

PROPOSED DISTRICT PLAN (STAGE I)

SUMMARY OF SUBMISSIONS **BY SUBMITTER**

Report: Summary of Submissions by Submitter Number/Name

Submitter Number:	2	Submitter:	Brett Wilkinson
Point Number	2.1		
Summary of Decision Requested:	<p>Amend the minimum lot size for the Residential Zone from 450m2 to 400m2 and initially apply this minimum to sites that have a road frontage</p> <p>AND</p> <p>Amend the building platform/building area for the Residential Zone to 50% of the lot area (ie: 200m2).</p>		
Decision Reasons:	<ul style="list-style-type: none"> • There is a requirement for more infill housing to make a better use of utilities already in place and save costs for the same. • To reduce the continuing subdivision of farmland and or productive land. • Front sites can be smaller as the berm and road are open space and provide necessary amenity. 		
Submitter Number:	3	Submitter:	Gulab Bilimoria
Organisation:	Bilimoria Consulting Ltd		
Point Number	3.1		
Summary of Decision Requested:	No specific decision sought, but submission states support for Chapter 16 Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		
Submitter Number:	4	Submitter:	Peter Humphreys
Point Number	4.1		
Summary of Decision Requested:	Amend Rule 17.3.6 Dwelling, which requires that a dwelling in the Business Zone not be located at ground level.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter considers that this rule could affect their wish to build a granny flat type of accommodation on their property at 14 Herschel Street, Ngaruawahia to accommodate their disabled daughter or other family member. 		
Submitter Number:	5	Submitter:	Jan Maree Vodanovich
Point Number	5.1		
Summary of Decision Requested:	Retain the proposed Residential zoning for the property at 22 Whangarata Road, Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		
Submitter Number:	6	Submitter:	Rodney Ranstead
Point Number	6.1		
Summary of Decision Requested:	Delete the Significant Natural Area on the property at 149 Cogswell Road, Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • When the submitter moved into the property 19 years ago, the entire property was barren other than approximately 10 old fruit trees (see photographs in submission). • Over the 19 years, screening, shelterbelt and landscaping plants have been planted, both native and exotics as well as firewood trees. These trees are not significant or natural and have been planted for a specific reason (see photographs in submission). • The submitter would like to retain the right to remove these plants and trees for firewood or landscaping purposes. 		
Submitter Number:	7	Submitter:	Jason Howarth
Organisation:	Howarth Consulting		
Point Number	7.1		
Summary of Decision Requested:	Delete Rule 23.4.2 (a)(ii) and (iii) General Subdivision, in relation to a 1.1ha lot size.		
Decision Reasons:	<ul style="list-style-type: none"> • There is no rationale for 1.1ha. 		

- The shape of the Airport Noise Subdivision Control Boundary does not reflect the operational nature of larger aircraft using Hamilton Airport.
- The Air Noise Subdivision Control Boundary has no ground reference, the shape combined with different subdivision limits creates unusual and perverse outcomes.
- Plan Change 19 cited that Hamilton International Airport proposed schedules wide body jet operations on more than three occasions per week. This no longer occurs.
- There are no provisions relating to noise within the zone that address reverse sensitivity issues.
- There is a lack of operational knowledge of the airport when the boundaries were set. Current regional Air New Zealand aircraft conduct their visual approach west of the boundaries that have been set and the aircraft are conducting approaches in areas not inside the Air Noise Subdivision Control Boundary and over areas that have subdivided down to 5000m².
- Current noise control boundaries do not allow for the visual approach of aircraft arriving from the south.
- The boundaries do not account for instrument approaches made on other navigational aids
- Light aircraft operations are operating under visual flight conditions and account for 75% of all Hamilton airports aircraft movements between the airport and the river (See attachment to submission for full details).
- Traffic management systems implemented by Airways Corporations have limited circuit training traffic to no more than 4 at any one time. Similar limitations on other training has also been limited to 4 by Airways Corporation.
- The noise restriction boundaries lack operational understanding. Air New Zealand operated on average 12 flights a day with last arrivals scheduled before 9pm. Aircraft noise is minimal as the aircraft are turbo prop and not jet or turbo fan.
- Other practical measures include landing and take off on the opposing runway.

Submitter Number: 8 **Submitter:** Geoscience Society of New Zealand

Point Number 8.1

Summary of Decision Requested: Add a new schedule listing scheduled Outstanding Natural Features (ONF) in the district.

Decision Reasons:

- Outstanding Natural Features are geological sites and landforms. Marine and terrestrial ecosystems, cultural and historic sites are all protected through other clauses in the RMA.
- Outstanding natural features were included in the RMA after our Society's submission where a clause was needed to protect the outstanding aspects of NZ's unique geoheritage.
- Outstanding natural features are outstanding geological sites and landforms recognised by other territorial and local authorities in northern NZ: e.g. Far North District Council 113 ONFs, Whangarei District Scheme schedules 56 ONFs, Auckland Unitary Plan schedules 254 ONFs, Waitomo District 75 potential ONFs to be scheduled. All of the above are geoheritage features.
- Identifying and scheduling outstanding natural features are the most critical actions for a District Plan.

Point Number 8.2

Summary of Decision Requested: Add a new Schedule to Section D Appendices and Schedules, entitled "Important Geological Sites and Landforms", and include the following sites (from the Waikato District Plan - Franklin Section, Part 5, Schedule 5B) in the schedule.

[Daff Road Jurassic Plant Beds](#)
[Kaawa Creek-Ngatutura Bay Section](#)
[Kellyville Tuff Ring](#)
[Moeweka Quarry, Jurassic Fauna](#)
[Onewhero Tuff Ring](#)
[Opuatia Cliff Jurassic Fauna](#)
[Port Waikato to Tuakau Bridge Road Jurassic Section](#)
[Pukekawa III Scoria Cone](#)
[Huriwai Beach Jurassic Plant Beds](#)
[Waikato River Delta](#)

Decision Reasons:

- These features are currently Outstanding Natural Features in the Franklin Section of the operative Waikato District Plan.
- These features have been protected as Outstanding Natural Features since the 1990s.
- The Society has attended resource consent hearings and commented on applications which have helped defend them from inappropriate subdivision, use and development as defined in RMA clause 4b.
- Not scheduling or showing these Outstanding Natural Features on planning maps must be an oversight, as it appears to be tantamount to removing the protection they so desperately need and have had for quarter of a century.

Point Number 8.3

Summary of Decision Requested: Add the following additional Outstanding Natural Features (i.e. geological sites and landforms) as recorded in the NZ Geopreservation Inventory to a new schedule of Outstanding Natural Features as follows:

[1. Port Waikato sandspit](#)
[2. Ngāpuriri natural arch and surrounding karst](#)
[3. Huriwai-Waikawau coastal section](#)
[4. Waiwiri Beach unconformity and basal Waitemata group](#)
[5. Pukeatāhinga scoria cone](#)
[6. Onewhero scoria cone](#)
[7. Kauri Rd scoria cone](#)
[8. Onepoto volcanic cone](#)
[9. Te Kohanga tuff ring](#)
[10. Rasmussen Rd tuff ring](#)
[11. Waiuku volcanic cone](#)
[12. Pokeno scoria cone](#)
[13. Serpell Rd tuff ring](#)
[14. Puketoka conglomerate](#)
[15. Waikorea hot springs](#)
[16. Gibsons Beach unconformity and fossil karst](#)

- 17. Taupiri Gorge
- 18. Dunphall Bluffs Oligocene sandstone
- 19. Waingaro hot springs
- 20. Carters Beach shore platforms
- 21. Raglan coastal karst
- 22. Te Toto Gorge lava and pyroclastic sequence
- 23. Mt Karioi
- 24. Papnui Pt volcanics
- 25. Bridal veil Falls columnar jointed basalt
- 26. Lake Disappear blind valley
- 27. Lake Disappear karst
- 29. Taranki Pt karst
- 30. Aotea dune field
- 31. Helectite Hole karst

Decision Reasons:

- The significance and location of these outstanding features are outlined in the publicly accessible NZ Geopreservation Inventory.
- Outstanding natural features need to be identified, mapped and scheduled so that they can be protected from inappropriate subdivision, use and development, as required by RMA clause 4B and in Policy 15 of the NZ Coastal Policy Statement which states: avoid adverse effects of activities on outstanding natural features and outstanding natural landscapes in the coastal environment.
- Outstanding Natural Features are geological sites and landforms. Marine and terrestrial ecosystems, cultural and historic heritage sites are protected through other clauses in the RMA.
- Identifying and scheduling outstanding natural features and providing criteria for potentially identifying others are the most critical actions for the District Plan.

Point Number 8.4

Summary of Decision Requested: **Add** more policies and rules to protect Outstanding Natural Features and provide criteria for the potential identification of others.

Decision Reasons:

- Outstanding Natural Features need to be protected from inappropriate subdivision, use and development, as required by RMA clause 4B and Policy 15 of the NZ Coastal Policy Statement which states: "avoid adverse effects of activities on outstanding natural features and outstanding natural landscapes in the coastal environment".
- Outstanding Natural Features are geological sites and landforms. Marine and terrestrial ecosystems, cultural and historic heritage sites are protected through other clauses in the RMA.
- The protection of Outstanding Natural Features is the most critical action for the District Plan.
- Council needs to consider other District Plans in the region that contain objectives, policies and criteria relating to Outstanding Natural Features.

Point Number 8.5

Summary of Decision Requested: **Add** into Section 3.3 Outstanding Natural Features, criteria for identifying Outstanding Natural Features, similar to that in the Auckland Unitary Plan, Northland Regional Plan and other local districts:

Assessment criteria for identifying ONFs

- (a) the extent to which the landform, feature or geological site contributes to the understanding of the geology or evolution of the biota in the region, New Zealand or the earth;
- (b) the rarity or unusual nature of the site or feature;
- (c) the extent to which the feature is an outstanding representative example of the diversity of district's natural landforms and geological features;
- (d) the extent to which the landform, geological feature or site is part of a recognizable group of features (e.g. caves and karst group; South Auckland volcanoes group);
- (e) the extent to which the landform or geological feature contributes to the aesthetic value or visual legibility of the wider landscape;
- (f) the extent of community association with, or public appreciation of, the values of the feature or site;
- (g) the potential value of the feature or site for public education;
- (h) the potential value of the feature or site to provide additional understanding of the geological or biotic history;
- (i) the state of preservation of the feature or site;
- (j) the extent to which a feature or site is associated with an historically important natural event, geologically related industry, or individual involved in earth science research;
- (k) the importance of the feature or site to Mana Whenua.

Decision Reasons:

- Providing criteria for potential outstanding natural features are the most critical action for District Plans.
- Council officers and public need to have clarity as to what the criteria are for identifying outstanding natural features and how consent applications can be assessed against the values of individual outstanding natural features.

Submitter Number: 9

Submitter: Elvin Priest

Point Number 9.1

Summary of Decision Requested: **Amend** the Significant Natural Area boundary for the property at 524B State Highway 1, Tamahere by determining the correct boundary on-site.

Decision Reasons:

- The indicated boundary may be incorrect. If the boundary is to follow the gully edge, the boundary is incorrect up to 40m (The correct boundary should be determined on site). This was raised at a community open day in Tamahere.

Point Number 9.2

Summary of Decision Requested:	No specific decision is sought, but the submission provides further information about Maaori Site of Significance S14/84, on the property at 524B State Highway 1, Tamahere.
Decision Reasons:	<ul style="list-style-type: none"> This site was on an early proposed route for the Waikato expressway and was walked by Transit staff and a Maaori Elder associated with the Narrows Marae. The adjacent gully was a trail used for access. It was confirmed that the site was never a habited site and there were not burials in the area. Transit may have further information recorded from their survey. The proposed expressway route was later abandoned with no viable route around Hillcrest or Berkley. There is little physical sign of the defence ditches, just faint depressions for two possible ditches.

Submitter Number:	10	Submitter:	Chris Yu
Point Number	10.1		
Summary of Decision Requested:	Amend the planning map to reflect the extent and status of the Paa site on the property at 16 Shelby Lane, Tamahere OR Delete the Paa site from the property at 16 Shelby Lane, Tamahere if further investigation indicates no Paa site exists.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter's communication with New Zealand Archaeological Association suggests there is no evidence that a Paa is located on this property. Previous correspondence with Council on this matter (attached to submission). 		

Submitter Number:	11	Submitter:	Jihong Chen
Point Number	11.1		
Summary of Decision Requested:	Amend the Significant Natural Area on the property at 996 Te Papatapu Road, Raglan, as the south area of the property is not a Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> Natural habitat within property does not meet criteria for Significant Natural Areas as per criteria outlined in the Waikato Regional Council Technical Report 2017/36. Gently sloping knoll previously recommended as building platform via geotechnical report. Aerial photography has been used for classifying Significant Natural Areas from 2012 and this is not accurate. See submission for geotechnical report. There are no Significant Indigenous Vegetation and Significant habitats of Indigenous fauna. 		

Submitter Number:	12	Submitter:	Carl Ammon
Point Number	12.1		
Summary of Decision Requested:	Retain Chapter 1.4 Issues for Waikato District, except for the amendments sought below AND Amend Chapter 1.4 Issues for Waikato District to better address environmental issues associated with the agriculture, forestry and extractive industries; and to provide a clearer stance on addressing issues of water quality, soil conservation and the restoration of natural biodiversity.		
Decision Reasons:	<ul style="list-style-type: none"> The Waikato is a region with a strong agricultural base, but it is also growing economically and in population. The proposed plan lacks a strong vision of the need to address environmental matters and gives the impression that farming has priority over the environment. The two need to be progressed together. 		

Point Number	12.2		
Summary of Decision Requested:	Retain Section 1.6 Ngaa Iwi o Tainui ki te Waikato Takiwaa.		
Decision Reasons:	<ul style="list-style-type: none"> This section is clearer and provides more purpose and clarity with respect to it's priority than other sections of the plan. 		

Point Number	12.3		
Summary of Decision Requested:	Retain Section 1.12 Strategic directions and objectives for the district, in particular the focus on limiting urban spread and loss of productive and valuable land, except for the amendments sought below AND Amend Section 1.12 Strategic directions and objectives for the district to provide a stronger priority on environmental issues in respect to water and soil and the restoration of the natural environment. AND Amend Section 1.12 Strategic directions and objectives for the district to provide greater flexibility for alternative approaches in the urban development model, like housing.		
Decision Reasons:	<ul style="list-style-type: none"> This strategy means that little change will occur and the scale of degradation will outweigh the areas being preserved and protected. These are good strategies, but lack a brave and vital level of aspiration. Focusing on limiting urban spread and loss of productive and valuable land is a positive. Providing greater flexibility for alternative approaches in areas like housing is afforded to address the urban development model that has prevailed to date. 		

Point Number 12.4

Summary of Decision Requested: **Amend** Chapter 3 Natural Environment to strengthen the requirement for development to protect and improve biodiversity.

Decision Reasons:

- In this section there is a positive focus. However it is timid and vague in its commentary.
- There is a pressing need to address problems such as climate change and ecological degradation.
- Need to address the harm caused in the past in the main urban centres, agriculture and forestry.
- Development rules do not drive the aims of protecting biodiversity. For example developers should be obliged to set aside and restore natural areas in subdivision proposals. Presently little effort is made and areas are not protected even where established. The submission uses examples of the Te Ahiawa subdivision which restored significant native plants, improved water quality and soil protection, but are not formally protected.
- Excessive development as a rule is harmful and leaves a legacy for the future. Those planning subdivision should have to meet very high standards of environmental care and restoration. The costs associated with development will save money in the future and avoid problems with sewage, storm water, water supply, traffic congestion etc.
- The focus of Significant Natural Areas is positive but is a drop in the bucket and hides attention on the wider issues of degrading the natural environment. The classification needs extending to all the main valleys and waterways from mountain to the sea.

Point Number 12.5

Summary of Decision Requested: **Amend** Chapter 4 Urban Environment to be flexible to address the needs in varying communities, share costs for infrastructure, and protect the cultural identity of areas when under growth pressures and add more emphasis on cycling, walking, small buses and public areas rather than cars and retail.

Decision Reasons:

- The directions in this chapter are positive.
- The challenge is to be flexible enough to address the needs in varying communities.
- Smaller areas cannot afford all of the costs for infrastructure including sewage and water.
- Other areas need to have their cultural identity protected when under growth pressures and the short sighted drive to provide parking when people taking a bus ride or parking a little further out of town may be a better option.
- More emphasis is needed on cycling, walking, small buses and putting public areas ahead of cars and retail interests.
- In Raglan, areas were granted by Maori as common use places for people, children and families to enjoy and these are under pressure for car parks.

Point Number 12.6

Summary of Decision Requested: **Add** more policy like Chapter 5 Rural Environment.

Decision Reasons:

- More policy like this is needed.

Submitter Number: 13

Submitter: Jason Nadin

Point Number 13.1

Summary of Decision Requested: **Amend** the zoning of the property at 11 Limmer Road, Te Kowhai from Rural Zone to Country Living Zone.

Decision Reasons:

- Te Kowhai is more populated now with more houses than farm land in the area.
- The property is very close to the Hamilton City boundary.
- The proposed Rotokauri North 1450 lot subdivision is happening within 700m of our address.
- Greater broadband improvement for the area - will make it easier to gain ultrafast fibre broadband services in future due to building the proposed Rotokauri North subdivision.

Submitter Number: 14

Submitter: Steve Cochrane

Point Number 14.1

Summary of Decision Requested: **Amend** Section 22.4 Subdivision to provide for 2500m² lot sizes in Matangi.

Decision Reasons:

- The District Plan does not reflect the needs of some of the residents.
- Older residents not able to maintain grounds as large as they used to.
- For properties over 1 hectare, some parts are screened off and this seems a waste. The need to have livestock is not always convenient as the residents get older.
- The submitter lives in an area of elite soil types, but as these lifestyle sites are unproductive it would seem more effective to follow Waipa District and Matamata-Piako District Council's by allowing smaller lifestyle sites of 2500m²
- The Waikato Regional Council will permit a septic tank on this size site.
- Matangi has existing infrastructure with businesses, services and schooling. For the community to thrive or be sustained there needs to be growth.

Point Number 14.2

Summary of Decision Requested: **Amend** Rule 22.3.2 P1 Minor dwelling to accommodate caregivers, not just dependant relatives.

AND

Amend Rule 22.3.2 P1 Minor dwelling to provide more flexibility in the location of minor dwellings on the site.

Decision Reasons:

- More leniency with respect to the location for the minor dwelling unit as it may not be possible to locate a minor dwelling as per the Council rules.
- Applications for resource consent requesting dispensation can be made, but at additional cost. It should be the right of the land owner and not at the discretion of council
- Alterations will allow for someone who has become debilitated to stay in their present home rather than move.

Submitter Number:

15

Submitter:

Te Wananga o Aotearoa

Point Number

15.1

Summary of Decision Requested:

Retain the zoning comprised in CT142356 for the property at 113 Rotowaro Road, Hundy (Lot 1 DP 320197 and Lot 2 DP 334744) as Business and Residential as notified.

Decision Reasons:

- The proposed zoning is consistent with previous feedback and aligns with existing (and future) development at the subject property.
- The proposed zoning will simplify the existing zoning of the subject property being only two zones instead of three.
- The proposed zoning is appropriate for the existing land use activities and development at the subject property.
- The proposed Business Zone is appropriate for the existing education facilities and associated administration and office activities.
- The proposed Residential zoning (over part of the site) is compatible with the existing and established residential developments nearby, including the properties immediately to the east and north-east of the subject property.
- The property is well positioned for future residential development. It has frontage onto two public roads and can potentially connect to the existing Council services and infrastructure.
- The proposed Business zoning is compatible with the existing land use activities on the site and existing land use activities in the immediate surrounding area.
- The proposed zoning will provide an appropriate buffer area between the Industrial zoned land to the south and the proposed (and existing) Living zoned land to the north.
- The amendments proposed to the location of the zone boundary on Lot 1 DP 320197 provide a more logical zone boundary. The boundary follows existing development on the subject property.

Submitter Number:

16

Submitter:

Brett Beamsley

Point Number

16.1

Summary of Decision Requested:

Amend the zoning for 64 Upper Wainui Road, Raglan and the remaining smaller sections along Upper Wainui Road from Rural Zone to Living Zone.

Decision Reasons:

- Properties along the northern side of Upper Wainui Road change for no apparent reason from Living to Coastal, while property sizes do not change.
- Inequality in zoning.

Submitter Number:

17

Submitter:

Leigh Thompson

Point Number

17.1

Summary of Decision Requested:

Delete the Hamilton Basin Ecological Management Area from the property at 454 Pencarrow Road, Tamahere.

Decision Reasons:

- No information has been provided on what this change relates to.
- No mention of what it means to property owners in an area that covers a large part of the Waikato Region.
- Concerned this will mean an increase in rates.

Submitter Number:

18

Submitter:

Kevin Hutchinson

Organisation:

Waikato RiverCare Incorporated

Point Number

18.1

Summary of Decision Requested:

Amend Chapter 8.1 Reserve Provision, to recognise that the development and day-to-day use and maintenance of reserves are managed through Council's reserve management plans which provide for the continuation of reserve activities.

Decision Reasons:

- Maintenance is the key management action required to protect and maintain indigenous plant values on Council administered reserves and prevent the spread of weeds, pests into adjoining areas.

Point Number

18.2

Summary of Decision Requested:

Retain Policy 8.1.3(b)(iv) Esplanade reserves and walkways.

Decision Reasons:

- RiverCare would welcome new partnership opportunities within Council to develop and co-fund planting projects on esplanade reserves.
- Projects that RiverCare may be in a position to assist Council with include the Hamilton City Council funded fencing works upstream of Ngaruawahia on the true right bank of the Waikato River and Whatawhata to Ngaruawahia Waipa River esplanade reserves.

Point Number

18.3

Summary of Decision Requested:	Amend Policy 8.2.2(a)(ii) as follows: <i>(ii) protecting and enhancing significant natural areas <u>as identified in regional and district strategies.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Need to ensure Councils efforts link with co-funders and partner organisations eg Waipa/Waikato Healthy Rivers strategy.

Submitter Number:	19	Submitter:	John Wright
Organisation:	Jet Ski Racing New Zealand Inc		
Point Number	19.1		
Summary of Decision Requested:	Amend provisions relating to reserves and lakes to ensure they work together for club events and the use of existing facilities for selected non-commercial events.		
Decision Reasons:	<ul style="list-style-type: none"> Under two different district plans one area can be used and one cannot. This is an existing use but has come up when overlapping plans. 		
Point Number	19.2		
Summary of Decision Requested:	Amend Section C Rules to allow approved and correctly controlled clubs to use Lakes Waahi and Kainui for selected jet ski racing events during the calendar year, excluding shooting months.		
Decision Reasons:	<ul style="list-style-type: none"> There are numerous resources at these reserves and lakes that are available to power boats but excludes jet skis. Running 1 or 2 day events at these venues would allow greater use of the existing facilities and should be considered on application rather than open all year to limit the effects to existing users. Existing conditions limit small events to less than 500 people. This would not need to be altered. Increased turnover for tourism and hospitality providers in the general Hamilton area. 2 day events would attract riders, family and supporters from all over the country. Single day events would give local people something to do in their back yard, rather than travelling to Auckland, Tauranga, Rotorua and further south. Other Council's are supporting local not for profit clubs to use facilities and reserves. 		

Submitter Number:	20	Submitter:	Glenn Morse
Point Number	20.1		
Summary of Decision Requested:	Amend the table in Rule 22.4.1.6 (a)(i) Conservation lot subdivision to reduce the minimum 2ha area of Significant Natural Area to be legally protected to 1ha to enable more development.		
Decision Reasons:	<ul style="list-style-type: none"> This would allow the submitter and other persons in a similar situation to construct a dwelling upon existing available land to meet the targets of the district plan with minimum impact upon available greenfield land. 		
Point Number	20.2		
Summary of Decision Requested:	Amend the Significant Natural Area overlay affecting parts of the property located at 63 Parker Lane, Pukekohe to become a Queen Elizabeth II Trust area. OR Delete the Significant Natural Area from 63 Parker Lane, Pukekohe.		
Decision Reasons:	<ul style="list-style-type: none"> The area identified has minimal significant natural vegetation. The area is mostly pine trees and 50% of the ground covering is covered in wandering dew. Adding the Significant Natural Area to about 40% of our land will not support the submitter's aims of building another house on the property. 		

Submitter Number:	21	Submitter:	Anthony Hutt
Point Number	21.1		
Summary of Decision Requested:	Delete the Significant Natural Area overlay from the property at 154 Orini Road, Taupiri.		
Decision Reasons:	<ul style="list-style-type: none"> The Significant Natural Area has only been identified aerially. The areas in question are naturally flood prone. The area is predominantly mangroves, willows and pines, many of which are old and have fallen. Water is not flowing, but stagnant in times of severe rain or in dryer times, no water is present. Two representatives from Waikato Regional Council have visited the site and agree that these areas do not qualify for Significant Natural Areas's due to the nature of the foliage and the lie of the land. The Significant Natural Area overlay would limit further building or subdivisions in the future. The foliage is old and diminished since the aerial photo was taken and will continue to diminish. The submitter would like to be able to develop and plant the area further without restriction. 		

Submitter Number:	22	Submitter:	Bill McDonald
Point Number	22.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is a motor sport facility nearby by requiring 'no complaint covenants' and extra sound-proofing for new dwellings.		
Decision Reasons:	<ul style="list-style-type: none"> Residential activities and motocross activities are not always compatible. The Pukekohe Motor Cycle Club and its track form a significant part of the local community and the broader sport of motocross in New Zealand. 		

Submitter Number:	23	Submitter:	Alarn Young
Organisation:	Kawasaki NZ		
Point Number	23.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is a motor sport facility nearby requiring 'no complaint covenants' and extra sound-proofing for new dwellings.		
Decision Reasons:	<ul style="list-style-type: none"> Residential activities and motocross activities are not always compatible. The Pukekohe Motor Cycle Club and its track form a significant part of the local community and the broader sport of motocross in New Zealand. 		

Submitter Number:	24	Submitter:	Lewis Heels
Point Number	24.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is a motor sport facility nearby requiring 'no complaint covenants' and extra sound-proofing for new dwellings.		
Decision Reasons:	<ul style="list-style-type: none"> Residential activities and motocross activities are not always compatible. The Pukekohe Motor Cycle Club and its track form a significant part of the local community and the broader sport of motocross in New Zealand. 		

Submitter Number:	25	Submitter:	Maurice Hayman
Point Number	25.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is a motorsport facility nearby, have a 'no complaints covenant' and require new dwellings to have extra sound-proofing.		
Decision Reasons:	<ul style="list-style-type: none"> Residential activities and motocross activities are not always compatible. The Pukekohe Motor Cycle Club and its track form a significant part of the local community and the broader sport of motocross in New Zealand. 		

Submitter Number:	26	Submitter:	Brian Leatham
Point Number	26.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is a motorsport facility nearby, have a 'no complaints covenant' and require new dwellings to have extra sound-proofing.		
Decision Reasons:	<ul style="list-style-type: none"> Residential activities and motocross activities are not always compatible. The Pukekohe Motor Cycle Club and its track are a significant part of the local community and the broader sport of motocross in New Zealand. This motorsport facility has also been established for years and has hosted international events. It is supported by a huge number of competitors nationwide. 		

Submitter Number:	27	Submitter:	Josh Charwood
--------------------------	----	-------------------	---------------

Point Number	27.1
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track at 115 Geraghty Maber Road to recognise there is a motor sport facility nearby, have a 'no complaints covenant' and require new dwellings to have extra sound-proofing.
Decision Reasons:	<ul style="list-style-type: none"> The property at 115 Harrisville Road abuts the eastern boundary of the well established motor sport facility. The track operation should therefore take precedence and not be subjected to any noise complaints if the property at 115 Harrisville Road is rezoned for residential purposes. The Harrisville Motocross Track has been in existence for many years and is a top internationally recognised facility.

Submitter Number:	28	Submitter:	Roko Urlich
Point Number	28.1		
Summary of Decision Requested:	Retain 22.4.1.2 General subdivision to enable the creation of a new 1.6ha lot from the 23ha at 2603 Highway 22, Glen Murray, except for the amendments sought below.		
	AND		
	Amend Rule 22.4.1.2 General subdivision to allow the new 1.6ha site to be net of the accessway.		
Decision Reasons:	<ul style="list-style-type: none"> The existing old farm house is not suitable for retirement purposes. Due to steep topography, any new dwelling would need to use the existing access and be located at the rear of the farm. 		

Submitter Number:	29	Submitter:	Wayne Reilly
Point Number	29.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is motor sport facility nearby, have a 'no complaints covenant,' regarding noise and dust, and require new dwellings to have extra sound-proofing.		
Decision Reasons:	<ul style="list-style-type: none"> Residential activities and motocross activities are not always compatible. The Pukekohe Motor Cycle Club and its track form a significant part of the local community and the broader sport of motocross in New Zealand. 		

Submitter Number:	30	Submitter:	Henk Ensing
Point Number	30.1		
Summary of Decision Requested:	Amend the boundaries of the Significant Natural Area on the property at 383 Karariki Road, Hamilton as outlined on the maps provided with the submission.		
Decision Reasons:	<ul style="list-style-type: none"> The notified maps do not accurately represent the Significant Natural Area, and there are more practical boundaries for Significant Natural Areas on this property. 		
Point Number	30.2		
Summary of Decision Requested:	Amend the permitted activity provisions to enable exotic vegetation to be cleared at 383 Kakarariki Road, Hamilton		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	30.3		
Summary of Decision Requested:	No specific decision sought, but the submitter requests assistance with fencing and plants.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		

Submitter Number:	31	Submitter:	Ting-Jung Lu
Point Number	31.1		
Summary of Decision Requested:	No specific decision sought, but submission states support for the property at 340C Laxon Road, Hamilton.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		

Submitter Number:	32	Submitter:	Rupert Copping
Point Number	32.1		
Summary of Decision Requested:	Add provisions to require new titles within the proposed Residential Zone abutting the Harrisville Motocross Track to recognise there is a motor sport facility nearby requiring 'no complaint covenants' and extra sound-proofing for new dwellings.		
Decision Reasons:	<ul style="list-style-type: none"> The Harrisville motocross track and the Pukekohe Motor Cycle Club are a significant part of the local community and are of high importance to the broader sport of motocross in New Zealand. It is proposed to rezone land abutting this facility to residential and the two land uses are not always compatible. This change needs to be thoroughly thought through to ensure that problems are not created in the future and as a minimum there should be a covenant on the title referring to the proximity of a motor sport facility, the acceptance of the facility and the inability to complain about noise or dust from activities. 		

Submitter Number:	33	Submitter:	Tim Shepherd
Organisation:	Cyclespot Euro		
Point Number	33.1		
Summary of Decision Requested:	Amend the proposed Residential zoning adjoining the Harrisville Motorcross track by retaining the current operative zoning.		
Decision Reasons:	<ul style="list-style-type: none"> The Harrisville motocross track and the Pukekohe Motor Cycle Club are a significant part of the local community and are of high importance to the broader sport of motocross in New Zealand. It is proposed to rezone land abutting this facility to residential and the two land uses are not always compatible. This change needs to be thoroughly thought through to ensure that problems are not created in the future and as a minimum there should be a covenant on the title referring to the proximity of a motor sport facility, the acceptance of the facility and the inability to complain about noise or dust from activities. 		
Point Number	33.2		
Summary of Decision Requested:	Add a requirement that any new titles that are created in the Residential Zone around or nearby the Harrisville motocross track recognise the motor sport facility and are subject to no-complaints covenants in regards to noise and dust and are required to have extra sound proofing in any new dwelling.		
Decision Reasons:	<ul style="list-style-type: none"> The Harrisville motocross track and the Pukekohe Motor Cycle Club are a significant part of the local community and are of high importance o the broader sport of motocross in New Zealand. It is proposed to rezone land abutting this facility to residential and the two land uses are not always compatible. This change needs to be thoroughly though through to ensure that problems are not created in the future and as a minimum there should be a covenant on the title referring to the proximity of a motorsport facility, the acceptance of the facility and the inability to complain about noise or dust from activities. 		

Submitter Number:	34	Submitter:	Brett Titchmarsh
Point Number	34.1		
Summary of Decision Requested:	Amend the planning maps to include a walkway/cycle way for Tuakau as shown on the map attached to the submission.		
Decision Reasons:	<ul style="list-style-type: none"> The attached map details a proposed cycle way/walkway which has been suggested at consultation days / workshops. Placing this route on the maps will enable the community and WDC to start working towards completion of this route. Map attached to submission. 		
Point Number	34.2		
Summary of Decision Requested:	Amend Rule 16.3.9.3 Pl (a)(iv) Building setback – Waterbodies to 10m from mean high water springs.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		

Submitter Number:	35	Submitter:	Malcolm Titchmarsh
Point Number	35.1		
Summary of Decision Requested:	No decision sought, but submission refers to Section 1.1 What is a District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	35.2		
Summary of Decision Requested:	No decision sought, but submission refers to Section 1.2 What is the purpose of the Waikato District Plan.		

Decision Reasons:

- No reasons provided.

Point Number 35.3

Summary of Decision Requested: No decision sought, but submission refers to Section 1.3 Background.

Decision Reasons:

- No reasons provided.

Point Number 35.4

Summary of Decision Requested: No decision sought, but submission refers to 2346 Buckland Road, Tuakau.

Decision Reasons:

- No reasons provided.

Submitter Number: 36

Submitter: Corey Belfield

Point Number 36.1

Summary of Decision Requested: Amend the notified zoning of the property at 369 Scotsman Valley Road, Tauwhare from Rural to Country Living Zone as in the operative District Plan.

Decision Reasons:

- The submitter does not consider that their property is suitable to be zoned as rural. Their property is a small lifestyle block and the rural rules and regulations are not appropriate.
- The submitter considers that the area should be retained the operative zone of Country Living.
- The neighbouring properties are in the same boat.

Submitter Number: 37

Submitter: Graeme Ward

Point Number 37.1

Summary of Decision Requested: Amend the location of Heritage Item 174 Briarly House shown on the maps at 10 Titoki Drive to Titoki Drive.

Decision Reasons:

- Heritage item 174 is incorrectly located on the planning map. Item 174 is Briarly', former Tinne / Bourke farmhouse. Schedule 30.1 correctly identifies it as being at number 8, but the map incorrectly locates it at number 10.

Submitter Number: 39

Submitter: Douglas & Jane Rickit

Organisation: D & J Trust

Point Number 39.1

Summary of Decision Requested: Amend the zoning of the property at 131 Buckville Road, Pukekohe from Rural Zone to Country Living Zone.

Decision Reasons:

- Surrounding area to the north and west within the Auckland Council territory boundary is zoned Future Urban under the Auckland Unitary Plan. This potentially means residential development in the locality rather than open space rural environment. The property is in close proximity to Buckland village and Pukekohe and changing the zoning of the area from Rural to Country Living is a logical step.

Submitter Number: 40

Submitter: Mark De Lautour

Point Number 40.1

Summary of Decision Requested: Retain the Residential zone for the property at 46 Jackson Street, Ngaruawahia as notified.

Decision Reasons:

- This is only a small block of land that has no future for farming being close to the Waikato river and given the amount of rainfall during the winter months.
- This block of land offers elevation and balance to the surrounding flat land and could be a potentially attractive extension of the new residential housing in the Jackson Street area.
- New Zealand, moving forward, has a shortage of land for residential housing.
- Ngaruawahia will benefit from new housing and infrastructure.

Submitter Number:	41	Submitter:	Perry Hughes
Point Number	41.1		
Summary of Decision Requested:	Add a requirement that any new titles that are created in the Residential Zone alongside the Harrisville motocross track recognise the motor sport facility and are subject to no complaints covenants in regard to noise, and are required to have extra sound proofing in any new dwelling.		
Decision Reasons:	<ul style="list-style-type: none"> • Having residential zoning alongside an established motor sport activity area is not appropriate. • The Pukekohe Motorcycle club has the Harrisville motorcross track located right next to the proposed new Tuakau residential zoning. This facility is used by the surrounding community for motorcross events for many weekends during the summer. 		

Submitter Number:	43	Submitter:	Amelia Lategan
Point Number	43.1		
Summary of Decision Requested:	Reconsider the proposed zoning at 102A, 102D and 126 Travers Road, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> • Infilling could ruin the character of the village while estate development would overwhelm it. • Development could lead to the loss of a diverse range of farms. • Development could significantly change small wine production in Te Kauwhata which started in 1903. Currently there are only 3 plantations left in Te Kauwhata. • Wine production plays a big part in our town history and we stand to lose this. • This area is prone to flooding and more subdivision puts strain on the already overloaded waterways, as this is not considered during development. • Neighbours have not been consulted by developers to estimate the increase down stream flow of additional water on to their properties. • Subdivision will change the character of Travers Road adding more light pollution with (e.g. streetlights incorporated into developments). • Increase of vehicle movements and under developed walkways which will increase the risk and public safety to pedestrians utilising Travers Road as part of their walking and fitness routine. • The inconvenience of heavy vehicle traffic and the lack of control of heavy vehicle traffic during construction stages. 		

Submitter Number:	44	Submitter:	William Ormsby
Organisation:	Maniapoto Maori Trust Board		
Point Number	44.1		
Summary of Decision Requested:	<p>Amend clause (c) in Section 2.10 Iwi Management Plans, as follows:</p> <p><i>2.10 Iwi Management Plans The Waikato-Tainui Environmental Plan and the Maniapoto Iwi Management Plans are redress instruments of Treaty settlements: AND</i></p> <p><i>(1) A local authority served under section 15(a), preparing, reviewing, or changing a Resource Management Act 1991 planning document must recognise the environmental plan in the same manner as would be required under the Resource Management Act 1991 for any planning document recognised by an iwi authority.</i></p> <p><i>(2) A consent authority considering an application for a resource consent under section 104 of the Resource Management Act 1991 must have regard to the environmental plan, if it considers that section 104(1)(c) applies to the plan.</i></p> <p><i>(3) A person carrying out functions or exercising powers under sections 12 to 14 of the Fisheries Act 1996 must recognise and provide for the environmental plan to the extent to which its contents relate to the functions or powers.</i></p> <p><i>(4) A person carrying out functions or exercising powers under the conservation legislation in relation to the Waipa River and its catchment must have particular regard to the environmental plan to the extent to which its contents relate to the functions or powers.</i></p> <p><i>NOTE: It is Council's responsibility to show HOW it gives EFFECT to the Iwi Management Plans and how the Iwi Management Plan is APPLIED within the context of the Proposed District Plan and ALL of its chapters.</i></p>		
Decision Reasons:	<p>Nga wai o Maniapoto (Waipa River) Act 2012</p> <ul style="list-style-type: none"> • The overarching purpose of this Act is to restore and maintain the quality and integrity of the waters that flow into and form part of the Waipa River for present and future generations, and the care and protection of the mana tuku iho o Waiwaia. <p><u>Co-governance and Co-management</u></p> <ul style="list-style-type: none"> • Arrangements between the Crown and river iwi ushered in a new era of Crown-iwi co-management of the Waikato and Waipa River catchment. Co-management provides iwi with mechanisms to manage the river in partnership with central and local government. • The co-governance co-management arrangements allow for, joint management agreements, participation in specific and defined river-related resource consent decision-making, recognition of the Waikato-Tainui environmental plan and Ko Ta Maniapoto o Mahere Taiao & Ko Ta Maniapoto Mahere ika mo te Waipa and other river iwi plans and provision for regulations relating to fisheries and other matters managed under conservation legislation; and an integrated river management plan. <p><u>Joint Management Agreement with the Waikato District Council</u></p> <ul style="list-style-type: none"> • Te Awa o Waipa is a taonga to Maniapoto. Maniapoto have a deep-felt obligation and desire to restore, maintain and protect all of the waters that flow and/or fall within the Maniapoto rohe (Nga Wai o Maniapoto), whether the waters are above, on or underground. Te Mana o Te Wai (the quality and integrity of the waters) is paramount. The obligation includes the waters that flow into and form part of the Waipa River. The relationship between Maniapoto and the Waipa River is historic, intellectual, physical and spiritual. • Historically, Te Mana o Te Wai was such that it provided all manner of sustenance to Maniapoto including physical and spiritual nourishment that has, over generations, maintained the quality and integrity of Maniapoto marae, whanau, hapu and iwi. To Maniapoto the Waipa River has mana and in turn represents the mana of Maniapoto. <p>The Waipa River is a single indivisible entity that flows from Pekepeke to its confluence with the Waikato River and includes its waters, banks, bed (and all minerals under it) and its streams, waterways, tributaries, lakes, fisheries, vegetation, floodplains, wetlands, islands, springs, geothermal springs, water column, airspace and substratum as well as its metaphysical elements with its own mauri.</p>		

Submitter Number:	45	Submitter:	Kewwa Low
Organisation:	Geotec Low Ltd		
Point Number	45.1		
Summary of Decision Requested:	Amend zoning of the property at 2044 River Road, Horsham Downs from Rural to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • During the consultation phases leading up to the notification of the District Plan, planning staff had always maintained that there will be no significant changes to existing zones and that property owners will not be made any worse off as a result of the Proposed District Plan. This is contrary to ratepayer's expectations and will result in diminished public confidence in the public consultation process. • The change from Country Living to Rural Zone will have significant economic impact on the owners. 		

Submitter Number:	46	Submitter:	Marc ter Beek
Point Number	46.1		
Summary of Decision Requested:	Amend Rule 22.4.1.1 PR2 and PR3 Prohibited Subdivision to have Discretionary activity status rather than Prohibited activity status.		
Decision Reasons:	<ul style="list-style-type: none"> • Discretionary activity status is adequate to protect the high quality soil resource and productive capacity of the land, where the lot is already too small for economic farming. • Where land is already fragmented to uneconomically small size, Policy 5.2.3 is not advanced by Rule 22.4.1.1. 		
Point Number	46.2		
Summary of Decision Requested:	Delete Rule 22.4.3 Title Boundaries – Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance.		
Decision Reasons:	<ul style="list-style-type: none"> • Rule 22.4.3 unnecessarily limits the future development potential of the land. The rule prevents other future property owners to own part of a Significant Natural Area. 		
Point Number	46.3		
Summary of Decision Requested:	Delete the Significant Natural Area from 49 Swallow Lane, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> • The vegetation in this mapped area is of low quality and contains many invasive pest plants such as ivy, Jerusalem cherry, privet and other climbing and ground covering weed plants. • A substantial part of the identified Significant Natural Area does not have any undergrowth and is used for animal grazing. • The Significant Natural Area unnecessarily limits the future development of this land. • The narrow mapped area along the southern boundary of the site comprises exotic species only 		

Submitter Number:	48	Submitter:	Beverley Bell
Point Number	48.1		
Summary of Decision Requested:	Retain the Significant Natural Area mapped at 108c Ferguson Road, Whatawhata and neighbouring properties.		
Decision Reasons:	<ul style="list-style-type: none"> • The native vegetation is restored in part of the Significant Natural Area along a stream and wetland, and predator control is occurring. The increase in native bird numbers and plant coverage is noticeable. • The restored area is under threat from stock roaming into the area from an unfenced neighbouring property, through which the Significant Natural Area also goes. 		
Point Number	48.2		
Summary of Decision Requested:	Add a rule to require fencing of Significant Natural Areas to exclude stock.		
Decision Reasons:	<ul style="list-style-type: none"> • The existing legislation on fencing generally and Significant Natural Areas in particular does not go far enough to protect Significant Natural Areas from roaming stock and their environmental damage. Requests to the property owner from neighbours and Waikato District Council staff, and supplying educational materials have not changed the situation. • Waikato District Council should have the power to back up the requirement to exclude stock. 		

Submitter Number:	49	Submitter:	Lindsay Graham Schick
Organisation:	L Schick Trust Company		
Point Number	49.1		
Summary of Decision Requested:	Amend zoning of Lot 2 DP 459844 at 359 Bedford Toad, Te Kowhai from Rural Zone to Country Living Zone.		

Decision Reasons:

- This property is at present run as a dairy farm.
- It is too small and uneconomic.
- It is surrounded by lifestyle block.
- The area is also unsatisfied in the demand for quality lifestyle blocks of land.

Submitter Number:

50

Submitter:

Gary McMahon

Point Number

50.1

Summary of Decision Requested:

Amend Rule 23.4.2 RDI (a)(i) General subdivision to reduce the net site area from 5000m² to 3000m².

Decision Reasons:

- 3000m² is appropriate for Tamahere because in future it will become a dormitory suburb of Hamilton and greater density of development will help to meet the demand.
- Waste water disposal is still possible with 3000m² lots.
- This lot size will also be adequate to preserve the green open nature of Tamahere.

Point Number

50.2

Summary of Decision Requested:

Delete the Airport Subdivision Control Boundary from Map 27.2.

Decision Reasons:

- The Airport Subdivision Control Boundary unnecessarily restricts subdivision and development potential of land within the area.
- The Airport Subdivision Control Boundary is unnecessary to protect in airport as reverse sensitivity issues are sufficiently addressed by building insulation requirements in the plan.

Submitter Number:

51

Submitter:

Anthony Van Lieshout

Point Number

51.1

Summary of Decision Requested:

Amend zoning of the property at 165 Golding Road, Pukekohe from Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban under the Auckland Unitary Plan.
- This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment.
- The subject property does not contain prime soils.
- Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living is a logical progression in zoning for this area.

Submitter Number:

52

Submitter:

Roelof Lategan

Point Number

52.1

Summary of Decision Requested:

No specific decision sought, but submitter opposes Chapter 16 Residential Zone.

Decision Reasons:

- No reason provided.

Point Number

52.2

Summary of Decision Requested:

Amend Section C: Rules to better deal with water runoff due to increased residential developments.

Decision Reasons:

- An increase in residential development has increased water runoff.
- Enforce stricter rules for developers to deal with additional stormwater runoff.
- Waterways, stormwater runoff and culverts must be taken into consideration.
- Property at 123 Travers Road, Te Kauwhata is zoned Country Living Zone and is experiencing increased water runoff due to increased residential development in surrounding area.

Submitter Number:

53

Submitter:

Ollie Kesing

Point Number

53.1

Summary of Decision Requested:

Amend Rule 22.2.7 Indigenous vegetation clearance inside a significant natural area to allow harvesting of forestry crops of manuka, blackwoods, pines and other crop trees.

Decision Reasons:

- The SNA covers areas of cropping Manuka, black woods, pines and other crops within the property.
- Will create issues on harvest.
- Others cropping Manuka may be affected.

Point Number 53.2

Summary of Decision Requested: **Amend** the boundaries of the significant natural area of the property #2003926 at Old Mountain Road, Waitetuna to align with the areas already protected through QEII covenants (see submission for mapped amendments).

Decision Reasons:

- The SNA covers areas of cropping Manuka, black woods, pines and other crops within the property.

Submitter Number: 54 **Submitter:** Thorntree Orchards Ltd

Point Number 54.1

Summary of Decision Requested: **Amend** the zoning of the properties near Pokeno bounded by State Highway 2 to the north, State Highway 1 to the west, Baird Road to the east and existing Village Zone to the south from Rural Zone to Village Zone.

Decision Reasons:

- Additional large lot Village development is required to meet the demand and projected population growth of Pokeno.
- The proposed Village Zone is a logical expansion of the existing Village Zone to the south of the submission area which is now largely developed.
- The Concept Plan enables future intensification of the area. The proposed layout ensures that additional roads can be constructed within the required yard setbacks, safeguarding a number of possible re-development options, all of which seek to limit the creation of undesirable rear lots.
- Residential development within the submission area will help to contain growth of Pokeno around the identified Town Centre.
- The proposed residential development supports the historical St Mary's Anglican Church and the Pokeno Domain.
- The residential development of the submission area would make a second underpass beneath SH1 viable. The Concept plan has identified suitable location based on engineering requirements and topography.
- To extend services, and enable greater pedestrian and cycling connectivity between east and west Pokeno.
- The proposed layout would remove existing access points from SH2 for residential properties which NZTA have identified as a primary safety concern. This will also alleviate safety concerns on the State Highway Network.
- The residential development will protect and restore important ecological features. This will provide significant amenity, environmental and ecological benefits.

Submitter Number: 55 **Submitter:** Shelley Munro

Point Number 55.1

Summary of Decision Requested: **Amend** the Proposed District Plan to consider the expansion of the connection from SH2 to Te Kauwhata via Kopuku or Okaria Roads by commuters.

Decision Reasons:

- Urban growth areas extend in the north all the way along the arterial SH2 roading due to easy and convenient accessibility of major cities and towns from Thames to Pukekohe to Te Kauwhata.

Point Number 55.2

Summary of Decision Requested: **Amend** the Proposed District Plan to only allow Rural enterprise in the Rural Zone that protects the natural environment.

Decision Reasons:

- Protect the quality of our degrading environment.
- It is this Clean Green tourism tag that keeps visitors coming.

Point Number 55.3

Summary of Decision Requested: **Amend** the Proposed District Plan to include sealing of roads close to waterways and specifically bordering the reserves such as river catchment areas.

Decision Reasons:

- Keeps waterways free of dust (silt), gravel from slips and washouts.
- Dust is an acknowledged health hazard.
- Residential properties will infill into these zones.
- Seal once.
- Save costs of continually reworking, grading, maintaining unsealed roads where water wash is frequent and traffic is increasing.

Point Number 55.4

Summary of Decision Requested: **Amend** the Proposed District Plan to not allow commercial or rural pollutants such as fertiliser plants near Significant Natural Areas.

Decision Reasons:

- Protect the quality of our degrading environment.
- It is this Clean Green tourism tag that keeps visitors coming.

Point Number 55.5

Summary of Decision Requested: **Amend** the Proposed District Plan to offer subsidies for self-sustaining enterprises or households.

Decision Reasons:

- Encourage independence from the grid.

Point Number 55.6

Summary of Decision Requested: Amend the Proposed District Plan to introduce signage to unsealed 100km/limit roads (yellow signs like on windy roads).

Decision Reasons:

- Safer speeds on rural gravel roads.
- Safer for stock, farm workers, dust pollution, farm fence damage and drivers.

Point Number 55.7

Summary of Decision Requested: Amend heritage areas or designations to include the natural wetlands where Maori tribes once fished for eels and harvested flax etc.

Decision Reasons:

- Recognition of the importance of wetlands in early NZ history.

Point Number 55.8

Summary of Decision Requested: Amend provisions relating to public reserves or nature areas to support the populations as a whole, not just a limited group.

Decision Reasons:

- Shooting should expect to cross paths with dog walkers, or kayakers or hikers.
- Shooting is no longer safe on public land.
- Increasing appreciation for natural environment.
- Attracting tourists not wanting to get shot.
- Increasing mobility with distances not being the restriction it was once for residents to explore further afield.

Point Number 55.9

Summary of Decision Requested: Amend the Proposed District Plan to extend urban growth areas in the north all the way along State highway 2.

Decision Reasons:

- Urban growth areas extend in the north all the way along the arterial SH2 roading due to easy and convenient accessibility of major cities and towns from Thames to Pukekohe to Te Kauwhata.
- Any where in close proximity to the main thoroughfares will likely be in demand.
- Infrastructure and services along SH2 planned and budgeted for such as town water, fibre, sewage, footpaths and playgrounds.

Point Number 55.10

Summary of Decision Requested: Amend the Proposed District Plan to plan for medical and public transport services along State highway 2.

Decision Reasons:

- No reasons provided.

Point Number 55.11

Summary of Decision Requested: Amend the Objective 5.1 The Rural Environment to maintain, enhance and improve the environment.

Decision Reasons:

- Most money gained from mining exploits does not get re-invested locally and employment opportunities are short-sighted.
- Long term physical and psychological effects on workers and local residents are not considered. Most rural employees, who are farmers, travel long distances and are sleep deprived. They are unable to hold jobs of their own and therefore fall back on benefits or take sick leave.
- Income from consents and applications should be future-proofed to provide benefit to all locals, rather than being limited to rehabilitation at the conclusion of works. Roads in the vicinity of the submitter's property are rarely upgraded to accommodate the extra traffic burden.
- Planting required in the resource consent is only along one boundary and only follows one road. This means that sound in every direction is not absorbed and there is an ugly visual impact from all directions of travel.
- Noise has impacted on mating seasons and the browsing patterns of animals.

Point Number 55.12

Summary of Decision Requested: No specific decision sought, however submission opposes mineral and extractive industries, particularly issuing of 24/7 operating licences.

Decision Reasons:

- Public and community welfare and long term benefits should outweigh profiteering by private corporates.
- Money from mining exploits does not get reinvested locally.
- Employment opportunities are short sighted when compared to long term effects of workers and residents of the locality (medically and professionally).
- In rural areas most employees travel long distances as most locals are farmers.
- Residents are sleep deprived.
- Income from consent applications should be future-proofed and provide benefits to all locals not just limited to rehabilitation at the conclusion.
- Roads in our area are rarely upgraded to accommodate extra traffic and fall into disrepair.
- Planting specified in resource consents on one boundary does not absorb sound in every direction or visual impact from all directions.
- Noise impacts on mating seasons and browsing patterns of animals.

Submitter Number: 56 **Submitter:** Riaan Jonker

Point Number 56.1

Summary of Decision Requested: Amend the 'Walkway Cycleway Bridleway' between the Te Kauwhata Golf Course and properties on Awanui Avenue to be located instead on 25A Awanui Avenue.

Decision Reasons:

- The 'Walkway Cycleway Bridleway' proposed will create a Iron cage fence between Awanui Avenue properties and golf course to protect the users of the 'Walkway Cycleway Bridleway' due to the layout of the golf course.
- This will negatively effect Awanui Avenue properties which were designed to take advantage of the views of the golf course.
- Awanui Avenue Properties will have complete unsolicited access from both Awanui Avenue and the proposed 'Walkway Cycleway Bridleway'.
- The 'Walkway Cycleway Bridleway' could be redirected through property no 2015776 - 25A Awanui Avenue, (Currently a public accessible green space) which contains a public access gate to the golf course. This would ensure the continuation of enjoyment by the existing properties bordering the golf course while providing the ability to integrate a 'Walkway Cycleway Bridleway' into and around the golf course.

Submitter Number: 58 **Submitter:** Kiwi Green NZ Limited

Point Number 58.1

Summary of Decision Requested: Amend zoning of the property at 115 Whangarata Road, Tuakau to include 21.268ha of Residential Zone and 4.1271 ha of Industrial Zone.

Decision Reasons:

- Additional residential-zoned land is needed to meet the current demand and projected growth of Tuakau.
- The relief sought fulfils a lot of the National Policy Statement: Urban Development Capacity in that it is able to be connected to existing service infrastructure.
- No significant constraints exist regarding the provision of three waters connections to the submission site.
- The site adjoins existing and approved residential development and provides an opportunity to expand on this residential area.
- The relief sought attempts to address identified issues with the current zoning, including the proximity of the existing and approved (Coles Road) residential area adjacent to or adjoining the current Tuakau Industrial Zone. If this land was to be developed for such permitted purposes, there would be significant effects on the existing residential areas.
- The need to safeguard and protect the existing and proposed residential areas of Tuakau needs to be a central consideration within any changes to the Industrial/Business Zones. A potential solution, is the land to the west of Bollard Road (including the existing businesses) is rezoned to Industrial.
- This zone and associated controls would be modified to provide a balance of protecting the existing businesses, but also limiting further industrial growth within immediate proximity to the residential areas of Tuakau. This would help to address the business owner's concerns, whilst also ensuring that Council has taken steps to safeguard the residents of Tuakau from effects which could arise, if the land zoned Industrial now was to be developed further.
- To ensure the existing businesses are not impacted by the proposed increase of residential land, part of the site should be contained within this Industrial Zone.
- If the currently piped gully which runs through the site in a generally south-east to north-west direction is to be reinstated to a natural stream, this will help provide a buffer between the proposed Industrial Zone and will also provide significant amenity and environmental benefits.
- The acoustic report attached to the submission provides specific assessment (noise measurements of the existing businesses) and details of how residential development can occur, whilst identifying any likely effects on the existing businesses. Specific mitigation is proposed.

Point Number 58.2

Summary of Decision Requested: Amend the District Plan to include additional site-specific controls for 115 Whanagata that align with the mitigation measures described in the acoustic and air quality reports provided with the submission.

Decision Reasons:

- Site specific controls will enable residential development to occur on the submitter's property whilst mitigating the adverse effects of noise and air discharge from nearby industries.

Submitter Number: 59 **Submitter:** Juliet Sunde

Point Number 59.1

Summary of Decision Requested: Amend the zoning of the property at 102 Travers Road, Te Kauwhata from Residential Zone to Country Living Zone.

Decision Reasons:

- The Land at 102 Travers Rd is subject to flooding and unsuitable for close subdivision. There is no need for additional sections to be created in Te Kauwhata, as enough land is already zoned to meet projected demands.
- Additional residential development in this land will compromise current land uses for viticultural and lifestyle activities (including stock). Land across the road is Country living and this should be the same.

Point Number 59.2

Summary of Decision Requested: Amend the zoning of the properties at 114, 126 and 128 Travers Road, Te Kauwhata from Residential Zone to Country Living Zone.

Decision Reasons:

- 126 Travers Rd is a working Vineyard and has been for the past 30 years. The Residential Zoning will significantly alter the owner's ability to keep it as a viable vineyard.
- The land is subject to flooding and unsuitable for residential development.
- There is a glut of sections available in Te Kauwhata and there is no need for this land to be in the Residential Zone.
- The land shown on the attached map provides a logical boundary between the Country Living Zone and Residential and matches the other side of Travers Road (See map attached to submission for further detail).

Submitter Number: 60 **Submitter:** Merged to # 59 Juliet Sunde

Point Number	60.1
Summary of Decision Requested:	Amend the zoning of the properties at 114, 126 and 128 Travers Road, Te Kauwhata from Residential Zone to Country Living Zone.
Decision Reasons:	<ul style="list-style-type: none"> • 126 Travers Rd is a working Vineyard and has been for the past 30 years. The Residential Zoning will significantly alter the owner's ability to keep it as a viable vineyard. • The land is subject to flooding and unsuitable for residential development. • There is a glut of sections available in Te Kauwhata and there is no need for this land to be in the Residential Zone. • The land shown on the attached map provides a logical boundary between the Country Living Zone and Residential and matches the other side of Travers Rd. (See map attached to submission for further detail).

Submitter Number:	61	Submitter:	Anthony Viner
Point Number	61.1		
Summary of Decision Requested:	Delete Rule 22.4.1.2 RD1(a)(ii) General Subdivision requiring a minimum of 20ha to subdivide in the Rural Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The restriction of subdivision to lots larger than 20ha is inappropriate for small lots in areas already fragmented such as Summerfield Lane, Tamahere. • None of the criteria in Policy 5.3.8 for rural zones are compromised by providing for smaller lots in areas such as this. 		
Point Number	61.2		
Summary of Decision Requested:	Amend Rule 22.4.1.2 RD1(a)(iv) General Subdivision to reduce minimum lot sizes in the Rural Zone from 8,000m ² -1.6ha to 5,000m ² .		
Decision Reasons:	<ul style="list-style-type: none"> • 5000m² is sufficient to maintain the values stated in Policy 5.3.8, and is the Waikato District conventional minimum lot size. • In the specific case of the proposed subdivision it is already surrounded by many lots of about 5000m². 		

Submitter Number:	62	Submitter:	Tara Wrigley
Point Number	62.1		
Summary of Decision Requested:	Amend Rule 22.4.1.6(i) Conservation lot subdivision by inserting a new row to the table regarding the Whaanga Coast as follows: <i>Contiguous Area to be legally protected (hectares): <u>Between 1ha and 2ha in areas within the Whaanga Coast</u></i> <i>Maximum number of new Records of Title: <u>1</u></i>		
Decision Reasons:	<ul style="list-style-type: none"> • The rule as proposed does not provide significant incentive to create additional legally protected conservation areas. The costs of doing so (approximately between \$35,000 and \$45,000) per ha for native planting plus fencing costs, and Council /Compliance costs) outweigh the return. There are unique opportunities on the Whaanga Coast to increase the area of land protected for conservation. Land use along this Coast is also changing from generating income from livestock, to generating income from events and tourism. An increase in the land protected for conservation would benefit this changing land use. 		
Point Number	62.2		
Summary of Decision Requested:	Amend the table in Rule 22.4.1.6(i) Conservation lot subdivision to increase the maximum number of titles in each row as follows: <i>Less than 2ha in all other areas: <u>1</u></i> <i>2ha to less than 5ha: <u>2</u></i> <i>5ha to less than 10ha: <u>3</u></i> <i>10ha or more: <u>4</u></i>		
Decision Reasons:	<ul style="list-style-type: none"> • The rule as proposed does not provide significant incentive to create additional legally protected conservation areas. The costs of doing so (approximately between \$35,000 and \$45,000) per ha for native planting plus fencing costs, and Council /Compliance costs) outweigh the return. There are unique opportunities on the Whaanga Coast to increase the area of land protected for conservation. Land use along this Coast is also changing from generating income from livestock, to generating income from events and tourism. An increase in the land protected for conservation would benefit this changing land use. 		

Submitter Number:	63	Submitter:	Colin John Orr
Point Number	63.1		
Summary of Decision Requested:	Amend the zoning of the properties at 126 and 128 Travers Road to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The access to this land is only 4m wide and cannot support residential densities. • 128 Travers Road is suitable for Country Living Zone with suitable topography and adjoining a vineyard. 		

Submitter Number:	64	Submitter:	Gulab Bilimoria
Organisation:	Bilimoria Consulting Ltd		
Point Number	64.1		
Summary of Decision Requested:	Amend the zoning of the property at 19 Hakarimata Road, Ngaruawahia from Rural Zone to retain the existing Light Industrial Zoning.		
Decision Reasons:	<ul style="list-style-type: none"> Industrial proposal has been planned for the site. 		

Submitter Number:	65	Submitter:	Brent Greig
Point Number	65.1		
Summary of Decision Requested:	Retain the proposed Residential Zone of the property at 15 Barnaby Road, Tuakau (Lot 1 DP 320629 CT 81778).		
Decision Reasons:	<ul style="list-style-type: none"> The Residential Zoning of Lot 1 DP DP 320629 CT 81778 is a logical extension to the residential zone of Tuakau and is able to be served by existing public reticulated utility services. See the map attached to the submission which provides detail of the utilities. 		
Point Number	65.2		
Summary of Decision Requested:	Amend Rule 16.4.1 Subdivision- General to require a minimum net site area of 300m2.		
Decision Reasons:	<ul style="list-style-type: none"> A 300m2 minimum net site area previously existed under the Franklin District Plan and provided choice and a range of housing typologies for Tuakau. 450m2 does not provide for efficient use of the residential land resource. The Discretionary Activity status for non-compliance will not attract confidence for applications or investment in Tuakau. The central area should be supported by a planning framework and intensification that recognises the transport links and the fact that Tuakau is 2.5km from the future urban zone of Auckland. 		
Point Number	65.3		
Summary of Decision Requested:	Amend Rule 16.3.9.3 Building setback - Waterbodies to reduce the setback from the bank of any river from 23m to 10m.		
Decision Reasons:	<ul style="list-style-type: none"> The 23m setback for any building from the bank of any river is an inefficient use of residential land. A setback is appropriate and this should be 10m. The submitter notes this is the case in the Auckland Unitary Plan Residential Zones and can find no resource management justification or science as to why a more onerous 23m is deemed to be required in Waikato when the same issues of amenity, biodiversity and flood hazard avoidance exist. 		

Submitter Number:	66	Submitter:	Andrew Loader
Organisation:	First Rock Consultancy Ltd		
Point Number	66.1		
Summary of Decision Requested:	Amend the approach to identifying Significant Natural Areas to allow any land owner to challenge the designation of a Significant Natural Area until a physical audit of the area has been carried out by a specified panel and confirmed that the designation is appropriate.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers that adopting the approach as sought will allow Council to protect areas deemed to be of significance from inappropriate use or development, while still allowing landowners the opportunity to contest the designation. The majority of the problems landowners have with Significant Natural Areas is around the designation of the area as a Significant Natural Area rather than the definition. Allowing a Significant Natural Area to be contested until a physical audit of the designated area has been carried out and confirmed that the designation is appropriate will remove the time constraints of the current approach and remove the need for expensive legal action by either landowners or Council. Landowners will only challenge a Significant Natural Area designation where they consider the designation is inappropriate so there is unlikely to be a flood of applications to contest it. 		

Submitter Number:	67	Submitter:	Pirie & Lynne Brown
Point Number	67.1		
Summary of Decision Requested:	Amend the zoning of the property at 97 Buckville Road, Buckland, from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory has been zoned Future Urban Zone under the Auckland Unitary Plan. This could potentially mean residential housing and therefore a residential environment in this locality rather than open rural space. The property does not contain any prime soils. The property is in close proximity to the village of Buckland and town of Pukekohe which means that a change of zone from Rural to Country Living is a logical progression in zoning. 		

Submitter Number:	68	Submitter:	William Smeed
Point Number	68.1		
Summary of Decision Requested:	Amend Chapter 22 Rural Zone rules, in consultation with island owners, to include specific rules for islands in the Waikato River.		
Decision Reasons:	<ul style="list-style-type: none"> Chapter 22 Rural Zone does not address issues relating to islands. The islands are specific areas of land that need to be given consideration and not just lumped into other rural areas. 		
Point Number	68.2		
Summary of Decision Requested:	Delete the overlays placed over the island in the Waikato River, such as the Significant Amenity Landscape or the Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> The Significant Amenity Landscape and the Significant Natural Area overlays affect the use of the island so that it cannot be used for any productive activities, including the use or development of the property. If the island is that significant, then Council needs to consider either paying significant compensation for the loss of use of the land or purchase the property. 		

Submitter Number:	69	Submitter:	Lucy Stallworthy
Point Number	69.1		
Summary of Decision Requested:	Delete the part of Rule 22.3.2 Minor dwelling, requiring minor dwellings to be within 20m of an existing dwelling.		
Decision Reasons:	<ul style="list-style-type: none"> It may not be possible to have a minor dwelling within 20m if the site is constrained or has geographical features which prevent this. As there is no longer a requirement for dependents to live in a minor dwelling, it could be used for worker accommodation. It may not be desirable to have workers living that close to the main house. 		
Point Number	69.2		
Summary of Decision Requested:	Amend Rule 22.4.1.6 Conservation lot subdivision which applies to the Hamilton Basin to the area around the northern boundary of the Waikato along the boundary with Auckland, particularly around the Tuakau, Puni, Mauku, south side of Pukekohe Hill area (Tramway / Settlement / Cameron Town Roads) to enable them to receive 1 new title in this area if they have between 1-2ha of Significant Natural Area protected. AND/OR Amend the fourth row in the table in Rule 22.4.1.6 Conservation lot subdivision to read as follows: 2 <u>1</u> ha to less than 5ha		
Decision Reasons:	<p>Submitter considers the rules should be amended as:</p> <ul style="list-style-type: none"> There are a lot of small areas of bush / wetland and streams in this area that need protection but are not necessarily 2ha or greater in size. A rule such as that suggested by the submitter would provide an incentive to protect these natural area. This area is very highly developed already with market gardens, the natural areas that are remaining need to be protected. It is also an area that is already highly subdivided with lots of lifestyle properties so it makes sense to allow a little more subdivision in these areas provided the natural areas are preserved. The rural character would in fact be enhanced as it could lead to more areas not being turned into market gardens. By limiting to areas around watercourses / streams / wetlands would also lead to water quality improvements. Small natural areas provide a refuge for wildlife and if they are dotted around the area can be like a series of refuges for wildlife as they move around the area. 		

Submitter Number:	70	Submitter:	Ben Stallworthy
Point Number	70.1		
Summary of Decision Requested:	Delete the part of Rule 22.3.2 Minor Dwelling requiring minor dwellings to be within 20m of an existing dwelling.		
Decision Reasons:	<ul style="list-style-type: none"> It may not be realistic to have a minor dwelling within 20m due to constraints of the site or geographical shape of the land. As there is no longer a requirement for dependents to live in a minor dwelling, it could be used for worker accommodation. It may be better for workers to live more than 20m away. 		
Point Number	70.2		
Summary of Decision Requested:	Amend Rule 22.4.1.6 Conservation Lot Subdivision, to allow for 1 new title around Pukekohe and Tuakau where there is 1-2 ha in a conservation area AND Amend Rule 22.4.1.6 Conservation Lot Subdivision, to allow the creation of new titles around Pukekohe and Tuakau where there is less than 1ha in a conservation area, AND Amend Rule 22.4.1.6 Conservation Lot Subdivision, to enable creation of 2 new titles where there is a conservation area between 2-5ha.		
Decision Reasons:	<ul style="list-style-type: none"> There are a lot of small natural areas that need to be protected and this would encourage land owners to protect these areas. There is so much market gardening around this area and very little natural areas. Allowing two titles from protecting 2-5ha would encourage people to enlarge the small natural areas they do have. 		

- Enabling subdivision through planting around streams like the Puni/Mauku stream would encourage people to protect the stream.
- Many of the areas around Cameron Town/Settlement/Tramway Road are already subdivided with lifestyle blocks and market gardens.
- Need to allow more limited housing in exchange for protecting what naturalness is left and adding to it.

Point Number 70.3

Summary of Decision Requested: **Amend** the zoning of areas along the northern Waikato border adjacent to the Auckland boundary from Rural to Country Living Zones, including the area to the south and east of Pukekohe, south of Pukekohe Hill and extending to Tuakau, comprising at least Tramway Road, Settlement Road and Cameron Town Road.

Decision Reasons:

- These areas are already significantly subdivided with many lifestyle blocks and it makes sense to allow further allow subdivision of existing small blocks that are not economic units of production, for example those under 10 hectares.
- It makes sense to concentrate rural living lifestyle blocks around existing towns - the fact that Pukekohe is in Auckland should not be relevant - it is an existing town and on its outskirts there should be countryside living allowed, much like it is in the Auckland Unitary Plan.
- All the people who live in this area are socially and economically tied to Auckland / Pukekohe.
- While the entire area along the border should not be countryside living, there are locations where there is already lots of lifestyle blocks - these should be allowed to be divided into smaller lifestyle blocks provided they are self-sufficient i.e. own water / water water.

Submitter Number: 71 **Submitter:** Diewke Butler

Point Number 71.1

Summary of Decision Requested: **Amend** the zoning of the properties with road frontage to Percy Graham Drive, Tuakau from Village Zone to Residential Zone.

Decision Reasons:

- One side of Percy Graham Road is zoned Residential while the other is Rural Residential Zone. Both sides have access to town water and wastewater.
- There is ample scope to subdivide further and better utilise the services provided
- As this area is already urban, this will not affect the amenity value.
- A similar situation is in Barnaby Road where the road frontage properties will be zoned Residential Zone.

Submitter Number: 72 **Submitter:** Lynne Collins

Point Number 72.1

Summary of Decision Requested: **Retain** the proposed Rural Zone for the property at 62 Bluff Road, Pokeno.

Decision Reasons:

- The landowners of 62 Bluff Road, Pokeno want to start a clean fill with a proposed concrete crushing facility to be built there also, but the submitter opposes this.
- There are natural waterways and a lot of bird and plant life at the site and clean fill/concrete crushing will be detrimental to the environment if it goes ahead.
- The road infrastructure would not take all the truck traffic.
- The other properties around 62 Bluff Road would all be affected if the clean fill and concrete crushing goes ahead - noise, pollution and environmental.
- Change of zoning to rural will be beneficial to all adjoining properties.

Submitter Number: 73 **Submitter:** Anna Wilkes

Organisation: Ravensdown

Point Number 73.1

Summary of Decision Requested: **Amend** the Aggregate Extraction Area overlay on the property at 2571 Port Waikato-Waikaretu Road, Tuakau so that the southern boundary of the overlay is aligned with the property boundary.

Decision Reasons:

- The submitter's understanding is that provisions in the proposed district plan relating to Aggregate Extraction Areas only relate to subdivision provisions; it is therefore logical that the small areas of overlay that extend beyond the Ravensdown property boundary are aligned with the property boundary.
- The boundary of the proposed aggregate extraction area overlay appears to have been based on the current areas of exposed site visible in Google maps imagery.

Submitter Number: 74 **Submitter:** Graham Hunkin

Point Number 74.1

Summary of Decision Requested: No specific decision requested, but submission questions the necessity of the designation held by Vector Gas Limited (Designation R1), particularly at the property at 185 Brown Road, Tuakau. The submission refers to Section 184 of the Resource Management Act which relates to the lapsing of the designation.

Decision Reasons:

- The construction zone designation was granted to Vector in approximately 2005. No substantial progress has been made by the requiring authority with the last letter received from the requiring authority on the 9th of June 2009 and no construction or preparation for construction has been initiated in this time.
- RMA section 184 states that a designation will lapse if no "substantial progress or effort has been made towards giving effect to the designation and is continuing to be made".
- See attachment to submission for copies of the correspondence between the submitter and Vector.

Submitter Number:	75	Submitter:	Mark Emms
Point Number	75.1		
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 126C Woodcock Road, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The vast majority of the vegetation is pest species. Although a large amount of privet has been removed over the years, there remains a large amount of blackberry, gorse, honeysuckle, willow etc. 		
Point Number	75.2		
Summary of Decision Requested:	Delete the walkway/cycleway/bridleway from the property at 126C Woodcock Road, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The landowner's privacy and security would be severely compromised by the proposed walkway/cycleway. This would be extremely difficult and expensive to construct as the whole of the gully bottom is wet/boggy and there are large areas of brambles/pest species and the gully sides are very steep. 		
Point Number	75.3		
Summary of Decision Requested:	Delete the walkway/cycleway/bridleway from Fushia Lane to Titoki Lane, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> This would be very difficult and expensive to construct as the whole of the gully bottom is wet and boggy, there are large areas of brambles/pest plants and the gully sides are very steep. 		
Submitter Number:	76	Submitter:	Gulab Bilimoria
Organisation:	Bilimoria Consulting Ltd		
Point Number	76.1		
Summary of Decision Requested:	Retain the proposed zoning of the properties at 24 and 43A Saubrey Road, Ngaruawahia as Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> Already in the process of subdivision for residential use (see attachment to submission for development plans). 		
Submitter Number:	77	Submitter:	Colette Hanrahan
Point Number	77.1		
Summary of Decision Requested:	Delete the walkway/cycleway/bridleway from the property at 126B Woodcock Road, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The walkway/cycleway/bridleway would greatly compromise the submitter's privacy and safety. The submitter does not understand why the proposed route crosses private property when land on the other side of the stream is QEII covenanted. See attachment to submission for photos. The proposed route is impractical due to terrain, being wet and boggy and full of weed species. 		
Point Number	77.2		
Summary of Decision Requested:	Delete the walkway/cycleway/bridleway from Fushia Lane to Titoki Lane, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The proposed route of the walkway/cycleway/bridleway is completely impracticable as the terrain is steep, the gully bottom is extremely wet and boggy and is full of blackberry, blackwood and other pest species. 		
Point Number	77.3		
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 126B Woodcock Road, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The indigenous vegetation mapped is of extremely low quality. The vegetation contains mainly pest species including blackberry, convolvulus, alligator weed, privet, gorse, jasmine, blackwood etc. The only native trees and plants in the gully surrounding the submitter's house are immature ones that have been planted in recent years. See attachment to submission for photos. 		
Submitter Number:	78	Submitter:	David Lawrie

Point Number 78.1

Summary of Decision Requested: Amend the Significant Natural Area on the property at 52B Mill Road, Pukekohe to match the true natural area.

Decision Reasons:

- The natural areas are incorrectly marked on the property.
- The natural area on the map includes barberry and forestry.
- The true natural feature has a QEII covenant over it.

Submitter Number: 79 **Submitter:** Amy Pitcher

Point Number 79.1

Summary of Decision Requested: Amend the proposed zoning of the property at Horotiu Bridge Road, Horotiu (Lot 3 DP 513666 and Valuation Reference 04421/079.21) from Rural Zone to Country Zone.

Decision Reasons:

- The submitter wishes to subdivide their property into two sections in the future, as the current property area of 15,000m2 is considered to be a lot for them to maintain.

Submitter Number: 80 **Submitter:** Dean Van Ingen

Point Number 80.1

Summary of Decision Requested: Delete the Significant Natural Area from the property at 384A Karakariki Road, Hamilton.

Decision Reasons:

- The Significant Natural Area identified on the property consists of two plum trees.
- There are no other trees within the Significant Natural Area that are on the property.
- See photos attached to the submission for further information.

Point Number 80.2

Summary of Decision Requested: Delete the overlay 'Hamilton basin ecological management area' from the property at 384A Karakariki Road, Hamilton.

Decision Reasons:

- No reason provided.

Submitter Number: 81 **Submitter:** Waikato Regional Council

Point Number 81.1

Summary of Decision Requested: Amend the Proposed District Plan to clarify the strategic objectives and policies in each policy chapter, and how they relate to the issues identified in Chapter 1.

Decision Reasons:

- Chapters in the Proposed Plan include strategic objectives and policies, and the relationship between these and non-strategic objectives and policies, and the resource management issues identified in Chapter 1, is not clear.
- Policy 4.1 of the Waikato Regional Policy Statement (WRPS) seeks that an integrated approach to resource management be adopted, including 4.1(h) establishing a planning framework which sets clear limits and thresholds for resource use. Clearly identifying the strategic objectives and policies for all the resources that the Proposed Plan seeks to manage and cross-referencing them to related issues in Chapter 1 would promote an integrated approach and provide clarity about the relationship between issues, strategic and other objectives, policies and methods for plan users, particularly those applying for and processing resource consent applications and plan changes.
- See submission for suggested amendments.

Point Number 81.2

Summary of Decision Requested: Amend each zone chapter to provide details on the purpose and anticipated outcomes of the corresponding zone or subzone.

Decision Reasons:

- There are no descriptions of zones and their intended outcomes.
- Clarification on the purpose of each zone will increase understanding of the anticipated outcomes, and appropriate types of activities for the different environments.
- These descriptions will assist with understanding the purpose and character of the residential zone and the associated provisions 4.2.1 and 4.2.2.

Point Number 81.3

Summary of Decision Requested: Amend Permitted Activity standards for all zones for earthworks to provide for a minimum 5 metre distance from any waterbody or overland flow path, example of which is as follows:

P16.2.4.1 (a)(i) Be located more than ~~4.5 m~~ 5.0 m horizontally from any waterway, open drain or overland flow path.

Decision Reasons:

- The Te Ture Whaimana o Te Awa o Waikato, Vision and Strategy for the Waikato River contains a number of objectives regarding the restoration and protection of the Waikato River, including but not limited to a) The restoration and protection of the health and

- wellbeing of the Waikato River; e) The integrated, holistic and coordinated approach to management of the natural, physical, cultural and historic resources of the Waikato River and (f).
- The adoption of a precautionary approach towards decisions that may result in significant adverse effects on the Waikato River, and in particular those effects that threaten serious or irreversible damage to the Waikato River.
- These provisions are supported by related provisions of the Waikato Regional Policy Statement (WRPS), notably Implementation Method 8.3.10.
- The provisions as written do not take a sufficiently precautionary approach to managing sediment loadings entering stormwater networks and waterbodies, such as: Managing earthworks in close proximity to water bodies, managing earthworks in a flood plain or flood hazard area and managing the revegetation of earthworked sites in a timely fashion.
- Amending (or adding) the conditions to provide for a more precautionary approach that minimises the risk of sediment entering waterbodies or stormwater providing a minimum 5 metre setback and 2 month revegetation period aligning with better practice earthworks management.

Point Number 81.4

Summary of Decision Requested: **Amend** Permitted Activity standards for all zones to provide for a shorter period of time for earthworks to be revegetated, as follows:

Areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 ½ months of the commencement of the earthworks.

Decision Reasons:

- The Te Ture Whaimana o Te Awa o Waikato, Vision and Strategy for the Waikato River contains a number of objectives regarding the restoration and protection of the Waikato River, including but not limited to a) The restoration and protection of the health and wellbeing of the Waikato River; e) The integrated, holistic and coordinated approach to management of the natural, physical, cultural and historic resources of the Waikato River; and f).
- The adoption of a precautionary approach towards decisions that may result in significant adverse effects on the Waikato River, and in particular those effects that threaten serious or irreversible damage to the Waikato River.
- These provisions are supported by related provisions of the Waikato Regional Policy Statement (WRPS), notably Implementation Method 8.3.10.
- The provisions as written do not take a sufficiently precautionary approach to managing sediment loadings entering stormwater networks and waterbodies, such as: Managing earthworks in close proximity to water bodies, managing earthworks in a flood plain or flood hazard area, managing the revegetation of earthworked sites in a timely fashion.
- Amending (or adding) the conditions to provide for a more precautionary approach that minimises the risk of sediment entering waterbodies or stormwater providing a minimum 5 metre setback and 2 month revegetation period aligning with better practice earthworks management.

Point Number 81.5

Summary of Decision Requested: **Add** to the Proposed District Plan for all zones an additional condition related to earthworks within a flood plain (in addition to identifying these on maps), as follows (or similar):

Not be located within a flood plain as identified in the Waikato District Plan.

AND

Add to Maps the flood plain.

Decision Reasons:

- The Te Ture Whaimana o Te Awa o Waikato, Vision and Strategy for the Waikato River contains a number of objectives regarding the restoration and protection of the Waikato River, including but not limited to a) The restoration and protection of the health and wellbeing of the Waikato River; e) The integrated, holistic and coordinated approach to management of the natural, physical, cultural and historic resources of the Waikato River; and f).
- The adoption of a precautionary approach towards decisions that may result in significant adverse effects on the Waikato River, and in particular those effects that threaten serious or irreversible damage to the Waikato River.
- These provisions are supported by related provisions of the Waikato Regional Policy Statement (WRPS), notably Implementation Method 8.3.10. The provisions as written do not take a sufficiently precautionary approach to managing sediment loadings entering stormwater networks and waterbodies, such as: Managing earthworks in close proximity to water bodies, managing earthworks in a flood plain or flood hazard area, managing the revegetation of earthworked sites in a timely fashion.
- Amending (or adding) the conditions to provide for a more precautionary approach that minimises the risk of sediment entering waterbodies or stormwater providing a minimum 5 metre setback and 2 month revegetation period aligning with better practice earthworks management.

Point Number 81.6

Summary of Decision Requested: **Add** to the Proposed District Plan for all zones a standard to minimise impacts on water bodies as follows:

Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- The Te Ture Whaimana o Te Awa o Waikato, Vision and Strategy for the Waikato River contains a number of objectives regarding the restoration and protection of the Waikato River, including but not limited to a) The restoration and protection of the health and wellbeing of the Waikato River; e) The integrated, holistic and coordinated approach to management of the natural, physical, cultural and historic resources of the Waikato River; and f).
- The adoption of a precautionary approach towards decisions that may result in significant adverse effects on the Waikato River, and in particular those effects that threaten serious or irreversible damage to the Waikato River.
- These provisions are supported by related provisions of the Waikato Regional Policy Statement (WRPS), notably Implementation Method 8.3.10. The provisions as written do not take a sufficiently precautionary approach to managing sediment loadings entering stormwater networks and waterbodies, such as: Managing earthworks in close proximity to water bodies, managing earthworks in a flood plain or flood hazard area, managing the revegetation of earthworked sites in a timely fashion.
- Amending (or adding) the conditions to provide for a more precautionary approach that minimises the risk of sediment entering waterbodies or stormwater providing a minimum 5 metre setback and 2 month revegetation period aligning with better practice earthworks management.

Point Number 81.7

Summary of Decision Requested: **Amend** the Proposed District Plan's provisions to support the use of low impact design principles for stormwater management (in particular consider for Restricted Discretionary Activity criteria and permitted activity standards).

Decision Reasons:

- Sensitive environments can be adversely affected by stormwater from the subdivision and development of land.
- There is an opportunity to provide in the policies for low impact design, or a water sensitive design approach, especially in the coastal environment, and in the vicinity of wetlands, lakes and rivers, and their margins.
- This is supported by Policies 6.2 and 6.3 of the WRPS and Implementation Method 8.3.10.
- Reserves can be located to enable low impact design stormwater management.

Point Number 81.8

Summary of Decision Requested: **Retain** Rule 19.1.2 RD1 Restricted Discretionary Activities.

Decision Reasons:

- Rule 19.1.2 RD1 already incorporates detail for low impact design principles and is supported.
- Submitter supports the application of low impact design principles as outlined in Waikato Regional Council's Waikato Stormwater Management Guideline.
- There is an opportunity for this item to be included as a matter of discretion across all zones in the district.

Point Number 81.9

Summary of Decision Requested: **Amend** the Proposed District Plan for all zones to provide for a minimum 10m setback from the banks of a perennial or intermittent stream.

Decision Reasons:

- There are a range of setbacks from water bodies throughout the zones.
- At a minimum all buildings should be setback a minimum of 10m from the banks of a perennial or intermittent stream, and rules should be provided and/or amended to reflect this.
- It is recommended that this setback is included for all zones.

Point Number 81.10

Summary of Decision Requested: **Retain** for all zones setbacks from waterbodies that are larger than 10m .

Decision Reasons:

- There are a range of setbacks from water bodies throughout the zones.
- A minimum setback of 10m from the bank of a perennial or intermittent stream that is provided for in other zones is supported.

Point Number 81.11

Summary of Decision Requested: **Amend** the Proposed District Plan to provide for district-wide provisions in the Natural Hazards and Climate Change zones/overlays to restrict activities that take place in these areas, and to discourage inappropriate use and development.

Decision Reasons:

- Submitter acknowledges that Phase 2 of the Proposed Plan review will address natural hazards. The Proposed Plan provides for a range of activities and also rezones land for urban expansion around some centres.
- Without detail from the Natural Hazards and Climate Change Chapters it is unclear what provisions will apply to manage or restrict development and other activities on land subject to an identified natural hazards or climate change area.
- Rules and standards that may be affected include those related to earthworks, building platforms, cleanfill, the construction of buildings and rezoning of new land for urban expansion.
- Objectives and policies throughout the document may also benefit from the consideration of natural hazards, such as Policies 5.3.5 and 6.4.7, avoiding the flood plain or flood risk areas.

Point Number 81.12

Summary of Decision Requested: **Amend** the Proposed District Plan to provide for cross references between issues, objectives, policies and rules.

Decision Reasons:

- There are not clear links and cross-references between related issues, objectives, policies and rules.

Point Number 81.13

Summary of Decision Requested: **Amend** the Proposed District Plan by pulling area specific provisions (ie Lakeside) into one Chapter (e.g. Section 9: Specific Zones).

Decision Reasons:

- There are a number of areas that are subject to specific provisions that have been created through plan changes or other processes: e.g. Te Kauwhata Lakeside, Rangitahi Peninsula.
- Provisions related to these types of developments are spread across multiple chapters of the Proposed Plan. There is an opportunity to provide an easier way to navigate and read a suite of provisions by pulling them together into one location.

Point Number 81.14

Summary of Decision Requested: **Amend** Chapter 1 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The National Policy Statement for Urban Development Capacity (NPS-UDC) impacts multiple chapters and sections of the Proposed Plan, relating to the provision of sufficient feasible zoned and serviced housing and business land is provided for.
- Because of the proposed approach to 'live' zone new urban growth areas there are a number of areas of concern regarding this, in particular in relation to the zoning of new areas of land for urban development where it is unclear what infrastructure is available or is proposed to be provided.
- There is also limited direction for staging which may affect the efficient delivery of infrastructure.
- The submission includes suggested options.

Point Number 81.15

Summary of Decision Requested: **Amend** Policy 4.6.3 Maintain a sufficient supply of industrial land by specifically referencing the National Policy Statement-Urban Development Capacity.

Decision Reasons:

- The National Policy Statement for Urban Development Capacity (NPS-UDC) impacts multiple chapters and sections of the Proposed Plan, relating to the provision of sufficient feasible zoned and serviced housing and business land is provided for.
- Because of the proposed approach to 'live' zone new urban growth areas there are a number of areas of concern regarding this, in particular in relation to the zoning of new areas of land for urban development where it is unclear what infrastructure is available or is proposed to be provided.
- There is also limited direction for staging which may affect the efficient delivery of infrastructure.
- The submission includes suggested options.

Point Number 81.16

Summary of Decision Requested: **Amend** Chapter 4, Chapter 16, the Planning Maps and any other provisions that are proposed for unserviced urban residential areas where there is uncertainty about the funding, staging and timing for infrastructure provision. The amendments should establish a stronger objective,

policy and rule framework than is proposed, in order to ensure that activities of an urban nature, including subdivision, is not provided for prior to structure planning processes being undertaken and without certainty about the funding, timing and staging of infrastructure provision.

Decision Reasons:

- The submitter is concerned that the provisions of Section 4.1 Strategic Direction do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for unserviced land within urban towns and villages.
- This concern also applies to other objectives and policies in Section 4 relating to residential activities and to rules contained in Section 16: Residential.
- Of particular concern are locations such as Tuakau, Pokeno and Horotiu. Submitter considers that the planning framework proposed for these areas does not give effect to the WRPS' direction on ensuring an integrated, staged approach to infrastructure and development.
- It is likely to enable development that undermines the ability to coordinate the adequate provision of network and community infrastructure to support growth.
- Submitter suggests that that an alternative method to 'live' zoning of these areas should be considered, to more appropriately manage land where a live zone has been applied, but where there is no existing or planned supporting infrastructure.
- Without limiting the scope of any amendments, submitter suggests that options to be considered include:
 1. Retention of the operative plan's rural zoning of these areas, with an overlay similar to the 'Hamilton Urban expansion' overlay proposed in the plan,
 2. Application of the urban zone, but with an overlay that would signal that while particular areas are considered appropriate particular activities, e.g. industrial or residential, additional subdivision and development will not be considered until there is certainty about infrastructure provisions,
 3. Creation of a new Urban Expansion Zone that would have its own suite of provisions for management of landuse and subdivision activities.

Point Number 81.17

Summary of Decision Requested: **Amend** the Proposed District Plan provisions so that any subdivision, use and development in areas that are proposed for unserviced residential where there is uncertainty about funding, staging and timing of infrastructure provision does not compromise them for future development.

Decision Reasons:

- The submitter is concerned that the provisions of Section 4.1 Strategic Direction do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for unserviced land within urban towns and villages.
- This concern also applies to other objectives and policies in Section 4 relating to residential activities and to rules contained in Section 16: Residential, particularly in locations such as Tuakau, Pokeno and Horotiu.
- The submitter considers that the planning framework proposed for these areas does not give effect to the WRPS' direction on ensuring an integrated, staged approach to infrastructure and development.
- The proposed approach is likely to enable development that undermines the ability to coordinate the adequate provision of network and community infrastructure to support growth.
- The submitter considers that that an alternative method to 'live' zoning of these areas should be considered, to more appropriately manage land where a live zone has been applied, but where there is no existing or planned supporting infrastructure.
- Without limiting the scope of any amendments, submitter suggests that options to be considered include:
 1. Retention of the operative plan's rural zoning of these areas, with an overlay similar to the 'Hamilton Urban expansion' overlay proposed in the plan;
 2. Application of the urban zone, but with an overlay that would signal that while particular areas are considered appropriate particular activities, e.g. industrial or residential, additional subdivision and development will not be considered until there is certainty about infrastructure provisions; and
 3. Creation of a new Urban Expansion Zone that would have its own suite of provisions for management of landuse and subdivision activities.

Point Number 81.18

Summary of Decision Requested: **Amend** the Proposed District Plan provisions and maps to provide for outcomes identified in the Auckland-Hamilton Corridor Plan and Future Proof Strategy Phase 2 review.

Decision Reasons:

- There is work underway producing the Auckland-Hamilton Corridor Plan, and also carrying out the Phase 2 review of the Future Proof Growth Strategy.
- This process will generate a vision for managing urban growth and development in significant parts of the Waikato District that may differ in some respects from that in the Proposed Plan as currently written.

Point Number 81.19

Summary of Decision Requested: **Amend** the Proposed District Plan to clarify the role and purpose of the Environmental Protection Area.

Decision Reasons:

- It is unclear what the role and purpose of the Environmental Protection Area is.
- The Environmental Protection Area is mentioned in the Residential, Rural and Country Living Zones however not the objectives and policies.
- This is problematic as non-compliance with rules sometimes leads to a discretionary activity status and it is unclear what an activity would be assessed against.

Point Number 81.20

Summary of Decision Requested: **Amend** the Proposed District Plan to provide a mechanism to manage areas that meet the WRPS IIA criteria and have not been identified and mapped in the Proposed Plan.

Decision Reasons:

- The submitter notes that not all areas of significance under section 6c of the Resource Management Act (RMA) and IIA of the Waikato Regional Policy Statement will have been identified and mapped in the development of the Proposed Plan.
- The plan needs to provide for those areas that meet the SNA criteria, but which were not known about until an activity is proposed.

Point Number 81.21

Summary of Decision Requested: **Add** advice notes drawing attention to the provisions of the Waikato Pest Management Plan, particularly for earthworks and fill activities.

Decision Reasons:

- There is potential for a number of activities to exacerbate the spread of pest plants and diseases, e.g. earthworks and filling.
- The spread of such pests and diseases poses a risk to the regional economy as well as indigenous biodiversity.
- While the Regional Pest Management Plan provides controls around the management of pests and diseases, it is important to recognise that activities controlled by the Proposed District Plan may also have implications in terms of biosecurity.

Point Number 81.22

Summary of Decision Requested: Add assessment criteria to earthwork and fill activities to allow the consideration of effects on pest and disease management.

Decision Reasons:

- There is potential for a number of activities to exacerbate the spread of pest plants and diseases, e.g. earthworks and filling.
- The spread of such pests and diseases poses a risk to the regional economy as well as indigenous biodiversity.
- While the Regional Pest Management Plan provides controls around the management of pests and diseases, it is important to recognise that activities controlled by the Proposed Plan may also have implications in terms of biosecurity.

Point Number 81.23

Summary of Decision Requested: Add issues, objectives, policies and rules to address the spread of Kauri Dieback Disease.

Decision Reasons:

- Kauri dieback is caused by a pathogen that is spread through soil, and is threatening kauri with functional extinction. Its spread can be facilitated by footwear, gear and machinery that is not cleaned of soil before going near kauri, and again before leaving an area with kauri.
- Provisions are sought to manage the effects of land use and development on the spread of kauri dieback.
- There is an opportunity to protect kauri. This will require changes in behaviour.
- The submission contains some details on environment court proceedings that the submitter are a party to.

Point Number 81.24

Summary of Decision Requested: Undertake a natural character assessment for wetlands, lakes, rivers and their margins.

Decision Reasons:

- The RMA (section 6a) and WRPS (12.2 and 12.2.1) seek to manage natural character in the coastal environment and wetlands, lakes and rivers and their margins.
- There is policy support for this in Section 3.5 of the Proposed Plan however that does not flow through to other provisions.
- There has been no assessment of the natural character of wetlands, lakes and rivers and their margins and as a consequence natural character has not been mapped outside of the coastal environment.
- The Policies in section 3.5 that relate to the wetlands, lakes and rivers and their margins will only come into play for discretionary and non-complying consent applications.
- As a result there may be permitted, controlled and restricted discretionary activities that are inappropriate to the level of natural character.

Point Number 81.25

Summary of Decision Requested: Amend the provisions to ensure that natural character is managed in accordance with Policy 12.2 and Implementation Method 12.2.1 of the WRPS.

Decision Reasons:

- The RMA (section 6a) and WRPS (12.2 and 12.2.1) seek to manage natural character in the coastal environment and wetlands, lakes and rivers and their margins.
- There is policy support for this in Section 3.5 of the Proposed Plan however that does not flow through to other provisions.
- There has been no assessment of the natural character of wetlands, lakes and rivers and their margins and as a consequence natural character has not been mapped outside of the coastal environment.
- The Policies in section 3.5 that relate to the wetlands, lakes and rivers and their margins will only come into play for discretionary and non-complying consent applications.
- As a result there may be permitted, controlled and restricted discretionary activities that are inappropriate to the level of natural character.

Point Number 81.26

Summary of Decision Requested: Amend provisions throughout the plan that relate to natural character to recognise that a different approach is required to high and outstanding natural character to give effect to Policy 12.2 and Implementation method 12.2.1 of the WRPS.

Decision Reasons:

- All the provisions for areas of High and Outstanding Natural Character are the same, no distinction has been made between the two areas in terms of the management approach.
- As a result the different levels of natural character have not been appropriately recognised and managed.
- This is inappropriate given that Policy 12.2 and Implementation Method 12.2.1 of the WRPS seek to recognise the different levels of natural character and therefore set out a different management approach for each.

Point Number 81.27

Summary of Decision Requested: Retain mapping of the coastal environment and consider a section that sets out the approach to the coastal environment.

Decision Reasons:

- The submitter supports the mapping of the Coastal Environment.
- The submitter considers that it would be helpful to plan users if there where a section in the Proposed District Plan that sets out the approach to the Coastal Environment.

Point Number 81.28

Summary of Decision Requested: Amend the Proposed Plan to take into account activities that may impact on the significant habitats of indigenous fauna that have been identified and mapped in the planning maps.

Decision Reasons:

- Section 6(c) of the RMA and Chapter 11 of the WRPS both require the protection of significant habitats of indigenous fauna.
- Consideration needs to be given to the SNAs identified on the planning maps and whether provisions that focus on the clearance of indigenous vegetation and earthworks are enough to ensure that significant habitats are protected. For example clearance of exotic vegetation may in certain circumstances adversely affect significant habitats of indigenous fauna (e.g. bats).

Point Number 81.29

Summary of Decision Requested: Amend Rule 22.2.8 P1(a)(ii) and P2(a)(ii) Indigenous vegetation clearance outside a Significant Natural Area to exclude clearance in wetlands.

Decision Reasons:

- The submitter does not support the removal of Manuka or Kanuka from wetlands, this is potentially permitted through P1(a)(ii) and P2(a)(ii).
- Wetlands are underrepresented with approximately 20% of original extent remaining in the Waikato District.

Point Number 81.30

Summary of Decision Requested: **Add** an additional clause to Rule 22.2.8 P1(a)(vii) and P3(a) Indigenous vegetation clearance outside a Significant Natural Area as follows:
There is no alternative development area on the site outside of the area of indigenous vegetation clearance.

Decision Reasons:

- P1 and P3 encourage dwellings, marae and papakainga to locate outside of areas of indigenous vegetation, as is the case for SNAs.

Point Number 81.31

Summary of Decision Requested: **Amend** Rule 22.2.8 P3 Indigenous vegetation clearance outside a Significant Natural Area to provide a total cap on clearance, after which a consent for a restricted discretionary activity is required.

Decision Reasons:

- P3 does not provide a total cap for clearance, at which point a restricted discretionary activity will be triggered.
- An unlimited amount of clearance could occur under this rule with no ability to require avoid, remedy, mitigate or offset.

Point Number 81.32

Summary of Decision Requested: **Retain** Rule 22.2.8 RD1 Indigenous vegetation clearance outside a Significant Natural Area for where the permitted thresholds become a restricted discretionary activity.

Decision Reasons:

- The submitter supports clearance beyond the permitted thresholds becoming a restricted discretionary activity.

Point Number 81.33

Summary of Decision Requested: **Add** an additional assessment criteria to Rule 22.2.8 RD1 Indigenous vegetation clearance outside a Significant Natural Area as follows:
the extent to which adverse effects have been avoided, remedied, mitigated or offset.

Decision Reasons:

- Discretion should include the adverse effects on the indigenous biodiversity on the site and the extent to which these adverse effects have been avoided, remedied, mitigated or offset to allow consideration of the mitigation hierarchy in WRPS Implementation Method 1.1.1.3.

Point Number 81.34

Summary of Decision Requested: **Amend** Rule 23.2.9 P1(a)(ii) and P2(a)(ii) Indigenous vegetation clearance outside a Significant Natural Area to exclude clearance in wetlands.

Decision Reasons:

- The submitter does not support the removal of Manuka or Kanuka from wetlands, this is potentially permitted through P1(a)(ii) and P2(a)(ii).
- Wetlands are underrepresented with approximately 20% of original extent remaining in the Waikato District.

Point Number 81.35

Summary of Decision Requested: **Add** an additional clause to Rule 23.2.9 P1(a)(vii) and P3(a) Indigenous vegetation clearance outside a Significant Natural Area as follows:
There is no alternative development area on the site outside of the area of indigenous vegetation clearance.

Decision Reasons:

- P1 and P3 encourage dwellings, marae and papakainga to locate outside of areas of indigenous vegetation, as is the case for SNAs.

Point Number 81.36

Summary of Decision Requested: **Amend** Rule 23.2.9 P3 Indigenous vegetation clearance outside a Significant Natural Area to provide a total cap on clearance, after which a consent for a restricted discretionary activity is required.

Decision Reasons:

- P3 does not provide a total cap for clearance, at which point a restricted discretionary activity will be triggered. An unlimited amount of clearance could occur under this rule with no ability to require avoid, remedy, mitigate or offset.

Point Number 81.37

Summary of Decision Requested: **Retain** Rule 23.2.9 RD1 Indigenous vegetation clearance outside a Significant Natural Area with the permitted thresholds becoming a restricted discretionary activity.

Decision Reasons:

- The submitter supports clearance beyond the permitted thresholds becoming a restricted discretionary activity.

Point Number 81.38

Summary of Decision Requested: **Add** an additional assessment criteria to Rule 23.2.9 RD1 Indigenous vegetation clearance outside a Significant Natural Area as follows:
the extent to which adverse effects have been avoided, remedied, mitigated or offset.

Decision Reasons:

- Discretion should include the adverse effects on the indigenous biodiversity on the site and the extent to which these adverse effects have been avoided, remedied, mitigated or offset to allow consideration of the mitigation hierarchy in WRPS Implementation Method 11.1.3.

Point Number 81.39

Summary of Decision Requested: **Amend** to clarify the application of the earthworks rule (Rule 16.2.4.3) in terms of whether it includes indigenous biodiversity vegetation clearance.

Decision Reasons:

- The submitter seeks clarity as to whether the earthworks rules for SNA include the clearance of vegetation as a result of earthworks or if that will be subject to Rule 16.2.8 respectively.

Point Number 81.40

Summary of Decision Requested: **Amend** to clarify the application of the earthworks rule (Rule 22.2.3.3) in terms of whether it includes indigenous biodiversity vegetation clearance.

Decision Reasons:

- The submitter seeks clarity as to whether the earthworks rules for SNA include the clearance of vegetation as a result of earthworks or if that will be subject to Rule 22.2.7 respectively.

Point Number 81.41

Summary of Decision Requested: **Retain** Rule 16.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The submitter is supportive of indigenous vegetation clearance beyond permitted thresholds becoming a discretionary activity (D1).

Point Number 81.42

Summary of Decision Requested: **Retain** Rule 22.2.7 DI Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The submitter is supportive of indigenous vegetation clearance beyond permitted thresholds becoming a discretionary activity (D1).

Point Number 81.43

Summary of Decision Requested: **Retain** Rule 23.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The submitter is supportive of indigenous vegetation clearance beyond permitted thresholds becoming a discretionary activity (D1).

Point Number 81.44

Summary of Decision Requested: **Retain** Rule 24.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The submitter is supportive of indigenous vegetation clearance beyond permitted thresholds becoming a discretionary activity (D1).

Point Number 81.45

Summary of Decision Requested: **Retain** Rule 28.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The submitter is supportive of indigenous vegetation clearance beyond permitted thresholds becoming a discretionary activity (D1).

Point Number 81.46

Summary of Decision Requested: **Retain** Rule 16.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below
AND
Amend Rule 16.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area to exclude clearance of Manuka and Kanuka in wetlands and the coastal environment from this rule.

Decision Reasons:

- The submitter supports the provision for sustainable clearance of regenerating Manuka or Kanuka for domestic firewood purposes or for arts or crafts in P2.
- However, the submitter does not support the removal of Manuka or Kanuka from wetlands or vegetation that is naturally short in stature.
- It is important to ensure that vegetation that is naturally short does not get included in the rules intended to provide for clearance of Manuka and Kanuka colonising pasture.
- Manuka, in particular, can be a permanent and important component of some types of ecosystems. These are generally wetlands, dunes and other coastal vegetation, but can be gumland vegetation that remains in the leached soils following kauri forest removal.
- These persistent shrublands are important habitats for lizards, orchids, mistletoes and a range of threatened species.
- Exclusion of permitted clearance of Manuka or Kanuka from wetlands and from the Coastal Environment is likely to prevent clearance of these ecosystems of concern
- The exclusion of Manuka and/or Kanuka clearance in the Coastal Environment from this rule would give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement (NZCPS) and Policy 11.4 of the WRPS.
- Vegetation clearance within an SNA needs to be remedied to give effect to Policy 3.2.3(a)(ii).

Point Number	81.47
Summary of Decision Requested:	Amend Rule 16.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area to ensure that weeds are controlled in the cleared area and native vegetation is allowed to regenerate.
Decision Reasons:	<ul style="list-style-type: none"> Vegetation clearance within an SNA needs to be remedied to give effect to Policy 3.2.3(a)(ii).
Point Number	81.48
Summary of Decision Requested:	Delete P6 of Rule 16.2.8 Indigenous vegetation clearance inside a Significant Natural Area.
Decision Reasons:	<ul style="list-style-type: none"> P6 duplicates P2.
Point Number	81.49
Summary of Decision Requested:	Retain Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below AND Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area to exclude clearance of Manuka and Kanuka in wetlands and the coastal environment from this rule.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the provision for sustainable clearance of regenerating Manuka or Kanuka for domestic firewood purposes or for arts or crafts in P2. However, the submitter does not support the removal of Manuka or Kanuka from wetlands or vegetation that is naturally short in stature. Point Number	81.59
Summary of Decision Requested:	Amend provisions to ensure that weeds are controlled in the cleared area and native vegetation is allowed to regenerate in a Significant Natural Area, in any chapters not covered in previous submissions.
Decision Reasons:	<ul style="list-style-type: none"> • Vegetation clearance within an SNA needs to be remedied to give effect to Policy 3.2.3(a)(ii). • The submission notes a number of rules that have amendments or retention sought as relief (subject to separate submission points)
Point Number	81.60
Summary of Decision Requested:	Delete duplicate provisions for the Indigenous vegetation clearance inside a Significant Natural Area rules in any chapters not covered in previous submissions.
Decision Reasons:	<ul style="list-style-type: none"> • P6 duplicates P2. • The submission notes a number of rules that are duplicates (subject to separate submission points) but has requested that the duplicates be removed for any other area of the Proposed Plan where similar provisions apply.
Point Number	81.61

Summary of Decision Requested: Amend Rule 16.2.8 P3 Indigenous vegetation clearance inside a Significant Natural Area by giving it restricted discretionary activity status.
AND/OR
Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P3 Provides for clearance of 250m² of indigenous vegetation removal within an SNA for building/access purposes if there is no alternative development area on the site outside the SNA. Natural values will not necessarily be evenly spread across the SNA and it is likely that some parts will be of higher natural value or of greater sensitivity than others. It is appropriate to retain discretion about the location of clearance in order to avoid as much as possible the adverse effects of the vegetation clearance.
- It is appropriate to require mitigation or offsetting to give effect to Policy 3.2.3(a)(iii) or (iv).
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.62

Summary of Decision Requested: Amend Rule 22.2.7 P3 Indigenous vegetation clearance inside a Significant Natural Area by giving it restricted discretionary activity status.
AND/OR
Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P3 Provides for clearance of 250m² of indigenous vegetation removal within an SNA for building/access purposes if there is no alternative development area on the site outside the SNA. Natural values will not necessarily be evenly spread across the SNA and it is likely that some parts will be of higher natural value or of greater sensitivity than others. It is appropriate to retain discretion about the location of clearance in order to avoid as much as possible the adverse effects of the vegetation clearance.
- It is appropriate to require mitigation or offsetting to give effect to Policy 3.2.3(a)(iii) or (iv).
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.63

Summary of Decision Requested: Amend Rule 23.2.8 P3 Indigenous vegetation clearance inside a Significant Natural Area by giving it restricted discretionary activity status.
AND/OR
Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P3 Provides for clearance of 250m² of indigenous vegetation removal within an SNA for building/access purposes if there is no alternative development area on the site outside the SNA. Natural values will not necessarily be evenly spread across the SNA and it is likely that some parts will be of higher natural value or of greater sensitivity than others. It is appropriate to retain discretion about the location of clearance in order to avoid as much as possible the adverse effects of the vegetation clearance.
- It is appropriate to require mitigation or offsetting to give effect to Policy 3.2.3(a)(iii) or (iv).
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.64

Summary of Decision Requested: Amend Rule 24.2.8 P3 Indigenous vegetation clearance inside a Significant Natural Area by giving it restricted discretionary activity status.
AND/OR
Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P3 Provides for clearance of 250m² of indigenous vegetation removal within an SNA for building/access purposes if there is no alternative development area on the site outside the SNA. Natural values will not necessarily be evenly spread across the SNA and it is likely that some parts will be of higher natural value or of greater sensitivity than others. It is appropriate to retain discretion about the location of clearance in order to avoid as much as possible the adverse effects of the vegetation clearance.
- It is appropriate to require mitigation or offsetting to give effect to Policy 3.2.3(a)(iii) or (iv).
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.65

Summary of Decision Requested: Amend Rule 28.2.8 P3 Indigenous vegetation clearance inside a Significant Natural Area by giving it restricted discretionary activity status.
AND/OR
Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P3 Provides for clearance of 250m² of indigenous vegetation removal within an SNA for building/access purposes if there is no alternative development area on the site outside the SNA. Natural values will not necessarily be evenly spread across the SNA and it is likely that some parts will be of higher natural value or of greater sensitivity than others. It is appropriate to retain discretion about the location of clearance in order to avoid as much as possible the adverse effects of the vegetation clearance.
- It is appropriate to require mitigation or offsetting to give effect to Policy 3.2.3(a)(iii) or (iv).
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.66

Summary of Decision Requested: Amend provisions for Indigenous vegetation clearance inside a Significant Natural Area (P3) by giving it restricted discretionary activity status.
AND/OR
Amend provisions to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P3 Provides for clearance of 250m² of indigenous vegetation removal within an SNA for building/access purposes if there is no alternative development area on the site outside the SNA. Natural values will not necessarily be evenly spread across the SNA and it is likely that some parts will be of higher natural value or of greater sensitivity than others.

- It is appropriate to retain discretion about the location of clearance in order to avoid as much as possible the adverse effects of the vegetation clearance. It is appropriate to require mitigation or offsetting to give effect to Policy 3.2.3(a)(iii) or (iv).
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.
- The submission lists a number of rules subject to the above (subject to their own submission points).

Point Number	81.67
Summary of Decision Requested:	<p>Retain Rule 16.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below</p> <p>AND</p> <p>Amend Rule 16.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to a restricted discretionary activity.</p> <p>AND/OR</p> <p>Amend Rule 16.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to assign a lower threshold than clearance off indigenous vegetation outside of SNA for the same activity.</p> <p>AND/OR</p> <p>Amend Rule 16.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to provide an overall cap on clearance as a permitted activity.</p> <p>AND/OR</p> <p>Amend to clarify the location and extent of areas that might be subject to this rule in order to determine if it is likely to have a significant effect on indigenous biodiversity.</p> <p>AND/OR</p> <p>Amend to provide tighter thresholds/ activity status in the Coastal Environment.</p>
Decision Reasons:	<ul style="list-style-type: none"> • P4 provides for up to 1500m² of vegetation removal for marae complex, 500 m²/dwelling, 500 m²/ building, as a permitted activity. • Cumulatively this could be a large loss of significant indigenous vegetation and habitat without the ability to address adverse effects through avoiding, remedying, mitigating or offsetting. • It is noted that this is the same amount of clearance is provided for non-significant indigenous vegetation. • As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number	81.68
Summary of Decision Requested:	<p>Retain Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below</p> <p>AND</p> <p>Amend Rule 22.2.7 P4 Indigenous vegetation clearance inside a Significant Natural Area to a restricted discretionary activity.</p> <p>AND/OR</p> <p>Amend Rule 22.2.7 P4 Indigenous vegetation clearance inside a Significant Natural Area to assign a lower threshold than clearance off indigenous vegetation outside of SNA for the same activity.</p> <p>AND/OR</p> <p>Amend Rule 22.2.7 P4 Indigenous vegetation clearance inside a Significant Natural Area to provide an overall cap on clearance as a permitted activity.</p> <p>AND/OR</p> <p>Amend to clarify the location and extent of areas that might be subject to this rule in order to determine if it is likely to have a significant effect on indigenous biodiversity.</p> <p>AND/OR</p> <p>Amend to provide tighter thresholds/ activity status in the Coastal Environment.</p>
Decision Reasons:	<ul style="list-style-type: none"> • P4 provides for up to 1500m² of vegetation removal for marae complex, 500 m²/dwelling, 500 m²/ building, as a permitted activity. • Cumulatively this could be a large loss of significant indigenous vegetation and habitat without the ability to address adverse effects through avoiding, remedying, mitigating or offsetting. It is noted that this is the same amount of clearance is provided for non-significant indigenous vegetation. • As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number	81.69
Summary of Decision Requested:	<p>Retain Rule 23.2.8 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 23.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to a restricted discretionary activity.</p> <p>AND/OR</p> <p>Amend Rule 23.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to assign a lower threshold than clearance off indigenous vegetation outside of SNA for the same activity.</p> <p>AND/OR</p> <p>Amend Rule 23.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to provide an overall cap on clearance as a permitted activity.</p> <p>AND/OR</p> <p>Amend to clarify the location and extent of areas that might be subject to this rule in order to determine if it is likely to have a significant effect on indigenous biodiversity.</p> <p>AND/OR</p> <p>Amend to provide tighter thresholds/ activity status in the Coastal Environment.</p>
Decision Reasons:	<ul style="list-style-type: none"> • P4 provides for up to 1500m² of vegetation removal for marae complex, 500 m²/dwelling, 500 m²/ building, as a permitted activity. • Cumulatively this could be a large loss of significant indigenous vegetation and habitat without the ability to address adverse effects through avoiding, remedying, mitigating or offsetting. It is noted that this is the same amount of clearance is provided for non-significant indigenous vegetation. • As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.70

Summary of Decision Requested: **Retain** Rule 24.2.8 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below

AND

Amend Rule 24.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to a restricted discretionary activity.

AND/OR

Amend Rule 24.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to assign a lower threshold than clearance off indigenous vegetation outside of SNA for the same activity.

AND/OR

Amend Rule 24.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to provide an overall cap on clearance as a permitted activity.

AND/OR

Amend to clarify the location and extent of areas that might be subject to this rule in order to determine if it is likely to have a significant effect on indigenous biodiversity.

AND/OR

Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P4 provides for up to 1500m² of vegetation removal for marae complex, 500 m² /dwelling, 500 m² / building, as a permitted activity.
- Cumulatively this could be a large loss of significant indigenous vegetation and habitat without the ability to address adverse effects through avoiding, remedying, mitigating or offsetting.
- It is noted that this is the same amount of clearance is provided for non-significant indigenous vegetation.
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.71

Summary of Decision Requested: **Retain** Rule 28.2.8 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below

AND

Amend Rule 28.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to a restricted discretionary activity.

AND/OR

Amend Rule 28.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to assign a lower threshold than clearance off indigenous vegetation outside of SNA for the same activity.

AND/OR

Amend Rule 28.2.8 P4 Indigenous vegetation clearance inside a Significant Natural Area to provide an overall cap on clearance as a permitted activity.

AND/OR

Amend to clarify the location and extent of areas that might be subject to this rule in order to determine if it is likely to have a significant effect on indigenous biodiversity.

AND/OR

Amend to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P4 provides for up to 1500m² of vegetation removal for marae complex, 500 m² /dwelling, 500 m² / building, as a permitted activity.
- Cumulatively this could be a large loss of significant indigenous vegetation and habitat without the ability to address adverse effects through avoiding, remedying, mitigating or offsetting. It is noted that this is the same amount of clearance is provided for non-significant indigenous vegetation.
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.

Point Number 81.72

Summary of Decision Requested: **Amend** provisions for Indigenous vegetation clearance inside a Significant Natural Area (P4) in any chapters not covered in previous submissions to a restricted discretionary activity.

AND/OR

Amend provisions for Indigenous vegetation clearance inside a Significant Natural Area (P4) to assign a lower threshold than clearance off indigenous vegetation outside of SNA for the same activity.

AND/OR

Amend provisions for Indigenous vegetation clearance inside a Significant Natural Area (P4) to provide an overall cap on clearance as a permitted activity.

AND/OR

Amend to clarify the location and extent of areas that might be subject to this rule in order to determine if it is likely to have a significant effect on indigenous biodiversity.

AND/OR

Amend provisions to provide tighter thresholds/ activity status in the Coastal Environment.

Decision Reasons:

- P4 provides for up to 1500m² of vegetation removal for marae complex, 500m² /dwelling, 500m² / building, as a permitted activity.
- Cumulatively this could be a large loss of significant indigenous vegetation and habitat without the ability to address adverse effects through avoiding, remedying, mitigating or offsetting. It is noted that this is the same amount of clearance is provided for non-significant indigenous vegetation.
- As currently drafted this rule does not give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement and Policy 11.4 for the coastal environment.
- The submission lists a number of rules subject to the above and these are provided for as separate submission points.

Point Number 81.73

Summary of Decision Requested: **Amend** Chapter 16: Residential Zone to manage buildings, structures and subdivision within landscape and natural character overlay areas, which may be through activity status, rules and assessment criteria.

Decision Reasons:

- Apart from Rule 16.2.4.4/24.2.4.4 which relates to earthworks in landscape and natural character areas, it appears that no other provisions apply to buildings, structures and subdivision that fall within an overlay area.
- This does not give effect to WRPS Policy 12.1, 12.2 and associated Implementation Methods.

Point Number

81.74

Summary of Decision Requested:

Amend Chapter 24: Village Zone to manage buildings, structures and subdivision within landscape and natural character overlay areas, which may be through activity status, rules and assessment criteria.

Decision Reasons:

- Apart from Rule 16.2.4.4/24.2.4.4 which relates to earthworks in landscape and natural character areas, it appears that no other provisions apply to buildings, structures and subdivision that fall within an overlay area.
- This does not give effect to WRPS Policy 12.1, 12.2 and associated Implementation Methods.

Point Number

81.75

Summary of Decision Requested:

Amend Chapter 1: Introduction to include additional information for the matters it covers to be better understood and by separating its contents into discrete chapters. In particular, discussion of the district's Issues, the Strategic Direction proposed to address these, and that related to Ngāa Iwi o Tainui ki te Waikato Takiwa, Settlement Acts /Co-management/Rivers Vision and Strategies/ Joint Management Agreement should all be provided with separate chapters or sections.

Decision Reasons:

- The submitter considers that several of the matters covered in this chapter are of such significance that there should be more emphasis placed on them, including through provision of more detailed information, and separation into standalone plan chapters.

Point Number

81.76

Summary of Decision Requested:

Amend Section 1.12.2 Natural environment to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports Sections 1.12.2 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number

81.77

Summary of Decision Requested:

Amend Section 1.12.3 Built environment to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports section 1.12.3 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number

81.78

Summary of Decision Requested:

Amend Sections 1.12.4 Ease of movement to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports Sections 1.12.4 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number

81.79

Summary of Decision Requested:

Amend Sections 1.12.5 Community wellbeing to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports Sections 1.12.5 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number

81.80

Summary of Decision Requested:

Amend Section 1.12.6 Employment and economic growth to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports Sections 1.12.6 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number

81.81

Summary of Decision Requested:

Amend Section 1.12.7 Managing change to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports Sections 1.12.7 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number 81.82

Summary of Decision Requested: **Amend** Section 1.12.8 Strategic objectives to clarify whether these are to be considered as strategic objectives or desired outcomes. If they are to be objectives, rewrite in the style of objectives, indicate the connections to relevant policies, and consider other relief sought for a separate chapter on the Strategic Direction of the Proposed Plan, and whether these sections would sit better there.

Decision Reasons:

- The submitter supports Section 1.12.8 in part, but seeks clarity about whether these provisions are to be considered as strategic objectives, or desired strategic directions/outcomes.

Point Number 81.83

Summary of Decision Requested: **Retain** Section 1.4.4 The urban environment, subject to the amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.84

Summary of Decision Requested: **Retain** 1.5.1 Compact urban development, subject to amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.85

Summary of Decision Requested: **Retain** 1.5.2 Planning for urban growth and development, subject to amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.86

Summary of Decision Requested: **Retain** Section 1.5.3 Cross-boundary issues subject to amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.87

Summary of Decision Requested: **Retain Section** 1.5.4 Urban growth, subject to amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.88

Summary of Decision Requested: **Retain** Section 1.5.5 Services and general infrastructure, subject to amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.89

Summary of Decision Requested: **Retain** Section 1.5.6 Transport and logistics, subject to amendments sought in previous submissions for Policy 4.6.3 to show that the requirements of the 2017 National Policy Statement on Urban Capacity (NPS-UDC) have been considered.

Decision Reasons:

- The submitter supports the stated approach of maintaining the productive capacity of Waikato District's rural resource and ensuring that population growth and urban development results in high – amenity urban areas.
- The 'centres based' approach to retail development in Waikato District is also supported, as is accommodation of growth in a more compact urban form that is underpinned by robust master and structure planning exercises and aligned with the agreed Future Proof settlement pattern.
- These approaches assist to some extent with giving effect to the WRPS' policies in respect of a strategic, integrated approach to growth and the provision of infrastructure, but should more clearly articulate the district's responsibilities and proposed responses in respect of urban growth management (see submission points on NPS-UDC – submission points 81.14 and 81.15).

Point Number 81.90

Summary of Decision Requested: **Amend** Section 1.5.6 (c) Transport and logistics to correctly reference the Waikato Regional Land Transport Plan (RLTP).
AND
Amend Section 1.5 Transport and logistics to reference the development of a Hamilton to Auckland passenger rail service that will run through the Waikato District.

Decision Reasons:

- Section 1.5.6(a) Transport and logistics talks about the need to promote a more regional and holistic consideration of the interactions between land use and transport infrastructure.
- There is an opportunity to reference the RLTP, as a document that sets out the strategic framework for land transport in the Waikato Region, including funding.
- Note Section 1.5.6(c) references the Regional Land Transport Strategy.
- This has now been replaced under the Land Transport Management Act by the Regional Land Transport Plan and the Proposed District Plan needs to be updated to reflect this.
- The Proposed Plan's statement in section 1.5.6(c) that public passenger transport will be supported by urban subdivision designs that promote efficient transport routes aligns with regional planning documents. Note that discussion of commuter rail services in section 1.5.6(d) only talks about advocacy for a passenger rail service extension between Pukekohe and Pokeno. The potential for a Hamilton to Auckland passenger rail service currently being investigated should also be acknowledged.

Point Number 81.91

Summary of Decision Requested: **Amend** Section 1.10.2.3 Waikato Region strategies and plans to correctly reference the Waikato Regional Land Transport Plan
AND
Amend Section 1.10 Integration of district plan with other plans and documents to reference the development of a Hamilton to Auckland passenger rail service that will run through the Waikato District.

Decision Reasons:

- Need to update reference to the recently adopted "2018 Update to the Waikato Regional Land Transport Plan 2015-2045" in the list of Waikato region strategies and plans in section 1.10.2.3.
- This section would also benefit from a brief outline on the importance of the RLTP for the Waikato District, as the RLTP contains important policy on regionally significant road and rail infrastructure and the integration of land use and infrastructure.

Point Number 81.92

Summary of Decision Requested: **Amend** Chapter 3.1 Indigenous Vegetation and Habitats to provide for the opportunity to offset non-significant biodiversity.

Decision Reasons:

- The submitter is generally supportive of Section 3.1 indigenous Vegetation and Habitats. However a number of amendments are sought in order to give effect to the WRPS and New Zealand Coastal Policy Statement.
- No Hierarchy or offsetting for non-significant biodiversity as per 11.1/ 11.1.3 WRPS.

Point Number 81.93

Summary of Decision Requested: **Amend** Objective 3.1.1 Biodiversity and ecosystems to clearly state that the outcome that is being worked towards is to achieve no net loss.

Decision Reasons:

- The Proposed District Plan does not clearly state that it seeks to maintain or enhance biodiversity in order to work towards achieving no net loss.
- Policy 11.1(a), Implementation Method 11.1.3 and 11.2.2 of the WRPS seek to achieve no net loss.

Point Number 81.94

Summary of Decision Requested: **Amend** Chapter 3.1 Indigenous Vegetation and Habitats to provide a mitigation hierarchy for indigenous biodiversity outside of a Significant Natural Area.

Decision Reasons:

- Policy 3.2.4 provides for offsetting where there are significant residual effects on indigenous biodiversity outside of a SNA. However, there is no policy that sets out a mitigation hierarchy for indigenous biodiversity outside of a SNA. It is important to link offsetting to a mitigation hierarchy to ensure that adverse effects are avoided, remedied or mitigated before offsetting significant residual adverse effects is considered.
- Implementation Method 11.1.3 of the WRPS provides direction in terms of biodiversity offsets for indigenous biodiversity outside of SNAs. Implementation Method 11.1.3 (a)(ii) states that district plans should promote biodiversity offsets as a way to achieve no net loss of indigenous biodiversity where significant residual adverse effects are unable to be avoided, remedied or mitigated.

Point Number 81.95

Summary of Decision Requested: **Amend** Section 3.2 Significant Natural Areas to ensure that policies related to indigenous biodiversity outside of Significant Natural Area are not under section 3.2 Significant Natural Areas.

Decision Reasons:

- There are provisions in section 3.2 SNAs that apply to indigenous biodiversity outside of an SNA.
- Implementation Method 11.1.3 of the WRPS provides direction in terms of biodiversity offsets for indigenous biodiversity outside of SNAs.
- Implementation Method 11.1.3 (a)(ii) states that district plans should promote biodiversity offsets as a way to achieve no net loss of indigenous biodiversity where significant residual adverse effects are unable to be avoided, remedied or mitigated.

Point Number 81.96

Summary of Decision Requested: **Amend** Section 3.1 Indigenous Vegetation and Habitats to ensure that policies related to indigenous biodiversity outside of Significant Natural Area are not under section 3.2 Significant Natural Areas.

Decision Reasons:

- There are provisions in section 3.2 SNAs that apply to indigenous biodiversity outside of an SNA.
- Implementation Method 11.1.3 of the WRPS provides direction in terms of biodiversity offsets for indigenous biodiversity outside of SNAs.
- Implementation Method 11.1.3 (a)(ii) states that district plans should promote biodiversity offsets as a way to achieve no net loss of indigenous biodiversity where significant residual adverse effects are unable to be avoided, remedied or mitigated.

Point Number 81.97

Summary of Decision Requested: **Amend** Policy 3.1.2(c) Policies as follows:
(c) Provide for the removal of Manuka or Kanuka for domestic firewood or arts and crafts on a sustainable basis.

Decision Reasons:

- The level of Manuka or Kanuka removal identified in 22.2.7 P2 and the purpose of that removal is acceptable to the submitter. However, further detail needs to be added to the policy to ensure that the effects of this type of clearance remain minor.
- This is in line with the WRPS Implementation Method 11.1.4.

Point Number 81.98

Summary of Decision Requested: **Retain** Objective 3.2.1 Significant Natural Areas.

Decision Reasons:

- Objective 3.2.1 is supported as it gives effect to Policy 11.2 of the WRPS.

Point Number 81.99

Summary of Decision Requested: **Retain** Policy 3.2.2 Identify and Recognise.

Decision Reasons:

- The submitter supports the approach of identification and mapping of SNAs. This approach provides landowners with greater certainty and assists with achieving Policy 11.2 of WRPS.

Point Number 81.100

Summary of Decision Requested: **Retain** Schedule 30.5 Urban Allotment.

Decision Reasons:

- The submitter supports the approach of identification and mapping of SNAs. This approach provides landowners with greater certainty and assists with achieving Policy 11.2 of WRPS.
- The submitter also supports the inclusion of Schedule 30.5 which contains a schedule of SNAs on urban environment allotments.

Point Number 81.101

Summary of Decision Requested: **Retain** identification of Significant Natural Area's on planning maps.

Decision Reasons:

- The submitter supports the approach of identification and mapping of SNAs. This approach provides landowners with greater certainty and assists with achieving Policy 11.2 of WRPS.

Point Number 81.102

Summary of Decision Requested: **Amend** Policy 3.2.3 Management hierarchy as follows:
(a) Recognise and protect indigenous biodiversity within Significant Natural Areas by:
(i) avoiding ~~the significant~~ adverse effects of vegetation clearance and the disturbance of habitats ~~unless specific activities need to be enabled~~;
(ii) remedying any effects that cannot be avoided; then
(iii) mitigating any effects that cannot be remedied; and
(iv) after remediation or mitigation has been undertaken, offset ~~any significant residual~~ more than minor adverse effects in accordance with Policy 3.2.4.

Decision Reasons:

- Policy 3.2.3 is generally supported; however, some amendments are required to ensure that the Policy gives effect to Implementation Method 11.2.2 of the WRPS.
- Policy 3.2.3(a)(i) states that significant adverse effects will be avoided unless specific activities need to be enabled. Firstly, the policy sets the bar at 'significant adverse effects' being avoided.

- Implementation Method 11.2.2(b) of the WRPS requires that all adverse effects are avoided.
- Secondly, no further guidance is provided on what the specific activities that need to be enabled are. This is potentially referring to those circumstances covered by Policy 3.2.1 of the Proposed Plan, however it is not clear. Implementation Method 11.1.4 of the WRPS recognises that some activities with minor adverse effects on indigenous biodiversity may be permitted.
- In addition, Policy 3.2.3(a)(iv) requires that any significant residual adverse effects be offset. WRPS Method 11.2.2(d) requires offsets where more than minor residual adverse effects remain. 'Significant' is a much higher threshold than 'more than minor' and may result in residual adverse effects not being addressed.

Point Number 81.103

Summary of Decision Requested: **Amend** Policy 3.2.4 Biodiversity Offsetting to address biodiversity offsets in relation to indigenous biodiversity outside of Significant Natural Areas.

Decision Reasons:

- As currently worded, Policy 3.2.4(a) addresses biodiversity offsets in both SNA's and indigenous biodiversity outside of SNA's. The rest of the Policy only addresses offsets in relation to SNA's. It is important that offsetting in relation to indigenous biodiversity outside of SNA's is also subject to a robust assessment framework.
- Outside of SNA's, WRPS Implementation Method 11.1.3(a)(ii) promotes biodiversity offsets where significant residual adverse effects remain. Within SNA's, WRPS Method 11.2.2(d) requires offsets where more than minor residual adverse effects remain.
- Policy 3.2.4 is intended to apply to both SNA and indigenous biodiversity outside of SNA. However it comes under section 3.2 SNA's.

Point Number 81.104

Summary of Decision Requested: **Retain** Objective 3.3.1 Outstanding natural features and landscapes.

Decision Reasons:

- Objective 3.3.1 is supported as it gives effect to Objective 3.20 and Policy 12.1 of the WRPS.

Point Number 81.105

Summary of Decision Requested: **Amend** Section 3.3 Outstanding Natural Features and Landscapes to require that adverse effects of activities on the values and characteristics of Outstanding Natural Feature Landscapes are avoided in the coastal environment.

Decision Reasons:

- The policy framework under section 3.3 takes the same approach to Outstanding natural features and landscapes (ONFL) regardless of whether they are in the coastal environment or outside of the coastal environment. Policy 6.2(c), Implementation Method 12.1.1 (a)(i) of the WRPS and Policy 15 of the New Zealand Coastal Policy Statement require that the adverse effects of activities on ONFL are avoided. Policy 3.3.3 (iv) of the Proposed Plan talks about avoiding, however that is only in the context of two specific activities; extractive industries and earthworks.

Point Number 81.106

Summary of Decision Requested: **Amend** Section 3.3 Outstanding Natural Features and Landscapes to ensure that, for areas outside of the coastal environment, the hierarchy set out in Implementation Method 12.1.1(a)(ii) of the WRPS is reflected. I.e. avoid adverse effects, where avoidance is not possible remedy or mitigate.

Decision Reasons:

- For areas outside of the coastal environment, the policy framework in section 3.3 does not reflect the mitigation hierarchy that is expressed in Implementation Method 12.1.1(a)(ii) of the WRPS that is avoid adverse effects of activities on the values and characteristics of ONFL, and if avoidance is not possible remedy or mitigate the adverse effects.

Point Number 81.107

Summary of Decision Requested: **Amend** Section 3.3 Outstanding Natural Features and Landscapes to address cumulative adverse effects.

Decision Reasons:

- The policies do not specifically address cumulative adverse effects as required by Policy 12.1 of the WRPS.

Point Number 81.108

Summary of Decision Requested: **Retain** objectives, policies, rules and maps for Significant Amenity Landscapes.

Decision Reasons:

- The submitter supports the approach to significant amenity landscapes as a way to give effect to Policy 12.3 of the WRPS.

Point Number 81.109

Summary of Decision Requested: **Retain** Objective 3.5.1 Natural character.

Decision Reasons:

- Objective 3.5.1 is supported as it gives effect to Objective 3.22 of the WRPS.

Point Number 81.110

Summary of Decision Requested: **Retain** Objective 4.1.1 Strategic, except for the amendments sought below

OR

Amend Objective 4.1.1 Strategic to ensure that these provisions provide a focused, integrated strategic direction in respect of the districts urban environments.

OR

Add to Objective 4.1.1 Strategic additional Objectives to ensure that these provisions provide a focused, integrated strategic direction in respect of the district's urban environments.

Decision Reasons:

- Objective 4.1.1 is supported in part as they will assist to some extent with giving effect to the WRPS and the Future Proof Strategy Planning for Growth 2017's (Future Proof Strategy's) direction for Waikato District's urban environment.
- Amendments (or additional objectives) are required to: provide more focussed, integrated strategic direction for the district's urban environments; relating to accommodating urban growth and development in Waikato District; and give effect to the National Policy Statement on Urban Development Capacity (NPS-UDC) and the WRPS.

Point Number 81.111

Summary of Decision Requested: **Retain** Objective 4.1.2 Urban growth and development, except for the amendments sought below
AND

Amend Objective 4.1.2 Urban growth and development to ensure that these provisions provide a focused, integrated strategic direction in respect of the district's urban environments.

OR

Add to Objective 4.1.1 Urban growth and development additional Objectives to ensure that these provisions provide a focused, integrated strategic direction in respect of the district's urban environments.

Decision Reasons:

- Objective 4.1.2 is supported in part as they will assist to some extent with giving effect to the WRPS and the Future Proof Strategy Planning for Growth 2017's (Future Proof Strategy's) direction for Waikato District's urban environment.
- Amendments (or additional objectives) are required to: provide more focussed, integrated strategic direction for the district's urban environments; relating to accommodating urban growth and development in Waikato District; and give effect to the National Policy Statement on Urban Development Capacity (NPS-UDC) and the WRPS.

Point Number 81.112

Summary of Decision Requested: **Amend** Objective 4.1.1 Strategic as follows to:

- Clarify whether it applies to both urban and rural communities

- More explicitly refer to planned growth and development that is integrated with infrastructure provision;

- Specify what proportion of the additional dwellings to be created between 2018-2045 are to be provided within the 10 year timeframe for this district plan and whether they will be serviced; and

- Identify what portion of the additional dwellings to be provided are anticipated to be located within the district's urban environments.

Decision Reasons:

- The Objective fails to provide direction on other matters critical to ensuring thriving, sustainable urban environments, including the management of natural or ecological values in the urban environment and management of conflicts between rural and urban environments or different types of urban activities, such as those of an industrial and residential nature.
- The submitter considers that additional strategic objectives should be included to address these matters.
- To meet the requirements of the NPS-UDC there should also be an objective that sets out the district's minimum targets for sufficient, feasible development capacity for housing, with associated policies. (Note: WRPS Policies 6.1, 6.3, 6.14, 6.16 and 6.17).

Point Number 81.113

Summary of Decision Requested: **Amend** Objective 4.1.2 Urban Growth and Development to:

- Clarify that urban growth and development is only to occur within and around towns and villages identified in the settlement pattern set out in the Future Proof Strategy and WRPS; and

- Direct that urban growth and development will only occur where there is existing or planned supporting infrastructure.

Decision Reasons:

- The Objective fails to provide direction on other matters critical to ensuring thriving, sustainable urban environments, including the management of natural or ecological values in the urban environment and management of conflicts between rural and urban environments or different types of urban activities, such as those of an industrial and residential nature.
- The submitter considers that additional strategic objectives should be included to address these matters.
- To meet the requirements of the NPS-UDC there should also be an objective that sets out the district's minimum targets for sufficient, feasible development capacity for housing, with associated policies. (Note: WRPS Policies 6.1, 6.3, 6.14, 6.16 and 6.17).
- This submission point is the same as that of 81.117 except that it refers to Objective 4.1.1 rather than 4.1.2.

Point Number 81.114

Summary of Decision Requested: **Amend** Policy 4.1.3 Location of development

OR

Amend Policy 4.1.3 Location of development to include additional policy for urban residential activities that is similar to Policy 4.1.6. The additional policy should specify:

- Which of the plan's residential zones are to apply in the district's urban towns and villages;

- That rural-residential subdivision and development is not to occur in urban areas;

- Exactly what is meant by the term 'infrastructure' as used in the policy, for example if it includes on-site waste water treatment, such as might be used in rural towns and villages; and

- That urban residential development is to occur primarily in accordance with the Future Proof Strategy (and any additional locations identified through the Future Proof update and Auckland to Hamilton Spatial Plan currently underway) where infrastructure to support development of an urban nature is or will be available over the term of the district plan; and whether and which of these locations are identified as priority growth areas for the district.

Decision Reasons:

- Policy direction similar to that contained in Policy 4.1.6 in respect of the zoning and location of commercial and industrial development should be included in respect of residential development.
- The policy should identify the zones that provide for urban scale residential development; the specific towns and villages where it is envisaged that residential growth and development is to occur, consistent with the Future Proof Strategy, and giving effect to the WRPS; and which of these the district intends to prioritise for growth and infrastructure provision over the term of the plan.
- Stage 2 of the Future Proof Strategy Update may have changes to the current settlement pattern, and these should be reflected in the district plan provisions.

Point Number 81.115

Summary of Decision Requested: **Amend** Policy 4.1.3 Location of development to take into account high class soils, significant natural areas, outstanding natural features and landscapes, natural character and hazards.

Decision Reasons:

- Policy 4.1.3 also directs the location of urban development, however, does not take into account consideration of high class soils, SNAs, outstanding natural features and landscapes, natural character and hazards.
- This policy should be expanded to take these into account, giving effect to the WRPS provisions such as Policies 14.2, 13.2, 12.1 and 6.1 among others. (Note: WRPS Policies 6.1, 6.3, 6.6, 6.14 and Section 6A).

Point Number 81.116

Summary of Decision Requested: **Amend** Policy 4.1.4 – Staging of development to include details on how subdivision, use and development of new urban areas within urban towns and villages is to be integrated and staged in areas where a 'live' zoning is proposed, but where infrastructure does not currently exist or is not planned to be provided over the timeframe of the district plan.

Decision Reasons:

- This policy is supported as it will assist with ensuring a co-ordinated approach to infrastructure provisions and integration of growth and infrastructure provision, however, it does not provide clear guidance on how infrastructure and staging of development will be integrated. (Note: WRPS Policies 6.1, 6.3, 6.14 and Section 6A).

Point Number 81.117

Summary of Decision Requested: **Amend** Policy 4.1.5 Density to indicate that in the Residential zone closest to Business Town Centre zones, **it is anticipated that a higher density per hectare is to be achieved.**

Decision Reasons:

- It is anticipated that a higher density per hectare is to be achieved.
- The submitter is concerned that the proposed densities for the Residential and Village zones do not accurately reflect the Future Proof density targets and the WRPS' Policy 6.15 *Density targets for the Future Proof area*.
- The WRPS targets are expressed as average gross density targets, are specific to greenfield developments for identified towns in Waikato District, and there are no specific densities provided for the district's established urban environments.
- Higher minimum densities than those proposed are more appropriate for established residential areas immediately adjacent to the Business Town Centre zones.
- Higher residential densities around this zone would better support public transport and other infrastructure, the commercial vitality of the town centre and promote people living, working and playing in their local town centres. The submitter notes that the draft *North Waikato Integrated Growth Management Programme Business Case* states that a density of approximately 17 dwellings per hectare would be required to support a commuter train service at Tuakau.
- The submission notes that this submission point should be read in conjunction with submission 81.118

Point Number 81.118

Summary of Decision Requested: **Amend** Policy 4.1.5 Density to indicate a higher minimum density than is currently proposed for serviced sites within the Village Zone.

Decision Reasons:

- Concerned that the proposed minimum density of 8-10 households per hectare for sites in the Village Zone where public reticulated services can be provided does not give effect to the WRPS' Policy 6.15, which seeks to achieve compact urban environments.
- The density proposed for the Village Zone is equivalent to the WRPS' direction for density in greenfield developments in Waikato's rural villages, and is an average gross density target.
- Densities for these serviced sites should more resemble those in the Residential Zone. This would assist with promoting a more compact, sustainable urban form and supporting efficient infrastructure provision.

Point Number 81.119

Summary of Decision Requested: **Retain** Policy 4.1.6 Commercial and industrial activities.

Decision Reasons:

- Policy 4.1.6 is supported.
- This policy will assist with giving effect to the WRPS' policy direction regarding the location of commercial and industrial activities. (Note: WRPS Policies 6.1; 6.14; 6.16; and Section 6A).

Point Number 81.120

Summary of Decision Requested: **Amend** Objective 4.1.7 Character of towns to ensure that these provisions provide a focused/integrated and strategic direction in respect of the district's urban environments.

OR

Amend Objective 4.1.7 Character of towns to add additional objectives to better support and align with the matters covered by the associated policies, including that the existing residential and commercial character of the district's urban environments is to be maintained and enhanced by new growth and development.

Decision Reasons:

- Provisions supported in part, but the submitter considers however that the Objective, including its title, does not align well with the content of the associated policies insofar as the policies address a broader range of matters than are included in the Objective, including subdivision, density, landscape characteristics and reverse sensitivity issues.
- The submitter considers that the objective should be amended, or new objectives added, to ensure better alignment with related policies. For example, the objective should address the issue of new development connecting well with the existing built environment.
- The submission includes some detail about why they support the provisions (in part).
- The submission notes the relevant sections of the WRPS.

Point Number 81.121

Summary of Decision Requested: **Amend** provisions to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the timing and staging of new development, and its integration with the existing towns.

Decision Reasons:

- As proposed, the plan contains no zone descriptions that could assist with an understanding of the desired urban outcomes for the Residential, Village, Industrial and Business zones.
- The submission notes the relevant sections of the WRPS.

Point Number 81.122

Summary of Decision Requested: **Amend** to include additional provisions, including Objectives, Policies, zone descriptions and references to the design guidelines in Appendix 3, character statements for specific towns and villages in Appendix 10 and structure plans included in other appendices to the plan, to assist with an

understanding of the particular character, development focus and desired, strategic outcome(s) for each of the identified towns and villages; and how these outcomes are to be achieved.

Decision Reasons:

- There is no cross-referencing to the design guidelines in Appendix 3 which are the focus of Policies 4.1.10-4.1.18, the character statements for specific towns and villages in Appendix 10 and structure plans included in other appendices to the plan.
- Cross-referencing to these provisions would assist with better achieving Objective 4.1.7, and provide greater clarity and understanding about the particular character, development focus and desired outcome(s) for each of the identified towns and villages.
- The submission notes the relevant sections of the WRPS.

Point Number 81.123

Summary of Decision Requested: **Amend** to include cross-referencing to Policies in Section 4.5 Business and Business Town Centre Zones, including Policies 4.5.14 – 4.5.19, and any other relevant sections of the plan, to enable plan users to obtain a full understanding of the policy direction in relation to the character of these places, and for an integrated approach to be taken to their growth and development.

Decision Reasons:

- The policies sitting under this Objective should be cross-referenced to Policies in Section 4.5 *Business and Business Town Centre Zones*, including Policies 4.5.14 – 4.5.19, and any other relevant sections of the plan. This would enable plan users to obtain a full understanding of the policy direction in relation to the desired settlement patterns and urban outcomes of these places, and for an integrated approach to be taken to their growth and development.
- The submission notes the relevant sections of the WRPS.

Point Number 81.124

Summary of Decision Requested: **Amend** rules in Chapter 16: Residential Zone to capture the intended location specific character and density sought.

Decision Reasons:

- There are no rules or other methods in Chapters 16 that are clearly targeted to achieve the outcomes sought for particular towns and villages identified in Policies 4.10-4.1.18.
- The submission notes the relevant sections of the WRPS.

Point Number 81.125

Summary of Decision Requested: **Amend** rules in Chapter 17 : Business Zone to capture the intended location specific character and density sought.

Decision Reasons:

- There are no rules or other methods in Chapter 17 that are clearly targeted to achieve the outcomes sought for particular towns and villages identified in Policies 4.10-4.1.18.
- The submission notes the relevant sections of the WRPS.

Point Number 81.126

Summary of Decision Requested: **Retain** Objective 4.2.16 Housing options.

Decision Reasons:

- The submitter supports this objective as it assists with giving effect to the WRPS' direction relating to the integration of land use with public transport: WRPS Policies 6.1; Policy 6.3 and Section 6A.

Point Number 81.127

Summary of Decision Requested: **Retain** Policy 4.2.17 Housing types.

Decision Reasons:

- The submitter supports this Policy as it assists with giving effect to the WRPS' direction relating to the integration of land use with public transport: WRPS Policies 6.1; Policy 6.3 and Section 6A.

Point Number 81.128

Summary of Decision Requested: **Retain** Policy 4.2.18 Multi-unit development.

Decision Reasons:

- The submitter supports this Policy as it assists with giving effect to the WRPS' direction relating to the integration of land use with public transport: WRPS Policies 6.1; Policy 6.3 and Section 6A.

Point Number 81.129

Summary of Decision Requested: **Amend** Objective 4.3.1 Village Zone character to include a description or explanation of the character and purpose of the Village Zone including anticipated intensity of development.

Decision Reasons:

- Submitter seeks amendments to provisions to provide greater clarity about critical elements of the character of the Village Zone that is to be maintained, (for example, the rationale behind the desired intensity of development) and to make a stronger correlation between infrastructure provision and the outcomes sought in terms of the zone.
- The submitter is concerned that in combination, the minimum density of 8-10 households per hectare for Village Zone sites proposed in Policy 4.1.5 Density where public reticulated services can be provided, and the requirement for a 3000m² minimum lot size (Rule 24.4.1) promote a rural rather than an urban outcome for the Village Zone.
- This would not achieve the sustainable, compact urban form necessary to support efficient, effective transport and other infrastructure services.
- The submitter is also of the view that the density policy and subdivision rule promote a settlement pattern that will be difficult to change if additional, more intensive development is required to provide for future growth around the district's urban settlements.

Point Number 81.130

Summary of Decision Requested: **Amend** Policy 4.3.2 Character to provide greater clarity about the character of the Village Zone; to make a stronger correlation between

infrastructure provision and the outcomes sought in terms of the Village zone; and to remove reference to 'semi-rural character'.

Decision Reasons:

- Submitter seeks amendments to the provisions to provide greater clarity about critical elements of the character of the Village Zone that is to be maintained, (for example, the rationale behind the desired intensity of development) and to make a stronger correlation between infrastructure provision and the outcomes sought in terms of the zone.
- The submitter is concerned that in combination, the minimum density of 8-10 households per hectare for Village Zone sites proposed in Policy 4.1.5 Density where public reticulated services can be provided, and the requirement for a 3000m² minimum lot size (Rule 24.4.1) promote a rural rather than an urban outcome for the Village zone. This would not achieve the sustainable, compact urban form necessary to support efficient, effective transport and other infrastructure services.
- The submitter is also of the view that the density policy and subdivision rule promote a settlement pattern that will be difficult to change if additional, more intensive development is required to provide for future growth around the district's urban settlements.
- The 'semi-rural character' reference is inappropriate for a zone that is to be used to manage activities in an urban environment.

Point Number

81.131

Summary of Decision Requested:

Amend Policy 4.3.3 Future development –Tuakau and Te Kowhai, to provide greater clarity about the urban outcomes sought for the Village Zone, including anticipated development density; to make a stronger correlation between infrastructure provision and the outcomes sought for the zone; and to remove reference to 'semi-rural character'

Decision Reasons:

- The submitter questions the extent to which it will achieve Objective 4.3.1 *Village Zone character*, to which it relates.
- The submitter submits that the policy should be amended to provide greater clarity about the Village Zone character that is to be maintained, including anticipated density of development, and to make a stronger correlation between subdivision, infrastructure provision and the outcomes sought in terms of the Village zone. In addition changes resulting from the Auckland-Hamilton Corridor Spatial Plan and Future Proof Strategy Phase 2 Review may influence whether this zoning is appropriate in these locations (Note: WRPS Policies 6.1, 6.3 and Section 6A).

Point Number

81.132

Summary of Decision Requested:

Retain Policy 4.3.1.1 Maintain residential function.

Decision Reasons:

- The submitter supports this Policy, as it will assist with giving effect to the WRPS' policy direction relating to the Future Proof settlement pattern. (Note: WRPS Policies 6.1, 6.14 and Section 6A).

Point Number

81.133

Summary of Decision Requested:

Retain Policy 4.5.1 Commercial function and purpose.

Decision Reasons:

- This Policy assists with giving effect to the WRPS' policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area. (Note: WRPS Policies 6.1, 6.14, 6.16, Section 6A; and Table 6-4).

Point Number

81.134

Summary of Decision Requested:

Retain Policy 4.5.2 Commercial function and purpose.

Decision Reasons:

- This Policy assists with giving effect to the WRPS' policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area. (Note: WRPS Policies 6.1, 6.14, 6.16, Section 6A; and Table 6-4).

Point Number

81.135

Summary of Decision Requested:

Retain Policy 4.5.3 Commercial purpose: Business Town Centre Zone.

Decision Reasons:

- This Policy assists with giving effect to the WRPS' policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area. (Note: WRPS Policies 6.1, 6.14, 6.16, Section 6A; and Table 6-4).

Point Number

81.136

Summary of Decision Requested:

Retain Policy 4.5.4 Commercial purpose: Business Zone.

Decision Reasons:

- This Policy assists with giving effect to the WRPS' policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area. (Note: WRPS Policies 6.1, 6.14, 6.16, Section 6A; and Table 6-4).

Point Number

81.137

Summary of Decision Requested:

Amend maps to show identified Neighbourhood Centres within the planning maps and not only on master and structure plans.

Decision Reasons:

- The submitter seeks clarity that Neighbourhood Centres will be depicted on the Planning maps, and not only on master and structure plans.
- The submission also states that WRC supports Policy 4.5.7 in principal but subject to the relief sought.

Point Number

81.138

Summary of Decision Requested:

Retain Policy 4.5.13 Town centre built form.

Decision Reasons:

- This policy gives effect to the WRPS' direction on encouraging walking, cycling and multi-modal transport and maximising opportunities for people to live, work and play within their local areas. (Note: WRPS Policies 6.1, 6.14, 6.16, Section and Table 6-4.)

Point Number 81.139

Summary of Decision Requested: **Retain** Objective 4.6.1 Economic growth of industry.

Decision Reasons:

- This objective will assist with maintaining the Future Proof settlement pattern and retaining industrial activities primarily within identified industrial nodes. (Note WRPS Policy 6.1.4)

Point Number 81.140

Summary of Decision Requested: **Retain** Policy 4.6.4 Maintain industrial land for industrial purposes.

Decision Reasons:

- The submitter supports this Policy as it will assist with maintaining the Future Proof settlement pattern, retaining industrial activities primarily within identified industrial nodes and managing reverse sensitivity issues. (Note WRPS Policies 6.1, 6.14 and Section 6A.)

Point Number 81.141

Summary of Decision Requested: **Retain** Objective 4.6.6 Manage adverse effects.

Decision Reasons:

- The submitter supports this Objective as it assists with giving effect to the WRPS direction relating to the need to have regard to reverse sensitivity effects. (Note WRPS Policy 6.1 and Section 6A).
- The submission should be read in conjunction with submission point 81.147 (submission on Policy 4.6.7)

Point Number 81.142

Summary of Decision Requested: **Retain** Policy 4.6.7 Management of adverse effects within industrial zones.

Decision Reasons:

- The submitter supports this Policy as it assists with giving effect to the WRPS direction relating to the need to have regard to reverse sensitivity effects. (Note WRPS Policy 6.1 and Section 6A)
- The submission should be read in conjunction with submission point 81.146 (submission on Objective 4.6.6).

Point Number 81.143

Summary of Decision Requested: **Retain** Objective 4.7.1 Subdivision and Land Use Integration.

Decision Reasons:

- This will give effect to the WRPS Policies 6.1, 6.3 and Section 6A regarding a planned, co-ordinated approach to subdivision, use and development and infrastructure provision.

Point Number 81.144

Summary of Decision Requested: **Amend** Rule 14.11.1.1 PI Permitted Activities to add advice notes regarding the Waikato Stormwater Management Guideline and Waikato Stormwater Runoff Modelling Guideline.

Decision Reasons:

- A note should be provided referring to following the guidance provided in the Waikato Regional Council's Waikato Stormwater Management Guideline and Waikato Stormwater Runoff Modelling Guidelines.

Point Number 81.145

Summary of Decision Requested: **Amend** Rule 14.11.2 RD1 Restricted Discretionary Activities to include a new point (c) as follows:

(c) The potential for adverse effects to the environment in terms of stormwater quantity and stormwater quality effects.

Decision Reasons:

- The effects on the environment of stormwater quality and quantity are not included as a matter of discretion.
- This change is recommended to ensure that storm water systems are appropriately designed to address potential adverse effects to the environment.

Point Number 81.146

Summary of Decision Requested: **Amend** the Section 32 analysis of the road hierarchy to ensure that the One Network Road Classification has been considered when forming Table 14.12.5.5.

Decision Reasons:

- The NZ Transport Agency has developed the One Network Road Classification as a tool to categorise roads based on their use, and to subsequently fund the road infrastructure accordingly. Clarification is sought that the road hierarchy reflects the actual and future anticipated levels of movement, in alignment with the One Network Road Classification, as this will influence the availability of funding, and may affect the ability of the road network infrastructure to meet the requirements of users and the associated land uses.

Point Number 81.147

Summary of Decision Requested: **Retain** Table 14.12.5.10 Required bicycle spaces.

Decision Reasons:

- Support requirement for bicycle spaces for all activities in section 14.12.5.10 to facilitate the uptake of cycling. The Waikato Regional Land Transport Plan supports the provision for alternative modes of transport, such as cycling.

Point Number 81.148

Summary of Decision Requested: Retain Rule 16.1.2 P3 Permitted Activities.

Decision Reasons:

- The submitter supports the rule's encouragement for location of retirement villages within 400 metres walking distance of public transport, as this assists with giving effect to the WRPS Policies 6.1 and 6.3, and Section 6A Development Principles.
- It also assists with giving effect to the Proposed Plan's Objective 4.2.16 *Housing options* and Policy 4.2.17 *Housing types*.

Point Number 81.149

Summary of Decision Requested: Add to Rule 16.1.3 RD | A Multi-Unit development a new condition as follows:

The development is either serviced by or within 400m walking distance of public transport.

Decision Reasons:

- The submitter supports the provision and considers that it will assist to some degree with the achievement of Objective 4.2.16 Staging options and Policies 2.2.17 *Housing types* and 4.2.18 Multi-unit development, however considers that there should be an incentive in the rule, similar to Rule 16.1.2 *Permitted Activities - P3* to encourage this type of development to locate within 400 metres walking distance of public transport.
- This would assist with giving effect to the WRPS' direction in Policies 6.1, 6.3 and Section 6A *Development Principles*.

Point Number 81.150

Summary of Decision Requested: Amend Rule 14.11.1.1 P1 Permitted Activities to include additional clauses that address:

- Water quality treatment
- Downstream erosion and scour effects
- Cumulative volume effects.

Decision Reasons:

- Wording is proposed to support a shift to low impact design stormwater management systems that manage stormwater at source through retention devices rather than relying on large detention devices downstream.
- This approach is recommended by the submitter and is outlined in Council's Waikato Stormwater Management Guideline.

Point Number 81.151

Summary of Decision Requested: Amend Rule 16.4.1 RD1 Subdivision – General to allow for more intensive subdivision in Residential areas directly adjacent to the Business Town Centre zones at Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata and Tuakau.

Decision Reasons:

- The submitter is concerned that applying this minimum lot size to areas directly adjacent to the Business Town Centre zones for the towns of Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata and Tuakau will not enable the achievement of a range of the plan's objectives and policies for the urban environment, including those relating to housing choice; density aligned with the Future Proof Strategy; and promotion of subdivision, land use and development that encourages thriving, sustainable town centres, and integrates with and is supportive of provision of public transport and other infrastructure.
- Submission refers to WRPS Policies 6.1 *Planned and co-ordinated subdivision, use and development*; Policy 6.3 *Co-ordinating growth and infrastructure*; Policy 6.16 *Commercial development in the Future Proof area*; and Section 6A *Development principles*.

Point Number 81.152

Summary of Decision Requested: Add a new alternative residential or mixed use zone or an overlay to the residential zone, or any other method, that includes objective(s) and policy(ies) that provide for a more intensive residential pattern around the Business Town Centre zones at Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata and Tuakau.

Decision Reasons:

- The submitter is concerned that applying this minimum lot size to areas directly adjacent to the Business Town Centre zones for the towns of Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata and Tuakau will not enable the achievement of a range of the plan's objectives and policies for the urban environment, including those relating to housing choice; density aligned with the Future Proof Strategy; and promotion of subdivision, land use and development that encourages thriving, sustainable town centres, and integrates with and is supportive of provision of public transport and other infrastructure.
- Submission refers to WRPS Policies 6.1 *Planned and co-ordinated subdivision, use and development*; Policy 6.3 *Co-ordinating growth and infrastructure*; Policy 6.16 *Commercial development in the Future Proof area*; and Section 6A *Development principles*.

Point Number 81.153

Summary of Decision Requested: Amend Rule 17.1.2 Permitted Activities – P1 Commercial activity and P2 Commercial services to clarify which particular activities are appropriate for each zone.

Decision Reasons:

- These rules allow for commercial activity and commercial services as permitted activities in both the Business and Business Town Centre zones.
- Allowing the same activities to occur in both zones creates unnecessary and inappropriate competition between the Town Centre and Business Zones, and does not promote a supportive, complimentary role for them.
- This is not consistent with the policy approach set out in Section 4.5, which seeks to encourage a wide range of commercial activities in both zones, the town centres focusing on retail, administration, commercial and civic centre activities, the Business Zone discouraging small scale retail and focusing on large format retail.
- The submitter seeks clarification about the rationale behind the rules, and is concerned that they do not give proper effect to the WRPS' Policy 6.16 or the policy framework for these zones contained in Section 4.5: of the Proposed Plan.

Point Number 81.154

Summary of Decision Requested: Amend Rule 18.1.2 P1 Commercial activity and P3 Commercial services to clarify which particular activities are appropriate for each zone.

Decision Reasons:

- These rules allow for Commercial activity and Commercial services as permitted activities in both the Business and Business Town Centre zones.
- Allowing the same activities to occur in both zones creates unnecessary and inappropriate competition between the Town Centre and Business Zones, and does not promote a supportive, complimentary role for them.
- This is not consistent with the policy approach set out in Section 4.5, which seeks to encourage a wide range of commercial activities in both zones, the town centres focusing on retail, administration, commercial and civic centre activities, the Business Zone discouraging small scale retail and focusing on large format retail.
- The submitter seeks clarification about the rationale behind the rules, and is concerned that they do not give proper effect to the WRPS' Policy 6.16 or the policy framework for these zones contained in Section 4.5: of the Proposed Plan.

Point Number 81.155

Summary of Decision Requested: **Amend** the definitions of "Commercial activity" and "Commercial services" to better distinguish large format from small scale activities.

Decision Reasons:

- These rules allow for Commercial activity and Commercial services as permitted activities in both the Business and Business Town Centre zones.
- Allowing the same activities to occur in both zones creates unnecessary and inappropriate competition between the Town Centre and Business Zones, and does not promote a supportive, complimentary role for them.
- This is not consistent with the policy approach set out in Section 4.5, which seeks to encourage a wide range of commercial activities in both zones, the town centres focusing on retail, administration, commercial and civic centre activities, the Business Zone discouraging small scale retail and focusing on large format retail.
- The submitter seeks clarification about the rationale behind the rules, and is concerned that they do not give proper effect to the WRPS' Policy 6.16 or the policy framework for these zones contained in Section 4.5: of the Proposed Plan.

Point Number 81.156

Summary of Decision Requested: **Add** to Rule 17.1.3 – RD 1 A Multi-Unit development a new condition as follows:

The development is either serviced by or within 400m walking distance of public transport.

Decision Reasons:

- The submitter supports this provision, however, seeks an incentive in the rule, similar to Rule 16.1.2 P3 to encourage this type of development to locate within 400 metres walking distance of public transport. This helps to give effects to WRPS Policies 6.1 and 6.3 and Section 6A Development Principles.
- Proposals not meeting the relief sought could be assessed as discretionary activities but has this not been sought this as specific relief.

Point Number 81.157

Summary of Decision Requested: **Retain** Rule 18.1.3 RD1 Restricted Discretionary Activities.

Decision Reasons:

- The submitter supports the provision for multi-unit development in the Business Town Centre Zone, and considers that it will assist with achieving Objective 4.2.16 and Policies 4.2.17 and 4.2.18.

Point Number 81.158

Summary of Decision Requested: **Add** to Section 20.5 rules addressing the management of stormwater in the Nau Mai Business Park.

Decision Reasons:

- It appears there are no rules in relation to managing stormwater from development in the Nau Mai Business Park.
- Appropriate low impact stormwater management needs to be undertaken at the Nau Mai Business Park to ensure no adverse environmental effects from stormwater runoff.

Point Number 81.159

Summary of Decision Requested: **Add** to Rule 22.1.8 P8 Forestry to have an activity specific condition as follows:

Afforestation must not occur within 10m of a Significant Natural Area.

Decision Reasons:

- The National Environment Standard for Plantation Forestry (NESPf) provides for afforestation as a permitted activity in certain circumstances.
- Regulation 14 of the NESPf sets out a number of permitted activity conditions. Regulation 14(1)(d) requires that afforestation must not occur within 10m of an SNA. There are no activity specific conditions that apply to P8 Forestry in the Proposed Plan.

Point Number 81.160

Summary of Decision Requested: **Amend** Rule 22.1.5 D15 Discretionary Activities to include afforestation of significant natural areas as a discretionary activity.

Decision Reasons:

- In the Rural Zone "Afforestation of any part of an Outstanding or Natural Character Area or High Natural Character Area" is a discretionary activity.
- National Environmental Standard for Plantation Forestry Regulation 12 states that afforestation must not occur within a SNA or an outstanding natural feature or landscape.
- Regulation 16 (1) states that afforestation is a restricted discretionary activity if regulation 12 cannot be met. Regulation 6 provides certain circumstances in which a rule in a plan can be more stringent than the regulations. These include where a rule gives effect to NZCPS policies 11, 13, 15 and 22 and matters of national importance (Outstanding Natural Feature Landscape and SNA). Given this, it is considered that a discretionary activity status is available and appropriate to ensure that the WRPS and NZCPS are given effect to. However, it is noted that the drafting of D15 should include afforestation as a discretionary activity in SNAs also. As currently drafted it could be considered a permitted activity under 22.1.2 P8.

Point Number 81.161

Summary of Decision Requested: **Amend** Rule 22.1.5 D15 Discretionary Activities to make it clear that includes Outstanding Natural Features and Outstanding Natural Landscapes.

Decision Reasons:

- The drafting of D15 could be improved to provide certainty as to the areas that it applies to.

Point Number 81.162

Summary of Decision Requested: **Clarify** the earthwork thresholds (area and volume) for the landscape and natural character areas, across all zones.

Decision Reasons:

- The submitter notes that the earthwork thresholds are lower for Landscape and Natural Character Areas in comparison to the rest of the Rural Zone. This is appropriate to achieve Policy 12.1, 12.2 and 12.3 of the WRPS.
- However, the submitter seeks clarity on what the thresholds are for the second part of the table that runs onto page 13. It is unclear if the 50m² area and 250m³ volume applies or if the figures have been omitted.

Point Number 81.163

Summary of Decision Requested: **Retain** Rule 22.3.1 Number of dwellings within a lot.

Decision Reasons:

- The submitter supports the provision of dwellings, buildings and structures in landscape or natural character areas as a discretionary activity. This gives effect to Policy 6.2, 12.1, 12.2, 12.3 of the WRPS.

Point Number 81.164

Summary of Decision Requested: **Amend** Rule 22.3.2 Minor dwelling to make a minor dwelling in an Outstanding Natural Feature, Outstanding Natural Landscape, Outstanding Natural Character Area or High Natural Character Area a discretionary activity.

Decision Reasons:

- It is unclear what activity status a minor dwelling would have in an Outstanding Natural Feature, Outstanding Natural Landscape, Outstanding Natural Character Area or High Natural Character Area. Would it be captured by 22.3.2 P1 or would it be subject to 22.3.3?
- For consistency and to enable the effects on the Outstanding Natural Feature, Outstanding Natural Landscape, Outstanding Natural Character Area or High Natural Character Area to be assessed, discretionary activity is sought for minor dwellings in these areas.

Point Number 81.165

Summary of Decision Requested: **Retain** Rule 22.3.3 Buildings and structures in Landscape and Natural Character Areas.

Decision Reasons:

- The submitter supports the provision of dwellings, buildings and structures in landscape or natural character areas as a discretionary activity. This gives effect to Policy 6.2, 12.1, 12.2, 12.3 of the WRPS.

Point Number 81.166

Summary of Decision Requested: **Retain** Rule 22.4.1.1 Prohibited subdivision.

Decision Reasons:

- The prohibited activity status for certain types of subdivision on high quality soils is supported noting WRPS Policy 14.2 and associated Implementation Method 14.2.1.

Point Number 81.167

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(ii) General subdivision to increase the subdivision threshold to 40ha.

Decision Reasons:

- Rule 22.4.1.2 acknowledges the role of high class soils and to limit the extent of rural land fragmentation. As currently written a minimum 20ha lot size is required before subdivision can be considered.
- In Rule 22.4.1.2 (a)(ii) a threshold set at 20 ha has the effect of increasing the area of land within the district for which subdivision may be permitted, thus increasing the potential for more fragmentation of rural land (and high class soils) than would otherwise be the case (with a 40 ha threshold). It may also lead to more diffuse rural residential development. This is inconsistent with policy 5.2.3(a) of the proposed plan around minimising the fragmentation of productive rural land.

Point Number 81.168

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(v) General subdivision to clarify that a property scale/site specific Land Use Capability Assessment is required.

Decision Reasons:

- In Rule 22.4.1.2(a)(v) it is important that the Land Use Capability Assessment be prepared at a suitable scale to reflect the specific property or properties.
- An assessment using regionally available data will not be sufficient to assess the class of soils on a site.

Point Number 81.169

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(v) General subdivision to provide for a minimum of 90% high class soils in the parent lot, and a maximum of 10% high class soils in the child lot.

Decision Reasons:

- Rule 22.4.1.2(a)(v) also seeks that one lot must contain a minimum of 80% of the high class soils, while the other lot may consist of up to 20% of high class soils.
- Clarification is needed that the parent lot is required to have the higher percentage of high class soils.
- To more effectively give effect to objectives and policies regarding high class soils a higher level of high class soils should be retained in the parent lot, and a 90%/10% split should apply.

Point Number 81.170

Summary of Decision Requested:	Add to 22.4.1.2(b) General subdivision the matters of discretion to include the availability of water supply, wastewater services and stormwater management.
Decision Reasons:	<ul style="list-style-type: none"> There is no assessment criteria relating to water supply, wastewater services and stormwater management. This should be included to promote the integration of infrastructure and land use and subdivision, giving effect to WRPS Policy 6.3.
Point Number	81.171
Summary of Decision Requested:	Add to Rule 22.4.1.5 (b) Rural Hamlet Subdivision the matters of discretion to include the availability of water supply, wastewater services and stormwater management.
Decision Reasons:	<ul style="list-style-type: none"> There is no assessment criteria relating to water supply, wastewater services and stormwater management. This should be included to promote the integration of infrastructure and land use and subdivision, giving effect to WRPS Policy 6.3.
Point Number	81.172
Summary of Decision Requested:	Amend Rule 22.4.1.4 Boundary relocation to reduce the scope for inappropriate sized subdivision that does not provide for a suitable minimum size for productive rural activities.
Decision Reasons:	<ul style="list-style-type: none"> The rule as currently written could potentially provide for lots through boundary adjustment that are neither smaller rural residential sized lots, nor suitably sized to provide for productive rural activities. This is not consistent with the policy framework of either the WRPS or the objectives and policies in the Proposed Waikato District Plan.
Point Number	81.173
Summary of Decision Requested:	Amend Rule 22.4.1.5(v) Rural Hamlet Subdivision to provide for a minimum 40ha balance lot.
Decision Reasons:	<ul style="list-style-type: none"> A threshold set at 20 ha has the effect of increasing the area of land within the district for which subdivision may be permitted, thus increasing the potential for more fragmentation of rural land (and high class soils) than would otherwise be the case (with a 40 ha threshold). It may also lead to more diffuse rural residential development. This is inconsistent with policy 5.2.3(a) of the Proposed Plan around minimising the fragmentation of productive rural land.
Point Number	81.174
Summary of Decision Requested:	Retain Rule 22.4.1.6 Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The submitter is supportive of mechanisms that incentivise the protection and enhancement of SNA's. This is consistent with Implementation Method 11.1.8 of the WRPS.
Point Number	81.175
Summary of Decision Requested:	Amend Rule 22.4.5 Subdivision within identified areas to make subdivision of land containing an Significant Natural Area that is not a conservation lot subdivision, a discretionary activity.
Decision Reasons:	<ul style="list-style-type: none"> Subdivision of land containing an SNA could be considered a restricted discretionary activity under Rule 22.4.1.2 (if the conservation lot opportunity is not taken up). However, for other overlay areas subdivision is a discretionary activity under Rule 22.4.5. In order to manage the effects of subdivision and any subsequent land use activities on SNA's it is considered that a discretionary activity status is more appropriate. This would give effect to Policy 11.1 and 11.2 and associated implementation methods in the WRPS.
Point Number	81.176
Summary of Decision Requested:	Add to Rule 22.8.3 RD2 Restricted Discretionary Activities assessment criteria as follows: <i>(vi) Stormwater management and the mitigation of potential adverse effects.</i>
Decision Reasons:	<ul style="list-style-type: none"> A list is provided in (a) of the matters that council will consider when considering activities against this rule. The effects of stormwater should be included as a matter of discretion to encourage an assessment of effects on the environment from stormwater infrastructure, giving effect to WRPS Policy 6.3.
Point Number	81.177
Summary of Decision Requested:	Retain Rule 23.3.1 Dwelling.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the discretionary activity status assigned to dwellings, buildings and structures within an Outstanding Natural Feature Landscape or natural character area.
Point Number	81.178
Summary of Decision Requested:	Retain Rule 23.3.3 Buildings and structures in Landscape and Natural Character Areas.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the discretionary activity status assigned to dwellings, buildings and structures within an Outstanding Natural Feature Landscape or natural character area.

Point Number 81.179

Summary of Decision Requested: **Amend** Rule 23.3.2 Minor dwelling to provide for minor dwellings in a landscape or natural character area as a discretionary activity.

Decision Reasons:

- Submitter requires clarification as to what is the activity status for a minor dwelling.

Point Number 81.180

Summary of Decision Requested: **Amend** subdivision provisions to implement the objectives and policies of Chapter 4 subject to previous submission points.

Decision Reasons:

- The submitter requests amendments as per other submission points. Refer to submission point regarding the Village Zone in Chapter 4 Urban Environment.
- It is unclear the exact submission point that has been referred to as there are a number of submission points by the submitter (81.123, 81.134, 81.135, 81.136 and 81.150) that have reference to both Chapter 4 and the Village Zone.

Point Number 81.181

Summary of Decision Requested: **Retain** Outstanding Natural Features as identified in the planning maps.

Decision Reasons:

- The WRPS identifies outstanding natural features and landscapes of regional significant in Section 12A.

Point Number 81.182

Summary of Decision Requested: **Retain** Outstanding Natural Landscapes as identified in the planning maps.

Decision Reasons:

- The WRPS identifies outstanding natural features and landscapes of regional significant in Section 12A.

Point Number 81.183

Summary of Decision Requested: **Clarify** the approach taken to the extent of the outstanding natural feature for Mount Karioi.

Decision Reasons:

- The WRPS identifies outstanding natural features and landscapes of regional significant in Section 12A.
- ONFL 4 Mount Karioi and Outstanding Natural Feature Landscape 7 Mount Pirongia are within, or partly within the Waikato District. These Outstanding Natural Feature Landscapes have been identified in the Proposed Plan planning maps. However the extent of the Outstanding Natural Feature Landscape overlay for Mount Karioi is significantly less than what is identified in the WRPS, with the rest of the area identified as Significant Amenity Landscape.
- The submitter seeks to understand further the rationale behind this approach.

Point Number 81.184

Summary of Decision Requested: **Clarify** the approach taken to the extent of the outstanding natural landscape for Mount Karioi.

Decision Reasons:

- The WRPS identifies outstanding natural features and landscapes of regional significant in Section 12A.
- Outstanding Natural Feature Landscape 4 Mount Karioi and ONFL 7 Mount Pirongia are within, or partly within the Waikato District. These Outstanding Natural Feature Landscapes have been identified in the proposed plan planning maps. However the extent of the Outstanding Natural Feature Landscape L overlay for Mount Karioi is significantly less than what is identified in the WRPS, with the rest of the area identified as Significant Amenity Landscape.
- The submitter seeks to understand further the rationale behind this approach.

Point Number 81.185

Summary of Decision Requested: **Retain** Natural Character on the planning maps.

Decision Reasons:

- Areas of outstanding and high natural character have been assessed and mapped in the Coastal Environment.
- The submitter supports this as a way of achieving section 6(a) RMA, Policy 12.2 of the WRPS and Policy 13 of the NZCPS.

Point Number 81.186

Summary of Decision Requested: **Amend** the planning maps to show streams and their flood plains.

Decision Reasons:

- Some land is zoned for urban development that has streams running across it.
- There is an opportunity to map streams and their flood plains (if any) to assist with locating residential development, and also managing assessment of effects. For example an individual resource consent application may propose a small amount of fill in a flood plain, which may on its own may not create more than minor effects. However, if a number of developments all undertake a small amount of fill, the cumulative effect may be more than minor.

Point Number 81.187

Summary of Decision Requested: **Amend** Appendix 6 (2) (1) Biodiversity Offsetting as follows:

Restoration, enhancement and protection actions offered by an applicant will only be considered a biodiversity offset where they are used to offset ~~offset~~ ~~compensate for the anticipated~~ reasonably-measurable residual effects of activities that are anticipated will remain after appropriate avoidance, remediation and mitigation ~~measures~~ ~~actions~~ have been ~~applied~~ ~~occurred~~ in accordance with Policy 3.2.3.

Decision Reasons:

- Appendix 6 (2) (1) is difficult to follow.
- A resource consent applicant is not required to propose or agree to biodiversity offset measures, but may choose to do so if they are unable to avoid, remedy or mitigate the adverse effects of the activity they propose.
- A biodiversity offset is not mitigation.
- Mitigation is action to reduce the severity of an adverse effect.
- A biodiversity offset, in contrast, is designed to compensate for residual adverse biodiversity effects that remain after appropriate measures to avoid, remedy or mitigate the effects have been applied.
- Submitter supports Biodiversity Offsetting Framework outlined in Appendix 6 but seeks the amendments in this submission point.

Point Number

81.188

Summary of Decision Requested:

Amend Appendix 6 Biodiversity Offsetting to take into account the forthcoming national guidance for local government on biodiversity offsetting, *Biodiversity Offsetting under the Resource Management Act; A guidance document*.

Decision Reasons:

- It is recommended to amend the detail relating to offsetting in order to give effect to Policy 11.1 of the WRPS.

Point Number

81.189

Summary of Decision Requested:

Add to Policy 3.3.2(b) an additional bullet point recognising the flood protection and flood water attenuation properties of the features for example:

(vi) existing water reservoirs and dams.

Decision Reasons:

- Policy 3.3.2 (b) pertains to recognising the value and qualities of various sites.
- Flood infrastructure, particularly the use of Lake Waikare and Whangamarino is not included, however, plays an important role in managing flood waters in the area.
- While not specifically listed in this policy, Lake Waikare is listed as an outstanding natural feature, and could also be listed here. No relief has been sought for this however.

Point Number

81.190

Summary of Decision Requested:

Amend Chapter 6: Infrastructure to explicitly provide for the protection of waterways and public drainage networks by suggested additions to Policies 6.4.2 and 6.4.7 or, alternatively, reflect this outcome in the specific objectives and policies for each zone.

Refer to suggested wording and examples in original submission.

Decision Reasons:

- There are no provisions proposed to protect the existing drainage networks from being over loaded from residential, rural residential, industrial and commercial developments that discharge additional stormwater volumes into existing WRC drainage managed catchments. An example is the Butcher road rural residential expansion without any form of suitably maintained road berm drainage disposal system.
- There is an opportunity to incorporate provisions that align with Waikato Regional Council stormwater management plan standards.
- For example, any subdivision or development of land in an existing Waikato Regional Council managed drainage catchment should be designed to avoid adverse effects on the drainage catchment, or result in no additional flows, as this can affect the cost of maintenance and operation, which are then passed onto ratepayers.

Point Number

81.191

Summary of Decision Requested:

Amend Chapters 6: Infrastructure and 14 : Infrastructure and Energy to include a policy and rule framework that will provide for the ongoing maintenance, repair, replacement and upgrade of flood and drainage scheme infrastructure.

OR

Alternatively provide specifically for flood protection and drainage scheme infrastructure in the policies and rule frameworks for each zone. (Refer to original submission for full details)

Decision Reasons:

- Given the national significance of flood and drainage scheme infrastructure (similar to the protection of national rail network, state highways etc.), relevant objectives and policies should be included to ensure its continued functioning (maintenance, repair, replacement and upgrades).
- This includes the related structures for examples pump sheds, transformers, etc. and the upgrades of this infrastructure as required should be included in the appropriate rules.
- Currently there is limited recognition of the nationally significant infrastructure in terms of issues, objectives and policies, and only limited activities are provided for as rules, for example the exemption of pump sheds from building setback requirements in relation to waterbodies.
- The permitted activity standards across all zones do not provide adequately for the ongoing maintenance, renewal and operation.
- The submitter states that the best fit (and their preference) is for the provisions sought to be contained within Chapters 6 and 14 to provide a district wide framework. An example of the framework has been attached to the submission (Appendix 1).

Point Number

81.192

Summary of Decision Requested:

Amend the definition of "ancillary rural earthworks" in Chapter 13: Definitions to provide for flood protection and drainage schemes managed by the Waikato Regional Council.

Decision Reasons:

- Earthworks associated with flood and drainage schemes is not referenced under this definition.

Point Number

81.193

Summary of Decision Requested:

Amend the definition of "infrastructure" in Chapter 13: Definitions to include Waikato Regional Council flood infrastructure with associated flood management regime.

Decision Reasons:

- It is noted that flood infrastructure is not included under the definition of infrastructure.
- If a standalone approach to flood protection and drainage infrastructure is not included in Chapter 6 (refer to previous submission points) it will be appropriate to provide for it in the definition of Infrastructure. This should be read in conjunction with submission point 81.246.

Point Number 81.194

Summary of Decision Requested: **Amend** the definition of "Minor Infrastructure Structure" in Chapter 13: Definitions to clarify the terminology.

Decision Reasons:

- The definition of Minor Infrastructure Structure includes "water infrastructure" would this include the infrastructure associated with flood and drainage schemes?

Point Number 81.195

Summary of Decision Requested: **Amend** the definition for "Rural Ancillary Earthworks" in Chapter 13: Definitions to clarify the terminology and to be consistent.

Decision Reasons:

- The Plan refers to both 'Rural Ancillary Earthworks' and 'Ancillary Rural Earthworks'.
- Clarification is sought that these refer to the same activity, and consistency is sought in the terminology.

Point Number 81.196

Summary of Decision Requested: **Retain** Rule 24.2.8 Indigenous vegetation clearance inside a Significant Natural Area, except for the amendments sought below
AND
Amend Rule 24.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area to exclude clearance of Manuka and Kanuka in wetlands and the coastal environment from this rule.

Decision Reasons:

- The submitter supports the provision for sustainable clearance of regenerating Manuka or Kanuka for domestic firewood purposes or for arts or crafts in P2.
- However, the submitter does not support the removal of Manuka or Kanuka from wetlands or vegetation that is naturally short in stature.
- It is important to ensure that vegetation that is naturally short does not get included in the rules intended to provide for clearance of Manuka and Kanuka colonising pasture.
- Manuka, in particular, can be a permanent and important component of some types of ecosystems. These are generally wetlands, dunes and other coastal vegetation, but can be gumland vegetation that remains in the leached soils following kauri forest removal.
- These persistent shrublands are important habitats for lizards, orchids, mistletoes and a range of threatened species.
- Exclusion of permitted clearance of Manuka or Kanuka from wetlands and from the Coastal Environment is likely to prevent clearance of these ecosystems of concern.
- The exclusion of Manuka and/or Kanuka clearance in the Coastal Environment from this rule would give effect to the 'avoid' direction in the New Zealand Coastal Policy Statement (NZCPS) and Policy 11.4 of the WRPS.
- Vegetation clearance within an SNA needs to be remedied to give effect to Policy 3.2.3(a)(ii).

Point Number 81.197

Summary of Decision Requested: **Amend** Rule 24.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area to ensure that weeds are controlled in the cleared area and native vegetation is allowed to regenerate.

Decision Reasons:

- Vegetation clearance within an SNA needs to be remedied to give effect to Policy 3.2.3(a)(ii).

Point Number 81.198

Summary of Decision Requested: **Delete** P6 of Rule 24.2.8 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- P6 duplicates P2.

Point Number 81.199

Summary of Decision Requested: **Retain** Policy 4.7.3 Residential subdivision.

Decision Reasons:

- These will give effect to the WRPS Policies 6.1, 6.3 and Section 6A regarding a planned, co-ordinated approach to subdivision, use and development and infrastructure provision.

Point Number 81.200

Summary of Decision Requested: **Amend** Policy 4.7.4 (b) Lot sizes to support appropriate urban outcomes for the Village Zone, and provide for more intense development in locations immediately adjacent to Business Town Centre Zones.

Decision Reasons:

- Submitter is concerned in Policy 4.7.4(b) that the minimum lot sizes in the Village Zone (particularly Te Kowhai and Tuakau) appear to promote rural outcomes rather than urban outcomes, and will not achieve the sustainable, compact urban form necessary to support efficient, effective transport and infrastructure.
- The submitter is generally supportive of the min site area (450m²) for urban residential areas across the district but notes their other submission points seeking higher densities and more intensive subdivision pattern in the Residential Zone immediately adjacent to the Business Town Centre zones.

Point Number 81.201

Summary of Decision Requested: Retain Policy 4.7.5 Servicing requirements.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.202

Summary of Decision Requested: Retain Policy 4.7.6 Co-ordination between servicing and development and subdivision.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.203

Summary of Decision Requested: Retain Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.204

Summary of Decision Requested: Retain Policy 4.7.8 Staging of subdivision.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.205

Summary of Decision Requested: Retain Policy 4.7.9 Connected neighbourhoods.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.206

Summary of Decision Requested: Retain Policy 4.7.10 Recreation and access.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.207

Summary of Decision Requested: Retain Policy 4.7.11 Reverse sensitivity.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.208

Summary of Decision Requested: Retain Policy 4.7.14 Structure and master planning.

Decision Reasons:

- The submitter supports this Policy as it will assist with giving effect to the WRPS' policy direction in regard to a planned, co-ordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects.

Point Number 81.209

Summary of Decision Requested: Amend Policy 4.7.13 (a)(i) Residential Zone – Te Kauwhata Ecological and West Residential Areas as follows:

~~Promote~~ Protect the natural features and landscapes of the Whangamarino Wetland and Lake Waikare;

Decision Reasons:

- To promote consistency with the WRPS, Policy 4.7.13 (a)(i) should read 'protect' rather than promote the natural features and landscapes of Whangamarino Wetland and Lake Waikare.

Point Number	81.210
Summary of Decision Requested:	Amend Objective 5.1.1(a)(i) The rural environment to incorporate peat soils as follows (for example): <i>high class soils <u>and peat soils</u> are protected for productive rural activities.</i>
Decision Reasons:	<ul style="list-style-type: none"> The Objective gives effect to WRPS Implementation Method 14.2.1 regarding high class soils and supporting productive rural activities; WRPS Provisions related to the Built Environment, including 6.1.5 and 6A regarding urban subdivision, use and development. Peat soils form a substantial component of Waikato District's soils, and are another valuable soil resource for the District. There is an opportunity to also seek peat soils to be protected for productive rural activities in this objective, giving effect to Policy 14.5 of the WRPS.
Point Number	81.211
Summary of Decision Requested:	Retain Section 5.2 Productive Versatility of Rural Resources.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the objective and policies of this section, noting the inclusion of maintaining and enhancing high class soils, natural ecosystems, freshwater and coastal water bodies and their catchments, and protection of indigenous biodiversity.
Point Number	81.212
Summary of Decision Requested:	Amend Objective 5.2.1 Rural resources wording to incorporate peat soils.
Decision Reasons:	<ul style="list-style-type: none"> Peat soils form a substantial component of Waikato District's soils, and are another valuable soil resource for the District. There is an opportunity to also seek peat soils to be protected for productive rural activities in this objective, aligning with Policy 14.5 of the WRPS.
Point Number	81.213
Summary of Decision Requested:	Amend Objective 5.2.1 (a)(ii) Rural resources as follows: <i>The health and wellbeing of rural land and natural ecosystems <u>and biodiversity</u>;</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that biodiversity is adequately considered this should be included with this objective, giving effect to WRPS provisions Policies 11.1 and 11.2.
Point Number	81.214
Summary of Decision Requested:	Retain Policy 5.2.2 High class soils.
Decision Reasons:	<ul style="list-style-type: none"> This objective and associated policies are supported due to how they give effect to WRPS provisions such as 14.2 and 14.2.1. Policy 14.2 of the WRPS seeks to avoid a decline in the availability of high class soils for primary production due to inappropriate subdivision, use or development. The Proposed District Plan provisions acknowledge the impacts that land fragmentation and other use and development, can have on high class soils.
Point Number	81.215
Summary of Decision Requested:	Retain Policy 5.2.3 Effects of subdivision and development on soils.
Decision Reasons:	<ul style="list-style-type: none"> This objective and associated policies are supported due to how they give effect to WRPS provisions such as 14.2 and 14.2.1. Policy 14.2 of the WRPS seeks to avoid a decline in the availability of high class soils for primary production due to inappropriate subdivision, use or development. The Proposed District Plan provisions acknowledge the impacts that land fragmentation and other use and development, can have on high class soils.
Point Number	81.216
Summary of Decision Requested:	Add to Objective 5.2 Production Versatility of Rural Resources an additional policy to recognise and provide for the key features of peat soils.
Decision Reasons:	<ul style="list-style-type: none"> To give effect to WRPS Policy 14.5 there is an opportunity to create a policy around peat soils, and their inherent value and limitations. The purpose of this policy is to: Recognise that peat soils may limit the location of development, Recognise the productive capacity of peat soils, Encourage the sustainable management, and where possible, the enhancement of peat soils.
Point Number	81.217
Summary of Decision Requested:	Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision.
Decision Reasons:	<ul style="list-style-type: none"> WRPS Implementation Method 6.1.5 seeks to direct rural-residential development to areas identified in the district plan. This sits within a greater context of provisions around focusing the expansion of urban development in identified growth areas, in this case as defined through Future Proof Growth Strategy.
Point Number	81.218

Summary of Decision Requested:	Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development.
Decision Reasons:	<ul style="list-style-type: none"> This provision is supported as it helps give effect to WRPS policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, co-ordinated approach to subdivision and development and provision of supporting infrastructure.
Point Number	81.219
Summary of Decision Requested:	Retain Policy 6.4.2 Provide adequate infrastructure.
Decision Reasons:	<ul style="list-style-type: none"> This provision is supported as it helps give effect to WRPS policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, co-ordinated approach to subdivision and development and provision of supporting infrastructure.
Point Number	81.220
Summary of Decision Requested:	Retain Policy 6.4.3 Infrastructure Location and Services.
Decision Reasons:	<ul style="list-style-type: none"> This provision is supported as it helps give effect to WRPS policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, co-ordinated approach to subdivision and development and provision of supporting infrastructure.
Point Number	81.221
Summary of Decision Requested:	Retain Policy 6.4.4 Road and rail network.
Decision Reasons:	<ul style="list-style-type: none"> This provision is supported as it helps give effect to WRPS policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, co-ordinated approach to subdivision and development and provision of supporting infrastructure.
Point Number	81.222
Summary of Decision Requested:	Retain Policy 6.4.5 Roading infrastructure.
Decision Reasons:	<ul style="list-style-type: none"> This provision is supported as it helps give effect to WRPS policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, co-ordinated approach to subdivision and development and provision of supporting infrastructure.
Point Number	81.223
Summary of Decision Requested:	Amend Section 6.5 Transport Objectives and Policies to take into account the Regional Land Transport Plan.
Decision Reasons:	<ul style="list-style-type: none"> While the provisions in this section are generally supported, the submitter considers the policies could be considerably strengthened to be more consistent with the Waikato Regional Land Transport Plan (RLTP). Road Controlling Authorities play an important role in implementing the policies and implementation actions of the RLTP. The District Plan would benefit from incorporating the following elements into Section 6.5: Recognising the important role strategic road and rail corridors play in the district for facilitating the movement of inter and intraregional freight; Connecting Regional cycle trails; Specifically providing for public transport in new growth areas of the district; and Supporting energy efficient transport modes by providing the necessary infrastructure e.g. electric vehicle chargers.
Point Number	81.224
Summary of Decision Requested:	Amend Policy 6.4.7 (a)(ii) Storm water as follows: <i>(a)(ii) Manages stormwater in accordance with a drainage hierarchy, with a preference for on-site treatment <u>at-source management</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> Care is required with on-site treatment, if this means the assets would be on-lot and hence in private ownership. How will Waikato District Council ensure that the stormwater management devices are constructed as per design criteria and that they are operated and maintained into the future? At-source stormwater management in the public domain is preferred by the submitter, i.e. in the roading corridor or in drainage reserves as this ensures that the assets can be operated and maintained as intended with the District Council ensuring this happens. Significant systems are needed to be in place within the District Council to manage the implementation and ongoing success of on-lot devices (to document on-lot device location, design criteria, operation and maintenance requirements, certificate of fitness, issues as they arise, etc.). The submitter's stormwater discharge resource consents are not able to cover on-lot devices.
Point Number	81.225
Summary of Decision Requested:	Retain Section 8.2 Natural Values.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the enhancement of the natural environment through the provision of reserves.
Point Number	81.226
Summary of Decision Requested:	Seek further assessment of Te Kowhai Airpark to enable adequate consideration of the area, including, but not limited to covering alignment with WRPS/Future Proof settlement pattern, assessment of precedent of alternative land release, availability of infrastructure, and impacts of the proposal on the Te Kowhai settlement as a whole.
Decision Reasons:	

- The proposal represents a departure from the Future Proof settlement pattern that has been given legal weight through its insertion into the WRPS, and if approved, will create a precedent in terms of a departure from that pattern. Alternatives to the agreed settlement pattern can only be allowed if they are justified by a robust, comprehensive evidence base, including following the criteria for alternative land release identified in the WRPS.
- Further information is sought on the following:
- Alignment with other land use and development at Te Kowhai, including Plan Change 17, and the strategic direction for the town and the Future Proof sub-region
- The timing, staging and sequencing of development. Rule 27.4.2 Subdivision Allotment Size provides for lot sizes between 450m2 and 2500m2, dependent on connection to wastewater.
- If on-site wastewater disposal only is provided for this becomes essentially a rural residential development, which is not appropriate at this location
- Assessment regarding the likelihood of the provision of wastewater mains infrastructure, impacts of providing for non-residential activities on Te Kowhai businesses
- Detail on how to improve connections between the Airpark and Te Kowhai, and better integrate the Airpark into Te Kowhai as a whole.

Point Number 81.227

Summary of Decision Requested: **Seek** further assessment of Te Kowhai Airpark to enable adequate consideration of the area, including, but not limited to covering alignment with WRPS/Future Proof settlement pattern, assessment of precedent of alternative land release, availability of infrastructure, and impacts of the proposal on the Te Kowhai settlement as a whole.

Decision Reasons:

- The proposal represents a departure from the Future Proof settlement pattern that has been given legal weight through its insertion into the WRPS, and if approved, will create a precedent in terms of a departure from that pattern. Alternatives to the agreed settlement pattern can only be allowed if they are justified by a robust, comprehensive evidence base, including following the criteria for alternative land release identified in the WRPS.
- Further information is sought on the following:
- Alignment with other land use and development at Te Kowhai, including Plan Change 17, and the strategic direction for the town and the Future Proof sub-region
- The timing, staging and sequencing of development. Rule 27.4.2 Subdivision Allotment Size provides for lot sizes between 450m2 and 2500m2, dependent on connection to wastewater. If on-site wastewater disposal only is provided for this becomes essentially a rural residential development, which is not appropriate at this location
- Assessment regarding the likelihood of the provision of wastewater mains infrastructure, impacts of providing for non-residential activities on Te Kowhai businesses
- Detail on how to improve connections between the Airpark and Te Kowhai, and better integrate the Airpark into Te Kowhai as a whole.

Point Number 81.228

Summary of Decision Requested: **Add** to Policy 9.3.3.3 Stormwater management as follows:
(a) Stormwater management systems shall be designed to minimise the erosion potential and rate of run-off into the coastal marine area.
(b) Stormwater management systems designed in accordance with low impact design philosophies.
(c) Provide a high level of water quality treatment.
(d) Minimise change to the existing hydrological cycle.

Decision Reasons:

- To give effect to WRPS Policy 8.3.10 provision should be made for the management of effects of subdivision, use and development in relation to this zone.

Point Number 81.229

Summary of Decision Requested: **Retain** Section 10.1 Hazardous Substances.

Decision Reasons:

- The objective and associated policies address issues around sensitive land uses, incompatible activities and the environment being properly separated from hazardous facilities, giving effect to WRPS Policy 14.4.

Point Number 81.230

Summary of Decision Requested: **Amend** Objective 10.2.1.(a) Contaminated land as follows:
(a)...contaminated land is sustainably managed to protect...

Decision Reasons:

- To enable a broader range of considerations when addressing contaminated site remediation and/or management propose amending the wording to include the word 'sustainably' to provide for, or encourage, sustainable remediation techniques and/or in-situ management.
- The submitter supports the use of human health and the environment as it aligns with National Environmental Standard for Contaminated Soil and section 31(1)(b) of the RMA.

Point Number 81.231

Summary of Decision Requested: **Retain** Policy 10.2.2(b) Managing the use of contaminated land.

Decision Reasons:

- The use of 'human health and the environment' is supported as it aligns with the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health (NESCS) and section 31(1)(b) of the RMA.

Point Number 81.232

Summary of Decision Requested: **Amend** Policy 10.2.2(d) Managing the use of contaminated land as follows:
(d)Ensure that the use, ~~subdivision and development of contaminated land management approaches~~ contaminated land management approaches associated with the use, subdivision and development of actually or potentially contaminated land include:...

Decision Reasons:

- The National Environmental Standard for Contaminated Soil provides a framework for the management of contaminated sites, and Implementation Method 14.4.1 of the WRPS requires that District Plans shall include provisions that support the implementation of the National Environmental Standard for Contaminated Soil.
- To clarify the intent of Policy 10.2.2(d) the wording should be rewritten.

Point Number 81.233

Summary of Decision Requested: **Add** to Policy 10.2.2(d) Managing the use of contaminated land reference to 'preliminary site investigations' .

Decision Reasons:

- To clarify the intent of Policy 10.2.2(d) the wording should be rewritten, with additional wording to include reference to 'preliminary site investigations'
- To align with the National Environmental Standard for Contaminated Soil reference to preliminary site investigations should also be included.

Point Number 81.234

Summary of Decision Requested: **Add** to Policy 10.2.2(d) Managing the use of contaminated land an additional sub-point the requirement that any preliminary or detailed site investigation reports, remedial action plans, site validation reports and ongoing site management plans are prepared in accordance with the Ministry for the Environment's Contaminated Land Management Guidelines #1 and #5, and are provided to both Waikato District Council and the submitter for their records.

Decision Reasons:

- To clarify the intent of Policy 10.2.2(d) the wording should be rewritten, with additional wording to include reference to 'the 'Ministry for the Environment's Contaminated Land Management Guidelines #1 and #5'.
- The National Environmental Standard for Contaminated Soil provides a framework for the management of contaminated sites, and Implementation Method 14.4.1 of the WRPS requires that District Plans shall include provisions that support the implementation of the National Environmental Standard for Contaminated Soil.

Point Number 81.235

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Flood risk area."

Decision Reasons:

- Adding this definition will assist with understanding and implementation of provisions that incorporate this term.

Point Number 81.236

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Floodplain."

Decision Reasons:

- Adding this definition will assist with understanding and implementation of provisions that incorporate this term.

Point Number 81.237

Summary of Decision Requested: **Add** to Chapter 13 a new definition for "Low impact design."

Decision Reasons:

- Adding this definition will assist with understanding and implementation of provisions that incorporate this term.

Point Number 81.238

Summary of Decision Requested: **Amend** the definition of "Overland flow path" in Chapter 13: Definitions as follows:

Overland flow path

Means either a primary or secondary Overland flowpath - route taken by stormwater runoff not captured in a reticulated or natural stormwater system.

Decision Reasons:

- Current definition for overland flow path does not align with the definition in WRC's Waikato Stormwater Management Guideline.

Point Number 81.239

Summary of Decision Requested: **Add** to Chapter 13 a new definition for "Biodiversity offset" as follows:

Biodiversity offset

A measureable conservation outcome resulting from actions designed to compensate for residual, adverse biodiversity effects arising from activities after appropriate avoidance, remediation, and mitigation measures have been applied. The goal of a biodiversity offset is to achieve a no-net-loss, and preferably a net-gain, of indigenous biodiversity values.

Decision Reasons:

- Biodiversity offsetting and its relationship to avoiding, remedying and mitigating adverse effects of an activity is poorly understood.
- A new definition is recommended to be added to clarify what this is, and the expectations around it.

Point Number 81.240

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Catchment Management Plan" and ensure it there is delineation between stormwater catchment plans and Waikato Regional Council led Catchment Management Plan or Healthy Rivers Wai Ora sub catchment plans.

Decision Reasons:

- It is noted that the term Catchment Management Plan is not defined in the Proposed Plan. There is a need to ensure delineation between storm water catchment plans and Waikato Regional Council led Catchment Management Plan or Healthy Rivers Wai Ora sub catchment plans.

Point Number 81.241

Summary of Decision Requested: **Amend** the definition for "Cleanfill" in Chapter 13: Definitions to reflect the definition in WasteMINZ 'Technical Guidelines for Disposal to Land (August 2018)'.

Decision Reasons:

- The definition for cleanfill does not fully align with the latest sector guidelines from WasteMINZ 'Technical Guidelines for Disposal to Land (August 2018)'.
- Currently the definition specifically limits cleanfill to that which has no adverse effects on people or the environment. This should be removed from the definition, with the rule framework providing the basis for managing effects of cleanfill.

Point Number 81.242

Summary of Decision Requested: **Amend** the definition of "Conservation Activity" in Chapter 13: Definitions to exclude the establishment of walkways, cycle ways and accessory buildings.

AND/OR

Amend Rule 25.1.2 P3 Permitted Activities to include appropriate thresholds or activity status for the clearance of indigenous vegetation as a result of establishing walking, cycling tracks or accessory buildings.

Decision Reasons:

- In the Reserve Zone, Conservation activities are permitted with no activity specific conditions. The definition for conservation activity includes the establishment of walking and cycle tracks and accessory buildings. Therefore these activities would be permitted with no restrictions on the amount of clearance.
- The submitter considers that this is inappropriate given the potential effect on indigenous biodiversity.

Point Number 81.243

Summary of Decision Requested: **Amend** Rule 25.1.2 P3 Permitted Activities to include appropriate thresholds or activity status for the clearance of indigenous vegetation as a result of establishing walking, cycling tracks or accessory buildings.

AND/OR

Amend the definition to exclude the establishment of walkways, cycle ways and accessory buildings.

Decision Reasons:

- In the Reserve Zone, Conservation activities are permitted with no activity specific conditions. The definition for conservation activity includes the establishment of walking and cycle tracks and accessory buildings. Therefore these activities would be permitted with no restrictions on the amount of clearance.
- The submitter considers that this is inappropriate given the potential effect on indigenous biodiversity.

Point Number 81.244

Summary of Decision Requested: **Amend** the definition of "High class soils" in Chapter 13: Definitions to include the peat soil definition as per the definition in the Waikato Regional Policy Statement.

Decision Reasons:

- The definition of high class soils is supported, and aligns with the definition in the WRPS. However, peat soils are excluded from this definition and there is no definition of peat soils in plan.

Point Number 81.245

Summary of Decision Requested: **Amend** the Proposed District Plan to clarify the terminology of the Huntly South Assessment Area and the Huntly south ponding zone and apply consistently if they are the same.

Decision Reasons:

- There is potential confusion in terminology: in some areas the Huntly south assessment area is referred to then the Huntly south ponding zone- are these are the same or different.

Point Number 81.246

Summary of Decision Requested: **Amend** Chapter 14 to ensure it is consistent with the approach to overlay areas in the zone chapters. For example, there should be consistency between permitted activity thresholds and activity status between Chapter 14 and the zone chapters.

Decision Reasons:

- Paragraph 14.1(1) of the Infrastructure and Energy Chapter states that the provisions of that chapter apply across the district in all the zones and overlays in the district plan. It goes on to say that the zone chapters and their associated overlays, objectives, policies and rules do not apply to infrastructure and energy activities unless specially referred to within Chapter 14. Therefore, it appears that Chapter 14 is largely intended to be a standalone/ self-contained chapter.
- See submission for examples of inconsistencies in Chapter 14.
- Amendments are required to Chapter 14 to ensure that Chapter 11 and 12 of the WRPS and the NZCPS are given effect to.

Point Number 81.247

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Identified Area."

Decision Reasons:

- It is unclear what the term 'Identified Area' means. This appears throughout Chapter 14.
- Is it intended that this captures Outstanding Natural Feature Landscape, Significant Amenity Landscapes, Natural , SNA and non-SNA?

Point Number 81.248

Summary of Decision Requested: **Amend** Rule 14.11.1.1 P1 Permitted Activities as follows:

(a)(ii) Primary systems detain/retain runoff from all...

Decision Reasons:

- Wording is proposed to support a shift to low impact design stormwater management systems that manage stormwater at source through retention devices rather than relying on large detention devices downstream.
- This approach is recommended by the submitter and is outlined in Council's Waikato Stormwater Management Guideline.

Point Number 81.249

Summary of Decision Requested: **Amend** Policy 3.2.4 Biodiversity Offsetting to require offsetting of more than minor residual adverse effects on Significant Natural Areas.

Decision Reasons:

- As currently worded, Policy 3.2.4(a) addresses biodiversity offsets in both SNA's and indigenous biodiversity outside of SNA's. The rest of the Policy only addresses offsets in relation to SNA's. It is important that offsetting in relation to indigenous biodiversity outside of SNA's is also subject to a robust assessment framework.
- Outside of SNA's, WRPS Implementation Method 11.1.3(a)(ii) promotes biodiversity offsets where significant residual adverse effects remain. Within SNA's, WRPS Method 11.2.2(d) requires offsets where more than minor residual adverse effects remain.

Point Number 81.250

Summary of Decision Requested: **Retain** Policy 3.2.5 Biodiversity in the coastal environment.

Decision Reasons:

- This Policy gives effect to Policy 11.4(a) of the WRPS.

Point Number 81.251

Summary of Decision Requested: **Retain** Policy 3.2.6 Providing for vegetation clearance, except for the amendments sought below.

AND

Amend Policy 3.2.6 Providing for vegetation clearance to recognise that only clearance with minor adverse effects in relation to the maintenance or protection of indigenous biodiversity will be enabled as a permitted activity.

Decision Reasons:

- Policy 3.2.6 gives effect to Implementation Method 11.1.4 of the WRPS. However, for clarity and consistency with the WRPS it is suggested that the opening statement be amended to refer to minor adverse effects, as this is the basis for the activities listed in the WRPS Implementation Method.

Point Number 81.252

Summary of Decision Requested: **Retain** Policy 3.2.6 Providing for vegetation clearance, except for the amendments sought below.

AND

Amend or Relocate Policy 3.2.6 Providing for vegetation clearance so that it is clear that it applies to both SNA's and indigenous biodiversity outside of Significant Natural Areas.

Decision Reasons:

- The activities in Policy 3.2.6 are provided for as permitted activities in the rules (just as they are for SNA, but different thresholds apply). However, this Policy falls under the heading 3.2 SNA's.

Point Number 81.253

Summary of Decision Requested: **Retain** Policy 3.2.8 Incentivise subdivision.

Decision Reasons:

- The submitter is supportive of mechanisms that incentivise the protection and enhancement of SNA's. This is consistent with Implementation Method 11.1.8 of the WRPS.

Submitter Number: 82

Submitter: Don and Angela Needham

Organisation: 320 Limited trading as Kids Time Kindergarten and Kids Time Early Learning Centre

Point Number 82.1

Summary of Decision Requested: No specific decision sought, but submission states support for Rule 17.1.2 Permitted Activities.

Decision Reasons:

- No reason provided.

Point Number 82.2

Summary of Decision Requested: **Amend** Rule 18.1.2 Permitted Activities to include education facilities as a complying activity

OR

Amend the zoning of the property at 94 Great South Road, Ngaruawahia from Business Town Centre Zone to Business Zone.

Decision Reasons:

- Under the Proposed District Plan, an Educational facility is no longer a complying activity. The submitter understands that existing use rights apply under the Resource Management Act
- The submitter plans to hopefully demolish the existing premises and rebuild a new purpose built premises sometime within the next few years.
- The submitter is happy to comply with the building requirements of the business town centre zone if necessary.
- Kids Time Kindergarten is licensed for 50 children and provides services to up to 75 different local children at a time (represented by about 60 different families). The submitter believes this provides an essential service to Ngaruawahia and that a new purpose built

facility on the existing site would be an asset to the area.

Submitter Number:	86	Submitter:	David Grigor
Organisation:	Grigor Construction Limited		
Point Number	86.1		
Summary of Decision Requested:	Delete Rule 16.3.9.1 P3 Building setbacks - All boundaries which requires a garage to be set back behind the facade of the dwelling.		
Decision Reasons:	<ul style="list-style-type: none">• Rule 16.3.9.1 is a significant constraint for residential development. There is no clear adverse effect from this activity and the submitter notes that the Auckland Unitary Plan (informed by a significant body of Urban Design advice and assessment), does not include this requirement in residential zones.		

Submitter Number:	87	Submitter:	Dianne O'Hara
Point Number	87.1		
Summary of Decision Requested:	Amend the Proposed District Plan to enable subdivision of the property at 261C Rotowaro Road Huntly, into smaller lots.		
Decision Reasons:	<ul style="list-style-type: none">• To make the property more productive in the future.		

Submitter Number:	88	Submitter:	John Kinghorn
Point Number	88.1		
Summary of Decision Requested:	Amend the location of Maaori Site of Significance S14/82 on the property at 214 Bell Road Whatawhata to match the New Zealand Archaeological Association records (attached to the submission).		
Decision Reasons:	<ul style="list-style-type: none">• The original site record from the NZ Archaeological Association (NZAA) shows the correct location of identified site S14/82, and describes the location as 300m northwest from the end of Bell Rd. The site record is attached, which contains an aerial photograph showing the location adjacent the small tributary stream south of the Waipa River. However, the location shown on the PDP maps is roughly 450m northeast (rather than west) and adjacent the Waipa instead of the tributary stream.• An archaeological assessment was carried out in 2016 on the property where the PDP maps show the site. The AEE report prepared by AECOM and submitted to WDC (refer SUB0156/16) concluded that 'there are no archaeological sites (when looking at WDC and NZAA records) affected by the proposed subdivision'.• The attached map of sites in the area from the NZAA shows the correct location of site S14/82 as being approximately 300m southwest of where it is currently shown on the PDP maps.		

Submitter Number:	89	Submitter:	CSL Trust and Top End Properties
Point Number	89.1		
Summary of Decision Requested:	Amend zoning of the properties at 179 and 205 Helenslee Road, Pokeno from Rural Zone to a mixture of Country Living and Residential Zone with an identified neighbourhood centre and an additional residential zone to enable higher density development (minimum lot size 300m2 as identified in the Appendix A of the submission).		
	OR		
	Alternative amendments to resemble the relief sought.		
Decision Reasons:	<ul style="list-style-type: none">• This area is an obvious expansion area for the current residential area of Pokeno.• The rapid growth of Pokeno has outstripped the population projections of the Franklin District Growth Strategy (FDGS, 2007). Most of the operative residential zoned land has been developed, or is under development.• A mixed lot size and housing typology will better cater for future residents.• There is insufficient Residential Zoned land to meet growth. Pokeno is experiencing rapid residential and commercial growth, due to its strategic location between Auckland, Hamilton and Tauranga and the proximity to key transport infrastructure such as State Highway 1, State Highway 2 and the North Island Main Trunk Line.• The public water and water services are able to be economically scaled and treated.• The affordability of land and houses and the access to public amenities, Pokeno Town Centre, Pokeno School and Tuakau College.• A combination of standard residential and large lots is needed to provide diversity within Pokeno's future housing stock.• Additional residential land will assist in meeting the obligations of the National Policy Statement for Urban Development Capacity.• On-site retention /detention and public stormwater attenuation ponds means there will not be an increase in downstream flooding.• See attachment to the submission for full details.		

Submitter Number:	90	Submitter:	Kevin Vickers
Point Number	90.1		
Summary of Decision Requested:	Amend the Significant Natural Area for the property at 38 Hermitage Road, Waiuku to only include the covenanted bush.		
Decision Reasons:			

- When making a resource consent application for a subsidiary dwelling, Councils consultant planner notified the applicant that the subsidiary dwelling was located inside the Significant Natural Area overlay when it was proposed to be located on a grassed area outside the covenanted bush shown on the title. This resulted in unnecessary assessment due to the overlay rule 22.2.7.
- This could cause the applicant unnecessary expense and delay if consent is required in the future on the area outside the covenanted bush.

Submitter Number:	92	Submitter:	Warren Jonson
Point Number	92.1		
Summary of Decision Requested:	Amend the zoning of the property at 158 Limmer Road RD8, Hamilton from Rural Zone to Village Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Village zone is appropriate for 158 Limmer Road because it is bounded by the Te Kowhai airfield (in particular the residential precinct). The site is a small parcel of land encompassed in a large block between the Te Kowhai village and Limmer Road, which pursuant to the current proposed plan is to be classified village or airfield. • The land between the airfield block and the village is zoned Village and it would be consistent to incorporate the land south of the airfield, village zone also. Our block is flat land suitable for Village zone development. • Further the intensification proposed for the airfield land will adversely affect the rural land potential of the site. 		

Submitter Number:	93	Submitter:	Martin Fleetwood
Point Number	93.1		
Summary of Decision Requested:	No specific decision sought, but submission states supports Chapter 22 Rural Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		

Submitter Number:	94	Submitter:	Carol Fleetwood
Point Number	94.1		
Summary of Decision Requested:	No specific decision sought, but submission states support for Chapter 22 Rural Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • No reason provided. 		

Submitter Number:	95	Submitter:	Warren Allen
Point Number	95.1		
Summary of Decision Requested:	Retain the Residential Zoning for the property at 18 Kernott Road Horotiu.		
Decision Reasons:	<ul style="list-style-type: none"> • Rezoning 18 Kernott Road from Country Living Zone to Residential Zone would better reflect the current land use in Horotiu. • Residential zoning would also allow more efficient, practical land use as well as additional capacity, to support the anticipated population growth in the Horotiu/Northgate Industrial Park area. 		

Submitter Number:	96	Submitter:	Carmen Allen
Point Number	96.1		
Summary of Decision Requested:	Retain the Residential Zoning for the property at 18 Kernott Road, Horotiu.		
Decision Reasons:	<ul style="list-style-type: none"> • Rezoning 18 Kernott Road from Country Living Zone to Residential will better reflect the current land use in Horotiu. • Residential zoning would also allow more efficient, practical land use and additional capacity to support the anticipated population growth in the Horotiu area. • As the Northgate Industrial Park establishes and develops, there will be increased demand for residential housing in the area. • The proposal to change the Horotiu zoning from Country Living Zone to Residential Zone future proofs the increased requirements for residential accommodation. • More residents in the areas will help provide for a base of students at Horotiu School. 		

Submitter Number:	97	Submitter:	Annie Chen Shiu
Point Number	97.1		

Summary of Decision Requested:	Retain the proposed Residential Zoning for 160ha land west of Helenslee Road and north of Huia Road, Pokeno (see map contained in the submission).
Decision Reasons:	<ul style="list-style-type: none"> • The ability to appropriately respond to key Pokeno-specific constraints such as the underlying topography and the provision of infrastructure has been demonstrated. • Infrastructure can be provided to ensure future residential development is adequately serviced. • The residential design is based around the existing contours and natural features of the site. This will ensure that these features are positively worked into the development with no large scale re-contouring or bulk earthworks proposed. • Assessment of the growth projections for Pokeno has identified the need for additional residential-zoned land. Evidence of this is the projected deficit in the supply of households in the periods of 2026 - 2035 and 2036-2045. This Pokeno West Plan Change area provides for circa 1350 residential lots which would greatly boost the future house stock of Pokeno ensuring the future demand for households in Pokeno can be met. • The Pokeno West Plan Change area represents a logical extension of the existing residential core of Pokeno. • Separated only by Helenslee Road, the opportunity exists for additional residential development expanding the areas that are currently developed/under development. • Council has obligations in accordance with the National Policy Statement Urban Development Capacity to ensure sufficient development capacity exists for the future. Retaining the Residential Zone as it is currently applied to the proposed area is a strategic move that will ensure Council's obligations can be met. • Supporting technical reports have been provided with the submission (refer to submission for these reports).

Submitter Number:	98	Submitter:	Andrew and Jo Payne
Point Number	98.1		
Summary of Decision Requested:	Amend the zoning of the property at 198C Buckville Road, Buckland from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean that residential housing would eventuate in this locality, rather than a large open space rural environment. • The subject property does not contain prime soils. • The property is located close to the village of Buckland and the town of Pukekohe. • A zone change from Rural to Country Living Zone is a logical progression in zoning for this area. 		

Submitter Number:	99	Submitter:	Peter Roberts
Point Number	99.1		
Summary of Decision Requested:	No specific decision sought, but submission opposes the painting of yellow no passing lines on Kaiua Road.		
Decision Reasons:	<ul style="list-style-type: none"> • Expresses concern about control to beauraucrats and cops, and that ratepayers are not trusted to use roads sensibly. 		
Point Number	99.2		
Summary of Decision Requested:	No specific decision sought, but submission states that Council are wasting ratepayers' money.		
Decision Reasons:	<ul style="list-style-type: none"> • Council does not respect ratepayers. • Council appears to be stealing rural ratepayers funds to subsidise town infrastructure. • Council hires contract ecologists. 		
Point Number	99.3		
Summary of Decision Requested:	No specific decision sought, but submission expresses concerns regarding the quality of Council's roading infrastructure, in particular Ratoroa Road.		
Decision Reasons:	<ul style="list-style-type: none"> • Ratoroa Road is not fit for purpose. • If there were to be a fatality on Rataoa Road, residents will point at Council negligence. • Council has taken contributions for subdivision on this road and returned nothing. • Extremely poor value for money on rates. • Maybe a rates boycott of road citizens is an option. 		
Point Number	99.4		
Summary of Decision Requested:	Delete the Significant Natural Area overlay, including from the property at 87 Rataroa Road, Miranda.		
Decision Reasons:	<ul style="list-style-type: none"> • Council hires contract ecologists to justify their work. • Significant Natural Areas are a Council grab at property rights. • Identifying these areas is the beginning of a hidden agenda. • Poorly identified Significant Natural Area, shows lusitanica forestry. • Council should stick to its knitting (i.e. Roads). 		

Submitter Number:	100	Submitter:	Medihah Bardsley
--------------------------	-----	-------------------	------------------

On behalf of:	The Bardsley No. 1 Family Trust
Point Number	100.1
Summary of Decision Requested:	Amend the area of Significant Natural Area through reassessing and reducing the area located at 31 Birchwood Lane, Tamahere.
Decision Reasons:	<ul style="list-style-type: none"> • Most of the area is immature native trees planted by the landowner that does not warrant Significant Natural Area status. • The Significant Natural Area unnecessarily restricts the subdivision potential of the property.
Point Number	100.2
Summary of Decision Requested:	Delete the Maaori Site of Significance S14/56 from the property at 31 Birchwood Lane, Tamahere.
Decision Reasons:	<ul style="list-style-type: none"> • Waikato District Council has acquired all of the land (Designation M106) that could be affected by the Maaori Site of Significance and it should no longer be associated with 31 Birchwood Lane, Tamahere.

Submitter Number:	101	Submitter:	Martin Bloxam
Point Number	101.1		
Summary of Decision Requested:	Amend the area of Significant Natural Area on the property at 13 Te Awa Lane, Tamahere to the area of natural wetland.		
Decision Reasons:	<ul style="list-style-type: none"> • The area identified on the planning maps exceeds the area of natural wetland that is considered of significant value. • There is a large wetland at the rear of the property which does have significant value. • The area identified appears to be based on an aerial photo taken when trees had leaves. • The trees are not native. They are pin oaks and swamp cypress planted 25 years ago. • The land under the tree shade is grassed and maintained by mowing. 		

Submitter Number:	102	Submitter:	Lawrence and Audrey Cummings
On behalf of:	Waiawa Downs Ltd		
Point Number	102.1		
Summary of Decision Requested:	Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below AND Amend the 1.6ha maximum lot size in Rule 22.4.1.2 General Subdivision (specific amendments not stated in the submission).		
Decision Reasons:	<ul style="list-style-type: none"> • To have greater flexibility for establishing a range of rural activities within the new lot. 		
Point Number	102.2		
Summary of Decision Requested:	Retain Rule 22.4.1.6 Conservation lot subdivision in its entirety.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		
Point Number	102.3		
Summary of Decision Requested:	Amend the thresholds for earthworks within a Significant Natural Area in Rule 22.2.3 PI (i) and (ii) Earthworks - Significant Natural area, to 200m3 volume and 800m2 area.		
Decision Reasons:	<ul style="list-style-type: none"> • There is an existing farm track dissecting the Significant Natural Area and the amended thresholds would be more appropriate for maintaining this. • Need more flexibility to cater for the characteristics of this particular property. 		

Submitter Number:	103	Submitter:	David Hall
Point Number	103.1		
Summary of Decision Requested:	Amend the zoning of the properties on along O'Brien Road, Rotokauri from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • There are 15 houses in O'Brien Road already. • There is a need for smaller sized sections close to Hamilton city. 		

Submitter Number:	104	Submitter:	Tim Newton
Point Number	104.1		
Summary of Decision Requested:	Amend the size of the proposed Significant Natural Area located on the property at 1665 Whaanga Road, Raglan to reflect areas of significant ecological value, as shown on the map attached to the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • Parts of the proposed Significant Natural Area are of low ecological value. • Comprises recently regenerated Kanuka as well as exotic species and pest species including woolly nightshade and gorse. • This area has been sustainably farmed for the past 100 years. • These areas are important parts of the farm and the loss of these productive areas will seriously impact on the economic value of the farm. • There are areas of vegetation that are of greater significance (see the map attached to the submission for further detail). 		
Point Number	104.2		
Summary of Decision Requested:	Amend the area of the Significant Natural Area on the property at 1665 Whaanga Road to exclude existing farm tracks.		
Decision Reasons:	<ul style="list-style-type: none"> • To ensure sustainable farm operations can continue. 		
Point Number	104.3		
Summary of Decision Requested:	<p>Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area by deleting "5m3" and replacing it with "1 per cent" AND</p> <p>Delete the words "outside the coastal environment" from Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • 5m3 is insufficient to provide for the heating needs of farms, especially those with more than one dwelling. • A 1 per cent allowance would have no adverse effects on sustainable management of the resource or on ecological values. • Excluding the coastal environment from the firewood allowance is unnecessary and unreasonable. 		
Point Number	104.4		
Summary of Decision Requested:	Amend Rule 22.2.3.4 Pl (a)(ii) Earthworks - within Landscape and Natural Character Areas, to allow 1,000m2 area and 500m2 volume for all categories of landscape or natural character areas.		
Decision Reasons:	<ul style="list-style-type: none"> • The restrictions on all categories of landscape or natural character areas other than Hill Country are unrealistic and will unreasonably restrict ordinary farm management activities. 		
Point Number	104.5		
Summary of Decision Requested:	Amend Rule 22.2.3.3 Earthworks - Significant Natural Areas, to permit earthworks to construct new tracks through Significant Natural Areas.		
Decision Reasons:	<ul style="list-style-type: none"> • Rule 22.2.3.3 is silent about construction of new tracks in Significant Natural Areas. • New tracks should be permitted to enable farming operations and farm development. 		
Point Number	104.6		
Summary of Decision Requested:	Amend the extent of the Significant Natural Area on the property at 1109 Whaanga Road, Raglan to reflect areas of significant ecological value worthy of protection.		
Decision Reasons:	<ul style="list-style-type: none"> • Wish to ensure any further sites removed from current farming land use are surveyed and verified as worthy of protection. • Some areas included in the proposed Significant Natural Area has been cleared regularly and is used for grazing stock. • Areas typically around streams, gullies and significant natural diversity should be preserved. • This property and neighbouring properties need to continue to be managed as working farms. • Wish to work with Council to identify the truly significant natural areas on the farm and ensure it does not interfere with practical farm operations or compromise stock welfare. 		

Submitter Number:	105	Submitter:	William & Paulette Screen
Point Number	105.1		
Summary of Decision Requested:	Amend the zoning of the property at 118 Logan Road, Buckland to be zoned from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing, and therefore a residential environment in this locality rather than a large open space rural environment. • The subject property does not contain prime soils. • Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area. • Buckland School is located within close proximity to the submitter's property. • A Christian School is directly opposite the submitter's property. 		

- A proposed school is within 1 km of the submitter's property.

Submitter Number:	106	Submitter:	Bruce and Dorothy Chipman
Point Number	106.1		
Summary of Decision Requested:	Retain the Rural Zoning for the property at 1689 Miranda Road, Mangatangi.		
Decision Reasons:	<ul style="list-style-type: none"> • Support the Proposed District Plan bringing together both Sections (Franklin and Waikato) of the District. • Having a property that is across both sections has made subdivision difficult and costly due to the inconsistency between the two sets of rules. 		
Point Number	106.2		
Summary of Decision Requested:	Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought AND Amend Policy 5.3.8(d) Effects on rural character and amenity from rural subdivision as follows: (d) Rural hamlet subdivision and boundary relocations <u>of consented lots and Records of Title</u> ensure the following...		
Decision Reasons:	<ul style="list-style-type: none"> • Clause (d) is amended to include the provision for the relocation of consented lots and Records of Title. 		
Point Number	106.3		
Summary of Decision Requested:	Amend the activity status of Rule 22.4.1.1 PR2 Prohibited subdivision, from Prohibited to a Non-Complying Activity.		
Decision Reasons:	<ul style="list-style-type: none"> • There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies, particularly with regards to rural character and landscape. 		
Point Number	106.4		
Summary of Decision Requested:	Amend Rule 22.4.1.1 Prohibited subdivision, to replace "lot" with "Record of Title or consented lot".		
Decision Reasons:	<ul style="list-style-type: none"> • It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title. 		
Point Number	106.5		
Summary of Decision Requested:	Retain Rule 22.4.1.2 (a)(i) – (ii) General Subdivision.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports the inclusion of General Subdivision rules. 		
Point Number	106.6		
Summary of Decision Requested:	Add a performance standard to Rule 22.4.1.2 (a)(iv) General Subdivision that allows for smaller lots around existing dwellings that follow the fenced curtilage, driveway, effluent disposal and any reserve area.		
Decision Reasons:	<ul style="list-style-type: none"> • General Subdivision creating a child lot around an existing dwelling should be able to be smaller than 8,000m2. • Where curtilage is established and a farming regime in place, flexibility in lot size should be provided to ensure that the existing farming regime can continue. 		
Point Number	106.7		
Summary of Decision Requested:	Delete Rule 22.4.1.2 (a)(v) General Subdivision, in relation to the 80/20 provision for high class soil.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter agrees with the intent of this rule, which is to design subdivision to avoid the fragmentation and loss of the high class soils. • The strict and arbitrary 80/20 requirement may not necessarily result in the best layout, design or environmental outcome for the site. • Would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. • The requirement to include Landuse Capability Reporting with every subdivision under the General Provisions becomes an additional compliance cost that does not result in a better outcome. • There is no analysis in the s32 report as to why the 80/20 rule was chosen as a method. 		
Point Number	106.8		
Summary of Decision Requested:	Add the following matter of discretion to Rule 22.4.1.2 General Subdivision, as follows: (b)(vii) effects on rural productivity and fragmentation of high class soils.		
Decision Reasons:	<ul style="list-style-type: none"> • Council's planners should be able to have discretion of where these are required to adequately assess the effects of the subdivision. 		

- Would like to see matters relating to the retention of high class soils and the maintenance of productivity /farming systems addressed as a matter of discretion for the General Subdivision provisions.

Point Number 106.9

Summary of Decision Requested: **Amend** Rule 22.4.1.4 Boundary Relocation, to read as follows:

(a) *The boundary relocation must:*

(i) *Relocate a common boundary or boundaries between two or more existing Records of Title or consented lots that existed prior to 18 July 2018...*

Decision Reasons:

- Support the inclusion of boundary relocation provisions.
- Support flexibility to allow rural properties to rationalise large landholdings.
- Would like provision made for the relocation of the boundaries of adjacent and consented lots and Records of title held in common ownership.
- This could be achieved by allowing consented lots to be relocated under the Boundary Relocation and Rural Hamlet Subdivision Rules.

Point Number 106.10

Summary of Decision Requested: **Amend** Rule 22.4.1.5 Rural Hamlet Subdivision as follows:

(a) *Subdivision to create a Rural Hamlet must comply with all of the following conditions:*

...

(iii) *Each proposed lot has a minimum area of 5,000m² to 8,000m².*

(iv) *Each proposed lot has a maximum area of 1.0ha to 4ha.*

(b) *Council's discretion is restricted to the following matters:*

...

(v) *Effects on rural productivity and fragmentation of high class soils.*

Decision Reasons:

- Allow for relocation of consented General Lots within a continuous landholding as part of a Rural Hamlet, where farmers have multiple titles.
- Would have positive outcomes through the provision of shared infrastructure and maintenance of the production systems.
- It will limit the wide dispersal of lots and enable subdivision layout to account for effects from intensive farming or mineral extraction activities.
- Rural hamlets can be difficult to achieve in reality and hamlet design needs to specifically respond to the site circumstances and it may be more appropriate to have smaller size lots to ensure the benefits of Hamlet design are achieved.
- The design guide should ensure that a response to the landscape context is more important than meeting performance standards relating to lot size and should allow for a reduction in the lot size.
- Rural Character and amenity values will be maintained by the 20ha + balance surrounding the Hamlet.
- Five lots at 1.6ha would take up 8ha of land and would visually result in dispersed rural housing and not a Hamlet and would result in a loss of productive land.

Point Number 106.11

Summary of Decision Requested: **Add** the following matter of discretion to Rule 22.4.1.4 Boundary Relocation:

(v) *Effects on farm management and productivity.*

Decision Reasons:

- Support the inclusion of boundary relocation provisions.
- Support flexibility to allow rural properties to rationalise large landholdings.
- Would like provision made for the relocation of the boundaries of adjacent and consented lots and Records of title held in common ownership.
- This could be achieved by allowing consented lots to be relocated under the Boundary Relocation and Rural Hamlet Subdivision Rules.

Submitter Number: 107

Submitter: Dirk-Jan & Family Oostdam

Point Number 107.1

Summary of Decision Requested: **Amend** the zoning of the property at 196B Logan Road, Buckland, Pukekohe from Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing, and therefore a residential environment in this locality rather than a large open space rural environment.
- The subject property does not contain prime soils.
- Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area.

Submitter Number: 108

Submitter: Kevin and Barbara Brown

On behalf of: Warkworth Law Trust

Point Number 108.1

Summary of Decision Requested: No specific decision sought, but submission states support for the Proposed District Plan and for growth and subdivision. The submission references properties at 17 Innovation Way, Horotiu and 18 Rangimarie Road, Ngaruawahia.

Decision Reasons:

- The growth that is required for the future for this location.
- Subdivision required for the population growth explosion on its way.

Submitter Number:	109	Submitter:	Gareth Wigmore
Point Number	109.1		
Summary of Decision Requested:	Amend the noise limits applying at the notional boundary within any zone to reflect World Health Organisation limits db (LA Max), excluding noise generated by farming and noise generated by emergency generators and emergency sirens.		
Decision Reasons:	<ul style="list-style-type: none"> • db (LA eq) limits are difficult and expensive to measure. • World Health Organisation Limits use simple db (LA max) levels to measure noise limits to protect people in all zones from excessive noise. 		
Submitter Number:	110	Submitter:	GD Jones
Point Number	110.1		
Summary of Decision Requested:	Retain the Village Zone in Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> • The Village Zone is an appropriate solution to allow for large lot subdivision without compromising the desire for potential increased density in the future. 		
Point Number	110.2		
Summary of Decision Requested:	Retain all elements of the Village Zone including Section 4.3 Village Zone except for the amendments sought below. AND Amend Rule 24.4.2 RD1(a) Subdivision - Te Kowhai and Tuakau, to reduce the minimum net site area from 3000m2 to 2500m2. AND Amend Rule 24.4.2 RD2(a) Subdivision - Te Kowhai and Tuakau, to reduce the minimum net site area from 1,000m2 to 800m2.		
Decision Reasons:	<ul style="list-style-type: none"> • 2500m2 is sufficient to enable an environmentally safe on-site wastewater solution and the site reduction allows for more flexibility in subdivision design. • 2500m2 is in line with the non-serviced single lot zone minimum size requirements in the Auckland Unitary plan. • Reducing the minimum size will allow more flexible design while keeping the larger residential lot objective of the zone. • 800m2 is in line with the non-serviced single lot zone minimum size requirements in the Auckland Unitary plan. 		
Point Number	110.3		
Summary of Decision Requested:	Amend Rule 14.12.5.14 Access and Road conditions to increase the access allotment requirement from 5 - 8 to 5 - 10 AND Amend Rule 14.12.5.14 Access and Road conditions to increase the local road allotment from >8 to >10.		
Decision Reasons:	<ul style="list-style-type: none"> • Under the proposed rule if 221 Dominion Road is developed initially in a non-serviced scenario 10 allotments could be potentially developed via an access allotment. • The proposed access lot rule would limit that unnecessarily to 8 lots. • It would be inefficient and out of place for the property to have a full 20m wide local road requirement. 		
Submitter Number:	111	Submitter:	Peter Donald Johnson
Point Number	111.1		
Summary of Decision Requested:	Amend the zoning of the property at 94 Buckville Road from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. • The subject property does not contain prime soils. • Given the close proximity to the village of Buckland and Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area. 		
Submitter Number:	112	Submitter:	Graham Reaks
Point Number	112.1		
Summary of Decision Requested:	Amend the zoning of the property at 76 Logan Road, Pukekohe from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. 		

- The subject property does not contain prime soils.
- Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area.

Submitter Number:	113	Submitter:	Dianne Murdoch
Point Number	113.1		
Summary of Decision Requested:	No specific decision sought, but submission refers to Significant Natural Areas and provides an annotated map.		
Decision Reasons:	<ul style="list-style-type: none"> • See map attached to submission for further detail. The areas highlighted in red are already covenanted, as are the rest of the trees on the property at 60 Kidd Road, Waiuku. These areas are already fenced. 		

Submitter Number:	114	Submitter:	Steven Mundy - Z & Z Developments Limited Partnership
Point Number	114.1		
Summary of Decision Requested:	Amend the zoning of the property at 102 Travers Road, Te Kauwhata from Country Living Zone to Village Zone AND Amend Rule 24.4.2 Subdivision - Te Kowhai and Tuakau to apply the minimum net site area requirements of 1,000m2 to subdivision at 102 Travers Road, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> • A minimum net site area of 1000m2 is appropriate for the site given the capability of the site to be provided with connections to public potable water and wastewater infrastructure. • The minimum lot area with the exemption applied is 4000m2 less than for general subdivision within the Country Living Zone. • Te Kauwhata is referenced in key strategic growth documents as an area for substantial growth and sufficient land will be needed to cater for this growth. • The submission site is primed for development and will greatly improve development capacity within Te Kauwhata. • The site will be able to provide a significantly higher lot yield. • The site adjoins the Residential Zone and has direct road access. • The adjoining Environmental Protection Areas will not be adversely affected by the relief sought. • A geotechnical report indicates there are no major geotechnical constraints (see report attached to the submission as Appendix C for further detail). • The site could create a transition zone between the large lots of Green Acres Drive and the smaller lots of Bragato Way. • Provides an increased variety of lot sizes. • Meets the relevant objectives and policies in the Proposed District Plan. • The site can fulfill Waikato District Council's visions for development within the Village Zone including meeting the desired residential character, reticulation is possible for water, wastewater and stormwater. • See the concept plan attached as Appendix B to the submission for further detail. 		

Submitter Number:	115	Submitter:	Robina Ross
Point Number	115.1		
Summary of Decision Requested:	Add 14 Galileo Street, Ngaruawahia as a heritage item to Schedule 30.1 (Historic Heritage Items).		
Decision Reasons:	<ul style="list-style-type: none"> • The house is a villa over 100 years old. • It retains its original general form materials and street façade, including original double-hung sash windows with lead lights and bull nosed roofed verandah. • The house has architectural significance and intrinsic or amenity values that meet the list under Policy 7.1.3. • The original owner of this house was William King, who was the first baker in Ngaruawahia and the original bakery building is still standing as a listed heritage item. • The house at 14 Galileo Street is currently listed as a heritage item in The Operative District Plan (number 125). 		

Submitter Number:	116	Submitter:	Ross & Margery Weir
On behalf of:	R.M. & M.A. Weir Family Trust		
Point Number	116.1		
Summary of Decision Requested:	Amend the zoning of the property at 702 State Highway 39 (Horotiu Rd) at Te Kowhai, on the western side of State Highway 39, from Village Zone to Rural Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The land proposed to be zoned as Village Zone is currently a working dairy farm and its production will be lost with a Village Zoning. • Other land along Te Kowhai Road would be more suitable for Village Zoning as it is already fragmented and unproductive. 		
Point Number	116.2		
Summary of Decision Requested:	Retain the Village Zone on the property at 692 Te Kowhai Road.		
Decision Reasons:	<ul style="list-style-type: none"> • The land is suitable for Village Zone as it is handy to the village and is already unproductive because of previous subdivision. • People's preference is for smaller blocks so they do not spend all weekend on lawnmowers. 		

Submitter Number:	117	Submitter:	Navin Makan
Point Number	117.1		
Summary of Decision Requested:	Retain Residential Zoning for the property at 2346A Buckland Road, Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> The proposed Residential rezoning is required because of housing demand and due to the potential for reverse sensitivity issues - cropping operations involve noise, dust, spray and sometimes irregular hours such as night and public holidays. 		
Point Number	117.2		
Summary of Decision Requested:	Consider the most appropriate location for the walkway/cycleway/bridleway identified on 2346A Buckland Road.		
Decision Reasons:	<ul style="list-style-type: none"> The walkway is in low land wetland in places (swamp). 		

Submitter Number:	118	Submitter:	Neil & Suzanne Cummings
Point Number	118.1		
Summary of Decision Requested:	Amend the zoning of the property at 1474 Kauaia Road, Mangatangi from Rural Zone to Village Zone.		
Decision Reasons:	<p>The land is suitable for Village Zone subdivision for the following reasons:</p> <ul style="list-style-type: none"> Easy contour; Adjoins Managatangi Village; Has good road access on a tarsealed road in a 80km/hr speed zone. 		

Submitter Number:	119	Submitter:	Dheru Makan
On behalf of:	Makan Daya & Co Ltd		
Point Number	119.1		
Summary of Decision Requested:	Retain the Residential Zoning of the properties at 2356 and 2364 Buckland Road, Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> Proposed Residential Zone of the sites is required because of housing demand. There are potential reverse sensitivity issues, also market garden operations involve sprays, irrigation, noise, dust in irregular hours such as public holidays and night times. 		
Point Number	119.2		
Summary of Decision Requested:	Amend the location of the walkway/cycle way/bridleway near 2356 and 2364 Buckland Road, Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> Some contours are not practical as the ground levels drop into swamp areas. 		

Submitter Number:	120	Submitter:	Amanda Shaw
Point Number	120.1		
Summary of Decision Requested:	Amend zoning of the properties in Scotsman Valley, Tauwhare which are currently Country Living Zone in the Operative District Plan from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> Land owners in the Country Living Zone at Scotsman Valley have already made plans and investment decisions that reflect the value of the land and subdivision potential of the Country Living Zone. It is therefore unfair to change it to the Rural Zone. There will be no value to the District from the Rural Zoning in terms of agricultural production. 		

Submitter Number:	121	Submitter:	Mark Fendall
Point Number	121.1		
Summary of Decision Requested:	Amend the zoning of the properties 129, 151 and 161G Hakarimata Road, Ngaruawahia from Country Living Zone to Village Zone.		
Decision Reasons:	<ul style="list-style-type: none"> This change would allow one additional lot to be subdivided allowing a greater number of people to live in a native bush clad setting, close to and enabling the growth of Ngaruawahia. 		

- The growth of subdivision to the north along Hakarimata Road highlights a clear need for additional housing in this area.
- This land is at the foot of the Hakarimata range, beneath the native bush that the reserve is known for. The proposed additional lot would have minimal or no visual impact, being set low down and close to Hakarimata road, but with sufficient planting that the setting would not be disturbed.
- To preserve the mana of the Hakarimata, the owners have already designated three quarters of the property (4.5ha) as a Significant Natural Area.
- This is not productive agricultural land, but it would provide for self-sufficient living without the need for reticulated services.
- Electricity supply and telecommunications services are already nearby.
- There is an existing area for a dwelling, which would require minimal earthworks.
- This lot would use the existing shared driveway to Hakarimata Road, which has good sightlines and would provide safe access. This would also minimise any additional runoff.
- The above reasons would make it appropriate to zone this property as Village zoning as per Section 24 of the Proposed District Plan. This zoning would allow for one additional lot with a minimum lot size of 3000m² to be created.
- On this basis, the submitters believe that setting 161G Hakarimata Road, as a Village Zone would be of benefit to the people and economy of the Waikato.

Submitter Number:	122	Submitter:	Mark Fendall
Point Number	122.1		
Summary of Decision Requested:	Amend the zoning of the properties at 129, 151 and 161G Hakarimata Road, Ngaruawahia from Country Living Zone to Village Zone		
Decision Reasons:	<ul style="list-style-type: none"> • The change would allow a greater number of people to live in a native bush clad setting, close to and enabling the growth of Ngaruawahia. • The growth of subdivision to the north along Hakarimata Road highlights a clear need for additional housing in this area. • This land is at the foot of the Hakarimata range, beneath the native bush that the reserve is known for. The subdivision options would have minimal or no visual impact, being set low down and close to Hakarimata road, but with sufficient planting that the setting would not be disturbed. • In order to preserve the mana of the Hakarimata, the owners of 161G have already designated three quarters of their property (~4.5 hectares) as a Significant Natural Area. This is not productive agricultural land, but it would provide for self-sufficient living without the need for reticulated services. Electricity supply and telecommunications services are already nearby. • There are existing obvious plots for future dwellings, which would require minimal earthworks. • These lots could use the existing shared driveway to Hakarimata Road, which has good sightlines and would provide safe access. This would also minimise any additional runoff. • The above reasons would make it appropriate to zone these properties as Village Zoning as per Section 24 of the Proposed District Plan. This zoning would allow for one additional lot with a minimum lot size of 3000m² to be created for each property. 		

Submitter Number:	123	Submitter:	Libby Gosling
Organisation:	Classic Builders Waikato Limited		
Point Number	123.1		
Summary of Decision Requested:	Retain Rule 14.12.1.3(1)(a)(i) Permitted Activities – exemption of Local Roads within the Residential and Village Zones with a posted speed limit of less than 60km/h from providing on-site manoeuvring, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The currently operative District Plan requires that all sites provide onsite manoeuvring and the submitters find that this requirement is very restrictive and results in poor outcomes where the house functionality and onsite amenity is sacrificed to cater to car parking and manoeuvring space. • The submitters support the proposed change to remove this requirement for residential properties in low speed environments. 		
Point Number	123.2		
Summary of Decision Requested:	Retain Rule 14.12.5.7 Required parking spaces and loading bays which requires two car parks per dwelling, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The currently operative plan requires one onsite car park to be provided per bedroom in a dwelling. • The submitters support the proposed change for two carparks per dwelling. • More than two carparks is excessive, results in poor outcomes for the site, and is counterproductive to encouraging the use of public transport. 		
Point Number	123.3		
Summary of Decision Requested:	Delete Rule 16.1.3 RD1 (c) Restricted Discretionary Activities, which requires a minimum net site area of 300m² for multi-unit development OR Amend Rule 16.1.3 RD1 (c) Restricted Discretionary Activities to reduce the minimum net site area to less than 300m² for each unit for multi-unit development.		
Decision Reasons:	<ul style="list-style-type: none"> • Council already has discretion without being fixed on a specific value (e.g. 600m² for a duplex). In Hamilton, the requirement for a duplex is 400m². 		
Point Number	123.4		
Summary of Decision Requested:	Delete Rule 16.2.4.1 PI(a) (vi) Earthworks – General requiring earthworks to be a minimum of 1.5m from all boundaries.		
Decision Reasons:			

- The submitters believe that this minimum setback is impractical, particularly as section sizes get smaller.
- Frequently a small batter or retaining wall is required near the boundary, but not at a scale that should require resource consent.
- The permitted yard requirement for the residential zone is 1.5m (to cladding), to build 1.5m from a boundary, it is necessary to undertake earthworks to create the footings etc. for the foundation which would be within this 1.5m area and trigger resource consent.

Point Number 123.5

Summary of Decision Requested: Amend Rule 16.3.9.1 P1 (a) Building setbacks – All boundaries, to allow eaves to encroach over setbacks.

Decision Reasons:

- This is common in many other districts and allows sites to be more usable, particularly as sites become smaller.

Point Number 123.6

Summary of Decision Requested: Retain Rule 16.4.1 (a)(i) Subdivision – General, relating to minimum net site area.

Decision Reasons:

- The submitters support the removal of the 600m² average lot size as in the Operative District Plan.
- The submitters do not consider a 600m² average lot size enables the efficient use of residentially zoned land.
- It restricts the submitter's ability to provide affordable housing due to reduced yield, and less efficiencies gained in servicing and development of the land.
- The submitters consider a 450m² average lot size to be beneficial to provide some range and variation in lot sizes, or for policy framework to support lot size variation if discretionary activity resource consent is sought, to promote a range of typologies .

Point Number 123.7

Summary of Decision Requested: Amend Rule 16.3.2 (a)(i) Minor dwelling to reduce the minimum net site area 900m² to enable Minor dwellings on smaller lots.

Decision Reasons:

- The submitters have experienced that minor dwellings are becoming more common for a variety of situations (e.g. investors, elderly parents, adult children saving for home deposit).
- Minor dwellings are often being constructed with new builds to provide an additional income stream for first home buyers and helping finance approval.
- In a new build situation, minor dwellings can easily be integrated into the bulk of the primary dwelling.
- In Tauranga, sections 500m² and over are allowed. In Queenstown, there is no minimum lot size to be entitled to a Minor dwelling but the submitters are frequently building them on lots of approximately 400m². Whilst the submitters acknowledge that Tauranga and Queenstown are quite different to Waikato, they believe that 900m² is too restrictive.
- The 900m² limit will rule out the majority of new-build/greenfield subdivisions, because the lots sizes are too small.

Point Number 123.8

Summary of Decision Requested: Amend Rule 16.3.5 P1 Daylight admission, as follows:

Buildings must not protrude through a height control plane rising at an angle of ~~27.45~~ degrees commencing at an elevation of ~~2.52.7m~~ above ground level at every point of the site boundary.

Decision Reasons:

- This daylighting standard is too restrictive on smaller lots, and lots that have topographical constraints and variations.

Point Number 123.9

Summary of Decision Requested: Retain Rule 16.3.8 Service court, except for the amendments sought below

AND

Amend Rule 16.3.8 Service court to allow for greater flexibility to how it can be achieved and delivered.

Decision Reasons:

- The current requirement results in dwellings being designed around a 15m² space containing a 3m circle.
- 2m is an adequate width to allow wheelie bins etc., this would allow greater flexibility to provide these spaces in locations that are usable, and functional, rather than just wherever it is manageable to fit a 3m circle.

Point Number 123.10

Summary of Decision Requested: Amend Rule 16.3.9 Building setbacks to not apply to rear lots, or other lots where the garage door is not on a main street facing facade of the dwelling, e.g. laneways or side entry garages.

Decision Reasons:

- The rule needs clarifying.
- This rule should not be applied to rear lots or other Lots where the Garage door is not on main street facing facade of the dwelling (e.g. laneways).
- This rule should not apply to side entry garages.

Submitter Number: 124

Submitter: Tony Welch

Point Number	124.1
Summary of Decision Requested:	Amend the zoning of the property at 52 Scott Road, Te Kauwhata, from Residential Zone to Light Industrial Zone as it was in the Operative District Plan.
Decision Reasons:	<ul style="list-style-type: none"> The submitter is currently running a self-storage business on the property as it is currently zoned as Light Industrial. The submitter would not be able to run their business under Residential zoning. The Waikato District Council has approved the business under a building consent. The submitter is in the process of subdividing the land under SUB 0053/19, so would be happy if Lot 2 was kept as Light Industrial.

Submitter Number:	125	Submitter:	Guy Rathbone
Organisation:	Dunholme Farm		

Point Number	125.1
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 5254 Highway 22, Waingaro.
Decision Reasons:	<ul style="list-style-type: none"> The submitter had attended a meeting at the council in 2015 and was assured that they did not have any significant areas on the farm. 91% of what the submitters produce is exported. By protecting Manuka and Kanuka, both, which are very fast growing and spreading each year, restricts the farm use and production. Both Manuka and Kanuka protect and allow gorse, blackberry, privet, tobacco and heather to become established and spread under the cover of this environment. The submitter has controlled the spread of Manuka and Kanuka by using scrub cutter bars and not burning these plants - unlike other farms in the area. There is now over 500 Totara trees and other native trees, plus exotic trees they have planted. This is because they did not burn areas and did not clear all native trees, as they have more than protected native trees for future generations. In comparison to other cut and burn farms the submitter is now being penalised under the Significant Natural Area proposal. The submitter asks for their steady plan of control to be allowed so they can continue to be viable in the future and carry on protecting native trees. Farmers are being penalised by this scheme compared to other farmers who have burnt all trees and now have all their farm cleared and in pasture. By the Council imposing the proposed Significant Areas plan and telling farmers they are unable to control the re growth of Manuka and Kanuka, this is reducing the grazing land available to help increase the sheep numbers, which in turn will increase the export returns of the country. The submitter is a member of the NZ Tree Crops Association so is committed to the preservation of native trees for future generations and should be allowed to continue to preserve the countries heritage.

Submitter Number:	126	Submitter:	Bonita Dean
--------------------------	-----	-------------------	-------------

Point Number	126.1
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 523 Waingaro Road, Ngaruawahia.
Decision Reasons:	<ul style="list-style-type: none"> The quality of the bush is low as it is regenerated tea tree and planted gum trees to prevent erosion (see the photos attached to the submission for further detail). It also includes undesirable species such as pine and pest species such as gorse and blackberry. Part of the mapped area is pasture. The land does not have any vegetation that has significant value as defined in the policy for significant natural areas. There will be a detrimental effect on farming activities through lose of productive area. The substantial fencing area costs would far outweigh the quality of the vegetation identified for protection. There would be no benefit in protection; only unjustified costs to the landowner.

Submitter Number:	127	Submitter:	Gary & Jill Morris
--------------------------	-----	-------------------	--------------------

Point Number	127.1
Summary of Decision Requested:	Amend zoning of the property at 157D Golding Road, Pukekohe from Rural Zone to Country Living Zone.
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territorial boundary has been zoned Future Urban under the Auckland Unitary Plan. This could result in a residential environment in this locality rather than a large open space rural environment. The property does not contain prime soils. Country Living Zone is a logical progression in zoning for this area given the close proximity to Buckland and Pukekohe.

Submitter Number:	128	Submitter:	Trevor Reid
--------------------------	-----	-------------------	-------------

Point Number	128.1
Summary of Decision Requested:	Retain the Residential Zoning for the property at 6257 Great South Road, Horotiu.
Decision Reasons:	<p>This land is suitable for Residential Zone for the following reasons:</p> <ul style="list-style-type: none"> Close to the school

- Good road access
- Forms part of the same community as the properties in the Residential Zone on the north side of Horotiu Bridge Road.

Point Number 128.2

Summary of Decision Requested: **Delete** the requirement in Rule 22.3.2 P1 (b)(i) Minor dwelling for the minor dwelling to be located within 20m of the existing dwelling.
AND
Delete the requirement in Rule 22.3.2 P1 (b)(ii) Minor dwelling for a minor dwelling to share a driveway with the existing dwelling.

Decision Reasons:

- There should be more flexibility in the rule to fit the circumstances of the residents and make better practicable use of existing land areas and driveways.

Point Number 128.3

Summary of Decision Requested: **Retain** the Residential zoning of the property at 108 Horotiu Bridge Road, Horotiu.

Decision Reasons:

- It makes sense for it to be Residential Zone given the new residential development.

Point Number 128.4

Summary of Decision Requested: **Retain** Rule 20.2.3.1 P3 Noise - General.

Decision Reasons:

- This rule provides existing residences with a safeguard against excessive noise from nearby Industrial Zones.
- Existing houses at Horotiu, near the Industrial Zone, do not have noise insulation and therefore need to have their amenity protected.

Submitter Number: 129 **Submitter:** Geoffrey Long

Point Number 129.1

Summary of Decision Requested: **Amend** the zoning of land in the Matangi vicinity from Rural Zone to Country Living Zone (see the map attached to the submission for the general area).

Decision Reasons:

- The area is already in small lots and not in farm production.
- Country Living Zone would better provide for the existing residents as well as releasing the development potential of the area.

Submitter Number: 130 **Submitter:** Kathleen Reid

Point Number 130.1

Summary of Decision Requested: **Retain** the Residential zoning of the property located at 6257 Great South Road, Horotiu.

Decision Reasons:

- The property at 6257 Great South Road, Horotiu is close to services and the school.
- Its residential development will be in keeping with neighbouring properties and will provide a good quality gateway to Hamilton.

Point Number 130.2

Summary of Decision Requested: **Amend** the noise limits to match the Operative District Plan for the Industrial Zone.

Decision Reasons:

- No reasons provided.

Point Number 130.3

Summary of Decision Requested: **Delete** the requirement in Rule 22.3.2 P1 (b)(ii) for the minor dwelling to be located within 20m of the existing dwelling.
AND
Delete the requirement in Rule 22.3.2 P1 (b)(ii) Minor dwelling for minor dwellings to share a driveway with the existing dwelling.

Decision Reasons:

- There should be more flexibility in the rule to fit the circumstances of the residents and to make better practicable use of the existing land areas and driveways.

Point Number 130.4

Summary of Decision Requested: **Amend** Rule 16.3.10 P1 Building - Horotiu Acoustic Area to make it clear that existing buildings do not have to comply with the insulation requirements.

Decision Reasons:

- The rule is not clear about the requirements to insulate existing buildings.

- It would be unfair and costly for existing buildings to be insulated.

Point Number 130.5

Summary of Decision Requested: Retain the Residential Zone of the property at 108 Horotiu Bridge Road.

Decision Reasons:

- The zoning has previously been proposed by Council and agreed by residents.
- The land is suitable for Residential Zoning for the following reasons:
 - It has good road access;
 - It is handy to Horotiu School; and
 - Surrounded by houses.

Point Number 130.6

Summary of Decision Requested: Retain Rule 20.2.3.1 P3 Noise - General.

Decision Reasons:

- This rule provides existing residences with a safeguard against excessive noise from nearby industrial zones.
- Existing houses at Horotiu near the Industrial Zone do not have noise insulation and therefore need to have their amenity protected.

Submitter Number: 131

Submitter: Vanessa Gibson

On behalf of: Brownie Investments

Point Number 131.1

Summary of Decision Requested: Retain the Residential Zoning of the property at 6257 Great South Road, Horotiu.

Decision Reasons:

- Good use of land with the anticipated growth within the area.
- Will provide a wider range of housing options.
- A good quality development as a gateway to Hamilton as opposed to industrial.
- Close to services.
- Within walking distance to school.
- Fits in with the development of neighboring properties.

Submitter Number: 132

Submitter: Brett Harvey

Organisation: B&A Harvey Ltd

Point Number 132.1

Summary of Decision Requested: Delete the Significant Natural Area from all B & A Limited Properties, Te Kauwhata.

Decision Reasons:

- Render the land incapable of reasonable use.
- The land and values have been protected for as long as the family have owned it and there is no need for identification of a Significant Natural Area on the site.
- Negative effect on the land values and workability.
- Council can purchase property if it wants it to be a Significant Natural Area (refers to a property in the middle of Lake Waikare which is for sale).
- The submitter is concerned that Council is trying to steal the natural areas.

Submitter Number: 133

Submitter: Simon Gibson

Point Number 133.1

Summary of Decision Requested: Retain the Residential zoning of the property at 6257 Great South Road, Horotiu.

Decision Reasons:

- The submitter wishes to subdivide and provide family homes.
- Support the local school and community.
- Fits in with the development of neighbouring properties.
- Can provide a range of stylish homes.

Point Number 133.2

Summary of Decision Requested: Ensure that the Industrial Zone noise limits are not increased.

Decision Reasons:

- No reasons provided.

Submitter Number:	134	Submitter:	Barbara Baker
Point Number	134.1		
Summary of Decision Requested:	Requests removal of the recently planted trees on the roadside of Te Kowhai Road, Hamilton.		
Decision Reasons:	<ul style="list-style-type: none"> • These trees will cause a traffic hazard because they grow too big and their trimming or removal is a ratepayer expense. • Keeping them trimmed relies on the health of the owner and continuous ownership of the property. 		

Submitter Number:	135	Submitter:	John & Roselei Holland
Point Number	135.1		
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 368 Riverview Road, Huntly.		
Decision Reasons:	<ul style="list-style-type: none"> • The bush is not high quality as it is a remnant of previously logging. • The adjacent Aggregate Extraction Area and Aggregate Resource Area will be compromised by the Significant Natural Areas as the rock resource provides economic, social and environmental benefits to the district as per Objective 5.4.1. 		

Submitter Number:	136	Submitter:	Evelyn Ward
On behalf of:	Ward Ranch Ltd		
Point Number	136.1		
Summary of Decision Requested:	Remove the weir from the Whangamarino Wetland.		
Decision Reasons:	<ul style="list-style-type: none"> • The weir has ruined any natural aspects of the Whangamarino Wetland, has resulted in no water flow through the Pungarehu or Morrins Creek area, which are flooded with stagnant water. • It has caused drainage, pasture and fencing damage on the submitter's property. 		

Submitter Number:	137	Submitter:	Michele Gamble
Point Number	137.1		
Summary of Decision Requested:	Retain the proposed Residential zoning of the property located at 6257 Great South Road, Horotiu.		
Decision Reasons:	<ul style="list-style-type: none"> • The property at 6257 Great South Road is close to the school and services. • Developing it for residential purposes will be in keeping with neighbouring properties. • It will provide a more attractive gateway to Hamilton than industrial development. 		
Point Number	137.2		
Summary of Decision Requested:	Amend the noise limits to match the Operative District Plan for the Industrial Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.

Submitter: Kirsten Seamer

Point Number 144.1

Summary of Decision Requested: Amend the zoning of the property at 166 Logan Road, Buckland from Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west is zoned Future Urban under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment rather than a large open space rural environment.
- The site does not contain prime soils.
- Given the close proximity to Buckland and Pukekohe, a change from Rural Zone to Country Living Zone is a logical progression in zoning for this area.

Submitter Number: 145

Submitter: Peter & Lee Walter

Point Number 145.1

Summary of Decision Requested: Amend the zoning of the property at 181D Golding Road, Pukekohe from Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west is zoned Future Urban under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment rather than a large open space rural environment.
- The site does not contain prime soils.
- Given the close proximity to Buckland and Pukekohe, a change from Rural Zone to Country Living Zone is a logical progression in zoning for this area.

Submitter Number:	146	Submitter:	Bruce & Raelyn Wallbank
Point Number	146.1		
Summary of Decision Requested:	Amend the zoning of the property at 210C Logan Road, Buckland from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west is zoned Future Urban under the Auckland Unitary Plan. • This could mean residential housing and therefore a residential environment rather than a large open space rural environment. • The site does not contain prime soils. • Given the close proximity to Buckland and Pukekohe, a change from Rural Zone to Country Living Zone is a logical progression in zoning for this area. • The submitter does not want building on the land that is being subdivided on vegetable growing lands. 		

Submitter Number:	147	Submitter:	Haley Bicknell-McMahon
Point Number	147.1		
Summary of Decision Requested:	Delete the Airport Subdivision Control Boundary from Planning Map 27.2.		
Decision Reasons:	<ul style="list-style-type: none"> • The Airport Subdivision Control Boundary unnecessarily restricts subdivision and development potential in this area. • The Airport subdivision Control Boundary is unnecessary to protect the airport as reverse sensitivity issues are sufficiently addressed by building insulation requirements in the District Plan. 		
Point Number	147.2		
Summary of Decision Requested:	Amend Rule 23.4.2 RD1 (a)(i) General subdivision by reducing the minimum net site area from 5000m2 to 3000m2.		
Decision Reasons:	<ul style="list-style-type: none"> • A minimum net lot size of 3000m2 is appropriate for Tamahere because this area will become a future dormitory suburb of Hamilton and a greater density of development will help to meet the demand. • Wastewater disposal is still feasible within 3000m2 lots. The open nature of Tamahere will be preserved. 		

Submitter Number:	148	Submitter:	Stephen John & Megan Lesley Ronke
Point Number	148.1		
Summary of Decision Requested:	Amend the buffer associated with the Maori Site of Significance (Paa) S14/75 to exclude the property at 64C Houghton Road, Whatawhata.		
Decision Reasons:	<ul style="list-style-type: none"> • When the purchase of 64C Houghton Road was being considered in 2016, enquiries to Council then confirmed that this paa site would have no effect on this property. • The submitter strongly opposes a change in status of the property at 64C Houghton Road. 		

Submitter Number:	149	Submitter:	Peter Thomson
On behalf of:	Maramarua Golf Club		
Point Number	149.1		
Summary of Decision Requested:	Maramarua Golf Club carpark be maintained by Council.		
Decision Reasons:	<ul style="list-style-type: none"> • Prior to Super City formation, Franklin Council painted parking lines on carpark. This has not been kept up by Waikato in spite of request Golf Club is a community asset that is used much more than just golf. 		

Submitter Number:	150	Submitter:	Nigel & Lee Tiley
Point Number	150.1		
Summary of Decision Requested:	Amend the zoning of the property at 210F Logan Road Pukekohe from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban under the Auckland Unitary Plan. • This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. • The subject property does not contain prime soils. 		

- Given the close proximity to the village of Buckland and Pukekohe, a change of zoning from Rural to Country Living is a logical progression in zoning for this area.

Point Number	151.1		
Summary of Decision Requested:	Amend the zoning for the property at 2324 River Road, Horsham Downs (Lot 3 DP 507442) from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> Refer the MGSL Plan Change Submission Report as attached for the reasons requested. By rezoning as Country Living Zone, the area will then be capable of contributing to the Waikato District's Future Proof Strategy Planning for Growth 2017 for additional 13,300-17,500 dwellings between 2018 and 2045. It is more important to use the land efficiently for future low density housing sites for accommodating future growth rather than to hold the area as a vacant rural small block of unproductive 'farm'. The site is surrounded by existing roads so therefore cannot be utilised as a rural run-off block by any adjacent farmers. Aligns with the purpose of the Country Living Zone aims to "provide for low density living in specific locations in rural areas." The size of the site will aid in preserving low density dwellings in accordance with the Country Living Zone rather than the purpose of the Rural Zone. This will accommodate low-density residential housing and a differing range of housing typologies between the country living areas located on the northern side of the Waikato River and newer residential areas on the Southern Side of the Waikato River. In addition, where there are new future employment focus areas (located south-west of the proposed site area), there is potential to provide additional housing on the proposed site area to be connected within close walking/cycling proximity of the future focused employment area to the south-west. Due to sand from the Waikato Expressway excavations, the ground conditions make it more appropriate that the subject Lot be rezoned as Country Living Zone without the Hamilton Urban Expansion Area Policy rather than a zone for intensified residential development (i.e. A Residential Living Zone or a Country Living Zone with the overlay). The adverse effects of rezoning the subject Lot is anticipated to be less than minor. Within An 800m pedestrian-shed analysis shows that there is one primary school (Horotui Primary School), suburban neighborhood node of Horotui, new residential areas (located south-west of the identified area), Industrial Park and Heavy Industrial areas (employment opportunities), business areas (employment opportunities and daily commercial/retail activities), country living areas, reserve areas along the fringes of the Waikato River and rural areas (located around and north of the site area). During the construction of the Waikato Expressway, any "high class soils" were removed or distributed. The area is not entirely rural due to its locality in relation to the surrounding land use activities located to the south and south east in which includes new residential areas, other countryside living areas, new residential areas, small portion of business areas, local primary school, industrial park and heavy industrial areas. Water infrastructure is readily available and new stormwater and wastewater infrastructure would be established upon resource consent. Significant views of the surrounding rural environment and mountain ranges. 		

Submitter Number:	152	Submitter:	Rolande Paekau
Organisation:	Te Whaanga 2B3B2 & 2B1 Ahu Whenua Trust		
Point Number	152.1		
Summary of Decision Requested:	Amend Section 2.2 (a) Background to apply the Resource Management Act definitions of "Tangata Whenua" and "Mana Whenua", as follows: <u>Tangata Whenua; in relation to a particular area means the iwi, or hapu, that holds mana Whenua over that area.</u> <u>Mana Whenua; means customary authority exercised by an iwi or hapu in an identified area.</u>		
Decision Reasons:	<ul style="list-style-type: none"> Waikato-Tainui is not 'the' tangata whenua, as if to proclaim that they are an entity that has a higher status than other iwi, hapu and marae in Waikato District. The Waikato-Tainui Iwi Authority was established to receive settlement funds from the Crown as a result of rāupatu. Council must not confuse the identity and status of tangata whenua and other hapu and/or iwi with its obligations under the Resource Management Act to all tangata whenua groups within Waikato District. Poihakena Marae and its beneficiaries assert that tangata whenua in Whaingaroa are only those that can whakapapa to Whaingaroa i.e. Ko Karioi te Maunga, Ko Whaingaroa te Moana, Ko Tainui te Waka, Ko Tainui te Iwi, Ko Ngati Koata, Ngati Hounuku, Ngati Te Ikaunahi, Ngati Kahu, Ngati Karu, Te Paetoka, Ngati Pukoro, Ngati Tira, Ngati Rua Aruhe, Ngati Heke, Ngati Tahau, Ngati Te Kore nga hapu. 		

Point Number	152.2		
Summary of Decision Requested:	Retain Section 2.5 Understanding of Maaori Land Ownership, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> Enables more Maori land to be utilised for the benefit of their landowners and beneficiaries. The submitter supports the change of Maori freehold title to Maori Lands in the Waikato District. 		

Point Number	152.3		
Summary of Decision Requested:	Retain Section 2.8 Concept Management Plan, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter states that they support this section given Whaingaroa Kite Whenua's Tihei Mauriora Plan. This includes plans for a cultural theme park to be endorsed by Council, and any updated versions of this plan. This Tihei Mauriora Plan captures the vision and aspirations of Tuaiwa Rickard. A Concept Management Plan will enable Maori land trusts to develop their land blocks with the assist of funding from Council and central government. Supports the Concept Management Plan for Maori land blocks and Trusts for Whaingaroa. Supports a Concept Management Plan funding pool to be allocated for the Waikato District. 		

Point Number	152.4		
Summary of Decision Requested:	Amend the Proposed District Plan to enable the following activities as permitted on Te Kopua lands on Riria Kereopa Memorial Drive, Raglan (including Te Kopua Trust, Te Kopua 2B3 Incorporation and Whaingaroa Kite Whenua):		
Decision Reasons:	<ul style="list-style-type: none"> Facilities for surface water activities Recreation 		

- Kohanga reo
- Education facilities
- Public toilets
- Camp site and associated car wash, grocery or boating store and marae
- Restaurant
- Conference facilities
- Travellers' accommodation

Decision Reasons:

- The submitter requests the same permitted activity provisions for Te Kopua lands as per the Pa Zone in the Operative District Plan as they reflect the aspirations of tangata whenua, owners and beneficiaries of those lands.

Point Number 152.5

Summary of Decision Requested: **Retain** Section 2.10 Iwi Management Plans as notified

AND

Create an Iwi Management Plan fund for Tangata Whenua, dedicated to hapu and marae to develop and implement their respective plans.

Decision Reasons:

- The submitter supports Iwi Management Plans.
- Recommends that Council contributes towards a dedicated funding pool or budget to implement Iwi Management Plans throughout Waikato District and therefore enable iwi, hapu and marae to develop their respective plans.
- An Iwi Management Plan will inform and guide Council in respect to consulting with the right people/tangata whenua in the development of master plans, blueprints and community plans as per Council's obligations under section 35(A) of the Resource Management Act 1991 and the Local Government Act 2002.
- Supports an Iwi Management Plan Fund for Tangata Whenua. This is a critical gap for Council who are seeking to develop Master Plans, Blueprints and community plans.

Point Number 152.6

Summary of Decision Requested: **Retain** Section 2.14 Objective - Kaitiaki (steward/guardian), as notified.

Decision Reasons:

- The submitter wishes to reiterate the importance of understanding who is tangata whenua with any consultation process. Waikato-Tainui is not the tangata whenua of Raglan/Whaingaroa. The people of Tainui ki W'hangaroa (Raglan) are the tangata whenua and hold mana whenua over their rohe.
- The submitter expects Council staff to consult with the submitter on any issue relating to their land or sea, including any development proposal.

Point Number 152.7

Summary of Decision Requested: **Retain** the Maaori Site of Significance that contains the Ururupa-Rangipu on the planning maps (located on Riria Kereopa Memorial Drive, Raglan).

Decision Reasons:

- No reasons provided.

Point Number 152.8

Summary of Decision Requested: **Add** the wahi tapu located at the end of Riria Kereopa Memorial Drive (on Te Kopua 2B3 Inc) to Schedule 30.3 Maaori Sites of Significance.

Decision Reasons:

- This wahi tapu site is significant to iwi and hapu.

Submitter Number: 153

Submitter: Michael Shen

Point Number 153.1

Summary of Decision Requested: **Amend** the extent of the Significant Natural Area at 68 Brown Road, Tuakau, to extend no further than the area to which the existing Conservation Covenant applies (see map attached to the submission for further information).

OR

Amend Rule 22.4.1.6 to allow for additional subdivision entitlement for the legal protection of any Significant Natural Area that is not subject to an existing conservation covenant.

AND

Amend the Proposed District Plan to provide any alternative, additional or consequential relief as is necessary to achieve consistency with the above and to satisfy the concerns of the submitter.

Decision Reasons:

- Gives the landowner an incentive to legally protect the remaining half of the Significant Natural Area.

Point Number 153.2

Summary of Decision Requested: **Amend** the zoning of Lot 2 DP 153636 (54 Dominion Road), Lot 2 DP 371796 (52 Dominion Road) and Lot 1 DP 485993 (48 Dominion Road) from a split zoning of Rural Zone and Residential Zone to purely Residential Zone.

AND

Amend the Proposed District Plan to provide any alternative, additional or consequential relief as is necessary to achieve consistency with the above and to satisfy the concerns of the submitter.

Decision Reasons:

- Air Quality report prepared for Plan Change 16 recommended a 250m separation distance through a rural buffer but did not consider other methods. This fait accompli was raised in a peer review of this report prepared by Jacobs for Waikato District Council and was

- included in part of the Plan Change 16 Section 32 analysis.
- The acoustic assessment prepared for Plan Change 16 does not assess the effects of providing residential development within the southern portion of the Dominion Road sites, or whether other methods can be applied to mitigate potential adverse acoustic effects.
- Separate assessment of noise effects which concluded that the current noise levels at 48 and 52 Dominion Road are suitable for residential land uses (therefore, no buffer would be required).
- Separate assessment of air quality which recommended a separation distance of 150m between industrial and residential activities.
- Supporting evidence has not been provided in the Proposed District plan as to why the buffer has been increased in width, or why the buffer width varies.
- Costs and benefits of different buffer widths has not been considered.
- Use of other methods have not been considered.
- The proposed zoning pattern will result in the reduction of over 10ha of potential residential land within 1km of the Tuakau town centre without supporting evidence that this is necessary to avoid reserve sensitivity effects.
- A Rural Zone buffer is only applied to the north of the Whangarata industrial area, not to the west where the Industrial Zone abuts the Residential Zone. This method has not been observed in any other Waikato District towns.
- Supporting information of PC16 suggested that a rural buffer was not required along the western interface due to topography, requirements for esplanade reserves, and building setbacks. Those attributes apply to the northern interface, which also includes the North Island Main Trunk railway corridor, inherently providing between 150m and 200m of separation.
- Removal of the rural buffer at 54 Dominion road would avoid split zoning and would provide a defensible boundary to urban limits along the Kairoa Stream.
- Southern portions of 48 and 52 Dominion Road have steep topography that would restrict residential development in the area closest to the Industrial Zone.

Point Number 153.3

Summary of Decision Requested: Retain the proposed Residential Zoning at 56 Dominion Road, Tuakau (Lot 1 DP 153636).

Decision Reasons:

- Reasons not stated.

Submitter Number: 155 **Submitter:** Karl Crook

Point Number 155.1

Summary of Decision Requested: Retain the proposed Residential Zoning at 6257 Great South Road, Horotiu.

Decision Reasons:

- Provides a wider range of housing options.
- Close to school
- Close to services
- Fits in with the development of neighbouring properties.

Point Number 155.2

Summary of Decision Requested: Amend Rule 20.2.3 Noise, to not increase the noise limits for the Industrial Zone.

Decision Reasons:

- No reasons given.

Submitter Number: 156 **Submitter:** David Rawiri

Point Number 156.1

Summary of Decision Requested: Maintain access to the property at 123 Rawiri Road from Rawiri Road, despite future changes to roading configuration.

Decision Reasons:

- That access to the property at 123 Rawiri Road is maintained from Rawiri Road.

Submitter Number: 157 **Submitter:** John Baillie

Point Number 157.1

Summary of Decision Requested: Retain the proposed Residential Zone at 6257 Great South Road, Horotiu.

Decision Reasons:

- Close to the school
- Good for the community
- Close to services
- Better quality development as gateway to Hamilton
- Fits in with the development of neighbouring properties.

Point Number 157.2

Summary of Decision Requested: Amend Rule 20.2.3 Noise, to not increase the noise limits for the Industrial Zone.

Decision Reasons:

- Not stated.

Submitter Number:	158	Submitter:	Peter Thomson
Point Number	158.1		
Summary of Decision Requested:	Amend the zoning of Maramarua township to encourage its development as a service centre for State Highway 2.		
Decision Reasons:	<ul style="list-style-type: none"> This needs to occur to continue to serve the surrounding townships. 		

Submitter Number:	159	Submitter:	Jefferis and Susan Bodley
On behalf of:	Kainga Moana Nui Ltd		
Point Number	159.1		
Summary of Decision Requested:	Amend the zoning of all four titles at 228 Waerenga Road, Te Kauwhata from Rural Zone to Village Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The topography is suitable for residential development. The existing wetlands and ponds and lake views provide good amenity for Village Zoning. The ponds and wetlands have been used by various Community groups including Scouts, Guides and emergency services. Property has reticulated water supply Good natural drainage. Waste water services are adjacent. 		

Submitter Number:	160	Submitter:	Anthony Armstrong
Point Number	160.1		
Summary of Decision Requested:	Delete the Significant Natural Area at property number 2018784, Kakakariki Road, Hamilton.		
Decision Reasons:	<ul style="list-style-type: none"> This was man made with pussy willow covering the dug out area for a duck pond approximately 10 years ago (see photos attached to the submission). The credibility of the SNAs initial identification need verification. Students were hired for holiday work to scout the district and identify what they thought were areas of SNA. They were not qualified to identify these. The Council then took this information as credible. 		

Submitter Number:	161	Submitter:	Martin Lynch
Point Number	161.1		
Summary of Decision Requested:	Amend zoning of 2044 River Road, Hamilton from Rural Zone to Country Living Zone, therefore retaining the Operative District Plan zoning.		
Decision Reasons:	<ul style="list-style-type: none"> The Rural Zoning will have an adverse material impact on the value of the property. The zoning is illogical and unfair that takes no account of the adjacent character and adjoining properties. The property is inappropriate and too small for rural land use and therefore should retain its existing Country Living Zone status. The zoning takes no account of the limited proportion of productive land available for use. The land can be subdivided into optimal sized lots and provide rural residential living opportunities in context with immediate surroundings alleviating pressure on other potential subdivision areas which are isolated. The property is adjacent to existing rural residential land use. The property will not generate reverse sensitivity effects on abutting rural land use. The neighbouring dairy farm (Rural Zone) has not generated any reverse sensitivity effects. The immediate farmland adjacent is grazed on a 4 week rotation and the herd is typically present in those paddocks for a one day period. There has been no issues of reverse sensitivity in locations to the south where cows graze up against property boundaries. The surrounding farming buildings are located more than 500m away. Houses in surrounding developments are well setback from boundaries providing space between activities. A wetland development to the east end of the property provides an additional buffer to the dairy farm. The degree and rationale behind the proposed zone change is contrary to Part 2 of the RMA as the proposal does not constitute sustainable management of natural and physical resources. If the property was subdivided it would not be an isolated Country Living Zone. The proposed rezoning to rural would undermine the existing rural residential amenity in the immediate area(s) and undermine the integrity of the Operative District Plan. Country living zoning of the property would facilitate effective and efficient use of land resource for housing in the Waikato District. Adverse effects on productive land resources in the district from the Country Living Zoning of the property are negligible. The property is in easy commuting distance of Hamilton and there is high demand for such properties, particularly in this northern location. The property and surrounding areas have already been managed in regard to Future Proof. Rezoning the property to rural will result in adverse environmental effects on existing land use that has already developed under the Country Living provisions of the Operative District Plan. 		
Point Number	161.2		
Summary of Decision Requested:	Amend Rule 23.4.1 (Prohibited subdivision) to remove a blanket ban on subdivision of properties in the Country Living Zone within the Hamilton Urban Expansion Policy Area.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter opposes the blanket ban of subdividing properties inside the Hamilton Urban Expansion Area as this is a blunt instrument which locks up value for the property owners for a significant period of time when there is the ability to design subdivisions to cater for future intensification at a later date. Prohibiting subdivision would have a material adverse economic and social outcome which goes against Objective 5.6.1 which calls for a balanced policy approach. Prohibiting subdivision in this areas does not take into account the ability to future proof for residential intensification. 		

- A blanket ban would be a blunt tool which does not take into account the existing layout of Country Living Zones and whether future development would materially impact upon the long term strategy of protecting Hamilton's Urban Expansion Area.
- The proposed change does not reflect public consultation phases and is contrary to ratepayers' expectations and the submitter's.

Point Number 161.3

Summary of Decision Requested: Delete the requirement for a 23m building setback apply to artificial water bodies in Rule 23.3.7 (Building Setbacks).

Decision Reasons:

- It is inappropriate for a setback to apply to artificial water bodies which have been developed for the purpose of adding character and amenity value on private property.
- The rule does not take into account elevation, screening and other material items.
- The rule prevents the provision of a small hut or bird viewing shelter which would be a great attribute for children and adults interested in conservation.

Submitter Number: 162

Submitter: Tim Searle

Point Number 162.1

Summary of Decision Requested: Retain proposed Country Living Zone in the areas bounding Travers Road and Green Acres Drive, Te Kauwhata.

Decision Reasons:

- The land is low lying and is a potential overflow area in case of flooding.
- To build residential dwellings on that piece of land will increase the likelihood of flooding on a wider scale in the area. Any additional flooding would cause surrounding properties to be potentially flooded as there is a drain that runs down the length of the property at 21 Green Acres Drive feeding into the drain at the low point of Travers Road.
- The submitter enjoy the country living aspect of our area of the village and piece of land and want to maintain that country lifestyle outlook.
- The submitter is pleased that ongoing development is occurring in the village with the Scott Road development and other developments around the Golf Course and see these developments as vital to the long term future of Te Kauwhata and helping ensure a thriving community.
- A change in zoning to on a relatively small flood prone low lying section of land does not fit with the future development and plans that have been made for Te Kauwhata.

Submitter Number: 163

Submitter: Kevin Mitchell

Point Number 163.1

Summary of Decision Requested: Amend the zoning of the property at 102 Travers Rd, Te Kauwhata from Residential Zone to Country Living Zone.

Decision Reasons:

- The land at 102 Travers Rd is, and has been subject to flooding and unsuitable for close subdivision.
- There is no need for additional sections to be created in Te Kauwhata, due to the excess sections available and that there is enough land already zoned to meet projected demands.
- Additional residential development on this land will compromise the current amenity for neighboring properties and compromise the current land users for viticulture and lifestyle activities, (including stock).

Submitter Number: 164

Submitter: Hiini Kepa

Point Number 164.1

Summary of Decision Requested: No decision sought, but submission states support for Chapter 2 Tangata whenua.

Decision Reasons:

- Allows autonomy, growth and independence.

Point Number 164.2

Summary of Decision Requested: No specific decision sought, but submission states support for Chapter 3 Natural Environment.

Decision Reasons:

- Allows autonomy, growth and independence.

Point Number 164.3

Summary of Decision Requested: No specific decision sought, but submission states support for Chapter 5 Rural Environment.

Decision Reasons:

- Allows autonomy, growth and independence.

Point Number 164.4

Summary of Decision Requested: No specific decision sought, but submission states support for Chapter 6 Infrastructure and Energy.

Decision Reasons:

- Allows autonomy, growth and independence.

Point Number 164.5

Summary of Decision Requested: No specific decision sought, but submission states support for Chapter 14 Infrastructure and Energy.

Decision Reasons:

- Allows autonomy, growth and independence.

Point Number 164.6

Summary of Decision Requested: No specific decision sought, but submission states support for Chapter 22 Rural Zone.

Decision Reasons:

- Allows autonomy, growth and independence.

Submitter Number: 165 **Submitter:** Janice Boot

Point Number 165.1

Summary of Decision Requested: **Amend** designation U23 (1117 Tauwhare Rd) to exclude the possible future cell phone transmitter/tower.

Decision Reasons:

- The designation including cell phone tower will devalue the adjoining property.
- The submitter is concerned about the effect of radiation from the operation of a cell phone transmitter/tower.
- The submitter does not object to the existing telephone exchange as it currently exists.

Submitter Number: 166 **Submitter:** Reginald Briggs

On behalf of: Beverage Developments Ltd

Point Number 166.1

Summary of Decision Requested: **Amend** the zoning of the Rural Zoned land that is existing urban housing in the area around Park Road and 6000-6012 Great South Road Horotiu (the submission does not specify a suitable zone).

Decision Reasons:

- This area is zoned "rural" and no way can it ever be described as adhering to the objectives and policies relating to rural zoning, e.g. Objective 5.1.1(a)(iii).
- This pocket of houses is an urban development in every sense of the word and the demand for denser development is evidenced by Council's approval of the residential development in the rezoned greenfields just north of the nearby golf course.
- New residential developments are largely funded by the developers, but Council still has an obligation to upgrade obsolete developments by the installation of modern day infrastructure even it means raising loans to be repaid by targeted rates.
- It is further noted that numbers 6010 and 6012 are currently carrying out non complying commercial activities (with I understand Resource Consent applications pending) which further indicates that the "rural" zoning is no longer appropriate for this area.

Submitter Number: 167 **Submitter:** Roger Heaslip

Point Number 167.1

Summary of Decision Requested: **Retain** the proposed Residential Zoning of the property at 6257 Great South Road, Horotiu.

Decision Reasons:

- Close to school.
- Good for the Horotiu Community.
- Close to services.
- Fits in with the development of neighbouring properties.
- A good quality development as gateway to Hamilton.

Point Number 167.2

Summary of Decision Requested: **Amend** the Proposed District Plan to not increase the noise limits for the Industrial Zone.

Decision Reasons:

- No reasons provided.

Submitter Number: 168 **Submitter:** Paula Brown

Point Number 168.1

Summary of Decision Requested: **Amend** the zoning of Scotsman Valley, Tauwhare properties from the notified Rural Zone back to Country Living Zone as they were zoned in the Operative District Plan.

Decision Reasons:

- Land owners in the Country Living Zone (Operative District Plan) at Scotsman Valley have already made plans and investment decisions that reflect the value of the land and subdivision potential of the Country Living Zone. It is unfair to change it to Rural Zone. There will be no value to the district from Rural Zoning in terms of agricultural production.

Submitter Number:	169	Submitter:	Tom Seddon
On behalf of:	Jo, Peggi, Oki, Mila, Jade, Anita and other kids		
Point Number	169.1		
Summary of Decision Requested:	Oppose the construction of apartments on the corner of Stuart Street and Wainui Road, Raglan		
Decision Reasons:	<ul style="list-style-type: none"> • The function and (high end) targeted users of these apartments, let alone the aesthetic, do not adhere to the "Raglan Naturally" ethos. The submitter believes a construction project of scale can only erode the remaining charm and character of central Raglan, with no benefit to the town, socially or financially. 		
Point Number	169.2		
Summary of Decision Requested:	Oppose the prohibition of horse access to Ngaranui Beach via the north-end carpark track.		
Decision Reasons:	<ul style="list-style-type: none"> • Safety is concern to the submitter. • Since the closure of the "pines" beach access track due to the creation of the mountain bike trails, this is the only safe access to Ngaranui beach for all the people with horses on Wainui Road. The only alternative access requires a very dangerous ride down the open highway with no foot path or cycle lane. 		

Submitter Number:	170	Submitter:	Anita Seddon
On behalf of:	Jo, Jade, Mila, Peggy, Oki and other kids riding with me!		
Point Number	170.1		
Summary of Decision Requested:	Oppose the prohibition of horse access to Ngaranui Beach via the north-end carpark track.		
Decision Reasons:	<ul style="list-style-type: none"> • Safety is a concern to the submitter. Since the closure of the "pines" beach access track due to the creation of the mountainbike trails this is the only safe access to Ngaranui beach for all the people with horses on Wainui road. The only alternative access requires a very dangerous ride down the open highway with no footpath or cycle lane. 		
Point Number	170.2		
Summary of Decision Requested:	Oppose the apartments on the corner of Wainui Street and Stewart Street, Raglan. Apartments like this should not be built in seaside Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • Not good that the feeling and look of Raglan is being changed similar to Mt Maunganui. The submitter supports Raglan becoming a conservation area with rules similar to these http://www.peakdistrict.gov.uk/planning/advice/conservation-areas where buildings cannot be changed, trees cut down or any other changes without it being good for the community. 		

Submitter Number:	171	Submitter:	Louis (Luke) Faesenkloet
Point Number	171.1		
Summary of Decision Requested:	Retain Rule 22.3.2 Minor Dwelling, particularly that a minor unit is a permitted activity that the maximum size is 70m2, that the minor dwelling is located within 20m of the dwelling and that the minor dwelling shares driveway access with the existing dwelling AND Amend the Proposed District Plan to clarify that the 70m2 maximum gross floor area for a minor dwelling does not include a garage.		
Decision Reasons:	<ul style="list-style-type: none"> • Provision enables additional accommodation without needing consent, e.g for farmhands, elderly parents, teenagers. 		
Point Number	171.2		
Summary of Decision Requested:	Amend Rule 22.3.7.1 Building setbacks -all boundaries to reduce the setbacks from the road which apply to the submitter's three titles at McWatt Road, Pokeno, that have frontages to paper roads. OR Amend Rule 22.3.7.1 Building setbacks -all boundaries so that the building setbacks only apply to one of the road boundaries for the submitter's three titles on McWatt Road, Pokeno.		
Decision Reasons:	<ul style="list-style-type: none"> • Development of site is difficult as a permitted activity due to the paper roads adjoining the submitter's site. • Achieving 7.5m setback from road boundaries is unachievable. 		

Point Number	171.3
Summary of Decision Requested:	Retain Rule 22.4.1.2 NCI General subdivision, where subdivision that does not comply with Rule 22.4.1.2 (RD1) is a non-complying activity.
Decision Reasons:	<ul style="list-style-type: none"> • Non-complying activity status is more appropriate than prohibited activity status.

Point Number	171.4
Summary of Decision Requested:	Amend Rule 22.4.1.4 (RD1) Boundary Relocation to ensure that a boundary relocation can occur in relation to the submitter's property in McWatt Road, where the smallest title is 9965m2 and the two titles are currently separated by an unformed paper road (see screen shot attached to submission).
Decision Reasons:	<ul style="list-style-type: none"> • The submitter's smallest title on 130 McWatt Road is separated from our other nearest title by way of a paper road. The location of the paper roads will make development of this smallest site difficult, particularly given the building setback requirements from roads for habitable buildings. • As a result, the submitter is seeking that the boundary relocation provisions be adjusted to enable them to relocate the boundaries between the smallest title and the next closest title, notwithstanding that there is currently a paper road separating the two titles. • The submitter will approach the Council about potentially stopping one part of the paper road.

Submitter Number:	172	Submitter:	Shaun Jackson
--------------------------	-----	-------------------	---------------

Point Number	172.1
Summary of Decision Requested:	Retain Residential Zoning as notified for the property at 139 Dominion Road, Tuakau.
Decision Reasons:	<ul style="list-style-type: none"> • Development of the site is generally in line with the desired outcomes of the Proposed District Plan (see plan attached to submission).

Point Number	172.2
Summary of Decision Requested:	Amend zoning of 118F Barnaby Road, Tuakau from Rural Zoning to either Village Zone or Residential Zone.
Decision Reasons:	<ul style="list-style-type: none"> • This site has potential to provide roading and walkway connections from Dominion Road through to Harrisville Road. • Currently the only way out from Barnaby Road and Dominion Road are singular and this could provide connections. • It is a Rural Zone predominately surrounded by Village and Residential Zones and may be better served to become Village or Residential Zone.

Point Number	172.3
Summary of Decision Requested:	Amend the map to create a separation between 115 Harrisville Road, Tuakau and the Pukekohe Motorcycle Club (Harrisville MX park).
Decision Reasons:	<ul style="list-style-type: none"> • The MX club creates a lot of dust and noise and putting residential hard on its boundary is bound to create conflict. • The MX Club is a significant local attraction and should be assisted to stay as part of the community.

Point Number	172.4
Summary of Decision Requested:	Amend the zoning of the Johnson Street, Tuakau area from Village Zone to Residential Zone.
Decision Reasons:	<ul style="list-style-type: none"> • This area is approximately 200 meters from the main street and makes a good location for higher density development.

Point Number	172.5
Summary of Decision Requested:	Retain the zoning of 100C Bollard Road, Tuakau as Industrial Zone as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Generally support the rezoning to Industrial Zone.

Submitter Number:	173	Submitter:	Cameron & Alicia De'Arth
--------------------------	-----	-------------------	--------------------------

Point Number	173.1
Summary of Decision Requested:	Amend the zoning of the property at 199 Buckville Road, Pukekohe. from Rural Zone to Country Living Zone.
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. • The subject property does not contain prime soils. • Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area.

Submitter Number:	174	Submitter:	David Shorter
Point Number	174.1		
Summary of Decision Requested:	Amend zoning of the property at 33 Jamieson Road, Buckland from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. The subject property does not contain prime soils. Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area. This area already has existing services infrastructure to handle the growth as well as access to public transport compared to Pokeno. 		

Submitter Number:	175	Submitter:	Yvonne Pack
Point Number	175.1		
Summary of Decision Requested:	Amend the zoning of the property at Jamieson Road, Buckland from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. The subject property does not contain prime soils. Given the close proximity to the village and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area. Surrounding streets already have electricity, town water, established roads and for the submitter's site gas piped to across the driveway. In addition Buckland School is within walking distance and Pukekohe Intermediate and High Schools are on the bus route and the rail track is within walking distance. 		

Submitter Number:	176	Submitter:	Isobel Waitere
Point Number	176.1		
Summary of Decision Requested:	Delete the Significant Natural Area from 511 Wharf Road, Te Akau South.		
Decision Reasons:	<ul style="list-style-type: none"> This land has been in the submitter's family for close to 100 years. In this time the submitter has protected it themselves and would like to continue to do so. A Covenant protecting the bush is already in place following a subdivision around 30 years ago. 		

Submitter Number:	177	Submitter:	Nick Hill
Point Number	177.1		
Summary of Decision Requested:	Amend the zoning of properties in Scotsman Valley, Tauwhare from the notified Rural Zone back to Country Living Zone as they were zoned in the Operative District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> Land owners in the Country Living Zone (Operative District Plan)at Scotsman Valley have already made plans and investment decisions that reflect the value of the land and subdivision potential of the Country Living Zone. It is unfair to change it to Rural Zone. There will be no value to the district from Rural Zoning in terms of agricultural production. 		
Point Number	177.2		
Summary of Decision Requested:	Amend Rule 22.3.7.1 P1 (a) (iii) Building Setbacks - all boundaries, from 25m to 12m.		
Decision Reasons:	<ul style="list-style-type: none"> The 25m proposed setback is unreasonable and will unnecessarily limit the submitter's building and development options on their lifestyle property and consented subdivision. 		

Submitter Number:	178	Submitter:	Steven Shue
Point Number	178.1		
Summary of Decision Requested:	Amend the zoning of the property at 169 Buckville Road, Pukekohe from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. The subject property does not contain prime soils. Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area. 		

Submitter Number:	179	Submitter:	Jennifer Buchanan
Point Number	179.1		
Summary of Decision Requested:	Amend the zoning of the property at 140 Logan Road, Pukekohe from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment. The subject property does not contain prime soils. Given the close proximity to the village of Buckland and town of Pukekohe, a change of zoning from Rural Zone to Country Living Zone is a logical progression in zoning for this area. 		

Submitter Number:	180	Submitter:	Roger Peart
On behalf of:	RM & CA Peart		
Point Number	180.1		
Summary of Decision Requested:	Amend the Coastal Zone to a Rural Zone, especially for working farms.		
Decision Reasons:	<ul style="list-style-type: none"> At present any building work requires a resource consent which is a huge hassle and cost requiring the help of a planner. This seems unnecessary especially when a proposed building is part of a working farm and within all the rules and guidelines. 		

Submitter Number:	181	Submitter:	Robert Smith
Point Number	181.1		
Summary of Decision Requested:	Retain Rule 16.4.1 Subdivision General		
Decision Reasons:	<ul style="list-style-type: none"> No reason provided. 		

Submitter Number:	182	Submitter:	Kirriemuir Trustee Limited
Point Number	182.1		
Summary of Decision Requested:	Amend the zoning of the sites on the western side of Geraghtys Road, Tuakau adjoining the Proposed Residential Zone (as shown in Figure 3 of the submission) from Rural Zone to Residential Zone. AND Amend provisions as consequential changes to give effect to the relief sought in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> There is no detailed reasoning as to why the proposed Residential Zone boundary location has been selected. The s32 analysis relies on the Tuakau Structure Plan (TSP) to establish the rural/residential boundary. The proposed Residential Zone boundary does not meet a key objective of the TSP as it does not provide a clear edge for the town to retain its rural context. An alternative location uses a Significant Natural Area and Outstanding Natural Feature as a definite defensible and permanent urban edge. (see Figure 3 of the submission document). Based on existing technical reports (including within the s32 documentation) no geotechnical, infrastructure, archaeological, transport or landscape impact effects are likely to arise from the extension to the Residential Zone which cannot be appropriately managed or mitigated. See submission document for further details supporting the change sought. 		
Point Number	182.2		
Summary of Decision Requested:	No specific decision sought, but submission states general support for Chapter 4 Urban Environment except as otherwise noted in supplementary points within the submission document.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	182.3		
Summary of Decision Requested:	No specific decision sought, but submission states general support for Chapter 16 Residential Zone except as otherwise noted in supplementary points within the submission document.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	182.4		

Summary of Decision Requested:	No specific decision sought, but submission states general support for Chapter 13 Definitions, except as otherwise noted in supplementary points in the submission.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	182.5
Summary of Decision Requested:	Retain the Objectives and Policies in Section 4.1 Strategic Direction as notified.
Decision Reasons:	<ul style="list-style-type: none"> The provisions provide a suitable framework to facilitate a residential environment.
Point Number	182.6
Summary of Decision Requested:	Retain the Objectives and Policies in Section 4.2 Residential Zone, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The provisions provide a suitable framework to facilitate a residential environment.
Point Number	182.7
Summary of Decision Requested:	Retain the Objectives and Policies in Section 4.4 Residential and Village Zones - Noise, lighting, outdoor storage, signs and odour, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The provisions provide a suitable framework to facilitate a residential environment.
Point Number	182.8
Summary of Decision Requested:	Retain the Objectives and Policies in Section 4.7 Urban Subdivision and development, as notified, unless otherwise specified in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The provisions provide a suitable framework to facilitate a residential environment.
Point Number	182.9
Summary of Decision Requested:	Retain Policy 4.1.3 (b) Location of development, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The Future Proof Strategy recognises Tuakau as a R2 growth area.
Point Number	182.10
Summary of Decision Requested:	Retain Policy 4.4.2 Noise, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The policy seeks to ensure lawfully established activities are protected and that setbacks are provided. This is agreed and will need to be supported with robust planning (for lawful establishment) and technical (acoustic) reporting where any setback is proposed.
Point Number	182.11
Summary of Decision Requested:	Retain Policy 4.4.5 Objectionable odour, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The policy seeks to ensure lawfully established activities are protected and that setbacks are provided. This is agreed and will need to be supported with robust planning (for lawful establishment) and technical (acoustic) reporting where any setback is proposed.
Point Number	182.12
Summary of Decision Requested:	Retain Objective 4.6.6 Manage adverse effects, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Industrial activities are required to manage effects in accordance with Regional and District Plan provisions and any relevant resource consents.
Point Number	182.13
Summary of Decision Requested:	<p>Amend Policy 4.7.11 Reverse sensitivity to ensure that "protection" of sites generating adverse effects is extended only where those effects are lawfully established, as follows:</p> <p>(a) <i>Development and subdivision design minimises <u>lawfully established and operating</u> reverse sensitivity effects on adjacent sites, adjacent activities, or the wider environment; and</i></p> <p>(b) <i>Avoid potential reverse sensitivity effects of locating new dwellings in the vicinity of <u>lawfully established and operating</u> intensive farming, extraction industry or industrial activity.</i></p> <p>AND</p> <p>Amend provisions as consequential changes to give effect to the relief sought in the submission.</p>
Decision Reasons:	

- Activities which generate effects on adjoining sites should not be protected if there is no consented right to operate.

Point Number 182.14

Summary of Decision Requested: Retain Chapter 16.1 to 16.4 Residential Zone, as notified.

Decision Reasons:

- The provisions provided for suitable controls expected within a residential environment.

Submitter Number: 183

Submitter: Tracey Smith

Point Number 183.1

Summary of Decision Requested: Retain Rule 16.4 Subdivision.

Decision Reasons:

- No reasons provided.

Submitter Number: 184

Submitter: Vera Wennekers

Point Number 184.1

Summary of Decision Requested: Add a new zone titled 'Kimihi Lakes Recreation and Events Zone' to the planning maps.

AND

Amend the zoning of the parcels of land with the legal descriptions Section 3 SO 482553, Lot 1 DPS 20619, Section 1 SO Plan 60522, Allotment 740 Parish of Taupiri, Allot 857 Parish of Taupiri and Allotment 6 Parish of Taupiri from Rural Zone to the proposed Kimihi Lakes Recreation and Events Zone (See table 6.1 within the submission for details).

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihi Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.
- Excludes the existing Lake Kimihi which is owned and managed by the Department of Conservation.

Point Number 184.2

Summary of Decision Requested: Add a new section 9.5 Kimihi Lakes Recreation and Events Zone within Chapter 9 Specific Zones containing objectives and policies specifically catering for the Kimihi Lakes Recreation and Events Zone as set out in section 4.2.2 of the submission.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihi Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognized that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number 184.3

Summary of Decision Requested: Add a new definition for "Ancillary Buildings (Kimihi Lakes Recreation and Events Park)" to Chapter 13 Definitions as follows:

Means a supporting building that is subordinate and incidental to a permitted activity undertaken in the Park, including storage units, administration and ablution facilities and clubrooms.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihi Lakes Recreation and Events Zone.

Point Number 184.4

Summary of Decision Requested: Add a new definition for "Commercial Node Areas" to Chapter 13 Definitions as follows:

Means those specified areas identified on Zone Maps in the Kimihi Lakes Recreation and Events Zone as 'Commercial Node Areas'.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 184.5

Summary of Decision Requested: **Add** a new definition for "Community Activities and Facilities (Kimihia Lakes Recreation and Event Park)" to Chapter 13 as follows:

Means in the Kimihia Lakes Recreation and Events Zone, land or building used for community activities, generally established on a not-for-profit basis, and includes buildings for educational purposes, community functions and public toilets or public rooms.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 184.6

Summary of Decision Requested: **Add** a new definition for "Operational Facilities" to Chapter 13 Definitions as follows:

Means the construction and use of facilities and/or infrastructure to assist in the day to day operation of the Kimihia Lakes Recreation and Events Parks, including but not limited to car parking, internal access, ticketing offices, storage and maintenance sheds, and helipads.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 184.7

Summary of Decision Requested: **Add** a new definition for "Outdoor Education" to Chapter 13 Definitions as follows:

Means in the Kimihia Lakes Recreation and Events Zone, land or buildings used for the formal or informal education or training and includes (but is not limited to) confidence courses.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 184.8

Summary of Decision Requested: **Add** a new definition for "Outdoor Pursuits" to Chapter 13 as follows:

Means moving across land by non-powered means for example biking, orienteering, tramping, and horse trekking.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 184.9

Summary of Decision Requested: **Add** a new definition for "Recreation Activity and Facilities" to Chapter 13 Definitions as follows:

Means any non-motorised indoor or outdoor passive or active leisure, sports, entertainment, games or recreational pursuits and buildings in the Kimihia Lakes Recreation and Events Park Zone for participants and/or spectators, whether or not they are undertaken for profit or reward or for which no charge is made, and shall include such activities on or in water or land, or in the air and includes but is not limited to:

- *Recreational events and activities*
- *Walking, running and cycling tracks*
- *Training or education*
- *Club Days and practice activities*
- *Organised Events and festivals*
- *Concerts*
- *Multi-sport and off road running events*
- *Outdoor skate parks and playgrounds*
- *Informal Recreation*
- *Tourism related activities*
- *Outdoor Pursuits*

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 184.10

Summary of Decision Requested: No specific decision sought, but the submission notes that the of the Regional Infrastructural Specifications (RITS) and the Waikato Regional Council Regional Plan will be the relevant documents for some developments in the Kimihia Lakes Recreation and Events Park.

Decision Reasons:

- No reasons provided.

Point Number

184.11

Summary of Decision Requested:

Amend the zoning of the parcels of land with the legal descriptions Allotment 746 Parish of Taupiri, Lot 20 DP 347582, Lot 21 DP 347582, Allotment 777 Parish of Taupiri and Lot 23A Section 463 Parish of Taupiri from Rural Zone to Residential Zone (See Table 6.1 of the submission for further details).

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- This area is located abutting existing Residential Zoned land and so forms a contiguous residential tract, ensuring services and infrastructure can easily be extended to the new residential area.
- Tunnel mining was undertaken west of the site and under the Huntly township including State Highway 1, Schools, the Power Station, the Waikato River and Riverine Lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining would not occur in this location. Residential use of the land is therefore not subject to that risk.

Point Number

184.12

Summary of Decision Requested:

Retain the Residential Zone on the parcels of land with the legal descriptions Lot 18 DP 347582, Lot 19 DP 347582, Sec 3 SO Plan 400374, Allot 515 Parish of Taupiri and Allot 789 Parish of Taupiri (see table 6.1 of the submission for further details).

Decision Reasons:

- Tunnel mining was undertaken west of the site and under the Huntly township including SH1, schools, the Power Station, the Waikato River and Riverine lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining, would not occur in this location. Residential use of the land is therefore not subject to that risk.

Point Number

184.13

Summary of Decision Requested:

Add a new Chapter 29 Kimihia Lakes Recreation and Events Zone that contains rules for the Kimihia Lakes Recreation and Events Zone as outlined within section 4.2.4 of the submission.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Proposed Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number

184.14

Summary of Decision Requested:

Amend Rule 14.12.1 Activity specific conditions 14.12.1.1(1)(e) relating to P1 Vehicle access for all activities, as follows:

(1) All activities must comply with the following vehicle access conditions:

...

(e) On a site with legal access to two roads, the activity only accesses the road with the lower classification in the road hierarchy in Tables 14.12.5.5 and 14.2.5.6 (where the roads have the same classification, access is only to the road with the lower average daily traffic movements) except in the Kimihia Lakes Recreation and Events Zone where this rules does not apply;

...

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

184.15

Summary of Decision Requested:

Add a new clause (2) to Activity-specific conditions 14.12.1.2 relating to P2 on site parking and loading as follows:

(1) All activities must comply with the following...

(2) In the Kimihia Lakes Recreation and Events Zone the above standards do not apply, providing that:

(a) A minimum of 1500 on-site parking spaces shall be provided except where activities are undertaken within the carpark area or where activity demand exceeds 1500 car parks, then the temporary alternative on-site parking shall be provided.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

184.16

Summary of Decision Requested:

Add clause (j) to Activity-specific condition 14.12.1.4(1) relating to P4 traffic generation as follows:

(1) Any activity must comply with the following traffic generation conditions:

...

(j) Within the Kimihia Lakes Recreation and Events Zone, there shall be no maximum traffic generation provided that:

(g) A certified Traffic Management Plan (which shall include, but is not limited to, the provisions of a wide area assessment) shall be in place and implemented for all activities. The Traffic Management Plan shall:

(i) Provide for the supervision and control of patrons entering and exiting the Kimihia Lakes Recreation and Events Park, and the transportation of patrons to and from the Park;

(ii) Limit the speed of traffic within the Kimihia Lakes Recreation and Events Park to 30km/h

(iv) Provide for monitoring and reporting on the number of vehicle movements for all activities and events;

(v) Include protocols for undertaking reviews of the Traffic Management Plan by an Implementation Monitoring Committee consisting of the New Zealand Police, the Council and the Kimihia Lakes Recreation and Events Park operator

(vi) Be reviewed, certified and endorsed by Council, by (date) of each year.

(b) For any activity or event, or combination of activities and events where there is likely to be in excess of 5,000 people, the operator of the park shall advise the Council a minimum of 10 working days before the activity and event occurs of the details of the activity and event and the relevant provisions of the Traffic Management Plan that are to be implemented.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

184.17

Summary of Decision Requested:

Add clause (b) to Activity-specific conditions 14.12.1.8 relating to P8 Off-road pedestrian and cycle facilities, as follows:

(b) In the Kimihia Lakes Recreation and Events Zone there shall be no activity specific conditions.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Submitter Number:

185

Submitter:

Grant & Merelina Burnett

Point Number

185.1

Summary of Decision Requested:

Amend the zoning of the property at 50 Te Awa Lane, Tamahere from Rural Zone to Country Living Zone.

Decision Reasons:

- The Local Purpose Reserve - Walkway vested in Waikato District provides the logical separation point between the Te Awa Lane cul-de-sac Country Living Zone and a Rural Zone.
- The site is bordered to the north and east by Country Living Zoned sites with an average lot size of 1ha.
- The site is legally and physically separated from adjoining lots zoned Rural where a potential for amalgamation would otherwise exist to give effect to sustainable rural land use according to the Zone;
- Sustainable rural land uses are dictated by minimum parent lot size pre-and post-subdivision in Chapter 22 of the Proposed Waikato District Plan which do not align with the size of the site; and
- Should the owners wish to use that site under an intensive or horticultural rural land use, consent is highly likely to be granted in consideration of high-risk reverse sensitivity effects in a locality where the site is immediately surrounded on all boundaries with land use activities that are residential in character.
- See attachment to the submission for further information and photos.

Submitter Number:

186

Submitter:

Taik Seok Hwang

Point Number

186.1

Summary of Decision Requested:

Amend the zoning of the property at 111 A Buckville Road, Pukekohe from the Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan.
- This could mean residential housing, and therefore a residential environment in this locality rather than a large open space rural environment.
- Given the close proximity to Buckland and Pukekohe, a change of zone from Rural to Country Living Zone is a logical progression in zoning for this area.

Submitter Number:

187

Submitter:

Heather Parker

On behalf of:

Warren & Heather Parker

Point Number

187.1

Summary of Decision Requested:

Add the property opposite 24 Kernott Road, Horotiu to Schedule 30.4 Maori Areas of Significance.

Decision Reasons:

- The land at the beginning of Kernott Rd have identified as "Kernott Gardens" in Schedule 30.4 Maaori Areas of Significance. The land opposite 24 Kernott Rd has a similar number of borrow pits and these are not protected nor does the property have any housing on it. The submitter considers that the borrow pits on this property should be protected as an area of significance.

Point Number 187.2

Summary of Decision Requested: Ensure the property opposite 24 Kernott Road, Horotiu is not made Residential.

Decision Reasons:

- This property has a number of borrow pits on it. The submitter considers the property should be included in the Kernott Road gardens and not be made residential.

Submitter Number: 188

Submitter: Sheryl Tukiri

Point Number 188.1

Summary of Decision Requested: Retain Chapter 2 Tangata Whenua as notified.

Decision Reasons:

- These changes are allowing Maori to use the land and develop the land for more of the whanau and are protecting Maori heritage, especially for future generation (Mokopuna).

Point Number 188.2

Summary of Decision Requested: Retain the provisions for Maori Freehold Land as opposed to Paa Zone.

Decision Reasons:

- These changes are allowing Maori to use the land and develop the land for more of the Whanau.

Point Number 188.3

Summary of Decision Requested: Retain the rules for permitted activities on Maaori Freehold land.

Decision Reasons:

- These changes are allowing Maori to use the land and develop the land for more of the Whanau.

Point Number 188.4

Summary of Decision Requested: Retain Schedule 30.3 Maaori Sites of Significance.

Decision Reasons:

- The submitter likes how council has started to protect Maori heritage for future generations.

Submitter Number: 189

Submitter: Kane Ongley

Point Number 189.1

Summary of Decision Requested: Amend Map 23.4 to realign the walkway/cycleway/bridleway adjacent to 31 Bay View Road, Raglan to avoid the cliff area.

Decision Reasons:

- The route shown on Map 23.4 is impracticable, as the cliff top is unstable and dangerous. Submitter suggests a better route would be a board walk along the base of the cliff.

Submitter Number: 190

Submitter: John Brannan

Point Number 190.1

Summary of Decision Requested: Delete the proposed walkway around the boundary of the Waikare Golf Club property.

Decision Reasons:

- The Waikare Golf course is private property and therefore not available for public use.
- There is a risk of injury from golf balls.
- Dogs are not permitted on the course.
- This walkway is not feasible as the land surrounding the course will be developed for housing, so there will only be access to the golf course not the wetlands.

Submitter Number: 191

Submitter: Neil Fredricson

Point Number	191.1
Summary of Decision Requested:	Delete the proposed walkway on the Waikare Golf Club grounds.
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers there is danger to the general public if the walkway goes ahead. This would also affect the driveway, the tenth tee and the fairway.

Submitter Number:	192	Submitter:	Ngarita Goode
Point Number	192.1		
Summary of Decision Requested:	Delete the proposed walkway on the Waikare Golf Club grounds.		
Decision Reasons:	<ul style="list-style-type: none"> The Waikare Golf Course is private land and used by all the community. A walkway in this area would be a hazard and a breach of health and safety laws. There would be a substantial cost to purchase this land for a walkway. 		

Submitter Number:	193	Submitter:	Neil Goode
Point Number	193.1		
Summary of Decision Requested:	Delete the proposed walkway on the Waikare Golf Club grounds.		
Decision Reasons:	<ul style="list-style-type: none"> The Waikare Golf Course is private land and used by all the community. A walkway in this area would be a hazard and a breach of health and safety laws. Any access would likely need to be totally enclosed and would be costly and visually detrimental to the amenity of the course. There would be a substantial cost to purchase this land for a walkway. 		

Submitter Number:	194	Submitter:	Neil Barker
Organisation:	Ngaruawahia Golf Club Inc		
Point Number	194.1		
Summary of Decision Requested:	<p>Add a Permitted or Controlled Activity to Rule 25.1 Land Use - Activities for golf courses and their ancillary uses</p> <p>OR</p> <p>Delete the Reserves Zones from the Proposed District Plan and replace with the approach used by Hamilton City Council which individually classifies recreation spaces according to their purpose.</p>		
Decision Reasons:	<ul style="list-style-type: none"> Golf courses are classed as non-complying activity. Ngaruawahia Golf Club is recognised nationally for the quality of the course and ease of access. The location of the golf club allows for ease of access from both Auckland and Hamilton and is played regularly by those travelling the North Island. The course has long brought visitors to the Waikato district, who in turn spend money at local businesses. Ngaruawahia Golf Club facilities are not only utilised for golf, but community events and fundraisers throughout the year. The site has potential to serve the community in an increased capacity, but is concerned about the flexibility of the plan to allow for this. While the rezoning of the site from Rural to Reserve does not increase restrictions, it does contribute. The submitter seeks to clarify its ability to accommodate future ancillary uses of the golf course as a permitted activity. This may include the formalisation of the existing driving range, which would see low-level buildings and some fencing along Great South Road. 		
Point Number	194.2		
Summary of Decision Requested:	<p>Amend Chapter 25: Reserve Zone to provide opportunities to develop land for small-scale commercial activities as a Restricted Discretionary Activity, consistent with the objectives of the Reserve Zone – Chapter 8: Reserves.</p> <p>OR</p> <p>Delete the Reserves Zone from the Proposed District Plan and replace with the approach used by Hamilton City Council which individually classifies recreation spaces according to their purpose.</p>		
Decision Reasons:	<ul style="list-style-type: none"> These future initiatives are consistent with what the Proposed District Plan seeks to achieve in the Reserve Zone and what is currently being undertaken on site. The site has potential to serve the community in an increased capacity, but is concerned about the flexibility of the plan to allow for this. The submitter seeks to clarify its ability to accommodate future ancillary uses of the golf course as a permitted activity. This may include the formalization of the existing driving range, which would see low-level buildings and some fencing along Great South Road. This activity is intended for club members, but a small number of fee-paying participants may look to use the facility. If Council considers this to be a commercial activity, then Council should see this as a minor activity and classify it a Restricted Discretionary Activity, rather than a Non-Complying Activity. 		
Point Number	194.3		
Summary of Decision Requested:	Amend Chapter 25: Reserve Zone to allow other recreation activities to be accommodated as Restricted Discretionary Activities, consistent		

with the objectives of the Reserve Zone – Chapter 8: Reserves.

OR

Delete the Reserves Zone from the Proposed District Plan and replace with the approach used by Hamilton City Council which individually classifies recreation spaces according to their purpose.

Decision Reasons:

- Wish to consider further recreational facilities.
- These future initiatives are consistent with what the Proposed District Plan seeks to achieve in the Reserve Zone and what is currently being undertaken on site.
- The site has potential to serve the community in an increased capacity, but is concerned about the flexibility of the plan to allow for this. While the rezoning of the site from Rural to Reserve does not increase restrictions, it does contribute.
- Future population growth to the north of Hamilton and adjacent to site will see increased demand for sport and recreation.
- Future development of the site may include, for example, a fitness suite or squash court.
- These types of uses will benefit the community and Ngaruawahia Golf Club a leading recreation provider in the region, however such activities are currently Non-Complying Activities.

Point Number

194.4

Summary of Decision Requested:

Amend Rule 25.2.7 Signs to provide for signage on sites with road frontage over 500 metres at a ratio of one non-illuminated sign per 150 metres of road frontage as a controlled activity, with a maximum sign area of 3m² (or similar wording).

Decision Reasons:

- The site has almost 1000 meters of road frontage to this former state highway. The submitter does not seek to swamp the boundary with signage, but see increased flexibility to put more signage up and generate a small amount of revenue to pay for this community asset. They key concern for all Club members when discussing signage is they do not want to see the natural amenity of the area degraded by advertising, because the members value this natural setting too.
- While two or more signs would be deemed a Restricted Discretionary Activity, this is overly onerous and provision should be made so that the number of signs on a site is dependent on the length of road frontage.

Submitter Number:

195

Submitter:

Chris Ryan

Point Number

195.1

Summary of Decision Requested:

Amend the zoning of the Kimihia Open Cast Mine to a multi-purpose recreation and events zone alongside a residential zone as set out in the submission from Allen Fabrics Limited.

Decision Reasons:

- The District Council recognises the need for economic development in this part of the Waikato (Huntly area).
- It seeks to create assets for a hole in the ground that would otherwise have limited economic and social benefit for the Huntly community.
- The plans proposed by Allen Fabrics addresses any possible adverse effects such as traffic, signs etc.
- There are obvious deficiencies at this stage of the proposal in terms of detail as to the numbers of business operations such as cafes and specific locations of supporting infrastructure including entry and exit points to the lake, numbers and locations of car parking spaces etc. The requested zoning makes the future development easier, which would benefit the developers and the Waikato District Council.
- The conversion of past open cast mines into lakes used for recreation, leisure and tourism, and for environmental causes such as provision of nesting areas for waterfowl is common. e.g Oceana Gold has mooted it in other parts of New Zealand such as at Waihi.
- When developed as an integrated resource that can include hotel and conference facilities (along with water sports and recreation usage that can incorporate sporting competitions) significant economic benefits can occur.
- The geographical position of Huntly and the increasing ease of accessibility to the Auckland market are factors that could contribute to the eventual success of the project to the benefit of the Huntly community.
- The request for zoning classification being sought is mutually advantageous to three key stakeholders – Allen Fabrics, The Waikato District Council and the broader Huntly Community by facilitating future planning of the development.

Submitter Number:

Submitter:

Derek and Colleen Hartley

Point Number

196.1

Summary of Decision Requested:

Delete Rule 23.4.2 RD 1(a) (i) and (ii) so that net site areas are not prescribed.

Decision Reasons:

- Rule should allow for discretion and subdivision to net site areas which do not materially/significantly affect the amenity values.
- Rule that creates the Airport Subdivision Control Boundary unnecessarily constrains subdivision potential of land within that boundary.
- Many sites in surrounding area are considerably less than 5000 m² and do not materially or significantly affect amenity values of the country living zone.
- Councils section 32 report dated July 2018 acknowledges a balanced approach is most beneficial to achieve country living zone objectives.
- Report further states there must be recognition of having land too small for farming but too large to maintain as gardens.

Point Number

196.2

Summary of Decision Requested:

Delete the Airport Subdivision Control Boundary from the Proposed District Plan.

Decision Reasons:

- The Designation unnecessarily constrains subdivision of land within the airport subdivision control boundary.
- Designation does not significantly/materially enhance the principles of the Country Living Zone.
- Enquiries with WDC cannot identify documents/evidence to support Zoning or Designation.

- The Noise from airport operations can be adequately protected by noise insulation techniques and rules for new dwellings.
- Existing lots less than 5000m2 have no impact on principles of the Country Living Zone.

Submitter Number:	197	Submitter:	Jeska McHugh
Organisation:	NZ Pork		
Point Number	197.1		
Summary of Decision Requested:	Retain Policy 4.1.10 - Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports a policy directive of avoidance of potential reverse sensitivity effects on existing intensive farming activities in Tuakau. 		
Point Number	197.2		
Summary of Decision Requested:	Retain Policy 4.1.15 Ngaruawahia.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports a policy directive of avoidance of potential reverse sensitivity effects on existing intensive farming activities in Ngaruawahia. 		
Point Number	197.3		
Summary of Decision Requested:	Retain Policy 4.7.1.11 Reverse Sensitivity.		
Decision Reasons:	<ul style="list-style-type: none"> • The relationship of rural and urban activities at the interface must be a key consideration in master planning and structure planning for urban growth. • Supports the policy directive of avoidance of potential reverse sensitivity effects of locating new dwellings in the vicinity of an intensive farm. 		
Point Number	197.4		
Summary of Decision Requested:	Amend Objective 5.1.1 The rural environment, as follows: <i>(a) Subdivision, use and development within the rural environment where:</i> <i>(i) high class soils <u>and rural production land is</u> are-protected for productive rural activities;</i> <i>(ii) productive rural activities are supported, while maintaining or enhancing the rural environment;</i> <i>(iii) urban subdivision, use and development in the rural environment is avoided.</i> <i>(iv) <u>managing the opportunities for countryside living in rural areas in ways that provide for rural-residential development in close proximity to urban areas and the larger towns and villages while minimising the loss of rural production land.</u></i>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports a strong strategic objective for the rural environment • The objective should be extended to the projection of rural land for productive purposes as while high-class soils are important, so too is the productive capacity of rural land more generally. • The submitters suggest the strategic directive should also contain a direction on managing countryside living. 		
Point Number	197.5		
Summary of Decision Requested:	Retain Objective 5.3.1 Rural character and amenity.		
Decision Reasons:	<ul style="list-style-type: none"> • NZPork supports an objective seeking to maintain rural character and amenity subject to a good understanding on what those characteristics and amenity is for the rural area as developed through the policy framework. 		
Point Number	197.6		
Summary of Decision Requested:	Retain Policy 5.3.2– Productive rural activities.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the directive policy for recognising and protecting the continued operation of the rural environment as a productive working environment. • It is noted that the policy recognition does not align with the limitation on building coverage for rural buildings. 		
Point Number	197.7		
Summary of Decision Requested:	Retain Policy 5.3.4 – Density of dwellings and buildings within the rural environment.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitters support the policy recognizing the need for dwellings to support workers accommodation while noting the method provides a size limitation that would not support a family unit. 		
Point Number	197.8		

Summary of Decision Requested:	Retain Policy 5.3.5 - Earthworks activities.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports policy support for a permitted activity range for ancillary farming earthworks.
Point Number	197.9
Summary of Decision Requested:	Retain Policy 5.3.6 Intensive farming activities.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports specific policy support for intensive farming activities and that they operate in accordance with industry best practice.
Point Number	197.10
Summary of Decision Requested:	Retain Policy 5.3.7 Reverse sensitivity effects, except for the amendments sought below AND Amend Policy 5.3.7 (a)(ii) Reverse sensitivity effects as follows: <i>(ii) Noise, odour, dust, traffic and visual effects associated with the use of land for farming, horticulture, <u>Intensive Farming</u>, forestry, farm quarries;</i>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports policy that provides for intensive farming activities, recognising the potential adverse effects that need to be managed, including noise, visual amenity, rural character or landscape effects, and odor. These effects are typical of the rural environment and the policy would be improved by recognizing this along with other farming horticulture, forestry, and farm quarries.
Point Number	197.11
Summary of Decision Requested:	Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports clear policy on managing effects on rural character and amenity from rural subdivision.
Point Number	197.12
Summary of Decision Requested:	Amend the definition for "Ancillary rural earthworks" in Chapter 13 Definitions to include the following activities: <i><u>burying of material infected by unwanted organisms as declared by Ministry, for Primary Industries Chief Technical Officer or an emergency declared by the Minister under the Biosecurity Act 1993.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> A permitted activity status and the exclusion of ancillary rural earthworks from the definition of earthworks is supported but should be amended to manage biosecurity responses.
Point Number	197.13
Summary of Decision Requested:	Amend the definition for "Building" in Chapter 13 Definitions to clearly exclude mobile shelters for outdoor pigs from the definition of building.
Decision Reasons:	<ul style="list-style-type: none"> The definition must clearly exclude mobile shelters for outdoor pigs from the definition of building.
Point Number	197.14
Summary of Decision Requested:	Retain the definition for "Minor Dwelling" in Chapter 13 Definitions AND Amend the Proposed District Plan to include provisions for onsite farm workers accommodation of sufficient size to accommodate a family.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the recognition of the need for additional dwellings on rural properties, ancillary to the principal dwelling. There is a lack of provision of onsite farm workers accommodation of sufficient size to accommodate a family.
Point Number	197.15
Summary of Decision Requested:	Retain the definition for "Rural Industry" in Chapter 13 Definitions subject to clarifying that rurally located feedmills and feed manufacturing activities are included in this definition.
Decision Reasons:	<ul style="list-style-type: none"> The definition is generally supported subject to clarity that rural located feedmills and feed manufacturing activities are included in this definition.
Point Number	197.16
Summary of Decision Requested:	Amend the definition for "Sensitive land use" in Chapter 13 Definitions as follows: <i>Means an education facility including a childcare facility, waananga, and kohanga reo, a residential activity, papakainga building, rest home, retirement village, travellers accommodation, home stay, health facility or hospital, <u>cafes, restaurants, tourism/entertainment activities, community services.</u></i>
Decision Reasons:	

- Sensitive land use activities from a pork production perspective are broader than the activities listed in the proposed definition and are activities often located or seeking to locate in rural areas.

Point Number 197.17

Summary of Decision Requested: **Retain** Rule 22.1.2 P7 Permitted Activities, as notified.

Decision Reasons:

- The submitter supports the Permitted Activity status for Farming.

Point Number 197.18

Summary of Decision Requested: **Amend** Rule 22.1.3 RD1 Restricted Discretionary Activities, as follows:

INTENSIVE PIG FARMING is a restricted discretionary activity subject to meeting the following standards:

(a) Compliance with the setback standards.

(b) Activity does not generate dust or odour which create a nuisance at or beyond the boundary of a site.

(c) Activity to operate in accordance with Pork Industry Board Code of Practice and Environmental Management Industry Guide.

(d) Activity has an Industry Approved Farm Environment Plan.

OUTDOOR PIG FARMING is a restricted discretionary activity subject to meeting the following standards:

(a) Compliance with the setback standards.

(b) Groundcover is maintained in accordance with best farming practices including any relevant industry good management practices.

(c) Activity does not generate dust, which create a nuisance at or beyond the boundary of a site.

(d) Activity has an Industry Approved Farm Environment Plan.

AND

Add a new rule to Rule 22.1.5 Discretionary activity that any activity that breaches these standards is a Discretionary Activity.

Decision Reasons:

- NZPork opposes the 3% building coverage limitation.
- There is a number of indoor piggeries (Intensive Pig Farming) that do not need the expansive farm land unrelated to the activity that this condition requires.
- Producers must meet the requirements of both the Animal Welfare (Pigs) Code of Welfare 2010 and the PigCare™ program. This includes a minimum lying space allowance for growing pigs.
- Pork production requires additional building areas for: grain milling, feed storage, plant and equipment rooms, and staff housing.
- NZPork supports a setback regime for pigs in both intensive and extensive situations.
- NZPork opposes the threshold numbers, which are arbitrary relative to effects. It is assumed this is 500 pigs at one time, which might mean 50 sows plus progeny. A medium sized farm with 400 sows would have 4800 pigs.
- A more effective and efficient method would be to separately define Intensive and Extensive farming and to provide performance standards around each given the different effects.
- NZPork supports reducing the overlap between the regional and local authority, and thereby reducing planning costs and timeframes.
- Air quality is an important resource management issue and one that requires an integrated approach between regional and local authorities. Issues relating specifically to air quality (dust and odor), rather than general amenity or reverse sensitivity effects, are more appropriately addressed through the regional plan by the Waikato Regional Council as is currently the case.
- The regional Council controls stock numbers for Extensive Farming through Plan Change 1. The justification for Waikato District Council to set a 500 pig per site threshold is not clear.
- Within the Rural Zone, farming activities and their associated effects should generally be expected to occur and therefore there should be an element of tolerance for this activity type. This sentiment is expressed through the creation of an extensive farming definition and rendering this activity type as permitted. This allows those activities that cause little or no effect to occur without needing resource consent.
- By having a definition for extensive and intensive farming, it provides clarity as to where a particular activity sits on the spectrum and if resource consent requirements have been triggered. There is a clear delineation between what could be considered an 'extensive' farm and an 'intensive' farm. An extensive farm would be considered to involve outdoor operations, with low stocking densities, grass cover being maintained, with low amounts of dust and odor being discharged from the activity. An intensive farm would primarily consist of an indoor high stock density operation.

Point Number 197.19

Summary of Decision Requested: **Retain** Rule 22.2.1.1 P1 Noise – General, as notified.

Decision Reasons:

- The submitter supports the Permitted Activity status for farming.

Point Number 197.20

Summary of Decision Requested: **Retain** Rule 22.2.2 P1 Glare and Artificial Light Spill, as notified.

Decision Reasons:

- The submitter supports the Permitted Activity status for vehicles used in farming activities and agricultural equipment.

Point Number 197.21

Summary of Decision Requested: **Retain** Rule 22.2.3.1 P1 Earthworks – General, as notified.

Decision Reasons:

- The submitter supports the Permitted Activity status for Ancillary Farming Earthworks.

Point Number	197.22
Summary of Decision Requested:	<p>Retain Rule 22.2.3.1 P2 Earthworks- General, insofar as supporting the permitted and restricted discretionary activity thresholds (volume and area) for earthworks in the Rural Zone</p> <p>AND</p> <p>Delete Rule 22.2.3.1 P2 (iii) Earthworks – General requiring all earthworks to be setback 1.5m from all boundaries.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The Permitted and Restricted Discretionary Activity thresholds (volume and area) for earthworks in the Rural Zone are supported. • The submitter would not support a more onerous activity status for earthworks, • The submitter opposes the requirement that all earthworks are setback 1.5m from all boundaries.
Point Number	197.23
Summary of Decision Requested:	<p>Delete the conditions from Rule 22.3.2 P1 Minor dwelling</p> <p>OR</p> <p>Add separate provisions for farm workers accommodation.</p>
Decision Reasons:	<ul style="list-style-type: none"> • A minor dwelling that might be used for farm workers accommodation appears to be limited by conditions that do not support a viable farm workers requirement. • Larger and more intensive rural production activities will often require the onsite provision of farm workers accommodation to provide onsite farm assistance, animal husbandry, and security. • A 70m2 limitation would not support a farm worker and family and the requirement that the minor dwelling be located 20m from the dwelling does not allow for privacy.
Point Number	197.24
Summary of Decision Requested:	Delete Rule 22.3.6 Building coverage.
Decision Reasons:	<ul style="list-style-type: none"> • Building coverage standards are utilised to control stormwater, character and amenity effects. Other technical standards can be adopted to effectively manage stormwater, • It is considered that Rural Buildings irrespective of their size are an accepted element of rural character and amenity. • The building coverage limitation and subsequent discretionary activity status for non-compliance is a constraint for rural production activities and will not encourage reinvestment or expansion in the Waikato. • Rural producers will look elsewhere for more supportive planning frameworks.
Point Number	197.25
Summary of Decision Requested:	Retain Rule 22.3.7.1 P1 Building setbacks – All boundaries, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports setbacks for habitable buildings from site boundaries to manage reverse sensitivity • Physical separation achieved through a defined setback regime is supported by NZ Pork as an effective method to avoid, remedy or mitigate potential conflicts and reverse sensitivity issues.
Point Number	197.26
Summary of Decision Requested:	Retain Rule 22.3.7.1 P2 Building setbacks – All boundaries, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports setbacks for inhabitable buildings. • Physical separation achieved through a defined setback regime is supported by NZ Pork as an effective method to avoid, remedy or mitigate potential conflicts and reverse sensitivity issues.
Point Number	197.27
Summary of Decision Requested:	Retain Rule 22.3.7.1 P3 Building setbacks – All boundaries, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports setbacks for habitable buildings from site boundaries to manage reverse sensitivity. • Physical separation achieved through a defined setback regime is supported by NZ Pork as an effective method to avoid, remedy or mitigate potential conflicts and reverse sensitivity issues.
Point Number	197.28
Summary of Decision Requested:	Retain Rule 22.3.7.1 P4 Building setbacks – All boundaries, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports setbacks for inhabitable buildings. • Physical separation achieved through a defined setback regime is supported by NZ Pork as an effective method to avoid, remedy or mitigate potential conflicts and reverse sensitivity issues.
Point Number	197.29
Summary of Decision Requested:	Retain Rule 22.3.7.2 P1 Building setback sensitive land use as notified.

Decision Reasons:

- Physical separation achieved through a defined setback regime us supported by NZ Pork as an effective method to avoid, remedy, or mitigate potential conflicts and reverse sensitivity issues.

Point Number 197.30

Summary of Decision Requested: **Retain** Rule 22.4.9 RD1 Subdivision - Building platform, insofar as it requires a specified building platform for proposed lots
AND

Add a new matter of discretion to Rule 22.4.9 RD1 Subdivision – Building platform, as follows:
(b)(vii) The relationship of the building platform and future use of the site with surrounding rural production activities and measures to avoid for reverse sensitivity effects.

Decision Reasons:

- The requirement for a specified building platform for a proposed lot is supported.
- The matters of discretion need to be expanded to consider the relationship of the building platform and future use of the site with surrounding rural production activities.

Point Number 197.31

Summary of Decision Requested: **Amend** the definition for "Earthworks" in Chapter 13 Definitions to include the following:
burying of material infected by unwanted organisms as declared by Ministry for Primary Industries Chief Technical Officer or an emergency declared by the Minister under the Biosecurity Act 1993.

Decision Reasons:

- The plan should identify this to avoid delay in responding to a biosecurity threat.

Point Number 197.32

Summary of Decision Requested: **Retain** the definition of "Farming" in Chapter 13 Definitions as notified.

Decision Reasons:

- The inter-relationship between rural production activities, mixed farming operations and intensive farming must be encapsulated in the higher order rural production issues, objectives and policies.

Point Number 197.33

Summary of Decision Requested: **Retain** the definition of "Farming noise" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition is supported.
- Farming noise must not be subject to regulatory constraints for activities that are a typical and necessary part of the rural production environment.

Point Number 197.34

Summary of Decision Requested: **Amend** the definition of Impervious Surface in Chapter 13 Definitions as follows:
Means a surface such as a road, rooftop, footpath, paving, decking, swimming pool, patio, driveway, vehicle access and maneuvering area or highly-compacted soil that is not vegetated and does not infiltrate runoff.
It excludes wooden decks with spacing between boards of 4mm or more, where water is allowed to drain through to a permeable surface below the deck.
It excludes farm tracks comprised of compacted surfaces ancillary to rural production activities.

Decision Reasons:

- The definition must exclude farm tracks.

Point Number 197.35

Summary of Decision Requested: **Delete** reference to "free-range pig farming" from the definition of "Intensive farming" in Chapter 13: Definitions.
AND

Add a new definition to Chapter 13 Definitions for "Extensive Farming" as follows:
Extensive Farming
Means the keeping, breeding or rearing of stock for commercial purposes, on pasture at a stocking density that sustains the maintenance of pasture or ground cover.

Decision Reasons:

- NZPork opposes the inclusion of free-range pig farming in the definition of an intensive farming.
- These activities are dependent on the fertility of the soils on which the activity is located and in accordance with good management practice required to maintain grass cover
- Supplementary feed is brought on to the site, as is the case in many farming activities.

Submitter Number: 198

Submitter: Katherine Wilson

Organisation: Property Council New Zealand

Point Number	198.1
Summary of Decision Requested:	Place on hold the District Plan review process to align with the Ministry for the Environment's National Planning Standards, incorporate structure plans as a result of current blueprinting work and incorporate a Natural Hazards chapter.
Decision Reasons:	<ul style="list-style-type: none"> • This would provide the opportunity to incorporate the structure plans and natural hazards chapter at the same time of the review. • The Plan references structure plans, but there is an absence of structure plans in the Plan. • While the submitters support the blueprint exercise, especially considering the growth challenges the district faces, the timing is unfortunate and would have been more effective if the process had been undertaken prior to the notification of the Proposed District Plan, as the blueprinting exercise has the potential to require a further plan change to implement. • By placing the plan on hold, there is real potential to align the Ministry for the Environment's National Planning Standards and incorporate natural hazards into the District Plan. • The submitters are concerned that the natural hazards chapter has been omitted from the Proposed District Plan. It is challenging to consider the District Plan without knowing how a future inserted natural hazards chapter will relate to other chapters in the plan. • Given the vast array of natural hazards in the Waikato District, it is not realistic to progress the District Plan without natural hazards being considered in tandem with all other chapters. • This will ensure consistency and integration across the plan. • It will unlock the potential to align the Ministry for the Environment's National Planning Standards and incorporate structure plans as a result of the blueprinting exercise. • The Proposed District Plan acknowledges that cross boundary issues are common due to the Waikato District being located between two growing cities. The submitter has strongly supported the MfE's Draft National Planning Standards to ensure that standardisation of definitions is consistent between council plans. • The Council is silent on how they intend to implement the National Planning Standards once they come into force. • The submitter encourages the Council to think about the need to update this the Plan given the impending planning standards which will have set definitions and zone requirements across New Zealand.
Point Number	198.2
Summary of Decision Requested:	Retain the Proposed District Plan's approach to focus urban development and growth primarily into existing towns and villages near necessary infrastructure such as transport nodes.
Decision Reasons:	<ul style="list-style-type: none"> • Urban growth in the Waikato District is a fine balancing act between the need to foster and enhance growth to keep up with demand, and the need to protect its rich soils and landscapes. Tightening land control may deter investment resulting in developers believing Waikato is 'closed for business'. • In contrast, no strategic plan and loose controls will have environmental impacts and may result in fragmented pocket communities. • A carefully managed strategic plan is required to meet the regions interests and effectively plan for growth. • It is important to ensure people live in or near cities with good transport options, to have access to economic and social opportunities.
Point Number	198.3
Summary of Decision Requested:	Increase collaboration with other councils for the sharing of resources and infrastructure near or crossing boundary lines.
Decision Reasons:	<ul style="list-style-type: none"> • This is important because of the increased urban development in both the north and south. • It is encouraging to see the Council working closely with Auckland Council to ensure that infrastructure accommodates urban growth south of Auckland. • The sharing of infrastructure and services between the two districts is important. • It aligns with the Waikato District Development Strategy 2015. • The submitter supports the Councils' ongoing collaboration with other councils. • This will ensure that key stakeholders are aware of the infrastructure needs facing the region along with proposed future projects.
Point Number	198.4
Summary of Decision Requested:	Amend the planning standards to better align with the Hamilton to Auckland Corridor Network Plan.
Decision Reasons:	<ul style="list-style-type: none"> • This will ensure greater density around transport nodes, which in turn could help fund infrastructure. • It will provide the important connectivity linkages between future planned urban development settlements and the new rail passenger service and expressway. • The submitters suggest this occur sooner rather than later, as the expressway is set to be completed by 2020.
Point Number	198.5
Summary of Decision Requested:	Amend the Proposed District Plan to strongly support urban growth in a way that does not rely solely on the Future Proof 2010 data, and to use more ambitious growth estimates in the region to support urban growth. AND No specific decision sought, but the submitter considers that Policy 4.1.3(b) Location of development is counterproductive, given that the predictions and data used by Future Proof date back to 2010.
Decision Reasons:	<ul style="list-style-type: none"> • This will provide potential developers with an early opportunity to provide feedback regarding their feasibility and likelihood of development opportunities that the settlement pattern aims to achieve. • Future Proof has been a slow process which is concerning given the rate of predicted future growth in the region. • The submitter wishes to see more progress on Future Proof and are willing to be approached for feedback on early stages of Phase 2 work. • Future Proof has the potential to drive regional collaboration by monitoring and identifying land supply needs along with an agreed sequence for development over the next 50 years. • Future Proof and Corridor Plan work should be linked and communicated to key stakeholders.

- The submitter wishes to see Future Proof flourish with more ambitious (and realistic) growth targets.
- The submitter's 2017 submission on Phase 1 of Future Proof did not support the settlement pattern. This was in part due to the age of the data and the use of low and medium growth projections to inform the sub-regional allocation and staging of residential household growth.
- The Ministry of Business, Innovation and Employment's National Policy Statement on Urban Development Capacity has placed Waikato as a high growth area.
- Smart investment and planning decisions must be made to ensure that Waikato can support this growth. The submitter has ideas on alternative funding mechanisms for infrastructure.
- The submitter supports updating the Future Proof growth predictions and data to align with MBIE's National Policy Statement on Urban Development and the New Zealand Census Data being released early 2020. This will be a better indicator of population and demographic trends for Waikato.
- The submitter supports Phase 2 updating the settlement pattern and incorporating the new Government's policy, initiatives and directions.
- The submitter supports a review of the Waikato Regional Policy Statement as part of the Phase 2 review in relation to land allocation assumptions and requirements.

The submitter is keen to provide feedback on progress, particularly in relation to settlement plans, before formal engagement in 2019.

Point Number 198.6

Summary of Decision Requested: No specific decision sought, but submission encourages a coordinated approach between councils across the Waikato region to comply with the upcoming Ministry for the Environment's (MfE) National Planning Standards as soon as the standards are operative.

Decision Reasons:

- This will be a strong signal that the Waikato is open for business and plan users will have comfort in the consistency between plans across the Waikato region.
- If all councils were aligned in the Waikato, this would allow ease of use for the submitter's members and would likely attract new development opportunities for the region.

Point Number 198.7

Summary of Decision Requested: **Amend** Objective 4.1.1 Strategic to be more ambitious and flexible to incorporate Future Proof Phase 2 and the upcoming Statistics NZ data.

Decision Reasons:

- *To adequately plan for population growth and housing demand.*

Point Number 198.8

Summary of Decision Requested: **Retain** the approach of allowing for a range of different housing options with varying land values and amenities.

Decision Reasons:

- *This aligns with the purpose of strategically managing growth by providing for a range of housing options that supports the regions diversity, and to meet peoples various requirements.*

Point Number 198.9

Summary of Decision Requested: **Amend** the Proposed District Plan to have a wider approach to plan for different housing typologies to cater for a diverse and younger population.

Decision Reasons:

- Communities and people like choice.

Point Number 198.10

Summary of Decision Requested: **Retain** the objective of ensuring that subdivisions are located, designed and staged to support infrastructure such as stormwater, parks and open space networks.

AND

Provide the important linkages from future planned urban development settlements in both residential and commercial areas to the expressway, and to invest in areas that are along the transport corridor.

Decision Reasons:

- It is important to ensure that subdivisions are located, designed and staged to support infrastructure such as stormwater, parks and open space networks.
- The Plan needs to utilise the Waikato Expressway, which is set to be completed in 2020.
- Connectivity is important to unlock the district's growth potential.
- The new expressway will result in different patterns of development along with providing alternative transport options. Monitoring this closely and providing local links to the new expressway is important.
- Providing these linkages aligns with Waikato Economic Development Roadmap 2012 and 2015, which was designed to improve connections and the districts infrastructure.
- The submitters support the council working with Auckland Council, Auckland Transport and the New Zealand Transport Agency considering the extending passenger rail service between Pukekohe and Pokeno, and its eventual extension to Hamilton City.
- It is vital that future urban growth is developed close to the transport hubs. This will support transport in either direction and the district's connectivity to Auckland.

Point Number 198.11

Summary of Decision Requested: No specific decision sought, but submission strongly supports the need for alternative funding mechanisms for infrastructure with central and local government, and the Long Term Plan and District Plan proposals in this regard.

Decision Reasons:

- *The submitters strongly support the need for alternative funding mechanisms particularly given the growth of Auckland and Hamilton cities, as they expand into the Waikato.*

- The Waikato region has seen a significant period of underfunding infrastructure.
- The submitter is happy to advocate alternatives to central government.
- The submitter is currently working with their members to look at alternative funding mechanism options to present to the Productivity Commission in its inquiry into local government funding.

Point Number 198.12

Summary of Decision Requested: Amend the Proposed District Plan to align the supply of industrial land with the Auckland Unitary Plan.

Decision Reasons:

- This will ensure a consistent approach is taken across the wider region.

Point Number 198.13

Summary of Decision Requested: No specific decision sought, but the submission supports the monitoring of growth against the anticipated growth settlement patterns and the targets identified in Future Proof strategy and the National Policy Statement on Urban Development Capacity.

Decision Reasons:

- The submitters know that as Auckland house prices continue to increase, many among the younger generation are looking to invest in and move outside of the city. The Waikato region is the natural beneficiary of this movement and the region needs to be prepared.

Point Number 198.14

Summary of Decision Requested: Amend the Proposed District Plan to have a multi-pronged approach and strategically support building both up and out to ensure that the district is not limiting itself.

Decision Reasons:

- The overarching direction of focusing urban growth in existing urban communities that have capacity for expansion is limiting its future growth potential.
- To ensure that the district is not limiting itself.
- The submitter generally supports a staged infrastructure provision relating to developments outside of expanding city limits; they do not want to see overzealous limitations of urban development as this will likely result in a failure to meet future demand of housing, employment opportunities and a lack of required infrastructure.
- A more forward-thinking and strategic multi-pronged approach to development across Waikato is required.
- Supporting simultaneous nodes of development will ensure that future demand is met, and provides certainty to allow developers to plan beyond the 2063 growth predictions.

Point Number 198.15

Summary of Decision Requested: Amend the Proposed District Plan to consider housing for the younger generation on the fringes of the city, which may include making land available for apartment-style or high density living near key transport routes that connect Waikato to Auckland and Hamilton.

Decision Reasons:

- Having a range of housing typologies will provide options for people.
- Hamilton City has a relatively young population with 48% of the population being under 30 years of age.
- With housing prices becoming more expensive in the city, young professionals and students may look at housing options outside of Hamilton city.

Point Number 198.16

Summary of Decision Requested: Retain the promotion of the outcomes in the urban design guidelines.

Decision Reasons:

- The submitter has long supported the development of infrastructure, buildings and designs that support quality urban design.
- Quality urban design is important in contributing to the overall design of the community and landscape.
- Urban design principles are important to ensure that buildings are functional and sustainable.

Point Number 198.17

Summary of Decision Requested: Retain the purpose of the Proposed District Plan to promote sustainable management of natural and physical resources primarily through strategic management of growth, as it is set out in Section 1.2(a) What is the purpose of the Waikato District Plan.

Decision Reasons:

- Property Council is a strong supporter of strategic management of growth.
- Due to the number of councils operating in the Waikato region, the variety of land, soils, water and energy resources and its geographic placement between Auckland and Hamilton, strategic management of growth is important.

Point Number 198.18

Summary of Decision Requested: No specific decision sought, but submission wishes to see more progress on Future Proof.

Decision Reasons:

- Future Proof has the potential to drive regional collaboration by monitoring and identifying land supply needs along with an agreed sequence of development over the next 50 years.

Point Number 198.19

Summary of Decision Requested: **Retain** the minimum density of 12-15 households per hectare in Residential zones and 8-10 households per hectare in Village zones.
AND
Amend the Proposed District Plan to have a mixed typology across the district.

Decision Reasons:

- The submitter supports these figures but wishes to see a mixed typology across the district.
- A well-designed neighborhood will incorporate a variety of housing typologies to accommodate the differing needs of its community.
- A key benefit of mixed typologies is a reduction in land space used.
- Adelaide has an average site area of less than 300m². In comparison, medium density housing in New Zealand has an average of less than 350m² per unit.
- Introducing townhouses and apartment developments would support a key concern within the Plan of encroaching on rich soils, as less land space is required for these types of developments. Setting a minimum lot size, e.g. 5000m² for lifestyle blocks, works against that objective.

Point Number 198.20

Summary of Decision Requested: **Retain** Policy 4.5.24 New buildings: Business Town Centre Zone.

Decision Reasons:

- The submitter has long supported the development of infrastructure, buildings and designs that support quality urban design.
- Quality urban design is important in contributing to the overall design of the community and landscape.
- Urban design principles are important to ensure that buildings are functional and sustainable.

Point Number 198.21

Summary of Decision Requested: **Retain** Policy 4.7.2 Layout and Design – Subdivision location and design.

Decision Reasons:

- The submitter has long supported the development of infrastructure, buildings and designs that support quality urban design.
- Quality urban design is important in contributing to the overall design of the community and landscape.
- Urban design principles are important to ensure that buildings are functional and sustainable.

Point Number 198.22

Summary of Decision Requested: **Retain** Policy 4.7.3 Layout and Design – Residential subdivision.

Decision Reasons:

- The submitter has long supported the development of infrastructure, buildings and designs that support quality urban design.
- Quality urban design is important in contributing to the overall design of the community and landscape.
- Urban design principles are important to ensure that buildings are functional and sustainable.

Point Number 198.23

Summary of Decision Requested: **Retain** the strategic approach to growth ensuring infrastructure and services are provided for and aligning infrastructure and urban development to provide for growth and connectivity.

Decision Reasons:

- The submitter supports a strategic approach to growth ensuring infrastructure and services are provided for.
- A strategic approach aligns infrastructure and urban development to provide for growth and connectivity.
- Due to Waikato's geographic size, connectivity is important to enable movement between rural and urban cities and to avoid the development of pocket communities with no interlinks or connections.

Submitter Number: 199 **Submitter:** Noeleen Darby

Point Number 199.1

Summary of Decision Requested: **Delete** the proposed walkway as notified around the Waikare Golf Course, including down the 10th fairway and along the 16th fairway.

Decision Reasons:

- This would be a very dangerous walkway both to pedestrians and cyclists. There is insufficient room to create a walkway around the golf course as the fairways are only just wide enough now and if they had to be reduced, the course would lose its appeal to golfers - hence making the golf club struggle financially to survive.
- There is insufficient room to create a walkway around the golf course.

Submitter Number: 200 **Submitter:** John Wiltshire

Point Number 200.1

Summary of Decision Requested: **Retain** Chapter 9 Specific Zones.

Decision Reasons:

- No reason provided.

Point Number

200.2

Summary of Decision Requested:**Add** a specific zone for the Kimihia Lakes Restoration and Development Project.**Decision Reasons:**

- Project is an initiative which Huntly deserves.
- Both the Huntly area (town and surrounds) and the Waikato District Council which supports it. It will benefit at all levels by encouraging the Project initiative.
- An inspirational and life changing Project with the potential for everyone to be involved.

Submitter Number:

201

Submitter:

Philip & Jan Hillmer

Point Number

201.1

Summary of Decision Requested:**Amend** the zoning of 233 Golding Road, Pukekohe from Rural Zone to Country Living Zone.**Decision Reasons:**

- The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan.
- This could mean residential housing and therefore a residential environment rather than a large open space rural environment.
- Given the close proximity to Buckland and Pukekohe, a change of zoning from Rural to Country Living Zone is a logical progression in zoning for this area.

Submitter Number:

202

Submitter:

Tom Hockley

Point Number

202.1

Summary of Decision Requested:**Amend Policy 3.2.2(b)** Identify and Recognise, to ensure that the proposed Significant Natural Areas related regulations are only accepted with the full voluntary participation of the landowner.**Decision Reasons:**

- The proposed Plan, as it is currently presented, effectively removes a significant degree of the submitters rights and amenity over/of the land they purchased, without appropriate compensation.
- Previous correspondence from the Council recognised that "The reason many of these areas still exist is because past generations of farmers and landowners valued and looked after them." The submitters now find it perplexing that they are no longer trusted to continue that approach without coercion.
- The imposition of the proposed SNAs significantly devalues the affected properties. The submitter purchased this land because other properties had similar encumbrances.
- Landowners also have plans. In the submitters' case, forestry and agriculture are options that they have considered, but chose to leave that portion of land in order to enjoy it as it is. There seems to be no recognition in the proposed Plan of the fact that landowners have made commitments and investments, in accordance with their own (heretofore) legitimate and responsible plans, which are now considered illegal.
- This approach is counterproductive.
- The best means of achieving conservation is by the acquisition of suitable land tracts, zoning and caring for them appropriately. By these means, all ratepayers would then share the cost burden, and all would be able to share the enjoyment of visiting those areas. Other alternatives include the "Bush Tenancy" method recently used in Victoria, Australia. That arrangement protects large eligible tracts of land by voluntary contracts. The economic benefits of this dwarf carbon-tax scenarios.

Submitter Number:

203

Submitter:

Marisa Ibanez

Point Number

203.1

Summary of Decision Requested:**Add** a new zone called Kimihia Lakes Recreation and Events Zone to allow development to occur on the former Huntly East mine as identified in the document attached to the submission. See the submission for full details of the site, and the new objectives, policies, rules and definitions sought.**Decision Reasons:**

- Submitter supports change of zoning to allow development at Kimihia Lakes. Refer to the submission for full details. The closed Huntly East Mine was purchased with a vision of developing the majority of this land as a recreation and events park to provide a community and sporting facility. The scale of the vision is vast, as is the landholding area involved, which enables the development of a facility that is not only for the Huntly community, but as a regionally significant tourist attraction.

Submitter Number:

204

Submitter:

Roger & Bronwyn Crawford

Point Number

204.1

Summary of Decision Requested:**Amend** the extent of the Village Zone boundary for the property at 34 Wairamarama Onewhero Road, Onewhero to include an additional 6210 m² of Village Zone. Refer to submission for maps and details.**Decision Reasons:**

- The submitters' property currently has split zone of Village/Rural and the submitter considers a more beneficial outcome can be achieved by extending the Village Zone boundary by 6210sqm for the following reasons:
 - The existing zoning restricts the land from being subdivided in an efficient and appropriate manner and reduces the number of potential future allotments than that which is already provided for under the Operative District Plan.
 - The current rules allow for 6 additional lots.

- The land is fragmented and will only allow for 4 additional lots due to the increased size and performance standards.
- The requested amendments remain consistent with the intended development of the Onewhero Village area and will achieve the relevant objectives and policies for the Village Zone.
- Refer to submission for indicative subdivision layout.

Submitter Number:	205	Submitter:	Ray Bowater
Organisation:	Rainbow Water Ltd		
Point Number	205.1		
Summary of Decision Requested:	Amend the zoning of the property at 5 Hitchen Road (Lot 2 DP 199997), Pokeno from Rural Zone to Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter considers that the site is suitable for residential development as it: <ul style="list-style-type: none"> - Adjoins other residential zoned property; - Is easily accessible to Pokeno; - Has covenanted bush, northfacing slopes, views and natural water courses; and - Is not of a size viable for rural uses. - The land had previously been subject to a buffer zone due to the neighbouring quarry but this is now no longer relevant. 		

Submitter Number:	206	Submitter:	David Horton
Point Number	206.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter considers that the objectives and policies for Te Kowhai Airpark as notified should be retained as it will ensure that the aerodrome will be self sufficient and will remain the GA satellite for Hamilton airport just as Ardmore is for Auckland airport. • Airparks are highly successful in America and this will be an exciting first for New Zealand. 		
Point Number	206.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter considers that the rules for Te Kowhai Airpark as notified should be retained as it will ensure that the aerodrome will be self sufficient and will remain the GA satellite for Hamilton airport just as Ardmore is for Auckland airport. • Airparks are highly successful in America and this will be an existing first for New Zealand. 		

Submitter Number:	207	Submitter:	John and Gail Cameron
Point Number	207.1		
Summary of Decision Requested:	Amend the zoning for the property at 198 Buckville Road, Pukekohe from the Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The surrounding area to the north and west of the property is within the Auckland Council territory boundary and has been zoned Future Urban Zone under the Auckland Unitary Plan. <ul style="list-style-type: none"> - This could mean residential housing and therefore a residential environment as opposed to a large open space rural environment. - Given the close proximity to Buckland and Pukekohe, a change in zoning from Rural to Country Living Zone is a logical progression in zoning for the area. 		

Submitter Number:	208	Submitter:	Bruce Belfield
Point Number	208.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The Policy Framework recognises the significance of the existing aerodrome to the Aviation community. • The objectives and policies will safeguard the future needs of the aviation community. • The policy framework allows for a mix of residential and commercial opportunities, making use of existing infrastructure and which cannot easily be replicated elsewhere. • Development of the airpark represents a practical use of a limited and scarce resource. 		
Point Number	208.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The provisions provide for flexibility of landuse activity that is needed for sustainable use of the aerodrome. • The proposed OLS will enhance the safety and function regardless of residential uptake in the airpark. • The airpark meets the niche requirement of the aviation community including the provision of hangars and the ability to taxi from home to hangar. 		

- Chapter 27 provisions recognise that the airpark is distinct from conventional residential development and is an extremely scarce physical resource reliant on proximity to an airfield without the opportunities and protection afforded by the airpark zone provisions, the ongoing operational needs of the aerodrome could not be guaranteed.
- Rezoning the aerodrome from the Rural to Airpark Zone is totally appropriate.

Submitter Number:	209	Submitter:	Brian Neil Harris
Point Number	209.1		
Summary of Decision Requested:	Retain the Country Living zoning of the property at 102 Travers Road, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitters want to retain the amenity value of their adjoining land at 9 Green Acres Drive, including the low-density development of the area. • The land is in a flood plain and unsuitable for high density living. • Many properties adjacent have stock/livestock and there will be issues of complaints, safety, and security if it is intensely developed. • The submitters moved there with the expectations that 102 Travers Road would remain a Country Living Zone. 		

Submitter Number:	210	Submitter:	Carol Anne Harris
Point Number	210.1		
Summary of Decision Requested:	Retain the Country Living zoning of the property at 102 Travers Road, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitters moved there with the expectations that 102 Travers Road would remain a Country Living Zone. • The submitters want to retain the amenity value of their adjoining land at 9 Green Acres Drive, and keep it at low-density development. • Many properties including the submitters' and adjacent have stock/livestock and there will be issues of complaints, safety, and security. • The land is in a flood plain and unsuitable for high density living. 		

Submitter Number:	211	Submitter:	Tony Knowing
Point Number	211.1		
Summary of Decision Requested:	Retain Chapter 9.2: Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter concurs with the application being sought. 		
Point Number	211.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter concurs with the application being sought. 		

Submitter Number:	212	Submitter:	Ron Pollock
On behalf of:	Community Living Trust		
Point Number	212.1		
Summary of Decision Requested:	Retain Chapter 16 Residential Zone in terms of combining Residential, Residential 2, Living Zones and Medium density housing areas into a single Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • This will allow more intensive development of properties throughout the new Residential Zone; which in turn supports Integration with local services and facilities, including public transport development initiatives. This decision to combine the 4 zones into 1 Residential Zone further supports Councils previous decision to accept our submission in 2005 to change our Mason Road property from Rural to Living Zone during the last District Plan Review. 		
Point Number	212.2		
Summary of Decision Requested:	No specific decision sought, but submission supports the Proposed District Plan in terms of streamlining and enhancing the way the District is developed and the way land and resources are managed for the betterment of all.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		

Point Number	212.3
Summary of Decision Requested:	No specific decision sought, but submission supports combining Waikato and Franklin sections into a single District Plan with a consistent approach to growth and development across the district.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	212.4
Summary of Decision Requested:	No specific decision sought, but submission notes that the development of subdivision and multi-unit guides will assist quality design and thriving communities.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	212.5
Summary of Decision Requested:	No specific decision sought, but submission considers the Proposed District Plan improves home choices, e.g. minor dwellings, multi unit development and retirement villages, which will offer a diverse range of housing types including care facilities for older and disadvantaged people.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	212.6
Summary of Decision Requested:	Prioritise the provision of reticulated Council operated water and wastewater to existing home owners and residents (particularly Whatawhata Village), and include planning these systems in Council's Long Term plan to encourage and support housing development in the Whatawhata Village Residential Area.
Decision Reasons:	<ul style="list-style-type: none"> Given Council's desire and planning for more development intensification, the submitter believes this vital infrastructure should be a priority.

Submitter Number:	213	Submitter:	Anita Torres
Point Number	213.1		
Summary of Decision Requested:	Amend Rule 16.4.1(a)(i) Subdivision - General, as follows: <i>(i) Proposed lots must have a minimum net site area of 450400m², except where the proposed lot is an access allotment or utility allotment or reserve to vest;</i>		
Decision Reasons:	<ul style="list-style-type: none"> The change to require a minimum of 450m² is onerous to landowners wishing to subdivide. Many lots are based on a multiple of 400m², i.e. 800m², 1200m² and so on. A land size requirement of 400m² is sufficient to preserve green space while still allowing for a reasonable amount of growth and a decent return on the land investment that many landowners have already made. 		

Submitter Number:	214	Submitter:	Cody Hata
Point Number	214.1		
Summary of Decision Requested:	Retain the zoning of the property at 163 Tregoweth Lane, Huntly, as notified, with Industrial Zone at the front portion of the site.		
Decision Reasons:	<ul style="list-style-type: none"> The property adjoins an existing Quarry. There is no rural aspect/outlook. The property is currently being used as a transport depot through resource consent and on the same lane there is a mixture of rural and industrial. 		

Submitter Number:	215	Submitter:	Joanna Clark
Point Number	215.1		
Summary of Decision Requested:	Amend the zone of the front section (near the road) of the property at 730 State Highway 22, Pukekawa from Rural Zone to Village Zone.		
Decision Reasons:	<ul style="list-style-type: none"> To allow a development right of 1 lot which would be keeping with the properties adjacent on the south side, as well as the properties opposite which are all Village zoned. There is a need for smaller acreages within Pukekawa village. 		

Submitter Number:	216	Submitter:	Scott Montagu
--------------------------	-----	-------------------	---------------

Point Number 216.1

Summary of Decision Requested: Retain Chapter 9.2: Te Kowhai Airpark, as notified.

Decision Reasons:

- Supporting this increasingly scarce community asset.
- Rezoning in support of an airpark would be an excellent asset to the aviation and local community.
- This would feed the local community with assets and venues.

Point Number 216.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Supporting this increasingly scarce community and regional asset.
- Rezoning in support of an airport would be an excellent asset to the aviation and local community.
- This would feed the local community with assets and venues.

Submitter Number: 217 **Submitter:** Alex Kirby

On behalf of: Raglan Properties Limited

Point Number 217.1

Summary of Decision Requested: Delete the heritage item from the property at 14 Bow Street, Raglan.

Decision Reasons:

- Owner of the property agrees with Council committees findings to remove the heritage designation at 19 Bow St, Raglan 3225 #1014405.
- The heritage designation increases the complexity and cost to maintain the property and therefore has an adverse effect on the overall upkeep of the property.

Submitter Number: 218 **Submitter:** Keith Gutry

On behalf of: Waikare Golf Club

Point Number 218.1

Summary of Decision Requested: Delete the proposed walkway through the Waikare Golf Course property at 66 Waerenga Road, Te Kauwhata.

Decision Reasons:

- It goes through car park (see photos attached to submission).
- It goes through the 10th tee block and can not be moved as not enough area.
- The proposed walkway goes down the 10th fairway which would create a health and safety concern with wayward balls.

Submitter Number: 219 **Submitter:** Bruce Cooke

Point Number 219.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- The proposal will meet a demand from sport flyers for residential properties that suit the aviation lifestyle and provide additional specialist housing.
- It will create a community and become a key regional asset.
- The airfield is a critical facility for the sport flying movement in the Waikato and greater NZ.
- In order to be viable and secure on an ongoing basis, the proposed development must proceed.

Point Number 219.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark, as notified.

Decision Reasons:

- The proposal will meet a demand from sport flyers for residential properties that suit the aviation lifestyle and provide additional specialist housing.
- It will create a community and become a key regional asset.
- The airfield is a critical facility for the sport flying movement in the Waikato and greater NZ.
- In order to be viable and secure on an ongoing basis, the proposed development must proceed.

Point Number	226.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter owns a hangar and aircraft at Te Kowhai Aerodrome. • It is an excellent, well run and operated facility • The submitter would be interested in living at the airpark. 		

- It is an excellent meeting place for like minded people and is proving an asset to the local community e.g. market days, vintage car groups and so on.

Point Number 226.2

Summary of Decision Requested: Retain Chapter 27 - Te Kowhai Airpark Zone as notified.

Decision Reasons:

- The submitter owns a hangar and aircraft at Te Kowhai Aerodrome.
- It is an excellent, well run and operated facility
- The submitter would be interested in living at the airpark.
- It is an excellent meeting place for like minded people and is proving an asset to the local community e.g. market days, vintage car groups and so on.

Submitter Number: 227

Submitter: Geoffrey Gatenby

Point Number 227.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The airpark is essential for residential housing for the growth of the area.
- Changes to the Obstacle Limitation Surface are essential to allow for future aviation operations and development.

Point Number 227.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The airpark is essential for residential housing for the growth of the area.
- Changes to the Obstacle Limitation Surface are essential to allow for future aviation operations and development.

Submitter Number: 228

Submitter: Richard Gardner

Point Number 228.1

Summary of Decision Requested: Amend the zoning of 21A, 111, 113, 115, 121, 129 and 131 Harrisville Road, Tuakau from Residential Zone to Rural Zone.

OR

Add measures to ensure the ongoing operation of the Pukekohe Motocross Club's facilities at 115 Geraghty Maber Road by managing surrounding residential development such as through the following methods:

- Requirements for acoustic insulation
- Additional noise control standards
- 'No complaint' covenants are placed on any new titles created in the rezoned land.

Decision Reasons:

- Keeping the land zoned Rural would provide for a limited range of housing and occupation to a degree that would not compromise the use of the club's facilities and its operation.
- The motocross club and its facilities/track have consent to operate from the site subject to appropriate conditions.
- If the immediately adjoining land is rezoned to Residential, which allows one house per 450m², then residential development will result in noise complaints about the club's activities.
- There are numerous examples in NZ where legitimately established noisy recreational activities have been forced to either close down or have their activities curtailed due to intensification of residential activities on adjoining properties.
- The club has been using this site for a long period of time and have upgraded the site and its facilities to a very high standard which is recognised both at a regional and national level.
- While the proposed district plan sets noise limits for activities in both the Rural and Residential zones, these standards will not protect the on going use of the club's activities from noise complaints etc.
- Controls such as acoustic mitigation to new residential houses and requiring 'no complaints' covenants have been routinely used by Auckland Council (e.g. air noise corridors) and by Franklin District Council when providing for residential development to occur around Buckland Village close to the Pukekohe Race Track.

Submitter Number: 229

Submitter: Stuart Parker

Point Number 229.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The submitter is a regular user of the airfield facilities.
- It provides a easily accessible 'hub' for pilots in the Hamilton area.
- The submitter would not want to see it whittled away by urban development encroaching around it.
- It is a jewel in the aviation world - very few places like it to fly into.

Point Number 229.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The submitter is a regular user of the airfield facilities.

- It provides a easily accessible 'hub' for pilots in the Hamilton area.
- The submitter would not want to see it whittled away by urban development encroaching around it.
- It is a jewel in the aviation world - very few places like it to fly into.

Submitter Number: 230 **Submitter:** Patricia Gutry
On behalf of: Waikare Golf Club Inc.

Point Number 230.1
Summary of Decision Requested: Delete proposed walkway shown on the planning maps at Waikare Golf Club, 66 Waerenga Road, Te Kauwhata.

- Decision Reasons:**
- The proposed walkway would impact on at least three fairways and is a health and safety issue.
 - It would be impossible and costly to change the layout of the course.
 - The walkway from Waerenga Road would take out considerable car parking spaces (see photos attached to the submission). The only alternative parking would be around the school gates on Waerenga Road which is a health and safety issue for students.

Submitter Number: 231 **Submitter:** Michael Francis Wells
On behalf of: Lana & Michael Wells

Point Number 231.1
Summary of Decision Requested: Delete Historic Heritage item from 1 Old Taupiri Road, Ngaruawahia (Lot 1 DP 31559).

- Decision Reasons:**
- Inaccurate to list the building as a historic heritage item.
 - There are many renovations which have altered the building including:
 - 3 windows and a set of French doors.
 - All roofing has been replaced including the verandah as have the verandah decorative brackets
 - Weatherboards have been replaced as have other parts of exterior wooden ware
 - Removal of a back porch, two new entrances added.
 - Internal walls and rooms removed (in the vicinity of what is now the dining/kitchen area)
 - New laundry/bathroom/toilet (previous long drop and outside laundry/woodshed with copper and tubs),
 - Foundations re-blocked and in some instances renewed.
 - When purchased the property was in a state of disrepair. Over many years & hours of work the submitter has managed to resurrect the property to its present state.
 - The submitter doesn't agree with the process. Having spoken to people with these properties it seems to have the opposite effect of what it is trying to achieve and results in a state of disrepair.
 - The submitter has owned the property for forty years and would have significantly altered its structure by now if they were going to.
 - A granny flat has been constructed on site which is located to the left hand side and to the rear of the existing house so as not to detract from its appearance.
 - The submitters plans are to leave the property to our family.
 - The submitter understand why we should have restrictions imposed upon them.
 - As a family the property has significant fond memories.
 - The submitter is concerned that the council does not contribute to the repair and maintenance, yet tells landowners what the can and cannot do to maintain it.

Submitter Number: 232 **Submitter:** Mark Mathers

Point Number 232.1
Summary of Decision Requested: No decision sought (annotated map of proposed Significant Natural Area at 536 Wainui Road Raglan, photos and video footage provided).

- Decision Reasons:**
- No reasons stated.

Point Number 232.2
Summary of Decision Requested: Retain the proposed Country Living Zone for the property at 536 Wainui Road, Raglan.

- Decision Reasons:**
- No reasons stated.

Submitter Number: 233 **Submitter:** Trena Marshall

Point Number 233.1
Summary of Decision Requested: Add to Schedule 30.2 Notable Trees, the Puriri Tree at the southern boundary of 124 Greenslade Road, Raglan.

- Decision Reasons:**
- Huge puriri tree on southern boundary of the property at 124 Greenslade Rd, Raglan (beside Lot 37, DPS 149 Greenslade Road Reserve) being 3.5 metres around the base of its trunk before the trunk divides into two stems.
 - The tree is healthy and is a home / landing bay / feed patch to many species of native birds.
 - Unsure of crown measurement; experts would need to look at it.

Submitter Number:	234	Submitter:	Gaynor & Colm Tierney
Organisation:	Glendine Ltd		
Point Number	234.1		
Summary of Decision Requested:	Delete walkway/cycleway/bridleway along the Waipa River.		
Decision Reasons:	<ul style="list-style-type: none"> This entire area floods at least 4-5 times per year. The water from the Waipa River goes over the flood banks and completely submerges all 3 farms that encompass the area for the walkway proposed. This is completely impractical and will require constant upkeep of the walkways and constant closures. 		
Submitter Number:	235	Submitter:	Phyllis Luders
On behalf of:	P.M. Luders Family Trust		
Point Number	235.1		
Summary of Decision Requested:	Delete the Significant Amenity Landscape on the planning maps from the property at 758 Mangapiko Valley Road, Ohinewai.		
Decision Reasons:	<ul style="list-style-type: none"> For the vast majority of the farm, Rule 22.2.3.4 is far too restrictive. As there are more than 1000m of tracks in one paddock (bush paddock), Rule 22.2.3.4 would prevent maintaining tracks to a safe standard. 		
Point Number	235.2		
Summary of Decision Requested:	Delete Significant Natural Areas from planning maps OR Add reason why they are deemed Significant Natural Areas AND Provide provisions to the effect that Waikato District Council will fund any fencing/pest control that may be required in the future and agree to give in return one additional title per Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Submitter Number:	236	Submitter:	Colin Willats
Point Number	236.1		
Summary of Decision Requested:	Delete walkway/cycleway/bridle way from Waikare Golf Course at 66 Waerenga Road, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> The Golf Club will lose the use of the 10th, 11th, 15th, 16th and driveway car park. The Club will be open to damage by bikes, dogs and vehicles. Walkers open to being hit by stray golf balls. 		
Submitter Number:	237	Submitter:	Stuart Parker
Organisation:	Recreational Aircraft Association (RAANZ)		
Point Number	237.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> The Recreational Aircraft Association NZ represents 750 microlight pilots from around NZ. Te Kowhai airfield is a key hub for pilots transiting through the Waikato, and has a long history in microlight aviation. The Submitter wishes to preserve it as an aviation centre and avoid any restrictions due to urban encroachment. 		
Point Number	237.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> The Recreational Aircraft Association NZ represents 750 microlight pilots from around NZ. Te Kowhai airfield is a key hub for pilots transiting through the Waikato, and has a long history in microlight aviation. The Submitter wishes to preserve it as an aviation centre and avoid any restrictions due to urban encroachment. 		
Submitter Number:	238	Submitter:	Christine Willats

Point Number	238.1
Summary of Decision Requested:	Delete walkway/cycleway/bridle way from Waikare Golf Course at 66 Waerenga Road, Te Kauwhata.
Decision Reasons:	<ul style="list-style-type: none"> The following facilities will be compromised; <ul style="list-style-type: none"> - Driveway; - 10th fairway; - 11th Green; - 15th Fairway; and - 14th Boundary. A boundary or safety barrier will be required which will affect the current properties on Awanui Avenue, Blunt Road and Swan Road Developments.

Submitter Number:	239	Submitter:	Les and Leonie Higgins
Organisation:	Waikare Golf Club		
Point Number	239.1		
Summary of Decision Requested:	Delete walkway/cycleway/bridle way from Waikare Golf Course at 66 Waerenga Road, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> The proposed walkway would be very dangerous with stray golf balls. The submitters have been members of the Club for over 40 years enjoying good fellowship and golf. 90 years ago 3-4 Gentleman who had the future in mind bought the land and turned it into what it is today. To realign the golf course would be a very costly project, way out of the Club's financial hands. 		

Submitter Number:	240	Submitter:	Steve Kirkbride
Point Number	240.1		
Summary of Decision Requested:	Delete Significant Natural Area from the property at 35 Kakarariki Valley Road.		
Decision Reasons:	<ul style="list-style-type: none"> The area on the property identified as a Significant Natural Area contained gorse, privet and hawthorn and has since been cleared and planted in grass. 		

Submitter Number:	241	Submitter:	Richard Goode
Organisation:	Waikato Decorators		
Point Number	241.1		
Summary of Decision Requested:	No specific decision sought, but submission opposes Chapter 7 Historic Heritage.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		

Submitter Number:	242	Submitter:	John Evered
Organisation:	Lodge Te Marama No 186		
Point Number	242.1		
Summary of Decision Requested:	Delete Item 107 (Masonic Lodge Te Marama, No. 186 1912/16 at 18 Herschel Street, Ngaruawahia) from Schedule 30.1 Historic Heritage Items.		
Decision Reasons:	<ul style="list-style-type: none"> The decreasing membership and increasing age of members made it uneconomic for the members to maintain the property. The majority of the current membership now reside in Hamilton and the property in Herschel Street is for sale. The main interest was on the interior of the building, not the exterior. The physical structure and its exterior is just a building that housed a Lodge. The heritage status severely limits the marketability of the property to achieve a realistic sale price. There is a limited number of purchasers who would be interested in the building in its current state and that would be prepared to maintain the building. It would also limit what the purchaser could do to the interior of the building. 		

Submitter Number:	243	Submitter:	Shaun McGuire
Point Number	243.1		
Summary of Decision Requested:	Retain Section 4.1 Strategic Direction and its policies and objectives.		
Decision Reasons:			

- The submitter supports the growth direction for Tuakau.

Point Number 243.2
Summary of Decision Requested: Amend Policies 4.2.2 to 4.2.10 to enable more intensive development.
Decision Reasons:

- The policies and subsequent rules are unnecessarily restrictive for a greenfield development.
- The amendments set out in subsequent submission points will be a better fit for the strategic direction whilst still providing a quality residential character.

Point Number 243.3
Summary of Decision Requested: Amend Rule 14.11.4 NC2 for wastewater treatment plants to be a Restricted Discretionary activity for wastewater treatment plants located in the Residential Zone. If wastewater and stormwater infrastructure is not available, an engineer-designed wastewater treatment system approved by Waikato District Council's engineering department may be used.
Decision Reasons:

- Some parts of Tuakau do not have wastewater and stormwater. Many of these areas have small lots made up of multiple owners.
- The costs to install these services for small developments is prohibitively expensive.
- Engineered waste and stormwater systems are successfully servicing dwelling in this area now.
- Approval via resource consent on a Restricted Discretionary basis will allow this to continue until suitable waste and stormwater can be provided.
- Placing this as a non-complying activity will make this process unreasonably difficult to obtain approval. Restricted Discretionary is a fair category.

Point Number 243.4
Summary of Decision Requested: Amend Rule 16.3.3.1 Height - Building general to increase the maximum height of any building from 7.5m to 8.0m.
Decision Reasons:

- 8.0 metres is generally considered as the standard.
- This allows existing plans to be used reducing unnecessary extra costs for building due to redesign.
- 7.5 metres causes difficulties with standard pitched roofs.

Point Number 243.5
Summary of Decision Requested: Amend Rule 16.3.5 Daylight admission, to change the rising angle of the height control plane from 37 degrees to 45 degrees.
Decision Reasons:

- The proposed height control plane is too restrictive to build a two-storey dwelling on a 450m² site.
- It makes it difficult to provide acceptable living space in the upper levels of the dwelling.
- More common is 45 degrees, and 55 degrees on the north face. This suits the roof design of 45 degrees pitch.

Point Number 243.6
Summary of Decision Requested: Amend Rule 16.4.1 (a)(ii) Subdivision - General, to read as follows:
(ii) Proposed lots must be able to connect to public-reticulated water supply and wastewater, if they are available, otherwise a engineer designed waste water and stormwater disposal system acceptable to the Waikato District Council engineering department may be used.
Decision Reasons:

- Some areas in Tuakau have limited wastewater and stormwater reticulation.
- There are many small individually owned lots. The costs to install infrastructure for smaller lots is prohibitively expensive.
- This would make the subdivision of these lots not viable.
- Allowing modern engineer designed wastewater and stormwater systems can adequately dispose of the wastewater and stormwater on site as is being used successfully in the area presently.

Point Number 243.7
Summary of Decision Requested: Delete Rule 16.4.1 (a)(iv) Subdivision - General.
Decision Reasons:

- Due to the existing infrastructure and previous planning in place, this rule is inappropriate and unnecessarily restrictive for subdivision in Tuakau.
- The historic pattern of sections lend themselves well to subdivide in approximate half to provide 2 sections over 450m² with a right of way to a rear site. This would mean most lots created would be a rear site. This rule would prevent this.
- Tuakau in these older area with existing 101 | m² section is different to subdividing large open areas of farm land because certain infrastructure already exists.

Point Number 243.8
Summary of Decision Requested: Delete Rule 14.11.4 (xix) Non-Complying Activities.
Decision Reasons:

- In the Residential Zone where reticulated wastewater is not available, this prevents being able to provide adequate alternative solutions to disposing of wastewater.

Submitter Number: 244

Submitter:

Garth and Sandra Ellmers

Point Number 244.1
Summary of Decision Requested: Retain Rule 16.1.2 P3 Permitted Activities A new retirement village or alterations to an existing retirement village.
Decision Reasons:

- More appropriate to have retirement villages in residential zones.

Point Number 244.2
Summary of Decision Requested: Amend Rule 16.1.2 P3 (a) Permitted Activities, to reduce the minimum area required for a retirement village in Raglan from 3ha to 1ha.

Decision Reasons:

- Raglan has very little flat land and retirement villages and facilities needs to be built on flat land to allow easy access. It is unlikely that there would be any area in Raglan of 3ha in which to develop a retirement village.
- The Ryman retirement village and complex in Gisborne consists of a three level apartment block with one level duplex units.
- The 3ha requirement should be reduced to 1ha to encourage and enable more retirement housing, especially when there is a dire shortage in Raglan.
- Attractive and functional retirement complexes are commonly developed on relatively small areas of land.
- There appears to be no valid reason for a minimum area of 3ha. 3ha is a huge area of land and would be difficult to find in most residential areas and expensive to purchase.
- This would necessitate demolishing existing properties in city areas.
- This is not practical or workable.

Point Number 244.3
Summary of Decision Requested: Amend Rule 16.1.2 (f) Permitted Activities to increase the maximum building height to allow for three level retirement developments.

Decision Reasons:

- Most apartment complexes for the incapacitated elderly are three levels.
- Setting a maximum building height of 8m would not allow three levels.
- The elderly feel secure in a unit or apartment that is easily accessible and close to staff and other residents.
- Helps reduce purchase costs for residents and development costs for providers.

Point Number 244.4
Summary of Decision Requested: Amend Rule 16.1.3 RD1 (c) Restricted Discretionary Activities, to decrease the minimum site area required for duplexes to 200m².

Decision Reasons:

- The minimum net side area of 300m² for a duplex residential unit of land is too large.
- The trend for new developments in Australia is for smaller residential and duplex lot sizes.
- The average age in most western countries is steadily rising.
- More people live alone and most do not want large lots and can often not afford to maintain them.
- People are busy and most do not want to spend time maintaining gardens and land, especially if they do not use them.
- The trend in Australia for small homes and duplexes is to have a small outdoor dining at the rear of their dwelling.
- Smaller lot sizes are very popular and very common in Australia, are most attractive once developed and allow development that is more intensive closer to cities.
- The small lots offer a lower cost entry level for sole home occupants or couples, which is they are so popular.
- Housing is fast becoming unaffordable for many people
- Making it possible for single people and couples to live in a new, modern, private, well designed, small home should be the aim of all councils as it would fill a desperate need and provide suitable dwellings for a large number of people who would otherwise not be able to afford them
- A well-planned duplex home on a small lot is preferable to living in an apartment.

Point Number 244.5
Summary of Decision Requested: Amend Rule 16.1.3 RD1 (e) Restricted Discretionary Activities, to increase the maximum site coverage to 60%.

Decision Reasons:

- To allow for homes and duplexes to be built on smaller lots
- 300m² minimum is not required for small duplexes
- Site coverage would need to be increased to 60% to allow for a reasonably sized home with 2 bedrooms and a garage on a 200m²-250m² duplex site.

Point Number 244.6
Summary of Decision Requested: Amend Rule 16.1.3 RD1 (h) Restricted Discretionary Activities, to reduce the minimum living court area for studios and 1 bedroom units to 20m.

Decision Reasons:

- The trend is heading towards smaller lots and homes
- Most people, especially the elderly do not require or want to maintain large outdoor living areas and can purchase larger lots if they do
- There must be provision for those who do not want large sections or cannot afford or maintain large dwellings and sections
- There is no need to have such a large living court area imposed, especially when most small dwellings and apartments are only occupied by 1-2 people

Point Number 244.7

Summary of Decision Requested: Amend Rule 16.1.3 RD1 (h) Restricted Discretionary Activities, to reduce the minimum living court area for 2 bedroom units to 25m2.

Decision Reasons:

- The trend is heading towards smaller lots and homes
- Most people, especially the elderly do not require or want to maintain large outdoor living areas and can purchase larger lots if they do
- There must be provision for those who do not want large sections or cannot afford or maintain large dwellings and sections
- There is no need to have such a large living court area imposed, especially when most small dwellings and apartments are only occupied by 1-2 people.

Point Number 244.8

Summary of Decision Requested: Amend Rule 16.1.3 RD1 Restricted Discretionary Activities, to reduce first level and second level apartment minimum living court areas to 6m2.

Decision Reasons:

- There is a need to recognise that the trend and requirement is for dwellings
- Most people, especially the elderly do not require or want to maintain large outdoor living areas and can purchase larger lots if they do
- There must be provision for those who do not want large sections or cannot afford or maintain large dwellings and sections
- There is no need to have such a large living court area imposed, especially when most small dwellings and apartments are only occupied by 1-2 people
- In apartment complexes, due to the close proximity between neighbors it is not desirable to have large outdoor living areas especially on upper levels as it can be dangerous (especially for elderly occupants) can create a noise problem for adjoining residents if too many people socialize on the lower and/or upper balconies
- Small apartments do not require large living court areas so they should be reduced to provide for those who do not require them
- Market forces dictate and people should have a choice.

Point Number 244.9

Summary of Decision Requested: Amend Rule 16.3.3.1 P1 Height - Building general, to increase the maximum building height from 7.5m to 8.5m.

Decision Reasons:

- Residential buildings in subdivisions have become very generic in the past 10-15 years
- These restrictions have led to mundane residential design
- If someone wants to build a two level home with a higher pitched roof they should be able to providing the building complies with the height to boundary rules
- Two level homes occupy less site coverage and open up view shafts for the adjacent homes and particular for the homes located to the rear
- Setting unnecessary height restrictions for residential homes is not conducive to good design.

Point Number 244.10

Summary of Decision Requested: Amend 16.4 4(a)(iv)Subdivision - Multi-unit development, to decrease all proposed minimum unit areas for multi-unit developments as follows:

1. Studio and 1 Bedroom units decrease from 60m2 to 50m2
2. 2 Bedroom units decrease from 80m2 to 70m2
3. 3 Bedroom units decrease from 100m2 to 80m2

Decision Reasons:

- There is little recognition in the Waikato District Plan that units and dwellings worldwide are downsizing.
- Due to the high cost of land and building and borrowed deposits required for a home, the result is that a very large number of people are locked out of home ownership.
- There must be options within a district plan to provide for smaller homes and units' that people can afford and there is not.
- Often units only have one permanent occupant, regardless of the size of the unit.
- 100m2 is a very large unit and larger than many standard homes so seems excessive and well outside the standard in most cities multi-unit developments
- If people require larger units they can purchase them but the option should be there to purchase units of various sizes.

Point Number 244.11

Summary of Decision Requested: Amend Rule 16.4.12 (a)(i) Subdivision – Building Platform, to decrease the circle diameter building platform minimum from 18m to 14m.

Decision Reasons:

- To reflect and allow for the requirement for smaller dwellings and lots.
- Often lots are small, have a variable contour or shape so it is difficult to accommodate the proposed minimum platform requirements when designing a subdivision.
- Decreasing the minimum building platform will allow more sites to be built upon.

Point Number 244.12

Summary of Decision Requested: Amend Rule 16.4.12(a) (ii) Subdivision – Building Platform, to decrease the minimum dimension of a rectangle building platform from 200m2 to 160m2.

Decision Reasons:

- To reflect and allow for the requirement for smaller dwellings and lots.

- Often lots are small, have a variable contour or shape so it is difficult to accommodate the proposed minimum platform requirements when designing a subdivision.
- Decreasing the minimum building platform will allow more sites to be built upon.

Point Number 244.13

Summary of Decision Requested: **Amend** Rule 16.4.11 (a) Subdivision – Road frontage, to decrease the width of the road boundary from 15m to 14m.

Decision Reasons:

- The requirement for smaller homes and lots must be accommodated for in the District Plan.
- The submitter has had experience in developments in Perth and very tasteful homes are being developed with a road frontage width of 12m. The homes are specifically designed to suit narrower sites and the design and usability of the home is not compromised.
- Smaller sites allow more efficient use of often limited available land in city areas and there is a demand for them.
- Single occupant homes are now very common so it must be possible to build affordable small homes on small lots.

Point Number 244.14

Summary of Decision Requested: **Amend** Rule 16.3.5 P1 Daylight admission, to reduce the height control plane angle to be more in line with other NZ councils – a relaxation of the control plane angle when a proposed building is not adjacent to residence on one or more boundaries for example, lots adjoining public walkways, public parks, road, rear driveways, reserves etc.

Decision Reasons:

- The District Plan height control plane angle is onerous, out of kilter with other councils
- To reflect individual applications and boundary situations
- It leads to mundane residential designs
- In many cases is not needed due to buildings not having another home on adjacent boundaries
- If no other residence is affected, the control angle should be reduced.

Point Number 244.15

Summary of Decision Requested: **Amend** Rule 16.3.6 P1 Building coverage, to increase building coverage for homes from 40% to 50%.

Decision Reasons:

- The worldwide trend is for smaller lots due to costs
- Smaller lots are usually the first to sell
- The pace of life is much faster now
- Children do not play or use outside areas as much these days and often prefer to socialise away from their homes or undertake inside activities
- Homes now often cater for adult children who remain living with their families well into adulthood due to the high cost of renting or buying their first home so many homes are need 4-5 bedrooms and additional living areas
- Most people do not want large lawns or gardens anymore
- Very few homes in most cities in the western world would have the luxury of 60% their site being garden and not want it
- Many homeowners want media rooms, garages etc. but not large gardens or large lawns.
- Most states in Australia now allow much higher site coverage for homes to cater for the trend towards larger homes on smaller sections
- Land costs and developments costs have substantially increased over the past ten years and are likely to continue increasing.

Point Number 244.16

Summary of Decision Requested: **Amend** Rule 16.3.7 P1 (a) Living court, to decrease the minimum area for a dwelling to 60m² and a minimum dimension of 3m in any direction, and when located on a balcony of an above ground apartment, decrease the minimum area to 6m² and a minimum dimension of 1.5 in any direction.

Decision Reasons:

- The trend in most western residential areas is for smaller lots and smaller houses
- Children do not play outside nearly as often as they used to and inside activities seem to be preferred, particularly with the massive growth and popularity of social media
- Adult family members prefer using media rooms or having multiple inside living areas and often an office
- More time is being spent inside the home and this will continue
- Decreasing the minimum areas for living courts will not result in wholesale movement away from large gardens but would allow larger homes to be built on some of the lots available for sale
- Apartments do not need large outside living court areas – unless balconies are on the Northside of the building, they are seldom used
- If people do not want large living court areas they can buy a unit or apartment with a large outdoor living court if they choose – there is no need to regulate large living court areas
- The market will decide what they want and should have the option of choice
- Most people prefer more area inside their homes, not outside.

Point Number 244.17

Summary of Decision Requested: **Retain** Rule 16.3.9.1 P1 (a) Building setbacks – All boundaries, as notified.

Decision Reasons:

- The current 6m setback is unworkable, particularly in the Raglan area
- Most land zoned for residential housing in much of the Waikato, particularly Raglan, is undulating with many lots being steep and often difficult to access.
- As a result of the rules in the Operative Plan it was almost impossible for many homes in the district to be built with a 6m setback from the road so dispensations had to be applied for which causes many time delays in the processing of consents and unnecessary cost

increases

- Any rule that is clearly not workable for much of the terrain in our district should be changed
- If so many dispensations need to be applied for then it is proof that a rule needs to be amended
- Homes built closer to the road are more secure so this should be allowable and encouraged
- Homes built closer to the road allow for a larger area behind the home for recreation, which is much safer than having children play in front of the home, on driveways and near the road.

Point Number 244.18

Summary of Decision Requested: **Amend Rule 16.4.4(a)(iii) Subdivision - Multi-unit development, to decrease minimum lot size per unit for multi-unit developments from 300m2 net site area to 200m2.**

Decision Reasons:

- Raglan is a popular holiday destination with a shortage of accommodation of a good standard.
- A large number of homes have converted their garages and sheds into sleep-outs which they rent out or rent rooms within their homes. These private dwellings often do not comply with many of the building or fire standards.
- In many ways Raglan is similar to what Mount Maunganui was about 40 years ago and has now become a sort after tourism destination
- The Waikato District Plan must allow for continued growth in tourism and unit development is sorely needed to provide short and medium term accommodation, especially in the township area.
- The 300m2 minimum site area per unit is limiting and will increase the development costs, especially in areas close to the township.
- In other holiday areas multi units can be built with a 100m2 net site area so 300m2 seem excessive.

Submitter Number: 245 **Submitter:** Aaron Mooar

Point Number 245.1

Summary of Decision Requested: **Amend the zoning of Raglan Aerodrome (Designation M51) from Rural Zone to Reserve Zone.**

Decision Reasons:

- The aerodrome is suitable for sports activities.
- The site is dry during winter, while other sites are underwater and unusable.
- The submitter acknowledge issues around the double use of this site but when it is being used for non-aerodrome activities council can issue a 'notam' to alert aircraft not to land during recreational uses (as happens currently).
- There is minimal flat dry land in Raglan for recreation activities.
- The aerodrome is used for public events (a resource consent is required every time).
- This is the most cost effective solution to resolve issues facing football in Raglan.
- Refer to submission for technical reports.

Point Number 245.2

Summary of Decision Requested: **Add a Special Character Zone in the Raglan Community Board Area, with allowance for precincts with varying standards and include the following:**

- Ensure any new construction proposals in Raglan that exceed rules are publicly notified i.e. no discretionary option;
- The Housing NZ 'Simple guide for urban development' should form the basis for the Special Character zone expectations (attached to the submission),
- Descriptive and enabling approach be taken to regulating within Zone rather than prescriptive;
- Raglan Town Centre design guide should be incorporated in approach;
- Qualities such as Raglan's diverse built environment, diverse culture, individual expression, relaxed and informal environment, having no multi storey buildings, pedestrian and bike friendly environment, water views, small population and the wild should be recognised;
- Raglan Naturally document currently being re-written be an essential reference guide for decisions made in the Raglan Special Character Zone;
- Holiday accommodation such as Airbnb or Bookabach rentals in the Special Character Zone be properly regulated in terms of minimum standards and proportion of housing stock used; and
- Introduce a Bed tax to pay for infrastructure needed to handle visitor load.
- Build worker accommodation.

Decision Reasons:

- Raglan community wishes to preserve natural character of township - both built and cultural environment.
- Community has recently expressed frustration with the use of the Discretionary option by Planners.
- Prescriptive approach too restrictive and does not allow for diversity in the built environment which is a key characteristic of Raglan.
- Preserve qualities that Raglan community value.
- The Raglan Naturally document is the most thorough assessment of Raglan's community values and wishes.
- Raglan currently has a 12-13% rate of houses appearing on Airbnb.
- Raglan's infrastructure issues are well documented, including in council reports.
- Not possible for the ratings base in Raglan to fund infrastructure required for peak tourist season.
- Not fair for the Waikato District ratepayers to fund infrastructure used by visitors from other areas.
- Airbnb agrees a bed tax is a good idea.
- Raglan business owners complaining their staff cannot find accommodation, making it harder to find staff.

Point Number 245.3

Summary of Decision Requested: **Add a resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social well-being considerations.**

Decision Reasons:

- Environmental damage caused by Genetically Modified Organisms can be dealt with under the RMA.
- Genetic Engineering will harm our clean green image.
- There should be no further development and field testing of transgenic organisms.
- Supports adopting the precautionary principle.

- Genetically Modified Organisms have irreversible significant adverse impacts.

Point Number 245.4

Summary of Decision Requested: **Add** strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- To ensure a consistent approach across Northland, Auckland and the Waikato.
- To eliminate cross boundary issues.
- Environmental damage caused by Genetically Modified Organisms can be dealt with under the RMA.
- Genetic Engineering will harm our clean green image.
- There should be no further development and field testing of transgenic organisms.
- Supports adopting the precautionary principle.
- Genetically Modified Organisms have irreversible significant adverse impacts.

Point Number 245.5

Summary of Decision Requested: **Amend** the Proposed Waikato District Plan to require consents which are exempt from plan rules to be automatically publicly notified whether rules are on Genetically Modified Organisms or any other matter.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- Environmental damage caused by Genetically Modified Organisms can be dealt with under the RMA.
- Genetic Engineering will harm our clean green image.
- There should be no further development and field testing of transgenic organisms.
- Supports adopting the precautionary principle.
- Genetically Modified Organisms have irreversible significant adverse impacts.

Point Number 245.6

Summary of Decision Requested: **Amend** the zoning of property 2008178 (Primrose Street, Raglan) currently zoned Recreational in the Operative District Plan to allow for development of a planted stormwater filtration system.

Decision Reasons:

- Water quality is important to Raglan community.
- Site has been earmarked for football, but Raglan Football does not support the relocation.
- Raglan football club has requested not to shift the sport to this location.
- See RFC submission (to this district plan process) about use of other areas in Raglan for football.

Submitter Number: 246

Submitter: Tony Oosten

Point Number 246.1

Summary of Decision Requested: **Amend** Rule 14.11.1 Permitted Activities to require new subdivision stormwater systems for Raglan to have swales and other technology to bring the quality of stormwater up to a standard such that its additive impact to the existing stormwater quality is maintained or improved at the point of connection.

Decision Reasons:

- No reasons provided.

Point Number 246.2

Summary of Decision Requested: **Delete** the ability for Council to apply discretion if applications are not notified.

Decision Reasons:

- To stop development that goes against the district plan permitted activity and sets precedence for future requests. An example is the Raglan Wainui Road development.

Point Number 246.3

Summary of Decision Requested: **Amend** Appendix 29:6 Biodiversity Offsetting so that the use of biodiversity offsets is the last resort and the area is 200% of the impacted area.

Decision Reasons:

- Biodiversity offsets are not equivalent in quality to the original existing areas of biodiversity as it is impossible to replicate the exact geological and climatic conditions as well as relocate all species of flora and fauna.

Point Number 246.4

Summary of Decision Requested: **Amend** Appendix 10.1 (Raglan Town Centre) to:

- Include Raglan town center character statements:
 - Enhance the pedestrian-friendly boulevard by de-prioritizing vehicular traffic;
 - Control development of buildings on either side of the Historic Harbour View Hotel to 2 storeys maximum;
 - Expand to 3 storey while maintaining the ground floor shop and verandah frontage and protection of the Harbour View stance

Decision Reasons:

- The Raglan Town Center is defined by its pedestrian-friendly boulevard and actions must be taken to enhance this.
- The clear stance of the Historic Harbour View Hotel in the streetscape needs to be maintained and potentially enhanced.

Submitter Number:	247	Submitter:	Kylie Escott
Point Number	247.1		
Summary of Decision Requested:	Retain the Residential Zone for the property at 7 Dromgools Road, Tuakau, as notified and the Residential Zoning on the Tuakau Planning Maps.		
Decision Reasons:	<ul style="list-style-type: none"> • Need for more residential sections. • Proximity to both primary and secondary schools and sporting and recreational areas. • Proximity to wastewater disposal, ease of roading construction. 		

Submitter Number:	248	Submitter:	Sharon Leigh
Point Number	248.1		
Summary of Decision Requested:	Amend the zoning of the property at 525 Horotiu Road, Te Kowhai, as well as its boundary properties to remain as Country Living Zone (Operative District Plan zone).		
Decision Reasons:	<ul style="list-style-type: none"> • The land has only just changed to Country Living Zone from Rural Zone, which the submitter was opposed to. • Allowing smaller lots to be cut off completely changes the country lifestyle the submitter purchased for in the first place. • The area has a high water table and drainage issues and is unsuitable for subdivision smaller than 5000m2. • The high volume of water running through the road drain with no houses yet built in the new subdivision behind the submitters' property has already destroyed the crossing and floods regularly in winter. • The drain in parts is also taking out the bank and has subsided back to the fence line where there was originally around 3 feet clearance. With the extra run off when houses get built there are likely to be some major issues. 		

Submitter Number:	249	Submitter:	Anton Marais
Point Number	249.1		
Summary of Decision Requested:	Amend the title for the "Country Living Zone" for a more commonly used term such as "Rural Residential", "Low Density Residential", or "Rural Settlement Zone".		
Decision Reasons:	<ul style="list-style-type: none"> • The Council should be seeking opportunities to align the Proposed Plan to the developing Draft National Planning Standards. • The Council should use terminology that is more commonly used across the country. • Country Living Zone is a legacy name and this is an opportunity to align with the future. 		
Point Number	249.2		
Summary of Decision Requested:	Amend the title for the "Village Zone", to use a more descriptive term such as "Rural Residential", "Residential Low Density", "Residential Large Lot" or similar.		
Decision Reasons:	<ul style="list-style-type: none"> • The "Village Zone" is not used elsewhere in New Zealand (to submitters knowledge). • "Village Zone" is not suggested in the draft National Planning Standards, and unlikely to be included. • The zone name does not describe the intended land use nor the intended form or feel of the zone. The naming of the zone should describe the activities, land uses, and intended street-scape one would expect, and the name does not describe these areas, the connotation is very unlike what the actual zone is like. • It is difficult for people to describe their property when it is being sold if a buyer is not familiar with the location and the house for sale is in a "Village Zone". • It is not an accurate description of the neighboring property nor the density and lot sizes a person would expect when they hear the term "Village Zone". The description of the property will match buyer/seller expectation of the zone description. • Zoning has a big impact on property valuations and when the name is not consistent with other zone names and types the valuation is not as easily standardized. • Aligning the name to something more commonly used will help people understand what the zone means. • Names such as Rural Residential, Large Lot Residential, or Residential Low Density, would enable a person on the street to know what the intention of the zone is and what it means for their property. 		

Submitter Number:	250	Submitter:	John Cunningham
Point Number	250.1		
Summary of Decision Requested:	Amend the zoning of the property at 102 Travers Road, Te Kauwhata, to remain as Country Living Zone (Operative District Plan zoning).		
Decision Reasons:	<ul style="list-style-type: none"> • Continuous Country Living Zone down from Moorfield Road • The environmental overlay surrounding the drain is flood prone and in winter gives poor drainage. Country Living gives more permeable surface and therefore reduced watershed to adjacent properties. • The amenity of the area will be maintained by the Country Living zoning. • The Lakeside development provides a new area for residential living and takes the pressure off conversion of current Country Living to Residential Living. 		

Submitter Number:	251	Submitter:	John Cunningham
Organisation:	Aparangi Retirement Village Trust		

Point Number	251.1
Summary of Decision Requested:	Amend the Proposed District Plan to enable mixed use of commercial and residential on Waeranga Road, Te Kauwhata.
Decision Reasons:	<ul style="list-style-type: none"> • Te Kauwhata is a growth node for North Waikato and will need more commercial street frontage in the future. • Mixed commercial/residential use of the Aparangi street frontage on Waeranga Road will future-proof the land use.
Point Number	251.2
Summary of Decision Requested:	Amend the Proposed District Plan to provide smaller section sizes for retirement villages.
Decision Reasons:	<ul style="list-style-type: none"> • Smaller section sizes, down to 225m2 will give better land utilization for the current Aparangi village. • It will allow clusters of "mini-houses" which is a popular retirement village layout overseas and will come to New Zealand to give greater flexibility for independent living.
Point Number	251.3
Summary of Decision Requested:	Amend the Proposed District Plan rules to enable retirement villages in Country Living and Rural Zones.
Decision Reasons:	<ul style="list-style-type: none"> • Aparangi could expand into Rural or Country Living in the future. If rules are in the District Plan, that will provide for expansion without the need for private plan changes.
Point Number	251.4
Summary of Decision Requested:	Amend the rules to remove the requirement for a retirement village to be within 400m of public transport and replace with <u>must have transport to take people to shops and connect with public transport.</u>
Decision Reasons:	<ul style="list-style-type: none"> • Public transport is not frequent in rural towns and villages.

Submitter Number:	252	Submitter:	Heather Andrews
Point Number	252.1		
Summary of Decision Requested:	Delete Rule 22.3.6 Building coverage. OR Amend Rule 22.3.6 P1 (a)(ii) Building coverage from 500m2 to at least 750m2.		
Decision Reasons:	<ul style="list-style-type: none"> • The main reason for buying a rural block is to have room to build a good house and have a shed as well. If a person wants to cover more than 500m2 they will be compelled to buy a block in excess of 3ha and have excess land that they may not have wanted. • It will make blocks of less than 3ha worth less and encourage subdivision of larger blocks, which is a waste of land. • It is not unusual for a good house to be in excess of 500m2 these days. 		

Submitter Number:	253	Submitter:	Jasmine Hunter
Point Number	253.1		
Summary of Decision Requested:	Add a Special Character Area for Raglan, with a focus on the following qualities: <ul style="list-style-type: none"> • Diverse buildings and people • Relaxed • No multi-story buildings • Enabled Individual expression • Pedestrian friendly • Bike-friendly • Water views • Human-Scale Buildings • Wild Coast OR Amend the District Plan to require any building activity that does not comply with the District Plan in Raglan to be publicly notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Raglan's special character is eroding and there should be better protection of that character. • There is a need to preserve the quaintness, uniqueness and the kaitiakitanga the Raglan iwi and greater community have. • Needed so that Raglan does not resemble other holiday towns that only cater for holidaymakers. • There needs to be a stronger focus on the sensitivity to character of the CBD area. • The controversy over the recent approval and waivers for an apartment block on Stewart Street highlights the lack of focus within the District Plan. • The District Plan needs strengthening and making the driver of development. 		
Point Number	253.2		

Summary of Decision Requested:	Amend the Proposed District Plan to increase regulation of holiday houses.
Decision Reasons:	<ul style="list-style-type: none"> The submitter does not want to see people struggling to find a home.

Submitter Number:	254	Submitter:	Michelle Levy
Point Number	254.1		
Summary of Decision Requested:	Amend the District Plan to require public notification of any building activity that does not comply with the District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> To ensure the special character of Whaingaroa is protected with no multi-storey developments. To ensure access to green spaces and natural resources such as beaches and bush are freely accessible and available for all to enjoy. To ensure development keeps pace with the infrastructure available. 		
Point Number	254.2		
Summary of Decision Requested:	Add a tax on Air BnB in Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> To remove the high rate of unoccupied properties in Raglan. To ensure adequate housing is available for the permanent population via control on unoccupied housing and Air BnB accommodation. 		

Submitter Number:	256	Submitter:	Liz Shaw
Point Number	256.1		
Summary of Decision Requested:	Amend the Proposed District Plan to prevent holiday houses in Raglan overwhelming already stretched resources. Submission references Chapter 6.4 Infrastructure, Subdivision and Development.		
Decision Reasons:	<ul style="list-style-type: none"> The infrastructure cannot take the building that is happening in Raglan. 		
Point Number	256.2		
Summary of Decision Requested:	Add better protection for the character of Raglan, to prevent multi-storey buildings and condos for holiday homes and high density building.		
Decision Reasons:	<ul style="list-style-type: none"> Raglan's seaside community is being eroded by the high-density holiday accommodation that is currently being built. Long-time residents can no longer afford to live in Raglan even if they can find a rental. Concerned that Raglan's special character is being eroded. 		

Submitter Number:	257	Submitter:	Stuart Chisnall
On behalf of:	Estate of Alwynne McDonald Chisnall		
Point Number	257.1		
Summary of Decision Requested:	Delete the Significant Amenity Landscape from 275 Parker Lane, Buckland.		
Decision Reasons:	<ul style="list-style-type: none"> The site is rough pasture and has no significant landscape features. The site does not meet the criteria for Significant Amenity Landscape. The proposed Significant Amenity Landscape rules are unreasonable and restrict maintenance of significant drains which are legally required to be maintained via a caveat with the Waikato Regional Council. 		
Point Number	257.2		
Summary of Decision Requested:	Delete Rule 22.2.3.4 Earthworks - within Landscape and Natural Character Areas. OR Amend Rule 22.2.3.4 PI Earthworks - within Landscape and Natural Character Areas to change the area and volume of earthworks for Significant Amenity Landscapes.		
Decision Reasons:	<ul style="list-style-type: none"> The rule will unreasonably limit ability to maintain significant drains, specifically for drains required to be maintained under a caveat to the Waikato Regional Council. 		
Point Number	257.3		
Summary of Decision Requested:	Amend Rule 22.2.8 (P1) Indigenous vegetation clearance outside a Significant Natural Area to allow farmers to maintain productive pastures by controlling non-pasture species.		
Decision Reasons:			

- The rule unreasonably restricts the ability of farmers to maintain productive pasture in accordance with ordinary farming practices, outside Significant Natural Areas.

Submitter Number:	258	Submitter:	Georgina Roy
Point Number	258.1		
Summary of Decision Requested:	Add a Special Character Area to Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • Better protection of Raglan's special character, it is being destroyed by modern flats and holiday homes. • Respect for those who live in Raglan year-round. 		
Point Number	258.2		
Summary of Decision Requested:	Amend the District Plan to require any building activity in Raglan that does not comply with the District Plan to be publicly notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Raglan's special character is being destroyed by 'modern flats' and holiday homes, which do not fit in Raglan and create an obstruction and eyesore. • Respect for those who live in Raglan year-round. 		

Submitter Number:	259	Submitter:	Wendy Rowell
Organisation:	Pokeno Playcentre		
Point Number	259.1		
Summary of Decision Requested:	Amend Rule 16.1.2 Permitted Activities by adding child care facility as a permitted activity.		
Decision Reasons:	<ul style="list-style-type: none"> • ECE confers large benefit to the young, growing Pokeno community. • It is appropriate for ECEs to be in the Residential Zone where people live. • An ECE will not have adverse effects on residential and recreational activities. • The only zone where the proposed plan permits ECEs is the Business Zone. In Pokeno this is a very limited area where pick up /drop offs will be dangerous. • Wish to develop a site for the Pokeno playcentre, which we will lose due to the Pokeno school expansion. 		
Point Number	259.2		
Summary of Decision Requested:	Amend Rule 22.1.2 Permitted Activities by adding childcare facility as a permitted activity.		
Decision Reasons:	<ul style="list-style-type: none"> • ECE confers large benefit to the young, growing Pokeno community. • It is appropriate for ECEs to be in the Residential Zone where people live. • An ECE will not have adverse effects on residential and recreational activities. • The only zone where the proposed plan permits ECEs is the Business Zone. Submitter Number:	260	Submitter:	Vaughan Rowsell
On behalf of:	The Pam Fergusson Charitable Trust and Allen Fabrics Limited	Organisation:	OMGTech!
Point Number	260.1		
Summary of Decision Requested:	<p>Add a new zone titled 'Kimihi Lakes Recreation and Events Zone' to the planning maps.</p> <p>AND</p> <p>Amend the zoning of the parcels of land with the legal descriptions Section 3 SO 482553, Lot 1 DPS 20619, Section 1 SO Plan 60522, Allotment 740 Parish of Taupiri, Allot 857 Parish of Taupiri and Allotment 6 Paris of Taupiri from Rural Zone to the proposed Kimihi Lakes Recreation and Events Zone (see Table 6.1 within the submission for details).</p> <p>AND</p> <p>Any consequential amendments as necessary to address the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihi Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park. • The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park. • Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option. • A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc). • Waikato District Council no longer desire the use of site specific schedules within the district plan. • The adoption of specific zoning is appropriate and will achieve the sought outcome. • Excludes the existing Lake Kimihi which is owned and managed by the Department of Conservation. 		
Point Number	260.2		

Summary of Decision Requested: **Add** a new section 9.5 Kimihia Lakes Recreation and Events Zone within Chapter 9 Specific Zones containing objectives and policies specifically catering for the Kimihia Lakes Recreation and Events Zone as set out in section 4.2.2 of the submission.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognized that overlays are in relation to significant tracks of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number 260.3

Summary of Decision Requested: **Add** a new definition for "Ancillary Buildings (Kimihia Lakes Recreation and Events Park)" to Chapter 13 Definitions as follows:

Means a supporting building that is subordinate and incidental to a permitted activity undertaken in the Park, including storage units, administration and ablution facilities and clubrooms.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 260.4

Summary of Decision Requested: **Add** a new definition for "Commercial Node Areas" to Chapter 13 Definitions as follows:

Means those specified areas identified on Zone Maps in the Kimihia Lakes Recreation and Events Zone as 'Commercial Node Areas'

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 260.5

Summary of Decision Requested: **Add** a new definition for "Community Activities and Facilities (Kimihia Lakes Recreation and Event Park)" to Chapter 13 as follows:

Means in the Kimihia Lakes Recreation and Events Zone, land or building used for community activities, generally established on a not-for-profit basis, and includes buildings for educational purposes, community functions and public toilets or public rooms.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 260.6

Summary of Decision Requested: **Add** a new definition for "Operational Facilities" to Chapter 13 Definitions as follows:

Means the construction and use of facilities and/or infrastructure to assist in the day to day operation of the Kimihia Lakes Recreation and Events Parks, including but not limited to car parking, internal access, ticketing offices, storage and maintenance sheds, and helipads.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 260.7

Summary of Decision Requested: **Add** a new definition for "Outdoor Education" to Chapter 13 Definitions as follows:

Means in the Kimihia Lakes Recreation and Events Zone, land or buildings used for the formal or informal education or training and includes (but is not limited to) confidence courses.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 260.8

Summary of Decision Requested:	<p>Add a new definition for "Outdoor Pursuits" to Chapter 13 as follows:</p> <p><u>Means moving across land by non-powered means for example biking, orienteering, tramping, and horse trekking.</u></p> <p>AND</p> <p>Any consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.
Point Number	260.9
Summary of Decision Requested:	<p>Add a new definition for "Recreation Activity and Facilities" to Chapter 13 Definitions as follows:</p> <p><u>Means any non-motorised indoor or outdoor passive or active leisure, sports, entertainment, games or recreational pursuits and buildings in the Kimihia Lakes Recreation and Events Park Zone for participants and/or spectators, whether or not they are undertaken for profit or reward or for which no charge is made, and shall include such activities on or in water or land, or in the air and includes but is not limited to:</u></p> <ul style="list-style-type: none"> <u>Recreational events and activities</u> <u>Walking, running and cycling tracks</u> <u>Training or education</u> <u>Club Days and practice activities</u> <u>Organised Events and festivals</u> <u>Concerts</u> <u>Multi sport and off road running events</u> <u>Outdoor skate, parks and playgrounds</u> <u>Informal Recreation</u> <u>Tourism related activities</u> <u>Outdoor Pursuits</u> <p>AND</p> <p>Any consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.
Point Number	260.10
Summary of Decision Requested:	No specific decision sought, but the submission notes that the of the Regional Infrastructural Specifications (RITS) and the Waikato Regional Council Regional Plan will be the relevant documents for some developments in the park
Decision Reasons:	No reasons provided.
Point Number	260.11
Summary of Decision Requested:	<p>Amend the zoning of the parcels of land with the legal descriptions Allotment 746 Parish of Taupiri, Lot 20 DP 347582, Lot 21 DP 347582, Allotment 777 Parish of Taupiri and Lot 23A Section 463 Parish of Taupiri from Rural Zone to Residential Zone (See Table 6.1 of the submission for further details).</p> <p>AND</p> <p>Any consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> This area is located abutting existing Residential Zoned land and so forms a contiguous residential tract, ensuring services and infrastructure can easily be extended to the new residential area. Tunnel mining was undertaken west of the site and under the Huntly township including State Highway 1, Schools, the Power Station, the Waikato River and Riverine Lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining would not occur in this location. Residential use of the land is therefore not subject to that risk.
Point Number	260.12
Summary of Decision Requested:	Retain the Residential Zone on the parcels of land with the legal descriptions Lot 18 DP 347582, Lot 19 DP 347582, Sec 3 SO Plan 400374, Allot 515 Parish of Taupiri and Allot 789 Parish of Taupiri (See Table 6.1 of the submission for further details).
Decision Reasons:	Tunnel mining was undertaken west of the site and under the Huntly township including SH1, schools, the Power Station, the Waikato River and Riverine lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining, would not occur in this location. Residential use of the land is therefore not subject to that risk.
Point Number	260.13
Summary of Decision Requested:	<p>Add a new Chapter 29 Kimihia Lakes Recreation and Events Zone that contains rules for the Kimihia Lakes Recreation and Events Zone as outlined within section 4.2.4 of the submission.</p> <p>AND</p> <p>Any consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park. The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option. A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc). Waikato District Council no longer desire the use of site specific schedules within the district plan. The adoption of specific zoning is appropriate and will achieve the sought outcome.
Point Number	260.14
Summary of Decision Requested:	Amend Rule 14.12.1 Activity specific conditions 14.12.1.1(1)(e) relating to P1 vehicle access for all activities as follows:

(1) All activities must comply with the following vehicle access conditions:

...

(e) On a site with legal access to two roads, the activity only accesses the road with the lower classification in the road hierarchy in Tables 14.12.5.5 and 14.2.5.6 (where the roads have the same classification, access is only to the road with the lower average daily traffic movements) except in the Kimihia Lakes Recreation and Events Zone where this rules does not apply;

...

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

260.15

Summary of Decision Requested:

Add a new clause (2) to Activity-specific conditions 14.12.1.2 relating to P2 on site parking and loading as follows:

(1) All activities must comply with the following..

(2) In the Kimihia Lakes Recreation and Events Zone the above standards do not apply, providing that:

(a) A minimum of 1500 on-site parking spaces shall be provided except where activities are undertaken within the carpark area or where activity demand exceeds 1500 car parks, then the temporary alternative on-site parking shall be provided.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

260.16

Summary of Decision Requested:

Add clause (j) to Activity-specific condition 14.12.1.4(1) relating to P4 traffic generation as follows:

(1) Any activity must comply with the following traffic generation conditions:

...

(j) Within the Kimihia Lakes Recreation and Events Zone, there shall be no maximum traffic generation, provided that:

a) A certified Traffic Management Plan (which shall include, but is not limited to, the provisions of a wide area assessment) shall be in place and implemented for all activities. The Traffic Management Plan shall:

i) Provide for the supervision and control of patrons entering and exiting the Kimihia Lakes Recreation and Events Park, and the transportation of patrons to and from the Park;

ii) Limit the speed of traffic within the Kimihia Lakes Recreation and Events Park to 30km/h

iv) Provide for monitoring and reporting on the number of vehicle movements for all activities and events;

v) Include protocols for undertaking reviews of the Traffic Management Plan by an Implementation Monitoring Committee consisting of the New Zealand Police, the Council and the Kimihia Lakes Recreation and Events Park operator

vj) Be reviewed, certified and endorsed by Council, by (date) of each year.

b) For any activity or event, or combination of activities and events where there is likely to be in excess of 5,000 people, the operator of the park shall advise the Council a minimum of 10 working days before the activity and event occurs of the details of the activity and event and the relevant provisions of the Traffic Management Plan that are to be implemented.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

260.17

Summary of Decision Requested:

Add clause (b) to Activity-specific conditions 14.12.1.8 relating to P8 off-road pedestrian and cycle facilities as follows:

(b) In the Kimihia Lakes Recreation and Events Zone there shall be no activity specific conditions.

AND

Any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Submitter Number:

261

Submitter:

Rita Carey

Point Number

261.1

Summary of Decision Requested:

Amend the approach to Maaori Sites of Significance through the following:

- Purchase the land from landowners;
- Fence the areas off at Council/Iwi cost;
- Council/Iwi to maintain those areas;
- Promote acknowledgement of the areas;
- Reward landowners for past care;
- Incentive Programmes; and
- Council/Iwi fund initial outlay cost such as fences.

Decision Reasons:

- Appears the council is determined to penalize, persecute and generally make life and business difficult for land owners for having areas of 'national treasure' on their land.
- Will have to argue with lawyers at a huge cost in the future if ever it is necessary to do something in and around those areas.

Point Number

261.2

Summary of Decision Requested:

Amend the Maaori Sites of Significance on the submitter's property by:

- Reducing the size of the buffer area;
- Locating them in the correct place; and
- Re-considering the significance of the sites.

Decision Reasons:

- Will be much more reasonable and ensures farming practice and development is not necessarily interrupted.
- 2 areas plotted on the submitter's property are in the wrong place (one of them).
- Not areas the submitter deems of significant interest/value to Maori since one is a suspected Kumara Pit and the other a suspected look out site.
- Huge buffers have been put in place for small areas that the submitter would be happy to leave alone, and has done so, with a small buffer.

Point Number

261.3

Summary of Decision Requested:

Amend the approach to Significant Natural Areas and Significant Amenity Landscapes through the following:

- Council purchase the land;
- Council to fund fencing;
- Council to maintain those areas or promote acknowledgement of the areas;
- Reward landowners for past care;
- Create an incentive programme for future care; and
- Initial capital outlay such as fences be at Council cost.

Decision Reasons:

- Appears the council is determined to penalize, persecute and generally make life and business difficult for land owners for having areas of 'national treasure' on their land.
- Will have to argue with lawyers at a huge cost in the future if ever it is necessary to do something in and around those areas.
- Appears to the submitter council want to take land from them but expect them to pay for the upkeep.
- Purchased land legally and should be able to do with it what they like.
- If council want it, they should purchase it of the submitter at riverfront, riparian right prices and pay for the upkeep themselves.

Point Number

261.4

Summary of Decision Requested:

Amend Rule 22.3.7.1 Building Setbacks - All boundaries, to reduce the setback for a habitable building to 10m.

Decision Reasons:

- A 25m setback from all boundaries means submitter will need to build towards the middle of a flat paddock and makes utilizing for farming difficult.
- The Paddock would become a section unless the paddock is ring fenced at a huge cost and inconvenience to the submitter.
- Better able to utilize the existing boundary fences for the residence section by leaving the rest of the property for grazing/cropping etc.

262

Submitter:

Brian Curle

Point Number

262.1

Summary of Decision Requested:

Amend the Proposed District Plan to include the Kimihia Lakes Restoration and Development Project.

Decision Reasons:

- Will expose Huntly and make it a 'destination' (it is a part of the 'Golden Triangle').
- Will provide a wide range of job opportunities.
- Will provide activities for youth.
- Has the potential to create educational involvement.

Submitter Number:

263

Submitter:

Rosemary Curle

Point Number

263.1

Summary of Decision Requested:

Amend the Proposed District Plan to include the Kimihia Lakes Restoration and Development Project.

Decision Reasons:

- Believes this would provide endless opportunities for our community.
- Huntly lies with in the 'Golden Triangle,' with the project added will be well on the way to being a tourist destination.
- There will be many jobs created which will also benefit the town.

Submitter Number:

264

Submitter:

Cathy Miller

Point Number

264.1

Summary of Decision Requested:

Add the Heritage Precinct Guide from the Operative District Plan for Rangiriri, and include the corner of Murphy Street and Rangiriri Road, neighbouring the cemetery and all properties exposed to the SH1 side on Austen St.

Decision Reasons:

- Rangiriri holds a unique place in New Zealand's history and as such should hold unique protection and respect.
- Requests the present Heritage Precinct Guide remains until such time that land/business owners in the precinct and other consultants can collectively respect and protect this towns future.
- Remain until such time that another more comprehensive plan unique to Rangiriri is created.
- Disagrees with Dr Ann McEwan for disestablishing the Heritage Precinct Design Guide.
- The Proposed District Plan, appears to protect and promote the necessary Rangiriri Heritage values and property, but submitter hasn't been able to establish the precinct area to which it will apply or specific specialties.
- It is essential the precinct at least takes in all that was under the removed guide, plus:
 - 1) The corner of Murphy Street and Rangiriri Road (Neighbouring the Cemetery, being exposed to the main entry to the town, a visual part of the Heritage buildings and activities).

265

Submitter:

James Whetu

Point Number

265.1

Summary of Decision Requested:**Amend** zoning of the properties at 2, 6 and 8 Durham Street Ngaruawahia from Industrial Zone to Business Zone.**Decision Reasons:**

- Submitter wishes to operate Business Zone type activities on these properties.
- Commercial activities and services are more appropriate on these properties rather than industrial activities.
- Historically, properties were used for retail and commercial services.
- One of the key issues identified in section 32 report 16, Business Zone, is connecting town centers to the Waikato River.
- These properties can improve connection of Ngaruawahia town centre to Waikato river due to their proximity to the town centre.
- Properties are close to key community features such as the Point reserve, the Waikato and Waipa rivers, the Haakarimata ranges and its walkway, as well the Kiingitanga office and reserve, where a strategic focus is promoted.
- 2 Durham Street provides safe access and clear line of sight for those visiting the community's features and improve the functioning the Ngaruawahia's town centre.
- Business zoning will be consistent with the Business Zone activities envisaged at properties 2 and 3 Princess Street and 14 and 16 Herschel Street, both zoned Business under the Proposed Plan.
- Considers natural foot traffic form town centre will be along Durham Street, when they cross over Great South Road.
- The existing railroad crossing by 2 Durham Street provides safe pedestrian passage.
- Property is in close proximity to the town centre, Jesmond Street, and will complement these activities and not detract from its intent.
- Present and future activities are reflective of Business Zone provisions rather than Industrial Zone provisions under the notified plan.
- Business zoning will uphold Objective 4.5.1 and its policies.
- The property will provide for economic, social and cultural well-being of current and future generations in Ngaruawahia.
- Re-zoning of 2 Durham Street as a Business Zone will not compromise the settlement pattern envisaged in the Future Proof Strategy.
- 2 Durham Street property will be actively used for Business Zone activities.
- Industrial provisions are not suitable for 2 Durham Street.

Summary of Decision Requested:**Amend** the Proposed District Plan to require any building activity that does not comply with the District Plan in Raglan to be publicly notified.**Decision Reasons:**

- Raglan is known for its special characters such as a relaxed family-friendly, multicultural and community-orientated, environmental and social enterprises.
- Concerned that development which doesn't take into account Raglan's residence's needs and wishes will result in such positive characters being lost.
- Important to prevent extensive developments, e.g. chain fast food companies, big chain supermarkets and/or a high rise building.
- Focus on protecting and preserving of nature, bicycle lanes, more long term housing and less vacation accommodation and water quality.

Submitter Number:

267

Submitter:

Elaine Hyland

Point Number

267.1

Summary of Decision Requested:**Amend** the Proposed District Plan to require any building that does not comply with the District Plan in Raglan to be publicly notified.**Decision Reasons:**

- Raglan's special character preserved, with no multi-storey buildings.
- Diversity reflecting nature of Raglan-relaxed village town centre.
- Natural beauty of town be protected.
- More permanent affordable accommodation for locals, rather than only tourists.

Submitter Number:

268

Warwick Cheyne

Point Number

268.1

Summary of Decision Requested:**Delete** Rule 22.3.3.3 Earthworks- Significant Natural Areas.**Decision Reasons:**

- Submitter proposes if they were to have an access track through an Significant Natural Area proposed area it will be problematic to maintain, which becomes a health and safety issue.
- Under the proposal, on a track approximately 3.5m wide, the submitter will only be allowed to do maintenance on around 80m in length per year.
- The track is around 200m long and submitter questions whether they will have to do maintenance over a 3 year period.

Point Number	268.2		
Summary of Decision Requested:	Delete Rule 22.2.3.4 Earthworks- within Landscape and Natural Character Areas.		
Decision Reasons:	<ul style="list-style-type: none"> • A limit of 1000m2 has been arbitrarily assigned for earthworks in a Hill Country Significant Amenity Landscape. • This limit will be problematic for track maintenance where large areas of the farm (60%) are proposed as a Significant Amenity Landscape. • Inability to maintain tracks is a health and safety issue. • Rules render land incapable of reasonable use. 		
Point Number	268.3		
Summary of Decision Requested:	Delete Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> • Total of 1000m2 seems overly restrictive. • Could result in land outside an Significant Natural Area becoming incapable of reasonable use as persistent invasive weeds (e.g. Manuka, Totara and Tutu) encroach on the pasture. • Not clear to submitter what 'outside an Significant Natural Area' means. • Submission questions how the Waikato District Council seeks to place restrictions what can be done on their land, beyond specific Significant Natural Area land they are interested in. 		
Point Number	268.4		
Summary of Decision Requested:	Delete the Significant Natural Area from property number 1003679 until there are clear benefits to the landowner in having this on their property. The submitter outlines options which Council could have explored before notifying the proposed plan: <ul style="list-style-type: none"> • Petition the government using the local government association to restore tradeable carbon credits on stands of native timber of 2 hectares or more. • Transferable titles, with not less than one transferable title per hectare of land taken • 100% rates relief from those areas affected by designations • Council to lease the Significant Natural Area • Council to pay landowners per year based on the area of Significant Natural Area to preserve it 		
Decision Reasons:	<ul style="list-style-type: none"> • No wish to have this designation on the property. • The submitter wishes to have a free title on their property with all their entitlement's privileges • Having native timber as carbon credits would do more to preserve these stands than any threats and/or theft by zoning. • Submitter questioned the use of the word "significant" and whether this word adds value to their land. • Submitter questioned who benefits from a Significant Natural Area • Council appears to be penalising farmers who early on decided to keep the bush on their property rather than applying for a subsidy from the government to remove it. • Patches of bush are useful as shelter for stock in rough and hot weather, and are a source of firewood or building materials. • There are risks, as in all businesses, in choosing the right use for the land in question. How to utilise the resource so it is beneficial to the landowner and his family, as well as to the land, so that with minimal inputs it will continue to produce a stable income and be around for future generations to have a go. • Forestry requires waiting 25 years or more to generate income after harvest which is not an incentive. • There is no mention of who or what will benefit from these proposals. It does not appear to benefit the landowner, whose income is dependent on utilising the land to its maximum economic potential. To affect economic potential and restrict income does not benefit the country. Questions why have all these rules and regulations if nobody benefits. 		
Point Number	268.5		
Summary of Decision Requested:	Delete the Significant Amenity Landscape from property number 1003679. The submitter suggested leasing the amenity landscapes.		
Decision Reasons:	<ul style="list-style-type: none"> • No wish to have this designation on the property. • Leasing the amenity landscapes would stop them from changing and help protect them • The rules are naive and ill-informed. 		
Point Number	268.6		
Summary of Decision Requested:	Delete the walkway/ cycleway / bridleway from property number 1003679 until proper consultation and benefits have been discussed and terms agreed to. The submission suggests a lease option and/or transferable title per kilometre of track.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter has not been provided with any or enough information regarding this proposal • Apart from a line on a map, there is no information at all. 		
Point Number	268.7		
Summary of Decision Requested:	Delete Rule 22.2.8 PI (a)(ii) Indigenous vegetation clearance outside a Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> • A total of 1000m2 seems overly restrictive and could result in the land outside a Significant Natural Area being incapable of reasonable use as persistent invasive weeds (such as manuka, totara and tutu) encroach on pasture. • It is not clear what "outside a Significant Natural Area" means and questions is it the whole farm or some defined area adjacent to the Significant Natural Area • Questioned how the Waikato District Council can see to place restrictions on what can be done on the submitter's land beyond the specific Significant Natural Area • No benefit economically and is likely to cause undue financial hardship • Considers it theft when a plan, objective, policy or rule is out to remove the rights of ownership, or right of use as the landowner sees fit • Does not believe the NZ Government promotes theft • Uncertain who benefits from these designations • Seeks to pursue a course of action through the NZ Police if the designations remain on the submitter's property due to restricting use of the property as a place of business and potentially lowering its value. 		
Submitter Number:	269	Submitter:	Catherine Wright

Point Number 269.1

Summary of Decision Requested: **Retain** Rule 23.3.2 Minor Dwelling, except for the amendments sought below

AND

Amend Rule 23.3.2 Minor Dwelling to have a flexible location (in metres) between a minor dwelling and the existing dwelling.

Decision Reasons:

- Support in principle a minor dwelling of no more than 70m² be allowed.
- Wish to provide accommodation that can be utilized for extended family when required.
- Submitter suggests negotiation on the siting of the minor dwelling with regards to the proximity of the existing dwelling.
- Otatau and the surrounding area is very undulating and the 20m rule would be impractical in some cases.
- In the submitters case, there is a suitable flat area suitable to a minor dwelling however it is approximately 45m from the main dwelling and can be serviced by the existing driveway.
- The alternative site, which falls under 20m rule, requires some adjustment to the land contour and felling of some trees.
- Wish to provide accommodation that can be utilized for extended family when required.

Submitter Number: 270 **Submitter:** Denise Overend-Clarke

Point Number 270.1

Summary of Decision Requested: **Add** a Special Character area for Raglan.

Decision Reasons:

- Concerns that Raglan's special character is being eroded.
- Raglan is only given token support.
- Better protection in the 10 year plan would be good.
- Diverse buildings in keeping with the area and no multi-story buildings.
- Bike and pedestrian friendly.
- Water access.
- Protect the coast.
- Manage the traffic flow.

Submitter Number: 271 **Submitter:** Dave and Fransiska Falconer

Point Number 271.1

Summary of Decision Requested: **Add** new zoning policy for a specific Kimihia Lakes Recreation and Events park zone, for the Lake Kimihia project and for the restoration of the former Solid Energy Huntly East Mine.

Decision Reasons:

- Other Councils have done it for Queenstown Events Centre, Lake Wanaka Centre, Rotorua Aquatic Centre, Taupo Events Centre, Taupo Equestrian Centre, etc.
- The development of the Lake Kimihia Recreation and Events park would offer significant employment and development opportunities
- It would be a popular events venue that is both accessible by the Auckland and Hamilton urban economies, generating income to Huntly —boosting employment opportunities that was forfeited by the closure of the mine
- The submitters welcome recreational area to their growing population and significant tourism industry.
- The 'Golden Triangle' of Auckland, Hamilton, and Tauranga contains half of the national population and economy, and the present Labour government has committed to building a rapid rail network connecting these areas that run right past Huntly.
- Recreational use of the environment is important to the district however the scale of the proposed Kimihia Lakes Recreation and Events Park would be on a scale that could reach the major city centers that are within Hamilton and Auckland
- It's time to be supportive to an outstanding vision to make Huntly a popular destination
- The significance of the restoration of Lake Kimihia, and wetlands within the former mine area, to their former state embodies the policy I.5.7.2 Landscape and natural character.
- The restored Lake Kimihia would be a complete reflection of the relationship between people and place and it would be a good example of 'de-evolution'
- The new owners have undone much of the exploitation of the lake by allowing it to refill and finally have its mana restored.
- This is relevant to I.9.3 Section 5 RMA, I.9.5 Section 7 RMA, I.12.5, I.12.6, I.12.7, 2.12.8, and Chapter 2: Tangata Whenua in the Proposed District Plan.

Point Number 271.2

Summary of Decision Requested: **Add** a southbound on/exit ramp near Kimihia Road or McVie Road, Huntly, to divert as much traffic away as possible from Taupiri Mountain Cemetery.

Decision Reasons:

- The Maori King, in the late 1860's, wept when he was informed of the intended route of the main rail trunk line alongside state highway I effectively cutting the access to the sacred burial ground.
- Mount Taupiri is a sacred mountain and burial ground for Waikato Iwi and Kingitanga.
- Parking and access became difficult because the State Highway and railway lie largely on gentler sloping land at the foot of the slopes of Taupiri Mountain
- Parking is required to be on the other side of the North Island transport system in a small and constrained area beside the Waikato River and Mangawara Stream.
- Many mourners attending Tangi often cause disruption to traffic, out of necessity.
- Mourners attending funerals have to manage 70kph traffic and then when the trains come it is formidable, as it is required to blow its horn amidst all the mourners and ceremony.
- Any reduction in traffic will be a much welcome outcome

Point Number	271.3
Summary of Decision Requested:	Restore the town name of Huntly to its original name of Rahui Pokeka.
Decision Reasons:	<ul style="list-style-type: none"> The Council need to be mindful of cultural value/impact assessments such as honoring urupa rather than factor the Huntly access to the Expressway The Council should be acknowledging 2.12.1, the significant legal power of Tangata Whenua and areas of significance such as urupa. It is a matter of utmost urgency and an obligation under 2.12.1 (iii) The Council had dismissed the submitters previously "At this stage Council is not looking to rename Huntly".

Point Number	271.4
Summary of Decision Requested:	Amend zoning of a small portion of the land at Solid Energy's Huntly East Mine from Rural Zone to Residential Zone.
Decision Reasons:	<ul style="list-style-type: none"> This is in relation to 1.4.4 (Issues for Waikato District – The Urban Environment) and 1.5.2 (What does this mean for Waikato district strategic objectives and directions – Planning for urban growth and development) To help fund for the project proposed in previous submission points. The rezoning of a small portion of the defunct mine to Residential Zoning would meet the Councils requirement to ensure the environment is maintained and enhanced from the derelict state it was left in to creating quality residential sites in a desirable area, which will fund further development of the mine into a sustainable environment.

Submitter Number:	272	Submitter:	Mark Smith
--------------------------	-----	-------------------	------------

Point Number	272.1
Summary of Decision Requested:	Amend the zoning of the properties in Summerfield Land, Tamahere from Rural Zone to Country Living Zone (see map attached to submission).
Decision Reasons:	<ul style="list-style-type: none"> Land forming Summerfield Lane was subdivided in 1992 into 10 lots with areas between 5218m2 and 2.8155ha. Subsequent boundary exchange resulted in 1 extra lot being created and lot sizes now ranging between 5218m2 and 2.037ha. Lots are all used as single dwelling lifestyle properties. Land not used directly for housing. Curtilage to housing is of low quality soils that are unsuitable for cropping or intensive farming. Land use fits requirements of Country Living Zone. Does not fit requirement of Rural Zone. Any future subdivision would not affect productive values of land or place any significant increase in traffic/services.

Submitter Number:	273	Submitter:	Russell Luders
--------------------------	-----	-------------------	----------------

Point Number	273.1
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.1.3 RD1 (a)(b) Restricted Discretionary Activities.
Decision Reasons:	<ul style="list-style-type: none"> The definition of intensive farming lacks clear intent. The submitter disagrees with any definition of farming that is linked to soil fertility. A management decision forced by extreme weather could suddenly mean that the submitters are intensive farmers.

Point Number	273.2
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.2.3.3 PI (a) Earthworks – Significant Natural Areas.
Decision Reasons:	<ul style="list-style-type: none"> The submitters must be able to maintain existing farm tracks to meet health and safety standards. It is not possible to repair a track or fence or drain with a volume limit of 50m3. 200m of track 3m wide skimming 10cm of soil amounts to 60m3. A 12 tonne digger has a 0.65m bucket. 50m3 would allow the submitter to move 76.92 buckets of soil. Hill country boundary fence lines often need earthworks to provide a foundation for a long lasting quality fence. Traditional post wire and batten fence is an expensive farm investment and needs to be erected on a well prepared line to get the longest life from this investment. Provision must be allowed for earthworks for new farm infrastructure such as fencing, tracks and drains.

Point Number	273.3
Summary of Decision Requested:	No specific decision sought, but submission opposes the limits on volume, area and cut of earthworks in Rule 22.2.3.4 PI (a) Earthworks within landscape or Natural Character Areas.
Decision Reasons:	<ul style="list-style-type: none"> Regular maintenance of tracks is essential. Provisions must be allowed for earthworks for maintaining existing farm infrastructure.

Point Number	273.4
---------------------	-------

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.2.7 P3 (a) Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The locations of building sites are highly dependent on topography and access.
- 250m2 is not enough allowance when building platform, access, stormwater, sewage systems fencing and landscaping are required.

Point Number 273.5

Summary of Decision Requested: No specific decision sought, but submission opposes the restrictions in Rule 22.4.2 RD1 (a) Title boundaries – natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas.

Decision Reasons:

- Boundaries must be determined by topography, and some Significant Amenity Landscapes already have property boundaries through them.

Point Number 273.6

Summary of Decision Requested: No specific decision sought, but submission opposes the restrictions in Rule 22.4.3 RD1 (a) Title boundaries – Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance.

Decision Reasons:

- Boundaries must be determined by topography, and some Significant Natural Areas already have property boundaries through them.

Point Number 273.7

Summary of Decision Requested: **Delete** Environmental Protection Areas from all of the Proposed District Plan, including Rule 22.4.6 Subdivision of land containing all or part of an Environmental Protection Area.

Decision Reasons:

- Environmental Protection Area is not defined.
- There is no apparent reason for having both Significant Natural Areas and Environmental Protection Areas.

Point Number 273.8

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.2.3.3 P2 Earthworks - Significant Natural Area and the limits on imported fill.

Decision Reasons:

- Sometimes the only option to repair a track or fence lines is to import fill.

Point Number 273.9

Summary of Decision Requested: No specific decision sought, but submission opposes Significant Natural Areas being identified on private land.

Decision Reasons:

- The submitter takes pride in the private bush area which their predecessors chose not to develop.
- Strongly oppose being dictated and restricted on what can and cannot be done on these areas.
- These areas in the future could possibly have significant value, however consultation needs to be undertaken prior.
- The Waikato District Council has not presented a practical plan for the direction of future management of Significant Natural Areas.

Point Number 273.10

Summary of Decision Requested: No specific decision sought, but submission opposes Significant Amenity Landscapes being identified on private land.

Decision Reasons:

- The submitter takes pride in the private bush area which their predecessors chose not to develop.
- Strongly oppose being dictated and restricted on what can and cannot be done on these areas.
- These areas in the future could possibly have significant value, however consultation needs to be undertaken prior.
- The Waikato District Council has not presented a practical plan for the direction of future management of Significant Amenity Landscapes.

Point Number 273.11

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.2.8 P1 (a) Indigenous vegetation clearance outside a Significant Natural Area.

Decision Reasons:

- There is not enough clarity on what Outside a Significant Natural Area means.
- Indigenous vegetation clearance for any farming purpose should be permitted given that farming is a permitted activity.
- Over time, invasive indigenous vegetation will revert productive land unusable as it overruns productive pasture.
- Provision must be allowed for indigenous vegetation clearance for the purpose of new farming infrastructure such as fences, tracks, drains and keeping productive land clear.
- Provision must be allowed for indigenous vegetation clearance for the purpose of new dwellings and buildings including access.

Point Number 273.12

Summary of Decision Requested: No specific decision is sought, but the submission opposes Rule 22.4.1.6 RD1(a) Conservation Lot Subdivision.

Decision Reasons:

- If the Waikato District Council is intent on defining a piece of the submitter's land as being of public interest, then those public benefits should be accounted for by a transaction.

- If perceived value of conservation lots are assessed on a per hectare basis, then the real ongoing costs and liabilities to landowners must be calculated and compensated on a per hectare basis. All conservation lots, regardless of size will require an ongoing commitment and liability to the landowners for maintenance and management.
- All Significant Natural Areas should be eligible for compensation which is in proportion to the size of the Significant Natural Area and its' conservation lot.
- Many landowners do not wish to subdivide their land, or their land is unsuitable for subdivision, therefore a subdivision incentive is not an option.
- Monetary compensation must be offered.

Submitter Number:	274	Submitter:	Charlie Young
Organisation:	Raglan Chamber of Commerce		
Point Number	274.1		
Summary of Decision Requested:	Add a new specific zone, in Chapter 9 Specific Zones for Huntly's Kimihia Lakes Recreation and Events zone for the following 183ha of properties: Section 3 SO 482553, Lot 1 DPS 20619, Allotment 746 Parish of Taupiri, Section 1 SO Plan 60522, Allotment 740 of Taupiri, Lot 18-21 DP 347582, Sec 3 SO Plan 400734, Allotment 777 Parish of Taupiri, Lot 23A Section 463 Parish of Taupiri, Allot 857 Parish of Taupiri, 515 Parish of Taupiri, 789 Parish of Taupiri and Allotment 6 Parish of Taupiri (Submission refers to attached submission from Allen Fabric Limited).		
Decision Reasons:	<ul style="list-style-type: none"> • Impending re-routing of main arterial motorway to the east of Huntly's town centre means the challenges facing the community are many, difficult and complex. • Businesses that traditionally rely on passing vehicular traffic will be severely impacted and may force some to close or relocate. • Run-on effect of loss of business and jobs will have a profound effect on the community's teetering ability to maintain its proud and vibrant history. • Huntly community needs a new direction and game changing plan to lead the way for the town's revitalization, which the proposed Kimihia Lakes redevelopment can be a catalyst for. • Closing of the Huntly East Mine brought a statutory rezoning of the area from an overlay 'Extraction Zone' to 'Rural Zone' which severely restricts the type of access and redevelopment activities that can occur. • New overlay is sought to enable lake associated activities to be created and conducive to education, recreation and economic development. • Alignment and recognition within the newly proposed Waikato District Council Plan is necessary. • Huntly is most deserving and in need of a new specific revitalization and economic zone. • Kimihia Lakes Project area needs to be defined as a specific zone to enable the commencement of its overall business plan. • Not including the Kimihia Lakes project would result in an expensive and arduous private plan change which Huntly cannot afford. • The Intent of the Kimihia Lakes Restoration and Redevelopment Project is to align with the Waikato District Council's stated overall vision for its communities ("Liveable, Thriving and Connected Communities"). • Kimihia Lakes Project is a grassroots community led program enabling the core environmental assets of the area to become the centerpiece to Huntly's revitalization, river and lakes network. • Recent closure of Huntly East Mine is an opportunity to restore the open cast mine back to an accessible lake and shoreline. • Restoration funds set aside by previous mine owners (Solid Energy) to kick start revitalization effort. • Plan's vision will be centered on future capabilities of the Lake's rehabilitation efforts, facilities and outlooks to create a sustainable circular economy model. • The renewed Kimihia Lake will be Huntly's largest deep water lake capable of hosting non-powered water craft events. • Allen Family (of Allen Fabrics Ltd.) acquired the mine property, as well as the responsibility of managing its restoration and connectivity to the environment and community, and is in the process of organizing a working group of stakeholders, iwi and investors. 		

Submitter Number:	275	Submitter:	Tim Foy
Organisation:	Waikare Golf Club (Te Kauwhata) Inc.		
Point Number	275.1		
Summary of Decision Requested:	Delete the proposed walkway/cycle way/bridleway overlay from the Waikare Golf Club, Te Kauwhata.		
Decision Reasons:	<ul style="list-style-type: none"> • Proposed bridleway/cycle way shown on the district plan poses a significant risk to people, horses etc. from flying golf balls. Oppose inclusion of cycle way/ bridleway/ walkway on this basis. • Not opposed to the idea of exercise facilities, however the health and safety risk in this case is too great. • Current board will not recommend to their member the sale of such land for the purpose of exercise facilities. 		
Point Number	275.2		
Summary of Decision Requested:	Amend the setback distance for the properties on the northern boundaries of Waikare Golf Club, Te Kauwhata from 1.5m to 10m.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter's experience with minimum setback distances allowed for development on their western boundary and likely on their eastern boundary has, is or is likely to cause significant health and safety issues for residents and their families. 		

Submitter Number:	276	Submitter:	Ted and Kathryn Letford
Point Number	276.1		
Summary of Decision Requested:	Amend Table 14.12.5.14-Access and Road conditions relating to the access leg widths for the Residential Zone as follows: <ul style="list-style-type: none"> • 1-3 allotments: 3.6m • 4-6 allotments: 4-6m 		
Decision Reasons:	<ul style="list-style-type: none"> • The access leg for requirement for 1 lot of 4m width is too wide and a waste of residential space. • The access lot requirement for 2-4 lots of 8m required is too wide and a waste of space. • HCC have a requirement for access serving 1-3 allotments and serves well. Suggests adopting the same for urban areas. • HCC also have 4-6 allotments at 4-6m private way width and suggests adopting the same approach for urban areas. • Urban land is going to waste, and is the zone where subdivision should be taking place. 		

Point Number 276.2

Summary of Decision Requested: **Retain** the following access widths in Table 14.12.5.15 Access and Road condition for Rural and Country Living Zone

- 6m wide access for one allotment.
- 6m wide access for 2-3 lots.
- 10m for 4-8 lots.

Decision Reasons:

- Proposed access widths are far more practical than the current requirements under Operative District Plan which wastes too much space.

Point Number 276.3

Summary of Decision Requested: **Retain** the ability in Chapter 16 Residential Zone to undertake multi unit development

AND

Amend Chapter 16 Residential Zone to reduce the size of the net site area per residential unit for multi unit development from 300m2 net site area to 150m2 average per apartment and 200m2 net site area per half duplex to be similar to Hamilton City Council.

Decision Reasons:

- Supports the ability to cater for Multi Unit Development.
- Recommend reconsidering 300m2 net site area per residential unit as they may be too large for this type of development.
- Suggests adopting a similar approach to HCC: 150m2 per apartment, 200m2 net site area per half duplex unit.

Point Number 276.4

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (iv) Subdivision General to increase the number of lots to 20 or more for when this rule is triggered.

Decision Reasons:

- Seems hard to work with.
- Submissions uses an example of a four lot subdivision with two front and two rear lots to illustrate that subdivision will not be able to achieve this rule.
- Would be difficult to obtain a parent title with a sufficiently long road frontage to make this work.
- Number of lots need to be raised for when this rule is triggered, suggests 20 lots or more.

Point Number 276.5

Summary of Decision Requested: **Retain** Rule 16.4.6 Subdivision - Amendments and updates to cross lease flats plans and conversions to freehold.

Decision Reasons:

- Supports the inclusion of Amendments to cross lease and flats plans.
- Supports the ability to convert from cross lease to fee simple title.
- This is an improvement on the Operative Plan, which has no provision for these.

Point Number 276.6

Summary of Decision Requested: **Retain** Rule 22.3.2 Minor dwelling.

Decision Reasons:

- Should be permitted to have a minor dwelling.
- Should be no requirement for it to be occupied by a dependent person related to the person in the main dwelling.
- Better outcome than the current Dependent Person Dwelling rule under the Operative Plan.

Point Number 276.7

Summary of Decision Requested: **Retain** 22.3.7.1 Building Setbacks - All boundaries, as notified.

AND

Retain Rule 22.3.7.1 P2 (a) Building Setbacks - all boundaries, which sets out non-habitable building setbacks on a title less than 1.6ha.

AND

Retain Rule 22.3.7.1 P4 (a) Building Setbacks - All boundaries, which sets out non-habitable building setbacks on a title greater than 1.6ha.

Decision Reasons:

- Non-habitable buildings should be permitted to be setback closer than 25m from every boundary other than a road.

Point Number 276.8

Summary of Decision Requested: **Delete** the Prohibited Activity Status from Rural subdivision rules (Rule 22.4.1.1 Prohibited Subdivision).

Decision Reasons:

- Many farmers want the right to split off a block that can be used for family members to build on or to sell during hard times and generate some income.
- If the record of title is large (over 20ha) then splitting off a small block (for example between 2500m2 and 5000m2) has minimal effects on losing those high quality soils. The Plan should allow this.
- Similarly, if the record of title is small to begin with (less than 4ha) and is not a viable productive rural block, then splitting off a small block as per above, is not going to result in a loss of productive land. The Plan should allow this.
- Prohibited activity status is too restrictive.

Point Number 276.9

Summary of Decision Requested: **Amend** Rule 22.4.1.2 RD1 (a) (iv) General Subdivision to reduce the size of the additional lot.

Decision Reasons:

- This is too large.
- Area should be smaller and rural blocks left in larger holdings.
- People want a small block and do not want to maintain a block size up to 1.6ha.

Point Number 276.10

Summary of Decision Requested: Amend Rule 23.3.7.1 (a) (iii) Building Setbacks (All Boundaries), from 12m to a 6m setback.

Decision Reasons:

- 12m setback seems like an inefficient use of land.
- Difference between 6m and 12m in terms of noise and privacy is not something that would be noticed in terms of effects on the residents, compared to the effects of the waste of space that it results in.

Point Number 276.11

Summary of Decision Requested: Amend Rule 23.4.2 RD1 (a) (i) General Subdivision, to reduce the minimum lot size to allow lots below 5000m2.

Decision Reasons:

- WDC needs to think about productivity of land and the use of it as most Waikato District towns are surrounded by very fertile land.
- Council should concentrate on developing smaller blocks as they have the inability to be used for productive purposes.
- More intensive subdivision in Tamahere should be catered for as a priority due to its proximity to Hamilton, which would require reducing the lot sizes to 2500m2 for all of the Country Living zone.
- it is important for Waikato farmland to be maintained to a viable size.
- Enabling the Country Living Zone to be more intensively developed leaves the Rural Zone available for productive purposes.
- Leaving the minimum lot size at 5000m2 seems like a very inefficient way of conserving large lots for farming purposes.
- Better to intensify the land that is already zoned for Country Living.
- Other councils in the Waikato Region manage to successfully have 2500m2 and the residents still enjoy a 'large lot' feel.
- Submission questions where the 5000m2 requirement came from.
- Reducing lot size to 2500m2 reduces the amount of land being taken out of productivity.
- Minimum lot size of 5000m2 encourages the loss of landscaped/garden areas as they are harder to maintain the lawn, reflecting a changing society which places less priority on gardening and more on family and recreation.
- Tamahere is in a location where development should be encouraged and catered for options, retaining some larger blocks, and allowing smaller country living blocks. Tamahere is also close to places of work, shopping areas and services, close to entertainment, the Waikato expressway and Airport.

Point Number 276.12

Summary of Decision Requested: No specific decision sought, but submission considers Rule 22.4.1.2 RD1 (a)(v) is too restrictive to enable subdivision based on soil type and will create difficulty in excessive assessment reports having to test the entire property.

Decision Reasons:

- Too restrictive to enable subdivision based on soil type.
- If additional lots are sufficiently small, this will minimise loss of productive land.
- Requirement will create difficulty in extensive assessment reports having to test right across the title in order to quantify the two lots in terms of high class soils.

Point Number 276.13

Summary of Decision Requested: Amend Rule 22.4.1.4 RD1 (a)(iv) Boundary relocation, for the lots to be smaller than 8000m2.

AND

Retain the absence of the requirement for boundary relocation titles to be held in common ownership in Rule 22.4.1.4 Boundary relocation.

Decision Reasons:

- Rural farmers do not want to lose too much land, but want ability for smaller blocks.
- Support removing requirement for boundary relocation titles to be held in common ownership, which is an improvement on the Operative District Plan.

Point Number 276.14

Summary of Decision Requested: Amend Rule 22.4.1.5 RD1 (a) (iii) Rural Hamlet Subdivision to reduce the 8000m2 minimum area requirement.

Decision Reasons:

- Support in principle.
- Should be provision for smaller blocks.
- Will retain rural balance blocks in larger holdings.

Point Number 276.15

Summary of Decision Requested: Amend Rule 22.4.1.6 RD1 (vi) and (vii) Conservation lot subdivision, to enable smaller lots.

Decision Reasons:

- Support in principal.
- The minimum lot size is too large at 8000m2.
- Provision to cater for smaller lots should be available and will result in larger balance rural land blocks.

Point Number 276.16

Summary of Decision Requested: Retain Rule 22.4.9 Subdivision - Building Platform.

AND

Retain the number of car parks for a dwelling in Table 14.12.5.7 Required parking spaces and loading bays.

Decision Reasons:

- Support the number of car parking spaces for the dwelling.
- This is an improvement on the Operative District Plan, requiring one parking space per bedroom.

Submitter Number:	277	Submitter:	Anthony Gurr
Point Number	277.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Aviation serves the wider community as a whole, and with the option of living as part of an aviation community, it will help go a long way to bringing more people and move diversity to a community. 		
Point Number	277.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • This is somewhere the submitter would look to retire later in life, somewhere they can be close to two major centers and still own and operate an aircraft from the comfort of home. The submitter also believes that this will bring an influx of people to and business to Te Kowhai. 		

Submitter Number:	278	Submitter:	Simpson Trevor
Organisation:	Simpsons Farms Ltd		
Point Number	278.1		
Summary of Decision Requested:	Delete the Outstanding Natural Features on the properties owned by Simpson Farms Ltd.		
Decision Reasons:	<ul style="list-style-type: none"> • Object to the application of the Outstanding Natural Feature without direct consultation and prior knowledge of the submitter 		
Point Number	278.2		
Summary of Decision Requested:	Delete the Significant Natural Area overlay on the properties owned by Simpsons Farms Ltd.		
Decision Reasons:	<ul style="list-style-type: none"> • Object to the application of the Significant Natural Areas overlay without direct consultation and prior knowledge of the submitter. 		

Submitter Number:	279	Submitter:	Robbie Bennett
Point Number	279.1		
Summary of Decision Requested:	Amend Rule 22.4.1.6 (a) (vi) Conservation lot subdivision to allow for a minimum lot size of 5,000m2.		
Decision Reasons:	<ul style="list-style-type: none"> • 5,000m2 lot size still retains rural character. • Subdivision of properties that contain indigenous vegetation need good incentive to protect, and 5,000m2 would encourage this. • There are properties west of Ngaruawahia, that often have a LUC of 4- 6e. Class 1-3e soils would still be protected. • The Country Living Zone allows for properties to have a minimum lot size of 5,000m2. • By allowing 5,000m2 there is more potential to support the rural communities . (in particular rural schools). • There are Rural Zoned properties on sealed roads within 10km of a township (eg Ngaruawahia). More rates to contribute to the maintenance of the roads. • The neighbouring council of Waipa allows for 5,000m2 which will mean Waikato District will be consistent with our neighbouring council. 		

Submitter Number:	280	Submitter:	Peter Nation
Organisation:	New Zealand National Fieldays Society Inc		
Point Number	280.1		
Summary of Decision Requested:	<p>Amend Rule 22.2.1 Noise to align with the Waipa District Plan and implement the Environment Court Consent Order with regards to Mystery Creek Events Centre (see submission for copy of Consent Order).</p> <p>AND</p> <p>Amend the zoning to align with Waipa District Council's Operative District Plan to manage the Mystery Creek Events Centre and noise generation.</p>		
Decision Reasons:			

- Mystery Creek Event Zone is identified as a specific zone in the operative Waipa District Plan.
- Refer to Appendix B in submission for corresponding Map.
- Waipa District Plan specifies a noise contour specific to Mystery Creek Events Centre.
- Careful restrictions placed on noise and event activity within the operative Waipa District Plan's Mystery Creek Events Zone and Mystery Creek Noise Contour, including limits on the number of events per year.
- Main basis of noise controls is the Mystery Creek Noise Contour.
- Contour extends across event platform to the centreline of the Waikato River adjacent to the Eastern boundary of the MCRC events Zone.
- Refer to Appendix B in submission for corresponding map.

Point Number 280.2

Summary of Decision Requested: **Amend** Rule 23.2.1 Noise to align with the Waipa District Council operative District Plan and implement the Environment Court Consent Order (see submission for copy of Consent Order).

AND

Amend the zoning to align with Waipa District Councils Operative District Plan to manage the Mystery Creek Events Centre and noise generation.

Decision Reasons:

- Implement provisions outlined in Environment Court Consent Order issued 28 July 1997 between PM & VWR Lang, Waipa District Council, Waikato District Council and the NZ National Fieldays Society.
- Refer to Appendix C in the submission for Court Order.
- Court Order contemplated noise provisions in the Waikato District Plan.
- Provisions contemplated decibel levels between 40dBA and 50dBA and 55dBA during scheduled times.
- Rules incorporated in Waipa District Plan.
- Rules not incorporated in Waikato District Plan, believe to be an omission.
- Society considers WDC's agreement to introduce noise provisions set out in the Memorandum and Consent Order should be incorporated in provisions within the proposed Waikato District Plan.

Point Number 280.3

Summary of Decision Requested: **Amend** the Proposed District Plan to include a noise contour for Mystery Creek Events Centre to align with the noise contour in the Operative Waipa District Plan.

AND

Add the rules from the Waipa District Plan (see Appendix E attached to the submission).

Decision Reasons:

- Waipa District Council have a Mystery Creek Noise Contour.
- Noise contour stops at boundary between the Waipa and Waikato Districts.
- Noise contour does not stop in logical location.
- Refer to Appendix F for an example map of an appropriate noise contour.
- Consistency of approach with the Waipa District Plan.

Submitter Number: 281 **Submitter:** Zeala Ltd

Organisation: Trading as Aztech Buildings

Point Number 281.1

Summary of Decision Requested: **Defer** the hearing of submissions until after the adoption of the National Planning Standards, and/or after Stage 2 of the review of Future Proof/updated Waikato Regional Policy Statement.

Decision Reasons:

- Deferring the Proposed Plan will allow for more thorough editing of the document
- Legislative reforms are currently occurring with other documents being updated:
 - Draft National Planning Standards (NPS) have been through consultation, with indications of adoption in 2019. The NPS are set to improve consistency in Plan structure format and content. The Ministry for Environment has signaled a desire for cost savings and standardization - particularly with regard to definitions.
 - The Proposed Plan is required to 'give effect to' to the Objectives and Policies of the Operative Waikato Regional Policy Statement (WRPS). While the WRPS was Operative 2016, the Objectives and Policies are yet to fully encompass the northern areas of the District that transferred from the former Franklin District. The WRPS will be reviewed to encompass this additional area and is largely informed with regard to settlement patterns, by 'Future Proof', which is also being updated over the 2018/19 period.
- That National Standards, potential changes in land use patterns through the adoption of revisions in Future Proof that will then inform the WRPS raises question marks regarding the timing of the review as subsequent changes to the Proposed Plan brought about by these other documents will be unnecessarily time consuming and expensive

Point Number 281.2

Summary of Decision Requested: **Amend** Section 1.4.3.1 (a) Rural Activities as follows:

Productive rural activities are those activities that use rural resources for economic gain or which cannot be carried out easily or appropriately in an urban setting. Farming activities including dairy, dry stock, horse breeding, training, honey production, horticulture, pig and poultry, mining, and forestry are all significant industries in economic terms for the Waikato district.

Decision Reasons:

- Farming Activities includes a prescriptive list of activities. This list is not inclusive of all things that could be deemed farming activities and differs from the definition of farming within the Proposed Plan.
- Deleting the list does not detract from the Strategic Direction of the document.

Point Number	281.3
Summary of Decision Requested:	Amend Section 1.10.1.1 (a) Waikato District Development Strategy 2015 to refer to the correct Waikato Regional Policy Statement Policy as "6.1.1" rather than "6.11".
Decision Reasons:	<ul style="list-style-type: none"> • It refers to the wrong WRPS Policy.
Point Number	281.4
Summary of Decision Requested:	Retain Objective 5.1.1 (a)(i) and (ii) The rural environment.
Decision Reasons:	<ul style="list-style-type: none"> • The primacy of this Objective is supported. • Productivity of the Rural Sector is of National importance. • Primary Objective of Rural Environment recognises this importance. • Rules need to be consistent with this Policy.
Point Number	281.5
Summary of Decision Requested:	Retain Policy 5.3.2 Productive rural activities. AND Amend rules to be consistent with this policy.
Decision Reasons:	<ul style="list-style-type: none"> • Rural rules need to be consistent with this policy as in further submission points. • The policy recognises the importance of buildings associated with farming, rural industry and established rural activities and is supported.
Point Number	281.6
Summary of Decision Requested:	Amend Policy 5.3.5 (a) Earthworks activities as follows: <i>(a) Provide for <u>Enable earthworks</u> where they support rural activities including...</i>
Decision Reasons:	<ul style="list-style-type: none"> • Providing for earthworks "supporting" rural activities is not actually supportive if the rules unduly restrict such activities.
Point Number	281.7
Summary of Decision Requested:	Retain Policy 5.3.6(a) Intensive farming activities, except for the amendments sought below AND Amend Policy 5.3.6 (a) Intensive farming activities as follows: <i>Enable Provide for intensive farming activities provided they operate in accordance with industry best practice and management of that are not reliant on the productive capacity of the soil on the site provided that the operative effectively manages the adverse effects both on-site and on any neighbouring sites.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Support the enabling policy with regard to Intensive farming where the proposal is shown to mitigate the potential adverse effects of operations. • Amend the wording of what constitutes intensive farming so that the definition excludes farming operations that are dependent on the productive capacity of the soils on site. • Rules need to be consistent with this Policy – see following section on Rural Rules, while the current definition is not reflective of this Policy - and frankly does not make sense. • See later discussion on definition of Intensive farming.
Point Number	281.8
Summary of Decision Requested:	Add a new line to Policy 5.3.7 (a) Reverse sensitivity effects as follows: <i>(vi) <u>buildings associated with rural production.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> • This Policy should recognise that farming/the rural environment may also contain large buildings/structures associated with rural production such as covered feed pads, wintering barns, glass houses, barns, implement sheds etc. • Further having large rural buildings which may house farming stock, either on a temporary or permanent basis, enables the better mitigation of one of the potential adverse effects of ruminant stock (effluent disposal) by separated stormwater from animal effluent whilst the animals are housed. • This type of mitigation is supported at a Regional Council level. • Housing animals also results in increased productivity, reduction in waste product and reduced pugging.
Point Number	281.9
Summary of Decision Requested:	Retain Policy 5.3.7(h) Reverse sensitivity effects. AND Amend rules to be consistent with this policy.
Decision Reasons:	<ul style="list-style-type: none"> • Rural rules need to be consistent with this policy as discussed in other submission points.

- Support the enabling policy with regard to Intensive farming where best practice is followed with regard to mitigating the potential adverse effects of operations.

Point Number 281.10

Summary of Decision Requested: **Amend** Rule 14.2.3 Discretionary Activities to exclude farm irrigation/drains. (This relates to the changes sought to the definition of "Infrastructure" to exclude farm irrigation/drains elsewhere in the submission).

Decision Reasons:

- Infrastructure includes drainage - Discretionary or Non-Complying Activities status may apply for earthworks associated with farm drainage. This is in conflict with the Rural Objectives and Policies relating to Earthworks.

Point Number 281.11

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays – Industrial activities as follows:

1 car space per 1002m² GFA for the first 500m² of any tenancy and thereafter 1 space per 500m².

Decision Reasons:

- The parking standard for industrial buildings does not recognise the differing nature of Industrial buildings or the nature of the activities within such buildings with failure triggering Restricted Discretionary Assessment.
- A large storage warehouse will not necessarily require 20 times as many car parking spaces as an industrial building 1/20th the scale. Most TA's use a sliding scale to recognise this.

Point Number 281.12

Summary of Decision Requested: **Amend** Rule 22.1.3 RD1 Restricted Discretionary Activities so that Intensive Farming is a Permitted Activity subject to compliance with standards that reflect the potential adverse effects of differing types of intensive farming.

AND

Add a Restricted Discretionary Activity for Intensive Farming activities that do not comply with the Permitted Activity Standards, where the potential effects (odour, noise and visual amenity) are able to be assessed to avoid, remedy or mitigate such effects.

AND

Amend the yard setback requirement to 100 metres for Intensive Farming as a Permitted Activity.

AND

Delete the specific building coverage requirement for intensive farming and rely on the building coverage standards within Rule 22.3.6 and other general development standards within the Rural Zone, noting that the effects of "farming" operations that do not comply with standards relating to activities, effects or building contained in Rules 22.12, 22.2 and 22.3 (unless otherwise specified as controlled, restricted discretionary or non-complying), default to full Discretionary assessment under Rule 22.1.5.

Decision Reasons:

- There is no justification within the Objectives or Policies of the Rural zone for the classification of Intensive Farming as a Restricted Discretionary Activity.
- Further failure of the 'development standards' (land use effects and building effects rules) mean automatic default to Non-Complying.
- The proposed rules creates unnecessary restrictions on the ability to establish Intensive Farming operations on smaller land holdings.
- Standards that need to be met to achieve the Restricted Discretionary Activity include a setback of 300 meters for any building or yard from any site boundary (where the activity is deemed to be Intensive Farming).
- The impact of such restrictions would be that a small intensive farming operation would need to be located on approximately 40 hectares of land to avoid NON-COMPLYING status - this is not consistent with the Objectives and Policies for Intensive Farming.
- The proposed Rule creates unnecessary restrictions on the ability to establish Intensive Farming Operations on smaller land holdings and is counter intuitive to the nature of Intensive Farming Operations which normally take place on such smaller holdings and are non-reliant on the productive capacity of the land.
- There is no justification for the 300 meter yard separation in dealing with the effects of buildings or yards associated with Intensive Farming, where the policy acknowledges potential effects are odour, noise, and visual amenity, and where such effects are 'permitted' for other rural activities. (green houses, silage bins, normal farming practices).
- The proposed rule does not recognize the potential positive environmental effect of buildings housing animals (either temporarily or permanently) in effectively separating stormwater from animal effluent, increased productivity through reduced farm pugging.

Point Number 281.13

Summary of Decision Requested: **Retain** the permitted activity status for ancillary rural earthworks in Rule 22.2.3.1 RD1 (a)(i) Earthworks General

AND

Add a new clause (v) to Rule 22.2.3.1 (a) Earthworks General as follows:

(v) for building works authorised by a building consent, and the area of earthworks is no more than 150% of the area of those building works and occurs on land with an average gradient no steeper than 1:8.

Decision Reasons:

- While the 'permitted activity' status for ancillary rural earthworks is supported the definition of ancillary rural earthworks (point 3 of the definition) creates some uncertainty over the extent of works which could be deemed permitted (i.e. earthworks for structures associated with farm buildings).
- The Waikato Section of Operative District Plan included permitted activity status for earthworks necessary for building works authorized by a building consent provided that the area of earthworks is no more than 150% of the area of those building works and occurs on land with an average gradient no steeper than 1:8.

Point Number 281.14

Summary of Decision Requested: **Amend** terminology in the Proposed District Plan to provide consistency between maps and text, particularly with respect to overlays.

Decision Reasons:

- There appears to be some inconsistency in terminology used in the Overlays on the Planning Maps versus provisions within the text – for example in the Rural Zone referencing "Outstanding Natural Character" versus "Maps Natural Character".

Point Number	281.15
Summary of Decision Requested:	Delete the definition of "Animal Feed Lot" in Chapter 13: Definitions.
Decision Reasons:	<ul style="list-style-type: none"> • It does not appear to be referenced elsewhere in the plan • Animal feed lot does not appear in either the list of landuse activities, land use effects, or land use buildings. • The reference in the definition to the "intensively feeding animals" could give rise to confusion around "Intensive Farming".
Point Number	281.16
Summary of Decision Requested:	<p>Amend the definition of "Fill Material" in Chapter 13: Definitions as follows:</p> <p><i>Means material used for filling activities including, <u>but not limited to, materials such as sand</u>, soil, clay or aggregate.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Clarify that the list is not inclusive - other materials could be fill such as sand.
Point Number	281.17
Summary of Decision Requested:	<p>Amend the definition of "Impervious Surface" in Chapter 13: Definitions as follows:</p> <p><i>Means a surface such as a road, rooftop, footpath, paving, decking, swimming pool, patio, driveway, vehicle access and manoeuvring area or highly-compacted soil that is not vegetated and does not infiltrate runoff. It excludes wooden decks with spacing between boards of 4mm or more, or surfaces such as gobi paving, where water is allowed to drain through to a permeable surface below the deck.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Definition is unduly restrictive and does not cater for 'pervious' materials that may be used for driveways etc.
Point Number	281.18
Summary of Decision Requested:	Amend clause (e) and (f) of the definition of "Infrastructure" in Chapter 13: Definitions to exclude farm irrigation/drains.
Decision Reasons:	<ul style="list-style-type: none"> • It may be interpreted to include farm irrigation and farm drains
Point Number	281.19
Summary of Decision Requested:	<p>Delete the whole definition of "Intensive Farming" in Chapter 13: Definitions</p> <p>AND</p> <p>Add the following replacement definition for "Intensive Farming" in Chapter 13: Definitions:</p> <p><i><u>Means the commercial raising and keeping of plants or animals contained in buildings or outdoor enclosures, that occurs independent of the soil fertility on the site, is dependent on a high input of food or fertiliser from beyond the site, and may (but not necessarily) involve artificially controlled growing conditions. It may include the use of feedlots for farmed animals; free range, farming where feed is introduced from off site, and vegetable, fruit and herb growing operations indoors in artificially controlled growing conditions.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> • The proposed definition of "Intensive Farming" does not make sense and is not consistent with the Objectives and Policies relating to Rural Productivity and Rural Effects and should be amended. • What constitutes Intensive Farming throughout various Local Authorities varies, but the overriding theme relates to the lack of reliance on the productive capacity of the soils on site. I.e. factory farming where feed is imported and not grown in-site.

Point Number 285.2
Summary of Decision Requested: Retain Chapter 27 - Te Kowhai Airpark Zone, as notified.
Decision Reasons:

- No reasons provided.

Submitter Number: 286 **Submitter:** Lorraine Dixon
Organisation: Waikato-Tainui

Point Number 286.1

Summary of Decision Requested: **Add** provisions to the Proposed District Plan to enable land in Te Wherowhero title at Hopuhopu to be planned for, developed and used in accordance with the mandate outlined below (or words to similar effect):

(b) Other land is held in Te Wherowhero title, created under the Waikato Raupatu Claims Settlement Act 1995. Te Wherowhero title land is held by Custodian Trustees for the benefit of all Waikato. The former Hopuhopu military base, now the site of Waikato-Tainui College for Research and Development and other activities, is in Te Wherowhero title. The district plan addresses this land differently from other Maori land. Business and Residential zoned areas at Hopuhopu are subject to the plan provisions that apply to those zones. The remainder of Hopuhopu is a specific site in the Rural Zone.

AND

Add a new point to Section 2.6 - Powers to set aside Maori Land for special purposes, (b), as follows:

(b) The district plan adopts a different approach to land at Hopuhopu in Te Wherowhero title. Rural Zoned land is identified as a specific site, enabling a range of activities appropriate to the aspirations of the Waikato Raupatu Claims Settlement Act 1995 and the Deed creating the Waikato Raupatu Lands Trust (1995.) Business and Residential zoned areas at Hopuhopu are subject to the plan provisions that apply to those zones.

AND

Add a new point to Section 2.8 - Concept Management Plan, as follows:

(c) At Hopuhopu, a concept management plan is required for some permitted activities. The concept plan for Hopuhopu is not subject to Maori Land Court approval.

AND

Add a new point to Section 2.13.1 - Policy Tangata Whenuatanga (utilisation by landowners), as follows:

(d) That the Te Wherowhero title at Hopuhopu can be sustainably used and developed.

AND

Add a new policy to Section 5.3 - Rural Character and Amenity after Policy 5.3.17, as follows:

Policy - Specific Area - Hopuhopu

(a) Provide for a range of activities on the land in Te Wherowhero title at Hopuhopu to plan for, develop and use the land in accordance with the mandate of the title, including the Waikato-Tainui College for Research and Development and associated facilities, sports facilities, hauora, marae complexes and associated facilities, and papakainga housing development according to customs and practices.

AND

Add a new section to Chapter 22 - Rural Zone after Section 22.8, as follows:

22.9 Specific Area - Hopuhopu

22.9.1 Application of Rules

(a) The rules that apply to the Hopuhopu specific area as identified on the planning maps are as follows:

(i) Rule 22.1 Land Use - Activities, and the additional permitted and discretionary activities identified in rules 22.9.2 and 22.9.3;

(ii) Rule 22.2 Land Use - Effects;

(iii) Rule 22.3 Land Use - Building; and

(iv) Rule 22.4 - Subdivision.

22.9.2 Permitted Activities - Hopuhopu

(a) Additional permitted activities at Hopuhopu:

P1: Education facilities - A concept management plan is provided.

P2: Marae complex - A concept management plan is provided.

P3: Papakainga Housing Development and Papakainga building - A concept management plan is provided.

P4: Place of assembly - A concept management plan is provided.

P5: Hauora - A concept management plan is provided.

P6: Recreational facility - A concept management plan is provided.

P7: Cultural events - Nil.

P8: Sports - Nil.

P9: Informal recreation - Nil.

P10: Water bulk storage infrastructure and associated easements - Nil.

22.9.3 Discretionary Activities - Hopuhopu

(a) The activities listed below are discretionary activities.

D1 - Any permitted activity that does not comply with an activity specific condition in Rule 22.9.2.

AND

Amend the planning maps by Hopuhopu Specific Area.

AND

Amend Chapter 13 - Definitions, by adding a definition for the "Hopuhopu Specific Area" as follows:

Hopuhopu Specific Area means the area shown on the planning maps.

Decision Reasons:

- To enable the land at Hopuhopu to be planned for, developed and used in accordance within the mandate of the Te Wherowhero title. This submission addresses a gap in the Proposed Plan. Hopuhopu will not get the benefit of the proposed new rules that confer

additional permitted activities on Maaori freehold land, because Hopuhopu is in special Te Wherowhero title created under the Waikato Raupatu Claims Settlement Act 1995.

- The removal of the Pa Zone results in Hopuhopu losing some permitted activities under the operative plan.
- The majority of Hopuhopu is in the Rural Zone, and the best approach for the district plan is to identify the rural part of Hopuhopu as a specific area in the Rural Zone, with appropriate rules. This fits the existing plan structure, which provides for some rural sites to be managed as specific areas, including agricultural research centres and Huntly power station facilities.

Point Number 286.2

Summary of Decision Requested: Retain areas of Hopuhopu in the Residential Zone being managed under the ordinary rules of that zone.

Decision Reasons:

- No reasons provided.

Point Number 286.3

Summary of Decision Requested: Retain areas of Hopuhopu in the Business Zone being managed under the ordinary rules of that zone.

Decision Reasons:

- No reasons provided.

Point Number 286.4

Summary of Decision Requested: No specific decision sought but submission generally supports the direction that Waikato District Council has taken in the development of the plan. Waikato-Tainui also see parts of the plan that can be improved, with a particular focus on the areas that effect Waikato-Tainui people.

Decision Reasons:

- Waikato-Tainui recognises the challenges of the growth pressures, and the large area covered by the district, the proximity to the fast-growing Hamilton City and limitations on funding available.

Point Number 286.5

Summary of Decision Requested: Waikato-Tainui support every opportunity for the planning process to become more streamline and less time consuming.

Decision Reasons:

The proposed plan should provide a document framework that is simple to understand and can be used by all.

Effort should be made to reduce the amount of time required by Waikato-Tainui staff and the community in general to understand the plan the implications for development.

Point Number 286.6

Summary of Decision Requested: No specific decision sought but the submission supports and promotes a co-operative and collaborative approach to natural resource and environmental management, restoration, responsibilities and care within the Waikato-Tainui rohe.

Decision Reasons:

- Mana whakahaere embodies the authority that Waikato-Tainui have established in respect of the environment and view the holistic integrated management of the environment of utmost importance.
- Waikato-Tainui are responsible for protecting and nurturing the mauri of all living things in accordance with tikanga.
- Waikato-Tainui welcomes the District plan that is intended to align and integrate the resource management system to enhance iwi and hapuu participation and that it provides robust and durable planning and environmental outcomes.

Point Number 286.7

Summary of Decision Requested: No specific decision sought but the submission opposes any legislative and policy development that may undermine participation in resource management processes that have been achieved to date. In respect of the Waikato River, Te Ture Whaimana/the vision and Strategy for the Waikato River is of paramount importance and must continue to prevail over other planning instruments and to ensure the Vision and Strategy is given effect to. Waikato-Tainui participation in planning processes relating to the Vision and Strategy must not be diluted.

Decision Reasons:

- Waikato-Tainui are Tangata whenua of the Waikato and Auckland regions including West Coast Harbours (Manukau, Whaingaroa, Aotea and Kawhia) the coastal areas of these regions.
- Waikato-Tainui are recognised as kaitiaki of their environment and view the holistic integrated management of the environment of utmost importance.
- Te Ture Whaimana is intended to be the primary direction-setting document for the Waikato River and activities within its catchment affecting the River.
- Te Ture Whaimana has certain status and prevails over any inconsistencies in other policies, plans, or processes affecting the Waikato River. Relevant policies, plans and processes cannot be amended so that they are inconsistent with Te Ture Whaimana and must be reviewed and amended, if required to address any inconsistencies.
- Resource management, use and activities with the Waikato River catchment in the Waikato-Tainui rohe are to be consistent with Te Ture Whaimana.
- Crown Iwi Accords reflect a commitment between the Crown and Waikato-Tainui to enter an era of co-management over the Waikato River with the overarching purpose of restoring and protecting the health and wellbeing of the Waikato River for future generations.
- The Waikato River Settlement provide for the establishment of Joint Management Agreements (JMAs) between local authorities and Waikato-Tainui and this provides the opportunity to sit at the table with local authorities and participate in the local government activities so far as they relate to the river.

Point Number 286.8

Summary of Decision Requested: No specific decision sought but the submission seeks to ensure that all plans and policies aligns with the outcomes of important tribal documents: Tai Tumu, Tai Pari, Tai Ao Waikato-Tainui Environmental Plan, and Whakatapuranga Waikato-Tainui 2050 Strategic Plan.

Decision Reasons:

- The Waikato-Tainui Environmental Plan is designed to enhance Waikato-Tainui participation in resource and environmental management.
- Waikato-Tainui acknowledges there may be more than one agency involved in the successful achievement of the Plans objectives due to different mandate, legislation, drivers and motivation across external agencies. Waikato-Tainui encourages and advocates for external agencies to do what they can to achieve the Plans objectives.
- Waikato-Tainui support and promotes a coordinated, co-operative and collaborative approach to environmental management across the Waikato-Tainui rohe.
- Whakatapuranga Waikato-Tainui 2050 is the strategic plan blue print for the cultural, social and economic advancement of Waikato-Tainui.

Point Number 286.9

Summary of Decision Requested: No specific decision sought but the submission supports the introduction of a specific chapter addressing Tangata whenua concerns, issues and opportunities.

Decision Reasons:

- The Tangata whenua Chapter discusses statutory responsibilities that are required of the Treaty of Waitangi, The Waikato River Settlement Act 2010 and the Resource Management Act amongst others. It is important to Waikato-Tainui that this recognition of responsibilities and commitments that the crown has made are acknowledged throughout the plan and how it is implemented.

Point Number 286.10

Summary of Decision Requested: Amend the Proposed District Plan to ensure that the Objectives, Policies, principles and intent of the Tangata Whenua Chapter is provided for across the plan and how it is implemented.

Decision Reasons:

- It is important the Tangata whenua issues are addressed throughout the proposed plan to ensure a holistic approach is taken to resource management, consistent with the principles of whakapapa, whanaunatanga, tangata whenuatanga, and kaitiaki.
- These principles are a way to interact and behave with the environment. By including these principles in the Proposed District Plan, Waikato District Council is committing to observe and work consistently with these principles.
- It is important to Waikato-Tainui that this recognition of responsibilities and commitments that the crown has made are acknowledged throughout the plan and how it is implemented.

Point Number 286.11

Summary of Decision Requested: Amend the Proposed District Plan to allow for greater use of Maatauranga Maaori.

Decision Reasons:

- Waikato-Tainui expects that Waikato District Council look to Maatauranga Maaori to remedy adverse effects of development.
- Maatauranga Maaori is increasingly being used as conditions of resource consents and in the identification of restoration projects as an alternative to engineering solutions.
- The Proposed Plan should signal and provide for greater opportunities to utilise Maatauranga Maaori for the benefit of the environment.

Point Number 286.12

Summary of Decision Requested: Amend the Proposed District Plan to ensure that the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao has been included, following engagement with Waikato-Tainui.

Decision Reasons:

- Waikato-Tainui considers greater regard be given to the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao than has occurred in the notified version.
- This statutory document provides significant information to provide council staff and the community in general an understanding of the expectations upon resource users in the rohe.
- In particular, but not limited to, Waikato-Tainui consider that greater weight and consideration should have been given to Chapter 7 of the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao which discusses Environmental Enhancement. At its core this chapter requires resource users not to simply mitigate adverse effects on the environment, but to act in a manner that enhances an environment for the betterment of the natural resource.
- There may be future opportunities for Waikato-Tainui and Council to develop initiatives and programmes of work where marae and Maaori owned land is better utilised.

Point Number 286.13

Summary of Decision Requested: No specific decision sought but submission supports the identification of areas of high and outstanding natural character and outstanding natural features and landscapes, and the engagement of experts in this field and with mana whenua.

Decision Reasons:

- No reason provided.

Point Number 286.14

Summary of Decision Requested: Amend the Proposed District Plan to include the Waikato River in its entirety as both an Outstanding Natural Feature and an Outstanding Natural Landscape

AND

Amend the Proposed District Plan maps to include the Waikato River in its entirety as both an Outstanding Natural Feature and an Outstanding Natural Landscape.

Decision Reasons:

- Waikato-Tainui do not support the assessment of the non-inclusion of the Waikato River as an Outstanding Natural Feature and/or Landscape.
- Waikato-Tainui do not believe that parts of the Waikato River can be cut into sections and not viewed holistically.
- The assessment of the Waikato River as an Outstanding Natural Feature and Landscape is both a historic and contemporary issue. A variety of legislative and policy directions have been developed that support the identification of the Waikato River as an Outstanding Natural Feature and Landscape.
- The Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010 talks of the significance and holistic nature of the Waikato River is viewed. The submission quotes Part 2, Settlement redress through legislation (8).
- This acknowledgement by the Crown, that the Waikato River should be considered in its entirety and not divided, as it has been assessed in the Proposed District Plan, provides what the river settlement legislation was seeking.
- The Vision and Strategy for the Waikato River was required to be included without amendment in the Waikato Regional Policy Statement. The Regional Policy Statement review assessed the Waikato River as an Outstanding Natural Feature and Landscape. This was removed in the decision's version on the basis that the Waikato River had been modified too significantly, in particular the part of the river flowing through Hamilton City to be deemed an Outstanding Natural Feature or Landscape and that the necessary assessments and understanding of the cultural significance has not been undertaken to support the rivers inclusion.
- Fast forward to the current situation where Waikato District Council are assessing the river at a more detailed district level, that does not include Hamilton City. In addition Waikato District Council have a greater understanding of the cultural significance of the Waikato River to Waikato-Tainui through the engagement process.
- The Proposed Plan and maps provide for the Waikato River as an Outstanding Natural Feature, only from the river Delta to inside the river mouth. Waikato-Tainui are of the opinion the Waikato River is an Outstanding Natural Feature in its entirety and the reasons for it not attaining regional significance was based on interpretation and lack of work on behalf of those researching the cultural significance of the river.
- The Waikato River is recognised by statute and is the subject of a previously unique authority that funds the restoration and protection annually. Alone this legislative weight potentially justifies its status as an Outstanding Natural Feature and Landscape at a district level.

- Of more importance is the cultural connection that Waikato-Tainui have with the Waikato River. Whilst the landscape assessment attached to the Proposed Plan does not support the entire river being included, it does as a starting point provide justification as to how the assessment was made (submission refers to the Proposed Plan Appendix 3).
- The cultural and heritage values do not neatly fit into the specific feature or landscape assessment criteria, however engagement with iwi and understanding the districts identity should have seen the Waikato River included as an Outstanding Natural Feature or Landscape or both. The lines that are blurred on the margins of the river by wetlands, tributaries, islands and river use in general only add to the rivers significance. Because the river does not sit neatly as an Outstanding Natural Feature or Outstanding Natural Landscape, that it should be considered both, and afforded the highest protection rather than defaulting to a partial categorisation that undermines its significance.
- The assessment criteria used appears to isolate features or places, rather than taking a more holistic approach. If this had been the case Waikato-Tainui assume that the Waikato River would have been deemed Outstanding; both as a landscape and a feature.

Point Number 286.15

Summary of Decision Requested: Amend the Proposed District Plan after undertaking a natural character assessment for the Waikato River to determine if there are any areas of high or outstanding natural character.

Decision Reasons:

- Waikato-Tainui have concerns that no natural character assessment has been undertaken for the Waikato River.

Point Number 286.16

Summary of Decision Requested: Amend the property description and title number SA57C/456 relating to 333 Old Taupiri Road and 467 Hakarimata Road to correct an error where both are referenced under same property description and title number.

Decision Reasons:

- Seeks to clarify and remedy an administrative error.

Point Number 286.17

Summary of Decision Requested: Amend the zoning at 333 Old Taupiri Road to a specific Hopuhopu Zone.

Decision Reasons:

- To remove confusion and provide clarity around future uses, Waikato-Tainui consider that providing for a Hopuhopu Zone is appropriate. The variety of activities that currently occurs at Hopuhopu and, the future aspirations for the site demand greater clarity.
- Waikato-Tainui considers that sufficient time will be available pre-hearing, that a Hopuhopu Zone can be drafted and presented to commissioners. This should be developed as a partnership between Waikato District Council and Waikato-Tainui.

Point Number 286.18

Summary of Decision Requested: Amend the description of 333 Old Taupiri Road to remove the incorrect reference to a Paa site.

Decision Reasons:

- The 467 Hakarimata Road site was a pre-1900 paa site, and the Old Taupiri Road site (Hopuhopu) was not.
- This places overly restrictive controls on this site and no historical Paa site zoning should apply or whatever the new definition or zoning is applied to this site.

Point Number 286.19

Summary of Decision Requested: No specific decision sought but the submission supports the introduction of Concept Management Plans.

AND

Amend the Proposed District Plan to provide greater clarity as to what information must be provided when developing a Concept Management Plan.

AND

Provide further information as to how Concept Management Plans will be implemented as part of a Resource Management Act process.

AND

Provide greater clarity as to the application of the plan if, a Concept Management Plan is not developed.

AND

Provide greater clarity as to who resources the development of Concept Management Plans and what council information and assistance will be provided to marae and/or trusts.

Decision Reasons:

- The ability of marae or trusts to develop Maaori Freehold Land has historically proven challenging and any initiative that remedies this is generally supported.
- Aside from the RMA issues around Concept Management Plans, Waikato-Tainui understands the key benefits being the development of papakainga housing and the ability to futureproof in some situations future land use. This is supported provided additional resource consents are not required to satisfy district plan requirements.
- Waikato-Tainui seek additional information as to the implementation of the plans. Whilst the introduction of Concept Management Plans and the potential for reduce regulation is positive, Waikato-Tainui want to ensure that the development of these plans is not overly onerous. Waikato-Tainui do not want to see individual marae or Maaori freehold land owners required to provide a Concept Management Plan and then still require further resource consents application to satisfy district plan requirements.
- The development and process of Concept Management Plan requires greater explanation in the proposed plan. Whilst Waikato-Tainui support ease of development on marae and Maaori freehold land, the potential still remains for a lengthy consenting process.
- Clarification is also sought in the proposed plan as to the application of the plan zoning when a Concept Management Plan is not developed. It is presumed that this means the underlying zone applies and this could create issues for those located in Residential and Rural Zones. It is understood that marae and papakainga housing will default to Discretionary Activity status without an approved Concept Management Plan. This would appear to be a restrictive activity status for what could be small scale development.

Point Number 286.20

Summary of Decision Requested: Amend the Proposed District Plan to ensure consistency of wording in the Rural and Residential Zones in relation to the approval process for a Concept Management Plan.

Decision Reasons:

- Waikato-Tainui seek additional information as to the implementation of the plans. Whilst the introduction of Concept Management Plans and the potential for reduce regulation is positive, Waikato-Tainui want to ensure that the development of these plans is no overly

- onerous. Waikato-Tainui do not want to see individual marae or Maaori freehold land owners required to provide a Concept Management Plan and then still require further resource consents application to satisfy district plan requirements.
- The development and process of Concept Management Plan requires greater explanation in the proposed plan. Whilst Waikato-Tainui support ease of development on marae and Maaori freehold land, the potential still remains for a lengthy consenting process. Clarification is also sought in the proposed plan as to the application of the plan zoning when a Concept Management Plan is not developed. It is presumed that this means the underlying zone applies and this could create issues for those located in Residential and Rural Zones. It is understood that marae and papakainga housing will default to Discretionary Activity status without an approved Concept Management Plan. This would appear to be a restrictive activity status for what could be small scale development.
 - Aside from the RMA issues around Concept Management Plans, Waikato-Tainui understands the key benefits being the development of papakainga housing and the ability to futureproof in some situations future land use. This is supported provided additional resource consents are not required to satisfy district plan requirements.

Point Number 286.21

Summary of Decision Requested: Amend the Proposed District Plan to provide for a new district-wide Maaori land Chapter, which provides a specific objective and policy framework, a wider range of activities relevant to Maaori land, such as Urupaa and koohanga (could be specifically identified rather than just covered under the definition of Marae Complex), and Concept Management Plans which provide for permitted activities. This chapter would apply district wide and ensure the benefits are not limited to certain zones.

Decision Reasons:

- Waikato-Tainui consider a more effective and efficient method of providing for the use and development of Maaori land in accordance with matauranga and tikanga is by way of a district-wide Maaori land chapter.
- In addition to the practical benefits, this would ensure that the Tangata Whenua Chapter as notified is brought through the entire plan, not simply a heading at the beginning of the proposed plan. This approach has been successful implemented in the Auckland Unitary Plan.

Point Number 286.22

Summary of Decision Requested: Amend the definition of "Marae Complex" in Chapter 13 Definitions as follows:

Means a group of buildings that constitutes a marae and can be made up of a whareniui (meeting house), wharekai (eating house), an aatea (courtyard area in front of the whareniui), urupaa (graveyard), waahu (memorial stones sacred place for ritual practices), waharao (archway entrance at the entrance to the aatea), and other buildings, (church, hauora (health clinic), koohanga (pre-school), conference centre and facilities, waananga (education facility), recreation facilities, places of cultural significance, a papakainga/papakainga building and utility services).

Decision Reasons:

- Waikato-Tainui seek the definitions that apply to Maaori land are clarified. Some definitions remain undefined and very broad.

Point Number 286.23

Summary of Decision Requested: Amend the definition of "Maaori Freehold Land" in Chapter 13 Definitions to be consistent with section 129(2)(b) of the Te Ture Whenua Maaori Act 1993.

Decision Reasons:

- Waikato-Tainui seek the definitions that apply to Maaori land are clarified. Some definitions remain undefined and very broad.

Point Number 286.24

Summary of Decision Requested: Amend the definition of "Maaori Customary Land" in Chapter 13 Definitions to be consistent with section 129(2)(a) of the Te Ture Whenua Maaori Act 1993.

Decision Reasons:

- Waikato-Tainui seek the definitions that apply to Maaori land are clarified. Some definitions remain undefined and very broad.

Point Number 286.25

Summary of Decision Requested: Place the district plan review process on hold so that the outcomes of the blueprinting exercise can be accommodated in the District Plan, including the development of structure plans.

Decision Reasons:

- Waikato-Tainui are pleased that structure plans were referenced in various parts of the Proposed District Plan, however there appears to be an absence of structure plans when attempting to locate them in the plan.
- Waikato-Tainui understands a 'Blueprinting' exercise is currently underway and will provide the basis for any future structure plans. Whilst this initiative is supported, it is considered that the timing of this process is unfortunate and would have been more effective if the process had been undertaken pre notification of the Proposed District Plan. The concern is, the Blueprinting exercise and potential structure plans will require a plan change process to implement as part of the district plan. Locations such as Huntly, Mercer and Pokeno are in need of high-level planning assessment and it is disappointing that resource and time are required to get these guiding plans part of the district plan.

Point Number 286.26

Summary of Decision Requested: No specific decision sought but submission requests the blueprint and structure plan processes recognise tikanga and Maatauranga Maaori.

Decision Reasons:

- Waikato-Tainui are of the opinion that any structure plans or Blueprinting exercises should recognise Waikato-Tainui tikanga and Maatauranga Maaori, to reflect the districts rich Maaori heritage.

Point Number 286.27

Summary of Decision Requested: Amend the Proposed District Plan to provide setbacks from the waterways that are consistent with Proposed Plan Change 1 to the Waikato Regional Council and gives effect to the Vision and Strategy for the Waikato River and the Waikato-Tainui Environmental Plan.

Decision Reasons:

- Waikato-Tainui have concerns that the earthworks setbacks do not adequately protect waterways and fail to be consistent with the notified Proposed Plan Change 1 to the Waikato Regional Plan. This plan change process triggered by the need to give effect to the Vision and Strategy for the Waikato River requires a minimum setback of 5m from a waterway (for cropping only) to be considered a permitted activity. The Proposed Waikato District Plan allows for a 1.5 setback in the Residential Zone and appears to have no setbacks at all for earthworks in the Rural Zone.
- The lack of a setback is inappropriate and has failed to have regard to the Vision and Strategy for the Waikato River and the Waikato-Tainui Environmental Plan. As a minimum it would be anticipated that the Proposed District Plan change would be consistent with

Point Number	286.28
Summary of Decision Requested:	Retain earthworks on Maaori Sites of Significance and Maaori Areas of Significance as a restricted discretionary activity.
Decision Reasons:	<ul style="list-style-type: none"> Waikato-Tainui support this as early warning when such activities are being undertaken is desirable.
Point Number	286.29
Summary of Decision Requested:	Retain the activity status and clearance thresholds for indigenous vegetation clearance for marae, dwellings and papakainga on Maaori Freehold Land or Maaori Customary Land.
Decision Reasons:	<ul style="list-style-type: none"> Waikato-Tainui support the ability to clear indigenous vegetation for the purpose of establishing these activities on Maaori Freehold Land or Maaori Customary Land.
Point Number	286.30
Summary of Decision Requested:	Amend the Proposed District Plan to provide for earthworks in Significant Natural Areas that are for the establishment of marae, papakainga, dwellings and associated access, parking and manoeuvring as a permitted activity.
Decision Reasons:	<ul style="list-style-type: none"> Earthworks within a Significant Natural Area associated with marae, papakainga and dwellings are not afforded the same permitted status as vegetation clearance and would be a restricted discretionary activity. There seems little point in providing for a permitted indigenous clearance for these activities but then requiring resource consent for earthworks. As currently proposed, consent for a restricted discretionary activity would potentially need to be obtained to establish building platforms and access.
Point Number	286.31
Summary of Decision Requested:	Retain the permitted activity provisions for indigenous vegetation clearance associated with the gathering of plants in accordance with Maaori customs and values.
Decision Reasons:	<ul style="list-style-type: none"> This is supported.
Point Number	286.32
Summary of Decision Requested:	Amend Policy 4.7.3 (a) (xvi) Residential subdivision to refer to low impact stormwater design. AND Amend the Proposed District Plan to clarify situations where low impact design is not appropriate.
Decision Reasons:	<ul style="list-style-type: none"> Amendments to Policy 4.7.3 would improve consistency with Policy 6.4.7 Stormwater which does mention low impact design being adopted where appropriate. The language used references low impact design 'where appropriate' understanding of where it would not be appropriate is sought. An example of this is in 14.11 Water, wastewater and stormwater.
Point Number	286.33
Summary of Decision Requested:	Amend the Proposed District to utilise Low Impact Design in all new developments.
Decision Reasons:	<ul style="list-style-type: none"> Clarification is sought as to why Council would not be seeking best practice low impact design for the management of stormwater to reduce the demand and load on existing infrastructure.
Point Number	286.34
Summary of Decision Requested:	Amend the Proposed District Plan to re-instate deferred zoning to a point in time when Waikato District Council have clarity around their wastewater infrastructure and are not reliant on outdated technology that is currently causing negative environmental outcomes.
Decision Reasons:	<ul style="list-style-type: none"> The Proposed District Plan 'live zones' or assigns Residential Zoning to areas of land that were previously Rural Zone/Future Urban/Deferred Zones. For most of this land there is uncertainty around infrastructure timing and funding, and structure planning is yet to be undertaken. Given the wastewater issues that the Council currently have and are facing in the future it seems almost impossible that Council infrastructure will be able to cope with the live zoning of the district. Waikato-Tainui are concerned that live zoning will create an expectation that the Waikato River will be absorbing greater volumes of wastewater and stormwater discharge. This expectation is contrary to and does not give effect to the Vision and Strategy for the Waikato River. Waikato-Tainui strongly oppose this proposition and believe deferred zoning is required in most if not all locations that cannot be catered for through existing infrastructure.
Point Number	286.35
Summary of Decision Requested:	Amend Chapter 14 Infrastructure to provide clear provisions to manage the effects of infrastructure and energy activities on Maaori Areas of Significance and Maaori Sites of Significance. This may include amending the activity status, rules and defining terms such as "identified areas."
Decision Reasons:	<ul style="list-style-type: none"> Chapter 14 states that the zone chapters are their associated overlays, objectives, policies and rules do not apply to infrastructure and energy activities unless specifically referred to within the Infrastructure and Energy Chapter. In other words, Chapter 14 is largely designed to be self-contained and standalone.

- Clarity is sought to what activity status and provisions would apply to infrastructure and energy activities proposed on Maaori Areas of Significance or Maaori Sites of Significance. Throughout the Chapter the terminology "identified areas" is used. This term is not defined in Chapter 13 Definitions and therefore it is unclear if this is intended to capture Maaori Areas of Significance or Maaori Sites of Significance.
- Without clear provisions regarding infrastructure and energy activities Maaori Areas of Significance or Maaori Sites of Significance there is a risk that these areas and sites may be adversely affected by activities with very few checks and balances in place. It is important to note that not all Areas of Significance to Waikato-Tainui are listed or public knowledge, this is well understood by all parties. For this reason, concerns exist that if infrastructure development was occurring, site disturbance could occur at sites of significance without the knowledge of Waikato-Tainui or the infrastructure provider.

Point Number 286.36

Summary of Decision Requested: **Withdraw** or place on hold the Proposed Waikato District Plan review process to allow for the Hazards Chapter to be developed, integrated and considered as part of a thorough district plan review process.

Decision Reasons:

- Waikato-Tainui are concerned that the Natural Hazards Chapter has been omitted from the notified Proposed District Plan. It is challenging to consider a Proposed District Plan without a natural hazards chapter in the plan.
- Given the vast array of natural hazards in the district, Waikato-Tainui are of the opinion that it is not realistic to progress the plan without this chapter being considered in tandem with the other chapters of the plan.
- This is a major flaw in the process and to ensure consistency and integration across the plan.

Point Number 286.37

Summary of Decision Requested: **Add** clear provisions for genetically modified organisms that include:

- precautionary policies to regulate the outdoor use of genetically modified organisms;
- prohibit the release of genetically modified organisms on land; and
- make field trials a discretionary activity with performance standards in regard to liability and the posting of bonds.

Decision Reasons:

- Waikato-Tainui are concerned about the potential risks posed by releasing genetically modified organisms (GMOs) into the environment. It considers the science is unproven and the risk of biological and ecosystem harm is too great not to include precautionary provisions for GMOs under local plans.
- Equally important is the risk to social, economic, and cultural wellbeing, even if the Council considers that GMOs pose no biological or ecosystem risks. GMO contamination could have significant adverse effects on the economic markets, way of life, for both organic and non-GMO food producers and the mauri and tikanga of Tangata whenua.
- The Waikato-Tainui Environmental Plan takes a precautionary approach to GMOs and specifies that application for new organisms and GMOs must demonstrate that there are no risks to humans, indigenous ecosystems, indigenous species, or primary production.
- The draft Maniapoto Environment Plan also takes a precautionary approach to GMOs and specifies that any applications for the introduction of new or GMOs into the environment must ensure that there is no risk to indigenous flora and fauna, ecosystems, or to the health and wellbeing of Maniapoto Iwi.
- A number of councils around New Zealand have been moving to protect their primary producers and communities by introducing precautionary or prohibitive policies. Auckland Council, Far North District Council, Whangarei District Council and Hastings District Council have all included provisions in their planning documents to regulate the outdoor use of genetically modified organisms. All four councils have prohibited the release of GMOs on land and made field trials a discretionary activity with performance standards in regards to liability and the posting of bonds.

Point Number 286.38

Summary of Decision Requested: **Amend** the Proposed District Plan to give further consideration to ensuring district plans are progressed in an integrated and holistic way, and that changes intended to promote residential economic development are balanced and do not undermine the existing environmental principles of the freshwater management regime.

Decision Reasons:

- No reason provided.

Submitter Number: 287 **Submitter:** Tony Risetto

Point Number 287.1

Summary of Decision Requested: **Amend** the zoning of 77 and 85 Barnaby Road, Tuakau from Village Zone to Residential Zone, allowing lots of 450m2.

Decision Reasons:

- Would reflect the existing neighbouring properties.
- Barnaby Road is supported by infrastructure including high voltage power and phone lines.
- Collaborating with neighbours in regards to the installation of sewerage pumping station.
- Rezoning will assist in meeting the needs of rapid growth within Tuakau.
- 77 and 85 Barnaby Road is suitable for residential activity, retirement village and multi-uni developments.
- The site is located in close proximity to all amenities within Tuakau.
- The site would offer Tuakau community a good mix of quality housing with minimum footprint and high standard of housing.
- Barnaby Road is one kilometre from the towncentre and the site is accessible via footpath.
- 77 and 85 Barnaby Road offers the closeness of the town centre and facilities with a touch of rural views.
- Good quality multi-unit development could assist with affordable housing.

Submitter Number: 288 **Submitter:** Brendan Wood

On behalf of: The Trustees of the Valmont & Oakfield Trusts as Registered Proprietors of the Property at 165 Wairamarama-Onewhero Rd

Point Number 288.1

Summary of Decision Requested: **Amend** the significant features identified for Scheduled Historic Heritage Building Number 35 ('Clunes'/Cameron's Castle' 1915-16) to recognise only the architectural significance of the Californian bungalow style and protect the tower and front concrete facade of the dwelling.

Decision Reasons:

There are a number of errors in the heritage assessment sheets for the building at 165 Wairamarama-Onewhero Road including:

- The turret can not be easily be seen;
- Forbes did not live in the house until her death;
- Many of the original features have been removed;

- There is little cultural significance of the house;
- Duncan Cameron did not reside in the house for a long period of time;
- The property has no scientific values as there are little original features remaining;
- The gardens were planted recently and do not have aesthetic or historic value;
- The front verandah was altered with removal of the balustrade;
- The balustrade on the ground floor in front of the porch and at the bottom of the turret were removed.

Submitter Number: 289 **Submitter:** Sarah and Dean Hewitt and McGill

Point Number 289.1

Summary of Decision Requested: Amend the zoning of 27 Barnaby Road, Tuakau from Village Zone to Residential Zone.

Decision Reasons:

- Property lends itself more to residential, which is in keeping with neighbouring properties and the first half of Barnaby Road.
- Landowners of 27 Barnaby Road are collaborating with neighbours to install a sewerage pumping station.
- Rezoning to residential zone will meet the needs of rapid growth in Tuakau.
- Infrastructure including town supply water, sewerage, high voltage power and phone lines are in place in Barnaby Road.
- Property is suitable to accommodate multi-unit developments, residential activities and a retirement village.
- Ideal location for residential activities in close proximity to Tuakau amenities and located 1.2km from the town.
- Easy vehicle access and will eventually be within walking distance of a future railway station.
- Will consist of development with minimal foot print and high quality of build with no transportable homes.
- Will be in accordance with the government desire for affordable housing.
- Landowners of 27 Barnaby Road, Tuakau are prepared to contribute wetlands/streams for reserves or provide walkway and cycle links in conjunction with residential development.

Point Number 289.2

Summary of Decision Requested: Retain the 450m2 minimum net site are for Residential Zone sites (Rule 16.4.1 RD1 (a)(j) Subdivision- General).

Decision Reasons:

- No reasons provided.

Submitter Number: 290 **Submitter:** Zikang (James) Lin

Point Number 290.1

Summary of Decision Requested: Amend the zoning of part of the site at 297 Dominion Road, Tuakau (Lot 1 DP 509070 and Lot 2 DP 202306) from Rural Zone to Village Zone in accordance with Sheet 2 of the plans attached to the submission in Appendix A.

Decision Reasons:

- The additional Village Zoned land will help contribute to satisfying the current demand and strategic projected growth of Tuakau.
- The existing Village Zone under the Proposed Waikato District Plan is restricting and does not encompass the full potential of the site. There are multiple other areas, including the small plateau located to the north-west and the Rural zoned land within the gully, which would be suitable for the Village Zone.
- Access restrictions to service the current Village zoned area have been identified onsite, due to the land dropping steeply away from Dominion Road. By encompassing the whole site within the Village Zone a more appropriate entrance can be provided which will allow for more efficient access to the gully area.
- A potential future road connection has also been provided on the Concept Plan (Sheet 3 – to Appendix A of the submission), attached within Appendix A. This potential connection may provide more connectivity and accessibility within the Village Zone and allow better access to those properties zoned village which are restricted by access.
- The current Rural zoned areas of the submission site are not suited to a range of rural activities due to the scale and nature of the site and can be better utilised as Village zoned land.
- The existing dwelling on the submission site is segregated from the farming block and gives the appearance of a separate property currently.
- The majority of the lots shown on the Concept Plan (Sheet 3 – to Appendix A of the submission) are located in or around the gully. This will help to visually contain the developments and means they will not be intrusive within the surrounding area or landscape.
- The ridgeline and plateau located to the north-west of the gully area within the site is overshadowed by the hilly terrain east of the site, towards Ridge Road. Development of this land should not appear visually prominent or invasive in the wider context of the general area.
- Connectivity and links can be provided between other properties located in the Village Zone, including an adjoining property which is undertaking a similar submission to this one. Refer to Sheet 2 attached within Appendix A of the submission.
- Refer to the submission for an assessment against the proposed district plan Village Zone objectives and policies as well as full details of the site and rationale.

Submitter Number: 292 **Submitter:** David Yzendoorn

Organisation: David and Barbara Yzendoorn

Point Number 292.1

Summary of Decision Requested: Delete the Urban Expansion Area overlay from the submitter's property at 83 Greenhill Road, Puketaha.

Decision Reasons:

- Urban Expansion Area rules unnecessarily restrict development of the subject site, a small residential lot.
- Is no scope for any development on the property to compromise future urban development, of which policy 5.5.1 indicates as the underlying reason.

Point Number 292.2

Summary of Decision Requested: Add Residential Activities as a permitted activity in Chapter 22 Rural Zone.

Decision Reasons:

- There is no mention of residential activities in Rule 22.1.2, so these are Non-complying activities under Rule 22.1.5. This is unreasonable and onerous as residential activities are expected throughout the Rural Zone.

Point Number 292.3
Summary of Decision Requested: Amend the zoning of the properties between Gordonton Road, Greenhill Road and the Waikato Expressway (including 83 Greenhill Road, Puketaha) from Rural Zone to Residential Zone.

Decision Reasons:

- The land (including 83 Greenhill Rd) is immediately adjacent to Hamilton City and is suitable for Residential development. Although reticulated water and wastewater services are not yet available, the rezoning should still proceed because the area is largely in residential use. The rezoning to Residential Zone will be appropriate as it will recognize the predominant residential character of the block

Point Number 292.4
Summary of Decision Requested: Amend the zoning of the property at 1002 Gordonton Road, Gordonton from Rural Zone to Residential Zone.

Decision Reasons:

- 1002 Gordonton Rd is a 2500m2 lot adjoining Residential Zone properties to the north.
- It is already developed as a residential property and reads as part of Gordonton Village. It has no productive value in the Rural Zone and should be changed to Residential Zone, to promote best residential use of the land, and to protect the amenity values of the neighbours to the north.

Point Number 292.5
Summary of Decision Requested: Amend Rule 22.3.1 P1(a) Number of dwellings within a lot to permit more than one dwelling on lots less than 40ha.

Decision Reasons:

- The rule unreasonably restricts development of small lots.
- The submitter has approximately 5500m2 lot across the road from the Hamilton City boundary at 83 Greenhill Rd, and wishes to build a new home with a decent floor space, and also retain the small 85ish m2 existing house which is in above average condition.

Point Number 292.6
Summary of Decision Requested: Amend the zoning of the property at 1012 Gordonton Road, Gordonton from Rural Zone to Residential Zone.

Decision Reasons:

- The site is irregular shaped and adjoins Hukanui Park and Residentially zoned properties.
- The property is partly zones Living Zone in the Operative District Plan
- It is unfair to downzone the Living Zone portion of the property by zoning the whole property as Rural Zone in the Proposed District Plan.
- The entire site should be an extension to the Gordonton Village, in accordance with Objective 4.1.2 Urban Growth
- Land has minimal productive value as farmland.
- Rural activities on the site will have adverse effects on the amenity of surrounding residential properties and will be subject to reverse sensitivity effects in the future.
- The land is suitable for residential use and development.

Submitter Number: 296 **Submitter:** Richard Falconer
Organisation: Terra Consultants (CNI) Ltd

Point Number 296.1
Summary of Decision Requested: Retain the Village zoning of 714 Te Kowhai Road, Te Kowhai as notified.

Decision Reasons:

- Rezoning to Village (from Country Living in the Operative District Plan) is consistent for growth ambitions for Te Kowhai and consistent with the views of the Te Kowhai community as reflected in the Te Kowhai Structure Plan (March 2017).

Point Number 296.2
Summary of Decision Requested: Retain the subdivision and activity provisions and development controls of Chapter 24 - Village Zone as notified.

Decision Reasons:

- Supports in particular the 3,000m2 minimum lot size as it is a reasonable sized rural-residential holding with it being large enough to retain the character of Te Kowhai while avoiding maintenance issues for future owners that has occurred in the Operative District Plan Country Living Zone.

Point Number 296.3
Summary of Decision Requested: Amend the zoning of the land between Horotiu Road and Te Kowhai Road from Rural Zone to Village Zone, as shown on Figure 2 of the submission.

Decision Reasons:

- Submitter has experienced a high demand for residential sections of their development, in particular for smaller sections (3,000m2).
- Additional land is necessary for rezoning to Village Zone due to complexities of developing other land and that the land should be rezoned now, as it is inevitable that the supply of suitable residential development land will be exhausted well before the next plan review cycle.

Point Number 296.4
Summary of Decision Requested: Retain the provisions of Chapter 17 - Business Zone as notified.

Decision Reasons:

- No reasons provided.

Point Number 296.5

Summary of Decision Requested: **Retain** the Business Zoning of the properties at 561 and 571 Horotiu Road, Te Kowhai as notified.

Decision Reasons:

- The Te Kowhai Structure Plan (2017) indicated a future town centre to support residential growth. The proposed rezoning to Business Zone will provide effective and efficient delivery of the Te Kowhai Structure Plan (2017).
- Submitter has resource consent for a cafe at 571 Horotiu Road and intends to develop 561 Horotiu Road with a retail development (superette or similar).
- The two sites are suitable for the town centre given that they have frontage to an arterial road which is the primary access to Te Kowhai from the north and east. This ensures that the greatest visibility and accessibility is afforded to the two properties.

Point Number 296.6

Summary of Decision Requested: **Retain** Rule 24.4.1 - RD1 (a) Subdivision - General, that has a minimum lot size of 3000m2.

Decision Reasons:

- Supports the 3,000m2 minimum lot size as it is a reasonable sized rural-residential holding with it being large enough to retain the character of Te Kowhai while avoiding maintenance issues for future owners that has occurred in the Operative District Plan Country Living Zone.

Submitter Number: 297 **Submitter:** Dave Glossop

Organisation: Counties Manukau Police

Point Number 297.1

Summary of Decision Requested: **Amend** Section 1.9.3 Section 5 RMA to include a reference to conforming to the four principles of CPTED and the seven qualities of safer places contained within the National Guidelines for Crime Prevention through Environmental Design in New Zealand.

OR

Amend the most appropriate section in Chapter 1 Introduction to include a reference to conforming to the four principles of CPTED and the seven qualities of safe places contained within the National Guidelines for Crime Prevention through Environmental Design in New Zealand.

Decision Reasons:

- To prevent victimisations caused by crime and road related offending, injury or death
- To make people safe and feel safe.

Point Number 297.2

Summary of Decision Requested: **Retain** Section 1.12.5 Community well-being specifically the wording "a high level of... personal safety and the potential for crime is recognised in the design of (these) public places".

AND

Amend Section 1.12.5 Community well-being to include conforming to the four principles of CPTED and the seven qualities of safer places contained within the National Guidelines for Crime Prevention through Environmental Design in New Zealand.

Decision Reasons:

- To prevent victimisations caused by crime and road related offending, injury or death
- To make people safe and feel safe.

Point Number 297.3

Summary of Decision Requested: **Amend** Section 1.12.5 Community well-being to include conforming to the four principles of CPTED and the seven qualities of safer places contained within the National Guidelines for Crime Prevention through Environmental Design in New Zealand.

Decision Reasons:

- To prevent victimisations caused by crime and road related offending, injury or death
- To make people safe and feel safe.

Point Number 297.4

Summary of Decision Requested: **Retain** Section 1.12.8 (b)(ii) Strategic Objectives.

Decision Reasons:

- To prevent victimisations caused by crime and road related offending, injury or death
- To make people safe and feel safe.

Point Number 297.5

Summary of Decision Requested: **Amend** Objective 4.1.1(a) Strategic as follows:
Liveable, safe, thriving and connected communities that are sustainable, efficient, and coordinated.

Decision Reasons:

- Decision making is dependent upon the strategic direction
- The inclusion of the word safe within the strategic objective would ensure that in all decision making about the urban environment there would be an obligation to consider keeping communities safe.
- To prevent victimisations caused by crime and road related offending, injury or death

- To make people safe and feel safe.

Point Number 297.6

Summary of Decision Requested: **Retain** Policy 4.1.8 Integration and Connectivity
AND
Add to Policy 4.1.8(iv) Integration and connectivity a new line that reads:
D. National Guidelines for Crime Prevention through Environmental Design in New Zealand.
AND
Add a new appendix to Chapter 29 Appendices - the National Guidelines for Crime Prevention through Environmental Design in New Zealand.

Decision Reasons:

- To ensure that CPTED is an obligatory consideration and influence in the manner in which development occurs.
- In any subdivision design CPTED should be an obligatory consideration to ensure people are safe and feel safe and to prevent victimisations.
- It is inadequate for the CPTED guidelines to appear only as a reference document within an appendix. CPTED guidelines must be an obligatory consideration for any development, at present they are not and the current location and wording does not highlight their significance and importance to safety.
- At present, the National CPTED Guidelines referred to in Appendix 3.1 page 7 that is listed at 4.1.8(iv) A. The context is very light and the National CPTED Guidelines are only included as a reference document to provide further useful information in relation to subdivision design.
- This will ensure that Waikato District Council actively demonstrates the commitment that is signed up to as part of the New Zealand Urban Design Protocol voluntary agreement.

Point Number 297.7

Summary of Decision Requested: **Amend** Policy 4.1.10(a) Tuakau as follows:
(i) Subdivision, land use and development in Tuakau's new residential and business areas occurs in a manner that promotes the development of a variety of housing densities, diversity of building styles and a safe, high quality living environment;
...
(iii) Future neighbourhood centres, roads, parks, pedestrian, cycle and bridle networks are developed in accordance with the Tuakau Structure Plan and conform to the national guidelines for CPTED.

Decision Reasons:

- To ensure that safety is included within the policy for the development of Tuakau and therefore obligate all development to consider safety and conform safety and conform to the national guidelines for CPTED.
- To prevent victimisations and to make people safe and feel safe.

Point Number 297.8

Summary of Decision Requested: **Amend** Policy 4.1.11(a) Pokeno as follows:
(i) Subdivision, land use and development of new growth areas promotes a safe, high quality environment and does not compromise the potential further growth and development of the town;
(ii) Walking and cycling networks are integrated with the existing urban area and conform to the national guidelines for CPTED
...

Decision Reasons:

- To ensure that safety is included within the policy for the development of Pokeno and therefore obligate all development to consider safety and conform safety and conform to the national guidelines for CPTED.
- To prevent victimisations and to make people safe and feel safe.

Point Number 297.9

Summary of Decision Requested: **Retain** Objective 4.2.3 Residential built form and amenity as notified.

Decision Reasons:

- The ensure that there is an obligation to consider safety, reducing victimisation, making people safe and feel safe.

Point Number 297.10

Summary of Decision Requested: **Amend** Policy 4.2.4(a)(iii) Front setback as follows:
Providing for passive surveillance to roads, avoiding windowless walls to the street and conforming to national guidelines for CPTED principles.

Decision Reasons:

- To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.11

Summary of Decision Requested: **Amend** Policy 4.2.10(c) Daylight and outlook as follows:
Maintain and enhance attractive open space character of residential areas by ensuring that development is compatible in scale to surrounding activities and structures and has generous on-site landscaping, screening and street planting, conforming to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.

Point Number	297.12
Summary of Decision Requested:	Amend Policy 4.2.12(a) Outdoor Living Court Multi-unit development as follows: <i>Enable multi-unit development to provide usable, <u>safe</u> and accessible outdoor living courts in alternative ways...</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.
Point Number	297.13
Summary of Decision Requested:	Amend Policy 4.2.13(a) Outdoor living court – Retirement villages as follows: <i>Require outdoor living courts or communal outdoor living courts to be usable, and accessible and <u>safe</u> (conforming to the national guidelines for CPTED).</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.
Point Number	297.14
Summary of Decision Requested:	Add to Policy 4.2.15 Earthworks a new line as follows: <i><u>Manage the earthworks site to ensure that resources at the site are safe and to minimise the risk of victimisation</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Development sites are crime attractors Vehicles, tools and diesel have previously been targeted by criminals The inclusion of this wording ensures that there in an obligation through council policy to consider safety at development sites This should result in a reduction victimisations, making people safe and feel safe.
Point Number	297.15
Summary of Decision Requested:	Add to Policy 4.3.15 Earthworks a new line as follows: <i><u>Manage the earthworks site to ensure that resources at the site are safe and to minimise the risk of victimisation</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Development sites are crime attractors Vehicles, tools and diesel have previously been targeted by criminals The inclusion of this wording ensures that there in an obligation through council policy to consider safety at development sites This should result in a reduction in victimisations, making people safe and feel safe.
Point Number	297.16
Summary of Decision Requested:	Add to Policy 4.5.41 Earthworks a new line as follows: <i><u>Manage the earthworks site to ensure that resources at the site are safe and to minimise the risk of victimisation</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Development sites are crime attractors Vehicles, tools and diesel have previously been targeted by criminals The inclusion of this wording ensures that there in an obligation through council policy to consider safety at development sites This should result in reduced victimisations, making people safe and feel safe.
Point Number	297.17
Summary of Decision Requested:	Add to Policy 5.3.5 Earthworks activities a new line as follows: <i><u>Manage the earthworks site to ensure that resources at the site are safe and to minimise the risk of victimisation</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Development sites are crime attractors Vehicles, tools and diesel have previously been targeted by criminals The inclusion of this wording ensures that there in an obligation through council policy to consider safety at development sites This should result in reduced victimisations, making people safe and feel safe.
Point Number	297.18
Summary of Decision Requested:	Add to 5.6.7 (Rural Environment – Country Living Zone – Policies - Earthworks) a new line as follows: <i><u>Manage the earthworks site to ensure that resources at the site are safe and to minimise the risk of victimisation</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Development sites are crime attractors Vehicles, tools and diesel have previously been targeted by criminals The inclusion of this wording ensures that there in an obligation through council policy to consider safety at development sites This should result in reduced victimisations, making people safe and feel safe.
Point Number	297.19
Summary of Decision Requested:	Add to Policy 4.2.18(b) Multi-unit development a new line as follows:

Conform to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.20

Summary of Decision Requested: **Add** to Policy 4.2.19(a) Retirement villages a new line as follows:

Conforming to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.21

Summary of Decision Requested: **Add** to Policy 4.3.12(a)(iii) Non-residential activities a new line as follows:

Conforming to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider national guidelines for CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.22

Summary of Decision Requested: **Amend** Objective 4.4.1(a) Adverse effects of land use and development as follows:

The health, ~~and~~ well-being and safety of people, communities and the environment are protected from the adverse effects of land use and development.

Decision Reasons:

- To ensure that there is an obligation to consider safety, reducing victimisation, making people safe and feel safe.

Point Number 297.23

Summary of Decision Requested: **Retain** Policy 4.4.3 Artificial outdoor lighting, except for the amendments sought below.

AND

Add to Policy 4.4.3 Artificial outdoor lighting a new line as follows:

(d) Conform to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider security and CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.24

Summary of Decision Requested: **Retain** Policy 4.5.38 Artificial outdoor lighting, except for the amendments sought below.

AND

Add to Policy 4.5.38(a) Artificial outdoor lighting a new line as follows:

(iv) artificial outdoor lighting conforms to national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider security and CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.25

Summary of Decision Requested: **Retain** Policy 5.6.15 Artificial outdoor lighting, except for the amendments sought below.

AND

Add to Policy 5.6.15 Artificial outdoor lighting a new line as follows:

(d) Conform to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider security and CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.26

Summary of Decision Requested: **Retain** Policy 4.4.7 Managing the adverse effects of signs as notified.

Decision Reasons:

- The intention of this policy is in line with the Police Prevention First Model (taking every opportunity to prevent harm) and the Safer Journeys Strategy (reducing and preventing road related trauma) and the target to reduce road deaths every year by 5 percent.

Point Number 297.27

Summary of Decision Requested: **Retain** Policy 4.5.37 Managing the adverse effects of signs as notified.

Decision Reasons:

- The intention of this policy is in line with the Police Prevention First Model (taking every opportunity to prevent harm) and the Safer Journeys Strategy (reducing and preventing road related trauma) and the target to reduce road deaths every year by 5 percent.

Point Number 297.28

Summary of Decision Requested: **Retain** Policy 5.6.14 Managing the adverse effects of signs as notified.

Decision Reasons:

- The intention of this policy is in line with the Police Prevention First Model (taking every opportunity to prevent harm) and the Safer Journeys Strategy (reducing and preventing road related trauma) and the target to reduce road deaths every year by 5 percent.

Point Number 297.29

Summary of Decision Requested: **Amend** Objective 4.5.12(c) Business Town Centre - Character as follows:
Development of town centres is designed in a functional and attractive manner serving the needs of the community and conforms to the national guidelines for CPTED.

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.30

Summary of Decision Requested: **Retain** Policy 4.5.13(a)(i) Town centre built form as notified.

Decision Reasons:

- To ensure that there is an obligation to consider safety, reducing victimisation, making people safe and feel safe.

Point Number 297.31

Summary of Decision Requested: **Retain** Policy 4.5.18(a)(i) Pokeno Town Centre as notified.

Decision Reasons:

- To ensure that there is an obligation to consider access and CPTED, reducing victimisation, making people safe and feel safe
- To ensure that there is an obligation to consider access by emergency services and other service vehicles
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number 297.32

Summary of Decision Requested: **Add** to Policy 4.7.10(a) Recreation and access a new point as follows:
(g)(iv) conforming to the national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.33

Summary of Decision Requested: **Add** to Policy 5.3.8(a) Effects on rural character and amenity from rural subdivision a new point as follows:
(g) subdivision, use, and development is designed to conform to the national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe

Point Number 297.34

Summary of Decision Requested: **Add** to Policy 5.3.9 Non-rural activities a new point as follows:
(c) ensure any non-rural activities and associated buildings, structures and facilities conform to the national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe

Point Number 297.35

Summary of Decision Requested: **Add** to Policy 5.6.2 Country Living character a new point as follows:
(f) conforms to the national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.36

Summary of Decision Requested: **Add** to Policy 5.6.3(a) (Subdivision within the Country Living Zone a new point as follows:
(vi) conforms to the national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number	297.37
Summary of Decision Requested:	Add to Policy 5.6.8 Non-residential activities a new point as follows: <i>(b) ensure any non-residential activities and associated buildings, structures and facilities conform to the national guidelines for CPTED</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe
Point Number	297.38
Summary of Decision Requested:	Add to Policy 6.1.2(a) Development, operation and maintenance, a new point as follows: <i>(vii) the need to conform to the national guidelines for CPTED</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.
Point Number	297.39
Summary of Decision Requested:	Amend Policy 6.1.9(a) Environmental effects, community health, safety and amenity, as follows: <i>Require the development, operation, maintenance, repair, replacement, upgrading and removal of infrastructure and its associated structures to avoid, remedy or mitigate adverse effects on the environment, community health, safety by conforming to the national guidelines for CPTED and amenity.</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.
Point Number	297.40
Summary of Decision Requested:	Amend Policy 6.4.4 Road and rail network as follows: <i>(a) Discourage subdivision, use and development that would compromise: (i) The road function, as specified in the road hierarchy, or the safety and efficiency of the roading network; (ii) The access by emergency services and their vehicles; and (iii) the safety and efficiency of the railway network.</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider access by emergency services and consequently any other service vehicles This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.
Point Number	297.41
Summary of Decision Requested:	Amend Policy 6.4.5(a)(i) Roading infrastructure to read: <i>The design, location, alignment and dimensions of new roads provide safe vehicle (including all emergency services vehicles), pedestrian and cycling access and maneuvering to every site</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider access by emergency services and consequently any other service vehicles especially when other vehicles are parked on the road side This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.
Point Number	297.42
Summary of Decision Requested:	Amend Objective 6.5.1(a)(i) Land transport network as follows: <i>All transport modes, including emergency services vehicles, are accessible, safe and efficient; and</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider access by emergency services and consequently any other service vehicles especially when other vehicles are parked on the roadside This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.
Point Number	297.43
Summary of Decision Requested:	Add to Policy 6.5.2 Construction and operation of the land transport network a new point as follows: <i>(ix) conforming to the national guidelines for CPTED</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.
Point Number	297.44
Summary of Decision Requested:	Amend Policy 6.5.3(a) Road hierarchy and function as follows: <i>Provide a hierarchy of roads for different functions and modes of land transport while recognising the nature of the surrounding land use within the district ensuring access by all emergency services vehicles</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider access by emergency services and consequently any other service vehicles especially when other vehicles are parked on the road side This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number 297.45

Summary of Decision Requested: **Add** to Policy 6.5.5 Road safety clause (b) as follows:
(b) Ensure that all road design, structures, lighting, signage and vegetation conform to national guidelines for CPTED, including access by emergency services and their vehicles

Decision Reasons:

- To ensure that there is an obligation to consider safety and CPTED, reducing victimisation, making people safe and feel safe
- To ensure that there is an obligation to consider access by emergency services and other service vehicles
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number 297.46

Summary of Decision Requested: **Amend** Policy 6.5.7(a) Vehicle access as follows:
Control the location of new vehicle accesses to sites adjacent to other accesses and rail level crossings to improve the safety and efficiency of the land transport network ensuring that all roads are accessible to emergency services vehicles.

Decision Reasons:

- To ensure that there is an obligation to consider access by emergency services and other service vehicles
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number 297.47

Summary of Decision Requested: **Add** to Policy 8.1.2(c) Provision, use and development of public open space and reserves a new point, as follows:
(iii) being safe and conforming to the national guidelines for CPTED

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.48

Summary of Decision Requested: **Amend** Policy 8.1.3 (b)(ii) Esplanade reserves and walkways as follows:
(ii) incorporating safety and security for neighbours and walkway users by conforming to the national guidelines for CPTED;

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number 297.49

Summary of Decision Requested: **Amend** Rule 14.12.1.6 P6(1) Permitted Activities – New public roads as follows:
New public roads, and private access, including where....

Decision Reasons:

- To ensure that there is an obligation to consider access, this is critical for the access of emergency services and other service vehicles.
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number 297.50

Summary of Decision Requested: **Retain** Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) which requires the minimum road/right of way access to be no less than 4m.

Decision Reasons:

- To ensure that there is an obligation to consider access, this is critical for the access of emergency services and other service vehicles.
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council
- The minimum width required for a Fire and Emergency Service general appliance is 4 meters
- The minimum requirement for an aerial appliance is 6 metres.

Point Number 297.51

Summary of Decision Requested: **Add** a new matter of discretion to Rule 14.12.2 RD1 Restricted Discretionary Activities as follows:
(f) the foreseeable needs for access by emergency services and their vehicles

Decision Reasons:

- To ensure that there is an obligation to consider access, this is critical for the access of emergency services and other service vehicles
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council
- The minimum width required for a Fire and Emergency Service general appliance is 4 meters
- The minimum requirement for an aerial appliance is 6 metres.

Point Number 297.52

Summary of Decision Requested: **Amend** Appendix 3.1 Residential Subdivision Guidelines to prominently include the national guidelines for CPTED to provide further useful information, and not just listed as a reference.

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number

297.53

Summary of Decision Requested:

Amend Appendix 3.3 Town Centre Guidelines to prominently include the national guidelines for CPTED to provide further useful information, and not just listed as a reference.

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number

297.54

Summary of Decision Requested:

Amend Appendix 3.4 Multi-unit Development to prominently include the national guidelines for CPTED to provide further useful information, and not just listed as a reference.

Decision Reasons:

- To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number

297.55

Summary of Decision Requested:

Retain Section 4.2 in Appendix 3.1 Residential Subdivision Guidelines – Connectivity and Movement Networks – Outcomes Sought as notified.

Decision Reasons:

- To consider CPTED, reducing victimisation, making people safe and feel safe.

Point Number

297.56

Summary of Decision Requested:

Amend Section 4.3 Page 10, second row of the table in Appendix 3.1 Residential Subdivision Guidelines to provide clarification about pedestrian and cyclist linkages within the guideline around avoiding cul-de-sacs.

Decision Reasons:

- To consider CPTED, reducing victimization, making people safe and feel safe.
- The use of access ways must consider CPTED considerations such as multiple exit points and avoiding entrapment spots.

Point Number

297.57

Summary of Decision Requested:

Amend 4.3 Page 12 in Appendix 3.1 Residential Subdivision Guidelines relating to rear lots to have stronger wording about conforming to CPTED guidelines.

Decision Reasons:

- To consider CPTED, reducing victimisation, making people safe and feel safe.
- Rear lots have become a crime attractor at other locations within the Police District, lack of good visibility, sightlines and casual surveillance are key as are elements such as concealment and lack of adequate lighting within the design.
- Police would like to advise developers of how to avoid replicating the design failings of other sites with rear parking lots.

Point Number

297.58

Summary of Decision Requested:

Retain Policy 6.4.5(a)(iii) Roading Infrastructure as notified.

Decision Reasons:

- To ensure that there is an obligation to consider access by emergency services and consequently any other service vehicles especially when other vehicles are parked on the road side.
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number

297.59

Summary of Decision Requested:

Add a new matter of discretion to Rule 14.12.2 RD2 Restricted discretionary activities as follows:

(f) the foreseeable needs for access by emergency services and their vehicles.

Decision Reasons:

- To ensure that there is an obligation to consider access, this is critical for the access of emergency services and other service vehicles.
- This of specific concern and has been problematic in some new developments under the authority of Auckland Council.
- The minimum width required for a Fire and Emergency Service general appliance is 4 metres.
- The minimum requirement for an aerial appliance is 6 metres.

Point Number

297.60

Summary of Decision Requested:

Add to Policy 4.5.18(a) Pokeno Town Centre a new point as follows:

(g)(v) ensuring adequate accessibility for emergency services and other service vehicles. (Including adequate turning circles and road widths when roads are in use and taking into consideration parked vehicles at the road side)

Decision Reasons:

- To ensure that there is an obligation to consider access and CPTED, reducing victimisation, making people safe and feel safe
- To ensure that there is an obligation to consider access by emergency services and other service vehicles
- This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.

Point Number	297.61
Summary of Decision Requested:	Add to Policy 4.5.18(a) Pokeno Town Centre a new point as follows: <i>(a)(vi) by conforming to the National Guidelines for Crime Prevention through Environmental Design in New Zealand.</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider access and CPTED, reducing victimisation, making people safe and feel safe To ensure that there is an obligation to consider access by emergency services and other service vehicles This is of specific concern and has been problematic in some new developments under the authority of Auckland Council.
Point Number	297.62
Summary of Decision Requested:	Retain Policy 4.7.2 Subdivision location and design except for the amendments sought below. AND Add to Policy 4.7.2(a) subdivision location and design a new point as follows: <i>(a)(v), promote safe communities through quality urban design, including conforming to the national guidelines for CPTED.</i> AND Add to Policy 4.7.2 Subdivision location and design a new point between (vi) and (vii) as follows: <i>Ensure adequate accessibility for emergency services and other services vehicles (including the provision of an adequate turning circle and road widths when roads are in use and taking into consideration parked vehicles at the road side.)</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider safety and CPTED, reducing victimisation, making people safe and feel safe. To ensure that there is an obligation to consider access by emergency services and other service vehicles. This is of specific concern and has been problematic in some new development under the authority of Auckland Council.
Point Number	297.63
Summary of Decision Requested:	Amend Policy 4.7.3(a)(viii) Residential subdivision as follows: <i>Conforming to national guidelines for CPTED, ensuring pedestrian access is consistent with the Crime Prevention through Environmental Design (CPTED)</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider CPTED, reducing victimisation, making people safe and feel safe.
Point Number	297.64
Summary of Decision Requested:	Add to Policy 4.7.6(a) Co-ordination between servicing and development and subdivision a new point as follows: <i>(a)(v), provides adequate accessibility for emergency services and other service vehicles (including the provision of an adequate turning circle and road width when roads are in use and taking into consideration parked vehicles at the road side).</i>
Decision Reasons:	<ul style="list-style-type: none"> To ensure that there is an obligation to consider access by emergency services and any other service vehicles This is of specific concern and has been problematic in some new developments under the authority of Auckland Council

Submitter Number:	299	Submitter:	2SEN Limited and Tuakau Estates Limited
Point Number	299.1		
Summary of Decision Requested:	Retain Section 4.1 Strategic Direction as notified except where specific modification is sought elsewhere in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> It provides a suitable framework to facilitate a residential environment. 		
Point Number	299.2		
Summary of Decision Requested:	Retain Section 4.2 Residential Zone as notified except where specific modification is sought elsewhere in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> It provides a suitable framework to facilitate a residential environment. 		
Point Number	299.3		
Summary of Decision Requested:	Retain Section 4.4 Noise, lighting, outdoor storage, signs and odour as notified except where specific modification is sought elsewhere in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> It provides a suitable framework to facilitate a residential environment. 		
Point Number	299.4		
Summary of Decision Requested:	Retain Section 4.7 Urban Subdivision and development as notified except where specific modification is sought elsewhere in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> It provides a suitable framework to facilitate a residential environment. 		

Point Number 299.5

Summary of Decision Requested: Retain Policy 4.1.3 (b) Location of development as notified.

Decision Reasons:

- The Future Proof Strategy recognizes Tuakau as a R2 growth area.

Point Number 299.6

Summary of Decision Requested: Retain Policy 4.4.2 Noise as notified.

Decision Reasons:

- The policy seeks to ensure lawfully established activities are protected and that setbacks are provided. This is agreed and will need to be supported with robust planning (for lawful establishment) and technical (acoustic) reporting where any setback is proposed.

Point Number 299.7

Summary of Decision Requested: Retain Policy 4.4.5 Objectionable odour as notified.

Decision Reasons:

- The policy seeks to ensure lawfully established activities are protected and that setbacks are provided. This is agreed and will need to be supported with robust planning (for lawful establishment) and technical (acoustic) reporting where any setback is proposed.

Point Number 299.8

Summary of Decision Requested: Retain Objective 4.6.6 Manage adverse effects as notified.

Decision Reasons:

- Industrial activities are required to manage effects in accordance with Regional and District Plan provisions and any relevant resource consents.

Point Number 299.9

Summary of Decision Requested: Retain Policy 4.7.11 Reverse sensitivity, except for the amendments sought below

AND

Amend Policy 4.7.11 Reverse Sensitivity as follows:

(a) Development and subdivision design minimises lawfully established and operating reverse sensitivity effects on adjacent sites, adjacent activities, or the wider environment; and

(b) Avoid potential reverse sensitivity effects of locating new dwellings in the vicinity of lawfully established and operating intensive farming, extraction industry or industrial activity.

AND

Any consequential changes necessary to give effect to the relief sought.

Decision Reasons:

- Activities which generate effects on adjoining sites should not be protected if there is no consented right to operate.
- To ensure that 'protection' of sites generating adverse effects is extended only where those effects are lawfully established (ie. consistent with Rule 4.4.2 Noise and Rule 4.4.5 Objectionable Odour).

Point Number 299.10

Summary of Decision Requested: Retain Section 16.3 Building as notified except where modifications are sought elsewhere in the submission.

Decision Reasons:

- It provide for suitable controls expected within a residential environment.

Point Number 299.11

Summary of Decision Requested: Retain Section 16.4 Subdivision as notified, except where modifications are sought elsewhere in the submission.

Decision Reasons:

- It provide for suitable controls expected within a residential environment.

Point Number 299.12

Summary of Decision Requested: Retain Rule 21.2.3.1 P3 Noise – General as notified.

Decision Reasons:

- It ensures that effects of Industrial zones on adjoining sites are appropriately managed.

Point Number 299.13

Summary of Decision Requested: Retain Rule 21.2.3.1 P4 Noise – General as notified.

Decision Reasons:

- It ensures that effects of Industrial zones on adjoining sites are appropriately managed.

Point Number 299.14

Summary of Decision Requested: **Amend** the zoning of the entire property at 48 Dominion Road, Tuakau to Residential Zone.
AND
Any consequential changes necessary to give effect to the relief sought.

Decision Reasons:

- There is no detailed reasoning as to why the proposed boundary location has been selected. The s32 analysis relies on the Tuakau Structure Plan to establish the rural residential boundary.
- The proposed boundary does not reflect the technical analysis presented to support the proposed District Plan.
- The proposed boundary is arbitrary, following no geographical or cadastral features.
- The proposed boundary would appear to limit opportunities to connect to the existing roading network (adjoining the site to the west).
- The proposed remaining Rural Zoned area would effectively be 'sterilised' by the proposed boundary location.
- Rezoning is supported by the following analyses:
 - Flooding hazards
 - Transportation
 - Archaeology
 - Visual assessment
 - Geotechnical
 - Ground contamination

Point Number 299.15

Summary of Decision Requested: **Amend** the zoning of the entire property at 52 Dominion Road, Tuakau to Residential Zone.
AND
Any consequential changes necessary to give effect to the relief sought.

Decision Reasons:

- There is no detailed reasoning as to why the proposed boundary location has been selected. The s32 analysis relies on the Tuakau Structure Plan to establish the rural residential boundary.
- The proposed boundary does not reflect the technical analysis presented to support the proposed District Plan.
- The proposed boundary is arbitrary, following no geographical or cadastral features.
- The proposed boundary would appear to limit opportunities to connect to the existing roading network (adjoining the site to the west).
- The proposed remaining Rural Zoned area would effectively be 'sterilised' by the proposed boundary location.
- Rezoning is supported by the following analyses:
 - Flooding hazards
 - Transportation
 - Archaeology
 - Visual assessment
 - Geotechnical
 - Ground contamination

Point Number 299.16

Summary of Decision Requested: **Delete** Rule 14.12.1.6(d)(iii) Transportation – Permitted Activities.
AND
Any consequential changes necessary to give effect to the relief sought.

Decision Reasons:

- Whilst swales are not generally opposed as a method of stormwater management, they will not be suitable in all circumstances. The rule is not specific enough to be a permitted activity standard eg: terms are not defined or quantifiable (poor drainage; infiltration system).
- This matter is more appropriately dealt with by an engineering code of practice requirement

Point Number 299.17

Summary of Decision Requested: **Retain** Section 16.1 Activities, except where modifications are sought elsewhere in the submission.

Decision Reasons:

- It provide for suitable controls expected within a residential environment.

Point Number 299.18

Summary of Decision Requested: **Amend** Rules 16.2.4.1 P1, P2, and P3 Earthworks- General to clarify how these rules work together.
AND
Any consequential changes necessary to give effect to the relief sought.

Decision Reasons:

- It is uncertain if the provisions of P1 need to be met when relying on P2 and P3. In particular, it is uncertain whether earthworks that does not involve importation of fill but is for a building platform, would fall within P1 or P2.

Point Number 299.19

Summary of Decision Requested: **Retain** Rule 21.2.3.1 P2 Noise – General as notified.

Decision Reasons:

- It ensures that effects of Industrial zones on adjoining sites are appropriately managed.

Point Number 299.20

Summary of Decision Requested: **Retain** Section 16.2 Effects, as notified, except where modifications are sought elsewhere in the submission.

Decision Reasons:

- It provide for suitable controls expected within a residential environment.

Submitter:

Rolande Paekau

Organisation:

The Te Whaanga 2B3B2 & 2B1 Ahu Whenua Trust

Point Number

300.1

Summary of Decision Requested:

Amend Section 2.2 Background to apply the Resource Management definitions, as follows:

Tangata Whenua: In relation to a particular area means the iwi, or hapu, that holds mana whenua over that area.

Mana Whenua: Means customary authority exercised by an iwi or hapu in an identified area.

AND

Amend Section 2.2 Background to recognise that Waikato-Tainui do not have authority or Tangata Whenua status in Raglan. Tangata Whenua in Whaingaroa are only those that can whakapapa to Whaingaroa.

Decision Reasons:

- Waikato-Tainui do not have authority or tangata whenua status in Raglan. Tainui iwi and hapu of the West Coast harbours have not ceded their sovereignty to Waikato-Tainui and do not hold the mandate to speak on behalf of the rohe for Te Whaanga 2B3B2 and 2B1 Ahu Whenua Trust on matters that concern future developments, growth, progress and the relationship with Waikato District Council. Council must not confuse the identity and status of tangata whenua and other hapu and/or iwi with its obligations under the RMA to all tangata whenua groups within Waikato District. The only tangata in Whaingaroa are those that can Whakapapa to Whaingaroa:
 - Ko Karioi te Maunga
 - Ko Whaingaroa te Moana
 - Ko Tainui te Waka
 - Ko Tainui te Iwi
 - Ko Ngati Koata, Ngati Hounuku, Ngati Te Ikanahi, Ngati Kahu, Te Paetoka, Ngati Pukoro, Ngati Tira, Ngati Rua Aruhe, Ngati Heke, Ngati Tahau, Ngati Te Kore nga hapu.

Point Number

300.2

Summary of Decision Requested:

Retain Section 2.5 Understanding Maaori Land Ownership, which addresses the change of Maori Freehold Title to Maori land blocks across Waikato District.

Decision Reasons:

- The change of title status will enable more Maori land blocks and trusts to develop and utilise their respective lands.

Point Number

300.3

Summary of Decision Requested:

Retain Section 2.8 Concept Management Plan contained in Chapter 2 Tangata Whenua which supports the submission of the Whaingaroa Kite Whenua, Tihei Mauriora land to develop Te Kopua lands for a future cultural theme park.

Decision Reasons:

- The plan for the cultural theme park aligns with the hapu, iwi aspirations and vision of Tuaiwa Rickard for Te Kopua lands.
- Supports any updated version of the plan to be submitted.

Point Number

300.4

Summary of Decision Requested:

Amend the Proposed District Plan to retain the Operative District Plan provisions for Te Kopua lands located on Riria Kereopa Memorial Drive at Raglan, which include permitted activities for:

- facilities for surface water activities
- recreation
- Kohanga reo
- education facilities
- public toilets
- campsite and associated carwash, grocery or boating store and marae
- restaurant
- conference facilities
- travellers' accommodation

Decision Reasons:

- The activities specifically requested above are currently listed as permitted activities on Te Kopua lands in the Operative Pa Zone.
- The provisions need to contain these same permissions to reflect the aspirations of tangata whenua and the owners and beneficiaries of Te Kopua lands.

Point Number

300.5

Summary of Decision Requested:

No specific decision sought, but submission opposes Section 3.4 Multi-unit development in Appendix 3.1 Residential Subdivision Guidelines. In particular the submission considers the natural character and essence of Raglan CBD will be significantly changed should 2-storey apartments or dwellings be erected along Wainui Road-Fire station area

Decision Reasons:

- The natural character and essence of Raglan's CBD would significantly change if 2-storey apartments or 2-storey dwellings are developed along Wainui Road and in the area of the fire station. This exploits the landscape values for tourism and economic gain with no benefits being provided to local tangata whenua.

Submitter Number:

301

Submitter:

Lizbeth Hughes

Point Number

301.1

Summary of Decision Requested:

Amend the zoning of the property at 17 Calvert Road, Raglan from Rural Zone to Residential Zone.

Decision Reasons:

- There has never been any rural activities carried out on this property as it has always been used for residential purposes.

Point Number

301.2

Summary of Decision Requested:

Delete the Significant Natural Area from the property at 17 Calvert Road, Raglan.

Decision Reasons:

- All vegetation on this property was planted by previous owners and the landowner wishes to manage this as a personal property right.

Point Number

301.3

Summary of Decision Requested:

Delete the Significant Amenity Landscape from the property at 17 Calvert Road, Raglan.

Decision Reasons:

- Unlike other properties that can be viewed in the Coastal Marine area, the property at 17 Calvert Road, and any activities on it, are less visible.

Submitter Number:

302

Submitter:

Jeremy Talbot

On behalf of:

EnviroWaste New Zealand Limited

Organisation:

Barker & Associates Limited

Point Number

302.1

Summary of Decision Requested:

Amend the definition for "National Grid Yard" in Chapter 13 Definitions to reduce the yard setbacks to align with the decisions on appeals and consent orders on the Auckland Unitary Plan and the current Auckland Unitary Plan rules.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The Overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the "Yard" is measured at 12m in any direction from the outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line (rather than up to 37m either side of transmission lines for 220kv lines under the Proposed Plan).
- There is no reason for the Waikato District Plan to have a wider restriction buffer than Auckland (when the effect on the National Grid would be the same regardless of Region and cognizant that the Auckland rules apply immediately adjoining the submitter's site).
- As Auckland has the most recent case law on the National Grid network through the Auckland Unitary Plan appeals process, it is not unreasonable to consider that its provisions are suitable to meet the National Policy Statement for Electricity Transmission.

Point Number

302.2

Summary of Decision Requested:

Amend Rules 14.4.1 - 14.4.4 National Grid to reduce the yard setbacks to align with decisions on appeals and consent orders on the Auckland Unitary Plan. The current Auckland Unitary Plan rules, and the activities within the yard allow for car parking or hard stand surfaces (and associated drainage) with limited storage height, on Industrial Zoned land, rather than the current proposed provisions which sterilize large tracts of Industrial Zone land for any activities.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The Overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the "Yard" is measured at 12m in any direction from the outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line (rather than up to 37m either side of transmission lines for 220kv lines under the Proposed Plan).
- There is no reason for the Waikato District Plan to have a wider restriction buffer than Auckland (when the effect on the National Grid would be the same regardless of Region and cognizant that the Auckland rules apply immediately adjoining the submitter's site).
- As Auckland has the most recent case law on the National Grid network through the Auckland Unitary Plan appeals process, it is reasonable to consider that its provisions are suitable to meet the National Policy Statement for Electricity Transmission.

Point Number

302.3

Summary of Decision Requested:

Delete Rule 14.12.1 P4(e) Permitted Activities.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The applicant is concerned at the traffic generation threshold allowable for the Light Industrial Zone, being "Maximum 250 vehicle movements per day and no more than 15% of these vehicle movements are heavy vehicle movements".
- Heavy vehicle movements characterize industrial zones and to limit these to only 15% of the trip generations are unnecessarily restrictive on industrial operations.
- The objectives and policies contained in Chapter 6.5 do not support this restriction on transportation.

Point Number

302.4

Summary of Decision Requested:

Add to Rule 20.1.1 Industrial Zone – Permitted Activities the following activities as permitted (as a minimum):

- Hire Centres
- Wholesale
- Trade Supply outlet

- Transport Depot
- Garden Centres
- Retailing of agricultural and industrial motor vehicles and machinery
- Processing, storage, distribution and sale (wholesale or retail) of aggregates.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- Under the Proposed Plan, there is no activity distinction between those activities provided for in the Heavy Industrial Zone and the Industrial Zone where the listed permitted activities are the same. This is inconsistent with Policy 4.6.2 which seeks to provide for "different functions" within the zones, but also a "range of activities".
- The range of permitted activities is too constrained and does not take into account more land intensive activities of a lower amenity value, which should be located an Industrial Zone rather than the Business Zone (where they are otherwise provided for as "commercial activities").
- The area of Business Zoned land nearby near Pokeno, where such activities could locate, is very limited (only around the Town Centre) and in close proximity to more services areas (i.e. residential).
- These activities could reasonably locate in an Industrial Zone (and be compatible with surrounding activities). Currently they are not considered in P1-P6, under rule 20.1.1 and unless specifically provided for would therefore default to a Non-Complying Activity (under NCI).

Point Number 302.5

Summary of Decision Requested: Delete from Rule 20.1.1 Permitted Activities any restriction on gross floor area

AND

Amend Rule 20.1.1 Permitted activities to allow for any office that is ancillary to a permitted activity.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- There is no reason to restrict offices associated with permitted activities where these support the efficient and effective operation of a permitted activity.

Point Number 302.6

Summary of Decision Requested: Add a permitted activity for the construction of a building for any permitted activity (which complies with the development controls) to Rule 20.1.1 Permitted Activities.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The activity status of buildings is unclear; this is to clarify the activity status.

Point Number 302.7

Summary of Decision Requested: Delete Rule 20.2.1 Servicing and hours of operation.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- This control is without precedent and represents a restrictive and inappropriate regime.

Point Number 302.8

Summary of Decision Requested: Amend Rule 20.2.2 CI Landscape planting for landscape planting to change from a controlled activity to a permitted activity.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- This control is without precedent and represents a restrictive and inappropriate regime.

Point Number 302.9

Summary of Decision Requested: Delete Rule 20.2.2 C1 (b) Landscape planting.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- This control creates a mandatory requirement for planting of streams irrespective of what the proposal is (for example a car parking shortfall) and without any consideration of the costs associated with the rule).

Point Number 302.10

Summary of Decision Requested: Retain Rule 20.2.3 Noise as notified.

Decision Reasons:

- The control is appropriate in managing effects between zones.

Point Number 302.11

Summary of Decision Requested: **Add** an exclusion to Rule 20.2.4 Glare and Artificial Light Spill so that it does not apply between sites in the Industrial Zones.
AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- These rules should only apply to sites adjoining a residential, reserve or countryside living zone (similar to the landscape screening and lower noise limits) and should not be applicable between Industrial sites.

Point Number 302.12

Summary of Decision Requested: **Retain** Rule 20.2.5.1 Earthworks – General as notified.

Decision Reasons:

- The control is appropriate in managing effects.

Point Number 302.13

Summary of Decision Requested: **Add** clarification to Rule 20.2.7.1 P2 (a) Signs – General that it applies to freestanding signs only.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- There is no valid reason to restrict signage of buildings.

Point Number 302.14

Summary of Decision Requested: **Amend** Rule 20.2.7.1 P2 Signs – General to increase rules to 10m² per site as a minimum.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The signage rules are unnecessarily restrictive in terms of freestanding sign size being limited to one sign per site at 3m².
- This does not take into account the use of a site for more than one activity and combined with the allowance for all other signs to be 1m² would create more visual clutter than allowing a larger free standing in the first instance.

Point Number 302.15

Summary of Decision Requested: **Amend** Rule 20.2.7.2 Signs – Effects on traffic to specify that it does not apply to site identification signs.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- It is unclear what is meant by “any sign directed at road users” - arguably any sign for identification of a business could be deemed to be directed at road user – however effects associated with identification signs are already managed by Rule 20.2.7.1.

Point Number 302.16

Summary of Decision Requested: **Delete** Rule 20.2.8(iv) Outdoor storage of goods or materials.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter opposes any restriction on the percentage of the site allowable for storage use and this should be deleted, as storage activities are permitted. Any visual effects associated with outdoor storage are already mitigated by the maximum height, setback and screening requirements contained in this rule.

Point Number 302.17

Summary of Decision Requested: **Retain** the 15m maximum height in Rule 20.3.1 Building height

OR

Amend Rule 20.3.1 Building height to increase the maximum height of 15m.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- A height of 15m is similar to that which has already started to develop/establish in the Pokeno Light Industrial 2 Zone, and there is no reason for this height to decrease. The submitter would support an increase in height.

Point Number 302.18

Summary of Decision Requested: **Amend** Rule 20.3.3 Daylight admission to increase height from 2.5m to 3m.
AND
Amend Rule 20.3.3 Daylight Admission to specifically exclude roads from any daylight admission plane.
AND
Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- There is no justification to reduce the height to boundary recession plane, to a height that is lower than the previous Franklin provisions when the maximum heights have been kept the same.
- There is no reason to apply a daylight recession plane against roads in the Industrial Zones as these areas are generally of a lower amenity and less have pedestrian traffic, therefore there is no reason to apply a daylight restriction against the road network.

Point Number 302.19

Summary of Decision Requested: **Retain** Rule 20.3.4.1 Building setback which requires a maximum front yard setback of 5m (which should not be increased).

Decision Reasons:

- A front yard setback of 5m is similar to that which has already started to develop/establish in the Pokeno Light Industrial 2 Zone, and there is no reason for setback to be increased. The submitter would support a decrease in setback.

Point Number 302.20

Summary of Decision Requested: **Amend** Rule 20.3.4.1 (a)(ii) Building setbacks to not apply to boundaries of other industrial zone sites
AND
Amend Rule 20.3.4.1(a)(ii) Building setbacks to reduce setback between sites with other zones from 7.5m to 3m.
AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- There is no justification to increase the yard setbacks between the Industrial Zones and other zones to 7.5m, when the previous Franklin provisions were more permissive.
- The 3m landscape buffer is sufficient, and there is no reason to have an additional 4.5m of building setback.
- The submitter supports the provisions for side yards to apply only to zones other than the Industrial and Heavy Industrial Zones – this is also backed up with the daylight provisions that also do not apply to adjoining industrial zoned sites.

Point Number 302.21

Summary of Decision Requested: **Retain** in Rule 20.4.1(a) Subdivision – General the minimum lot size of 1000m² and average of 2000m².

Decision Reasons:

- The proposed lot sizes are an efficient use of land for industrial activities.
- The submitter would also support a decrease in minimum area and average.

Point Number 302.22

Summary of Decision Requested: **Delete** Rule 20.4.1 RD1 (a)(iii) Subdivision – General.
AND
Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The 20% restriction on rear sites creation results in inefficiencies of land resources (which are already scarce), as it will significantly reduce the amount of land available for industrial activities (and other similar uses).
- These types of areas are generally of a "lower amenity" than town centre or residential areas, and subject to less (if any) pedestrian thoroughfare, there is no reason to restrict the number of rear lots created via subdivision.

Point Number 302.23

Summary of Decision Requested: **Retain** Rule 22.2.1.1 Noise - General as notified.

Decision Reasons:

- Standards are appropriate for noise in the Rural Zone.

Point Number 302.24

Summary of Decision Requested: **Retain** Rule 22.2.1.3 Noise – Construction as notified.

Decision Reasons:

- Standards are appropriate for construction noise.

Point Number 302.25

Summary of Decision Requested: **Amend** Section 22.3 Land Use - Building to make non-residential buildings or structures a permitted activity outside Landscape and Natural Character Areas.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The Operative Plan provides for non-residential buildings as a permitted activity in the Rural Zone. The proposed plan should include the same provision to ensure farm buildings and similar structures are provided for.

Point Number 302.26

Summary of Decision Requested: **Retain** Rule 22.3.4.1 Height – Building General as notified.

Decision Reasons:

- Standards are appropriate for building height in the Rural Zone.

Point Number 302.27

Summary of Decision Requested: **Delete** Rule 22.3.6 Building coverage.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- A restriction on building coverage and particularly one as low as the proposed 500m² is not consistent with a working rural environment which requires storage sheds, hay barns, milking sheds and dwellings etc.

Point Number 302.28

Summary of Decision Requested: **Amend** Rule 22.3.7 Building setbacks to reduce the yard separation between sites (other than a road) to 12m or less in all instances.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter opposes the yard setbacks (of up to 22m) as they are too onerous. Setbacks could be reduced and still achieve sufficient separation between activities – and maintain an open landscape character.

Point Number 302.29

Summary of Decision Requested: **Delete** from Section 22.4 Subdivision the arbitrary title date from all rules.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- There is no justification to have an arbitrary title date for further subdivision or boundary adjustments. Potential fragmentation issues can be dealt via other less arbitrary mechanisms.

Point Number 302.30

Summary of Decision Requested: **Delete** Rule 22.4.1.1 Prohibited Subdivision so there is no prohibited subdivision activity.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- Effects on soil classification can be managed in other ways (i.e. objectives and policies) which are far more consistent with an “effects based” approach to resource management.

Point Number 302.31

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision to take into account enhancement planting for the total area to be protected.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- There is a significant environmental benefit to be obtained from enhancement planting, particularly to “join up” areas of SEA (and other non-identified features).

Point Number 302.32

Summary of Decision Requested:	Retain the identification of new and expanded areas of Industrial Zones on the Planning Maps.
Decision Reasons:	<ul style="list-style-type: none"> The increase in land zoned Industrial will support economic growth and employment within existing urban areas and/or locations with good transport accessibility.
Point Number	302.33
Summary of Decision Requested:	Retain Rule 4.6.2 Provide Industrial Zones with different functions insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of the policy to enable a range of activities; however, this is not reflected in the Land Use provisions.
Point Number	302.34
Summary of Decision Requested:	Retain Rule 4.6.3 Maintain a sufficient supply of industrial land insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of the policy to enable a sufficient supply of Industrial Zoned land.
Point Number	302.35
Summary of Decision Requested:	Retain Rule 4.6.4 Maintain industrial land for industrial purposes insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of the policy to enable ancillary activities related to industrial activities; however, this is not reflected in the Land Use provisions.
Point Number	302.36
Summary of Decision Requested:	Retain Rule 4.6.5 Recognition of industrial activities outside of urban areas insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of the policy to recognize and provide for existing industrial activities; however, this is not reflected in the Land Use provisions.
Point Number	302.37
Summary of Decision Requested:	Retain the intent of Objective 4.6.6 Manage adverse effects insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of this objective to manage adverse effects on sensitive activities in other zones and ecosystems; however, the provisions are unnecessarily restrictive and could be modified as per the submitter's relief to achieve the same outcome.
Point Number	302.38
Summary of Decision Requested:	Retain the intent of Policy 4.6.7 Management of adverse effects within industrial zones insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of this objective to manage adverse effects on sensitive activities in other zones and ecosystems; however, the provisions are unnecessarily restrictive and could be modified as per the submitter's relief to achieve the same outcome.
Point Number	302.39
Summary of Decision Requested:	Add an exclusion to Policy 4.7.2 Subdivision location and design for Industrial Zones. AND Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The policy requires subdivision design and layout to adhere to a grid pattern, which enables public viewing for all urban zones, which are unnecessarily restrictive for industrial development. As industrial areas are generally of a "lower amenity" than town center or residential areas, and subject to less pedestrian thoroughfare, there is no reason to require industrial areas to adhere to the same amenity standards as residential and other higher amenity zones.
Point Number	302.40
Summary of Decision Requested:	Add an exclusion to Policy 4.7.5 Urban Outcomes – Servicing requirements for Industrial Zones for provision of cycleways/pedestrian connections. AND Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 302.41

Summary of Decision Requested: **Retain** Policy 4.7.7(a) Urban Outcomes – Achieving sufficient development density to support the provision of infrastructure services as proposed, to the extent that the industrial lot sizes are retained or reduced.

Decision Reasons:

- The proposed lot sizes are considered as a minimum for the efficient use of land designated for industrial activities, whilst enabling provision for industrial subdivision.
- The policy in its current form would also support a reduction in the average or minimum lot size.

Point Number 302.42

Summary of Decision Requested: **Add** an exclusion to Policy 4.7.9 Connected neighbourhoods for Industrial Zones provision of cycleways/pedestrian connections.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 302.43

Summary of Decision Requested: **Add** an exclusion to Policy 4.7.10 Urban Outcomes – Recreation and access for Industrial Zones for provision of cycleways/pedestrian connections.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 302.44

Summary of Decision Requested: **Add** provision to Policy 5.3.3(b) Industrial and commercial activities for industrial and commercial activities where effects on rural character can be mitigated.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- It is appropriate that provision is made for industrial and commercial activities in rural areas where their effects can be appropriately managed.

Point Number 302.45

Summary of Decision Requested: **Amend** Policy 5.3.13(b) Waste management activities to provide for waste management facilities that may not be completely compatible with the rural environment.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- It is difficult for waste management facilities to be compatible with rural environments; however, rural land acts as an effective buffer for their effects, which should be acknowledged by the policy.

Point Number 302.46

Summary of Decision Requested: **Retain** the intent of Objective 6.2.1 National Grid insofar as it gives effect to the submitter's sought relief in that the provisions relating to the National Grid Yard are too restrictive.

Decision Reasons:

- The submitter supports the intention of the objective and policies to recognise and protect of the National Grid however, the provisions relating to the National Grid yard are too restrictive.

Point Number 302.47

Summary of Decision Requested: **Retain** Objective 6.4.1 Introduction of infrastructure with subdivision, land use and development subject to relief sought elsewhere in the submission.

Decision Reasons:

- The submitter supports the intention of the objective, subject to the relief sought elsewhere in this submission.

Point Number 302.48

Summary of Decision Requested: **Add** an exclusion to Policy 6.4.5 (i) and (ii) Roading Infrastructure for Industrial Zones.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 302.49

Summary of Decision Requested: **Amend** the definition for "Clean Fill" in Chapter 13 Definitions to be consistent with the clean fill Material definition in the WasteMINZ Technical Guidelines for Disposal to Land. This reads:

Clean Fill Material

Virgin excavated natural materials (VENM) such as clay, soil and rock that are free of:

- combustible, putrescible, degradable or leachable components;
- hazardous substances or materials (such as municipal solid waste) likely to create leachate by means of biological breakdown;
- products or materials derived from hazardous waste treatment, stabilisation or disposal practices;
- materials such as medical and veterinary waste, asbestos, or radioactive substances that may present a risk to human health if excavated;
- contaminated soil and other contaminated materials; and
- liquid waste

When discharged to the environment, clean fill material will not have a detectable effect relative to the background.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- For consistency.

Point Number 302.50

Summary of Decision Requested: **Amend** the Land Use provisions in Chapter 20 Industrial Zone to reflect the intentions of Policy 4.6.2 Provide Industrial Zones with different functions, Policy 4.6.4 Maintain industrial land for industrial purposes and Policy 4.6.5 Recognition of industrial activities outside of urban areas.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The enabling of range of activities, ancillary activities, and existing industrial activities are not reflected in the land use provisions.

Point Number 302.51

Summary of Decision Requested: **Amend** the Land Use provisions in Chapter 21 Industrial Zone Heavy to reflect the intentions of Policy 4.6.2 Provide Industrial Zones with different functions, Policy 4.6.4 Maintain industrial land for industrial purposes as proposed and Policy 4.6.5 Recognition of industrial activities outside of urban areas.

AND

Amend the Proposed District Plan to make consequential amendments or additional amendments to address the matters raised in the submission.

Decision Reasons:

- The enabling of range of activities, ancillary activities, and existing industrial activities are not reflected in the land use provisions.

Point Number 302.52

Summary of Decision Requested: **Retain** the intent of Policy 6.2.2 Recognise the National Grid, insofar as it gives effect to the submitter's relief sought in the provisions relating to the National Grid Yard being too restrictive.

Decision Reasons:

- The submitter supports the intention of the policy to recognise and protect the National Grid, however, the provisions relating to the National Grid Yard are too restrictive.

Point Number 302.53

Summary of Decision Requested: **Retain** the intent of Policy 6.2.3 Operation and development of the National Grid, insofar as it gives effect to the submitter's relief sought in the provisions relating to the National Grid Yard being too restrictive.

Decision Reasons:

- The submitter supports the intention of the policy to recognise and protect the National Grid, however, the provisions relating to the National Grid Yard are too restrictive.

Point Number 302.54

Summary of Decision Requested: **Retain** the intent of Policy 6.2.4 Maintenance and minor upgrade the National Grid, insofar as it gives effect to the submitter's relief sought in the provisions relating to the National Grid Yard being too restrictive.

Decision Reasons:

- The submitter supports the intention of the policy to recognise and protect the National Grid, however, the provisions relating to the National Grid Yard are too restrictive.

Point Number 302.55

Summary of Decision Requested:	Retain the intent of Policy 6.2.5 Environmental Effects , insofar as it gives effect to the submitter's relief sought in the provisions relating to the National Grid Yard being too restrictive.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of the policy to recognise and protect the National Grid, however, the provisions relating to the National Grid Yard are too restrictive.
Point Number	302.56
Summary of Decision Requested:	Retain the intent of Policy 6.2.6 Reverse sensitivity and the National Grid, insofar as it gives effect to the submitter's relief sought in the provisions relating to the National Grid Yard being too restrictive.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intention of the policy to recognise and protect the National Grid, however, the provisions relating to the National Grid Yard are too restrictive.

Submitter Number:	303	Submitter:	Dave Campbell
Organisation:	The Village Church		
Point Number	303.1		
Summary of Decision Requested:	Amend Historic Heritage Item 107, Masonic Lodge Te Marama at 18 Hershel Street, Ngaruawahia which protects the interior, exterior and location of the building to allow for wide-ranging development and modernisation of the building.		
Decision Reasons:	<ul style="list-style-type: none"> The current restrictions on this building in the Proposed District Plan present a significant hurdle for the community, in terms of utilising the asset. The protections on the interior and exterior of the building hinder the future use of the building. The building would be useful for youth education, church services, community meals etc., however it currently cannot serve these needs and the proposed restrictions will further restrict its likelihood of becoming a community facility. The heritage values that has been attached to the building is outweighed by the benefit it could have to Ngaruawahia if it could be modified to services a community-oriented purpose. 		

Submitter Number:	304	Submitter:	Graham Taylor
Point Number	304.1		
Summary of Decision Requested:	Amend Rule 27.2.6 Noise - Other than Taxiways to include a night curfew on general aviation and recreational flying between 10pm and 7am.		
Decision Reasons:	<ul style="list-style-type: none"> There are many dwellings in close proximity to the airfield and aircraft movements at night would have serious adverse effects on residents. 		
Point Number	304.2		
Summary of Decision Requested:	Amend Rule 27.2.7 Noise - Taxiways to include a night curfew on general aviation and recreational flying between 10pm and 7am.		
Decision Reasons:	<ul style="list-style-type: none"> There are many dwellings in close proximity to the airfield and aircraft movements at night would have serious adverse effects on residents. 		

Submitter Number:	305	Submitter:	John Joensen
Point Number	305.1		
Summary of Decision Requested:	Amend the Proposed District Plan to allow for more high density housing within central Raglan, possibly as far as James Street.		
Decision Reasons:	<ul style="list-style-type: none"> Allow for higher density housing to alleviate the housing shortage within Raglan. Building smaller units will free up the bigger homes for families. Raglan businesses suffer during winter and need an increase in resident population. Reduces need to drive into town and reduces traffic congestion. Keeping standards high will enhance the town and create a more vibrant atmosphere. 		

Submitter Number:	306	Submitter:	Peter Fitzpatrick
Point Number	306.1		
Summary of Decision Requested:	Amend the zoning of the land between Taplin, Hoeka and Marychurch Roads, Matangi from Rural Zone to Village Zone or Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The area surrounding Matangi township is highly developed and reflects the provisions of the Country Living Zone. Areas of Ohaupo and Te Kowhai have been proposed as Village Zone and Matangi is also suitable for such development. Properties along Meadowpark Way, Clover Close and Margot Lane and neighbouring properties have been developed and subdivided into the Country Living Zone size lots. 		

- Services and traffic links are established in and around Matangi Village.
- The area in and around Matangi Road is well served by quality traffic links, rural services and amenities.
- Rezoning some of this area will allow for a more intensive land use, and will not detract from any productive land utilisation.
- Based on the objectives of the Proposed Waikato District Plan, this area is more suited to Country Living Zone.
- The predominant soils have limited horticultural use due to a pan which limits drainage.
- Any potential development will be in keeping with the current nature of Matangi village.

Submitter Number:	307	Submitter:	Julie Caddigan
Point Number	307.1		
Summary of Decision Requested:	Amend Rule 22.2.3.2 Earthworks - Maaori Sites and Maaori Areas of Significance to be more in line with Rule 22.2.3.3 and allow for a defined level of earthworks, cut and fill as a permitted activity, for example rotary hoeing, fencing and forestry activities and ensure farming remains viable in these areas.		
Decision Reasons:	<ul style="list-style-type: none"> • This earthworks rule is onerous • This rule states no permitted earthworks activities within the overlay which is broadly applied. • It would be difficult for the District Council to exercise this rule in relation to the Maaori Site of Significance S14/5 which has been incorrectly located. • This rule will obstruct farming activities. • Rules needs to be clarified to ensure farming remains viable in these areas. 		
Point Number	307.2		
Summary of Decision Requested:	Amend the specific location for Maaori Site of Significance S14/5 Te Uhi Paa, Exelby Road, Rotokauri to the correct coordinates.		
Decision Reasons:	<ul style="list-style-type: none"> • There is confusion and conflicting co-ordinates over the exact location of the paa site. Various sources have differing coordinates for the paa site. • It is questionable as to the reliability of the site co-ordinates used by the Council in their mapping of S14/5. • Desktop based methods of research were used and therefore relied on secondary information and no additional evidence was provided beyond the New Zealand Archaeological Association report. • A review has been undertaken that reiterates that the site was searched for, but not found and there is poor archaeological evidence. 		
Point Number	307.3		
Summary of Decision Requested:	Amend Maaori Site of Significance site S14/5 Te Uhi Paa, Exelby Road Rotokauri to be reduced to reflect the correction location and extent of the Paa site.		
Decision Reasons:	<ul style="list-style-type: none"> • There is confusion and conflicting co-ordinates over the exact location of the pass site. Various sources have differing co-ordinates for the paa site. • It is questionable as to the reliability of the site co-ordinates used by the Council in their mapping of S14/5. • Desktop based methods of research were used and therefore relied on secondary information and no additional evidence was provided beyond the New Zealand Archaeological Association report. • Two sources state that the paa site was the size of a house and 1/6 of an acre. The overlay area for S14/5 is approximately 2ha and larger than the actual paa site. 		
Point Number	307.4		
Summary of Decision Requested:	Delete the Maaori Site of Significance site S14/5 at Exelby Road, Rotokauri from Lot 1 DPS 80361 if it is found that the paa site is located in the swamp area by the lake edge.		
Decision Reasons:	<ul style="list-style-type: none"> • There is confusion and conflicting co-ordinates over the exact location of the paa site. Various sources have differing coordinates for the paa site. 		
Point Number	307.5		
Summary of Decision Requested:	Amend the Proposed District Plan to reflect further investigation of Maaori Site of Significance S14/5 at Exelby Road, Rotokauri, given that the New Zealand Archaeological Association report states there are no visible remains of the paa site and the site has been destroyed.		
Decision Reasons:	<ul style="list-style-type: none"> • There is confusion and conflicting co-ordinates over the exact location of the paa site. Various sources have differing coordinates for the paa site. 		

Submitter Number:	310	Submitter:	Fiona McNabb
Organisation:	Whaingaroa Raglan Affordable Housing Project		
Point Number	310.1		
Summary of Decision Requested:	Delete the minimum unit areas from Rule 16.4.4 RD1 (a) (iv) Multi-unit development. OR Amend Rule 16.4.4 RD1 (a) (iv) Multi-unit development by replacing the minimum unit areas with lower values for example Studio unit 30m2, One bedroom unit 40m2, Two Bedroom 50m2, Three bedroom 70m2.		
Decision Reasons:	<ul style="list-style-type: none"> • Cost of building has risen such that in order to retain affordability, building smaller dwellings is necessary. • Having fixed minimum sizes restricts those wanting to live in a much smaller space in order to meet the Building Code and retain accessible building cost. • The attached Raglan Housing Study (attached to the submission) recommends investigating the commercial potential for alternative forms of housing that depart from traditional single site/detached dwelling (e.h. multi-units/townhouses). 		

- Whaingaroa/Raglan Affordable Housing Project highlights need for Raglan community to generate and explore all possible options to provide affordable houses.

Point Number 310.2

Summary of Decision Requested: **Amend** Residential Zone Subdivision Rule 16.4.4 RD1 (b), by including the following:
(xi) Positive effects for affordable housing.

Decision Reasons:

- Affordability of housing should be enabled by objectives and Rules of District Plan.
- WRAP highlight need for Raglan community to generate and explore all possible options to provide affordable houses.

Point Number 310.3

Summary of Decision Requested: **Amend** Objective 4.1.1 (a) Strategic, to read as follows:
(a) Liveable, thriving, and connected communities that are sustainable, affordable, efficient and co-ordinated.

Decision Reasons:

- Only mention of affordability in the District Plan is in the strategic directions section 1.12.3 which calls for 'affordable options.'
- Affordability should be a core principle of the District Plan in order to support overarching goal of objective 4.1.1 (a).
- Current housing models and forecasts predict a widening disparity between portion of community who can and those who cannot afford housing.
- Lack of affordability now affects all at and below the median income and extends into the 3rd quarter of income.
- Strategy for the District Plan should recognise the environment that now surrounds housing affordability and impact is having on communities.
- Plan should enable innovative housing developments that deliver highly affordable housing options for all income streams.

Point Number 310.4

Summary of Decision Requested: **Amend** Direction Policy 4.1.18 (iii)- Raglan as follows:
Rangitahi is the ~~only~~ area that provides for the medium term future growth...

Decision Reasons:

- Other districts (e.g. Queenstown Lakes District Council) require components of all developments to deliver a portion of affordable housing, however Waikato District Council does not.
- Raglan has no affordable housing as part of their plan and the cost to buy a section is likely to exceed \$575,000.
- Raglan median household income is calculated at \$47,500 and Stats NZ suggests affordability range for this income is \$323,000 (20% deposit), which is far below the lowest range of housing likely to be able to be constructed within Rangitahi development.
- Retaining the word "only" will create a bias in affordability only attainable for household incomes above \$90,500.

Point Number 310.5

Summary of Decision Requested: **Amend** Policy 4.1.18 (iii)- Raglan to read as follows:
~~Rangitahi is the only area that will provide for the medium term future growth and is above the multiple median of affordability for Raglan. Developments that propose affordable housing to cater for the quartiles below the multiple median and that are developed in a manner that connects to the existing town and maintains and enhances the natural environment will be considered as preferred options for additional green fields development.~~

Decision Reasons:

- Will require a negotiated definition of 'affordable' and acceptance the 'multiple median' is the international standard by which housing affordability is determined.
- Rangitahi has no affordable housing as part of their plan, therefore the cost to buy a section and build is likely to exceed \$575,000.
- Raglan median household income is calculated at \$47,500 and Stats NZ suggests affordability range for this income is \$323,000 (20% deposit), which is far below the lowest range of housing likely to be able to be constructed within Rangitahi development.

Point Number 310.6

Summary of Decision Requested: **Add** a new objective to 4.2- Residential Zone as the follows:
Objective: To provide for a range of opportunities for affordable housing that enables low and moderate income people to live in the district in accommodation that suits their needs.

Decision Reasons:

- Affordability of housing should be enabled by objectives and Rules of the District Plan.

Point Number 310.7

Summary of Decision Requested: **Add** the following policies to 4.2-Residential Zone as follows (or words to similar effect):

- *Policy 1: Enable affordable housing by allowing residential densities that make economical and best use of available land in existing residential areas.*
- *Policy 2: New housing developments will include affordable housing as part of the development plan.*
- *Policy 3: Allow access for developers of affordable housing to lower cost structure of consent and regulation requirements.*
- *Policy 4: Encourage multi-unit residential developments subject to appropriate safeguards to amenities and the environment.*
- *Policy 5: Take into account positive effects for the community of affordable housing when assessing resource consent applications.*

Decision Reasons:

- Affordability of housing should be enabled by the objectives and rules of the District Plan.

Point Number 310.8

Summary of Decision Requested: **Amend** Rule 16.3.1 P1- Dwelling as follows:
One dwelling within a site Two dwellings within a site, where the combined floor areas do not exceed 'X' percentage of the section.

Decision Reasons:

- Increasing building density in residential zoned land increases the availability of affordable housing.

- Increasing density while meeting the height to boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- 16.3 currently restricts the numbers of dwellings per site and the size of those buildings therefore requiring discretionary resource consent adding to the cost of development.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize number of dwellings on a site without discretionary consent.
- Other councils have made similar changes (e.g. Auckland, Wellington) to enable increased density by right within the rules of the plan.

Point Number 310.9

Summary of Decision Requested: **Add** new rule to Rule, 16.3.1 P2 Dwelling as follows:

(g) Three dwellings within a site, if at least two of the dwellings are small houses each with a gross floor area of less than 45m².

Decision Reasons:

- Increasing building density in residential zoned land can increase the availability of affordable housing.
- Increasing density while meeting the height to boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- Rule 16.3 currently restricts the numbers of dwellings per site and the size of those buildings therefore requiring discretionary resource consent adding to the cost of development.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize number of dwellings on a site without discretionary consent.
- Other councils have made similar changes (e.g. Auckland, Wellington) to enable increased density by right within the rules of the plan.

Point Number 310.10

Summary of Decision Requested: **Amend** Rule 16.3.9.1 RD1 Building setbacks - All boundaries, to include the following:

(v) (iii) Positive effects for affordable housing.

Decision Reasons:

- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes, e.g. Auckland & Wellington, to enable increased density by right within the rules of the plan.

Point Number 310.11

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (b) Subdivision - General by including the following:

xi) Positive effects for affordable housing.

Decision Reasons:

- To insert consideration of affordability in housing development into the focus for Council discretion when considering development consents for subdivision.

Point Number 310.12

Summary of Decision Requested: **Amend** Rule 17.1.2 Permitted Activities, by including "Relocatable Home Park" as a permitted activity in the Business Zone.

AND

Add a definition to Chapter 13 Definitions for "Relocatable Home Park."

Decision Reasons:

- Building much smaller, on trailers and with intent houses could be moved if desired is a mechanism for providing affordable housing that is not currently addressed by the District Plan.
- Future option is that land be retained by the developer and only dwellings would be owned by the purchaser(s).
- Developments created to provide suitable flat size, power, potable water and waste amenities to the site ready for connection.
- Shared facilities of communal gardens and recreation areas could be a pre-requisite for such developments.
- Rule change necessary to create the above as a permitted activity and provide good planning objectives so that such developments would be built of good standard, enhance town and building amenities and provide affordable options for those wanting smaller homes in a village environment.

Point Number 310.13

Summary of Decision Requested: **Amend** Rule 16.3.7 PI (iii)- Living court by changing the 80m² requirement to 40m².

Decision Reasons:

- Decreasing living court requirements will enable more dwellings to be situated on a single site.
- Increasing building density in residential zoned land can increase the availability of affordable housing.
- Increasing density while meeting the height to boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- Rule 16.3 currently restricts the numbers of dwellings per site and the size of those buildings therefore requiring discretionary resource consent adding to the cost of development.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize number of dwellings on a site without discretionary consent.
- Other councils have made similar changes (e.g. Auckland, Wellington) to enable increased density by right within the rules of the plan.

Point Number 310.14

Summary of Decision Requested: **Amend** Rule 16.3.1 Dwelling, to allow more than one primary dwelling and one minor dwelling per site.

Decision Reasons:

- Increased building density in residential zoned land can increase the availability of affordable housing.
- Rule 16.3 currently restricts numbers of dwellings per site therefore requiring discretionary resource consent adding to the cost of development.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes, e.g. Auckland & Wellington, to enable increased density by right within the rules of the plan.

Point Number 310.15

Summary of Decision Requested: **Amend** the definition of 'minor dwelling' in Chapter 13 Definitions, to allow more than one minor dwelling per site.

AND

Amend Rule 16.3.1 Dwelling to allow more than one primary dwelling and one minor dwelling per site.

Decision Reasons:

- Increased building density in residential zoned land can increase the availability of affordable housing.
- Increased density while meeting the height to boundary and other restrictions
- Rule 16.3 currently restricts numbers of dwellings per site therefore requiring discretionary resource consent adding to the cost of development.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes, e.g. Auckland & Wellington, to enable increased density by right within the rules of the plan.

Point Number 310.16

Summary of Decision Requested: **Delete** the setback requirement for garages in Rule 16.3.9.1 Building setbacks - All boundaries.

Decision Reasons:

- Increasing density whilst meeting height-boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes, e.g. Auckland & Wellington, to enable increased density by right within the rules of the plan.

Point Number 310.17

Summary of Decision Requested: **Delete** Rule 16.3.9.1 P3 Building setbacks - All boundaries.

Decision Reasons:

- Increasing density whilst meeting height-boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- Amending Rule 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes, e.g. Auckland & Wellington, to enable increased density by right within the rules of the plan.

Submitter Number: 311 **Submitter:** Harpal Singh-Sandhu

Point Number 311.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, except for the amendments sought below

AND

Amend Objective 5.1.1 The rural environment, as follows:

(a) Subdivision, use and development within the rural environment where:

(i) high class soils are reasonably and appropriately protected for productive rural activities;

(ii) productive rural activities are supported, while maintaining or enhancing the rural environment;

(iii) urban subdivision, use and development in the rural environment is avoided.

Decision Reasons:

- The submitter generally supports the principle that typical urban subdivision, use and development should not be encouraged within the rural environment, particularly within properties with high-class soils.
- Reasonable and appropriate subdivision that supports the amenity and purpose of the rural environment and communities should be considered, with particular regard to sites that do not sufficiently support the overall operation of rural activities.

Point Number 311.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources.

Decision Reasons:

- It is appropriate to direct inappropriate subdivision and land use away from productive soils to support the retention of rural land and activities.

Point Number 311.3

Summary of Decision Requested: **Retain** Policy 5.2.3 Effects of subdivision and development on soils.

Decision Reasons:

- It is appropriate to direct inappropriate subdivision and land use away from productive soils to support the retention of rural land and activities.

Point Number 311.4

Summary of Decision Requested: Amend Rule 22.4.1.1 PR1 Prohibited subdivision, to be a non-complying activity.

Decision Reasons:

- It is acknowledged that the high-class soils should be protected for rural land use practices. Inappropriate subdivision and land use should be directed away from locations/properties with high-class soils to ensure that the rural capabilities of the land are retained.
- There are pockets of land that are considered high class soils, however they cannot be easily used to support the overall operation of a rural land use and activity. This results in an inefficient use of a resource that could otherwise be used to provide properties and housing for members of the community that are not directly employed in rural businesses, but support other business and institutions (e.g. schools, stores) within the local community.
- It is supported that high-class soils be protected, however it should not be considered a prohibited activity, particularly because such subdivision may be considered appropriate in various circumstances. Therefore, such proposed subdivision should be considered a non-complying activity.

Point Number 311.5

Summary of Decision Requested: Amend Rule 22.4.1.1 PR4 Prohibited subdivision to be a non-complying activity.

Decision Reasons:

- It is acknowledged that the high-class soils should be protected for rural land use practices. Inappropriate subdivision and land use should be directed away from locations/properties with high-class soils to ensure that the rural capabilities of the land are retained.
- There are pockets of land that are considered high class soils, however they cannot be easily used to support the overall operation of a rural land use and activity. This results in an inefficient use of a resource that could otherwise be used to provide properties and housing for members of the community that are not directly employed in rural businesses, but support other business and institutions (e.g. schools, stores) within the local community.
- It is supported that high-class soils be protected, however it should not be considered a prohibited activity, particularly because such subdivision may be considered appropriate in various circumstances. Therefore, such proposed subdivision should be considered a non-complying activity.

Submitter Number: 312

Submitter: Brian Putt

Organisation: Metro Planning Ltd

Point Number 312.1

Summary of Decision Requested: Add a site-specific precinct as Appendix I3 for the Whatawhata Arboretum at 635 State Highway 23, Whatawhata which:

- provides for not more than 10 house sites;
- protects all identified trees and planting areas on a precinct tree plan; and
- enables subdivision associated with the approved house sites and the protection of individual or groups of notable trees.

Decision Reasons:

- A site-specific precinct for the arboretum is sought because:
- The property at 635 State Highway 23, Whatawhata is unique as it was planted by acknowledged Waikato foresters 60-80 years ago.
- The register of trees on this property confirms the notable character of the site which has district significance.
- The site can not be farmed for pastoral or horticultural purposes without adversely affecting the notable trees and the significant environmental value that the site contributes to the district.
- The proposed precinct secures the permanent environmental qualities of the site while allowing for a rural residential environment to emerge which maintains and enhances those qualities.
- The protection of the arboretum within a rural residential environment would achieve the purpose of the RMA, particularly Part 2.

Point Number 312.2

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, by deleting all references to a prohibited activity.

Decision Reasons:

- A prohibited activity status for subdivision represents an abrogation of resource management principles in respect of land use, development and subdivision in the Rural Zone.
- Subdivision is the principal method for providing for land use activity in the Rural Zone that achieves the economic, social and cultural well-being of the rural community. This is achieved through the underlying creation of titles providing for rural investment.
- Planning can not predict the future opportunities for rural investment and therefore must leave subdivision available as a technique for achieving the purpose of the RMA.
- The prohibited activities provisions in Rule 22.4.1 have no foundation in the objectives and policies of the district plan. Prohibited activities are not mentioned in Chapter 5.
- Accordingly, providing for prohibited activity subdivision is contrary to the purpose of the RMA, in particular section 5.

Submitter Number: 323

Submitter: Dorothy Chipman

Point Number 323.1

Summary of Decision Requested: No specific decision sought, but submission states support in part for rule 22.4.1.4 Boundary relocation and expresses desire to be able to relocate a boundary within one farming property from the Waikato area to the Franklin area.

Decision Reasons:

- Submitter has 3 titles adjacent to each other, 2 covered under the Waikato and 1 under the Franklin District Council.
- Would like to move a title which can be created from the Waikato area to the Franklin area.
- Have gone to considerable unnecessary expense to try and relocate the extra title to the Franklin area.
- Will allow retention of a large land holding more suitable for productive farming by keeping titles in a small rural hamlet together and leaving remaining titles in a productive farming enterprise and make landholdings larger.
- Unfairly restrained by boundary relocation due to being situated over 2 differing councils with a paper road bisecting the property.
- There will be a definite advantage in keeping productive soils from subdivided by keeping land together under a boundary relocation.

Submitter Number: 324

Submitter: Jason Dawson

Organisation: Hamilton & Waikato Tourism

Point Number 324.1

Summary of Decision Requested: **Add** a new section, 9.5 Kimihia Lakes Recreation and Events Zone, to Chapter 9 Specific Zones, to enable the development of a regionally-significant events and recreation facility at the former Huntly East Mine.

AND

Add a policy entitled "Tourism Significance" as follows:

Policy: Tourism Significance

(g) To promote the on-going development of the Kimihia Lakes Recreation and Events Park as a venue for regional, national and international events and outdoor pursuits, whilst providing for the general public to use and enjoy the facilities.

Decision Reasons:

- Approach in the PDP is to provide the activity with its own zone due to its unique nature.
- Seeks to include only privately owned land and excludes the existing Lake Kimihia Lake which is DOC owned and operated.
- Develop the area into a regionally-significant events and recreation facility.
- Establishment of a zone with supporting provisions is envisaged to 'fast forward' the development of the Park without onerous and numerous resource consenting processes.
- Location of the proposed Kimihia Lakes Recreation and Events Park provides a catchment of 2.3 million people within a 3-hour drive radius.
- Kimihia Lakes Recreation and Events Park development is aligned to the following game-changers identified in the plan:
 - Regional Events Strategy
 - Home of Kingitanga
 - Activate the Waikato River and environs.
- Submitter supports development of Kimihia Lakes Recreation and Events Park to include 3 precincts of facilities/activities including:
 1. Lake precinct for all types of water-based and lakeside based sports, recreation activities and events;
 2. The commercial nodes immediately adjacent to the lake where a community and education focused Aquatic Centre would be built along with ancillary recreation and retail facilities; and
 3. Remaining natural areas where all types of non-motorised recreation activities and events could occur.

Point Number 324.2

Summary of Decision Requested: **Add** a new Chapter 29 Kimihia Lakes Recreation and Events Zone, including the following:

29.1.1 Permitted Activities

All permitted activities are subject to compliance with the Land Use Effects, Land Use Building and Activity Specific rules below:

- Recreation Activity and Facilities

- Construction, additions and alterations of buildings to support and/or accommodate Recreation Activities

- Construction of structures in and/or over the lake, including (but not limited to) jetties, piers, pontoons and walkways;

- Community Activities and Facilities

- Outdoor Education

- Commercial activities within the Commercial Node Areas;

- Ancillary buildings;

- Operational Facilities;

- Travellers' Accommodation including campgrounds;

- Signs;

- Earthworks;

- Managers'/Caretakers' Dwellings;

- Beekeeping

- Temporary Event

- A Conservation activity

AND

Add the new provisions attached to the submission including a new Chapter 29, additions to Chapter 13 Definitions, additions to Chapter 14 Infrastructure and Energy and consequential amendments.

Decision Reasons:

- Hamilton and Waikato region, especially Waikato District, has an urgent shortage of large quality commercial accommodation and addition of a campground/holiday park to the Kimihia Lakes Recreation and Events Zone.
- Supports the proposal to develop a recreation zone for rowing, waka ama, sailing, aqua cycles, mountain biking, zip-lines and fitness/confidence courses, but excluding powered/motor activities.
- This proposal aligns to the 2016 Tourism Opportunities Plan to develop visitor experiences within the North Waikato Corridor around outdoor recreation.

Submitter Number: 325

Submitter: Noelene Searle

Point Number 325.1

Summary of Decision Requested: **Amend** the zoning of the property at 102 Travers Road, Te Kauwhata to Country Living Zone.

Decision Reasons:

- Land is prone to flooding as there is a creek running through it.
- Increase in traffic along Travers Road.
- Already 60 houses being built on Travers Road.
- Loss of rural views due to streets, lights and houses.
- Rezoning would result in many houses bordering the property.
- Submitter concerned about livestock (sheep) theft.

Submitter Number: 326

Submitter: Charlie Young

Organisation: Raglan Chamber of Commerce

Point Number 326.1

Summary of Decision Requested: **Amend** Objective 4.1.1 (a) Strategic, as follows:
Liveable, thriving, and connected communities that are sustainable, affordable, efficient and coordinated.

Decision Reasons:

- The only mention of affordability in the District Plan is in the strategic directions section 1.12.3 calling for 'affordable options.'
- Affordability should be a core principle of the district plan.
- Current housing models and forecasts predict a widening disparity between portion of community who can and those who cannot afford housing.
- Lack of affordability now affects all those at and below the median income and extends into the 3rd quarter of income.
- Strategy for District Plan should recognise the environment that surrounds housing affordability and the impact it's having on communities.
- Plan should enable innovative housing developments that deliver highly affordable housing options for all income streams.
- Housing developments have a focus on providing good quality homes which meet the needs of individual communities at a cost that enables those at all income levels to afford a decent place to live are supported in the consent and development processes.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognized housing crisis and have activated affordable housing policies and initiatives.

Point Number 326.2

Summary of Decision Requested: **Amend** Urban Environment Strategic Direction Policy 4.1.18(iii) Raglan, to remove the word "only" and allow other developments that support affordable development to occur by replacing with the following wording:

Rangitahi will provide for medium term growth above the multiple median of affordability for Raglan. Developments that propose affordable housing to cater for the quartiles below the multiple median and that are developed in a manner that connects to the existing town and maintains and enhances the natural environment will be considered as preferred options for additional green fields development.

Decision Reasons:

- This will require a negotiated definition of 'affordable' and acceptance that the 'multiple median' is the international standard by which housing affordability is determined.
- Housing developments have a focus on providing good quality homes which meet the needs of individual communities at a cost that enables those at all income levels to afford a decent place to live are supported in the consent and development processes.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognised housing crisis and have activated affordable housing policies and initiatives.
- Other districts, e.g. Queenstown Lakes District Council, require compulsory components of all developments to deliver a portion of affordable housing within the development, of which Waikato District Council currently doesn't.
- Rangitahi has no affordable housing as part of plan and cost to buy a section/build likely to exceed \$575,000.
- Raglan median household income is calculated at \$47,500 and Stats NZ's affordability range for this household income is \$323,000-\$387,000, far below the lowest range of housing able to be constructed within Rangitahi development.
- Retaining 'only' will create a bias in affordability only attainable for household income above \$90,500.
- Housing developments have a focus on providing good quality homes which meet the needs of individual communities at a cost that enables those at all income levels to afford a decent place to live are supported in the consent and development processes.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognized housing crisis and have activated affordable housing policies and initiatives.

Point Number 326.3

Summary of Decision Requested: **Add** a new policy and objective to Section 4.2 Residential Zone, as follows (or similar wording):

Objective: To provide for a range of opportunities for affordable housing that enables low and moderate income people to live in the district in accommodation that suits their needs.

Policy 1: Enable affordable housing by allowing residential densities that make economical and best use of available land in existing residential areas.

Policy 2: New housing development will include affordable housing as part of the development plan.

Policy 3: Allow access for developers of affordable housing to lower cost structure of consent and regulation requirements.

Policy 4: Encourage multi-unit residential developments subject to appropriate safeguards to amenities and the environment.

Policy 5: Take into account the positive effects for the community of affordable housing when assessing resource consent applications.

Decision Reasons:

- Affordability of housing should be enabled by the objectives and Rules of the District Plan.
- Housing developments have a focus on providing good quality homes which meet the needs of individual communities at a cost that enables those at all income levels to afford a decent place to live are supported in the consent and development processes.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognized housing crisis and have activated affordable housing policies and initiatives.
- Policies need to be incorporated into the district plan.

Point Number 326.4

Summary of Decision Requested: **Delete** Rule 16.4.4 RD1 (a)(iv) Multi-unit development

OR

Amend Rule 16.4.4 RD1 (a)(iv) Multi-unit development by decreasing the Multi-unit development minimum unit areas, for example Studio unit 30m², One bedroom unit 40m², Two bedroom 50m² and Three bedroom 70m².

Decision Reasons:

- Affordability of housing should be enabled by the rules of the District Plan.
- The cost of building has risen such that in order to retain affordability, building smaller dwellings is necessary.
- Having fixed minimum sizes in the rules restricts those wanting to live in a much smaller space to meet Building Code and retain accessible building cost.
- Housing developments have a focus on providing good quality homes which meet the needs of individual communities at a cost that enables those at all income levels to afford a decent place to live are supported in the consent and development processes.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognised housing crisis and have activated affordable housing policies and initiatives.

Point Number 326.5

Summary of Decision Requested: **Add** "Relocatable Home Park" to Rule 17.1.2 Permitted Activities, to include 'Relocatable Home Park'

AND

Add a definition to Chapter 13 Definitions, that describes a "Relocatable home park".

Decision Reasons:

- Building much smaller, building on trailers and with the intent that houses could be moved if the owner wanted to relocate is a mechanism for providing affordable housing that is not currently addressed by the District Plan.
- Land remains one of the most expensive components, a future option is that land ownership be retained by the developer and only the dwellings would be owned by purchaser(s).
- Developments could be created to provide suitable flat site, power, potable water and waste amenities to the site ready for connection.
- Some shared facilities of communal gardens and recreation areas could be a pre-requisite for such developments.
- Rule change necessary to create activity as permitted and provide good planning objectives so such developments are of a good standard, enhance town and building amenities and provide affordable options for those desiring smaller homes in village environment.
- Housing developments have a focus on providing good quality homes which meet the needs of individual communities at a cost that enables those at all income levels to afford a decent place to live are supported in the consent and development processes.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognized housing crisis and have activated affordable housing policies and initiatives.

Point Number

326.6

Summary of Decision Requested:

Amend Rule 16.3 Land use, so that the number of dwellings and the definition of a minor dwelling allow for more than one primary dwelling and one minor dwelling per site. The submission sets out some examples of possible amendments to rules, e.g.:

Rule 16.3.1 P1

Two dwellings within a site where the combined floor areas do not exceed x percentage of the section.

New Rule 16.3.1.P2

Three dwellings within a site, if at least two of the dwellings are small houses each with a gross floor area of less than 45m2.

Decision Reasons:

- Increasing building density in residential-zoned land can increase the availability of affordable housing.
- Increasing density requires building smaller dwellings or multi-unit dwellings.
- Rule 16.3 restricts the number of dwellings and therefore adds cost through requiring a resource consent.
- These changes enable affordable housing design to maximise the number of dwellings on a site without discretionary consent.

Point Number

326.7

Summary of Decision Requested:

Add a matter of discretion to Rule 16.4.4 RDI(b)- Multi-unit development as follows:

(xi) Positive effects for affordable housing.

Decision Reasons:

- Affordability of housing should be enabled by rules of the District Plan.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognised housing crisis and have activated affordable housing policies and initiatives.
- The cost of building has risen such that, in order to retain affordability, building smaller dwellings is necessary.

Point Number

326.8

Summary of Decision Requested:

Amend Rule 16.3.7 P1(iii) Living Court, by changing "80m2" to "40m2".

Decision Reasons:

- Increasing building density in residential zoned land can increase the availability of affordable housing.
- Increasing density while meeting the height to boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- 16.3 currently restricts the numbers of dwellings per site and the size of those buildings therefore requiring discretionary resource consent adding to the cost of development.
- Amending 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes (Auckland, Wellington) to enable increased density by right within the rules of the plan.

Point Number

326.9

Summary of Decision Requested:

Delete Rule 16.3.9.1 P3 Building setback - All boundaries

AND

Add a matter of discretion to Rule 16.3.9.1 RDI Building setbacks - all boundaries, as follows:

(viii) Positive effects for affordable housing.

Decision Reasons:

- Increasing building density in residential zoned land can increase the availability of affordable housing.
- Increasing density while meeting the height to boundary and other restrictions requires building smaller dwellings or multi-unit dwellings.
- 16.3 currently restricts the numbers of dwellings per site and the size of those buildings therefore requiring discretionary resource consent adding to the cost of development.
- Amending 16.3 as suggested enables affordable development design in residential zoned land to maximize the number of dwellings on a site without discretionary consent.
- Other councils have made similar changes (Auckland, Wellington) to enable increased density by right within the rules of the plan.

Point Number

326.10

Summary of Decision Requested:

Add a matter of discretion to Rule 16.4.1 RDI(b) Subdivision - general, as follows:

(xi) Positive effects for affordable housing.

Decision Reasons:

- Inserts a consideration of affordability in housing development into the focus for Council discretion when considering development consents for subdivision.
- Clearly housing affordability throughout District needs to be supported.
- Lack of affordable housing is having a severe impact on businesses trying to retain staff in communities.
- Other NZ District Councils have recognised housing crisis and have activated affordable housing policies and initiatives.

Submitter Number:	327	Submitter:	Jon Harris
Point Number	327.1		
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 140B Woodcock Road, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The area indicated contains predominantly introduced and pest species of vegetation, such as willow trees. 		
Point Number	327.2		
Summary of Decision Requested:	Delete the walkway / cycle-way / bridleway from Fuchsia Lane to Titoki Drive, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The banks of the gully are steep, unstable and prone to erosion due to the sandy loam soil structure. The stream banks and low lying surrounding area are extremely boggy which would make construction of a walkway / cycle-way / bridleway impractical and prohibitively expensive. 		

Submitter Number:	328	Submitter:	Paula Dudley
Point Number	328.1		
Summary of Decision Requested:	Retain Chapter 2 Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	328.2		
Summary of Decision Requested:	Retain Objective 2.14 Kaitiaki (steward/guardian).		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	328.3		
Summary of Decision Requested:	Amend Policy 3.2.7 (vii) Managing Significant Natural Areas to extend the role of kaitiaki to the neighbouring property owners residing next to historical reserves, to include daily upkeep and management of lawns, gardens and rubbish. Kaitiaki to be supported by WDC to maintain grounds.		
Decision Reasons:	<ul style="list-style-type: none"> Historical site proposed on south boundary of the property at 524A State Highway 1, Tamahere, but concerns are raised as to who will be responsible for its upkeep/maintenance. If a property owner has links to Tainui, consideration could be made to be supported by WDC to manage and maintain the lawns and rubbish of the reserve and turning bay at the entrance of the submitter's property and the neighbouring reserve. 		
Point Number	328.4		
Summary of Decision Requested:	Retain Section 3.4 Significant Amenity Landscapes.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	328.5		
Summary of Decision Requested:	Amend Rule 23.4.2 RD1 (a)(i) General Subdivision, to be 3000m2 minimum site area rather than 5000m2.		
Decision Reasons:	<ul style="list-style-type: none"> As the submitter's property must also adhere to the various subdivision constraints imposed from the south boundary (historical reserve), west boundary (highway) and east boundary (SNA), it is more difficult for the submitter to meet the complex subdivision criteria. The complexity of the submitter's boundaries seeks flexibility on the net site area to 3000m2 to ensure a fair solution in optimising subdivision potential. Optimise division of land into smaller sized lots. 		
Point Number	328.6		
Summary of Decision Requested:	Amend Rule 23.1.1 P3 (c) Permitted Activities for Operating hours of temporary events to be shortened with some flexibility during daylight savings.		
Decision Reasons:	<ul style="list-style-type: none"> Safety concerns with public entry and activity(s) on neighboring historical reserve to property owners and residents. Safety concerns for neighbouring residents near public reserves. 		

Point Number	328.7
Summary of Decision Requested:	Amend Rule 23.4.7 RD1 (a) Road frontage to include more specific details on rules about what/how the number(s) of dwellings/lots/activities can determine the width(s) of a right of way and the 15m width is excessive.
Decision Reasons:	<ul style="list-style-type: none"> • An excessive width from the modest 7-9m width required for a property wishing to explore subdivision potential. • Not enough information is provided in the Proposed Plan (or various public mediums) to property owners and residents on what/ how the width of a right of way can influence and/or affect the number of dwellings permitted. A land acquisition involving the submitter's original privately owned right of way (approx. 9m) to be replaced with only a 7m, reducing their chances for any future subdivision potential.
Point Number	328.8
Summary of Decision Requested:	Amend Rule 23.4.9 RD1 (b) Subdivision creating Reserves to require consultation with neighbouring property owners directly affected by planning and implementation of public owned reserves.
Decision Reasons:	<ul style="list-style-type: none"> • The sharing of information between parties (council and owner(s)) can only improve the effectiveness on the operation of any public reserves. • To be amended to also consult with affected property owners. • To build relationships.
Point Number	328.9
Summary of Decision Requested:	Retain Section 7.1 Protection of Historic Heritage and Notable Trees.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	328.10
Summary of Decision Requested:	Amend Policy 8.1.2(b)(iv) Provision, use and development of public open space and reserves, to ensure the relevant style/type of fencing and lighting is negotiated with neighbouring property owner(s).
Decision Reasons:	<ul style="list-style-type: none"> • Historical reserve on the south boundary of the submitter's property - raises concerns for residents/ owners' safety. • Currently, no information has been forwarded outlining plan and implementation pre-development and post-development.
Point Number	328.11
Summary of Decision Requested:	Amend Section 12.2 How to use and interpret the rules – Categories of Activities, pertaining to controlled activities to offer provisions to property owners who are affected by multiple public developments. AND Amend Section 12.2 How to use and interpret the rules – Categories of Activities, specifically in relation to the ability for council to refuse to grant a controlled activity subdivision if the provisions of s106 of the Resource Management Act apply, to ensure provisions are offered to support property owners faced with unusual circumstances of multiple public developments.
Decision Reasons:	<ul style="list-style-type: none"> • Both the historical reserve on the south boundary of the property (524B State Highway, Tamahere) and a four-lane highway on the west boundary pose additional complications for a potential subdivision. • A case-by-case scenario supports property owners faced with unusual circumstances of multiple public developments.

Submitter Number:	329	Submitter:	Richard Sun
Organisation:	The Coffee Club Te Rapa Service Centre		
Point Number	329.1		
Summary of Decision Requested:	Retain the Residential Zone at the property owned by the Coffee Club Te Rapa Service Centre.		
Decision Reasons:	<ul style="list-style-type: none"> • Perfect location to Horotiu School • Accessibility to employment surrounding Horotiu • Good vehicle access • Easy connection to river ride • River sided and improve environment. 		

Submitter Number:	330	Submitter:	Andrew and Christine Gore
Point Number	330.1		
Summary of Decision Requested:	Amend the activity status of subdivision to be controlled activities.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		

Point Number	330.2
Summary of Decision Requested:	Retain the provisions restoring and enhancing the gully systems throughout the Waikato Region.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	330.3
Summary of Decision Requested:	Retain Rule 22.4.1.6 Conservation lot subdivision, allowing an extra subdivision right to protect ecological areas and for the contiguous area to be determined by an experienced and suitably qualified ecologist.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	330.4
Summary of Decision Requested:	Amend the Proposed District Plan to allow subdivision where a property is planted and creates an ecological area for the future.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	330.5
Summary of Decision Requested:	Amend the Proposed District Plan to require more consideration of the environment including lighting and noise.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Point Number	330.128
Summary of Decision Requested:	No specific decision sought, however submission refers to Section E Designations.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	330.129
Summary of Decision Requested:	Amend Section 5.1 The Rural Environment so that urban subdivision use and development is appropriate to circumstance, in particular for properties such as the submitters' at 295 Kay Road, Horsham Downs.
Decision Reasons:	<ul style="list-style-type: none"> The submitters' property has been dislocated from rural land use by the Waikato expressway and Resolution Drive. It is unreasonable to have an objective that limits urban subdivision in an area that is marked future urban. Landowners such as the submitters are penalised by development. Fragmentation by NZTA/Alliance road development and future demand by Hamilton City for Housing.
Point Number	330.130
Summary of Decision Requested:	Amend Section 5.2 Productive Versatility of Rural Resources to recognise that where the surrounding ecosystem has already been changed by development that the best use forward is the option. This could include developments with best practice to prevent further deterioration of those ecosystems, such as appropriate subdivision and appropriate productive rural activity.
Decision Reasons:	<ul style="list-style-type: none"> The health and wellbeing of the submitters land has already been compromised by the large-scale projects bordering the property. The natural ecosystem is already altered irreparably.
Point Number	330.131
Summary of Decision Requested:	Amend Section 5.3 Rural Character and Amenity to recognise properties where the continued operation of the rural environment as a productive working environment is not possible so the landowners can develop their property.
Decision Reasons:	<ul style="list-style-type: none"> It is not possible to recognise and protect our land as a productive working environment The submitters are fragmented from neighbouring land by NZTA roading The submitters are prevented from intensive agriculture by proposed future urban zoning
Point Number	330.132
Summary of Decision Requested:	Amend Policy 5.3.4 Density of dwellings and buildings within the rural environment to allow urban development to take place in an amended environment that preserves the rural character, by less intensive urbanisation.
Decision Reasons:	<ul style="list-style-type: none"> It must be addressed where property is a Future Urban Zone and has restrictions on rural amenity imposed by current development
Point Number	330.133
Summary of Decision Requested:	Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, so that urban development can take place in the form of rural development that does not have to regard the productive soils where the productive rural area is already compromised by development such as large scale public works.
Decision Reasons:	<ul style="list-style-type: none"> In a situation such as the submitters', the rural land is no longer productive due to fragmentation out of their control. Rural subdivision should be able to take place without the clause protecting production.
Point Number	330.134
Summary of Decision Requested:	Amend Policy 5.3.15 Noise and vibration to mitigate adverse effects of large-scale roading developed next to urbanisation at the source, and the ecological management area must be considered in the mitigation as future proofing.
Decision Reasons:	<ul style="list-style-type: none"> This policy does not go far enough. The submitters' property is a Future Urban Zone. The submitters' property is under the overlay of ecological area. The NZTA/Alliance roading is not sufficiently noise mitigated in the mitigating plan for this type of development. Urbanisation will be sensitive to noise effect. This is proven throughout the North Island where housing and large expressways intersect. To plan an ecological area should have excellent noise management. Lower noise is essential for the movement of any wildlife who rely on acoustic vibration. By allowing extensive roading into this proposed ecological area, the ecosystem has been irreparably altered. It is noted that noise being experienced currently in the proposed ecological area is unacceptable for an ecological management area. All effort should be made to minimize any more effect into the environment by noise.

- Noise policy needs to directly address the potential traffic noise effect from the unfinished road projects, and finished road projects to ensure the basin area can be promoted as ecological.
- Noise levels should be subject to tighter environmental control.

Point Number 330.135

Summary of Decision Requested: **Amend** Section 5.5 Hamilton's Urban Expansion Area for those under the Rural Zone to be able to develop according to rural rules unless the land is acquisitioned by Hamilton City Council. This is especially for the submitters' property at 295 Kay Road RD1, Horsham Downs.

Decision Reasons:

- Land cannot be unreasonably protected for Hamilton urban development.
- This is an unrealistic and unfair objective for small landholders such as the submitters' who have been subjected to land fragmentation by large-scale development.
- As landowners of a small Land holding, 4ha, they should not have their land which is also a Rural Zone protected just for the Hamilton urban expansion
- In their situation, they cannot use the productive rural land due to fragmentation by large NZTA/ Alliance roading projects.
- They should be able to use the land for appropriate rural use, such as a rural supporting business, e.g. veterinary clinic.
- They should be able to develop a rurally sensitive subdivision.
- They should not be put in a holding pattern by Hamilton urban expansion objectives.
- They should be able to develop a Hamilton Country Living Zone such as 5.6 (Rural Environment - Country Living Zone).

Point Number 330.136

Summary of Decision Requested: **Amend** Policy 5.6.15 Artificial outdoor lighting to control adverse effects of large project lighting and any other lighting in an ecological management area with low light emission tolerance.

Decision Reasons:

- This policy does not go far enough
- An ecological management area should be managing for environmentally sensitive lower light spill tolerance.
- Dark sky area should be promoted
- Specific mitigation policy should be in place for road lighting spill.
- Permissible Lux light level should be lower.
- If this is an ecological area then a dark sky area should be promoted. It is noted that there is no significant dark sky area in this central area of the north island. It is also noted that light spill is being experienced currently in the proposed ecological area that is unacceptable for an ecological management area.
- The light spill should be strictly controlled. Lighting should be subject to tighter environmental control.

Point Number 330.137

Summary of Decision Requested: **Amend** Rule 22.2.2 Glare and Artificial Light Spill to specify the type of lighting to comply with low glare and low light spill
AND
Amend Rule 22.2.2 Glare and Artificial Light Spill to ensure that lighting into an ecological area will meet standards for dark sky.
AND
Amend Rule 22.2.2 Glare and Artificial Light Spill to lower lux standards.

Decision Reasons:

- This rule is not comprehensive enough
- With an ecological management zone the rules around lighting to be more comprehensive.
- The lux should be lower.
- The mitigation measures should be stipulated.

Point Number 330.138

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR1 Prohibited subdivision to not apply to land that is fragmented by projects the council supports, in particular by other publicly driven projects such as expressway development.

Decision Reasons:

- The submitters are in a Rural Zone, and should be able to subdivide a rural subdivision and build a business that supports the Rural Zone.
- As a property owner that has been fragmented by NZTA/Alliance roading projects, the submitters are no longer able to produce off the land.
- As a property owner under a future Urban Zone, the submitters cannot intensively farm the land with agriculture.
- The submitters are penalized because of development around them.
- Their land is 4ha and is too small to be economic on its own. With all of the boundary constraints, they should be able to develop a rural subdivision that meets ecological management and Waikato river basin management requirements.
- They cannot be in a holding pattern of prohibited activity by either the Waikato District Council or the Hamilton City Council. They own the land, the WDC and the HCC do not.

Point Number 330.139

Summary of Decision Requested: **Amend** Rule 22.4.1.2 RD1 General Subdivision to reflect rural values but supply some urban demand
AND
Add new clauses to Rule 22.4.1.2 RD1 General Subdivision to allow for smaller rural lots that are developed ecologically.
AND

Amend Rule 22.4.1.2 RDI General Subdivision to require that subdivision should be ecological in management in order to retain a natural environment.

Decision Reasons:

- RDI (a) is not practical where properties are future Urban Zone and Rural Zones, and Hamilton basin zoned.
- As the area is future Urban Zoned, the development needs to be rurally sensitive but also urban pitched within the ecological management.

Point Number 330.140

Summary of Decision Requested: **Amend** Section 5.1 The Rural Environment so that it does have primacy over all other objectives as it is not suitable for all properties.

Decision Reasons:

- Objective 5.1.1 is not suitable for all properties in particular those such as the submitters' property.
- The submitters' property has been dislocated from rural land use by the Waikato expressway and Resolution Drive.
- It is unreasonable to have an objective that limits urban subdivision in an area that is marked future urban.
- Landowners such as the submitters are penalised by development.
- Fragmentation by NZTA/Alliance road development and future demand by Hamilton City for Housing.

Point Number 330.141

Summary of Decision Requested: **Amend** the Proposed District Plan to allow small land holdings such as 4ha to be sensitivity developed as Country Living Zones, in particular land that has been fragmented by publicly driven projects such as the expressway.

Decision Reasons:

- The submitters are in a Rural Zone, and should be able to subdivide a rural subdivision and build a business that supports the Rural Zone.
- As a property owner that has been fragmented by NZTA/Alliance roading projects, the submitters are no longer able to produce off the land.
- As a property owner under a future Urban Zone, the submitters cannot intensively farm the land with agriculture.
- The submitters are penalised because of development around them.
- Their land is 4ha and is too small to be economic on its own. With all of the boundary constraints, they should be able to develop a rural subdivision that meets ecological management and Waikato river basin management requirements.
- They cannot be in a holding pattern of prohibited activity by either the Waikato District Council or the Hamilton City Council. They own the land, the WDC and the HCC do not.

Submitter Number: 331

Submitter:

Roderick MacRae

Point Number 331.1

Summary of Decision Requested: Delete the Significant Natural Area from the property at 142 Woodcock Road, Tamahere.

Decision Reasons:

- The area does not meet the definition of a Significant Natural Area and therefore should not be identified as a Significant Natural Area.
- There are some indigenous plants, however the majority of the plants are pests species including willow trees, gorse convolvulus, Japanese honey suckle, blackberry etc.

Point Number 331.2

Summary of Decision Requested: Delete the Walkway Cycleway Bridleway overlay from the property at 142 Woodcock Road, Tamahere.

Decision Reasons:

- The proposed route is unsuitable. The gully floor is too boggy and the banks of the gully are soft sandy soil.
- Traffic via foot, cycle and horse would lead to significant damage and erosion of the area.
- There is evidence of erosion damage in the form of slips and slumps caused by the use of herbicides.
- The submitter is an avid cyclist and does not support this overlay.
- Concerns regarding privacy and security. Recent tampering of the Allan Turner walkway is an example.

Submitter Number:	332	Submitter:	Gwyneth & Barrie Smith
Point Number	332.1		
Summary of Decision Requested:	<p>Retain Policy 3.2.8 Incentivise subdivision, except for the amendments sought below</p> <p>AND</p> <p>Add a new clause to Policy 3.2.8 Incentivise subdivision, as follows:</p> <p><i>(b) Incentivise subdivision in the Rural Zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous Biodiversity.</i></p>		
Decision Reasons:	<ul style="list-style-type: none"> Support incentivising the protection of existing biodiversity with the ability to subdivide subject to meeting certain criteria. Policy 3.2.8 should be expanded to include provision for the enhancement and/or restoration of areas, when once restored, would be a suitable size and quality to achieve a functioning ecosystem. Appendix 2 of the Proposed District Plan could provide a basis for assessing the eligibility of these areas. Incentivising restoration is in line with the Vision and Strategy for the Waikato River. 		
Point Number	332.2		
Summary of Decision Requested:	Retain Objective 5.1.1 The rural environment.		
Decision Reasons:	<ul style="list-style-type: none"> Protecting high class soils from adverse effects of inappropriate use and development that may impact their life supporting capacity is of national importance, and this is now being recognized with a National Policy Statement for Versatile Land and High Class Soils under consideration. Urban subdivision of rural production land may undermine the integrated development of identified townships and expansion areas. Support the strength of wording in this objective and agree that urban development within the Rural Environment is an outcome that should be avoided. 		
Point Number	332.3		
Summary of Decision Requested:	<p>Retain Objective 5.2.1 Rural resources, except for the amendment sought below</p> <p>AND</p> <p>Amend Objective 5.2.1 Rural resources as follows:</p> <p><i>(a) Maintain or enhance the:</i></p> <p><i>(i) Inherent life-supporting capacity, <u>accessibility</u> and versatility of soils, in particular high class soils;</i></p>		
Decision Reasons:	<ul style="list-style-type: none"> Support maintaining and enhancing the life-supporting capacity and versatility of soils. Accessibility to versatile land is also a key consideration in managing this resource. Support the enhancement and/or restoration of natural ecosystems, surface and ground water quality, and the natural characteristics of fresh waterbodies and coastal waters. A method of enhancement should be incentivising the stock exclusion, restoration of biodiversity, and protection of waterways through rural subdivision. Providing for conservation lot subdivision via enhancement and/or restoration would enable this policy. 		
Point Number	332.4		
Summary of Decision Requested:	Retain Policy 5.2.2 High class soils.		
Decision Reasons:	<ul style="list-style-type: none"> Support retaining high class soils and ensuring adverse effects do not compromise the life supporting properties of high class soils. 		
Point Number	332.5		
Summary of Decision Requested:	<p>Retain Policy 5.2.3 Effects of subdivision and development on soils, except for the amendment sought below</p> <p>AND</p> <p>Amend Policy 5.2.3 Effects of subdivision and development on soils as follows:</p> <p><i>(b) Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, <u>enhanced, and/or restored (with plantings)</u>.</i></p>		
Decision Reasons:	<ul style="list-style-type: none"> Support incentivising the protection, enhancement and/or restoration of biodiversity values, however this policy only provides for subdivision where existing indigenous biodiversity is being protected. There are a number of waterways and wetlands in the Rural Zone that would benefit from stock exclusion, enhancement and/or restoration. The cost of restoration is approximately \$45,000 + GST per ha and subdivision offers an incentive for landowners to undertake restoration works which they would be unlikely to do without a financial offset. This policy will support the protection/restoration outcomes sought in Policy 5.2.1(a)(ii) and the enhancement outcome sought in Policy 3.1.2. The Vision and Strategy for the Waikato River seeks restoration of health and wellbeing of the Waikato River Catchment. The incentives offered in this policy will contribute to the achievement of the objectives of the Vision and Strategy. 		
Point Number	332.6		
Summary of Decision Requested:	<p>Retain Objective 5.3.1 Rural character and amenity, except for the amendment sought below</p> <p>AND</p> <p>Amend Objective 5.3.1 Rural character and amenity, as follows:</p> <p><i>(a) Rural character and amenity are maintained <u>while recognising the localised character of different parts of the District.</u></i></p>		
Decision Reasons:	<ul style="list-style-type: none"> Need to recognise the variation of what defines rural character and amenity across the district. 		

- The district encompasses a variety of landscapes and activities, including coastal areas, hill country which comprise of large landholdings and pastoral uses and smaller landholdings.
- Consideration of rural character should take into account the unique variables of the locality including land holding pattern, built form, land use activities, vegetation and geomorphology.

Point Number 332.7

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision as follows:

(b) *Ensure development does not compromise the predominant open space, character and amenity of rural areas.*

...

(d) *Rural hamlet subdivision and boundary relocations ensure the following:*

(i) *Protection of rural land for productive purposes;*

(ii) *Maintenance of the localised rural character and amenity of the surrounding rural environment;*

(iii) *Minimisation of cumulative effects.*

(e) *Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.*

...

Decision Reasons:

- Policy 5.3.8(b) duplicates Policies 5.3.8(d)(i) and 5.3.8(e), which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- The district's rural character varies in nature and comprises landscapes, landforms and structures. There are also areas of active and dynamic primary production rather than benign landscapes.
- Rural landscapes can be visually altered by structures and buildings, however these are important components of primary production activities and form part of the rural environment.

Point Number 332.8

Summary of Decision Requested: **Retain** the definition of Significant Natural Area in Chapter 13: Definitions, except for the amendment sought below

AND

Amend the definition of Significant Natural Area in Chapter 13: Definitions as follows:

Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area on the planning maps or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity, (Appendix 2) by a suitably qualified Ecologist.

Decision Reasons:

- The definition needs to be expanded to include areas that have been assessed by a suitably qualified Ecologist as meeting one more of the criteria in Appendix 2 of the Proposed District Plan. This would align with the wording of the Conservation Lot Subdivision provisions which allow for subdivision where an Significant Natural Area is identified as being protected or meets the criteria for determining significance of indigenous biodiversity.

Point Number 332.9

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, to change the activity status for PR1, PR2, PR3 and PR4 from prohibited to non-complying

AND

Amend all references to "lot" with the term "Record of Title".

Decision Reasons:

- With regards to PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. However, it is fanciful to think that every subdivision on high class soil would result in a significant adverse effect on the environment.
- There are circumstances where it may be unavoidable to create an additional record of title.
- The rule relies on the definition of 'high class soils' within the Proposed District Plan and may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities and it is appropriate for these to be subdivided from other rural activities on the site.
- There may be circumstances where subdivision enables more significant opportunities for economic well being and the efficient and effective operation of the activity.
- Commercial reasons may necessitate subdivision including the desire to sell or lease the business, rather than having no other option but to dispose of the entire property or invest more capital.
- Prohibited activity status prevents opportunities for subdivision where there is a significant capital investments and the intensive rural activity will continue to be commercially viable and sustainably following is subdivision. .
- PR4 unreasonably restricts the subdivision potential over and above what is necessary to avoid undermining the intent of the rule under which these records of title were created. While subdividing lots amalgamated under section 22b of the Franklin Section require more attention, this should merit a non-comply activity status only.
- The objectives and policies of the Proposed District Plan should be sufficiently strong to ensure that the subdivision of land with high class soils is protected from inappropriate subdivision and development.
- The change in terms from "lot" to "record of title" is necessary to capture multiple lots and hold them in one Record of Title. e.g. roads or streams bisecting land.

Point Number 332.10

Summary of Decision Requested: **Retain** Rule 22.4.1.4 Boundary relocation, except for the amendments sought below

AND

Amend Rule 22.4.1.4 Boundary Relocation as follows:

RDI

(a) *The boundary relocation must:*

(i) *Relocate a common boundary or boundaries between two or more existing Records of Title or consented lots that existed prior to 18 July 2018;*

...

(b) *Council's discretion is restricted to the following matters:*

...

(v) *effects on high class soils, farm management and productivity.*

Decision Reasons:

- Support the inclusion of boundary relocation provisions and flexibility to allow large rural landholdings to provide a logical lot arrangement that supports farming activities.
- Boundary relocations typically result in positive effects through the enhancement of the farming system and allows for the relocation of house sites to favourable locations.
- Seek that provision be made for the relocation of the boundaries of adjacent consented lots and records of title held in common ownership as per the Frankline section of the Operative District Plan.
- Consider the retention of the date, 18 July 2018 is appropriate and will allow for scrutiny of those records of title and consented lots created under the Transferable and Environmental Lot rules of the previous sections of the district plan.
- Consider it appropriate to include a matter of discretion to acknowledge the effects on high class soils, farm management and productivity in combination with the objectives and policies within Chapter 5 to provide a robust framework to ensure adverse effects on high class soils are avoided.

Point Number 332.11

Summary of Decision Requested: Retain Appendix 2.

Decision Reasons:

- Support the inclusion of the Criteria for Determining Significance of Indigenous Biodiversity.

Point Number 332.12

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(i)-(iii) General subdivision.

Decision Reasons:

- Support the inclusion of the general subdivision rules.

Point Number 332.13

Summary of Decision Requested: Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.2 General subdivision to include a discretionary activity rule as follows:

DI

(g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2(iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2(iv) RDI.

...

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha is supported.
- Creating a child lot around an existing dwelling, where a curtilage and farming regime is established will provide flexibility in lot size to ensure that farming can continue. It ensures practical location of boundaries.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the the proposed lot size whilst achieving the objectives and policies.
- The creation of lots that accommodate existing and well-established rural activities with a viable, sustainable and permanent nature can be appropriately subdivided from other other activities on the site should be provided for.
- Lots greater than 1.6ha may need an assessment on productive potential of the land.

Point Number 332.14

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v) General subdivision

AND

Amend Rule 22.4.1.2(b)(vi) General subdivision as follows:

RDI

(a) Subdivision must comply with all of the following conditions:

....

(v) Land containing high class soil (as determined by a Land Use Capability Assessment prepared by a suitably qualified person) must be contained within the boundaries of only two lots as follows;

~~— A. one lot must contain a minimum of 90% of the high class soil; and~~

~~— B. the other lot may contain up to 20% of high class soil.~~

(b) Council's discretion is restricted to the following matters:

...

(vi) Effects on rural productivity and fragmentation of high class soils.

..."

Decision Reasons:

- There is no analysis of this rule in the section 32 report regarding relevance or practicality.
- Agree with the intent to design subdivision to avoid the fragmentation of high class soils.
- The strict 80/20 requirement of this rule may not result in the best layout, design or farming outcome for the site.
- The objectives and policies given primacy to the protection of high class soils. The submitter would like to see the matters relating to the retention of high class soils and maintenance of productivity/farming systems be addressed as a matter of discretion. The objectives and policies with the matters of discretion will be strong enough to avoid adverse outcomes on high class soils.
- The 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the general provisions and this will become an additional compliance cost and box ticking exercise for Council.

Point Number 332.15

Summary of Decision Requested: Retain Rule 22.4.1.6 Conservation lot subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.6 Conservation lot subdivision as follows:

RD I

(a) The subdivision must comply with all of the following conditions:

(i) The lot must contain:

A. a contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist which meets; or

B. a contiguous area, to be enhanced and/or restored;

in accordance with the table below:

...

(ii) The area of Significant Natural Area, or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);

(iii) The Significant Natural Area or area to be restored is not already subject to a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act legal protection.

(iv) The subdivision proposes to legally protect all areas of Significant Natural Area or area to be restored by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth National Trust Act.

(v) An ecological management plan is prepared to address the ongoing management of the ~~covenant~~ protected area to ensure that the Significant Natural Area area to be protected is a self-sustaining and that plan:

A. Addresses fencing requirement for the ~~covenant~~ protected area;

B. Addresses ongoing pest plan and animal control;

C. Identifies any enhancement and/or restoration or edge planting required within the ~~covenant~~ area to be protected.

...

(b) Council's discretion is restricted to the following matters:

(i) Subdivision layout and proximity of building platforms to Significant Natural Area the area to be protected;

(ii) Matters contained in an ecological management plan for the ~~covenant~~ protected area;

(iii) Effects of the subdivision on localised rural character and amenity values;

(iv) Extent of earthworks including earthworks for the location of building platform and access ways;

(v) Mechanism of legal protection for the area to be protected.

DI

(a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6(vi-vii) RD I.

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6(vi-vii) RD I.

...

Decision Reasons:

- Support the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot Rule. The Proposed District Plan should be enabling or improving both biodiversity and water quality within the Waikato Catchment and incentivising/restoring areas that meet one or more criteria outlined in Appendix 2.
- Incentivising through subdivision would assist in offsetting the cost of enhancing and restoring.
- Seeks the inclusion of provisions that enable ecological enhancement and/or restoration of appropriate areas to be included in the Conservation Lot Subdivision rules. This includes appropriate features as noted in Appendix 2 of the Proposed District Plan or areas identified as Significant Natural Areas that do not meet the minimum size requirements for subdivision without additional enhancement and/or restoration planting. Minimum areas for enhancement should be in accordance with rule 22.4.1.6.
- This rule requires legal protection only, suggest leaving the mechanism of protection to the discretion of Council when assessing the application.
- Flexibility for lot size around an existing dwelling avoids unnecessary fragmentation of productive farming land and could be addressed as a matter of discretion.

Point Number

332.16

Summary of Decision Requested:

Retain Rule 22.4.1.5 Rural Hamlet Subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.5 Rural Hamlet Subdivision to allow relocation of consented lots to allow clustering of General lots in a hamlet and reduce lot size requirements as follows:

RD I

(a) Subdivision to create a Rural Hamlet must comply with all of the following conditions:

(i) it results in 3 to 5 proposed lots being clustered together;

(ii) All existing Records of Title and/or consented lots form one continuous landholding;

(iii) Each proposed lot has a maximum area of 85,000m²;

(iv) Each proposed lot has a maximum area of 1.4ha;

(v) The proposed balance lot has a minimum area of 20ha; and

(vi) It does not create any additional lots beyond the number of existing Records of Title.

(b) Council's discretion is restricted to the following matters:

(i) subdivision layout and design including dimension, shape and orientation of the proposed lots and specified building areas;

(ii) effects on rural character and amenity values;

(iii) effects on landscape values;

(iv) potential for reverse sensitivity effects;

(v) extent of earthworks including earthworks for the location of building platforms and access ways;

(vi) effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Support the hamlet subdivision within the Rural Zone. Well-designed rural hamlets will result in benefits such as shared infrastructure, improved and enhanced farming systems, housing and lifestyle choices.
- Seek the inclusion of consented lots in the hamlet provisions. This would have positive outcomes through the provision of shared infrastructure and enhancement of production systems, and would limit the wider dispersal of lots.
- The purpose of rural hamlets is to allow for compact design within a rural setting. Dwellings within a hamlet borrow their rural character and amenity from adjoining rural land. The hamlet provisions should ensure that a response to the landscape context is more important than meeting performance standards relating to lot size etc.
- Smaller lot sizes would visually result in a more compact development.

Submitter Number:	333	Submitter:	Russell Grey
Point Number	333.1		
Summary of Decision Requested:	Amend Rule 24.3.5 P2 Building Coverage, reducing the provision from 20% to 15%.		
Decision Reasons:	<ul style="list-style-type: none"> On a 5000m2 20% site coverage allows 600m2 of building ground floor area which is excessive. Most new dwellings are 250m2-350m2 in size with a shed of 100m2 totaling 450m2/15% which is ample for small sites. More building area will lead to greater pressure on storm water runoff and local waterways, and ultimately the Waipa River. 		
Point Number	333.2		
Summary of Decision Requested:	Amend Rule 24.3.6.1 P1 (i) Building setbacks- All boundaries so that a setback from a road at 3m is the same as a setback from an indicative road of 13m.		
Decision Reasons:	<ul style="list-style-type: none"> Appears to be an anomaly around the setbacks. A large Te Kowhai property is to be rezoned 'Village,' allowing building setbacks to be 3m from a local rural road (Woolrich Road) with a 5.5m width, impacting on its rural nature, whilst any setback from indicative roads within the proposed development would be 13m. 		
Point Number	333.3		
Summary of Decision Requested:	Amend Rule 24.3.6.1 P1 (iii) and (iv)-Building setbacks- All boundaries to be a minimum of 3m.		
Decision Reasons:	<ul style="list-style-type: none"> Appears to be an anomaly around the setbacks. 		
Point Number	333.4		
Summary of Decision Requested:	No specific decision sought , but submission considers Horotiu Road should be the main vehicle access to 702 Horotiu Road, Te Kowhai.		
Decision Reasons:	<ul style="list-style-type: none"> Horotiu Road is classified as an Arterial Road, whereas Woolrich Road is a local road and thus the main access for the property. Horotiu Road provides excellent linkage through to Limmer Road and SH39 and is fully road marked. Woolrich Road has a sealed width of 5.5m with limited road markings and two sharp corners. Submitter notes an increase in traffic flow resulting from more dwelling constructions on Woolrich, Bedford, Richards and Collie Road, all utilizing Woolrich Road for SH39 access. There is still a number of vacant blocks yet to be developed which will lead to increased traffic. Potential for additional blocks to be developed within 702 Horotiu Road would exacerbate traffic problem by using Woolrich Road for access. Recommend no vehicle access from Woolrich Road for 702 Horotiu Road for safety reasons. Rule 14.12.5.1 requires the minimum sealed width for a road within such a development is 8m, greater than Woolrich Road's width. 		

Submitter Number:	335	Submitter:	Willemien Wennekers
Point Number	335.1		
Summary of Decision Requested:	Amend the Proposed District Plan to include a Special/Specific Zone for Kimihia Lakes in accordance with the relevant relief sought by Submission #584 Louise Feathers Planning.		
	AND		
	Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> Submission strongly supports submission #584 and its relief sought around the Kimihia Lakes zone. The closed Huntly Mine was purchased with a vision for developing such land as a recreation and events park. Scale of vision is vast enabling a regionally significant tourist attraction, as well as a facility for the Huntly community. 		
Point Number	335.2		
Summary of Decision Requested:	Add a new zone titled 'Kimihia Lakes Recreation and Events Zone' to the planning maps.		
	AND		
	Amend the zoning of the parcels of land with the legal descriptions Section 3 SO 482553, Lot 1 DPS 20619, Section 1 SO Plan 60522, Allotment 740 Parish of Taupiri, Allot 857 Parish of Taupiri and Allotment 6 Paris of Taupiri from Rural Zone to the proposed Kimihia Lakes Recreation and Events Zone (see table 6.1 within the submission for details).		
	AND		
	Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park. 		

- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.
- Excludes the existing Lake Kimihia which is owned and managed by the Department of Conservation.

Point Number 335.3

Summary of Decision Requested: **Add** a new section 9.5 Kimihia Lakes Recreation and Events Zone within Chapter 9 Specific Zones containing objectives and policies specifically catering for the Kimihia Lakes Recreation and Events Zone, as set out in section 4.2.2 of submission 584.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracks of land covering various zones (SNA etc).
- Waikato District Council no linger desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number 335.4

Summary of Decision Requested: **Add** a new definition for "Ancillary Buildings (Kimihia Lakes Recreation and Events Park)" to Chapter 13 Definitions as follows:

Means a supporting building that is subordinate and incidental to a permitted activity undertaken in the Park, including storage units, administration and ablution facilities and clubrooms.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.5

Summary of Decision Requested: **Add** a new definition for "Commercial Node Areas" to Chapter 13 Definitions as follows:

Means those specified areas identified on Zone Maps in the Kimihia Lakes Recreation and Events Zone as 'Commercial Node Areas'

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.6

Summary of Decision Requested: **Add** a definition for "Community Activities and Facilities (Kimihia Lakes Recreation and Event Park)" to Chapter 13 as follows:

Means in the Kimihia Lakes Recreation and Events Zone, land or building used for community activities, generally established on a not-for-profit basis, and includes buildings for educational purposes, community functions and public toilets or public rooms.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.7

Summary of Decision Requested: **Add** a definition for "Operational Facilities" to Chapter 13 Definitions as follows:

Means the construction and use of facilities and/or infrastructure to assist in the day to day operation of the Kimihia Lakes Recreation and Events Parks, including but not limited to car parking, internal access, ticketing offices, storage and maintenance sheds, and helipads.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.8

Summary of Decision Requested: **Add** a new definition for "Outdoor Education" to Chapter 13 Definitions as follows:

Means in the Kimihia Lakes Recreation and Events Zone, land or buildings used for the formal or informal education or training and includes (but is not limited to) confidence courses.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.9

Summary of Decision Requested: **Add** a new definition for "Outdoor Pursuits" to Chapter 13 as follows:

Means moving across land by non-powered means for example biking, orienteering, tramping, and horse trekking.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.10

Summary of Decision Requested: **Add** clause (b) to Activity-specific conditions 14.12.1.8 relating to P8 off-road pedestrian and cycle facilities, as follows:

(b) In the Kimihia Lakes Recreation and Events Zone there shall be no activity specific conditions.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.11

Summary of Decision Requested: No specific decision sought, but the submission notes that the of the Regional Infrastructural Specifications (RITS) and the Waikato Regional Council Regional Plan will be the relevant documents for some developments in the park.

Decision Reasons:

- No reasons provided.

Point Number 335.12

Summary of Decision Requested: **Amend** the zoning of the parcels of land with the legal descriptions Allotment 746 Parish of Taupiri, Lot 20 DP 347582, Lot 21 DP 347582, Allotment 777 Parish of Taupiri and Lot 23A Section 463 Parish of Taupiri from Rural Zone to Residential Zone (see table 6.1 of the submission for further details).

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- This area is located abutting existing Residential Zoned land and so forms a contiguous residential tract, ensuring services and infrastructure can easily be extended to the new residential area.
- Tunnel mining was undertaken west of the site and under the Huntly township including State Highway 1, Schools, the Power Station, the Waikato River and Riverine Lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining would not occur in this location. Residential use of the land is therefore not subject to that risk.

Point Number 335.13

Summary of Decision Requested: **Retain** the Residential Zone on the parcels of land with the legal descriptions Lot 18 DP 347582, Lot 19 DP 347582, Sec 3 SO Plan 400374, Allot 515 Parish of Taupiri and Allot 789 Parish of Taupiri (see table 6.1 of the submission for further details).

Decision Reasons:

- Tunnel mining was undertaken west of the site and under the Huntly township including SH1, schools, the Power Station, the Waikato River and Riverine lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining, would not occur in this location. Residential use of the land is therefore not subject to that risk.

Point Number 335.14

Summary of Decision Requested: **Add** a definition for "Recreation Activity and Facilities" to Chapter 13 Definitions as follows:

Means any non-motorised indoor or outdoor passive or active leisure, sports, entertainment, games or recreational pursuits and buildings in the Kimihia Lakes Recreation and Events Park Zone for participants and/or spectators, whether or not they are undertaken for profit or reward or for which no charge is made, and shall include such activities on or in water or land, or in the air and includes but is not limited to:

- Recreational events and activities
- Walking, running and cycling tracks
- Training or education
- Club Days and practice activities
- Organised Events and festivals
- Concerts
- Multi-sport and off-road running events
- Outdoor skate, parks and playgrounds
- Informal Recreation
- Tourism related activities
- Outdoor Pursuits

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.15

Summary of Decision Requested: **Add** a new Chapter 29 to Kimihia Lakes Recreation and Events Zone that contains rules for the Kimihia Lakes Recreation and Events Zone, as outlined within section 4.2.4 of submission 584.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number 335.16

Summary of Decision Requested: **Amend** Rule 14.12.1 Activity specific conditions 14.12.1.1(1)(e) relating to P1 vehicle access for all activities as follows:

(1) All activities must comply with the following vehicle access conditions:

...

(e) On a site with legal access to two roads, the activity only accesses the road with the lower classification in the road hierarchy in Tables 14.12.5.5 and 14.2.5.6 (where the roads have the same classification, access is only to the road with the lower average daily traffic movements) except in the Kimihia Lakes Recreation and Events Zone where this rules does not apply;

...

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.17

Summary of Decision Requested: **Add** a new clause (2) to Activity-specific conditions 14.12.1.2 relating to P2 on site parking and loading, as follows:

(1) All activities must comply with the following...

(2) In the Kimihia Lakes Recreation and Events Zone the above standards do not apply, providing that:

(a) A minimum of 1500 on-site parking spaces shall be provided except where activities are undertaken within the carpark area or where activity demand exceeds 1500 car parks, then the temporary alternative on-site parking shall be provided.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 335.18

Summary of Decision Requested: **Add** clause (j) to Activity-specific condition 14.12.1.4(1) Permitted Activities relating to P4 traffic generation, as follows:

(1) Any activity must comply with the following traffic generation conditions:

...

(j) Within the Kimihia Lakes Recreation and Events Zone, there shall be no maximum traffic generation provided that:

a) A certified Traffic Management Plan (which shall include, but is not limited to, the provisions of a wide area assessment) shall be in place and implemented for all activities. The Traffic Management Plan shall:

i) Provide for the supervision and control of patrons entering and exiting the Kimihia Lakes Recreation and Events Park, and the transportation of patrons to and from the Park;

ii) Limit the speed of traffic within the Kimihia Lakes Recreation and Events Park to 30km/h

iv) Provide for monitoring and reporting on the number of vehicle movements for all activities and events;

v) Include protocols for undertaking reviews of the Traffic Management Plan by an Implementation Monitoring Committee consisting of the New Zealand Police, the Council and the Kimihia Lakes Recreation and Events Park operator

v) Be reviewed, certified and endorsed by Council, by (date) of each year.

b) For any activity or event, or combination of activities and events where there is likely to be in excess of 5,000 people, the operator of the park shall advise the Council a minimum of 10 working days before the activity and event occurs of the details of the activity and event and the relevant provisions of the Traffic Management Plan that are to be implemented.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Submitter Number: 337 **Submitter:** Michelle Byers

Point Number	337.1		
Summary of Decision Requested:	Amend the zoning of the property at 102 Travers Road, Te Kauwhata, to retain the Operative District Plan Zoning of Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter doesn't want any intensive development on 102 Travers Road. • Subject property is unsuitable for intensive development due to flooding. • Concerned about the impact on the adjoining rural property which is a working orchard and has stock. 		

Submitter Number:	338	Submitter:	John Van der Star
Organisation:	Five Star Gardens Limited		
Point Number	338.1		
Summary of Decision Requested:	Amend the zoning of the property at 102 Travers Road, Te Kauwhata, to retain the Operative Plan Zoning of Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter doesn't want any intensive development at 102 Travers Road. • Property is unsuitable for intensive development due to land being subject to flooding. • Concerned about the impact on the adjoining rural property which is a working orchard and has stock. 		

Submitter Number:	339	Submitter:	Leah Forbes-Oakes
Point Number	339.1		
Summary of Decision Requested:	Add a Special Character Zone to Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter is concerned that Raglan's special character is being eroded, which needs better protection. • Submitter recommends the Special Character Area focus on the following: Diverse buildings and diverse people, relaxed, no multi-story buildings, enabling individual expression, pedestrian and bike friendly, water views, human scale buildings and wild coast. • Need more controls on how much of the town is being turned into permanent holiday accommodation. e.g. Airbnb. 		
Point Number	339.2		
Summary of Decision Requested:	Amend the proposed District Plan so that any building not complying with the District Plan in Raglan will be publicly notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Need more controls on how much of the town is being turned into permanent holiday accommodation. e.g. Airbnb. • Submitter is concerned that Raglan's special character is being eroded, which needs better protection. 		

Submitter Number:	340	Submitter:	Stuart Jefferis
Organisation:	Ruakiwi Graziers Ltd		
Point Number	340.1		
Summary of Decision Requested:	No specific decision sought, however submission states the Maori Sites of Significance S13/119 and S13/141 on Jefferis Road are unconfirmed.		
Decision Reasons:	<ul style="list-style-type: none"> • Sites on property are not confirmed as Maori Sites. • Aerial Photos do not confirm sites S13/119, S13/141. 		
Point Number	340.2		
Summary of Decision Requested:	No specific decision sought, however submission states that the Significant Natural Area identified on the property at Jefferis Road, Waerenga is not significant to Council.		
Decision Reasons:	<ul style="list-style-type: none"> • Sites were identified prior to 2008, however under the Public Works Act Transpower removed a significant area of mature native trees so new pylons could be erected. • Submitter has protected the trees for close to 145 years, yet they can be removed with a 'stroke of a pen.' • Mature strands of trees are significant to the submitter's family. 		
Point Number	340.3		
Summary of Decision Requested:	No specific decision sought, however submission opposes Rule 22.2.3.3 Earthworks - Significant Natural Area and Rule 22.2.3.2 Earthworks - Maori Sites and Areas of Significance.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		

Submitter Number:	341	Submitter:	Brian Croad
--------------------------	-----	-------------------	-------------

Organisation: Tainui Group Holdings Limited

Point Number 341.1

Summary of Decision Requested: **Amend** zoning of Sections 8 and 9 SO 483544, held in CT SA53C/665 (located on the north-west corner of Ruakura Road and Davidson Road) from Rural Zone to a new Ruakura Industrial Zone (the extent of this land is shown in Appendix A to the submission). Details of the new zone are outlined in other submission points.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- TGHL's largest investment is the current development of the Ruakura inland port and its associated logistics, industrial, commercial, education, research, retail and residential areas.
- The process in terms of re-zoning, consenting and now developing the Ruakura area has been long and complex, and has included the preparation of a comprehensive plan change and structure plan and a subsequent Board of Inquiry.
- TGHL is now in the process of working with a range of local and internationally based operators to confirm site leases at Ruakura, with some initial enabling works completed on-site.
- Based on these experiences to date, TGHL have a strong understanding of the current demand for developable land of this nature within the Waikato region and the wider country.
- Ruakura is identified as a Strategic Industrial Node within the Waikato Regional Policy Statement (the RPS), with an allocation of 405 ha of gross developable industrial land to be provided between 2010 and 2061 as directed by Future Proof.
- Further constraining the ability to deliver on industrial land demand is the continuation of high population growth occurring within the Waikato region.
- The National Policy Statement on Urban Development Capacity (the NPSUDC) requires that high-growth urban areas; of which Waikato District Council is part of the high-growth Hamilton urban area, produce a future development strategy to demonstrate there will be sufficient, feasible development capacity in the medium (3-10 years) and long term (10-30 years).
- TGHL note that three of the Special Housing Areas currently approved by Hamilton City Council involves the proposed usage of existing industrially zoned land for residential housing purposes.
- The Phase 2 review of Future Proof Strategy Update, which is currently being undertaken and is proposed to be released in early 2019, is expected to recalibrate the RPS's existing land allocation assumptions and requirements based on the implications of the NPS-UDC.
- A new Ruakura Industrial Zone, aligned with the existing Ruakura Logistics and Ruakura Industrial Park zones within the HCC ODP, is the most appropriate way to enable for the types of activities that will occur within this area.
- The land is essentially contiguous with the existing Ruakura Logistics and Ruakura Industrial Park zones in the HCC ODP.
- The land is located in immediate proximity to the WEX, thereby having direct access via the future Ruakura interchange, as well as the East Coast Main Trunk rail line. This integration with key infrastructure aligns with the strategic objectives of the RPS.
- Market response on the current offering at Ruakura has shown strong demand for large logistics and industrial footprints.
- Undertaking the re-zoning as part of the Proposed Plan provides efficiencies for Waikato District Council, TGHL and all relevant stakeholders; minimising the significant costs and procedures that would be associated with a separate plan change process.
- The future expansion of Ruakura will help support and strengthen the growth of the district's industry, which is consistent with Waikato District Council's economic growth of industry objective.
- The Ruakura development, in being heard by a Board of Inquiry, has previously been assessed as being of national significance.
- Providing for a longer-term expansion of TGHL's operations at Ruakura aligns not only with TGHL's intergenerational investment approach but also will help address future demand for developable land of this nature.

Point Number 341.2

Summary of Decision Requested: **Add** a new Ruakura Industrial Zone as follows:

Add a new set of objectives and policies to Section 9 Specific Zones as Section 9.5 for Ruakura Industrial Zone and that these be based on the existing objectives and policies for the Ruakura Logistics and Ruakura Industrial Park zones contained within Sections 10.2 and 11.2 of the Operative Hamilton City District Plan.

AND

Add a set of rules to Chapter 29 Appendices that give effect to the requested objectives and policies for Ruakura Industrial Zone based on existing objectives and policies for the Ruakura Logistics and Ruakura Industrial Park Zones contained within Sections 10.2 and 11.2 of the Operative Hamilton City District Plan.

AND

Add any consequential amendments and refinements to the Proposed District Plan as appropriate in order to allow a new Ruakura Industrial Zone to apply at Tainui Group Holdings Ltd land in Ruakura.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- TGHL's largest investment is the current development of the Ruakura inland port and its associated logistics, industrial, commercial, education, research, retail and residential areas.
- The process in terms of re-zoning, consenting and now developing the Ruakura area has been long and complex, and has included the preparation of a comprehensive plan change and structure plan and a subsequent Board of Inquiry.
- TGHL is now in the process of working with a range of local and internationally based operators to confirm site leases at Ruakura, with some initial enabling works completed on-site.
- Based on these experiences to date, TGHL have a strong understanding of the current demand for developable land of this nature within the Waikato region and the wider country.
- Ruakura is identified as a Strategic Industrial Node within the Waikato Regional Policy Statement (the RPS), with an allocation of 405 ha of gross developable industrial land to be provided between 2010 and 2061 as directed by Future Proof.
- Further constraining the ability to deliver on industrial land demand is the continuation of high population growth occurring within the Waikato region.
- The National Policy Statement on Urban Development Capacity (the NPSUDC) came into effect in December 2016 and requires that high-growth urban areas; of which Waikato District Council is part of the high-growth Hamilton urban area, produce a future development strategy to demonstrate there will be sufficient, feasible development capacity in the medium (3-10 years) and long term (10-30 years).
- The Phase 2 review of Future Proof Strategy Update, which is currently being undertaken and is proposed to be released in early 2019, is expected to recalibrate the RPS's existing land allocation assumptions and requirements based on the implications of the NPS-UDC.
- All these factors contribute to the need for long-term, strategic planning to ensure the future demand for industrial land is provided for. A new Ruakura Industrial Zone, aligned with the existing Ruakura Logistics and Ruakura Industrial Park zones within the HCC ODP, is the most appropriate way to enable for the types of activities that will occur within this area.
- The Ruakura development, in being heard by a Board of Inquiry, has previously been assessed as being of national significance.
- Providing for a longer-term expansion of TGHL's operations at Ruakura aligns not only with TGHL's intergenerational investment approach but also will help address future demand for developable land of this nature.

Point Number 341.3

Summary of Decision Requested: **Retain** Rule 22.1.2 P6 Permitted Activities for Afforestation not in an Outstanding Landscape Area.

Decision Reasons:

- TGHL supports the provision of these activities in the Rural Zone as a permitted activity subject to meeting all the relevant Rural Zone effect and building conditions.

- TGHL own and manage a number farming and forestry operations throughout the Waikato District. In enabling farming and forestry activities within the Rural Zone the importance of these primary industries to the economic wellbeing of the Waikato District, wider region and country is appropriately provided for.
- Retain the 'activity based' structure of the Proposed Plan whereby activity tables establish the status of the activities provided for in a zone.
- This approach has also reduced the replication of the numerous conditions/performance standards within each zone chapter of the Proposed Plan, compared to the Operative Plan, and has consequently improved readability and provided greater certainty.

Point Number 341.4

Summary of Decision Requested: **Amend** the numbering of Rule 22.1.5 Discretionary Activities to Rule 22.1.4.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The relief sought will correct the typographical error within the Proposed Plan which currently has Rule 22.1.5 subsequent to Rule 22.1.3.

Point Number 341.5

Summary of Decision Requested: **Add** to Rule 22.1.5 Discretionary Activities "Permanent Sawmills and Timber Processing Facilities" as a discretionary activity.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The definition of Forestry within Chapter 13 of the Proposed Plan excludes the establishment and/or use of permanent sawmills or other methods of timber processing, and under Rule 22.1.5 (Non-Complying Activities) any activity that is not listed as Prohibited, Permitted, Restricted Discretionary or Discretionary is assessed as a non-complying activity.
- The specific inclusion of Permanent Sawmills and Timber Processing Facilities such a definition will provide certainty around the activity status for these facilities.

Point Number 341.6

Summary of Decision Requested: **Retain** Rule 22.1.3 RD1 Restricted Discretionary Activities for Intensive Farming.

Decision Reasons:

- The matters listed for Council's discretion are more succinct and without the associated list of information requirements (for Intensive Farming) when compared to the Operative Plan.
- TGHL supports the Proposed Plan's more simplified consenting approach for Intensive Farming and Rural Industry activities.

Point Number 341.7

Summary of Decision Requested: **Retain** Chapter 21 Industrial Zone Heavy as notified, including the proposed structure and approach.

Decision Reasons:

- A Heavy Industrial zoning is proposed for the TGHL owned Huntly and Meremere Power Stations sites within the Proposed Plan as notified.
- Policy 4.6.2 of the Proposed Plan describes the Heavy Industrial Zone as providing 'for a range of industrial and other compatible activities that generate potentially significant effects on more sensitive zones, including relatively high levels of visual impact from buildings and associated parking and loading spaces, outdoor storage, lighting, noise, odour and heavy traffic, subject to appropriate separation distances.'
- Further to the comments above regarding the Rural Zone provisions, TGHL support the more 'activity based' structure and approach to Chapter 21 for the Heavy Industrial Zone.
- For ease of interpretation, TGHL also support the specific Heavy Industrial Zone chapter when compared to the lengthy combined Industrial Chapter in Operative Plan.

Point Number 341.8

Summary of Decision Requested: **Amend** Section 14.4 National Grid to ensure undue limitations are not placed on land subject to these provisions.

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Both the Huntly and Meremere Power Station sites owned by TGHL currently contain the following National Grid transmissions lines/assets which are owned and operated by Transpower New Zealand Limited.
- The presence of Transpower's transmission lines places limitations on the ability for TGHL to develop their land.
- Rule 14.4.1.2 allows a limited range of buildings and structures as a permitted activity to occur within the National Grid Yard.
- Rule 14.4.1.3 allows a limited range of earthworks activities as a permitted activity to occur within the National Grid Yard.
- The non-complying activity status under Rule 14.4.4 (NC4) for any activity within the National Grid Yard that does not comply with one or more of the conditions of Rule 14.4.1.2 is unnecessarily onerous.

Point Number 341.9

Summary of Decision Requested: **Amend** the planning maps and Section E to reduce the extent as far as practicable of Designation K4 -Transpower New Zealand Limited (Meremere Switching Station).

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The Meremere Switching Station is located immediately south of the decommissioned Meremere Power Station. Designation K4 is 0.6065 ha (6,065m²) in area.
- Transpower has however requested this designation is 'rolled over' without modification from the Operative Plan.

- A number of low lying transmission lines also extend beyond the designation and connect to the existing National Grid transmission lines some 300m to the east.
- TGHL wish to maximise the ability to develop their land at Meremere, which includes the removal of any redundant assets.
- TGHL understand from previous correspondence with Transpower that some or all of the transmission assets within the Meremere Switching Station and across TGHL's land at Meremere are no longer active.
- Considering the status of the Transpower assets and the fact TGHL have an interest in the land subject to the Designation K4, the relevant matters that a territorial authority must have regard to when considering a notice of requirement under section 171(1) of the Resource Management Act 1991 have been considered. TGHL conclude the following:
 - No consideration of alternatives sites (in this instance, site extent) appears to have been undertaken by Transpower;
 - The proposed extent of Designation K4 is not considered reasonably necessary to achieve Transpower's objectives for which the designation was originally sought
- TGHL acknowledge that Transpower will have a position on this designation relative to their aspirations and future plans for these assets.
- TGHL intend to have further discussions with Transpower around a suitable designation extent for the Meremere Switching Station that meets the requirements of both parties.

Point Number 341.10

Summary of Decision Requested: **Retain** Rule 22.1.3 RD2 Restricted Discretionary Activities for Rural Industry.

Decision Reasons:

- The matters listed for Council's discretion are more succinct and without the associated list of information requirements (for Intensive Farming) when compared to the Operative Plan.
- TGHL supports the Proposed Plan's more simplified consenting approach for Intensive Farming and Rural Industry activities.

Point Number 341.11

Summary of Decision Requested: **Amend** the definition of "Farming" in Chapter 13 Definitions as follows:

Means an agricultural, horticultural or apicultural activity having as its primary purpose the production of any livestock or crop using the in-situ soil, water and air as the medium for production. It includes:

- Ancillary buildings and structures such as barns and dairy sheds;
- Ancillary produce stalls;
- Processing of farm produce grown on the land, such as cutting, cleaning, grading, chilling, freezing, packaging and storage

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The relief sought will provide clarity that ancillary buildings and structures associated with farming operations fall within this activity.

Point Number 341.12

Summary of Decision Requested: **Amend** the definition of "National Grid Yard" in Chapter 13 Definitions as follows:

National Grid Yard means the area located measured either side of the centre line of any above-ground electricity transmission as follows:

- 12 metres in any direction from the outer edge of a national grid support structure; and
- 10 metres either side of the centre line of any above-ground 110kV national grid line on single poles; and
- 12 metres either side of the centre line of any above-ground national grid line on towers.
- ~~14m for the 110kV national grid lines on single poles;~~

~~16m for the 110kV national grid lines on pi-poles;~~

~~22m for 110kV national grid lines on towers; and~~

~~37m for the 220kV transmission lines.~~

~~Refer to the diagram in the definition for "National grid corridor".~~

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The definitions for the National Grid Yard and National Grid Corridor as notified within the Proposed Plan are transposed, as it is in fact the National Grid Corridor that extends up to 37m; rather than the National Grid Yard.
- Making these amendments will help ensure the associated National Grid provisions are implemented correctly.

Point Number 341.13

Summary of Decision Requested: **Amend** the definition of "National Grid Corridor" in Chapter 13 Definitions as follows:

National grid corridor means the area measured either side of the centre line of any above-ground electricity transmission line as follows:~~located:~~

- ~~14m for the 110kV national grid lines on single poles;~~
- ~~16m for the 110kV national grid lines on pi poles;~~
- ~~22m for 110kV national grid lines on towers; and~~
- ~~37m for the 220kV transmission lines.~~
- 12 metres in any direction from the outer edge of a national grid support structure; and
- 10 metres either side of the centre line of any above-ground 110kV national grid line on single poles; and
- 12 metres either side of the centre line of any above-ground national grid line on towers

AND

Amend the Proposed District Plan to make consequential amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The definitions for the National Grid Yard and National Grid Corridor as notified within the Proposed Plan are transposed, as it is in fact the National Grid Corridor that extends up to 37m; rather than the National Grid Yard.
- Making these amendments will help ensure the associated National Grid provisions are implemented correctly.

Point Number 341.14

Summary of Decision Requested: Retain Rule 22.1.2 P7 Permitted Activities for Farming.

Decision Reasons:

- TGHl supports the provision of these activities in the Rural Zone as a permitted activity subject to meeting all the relevant Rural Zone effect and building conditions.
- TGHl own and manage a number farming and forestry operations throughout the Waikato District. In enabling farming and forestry activities within the Rural Zone the importance of these primary industries to the economic wellbeing of the Waikato District, wider region and country is appropriately provided for.
- Retain the 'activity based' structure of the Proposed Plan whereby activity tables establish the status of the activities provided for in a zone.
- This approach has also reduced the replication of the numerous conditions/performance standards within each zone chapter of the Proposed Plan, compared to the Operative Plan, and has consequently improved readability and provided greater certainty.

Point Number 341.15

Summary of Decision Requested: Retain Rule 22.1.2 P8 Permitted activities for Forestry.

Decision Reasons:

- TGHl supports the provision of these activities in the Rural Zone as a permitted activity subject to meeting all the relevant Rural Zone effect and building conditions.
- TGHl own and manage a number farming and forestry operations throughout the Waikato District. In enabling farming and forestry activities within the Rural Zone the importance of these primary industries to the economic wellbeing of the Waikato District, wider region and country is appropriately provided for.
- Retain the 'activity based' structure of the Proposed Plan whereby activity tables establish the status of the activities provided for in a zone.
- This approach has also reduced the replication of the numerous conditions/performance standards within each zone chapter of the Proposed Plan, compared to the Operative Plan, and has consequently improved readability and provided greater certainty.

Submitter Number: 343

Submitter: Michael Briggs

On behalf of: Rangitahi Limited

Organisation: Harrison Grierson Cosultants Limited

Point Number 343.1

Summary of Decision Requested: Amend Policy 4.1.3 (b) Location of development, to clarify the indicative nature of the Future Proof Strategy urban limits.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The submitter supports the planned and sustainable growth intention of Policy 4.1.3(b). However, while the indicative urban limits on Map 1 of the Future Proof Strategy identify growth to the west of Raglan, the strategy identifies that "These limits, which are shown on Maps 1 and 2, are still indicative and will remain so until further development analysis, for example structure planning, has been completed," and "The indicative urban limits will not necessarily prevent changes to these limits if further development analysis determines such changed to be appropriate".

Point Number 343.2

Summary of Decision Requested: Retain Policy 4.1.18 Raglan, except for the amendments sought below
AND
Amend Policy 4.1.18 Raglan to include the medium to long future growth area.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Policy 4.1.18(a)(iii) confirms that the Rangitahi Structure Plan area is the only area that provides for the medium term future growth in Raglan.
- While there are some areas of Residential Zoned land around the Raglan township that are yet to be developed, the areas are relatively small in relation to the Rangitahi Structure Plan area.
- Given the strong demand that has been experienced for lots at Rangitahi, the submitter agrees that the Rangitahi Structure Plan area will only provide for short to medium growth and considers that a medium to long term future growth area also needs to be identified and planned for through the Proposed Plan.

Point Number 343.3

Summary of Decision Requested: Retain Policy 9.3.1.1 Development, except for the amendments sought below
AND
Amend Policy 9.3.1.1 Development to include "physical characteristics."
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Policy 9.3.1.1(b) clearly identifies that some variations to the Rangitahi Structure Plan designs are anticipated by the District Plan to respond to development constraints identified through further investigations.
- There are some potential constraints that may relate to poor ground or soil conditions, and therefore "physical" characteristics needs to be added to the policy.

Point Number

343.4

Summary of Decision Requested:

Amend Objective 9.3.2 Non-Residential Activities, to refer to significant adverse traffic effects.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Objective 15B.3.10 of the Operative Plan requires non-residential activities to contribute to village character without causing significant adverse traffic effects.
- Objective 9.3.2 does not include reference to significant adverse traffic effects.

Point Number

343.5

Summary of Decision Requested:

Amend Policy 9.3.2.1(b)(i) Commercial Activities, to split the two separate matters relating to active ground-floor business activities and frontages and residential activities above ground floor.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The submitter agrees with the intent of the policy insofar as providing for active ground-floor business activities is generally a good urban design approach for mixed-use developments.
- The total area of commercial activity permitted at Rangitahi under the Proposed Plan is limited and in some circumstances it may not be possible for the entire ground floor level of mixed-use developments at Rangitahi to accommodate business activities because of these limitations.
- Good urban design outcomes can be achieved for mixed-use developments with some residential activities at ground floor level.
- The submitter seeks greater flexibility within the policy.

Point Number

343.6

Summary of Decision Requested:

Delete Policy 9.3.3.5(b) Environmental Improvement.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- This policy goes further than Objective 9.3.3 in seeking net environmental gain for gullies and streams.
- It is not consistent with the objective, the Rangitahi Structure Plan is an established Urban Zone, and the maintenance and enhancement of gully systems and stream margins is already sought by subclause (a).

Point Number

343.7

Summary of Decision Requested:

Amend Policy 9.3.3.7(b) Ecological and Habitat Values, to adopt the same approach as in Policy 15B.2.23 of the Operative Plan, which seeks:

"The loss of significant indigenous vegetation and significant habitat of indigenous fauna should be avoided. Short term, minor, or localised degradation effects should be mitigated if they cannot be practically avoided."

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- This policy fails to recognise that there will be some unavoidable minor and localised loss of indigenous vegetation and habitat required to give effect to the established zoning and the Rangitahi Structure Plan. It would not be possible for all activities to achieve consistency with this policy, which requires that the loss of significant indigenous vegetation and significant habitat of indigenous fauna to be avoided.

Point Number

343.8

Summary of Decision Requested:

Amend Policy 9.3.5.4 Secondary access to fix the list level error as follows:

- Policy 9.3.5.4(a)(i) should be Policy 9.3.5.4(b)
- Policy 9.3.5.4(a)(ii) should be Policy 9.3.5.4(b)(i)
- Policy 9.3.5.4(a)(iii) should be Policy 9.3.5.4(b)(ii)

(a) From the beginning of development of the Rangitahi Peninsula Structure Plan Area up to completion...

~~ii)(b)~~ A permanent secondary access must be constructed:

~~iii)(i)~~ Prior to development of any of the Precincts E, F or G: and

~~iii)(ii)~~ In accordance with access and road performance standards suitable for its secondary function.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- To correct a list level error.

Point Number 343.9

Summary of Decision Requested: **Retain** the definition for "Child Care Facility" in Chapter 13 Definitions.

Decision Reasons:

- The Submitter supports the inclusion of a definition for childcare facility.

Point Number 343.10

Summary of Decision Requested: **Amend** the definition for "Rangitahi Commercial Activity" in Chapter 13 Definitions to exclude childcare facilities.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The definition is broad and needs to be updated to specifically exclude child care facilities so there is no confusion, particularly to make it clear that the maximum floor area limits for those activities are not relevant to child care facilities.

Point Number 343.11

Summary of Decision Requested: **Amend** the definition for "Community Activity" in Chapter 13 Definitions to exclude childcare facilities.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The definition is broad and need to be updated to specifically exclude child care facilities so there is no confusion, particularly to make it clear that the maximum floor area limits for those activities are not relevant to child care facilities.

Point Number 343.12

Summary of Decision Requested: **Retain** the definition for "Rangitahi Integrated Development" in Chapter 13 Definitions, except for the amendments sought below

AND

Amend the definition for "Rangitahi Integrated Development" in Chapter 13 Definitions to include "or an approved subdivision".

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The Submitter supports the inclusion of a definition for "Rangitahi Integrated Development", but seeks flexibility to allow for changes between Development Outcomes Plan 5 of the Rangitahi Peninsula Structure Plan and approved subdivision consents for the relevant precincts.

Point Number 343.13

Summary of Decision Requested: **Delete** Rule 28.1.1 (b) Permitted Activities.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Permitted activity conditions (a) and (b) of Rule 28.1.1 of the Proposed Plan are very similar with respect to both conditions requiring activities to be in accordance with the Rangitahi Peninsula Structure Plan.
- Rule 28.1.1(b) is superfluous.
- Conditions (a) and (b) do not reflect that changes to activity locations may occur through the subdivision process for each precinct. The subdivision standards in the Proposed Plan provide some flexibility for variations to the precinct areas.
- The Submitter seeks that the permitted activity conditions in Rule 28.1.1 refer to the location of residential activities being in accordance with the Rangitahi Peninsula Structure Plan or any approved subdivision.

Point Number 343.14

Summary of Decision Requested: **Amend** Rule 28.3.1 Dwellings, to exclude lots in the locations shown on Development Outcomes Plan 5 in Appendix 8, which are likely to include multi-unit developments (Rangitahi Integrated Developments).

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- No reasons were provided.

Point Number

343.15

Summary of Decision Requested:

Amend Rule 28.3.6 P1 (b) Accessory Buildings, to make it clear that the gross floor area standards apply to individual buildings on a site rather than the total floor area of all accessory buildings.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- No reasons were provided.

Point Number

343.16

Summary of Decision Requested:

Delete the variance standards in Rule 28.4.1 RDI (a)(ii) Subdivision – General.

AND

Retain the matters of discretion in Rule 28.4.1 RDI (b) Subdivision – General.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The Rangitahi Structure Plan was originally investigated and designed at a level suitable for structure planning and plan change purposes. Resource consent phases for each Precinct necessitate further investigations and design that is more detailed which has the potential to result in changes to respond to any development constraints or opportunities that may be identified. Examples include poor ground conditions, which might be identified through additional geotechnical investigations, changes to accommodate stormwater treatment/attenuation, minimization of effects on ecologically sensitive areas, or changes to roading layouts in response to factors such as soil conditions or topography. In some cases, if the identified constraints cannot be avoided then there could be significant costs to the developer and future lot owners and/or potentially greater effects on the environment than alternative options.
- The variances allowed for as a Restricted Discretionary Activity under Rule 28.4.1 and as a Controlled Activity under Rule 28.4.2 do not provide enough flexibility to respond to some of the issues that may arise. The existing provisions create the potential that resource consents may be required as a Discretionary Activity due to the extent of variances proposed, despite potentially having good reasons for the changes, such as reduced environmental effects or improved suitability of lots.

Point Number

343.17

Summary of Decision Requested:

Delete the variance standards in Rule 28.4.2 C1 (a)(ii) Subdivision – Boundary adjustments.

AND

Add a matter of control to Rule 28.4.2 C1(c) Boundary adjustments, for the extent to which the subdivision is consistent with the Rangitahi Structure Plan in Rule 28.4.2 Subdivision – Boundary adjustments.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The Rangitahi Structure Plan was originally investigated and designed at a level suitable for structure planning and plan change purposes. Resource consent phases for each Precinct necessitate further investigations and design that is more detailed which has the potential to result in changes to respond to any development constraints or opportunities that may be identified. Examples include poor ground conditions, which might be identified through additional geotechnical investigations, changes to accommodate stormwater treatment/attenuation, minimization of effects on ecologically sensitive areas, or changes to roading layouts in response to factors such as soil conditions or topography. In some cases, if the identified constraints cannot be avoided then there could be significant costs to the developer and future lot owners and/or potentially greater effects on the environment than alternative options.
- The variances allowed for as a Restricted Discretionary Activity under Rule 28.4.1 and as a Controlled Activity under Rule 28.4.2 do not provide enough flexibility to respond to some of the issues that may arise. The existing provisions create the potential that resource consents may be required as a Discretionary Activity due to the extent of variances proposed, despite potentially having good reasons for the changes, such as reduced environmental effects or improved suitability of lots.

Point Number

343.18

Summary of Decision Requested:

Delete Rule 28.4.4 Title Boundaries – Contaminated Land.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health requires the appropriate identification, assessment and if necessary remediation of contaminants contained in soil to make the land safe for human use prior to development.

Point Number

343.19

Summary of Decision Requested:

Delete Rule 28.4.5 (a)(i) Title Boundaries – Significant Natural Areas and Maaori Sites of Significance.

AND

Delete Rule 28.4.5 (b)(ii) Title Boundaries – Significant Natural Areas and Maaori Sites of Significance.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- There are no Maaori sites of significance within the Rangitahi Structure Plan area identified on Proposed Plan maps 23 (Raglan Coast) and 23.3 (Raglan West).

Point Number 343.20

Summary of Decision Requested: **Amend** Policy 9.3.2.1 Commercial activities, to provide greater flexibility with regards to the location of activities at ground level, including residential.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Good urban design outcomes can be achieved for mixed-use development with some residential activities at ground floor level.
- The submitter seeks greater flexibility within the policy.

Point Number 343.21

Summary of Decision Requested: **Amend** Policy 9.3.5.4 Secondary access, to require the permanent secondary access to be constructed prior to the completion of Precincts F or G.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The submitter understands that Council is seeking greater certainty as to the timing of the permanent secondary access.
- The construction of the access will be a significant cost to the submitter, and should be undertaken to mitigate effects on the safe and efficient operation of the primary access and surrounding road network.

Point Number 343.22

Summary of Decision Requested: **Amend** the activity conditions in Rule 28.1.1 Permitted Activities, to refer to the location of residential activities being in accordance with the Rangitahi Peninsula Structure Plan or any approved subdivision.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Permitted activity conditions (a) and (b) of Rule 28.1.1 of the Proposed Plan are very similar with respect to both conditions requiring activities to be in accordance with the Rangitahi Peninsula Structure Plan.
- Rule 28.1.1 (b) is superfluous.
- Conditions (a) and (b) do not reflect that changes to activity locations may occur through the subdivision process for each precinct. The subdivision standards in the Proposed District Plan provide more flexibility for variations to the precinct plans.
- The submitter seeks that the permitted activity conditions i Rule 28.1.1 refer to the location of residential activities being in accordance with the Rangitahi Peninsula Structure Plan or any approved subdivision.

Point Number 343.23

Summary of Decision Requested: **Amend** Rule 28.2.8 P1 Indigenous Vegetation Clearance Inside a Significant Natural Area, to make provision for indigenous vegetation clearance associated with construction of roads that are in general accordance with the Rangitahi Structure Plan.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The Rangitahi Structure Plan area includes planned roads which cross Significant Natural Areas that are identified under the Proposed District Plan. It will therefore be necessary for earthworks to be undertaken in some the Significant Natural Areas in order to give effect to the Structure Plan.

Point Number 343.24

Summary of Decision Requested: **Amend** the Proposed District Plan to include an additional growth area for Raglan West, linking the Rangitahi Peninsula to Te Hutewai Road (near the Raglan Golf Course) and through to Wainui Road near the completed Te Ahiawa subdivision (see submission for map)

AND

Add objectives, policies, rules and zoning to enable future growth of Raglan.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The recent Future Proof decisions included changes to the growth strategy in response to Rangitahi Ltd's submission to identify Raglan as a location for growth emphasis and to recognise that residential growth is expected to occur due to lifestyle, proximity to Hamilton and technological and transport improvements.

Point Number 343.25

Summary of Decision Requested: **Amend** Rule 28.1.3 RDI Restricted Discretionary Activities for clarity so that (b) is a subset of (a).

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The format of Rule 28.1.3 does not make sense in the current form.

Point Number 343.26

Summary of Decision Requested: **Delete** Rule 28.2.4.2 Earthworks Maaori Sites and Maaori Areas of Significance.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- There are no Maaori sites or areas of significance within the Rangitahi Structure Plan area identified on Proposed Plan maps 23 (Raglan Coast) and 23.3 (Raglan West).

Point Number 343.27

Summary of Decision Requested: **Amend** Rule 28.2.4.3 Earthworks - Significant Natural Areas, to make provision for earthworks associated with construction of roads that are in general accordance with the Rangitahi Structure Plan.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- The Rangitahi Structure Plan area includes planned roads, which cross Significant Natural Areas that are identified under the Proposed Plan. It will therefore be necessary for earthworks to be undertaken in some of the Significant Natural Areas in order to give effect to the Structure Plan.

Point Number 343.28

Summary of Decision Requested: **Delete** Rule 28.2.6.3 Heritage items and Maaori Sites of Significance.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- There are no heritage items or Maaori sites of significance within the Rangitahi Structure Plan area identified on Proposed Plan maps 23 (Raglan Coast) and 23.3 (Raglan West).

Point Number 343.29

Summary of Decision Requested: **Delete** references to Schedule 30.5 (Urban Allotment Significant Natural Areas, Maori Freehold Land or Maori Customary Land) from Rule 28.2.8 – Indigenous Vegetation Clearance Inside a Significant Natural Area.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in this submission.

Decision Reasons:

- Urban Allotment Significant Natural Areas, Maori Freehold Land and Maori Customary Land do not relate to the Rangitahi Structure Plan area.

Submitter Number: 344 **Submitter:** Burton Trust

Point Number 344.1

Summary of Decision Requested: **Delete** the date "2017" from Policy 4.1.3(b) Location of development.

Decision Reasons:

- By removing the "2017" date it will remain a current policy through out the life of the Proposed Plan, including when Phase 2 of Future Proof is completed, when the Future Development Strategy is completed and also when Future Proof may be amended again in the future.

Point Number 344.2

Summary of Decision Requested: **Add** new Policy 4.1.3(c) as follows:
(c) Identify and investigate potential future growth area options to meet long term demand.

Decision Reasons:

- Work is continuing on Phase 2 of Future Proof, the Hamilton Growth Corridor and Future Development Strategy so it is appropriate to identify medium and long term options for future investigations.

Point Number 344.3

Summary of Decision Requested: **Add** to planning maps identification of the area east of Hamilton City between Puketaha and Holland Roads that is shown in Attachment 2 to the

submission as an area to be investigated for future urban growth and any additional or consequential relief.

Decision Reasons:

- The submitter owns in excess of 500ha in the locality and the remaining land is predominantly in the ownership of a relatively small number of landowners with large landholdings, willing to avoid subdivision/fragmentation of the land in order to protect the land for future urban growth.
- In addition to the submitter's 500ha with frontage to Puketaha, Greenhill and Telephone Roads, (allowing good urban connectivity in future and logical road connections), the land east of Hamilton will have access to the future Waikato Expressway via the Greenhill and Ruakura interchanges.
- The land to the east of Hamilton owned by the Submitter and immediate neighbours has the following characteristics that make them ideal for future urban growth:
- The land is relatively flat and contiguous with the existing Hamilton urban and business areas, separated only by the Waikato Expressway.
- The proximity of the land to the East Coast Main Trunk railway line allows the possibility for future business space which utilises rail freight.
- The land is adjacent to the future infrastructure for the Ruakura residential and business areas, separated only by the Waikato Expressway. Additional capacity and extensions from the Ruakura infrastructure could enable new infrastructure to develop further east of Hamilton.
- Interest has been expressed by developers who are capable of forward funding key infrastructure rather than relying on Councils.

Submitter Number:

345

Submitter:

Brent Trail

Point Number

345.1

Summary of Decision Requested:

Amend Rule 22.4.1.1 PR4 Prohibited subdivision, by replacing with the following:

Any Subdivision where a lot of a record of title that has been created for the purpose of a transferable rural lot subdivision under the provisions of the previous Operative Waikato District Plan - Franklin.

Except where an additional lot is created by any of the following rules:

(i) The conservation lot subdivision (Rule 22.4.1.6);

(ii) Reserve lot subdivision (Rule 22.4.1.7);

(iii) Access allotment or utility allotment using Rule 14.1.2 (Transportation).

AND

Delete Rule 22.4.1.1 PR4 Prohibited subdivision.

Decision Reasons:

- Wording is inappropriate considering previous clauses.
- Subdivision should be allowed using other provisions that have not been utilised in the past.
- The rules are an attempt to stop people using new lifestyle provisions to gain further subdivisions.
- It makes sense that properties can be subdivided for other reasons.

Point Number

345.2

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(i)-(iii) General subdivision.

Decision Reasons:

- No reasons provided.

Point Number

345.3

Summary of Decision Requested:

Amend Rule 22.4.1.2(a)(v) General subdivision, to reduce the minimum lot size to 5000m² and increase the upper limit to 3ha, or a percentage of the total land area.

Decision Reasons:

- In the interests of keeping as much land in rural production as possible the minimum should be reduced to 5000m².
- To give the ability for someone, who wants to produce something and needs a larger area, the upper limit should be increased to 3ha, which could be a viable orchard area in the right conditions.
- It could be limited to a certain percentage of the total land area, e.g. 10%, which equates to 2ha of a 20ha farm and 4ha of a 40ha farm.

Point Number

345.4

Summary of Decision Requested:

Delete Rule 22.4.1.2(a)(v) General subdivision.

Decision Reasons:

- The high class soils limit is unnecessarily complex and unnecessary given the small size of excised block relative to the balance block.
- It could create a situation where the lifestyle block is forced onto unsuitable land, particularly when a large block is largely low productive land but has a small buildable area, and this type of land is quite possible.
- The small lifestyle block may be more productive than the larger block.
- The limit in size of the small block will sufficiently take care of this issue.

Point Number

345.5

Summary of Decision Requested:

Delete Rule 22.4.1.4 RD1(a)(i) Boundary relocation.

Decision Reasons:

- The date is not needed.
- The provision should apply to all records of title, regardless of the date they were established.
- There can be all manner of reasons for relocating e.g. size, earth deformation of flooding, reverse sensitivity etc.

Point Number

345.6

Summary of Decision Requested:

Amend Rule 22.4.1.4 RD1(a)(iii) and (iv) and RD1(b) Boundary relocation, to replace the word "lot" with "record of title".

Decision Reasons:

- It should refer to "record of title" rather than "lot" as some Records of Title can be made up of multiple lots due to survey regulations.

Point Number 345.7

Summary of Decision Requested: Amend Rule 22.4.1.5 RDI (a) Rural Hamlet Subdivision, to replace the word "lot" with "record of title".

Decision Reasons:

- The interchangeability between "lot" and "record of title" is confusing and incorrect.
- A lot is a separately surveyed and marked piece of contiguous land, whereas a record of title may be comprised of one or more lots.

Point Number 345.8

Summary of Decision Requested: Amend Rule 22.4.1.5 RDI (iv) Rural Hamlet Subdivision as follows:

(iv) ~~Each proposed lot has a maximum area of 1.6ha~~ except the balance title, which should be as follows

OR

Amend Rule 22.4.1.5 RDI (iv) into one bullet point as follows:

(iv) ~~Each proposed lot has a maximum area of 1.6ha~~ except for ~~the proposed balance~~ ~~record of title~~ which has a minimum area of 20ha; and

~~it~~ it does not create any additional lots beyond the number of existing Records of Title.

Decision Reasons:

- The wording of (iv) is not entirely correct and should be merged with (v) into one statement as indicated.

Point Number 345.9

Summary of Decision Requested: Retain Rule 22.4.1.6 RDI (a)(i) Conservation lot subdivision.

AND

Retain Rule 22.4.1.6 RDI (a)(iii) Conservation lot subdivision.

Decision Reasons:

- No reasons provided.

Point Number 345.10

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.4.1.6 RDI (a)(iii) and (iv) Conservation lot subdivision.

Decision Reasons:

- Effectively penalises landowners who have taken the initiative to privately covenant significant areas and not take subdivision credits at the time.
- It is common in other districts to be able to claim subdivision credits retrospectively.
- It could perhaps be handled as a non-complying application in the above circumstance but the land owner should not have to go through the process without certainty.

Point Number 345.11

Summary of Decision Requested: Retain Rule 22.4.1.6 RDI (a)(v) Conservation lot subdivision.

Decision Reasons:

- No reasons provided.

Point Number 345.12

Summary of Decision Requested: Amend Rule 22.4.1.6 RDI (a)(vi) Conservation lot subdivision, to have a minimum lot size of 5000m².

AND

Amend Rule 22.4.1.6 RDI (a)(vii) Conservation lot subdivision, to have a maximum area of 3ha or a percentage of the total land area, e.g. 10%.

Decision Reasons:

- In the interests of keeping as much land in rural production as possible the minimum should be reduced to 5000m².
- To give the ability for those wanting to produce something and need a larger area, the upper limit should be increased to 3ha.
- This could be a viable orchard area in the right conditions.
- Could be limited to a certain percentage of the total land area, e.g. 10%.

Point Number 345.13

Summary of Decision Requested: Retain Rule 22.4.1.6 RDI (a)(viii) Conservation lot subdivision.

Decision Reasons:

- No reasons provided.

Point Number 345.14

Summary of Decision Requested: Retain Rule 22.4.6 Subdivision of land containing all or part of an Environmental Protection Area.

Decision Reasons:

- No reasons provided.

Point Number 345.15

Summary of Decision Requested: **Amend** Rule 22.4.9 RD1 (a)(i) Subdivision building platform, to be reduced to 300m2.

AND

Amend the equivalent rule in all zones, to reduce the building platform requirement to 300m2.

Decision Reasons:

- The rule concerns submitter and thus oppose it along with the same rule appearing anywhere else, particularly in Country Living and Village Zones.
- It is unrealistic.
- A building site of 300m2 is more realistic.
- 100m2 is clearly not meant to cater for wastewater treatment and disposal as well as buildings.

Point Number 345.16

Summary of Decision Requested: **Amend** Rule 22.4.9 RD1 (a)(ii) Subdivision building platform, to have an average gradient of 1:5.

AND

Amend the equivalent rule in all zones to an average gradient of 1:5.

Decision Reasons:

- Rule concerns submitter, along with the same rule appearing anywhere else, particularly in Country Living and Village Zones.
- It is unrealistic.
- Given earthworks take place, a grade of 1.5 would be acceptable.
- Given you require evidence from a geotechnical engineer even steeper may be acceptable.

Point Number 345.17

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.4.9 RD1 (a)(iii) Building platform and the equivalent requirement for certification by a geotechnical engineer of a building platform for subdivision in all other zones.

Decision Reasons:

- Rule concerns submitter, along with the same rule appearing anywhere else, particularly in Country Living and Village Zones.
- It is unrealistic.
- It is inappropriate for a flat site.
- A soils engineer should be able to certify such a site up to 1:5.
- Council should seek independent advice on the matter and to not over specify the level of engineer required on straight forward sites.
- Sites can be readily constructed on sloping ground subject to the recommendation and supervision from soils engineers without particular geotechnical qualifications, if they consider it out of their field they are expected to engage an expert.

Point Number 345.18

Summary of Decision Requested: **Delete** Rule 23.4 Subdivision.

Decision Reasons:

- It is an extraordinary measure.
- It will undoubtedly cause future significant hurdles for interim management of land resources.
- There will be cases where, with appropriate planning, subdivision could take place considering future development and thus there will undoubtedly be requirements for subdivision in relation to infrastructure.

Point Number 345.19

Summary of Decision Requested: **Amend** Subdivision Rule 23.4.2 RD1 (a)(i) General Subdivision, to reduce the minimum lot size from 5000m2 to 2500m2.

Decision Reasons:

- This will match requirements for on-site treatment and disposal of wastewater.
- This will allow for much better use of resource.
- This will assist in making housing land more affordable.
- So much land is being wasted with this rule.
- People do not necessarily want to have to maintain 5000m2.

Point Number 345.20

Summary of Decision Requested: **Delete** Rule 23.4.4 RD1 (a)(iii) Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas.

AND

Delete from every zone the subdivision rule which requires the boundary of every proposed lot to not divide any of the following:

- A natural hazard area;
- Contaminated land;
- Significant Amenity Landscape;
- Notable tree.

Decision Reasons:

- Submitter is concerned by rule.
- Submitter agrees a boundary should ideally not go through a notable tree, there will be instances where a boundary could go through a contaminated area, natural hazard or significant landscape.
- Much of Waikato rural land is contaminated due to high levels of cadmium, therefore any rural boundary line would not be allowed.
- Vast lengths of the coast may become natural hazards, therefore any coastal subdivision where lots require to intersect the coastal reserve will likely be affected by this rule.

Point Number 345.21

Summary of Decision Requested: **Delete** Rule 23.4.5 Site boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maori.

Decision Reasons:

- The rule concerns submitter and oppose it along with the same rule appearing anywhere else.

- Significant natural areas and Maaori sites can be very large, and often to create access, viable building sites and practical boundaries, and such sites may be required to have boundaries go through parts of them.
- Submitter agrees parts of significant Maaori sites should not be severed, however some sites, by their nature, can be spread out.

Point Number 345.22

Summary of Decision Requested: Delete Rule 23.4.8 Building platform.

Decision Reasons:

- Rule concerns submitter and opposite, along with the same rule appearing anywhere else, particularly in Country Living and Village Zones.
- It is unrealistic.
- A building site of 300m² is more realistic.
- Given earthworks take place, a grade of 1.5 would be acceptable.
- Given that evidence is required from a geotechnical engineer, even steeper may be acceptable.
- With a proposed size of 1000m² it is clearly not meant to cater for wastewater treatment and disposal as well as building.
- It is inappropriate for a flat site.
- A soils engineer should be able to certify such a site up to 1:5.
- Council should seek independent advice on the matter and to not over specify the level of engineer required on straight forward sites.
- Sites can be readily constructed on sloping ground subject to the recommendation and supervision from soils engineers without particular geotechnical qualifications, if they consider it out of their field they are expected to engage an expert.

Point Number 345.23

Summary of Decision Requested: Amend Rule 24.4.1 Subdivision - General to reduce the minimum lot size to 2500m².

Decision Reasons:

- 2500m² is adequate to provide for 'on site' wastewater treatment and disposal.
- Existing rule in Franklin has been in place for many years and significant planning has gone into some sites.
- Reduced size will lead to a reduced yield on land already zoned for development, which will not help with availability and affordability of land and therefore is not sustainable.

Point Number 345.24

Summary of Decision Requested: Retain Rule 22.4.1.6 RDI(b) Conservation lot subdivision.

Decision Reasons:

- No reasons provided.

Point Number 345.25

Summary of Decision Requested: Delete Rule 22.4.2 RDI(a)(iii) Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas and the associated matters of discretion.

AND

Delete from every zone the subdivision rule which requires the boundary of every proposed lot to not divide any of the following:

- A natural hazard area;
- Contaminated land;
- Significant Amenity Landscape;
- Notable trees

and the associated matters of discretion.

Decision Reasons:

- This rule concerns the submitter, along with the same rule that appears anywhere else, particularly in Country Living and Village zones.
- Agrees that a boundary should ideally not go through a notable tree, but there are instances where a boundary could go through a contaminated area, natural hazard or significant landscape.
- Much of Waikato's rural land is contaminated due to high levels of cadmium, thus any rural boundary line would not be allowed.
- Vast lengths of the coast may also be determined to be a natural hazard, therefore any coastal subdivision where lots are required to intersect the coastal reserve will likely be affected by this rule.

Point Number 345.26

Summary of Decision Requested: Delete Rule 22.4.3 Title boundaries - Significant Natural Areas, heritage items, Maaori Sites of Significance and Maaori Areas of Significance.

AND

Delete from every zone the subdivision rule for Title boundaries - Significant Natural Areas, heritage items, Maaori Sites of Significance and Maaori Areas of Significance.

Decision Reasons:

- The rule concerns submitter and oppose it along with the same rule appearing anywhere else, particularly in Country Living and Village Zones.
- Significant natural areas and Maaori sites can be very large, and often to create access, viable building sites and practical boundaries, and such sites may be required to have boundaries go through parts of them.
- Submitter agrees parts of significant Maaori sites should not be severed, however some sites, by their nature can be spread out.

Point Number 345.27

Summary of Decision Requested: Delete Rule 22.4.4 Road Frontage.

OR

Amend Rule 22.4.4 RDI(a) Road Frontage, to be reduced to 40m.

Decision Reasons:

- A narrower road frontage, as long as it is not on all lots, can still manage the necessary separation of access and can be an advantage for amenity and rural character, enabling dwellings and buildings to locate further from the road.

Point Number 345.28

Summary of Decision Requested:	Amend Rule 22.4.4 Road Frontage to change all references to "lot" to "record of title".
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	346	Submitter:	Robert Morton-Jones
Point Number	346.1		
Summary of Decision Requested:	Delete the Significant Green Zone from the property at 35A Norrie Avenue, Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> There were two old pine trees in the middle of the property that were removed approximately 5 years ago and a second dwelling has been built in its place, approved by Waikato District Council. There is a Reserve next to the property which is a Significant Green Zone. 		

Submitter Number:	347	Submitter:	Wallace & AnnMaree Bremner
Point Number	347.1		
Summary of Decision Requested:	Amend zoning of 205 Buckville Road, Buckland from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory has been zoned Future Urban under the Auckland Unitary Plan. This could potentially result in residential housing within this locality, rather than a large open space rural environment. The site does not contain prime soils. Given the proximity to Buckland and Pukekohe, rezoning from Rural to Country Living Zone is a logical progression for this area. 		

Submitter Number:	348	Submitter:	Julie Perry
Point Number	348.1		
Summary of Decision Requested:	Amend to allow subdivision of the property at 55A Rosebanks Drive Tamahere into two titles of 5000m2 and 3000m2.		
Decision Reasons:	<ul style="list-style-type: none"> Allow the submitters to purchase the land and build a family home. Allowing the subdivision of the land will accommodate a growing population and economic growth in my region. Minimal impact on the environment. The current site does not infringe on any other resident and is of limited use to the current owner. The proposed site has shared access. Accommodate the growing population and the demands of people wanting to raise a family in a semi-rural environment. Enables family to live close together. The site would maintain its rural character Economic benefits for the surrounding areas and businesses. 		

Submitter Number:	349	Submitter:	Kim Robinson
On behalf of:	Lochiel Farmlands Limited		
Point Number	349.1		
Summary of Decision Requested:	Add the criteria for each Significant Natural Area, as these are what should be relevant when assessing appropriate for Significant Natural Areas.		
Decision Reasons:	<ul style="list-style-type: none"> Section 32 analysis noted that mapping was mainly a desktop exercise. Rules don't identify the characteristics being protected. This submission point applies equally to all Significant Natural Areas. 		

Point Number	349.2		
Summary of Decision Requested:	Retain the intent of Policy 3.2.4 Biodiversity offsetting.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons stated. 		

Point Number	349.3		
Summary of Decision Requested:	Add rules and assessment criteria that provide for biodiversity offsetting where an activity might cause effects on a Significant Natural Areas or on Indigenous Biodiversity outside a Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> There does not appear to be any reference to biodiversity offsetting in the methods or rules for the Rural Zone. 		

Point Number	349.4		
---------------------	-------	--	--

Summary of Decision Requested:	Amend Rule 22.2.4 Hazardous substances, to replace the reference from "Appendix 6 (Hazardous Substances)" to "Appendix 5".
Decision Reasons:	<ul style="list-style-type: none"> • Rule 22.2.4 - hazardous substances appears to be a typo and should be Appendix 5 as is the Appendix for hazardous substances.
Point Number	349.5
Summary of Decision Requested:	Retain the intent of Policy 3.2.8 Incentivise subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • No reason stated.
Point Number	349.6
Summary of Decision Requested:	Delete the limitation in Rule 22.4.3(a)(i) Significant Natural Areas on title boundaries not dividing Significant Natural Areas.
Decision Reasons:	<ul style="list-style-type: none"> • It should be an incentive to further protect Significant Natural Areas even if only part of the Significant Natural Areas is to be protected as a conservation lot. There is an inconsistency between Rule 22.4.3 and Policy 22.4.3 if applied to large sites within Significant Natural Areas.
Point Number	349.7
Summary of Decision Requested:	Retain Rule 22.2.1.1 Noise - General.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the permitted activity status of farming noise and noise generated by emergency generators and emergency sirens.
Point Number	349.8
Summary of Decision Requested:	Retain Rule 22.2.3.1 P1(a)(i) Earthworks - General for ancillary rural earthworks as a permitted activity.
Decision Reasons:	<ul style="list-style-type: none"> • Support Rural ancillary earthworks as being permitted.
Point Number	349.9
Summary of Decision Requested:	Add a provision in rule 22.2.3.1.P1 Earthworks - General permitting earthworks for farm buildings.
Decision Reasons:	<ul style="list-style-type: none"> • Earthworks to create farm buildings are not included within the definition of Ancillary rural earthworks and therefore need to be added to the list of permitted earthworks.
Point Number	349.10
Summary of Decision Requested:	Amend Rule 22.2.3.1 P1(a)(ii) Earthworks - General, to increase the volume of aggregate permitted for a farm quarry from 1000m ³ to 2500m ³ .
Decision Reasons:	<ul style="list-style-type: none"> • The permitted volume of earthworks for a farm quarry is too small (1000m³ per 12 months).
Point Number	349.11
Summary of Decision Requested:	Amend Rule 22.2.3.1 Earthworks - General, to reflect the earthworks limits in the Thames Coromandel District Council's Proposed District Plan's Rural Zone, as follows: <ul style="list-style-type: none"> • maximum area per site per calendar year is 10,000m² (1ha) • maximum volume per site per calendar year is 2,500m³ (1ha) • maximum height of any fill and/or cut is 5m.
Decision Reasons:	<ul style="list-style-type: none"> • The volume of earthworks within the general standards under Rule 22.2.3.1P2 is too small and the slope will limit much of the hill country. • The limit on importation of fill under rule 22.2.3.1P4 is too small for rural ancillary earthworks generally and the cut height is too low. The slope (1:2) is too hard to achieve in hill country. • The earthworks limits in the Thames-Coromandel Proposed District Plan are considered appropriate, due to the similar terrains held by the Waikato District and Thames-Coromandel District.
Point Number	349.12
Summary of Decision Requested:	Delete from Rule 22.2.3.3 Earthworks in Significant Natural Areas, the earthworks controls relating to maintenance of existing tracks, fences or drains.
Decision Reasons:	<ul style="list-style-type: none"> • Volume too small and purposes too limited. • Cut height is too low and slope is too gradual. • Hill country is prone to slips and tracks may need to be repaired/restored. Existing use is protected under section 10 RMA.

Point Number	349.13
Summary of Decision Requested:	Delete from Rule 22.2.3.3 Earthworks in Significant Natural Areas, the earthworks controls on cultivation and pasture maintenance.
Decision Reasons:	<ul style="list-style-type: none"> • Volume is too small and purposes too limited. • Cut height is too low and slope is too gradual. • In hill country tracks may need repair/restoration due to a slip. Managing existing tracks and fences is provided for as an existing use under section 10 of the RMA.
Point Number	349.14
Summary of Decision Requested:	Amend Rule 22.2.7D1 Indigenous vegetation clearance inside a Significant Natural Area, to be a restricted discretionary activity rather than a discretionary activity and read: DRD
Decision Reasons:	<ul style="list-style-type: none"> • If indigenous vegetation removal does not comply with the permitted limit it should be a Restricted Discretionary activity, rather than a Discretionary activity.
Point Number	349.15
Summary of Decision Requested:	Amend Rule 22.2.7P3(a) Indigenous vegetation clearance inside a Significant Natural Area, to increase the area for indigenous vegetation clearance in relation to buildings and access/parking.
Decision Reasons:	<ul style="list-style-type: none"> • The rule is too uncertain as to what is an 'alternative development area' is. If the building has been approved, then another assessment should not be required. 250m2 of indigenous vegetation clearance will not provide enough area for a building and driveway.
Point Number	349.16
Summary of Decision Requested:	Amend Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area, to remove all controls on indigenous vegetation clearance for pasture maintenance and other existing activities ancillary to farming.
Decision Reasons:	<ul style="list-style-type: none"> • Farming is a permitted activity protected as existing uses under s10 RMA and there should be no limit on the maintenance requirements for pasture, track and drain maintenance and cultivation. • There should be no limit if the purpose is for pasture maintenance.
Point Number	349.17
Summary of Decision Requested:	Amend Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area, to increase the permitted indigenous vegetation clearance for new pasture, new fencing and tracks to 2,500m2 per site per year.
Decision Reasons:	<ul style="list-style-type: none"> • The limit on indigenous vegetation removal outside a SNA is too low (only 1000m2 per single consecutive 12 month period).
Point Number	349.18
Summary of Decision Requested:	Amend Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area, to increase the limit for permitted indigenous vegetation clearance for new dwellings and buildings and associated access to 2500m2 per site per year.
Decision Reasons:	<ul style="list-style-type: none"> • The limit on indigenous vegetation removal outside a SNA is too low (only 1000m2 per single consecutive 12 month period)
Point Number	349.19
Summary of Decision Requested:	Delete Rule 22.3.7.5 P1 Building setback - water bodies. OR Delete Rule 22.3.7.5 P1 (a)(ii) Building setback - water bodies.
Decision Reasons:	<ul style="list-style-type: none"> • Remove the requirement for a 23m building setback from a bank of a river. • Neither river or water body is defined within the Proposed District Plan, and therefore the setback could apply to a water course of any size. • This setback will also apply outside a SNA, landscape or natural character area.
Point Number	349.20
Summary of Decision Requested:	Amend Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area, to enable any indigenous vegetation clearance for a consented building platform or for clearance that has been considered appropriate at the time of resource or subdivision consent approval to be permitted.
Decision Reasons:	<ul style="list-style-type: none"> • The limit on indigenous vegetation removal outside a Significant Natural Area is too low.
Point Number	349.21
Summary of Decision Requested:	Amend Rule 22.3.7.5D1 Building setback - water bodies, to be considered a restricted discretionary activity rather than discretionary activity and to read: DRD

Decision Reasons:

- Remove the requirement for a 23m building setback from a bank of a river.
- Neither river or water body is defined within the Proposed District Plan, and therefore the setback could apply to a water course of any size.
- This setback will also apply outside a Significant Natural Area, landscape or natural character area.

Point Number 349.22

Summary of Decision Requested: **Delete** references to Environmental Protection Area/EPA in Rule 22.3.7.6 Building setback - water bodies.

Decision Reasons:

- Environmental Protection Area is not defined. There doesn't seem to be any policies in the Proposed District Plan to support an Environmental Protection Area.

Point Number 349.23

Summary of Decision Requested: **Retain** Rule 22.4.1.6 Conservation lot subdivision.

Decision Reasons:

- Generally support the provisions for conservation lot subdivision.

Point Number 349.24

Summary of Decision Requested: **Delete** Rule 22.4.3RD1(a)(i) Title boundaries - Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance.

Decision Reasons:

- Within large Significant Natural Area site area it may be difficult to ensure that a boundary of a proposed lot does not divide a Significant Natural Area. There may be geographical reasons as to why the boundary of a proposed lot runs through a Significant Natural Area.
- A boundary does not stop a Significant Natural Area from continuing to be considered a Significant Natural Area. Landowners of large Significant Natural Areas should be encouraged to protect the Significant Natural Areas as conservation lots and not be required to encompass all of the Significant Natural Area where it is large.

Point Number 349.25

Summary of Decision Requested: **Amend** Rule 22.4.4RD1 Subdivision - Road frontage, to a discretionary activity rather than a restricted discretionary activity and read ~~RD1~~

Decision Reasons:

- No reasons stated.

Point Number 349.26

Summary of Decision Requested: **Amend** Rule 22.4.3 Title boundaries - Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance so that subdivision that does not comply with the standards for Title Boundaries on SNAs and Maaori sites/areas of significance is a discretionary activity.

Decision Reasons:

- Subdivision that divides a Significant Natural Area becomes a non-complying activity and this is unreasonable. The effects of dividing a Significant Natural Area into a new lot can be managed as a Restricted Discretionary criterion without triggering a non-complying activity status.

Point Number 349.27

Summary of Decision Requested: **Delete** references to the Environmental Protection Area in Rule 22.4.6 Subdivision of land containing all or part of an Environmental Protection Area.

Decision Reasons:

- The Proposed District Plan has no definition of an Environmental Protection Area and it would seem to be a duplication of Significant Natural Areas..

Point Number 349.28

Summary of Decision Requested: **Review** application of Significant Natural Areas mapping on Lochiel Farmlands Ltd property at 316 Allen and Eyre Road, Onewhero.

Decision Reasons:

- Mapping of Significant Natural Areas is inaccurate on the Lochiel Farmlands Ltd property. The landowner has concerns regarding the accuracy of mapping on the property, which contains multiple Significant Natural Areas.

Point Number 349.29

Summary of Decision Requested: **Ensure** that Council funds the investigation of, identification of and robustness of Significant Natural Area mapping throughout the District.

Decision Reasons:

- It seems that the mapping is provisional and needs to be tested with data from subsequent field surveys. The obligation is on the Council to identify Significant Natural Areas not the landowner.
- Needs to be provision for payment to landowners for that assessment if there is any intention for ecological assessments to be required to determine significance of indigenous vegetation as part of any resource consent process.

Point Number 349.30

Summary of Decision Requested: Amend the mapping of Significant Natural Areas on the Proposed District Plan maps once ground truthing has been undertaken.

Decision Reasons:

- Mapping mainly a desktop exercise and rules do not identify the characteristics being protected.
- Ground truthing is required to check that the areas identified justify protection.

Point Number 349.31

Summary of Decision Requested: Delete from Rule 22.2.3.3 Earthworks - Significant Natural Areas, the earthworks controls on new fencing.

Decision Reasons:

- Fencing is important in protecting Significant Natural Areas from stock. In hill country this can require earthworks to provide a proper building foundation. The earthworks need to be permitted.

Point Number 349.32

Summary of Decision Requested: Delete from Rule 22.2.3.3P2 Earthworks - Significant Natural Areas, the maximum volume control of 200m³ for imported fill.

Decision Reasons:

- A limit of 20m³ imported fill is too low for permitted earthworks in a SNA. If the activity is permitted or an existing activity protected as existing use rights under section 10 of the RMA, it is not relevant that the fill is imported.

Point Number 349.33

Summary of Decision Requested: Amend Rule 22.2.7P1(a)(iv) Indigenous vegetation clearance inside a Significant Natural Area as follows:

Maintaining, repairing or reinstating existing tracks and fences; or

Decision Reasons:

- Add references to repair and/or restore to allow for tracks that need to be re-routed following slips or natural events.

Point Number 349.34

Summary of Decision Requested: Amend Rule 22.2.7P2 Indigenous vegetation clearance inside a Significant Natural Area, to remove the limitation on mauka/kanuka removal.

Decision Reasons:

- Manuka/Kanuka scrub needs to be actively managed to prevent a fire risk and to construct new tracks, fire breaks, fences, etc.

Point Number 349.35

Summary of Decision Requested: Oppose in Rule 22.2.7P3(a) Indigenous vegetation clearance inside a Significant Natural Area, the requirement that indigenous vegetation removal is only permitted if no alternative development area is identified outside the Significant Natural Area.

Decision Reasons:

- The alternative development area has to be a practical site. This limitation will not work if the alternative site is not accessible.

Submitter Number: 350 **Submitter:** Tony Perkins

Organisation: HRRA

Point Number 350.1

Summary of Decision Requested: Amend the designation of the old East Mine area, Huntly for recreational area use.

Decision Reasons:

- Huntly is in a unique place being in the middle of the Auckland, Tauranga, Hamilton triangle. This is a chance to put Huntly on the map as a recreational destination.

Submitter Number: 351 **Submitter:** TKDM Farms Limited

Point Number 351.1

Summary of Decision Requested: Amend the zoning of the property at Lot 9 DP 461781 on Koheroa Road from Rural Zone to Village Zone.

Decision Reasons:

- The site contains minimal development constraints and is appropriate for low-density residential use;
- Rural zoning is an inefficient use of the land resource, that is close to the existing settlement area of Mercer;
- The moderate terrain is suitable for an efficient residential and rural-residential use and development, such as low-density residential development (Village Zone);
- The subject site segregates Mercer School and the Saint Judes Church Cemetery. The rezoning will improve connections between Mercer School and the Cemetery;
- The subject site is within walking distance to Mercer School and the Cemetery and rezoning the land from Rural Zone to Village Zone will provide for low-density residential development an obvious step in providing for an urban land resource that encapsulates this community;
- The current zoning results in an awkward section of rural land between Village Zoned land directly to the northwest and the Cemetery and Mercer School to the north. No reasons explained for the zoning in the s32 analysis;
- The request to rezone the site to Village Zone will enable appropriate low-density residential growth away from rural and coastal areas within the District;
- Prevents inappropriate development on versatile soils. The site is not made up of elite/prime soils.

Submitter Number:	352	Submitter:	Terence Denton
On behalf of:	Terence Denton & Bernardina van Loon		
Point Number	352.1		
Summary of Decision Requested:	Delete the portion of Significant Natural Area on the property at 40 Cameron Town Road, Pukekohe that does not meet any of the Significant Natural Area criteria in Section 11A of the Waikato Regional Policy Statement (see maps attached to the submission).		
Decision Reasons:	<ul style="list-style-type: none"> The notified Significant Natural Area overlay erroneously includes large proportions of garden, amenity and livestock areas which do not meet any of the criteria for significance of indigenous criteria listed in section 11A of the Waikato Regional Policy Statement. The area is used as a garden/stock/amenity/yard area and contains significant infrastructure as well as a substantial number of non-indigenous plant species. 85% of the property is already protected by covenant. The remaining 15% should not fall under the Significant Natural Area classification. 		
Point Number	352.2		
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.2.3.3 P1(a), P2 and RD1 Earthworks - Significant Natural Areas.		
Decision Reasons:	The plan does not adequately address rules applying to existing non-compliant elements or activities within the overlay.		
Point Number	352.3		
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.2.7 P1(a), P3(a) and D1 Indigenous vegetation clearance inside a Significant Natural Area.		
Decision Reasons:	The Plan does not adequately address rules applying to existing non compliant elements or activities with the overlay.		
Point Number	352.4		
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.4.3 RD1(a), RD1(b) and NCI Title boundaries - significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance.		
Decision Reasons:	The plan does not adequately address rules applying to existing non-compliant elements or activities within the overlay.		

Submitter Number:	353	Submitter:	Michael Anderson
Point Number	353.1		
Summary of Decision Requested:	Add strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms (GMOs), the same or similar to the Far North District Plan, Whangarei District Plan and the Auckland Unitary Plan.		
Decision Reasons:	<ul style="list-style-type: none"> The submission references provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89. Release of genetically modified organisms has a potential to cause significant adverse effects on the environment, including the following: <ol style="list-style-type: none"> biological or ecosystem harm; harm to tangata whenua cultural values such as mauri and tikanga; harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing; harm from genetically modified organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependent on an uncontaminated environmental brand; Adverse effects to these land uses could include loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood. Conditions of consent may be breached by poor management, human error, natural events. Once GMOs have been released they would be very difficult, if not impossible to eradicate. Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment. 		

Submitter Number:	354	Submitter:	Peter & Janette Middlemiss
Point Number	354.1		
Summary of Decision Requested:	Amend the Rural Zone to have three sub-zoning categories to accommodate the diversity of the area rather than just one blanket zone.		
Decision Reasons:	<ul style="list-style-type: none"> To accommodate the diversity of the area rather than one blanket zoning. Potential zone categories would be need to be discussed. Rural zoning encompasses all rural land regardless of size contour, location and what subdivisions have already been approved in the past. Understands that Council wish to conserve arable farming land. Some land does not lend itself to profitable land uses, therefore should not be categorised with the profitable land when zoned. Accommodate growth by increasing the availability of the less productive land for subdivision e.g. land in Ngaruawahia and Huntly areas The Ngaruawahia area is becoming increasingly sought after due to its easy travelling distance to Hamilton and Auckland. There is a need to provide a broad spectrum of land use environments to accommodate residential, rural, residential, lifestyle, farming, industrial and recreational lands. The District Plan in its current form does not accommodate these land use needs. 		

Point Number 354.2

Summary of Decision Requested: **Delete** restrictions in Rule 22.4.1.2(a)(i) General Subdivision for Record of Title date.
OR
Amend Rule 22.4.1.2(a)(i) if the Rural Zone is tiered, e.g. any lot less than 8,000m2 cannot be further divided.

Decision Reasons:

- Rule outdated
- Should be removed from current plan structure
- Could be incorporated in a different form if the Rural Zone is tiered, e.g. lots less than 8,000m2 cannot be further subdivided.

Point Number 354.3

Summary of Decision Requested: **Delete** restrictions in Rule 22.4.1.2(a)(ii) General Subdivision for minimum qualifying title size of 20ha, particularly for those properties where bordering titles are less than the 20 hectare limit.

Decision Reasons:

- In areas where surrounding/bordering titles are less than 20 ha, this part of the rule needs removing.
- Some property sizes are approximately 5,000m2, 2, 4, 6 and 17 ha e.g. Te Puroa and Waipa Heights Roads.

Point Number 354.4

Summary of Decision Requested: **Amend** restrictions in Rule 22.4.1.2(a)(iv) General Subdivision, requiring the additional lot size being between 8,000m2 and 1.6ha.

Decision Reasons:

- The upper limit of this rule is not realistic and requires increasing or being negotiable. For example where a block is less than 20ha in an already subdivided area or a larger property where subdivision is required for inheritance or family reasons.
- Sizes should be negotiable or tiered in the Rural zone.
- There needs to be a distinction between 'life style' properties and larger properties.

Point Number 354.5

Summary of Decision Requested: **Amend** restrictions in Rule 22.4.1.2(a)(v) General Subdivision, such that the high class soil criteria is negotiable in some circumstances.

Decision Reasons:

- In some circumstances percentage should be negotiable.
- Rural Zoning encompasses all rural classified land regardless of size, contour, locations or what subdivision have been allowed in the past for example Te Puroa Road, Waipa Heights Road, Hill Side Heights Road, Huntly, Kimihia and James Road, Huntly.
- Need to consider Waikato Regional Council requirements to fence off waterways or retire areas at risk of erosion.
- This will further reduce areas of smaller properties rendering them less able to generate income if the percentage of area is significant due to multiple waterways on a property.
- Property at 495 Te Puroa Road has three different water sources in the bottom of each gully.
- Due to property at 495 Te Puroa Road being under 20 hectares this will reduce the amount of land available for our use.
- Subdivision is already part of the character of the immediate area and should be considered correct and proper use of the land.

Point Number 354.6

Summary of Decision Requested: **Delete** Rule 22.4.1.2 (a)(iii) General Subdivision.

Decision Reasons:

- This part of the rule should not be applied to all subdivision.
- If the Rural Zone is tiered, this could be addressed an applied to those larger properties with a commercial land use.

Submitter Number: 355 **Submitter:** Scott & Tina Ferguson

Point Number 355.1

Summary of Decision Requested: **Retain** Objective 5.1.1. The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting these soils from adverse effects of inappropriate use and development is of national importance and is recognised with a National Policy Statement for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land.
- Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Agree that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 355.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Amend Objective 5.2.1(a)(i) Rural resources as follows:
(a) Maintain or enhance the:
(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;
...

Decision Reasons:

- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 355.3

Summary of Decision Requested: **Retain** Policy 5.2.2. High class soils, as notified.

Decision Reasons:

- Policy 5.2.2 seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 355.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of "Rural Character" should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 355.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(i) – (iii) General Subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of the General Subdivision rules.

Point Number 355.6

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General Subdivision to create new discretionary activities, as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD I.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD I.

Decision Reasons:

- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number 355.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision

AND

Add a new matter of discretion to Rule 22.4.1.2 (b) General Subdivision, as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- The strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 355.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary activity.

Point Number 355.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivisions, as follows:
~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~
...
(d)(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;
(e) ... ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy 5.3.8 (b) duplicates Policy 5.3.8(d)(ii) and 5.3.8(e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses and are recognised as important components of primary production activities which form part of the rural environment.

Point Number 355.10

Summary of Decision Requested: **Amend** the activity status for Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from Prohibited to Non-Complying Activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- In some instances it may be unavoidable to create an additional Record of Title.
- The rule relies on a definition of "High Class Soils". High class soils as defined in the Proposed Plan (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities which are viable and sustainable such as greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business, rather than disposal of the entire property or the need to invest more capital in the operation.
- This activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 228 of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation, under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 355.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision to replace "lot" with "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 356 **Submitter:** Robert & Colleen Endicott

Point Number 356.1

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General Subdivision, to delete restrictions on subdivision of rural land smaller than 20ha and to delete the requirement that a title issued prior to 1997.

Decision Reasons:

- These restrictions are unreasonable in regards to existing land holdings that are already too small to be an economic farming unit.

Submitter Number: 357 **Submitter:** Colin John Wood

Point Number 357.1

Summary of Decision Requested: **Remove** walkway from the property located at 493 Old Taupiri Road, Hopuhopu.

Decision Reasons:

- The submitter states that a lot of money was spent on the River Bank when it slipped a few years ago.

Submitter Number: 358 **Submitter:** Caroline Swann

Point Number 358.1

Summary of Decision Requested: **Amend** the extent of the Significant Natural Area on the property at 1384 Whaanga Road, Raglan by reducing the size (see map attached to the submission).

Decision Reasons:

- Kanuka/Manuka is a regenerated tree over grassland. These trees are not significant compared to other areas on this farm.

Point Number 358.2

Summary of Decision Requested: Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, by deleting 5m3 and the words "outside the coastal environment".

Decision Reasons:

- 5m3 is not enough for heating needs within the coastal environment.
- Need to be able to cut kanaka/manuka for firewood.

Point Number 358.3

Summary of Decision Requested: Amend the proposed Significant Natural Area on the property at 1384 Whaanga Road, Raglan, to exclude existing farm tracks.

Decision Reasons:

- To ensure sustainable farm operations can continue.

Submitter Number: 359 **Submitter:** Phillip Swann

Point Number 359.1

Summary of Decision Requested: Amend the size of the proposed Significant Natural Areas on the property at 1665 Whaanga Road, Raglan, to reflect areas of significant ecological value (see map attached to submission).

Decision Reasons:

- Parts of the proposed Significant Natural Area are of low ecological value.
- Comprises recently regenerated Kanuka as well as exotic species and pest species including woolly nightshade and gorse.
- This area has been sustainably farmed for the past 100 years.
- These areas are important parts of the farm and the loss of these productive areas will seriously impact on the economic value of the farm.
- There are areas of vegetation that are of greater significance (see the map attached to the submission for further detail).

Point Number 359.2

Summary of Decision Requested: Amend the area of the Significant Natural Area on the property at 1665 Whaanga Road, Raglan, to exclude existing farm tracks.

Decision Reasons:

- This is to ensure sustainable farm operations can continue.

Point Number 359.3

Summary of Decision Requested: Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, by deleting "5m3" and replacing it with "1 per cent" AND Delete the words "outside the coastal environment" from Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- 5m3 is insufficient to provide for the heating needs of farms, especially those with more than one dwelling.
- A 1 per cent allowance would have no adverse affects on sustainable management of the resource, or on ecological values.
- Excluding the coastal environment from the firewood allowance is unnecessary and unreasonable.

Point Number 359.4

Summary of Decision Requested: Amend Rule 22.2.3.3 Earthworks - Significant Natural Areas to permit earthworks, to construct new tracks through Significant Natural Areas.

Decision Reasons:

- Rule 22.2.3.3 is silent about construction of new tracks in Significant Natural Areas. New tracks should be permitted to enable ongoing farming operations and farm development.

Submitter Number: 360 **Submitter:** Kwanghoon Yang

Point Number 360.1

Summary of Decision Requested: Amend zoning of the properties on the western side of Helenslee Road and north of Munro Road and Huia Road, Pokeno (see maps included in the submission) Residential to Rural Zone.

Decision Reasons:

- The proposed re-zoning does not include 166 Pokeno Road, which is in the same Central Rural Area.

Point Number 360.2

Summary of Decision Requested: Amend the zoning of the property at 7 Munro Road, Pokeno, from Rural Zone to Residential Zone.

Decision Reasons:

- The site is within 400m of the bus route.
- The property is within the Central Rural Area, same as the properties proposed as Residential Zone on the western side of Helenslee Road.
- The zoning of land on the northern side of the railway line should match that on the southern side of the railway line on Pokeno Road.
- The property is surrounded by three roads so has easy access for residential dwellings.

Submitter Number: 362 **Submitter:** CYK Limited

Point Number 362.1

Summary of Decision Requested: **Retain** Policy 3.2.8 Incentivise subdivision, except for the amendments sought below

AND

Add to Policy 3.2.8 Incentivise subdivision, as follows:

(b) Incentivise subdivision in the Rural zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous Biodiversity.

Decision Reasons:

- Support incentivising the protection of existing biodiversity with the ability to subdivide subject to meeting certain criteria.
- Policy 3.2.8 needs to be expanded to include provision for the enhancement and/or restoration of areas, when once restored, would be of a suitable size and quality to achieve a functioning ecosystem. Appendix 2 of the Proposed Plan - 'Criteria for Determining Significance of Indigenous Biodiversity' could provide the basis for assessing the eligibility of these areas. Eligible areas would likely be wetlands and waterways which are degraded in the Waikato District due to farming activities such as stock and cropping.
- Incentivising restoration is in line with The Vision and Strategy for the Waikato River.

Point Number 362.2

Summary of Decision Requested: **Retain** Objective 5.1.1 The Rural Environment, as notified.

Decision Reasons:

- The Waikato District encompasses valuable areas of high class soils that are of primary importance for food production both regionally and nationally.
- Protecting soils from adverse effects of inappropriate use and development may impact life-supporting capacity.
- This is of national importance, and is now being recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land.
- Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- The strength of wording in this objective is supported.
- Agree that urban development within the Rural Environment is an outcome contrary to the intent of the Proposed Plan and should be avoided.

Point Number 362.3

Summary of Decision Requested: **Retain** Objective 5.2.1 (a)(i) Rural Resources, except for the amendments sought below

AND

Amend Objective 5.2.1 (a)(i) Rural Resources, as follows:

(a) Maintain or enhance the:

(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular...

Decision Reasons:

- Support sub-policy (i) to maintain or enhance the life-supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource.
- Support the enhancement and/or restoration of natural ecosystems, surface and ground water quality, and the natural characteristics of fresh waterbodies and coastal waters as set in sub-parts ii, iii and iv of this Policy.
- A method of enhancement should be incentivising the stock exclusion, restoration of biodiversity, and protection of waterways through rural subdivision.
- Providing for conservation lot subdivision via enhancement and/or restoration would enable this policy.

Point Number 362.4

Summary of Decision Requested: **Retain** Policy 5.2.2 High Class Soils.

Decision Reasons:

- Supports the policy which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 362.5

Summary of Decision Requested: **Retain** Policy 5.2.3 (b) Effects of subdivision and development on soils, except for the amendments sought below

AND

Amend Policy 5.2.3 (b) Effects of subdivision and development on soils, as follows:

(b) Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).

Decision Reasons:

- Supports provisions that incentivise protection, enhancement and/or restoration of biodiversity values within the Waikato District through subdivision.

- This Policy only provides for subdivision where existing indigenous biodiversity is being protected.
- There are a number of waterways and wetlands in the Rural Zone of the Waikato District that would benefit from stock exclusion (through fencing) and enhancement and/or restoration.
- The cost of full restoration is approximately \$45,000 + GST per ha (excluding fencing of revegetated areas from stock).
- Subdivision offers an incentive for landowners to undertake restoration works which they would be unlikely to do without a financial offset.
- To allow for the protection and/or restoration, particularly of water ways, would achieve the outcome sought in Policy 5.2.1(a)(iii), being the enhancement of water quality.
- Would support Policy 3.1.2 which seeks enhancement of indigenous biodiversity values through planting, pest control and other biosecurity measures.
- The Vision and Strategy for the Waikato River seeks restoration of the health and wellbeing of the Waikato River Catchment - improvements over time.
- Incentivising the fencing and restoration of waterways in the Waikato District would contribute positively to the improvement of water quality and achieving the objectives of the Vision and Strategy.

Point Number 362.6

Summary of Decision Requested: **Retain** Objective 5.3.1 (a) Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 (a) Rural character and amenity, as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Support in part the intent of this objective, however, recognition of the variation of what defines rural character and amenity values across a large District is needed.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the District which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 362.7

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision as follows:

(a) Protect productive rural areas by directing urban forms of subdivision, use, and development to within the boundaries of towns and villages.

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

(c) Ensure subdivision, use and development minimise the effects or ribbon development.

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy 5.3.8(b) duplicates (d)(ii) and (e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. It is recognised that the district's rural character is varied in nature and comprises landscapes, landforms and structures.
- These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses.
- These are recognised as important components of primary production activities and form part of the rural environment and are generally considered rural in appearance and value.

Point Number 362.8

Summary of Decision Requested: **Retain** the definition for "Significant Natural Area" in Chapter 13: Definitions, except for the amendments sought below

AND

Amend the wording of the definition for "Significant Natural Area" in Chapter 13: Definitions, as follows:

Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area of the planning maps or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity (Appendix 2) by a suitably qualified Ecologist.

Decision Reasons:

- Support the inclusion of Significant Natural Area's definition.
- Would like to see definition expanded to also include areas that have been assessed by a suitably qualified Ecologist as meeting one or more of the criteria in Appendix 2 of the Proposed Plan - *Criteria for Determining Significance of Indigenous Biodiversity*.
- Aligns with the wording of the Conservation Lot Subdivision provisions which allow for subdivision where an identified as Significant Natural Area is being protected or an area meeting the Criteria for Determining Significance of Indigenous Biodiversity.

Point Number 362.9

Summary of Decision Requested: **Amend** the activity status for Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited Subdivision, from Prohibited to Non Complying activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies.
- It is fanciful to think that every subdivision on high class soil would result in a significant adverse effect on the environment.
- Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils.
- High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- Unfair and unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site.
- Established rural activities include greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries or commercial orchard activities.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- A number of commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 states any subdivision of a lot previously amalgamated for the purpose of a transferable lot subdivision is prohibited. This rule may unreasonably restrict the subdivision potential over and above what is necessary to avoid undermining the intent of the rule under which these Records of Title were created. Under Rule 22B of the Franklin Section, the donor certificates of title had to meet a minimum area of 1ha each. However there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. We also note that under the Franklin Section of the District Plan there were no corresponding rules that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22B of the Franklin Section require closer scrutiny this should merit a Non-Complying status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbour without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected in the Rural Zone from inappropriate subdivision and development and that subdivision in the Urban Expansion Area does not undermine the integrated and efficient development of this zone.

Point Number 362.10

Summary of Decision Requested: Retain Appendix 2 Criteria for Determining significance of Indigenous Biodiversity.

Decision Reasons:

- Support the inclusion of the criteria for determining significance of indigenous biodiversity.

Point Number 362.11

Summary of Decision Requested: Add a new discretionary activity to Rule 22.4.1.6 Conservation lot subdivision, as follows:

DI

(a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6(vi-vii) RDI.

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6(vi-vii) RDI.

Decision Reasons:

No reasons provided.

Point Number 362.12

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(iv) General Subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary activity.

Point Number 362.13

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, to replace references to "lot" with "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Point Number 362.14

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(i) – (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of General Subdivision provisions.

Point Number 362.15

Summary of Decision Requested: Retain Rule 22.4.2.2 General subdivision, except for the amendments sought below

AND

Amend Rule 22.4.2.2 General subdivision to add new discretionary activities as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RDI.

Decision Reasons:

- General subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- This will ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not to meet an arbitrary rule.
- A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.

- A discretionary rule should be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8,000m² it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land.
- If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land.
- If the land comprises productive potential, then a Farm management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- The creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other activities on the site should be provided for.

Point Number 362.16

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v) General Subdivision

AND

Add a new matter of discretion to Rule 22.4.1.2, as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 report regarding the relevance or practicality of this rule.
- The submitter agrees with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high class soils.
- The strict and arbitrary 80/20 requirement of this rule may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions.
- The objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome.
- Consent planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 362.17

Summary of Decision Requested: Amend clauses (a) and (b) in Rule 22.4.1.6 (a) Conservation Lot subdivision, as follows:

(a) The subdivision must comply with all of the following conditions:

(i) The lot must contain a contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist, or a contiguous area, to be enhanced and/or restored in accordance with the table below:

...

(ii) The area of Significant Natural Area, or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);

(iii) The Significant Natural Area, or area to be restored, is not already subject to a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977-legal protection;

(iv) The subdivision proposes to legally protect all areas of Significant Natural Area, or area to be restored; by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977;

(v) An ecological management plan is prepared to address ongoing management of the ~~covenant~~ protected area to ensure that the Significant Natural Area area to be protected is self-sustaining and that plan:

A. Addresses fencing requirements for the ~~covenant~~ protected area;

B. Addresses ongoing pest plant and animal control;

C. Identifies any enhancement and/or restoration or edge planting required within the ~~covenant~~ area to be protected;

(vi) All proposed lots are a minimum size of 8,000m²;

(vii) All proposed lots excluding the balance lot, must each have a maximum area of 1.6ha;

(viii) This rule or its equivalent in a previous district plan has not previously been used to gain an additional subdivision entitlement;

(b) Council's discretion is restricted to the following matters:

(i) Subdivision layout and proximity of building platforms to Significant Natural Area the area to be protected;

(ii) Matters contain in an ecological management plan for the ~~covenant~~ protected area;

(iii) Effects of the subdivision on localised rural character and amenity values;

(iv) Extent of earthworks including earthworks for the location of building platforms and access ways.

(v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- Support the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity which offers positive benefits for the Region.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot rules.
- There are significant biodiversity and water quality benefits to be gained from ecological enhancement particularly along waterways and wetland areas.
- Water quality is a key issue identified in the Regional Policy Statement and the Vision and Strategy.
- Recognised in the rural objectives and policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways.
- The plan should be enabling of improving biodiversity and water quality within the Waikato Catchment and incentivise enhancement and/or restoration of areas that meet criteria in Appendix 2.
- Re-vegetation costs approximately \$45,000 per hectare.
- Incentivisation through subdivision would assist in offsetting this cost and encourage enhancement and/or restoration.
- Seek that provisions for ecological enhancement and/or restoration of appropriate areas be included.
- Minimum areas for enhancement and/or restoration should be in accordance with Rule 22.4.1.6.
- Rule 22.4.1.6 ii requires the legal protection of the conservation feature.
- Other forms of legal protection, such as the vesting of the conservation area in Council ownership (esplanade reserve) or by S221 consent notice may be appropriate.
- Suggest that this rule require legal protection only and leave the mechanism of protection to discretion of Council.
- Rule 22.4.1.6 (vi) requires a minimum area of 8,000m², flexibility for lot area should be provided where dwellings or established rural activities exist. This avoids unnecessary fragmentation of productive land. This could be addressed as a matter of discretion.

Submitter Number: 363

Submitter:

Divina Libre

Point Number 363.1

Summary of Decision Requested: **Amend** the zoning for the land located between the Waikato Expressway and the Tamahere Country Living Zone (which includes Yumelody Lane) from Rural Zone to Country Living Zone.

Decision Reasons:

- The land around Yumelody Lane is already subdivided into small lots.
- The land is not suitable or economic for farming.
- The land is suitable for Country Living Zone because it is adjacent to the Tamahere Country Living Zone and cut off from other rural areas by the Expressway.

Point Number 363.2

Summary of Decision Requested: **Retain** Rule 22.3.2 (P1) Minor dwelling, and ensure that it does not include reference to dependent persons in the rule.

Decision Reasons:

- There is no need to stipulate that dependent persons live in a minor dwelling.

Point Number 363.3

Summary of Decision Requested: **Delete** Rule 22.3.2 (P1)(b)(i) Minor dwelling, that requires minor dwellings to be within 20m of the main dwelling.

Decision Reasons:

- This requirement for minor dwellings to be within 20m of the main dwelling is unnecessary.
- Takes no account of the topography or other features of the land.
- A better site on the land may be further away.

Point Number 363.4

Summary of Decision Requested: **Amend** the Significant Natural Area near Yumelody Lane further along the gully, past 60 Yumelody Lane.

Decision Reasons:

Significant bird life wild life and large trees in the gully adjacent to 60 Yumelody land that justify this being a Significant Natural Area.

Submitter Number: 364 **Submitter:** Michael Innes

Point Number 364.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment.

Decision Reasons:

- Waikato District encompasses valuable areas of high class soils that are important for food production both regionally and nationally.
- Protecting these soils from adverse effects of inappropriate use and development that may impact their life supporting capacity is of national importance which is now being recognised with a National Policy Statement for versatile land and High Class Soils).
- Urban subdivision is an inefficient use of rural production land.
- Urban subdivision, particularly ad-hoc subdivision may undermine the integrated development of identified townships and expansion areas.
- Support strength of wording in this objective and agree that urban development is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 364.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Amend Objective 5.2.1(a)(i) Rural resources, as follows:
Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;

Decision Reasons:

- Support the maintenance or enhancement of life-supporting capacity and versatility of soils.
- Accessibility to versatile land is a key consideration in managing this resource.

Point Number 364.3

Summary of Decision Requested: **Retain** Policy 5.2.2. High class soils.

Decision Reasons:

- Support that the policy seeks to retain high class soils and ensure adverse effects do not compromise the life supporting properties of high class soil.

Point Number 364.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendment sought below
AND
Amend Objective 5.3.1(a)- Rural character and amenity, as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Support the intent of this objective. However recognition of the variation of what defines rural character and amenity values across a large District is needed.

- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholding, particularly in the northern part of the District which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of "Rural Character" should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 364.5

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(i) – (iii) General Subdivision, as notified.

Decision Reasons:

- Support the inclusion of the General Subdivision rules.

Point Number 364.6

Summary of Decision Requested: Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.2 General Subdivision to create new discretionary activities as follows:

D1

(g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- General subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- This will ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not to meet an arbitrary rule.
- A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should be provided for lots less than 8,000m2 and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8,000m2 it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land.
- If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land.
- If the land comprises productive potential, then a Farm management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate. The creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other activities on the site should be provided for.

Point Number 364.7

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v) General Subdivision

AND

Add a new matter of discretion to Rule 22.4.1.2(b) General Subdivision, as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 report regarding the relevance or practicality of this rule.
- We agree with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high class soils.
- The strict and arbitrary 80/20 requirement of this rule may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions.
- The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met.
- This becomes an additional compliance cost that does not necessarily result in a better environmental outcome.
- Consent planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 364.8

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m2 and 1.6ha is supported as a Restricted Discretionary activity.

Point Number 364.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

... *(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;*

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy 5.3.8(b) duplicates (d)(ii) and (e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.

- It is recognised that the district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 364.10

Summary of Decision Requested: Amend the activity status for Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, from Prohibited to Non-Complying Activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies.
- It is fanciful to think that every subdivision on high class soil would result in a significant adverse effect on the environment.
- Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- Unfair and unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site.
- Established rural activities include greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries or commercial orchard activities.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- A number of commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 states any subdivision of a lot previously amalgamated for the purpose of a transferable lot subdivision is prohibited.
- This rule may unreasonably restrict the subdivision potential over and above what is necessary to avoid undermining the intent of the rule under which these Records of Title were created.
- Under Rule 22B of the Franklin Section, the donor certificates of title had to meet a minimum area of 1ha each. However there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation.
- We also note that under the Franklin Section of the District Plan there were no corresponding rules that limited any further subdivision of the donor lot.
- While subdividing lots amalgamated under Section 22B of the Franklin Section require closer scrutiny this should merit a Non-Complying status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbour without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected in the Rural Zone from inappropriate subdivision and development and that subdivision in the Urban Expansion Area does not undermine the integrated and efficient development of this zone.

Point Number 364.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, to replace reference to "lot" with "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title.
- This may occur where a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 365 **Submitter:** Delta Property Group

Point Number 365.1

Summary of Decision Requested: Amend Rule 22.4.1.2 General Subdivision, to add a new restricted discretionary activity for records of title containing no high class soils and to allow a minimum lot area of 4ha on properties that do not contain high class soils as follows:

RD1 A1 - Record of Title containing High Class Soil:

(a)

RD2 A2 - Record of Title containing no High Class Soil:

(a) *Subdivision must comply with all of the follow conditions:*

(i) The Record of Title to be subdivided must not have previously been used to gain an additional subdivision entitlement under this Rule. (Note: A consent notice will be required on new Titles created under this Rule confirming no further subdivision under this Rule may be made);

(ii) The Record of Title to be subdivided must be at least 20 hectares in area;

(iii) The proposed subdivision must create no more than one additional lot, excluding an access allotment.

(iv) The additional lot must have a minimum lot area of 4ha;

(b) Council's discretion is restricted to the following matters:

...

Decision Reasons:

- There are many cases where there are rural sites that do not contain high class soils that could be potentially subdivided down to smaller sizes without compromising productivity or the character and amenity of the rural zone.
- This could be achieved by making a larger minimum lot size (with no maximum) and providing a one-time only provision to ensure subdivision retains rural character and amenity and ensures lot sizes are sufficiently sized for productive use.

Point Number 365.2

Summary of Decision Requested: Amend Rule 22.4.1.6 RD1 (a) Conservation Lot Subdivision, as follows:

(a)(i) The lots must contain an contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist in accordance with the table below:

Contiguous area to be legally protected (hectares)	Maximum number of new Records of Title
Between 1ha and 2ha in area within the Hamilton Basin	4
Less than 2ha in all other areas	10

2ha to less than 5ha 2+

5ha or more to less than 10ha 3+

10ha or more 3

...

(vii) In cases where high class soils exist onsite, and exist within the parent title, all proposed lots...

AND

Add a new clause to Rule 22.4.1.6 RD1(a) Conservation Lot Subdivision as follows:

(viii) In cases where no high class soils exist onsite, or exist within the parent title, all proposed lots excluding the balance lot, there is no maximum lot size;

Decision Reasons:

- Current requirement for both contiguous areas of significance and the minimum lot area are too restrictive.
- These requirements provide no incentive for potential protection for future generations in cases where the current area is less than the minimums or segregated by some feature but still containing a Significant Natural Area.
- Council still maintain discretion for areas less than two hectares.
- By removing the requirements for the areas to be "contiguous", Council may find that proposals could be made to reinstate land between non-contiguous areas as part of possible future Significant Natural Areas.
- Where this rule is utilised, there should be different lot sizes for areas of land that do and do not contain high class soils.

Point Number

365.3

Summary of Decision Requested:

Consider introducing the ability to transfer development rights to other properties where an allotment is entirely covered by Significant Natural Area Overlay.

Decision Reasons:

- There are properties that are entirely covered by a Significant Natural Area overlay which makes subdivision a non-complying activity for splitting Significant Natural Areas through subdivision.

Decision Reasons:

- No reasons provided.

Point Number	367.17
Summary of Decision Requested:	Retain Chapter 13 Definition of "Maaori Sites of Significance."
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.18
Summary of Decision Requested:	Retain Chapter 13 Definition of "Marae Complex".
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.19
Summary of Decision Requested:	Add Koheroa Road as an Arterial Road to Transportation tables and figures 14.12.5.
Decision Reasons:	<ul style="list-style-type: none"> Koheroa Road was defined as a Collector Road in the Franklin District Plan in Part 9- Transportation, Para 9.4- Roading Hierarchy. Koheroa Road is well used by other activity organisers for day outings, main arterial for tourists, users of Mercer Airport and main access to Glass Road (used for Mercer School and Cemetery). Due to its significance and users, it needs to be incorporated in the Proposed District Plan. This is the major alternative road for detours as a result of accidents on State Highways 1 and 2.
Point Number	367.20
Summary of Decision Requested:	Amend Rule 16.1.2 P4 Permitted Activities, by increasing the number of non-permanent residents working for home occupations to 2x the number of bedrooms.
Decision Reasons:	<ul style="list-style-type: none"> Restrictions limits those running businesses from home as there are potentially more than 4 people working. Place a ratio of 2x number of bedrooms as long as ensuring sufficient car parking spaces available including toilet facilities will allow for greater growth for small businesses instead of leasing a small office/warehouse which increases overheads and extra costs.
Point Number	367.21
Summary of Decision Requested:	Amend Rule 16.1.2 P5 Permitted Activities, by increasing operating hours or allowing exemptions for temporary activities.
Decision Reasons:	<ul style="list-style-type: none"> Increasing/allowing exemptions to hours will allow events, e.g. weddings, to continue as they may run past 8.30pm.
Point Number	367.22
Summary of Decision Requested:	Amend Rule 16.1.2 P9 Permitted Activities, by increasing the homestay guests to 2x the number of bedrooms as long as there is sufficient and toilets.
Decision Reasons:	<ul style="list-style-type: none"> Place a ratio of 2x number of bedrooms as long as ensuring sufficient car parking spaces are available.
Point Number	367.23
Summary of Decision Requested:	Amend Rule 16.2.2 Servicing and hours of operation - Bankart Street and Wainui Road Business Overlay Area, to provide clarification that it relates to Raglan.
Decision Reasons:	<ul style="list-style-type: none"> Adds clarity.
Point Number	367.24
Summary of Decision Requested:	Amend Rule 16.2.6.2 Notable tree – Trimming, to provide clarification in terms of residents who have overhanging or growth of trees interfering with another residents notable tree.
Decision Reasons:	<ul style="list-style-type: none"> Are no rules/guidelines for residents around their rights and limitations for notable trees hanging/growth interfering with another resident's notable tree. Courses of action should be considered.
Point Number	367.25
Summary of Decision Requested:	Retain Rule 20.2.2 Landscape planting.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Point Number	367.26
Summary of Decision Requested:	Retain Rule 20.2.1 Servicing and hours of operation.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.27
Summary of Decision Requested:	Retain Rule 21.2.2 Landscape planting.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.28
Summary of Decision Requested:	Amend 22.8.2 P4(e) Permitted Activities, by reducing the length of operation time to an earlier time to be in line with other curfew times.
Decision Reasons:	<ul style="list-style-type: none"> Lakeside Te Kauwhata Precinct is a densely populated area thus consideration must be given to neighbours for the operating times of machinery, especially if it is marketed to families or retirees. 9pm is too late and impractical.
Point Number	367.29
Summary of Decision Requested:	Retain Rule 24.2.4.2 Earthworks for Maaori Sites and Maaori Areas of Significance
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.30
Summary of Decision Requested:	Add Mercer Airport as its own Appendix under Appendix I Acoustic Insulation.
Decision Reasons:	<ul style="list-style-type: none"> Mercer Airport is a fully operational business, including leisure activities and accommodation.
Point Number	367.31
Summary of Decision Requested:	Add Pukekohe Motorcycle Club, located in Mercer, to Appendix 12 Motorsport and Recreation.
Decision Reasons:	<ul style="list-style-type: none"> Such activities provide great opportunities to showcase small towns and what highly regarded, high class race tracks can be.
Point Number	367.32
Summary of Decision Requested:	Retain Section 1.4 Issues for Waikato District.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.33
Summary of Decision Requested:	Amend Section 1.5.4 Urban growth, to include Mercer Airport.
Decision Reasons:	<ul style="list-style-type: none"> Mercer airport is currently a tourist attraction used for skydiving and has backpackers accommodation. Currently undergoing construction to enlarge facilities and hangar availability.
Point Number	367.34
Summary of Decision Requested:	Retain Section 1.5.7.2 Landscape and natural character.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	367.35
Summary of Decision Requested:	Retain Section 1.5.7.8 Tourism.
Decision Reasons:	<ul style="list-style-type: none"> Supports as Mercer contributes to it.
Point Number	367.36

Summary of Decision Requested: Retain Section 1.7 Settlements Acts / Co-management/ Rivers – Vision and Strategies / Joint Management Agreement.

Decision Reasons:

- No reasons provided.

Point Number 367.37

Summary of Decision Requested: Retain Section 1.9 Statutory Context and Framework.

Decision Reasons:

- No reasons provided.

Point Number 367.38

Summary of Decision Requested: Retain Section 1.10.2.3 Waikato Region strategies and plans, particularly (iii) Regional Public Transport Plan 2015-2025, (iv) Regional Walking and Cycling Strategy 2009-2015 and (viii) Waikato Regional Pest Management Strategy 2014-2024.

Decision Reasons:

- No reasons provided.

Point Number 367.39

Summary of Decision Requested: Add Public Toilet Strategy to the list of Strategies and plans in Section 1.10 Integration of district plan with other plans and documents.

Decision Reasons:

- Mercer desperately needs public toilets.
- Will help council prioritise towns needing toilets and assign funding accordingly.

Point Number 367.40

Summary of Decision Requested: Retain Section 1.10.3.2 Local Government Act 2002, particularly in regard to working collaboratively with Tangata Whenua.

Decision Reasons:

- Support the need to work collaboratively with Tangata Whenua.

Point Number 367.41

Summary of Decision Requested: Add noise restrictions and guidelines to Section 1.12.5 Community well-being.

Decision Reasons:

- Plant trees in parks and reserves next to a main road/highway to dull/absorb noise.
- For events producing noise, have guidelines and hours of operations.

Point Number 367.42

Summary of Decision Requested: Retain Section 1.12.8(vi) Strategic objectives.

Decision Reasons:

- No reasons provided.

Point Number 367.43

Summary of Decision Requested: Retain Section 2.9 Examples of a Concept Management Plan.

Decision Reasons:

- An ideal example for Mercer Domain.

Point Number 367.44

Summary of Decision Requested: Retain Section 3.1 Indigenous Vegetation and Habitats.

Decision Reasons:

- No reasons provided.

Point Number 367.45

Summary of Decision Requested: Retain Section 3.2 Significant Natural Areas.

Decision Reasons:

- No reasons provided.

Point Number 367.46

Summary of Decision Requested: Retain Section 3.3 Outstanding Natural Features and Landscapes.

Decision Reasons:

- No reasons provided.

Point Number 367.47

Summary of Decision Requested: **Retain** Section 3.4 Significant Amenity Landscapes.

Decision Reasons:

- No reasons provided.

Point Number 367.48

Summary of Decision Requested: **Retain** Section 3.5 Natural Character.

Decision Reasons:

- No reasons provided.

Point Number 367.49

Summary of Decision Requested: **Retain** Section 4.1 Strategic Direction.

Decision Reasons:

- No reasons provided.

Point Number 367.50

Summary of Decision Requested: **Add** Meremere Dragway, located off SH1 to Appendix 12 Motorsport and Recreation.

Decision Reasons:

- Includes Jetsprints.
- Such activities provide great opportunities to showcase small towns and what highly regarded, high class race tracks can be.

Point Number 367.51

Summary of Decision Requested: **Add** the Kauri Tree located at 57 Koheroa Road, Mercer to Schedule 30.2 Notable Trees.

Decision Reasons:

- Has been identified by residents that the notable tree has not been recognised by the Proposed District Plan.

Point Number 367.52

Summary of Decision Requested: **Add** Te Paina Pa, Mercer Recreation Reserve, Riverbank Road, Mercer to Schedule 30.4 Maaori Areas of Significance.

Decision Reasons:

- Te Paina Pa is mentioned twice in Franklin District Plan, dated 11th February 2000 as follows:
Part 8 - Cultural Heritage, Schedule 8A: Historic Buildings, Structures, Trees and Areas, Group D: Areas.
D.19 Te Paina Pa Mercer Recreation Reserve, Riverbank Road, Mercer 7.7 03800/807.00
Appendices, Appendix 2 Inventory of Historic Buildings, Structures, Trees and Areas, Group D: Areas.
ITEM D.19 Name: Te Paina Paa
Type: Historic Area - Te Paina Paa
Location: Mercer Recreation Reserve, Riverbank Road, Mercer
Valuation Number: 03800 / 807.00
Legal Description: Pt Allot 280 Parish of Koheroa Parcel ID 6691146
Description: Historic Paa site managed by Department of Conservation

Point Number 367.53

Summary of Decision Requested: **Add** Mercer Cemetery to Section E Designations, M Waikato District Council.

Decision Reasons:

- All other cemeteries have been added that are around the district.

Point Number 367.54

Summary of Decision Requested: **Add** Mercer Reserve/Domain to Section E Designations, M Waikato District Council.

Decision Reasons:

- Addition of other reserves/domains have been made that are around the district.
- With request for addition of Te Paina Paa to Mercer Recreational Reserve, the reserve needs to be captured as well.

Point Number 367.55

Summary of Decision Requested: Add Waste Water treatment plant in Mercer Township to Section E Designations, M Waikato District Council.

Decision Reasons:

- The addition of other wastewater treatment plants have been added that are around the district.

Submitter Number: 368 **Submitter:** Ian McAlley

Point Number 368.1

Summary of Decision Requested: Amend the Proposed District Plan to ensure direction related to maximising the potential of the urban/residential land resource is maintained.

Decision Reasons:

- Maximising the potential of the urban land resource must extend beyond just limiting rural residential development and the use of rural land for residential/non rural purposes.
- By more efficiently developing the existing urban land resource enables economies of scale to be exercised to improve the affordability of land on a per section basis.
- Underutilising urban zoned land is a poor use of a physical resource
- It must include ensuring that residential land is developed in the most efficient manner possible to ensure that development costs are kept to a minimum and ongoing infrastructure costs are also minimised.
- Need to ensure the design and development of subdivisions enables future built development is cost effective and improves affordability.

Point Number 368.2

Summary of Decision Requested: Amend the Proposed District Plan to maintain the commitment to the Future Proof Outcomes, in particular the desire to achieve a more compact and concentrated urban form over time.

Decision Reasons:

- Delivery of quality urban environments is a relationship between the design of those environments and the ability to efficiently (in both time and cost) to deliver those outcomes.
- The type and density of development enabled is important to ensure that over time a development pattern evolves that will accommodate changes to composition of population and growth, balance growth inside and outside the existing urban area, provide for shifts in housing preferences, including location and typology, recognise constraints in key bulk infrastructure delivery and funding availability and recognise and provide for changes in strategic direction and/or priorities.

Point Number 368.3

Summary of Decision Requested: Amend Section 3.3 Outstanding Natural Features and Landscapes, to ensure that limitations on development only apply to Outstanding Natural Features and Landscapes that are specifically identified in the District Plan.

Decision Reasons:

- Policy 3.3.3 refers to 'features' without a capital 'F'. If there are to be limitations with respect to Outstanding Natural Features these must only be with regard to those 'Features' specifically identified in the District Plan.
- Unclear referencing of Outstanding Natural Features and Landscapes creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Clarity is required to ensure that relevant objectives and policies of the District Plan can be administered with both efficiency and certainty.

Point Number 368.4

Summary of Decision Requested: Amend Objective 3.4.1(a) Significant Amenity Landscapes, to clearly identify that the objective only relates to specifically identified Significant Amenity Landscapes.

Decision Reasons:

- Unclear referencing of Significant Amenity Landscapes creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Certainty is required to enable appropriate planning to occur, both for Council and for private landowners.
- Clarity is required to ensure that relevant objectives and policies of the District Plan can be administered with both efficiency and certainty.

Point Number 368.5

Summary of Decision Requested: Amend Section 3.5 Natural Character, to ensure that any limitations to development are only for those areas specifically identified in the District Plan as having High and Outstanding Natural Character.

Decision Reasons:

- Unclear referencing of Natural Character creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Certainty is required to enable appropriate planning to occur, both for Council and for private landowners.
- Clarity is required to ensure that relevant objectives and policies of the District Plan can be administered with both efficiency and certainty.

Point Number 368.6

Summary of Decision Requested: Amend Policy 4.1.9(a) maintaining Landscape Characteristics, to recognise that subdivision and development processes on land zoned for a particular purpose will change the shape, contour and landscape characteristics of this land.

Decision Reasons:

- Policy 4.1.9(a) needs to be amended to recognise that subdivision and development processes on land zoned for a particular purpose will change the shape, contour and landscape characteristics of this land and to 'maintain' these characteristics may not be possible when integrating the engineering requirements of the development such as roading and/or development platforms.
- Where land is not protected for its landscape or natural character attributes, it must be available for development in a manner that is efficient and achieves the desired urban form outcome.
- The term "fundamental" is subjective and open to wide interpretation.

Point Number 368.7

Summary of Decision Requested: **Amend** Objective 4.2.14 – Earthworks, to read as follows:
Earthworks facilitate efficient subdivision, use and development.

Decision Reasons:

- Every effort should be made to integrate the significant majority of the earthworks required for the development of individual house lots with the overall bulk subdivision earthworks. This significantly reduces the requirement for secondary earthworks and reduces both on-site and off-site effects related to erosion, sediment, dust and noise from machinery.
- Designing and undertaking of earthworks as a 'cut to fill balance' significantly limits on-site and/or off-site movement of material
- Earthworks, amendments proposed to recognise the focus of earthworks must be to enable the overall efficient development of the subdivision, as earthworks can be a significant component of the works. Furthermore the earthworks profile is often dictated by the engineering requirements of providing roads and services at appropriate gradients, in turn able to provide efficient and safe connection to individual lots.

Point Number 368.8

Summary of Decision Requested: **Amend** Policy 4.2.15(a)(iv) - Earthworks, to read as follows:
The importation and exportation of cleanfill is avoided in the Residential Zone.

Decision Reasons:

- Every effort should be made to integrate the significant majority of the earthworks required for the development of individual house lots with the overall bulk subdivision earthworks. This significantly reduces the requirement for secondary earthworks and reduces both on-site and off-site effects related to erosion, sediment, dust and noise from machinery.
- The amendment proposed is to promote a 'cut to fill balance' in earthworks design in order to reduce the earthworks period and avoid off site effects from earthworks resulting from the importation or exportation on or off a site of large volumes of material. The exception is the removal of unsuitable material, contaminated material or excess topsoil from development sites.
- Designing and undertaking of earthworks as a 'cut to fill balance' significantly limits on-site and/or off-site movement of material

Point Number 368.9

Summary of Decision Requested: **Delete** Policy 4.2.15(d) - Earthworks.

Decision Reasons:

- If land has been zoned for residential purposes than the shape, contour and landscape characteristics of the land will change, because it will be converted from open land, likely in horticultural or pastoral use, to urban development. Unless the land is specifically identified and protected for its landscape and/or character attributes the most important outcome is the efficient development of the land to achieve the use it is zoned for. Creating an attractive development will be a product of the design and construction of the subdivision, not the retention of existing land-form. Issues related to the change in the appearance of the land need to have been addressed at the time the zone was changed.

Point Number 368.10

Summary of Decision Requested: **Retain** Objective 4.2.16 Housing Options and
AND
Retain Policy 4.2.17 Housing Types
AND
Retain Policy 4.2.18 Multi-Unit Development
AND
Amend rules to ensure the directions in the objectives and policies and the associated rules align.

Decision Reasons:

- The diversity of housing sought will not enabled if rules do not enable flexibility in lot enable flexibility in lot and dwelling size and dwelling type within a development, particularly a large scale development where variation enables a cross section of the community to all be provided for.

Point Number 368.11

Summary of Decision Requested: **Delete** Policy 4.2.2 Character
OR
Amend the Proposed District Plan to identify the view points from public spaces and extent of views to be retained.

Decision Reasons:

- Character is vague as to its application, to require roads to follow natural contours could potentially be contradictory to the applicable engineering standards and therefore limit the safety and/or multi modal transport efficiency of a development. Further, requiring the promotion of views and vistas from public spaces to the hinterland beyond is uncertain unless the view points have been identified in the District Plan and the extent of views to be retained is also identified. Unless this certainty can be provided these Policies should be deleted.

Point Number 368.12

Summary of Decision Requested: **Amend** Objective 4.7.1 Subdivision and land use integration, to read as follows:
Subdivision layout and design facilitates the land use outcomes sought for the residential, business, industrial, reserve and specific purpose zones, ensuring development occurs in the most efficient means possible to achieve the defined purpose of the zone.

Decision Reasons:

- Objective 4.7.1 'Subdivision and Land Use Integration' should be amended to recognise that where land has been zoned for a particular purpose efficient and effective development of land for that purpose is the focus of the process after the land has been rezoned.

Point Number 368.13

Summary of Decision Requested: Delete Policy 4.7.2 (a)(i) Subdivision location and design.

Decision Reasons:

- Policy 4.7.2 (a)(i) should be deleted, consideration of these matters should have occurred at the time the land was being zoned.

Point Number 368.14

Summary of Decision Requested: Add to Policy 6.5.2 – Construction and operation of the land transport network the following:

(ix) Recognition that any adverse effects of the development of an integrated and effective land transport network can often be mitigated in a short term time-frame in comparison to the lifetime of the infrastructure

Decision Reasons:

- Provision of adequate and appropriate infrastructure is critical to land development. Infrastructure has particular design characteristics that are required to be adhered to and poor infrastructure provision will lead to medium to long term costs that are borne by the community either through lack of efficiency in terms of price paid per household unit, or greater than anticipated operational and maintenance costs. The design life of infrastructure is normally measured in the tens of years, therefore there is adequate scope for mitigation measures to be applied that enable adequate and appropriate infrastructure to be provided and for effects on landscape, character or ecological values to be remedied and/or mitigated and to enable social, economic, community and health and safety benefits to be enabled.

Point Number 368.15

Summary of Decision Requested: Amend Section 8.2, to clearly state it relates to existing Reserves.

Decision Reasons:

- Unclear referencing of outstanding natural landscapes, outstanding natural features, natural character areas and significant natural areas creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Certainty is required to enable appropriate planning to occur, both for Council and for private landowners/developers to ensure that relevant objectives and policies of the District Plan can be administered with both efficiency and certainty.

Point Number 368.16

Summary of Decision Requested: Amend Policy 8.2.2 - Natural Values, to relate to outstanding natural landscapes, outstanding natural features, natural character areas and significant natural areas that are identified on the District Plan Maps.

Decision Reasons:

- Unclear referencing of outstanding natural landscapes, outstanding natural features, natural character areas and significant natural areas creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Certainty is required to enable appropriate planning to occur, both for Council and for private landowners/developers to ensure that relevant objectives and policies of the District
- Consideration needs to be restricted to those identified items only.

Point Number 368.17

Summary of Decision Requested: Amend Rule 14.12.1. 1(6)(1)(f), to delete specific requirements for development within the Te Kauwhata Structure Plan area.

Decision Reasons:

- This area has not been defined in the Proposed Plan. In particular the existing site gradients have been found to be too steep for road side swales to be provided without scour occurring.
- Unclear referencing to other documents not notified with the Proposed Plan creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Certainty is required to enable appropriate planning to occur, both for Council and for private landowners/developers to ensure that the relevant requirements of the District Plan can be administered with both efficiency and certainty.

Point Number 368.18

Summary of Decision Requested: Delete figures 14.12.5.19, 14.12.5.20 and 14.12.5.21 from the Proposed District Plan.

Decision Reasons:

- The Te Kauwhata Structure Plan area has not been defined on the planning maps therefore it is uncertain as to the applicability of these cross section requirements. Instead the standard engineering provisions should apply.
- Unclear referencing to other documents or areas not notified with the Proposed Plan creates uncertainty in terms of being able to effectively assess the issues associated with a particular project. Certainty is required to enable appropriate planning to occur, both for Council and for private landowners/developers to ensure that the relevant requirements of the District Plan can be administered with both efficiency and certainty

Point Number 368.19

Summary of Decision Requested: Add Show homes as a permitted activity in the Residential Zone

AND

Add a carpark requirement for show homes over and above that which applies to a standard residential dwelling such that two additional car park spaces be provided

AND

Add controls on signage for show homes in keeping with Rule 16.2.7.1 Signs permitted activity for real estate signs.

Decision Reasons:

- Show homes are residential in character and in a residential subdivision a show home will be on-sold as a residential dwelling once the subdivision sales are completed (if not before).
- So long as additional car parking is provided for staff and customers, with signage controlled to an appropriate level there appears to be no reason that show homes should require specific land use consent.

Point Number 368.20

Summary of Decision Requested: Retain Rule 16.1.3 Restricted Discretionary Activities, as notified

AND

Add rules for multi unit development to enable it in all residential areas of the District where connection is available, or will be available to reticulated services.

Decision Reasons:

- The active provision of multi unit development assists in enabling different development densities, assists in providing a variety of housing types and achieving the required densities of development as per the Waikato Regional Policy Statement.

Point Number

368.21

Summary of Decision Requested:

Amend Rule 16.2.4.1 Earthworks, to enable the assessment of bulk earthworks as part of a subdivision to be assessed as permitted activity where consent has been received from the Waikato Regional Council for those earthworks.

Decision Reasons:

- Earthworks need to be accepted as part of the land development process.
- Large scale earthworks are undertaken by experienced contractors under the control of the Waikato Regional Council with appropriate monitoring and enforcement.
- For the District Council to double up on earthworks control when the Regional Council is already actively managing this process is not a good use of time and resource and such inefficiencies should be avoided.

Point Number

368.22

Summary of Decision Requested:

Delete Rule 16.2.4.1 NCI- Earthworks - General, the assessment of the importation of cleanfill to a site as a non-complying activity.

Decision Reasons:

- Assessment of the importation of cleanfill to a site as a non-complying activity is overly onerous as this maybe required to bring appropriate material onto a site where such material is required to meet engineering requirements.

Point Number

368.23

Summary of Decision Requested:

Amend Rule 16.2.4.1, to only require assessment of amenity and landscape effects related to earthworks where the earthworks are occurring in an area clearly defined in the Plan as being protected for its landscape and/or natural character values.

Decision Reasons:

- Assessment of amenity and landscape effects of earthworks should only occur where the earthworks are occurring in an area that is clearly defined as being protected for its landscape and/or natural character values.

Point Number

368.24

Summary of Decision Requested:

Amend Rule 16.3.4.P2 Fences or Walls - Road boundaries and reserve Zone boundaries, to read as follows:

Any Fences or walls between the erected within the applicable building setbacks under Rule 16.3.9 on a site and along on the northern common boundary of the Residential Zone between Wayside Road and Travers Road, Te Kauwhata, adjacent to the and Country Living Zones between Wayside Road and Travers Road, Te Kauwhata must be of a rural-type post and wire or post and rail construction.

Decision Reasons:

- The amended rule makes it clear that the requirement for a rural-type post and wire or post and rail fence is only required on the zone boundary between the Country Living and the Residential Zones.

Point Number

368.25

Summary of Decision Requested:

Amend Rule 16.3.5 Daylight Admission, to enable the height control plane to be measured from the top of a retaining wall where that retaining wall was included in the design of the subdivision and constructed as part of the subdivision prior to individual houses being built.

Decision Reasons:

- If retaining walls have been developed at the time of subdivision then prospective purchasers can see the completed building platforms and therefore can ascertain that a dwelling will be located on top of the wall. As such measuring the height control plane from the site boundary that could be at the bottom of the wall is overly restrictive and potentially leads to unnecessary land use consents being required.

Point Number

368.26

Summary of Decision Requested:

Amend Rule 16.3.6 P2 Building Coverage, to make the building coverage allowance in the Te Kauwhata Residential West Area the same as the Residential Zone 40%.

Decision Reasons:

- The Proposed Plan does not identify why the building coverage allowance in the Te Kauwhata Residential West Area should be any less than the rest of the Residential Zone. Reducing the permitted building coverage in the Te Kauwhata Residential West Area will lead to less efficient use of the land resource.

Point Number

368.27

Summary of Decision Requested:

Amend Rule 16.4.1(a)(4) Subdivision - General, to enable 25% of lots to be rear lots.

Decision Reasons:

- The amendment to Rule 16.4.1(a)(4) is proposed to enable more efficient and flexible subdivision design. As all subdivision is a restricted discretionary activity Council has the ability to have input into the subdivision design in the assessment process.

Point Number

368.28

Summary of Decision Requested:

Amend Rule 16.4.1 (b) Subdivision - General, to ensure it only relates to structure plans or master plans notified within the Proposed Plan.

Decision Reasons:

- The amendment to Rule 16.4.1(b)(ix) is proposed as referencing other documents such as structure plans or master plans not notified with the Proposed Plan creates uncertainty in terms of being able to effectively assess the issues associated with a particular project.
- Certainty is required to enable appropriate planning to occur, both for Council and for private landowners/developers to ensure that the relevant requirements of the District Plan can be administered with both efficiency and certainty.
- Not being able to submit on these other documents takes away the ability to assess the compatibility of the documents with the proposed rules and/or assessment criteria and vice versa.

Point Number 368.29

Summary of Decision Requested: **Delete** Rule 16.4.3 Subdivision - Te Kauwhata West Residential Area
AND

Amend the Proposed District Plan to apply the standard residential subdivision provisions to this area.

Decision Reasons:

- Where land has been zoned for residential development, the applicable rules should promote the efficient development of that land for that purpose. Efficiently developing residential zoned land for housing limits the potential that urban development will spread into surrounding rural areas.
- The Te Kauwhata West Residential Area proposed minimum and average lot size will not achieve the required outcomes defined for residential density under the Waikato Regional Policy Statement. As such the Proposed Plan will not be giving effect to the Regional Policy Statement, therefore the standard Residential Zone provisions are more appropriate.
- Policy 4.7.13 – Residential Zone – Te Kauwhata Ecological and West Residential Areas (b) only requires that 'Subdivision is designed and located in the Te Kauwhata West Residential Area to achieve the minimum lot size ...' therefore the proposed average lot size, being significantly larger than the minimum is not supported by the applicable policy.
- Notwithstanding, the outcomes identified in Future Proof and incorporated into the Waikato Regional Policy Statement of achieving a minimum residential density of 12-15 households per hectare in the Residential Zone, must be achieved in order to enable growth across the Region to be adequately managed and provided for. All other rules related to development must be aligned to this required outcome, thereby making development efficient in both the short and the long term. The minimum lot size of 650m² in the Te Kauwhata West Residential Area will not achieve the 12-15 households per hectare required under the Waikato Regional Policy Statement.

Point Number 368.30

Summary of Decision Requested: **Retain** Rule 16.4.4 A Multi-Unit development, except for the amendments sought below
AND

Amend rules for multi unit development to enable them in all residential areas of the District where connection is available, or will be available to reticulated services.

Decision Reasons:

- The active provision of multi unit development assists in enabling different development densities, assists in providing a variety of housing types and assists in achieving the required densities of development as per the Waikato Regional Policy Statement.

Point Number 368.31

Summary of Decision Requested: **Amend** the reference in Rule 16.4.4(b)(viii) Multi Unit development, to structure and master planning to clarify that it only refers to structure or master plans that are contained within the notified version of the Proposed Plan.

Decision Reasons:

- Reference in Rule 16.4.4(b)(viii) to structure and master planning needs to be amended to clarify that it only refers to structure or master plans that are contained within the notified version of the Proposed Plan, otherwise new provisions within the Proposed Plan could be referring to documents outside of the Plan that submitters have not had the chance to consider and submit on.

Point Number 368.32

Summary of Decision Requested: **Amend** Rule 16.4.13 Subdivision creating reserves, and the associated matters that Council has restricted its discretion to with regard to structure and master planning to clarify that these references only relate to structure or master plans that are contained within the notified version of the Proposed Plan.

Decision Reasons:

- Reference in Rule 16.4.13 to structure and master planning needs to be amended to clarify that it only refers to structure or master plans that are contained within the notified version of the Proposed Plan, otherwise new provisions within the Proposed Plan could be referring to documents outside of the Plan that submitters have not had the chance to consider and submit on.

Point Number 368.33

Summary of Decision Requested: **Amend** Section 3 of Appendix 3.1 Residential Subdivision Guidelines, to limit the consideration of the "site and contextual analysis" to how the subdivision/development will integrate with the immediately surrounding existing and/or proposed development.

Decision Reasons:

- Some of the matters proposed for assessment under section 3.3 "Landform and Vegetation" are more appropriately assessed at the time a zoning change is undertaken rather than in reaction to an individual development.
- Where land has been zoned for residential development the Plan and assessment process must promote the efficient development of that land for that purpose. Efficiently developing residential zoned land for housing limits the potential that urban development will spread into surrounding rural areas. Assessment by way of subjective elements not clearly defined in the Plan leads to uncertainty, delays and increased costs.
- Where landform elements are clearly assessed and defined and included in the Plan at the time (re)zoning takes place ensures that development can be appropriately undertaken across whole settlements, rather than being assessed on an ad-hoc, site by site basis. Also, where development is occurring within an environment set aside for larger scale change than the individual development being assessed, the larger scale change (the future state) must be considered. This ensures the context the proposal is assessed within is the end result, incorporating the change as enabled by the rezoning that has occurred. Use of subjective assessment methods can lead to re-litigation by way of assessment of outcomes considered to already be enabled by way of the underlying zoning. Such uncertain and potentially protracted assessment processes are counterproductive to development occurring efficiently where such assessment should have occurred at the time a piece of land was considered for rezoning for more intensive, or alternative forms of development.

Point Number 368.34

Summary of Decision Requested: **Amend** the Zoning of the property at 24 Wayside Road Te Kauwhata from Te Kauwhata West Residential Zone to Residential Zone.

Decision Reasons:

- The Te Kauwhata West Residential Area proposed minimum and average lot size will not achieve the applicable outcomes sought in terms of residential density under the Waikato Regional Policy Statement, as such the Proposed Plan will not give effect to the Regional Policy Statement, therefore the standard Residential Zone is more applicable as a means to achieve these higher order outcomes.

- The residential zoning provisions as notified will not achieve 12-15 households per hectare. Provisions that achieve a density less than the Future Proof/Waikato Regional Policy Statement outcomes will result in the Future Proof outcomes not being achieved. In particular in Te Kawhata there is ability to provide for growth in areas zoned for development other than Lakeside.
- There is potential that the outcomes of the 'Corridor Plan' being developed, which are understood to be considering enabling greater growth capacity on the Auckland/Hamilton Corridor, linked to transport initiatives, could seek even greater development capacity be provided for than envisaged under Future Proof and therefore the zoning applied must enable residential growth and be broad enough to accommodate such future change, given that the Plan is looking at a 25+ year horizon with a 30%+ variance in household numbers in the period.
- The Residential Zone as opposed to the Te Kawhata West Residential Zone will enable greater flexibility in the design and development of the site to accommodate future growth and changes in average household size.

Point Number 368.35

Summary of Decision Requested: Retain the extent of reserve proposed near 24 Wayside Road, Te Kawhata.

Decision Reasons:

- The reserve size as shown is considered to be appropriate (subject to final design) for the location and the type of development proposed.

Point Number 368.36

Summary of Decision Requested: Delete the Walkway/Cycleway on the Planning Maps located on near 24 Wayside Road, Te Kawhata.

Decision Reasons:

- The walkway/cycleway shown should be deleted as there is no apparent connection to the indicative roading pattern within 24 Wayside Road.

Point Number 368.37

Summary of Decision Requested: Retain the indicative roading pattern, for 24 Wayside Road, Te Kawhata

AND

Delete the proposed connection shown to 62 D Wayside Road (CTSA62B/833).

Decision Reasons:

- The indicative roading pattern will enable appropriate servicing of the site with connection to the surrounding established and proposed roading pattern.
- A connection to 62 D Wayside Road is not considered necessary as a segregation strip has been applied to the common boundary between 24 Wayside Road and the adjoining land zoned Country Living.

Point Number 368.38

Summary of Decision Requested: Amend the Objectives and Policies to promote the efficient development of Residential Zoned land for that purpose.

Decision Reasons:

- Efficiently developing residentially zoned land for housing limits the potential that urban development will spread into surrounding rural areas.

Point Number 368.39

Summary of Decision Requested: Delete Policy 4.7.2 (a)(iii) Subdivision location and design.

Decision Reasons:

- Policy 4.7.2 (a)(iii) should be deleted, "view sharing" appears to be an undefined term and therefore is difficult to provide for it.

Point Number 368.40

Summary of Decision Requested: Delete Policy 4.7.2 (a)(vii) Subdivision location and design.

Decision Reasons:

- Policy 4.7.2 (a)(vii) should be deleted, promotion of a grid layout is a design nicety which does not suit all sites because of shape and/or topography and/or existing road connections. Also some of the indicative roading layouts contained in the Proposed Plan are not shown in a grid pattern, therefore there is incongruence within the Proposed Plan.

Point Number 368.41

Summary of Decision Requested: Amend Policy 4.7.13 (b) Residential zone Te Kawhata Ecological and West Residential Areas, as follows:

~~(b) Subdivision is designed and located in the Te Kawhata West Residential Area to achieve the minimum lot size, and recognise the views of natural features and landscapes.~~

OR

Delete Policy 4.7.13 - Residential Zone - Te Kawhata Ecological and West Residential Areas and rely on the standard Residential Zone provisions.

Decision Reasons:

- Achieving the minimum lot size will still not achieve the applicable outcomes sought in terms of residential density under the Waikato Regional Policy Statement and therefore the standard Residential Zone provisions are more applicable. The recognition of "the views of natural features and landscapes" is a vague concept open to too much subjective interpretation to be applicable and therefore should be deleted from the Policy.
- The Te Kawhata West Residential Area proposed minimum and average lot size will not achieve the applicable outcomes sought in terms of residential density under the Waikato Regional Policy Statement. As such the Proposed Plan will not be giving effect to the Regional Policy Statement, therefore the standard Residential Zone provisions are more applicable.
- Policy 4.7.13 – Residential Zone – Te Kawhata Ecological and West Residential Areas (b) only requires that "Subdivision is designed and located in the Te Kawhata West Residential Area to achieve the minimum lot size ..." therefore the proposed average lot size, being significantly larger than the minimum is not supported by the applicable policy.

Point Number 368.42

Summary of Decision Requested: Amend Policy 4.7.14 Structure and Master Planning to clarify that it only refers to structure or master plans that are contained within the notified version of the Proposed Plan.

Decision Reasons:

- Policy 4.7.14 – Structure and master planning needs to be amended to clarify that it only refers to structure or master plans that are contained within the notified version of the Proposed Plan, otherwise new provisions within the Proposed Plan could be referring to documents outside of the Plan that submitters have not had the chance to consider and submit on.

Point Number 368.43

Summary of Decision Requested: Retain Chapter 6.4 - Objectives and Policies, as notified.

Decision Reasons:

- Provision of adequate and appropriate infrastructure is critical to land development. Infrastructure has particular design characteristics that are required to be adhered to and poor infrastructure provision will lead to medium to long term costs that are borne by the community either through lack of efficiency in terms of price paid per household unit, or greater than anticipated operational and maintenance costs.

Submitter Number: 369 **Submitter:** Linnet Watson

On behalf of: S W Ranby

Point Number 369.1

Summary of Decision Requested: No specific decision sought, but submission opposes Chapter 9.2 Te Kowhai Airpark.

Decision Reasons:

- The range of activities proposed within Precincts A and B of Te Kowhai Airpark will facilitate an increase in aircraft movements (projected to be in the vicinity of 57 aircraft movements per day, or 21,000 per annum).
- Aircraft arrivals and departures are not subject to District Plan Rules, and are therefore noted as being outside the scope of the Acoustic Assessment, which focuses on the noise from taxiing aircraft and other on-site activities. If increased aircraft movements are facilitated or supported by the Objectives and Policies of the Plan then there will be an increase in the frequency that neighbouring properties experience the noise of arrivals and departures. This has not been adequately considered in terms of the adverse effect on neighbouring properties, and is an effect that is impossible for the Airpark to internalise.
- The Summary Assessment of Environmental Effects for the Section 32 Report for Te Kowhai Airpark Zone compares future aircraft movements with earlier data of aircraft movements experienced in the early 2000's, however the Section 32 Report also acknowledges that the Operative District Plan (ODP) contains no objectives, rules, or other methods that are specifically applicable to airparks and that aircraft movements are currently unrestricted by the ODP (being controlled only by the existing air noise boundary). The inability of the Operative District Plan to manage air traffic using the Te Kowhai runway is being used as justification of the current proposal, when the noise effects of air traffic and the impact on amenity values in this area have not been fully considered.
- Proposed Policy 9.2.1.6 refers to airspace protection via an Increased Obstacle Limitation Surface (OLS). This would introduce a new height restriction on the Ranby property that is lower than the current permitted height in the Rural zone, including restrictions on vegetation / tree height that will result in obligations that do not currently exist, and resultant financial obligations on property owners within the OLS. In terms of buildings, the OLS intrudes 78.5m into the Ranby property before the District Plan height limit of 10m matches the restrictions of the OLS.
- The objectives and policies seem strongly aimed at supporting the social, economic and cultural wellbeing of the aviation sector without considering the short and long term effects outside the Airpark.

Point Number 369.2

Summary of Decision Requested: No specific decision sought, but submission opposes Chapter 27 Te Kowhai Airpark.

Decision Reasons:

- The range of activities proposed within Precincts A and B of Te Kowhai Airpark will facilitate an increase in aircraft movements (projected to be in the vicinity of 57 aircraft movements per day, or 21,000 per annum).
- Aircraft arrivals and departures are not subject to District Plan Rules, and are therefore noted as being outside the scope of the Acoustic Assessment, which focuses on the noise from taxiing aircraft and other on-site activities. If increased aircraft movements are facilitated or supported by the Objectives and Policies of the Plan then there will be an increase in the frequency that neighbouring properties experience the noise of arrivals and departures. This has not been adequately considered in terms of the adverse effect on neighbouring properties, and is an effect that is impossible for the Airpark to internalise.
- The Summary Assessment of Environmental Effects for the Section 32 Report for Te Kowhai Airpark Zone compares future aircraft movements with earlier data of aircraft movements experienced in the early 2000's, however the Section 32 Report also acknowledges that the Operative District Plan (ODP) contains no objectives, rules, or other methods that are specifically applicable to airparks and that aircraft movements are currently unrestricted by the ODP (being controlled only by the existing air noise boundary). The inability of the Operative District Plan to manage air traffic using the Te Kowhai runway is being used as justification of the current proposal, when the noise effects of air traffic and the impact on amenity values in this area have not been fully considered.
- Proposed Policy 9.2.1.6 refers to airspace protection via an Increased Obstacle Limitation Surface (OLS). This would introduce a new height restriction on the Ranby property that is lower than the current permitted height in the Rural zone, including restrictions on vegetation / tree height that will result in obligations that do not currently exist, and resultant financial obligations on property owners within the OLS. In terms of buildings, the OLS intrudes 78.5m into the Ranby property before the District Plan height limit of 10m matches the restrictions of the OLS.
- The objectives and policies seem strongly aimed at supporting the social, economic and cultural wellbeing of the aviation sector without considering the short and long term effects outside the Airpark.
- The land use activities provided for a range of activities that are not adequately controlled by the proposed rules.
- Aircraft arrivals and departures are already clearly heard from the existing residential dwelling on the Ranby property. Rule 27.1 serves to exacerbate that effect by allowing general aviation as an unfettered permitted activity, with no limits on aircraft numbers, and therefore no restriction on the noise emitted from aircraft arrival and departure, i.e. noise from overhead aircraft outside of the Airpark.
- The Acoustic Report notes that there is potential for a twin engine aircraft and/or small jets to be domiciled at Te Kowhai Airpark, and that if that was proposed, it should be specifically assessed. However the Proposed District Plan contains no rules that limit the type of aircraft that can use the Airpark, with 'General Aviation' being a permitted activity in Precincts A and B.
- Residential subdivision is proposed to be provided for as a restricted discretionary activity in Precincts B - D and residential development as a permitted activity in Precincts C and D upon high class soils (New Zealand Land Resource Inventory Land Use Capability Unit 2w2), which is at odds with other strategies for the District.

Point Number 369.3

Summary of Decision Requested: Delete Appendix 9 Te Kowhai Airfield Precincts Zoning.

Decision Reasons:

- The proposed Specific Zoning introduces new restrictions on private property in the form of an extended Obstacle Limitation Surface in the vicinity of the proposed Airpark while facilitating unlimited commercial and recreational aviation, which will result in adverse noise

- effects.
- The extended Obstacle Limitation Surface will allow aircraft to fly lower over affected properties, which will exacerbate adverse noise effects.

Point Number 369.4

Summary of Decision Requested: Amend Map 26.2 Te Kowhai, to change zoning from Te Kowhai Airpark Zone to Rural Zone.

Decision Reasons:

- Activities enabled by the proposed zoning are considered inappropriate for the area with insufficient regard for off-site effects. The position of the proposed Te Kowhai Airpark is inappropriate given its proximity to Te Kowhai village and its position on high class soils.
- Introducing an intensive commercial and residential activity in this area will degrade the amenity values of Te Kowhai village.
- Commercial aviation should be operated at Hamilton Airport.

Submitter Number: 370 **Submitter:** Catherine Shaw

Point Number 370.1

Summary of Decision Requested: No specific decision sought, but submission opposes any increase in setbacks required from the First Gas pipeline on Te Kowhai Road, Hamilton.

Decision Reasons:

- First Gas has informed the submitter that they are proposing to have the gas pipeline building set back changed from 6 mtrs to 'no less than 20 mtrs'.
- The submitter has two gas lines crossing their land and they already take up a large area.
- The submitter is not happy about the proposed changes.
- With a 20 mtr building set back the area within the set backs would be approximately 7,400 sq mtrs over two paddocks on the western boundary.
- The existing set back already prevents any building on the western boundary of the land but adding an extra 14 mtrs to the existing 6 mtr set back on the eastern side of the pipeline would have an unfavorable impact when the land is subdivided.
- The submitter understands what the gas company is trying to do but this proposal would have a negative financial impact on the submitter in the future and it doesn't seem right that a gas company could have more right to the land than what the owner does.
- The submitter knows the gas easement was on the property when it was purchased, but First Gas are wanting to make significant changes without consulting the legal owners of the land.

Submitter Number: 371 **Submitter:** Kitty Burton

Point Number 371.1

Summary of Decision Requested: Amend the zoning of the properties adjacent to the Matangi village, as identified in the Community Plan 2013 (see Community Plan attached to submission) from Rural Zone to Village Zone.

Decision Reasons:

- Rezoning will reflect growth of interest in living in village setting, provide diversity of living options, provide housing options to locally employed, reduce conversion of productive land to land hungry, low population density expensive subdivisions disconnected from any local community centre.
- See submission for full rationale.

Point Number 371.2

Summary of Decision Requested: Amend the Proposed District Plan to include a Council-driven structure plan for Matangi.

Decision Reasons:

- This is an opportunity for council to get on the front foot and take an optimistic growth focused step into the future.
- This is a key weakness to be resolved from the previous District Plan version.

Point Number 371.3

Summary of Decision Requested: Request that Matangi reticulated infrastructure issues are resolved or investigated further by council.

Decision Reasons:

Point Number 371.4

Summary of Decision Requested: Add a new restricted discretionary rule (RD1 (c)) for reticulated service lots of 1000m2 for Matangi within the Village Zone.

Decision Reasons:

Point Number 371.5

Summary of Decision Requested: Add within the Village Zone overlay in Matangi, the provision of reticulated infrastructure, footpaths, cycleways, other healthy exercise options and public transport links in Matangi.

Decision Reasons:

Point Number 371.6

Summary of Decision Requested: Retain the existing rail corridor in Matangi.

Decision Reasons:

Point Number	371.7
Summary of Decision Requested:	Add a density target of 8-10 households per hectare for Greenfield development in serviced Waikato District rural Villages and specifically Matangi.
Decision Reasons:	
Point Number	371.8
Summary of Decision Requested:	Amend the Proposed District Plan to reconsider the intent of Matangi and the indicative village limits.
Decision Reasons:	
Point Number	371.9
Summary of Decision Requested:	Amend the zoning of the ex-Matangi Dairy Factory to incorporate the intent of the Mowbray Group's submission.
Decision Reasons:	

Submitter Number:	372	Submitter:	Steve van Kampen
Organisation:	Auckland Council		
Point Number	372.1		
Summary of Decision Requested:	No specific decision sought, but submission seeks clarification over the exclusion of Chapter 11 from the Proposed Waikato District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> The submission queries the value and process for a 'stage 2' plan change and how/when it will be included into the plan. The submission questions what impact a stage 2 plan change will have on provisions included in the proposed plan, particularly those relating to the implications of climate change such as developable areas, floor levels and restrictions on coastal development. 		
Point Number	372.2		
Summary of Decision Requested:	Amend the title to Section 1.5 to read as follows: <i>1.5 What does this mean for Waikato District strategic objectives and directions?</i>		
Decision Reasons:	<ul style="list-style-type: none"> Proposed amendments will explicitly identify that the matters listed in section 1.5 are the district strategic objectives and directions of the Plan. 		
Point Number	372.3		
Summary of Decision Requested:	Amend Section 1.5 to provide for outcomes identified in the Hamilton-Auckland Corridor Plan, Interim Rail Business Case and Future Proof Strategy Phase 2 review AND Amend maps to provide for outcomes identified in the Hamilton - Auckland Corridor Plan, Interim Rail Business Case and Future Proof Strategy Phase 2 review.		
Decision Reasons:	<ul style="list-style-type: none"> Section 1.5 -There is work underway producing the Hamilton-Auckland Corridor Plan and Interim Rail Business Case, and also carrying out the Phase 2 review of the Future Proof Growth Strategy. These processes will generate a vision for managing urban growth and development in significant parts of the Waikato District that may differ in some respects from that in the Proposed Plan as currently written. 		
Point Number	372.4		
Summary of Decision Requested:	Add to Section 1.5 - What does this mean for Waikato district strategic objectives and directions?, a new section for High Class soils as a matter of strategic direction.		
Decision Reasons:	<ul style="list-style-type: none"> The protection of high class soils is a significant issue and requires its own strategic direction and objective in section 1.5.1. 		
Point Number	372.5		
Summary of Decision Requested:	Retain Sections 1.5.1 Compact urban development and 1.5.1 and 1.5.1(a) Compact urban development.		
Decision Reasons:	<ul style="list-style-type: none"> Supports Identifying compact urban development as one of the strategic directions of the plan to ensure growth occurs around existing established centres. 		
Point Number	372.6		
Summary of Decision Requested:	Retain Section 1.5.2(a) Planning for urban growth and development.		
Decision Reasons:	<ul style="list-style-type: none"> Supports identifying compact urban development as one of the strategic directions of the plan to ensure growth occurs around existing centres. 		

Point Number 372.7

Summary of Decision Requested: **Retain** Section 1.5.3 Cross-boundary issues, except for the amendments sought below

AND

Amend Section 1.5.3 to seek that the Council liaise with Auckland Council and Waikato Regional Council and the relevant district councils on air quality issues as appropriate where there could be adverse effects across territorial boundaries.

Decision Reasons:

- Land-water interface and natural character have cross boundary implications are not confined to one geographical area.
- There are activities, which may have the potential to adversely affect air quality beyond the district boundary such as odour or dust. Support the recognition that although Councils may under s31 (b) of the Resource Management Act 'control ... any actual or potential effects of the use, development or protection of land ...', the primary control of air contaminants remains the role of the regional councils through their regional plans. Seek that the Council liaise with Auckland Council and Waikato Regional Council and the relevant district councils on air quality issues as appropriate where there could be adverse effects across territorial boundaries.
- Supports the strategic recognition of the significance of cross boundary issues for integrated decision making.

Point Number 372.8

Summary of Decision Requested: **Retain** Sections 1.5.4(b) and 1.5.4(c) Urban Growth.

Decision Reasons:

- Supports overall strategic direction relating to creating a compact urban growth development pattern in line with the outcomes of Future Proof. Services and general Infrastructure provisions and servicing deliver growth patterns identified in Future Proof.

Point Number 372.9

Summary of Decision Requested: **Retain** Section 1.5.5 (e) Services and general infrastructure.

Decision Reasons:

- Support the directive for consultation between the organisations responsible for the infrastructure, developers, adjoining landowners, and iwi and adjoining consent authorities.

Point Number 372.10

Summary of Decision Requested: **Retain** Sections 1.5.5 (f) and (g) Services and general infrastructure.

Decision Reasons:

- Supports the directive for consultation between the organisations responsible for the infrastructure, developers, adjoining landowners and iwi and adjoining consent outcomes.
- Support strategic recognition of reverse sensitivity.

Point Number 372.11

Summary of Decision Requested: **Retain** Section 1.5.7.3 (b) Water.

Decision Reasons:

- Supports provision of water supply to growth areas and links to the Sub-regional Three Waters Strategy (part of the Future Proof partnership).

Point Number 372.12

Summary of Decision Requested: **Amend** Section 1.5 What does this mean for Waikato district strategic objectives and directions? to include a strategic recognition regarding reverse sensitivity.

Decision Reasons:

- No reason provided.

Point Number 372.13

Summary of Decision Requested: **Retain** Objective 3.2.1 (a) Significant Natural Areas.

Decision Reasons:

- Supports the identification and protection of Significant Natural Areas.

Point Number 372.14

Summary of Decision Requested: **Retain** the definition of "Road network activities" in Chapter 13 Definitions.

Decision Reasons:

- General alignment of the definition of "road network activities" will make it more efficient for Auckland Transport to manage roading within Waikato District and across the common boundary.

Point Number 372.15

Summary of Decision Requested: **Retain** Transportation 14.12.1 (a) Permitted Activities.

Decision Reasons:

- General alignment of the definition of "road network activities" will make it more efficient for Auckland Transport to manage roading within Waikato District and across the common boundary.

Point Number 372.16

Summary of Decision Requested: **Amend** Rule 16.1.3 Restricted Discretionary activities, as it relates to Pokeno and Tuakau as follows:

A Multi-Unit development that meets all of the following conditions:

(a) *The Land Use – Effects rules in Rule 16.2;*

(b) *The Land Use – Building rules in Rule 16.3, except the following rules do not apply:*

(i) *Rule 16.3.1, Dwelling;*

(ii) *Rule 16.3.8 Building coverage;*

(iii) *Rule 16.3.9 Living court;*

(iv) *Rule 16.3.10 Service court;*

~~(e) *The minimum net site area per residential unit is 300m²;*~~

(d) *The Multi-Unit development is connected to public wastewater and water reticulation.....*

OR

Add an alternative residential zone for Pokeno and Tuakau which provides for terraced housing.

Decision Reasons:

- Growth can be accommodated within Pokeno and Tuakau through expanding the urban areas or through enabling greater densities within existing urban areas. The proposed plan seeks to accommodate growth within Tuakau and Pokeno through increasing the urban footprints of these towns.
- Within the proposed Residential zone there are provisions for multiunit development, however each unit must have a minimum net site area of 300m². The minimum site area for vacant lot subdivision is 450m². The proposed rules within the residential zone will not provide for intensification of the existing urban area nor will they result in a range of housing typologies that facilitate housing choice.
- The proposed rezoning of rural land for urban development and the zone rules will generate further urban sprawl on land and will result in a loss of prime soil. Furthermore, the lack of variety in housing typologies facilitated within the Residential and Village zones will result in a lack of housing choice to cater for a variety of incomes in and around Tuakau and Pokeno.
- Higher minimum densities than those proposed are more appropriate for established residential areas immediately adjacent to the Business Town Centre zones. Higher residential densities around this zone would better support public transport and other infrastructure, the commercial vitality of the town centre and promote people living, working and playing in their local town centres.
- The provision of other bulk and location requirements, site coverage and the assessment criteria included for this type of activity are sufficient enough to address the likely impacts on amenity and residential character, whilst encouraging alternative types of housing design and delivering on the typology enabled by these provisions.
- An alternative to the above is to enable a new zone to be included within established residential areas, such as within walking distance from existing Business Town Centre zoned areas. This could be a more dense residential zone, or one that enables slightly increased building envelopes to enable in-fill and additional residential development to occur close to town centres.

Point Number 372.17

Summary of Decision Requested: **Retain** Rule 22.3.7.1. Building setbacks - All boundaries.

Decision Reasons:

- Building setbacks create separation for sensitive activities based on zone and site size. Specific rules for sensitive activities are included.

Point Number 372.18

Summary of Decision Requested: **Retain** Rule 22.3.7.2. Building setback - sensitive land use.

Decision Reasons:

- Building setbacks create separation for sensitive activities based on zone and site size. Specific rules for sensitive activities are included.

Point Number 372.19

Summary of Decision Requested: **Retain** Rule 22.4.1.1 Prohibited subdivision.

Decision Reasons:

- Supports provisions that protect and retain high class soils, particularly for their value in food production.

Point Number 372.20

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR4 Prohibited subdivision PR4, to make it more absolute that no additional lots are able to be subdivided where a transferable rural lot subdivision has occurred in the past.

Decision Reasons:

- Waikato District Plan approach to rural subdivision does not include TTR mechanism which enables additional subdivision rights to be transferred to other sites where certain criteria are met.
- Suggest amendments to make it more absolute that no additional lots are to be subdivided where a transferable rural lot for subdivision has occurred in the past.

Point Number 372.21

Summary of Decision Requested: **Amend** Rule 22.4.1.5 Rural Hamlet Subdivision, to be limited and focused around existing towns and villages.

Decision Reasons:

- Rural Hamlets and the growth of new residential areas should be limited and focused around existing towns and villages. Strategic directions in the plan encourage growth around existing towns and centres, therefore enabling rural hamlets do not align with this. Rural hamlet developments have the potential to create small enclaves of residential activity, with potential effects on reverse sensitivity, transport management and on rural character.

Point Number 372.22

Summary of Decision Requested: No specific decision sought, but submission states support for further section 32 analysis to consider the potential costs and benefits of conservation lots in the rural area.

Decision Reasons:

Support further section 32 analysis to consider the potential costs and benefits of conservation lots in the rural area, in particular the impacts of potential yields on rural character where these provisions are utilised to create additional lots. Analysis to consider the potential impact on growth in the rural area would be beneficial.

Point Number 372.23

Summary of Decision Requested: **Amend** Chapter 4 Urban Environment, Chapter 16 residential Zone, the Planning Maps and any other provisions that are proposed for 'live' Residential zoning in unserviced urban residential areas in and around Pokeno and Tuakau where there is uncertainty about the funding, staging and timing for infrastructure provision.

Decision Reasons:

- The submitter opposes the application of 'live' urban residential zones in and around Pokeno and Tuakau.
- The provisions of Section 4.1 Strategic Direction do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for un-serviced land in and around Pokeno and Tuakau. The planning framework proposed for these areas is not promoting an integrated, staged approach to infrastructure and development. It is likely to enable development that undermines the ability to coordinate the adequate provision of network and community infrastructure to support growth.
- An alternative method to 'live' zoning of these areas should be considered, to more appropriately manage land where a live zone has been applied, but where there is no existing or planned supporting infrastructure.
- The introduction of the National Planning Standards may provide alternative methods to large areas of live zoned residential areas, whereby necessary infrastructure requirements (particularly water supply and the regional roading network) could be addressed through the use of development areas and framework planning tools in the new standards. We support consideration of alternative zoning methodologies to enable future growth in a planned way and the National Planning Standards may provide these.

Point Number 372.24

Summary of Decision Requested: **Amend** Policy 3.2.2 (a) Identify and Recognise as follows:
Identify significant indigenous vegetation and habitats of indigenous fauna in accordance with the Waikato Regional Policy Statement and include identified significant ecological areas in the Auckland Unitary Plan which cross the Waikato-Auckland territorial boundary, as Significant Natural Areas.

Decision Reasons:

- Submitter seeks alignment with the Auckland Unitary Plan – Operative in Part in relation to the identification and protection of Significant Natural Areas in close proximity to the common territorial authority boundary.
- Ensure areas identified in the Unitary Plan follow through into the Waikato District.

Point Number 372.25

Summary of Decision Requested: **Retain** Objective 5.1.1. The rural environment.

Decision Reasons:

- Submitter supports provisions that protect and retain high class soils, particularly for their value in food production.

Point Number 372.26

Summary of Decision Requested: **Retain** Policy 5.2.2. High class soils.

Decision Reasons:

- Supports provisions that protect and retain high class soils, particularly for their value in food production.

Point Number 372.27

Summary of Decision Requested: **Delete** Policy 5.3.8(d) Effects on rural character and amenity from rural subdivision.

Decision Reasons:

- The provisions enabling rural hamlet development do not cascade appropriately from the higher order strategic objectives of the plan and as the provisions enabling rural hamlets are sought for deletion, the associated policy is also sought for deletion.

Point Number 372.28

Summary of Decision Requested: **Retain** Policy 5.3.7. Reverse sensitivity effects.

Decision Reasons:

- Submitter supports policy that recognises types of rural environment activities and avoids and or mitigates the effects of these activities on other sensitive land uses.

Submitter Number: 373 **Submitter:** Andrew Hutchison

Organisation: The Church in Hamilton

Point Number 373.1

Summary of Decision Requested: **Amend** Rule 22.1.2 Permitted Activities, to include religious gatherings under 150 people with a maximum vehicle movement condition of 200 vehicles per day.

Decision Reasons:

- There are already religious gatherings occurring in the zone.
- Such gatherings do not cause any disturbance to traffic or cause any other disturbance.

Submitter Number:	374	Submitter:	Judy Garrick
Point Number	374.1		
Summary of Decision Requested:	<p>Delete the cycle-way through the property at 17 Scott Road, Te Kauwhata.</p> <p>AND</p> <p>Amend the District Plan Maps to include a cycleway in the Lakeside development exit road.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • This is private land. • Health and Safety laws state that all persons using private land are the responsibility of the 'land owner'. (If an incident or injury occurred as a result of work being conducted on or near the public land, then there would be liability, under the <i>Health and Safety at Work Act 2015</i>.) • The proposed cycle-way through this land will cut off the end paddock and there will be no legal access for the submitter's stock, creating another health and safety issue when the submitter needs to move them. • The drain running along this land poses a serious health and safety issue to anyone using this cycle-way. • Creating a cycle-way through the property will jeopardise any future development plans for this land, basically splitting the title in two. 		

Submitter Number:	375	Submitter:	Paul Ivory
Point Number	375.1		
Summary of Decision Requested:	<p>Amend the zoning of the property at 93 Hakarimata Road, Ngaruawahia from being a split zone of Rural Zone and Country Living Zone to being only Country Living Zone.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter does not want to be disadvantaged by double zoning for any further subdivision proposals under the Country Living zone. • The proposed split/double zoning would <ul style="list-style-type: none"> - Diminish the land value - The proposed Rural Zone is restrictive and would limit efficient management of this property - Any prospective subdivision opportunities would be flawed if part of the property was zoned Rural - None of the adjoining properties have the proposed Rural zoning - Seeks that the property remain as Country Living zone. 		

Submitter Number:	376	Submitter:	Jolene Francis
Point Number	376.1		
Summary of Decision Requested:	<p>Amend Rule 22.4.1.2 General Subdivision, by including additional provisions to permit additional subdivision to occur that does not have a detrimental impact on amenity and economic values on the rural environment.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Recognising that fragmentation of rural land and loss of productive and versatile land is not ideal, the rules as currently written encourage this by only permitting the subdivision of larger farms, rather than allowing smaller blocks of 10-20 acres the opportunity to subdivide one lot from their property allowing two titles. • These size blocks still provide low density housing, are most likely not of a size to be productive and are not likely to be amalgamated into a large more economically viable block. Yet they are also unable to subdivide. • In many circumstances, having the opportunity to create another title and subdivide results in income directed back into the property and further opportunities to diversify. 		
Point Number	376.2		
Summary of Decision Requested:	<p>Amend the District Plan Maps by expanding the Village Zone and Country Living Zone areas around Te Kowhai village.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The zoning of land as Country Living and village living and to expand the footprint of Te Kowhai village is a great initiative, however it should go further. • There are a number of reasonable sized lifestyle properties around this village i.e. Bedford, Te Kowhai and Horotiu Roads that potentially have land available for subdivision of a lot from their title. • With demand for housing high, particularly in this area, permitting blocks of 10-20 ha in size to have a second title would maintain the rural outlook and amenities while providing the district with further housing in a desirable location. This would add to the both the local and district economy and increase the rating base for the district. • Areas that have been identified within the proposed district plan for country and village living have or are already being developed with some sections already on the market for sale. Considering the plan should be allowing for growth within the district for the next 10 years, the proposed zones don't go far enough and should encompass a wider radius around the village. • In the next 10 years, at the current growth we are seeing, it is likely there will be increasing pressure from urban expansion out into the Waikato district, particularly in the northern part of the district plan. 		
Point Number	376.3		
Summary of Decision Requested:	<p>Amend Rule 23.4 Subdivision provisions to permit additional allotments where appropriate for larger lifestyle properties.</p>		
Decision Reasons:			

- In the next 10 years, at the current growth we are seeing, it is likely there will be increasing pressure from urban expansion out into the Waikato district, particularly in the northern part of the district.
- Provisions within the proposed plan should permit additional allotments where appropriate for larger lifestyle properties to allow fill in of current housing areas and ease the requirements for entirely new subdivisions to address a housing shortage.

Point Number 376.4

Summary of Decision Requested: Place the Proposed District Plan on hold pending the outcome of the other Strategic Planning currently underway, including Future Proof Phase 2 and the Hamilton to Auckland Corridor network plan.

Decision Reasons:

Submitter Number: 377 **Submitter:** Rangimonehu Kereopa

Organisation: Pareaute Kereopa Whanau Trust

Point Number 377.1

Summary of Decision Requested: Amend Section 2.2 (a) Background - to apply the Resource Management Act definitions, as follows:
Tangata whenua: In relation to a particular area, means the iwi, or hapu, that holds mana whenua over that area.
Mana whenua: Means customary authority exercised by an iwi or hapu in an identified area.
 AND
 Amend Section 2.2 (a) Background which states that Waikato-Tainui is Tangata Whenua of the Waikato district.

Decision Reasons:

- Waikato-Tainui is not: 'The Tangata Whenua of the Waikato District'.
- The terminology is quite important to get correct, as Waikato-Tainui do not have authority or Tangata whenua status in Raglan.
- Tainui iwi and hapu of the West Coast Harbour of Raglan have not ceded their sovereignty to Waikato-Tainui.
- Waikato-Tainui do not hold our mandate to speak on our behalf re: future developments, growth or progress of our rohe.
- Nor have we given up any type of relationship that us here as Tangata whenua are striving to build with Waikato District Council.
- Waikato-Tainui is not 'the' Tangata whenua, as if to proclaim that they are an entity that has a higher status than other iwi, hapu and marae in the Waikato district.
- Waikato-Tainui Iwi Authority was established to receive settlement funds from the Crown as a result of Raupatu. Waikato District Council must not confuse the identity and status of Tangata whenua and other hapu and or iwi with its obligation under the RMA to all Tangata whenua groups within the Waikato district.
- The submitter asserts that Tangata whenua in Whaingaroa are only those that can whakapapa to Whaingaroa.

Point Number 377.2

Summary of Decision Requested: No specific decision sought, but submission supports Whaingaroa Kite Whenua, Tihei Mauriora - a cultural theme park plan.

Decision Reasons:

- Aligns with the vision and aspirations of Tangata whenua and owners and beneficiaries of Te Kopua lands on Riria Kereopa Memorial Drive, Whaingaroa.

Point Number 377.3

Summary of Decision Requested: No specific decision sought, but submission states support for Iwi Management Plans for hapu, iwi groups and organisations
 AND
 No specific decision sought, but submission states, support for Council creating a Hapu/Iwi Management Plan budget/funding pool for the Waikato district.

Decision Reasons:

- This will improve consultation and engagement with tangata whenua and any future developments within our rohe.

Point Number 377.4

Summary of Decision Requested: No specific decision sought, but submission opposes the development of multi unit dwellings on the corner of Wainui and Stewart Street, Raglan.

Decision Reasons:

- It will change the natural characteristic of the landscape of Whaingaroa, especially the effect and impact it will have on current residences of that area. The beauty of Whaingaroa is the lifestyle by the sea which enhances our authenticity.
- The submitter feels we need to retain what we already have, without further developments of 2-storey multi-unit dwellings in the CBD.

Submitter Number: 378 **Submitter:** Fire and Emergency New Zealand

Point Number 378.1

Summary of Decision Requested: Retain Policy 5.6.9 Existing non-residential activities.

Decision Reasons:

- Fire and Emergency New Zealand supports the policy as a number of existing fire stations in the Waikato region are within the Rural environment therefore provision to enable fire service facilities to continue to function, re-development, or if necessary, expand, they can do so grounded on an effects based approach.

Point Number	378.2
Summary of Decision Requested:	Retain Policy 6.4.3 Infrastructure Location and Services.
Decision Reasons:	<ul style="list-style-type: none"> • Policy ensures subdivision, use and development are provided with infrastructure and services to a level that is appropriate to its location and intended use, including adequate water supply within urban areas for firefighting purposes.
Point Number	378.3
Summary of Decision Requested:	Retain Policy 6.5.2 Construction and operation of the land transport network.
Decision Reasons:	<ul style="list-style-type: none"> • Policy promotes the appropriate design and location of site accesses.
Point Number	378.4
Summary of Decision Requested:	Retain Policy 9.1.1.3 Management of adverse effects.
Decision Reasons:	<ul style="list-style-type: none"> • Policy requires the management of adverse traffic safety effects to ensure the safe and efficient operation and functioning of the adjacent transport network and efficient access to surrounding facilities is maintained at all times. This is important to maintain access to properties for emergency vehicles.
Point Number	378.5
Summary of Decision Requested:	<p>Retain Policy 9.2.1.2 Servicing, as it requires development to be adequately serviced for essential services, except for the amendments sought below</p> <p>AND</p> <p>Amend Policy 9.2.1.2 (a) Servicing, as follows:</p> <p><i>(a) Development is to be adequately serviced with respect to essential service, water supply (including for fire fighting purposes), wastewater treatment and disposal and stormwater treatment and disposal.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the policy in part as it requires that development is to be adequately serviced with respect to essential services such as water supply, however Fire and Emergency New Zealand seeks that the provision for water supply is adequate for firefighting purposes.
Point Number	378.6
Summary of Decision Requested:	<p>Retain Policy 9.3.2.2 Community facilities, except for the amendments sought below</p> <p>AND</p> <p>Amend Policy 9.3.2.2 (a)(ii) Community facilities, as follows:</p> <p><i>(ii) Provide a service or function <u>that provides for the health, safety and well-being to the local neighborhood</u>:</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the policy in part, however seek the amendments to better emphasise the purpose of providing a service or function.
Point Number	378.7
Summary of Decision Requested:	<p>Retain Objective 9.4.2 Adverse effects of land use, to the extent that recognition is given to health and well-being of communities and they are protected from adverse effects of land use and development.</p> <p>AND</p> <p>Amend Objective 9.4.2(a) Adverse effects of land use, as follows:</p> <p><i>(a) The health, <u>safety</u> and well-being of people, communities and the environment are protected from the adverse effects of land use and development within the Business Zone Tamahere.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the objective to the extent that recognition is given to the health and well-being of communities and are protected from the adverse effects of land use and development. However, Fire and Emergency New Zealand recommends the wording better reflect section 5 of the RMA, which also refers to the safety of the community.
Point Number	378.8
Summary of Decision Requested:	Retain Objective 10.1.1 Effects of hazardous substances.
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the objective on the basis that residual risk associated with storage, use or disposal of hazardous substances is managed to ensure that the effects on people, property and the environment are acceptable.

Point Number	378.9
Summary of Decision Requested:	Retain Policy 10.1.2 Location of new hazardous facilities.
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the policy on the basis that residual risk associated with storage, use or disposal of hazardous substances is managed to ensure that the effects on people, property and the environment are acceptable.
Point Number	378.10
Summary of Decision Requested:	Retain Policy 10.1.3 Residual risks of hazardous substances.
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the policy on the basis that residual risk associated with storage, use or disposal of hazardous substances is managed to ensure that the effects on people, property and the environment are acceptable.
Point Number	378.11
Summary of Decision Requested:	<p>Retain the definition of "Commercial activity" in Chapter 13 Definitions on the assumption that it includes emergency services.</p> <p>AND</p> <p>Amend the definition of "Commercial Activity" in Chapter 13 Definitions, as follows:</p> <p><i>Means the use of land and buildings which provides social and cultural services and facilities for the general public in respect of <u>emergency services</u>, education, and religion. Community facilities and leisure, may be associated with health clinics, schools, churches, probation and periodic detention centres.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand supports the definition on the assumption that the definition is intended to encompass emergency services. However, Fire and Emergency New Zealand considers that, in order to provide clarity, the definition should be expanded to make explicit mention of emergency services.
Point Number	378.12
Summary of Decision Requested:	<p>Add a new definition of "emergency services" to Chapter 13 Definitions as follows:</p> <p><u>Emergency Services</u></p> <p><i>Means the New Zealand Police, Fire and Emergency New Zealand, and hospital and health services.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • New definition will provide greater clarity to plan users and to support the relief sought elsewhere in the submission. • Proposed definition reflects the definition included in section 4 of the Civil Defence Emergency Management Act 2002.
Point Number	378.13
Summary of Decision Requested:	<p>Add a new definition for "Emergency services training and management activities" to Chapter 13: Definitions, as follows:</p> <p><u>Emergency services training and management activities</u></p> <p><i>Means the training activities, operational support and other non-emergency activities undertaken by the New Zealand Police, Fire and Emergency New Zealand, and hospital and health services.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Inclusion of the definition will provide greater clarity to plan users and to support the relief sought elsewhere in this submission.
Point Number	378.14
Summary of Decision Requested:	<p>Add a new definition for "non-hazardous gas", to provide clarity with regard to thresholds specified in Appendix 5.</p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Provides clarity as to whether the volumes proposed in Appendix 5 are the compressed or uncompressed, e.g. BA cylinder (9L) at 300 Bar has approximately 2.6m³ of air. • Definition is important to Fire and Emergency New Zealand as it will assist in determining whether the district plan provides for the storage of a sufficient amount of BA tanks at a station in a residential area. • Fire and Emergency New Zealand will work with the Waikato District Council to agree to a wording for the definition as needed.
Point Number	378.15
Summary of Decision Requested:	<p>Retain the standards for subdivision in Section 14.3 General infrastructure, particularly Rule 14.3.1.8 relating to service connections for subdivision.</p> <p>AND</p> <p>Amend Rule 14.3.1.8 relating to P12 Permitted Activities as follows:</p> <p><i>14.3.1.8 (3) Within all zones, except the Rural and Country Living Zones, the water supply required under Rule 14.3.1.8 (1)(b) must be adequate for firefighting purposes in accordance with New Zealand Fire Service Firefighting Water Supplies Code of Practice SNZ PAS 4509:2008. Compliance with this Code of Practice can typically be achieved through connection to a Council reticulated water supply.</i></p>

14.3.1.8(4) Within the Rural and Country Living Zones, provision shall be made for an adequate supply of water and access to water supplies for firefighting purposes in accordance with New Zealand Fire Service Firefighting Water Services Code of Practice SNZ PAS 4509:2008.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports 14.3.1.8 as it requires all new lots created as part of a subdivision must be designed and located so that provision is made for access and service connections up to the boundary of the lot, including water supply and vehicle access.
- Amendments will require provision for water supply in the Rural and Country Living Zones that are adequate for firefighting purposes.
- Is consistent with the priority given to firefighting water supply in section 14(3) of the RMA.
- Better enables FENZ to achieve its statutory obligations under the FSA.
- Better gives effect to the RPS.
- Achieves the purpose of the RMA by enabling people and communities to provide for their health, safety and well-being by managing a potential adverse effect of relatively low probability but high consequence.

Point Number

378.16

Summary of Decision Requested:

Retain Rule 14.12.1.1 relating to PI Vehicle access, subject to the relief sought in relation to Tables 14.12.5.14 and 14.12.5.15

AND

Amend Rule 14.12.1.1 relating to PI Vehicle access for all activities, as follows:

14.12.1.1 Vehicle access for all activities

(1) All activities must comply with the following vehicle access conditions:

(a) The site has a vehicle access to a formed road that is maintained by a road controlling authority;

(b) The site has a vehicle access that is constructed to comply with the relevant requirements of Table 14.12.5.1, Figure 14.12.5.2, Table 14.12.5.3 and Figure 14.12.5., Table 14.12.5.14 and Table 14.12.5.15 except:

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Subject to relief sought in relation to Table 14.12.5.14 and Table 14.12.5.15, Fire and Emergency New Zealand generally supports the access provisions in 14.12.1.1 as it recognises the need for suitable vehicle access for all activities within the District.
- For fire appliances to access an emergency, adequate access width, height and gradient is necessary. A 95th percentile pumping appliance has a width of 2.5m, a height of 3.55m and a length of 8.72m. A clearance of greater than 4m is required for firefighters to work around the fire appliance to access hoses and pumps. The maximum negotiable gradient is 1:5, accompanied by a 4m long 1:15 transition grade. In order to provide for ability to access a fire/emergency, amendments must be made to ensure adequate clearance.
- Inclusion of these tables will ensure all activities comply with the relevant vehicle access requirements to ensure sufficient access for firefighting purposes.
- Vehicle access that does not comply with one or more of the conditions of Rule 14.12.1.1 is a Restricted Discretionary Activity.

Point Number

378.17

Summary of Decision Requested:

Retain the matters of discretion in Rule 14.12.2 Restricted Discretionary Activities, to the extent that discretion is required for vehicle access that does not comply with Rule 14.12.1.1

AND

Amend Rule 14.12.2 RD1 Restricted Discretionary Activities, as follows:

Discretion is restricted to:

(a) Traffic generation by the activities to be served by the access;

(b) Location, design, construction and materials of vehicle access;

(c) Safety for vehicles and pedestrians;

(d) Road network safety and efficiency; and

(e) Mitigation to address safety, including access clearance requirements for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports the matters of discretion to the extent that it recognises that discretion is required for vehicle access that does not comply with one or more of the conditions of Rule 14.12.1.1.
- While discretion addresses matters in relation to mitigation to address safety, Fire and Emergency New Zealand is concerned that access to a site for emergency purposes may be overlooked.
- Fire and Emergency New Zealand seek clarity around the discretion Council have for access infringements, specifically in relation to access widths.

Point Number

378.18

Summary of Decision Requested:

Retain Table 14.12.5.7 Required parking spaces and loading bays relating to emergency service facilities.

Decision Reasons:

- Fire and Emergency New Zealand supports the parking requirements in Standard 14.12.5.7 that requires emergency service facilities to provide 1 car space per on-duty staff person, plus sufficient space for all the emergency vehicles that use the site.
- This is considered an effective and practical standard for emergency facilities.

Point Number

378.19

Summary of Decision Requested:

Retain Table 14.12.5.14 Access and road conditions, as it requires an adequate minimum road/ROW width

AND

Add a note below Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Towne Centre and Industrial Zones) relating to minimum road/ROW reserve width column as follows:

**Accesses shall have a minimum height clearance of 4.0m and a maximum gradient of 1 in 5 (with minimum 4.0m transition ramps of 1 in 8) except where the access terminates less than 13.5m from the nearest road that has reticulated water supply (included hydrants).*

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports the design requirements for vehicle access as it requires an adequate Minimum Road/ROW Reserve Width to allow for access to properties for firefighting purposes.
- Fire and Emergency New Zealand is concerned however that the requirements in Table 14.12.5.14 fail to prescribe height clearance and gradient requirements and therefore would not be able to accommodate a fire appliance.
- For fire appliances to access an emergency, adequate access width, height and gradient is necessary. A 95th percentile pumping appliance has a width of 2.5m, a height of 3.55m and a length of 8.72m. A clearance of greater than 4m is required for firefighters to work around the fire appliance to access hoses and pumps. The maximum negotiable gradient is 1:5, accompanied by a 4m long 1:15 transition grade. In order to provide for ability to access a fire/emergency, amendments must be made to ensure adequate clearance.

Point Number

378.20

Summary of Decision Requested:

Retain Table 14.12.5.15 Access and road conditions, as it contains minimum road/ROW reserve width requirements

AND

Add note below Table 14.12.5.15 Access and road conditions (Rural and Country Living Zones) relating to the Minimum Road/ROW Reserve Width column, as follows:

**Accesses shall have a minimum height clearance of 4.0m and a maximum gradient of 1 in 5 (with minimum 4.0 transition ramps of 1 in 8),*

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports the design requirements for vehicle access as it generally recognises Minimum Road/ROW Reserve Width requirements to allow for access to properties for firefighting purposes.
- Fire and Emergency New Zealand are concerned, however, that the requirements in Table 14.12.5.15 fail to prescribe height clearance and gradient requirements and therefore would not be able to accommodate a fire appliance and may give rise to situations where access for emergency vehicles is compromised in the Rural and Country Living Zones.
- There is also an absence of provisions to provide for height clearance and gradient requirements and therefore would not be able to accommodate a fire appliance.
- For fire appliances to access an emergency, adequate access width, height and gradient is necessary. A 95th percentile pumping appliance has a width of 2.5m, a height of 3.55m and a length of 8.72m. A clearance of greater than 4m is required for firefighters to work around the fire appliance to access hoses and pumps. The maximum negotiable gradient is 1:5, accompanied by a 4m long 1:15 transition grade. In order to provide for ability to access a fire/emergency, amendments must be made to ensure adequate clearance.
- This amendment will ensure sufficient clearance.

Point Number

378.21

Summary of Decision Requested:

Add a new activity to Rule 16.1.2 Permitted Activities as a permitted activity:

x. Emergency services training and management activities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in 16.1.2 as permitted activities as there is no provision made for emergency services training and management activities.
- Fire and Emergency New Zealand seek the rule be expanded to provide for emergency services training and management activities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighting and emergency response.

Point Number

378.22

Summary of Decision Requested:

Add a new activity to Rule 16.1.3 as a Restricted Discretionary Activity:

(j) Emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 16.1.3 to the extent that no provision is made for emergency services facilities. As provision is not made under this rule, emergency service facilities would instead default to non-complying activities under Rule 16.1.5.
- Fire and Emergency New Zealand considers the default non-complying activity status is overly restrictive and inappropriate and therefore seek the inclusion of emergency service facilities as a restricted discretionary activity to provide for emergency services in the Residential Zone for the following reasons:
 1. Fire stations must be strategically located within and throughout communities to maximize their coverage and response times so that they can efficiently and effectively provide for health and safety of people and communities by being able to respond to emergency call outs in a timely way, thus avoiding or mitigating the potential for adverse effects associate with fire hazard and other emergencies;
 2. The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently managed by conditions of consent and subsequent matters for control;
 3. Restricted Discretionary activity status will better implement the Objectives and Policies of the Proposed District Plan.
 4. Restricted Discretionary activity status better achieves the purpose of the RMA and better enables the submitter to meet its statutory obligations.

Point Number

378.23

Summary of Decision Requested:

Retain Rule 16.2.1.1 Noise - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 16.2.1.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.

Point Number

378.24

Summary of Decision Requested:

Add a clause to Rule 16.2.5 Hazardous substances, as follows:

16.2.5 Hazardous substances

(a) The use, storage or disposal of any hazardous substance where:

(i) the aggregate quantity of any hazardous substance of any hazard classification on a site is less than the quantity specified in the Residential zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).

(ii) 16.2.5(g)(i) excludes the fire stations and associated fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 16.2.5 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as effectively as needed.
- Fire and Emergency New Zealand's recent firefighting chemicals work has highlighted a number of challenges and limitations with the way the hazardous substances rules are written in district plans. Therefore, Fire and Emergency New Zealand requests that fire stations and associated firefighting activities are excluded from the permitted activity Rule 16.2.5 for the following reasons:
 1. The 8.3 Classification (Table 5.1 contained with Appendix 5-Hazardous substances) has only a 50L/kg limit in residential zones, and is quite low in other areas- lots of household products are eye corrosives from dishwashing powder to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or any of these chemicals on site, as a 50kg limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classifications is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSN0 legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, the higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example is Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, Fire and Emergency New Zealand may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent further harm.

Point Number 378.25

Summary of Decision Requested: **Amend** Rule 16.3.3.1 Height - Building general, as follows:

This standard does not apply to emergency service facilities and hose drying towers up to 15m associated with emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand oppose the height requirements of Rule 16.3.3.
- The inclusion of a specific exemption for emergency service facilities and hose drying towers in order to appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height. Some fire stations also include a hose drying tower between 12-15m in height.
- The inclusion of an exemption would better provide for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand.

Point Number 378.26

Summary of Decision Requested: **Retain** Rule 16.3.9.3- Building setback - Waterbodies.

Decision Reasons:

- Fire and Emergency New Zealand considers that the standard will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.27

Summary of Decision Requested: **Retain** Rule 16.4.1 Subdivision general, to the extent that subdivision is a restricted discretionary activity and proposed lots must connect to a public-reticulated water supply

AND

Amend Rule 16.4.1 Subdivision - General, as follows:

(x) Provision of infrastructure, including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports Rule 16.4.1 to the extent that subdivision is a Restricted Discretionary activity and requires that proposed lots in the Residential Zone must connect to public-reticulated water supply.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.28

Summary of Decision Requested: **Retain** Rule 16.4.2 Subdivision - Te Kauwhata Ecological Residential Area, to the extent that subdivision is a restricted discretionary activity and proposed lots must connect to a public-reticulated water supply.

AND

Amend Rule 16.4.2(b)(x) Subdivision - Te Kauwhata Ecological Residential Area, as follows:

(x) Provision of infrastructure, including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports Rule 16.4.2 to the extent that subdivision in the Te Kawhata Ecological Residential Area is a Restricted Discretionary activity and requires that proposed lots in the Residential Zone must connect to a public-reticulated water supply.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.29

Summary of Decision Requested: **Retain** Rule 16.4.3 Te Kawhata West Residential Area, to the extent that subdivision is a Restricted Discretionary Activity and requires proposed lots to connect to public-reticulated water supply

AND

Amend Rule 16.4.3 Te Kawhata West Residential Area, as follows:

(x) Provision of infrastructure, including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports Rule 16.4.3 to the extent that subdivision in the Te Kawhata West Residential Area is a Restricted Discretionary activity and requires that proposed lots in the Residential zone must connect to public-reticulated water supply.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.30

Summary of Decision Requested: **Retain** Rule 16.4.4 Subdivision - Multi-unit development, to the extent that subdivision is a restricted discretionary activity and requires connections to water reticulation

AND

Amend Rule 16.4.4(b)(x) Subdivision - Multi-unit development, as follows:

(x) Provision of infrastructure to individual units; including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports Rule 16.4.1 to the extent that subdivision in the form of multi-unit development in the Residential Zone is a Restricted Discretionary activity and requires connection to water reticulation.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.31

Summary of Decision Requested: **Add** a new activity to Rule 17.1.2 Permitted Activities, as follows:

(x) Emergency services training and management activities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in Rule 17.1.2 as permitted activities as there is no provision explicitly made for emergency services training and management activities.
- The rules should be expanded to provide for emergency services training and management activities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighting and emergency response.

Point Number 378.32

Summary of Decision Requested: **Retain** Rule 22.2.1.1 Noise - General, as notified.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 22.2.1.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.

Point Number 378.33

Summary of Decision Requested: **Amend** Rule 22.2.4 Hazardous substances, as follows:

22.2.4 Hazardous substances

(a) The use, storage or disposal of any hazardous substances where:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site less than the quantity specified for the Rural Zone in Table 6.1 contained within Appendix 5 (Hazardous Substances).

(ii) Rule 22.2.4.(a).(i) excludes fire stations and associated fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 22.2.4 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand requests that fire stations and associated firefighting activities are excluded from Rule 22.2.4 for the following reasons:
 - I. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent

to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.

2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.34

Summary of Decision Requested: **Amend** Rule 22.3.4.1 Height - Building General, to include the following:

22.3.4.1 Height - Building General

The maximum height of any building must not exceed 10m, except hose drying towers up to 15m associated with emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports the height standard in Rule 22.3.4.1, however an inclusion of a specific exemption will appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers that the inclusion of an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand and is consistent with the typical height of similar network utility structures.

Point Number 378.35

Summary of Decision Requested: **Retain** Rule 22.3.7.5 Building setback - Waterbodies.

Decision Reasons:

- The standard will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.36

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, as subdivision is a restricted discretionary activity, except for the amendments sought below

AND

Amend Rule 22.4.1.2 General subdivision, as follows:

(a) Subdivision must comply with all of the following conditions...

x. Proposed lots must be connected to water supply sufficient for firefighting purposes.

(b) Council's discretion is restricted to the following matters...

x. Provision of infrastructure, including water supply, for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports Rule 22.4.1.2 as subdivision of land in the Rural Zone is a Restricted Discretionary activity, however, Fire and Emergency New Zealand requires that proposed lots shall be connected to public-reticulated water supply or water supply sufficient for firefighting purposes
- Subdivision that does not comply is a Non-Complying activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.37

Summary of Decision Requested: **Retain** Rule 22.4.1.5 Rural hamlet subdivision, as subdivision is a restricted discretionary activity, except for the amendments sought below

AND

Amend Rule 22.4.1.5 Rural Hamlet Subdivision, as follows:

(a) Subdivision must comply with all of the following conditions...

(xi) Proposed lots must be connected to water supply sufficient for firefighting purposes.

(b) Council's discretion is restricted to the following matters...

Provision of infrastructure, including water supply, for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand generally supports Rule 22.4.1.5 as subdivision of land in a Rural Hamlet is a Restricted Discretionary activity, however, Fire and Emergency New Zealand requires proposed lots shall be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.
- Subdivision that does not comply is a Non-Complying activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number	378.38
Summary of Decision Requested:	<p>Add a new activity to Rule 23.1.1 Permitted Activities as a permitted activity as follows:</p> <p><u>(x) Emergency services training and management activities.</u></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand opposes the range of activities listed in Rule 23.1.1 to the extent that no provision is explicitly made for emergency services training and management activities. • The rules should be expanded to provide for emergency services training and management activities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighting and emergency response.
Point Number	378.39
Summary of Decision Requested:	<p>Add a new discretionary activity to Rule 23.1.2 Discretionary Activities, as follows:</p> <p><u>(x) Emergency service facilities.</u></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand opposes Rule 23.1.2 as no provision is made for emergency service facilities. As no provision is made under this rule, emergency service facilities would instead default to non-complying activities under Rule 23.1.2. • The default non-complying activity is overly restrictive and inappropriate. • Fire and Emergency New Zealand therefore seeks the inclusion of emergency facilities as a discretionary activity in the Country Living Zone for the following reasons: <ol style="list-style-type: none"> 1. Fire stations must be strategically located within and throughout communities to maximise their coverage and response times so that they can efficiently and effectively provide for the health and safety of people and communities by being able respond to emergency call outs in a timely way, thus avoiding or mitigating the potential for adverse effects associated with fire hazard and other emergencies; 2. The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently managed by conditions of consent and subsequent matters for control; 3. Restricted Discretionary activity status better implement the Objectives and Policies of the Proposed District Plan. 4. Restricted Discretionary activity status better achieves the purpose of the RMA and better enables Fire and Emergency New Zealand to meet its statutory obligations.
Point Number	378.40
Summary of Decision Requested:	Retain Rule 23.2.1.1 Noise - General.
Decision Reasons:	<ul style="list-style-type: none"> • The rule permits noise generated by emergency sirens and this exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.
Point Number	378.41
Summary of Decision Requested:	<p>Amend Rule 23.2.4 Hazardous Substances, as follows:</p> <p><i>(a) The use, storage or disposal of any hazardous substance where:</i></p> <p><i>(i) The aggregate quantity of any hazardous substance of any hazard classification on a site is less than the quantity specified for the Country Living Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances); and</i></p> <p><i>(ii) The storage or use of radioactive materials is in approved equipment for medical and diagnostic purposes, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.</i></p> <p><u><i>(iii) Rule 23.2.4 (a)(i) excludes fire stations and associated fire service operations.</i></u></p> <p>AND</p> <p>Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Fire and Emergency New Zealand oppose Rule 23.2.4 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed. • Fire and Emergency New Zealand request that fire stations and associated firefighting activities should be excluded from the Rule 23.2.4 for the following reasons: <ol style="list-style-type: none"> 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site. 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems. 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow. 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.
Point Number	378.42

Summary of Decision Requested: Amend Rule 23.3.4.1 Height, to include the following:
This Standard does not apply to emergency service facilities and hose drying towers up to 15m associated with emergency service facilities.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Inclusion of a specific exemption for emergency service facilities and hose drying towers will appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers that the inclusion of an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand.

Point Number 378.43
Summary of Decision Requested: Retain Rule 23.3.7.5 Building setback - Waterbodies.

Decision Reasons:

- The Rule will safeguard the wellbeing of communities in accordance with the purpose of the RMA and purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.44
Summary of Decision Requested: Amend Rule 23.4.2 General Subdivision, as follows:

(a) Subdivision must comply with all of the following conditions:...

(x) Proposed lots must be connected to water supply sufficient for firefighting purposes.

(b) Council's discretion is limited to the following matters:...

(i) Provision of infrastructure, including water supply, for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand support Rule 23.4.2 as subdivision of land in the Country Living Zone is a Restricted Discretionary activity, however, Fire and Emergency New Zealand requires proposed lots to be connected to public-reticulated water supply or water supply sufficient for firefighting purposes. Subdivision that does not comply is a Non-complying activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.45
Summary of Decision Requested: Add a new activity to Rule 24.1.1 Permitted Activities, as follows:

(x) Emergency services training and management activities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes range of activities listed in Rule 24.1.1 as permitted activities to the extent no provision is made for emergency services training and management activities.
- The rules should be expanded to provide for emergency services training and management in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighting and emergency response.

Point Number 378.46
Summary of Decision Requested: Add a new activity to Rule 24.1.2 Discretionary Activities, to include the following as a Discretionary activity:

(x) Emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 24.1.2 as no provision is made for emergency service facilities. As provision is not made under the rule, emergency service facilities would instead default to a non-complying activity under Rule 24.1.3.
- The non-complying activity status is restrictive and inappropriate.
- Fire and Emergency New Zealand seek the inclusion of emergency service facilities as a discretionary activity in the Village Zone for the following reasons:
 1. Fire stations must be strategically located within and throughout communities to maximise their coverage and response times so that they can efficiently and effectively provide for the health and safety of people and communities by being able respond to emergency call outs in a timely way, thus avoiding or mitigating the potential for adverse effects associated with fire hazard and other emergencies;
 2. The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently managed by conditions of consent and subsequent matters for control;
 3. Restricted Discretionary activity status better implement the Objectives and Policies of the Proposed District Plan.
 4. Restricted Discretionary activity status better achieves the purpose of the RMA and better enables Fire and Emergency New Zealand to meet its statutory obligations.

Point Number 378.47
Summary of Decision Requested: Retain Rule 24.2.1 Noise - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 24.2.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for on-going health and safety of people and communities.

Point Number 378.48

Summary of Decision Requested: **Amend** Rule 24.2.5 Hazardous Substances, as follows:

(a) *The use, storage or disposal of any hazardous substances where:*

(i) *The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Residential Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances)*

(ii) *Rule 24.2.5.(a),(i) excludes fire stations and associated fire service operations.*

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 24.2.5 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances as quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand requests fire stations and associated firefighting activities are excluded from the permitted activity Rule 24.2.5 for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSN0 legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.49

Summary of Decision Requested: **Amend** Rule 24.3.3.1 Height - Building general, to include the following:

This Standard does not apply to hose drying towers up to 15m associated with emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The inclusion of a specific exemption for emergency service facilities and hose drying towers in order to appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers that the inclusion of an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand.

Point Number 378.50

Summary of Decision Requested: **Retain** Rule 24.3.6.3 Building setback - Waterbodies.

Decision Reasons:

- The Rule will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.51

Summary of Decision Requested: **Retain** Rule 24.4.1 Subdivision - General, as subdivision is a restricted discretionary activity, except for the amendments sought below

AND

Amend Rule 24.4.1 Subdivision - General, as follows:

(a) *Subdivision must comply with all of the following conditions...*

(x) *Proposed lots must be connected to water supply sufficient for firefighting purposes.*

(b) *Council's discretion is restricted to the following matters...*

(x) *Provisions of infrastructure, including water supply, for firefighting purposes.*

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand requires that proposed lots to be connected to public-reticulated water supply or water supply sufficient for firefighting purposes. Subdivision that does not comply is a Discretionary Activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.52

Summary of Decision Requested: **Retain** Rule 24.4.2 Subdivision - Te Kowhai and Tuakau, as subdivision is a restricted discretionary activity, except for the amendments sought below

AND

Amend Rule 24.4.2 Subdivision - Te Kowhai and Tuakau, as follows:

(a) Subdivision must comply with all of the following conditions:...

x. Proposed lots must be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.

(b) Council's discretion is restricted to the following matters:...

(x) Provision of infrastructure, including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand requires proposed lots be connected to public-reticulated water supply or water supply sufficient for firefighting purposes. Subdivision that does not comply is a Discretionary Activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.53

Summary of Decision Requested: Retain Rule 26.2.7 Motor sport and Event Traffic Management - All precincts.

Decision Reasons:

- Fire and Emergency New Zealand supports provisions in Rule 26.2.7 as a Traffic Management Plan shall be prepared and provision shall be made for emergency service vehicles, e.g. fire, police, ambulance, military, Department of Corrections, vehicles needing emergency access to any site or dwelling located on, or with access from Hampton Downs Road.
- The operation of the Hampton Downs Motorsport Park for a motor sport and recreation event is a Controlled Activity if access provisions are complied with.

Point Number 378.54

Summary of Decision Requested: Amend Rule 26.2.9 Hazardous substances - All precincts, as follows:

(a) The use, storage or disposal of any hazardous substances where:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Motorsport and Recreation Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances);

(ii) The storage or use of radioactive materials is in approved equipment for medical and diagnostic purposes, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.

(iii) Rule 26.2.9 (a)(i) excludes fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 26.2.9 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor; it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand requests that fire stations and associated firefighting activities are excluded for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.55

Summary of Decision Requested: Retain Rule 26.4 Subdivision, as subdivision is a discretionary activity, except for the amendments sought below

AND

Amend Rule 26.4 Subdivision, as follows:

(x) Every allotment is provided with water supply and complies with the requirements of Chapter 14: Infrastructure and Energy;

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand require proposed lots to be connected to public-reticulated water supply or water supply sufficient for firefighting purposes. Subdivision that does not comply is a Non-complying Activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.56

Summary of Decision Requested: Retain Rule 27.2.6 Noise - Other than Taxiways.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 27.2.6 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a

manner that provides for the on-going health and safety of people and communities.

Point Number 378.57

Summary of Decision Requested: **Add** a new objective to Section 4.5 Business and Business Town Centre Zones, as follows:

Objective 4.5.x

To recognise and provide for non-commercial activities that contribute to the health, safety and wellbeing of the community while managing their potential adverse effects to ensure that the activities complement the amenity values of the District's Business Zone areas.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Amendments sought will better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.58

Summary of Decision Requested: **Retain** Policy 4.5.4 Commercial purpose: Business Zone, except for the amendments sought below

AND

Add a new clause (iv) to Policy 4.5.4 Commercial purpose: Business Zone as follows:

(iv) Enabling non-commercial activities such as emergency service facilities that provide for the health, safety and well-being of the community and that service or support an identified local need.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports Policy 4.5.4 in part, however considers that the provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-commercial activities in the Business Zones. For instance providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.

Point Number 378.59

Summary of Decision Requested: **Retain** Policy 4.6.4 Maintain industrial land for industrial purposes, to the extent that it anticipates ancillary non-industrial activities in the Industrial Zone

AND

Add new clause (b) to Policy 4.6.4 Maintain industrial land for industrial purposes, as follows:

(b) Enable emergency services facilities that provide for the health, safety and well-being of the community and that service or support and identified local need.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports in part Policy 4.6.4 to the extent that the provision anticipates ancillary non-industrial activities in the Industrial Zone, but considers that the provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-industrial activities in the Industrial Zones. For instance providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- Amendments sought better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.60

Summary of Decision Requested: **Retain** Policy 4.7.5 Servicing requirements.

Decision Reasons:

- Fire and Emergency New Zealand supports Policy 4.7.5 as it requires urban subdivision and development to be serviced to a level that will provide for the anticipated activities, including water provision for domestic and firefighting purposes, which is important to ensure the health, safety and well-being of the community.

Point Number 378.61

Summary of Decision Requested: **Add** new Objective to Section 5.3 Rural Character and Amenity as follows:

Objective 5.3.x

To recognise and provide for non-rural activities that contribute to the health, safety and wellbeing of the community while managing their potential adverse effects to ensure that the activities complement the amenity values of the District's rural areas.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Amendments sought better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.62

Summary of Decision Requested: **Retain** Policy 5.3.9 Non-rural activities, to the extent that it anticipates non-rural activities in the Rural Zone

AND

Amend Policy 5.3.9 Non-rural activities, as follows:

(a) Manage any non-rural activities, including equestrian centres, horse training centres, emergency service facilities, forestry and rural industries, to achieve a character, scale, intensity and location that are in keeping with rural character and amenity values,

(b) Avoid buildings and structures dominating land on adjoining properties, public reserves, the coast or waterbodies; and

(c) Enable non-rural activities that provide for the health, safety and well-being of the community and that service or support an identified local need.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports Policy 5.3.9 to the extent that these provisions anticipate non-rural activities in the Rural Zone, but considers that the provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-rural activities in the Rural Zone. For instance providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- Amendments sought better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number

378.63

Summary of Decision Requested:

Add a new Objective to Section 5.6 Country Living Zone, as follows:

Objective 5.6.x

To recognise and provide for non-residential activities that contribute to the health, safety and wellbeing of the community while managing their potential adverse effects to ensure that the activities complement the amenity values of the District's Country Living areas.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- To better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number

378.64

Summary of Decision Requested:

Retain Policy 5.6.2 Country living character, as it requires activities to be self-sufficient for water supply, unless a reticulated system is available

AND

Amend Policy 5.6.2(e) Country Living character, as follows:

(e) Requires activities within the Country Living Zone to be self-sufficient in the provision of water supply (including for firefighting purposes), wastewater and stormwater disposal, unless a reticulated supply is available.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports in part Policy 5.6.2. However, Fire and Emergency New Zealand requests that it is made explicit that water supply in the Country Living Zone is sufficient for firefighting purposes and not just for drinking supply.

Point Number

378.65

Summary of Decision Requested:

Retain Policy 5.6.8 Non-residential activities, to the extent that it anticipates non-residential activities in the Country Living Zone

AND

Amend Policy 5.6.8 Non-residential activities, as follows:

(a) Limit the establishment of ~~commercial or industrial~~ non-residential activities within the Country Living Zone unless they:

(ii) Provide for the health, safety, and well-being of the community and that service or support an identified local need.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports in part Policy 5.6.8 to the extent that these provisions anticipate non-residential activities in the Country Living Zone, but considers that the provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-residential activities in the Country Living Zone. For instance providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- Amendments sought better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number

378.66

Summary of Decision Requested:

Add a new objective to Section 4.2 Residential Zone, as follows:

Objective 4.2.(g)

To recognise and provide for non-residential activities that contribute to the health, safety and wellbeing of the community while managing their potential adverse effects to ensure that the activities complement the amenity values of the District's residential areas.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The provisions for non-residential activities in the Residential Zone focus on the management of effects rather than the opportunities of the activity.
- Emergency services have a functional and operational need to be located in close proximity to the communities they serve.
- This objective will better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number

378.67

Summary of Decision Requested:

Retain Policy 4.2.21 Maintain residential purpose, to the extent that the provision anticipates non-residential activities in the Residential Zone.

AND

Amend Policy 4.2.21 - Maintain residential purpose as follows:

Restrict the establishment of non-residential ~~commercial or industrial~~ activities, unless the activity has a strategic or operational need to locate within a residential zone, and the effects of such activities on the character or amenity of residential zones are insignificant.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand (FENZ) supports in part Policy 4.2.21 to the extent that the provision anticipate non-residential activities in the Residential Zone, but considers that the provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-residential activities in the Residential Zone.
- For instance, providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- Amendments sought better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.68

Summary of Decision Requested: **Retain** Policy 4.2.23 Non-residential activities, to the extent that the provision anticipates non-residential activities in the Residential Zone
AND
Amend Policy 4.2.23(iii) Non-residential activities as follows:
(iii) Enabling non-residential activities that provide for the health, safety, and well-being of the community and that service or support an identified local need
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand (FENZ) supports in part Policy 4.2.23 to the extent that the provision anticipate non-residential activities in the Residential Zone, but considers that the provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-residential activities in the Residential Zone.
- For instance, providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- Amendments sought better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.69

Summary of Decision Requested: **Retain** Policy 4.3.2 Character.

Decision Reasons:

- FENZ supports Policy 4.3.2 as it requires activities within the Village Zone to be self-sufficient in the provision of on-site water supply, unless a reticulated supply is available.

Point Number 378.70

Summary of Decision Requested: **Add** a new objective to Section 4.3 Village zoning, as follows:
To recognise and provide for non-residential activities that contribute to the health, safety and wellbeing of the community while managing their potential adverse effects to ensure that the activities complement the amenity values of the District's Village Zone areas.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The provisions focus on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-residential activities in the Village Zone.
- Emergency services have a functional and operational need to be located in close proximity to the communities they serve.
- These amendments better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.71

Summary of Decision Requested: **Retain** Policy 4.3.8 Residential amenity and function, to the extent that the provision anticipates non-residential activities in the Village Zone
AND
Amend Policy 4.3.8(ii)- Residential amenity and function as follows:
(ii) Provide for the health, safety, and well-being of the community.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- FENZ supports in part Policy 4.3.8 to the extent that these provisions anticipate non-residential activities in the Village Zone, but considers that the provisions focuses on the management of effects, rather than an outcome that provides clear direction in relation to the appropriateness of some non-residential activities in the Village Zone. For instance providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- Amendments sought will better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.72

Summary of Decision Requested: **Retain** Policy 4.3.11 Maintain residential function, to the extent that these provisions anticipate non-residential activities in the Village Zone
AND
Amend Policy 4.3.11 Maintain residential function as follows:
Restrict the establishment of non-residential commercial or industrial activities, unless the activity has a strategic or operational need to locate within the Village Zone, and the effects of such activities on the character and amenity are insignificant.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports in part Policy 4.3.11 to the extent that these provisions anticipate non-residential activities in the Village Zone, but considers that the provisions focus on the management of effects, rather than an outcome that provides clear

- direction in relation to the appropriateness of some non-residential activities within the Village Zone. For instance providing for emergency services that have a functional and operational need to be located in close proximity to the communities they serve.
- The amendments sought will better achieve the purpose of the RMA by providing for the health and safety of people and communities.

Point Number 378.73

Summary of Decision Requested: **Retain** Objective 4.4.1 Adverse effects of land use and development, to the extent that recognition is given to the health and well-being of communities and are protected from the adverse effects of land use and development

AND

Amend Objective 4.4.1 (a) Adverse effects of land use and development as follows:

4.4.1 (a) *The health, safety and well-being of people, communities and the environment are protected from the adverse effects of land use and development.*

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports Objective 4.4.1 to the extent that recognition is given to the health and well-being of communities and are protected from the adverse effects of land use and development. However, Fire and Emergency New Zealand recommends the wording better reflect section 5 of the RMA, which also refers to the safety of the community.

Point Number 378.74

Summary of Decision Requested: **Retain** Policy 4.5.3 Commercial purpose: Business Town Centre Zone.

Decision Reasons:

- Fire and Emergency New Zealand supports Policy 4.5.3 as the provision anticipates non-commercial activities in the Business Town Centre Zone providing for a range of activities, including community activities and facilities.

Point Number 378.75

Summary of Decision Requested: **Amend** Rule 27.2.11 Hazardous Substances, as follows:

(a) *In ALL PRECINCTS, the use, storage or disposal of any hazardous substance where:*

(i) *The aggregate quantity of hazardous substance of any hazard classification on a site is less than the quantity specified for Te Kowhai Airpark Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances);*

(ii) *The storage or use of radioactive materials is in approved equipment for medical and diagnostic purposes, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.*

(iii) Rule 27.2.11 (g),(i) excludes fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Therefore, Fire and Emergency New Zealand requests fire stations and associated firefighting activities are excluded from Rule 27.2.11 for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.76

Summary of Decision Requested: **Retain** Rule 27.4.2 Subdivision allotment size, as subdivision is a restricted discretionary activity, except for the amendments sought below

AND

Amend Rule 27.4.2 Subdivision allotment size, as follows:

(a) *Subdivision within PRECINCT B.*

(b) *Council's discretion is restricted to the following matters:...*

(x) Proposed lots must be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.

(a) *Subdivision within PRECINCT C AND D where:...*

(x) Proposed lots must be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.

Council's discretion is restricted to the following matters:...

(x) Provision of infrastructure, including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand requires proposed lots to be connected to public-reticulated water supply or water supply sufficient for firefighting purposes. Subdivision that does not comply is a Discretionary Activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.77

Summary of Decision Requested: Retain Rule 28.2.1.2 Noise General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 28.1.2.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.

Point Number 378.78

Summary of Decision Requested: Amend Rule 28.2.5 Hazardous substances, as follows:

(a) The use, storage or disposal of any hazardous substances where:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Rangitahi Peninsula Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances); and

(ii) The storage or use of radioactive materials is in approved equipment for medical and diagnostic purposes, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.

(iii) Rule 28.2.5 (g) (i) excludes fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 28.2.5 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Therefore, Fire and Emergency New Zealand requests that the fire stations and associated firefighting activities are excluded from Rule 28.2.5 for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.79

Summary of Decision Requested: Retain Rule 28.3.9.3 Building setback - Waterbodies.

Decision Reasons:

- The standard will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.80

Summary of Decision Requested: Amend Rule 28.4.1 Subdivision - General, as follows:

(a) Subdivision must comply with the following conditions...

(x) Proposed lots must be able to connect to public-reticulated water supply;

(b) Council's discretion shall be restricted to the following matters...

(x) Provision of infrastructure, including water supply for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 28.4.1 as there is no explicit requirement to connection to water reticulation. Subdivision that does not comply is a Discretionary Activity.

Point Number 378.81

Summary of Decision Requested: Amend the thresholds within Appendix 5 Hazardous Substances, as follows:

- More permissive levels for 8.3;
- More permissive levels for 8.3A;
- To better recognise that fire retardants come in different forms, including as solids rather than liquids, powders and foams, and this alters the applicable thresholds,
- To provide for the temporary storage of chemicals necessary for providing an emergency response.

AND/OR

Amend Appendix 5 Hazardous Substances in recognition that the provisions of the Hazardous Substances and New Organisms Act (HSNO) and Health and Safety at Work Act are adequate to manage risks in this regard, without an overlapping district plan framework.

OR

Delete Appendix 5 Hazardous Substances in recognition that the provisions of the Hazardous Substances and New Organisms Act (HSNO) and Health and Safety at Work Act are adequate to manage risks in this regard without an overlapping District Plan framework.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports in part Appendix 5 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that thresholds within Appendix 5 for some zones will trigger the need for consent, which could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Therefore, Fire and Emergency New Zealand requests that the thresholds within Appendix 5 be amended as follows:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.
- 2018 amendments to sections 30 and 31 of the RMA removed control of hazardous substances as an explicit function of council as the provisions of HSNO and Health and Safety at Work are adequate to managed risks, for the most part.

Point Number

378.82

Summary of Decision Requested:

Add a new activity to Rule 17.1.3, to include the following as a Restricted Discretionary Activity:

(x) Emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 17.1.3 as no provision is made for emergency service facilities. As no provision is made under this rule, emergency service facilities would instead default to non-complying activities under Rule 17.1.5.
- The default non-complying activity status is overly restrictive and inappropriate.
- Fire and Emergency New Zealand consider that emergency service facilities should be included as a restricted discretionary activity to provide for emergency services in the Business Zone for the following reasons:
 1. Fire stations must be strategically located within and throughout communities to maximise their coverage and response times so that they can efficiently and effectively provide for the health and safety of people and communities by being able to respond to emergency call outs in a timely way, thus avoiding /mitigating the potential for adverse effects associated with fire hazard and other emergencies;
 2. The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently managed by conditions of consent and subsequent matters for control;
 3. A Restricted Discretionary activity status better implements the Objectives and Policies of the Proposed District Plan.
 4. A Restricted Discretionary activity status better achieves the purpose of the RMA and better enables Fire and Emergency New Zealand to meet its statutory obligations.

Point Number

378.83

Summary of Decision Requested:

Retain Rule 17.2.1.1 Noise - General, as notified.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 17.2.1.1 as it permits noise-generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet it statutory obligations.

Point Number

378.84

Summary of Decision Requested:

Amend Rule 17.2.5.4 PI Hazardous Substances, as follows:

17.2.5.4 PI Hazardous Substances

(a) The use, storage or disposal of any hazardous substances must meet the following conditions:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Business Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).

(ii) The storage or use of radioactive materials is in approved equipment for medical and diagnostic purpose, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.

(iii) Rule 17.2.5.4 (a), (i), excludes fire stations and associated fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 17.2.5.4 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor; it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.

- As such, Fire and Emergency New Zealand requests that the fire stations and associated firefighting activities are excluded from the permitted activity Rule 17.2.5.4 for the following reasons:
 1. The 8.3 Classification (Table 5.1 contained within Appendix 5) (Hazardous Substances) has a relatively low limit in the Business Zone, and is quite low in other areas-lots of household products are eye corrosives from dishwashing powder to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or any of these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A Classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, the higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, Fire and Emergency New Zealand may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people or the environment.

Point Number 378.85

Summary of Decision Requested: **Amend** Rule 17.3.1 Height as follows:

17.3.1 Height - Building

The maximum height of any building must not exceed 10m, except hose drying towers up to 15m associated with emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports the height standards of 17.3.1, but seeks the inclusion of a specific exemption for hose drying towers in order to appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers that the inclusion of an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand.

Point Number 378.86

Summary of Decision Requested: **Retain** Rule 17.3.4.2 Building setbacks - Waterbodies.

Decision Reasons:

- Fire and Emergency New Zealand supports the building setback in 17.3.4.2 and considers that the Standard will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and surrounding environment.

Point Number 378.87

Summary of Decision Requested: **Retain** Rule 17.4.1 - General subdivision.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 17.4.1 as subdivision of land in the Business Zone is a Restricted Discretionary activity and requires that proposed lots must be connected to public-reticulated water supply.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.88

Summary of Decision Requested: **Retain** Rule 17.4.1.1 Subdivision - Multi-unit development as notified.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 17.4.1.1 as any subdivision of land in the Business Zone in the form of multi-unit development is a Restricted Discretionary activity and requires that multi-unit developments are able to be connected to water reticulation.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.89

Summary of Decision Requested: **Add** a new activity to Rule 18.1.2 Permitted Activities as a permitted activity, as follows:

(x) Emergency services training and management activities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in 18.1.2 as permitted activities to the extent that no provision is explicitly made for emergency services training and management activities.
- The rules should be expanded to provide for emergency services training and management activities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighting and emergency response.

Point Number 378.90

Summary of Decision Requested: **Add** a new activity to Rule 18.1.3 to include the following as a Restricted Discretionary activity:

(x) Emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 18.1.3 as no provision is made for emergency service facilities. As no provisions is not made under this rule, emergency service facilities would instead default to non-complying activities under Rule 18.1.5.
- The default non-complying activity status is overly restrictive and inappropriate.
- Fire and Emergency New Zealand therefore seeks the inclusion of emergency service facilities as a restricted discretionary activity to provide for emergency services in the Business Town Centre Zone for the following reasons:
 1. Fire stations must be strategically located within and throughout communities to maximise their coverage and response times so that they can efficiently and effectively provide for the health and safety of people and communities by being able to respond to emergency call outs in a timely way, thus avoiding or mitigating the potential for adverse effects associated with fire hazard and other emergencies;
 2. The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently managed by conditions of consents and subsequent matter for control;
 3. Restricted Discretionary activity status better implement the Objectives and Policies of the Proposed District Plan;
 4. Restricted Discretionary activity status better achieves the purpose of the RMA and better enables Fire and Emergency New Zealand to meet its statutory obligations.

Point Number 378.91

Summary of Decision Requested: **Retain** Rule 18.2.1.1 Noise - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 18.2.1.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations.

Point Number 378.92

Summary of Decision Requested: **Amend** Rule 18.2.5 Hazardous substances, as follows:

(a) The use, storage or disposal of any hazardous substances where:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Business Town Centre Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).

(ii) Rule 18.2.5 (a) (i) does not apply to fire stations and associated fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 18.2.5 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand therefore requests that fire stations and associated firefighting activities are excluded from the permitted activity Rule 18.2.5 for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas: lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.93

Summary of Decision Requested: **Amend** Rule 18.3.1.1 Height - Building general, as follows:

18.3.1.1 Height - Building General

The maximum height of any building must not exceed 10m, except hose drying towers up to 15m associated with emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports the height standard of 18.3.1, but an inclusion of a specific exemption for hose drying towers in order to appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand and is consistent with the typical height of similar network utility structures.

Point Number 378.94

Summary of Decision Requested: **Retain** Rule 18.3.7 Building setbacks - Waterbodies.

Decision Reasons:

- Fire and Emergency New Zealand supports the building setback in Rule 18.3.7 and considers that the Standard will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and surrounding environment.

Point Number 378.95

Summary of Decision Requested: Retain Rule 18.4.1 Subdivision - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 18.4.1 as subdivision of land in the Business Town Centre Zone is a Restricted Discretionary activity and requires that proposed lots shall be connected to public-reticulated water supply.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.96

Summary of Decision Requested: Retain Rule 18.4.2 Subdivision - Multi-unit subdivision.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 18.4.2 as any subdivision of land in the Business Town Centre Zone in the form of multi-unit development is a Restricted Discretionary activity and requires that multi-unit developments be connected to water reticulation.
- Subdivision that does not comply is a Discretionary Activity.

Point Number 378.97

Summary of Decision Requested: Add a new activity to Rule 19.1.1 Permitted Activities as a permitted activity, as follows:
(x) Emergency services training and management activities.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in Rule 19.1.1 as no provision is explicitly made for emergency services training and management activities.
- The rules should be expanded to provide for emergency services and training and management activities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function.

Point Number 378.98

Summary of Decision Requested: Add a new activity to Rule 19.1.2 Restricted Discretionary Activities, as follows:
(x) Emergency service facilities.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 19.1.2 as no provision is made for emergency service facilities. As the provision is not made under the rule, emergency service facilities would instead default to non-complying status under Rule 19.1.4.
- The default non-complying activity status is overly restrictive and inappropriate.
- The inclusion of emergency service facilities as a restricted discretionary activity to provide for emergency services in the Tamahere Business Zone for the following reasons:
 1. Fire stations must be strategically located within and throughout communities to maximise their coverage and response times so that they can efficiently and effectively provide for the health and safety of people and communities by being able to respond to emergency call outs in a timely way, thus avoiding or mitigating the potential for adverse effects associated with fire hazard and other emergencies;
 2. The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently managed by conditions of consent and subsequent matters for control;
 3. Restricted Discretionary activity status better implement the Objectives and Policies of the Proposed District Plan.
 4. Restricted Discretionary activity status better achieves the purpose of the RMA and better enables Fire and Emergency New Zealand to meet its statutory obligations.

Point Number 378.99

Summary of Decision Requested: Retain Rule 19.2.1.1 Noise - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 19.2.1.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.

Point Number 378.100

Summary of Decision Requested: Amend Rule 19.2.5 Hazardous Substances, as follows:
(a) The use, storage or disposal of any hazardous substance where:
(i) The aggregate quantity of any hazardous substance of any hazard classification on a site is less than the quantity specified for the Business Zone Tamahere in Table 6.1 contained within Appendix 5 (Hazardous Substances);
(ii) The storage or use of radioactive materials is in approved equipment for medical and diagnostic purposes, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.
(iii) Rule 19.2.5(a)(i) excludes fire stations and associated fire service operations.
AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 19.2.5 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand requests that fire stations and associated fire fighting activities are excluded from Rule 19.2.5 for the following reasons:

1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.101

Summary of Decision Requested: **Amend** Rule 19.3.1 Height - Building, to include the following:

19.3.1 Height- Building

The maximum height of any building must not exceed 10m, except hose drying towers up to 15m associated with emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports the height standard of Rule 19.3.1, however the inclusion of a specific exemption for hose drying towers will appropriately provide for the operational requirements of Fire and Emergency New Zealand.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers the inclusion of an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand and is consistent with the typical height of similar network utility structures.

Point Number 378.102

Summary of Decision Requested: **Add** new activities to Rule 20.1.1 Permitted Activities, as follows:

(x) Emergency services training and management activities

(x) Emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in Rule 20.1.1 as no provision is explicitly made for emergency services training and management activities, or emergency service facilities.
- The rules should be expanded to provide for emergency services training and management activities and emergency service facilities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function.
- Such activities are strongly compatible with an industrial environment.

Point Number 378.103

Summary of Decision Requested: **Retain** Rule 20.2.3.1 Noise - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 20.2.3.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.

Point Number 378.104

Summary of Decision Requested: **Amend** Rule 20.2.6 Hazardous Substances, as follows:

(a) The use, storage or disposal of any hazardous substance where:

(i) the aggregate quantity of a hazardous substance of any hazard classification on a site is less than the quantity specified for the Industrial Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).

(ii) Rule 20.2.6 (a), (i) excludes fire stations and associated fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 20.2.6 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand requests that fire stations and associated firefighting activities are excluded from the Rule 20.2.6 for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.

2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.105

Summary of Decision Requested: Retain Rule 20.3.1 Building height.

Decision Reasons:

- Fire and Emergency New Zealand supports the height requirements of Rule 20.3.1 in that it provides for the operational requirements of Fire and Emergency New Zealand in relation to the height of buildings and structures associated with emergency service facilities.
- Fire stations are single storied buildings of approximately 8-9m in height. Some fire stations also include a hose drying tower of between 12-15m in height. Fire and Emergency New Zealand considers that the provision for fire station buildings and associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand.

Point Number 378.106

Summary of Decision Requested: Retain Rule 20.3.4.2 Building setbacks - Waterbodies.

Decision Reasons:

- Fire and Emergency New Zealand supports the building setback in Rule 20.3.4.2 and considers that it will safeguard the wellbeing of communities in accordance with the purpose of the RMA and the purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.107

Summary of Decision Requested: Retain Rule 20.4.1 Subdivision general, as subdivision of land is a restricted discretionary activity.

AND

Amend Rule 20.4.1 Subdivision- General as follows:

(a) Subdivision must comply with all of the following conditions:

(i) Proposed lots must have a minimum net site area of 1000m²;

(ii) Proposed lots must have an average area of at least 2000m²; and

(iii) No more than 20% rear lots are created.

(iv) Proposed lots must be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.

(b) Council's discretion is restricted to the following matters:

(i) The extent to which a range of future individual activities can be accommodated; and

(ii) Amenity values.

(iii) Provision of infrastructure, including water supply, for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 20.4.1 as subdivision of land in the Industrial Zone is a Restricted Discretionary activity, however Fire and Emergency New Zealand requires that proposed lots shall be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.
- Subdivision that does not comply is a Discretionary Activity.
- The changes sought promote consistency across all zones in the District Plan.

Point Number 378.108

Summary of Decision Requested: Add new activities to Rule 21.1.1 Permitted Activities to include the following:

(x) Emergency services training and management activities.

(x) Emergency service facilities.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in Rule 21.1.1 as no provision is explicitly made for emergency services training and management activities, and emergency service facilities.
- The rules should be expanded to provide for emergency services training and management activities, and emergency service facilities in order to better achieve the sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighting and emergency response.
- Such activities are strongly compatible with an industrial environment.

Point Number 378.109

Summary of Decision Requested: Retain Rule 21.2.3.1 Noise - General.

Decision Reasons:

- Fire and Emergency New Zealand supports Rule 21.2.3.1 as it permits noise generated by emergency sirens. This exemption appropriately provides for the operational requirements of Fire and Emergency New Zealand and enables them to meet its statutory obligations in a manner that provides for the on-going health and safety of people and communities.

Point Number 378.110

Summary of Decision Requested: Amend Rule 21.2.6 Hazardous Substances, as follows:

(a) *The use, storage or disposal of any hazardous substance where:*

(i) *the aggregate quantity of hazardous substance of any hazard classification on a site is less than the quantity specified for the Heavy Industrial Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).*

(ii) Rule 21.2.6 (g), (i) excludes fire stations and associated fire service operations.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 21.2.6 as while fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor, it is possible that the permitted provisions may not enable for this, and could affect Fire and Emergency New Zealand's ability to operate as easily and smoothly as needed.
- Fire and Emergency New Zealand requests that fire stations and associated firefighting activities are excluded from the Rule 21.2.6 for the following reasons:
 1. The 8.3 classification (Table 5.1 contained within Appendix 5 (Hazardous Substances)) has a relatively low limit in the Business Town Centre Zone, and is quite low in other areas- lots of household products are eye corrosives from dishwashing to laundry powder. This would limit and potentially prevent Fire and Emergency New Zealand having a HAZMAT vehicle based in this zone because they carry neutralizing agents which are eye corrosives. A greater concern is that some of Fire and Emergency New Zealand's fire retardants and foams also have this classification and this limit could potentially require that Fire and Emergency New Zealand need a resource consent to hold a small amount or and other these chemicals on site, as a lower limit would be largely taken up by ordinary household chemicals used on site.
 2. The 8.3A classification is for eye corrosion. A person is only affected by this hazard class if they come into direct contact with a product with this classification. This hazard is also managed under the health and safety at work and HSNO legislation usually via labeling and PPE requirements. Fire and Emergency New Zealand considers that there is no logic in restricting the amount of these substances held as it relates to Fire and Emergency New Zealand operations, particularly if they are in enclosed containers for systems.
 3. Some of Fire and Emergency New Zealand's fire retardants are solids rather than liquids and the reasons for the limits specified in the plan do not make sense for solids. Fire and Emergency New Zealand current main fire retardant is a powder but Fire and Emergency New Zealand are also looking at new foams which come in bricks. As such, higher restrictions for waterways do not make sense for these products as they do not leak or flow.
 4. Fire and Emergency New Zealand often requires the temporary storage of chemicals necessary for providing an emergency response, during an emergency and within a short period after the emergency, i.e. there is a small grace period for example if Fire and Emergency New Zealand need a truck to remove a container which has firefighting chemicals in it, they may need to wait for a few working days after the emergency has finished for a contractor to do that work. Not providing for this could restrict Fire and Emergency New Zealand's ability to respond to bush or other major events, e.g. large acid spills and other HAZMAT events. This could also result in a breach of the RMA in order to bring in the necessary products to resolve the issue and prevent harm to people/the environment.

Point Number 378.111

Summary of Decision Requested: Retain Rule 21.3.1 Height - General.

Decision Reasons:

- Fire and Emergency New Zealand supports height requirements of Rule 21.3.1 in that it provides for the operational requirements of Fire and Emergency New Zealand in relation to the height of buildings and structures associated with emergency service facilities.
- Fire stations are single storied buildings of approximately 8-9m in height and are typically able to achieve the height standards in a District Plan. Some fire stations also include a hose drying tower of between 12-15m in height.
- Fire and Emergency New Zealand considers that the inclusion of an exemption for associated structures better provides for the health and safety of the community by enabling the efficient functioning of Fire and Emergency New Zealand and is consistent with the typical height of similar network utility structures.

Point Number 378.112

Summary of Decision Requested: Retain Rule 21.3.4.2 Building setback - Waterbodies.

Decision Reasons:

- Fire and Emergency New Zealand supports the building setback in Rule 21.3.4.2 and considers it will safeguard the wellbeing of communities in accordance with the purpose of the RMA and purpose of Fire and Emergency New Zealand in the effective protection of lives, property and the surrounding environment.

Point Number 378.113

Summary of Decision Requested: Retain Rule 21.4.1 Subdivision - General, as subdivision of land is a restricted discretionary activity.

AND

Amend Rule 21.4.1 Subdivision - General, as follows:

RD1

a) Subdivision must comply with all of the following conditions:

(i) proposed lots must have a minimum net site area of 1000m²;

(ii) proposed lots must have an average area of at least 2000m²; and

(iii) no more than 20% rear lots are created.

(iv) proposed lots must be connected to public-reticulated water supply or water supply sufficient for firefighting purposes.

RD2

(a) Council's discretion is restricted to the following matters:

(i) the extent to which a range of future industrial activities can be accommodated; and

(ii) Amenity values.

(iii) Provision of infrastructure, including water supply, for firefighting purposes.

AND

Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand support Rule 20.4.1 as subdivision of land in the Industrial Zone is a Restricted Discretionary activity, however, Fire and Emergency New Zealand requires that proposed lots shall be connected to public-reticulated water supply or water

- supply sufficient for firefighting purposes.
- Subdivision that does not comply is a Discretionary Activity.
- The changes sought promotes consistency across all zones in the District Plan.

Point Number 378.114

Summary of Decision Requested: **Add** a new activity to Rule 22.1.2 Permitted Activities, as follows:
(x) Emergency services training and management activities.
 AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes the range of activities listed in Rule 22.1.2 as no provision is explicitly made for emergency services training and management activities.
- The rules should be expanded to provide for emergency services training and management activities in order to better achieve sustainable management purpose of the Act and better enable Fire and Emergency New Zealand to achieve its statutory function by facilitating firefighter and emergency response.

Point Number 378.115

Summary of Decision Requested: **Add** a new activity to Rule 22.1.3 Restricted Discretionary Activities, as follows:
(x) Emergency service facilities
 AND
Amend the Proposed District Plan to make further or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Fire and Emergency New Zealand opposes Rule 22.1.3 as no provision is made for emergency service facilities. As no provision is made under this rule, emergency service facilities would default to non-complying activities under Rule 22.1.5.
- The default non-complying activity status is overly restrictive and inappropriate.
- Fire and Emergency New Zealand seeks the inclusion of emergency service facilities as a restricted discretionary activity to provide for emergency services in the Rural Zone for the following reasons:
 - Fire stations must be strategically located within and throughout communities to maximise their coverage and response times so that they can efficiently and effectively provide for the health and safety of people and communities by being able respond to emergency call outs in a timely way, thus avoiding or mitigating the potential for adverse effects associated with fire hazard and other emergencies;
 - The actual or potential effects of fire stations are minor and can be adequately predicted and subsequently
 - managed by conditions of consent and subsequent matters for control;
 - Restricted Discretionary activity status better implement the Objectives and Policies of the Proposed District Plan.
 - Restricted Discretionary activity status better achieves the purpose of the RMA and better enables Fire and Emergency New Zealand to meet its statutory obligations.

Submitter Number: 379 **Submitter:** Lisa Gardiner

Organisation: Ngati Hau Iwi Trust

Point Number 379.1

Summary of Decision Requested: No specific decision sought, however the submitter supports the general direction that Waikato District Council has taken in the development of the Proposed Plan overall.

Decision Reasons:

- No reasons provided.

Point Number 379.2

Summary of Decision Requested: **Retain** Chapter 2 – Tangata Whenua, which specifically addresses tangata whenua concerns, issues, and opportunities.

Decision Reasons:

- This aligns to key principles of the Ngati Hau Environmental Management Plan.
- Chapter 2 of the Proposed Plan summarises the importance of Iwi Management Plans in terms of not only articulating the aspirations of tangata whenua, but also highlighting the requirements under the RMA for territorial authorities to take into account these documents when preparing or changing a district plan.

Point Number 379.3

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure:
 (a) Ngati Hau Iwi Trust's role as kaitiaki within the Waikato District is recognised; and
 (b) The aspirations and priorities for Ngati Hau Iwi Trust, as set out in the Ngati Hau Environmental Management Plan, are taken into account within the provisions of the Proposed Plan.
 AND
Amend the Proposed District Plan, including Section C (Rules) to make consequential amendments to give effect to the matters raised in the submission and relief sought.

Decision Reasons:

- The submitter has developed a Ngati Hau Environmental Management Plan 'Te Rautaki Tamata Ao Turoa o Hau' in collaboration with our marae, who identified their aspirations and priorities in becoming fully functional, sustainable and fulfilling the principles of Tumaukitanga and Kingitanga.

2. The Environmental Management Plan documents the aspirations and priorities for Waimakariri Marae, Te Iti o Haua Marae, Rukumoana Marae, Kai-a-te-mata Marae and Raungaiti Marae.
3. The vision of the plan is to restore belief that 'We are a noble and self-sustaining people, from days past, today and forevermore'.
4. The Mission is to protect, manage and grow our Ngati Huau resources to support the Kingitanga through Te Tumuaki o Te Kingitanga and grow the overall well-being of Ngati Haua.
5. The Environmental Management Plan provides an opportunity for Ngati Haua Iwi Trust to align specific aspirations for collective impact across the Marae. It also provides an opportunity for local authorities, central government and other agencies to see how they can work with Ngati Haua to collaborate on projects and/or provide technical support, advice, funding or opportunities for capacity building.
6. The Environmental Management Plan is an expression of our values, frustrations, aspirations and position statements in relation to our taiao. Many of these are common for all people (e.g. clean air and water) and many are specific to us, as Ngati Haua (e.g. protection of our wahi tapu).
7. The Environmental Management Plan enables us to exercise our responsibilities as Kaitiaki, in particular ensuring that we can:
 - a. Restore the mauri of our taiao
 - b. Swim in, drink from and gather food from our rivers and streams
 - c. Provide for the cultural, social and economic wellbeing of our people.
 - d. Revitalize our traditional knowledge and practices.
 - e. Build the capability of our future kaitiaki.
8. The submitter wishes to ensure their responsibilities as kaitiaki within the Environmental Management Plan, are taken into account within the Proposed Waikato District Plan as required under section 74(2A) of the RMA.

Point Number	379.4
Summary of Decision Requested:	Amend Chapter 2 Tangata Whenua, to include specific reference to the Ngati Haua Environmental Management Plan. AND Amend the Proposed District Plan, including Section C (Rules) to make consequential amendments to give effect to the matters raised in the submission and relief sought.
Decision Reasons:	<ol style="list-style-type: none"> 1. The submitter has developed a Ngati Haua Environmental Management Plan 'Te Rautaki Tamata Ao Turoa o Haua' in collaboration with our marae, who identified their aspirations and priorities in becoming fully functional, sustainable and fulfilling the principles of Tumuakitanga and Kingitanga. 2. The Environmental Management Plan documents the aspirations and priorities for Waimakariri Marae, Te Iti o Haua Marae, Rukumoana Marae, Kai-a-te-mata Marae and Raungaiti Marae. 3. The vision of the plan is to restore belief that 'We are a noble and self-sustaining people, from days past, today and forevermore'. 4. The Mission is to protect, manage and grow our Ngati Haua resources to support the Kingitanga through Te Tumuaki o Te Kingitanga and grow the overall well-being of Ngati Haua. 5. The Environmental Management Plan provides an opportunity for Ngati Haua Iwi Trust to align specific aspirations for collective impact across the Marae. It also provides an opportunity for local authorities, central government and other agencies to see how they can work with Ngati Haua to collaborate on projects and/or provide technical support, advice, funding or opportunities for capacity building. 6. The Environmental Management Plan is an expression of our values, frustrations, aspirations and position statements in relation to our taiao. Many of these are common for all people (e.g. clean air and water) and many are specific to us, as Ngati Haua (e.g. protection of our wahi tapu). 7. The Environmental Management Plan enables us to exercise our responsibilities as Kaitiaki, in particular ensuring that we can: <ol style="list-style-type: none"> a. Restore the mauri of our taiao b. Swim in, drink from and gather food from our rivers and streams c. Provide for the cultural, social and economic wellbeing of our people. d. Revitalize our traditional knowledge and practices. e. Build the capability of our future kaitiaki. 8. The submitter wishes to ensure their responsibilities as kaitiaki within the Environmental Management Plan, are taken into account within the Proposed Waikato District Plan as required under section 74(2A) of the RMA.

Submitter Number:	380	Submitter:	Norman Hill
Organisation:	Waahi Whaanui Trust		
Point Number	380.1		
Summary of Decision Requested:	Amend the name Huntly to Raahui Pookeka in the Proposed District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> • Whanui aims to reclaim the name Raahui Pookeka and to establish principles of beauty based on Huntly's original name. • The Waikato –Tainui leader, Te Putu, christened Raahui Pookeka, he embraced the need for sustainability of the scarce resources, fair and equitable distribution of eel stocks, practical leadership for Iwi, Hapu and Whanau backing and working together for their livelihoods. • Raahui Pookeka, the original name for Huntly, is more appropriate recognising the environment, people and history of the area. • The colonial name for Huntly stems from Scotland, the place of the first Postmaster who arrived in 1877 to make him feel "at home" while he lived in the community. 		
Point Number	380.2		
Summary of Decision Requested:	No specific decision sought, but the submitter seeks that the Waikato District Council communicate and engage directly with Whaanui in all discussions, planning and development of master plans, and blueprint scoping within and for Raahui Pookeka (Huntly).		
Decision Reasons:	<ul style="list-style-type: none"> • A key responsibility is to assist whanau and hapu in order to fulfil responsibilities as kaitiaki o nga taonga tuku iho, to exercise full guardianship and custodial protection and care of all-natural resources within the tribal boundaries. • Representing the whanau and hapu of the area, Whaanui has the responsibility to ensure that all environmental issues are addressed. 		

Point Number	380.3
Summary of Decision Requested:	No specific decision sought, but submission seeks that the Waikato District Council immediately commit resources to a programme of restoration and reconstruction of Raahu Pookeka (Huntly).
Decision Reasons:	<ul style="list-style-type: none"> • This is to achieve the collective aspirations and expectations for Maori in Raahui Pookeka. • Whanui is committed to uphold the cultural, environmental and historical integrity of our people by: <ul style="list-style-type: none"> i. Actively promoting our cultural, social, economic and educational development. ii. Sponsoring strategic partnership and alliances that contribute to the unity and diversity of our wider community. iii. Encouraging the health and well-being of all people.
Point Number	380.4
Summary of Decision Requested:	No specific decision sought, but submission states that the Tangata Whenua chapter discusses statutory responsibilities that are required of the Treaty of Waitangi, The Waikato River Settlement Act 2010, the Resource Management Act and the Waikato River Vision and Strategy, amongst others.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	380.5
Summary of Decision Requested:	Amend the rules to enable earthworks in Significant Natural Areas associated with Marae, papakainga and dwellings as a permitted activity.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	380.6
Summary of Decision Requested:	Amend the Proposed District Plan to ensure that Low Impact Design is utilised in all new developments and to ensure best practice low impact design is used for the management of stormwater is forced to reduce the demand and load on infrastructure.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	380.7
Summary of Decision Requested:	Add clear provisions to include precautionary policies to regulate the outdoor use of genetically modified organisms AND Add provisions to prohibit the release of GMOs on land and make field trials a discretionary activity with performance standards in regard to liability and the posting of bonds.
Decision Reasons:	<ul style="list-style-type: none"> • Whanui are concerned about the potential risks posed by releasing GMOs into the environment. • It considers that the science is unproven, and the risk of biological and ecosystem harm is too great not to include precautionary provisions for GMOs under local plans. • Equally important is the risk to social, economic, and cultural wellbeing, even if the Waikato District Council considers that GMOs pose no biological or ecosystem risks. • This is because GMO contamination could have significant adverse effects on the economic markets, and way of life, for both organic and non-GMO food producers, and the mauri and tikanga of tangata whenua. • The Waikato Tainui Environmental Plan takes a precautionary approach to GMOs. • It specifies that applications for new organisms and GMOs must demonstrate that there are no risks to humans, indigenous ecosystems, indigenous species, or primary production. • Whanui takes a precautionary approach to GMOs. • It specifies that any applications for the introduction of new or GMOs into the environment must ensure that there is no risk to indigenous flora and fauna, ecosystems, or to the health and wellbeing of Waikato Tainui Iwi. • A number of councils around New Zealand have been moving to protect their primary producers and communities by introducing precautionary or prohibitive policies. • Auckland Council, Far North District Council, Whangarei District Council and Hastings District Council have all included provisions in their planning documents to regulate the outdoor use of genetically modified organisms. • All four councils have prohibited the release of GMOs on land and made field trials a discretionary activity with performance standards in regard to liability and the posting of bonds.
Point Number	380.8
Summary of Decision Requested:	No specific decision sought, but submission seeks that Waikato District Council resource and support Whaanui to develop and undertake initiatives, activities and projects that improve the education, employment opportunities, health and well-being of the people and community of Whaanui.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	380.9
Summary of Decision Requested:	No specific decision sought, but the submission generally supports the direction that the Waikato District Council has taken in the development of the Proposed District Plan.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	380.10

Summary of Decision Requested:	No specific decision sought, but the submission supports the introduction of a specific chapter addressing Tangata Whenua concerns, issues and opportunities.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	380.11
Summary of Decision Requested:	No specific decision sought, but the submitter seeks to work together in partnership with Waikato District Council to enhance cultural relationships that Whaanui has with the Waikato River and including initiatives intended to address loss of erosion of mana, historical knowledge, tikanga, tribal identity and including identifying, preserving and where appropriate protecting waahi tapu.
Decision Reasons:	<ul style="list-style-type: none"> Whaanui reaffirm the passing of the legislation of the Waikato-Tainui Claims (Waikato River) Settlement Act 2010, which instigated the Vision and Strategy for the Waikato River which provides Waikato-Tainui co-management of the Waikato River from the Karapiro Dam to Te Puaha o Waikato (Port Waikato). The Vision and Strategy also forms part of the operative Waikato Regional Policy Statement. The discussion within the region now considers what "restore and protect" looks like in relation to activities and impacts on the Waikato River and its resources.
Point Number	380.12
Summary of Decision Requested:	Retain the restricted discretionary activity status for earthworks in Maaori Sites of Significance and Maaori Areas of Significance.
Decision Reasons:	<ul style="list-style-type: none"> Waikato-Tainui support this as early warning when such activities are being undertaken.

Submitter Number:	381	Submitter:	Rawiri Bidois
Point Number	381.1		
Summary of Decision Requested:	Council shall provide rates relief for the loss of use to the private landowner where an identified Significant Natural Area is located on private land.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers the idea of applying restrictions to the Significant Natural Areas for environmental and aesthetic purposes is meritorious to the council community and its ratepayers. However in doing so ignores two important points: <ul style="list-style-type: none"> Firstly, by council applying the Significant Natural Area identifier, the private landowner is being robbed of the freehold and unfettered use of that land for ever, and for no compensation. The submitter considers this amounts to the same as was done to Maori in the 1800's (Eg: Raupatu, Public Works takings of the Tokanui land block for the Waikeria Prison at one end and Hospital at the other etc etc), with the flick of the pen. Additionally it is difficult to believe and trust the machinery of Local and Central government, that they won't change the rules in the future to accommodate new best practise thinking of the time, to the detriment of the current thinking. eg: Significant Natural Area today turned into a highway tomorrow, or tree planting for Carbon Credits the day after. Secondly, the council will be socialising the gains to the community, at the expense of the private landowner. 		

Submitter Number:	382	Submitter:	Brent Trail
Organisation:	Surveying Services Ltd		
Point Number	382.1		
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 24.4.1 Subdivision - General.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	382.2		
Summary of Decision Requested:	Amend Rule 24.4.2 RD1 (a) (i) Subdivision -Te Kowhai and Tuakau, by reducing the net site area from 3000m2 to 2500m2.		
Decision Reasons:	<ul style="list-style-type: none"> For the reasons relating to sustainability and 2500m2 being adequate for wastewater disposal. 		
Point Number	382.3		
Summary of Decision Requested:	No specific decision sought, but submission states support for Rule 24.4.4 Subdivision - Amendments to cross lease and flats plans and conversions.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	382.4		
Summary of Decision Requested:	Delete Rule 24.4.5 RD1 (a)(ii) Title boundaries.		
Decision Reasons:			

- Submission states explanation covered in rural section containing this rule.

Point Number 382.5

Summary of Decision Requested: Delete Rule 24.4.7 Title boundaries - Maaori sites and Maaori areas of significance to Maaori.

Decision Reasons:

- Submission states reasons given under rural rules.

Point Number 382.6

Summary of Decision Requested: No specific decision sought, but submission states support for Rule 24.4.10 Subdivision - Building Platform.

Decision Reasons:

- No reason provided.

Point Number 382.7

Summary of Decision Requested: Amend Rule 24.4.11 RD1 (a) Subdivision Creating Reserves, by replacing 50% with 20%.

Decision Reasons:

- This rule is not helpful to sustainable development and cost of housing unless Council is doing the development or reimbursing the developer for additional roading requirements due to this rule.
- 20% is reasonable.

Submitter Number: 383 **Submitter:** Paul Arnesen

Organisation: Planning Focus Limited

Point Number 383.1

Summary of Decision Requested: Amend the zoning of the following properties in Ohinewai from Rural Zone to Industrial Zone:

- 52 Lumsden Road (Lot 3 Deposited Plan 474347)
- 56 Lumsden Road (Lot 2 Deposited Plan 474347)
- 58 Lumsden Road (Lot 1 Deposited Plan 474347)
- 109 Tahuna Road (Part Allotment 436A Parish of Whangamarino)
- 147 Ohinewai South Road (Lot 1-3 Deposited Plan 15270)
- Ohinewai South Road; (Part Allotment 36 Parish of Taupiri)
- 159 Ohinewai South Road; (Lot 1 Deposited Plan 63073)
- 181 Ohinewai South Road; (Part Allotment 36 Parish of Taupiri)

AND

Amend the zoning the following properties from Country Living Zone to Industrial Zone:

- 123 Ohinewai South Road, Ohinewai
- 101 Ohinewai South Road, Ohinewai
- 117 Ohinewai South Road, Ohinewai
- 183 Ohinewai South Road; (Part Lot 1 Deposited Plan 90412 and Allotment 816 Taupiri Parish and Part Allotment 817 Taupiri Parish)

See the map attached to the submission.

Decision Reasons:

- There is insufficient industrial zoned land in Huntly to provide for employment growth, and the subject land is suitably located with regard to the residential neighbourhood of Huntly while being sufficiently distant to avoid adverse effects associated with industrial activities.
- Both areas have access to State Highway 1 via the existing Tahuna Road interchange.

Submitter Number: 384 **Submitter:** Te Kauwhata Community Committee

Point Number 384.1

Summary of Decision Requested: Amend Appendix 10.5 Character Statements for Te Kauwhata Town Centre 2017, as per but not limited to the suggestions in the document attached to the submission.

Some points for consideration are, but not limited to:

- Ensure that there are fluid connections to walkways/cycleways and also to include those trails etc that are envisaged in the future;
- Public transport options;
- Smaller/modern retail features with more options/opportunities eg: rental/lease opportunities for small business in Te Kauwhata to have a physical presence and to be able to contribute more fully to the local economy;
- Consideration of any effect (positive or negative) of mixed zoning options ie: Residential and Retail;
- Enhanced/improved cosmetic features whilst retaining the heritage features of the main street eg: better/brighter/modern appearance/features of the retail sector; town centre feature(s)/plantings, improved parking, more park bench setting, usage of the currently vacant land in town;
- Work with Mana Whenua regarding the development and promotion of cultural features in Te Kauwhata ie: Cultural Repatriation.

Decision Reasons:

- The town character statement should more accurately reflect the village community of Te Kauwhata as it is today, in order to better guide the future direction, yet maintaining links to the past.

Submitter Number:	385	Submitter:	Peter Ward
Organisation:	Ward Demolition		
Point Number	385.1		
Summary of Decision Requested:	Amend the zoning of the property at 25 Island Block Road, Meremere, and the property to the east of 25 Island Block Road, Meremere with Legal descriptions LOT 2 DPS 14402 SECS 8 12 14 SO 459323 SEC 6 SO 41728926 SO 383114 ALLOT 679 WHANGAMARINO PSH SO 41542 and PT ALLOT 427 WHANGAMARINO PSH DP 21294 from Rural Zone to Industrial Zone and Business Zone (see map attached to the submission).		
Decision Reasons:	<ul style="list-style-type: none"> • The change of zoning would support the following: <ul style="list-style-type: none"> - Employment land, sustainable communities and economic development. - Integrated infrastructure supply enabling sustainable economic development. - An integrated structure planned business precinct at a scale able to provide for an evolving range of business and industrial activities. - Sustainable environmental outcomes - Deals with land otherwise sterilised by overhead power line corridors. - Works in partnership with Council and iwi. • Refer to the supporting document: letter and maps for full rationale. 		

Submitter Number:	386	Submitter:	Pokeno Village Holdings Limited
Point Number	386.1		
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to better reflect good plan drafting practice. AND Any further, other or consequential relief necessary		
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan does not represent good practice. For example objectives and policies are separated from methods and it is therefore unclear which methods are intended to give effect to which objectives and policies. • The approach of cascading to a discretionary upon non-compliance with a standard is unnecessary and inappropriate. As a matter of good practice, the Proposed District Plan should only utilize full discretionary activity status where it is difficult to clearly identify and define the key effects to be managed and assessed. • The development of the Proposed District Plan does not appear to have taken account of the draft National Planning Standards in terms of format, structure and zones. 		
Point Number	386.2		
Summary of Decision Requested:	Amend the Proposed District Plan to remove ambiguities and avoid disputes over interpretation. AND Any further, other or consequential relief necessary.		
Decision Reasons:	<ul style="list-style-type: none"> • For example, permitted activities are noted as having "activity specific conditions" but it is unclear what is meant by the term "condition" as the conditions appear to be permitted standards. Permitted standards are listed elsewhere in addition to activity specific conditions. 		

Point Number	386.3		
Summary of Decision Requested:	Amend the Proposed District Plan to better give effect to the Regional Policy Statement. AND Any further, other or consequential relief necessary.		
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan does not adequately give effect to the Waikato Regional Policy Statement. • A number of objectives and policies have been drafted in a manner that does not adequately give effect to the Regional Policy Statement, including but not limited to Policies 3.1.2, 3.2.2, 3.2.3, 4.1.8 and 4.5.18 		

Point Number	386.4		
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to apply the provisions of Plan Change 24 and Plan Change 21 to the full extent of the Pokeno Structure Plan Area AND Any consequential amendments to other parts of the Proposed District Plan to address the concerns raised in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • The comprehensive planning approach to the development of Pokeno introduced through PC24 and PC21 and primarily implemented by Pokeno Village Holdings Limited (PVHL) has been ignored and dismissed through the review of the WDP:FS and preparation of the PVDP without: <ol style="list-style-type: none"> a) Any specific engagement with PVHL including any discussion of the workability of the provisions; and b) Adequate consideration of this decision through the Council's s32 analysis. • The Section 32 analysis relating to the development of Pokeno did not have regard to all relevant information such as the technical analysis supporting the rezoning of additional land areas in Pokeno was inadequate. • The Section 32 evaluation failed to properly analyse the efficiency and effectiveness of replacing the PC24 and PC21 provisions with an entirely new planning framework, notwithstanding the recent history of planning for Pokeno. • To disregard the planning framework introduced through PC24 and PC21 is inconsistent with the sustainable management principles of Part 2 of the RMA. 		

Point Number 386.5

Summary of Decision Requested: Amend the zoning of the property at Lot 19, Yashili Drive, Pokeno from a split Residential / Light Industrial Zoning to Light Industrial Zone

AND

Amend the zoning of the property at Lot 30 Yashili Drive, Pokeno from a split Residential / Light Industrial Zoning to Light Industrial Zone

Decision Reasons:

- The Proposed District Plan shows lot 19 and 30 as zoned partly Residential and partly Light Industrial Zone.
- There is no good reason for this split.
- Applying two different zones to a single land parcel is efficient.

Point Number 386.6

Summary of Decision Requested: Amend the Proposed District Plan to include an appropriate definition of the term "structure plan"

AND

Amend the Proposed District Plan to provide sufficient guidance (in line with recent good practice) for what is required for a structure plan process including (but not limited to) expectations of the development of new plan provisions to give effect to structure plans

AND

Amend the Proposed District Plan to include guidance for a structure plan approval process

AND

Amend the Proposed District Plan to include confirmation that the term "structure plan" applies to existing structure plan areas, including but not limited to the Pokeno Structure Plan Area

AND

Add a new section to the Proposed District Plan specifically for structure plans and associated plan provisions.

Decision Reasons:

- A number of provisions (including but not limited to Rule 16.4.1) refer to "structure plans" and "approved structure plans", however:
 - There is no definition of the term structure plan
 - There is no guidance as to Council's expectations as to what would be required for a structure plan
 - It is unclear whether the term "structure plan" applies to existing adopted structure plans (such as the Pokeno Structure Plan)
 - There is no guidance as to what the approval process is

Point Number 386.7

Summary of Decision Requested: Delete the density targets for Pokeno (as contained in Policy 4.1.5(b) Density).

OR

Amend Policy 4.1.5 Density to be "greater than 10 dwellings per hectare" in accordance with the Regional Policy Statement

Decision Reasons:

- The Proposed District Plan provides no guidance as to how density per hectare will be calculated. For example:
 - It is assumed that every hectare of residential zoned land will achieve 12-15 households per hectare;
 - It is unclear whether this includes or excludes areas of environmental protection, roads and reserves;
 - For structure plan areas, it is unclear whether density per hectare will be assessed as an average over the whole area
- Given the lack of guidance it is assumed that every hectare of residential land is required to achieve 12-15 households per hectare but this approach does not reflect the reality of environmental constraints within the residential zone or the policy direction to provide residential choice.
- The various residential blocks in Pokeno achieve densities between 10.5-13.8 lots per hectare which are consistent with the Regional Policy Statement requirements of greater than 10 dwellings per hectare.

Point Number 386.8

Summary of Decision Requested: Amend the Proposed District Plan's approach to achieving housing variety by:

- Providing for the full range of housing choice;
- Recognising the role of personal choice in housing provision;
- Recognising other constraints to achieving higher densities such as physical constraints and the provision of infrastructure; and
- Recognising that housing variety is unlikely to be achieved through a single residential zone and density targets.

Decision Reasons:

- The list of housing typologies in Policy 4.2.17 is not extensive and thus does not represent housing choice.
- The list of housing typologies does not recognize that constraints such as contour or personal choice may not always allow for higher densities.
- The physical characteristics of the remaining undeveloped land at Pokeno limits the achievable density of housing without the need for significant earthworks, with associated adverse environmental effects.
- While the objectives and policies seek to provide for higher residential densities and a variety of housing types, it is unclear how the methods in the Proposed District Plan will enable such variety to be delivered.
- Policies 4.2.17 and 4.1.5(b) are contradictory insofar as they seek to enable housing choice whilst requiring a fairly limited density range to be achieved.
- The scale of higher density housing types that would be required within the Pokeno Structure Plan Area to achieve the density targets of between 12-15 dwellings per hectare would be an inappropriate outcome for Pokeno and would likely significantly impact on the character of Pokeno and would be inconsistent with Proposed Objective 4.2.1 of the Proposed District Plan which requires the maintenance of the residential character of the Residential Zone.

Point Number 386.9

Summary of Decision Requested: Amend the Proposed Waikato District Plan's approach to management of the Pokeno Town Centre (including Policy 4.5.18 Pokeno Town Centre and associated implementation methods) to reflect the need for the Pokeno Town Centre to service the surrounding community.

Decision Reasons:

- While the land surrounding Pokeno has undergone significant change from rural to urban over the last decade, the town centre has hardly changed at all, meaning Pokeno residents need to travel to other urban areas such as Pukekohe for basic services.
- Policy 4.5.18 and associated implementation methods do not recognize the ongoing urbanisation of the Pokeno Structure Plan area and are thus inconsistent with Part 2 of the RMA, particularly with regards to enabling people to provide for the social and economic wellbeing.

Point Number 386.10

Summary of Decision Requested: Amend the Proposed District Plan to include additional residential zone types - consistent with those proposed through the Draft National Planning Standards - in particular a "Medium-density residential" zone

AND

Any further, other or consequential relief necessary

Decision Reasons:

The objectives and policies of the "Residential Zone" (as set out in Chapter 4.2 of the Proposed District Plan) in particular Proposed Objective 4.2.16 and associated Policies 4.2.17 and 4.2.18 all seek to enable a wide development of housing types, including high density residential development and "integrated residential development". Rather than trying to provide for multiple housing types with a range of varying residential densities with a single Residential Zone, the Proposed District Plan should be amended to include additional residential zone types.

Point Number 386.11

Summary of Decision Requested: Retain Rule 16.3.5 RD1 Daylight admission where non-compliance with the daylight admission standards is assessed as a restricted discretionary activity.

Decision Reasons:

Any non-compliance with Rule 16.3.5 should also be assessed as a restricted discretionary activity rather than a full discretionary activity.

Point Number 386.12

Summary of Decision Requested: Amend the zoning of 160ha west of Munro Road, Pokeno (known as Pokeno West) from Residential Zone to Rural Zone as it is in the Operative District Plan.

Decision Reasons:

- The land at Pokeno West was deliberately excluded from the Pokeno Structure Plan Area because of limitations including the steepness of the slope and associated erosion risk, the significant challenges associated with managing stormwater and flooding risk and the lack of defensible visual boundary.
- The Section 32 analysis is extremely limited, with notable omissions. These omissions are inconsistent with and thus do not give effect to the RPS.
- The submission identifies issues in terms of the following:
 - Consultation
 - Stormwater management
 - Water and wastewater
 - Transport
 - Consistency with relevant urban growth information requirements
 - National Policy Statement on Urban Development Capacity
- The proposed residential zoning of Pokeno West is problematic for a number of reasons and has the potential to result in adverse effects on the submitter's developments and the wider Pokeno area.

Point Number 386.13

Summary of Decision Requested: Amend Policy 4.5.18 (a) (iv) F Pokeno Town Centre as follows:

~~Ensuring Encourage~~ built form is consistent with Waikato District Council Pokeno Town Centre Architectural Form, Materials and Signage Design Guide, and in particular section 6 (Architectural Style, Materials and Appearance).

AND

Amend the matters of discretion in Rule 18.1.3 RD2(a)(ii) Restricted Discretionary Activities as follows:

~~Consistency~~ The extent to which the building is consistent with the relevant Town Centre Character Statement contained within Appendix 10.1-10.6 (Town Centre Character Statements).

Decision Reasons:

- The use of the word "ensuring" is inappropriate in this context, as it implies that a rule may follow in the Town Centre Zone provision which requires compliance with the 'Pokeno Town Centre Architectural Form, Materials and Signage Design Guide.'
- Such an amendment recognises there is no rule requirement in the Proposed District Plan which would ensure such consistency or compliance.
- The matter of discretion is requested to be consistent with the wording of the amendments sought to Policy 4.5.18.

Point Number 386.14

Summary of Decision Requested: Delete the proposed walkway/cycle way/bridleway that goes through 152 Hitchen Road, 201 Hitchen Road and Munro Road, Pokeno from the planning maps.

Decision Reasons:

- The proposal for a walkway/cycle way/bridleway through 152 Hitchen Road, 201 Hitchen Road and Munro Road has never been discussed with the landowner and it is unclear how this proposal will be achieved.

Point Number 386.15

Summary of Decision Requested: Amend Rule 14.12.1 Permitted Activities, so that the minimum parking requirement in the Residential Zone is for one car park per dwelling.

Decision Reasons:

- The requirement is unnecessary.
- Such a requirement also is likely to lead to the inefficient use of residentially zoned land, where for instance on-site space could better be utilized to provide for useable private outdoor space.
- Amendment will enable locational specifics and market demand to determine whether the provision of two car parks per dwelling is needed or desired for any given residential development proposal.

Point Number 386.16

Summary of Decision Requested: Amend Rule 16.3.3.1 PI Height - Building general, as follows:

PI The maximum height of any building must not exceed ~~7.5m~~ 8m.

AND

Any consequential amendments to Rule 16.3.5 Daylight Admission such as taking the recession plane angle measurement from an elevation of 3m (rather than the proposed 2.5m) above ground level.

Decision Reasons:

- The Operative District Plan provides for a permitted building height of 8m. There is no compelling basis for reducing the permitted building height by 0.5m.
- The submitter has been unable to find any section 32 analysis that provides justification for this approach.
- Consequential amendments may also be necessary to the daylight admission control Rule 16.3.5.

Point Number 386.17

Summary of Decision Requested: **Amend** the Proposed Waikato District Plan so that any non-compliance with the permitted building height is assessed as a restricted discretionary activity.

Decision Reasons:

- Rule 16.3.3.1 of the PWDP requires any non-compliance with the permitted building height rule to be assessed as a full discretionary activity. This is inappropriate because the environmental effects of any such non-compliance are easily identifiable (relating to residential amenity, privacy, overshadowing and dominance)

Submitter Number: 387 **Submitter:** Farm Limited Diamond Creek

Point Number 387.1

Summary of Decision Requested: **Amend** the zoning of the property on State Highway 23, Te Uku (Pt Lot 1 DP 23893, Lot 4 DP 437598 and Allot 218 Parish of Whaingaroa) from Rural Zone to Country Living Zone (see map included in the submission).

Decision Reasons:

- The Subject Property is 43 hectares in area and forms part of the settlement of Te Uku.
- The Surrounding properties within the settlement of Te Uku comprise a mixture of rural and rural-residential size allotments.
- The overall size of the subject property, along with the topography of the site and the location of streams and wetland areas restricts the use of the site as a separate and single farming unit.
- The subject property would be better suited to rural lifestyle living.
- Submitter requests that the site be rezoned to Country Living Zone to enable the property to be developed in a more efficient and appropriate manner in accordance with the purpose, objectives, policies and provisions of the Country Living Zone.
- The rezoning would enable a self-sufficient low density rural lifestyle development that adjoins the village of Te Uku to be developed on the site.
- Proposed allotment sizes would continue to reflect the character of the surrounding area.
- The outcome of changing the subject site from Rural Zone to Country Living Zone has a number of positives such as:
 - The subject property is not subject to any special character overlays and is adjacent to a modified environment that can be described as having a rural village character to it;
 - The topography of the site ensures that not all proposed buildings, and structures will be visible at the one time and therefore will maintain the open space character to it;
 - A rural lifestyle or low density residential development of the property would enable the wetland areas and adjoining stream to be protected and therefore environmental gain can be accommodated with any development of the site;
 - The subject property is of a sufficient size that will enable allotments to be created that will be self-sufficient in the provision of water, wastewater and storm water services;
 - A proposed subdivision of the subject property can be designed so that only entry point to the site will be required at a location that will have excellent sight lines along State Highway 23.
 - An efficient use of land that is unproductive, and protection of more productive rural lots.

Submitter Number: 388 **Submitter:** Sonny Karena

Organisation: Tangata Whenua Working Group

Point Number 388.1

Summary of Decision Requested: **Retain** the introduction of Chapter 2 Tangata Whenua addressing Tangata Whenua concerns, issues and opportunities.

Decision Reasons:

- TWWG provides a Cultural Values Based Position to the Proposed Waikato District Plan.
- TWWG has an interest in a number of aspects of the Proposed Plan and how its provisions as notified will provide for current and future interests and operations in Horotiu West.
- The TWWG support the introduction of a specific chapter addressing Tangata Whenua concerns, issues and opportunities in the proposed District Plan

Point Number 388.2

Summary of Decision Requested: **Retain** the discussion of statutory responsibilities that are required of the Treaty of Waitangi, the Waikato River Settlement Act 2010, and the Resource Management Act, among others.

Decision Reasons:

- No reasons provided.

Point Number 388.3

Summary of Decision Requested: **Retain** the Proposed Residential zoning of the site with legal description of part Allotment 105 Horotiu Parish, Lot 6 DP 12221 and part Allotment 106, Horotiu Parish.

Decision Reasons:

- The TWWG have been working with Perry Group Ltd on their development proposal for this land and consider that the proposed development will support the wider Tangata Whenua values outlined in this submission.
- The site has frontage to the Waikato River and Perry Group development proposals include sensitive development adjacent to the River, improvements of access to the River and the Te Awa Walkway/cycleway and river edge landscaping.
- The development fits well with the local community, particularly the Horotiu School and the nearby Te Awa Lakes Development.
- Through the relationship of TWWG with Perry Group there will be opportunities to work together to achieve enhanced cultural outcomes consistent with the Cultural Impact Assessment prepared for Te Awa Lakes.

Point Number 388.4

Summary of Decision Requested: No specific decision sought, but the submission generally supports the direction that the Waikato District Council has taken in the development

of the Proposed District Plan.

Decision Reasons:

- No reasons provided.

Point Number

388.5

Summary of Decision Requested:

No specific decision sought, but the submission reaffirms the passing of the legislation the Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010 which instigated the Vision and Strategy for the Waikato River and provides for Waikato-Tainui co-management.

Decision Reasons:

- No reasons provided.

Point Number

388.6

Summary of Decision Requested:

Retain policies that require that the overall quality of freshwater is to be maintained or improved, while protecting the significant values of outstanding freshwater bodies and wetlands, and improving water quality in waterbodies that have been degraded to the point of being over-allocated.

Decision Reasons:

- The innate relationship between te hauora o te wai (the health and mauri of water) and te hauora o te taio (the health and wellbeing of the environment) and their ability to sustain te hauora o te tangata (the health and mauri of people).

Point Number

388.7

Summary of Decision Requested:

No specific decision sought, but the submission outlined the responsibility to protect waahi tapu/waahi tupuna and other taonga, and avoiding inappropriate activities that have adverse effects on Paptuaanuku.

Decision Reasons:

- The relationship with the whenua is of utmost importance to all hapu, especially maintaining customs and traditions.
- Kaitiaki have responsibilities to look after and futureproof whenua, even if mana whenua are not the 'owners' of the land.

Submitter Number:

389

Submitter:

Jonathan Quigley

Organisation:

J and T Quigley Ltd

Point Number

389.1

Summary of Decision Requested:

Amend the zoning of the property at 25 Tamahere Drive, Tamahere from Rural Zone to Countryside Living Zone

OR

Amend the zoning of the property at 25 Tamahere Drive, Tamahere from Rural Zone to Tamahere Village Zone.

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- Given, the location of the submitters site it is considered appropriate that the site be included within the Country Side Living Zone, as opposed to the Rural Zone.
- Given, the location of the submitter's site, it is considered appropriate that the site is included within the Tamahere Village Living Zone, as opposed to the Rural Zone.
- Given the size of the lot, now just under 2 hectares, the proximity to the Waikato Expressway and the adjacent properties across Tamahere Drive, the site is no longer considered rural in nature.
- The properties closest to the site are Countryside Living Zone or Residential Zone (being the new retirement area) and the Tamahere Village Green is at the end roundabout and under 800m walking distance from this property.
- Note that in the Countryside Living Zone a Retirement Village is a Non-Complying Activity yet the site (25 Tamahere Drive) has a consented retirement village (zoned residential) across the road, identified as 650 Airport Road.
- Given the location of the site and the previous reference points if the site is not to be zoned Countryside Living due to proximity of the new retirement village at 650 Airport Road then the site should be zoned Tamahere Village Zone, given its proximity to the Tamahere Market, church, Tamahere Country School and Tamahere Village Green.
- This will allow for appropriate subdivision of the site, where there is demand, yet retain the rural character.

Point Number

389.2

Summary of Decision Requested:

Retain the current extent of Countryside Living Zone and Residential Zone located to the west of the submitters' site on Tamahere Drive, Tamahere.

Decision Reasons:

- Support the current extent of the area of Residential Zone located to the west of its site on Tamahere Drive.
- To ensure that the notified zones are consistent with the direction given in the objectives and policies in the proposed Waikato District Plan relating to reverse sensitivity, it is considered appropriate for the JTQL site to become Country Side Living or Tamahere Village Zone so the adjacent Country Side Living and Residential Zone does not cause reverse sensitivity issues.

Point Number

389.3

Summary of Decision Requested:

Amend Policy 5.6.2 Country Living Character, to include early childcare activities

OR

Amend related Objectives and Policies to refer to early childhood activities.

OR

Amend the definition of "Rural Activity" in Chapter 13 Definitions, to include early childhood activities.

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- It is considered that the policy for Country Living character at it is currently written, would not clearly include JTQL activities that occur on the site. Day-care facility with spaces for up to 114 Children
- It is considered that the definition of "Rural Activity" as it is currently written, would not clearly include JTQL activities that occur on the site.
- Accordingly, it is requested that either the definition of "rural activities" is amended to clearly include JTQL's activities or the related objectives and policies need to refer to early childhood activities.

Point Number

389.4

Summary of Decision Requested:

Add a clause to Policy 5.6.3 Subdivision within the Country Living Zone, as follows:

(vi) where sites are in close to a village Zone, subdivision can be between 5,000m² and 3000m² unreticulated.

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- Some activities are appropriate in the rural environment and the effects are to be accepted.
- To specifically include urban activities in the list of features in the rural environment where a site is in close proximity to an urban village is appropriate.
- It is important to ensure consistent direction in the objectives and policies in the Proposed Waikato District Plan relating to reverse sensitivity.
- Whilst JTQL is located in the Rural Zone, it is surrounded by the Country Living Zone, Residential Zone and adjacent to the Waikato Expressway.
- The Tamahere Village Zone is within 800m of the site and is therefore no longer appropriately zoned as Rural.
- It is important to also provide a policy basis to ensure that when considering applications to subdivide and develop in the Rural Zone and Country Side Living Zone, that the location of the subdivision itself needs to be considered in terms of reverse sensitivity mitigation.
- This will assist in reducing the adverse effects of reverse sensitivity instead of only mitigating them.

Point Number

389.5

Summary of Decision Requested:

No specific decision sought, but the submission supports in part Rule 23.1.3 Non-Complying Activities.

Decision Reasons:

- Notes that in the Countryside Living Zone a Retirement Village is a non-complying activity yet the JTQL site has a consented retirement village (zoned Residential) across the road at 650 Airport Road. Therefore, the current zoning of Rural does not suit the JTQL site anymore.

Point Number

389.6

Summary of Decision Requested:

No specific decision sought, but submission supports in part Rule 24.4.1 Subdivision - General.

Decision Reasons:

- If the JTQL site is not zoned Countryside Living Zone then it should be zoned Village Zone which will allow for appropriate subdivision of the site where there is demand, yet retain the rural character.

Point Number

389.7

Summary of Decision Requested:

Add a new clause (iii) to Policy 5.6.8 Non-residential activities, as follows:

(iii) Are in close proximity (within 1km) to a Village Living Zone and include early childhood education.

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- Childcare facilities should be considered as providing for the health and well being of the community.

Point Number

389.8

Summary of Decision Requested:

Add a new activity for childcare facility to Rule 23.1.1 Permitted Activities, as follows:

P5 Child Care Facility A child care facility established prior to notification of the District Plan and within 1km of a Village Zone

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- JTQL is concerned that JTQLs activities may not fit within the definition of Rural Activity.
- There is no confirmation in the plan, that a child care facility fits within activity.
- Therefore, the child care facility that has been legally established potentially is not considered as a permitted activity in the Rural Zone or Country Side Living.
- Village Living Zone appears to be the best zone for the JTQL site (25 Tamahere Drive).

Point Number

389.9

Summary of Decision Requested:

Amend Rule 23.1.2(1) and D5 Discretionary Activities, as follows:

(1) The activities listed below are discretionary activities, *unless in close proximity 1km to a Village Zone*

D5 An education facility, excluding a child care facility for up to 10 children and P5 above

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- Consideration for some of these activities given the proximity to the Tamahere Village Green, specifically D3, D4, D5, D7 and D9.

Point Number 389.10

Summary of Decision Requested: **Amend** the definition of "Rural Activities" in Chapter 13: Definitions to confirm that childcare is included or provide more examples of what rural industry activities would be.

AND

Amend the Proposed District Plan to include all necessary, consequential or further relief required to give effect to the submission.

Decision Reasons:

- This is necessary to recognise JTQL activities.

Submitter Number: 390 **Submitter:** C.H.S. Enterprises Limited

Point Number 390.1

Summary of Decision Requested: **Amend** the zoning of the property at 219B Dominion Road, Tuakau from Rural Zone to Village Zone, as identified in Appendix A of the submission.

Decision Reasons:

- The additional Village Zoned land will help contribute to satisfying the current demand and strategic projected growth of Tuakau
- The current size of the site does not provide many options or capacity to undertake viable rural activities
- The site is accessed off an access lot which is zoned Village under the Proposed Plan, and is held together with the site (zoned Rural) in the same CFR. Neighbouring land that accesses Lot 7 DP 116403 is zoned Village.
- Potential future road connection may provide more connectivity and accessibility within the Village Zone and other Village Zone properties which are restricted by access solely off Dominion Road (see sheet 3 within Appendix A).
- The site is not located within any Outstanding Landscape or Natural Feature.
- Connectivity and links can be provided between other properties located in the Village Zone.
- See attachment to the submission for full details.

Submitter Number: 391 **Submitter:** Lachie Cameron and Donna Watts

Point Number 391.1

Summary of Decision Requested: **Add** new Rule 22.4.10 Subdivision - Country Living Hamlet, as follows (or similar wording and alternative activity status as necessary):

22.4.10 Subdivision- Country Living Hamlet

RDI *(a) Subdivision to create a Country Living Hamlet within the Rural Zone must comply with the following conditions:*

(i) The Record of Title to be subdivided must be at least 104.5ha in area;

(ii) The Record of Title must contain lots which are not contiguous;

(iii) The lot to be developed must have a maximum area of 4.5 ha;

A. This lot must be subdivided in accordance with Chapter 23 Country Living Zone and is not subject to Chapter 22 Rural Zone.

(b) Council's discretion is restricted to the following matters:

(i) Subdivision layout and design including dimension, shape and orientation of the proposed lots;

(ii) Effects on rural character and amenity values;

(iii) Effects on landscape values;

(iv) Potential for reverse sensitivity effects.

NCL *(a) Subdivision that does not comply with Rule 22.4.10 RDI.*

Decision Reasons:

- Addition of new rule will allow small land holdings physically separated from larger land holdings (held in the same title) to be better utilised as Country Living Hamlets.
- There are already areas within the Rural Zone which feature small pockets of Country Living type development, therefore a Country Living Hamlet will not look unfitting within the Rural Zone.
- Developments under the proposed rule will be developed in accordance with the Country Living Rules, Objectives and Policies which will allow for components of rural living to be maintained.
- The restrictive nature of proposed Rule 22.4.10 will mean only a very limited amount of properties will be entitled to subdivide under this rule.
- Lot 2 DPS 2534 can no longer be used in the dairy operation due to the increase in traffic on Te Ohaki Road as it is too small to undertake its own rural based operation.
- Further development can be supplied onsite which meets requirements of Country Living Zone and sufficient space has been provided to all proposed lots to support onsite waste water and storm water disposal.
- The site at 821 Ohaki Road, Huntly is capable of providing high levels of amenity being adjacent to the Waikato River with views out across the river to the Waikato-Tainui Whenua Raahui Wildlife Refuge Reserve Islands help to provide favorable conditions for Country Living developments.
- An esplanade reserve has been proposed along the boundary adjoining the river, and a public walkway is also proposed to allow access to the reserve and river.
- There is only a small amount of Country Living land around Huntly.
- The location of the submission site provides suitable connection to Hamilton and Auckland, which provides an opportunity to work in larger towns whilst living in a rural setting.

Submitter Number: 392 **Submitter:** Hugh Green Limited

Point Number 392.1

Summary of Decision Requested: **Amend** the zoning of the following properties at Saleyard Road, Te Kauwhata from Business Town Centre to Business:

Legal Description	Certificate(s) of Title
Section 59 Town of Te Kauwhata	SA63B/35 and SA63B/36
Part Allotment 544, 546 Parish of Whangamarino and	SA31D/969, SA31D/970 and SA31D/971

Defined On Deposited Plan 25060	
Lot 5 Deposited Plan South Auckland 18623	SA57C/113, SA31D/972 and SA31D/973
Lot 1 Deposited Plan South Auckland 17707	SA31D/318, SA31D/319 and SA31D/320
Allotment 548 Parish of Whangamarino	SA49D/648
Lot 1 Deposited Plan South Auckland 58730	SA50D/460
Lot 2 Deposited Plan South Auckland 58730	SA50D/503
Lot 2 Deposited Plan South Auckland 17707	SA16C/1076

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Business Town Centre zone provisions are not considered appropriate for the subject sites.
- No clear justification within PDP's supporting documentation as to why the Business Town Centre Zone was chosen for the subject site and adjacent vacant land over the Business Zone.
- Business Zone is a more appropriate zone for development in providing a supporting role to an established town centre, rather than extending the Business Town Centre zone.
- There is only a small amount of Business Zoned land in Te Kauwhata and none of it is currently vacant and proposed plan does not enable larger scale retail that may support the town centre.
- Amending the zoning of subject sites to Business Zone will provide for a greater variety of activities.

Point Number

392.2

Summary of Decision Requested:

Amend the activity-specific conditions for Rule 17.1.2 P4 Permitted activities, as follows:

Located above ground floor level nil.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Imposition of controls around Activities at Ground Floor Level for buildings facing the front Main Road are accepted, however for all sites within the Business Zone the rule is unduly restrictive.

Point Number

392.3

Summary of Decision Requested:

Add "Retail activity" to Rule 17.1.2 Permitted activities, as a separate activity to the wider-defined "Commercial activity" (already a permitted activity).

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- To be consistent with approach taken in Rule 18.1.2 (for the Business Town Centre) and avoid confusion.

Point Number

392.4

Summary of Decision Requested:

Delete Rule 17.1.3 RD1 condition (a)(iii) Restricted Discretionary Activities.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Imposition of controls around Activities at Ground floor level for buildings facing the front Main Road are accepted however for all sites within the Business Zone the rule is unduly restrictive.

Point Number

392.5

Summary of Decision Requested:

Delete Rule 17.1.5 NC1 Non-Complying Activities.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- This requirement is unduly restrictive for the Business Zone.

Point Number

392.6

Summary of Decision Requested:

Delete Rule 17.1.5 NC2 Non-Complying Activities.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- This requirement is unduly restrictive for the Business Zone.

Point Number

392.7

Summary of Decision Requested:

Delete Rule 17.3.6 PI Condition (a)(i) Dwelling.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Zone is considered unduly restrictive.
- Restrictions on residential activities in the Business Zone should be removed.

Point Number 392.8

Summary of Decision Requested: Delete Rule 17.3.6 NC1 Dwelling
AND

Amend Rule 17.3.6 D1 Dwelling, to apply to buildings not complying with Rule 17.3.6 P1.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions on residential activities in the Business Zone should be removed.
- Dwellings not complying with Rule 17.3.6 P1 subject instead to Rule 17.3.6 D1.

Point Number 392.9

Summary of Decision Requested: **Amend** the specific conditions for Rule 18.1.2 P2 Permitted activities, as follows:

Located above floor ground floor level if the site is subject to a verandah line identified on the planning maps.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Town Centre Zone is considered unduly restrictive.
- Restrictions on residential activities in the Business Town Centre Zone should only apply to sites that are subject to a verandah line identified on the planning maps.

Point Number 392.10

Summary of Decision Requested: Delete Rule 18.3.3 NC1 Gross leasable floor area.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- No reasons provided

Point Number 392.11

Summary of Decision Requested: **Amend** Rule 18.3.8 (a)(i) Dwelling, as follows:

The dwelling must not be located at ground floor if the site is subject to a verandah line identified on the planning maps.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Town Centre Zone is considered unduly restrictive.
- Restrictions on residential activities in the Business Town Centre Zone should only apply to sites that are subject to a verandah line identified on the planning maps.

Point Number 392.12

Summary of Decision Requested: **Amend** the specific condition for Rule 18.1.2 P8 as follows:

Located above ground floor level if the site is subject to a verandah line identified on the planning maps.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Town Centre Zone is considered unduly restrictive.
- Restrictions on the ground floor in the Business Town Centre Zone should only apply to sites that are subject to a verandah line identified on the planning maps.

Point Number 392.13

Summary of Decision Requested: **Amend** Rule 18.1.3 RD1 condition (b), as follows:

The multi-unit development must be located above the ground floor level if the site is subject to a verandah line identified on the planning maps.

AND

Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Town Centre Zone is considered unduly restrictive.
- Restrictions on residential activities in the Business Town Centre Zone should only apply to sites that are subject to a verandah line identified on the planning maps.

Point Number 392.14

Summary of Decision Requested: **Amend** Rule 18.1.5 NC2 Non-Complying Activities, as follows:
Residential activity on the ground floor if the site is subject to a verandah line identified on the planning maps.
 AND
Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Town Centre Zone is considered unduly restrictive.
- Restrictions on residential activities in the Business Town Centre Zone should only apply to sites that are subject to a verandah line identified on the planning maps.

Point Number 392.15

Summary of Decision Requested: **Amend** Rule 18.1.5 NC3 Non-Complying Activities, as follows:
A multi-unit development located on the ground floor if the site is subject to a verandah line identified on the planning maps.
 AND
Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- Restrictions are accepted for buildings that front Main Road, however the imposition of this control for all sites within the Business Town Centre Zone is considered unduly restrictive.
- Restrictions on activities in the Business Town Centre Zone should only apply to sites that are subject to a verandah line identified on the planning maps.

Point Number 392.16

Summary of Decision Requested: **Amend** Rule 18.3.3 D1 Gross leasable floor area, to remove the reference to "and no greater than 500m2."
 AND
Amend the Proposed District Plan to provide alternative, additional or consequential amendments/relief as necessary to achieve consistency with the other submission points and to satisfy submitter's concerns or such alternative relief to satisfy the concerns of the submitter.

Decision Reasons:

- No reasons provided.

Submitter Number: 393 **Submitter:** Bowrock Properties Limited
Organisation: PAUA Architects

Point Number 393.1

Summary of Decision Requested: **Amend** the zoning of Lot 3 DP 325499 and Lot 32 DP 81580, Tauwhare Road, Tauwhare from Rural Zone to Country Living Zone or Village Zone.

Decision Reasons:

- Subject site is located to south east of Tauwhare Village, which is designated Country Living Zone in both the Operative and Proposed Plan, comprised of standalone dwellings on large sized residential lots.
- To the west of the subject site there is a mix of smaller sized residential and larger agricultural properties, a number of which are of similar size to those in Tauwhare village.
- It is an opportunity to develop the site for residential use.
- Residential development could be undertaken in a manner currently provided for by Country Living Zone.
- Subject site could provide for 25-35 residential properties and account for its natural features.
- Development of subject site would effectively increase size of current Country Living Zone allowing to extend to the west along Tauwhare Road.
- Development would be consistent with existing context and feel of both Tauwhare Village to the east and Tauwhare Road to the west.
- If Village Zone was to be adopted, submitter would appreciate the opportunity to liaise with Council regarding suitability of the zoning for the subject site.
- Higher density zoning could enable a comprehensive residential development that provides for varying property types and subdivision patterns whilst allowing productive use of land.
- Such development would require master planning to ensure good outcomes.

Submitter Number: 394 **Submitter:** Gwenth Sophie Francis

Point Number 394.1

Summary of Decision Requested: **Delete** Section 1.4.3.1 (c) Rural activities.
 AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- There is no evidence of the vulnerability of rural areas in the manner suggested.

Point Number 394.2

Summary of Decision Requested: **Amend** Section 1.4.3.2 Protecting the rural environment, so that it acknowledges that the direction to protect rural activities is not absolute and where there are limits on the potential use of high class soils due to limited land areas, lack of available water and/or nutrient controls, then new and innovative approaches to managing and utilising rural land should be enabled.
 AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- Fails to appropriately identify the issues and challenges facing Waikato District;
- Fails to have appropriate regard to relevant National Policy Statements including the National Policy Statement for Freshwater Management and the National Policy Statement on Urban Development Capacity
- Fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- Fails to provide practical solutions to the challenges facing farming in the northern part of Waikato District and places undue emphasis on the protection of versatile soils without acknowledging other limitations for farming such soils.
- Fails to provide for and enable alternative and/or innovative approaches to better utilise rural land.

Point Number 394.3

Summary of Decision Requested: **Amend** Section 1.5.4 Urban growth, so that it focuses on urban issues, not rural issues, and the utilisation of urban land.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including those for Freshwater Management and on Urban Development Capacity
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- Council has failed to undertake an adequate section 32 analysis, particular with respect to the extent and location of potential countryside living.

Point Number 394.4

Summary of Decision Requested: **Amend** Section 1.5.5 Services and general infrastructure, to signal that land close to urban infrastructure (main roads, and water or wastewater services) will be prioritised for urbanisation.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including that on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- Council has failed to undertake an adequate section 32 analysis, particular with respect to the extent and location of potential countryside living;
- The Proposed Waikato District Plan fails to identify sufficient and appropriately located areas for countryside living - particularly where there is good access to appropriate infrastructure.

Point Number 394.5

Summary of Decision Requested: **Amend** Section 1.5.7.3 Water, to recognise the cumulative effect of the "Vision and Strategy" on the potential for high class soils to be utilised other than dry stock farming - particularly the direction to use less water and fewer nutrients.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriate identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including the National Policy Statement for Freshwater Management and the National Policy Statement on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- The Proposed Waikato District Plan fails to provide practical solutions to the challenges facing farming in the northern part of the Waikato District and places undue emphasis on the protection of versatile soils without acknowledging other limitations for farming such soils.
- The Proposed Waikato District Plan fails to recognise that farms need large water reservoirs to make irrigation feasible. Irrigation is unlikely to occur without access to such reservoirs.

Point Number 394.6

Summary of Decision Requested: **Add** a new objective to Chapter 3 Natural Environment, to encourage the restoration and/or rehabilitation of indigenous ecosystems to encourage new significant ecological areas to be established to replace, in part, what has been lost.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to set realistic and achievable goals for subdivision reliant on the protection, enhancement or establishment of significant ecological areas and therefore set the bar too high which then creates a disincentive for achieving good biodiversity outcomes.
- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- Council has failed to undertake an adequate section 32 analysis with respect to subdivision opportunities for ecological enhancement or protection.

Point Number 394.7

Summary of Decision Requested: **Add** new policies to Chapter 3 Natural Environment to implement the additional objective requested (in submission point 394.6) which provide, inter alia, subdivision incentives for creating areas with significant indigenous biodiversity value, including the encouragement, establishment or protection of:

- (i) Significant linkages between large (significant) areas of native bush, wetland, scrubland and dunelands;
- (ii) Significant enhancement of an area which is already significant in terms of bush or natural values;
- (iii) Significant restoration or enhancement of areas which are largely depleted, highly modified or destroyed in terms of native biodiversity within the district;
- (iv) Compensation, mitigation or remediation to offset the adverse effects of subdivision or development.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to set realistic and achievable goals for subdivision reliant on the protection, enhancement or establishment of significant ecological areas. The lack of uptake of such enhancement subdivision means that the biodiversity outcomes envisaged are unlikely to be achieved;
- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- Council has failed to undertake an adequate section 32 analysis with respect to subdivision opportunities for ecological enhancement or protection.

Point Number 394.8

Summary of Decision Requested: **Amend** Policy 3.2.8 Incentivise subdivision, as follows:

(a) *Incentivise subdivision in the Rural Zone when there is the legal and physical protection of Significant Natural Areas, provided the areas are of a suitable size and quality to achieve a ~~functioning ecosystem~~ material ecological benefit.*

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The submitter states that the Proposed Waikato District Plan fails to set realistic and achievable goals for subdivision reliant on the protection, enhancement or establishment of significant ecological areas.

Point Number 394.9

Summary of Decision Requested: **Add** an objective to Chapter 5 Rural Environment, to encourage and enable innovative development opportunities which both provide additional living opportunities and enhance the sustainable utilisation of the rural environment through facilitating farm parks.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan and the section 32 analysis fail to recognise the ability for innovative uses of countryside living and farm parks to provide housing choice, better ecological outcomes and appropriate use of high value soils, given the constraints relating to water abstraction and nutrient control.

Point Number 394.10

Summary of Decision Requested: **Add** new policies to Chapter 5 Rural Environment, to facilitate farm parks and ensure good quality outcomes by:

- (i) Allowing up to 1 new site per 4 ha, provided that the parent title is 20 ha or larger;
- (ii) New sites being clustered, less than 5000m² and the development to be lined with a Farm Management Plan to ensure long term environmentally sustainable farming practices;
- (iii) Ecological restoration of permanent watercourses and wetlands;
- (iv) Reverse sensitivity covenants for farming activities;
- (v) Clustering of houses where topography allows it; and
- (vi) Facilitating changes of use in farming operations to land uses which are compatible and give effect to the "Vision and Strategy" and are more sustainable through reduced water and nutrient needs.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including the National Policy Statement for Freshwater management and the National Policy Statement on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document;
- The Proposed Waikato District Plan fails to provide practical solutions to the challenges facing farming in the northern part of the Waikato District and places undue emphasis on the protection of versatile soils without acknowledging other limitations for farming such soils;
- Council has failed to undertake an adequate section 32 analysis, particularly with respect to the extent and location of a countryside living zone, subdivision opportunity for ecological enhancement or protection and provision of innovative subdivision developments such as farm parks; and
- The Proposed Waikato District Plan fails to identify sufficiently and appropriately located areas for countryside living - particularly where there is good access to appropriate infrastructure.

Point Number 394.11

Summary of Decision Requested: **Amend** Section 5.2 Productive Versatility of Rural Resources by rewriting, so that:

- (i) increased and efficient utilisation of the rural land resource is enabled;

(ii) the capacity and versatility of high class soils is maintained and enhanced where those soils are (or are likely to be) part of a farming unit that has sufficient critical area and where the soils are located in areas which have available allocable water and nutrient capacity; and

(iii) Delete or rewrite Policy 5.2.2 - High class soils to give effect to the above and/or the protection of high class soils is limited to tracts of land which are large enough to be commercially viable and with available water and nutrient budgets; and

(iv) Delete or rewrite Policy 5.2.3 Effects of subdivision and development on soils to give effect to the above and/or the protection of high class soils is limited to tracts of land which are large enough to be commercially viable and with available water and nutrient budgets.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including the National Policy Statement for Freshwater Management and the National Policy Statement on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- The Proposed Waikato District Plan fails to provide practical solutions to the challenges facing farming in the northern part of the Waikato District and places undue emphasis on the protection of versatile soils without acknowledging other limitations for farming such soils.
- The Proposed Waikato District Plan fails to recognise that farms need large water reservoirs to make irrigation feasible. Irrigation is unlikely to occur without access to such reservoirs.

Point Number

394.12

Summary of Decision Requested:

Delete Objective 5.3.1 Rural character and amenity, and replace with a new objective that enables rural activities in rural zones.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including the National Policy Statement for Freshwater management and the National Policy Statement on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document;
- The Proposed Waikato District Plan fails to provide practical solutions to the challenges facing farming in the northern part of the Waikato District and places undue emphasis on the protection of versatile soils without acknowledging other limitations for farming such soils;
- Council has failed to undertake an adequate section 32 analysis, particularly with respect to the extent and location of a countryside living zone, subdivision opportunity for ecological enhancement or protection and provision of innovative subdivision developments such as farm parks; and
- The Proposed Waikato District Plan fails to identify sufficiently and appropriately located areas for countryside living - particularly where there is good access to appropriate infrastructure.

Point Number

394.13

Summary of Decision Requested:

Delete Policy 5.3.4 (a) Density of dwellings and buildings within the rural environment

OR

Amend Policy 5.3.4 (a) Density of dwellings and buildings within the rural environment to encourage clustering

AND/OR

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including the National Policy Statement for Freshwater Management and the National Policy Statement on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document;
- The Proposed Waikato District Plan fails to provide practical solutions to the challenges facing farming in the northern part of Waikato District and places undue emphasis on the protection of versatile soils without acknowledging limitations for farming such soils;
- Council has failed to undertake an adequate section 32 analysis, particularly with respect to the extent and location of countryside living zone, subdivision opportunity for ecological enhancement or protection and provision of innovative subdivision developments such as farm parks; and
- The Proposed Waikato District Plan fails to identify sufficient and appropriately located areas for countryside living - particularly where there is good access to appropriate infrastructure.

Point Number

394.14

Summary of Decision Requested:

Amend Rule 22.3.2 P1 (a) Minor dwelling, as follows:

PI (a) One minor dwelling not exceeding 70m² ~~gross floor area in~~ footprint, (excluding decks and carports), within a lot.

(b) Where there is an existing dwelling located within a lot:

(i) The minor dwelling must be located within ~~20m~~ 200m of the dwelling;

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number

394.15

Summary of Decision Requested:

Delete Rule 22.2.8 Indigenous vegetation clearance - outside a Significant Natural Area, and make indigenous vegetation clearance outside a Significant Natural Area permitted in all circumstances.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.16

Summary of Decision Requested: **Delete** Rule 22.4.1.1 Prohibited subdivision.
OR
Amend Rule 22.4.1.1 Prohibited Subdivision if retained, so that it only applies to the Rural Zone and does not apply to the Country Living Zone.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The submitter states that subdivision should not be prohibited in any circumstance.

Point Number 394.17

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General subdivision, so that this rule only applies to the Rural Zone and does not apply to the Country Living Zone.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.18

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, to acknowledge other allowable forms of subdivision such as Conservation Lot Subdivision and farm parks.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.19

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General subdivision, to acknowledge other allowable forms of subdivision such as Conservation Lot Subdivision and farm parks.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.20

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision, by incorporating the provisions from the Auckland Council District Plan (Rodney Section) 2011 and any directly linked assessment criteria and appendices referred to in those provisions to enable subdivision for protection of Significant Natural Areas. Refer to the submission which sets out these Rodney Section provisions in full.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to set realistic and achievable goals for subdivision reliant on the protection, enhancement or establishment of significant ecological areas;
- Allowing greater lot yields would provide an incentive for this type of subdivision; and
- Council has failed to undertake an adequate section 32 analysis with respect to subdivision opportunities for ecological enhancement.

Point Number 394.21

Summary of Decision Requested: **Amend** the number of lots to be created per area of ecological enhancement, restoration or protection to be calculated from the date that the Proposed District Plan was notified.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.22

Summary of Decision Requested: **Add** a new rule to Section 22.4 Subdivision for farm park subdivision, that provides for:

(i) 1 new site per 4 ha from a parent title that is at least 20 ha, provided that the new sites are clustered, less than 5000m2 and;

(ii) Development is lined with a farm management plan to ensure long term environmentally sustainable farming practices.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document;
- The Proposed Waikato District Plan fails to provide practical solutions to the challenges facing farming in the northern part of Waikato District and places undue emphasis on the protection of versatile soils without acknowledging other limitations for farming such soils;
- Council has failed to undertake an adequate section 32 analysis with respect to innovative subdivision developments such as farm parks.

Point Number 394.23

Summary of Decision Requested: **Delete** Rule 23.2.9 Indigenous vegetation clearance - outside a Significant Natural Area, to make indigenous vegetation clearance outside of a Significant Natural Area permitted in all circumstances.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- Indigenous vegetation clearance outside of Significant Natural Area should be permitted in all circumstances but no reasons have been provided.

Point Number 394.24

Summary of Decision Requested: **Amend** Rule 22.3.2 P1 Minor dwelling, as follows:

PI (a) One minor dwelling not exceeding 70m2 ~~gfa~~ in footprint (excluding decks and carports), per site.

(b) Where there is an existing dwelling located within a site:

(i) The minor dwelling must be located within ~~20m~~ 200m of the dwelling;

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.25

Summary of Decision Requested: **Amend** the zoning of various properties in the vicinity of Parker Lane and Cameron Town Road, Buckland, so that they are zoned in a Country Living Zone. Refer to maps in submission for details of the extent of this requested. The submission states that the requested zone boundaries follow roads or streams as far as reasonably practicable.

OR

Amend the planning maps by applying an overlay to properties on Parker Lane, Buckland that provides for farm park subdivisions in this location on the basis of 1 additional lot per 4 ha of parent title, unless farm park subdivisions are enabled across the Waikato District.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- Recognise the existence of areas of land such as (but not limited to) the land around Parker Land and Cameron Town Road which have reasonable access to main roads (such as Buckland Road), have convenient potential access to wastewater infrastructure and are conveniently located near Pukekohe, Pokeno and Tuakau.
- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to relevant National Policy Statements including those for Freshwater Management and on Urban Development Capacity;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document; and
- Council has failed to undertake an adequate section 32 analysis, particular with respect to the extent and location of potential countryside living.

Point Number 394.26

Summary of Decision Requested: **Delete** the Significant Natural Area from the property located at 312 Parker Lane, Buckland, except for those parts which have already been protected by covenant.

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.27

Summary of Decision Requested: No specific decision sought, but submission seeks the addition of new definitions and to amend definitions in Chapter 13 Definitions to give effect to the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.28

Summary of Decision Requested: **Amend** Policy 5.3.7 Reverse sensitivity effects, to recognise the appropriateness of reverse sensitivity covenants
AND/OR
Amend other plan provisions as consequential or additional amendments as necessary to give effect to the relief sought.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.29

Summary of Decision Requested: **Add** objectives and policies to Section 5.6 Country Living Zone, that:

(i) Require sufficient areas within the northern part of the district are zoned countryside living to provide additional housing choices, particularly where there is reasonable access to Pukekohe and Tuakau;

(ii) Identify opportunities for countryside living zones to be reticulated with wastewater where it is located close to wastewater infrastructure; and

(iii) Zone land around Parker Lane and Cameron Town Road as countryside living

AND/OR

Amend other plan provisions as consequential or additional amendments as necessary to give effect to the relief sought.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- The Proposed Waikato District Plan fails to appropriately identify the issues and challenges facing Waikato District;
- The Proposed Waikato District Plan fails to have appropriate regard to the Regional Policy Statement and/or misapplies the strategic direction of that document;
- Council has failed to undertake an adequate section 32 analysis, particularly with respect to the extent and location of countryside living zone.
- The Proposed Waikato District Plan fails to identify sufficient and appropriately located areas for countryside living - particularly where there is good access to appropriate infrastructure.

Point Number 394.30

Summary of Decision Requested: **Delete** the definition of "High class soils" in Chapter 13 Definitions, and replace with the following:

(i) Elite soils (Class I); and
(ii) Prime Soils (Class II), and

AND

Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- Recognise that not all high quality soils are the same and that there is a difference between 'elite soils' (Class I) and prime soils (Class II and some III).

Point Number 394.31

Summary of Decision Requested: **Add** a definition of "Farm Park" in Chapter 13 Definitions.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Point Number 394.32

Summary of Decision Requested: **Add** a definition of "Restoration or enhancement planting subdivision" in Chapter 13 Definitions.
AND
Amend the Proposed District Plan to make consequential or further additional relief, as is appropriate to give effect to the intent of the submission.

Decision Reasons:

- No reasons provided.

Submitter Number: 395 **Submitter:** Ministry of Business, Innovation and Employment
Organisation: New Zealand Petroleum and Minerals

Point Number 395.1
Summary of Decision Requested: **Amend** Policy 3.3.3 (a) (iv) Protection from inappropriate subdivision, use and development as follows (or similar wording):

(iv) Avoiding, remedying, mitigating, offsetting or compensating the adverse effects of extractive industries and earthworks.

AND

Amend the Proposed District Plan to make consequential or similar amendments as necessary to address the matters raised in submission.

Decision Reasons:

- NZPM recognises that Outstanding Natural Features and Outstanding Natural Landscapes are valued areas for a range of reasons and agrees that the attributes of these areas should be protected from inappropriate subdivision, use and development.
- NZPM does not oppose a more stringent management regime however a requirement to avoid absolutely all adverse effects of extractive industries effectively equates to a prohibition of mining activities in these areas.
- A requirement to avoid, remedy and mitigate adverse effects is consistent with Part 2 of the RMA whilst ensuring inappropriate mining activities are avoided in Outstanding Natural Features and Outstanding Natural Landscapes.
- Offsetting and compensation is consistent with 2017 amendments to the RMA which inserted section 104(ab).
- Relief sought is consistent with mitigation hierarchy promoted by the Business and Biodiversity Offsets Programme.
- Amendment will ensure Policy 3.3.3 is better aligned with Objective 5.4.1 and assist therefore in plan integration.

Point Number 395.2

Summary of Decision Requested: **Retain** Objective 5.4.1 Minerals and extractive industries, as notified.

Decision Reasons:

- NZPM supports the intent of this objective to ensure that mining resource use can provide economic, social and environmental benefits to the Waikato District.

Point Number 395.3

Summary of Decision Requested: **Retain** Policy 5.4.2 Access to minerals and extractive industries, which enables mineral use and extractive industries, except for the amendment sought below.

AND

Amend Policy 5.4.2- Access to minerals and extractive industries as follows (or similar wording):

Protecting and enabling Access to minerals use and extractive industries

(a) Enable extractive industries provided that adverse effects are appropriately avoided, remedied, ~~or~~ mitigated, offset or compensated.

(b) Protect access to, and extraction of, mineral resources by:

(i) Identifying ~~lawfully established~~ existing extractive industries in Aggregate Extraction Areas and Coal mining Areas on planning maps;

(ii) Identifying the site of a potential extractive industry within an Aggregate Resource Area on planning maps;

(c) Ensure that ~~lawfully established~~ extractive industries are not compromised by new subdivision, use or development;

(d) Avoid the location of any sensitive land use within specified buffer areas which otherwise risks the effective operation of an existing ~~lawfully established~~ extractive industry.

AND

Amend the Proposed District Plan to make consequential or similar amendments as necessary to address the matters raised in submission.

Decision Reasons:

- NZPM generally supports the intent of this policy to protect and enable mineral use and extractive industries.
- Amendments make the title more aligned with the intent and focus of the policy.
- Ensures that offsetting and compensation are options available to manage residual adverse effects of mining activities that cannot be avoided, remedied and mitigated.
- Removes unnecessary references to 'lawfully established' extractive industries.

Point Number 395.4

Summary of Decision Requested: **Amend** Rule 22.1.5(l) (D8) (a)- Extractive activities within Rural Zones so that prospecting and exploration activities are classed as a more lenient activity status, for example Restricted Discretionary.

AND

Amend the Proposed District Plan to make consequential or similar amendments as necessary to address the matters raised in submission.

Decision Reasons:

- NZPM does not oppose discretionary activity status for extractive activities in the Rural Zone to allow all potential effects and relevant matters to be assessed through the resource consent process.
- Consideration however should be given to a more lenient status for prospecting and exploration activities given these activities are of a smaller scale and have less adverse effects than extraction.
- NZPM notes prospecting and exploration are a permitted activity in the Rural Zone in Thames-Coromandel District Plan and there is no reason why these activities should have a much more stringent activity status under the Proposed Waikato District Plan.

Point Number 395.5

Summary of Decision Requested: **Retain** Rule 22.1.5 (NC2) Non-Complying activities, as notified.

Decision Reasons:

- NZPM considers that non-complying activity status is appropriate for extractive activities in identified outstanding areas, which still allowed such activities to be assessed on its merits.
- NZPM's support for this rule is subject to the relief sought to Policy 3.3.3 as a non-complying status coupled with policy direction to avoid all adverse effects of extractive industries would effectively prohibit these activities in these areas.

Submitter Number: 396

Submitter: Alan Bekhuis

Point Number 396.1

Summary of Decision Requested: **Amend** the zoning of the rear portion of the property at 25 Rangimarie Road, Ngaruawahia to Country/Rural living.

Decision Reasons:

- Land is hilly and more appropriate to a lifestyle section.
- Much of the land cannot be built on due to its steepness.

- There is an issue with the access road being built to the back half of the farm as it will be used as access to a large amount of Residential Zoned land at the rear of the property and the excessive traffic that will result through Rangimarie Road.
- The whole area back to the start of Jackson Street only has one access/egress point leading to further traffic increases.
- Fire service has highlighted the amount of residential area accessed by only one small street is a concern.

Submitter Number:	397	Submitter:	Horotiu Properties Limited
Point Number	397.1		
Summary of Decision Requested:	<p>Amend the zoning of the property at 27 Sullivan Road, Horotiu (Lot 5 DP 513666) from Rural Zone to Village Zone</p> <p>OR</p> <p>Amend the zoning of the property at 27 Sullivan Road, Horotiu (Lot 5 DP 513666) from Rural Zone to Residential Zone</p> <p>OR</p> <p>Amend the zoning of the property at 27 Sullivan Road, Horotiu (Lot 5 DP 513666) from Rural Zone to Country Living Zone.</p> <p>AND</p> <p>Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Zoning of the property for large lot residential development, which would be enabled under the Village Zone, is consistent with the Future Proof settlement pattern which identifies Horotiu as a growth centre. • The submitter's land is bounded by roads on three sides, two of which are arterial routes in the Operative and Proposed District Plans. These roads place significant constraints on property access and the ability for the landholding to expand, therefore further ruling out the ability to enable productive rural activities. • The submitter's land has a unique topography comprised of approximately 60% flat land with the remaining land being moderately sloping (gradients of 1:3-1:4) down to an artificial watercourse lake). Approximately 40% of their 7.5364 ha site is therefore already restricted for productive rural uses. • The Waikato River is beyond the adjoining rural-residential properties and the property simply cannot be expanded as a rural productive property. • See submission text for further detailed assessment. 		
Point Number	397.2		
Summary of Decision Requested:	<p>Amend Policy 4.1.5 (c) Density, as follows:</p> <p><i>(c) Achieve a minimum density of 8-10 households per hectare in the Village Zone where public reticulated services can be provided.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • It is feasible that the development in the Village Zone could be serviced by reticulated services that are privately owned and managed. • The policy should not be limited to only publicly owned infrastructure networks. 		
Point Number	397.3		
Summary of Decision Requested:	<p>Amend Policy 4.3.3 Future Development - Tuakau and Te Kowhai, as follows:</p> <p><i>4.3.3 Policy - Future Development - Tuakau and Te Kowhai Village Zone</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Policy wording should be relevant to the Village Zone direction, not area specific. • The Village Zone could apply in areas beyond Tuakau and Te Kowhai where this policy should be relevant. 		
Point Number	397.4		
Summary of Decision Requested:	<p>Amend Rule 14.3.1.8 relating to P12 Service connections for subdivision, as follows:</p> <p><i>(2) Rule 14.3.1.8 (1)(a) does not apply to any allotment that is serviced by a site-contained wastewater system in accordance with Rule 14.1.1.3; and Rule 14.3.1.8(1)(b) does not apply where reticulated water supply is unavailable.</i></p> <p><i>(3) Within all zones, except the Rural, Village and Country Living Zones, the water supply required under Rule 14.3.1.8(1)(b) must be adequate for fire fighting purposes.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • In some situations, water supply for an allotment will be from roof water harvesting or bore and will not be provided by a service connection at the boundary. • Like the Rural and Country Living Zones, water supply in the Village Zone may not be pressurised. 		
Point Number	397.5		
Summary of Decision Requested:	<p>Retain Rule 14.1.1.3 (a)(ii) relating to P3 Wastewater servicing for new development or subdivision, as notified.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Allows for a range of waste water solutions to be considered at the time of subdivision or development. 		
Point Number	397.6		
Summary of Decision Requested:	<p>Amend Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones), by amending the minimum access width for the Village and Residential Zones as follows:</p>		

- 1 to 4 lots= 3.6m
- 5 to 8 lots= 4.5m

AND

Amend carriageway and pavement widths as a consequential amendment.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Proposed access widths are excessive and will result in inefficient use of land.

Point Number 397.7

Summary of Decision Requested: Delete Rule 24.2.4.1 P1 (a)(f) Earthworks - General.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Earthworks within 1.5m of a boundary are inevitable and even the most minor activities such as digging a posthole would trigger a requirement for resource consent.

Point Number 397.8

Summary of Decision Requested: Delete Rule 24.2.4.1 P3 (a)(iv) Earthworks - General.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Earthworks within 1.5m of a boundary are inevitable and even the most minor activities such as digging a posthole would trigger a requirement for resource consent.

Point Number 397.9

Summary of Decision Requested: **Amend** Rule 24.3.5 Building coverage, as follows:

P1 On a lot connected to ~~public reticulated~~ waste water ~~and a water supply~~, the total building coverage must not exceed 40%.

P2 On a lot connected to ~~public reticulated~~ waste water ~~and a water supply~~, the total building coverage must not exceed 20%.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- It is feasible that the development in the Village Zone could be serviced by reticulated services that are privately owned, and shouldn't be limited to only publicly owned infrastructure networks.
- The Village Zone anticipates lots at 3,000m² which can be self-sufficient or 1,000m² if urban infrastructure is provided.

Point Number 397.10

Summary of Decision Requested: **Amend** Rule 24.4.10 RD1 Subdivision - Building Platform, as follows:

(a) Every proposed lot, other than ~~a new lot specifically for access, utility allotment & access allotment~~ an access allotment, utility allotment or reserve allotment, must be capable of containing a building platform.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Improves wording and includes reserve allotments.

Point Number 397.11

Summary of Decision Requested: **Amend** the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Various, as outlined in the submission.

Point Number 397.12

Summary of Decision Requested: Delete Rule 24.3.6.1 P3 Building Setbacks - All boundaries.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- There are instances when it is appropriate to locate the garage forward of the front façade of the dwelling.

Point Number 397.13

Summary of Decision Requested: **Amend** Rule 24.3.6.3 P1 (a) Building setback - Waterbodies, as follows:

P1 (a) A building must be setback a minimum of 30m;

(i) From the margin of any;

A. Lake with a bed area of 8ha or more

B. Wetland with an area greater than 1ha; and

C. River bank other than the Waikato River and Waipa River whose bed has an average width 3m or more.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Building setbacks from lakes should be to protect buildings from flood risk (covered by other rules) or alternatively large lakes which could potentially one day require space for esplanade purposes.
- Current wording places unjust setback requirement from private, onsite and often artificial ponds/Waterbodies.

Point Number 397.14

Summary of Decision Requested: **Amend** Rule 24.4.2 Subdivision - Te Kowhai and Tuakau, as follows:

~~Rule 24.4.2 Subdivision - Te Kowhai and Tuakau - Village Zone~~

AND

Amend Rule 24.4.2 RD1 Subdivision - Te Kowhai and Tuakau, as follows:

~~Rule 24.4.2 RD1 Subdivision - Te Kowhai and Tuakau - Village Zone~~

AND

Amend Rule 24.4.2 RD2 Subdivision - Te Kowhai and Tuakau, as follows:

~~Rule 24.4.2 RD2 D2 Subdivision - Te Kowhai and Tuakau - Village Zone~~

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Current rule wording is exclusive to the notified village zone areas only which is subject to change.

Point Number 397.15

Summary of Decision Requested: **Amend** Rule 24.4.4 C2 Subdivision - Amendments to cross lease and flats plans and conversions, as follows:

~~(a) Amendment or update to a cross lease flats plan including additions or alterations to any buildings and any areas for exclusive by an owner or owners.~~

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- A change to an exclusive use area is not deemed to be a subdivision under s218 of the RMA and is not able to be controlled by Council as it is a private covenant.

Point Number 397.16

Summary of Decision Requested: **Amend** Rule 24.4.9 RD1 Road Frontage, by replacing with the following wording:

(a) Every proposed lot must have at least 20m frontage to a road boundary, except where the proposed lot is an access allotment, utility allotment or a right of way or access leg is provided.

AND

Amend the Proposed District Plan to make any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Improves wording.

Submitter Number: 398

Submitter: Ian Thomas

Point Number 398.1

Summary of Decision Requested: **Amend** the zoning of the property at 647 Marychurch Road, Matangi (Lot 1 DP 454288) from Rural to Country Living Zone.

AND

Amend the Proposed District Plan to make consequential amendments to enable subdivision and development in accordance with the Country Living Zone provisions for the property at 647 Marychurch Road, Matangi, and surrounding properties.

Decision Reasons:

- Subject property is small and unproductive in a rural sense and cannot make money if used for farming purposes.
- Subject site is completely surrounded by lifestyle blocks with only a couple of neighbours having any animals in addition to the submitters.
- Property is a 'hobby farm' and does not make a profit and thus farmed at a loss and not providing an economic gain.
- Property can only support low numbers of stock rates of approx. 3.0 animals per hectare and stocking rate is not financially viable for any productive economic gain.
- Subject site's access is safe and convenient and will be improved once vehicle movements along Marychurch Road reduce as a result of the road transferring to the council.
- Proposed rezoning would enable additional housing development and growth within the existing Matangi village area with no domination by rural activities.
- Submission supports premise of growth within existing village environments.
- One dwelling can be established as of the right of the property, not enabling any additional productive potential of the land.
- The site's existing vehicle crossing, meter water connection, transport and water reticulation supports proposed rezoning to Country Living Zone whereby storm and waste water can be accommodated on site and infrastructure is self-sufficient.
- Rezoning enables a logical and acceptable level of development from a currently underutilized block restricted by its Rural zoning.

Point Number 398.2

Summary of Decision Requested: **Amend** the zoning of properties on the corner of Marychurch Road and Tauwhare Road, Matangi from Rural Zone to Country Living Zone (see

submission for extent of re-zoning sought).

AND

Amend the Proposed District Plan to make consequential amendments to enable subdivision and development in accordance with the Country Living Zone provisions for the property at 647 Marychurch Road, Matangi, and surrounding properties.

Decision Reasons:

- Subject property is small, unproductive in a rural sense and can't make money if used for farming purposes.
- Subject site is completely surrounded by lifestyle blocks with only a couple of neighbours having any animals in addition to the submitters.
- Property is a 'hobby farm' and does not make a profit and thus farmed at a loss and not providing an economic gain.
- Property can only support low numbers of stock rates of approx. 3.0 animals per hectare and stocking rate is not financially viable for any productive economic gain.
- Subject site's access is safe and convenient and will be improved once vehicle movements along Marychurch Road reduce as a result of the road transferring to the council.
- Proposed rezoning would enable additional housing development and growth within the existing Matangi village area with no domination by rural activities.
- Submission supports premise of growth within existing village environments.
- One dwelling can be established as of the right of the property, not enabling any additional productive potential of the land.
- The site's existing vehicle crossing, meter water connection, transport and water reticulation supports proposed rezoning to Country Living Zone whereby storm and waste water can be accommodated on site and infrastructure is self-sufficient.
- Rezoning enables a logical and acceptable level of development from a currently underutilized block restricted by its rural zoning.
- This is a logical line between Rural Zone and Country Living Zone.
- Housing development is the most appropriate for this area of Matangi.
- Consider it appropriate if a broader area around the property be rezoned as it would be planned and logical, for example area bounded by railway to the southwest, Tauwhare Road to the northwest, Marychurch Road to the northwest, and the southern boundary of Lot 3 DP 365743 would be appropriate and a logical line to rezone from Rural to Country Living.

Point Number

398.3

Summary of Decision Requested:

If the rezoning sought in submission points 398.1, 398.2 and 398.5 is not supported, **Delete** Rural Zone Prohibited Subdivision (PR3) Rule 22.4.1.1.

OR

Amend Rule 22.4 Subdivision, to enable subdivision of Rural Zoned land at an appropriate scale in appropriate locations, i.e. such as 647 Marychurch Road, Matangi.

Decision Reasons:

- Opposes Prohibited subdivision Rule PR3.

Point Number

398.4

Summary of Decision Requested:

Amend the Proposed District Plan to make consequential amendments to enable subdivision and development in accordance with the Country Living Zone provisions for the property at 647 Marychurch Road, Matangi, and surrounding properties.

Decision Reasons:

Point Number

398.5

Summary of Decision Requested:

If the rezoning sought in submission points 398.1 and 398.2 is not supported, **Amend** the zoning of 647 Marychurch Road, Matangi and the properties at the intersection of Marychurch Road and Tauwhare Road, Matangi from Rural zone to Village zone or Residential zone to enable appropriate subdivision and development (see map attached to submission for extent of rezoning sought).

Decision Reasons:

- Subject property is small, unproductive in a rural sense and can't make money if used for farming purposes.
- Subject site is completely surrounded by lifestyle blocks with only a couple of neighbours having any animals in addition to the submitters.
- Property is a 'hobby farm' and does not make a profit and thus farmed at a loss and not provide an economic gain.
- Property can only support low numbers of stock rates of approx. 3.0 animals per hectare and stocking rate is not financially viable for any productive economic gain.
- Subject site's access is safe and convenient and will be improved once vehicle movements along Marychurch Road reduce as a result of the road transferring to the council.
- Proposed rezoning would enable additional housing development and growth within the existing Matangi village area with no domination by rural activities.
- Submissions supports premise of growth within existing village environments.
- One dwelling can be established as of the right of the property, not enabling any additional productive potential of the land.
- Site's existing vehicle crossing, meter water connection, transport and water reticulation supports proposed rezoning to Country Living Zone whereby storm and waste water can be accommodated on site and infrastructure is self-sufficient.
- Rezoning enables a logical and acceptable level of development from a currently underutilized block restricted by its rural zoning.
- Consider it appropriate if a broader area around the property be rezoned as it would be planned and logical, for example area bounded by railway to the southwest, Tauwhare Road to the northwest, Marychurch Road to the northwest, and the southern boundary of Lot 3 DP 365743 would be appropriate and a logical line to rezone from Rural to Country Living.

Submitter Number:

399

Submitter:

Delys Tansley

Point Number

399.1

Summary of Decision Requested:

Amend the zoning of the property at 42 Geraghtys Road, Tuakau, from Rural Zone to Residential Zone.

Decision Reasons:

- Does not consider the Residential Zone boundary has been appropriately selected.
- No detailed reasoning is available for the decision made.
- Do not see any adverse effects from extending Residential zoning to the property at 42 Geraghtys Road.

Submitter Number:

400

Submitter:

Andrew Kerr

Point Number

400.1

Summary of Decision Requested:

Amend the Significant Natural Areas maps so that these are agreed with land owners before Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, is approved.

Decision Reasons:

- The mapping used to identify Significant Natural Areas is very out of date. The submitter has images from 1947 when their property was cleared and the submitter has to be able to maintain that state of land clearance as the submitter depends on it for their livelihood.
- As the submitter develops the farm they need to be able to maintain fence lines and build new ones. This requires clearing of vegetation to maintain them.
- The farm suffers from lots of wind damage to the trees and these need to be cleared each year over 50m³ per annum in windfall alone.
- The identification of Significant Natural Areas has been done without consultation with the submitter and was not identified in the LIM report when the property was purchased.
- Also 5m³ is an insignificant amount of firewood per annum.

Point Number 400.2

Summary of Decision Requested: Delete the Significant Natural Area from the property at 862B Waikare Road, Waeranga.

Decision Reasons:

- The area that has been assigned is based on old images and a lot of the area has been cleared already.
- The maps used are from 2012.
- The submitter already has a large Covenant block on the property which was established 21st November 1999.
- The submitter prides themselves on keeping this area locked up with stock exclusion and pest management plans in place.
- The area of land identified by council in the Proposed District Plan very close to half of the entire property.
- The submitter grazes the property in its entirety excluding the covenant block and the waterways. The submitter farms beef and sheep which do not eat Kanuka. The submitter also produces honey from the property. Locking these areas up as Significant Natural Areas will significantly impact the livelihood of the submitter.
- The property is mainly kanuka and the submitter has planted some manuka this year to enhance waterways.
- The submitter has identified 3 areas on the property which they would be happy to change to Significant Natural Areas, 2 of these contain good regenerating native bush and the other is a wetland area the submitter would like to protect. The long term plan is to fence them off and improve them further.

Point Number 400.3

Summary of Decision Requested: Amend Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, to enable clearance of vegetation for maintenance of fence lines, new fence lines, clearing of wind damage and increased amount of firewood.

Decision Reasons:

- The mapping used to identify Significant Natural Areas is very out of date. The submitter has images from 1947 when their property was cleared and the submitter has to be able to maintain that state of land clearance as the submitter depends on it for their livelihood.
- As the submitter develops the farm they need to be able to maintain fence lines and build new ones. This requires clearing of vegetation to maintain them.
- The farm suffers from lots of wind damage to the trees and these need to be cleared each year over 50m³ per annum in windfall alone.
- The identification of Significant Natural Areas has been done without consultation with the submitter and was not identified in the LIM report when the property was purchased.
- Also 5m³ is an insignificant amount of firewood per annum.

Submitter Number: 401

Submitter: Robert Hugh Maclennan

Point Number 401.1

Summary of Decision Requested: Amend Rule 23.3.7 Building Setbacks, to reduce the required boundary setback from 12m to 1.5m.

Decision Reasons:

- The current required boundary setback is now too restrictive on the current and proposed site sizes.

Submitter Number: 402

Submitter: Tuakau Proteins Limited

Point Number 402.1

Summary of Decision Requested: Retain the Industrial zoning of the Tuakau Proteins Limited site including 22, 24 and 26 Lapwood Road, Tuakau as notified.

Decision Reasons:

- It is considered appropriate that the Tuakau Protein Limited site is included within the Industrial Zone, as opposed to the Business Zone (the current zoning).

Point Number 402.2

Summary of Decision Requested: Retain the current extent of Residential Zoning in Tuakau, as notified.

Decision Reasons:

- Tuakau Protein Limited support the current extent of the area of Residential Zone located to the north of its site in Tuakau.
- To ensure notified zones are consistent with the direction given in the objectives and policies in the Proposed District Plan relating to reverse sensitivity, it is considered necessary for the Residential Zone to not encroach within the 1000m buffer from the Tuakau Protein Limited site, which was recommended in the Tonkin and Taylor Assessment Report (2015).

Point Number 402.3

Summary of Decision Requested: Amend Policy 4.1.10 (a) (ii) Tuakau, as follows (or words to similar effect):

(ii) Existing intensive farming, rural industry and industrial activities are protected from the effects of reverse sensitivity by considering the location of new residential development.

OR

Amend the definition of "Industrial Activity" in Chapter 13 Definitions to ensure that Tuakau Proteins Limited would fit within that definition.

AND

Any consequential amendment and/or further amendments to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Proteins Limited's activities or the related objectives and policies need to refer to rural industry as well as industrial activities, which is considered necessary particularly due to proposed rezoning of Tuakau Proteins Limited's site from Business to Industrial.
- The definition of "industrial activity" as it is currently written would not clearly include Tuakau Proteins Limited's activities on the site.

Point Number

402.4

Summary of Decision Requested:

Amend Policy 5.3.7 Reverse sensitivity effects, as follows (or words to similar effect):

- (a) Recognise the following features are typical of the rural environment and the effects are accepted and able to be managed:
- (i) Large numbers of animals being farmed, extensive areas of plants, vines or fruit crops, plantation forests and farm forests;
- (ii) Noise, odour, dust, traffic and visual effects associated with the use of land for farming, horticulture, forestry, farm quarries;
- (iii) Existing mineral extraction and processing activities;
- (iv) Minor dwellings;
- (v) Papakainga housing developments within Maori freehold land;
- (vi) Rural industry.
- (b) Avoid adverse effects outside the site and where those effects cannot be avoided, they are to be mitigated.
- (c) Reduce and/or mitigate the adverse effects of reverse sensitivity through the use of setbacks and the design and location of subdivisions and development.
- (d) The scale, intensity and timing and duration of activities are managed to ensure compatibility with the amenity and character of the rural environment.
- (e) Enable the use of artificial outdoor lighting for night time work.
- (f) Ensure glare and light spill from artificial lighting in the rural environment does not:
- (i) Compromise the safe operation of the road transport network; and
- (ii) Distract from the amenity of other sites within the surrounding environment.
- (g) Frost fans are located and operated to ensure adverse effects on the surrounding environment are minimised.
- (h) Provide for intensive farming activities and rural industry, recognising the potential adverse effects that need to be managed, including noise, visual amenity, rural character or landscape effects, and odour.

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- With regard to reverse sensitivity in the rural environment, rural industry should be recognised as being typical in the rural environment and the effects are to be accepted.
- To specifically include rural industry in the list of features in the rural environment is important to ensure consistent direction in the objectives and policies in the Proposed District Plan relating to reverse sensitivity.
- Whilst Tuakau Protein Limited is located now in the Industrial zone, it is surrounded by the Rural Zone, and as a rural industry this should be accepted as an appropriate land use.
- It is also noted that the existing policy direction in the Franklin section of the Waikato District Plan in Objective 17C.2.1.4 refers to rural industry specifically.
- It is considered important to also provide a policy basis to ensure that when considering applications to subdivide and develop in the Rural Zone, that the location of subdivision itself needs to be considered in terms of reverse sensitivity mitigation, assisting in reducing rather than mitigating adverse effects.

Point Number

402.5

Summary of Decision Requested:

Amend the definition of "Industrial Activity" in Chapter 13 Definitions to specifically include "rural industry activities" (or words to similar effect).

OR

Add "Rural Industry" to Rule 20.1.1 Permitted Activities as a permitted activity in the Industrial Zone (or words to similar effect).

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Proteins Limited is concerned that their activities may not fit within the definition of Industrial activity.
- Tuakau Proteins Limited is confident that they would fit within definition of rural industry however, there is no confirmation in the plan as it written that rural industry fits within Industrial activity. Therefore, rural industry potentially is not considered as a permitted activity in the Industrial Zone.

Point Number

402.6

Summary of Decision Requested:

Retain the permitted noise levels in Rule 20.2.3 Noise, except for the amendments sought below

AND

Add new noise level standards to Rule 20.2.3.1 P2 - General, as follows (or words to similar effect):

P2

(a) Noise measured within any other site:

- (i) In an Industrial Zone must not exceed:
A. 75dBA (LAeq) 7am to 10pm; and
B. 55dB (LAeq) and 85dB (LAmax) 10pm to 7am the following day.

(ii) At the Rural Zone interface, noise levels must not exceed the below noise levels when measured within the notional boundary of property in a rural zone:
A. 55dB (LAeq) 7am to 10pm; and
B. 45dB (LAeq) and 75dB (LAmax) 10pm to 7am the following day.

AND

Add new noise level standards to Rule 20.2.3.1 P3 Noise General as follows (or words to similar effect):

P3

(a) Noise measured within any site in any zone other, than the Industrial Zone and the Heavy Industrial Zone, must meet the permitted noise levels for that zone, with the exception of the interface with the Rural Zone.

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Proteins Limited supports the permitted noise levels in the Industrial Zone, but considers that is necessary to include 'interface' permitted noise levels in the Industrial zone.
- As Tuakau Proteins Limited is located within the Industrial Zone but is the only industrial activity, the zoning changes at the site boundary to the adjacent Rural Zone. Therefore, although noisy activities are accepted in the Industrial Zone and higher permitted noise levels are provided, Industrial activities still need to fit within the Rural Zone's permitted noise levels, since the noise measured within any site in any zone other than the Industrial Zone and Heavy Industrial Zone, must meet the permitted noise levels for that zone.
- Tuakau Protein Limited must meet the Rural Zone permitted noise levels, which are much lower than the Industrial Zone's, which creates an issue when considering future growth of the site.
- Tuakau Protein Limited notes that other councils have included interface noise levels to manage such situations where noise levels need to be considered on sites which are located on the boundary of another zone. It is considered that this is appropriate to ensure the District Plan does not unreasonably restrict future growth of rural industry located on the boundary of the Rural Zone.

Point Number

402.7

Summary of Decision Requested:

Delete Rule 20.2.6 Hazardous Substances.

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Proteins Limited considers that hazardous substances should not be regulated under the District Plan.
- Sections 30 and 31 of the Resource Management Act have been amended to remove control of hazardous substances as an explicit function of councils.
- Consequential changes have also been made to the Hazardous Substances and New Organisms Act 1996 (HSNO) and Health and Safety at Work Act 2015 in light of this change.
- Tuakau Proteins Limited considers HSNO or Worksafe controls are adequate to address the environmental effects of hazardous substances in any particular case (including managing the risk of potential effects on the local environment).

Point Number

402.8

Summary of Decision Requested:

Delete Rural Industry from Rule 22.1.3 RD2 Restricted Discretionary activities

AND

Add Rural Industry to Rule 22.1.2 Permitted Activities.

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Proteins Limited does not consider the rural industry should be classed as Restricted Discretionary Activity in the Rural Zone.
- Waikato District Council has listed other 'non-rural' activities as Permitted Activities in the Rural Zone, such as forestry, equestrian centres and horse training centres.
- Is considered that including rural industry as Restricted Discretionary is inconsistent with Policy 5.3.2.

Point Number

402.9

Summary of Decision Requested:

Amend Policy 5.3.9 (a) Non-rural activities, as follows (or words to similar effect):

(a) manage any non-rural activities, including equestrian centres, horse training centres and forestry ~~and rural industries~~, to achieve a character, scale, intensity and location that are in keeping with rural character and amenity values.

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Protein Limited considers that rural industries are rural activities and should not be included in a list of activities which are considered to be 'non-rural.'
- Tuakau Protein Limited also wish to highlight that the Waikato District Council have included all the non-rural activities listed in Policy 5.3.9 as Permitted Activities under 22.1.2 with the exception of rural industry which is listed as a Restricted Discretionary Activity 22.1.3.

Point Number

402.10

Summary of Decision Requested:

Amend the definition of "Industrial Activity" in Chapter 13 Definitions, as follows (or words to similar effect):

Industrial Activity

Means the production, processing, bulk moving or storage in bulk of any materials, goods or products:

Production includes:

(a) manufacturing; and

(b) assembly from components.

Processing includes:

(a) repair;

(b) servicing;

(c) maintenance; and

(d) assembly of materials, goods or product.

Bulk storage includes:

(a) warehousing.

Rural industry activities are included within the definition of industrial activity.

OR

Amend policies such as Policy 4.1.10 Tuakau that only mention "industrial activity" to also refer to "rural industry" (or words to similar effect).

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Tuakau Protein Limited does not consider that the definition of Industrial activity is adequately described.
- Being an activity that has been changed from located in the Business to Industrial Zone, it is interpreted that Tuakau Protein Limited would therefore fit within the Rural Industry and subsequently the Industrial Activity definitions to ensure consistency.

Point Number 402.11

Summary of Decision Requested: **Confirm** the inclusion of rendering in the definition of "Rural Industry" in Chapter 13 Definitions.

OR

Amend the definition of "Rural Industry" in Chapter 13 Definitions to provide more clarity or examples of what rural industry activities would be.

AND

Any consequential amendments and/or additional relief to give effect to the concerns raised in the submission.

Decision Reasons:

- It is considered that Tuakau Proteins Limited's operation does fit within the definition of Rural Industry as it written.
- However, it is requested that Waikato District Council confirm this interpretation.
- It is acknowledged that the definition is more succinct than the existing definition in the Franklin Section of the plan. Therefore, it is important to ensure that the definition has not become more ambiguous in application.

Submitter Number: 403 **Submitter:** Doug Nicholson

Point Number 403.1

Summary of Decision Requested: No specific decision sought, but submitter seeks that Rule 18.2.1 be amended.

Decision Reasons:

- No reasons provided.

Point Number 403.2

Summary of Decision Requested: **Amend** Rule 18.2.4.1 Earthworks - General, to suit 10 Baird Avenue, Te Kauwhata.

Decision Reasons:

- No one has visited the site to the knowledge of the submitter.
- No consideration as to what the land looks like and what runs through it, such as the council easement for wastewater being an open drain right through the middle of the property to a small lake, which then drains to the wetlands via a large open culvert.
- Any planned development would have to do earthworks outside these rules to achieve the District Plan vision.

Point Number 403.3

Summary of Decision Requested: **Amend** Rule 18.2.8 PI (iii) Outdoor Storage, so activities on 10 Baird Ave, Te Kauwhata are a discretionary activity.

Decision Reasons:

- 10 Baird Avenue is in a gully from adjacent zones and properties. This rule is unlikely to be achieved, and would need compromise of sorts at consent stage.

Point Number 403.4

Summary of Decision Requested: **Amend** Rule 18.3.1.1 PI Height – Building General, from 10m to 15m.

Decision Reasons:

- 10m does not lend itself to current successful/optimum shopping precincts developments, which consist of anchor tenants, such as The Warehouse Ltd
- It is necessary for a 15m peak for buildings (perhaps not on street frontage) which are these anchor tenants
- Example: <http://www.colliers.co.nz/209211/>

Point Number 403.5

Summary of Decision Requested: **Amend** Rule 18.1.3 Restricted Discretionary Activities and review the rules in consultation with 10 Baird Avenue, Te Kauwhata.

Decision Reasons:

- There are rules which contradict each other
- The new rules do not lend themselves to current trends in developments the Town Centre is looking for.
- 10 Baird Avenue is the submitters' residential home, and they would not be able to do anything that they regard as 'lifestyle block' ownership improvements (such as a barn for a tractor).
- The Plan restricts development to business with residential only allowed above ground floor, but cannot be done unless the indicative road is made into a permanent road. This may not happen for a long time, as the submitter does not own the road, only have right of use.
- The only choice under these new rules would be to sell now to someone who is happy as it is, or wants to land bank, or sit 'in limbo' waiting for someone to come and want to buy the block plus the neighbours block to develop into shops etc., which could be 7-20 years away.
- The rules devalue the land.

Point Number 403.6

Summary of Decision Requested: **Amend** the zoning for the property at 10 Baird Avenue, Te Kauwhata from Business Town Centre to Business Zone.

Decision Reasons:

- 10 Baird Avenue may not be best suited to a Town Centre Zone as it does not have main street frontage.
- The property would be better as a Business Zone to reach full potential of development as Business Zone permissible activities.

Point Number 403.7

Summary of Decision Requested: **Amend** Rule 18.1.2 P8 Permitted Activities, to allow offices at the rear of tenancies on the ground floor

OR

Amend Rule 18.1.2 P8 Permitted Activities, to have no restrictions on offices.

Decision Reasons:

- A typical shop or retail development does not have a second floor and offices are generally at the rear of the tenancy on the ground floor.
- Some businesses require offices to be on the ground floor and at the street front
- Campbell Tyson, as an example, is on the ground floor and on a main street frontage.

Point Number 403.8

Summary of Decision Requested: **Amend** Rule 18.1.2 P2 Permitted Activities, to allow for existing ground floor dwellings and new ground floor dwellings as permitted activities as per the existing mixed use area rules, for the duration of the existing legal owners.

Decision Reasons:

- The home is on the ground floor, and the submitter may want to build another home on the site should the existing home become uninhabitable for whatever reason.
- The Proposed District Plan removes their existing rights or use they had when they purchased.
- The Proposed District Plan should allow current landowners to use existing zone rules until sale.

Point Number 403.9

Summary of Decision Requested: **Amend** Rule 18.1.5 Non-Complying Activities, to allow for rules under mixed-use area policy currently in place

AND

Amend Rule 18.1.5 Non-Complying Activities, to enable development on an indicative road.

Decision Reasons:

- 10 Baird Avenue is on an indicative road (not owned by submitter).
- NC1, NC2 and NC4 do not allow the submitter to do anything unless neighbours land turns into permanent road, which may never happen.
- The submitter does not want to develop the land themselves, just to be able to build lifestyle improvements while they are there, until they sell to a developer, if one is interested in next 10 years or more.
- This rule effectively devalues the land from the current rules.

Point Number 403.10

Summary of Decision Requested: **Amend** Rule 18.3.3 D1 Gross leasable floor area, as follows (or similar):

Any individual tenancy with a gross leasable floor area over 350m² and no greater than ~~500m²~~ 1000m², and no greater than 5000m² for no more than two tenancies

Decision Reasons:

- Anchor tenants are key to shopping or business area developments
- With small tenancy restrictions, no anchor tenant will be allowed so developments will not get off the ground due to no interest for other smaller tenants
- Retailers and business need to be around anchor tenants for many reasons
- A developer will not spend money if there is no tenancy interest, or ongoing success in a development
- Examples of typical shopping development of size suitable for Te Kauwhata: <http://www.colliers.co.nz/209211/>

Point Number 403.11

Summary of Decision Requested: **Amend** Rule 18.3.4 Display windows and building facades, to reflect Business Zone rule for 10 Baird Avenue, Te Kauwhata.

Decision Reasons:

- This rule will restrict optimum developments at 10 Baird Ave, Te Kauwhata.

Point Number 403.12

Summary of Decision Requested: **Amend** Rule 18.3.7 P1 (a)(i)A Building setbacks - Waterbodies, to define what qualifies as a lake.

Decision Reasons:

- It is unclear to the submitter whether the water at 10 Baird Avenue is a lake or if the site is a flood zone area. It is noted that the site includes a flood line limit and no identified waterbodies.

Point Number 403.13

Summary of Decision Requested: **Amend** Rule 18.3.8 Dwelling, to allow for current owners at 10 Baird Ave, Te Kauwhata to have the same rules as mixed policy area rules in place currently.

Decision Reasons:

- 10 Baird Ave, Te Kauwhata is the submitters residential home, and they would not be able to do anything they regard as 'lifestyle block' ownership improvements (such as a barn for a tractor), or a replacement home on the land.
- The Proposed District Plan restricts development to business with residential only allowed above ground floor, but cannot be done unless indicative road is made into a permanent road. This may not happen for a long time, as they do not own the road, only have right of use.
- The only choice under these new rules would be to sell now to someone who is happy as it is, or wants to land bank, or sit 'in limbo' waiting for someone to come and want to buy the block
- The neighbours block is to develop into shops etc., which could be 7-20 years away. The rules devalue the land.

Submitter Number:	404	Submitter:	Harry Mowbray
Organisation:	Mowbray Group		
Point Number	404.1		
Summary of Decision Requested:	Add provision for historic railway cottages to be shifted to the property at 452B Tauwhare Road, Matangi.		
Decision Reasons:	<ul style="list-style-type: none"> • Will compliment the Matangi History. • Will help create a destination. • Cottages to be classical exterior; modern interior for Air BnB letting. • The land used to have the Matangi Railway Station on it and railway houses. • Wishes to put railway houses on this land, with possibly a railway station and early historic cottages. 		
Point Number	404.2		
Summary of Decision Requested:	Retain the zoning to be Industrial Zone but work towards Business Town Centre zoning at the following properties: <ul style="list-style-type: none"> • Lot 1 DPS 61203 • IBII DPS 61203 • ITXVI DPS 37920 • ISII DPS 72565 • Lot 2 DPS 72565 		
Decision Reasons:	<ul style="list-style-type: none"> • Recently purchased some of this land from Railways and created 2 new titles. • Would like the zone to be Industrial with a view to going to Business Town Centre zoning. 		
Point Number	404.3		
Summary of Decision Requested:	Retain the zoning to be Industrial Zone but to be developed to Business Town Centre at the property at 456 Tauwhare Road, Matangi.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter owns this site as well as the Matangi Dairy Factory. 		
Point Number	404.4		
Summary of Decision Requested:	Amend Rule 20.3.1 Building height to provide dispensation for existing buildings located at 452B Tauwhare Road, Matangi (Matangi Dairy Factory) to ensure the boiler house (22m), dryer tower (26m) and boiler flues (33m) remain at these heights when a change of use occurs.		
Decision Reasons:	<ul style="list-style-type: none"> • Supports increase in building height to 15m from 10m for Rule 20.3.1. • Matangi Dairy Factory is a site of significant history. • Council records show that when a previous change of use for these buildings was requested, Council wanted the buildings reduced in height to 10m. • The submitter does not want this to be a condition in future development. 		
Point Number	404.5		
Summary of Decision Requested:	Retain the Industrial Zone for the property located at 452B Tauwhare Road, Matangi (Matangi Dairy Factory), but seeks special and flexible zoning to allow development of a historic business town centre.		
Decision Reasons:	<ul style="list-style-type: none"> • Allow a special and flexible zoning for this site. • Matangi site is historic and needs to be preserved and become an historic destination. • Matangi needs to continue to grow into an up-market village. • Having an industrial site in the middle of the village does not fit well. 		

Submitter Number:	405	Submitter:	Counties Power Limited
Point Number	405.1		
Summary of Decision Requested:	Retain Policy 6.3.4 (a) Future renewable electricity as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Counties Power supports the use of renewable energy resources. 		
Point Number	405.2		
Summary of Decision Requested:	Add the following to Objective 6.4.1 (a) Integration of infrastructure with subdivision, land use and development : <u>Protection of existing infrastructure assets.</u>		
Decision Reasons:	<ul style="list-style-type: none"> • Protect access to existing Counties Power assets during development, use and subdivision. 		
Point Number	405.3		
Summary of Decision Requested:	Retain Policy 6.4.3(a)(iii) Infrastructure Location and Services as notified.		
Decision Reasons:			

- Counties Power recognises the need to support new development and needs to be able to respond quickly to increased demand for electricity.

Point Number 405.4

Summary of Decision Requested: **Add** the following to Policy 6.4.5 (a) Roading infrastructure:
Design, alignment and dimension of new roads to accommodate installation of network infrastructure in accordance with technical and safety specification.

Decision Reasons:

- Counties Power supports good design and connectivity of roads.
- Road corridors are utilised for installation of distribution network for the connection of new subdivisions and development.

Point Number 405.5

Summary of Decision Requested: **Amend** Policy 6.5.2 (a) (vi) Construction and operation of the land transport network, by including the following:
Encourage collaborative working to enable sustainable transport and electricity networks in transport corridors and the protection of existing assets.

Decision Reasons:

- Encourage collaborative working to achieve safe, integrated, resilient and sustainable transport and electricity networks in the transport corridors, through good design and protection of existing Counties Powers assets.

Point Number 405.6

Summary of Decision Requested: **Retain** Policy 6.5.5 (a) Road safety.

Decision Reasons:

- Ensure structures, lighting, signage and vegetation do not compromise the safe and efficient operation of the transport network or the electricity network located in the transport corridors.

Point Number 405.7

Summary of Decision Requested: **Amend** Policy 6.5.6 (a) Network utility location, to give protection to existing network utility assets.

Decision Reasons:

- Enables Counties Power to install and maintain new and existing Counties Power network utility assets.

Point Number 405.8

Summary of Decision Requested: **Amend** the definition of "Building" in Chapter 13 Definitions, to exclude power poles, support structures and mast poles, as per section 9 (a), (ab) and (ac) of the Building Act 2004.

Decision Reasons:

- Power poles, support structures and mast poles are not buildings.

Point Number 405.9

Summary of Decision Requested: **Amend** definition of "Cabinet" in Chapter 13 Definitions, to clarify whether cabinets ancillary to the operations of communications equipment for the connectivity of the electricity network should be regarded as a cabinet or minor infrastructure. If regarded as a cabinet, the submitter questions whether it would be excluded because it houses ancillary equipment, or whether this is subject to assessment of dimensions.

Decision Reasons:

- Counties Power uses cabinets which are ancillary to the operation of communications equipment which is required for connectivity of the electricity network. These cabinets are generally attached to the lower part of the pole, or on the ground at the base of the pole.

Point Number 405.10

Summary of Decision Requested: **Amend** the definition of "earthworks" in Chapter 13 Definitions, to clarify as to whether all forms are included in the definition e.g. thrusting/drilling. Thrusting and drilling should not be included in the definition of "earthworks".

Decision Reasons:

- To ensure the definition is clear and whether all forms of earthworks that can occur with infrastructure activities are included.

Point Number 405.11

Summary of Decision Requested: **Amend** the definition of "Infrastructure" in Chapter 13 Definitions to include lines and fittings used or designed or intended for use, in or in connection with the generation, conversion, transformation, conveyance or use of electricity.

Decision Reasons:

- This definition and that of minor Infrastructure Structures does not cover everything utilised on the electricity for its safe and efficient operation.
- Allow some scope for those items not specifically defined by expanding on the definition.
- The alternative is to list every item of equipment on the network, but this does not necessarily allow for new equipment which will perform the same function.

Point Number 405.12

Summary of Decision Requested: **Amend** the definition of "Minor infrastructure structure" in Chapter 13 Definitions, to include the following relating to boxlike structures (dimensions can be provided for ground and pole mounted equipment in order to decide whether to adopt extensive list or refer to utility and dimension of infrastructure):

- service pillars;
- switch gear;
- voltage generator;
- autotransformer;
- cabinetry, for electricity network connectivity;

AND

Amend the definition of "Minor infrastructure structure" in Chapter 13 Definitions, to include the following equipment mounted on power poles (dimensions can be provided for ground and pole mounted equipment in order to decide whether to adopt extensive list or refer to utility and dimension of infrastructure).

- transformer;
- switch gear;
- voltage regulator;
- autotransformer;
- cabinetry, for electricity network connectivity;
- control boxes;
- capacitor.

Dimensions can be provided for ground and pole mounted equipment in order to decide whether to adopt extensive list or refer to utility and dimension of infrastructure.

AND

Add plinths to the definition of "Minor infrastructure structure" in Chapter 13 Definitions, and state that conditions which quote a height for ground/pad mounted infrastructure should not include height of plinth in overall height.

OR

Amend definition of "Minor infrastructure structure" definition in Chapter 13 Definitions, to allow box-like structures to be defined by use, e.g. electricity, telecommunications etc., and by maximum dimensions (m2/m3).

Decision Reasons:

- The current wording suggests this definition applies to box-like structures installed at ground level in which case, the list needs to include other structures.
- The electricity industry has equipment which is mounted on power poles which performs the same function as the ground/pad mounted equipment. This definition does not appear to include these items.

Point Number 405.13

Summary of Decision Requested: **Retain** the definition of "Minor upgrading of existing infrastructure" in Chapter 13 Definitions, as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.14

Summary of Decision Requested: **Retain** the definition of "Network utility operator" in Chapter 13 Definitions, as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.15

Summary of Decision Requested: **Retain** the definition of "Temporary infrastructure" in Chapter 13 Definitions, as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.16

Summary of Decision Requested: **Retain** the definition of "Utility allotment" in Chapter 13 Definitions, as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.17

Summary of Decision Requested: **Amend** Rule 14.2.1.1 (1) (b) Permitted Activities relating to P1 New infrastructure, to allow for new poles and support structures in other zones or roads adjacent to a zone other than Rural.

Decision Reasons:

- These height restrictions do not allow for new poles and support structures in any zone (or roads adjacent to a zone) other than Rural.

Point Number 405.18

Summary of Decision Requested: **Delete** Rule 14.2.1.1 (1) (c) and (d) Permitted Activities relating to P1 New infrastructure.

Decision Reasons:

- It does not make sense to have a rule that requires compliance with height in relation to boundary when the height limit is 2.5m.
- Will cause confusion in interpretation.

Point Number 405.19

Summary of Decision Requested: **Amend** Rule 14.2.1.1 (2) (a) Permitted Activities relating to P1 New infrastructure, by including the following:
except where the actual or % increase in height or area for minor upgrading would be less than allowed for in 14.2.1.1(1)(a-b), in which case 14.2.1.1 (1) (a) & (b) would apply.

Decision Reasons:

- The proposed percentage increase in area (and height) of above ground infrastructure under minor upgrading may be less than the limits proposed for new infrastructure of the same type; in which case it would make sense for the greater of the two measurements to apply.

Point Number 405.20

Summary of Decision Requested: **Amend** Rule 14.2.1.2 Permitted Activities relating to P2 Construction Noise, based on clarifying where the noise limits are measured.

AND

Amend Rule 14.2.1.2 Permitted Activities relating to P2 Construction Noise, to clarify which noise standards would apply when a transformer is in the road.

Decision Reasons:

- The proposed percentage increase in areas and height of above ground infrastructure under minor upgrading may be less than the limits proposed for new infrastructure of the same type; in which case it would make sense for the greater of the two measurements to apply.

Point Number 405.21

Summary of Decision Requested: **Retain** Rule 14.2.1.3 Permitted Activities relating to P3 Any activity emitting electric and magnetic fields, as notified.

Decision Reasons:

- Counties Power supports the management of electric and magnetic fields via the International Commission on Non-ionising Radiation Protection Guidelines.

Point Number 405.22

Summary of Decision Requested: No specific decision sought, but submission states Rule 14.2.2 RD1 (a) Restricted Discretionary Activities enables new infrastructure/technology.

Decision Reasons:

- The objectives and policies list new technological advancements as an important part of infrastructure.

Point Number 405.23

Summary of Decision Requested: **Add** the following clauses to Rule 14.3.1 PI The operation, maintenance, repair and removal of existing infrastructure:

(1) The maintenance and repair of existing infrastructure that meet the following condition:

(a) Does not increase the capacity, efficiency or security of existing infrastructure.

Decision Reasons:

- Clarification between repair of existing and minor upgrade of existing to make it easier to read the plan.

Point Number 405.24

Summary of Decision Requested: **Amend** Rule 14.3.1.1 Permitted Activities relating to P2 Minor upgrading of existing infrastructure, as follows:

(1) The realignment, configuration, relocation or replacement of infrastructure and associated structures that meet all of the following conditions:

(a) Are within 5.10m of the existing alignment or location;

(b) Do not increase the height of any existing pole or support structure by more than ~~45~~40% to a maximum height of 15m in all zones except the Rural Zone;

(c) Do not increase the diameter (width) of any existing pole or support structure by more than ~~150~~ or 100% increase in the case of a double pole in ALL zones;

(d) Do not increase the diameter of any existing aboveground pipe by more than ~~15~~20%;

(e) Do not increase the area of any existing aboveground structure by more than ~~15~~25% to a maximum of 10m² as per Rule 14.2.1.1 (1) (a)

(f) Do not increase the height of cabinet or box-like structures to more than 2.5m as per Rule 14.2.1.1 (1) (b).

Decision Reasons:

- Need to allow for up to 40% increase in pole height to a maximum of 15m in ALL zones except the Rural Zone where Rule 14.5.1.1 (a) (ii) & (iii) should apply as this will allow for the use of modern equipment.
- The height restrictions apply to poles and should be a similar permitted percentage increase in height for the upgrade of pad/ground mounted equipment.
- percentage increase in area should not apply to ground/pad mounted equipment. The area of autotransformer is for the footprint of the pad, not the autotransformer itself, which is smaller.

Point Number 405.25

Summary of Decision Requested: **Retain** Rule 14.3.1.1 (2) (a-k) Permitted Activities relating to P2 Minor upgrading of existing infrastructure (particularly clauses (f) and (j)), except for the amendments outlined below.

AND

Amend Rule 14.3.1.1 (2)(f) Permitted Activities as follows:

(f) The addition, replacement or relocation of transformers or visually similar fixtures;

Decision Reasons:

- Submitter particularly supports (f)-the addition and relocation of transformers and fittings on existing poles or support structures and (j)-increase in voltage to 110kV.
- Amendment to 14.3.1.1 (2) (f) relates to comments made regarding what should be covered under the definition of Infrastructure and Minor Infrastructure structures.

Point Number 405.26

Summary of Decision Requested: **Amend** Rule 14.3.1.2 (1) (c) Permitted Activities relating to P3 Temporary infrastructure as follows:

(c) The activity, including the requirements of Rule 14.3.1.2 (1) (a) and (b), must not exceed ~~24~~22 months in total.

Decision Reasons:

- Infrastructure as opposed to other land uses is generally in place for a much longer period of time and a temporary solution for infrastructure may be required for longer than anticipated.
- In many cases temporary infrastructure is required before a long-term solution is put in place or projects such as road widening which may require a temporary diversion of an overhead line, can be delayed meaning that the infrastructure is in place for longer than anticipated.

Point Number 405.27

Summary of Decision Requested: **Retain** Rule 14.3.1.3 (1) (a) and (b) Permitted Activities relating to P4 Earthworks activities associated with infrastructure, except for the amendments outlined below.

AND

Amend Rule 14.3.1.3 (g) Permitted Activities relating to P4 Earthworks activities associated with infrastructure as follows:

(g) Earthworks shall not obstruct or divert any stormwater overland flow path ~~or~~ in such a way as to result in changed stormwater drainage patterns on another site.

AND

Amend Rule 14.3.1.3 (1) (h) Permitted Activities relating to P4 Earthworks activities associated with infrastructure to confirm earthworks does not include drilling, therefore allowing trenchless construction within a Historic Heritage site.

Decision Reasons:

- The submitter supports this rule with the exception of (g) as they believe that where there is no other alternative it should be permitted to install equipment (at their own risk), within a stormwater overland flow path so long as it does not result in flooding or altered drainage patterns on any other sites.

Point Number 405.28

Summary of Decision Requested: **Retain** Rule 14.3.1.4 (1) Permitted Activities relating to P5 Trimming, maintenance or removal of vegetation or trees associated with infrastructure as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.29

Summary of Decision Requested: **Amend** Rule 14.3.1.6 (1) (a) Permitted Activities relating to P7 Electric vehicle chargers, to increase the height of EV chargers to 2m (total height allowed not to include concrete pad).

Decision Reasons:

- Allows for a 0.2m concrete pad which is the average height of EV chargers.
- Counties Power have a number of EV chargers which are 2m in height, installed in car parks with dedicated parking bays.

Point Number 405.30

Summary of Decision Requested: **Retain** Rule 14.3.1.8 Permitted Activities relating to P12 Service connections for subdivision as notified.

Decision Reasons:

- Submission notes that while provision is made for connection to the network, in private ROW and private subdivisions where there is no vested road, the submitter may not own the service cables or lines from the network connection point to the boundary of each lot.

Point Number 405.31

Summary of Decision Requested: **Retain** Rule 14.3.2 CI Controlled Activities as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.32

Summary of Decision Requested: **Retain** Objective 6.1.1 (a) Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- Counties Power supports the development, operation and maintenance of infrastructure across the Waikato.

Point Number 405.33

Summary of Decision Requested: **Retain** Policy 6.1.2 (a) (i-vi) Development, operation and maintenance, as notified.

Decision Reasons:

- Policy provides for all services that Counties Power carries out.

Point Number 405.34

Summary of Decision Requested: **Retain** Policy 6.1.3 (a) (i-iii) Technological advancements as notified.

Decision Reasons:

- Counties Power supports the use of new technology and the reuse of redundant infrastructure and structures.

Point Number	405.35
Summary of Decision Requested:	Retain Policy 6.1.4 (a) (i-vii) Infrastructure benefits as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power supports the recognition of the benefits and the importance of infrastructure.
Point Number	405.36
Summary of Decision Requested:	Retain Policy 6.1.5 (a) Natural hazards and climate change as notified.
Decision Reasons:	<ul style="list-style-type: none"> Ensures that infrastructure does not exacerbate any hazards. Counties Power seeks to provide connections for wherever people choose to live/set up business (i.e. where consent has been given).
Point Number	405.37
Summary of Decision Requested:	Retain Objective 6.1.6 (a) Reverse sensitivity as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power wants to ensure that infrastructure is protected from any new activities.
Point Number	405.38
Summary of Decision Requested:	Retain Policy 6.1.7(a) Reverse sensitivity and infrastructure as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power wants to ensure that infrastructure is protected from subdivision, use and development. It is important that Counties Power infrastructure and suitable access is maintained to it so that, the efficient operation and resilience of the network is not compromised.
Point Number	405.39
Summary of Decision Requested:	Retain Objective 6.1.8 (a) Infrastructure in the community and identified areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power supports community well-being across the District.
Point Number	405.40
Summary of Decision Requested:	Retain Policy 6.1.9 (a) Environmental effects, community health, safety and amenity as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power supports the development and maintenance of infrastructure while taking in account environment effects where practicable.
Point Number	405.41
Summary of Decision Requested:	Retain Policy 6.1.10 (a) Infrastructure in identified areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power supports the consideration of Significant Natural Areas, Landscape and Natural Character Areas when it comes to proposing new infrastructure and undergoing maintenance or upgrades of existing infrastructure where practicable.
Point Number	405.42
Summary of Decision Requested:	Amend Policy 6.1.11 (a) (i-iii) Undergrounding new infrastructure, to emphasise the economic limitations of undergrounding especially with 110kV lines. Subject to satisfaction of technical requirements. 110kV lines will only be undergrounded where the party requesting the undergrounding pays. Lines within rural environments to continue to be overhead regardless of voltage.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power owns an electricity distribution network with a current system length of 3200km. 60% of the area covered by Counties Power falls within the Waikato District and is predominantly Rural. The cost of undergrounding all new infrastructure would be prohibitive. Undergrounding is very expensive.
Point Number	405.43
Summary of Decision Requested:	Retain Policy 6.1.12 (a) Co-location of compatible facilities as notified.
Decision Reasons:	<ul style="list-style-type: none"> This policy can reduce the sprawl of infrastructure.
Point Number	405.44
Summary of Decision Requested:	Retain Policy 6.1.13 (a) Future growth areas as notified.
Decision Reasons:	

- Counties Power wants to be able to easily develop infrastructure in new future growth areas and expand their existing network with ease.

Point Number 405.45

Summary of Decision Requested: **Retain** Policy 6.1.14 (a) Electromagnetic and radio frequency fields as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.46

Summary of Decision Requested: **Retain** Objective 6.2.1 (a) National grid as notified.

Decision Reasons:

- Protect access to existing Transpower assets during development, use and subdivision.

Point Number 405.47

Summary of Decision Requested: **Retain** Policy 6.2.6 (a) (i-iv) Reverse sensitivity and the National Grid as notified.

Decision Reasons:

- Protect access to existing Transpower assets during development, use and subdivision.

Point Number 405.48

Summary of Decision Requested: **Retain** Objective 6.3.1 (a) Renewable energy as notified.

Decision Reasons:

- Counties Power supports the use of renewable energy resources.

Point Number 405.49

Summary of Decision Requested: **Retain** Policy 6.3.3 (a) Enabling renewable electricity generation as notified.

Decision Reasons:

- Counties Power supports the use of renewable energy resources.

Point Number 405.50

Summary of Decision Requested: **Amend** Rule 14.3.4 D1 Discretionary Activities, to make provision for overhead lines in Industrial areas and to pass through pockets of non-Rural Zone where the line is built predominantly in a Rural Zone/road adjacent to the Rural Zone.

Decision Reasons:

- Rule does not allow for new poles in roads and unformed roads other than through Rural zones.

Point Number 405.51

Summary of Decision Requested: **Add** wording to Rule 14.4.2.1 RD4 (a)-(d) Subdivision of land within the National Grid Corridor that is similar to the subdivision rules within the zones.

Decision Reasons:

- The need may arise for Counties Power to construct new lines or amend the alignment of its existing lines which cross the Transpower corridor.

Point Number 405.52

Summary of Decision Requested: **Amend** Rule 14.5.1.1 Permitted Activities relating to P2 and P3 Overhead distribution lines to allow for new overhead lines to be constructed in the road corridor adjacent to industrial and open space zones.

AND

Amend Rule 14.5.1.1 Permitted Activities relating to P2 and P3 Overhead distribution lines to allow for new overhead lines to be constructed in the road corridor adjacent to pockets of residential zoning in an otherwise predominantly rural or industrial zone.

Decision Reasons:

- P2 and P3 only allow for new overhead lines in Rural Zone and roads adjacent to the Rural Zone. This needs to allow new overhead lines in Industrial/Heavy Industrial zones at least.
- Substations are allowed as a Permitted Activity in Heavy Industrial Zones but not overhead lines.

Point Number 405.53

Summary of Decision Requested: **Amend** Rule 14.5.1.2 Permitted Activities relating to P4 Substations and associated transformers and switching stations to allow for construction of substations in the Rural Zone.

Decision Reasons:

- Many of the sites Counties Power utilities are located are in the Rural Zone.

Point Number	405.54
Summary of Decision Requested:	Add conditions of compliance contained in Rule 14.5.1.3 (a)(ii) Permitted Activities relating to P5 Construction of building for sensitive land use for construction or alteration of ANY building to each of the relevant Zone chapters.
Decision Reasons:	<ul style="list-style-type: none"> Construction or alteration of ANY building within the vicinity of overhead lines must comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZCEP34:2001).
Point Number	405.55
Summary of Decision Requested:	Amend Rule 14.5.2 RD1 (a) (i) Overhead distribution lines and support structures not exceeding a voltage up to and including 110kV: Not located within the Rural Zone, to allow for new overhead lines to be constructed in the Road corridor adjacent to industrial and open space zones as a Permitted activity. AND Amend Rule 14.5.2 RD1 (a) (i) Overhead distribution lines and support structures not exceeding a voltage up to and including 110kV: Not located within the Rural Zone, to allow new overhead lines to be constructed in the road corridor adjacent to pockets of Residential zoning in an otherwise predominantly rural or industrial zone, as a Permitted Activity.
Decision Reasons:	<ul style="list-style-type: none"> Overhead lines should be permitted in Heavy Industrial zones and roads adjacent to Heavy Industrial Zones and in roads adjacent to pockets of Residential zoning in a predominantly Rural Zone.
Point Number	405.56
Summary of Decision Requested:	Retain Rule 14.6.1.1(a) Permitted Activities relating to P1, P2, P3 and P4 as notified.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	405.57
Summary of Decision Requested:	Retain Rule 14.10.1.1 (a) Permitted Activities relating to P1 Ancillary equipment as notified.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	405.58
Summary of Decision Requested:	Amend Rule 14.10.1.2(a) Permitted Activities relating to P3 Cabinets to provide dimensions for permitted cabinets.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	405.59
Summary of Decision Requested:	Retain Rule 14.10.1.4 (a)(i)-(vi) Permitted Activities relating to P5 Antennas attached to a building/structure as notified.
Decision Reasons:	<ul style="list-style-type: none"> Counties Power use Yagi antenna (UHF450/500MHZ) for automation on the Counties Power network and have a similar appearance to TV aerial-boom length (1.6m and 38mm diameter). These are not referred to but should be a Permitted Activity on an existing pole.
Point Number	405.60
Summary of Decision Requested:	Amend Rule 14.10.1.6(c) Permitted Activities relating to P9 Poles, antennas and head frames to make the rule clear.
Decision Reasons:	<ul style="list-style-type: none"> Under (c) it says "Rule 14.10.1.7 (l) does not apply to lighting rods and GPS antenna...." Therefore, does not seem to be a 14.10.1.7 (l) and therefore the rule is not clear.
Point Number	405.61
Summary of Decision Requested:	Add matters of discretion to Rule 16.4.1 RD1 (b) Subdivision - General as follows: <i>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;</i> <i>The consideration of the nature and location of any vegetation to be planted in the vicinity of existing infrastructure assets.</i>
Decision Reasons:	<ul style="list-style-type: none"> To prevent assets becoming landlocked. Similar to Transpower rules.
Point Number	405.62
Summary of Decision Requested:	Add a matter of discretion to Rule 17.4.1 RD1 (b) General Subdivision as follows: <i>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;</i>
Decision Reasons:	<ul style="list-style-type: none"> To prevent assets becoming landlocked. Similar to Transpower rules.

Point Number 405.63

Summary of Decision Requested: **Add** a matter of discretion to Rule 18.4.1 RD1(b) Subdivision - General as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.64

Summary of Decision Requested: **Add** a matter of discretion to Rule 20.4.1 RD1(b) Subdivision - General as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.65

Summary of Decision Requested: **Add** a matter of discretion to Rule 21.4.1 RD1(b) Subdivision - General as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.66

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.1.2 RD1(b) General subdivision as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.67

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.1.3 Subdivision of Maori Freehold Land as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.68

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.1.4 RD1(b) Boundary relocation as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.69

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.1.5 RD1(b) Rural Hamlet Subdivision as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.70

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.1.6 RD1(b) Conservation lot subdivision as follows:
The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;

Decision Reasons:

- To prevent assets becoming landlocked.

- Similar to Transpower rules.

Point Number 405.71

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.1.7 RD1 (b) Subdivision to create a reserve as follows:

The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets:

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.72

Summary of Decision Requested: **Add** a clause to Rule 23.3.1 PI(b) Dwelling so that where there are existing overhead lines, the location of the dwelling must comply with the requirements of NZECP34:2001.

Decision Reasons:

- Works must comply with NZECP34:2001.

Point Number 405.73

Summary of Decision Requested: **Add** a clause to Rule 23.3.2 PI(b) Minor Dwelling so that where there are existing overhead lines, the location of the dwelling must comply with the requirements of NZECP34:2001.

Decision Reasons:

- Works must comply with NZECP34:2001.

Point Number 405.74

Summary of Decision Requested: **Add** a clause to Rule 23.3.3 D1 Buildings and structures in Landscape and Natural Character Areas so that where there are existing overhead lines, the location of the dwelling must comply with the requirements of NZECP34:2001.

Decision Reasons:

- Works must comply with NZECP34:2001.

Point Number 405.75

Summary of Decision Requested: **Add** a matter of discretion to Rule 23.4.2 RD1 (a) General Subdivision as follows:

The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets:

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.76

Summary of Decision Requested: **Add** the following to Rule 23.4.3 D1 (a) (i-viii) Subdivision within identified areas as follows:

The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets:

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.77

Summary of Decision Requested: **Add** a matter of discretion to Rule 23.4.9 RD1 (b) Subdivision creating Reserves as follows:

The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets:

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.78

Summary of Decision Requested: **Add** a matter of discretion to Rule 23.4.12 RD1 (b) Esplanade reserves and esplanade strips as follows:

The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets:

Decision Reasons:

- To prevent assets becoming landlocked.
- Similar to Transpower rules.

Point Number 405.79

Summary of Decision Requested:	Add a clause to Rule 24.3.1 PI Dwelling so that where there are existing overhead lines, the location of the dwelling must comply with requirements of NZECP34:2001.
Decision Reasons:	<ul style="list-style-type: none"> • Works must comply with NZECP34:2001.
Point Number	405.80
Summary of Decision Requested:	Add a clause to Rule 24.3.2 PI Minor dwelling by adding another clause so that where there are existing overhead lines, the location of the dwelling must comply with the requirements of NZECP34:2001.
Decision Reasons:	<ul style="list-style-type: none"> • Works to comply with NZECP34:2001.
Point Number	405.81
Summary of Decision Requested:	Add a matter of discretion to Rule 24.4.1 RD1 (b) Subdivision - General, as follows: <u>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;</u>
Decision Reasons:	<ul style="list-style-type: none"> • To prevent assets becoming landlocked. • Similar to Transpower rules.
Point Number	405.82
Summary of Decision Requested:	Amend Rule 24.4.3 C1 (b) Subdivision - Boundary adjustments so adjustments do not prevent access to existing electricity infrastructure.
Decision Reasons:	<ul style="list-style-type: none"> • Adjustments must not prevent access to existing electricity infrastructure.
Point Number	405.83
Summary of Decision Requested:	Add a matter of discretion to Rule 24.4.11 RD1 (b) Subdivision Creating Reserves as follows: <u>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;</u>
Decision Reasons:	<ul style="list-style-type: none"> • To prevent assets becoming landlocked. • Similar to Transpower rules.
Point Number	405.84
Summary of Decision Requested:	Add a matter of discretion to Rule 24.4.12 RD1 (b) Subdivision of Esplanade Reserves and Esplanade Strips, as follows: <u>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;</u>
Decision Reasons:	<ul style="list-style-type: none"> • To prevent assets becoming landlocked. • Similar to Transpower rules.
Point Number	405.85
Summary of Decision Requested:	Add the following to Rule 25.4 (a) D1 Subdivision: <u>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of existing infrastructure assets;</u>
Decision Reasons:	<ul style="list-style-type: none"> • To prevent assets becoming landlocked. • Similar to Transpower rules
Point Number	405.86
Summary of Decision Requested:	Amend Designation II- Electricity Substation at Lot 1 DP 53555 McKenzie Road, Mangatawhiri by realigning the designation boundary with the property boundary.
Decision Reasons:	<ul style="list-style-type: none"> • Incorrect alignment of designation boundary.
Point Number	405.87
Summary of Decision Requested:	Amend Designation I5- Electricity Substation at the property at 217 Whangarata Road, Tuakau to cover the entire area owned by Counties Power.
Decision Reasons:	<ul style="list-style-type: none"> • Incorrect designation boundary.
Point Number	405.88

Summary of Decision Requested: Add rules to limit the height of amenity planting in the front yard in Rural and Industrial zones to prevent potential interference with installation of overhead lines.

Decision Reasons:

- There are landscaping conditions that have been part of the consent process that may interfere with the construction or maintenance of infrastructure.
- Any front yard landscaping conditions should need to consider existing and future infrastructure that is in the road reserve.

Point Number 405.89

Summary of Decision Requested: Amend the planning maps as the Outstanding Natural Character and High Natural Character do not appear in the drop-down lists on the Planning Maps, as stated in the Definitions section.

Decision Reasons:

- No reasons provided.

Point Number 405.90

Summary of Decision Requested: Amend Rule 14.2.2 RD2(a) Restricted Discretionary Activities based on clarifying where the noise limits are measured.

Decision Reasons:

- Where a transformer is in the road, it needs to be clarified as to which noise standard would apply.

Point Number 405.91

Summary of Decision Requested: Amend Rule 14.3.4 D2 Discretionary Activities by increasing the temporary period to 24 months or allow for a 12 month extension.

Decision Reasons:

- It may not be possible to limit temporary activities to 12 months due to delays caused by a third party.

Point Number 405.92

Summary of Decision Requested: Amend Rule 14.5.1.2 (a) (iii) Permitted Activities relating to P4 Substations and associated transformers and switching stations to increase the floor area to 250m² per ancillary building.

Decision Reasons:

- A typical switch room (submitter presumes this is what is meant by "ancillary building") have a floor area up to 250m².

Point Number 405.93

Summary of Decision Requested: Amend Rule 14.5.2 RD2 (a) (iv) Construction or alteration of a building for a sensitive land use that does not comply with Rule 14.5.1.3, so construction of ANY building within the vicinity of overhead electricity lines must comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZECP34:2001).

Decision Reasons:

- Construction or alteration of ANY building within the vicinity of overhead electricity lines should comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZECP34:2001).

Point Number 405.94

Summary of Decision Requested: Amend Rule 14.5.3 D3 Discretionary Activities to increase the floor area of ancillary buildings to 250m² as a permitted activity.

Decision Reasons:

- Switch rooms cannot be accommodated in a gross floor area of 100m².

Point Number 405.95

Summary of Decision Requested: Retain Rule 14.6.1 Permitted Activities relating to P1 Small scale electricity generation as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.96

Summary of Decision Requested: Retain Rule 14.6.1.1 Permitted Activities relating to P2 Community-scale electricity generation as notified.

Decision Reasons:

- No reasons provided.

Point Number 405.97

Summary of Decision Requested: Retain Rule 14.6.1.1 Permitted Activities relating to P4 Temporary diesel-fueled electricity generation activities as notified.

Decision Reasons:

- No reasons provided.

Submitter Number:	406	Submitter:	Barry Green
Organisation:	Rushala Farm Ltd		
Point Number	406.1		
Summary of Decision Requested:	No specific decision sought, but the submission indicates opposition to Section 5.1 The Rural Environment, and states: "Been told what and how we can subdivide our land".		
Decision Reasons:	<ul style="list-style-type: none"> • Consider it should be the right of the landowner who pays rates to have input into subdivision • Land use is the only way a farmer can survive. • Council does not understand the costs involved in compliance and restraints mean that farming is becoming less viable. • Subdivision is a way that some farmers can survive and reduce their debt. 		

Submitter Number:	407	Submitter:	Mel Libre
Point Number	407.1		
Summary of Decision Requested:	Amend the proposed zoning of the land between the Waikato Expressway and the Tamahere Country Living Zone (including Yumelody Lane) from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • This land around Yumelody Lane is already subdivided into small lots and is not suitable as economic farming. It is suitable for Country Living because it is adjacent to the Tamahere Country Living and separated from the rural areas by the Expressway. 		
Point Number	407.2		
Summary of Decision Requested:	Retain Rule 22.3.2 PI Minor dwelling and do not include reference to dependent persons in the rule.		
Decision Reasons:	<ul style="list-style-type: none"> • There is no need to stipulate that dependent persons live in a minor dwelling. 		
Point Number	407.3		
Summary of Decision Requested:	Delete Rule 22.3.2 PI (b)(i) Minor dwelling, requiring a minor dwelling to be within 20m of the main dwelling.		
Decision Reasons:	<ul style="list-style-type: none"> • The requirement for the minor dwelling to be within 20m of the main dwelling is unnecessary • It takes no account of the topography and other features of the land. • There might be a better site on the land which is further away. 		
Point Number	407.4		
Summary of Decision Requested:	Amend the extent of the Significant Natural Area to extend further along the gully past 60 Yumelody Lane, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> • There is significant bird life and large trees in the gully adjacent to 60 Yumelody Lane, Tamahere that justify assessment of the gully as a Significant Natural Area. 		

Submitter Number:	408	Submitter:	Godfrey Bridger
Point Number	408.1		
Summary of Decision Requested:	Amend Rule 23.4.2 General subdivision, by reducing the minimum lot size from 5000m ² to 4000m ² .		
Decision Reasons:	<ul style="list-style-type: none"> • The operative minimum lot size requirement of 5000m² has existed for quite a while and needs to take account of change. • Changing this to 4000m² would enable the supply of sections in the Country Living Zone to transition to a slightly higher density housing. • Reduces the likelihood of a pressure point. 		

Submitter Number:	409	Submitter:	Riki Manarangi
Point Number	409.1		
Summary of Decision Requested:	Amend Rule 23.4.2 RD1 (a)(i) General Subdivision, as follows: <i>(a) Subdivision must comply with all of the following conditions:</i>		

(i) All proposed lots must have a net site area of at least ~~5000m²~~ 3000m².

Decision Reasons:

- No reasons provided.

Point Number

409.2

Summary of Decision Requested:

Amend the zoning of the properties located from 22 Hakarimata Road to 963 Hakarimata Road (i.e. from the residential portion of Hakiramata Road to Riverview Road) from Country Living Zone to Village Zone.

Decision Reasons:

- Will ensure consistency with other parts of the district which are proposed to be zoned Village where the absence of reticulated infrastructure requires a minimum lot size of 3000m²;
- Will not require further commitments from Council in terms of infrastructure/services;
- Will ensure consistency with other parts of the district which are proposed to be zoned Village given their proximity to residential properties and infrastructure on Hakarimata Road;
- Will enable Council to respond to central government's messaging on affordable housing and an increase in housing supply to meet an increasing demand;
- Will enable development to be drawn away from high class soils; and
- Will enable more people to choose the Waikato District as a place to live and play rather than Auckland and Hamilton.

410

Submitter:

Trevor Weaver

Point Number

410.1

Summary of Decision Requested:

Amend Planning Map 14.5 for Rangiriri so that it indicates the canal/drain running from Lake Kopuera to Rangiriri Stream and the weir located beside this lake.

Decision Reasons:

- Notified planning map 14.5 for Rangiriri does not show a canal/drain that runs from Lake Kopuera to the Rangiriri Stream or the weir located beside this lake.

Point Number

410.2

Summary of Decision Requested:

Delete the Significant Natural Area (B7) from the submitter's property located at Te Onetea Road, Rangiriri, east of Lake Kopuera.

Decision Reasons:

- The mapped Significant Natural Area on their property does not contain bush as it is affected from flooding from Lake Kopuera when there are overflows of the normal lake margins. This area is used as a pastoral runoff for drystock and dairy replacements.
- Considers this is a sneak attack to turn private land into wetland.

Point Number

410.3

Summary of Decision Requested:

Lower the weir height in winter to stop water overflowing the normal margins of Lake Kopuera and causing flooding on private land.

Decision Reasons:

- The flood-prone areas on the submitter's property are required to support the submitter's farming operation which includes the raising of drystock and dairy replacements (as well as for hay and cropping).

Point Number

410.4

Summary of Decision Requested:

Amend Planning Map 14.5 Rangiriri to correct the boundaries of the submitter's property at Te Onetea Road so the farm boundaries align with the main trunk railway line and Lake Kopuera and include the swamp/bush from the lake to the railway line.

Decision Reasons:

- The planning maps showing the location of the farm are wrong.

Submitter Number:

411

Submitter:

Kelvin Norgrove

Point Number

411.1

Summary of Decision Requested:

Retain the definition of "commercial activity" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition provides flexibility for a range of activities (such as restaurants, cafes, shops and offices) within both the Business Zone and Town Centre Business Zone, thus enabling mixed use developments in town centres.

Point Number

411.2

Summary of Decision Requested:

Amend the planning maps for Pokeno, by extending the verandah annotation to corner sites (including the property at 26 Market Street) that are within the Town Centre Business Zone at the western end (Market Square).

Decision Reasons:

- Extending the map annotation for verandahs in this location would be consistent with the approach for other road intersections to the east. A stronger built form, pedestrian shelter and amenity are required at the western entrance to the main street to achieve the design guidelines for the Pokeno Town Centre.

Submitter Number:	412	Submitter:	David Saxton
Point Number	412.1		
Summary of Decision Requested:	<p>Require the Department of Corrections to maintain all mitigation plantings associated with Springhill Prison for as long as the prison exists.</p> <p>AND</p> <p>Amend the Proposed District Plan to apply a "Significant Natural Area" map annotation to the native plantings at Springhill Prison.</p>		
Decision Reasons:	<ul style="list-style-type: none"> The Department of Corrections was directed by the consenting authorities to mitigate the impact of the prison on the landscape by extensive planting that is maintained for as long as the prison exists. 		
Point Number	412.2		
Summary of Decision Requested:	<p>Amend the planning maps by only mapping Significant Natural Areas after direct and meaningful consultation with an affected landowner and a site visit by a suitably experienced council officer which is authorised by that landowner.</p>		
Decision Reasons:	<ul style="list-style-type: none"> Council's mapping of Significant Natural Areas so far has been crude and has likely alienated landowners. It has involved a desk top exercise using dated satellite imagery and best guess decision making which has resulted in anomalies and landowner frustrations. This mapping will mean the loss of property rights, despite on-going costs of land ownership. There needs to be additional incentives to affected landowners such as rates relief and/or increased subdivision potential. The submitter supports the principle of protecting Significant Natural Areas. 		
Point Number	412.3		
Summary of Decision Requested:	<p>Amend Rule 26.2.1 Noise - Motor sport and recreation activity, by specifying that no excessive noise associated with the motor sport park is permitted between 7pm and 7am on any day.</p>		
Decision Reasons:	<ul style="list-style-type: none"> Through the development of this motor sport park, locals largely accepted that the activities would exceed noise levels allowed in the District Plan for the Rural Zone but were reassured that no night-time racing would occur. The park has recently run a very noisy event that had a 24 hour duration which is intolerable for adjacent neighbours and it is considered that this breaches the existing resource consents. 		

Submitter Number:	413	Submitter:	Danielle Hart
Point Number	413.1		
Summary of Decision Requested:	<p>Add a special character area to Chapter 9 Specific Zones for the main township of Raglan.</p>		
Decision Reasons:	<ul style="list-style-type: none"> Raglan has a special character that needs to be acknowledged and protected from drastic change. A successful Raglan brand is not based on multi-storey buildings, modern architecture, apartments or a commercial, sterile feel. Raglan will change but it has an undeniably special character. 		
Point Number	413.2		
Summary of Decision Requested:	<p>Amend the Proposed District Plan to require building activity in Raglan which does not comply with the Proposed District Plan to be publicly notified.</p>		
Decision Reasons:	<ul style="list-style-type: none"> Discretionary activities mean that the discretion to publicly notify is available. It is not fair to give this power to a planner. The high engagement in Raglan Naturally shows how strongly the community feels, how diverse it is, how it wishes to protect what makes Raglan unique. Buildings are a huge part of Raglan's environment and the feel of a town. Raglan has a special character that deserves a community voice in its protection. 		

Submitter Number:	414	Submitter:	Chris Rayner
Point Number	414.1		
Summary of Decision Requested:	<p>Amend the Proposed District Plan to give consideration and guidelines to alternative collective living arrangement within the Living Zone. For instance, a large site of more than 1 acre with multiple dwellings on the site in a form of communal living.</p>		
Decision Reasons:	<ul style="list-style-type: none"> As land becomes more and more expensive, especially in Raglan. The simple aim of infill and further subdivision of land is not suited to everyone and the Council should be encouraging and enabling other forms of sustainable communal living that provide accommodation and community for people. Perhaps some of the rules that apply for papakainga could be used as a guide for more groups of people to create alternative communal living on private land. 		
Point Number	414.2		
Summary of Decision Requested:	<p>Amend the Raglan Business Zone to include all of Bankart Street and 8, 10 and 12 Wainui Road, with possible consideration given to 4 Stewart Street.</p>		

Decision Reasons:

- 12 Wainui Rd and 4 Stewart St are both very large sections very close to the town centre and are perfect for future commercial development as they are also close to parking and walking.
- These properties are also very close to the fire and ambulance service and the submitter considers that intensive residential development is not suited due to the noise of the emergency services siren.
- Questions why the business zone in the Raglan town centre has not been continued along Wainui Road towards the museum and information center, and specifically why the sections at 8, 10 and 12 Wainui Road and 4 Stewart Street have not been rezoned to Business Zone.

Point Number 414.3

Summary of Decision Requested: Retain Section 4.7 Urban Subdivision and development.

Decision Reasons:

- No reasons given.

Point Number 414.4

Summary of Decision Requested: The submitter seeks a number of roading changes in Raglan; including:
- State Highway 23 to end just before Greenslade Road;
- A proper turning bay for traffic turning into Greenslade Road with enough room for traffic going straight;
- Reducing speed limits;
- Standards of roading, drainage, lighting and footpaths; and
- Roundabout between Hills Road and Lorezen Bay Road and State Highway 23.
- Turning bays on State Highway 23 at Lorenzen Bay Road/Hills Road.

Decision Reasons:

- Roads can be extremely dangerous.
- Posted speeds are too high.
- Waikato District Council and Transit NZ need to work together.

Point Number 414.5

Summary of Decision Requested: Amend the Proposed District Plan by lifting noise limits within the town centre of Raglan to enable more live music and events.

Decision Reasons:

- Socialising and getting out to events, with music and dancing is an important part of a happy healthy community.
- The submitter would like to see Council help those who want to create events as music is a big part of why people come to Raglan.
- The submitter believes the noise limits in the the town centre should be raised and the restrictions around temporary events should be reduced.

Point Number 414.6

Summary of Decision Requested: No specific decision is sought, but the submitter questions why there is a large area of land on State Highway 23 just after Lorenzen Bay Road that is now marked to be rezoned Business.

Decision Reasons:

- This new Business Zone is larger than any newly zoned business land in the town centre. By creating a satellite strip of shops out of town, Council is going against its own objectives such as 4.5.12 (b) The Business Town Centre Zone is promoted as a community focal point.
- The new Business Zone on State Highway 23 will have a negative impact on business in the town centre.
- More land should be rezoned Business within the town centre and wharf area rather than creating new strips of shops out of town on an already very busy and dangerous section of road.

Point Number 414.7

Summary of Decision Requested: No specific decision sought, but submitter questions why there are 6 new cul-de-sacs in the Greenslade Road infill development, which is contrary to Policy 4.7.3(a)(iv). The submission seeks a detailed design with public consultation for the development between State Highway 23 and Greenslade Road.

Decision Reasons:

- No reasons provided.

Submitter Number: 416 **Submitter:** Barry Green

Point Number 416.1

Summary of Decision Requested: No specific decision sought, but submission opposes Section 5.2 Productive Versatility of Rural Resources, and effects of subdivision and development on soils.

Decision Reasons:

- It should be the right of the landowner who pays the rates to have input into subdivision and land use as this is the only way a farmer can survive. Farming is become a less viable option because of costs of compliance and subdivision is a way that some farmers can reduce their debt.

Point Number 416.2

Summary of Decision Requested: No specific decision sought, but the submission opposes Policy 5.3.14(b) Signs and mentions signs on Kaiaua Road and Waikato District Council area double yellow lines.

Decision Reasons:

- The double lines on Kaiaua Road have made this road very dangerous (people not passing slow vehicles and passing in dangerous spots where there are no yellow lines but where there should be).
- They are a waste of money and ratepayers should have been consulted.

Submitter Number:	417	Submitter:	Glenys McConnell
Point Number	417.1		
Summary of Decision Requested:	<p>Add a new clause to Objective 5.1.1 The rural environment, as follows:</p> <p><i>(iv) existing titles created prior to 6 December 1997 may be aggregated to produce a compliant small sized block and a larger block by boundary adjustment.</i></p> <p>AND</p> <p>Add a new clause to Policy 5.2.3 Effects of subdivision and development on soils, as follows:</p> <p><i>(c) Subdivision by way of aggregation of titles created prior to 6 December 1997 to produce a compliant small sized block and a larger block by boundary adjustment.</i></p> <p>AND</p> <p>Consequential amendments to Rule 22.4.1.2 (as outlined in submission point 417.2).</p>		
Decision Reasons:	<ul style="list-style-type: none"> • It is desirable to have a policy that encourages older titles to be amalgamated to create larger usable lots. 		
Point Number	417.2		
Summary of Decision Requested:	<p>Delete Rule 22.4.1.2(a)(ii) General subdivision</p> <p>AND</p> <p>Amend Rule 22.4.1.2 (a)(iv) General subdivision, as follows:</p> <p><i>(a) Subdivision must comply with all of the following conditions:</i></p> <p>...</p> <p><i>(iv) The additional lot must have a proposed area of between 8,000m² <u>2,500m²</u> and 1.6 ha;</i></p> <p>AND</p> <p>Amend Rule 22.4.1.2 (v) General subdivision, to allow the smaller lot to contain up to 100% of high class soils if this results in the aggregation of older titles.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter considers that this amendment is a consequence of their requested policy changes to Section 5.1.1 The Rural Environment and Policy 5.2.3. • The amendment supports the amalgamation of smaller older titles by way of boundary alteration or subdivision to create larger titles that are usable and enables smaller titles to be sold separately. • The amendment encourages the use of high class land as a trade-off. 		

Submitter Number:	418	Submitter:	Ethan Findlay
Point Number	418.1		
Summary of Decision Requested:	<p>Retain the approach to relocatable or second-hand buildings by not having any separate rules for them and therefore that these are a permitted activity.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports relocatable or second-hand buildings being permitted activities. 		
Point Number	418.2		
Summary of Decision Requested:	<p>Amend the definition of "earthworks" in Chapter 13 so that it excludes common farming practices such as cropping, paddock contouring, drainage improvement and planting.</p> <p>OR</p> <p>Amend Rule 22.2.3.1 P2(i) Earthworks general to increase the area and volumes permitted.</p> <p>AND</p> <p>Amend other parts of the district plan as necessary to give effect to the relief sought.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The rule renders typical farming activities unsustainable, given the need to carry out many of the farming activities listed above on areas greater than 2000m² per annum. • This rule does not appear to allow common rural activities or other effects of areas over 2000m² per annum. 		
Point Number	418.3		
Summary of Decision Requested:	<p>Amend the definition of "earthworks" to exclude common farming practices</p> <p>OR</p> <p>Amend Rule 22.2.3.1 P2(a)(iii) Earthworks - General to not apply to earthworks commonly carried out within 1.5m of boundaries such as planting, fencing, digging drains, tracks etc.</p> <p>AND</p> <p>Amend other parts of the district plan as necessary to give effect to the relief sought.</p>		
Decision Reasons:			

- The submitter considers that P2(a)(iii) contradicts P1(a)(iii), the latter of which permits earthworks for tracks, fences or drains. It is therefore unclear what earthwork activities are permitted within a 1.5m boundary setback.

Point Number 418.4

Summary of Decision Requested: **Delete** Rule 22.3.2 P1(a) Minor dwelling, which limits the gross floor area of a minor dwelling.

AND

Amend other parts of the district plan as necessary to give effect to the relief sought.

Decision Reasons:

- The size of the minor dwelling is best determined by the owner or end user and the building coverage rule for the Rural Zone already manages the size of this type of building.
- A gross floor area limit of 70m² will not enable optimum building design for the intended use as it does not provide for sufficient storage room or flexibility to cater for the needs of different occupants.
- The maximum gross floor area of 70m² is overly restrictive and makes no allowance for garaging within this rule.

Point Number 418.5

Summary of Decision Requested: **Delete** Rule 22.3.2 P1(b)(i) Minor dwelling, which requires minor dwellings to be 20m from the main dwelling.

AND

Amend other parts of the district plan as necessary to give effect to the relief sought.

Decision Reasons:

- The positioning of a minor dwelling relative to a dwelling should only be governed by the rules that address boundary setbacks and building coverage.
- This would allow landowners to optimise the permitted use of their land as they see fit.
- A 20 metre separation distance would also unlikely result in the best positioning of the minor dwelling in terms of solar performance, and accessibility, etc.

Point Number 418.6

Summary of Decision Requested: **Amend** Rule 22.3.6 P1(a)(i) and (ii) - Building coverage, so that the permitted building coverage is increased to 850m².

AND

Amend other parts of the district plan as necessary to give effect to the relief sought.

Decision Reasons:

- A building coverage of 850m² would provide for a dwelling, minor dwelling and sufficient ancillary buildings (such as implement sheds, storage sheds, workshops and farm buildings) on the submitter's property.
- The notified limits (the larger of 2% of the site area or 500m²) are not logical and have been carried over from previous district plan reviews.
- The rules for boundary setbacks and building height are sufficient to manage adverse effects for smaller properties where a large building coverage is not achievable.

Point Number 418.7

Summary of Decision Requested: **Amend** Rule 22.3.7.1 Building Setbacks - All boundaries, so that the setbacks of the 1.6ha or smaller neighbouring lots apply to both sides of a boundary to optimise land use where the larger neighbouring lot is 4ha or less.

AND

Amend other parts of the district plan as necessary to give effect to the relief sought.

Decision Reasons:

- A 25m setback from boundaries, other than a road boundary, is unreasonable and would adversely impact on the ability for the submitter to use their land.
- Two boundaries for the submitter's property adjoin properties that are less than 1.6ha. These neighbouring properties are permitted to have 12 metre setbacks.
- Building setbacks should promote a more efficient use of land without prejudicing more intensive subdivision of non-productive land in the future.

Point Number 418.8

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision to allow subdivision of Rural-zoned lots less than 4ha to allow better use of fragmented high class soils, regardless of when the certificate of title was issued.

OR

Amend the zoning of properties of Rural-zoned lots less than 4ha to Country Living zone, including the property at 7B Llennoc Lane, Tamahere.

AND

Amend the Proposed District Plan to enable subdivision of 7B Llennoc Lane, Tamahere into lots approximately 4500m² if non-serviced.

AND

Amend other parts of the district plan as necessary to give effect to the relief sought.

Decision Reasons:

- The requested amendments would promote the better use of already fragmented high class soil. For example, the area described by the submitter that is bordered by the high tension power lines, Tauwhare Road, Matangi settlement and the Hautapu rail link (and illustrated by the submitter's map) already contains fragmented high class soils.
- It is not possible to farm land areas less than 4ha without impacting on the surrounding lifestyle community.
- The creation of 4500m² lots from the submitter's property at 7B Llennoc Lane would have minimal impact on neighbouring landowners as their properties are already closely aligned to a Country Living Zone.

Point Number 418.9

Summary of Decision Requested: **Amend** the zoning of 7B Llennoc Lane, Tamahere and the surrounding properties (bordered by the high tension power lines, Tauwhare Road, Matangi settlement and the Hautapu rail link as illustrated by the submitter's map) from Rural Zone to a more enabling zone that allows intensification.

OR

Amend the Proposed District Plan to allow intensification of rural lot sizes smaller than 4ha through subdivision of fragmented high class soil land.

AND

Amend other provisions of the district plan as necessary to give effect to the relief sought.

Decision Reasons:

- Appropriate zoning would better reflect current land uses, allow intensification near Matangi settlement so as to provide critical mass to schooling and further support local businesses without the demand for additional wastewater and other infrastructure typically required in an urban environment.

Point Number 418.10

Summary of Decision Requested: No specific decision sought, however submission opposes Rule 22.3.2 Minor dwelling.

Decision Reasons:

- No reasons provided.

Point Number 418.11

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.3.6 Building coverage.

Decision Reasons:

- No reasons provided.

Point Number 418.12

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.3.7.1 Building Setbacks- All boundaries.

Decision Reasons:

- No reasons provided.

Point Number 418.13

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.4.1.1 Prohibited subdivision.

Decision Reasons:

- No reasons provided.

Point Number 418.14

Summary of Decision Requested: **Amend** Rule 22.3.7.1 Building setbacks, to promote a more efficient use of land and not prejudice future (more intensive) subdivision of non-productive rural land, including setbacks of 12m for lot sizes 4ha or smaller with boundaries that neighbour 1.6ha or smaller lots.

Decision Reasons:

- A 25m setback from boundaries, other than a road boundary, is unreasonable and would adversely impact on the ability for the submitter to use their land.
- Two boundaries for the submitter's property adjoin properties that are less than 1.6ha. These neighbouring properties are permitted to have 12 metre setbacks.
- Building setbacks should promote a more efficient use of land without prejudicing more intensive subdivision of non-productive land in the future.

Point Number 418.15

Summary of Decision Requested: No specific decision sought, but submission opposes Chapter 22 Rural Zone.

Decision Reasons:

- No reasons provided.

Point Number 418.16

Summary of Decision Requested: No specific decision sought, but submission opposes Chapter 23 Country Living Zone.

Decision Reasons:

- No reasons provided.

Point Number 418.17

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.4.1 Subdivision.

Decision Reasons:

- No reasons provided.

Point Number 418.18

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 22.2.3.1 Earthworks- General.

Decision Reasons:

- No reasons provided.

Submitter Number: 419 **Submitter:** Lucy Deverall
Organisation: Horticulture New Zealand

Point Number 419.1
Summary of Decision Requested: **Retain** Rule 16.1.2 P10 Agricultural, horticultural and viticultural activities, except for the amendments sought below
AND
Add the following activity specific condition to Rule 16.1.2 P10 Agricultural, horticultural and viticultural activities:
(a) Must be within the Residential West Te Kawhata Area; or
(b) Must be in the area around Tuakau being north of the Waikato River, west of State Highway One and east of the Tutaenui Stream.
AND
Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the provision of horticultural activities within the Te Kawhata Area.
- The provision of horticultural activities as permitted activities should be extended to include all existing horticultural activities.
- There is a significant amount of land in the Tuakau area that has been rezoned from Rural to Residential Zone and which is actively being cultivated. As outlined in Schedule One, these horticultural areas play a significant role in New Zealand's domestic food supply and it is critical they be protected and that cultivation they be protected and allowed to continue.
- The submitter strongly opposes the rezoning of these areas.

Point Number 419.2
Summary of Decision Requested: **Retain** Rule 16.2.1.1 P1 Noise - General, as notified.

Decision Reasons:

- There are a number of residential zones immediately adjoining Rural Zones, particularly around Tuakau and Pokeno.
- The submitter supports recognising, and providing for, the legitimate farming noises that will impact on these new and existing residential zones.

Point Number 419.3
Summary of Decision Requested: **Add** a new permitted activity rule in Rule 16.2.4.1 Earthworks, as follows:
Ancillary rural earthworks
AND
Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Ancillary rural earthworks should be a permitted activity to allow for existing operations to continue where land is rezoned from rural to residential.

Point Number 419.4
Summary of Decision Requested: **Add** a new matter of discretion to Rule 16.2.4.1 RD1 (b) Earthworks - General, as follows:
(xii) Measures to avoid reverse sensitivity effects on any adjoining Rural zoned land.
AND
Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The potential impacts of earthworks on adjoining rural production activities is relevant given the expansion of the rural-urban boundary.
- Recognition of this as a matter to which discretion is restricted will assist in managing the new urban-rural interface.

Point Number 419.5
Summary of Decision Requested: **Add** a new clause (v) to Rule 16.3.9.1 P1 (a) Building setbacks - All boundaries , as follows:
(a) A building must be set back a minimum of:
...
(v) 5m from every boundary adjoining the Rural Zone.
AND
Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- An additional standard is sought to ensure adequate management of any new rural-urban interface.
- A 1.5m setback from all boundaries as proposed is not sufficient to avoid or mitigate potential reverse sensitivity effects that will arise a result of the extended residential areas, particularly around Tuakau.
- The Rural Zone permits farming activities which includes spraying of agrichemicals for horticultural operations.
- Greater setbacks for those buildings in Residential Zones which adjoining Rural Zones will assist in mitigating reverse sensitivity effects.

Point Number 419.6
Summary of Decision Requested: **Add** a new clause (vi) to Rule 16.3.9.2 P1 (a) Building setback - Sensitive land use, as follows:
(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:
...

(vi) 100m from any boundary adjoining a Rural Zone.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks that additional clauses be provided to better manage the new rural-urban interface.
- There are many sensitive land uses that are incompatible with horticulture, such as schools/childcare facilities, health facilities and hospitals, retirement villages and rest homes.
- Greater setbacks should be provided to avoid or mitigate reverse sensitivity effects.

Point Number

419.7

Summary of Decision Requested:

Add a new clause (vi) to Rule 16.4.1RD1 (a) Subdivision - General, as follows:

(a) Subdivision must comply with all of the following conditions:

...

(vi) Where the subdivision adjoins a Rural Zone, a buffer strip no less than 10m wide is to be provided along the boundary adjoining the Rural Zone.

AND

Add a new matter of discretion to Rule 16.4.1 RD1 (b) as follows:

(b) Council's discretion shall be restricted to the following matters:

...

(xi) measures to minimise and avoid reverse sensitivity effects on high class soils and any adjoining Rural Zone.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Given the significant rezoning of prominent horticultural land from Rural to Residential Zone, it is appropriate to include provisions which will assist in managing reverse sensitivity on high class soils and adjoining Rural zones.
- This could include requiring provision of buffer strips on Residential zoned land at the time of subdivision as an activity condition, and including reverse sensitivity as a matter to which discretion is restricted.
- This aligns with the proposed objectives and policies which seek to protect high class soils.

Point Number

419.8

Summary of Decision Requested:

Retain Rule 22.1.2 P7 Farming, as notified.

Decision Reasons:

- The submitter supports the provision for farming activities as a permitted activity with no additional specific conditions.

Point Number

419.9

Summary of Decision Requested:

Add a new permitted activity to Rule 22.1.2 Permitted Activities, as follows:

Workers' accommodation that comply with Rule 22.3 X Workers' accommodation.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks a suite of provisions to provide for workers' accommodation as a permitted activity in the Rural Zone.

Point Number

419.10

Summary of Decision Requested:

Add a new permitted activity to Rule 22.1.2 Permitted Activities, as follows:

Artificial crop protection structures that meet the following conditions:

(a) Green or black cloth shall be used on vertical faces within 30m of the site boundary.

(b) Green, black or white cloth shall be used on horizontal surfaces.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- If the exclusions sought to the definition of "building" are rejected, the submitter seeks the insertion of a suite of rules to address effects specific to these structures.
- The standards proposed in this submission have been adopted in the Proposed Opotiki District Plan and are similar to controls in Western Bay of Plenty District Plan.
- Restricting colours to green and black along the vertical surfaces will assist in reducing glare and minimising potential amenity effects.

Point Number

419.11

Summary of Decision Requested:

Retain the restricted discretionary activity status for Rule 22.1.3 RD2 Rural Industry

AND

Delete matter of discretion (a)(iii) waste disposal in Rule 22.1.3 RD2 Rural Industry

OR

Amend matter of discretion (a)(iii) waste disposal in Rule 22.1.3 RD2 Rural Industry to provide more clarity around what waste disposal effects Council is attempting to manage.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the restricted discretionary activity status for a Rural Industry.
- The submitter is unsure of the use of the term "waste disposal" as it is not defined in the Proposed District Plan.
- The Proposed District Plan defines "waste management", which includes waste disposal.
- The outcomes sought are not clear.

Point Number

419.12

Summary of Decision Requested:

Add a new restricted discretionary activity provision to Rule 22.1.3 Restricted Discretionary Activities, as follows:

Workers' accommodation that does not comply with Rule 22.3 X

Council's discretion is restricted to the following matters:

1. Those matters in Rule 22.3.X that are not able to be met.

2. Methods to avoid, remedy or mitigate the effects on existing activities, including the provision of screening, landscaping and methods for noise control.

3. The extent to which the application complies with the Code of Practice for Able Bodied Seasonal Workers, published by the Department of Building and Housing 2008.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks that a restricted discretionary standard be applied where workers' accommodation does not meet the permitted activity standards, although no reasons have been provided.

Point Number

419.13

Summary of Decision Requested:

Add a new restricted discretionary activity to Rule 22.1.3 Restricted Discretionary Activities, as follows:

Artificial crop protection structures that do not comply with Rule 22.3.X

Council's discretion is restricted to the following matters:

i) Amenity values;

ii) Effects of glare on traffic

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks the insertion of a suite of rules to address effects specific to these structures, although no reasons have been provided.

Point Number

419.14

Summary of Decision Requested:

Delete Appendix 5 Hazardous Substances and Table 5.1 Activity Status Table - Permitted activity thresholds.

AND

Delete references to Appendix 6 and Table 6.1 Activity Status Table in Rule 22.2.4 Hazardous Substances.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter does not agree with the use of Activity Status Tables and seeks that Appendix 5 be deleted.
- Rule 22.2.4 references Table 6.1 in Appendix 6 which is assumed to be Table 5.1 in Appendix 5.

Point Number

419.15

Summary of Decision Requested:

Delete Rule 22.2.4 P1 Hazardous Substances

AND

Add a replacement Rule 22.2.4 P1 Hazardous Substances, as follows:

The use, storage or disposal of any hazardous substance is permitted.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The use, storage or disposal of hazardous substances should be permitted unless there are specific resource management reasons why specific rules and controls should be included.

Point Number

419.16

Summary of Decision Requested:

Amend Rule 22.2.4 D1 Hazardous substances to become a restricted discretionary activity rather than a discretionary activity.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The default rule if Rule 22.2.4P1 is not met is a discretionary activity.
- The submitter considers that a discretionary activity is inappropriate if the thresholds in Table 5.1 are not met. There should be a restricted discretionary rule with clear matters of discretion to be assessed specifically related to meeting the policies in the plan for activities where there is a clear resource management reasons for specific controls.

Point Number	419.17
Summary of Decision Requested:	Retain Rule 22.2.1.1PI Noise - General, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the provision of farming noise as a permitted activity, although no reasons have been provided.
Point Number	419.18
Summary of Decision Requested:	<p>Amend Rule 22.2.1.2 P1 Noise - Frost Fans, as follows:</p> <p><i>Noise generated by a frost fan must not exceed 55 60dB (LAeq) when measured at the notional boundary on any site in the Rural Zone and within any site in the Country Living Zone, Village Zone or Residential Zone.</i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The 55dB (LAeq) limit is too restrictive and unrealistic. Frost fans are a key means to protect crops and ensure high quality produce that meets strict market standards. The Proposed Opotiki District Plan permits a 60dB (LAeq) limit. This limit has not been opposed by submitters, is more realistic and allows for effective and efficient use of frost fans.
Point Number	419.19
Summary of Decision Requested:	<p>Amend Rule 22.2.1.2 D1 Noise- Frost Fans to become restricted discretionary activity rather than a discretionary activity</p> <p>AND</p> <p>Add the following matters of discretion to Rule 22.2.1.2 Noise- Frost Fans:</p> <p><u>Council's discretion is restricted to the following matters:</u></p> <p><u>1. Location of frost fan</u></p> <p><u>2. Noise sound levels at any point within at the national boundary of any dwelling on another site</u></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The jump from a permitted activity to a discretionary activity is too onerous and there is limited guidance in the objectives and policies on how noise effects might be assessed. The submitter seeks that this be amended to a restricted discretionary activity. This approach has been adopted in the Proposed Opotiki District Plan following submissions from Horticulture New Zealand and in Hurunui and Western Bay of Plenty. The submitter recommends that discretion be restricted to the same matters as proposed in the Opotiki District Plan.
Point Number	419.20
Summary of Decision Requested:	<p>Amend Rule 22.2.3.1 P1 (a)(iv) Earthworks - General, as follows:</p> <p>(a) Earthworks for:</p> <p>...</p> <p>(iv) A building platform for a <u>permitted</u> residential activity, including accessory buildings.</p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the permitted activity status of ancillary farming earthworks noting the submission point seeks changes to the definition of "Ancillary Farming Earthworks". Creation of a building platform modifies the existing environment from which a resource consent will be assessed. It is likely to result in the land being stripped of its productive or high class soil. This is inconsistent with the objectives and policies of the Rural Zone which seek to protect High Class Soils. The submitter seeks that the rule specify that earthworks are permitted only for a building platform for a residential building and accessory buildings that could be undertaken as a permitted activity. This would prevent earthworks being undertaken for development that would otherwise require consent. This also provide greater protection of High Class Soils and land with productive potential.
Point Number	419.21
Summary of Decision Requested:	<p>Amend Rule 22.2.3.1 P3 (a) Earthworks - General , as follows:</p> <p>(a) Earthworks for the purpose of creating a building platform for a <u>permitted residential activity purposes</u> within a site, using imported fill material must meet the following condition:</p> <p>...</p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> Creation of a building platform modifies the existing environment from which a resource consent will be assessed. The submitter seeks that the rule specify that earthworks are permitted only for a building platform for a residential building and accessory buildings that could be undertaken as permitted activities. This would prevent earthworks for inappropriate development, or development that would otherwise require consent. This would also provide greater protection of High Class Soils.
Point Number	419.22
Summary of Decision Requested:	<p>Add a new permitted activity to Rule 22.2.3.1 Earthworks - General, as follows:</p> <p><u>(a) Earthworks for purposes associated with horticultural activities using imported fill material or cleanfill must meet all of the following conditions:</u></p> <p><u>(i) sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls; and</u></p>

(ii) does not divert or change the nature of water bodies.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the provision of cleanfill as a permitted activity and notes that the use of cleanfill can be managed through good management practice.
- The northern portion of the Waikato District typically has an undulating topography. It is also a significant location for horticultural activities. In order to maximise the productive potential of land in this area, it is common for fill to be imported to help contour the land to a slope appropriate for horticultural activities.
- Cleanfill is also used for other land management purposes such as drainage or track creation and maintenance.

Point Number

419.23

Summary of Decision Requested:

Retain Rule 22.2.7PI Indigenous vegetation clearance inside a Significant Natural Area, as notified

OR

Add a new clause (vi) to Rule 22.2.7 PI (a) Indigenous vegetation clearance inside a Significant Natural Area, as follows:

(a) Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) for the following purposes:

...

(vi) removal of vegetation for pest management and biosecurity works

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the provision of indigenous vegetation clearance inside Significant Natural Areas for maintaining existing tracks, fences, farm drains and conservation fencing.
- It is sought that an additional standard be included here to allow for that response. This is appropriate in the context as there are a number of horticultural cropping sites containing, or adjoining, Significant Natural Areas.
- It is feasible that should those Significant Natural Areas become infected, then this would pose a risk to the production of fruit and vegetables for human consumption.

Point Number

419.24

Summary of Decision Requested:

Amend the definition of 'Vegetation Clearance' in Chapter 13 Definitions, to exclude clearance related to a rapid biosecurity response. Specific amendments are outlined elsewhere in the submission.

OR

Add a new clause (viii) to Rule 22.2.8 PI Indigenous vegetation clearance outside a Significant Natural Area, as follows:

(a) Indigenous vegetation clearance outside a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) must be for the following purposes:

...

(viii) removal of vegetation for pest management and biosecurity works.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter has sought an amendment to the definition of "vegetation clearance" to exclude clearance related to a rapid biosecurity response. The submitter requests this additional clause (viii) if the requested amendment to this definition is rejected.

Point Number

419.25

Summary of Decision Requested:

Add a new provision to Rule 22.3 Land Use - Building, as follows:

Workers' accommodation is a permitted activity where it meets the following standards:

(a) The relevant zone standards for yards, height, daylight protection and parking are complied with

(b) Access - No additional formed accesses are to be created to any State Highway

(c) Is associated with the horticultural activity

(d) Comprises of a combination of communal kitchen and eating areas and sleeping and ablution facilities

(e) Accommodates up to 12 workers

(f) Complies with Code of Practice for Able Bodies Seasonal Workers, published by Department of Building and Housing 2008.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks specific provision for workers' accommodation.
- The submitter seeks the insertion of a new rule to set the standards for workers' accommodation as a permitted activity, similar to those that have been adopted in the Proposed Opotiki District Plan.

Point Number

419.26

Summary of Decision Requested:

Amend Rule 22.3.4.1 PI Height - Building General, as follows:

~~*The maximum height of any building must not exceed 10m.*~~

The maximum height of any building associated with

(a) A residential activity must not exceed 10m

(b) A farming or rural industrial or services activity must not exceed 15m.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A 10m height limit is not sufficient for horticultural sheds.
- Horticultural sheds require additional height for bin storage and air flow for drying produce such as onions.
- The Auckland Unitary Plan appropriately provides a 15m height threshold for buildings other than dwellings.

Point Number 419.27

Summary of Decision Requested: **Retain** Rule 22.3.4.2 Height - Frost Fans, as notified.

Decision Reasons:

- The submitter supports the proposed height and blade height thresholds.

Point Number 419.28

Summary of Decision Requested: **Amend** the definition of "Building" in Chapter 13: Definitions, in terms of artificial crop protection structures (specific amendments sought are addressed elsewhere in the submission)

OR

Amend Rule 22.3.5 P1 Daylight admission to specifically exclude artificial crop protection structures as follows:

A building (excluding artificial crop protection structures) must not protrude through a height control plane rising at an angle of 37 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

AND

Add a new permitted activity to Rule 22.3.5 Daylight admission, as follows:

PX Artificial crop protection structures that comply with Rule 22.1.2 PX Artificial crop protection structures.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter has made a submission on the definition of building as it relates to artificial crop protection structures.
- The submitter seeks that artificial crop protection structures be excluded from Rule 22.3.5.
- In order to be economically viable, cultivation and planting often occur right up to the site boundary.
- To ensure high quality production, it is necessary that these structures cover the entire crop. As such, it would be impossible for these structures to meet the permitted standards.
- The submitter seeks that a new rule be inserted to address effects specific to artificial crop protection structures.
- The permitted standards proposed in this submission have been adopted in the Proposed Opoitiki District Plan.

Point Number 419.29

Summary of Decision Requested: **Amend** the definition of 'Building' in Chapter 13 Definitions, to exclude artificial crop protection structures (the specific amendments sought are addressed elsewhere in the submission)

AND

Add a new clause (iii) to Rule 22.3.6 P1 Building Coverage, as follows:

(a) The total building coverage must not exceed the larger of:

...

(iii) except that this rule shall not apply to buildings associated with rural production activities or rural industries and services and shall not apply to artificial crop protection structures.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter has sought that artificial crop protection structures be excluded from the definition of building.
- Should this be rejected, the submitter seeks that artificial crop protection structures be excluded from the building coverage rule.
- Artificial crop protection structures are open structures - any materials used are necessarily permeable to allow water through and to control temperature. As such, these structures do not impact on stormwater run-off.
- It is considered that the proposed limits are too restrictive for the rural environment. A number of large scale buildings are required to support ordinary farming activities. This is particularly relevant for rural industry activities such as pack houses and cool stores.
- The submitter purports that the presence of large scale buildings in the rural environment forms part of the rural character and amenity.
- The section 32 report comments that controls of height, setbacks and daylight admission are necessary to control the dominance of buildings on the landscape. However the report does not provide sufficient explanation for why a 500m2 limit is applicable in this instance.
- The submitter contends that large scale buildings, such as storage sheds, cool sheds and packhouses are activities that are anticipated in the rural landscape.

Point Number 419.30

Summary of Decision Requested: **Amend** Rule 22.3.6D1 Building coverage, from a discretionary activity to a restricted discretionary activity

AND

Add the following matters of discretion to Rule 22.3.6 Building coverage:

Matters of discretion:

a) Effects on character and amenity.

b) Management of effects of stormwater run-off.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A discretionary activity status is a further disincentive for rural production activities to locate and expand in the Waikato District.

Point Number 419.31

Summary of Decision Requested: **Amend** the definition of 'Building' in Chapter 13 Definitions (the specific amendments sought are addressed elsewhere in the submission)

OR

Amend Rule 22.3.7.1 P2 (a) Building Setbacks - All boundaries, as follows:

(a) A non-habitable building (excluding artificial crop protection structures) located on a Record of Title less than 1.6ha must be set back a minimum of:

...

AND

Amend Rule 22.3.7.1 P4 (a) Building Setbacks - All boundaries, as follows:

(a) A non-habitable building (excluding artificial crop protection structures), located on a Record of Title 1.6ha or more must be set back a minimum of:

...

AND

Add a new permitted activity to Rule 22.3.7.1 Building Setbacks - All boundaries, as follows:

PX Artificial crop protection structures that comply with Rule 22.1.2 PX Artificial crop protection structures

AND

Amend Rule 22.3.7.1 RD1 (a) Building Setbacks - All boundaries, as follows:

(a) A building that does not comply with Rule 22.3.7.1 P1, P2, P3 ~~or~~ P4 or PX

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the distinction between habitable and non-habitable buildings and particularly supports the proposed setbacks for habitable buildings in the Rural Zone.
- To maximise viability, cultivation and planting often occur within 1m of the site boundary.
- The proposed setback would not be achievable for any existing or many future horticultural operations.
- The submitter seeks that artificial crop protection structures be excluded from this rule and that a new rule be inserted to address effects specific to these structures.

Point Number

419.32

Summary of Decision Requested:

Retain Rule 22.3.7.2 Building setback sensitive land use, except for the amendments sought below

AND

Add two new clauses (x) and (xi) to Rule 22.3.7.2 P1 (a) Building setback sensitive land use, as follows:

(a) Any building for a sensitive land use must be set back a minimum of:

...

(x) 100m from the boundary of another site containing a rural industry or services activity,

(xi) 100m from the boundary of another site containing a farming activity where the sensitive land use is not a residential activity,

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the proposed rule which places the onus on the sensitive activity to be set back from existing activities. This is an effective means of managing reverse sensitivity effects.
- However, this should be extended to ensure setbacks from all existing farming activities, including rural industry activities, which generate legitimate farm noise and spraying effects that are often hampered by reverse sensitivity effects.
- Care must be taken in differentiating between residential activities and other sensitive activities such as education facilities and hospitals.
- The submitter purports that many of these sensitive activities are not appropriate for the Rural Zone at all. The potential for reverse sensitivity effects is amplified and the ability to manage or mitigate reverse sensitivity effects becomes more difficult.
- Managing notification requirements to sensitive activities that are not residential activities becomes even more complicated as those facilities then have to notify all individuals who may be present at the time.

Point Number

419.33

Summary of Decision Requested:

Amend Rule 22.3.7.5 P1 (a) Building setback - water bodies, as follows:

(a) Any building must be set back a minimum of:

(i) ~~22~~ 30m from the margin of any:

A. Lake; and

B. Wetland

(ii) ~~22~~ 20m from the bank of any river (other than the Waikato River and Waipa River);

(iii) ~~28~~ 20m from the banks of the Waikato River and Waipa River; and

...

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter has sought an exclusion of artificial crop protection structures from the definition of "building". Should this be rejected, the submitter seeks that artificial crop protection structures be excluded from this rule. These are permeable structures with materials consisting of fabric and poles. Minimal works are required so there would be minimal land disturbance and minimal risk of sediment in water bodies.
- Should the land be subdivided, the structures are easily removable such that the ability to take esplanade is not impeded.
- The section 32 reports do not seem to provide any explanation for the proposed setbacks from waterbodies. The Auckland Unitary Plan provides a setback of 30m from any lake and a 20m riparian setback and this is considered appropriate to incorporate in the Waikato District Plan.

Point Number

419.34

Summary of Decision Requested:

Amend Rule 22.3.7.5P2 Building setback - water bodies as follows:

(a) A public amenity of up to 25m², ~~and a pump shed~~ within any building setback identified in Rule 22.3.7.5P1 and

(b) a pump shed must be setback a minimum of 5m from any waterbody,

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- It is necessary and more efficient for pump stations to locate in close proximity to water bodies.

Point Number 419.35

Summary of Decision Requested: No specific decision sought, but submission seeks clarification on how Rule 22.3.7.6 Building setback- Environmental Protection Area applies to the Environmental Protection Areas and the Hamilton Basin Ecological Management Area. If the Hamilton Basin Ecological Area is an Environmental Protection Area, then the submitter opposes this rule.

Decision Reasons:

- It is not clear on the planning maps where the Environmental Protection Areas are located.
- The submitter has been advised that the Hamilton Basin Ecological Management Area is an Environmental Protection Area, but this has a separate key notation on the planning maps.
- If the Hamilton Basin Ecological Management Area is an Environmental Protection Areas, the submitter opposes this rule as no building would be permitted.

Point Number 419.36

Summary of Decision Requested: Delete Rule 22.4.1.1 PR2 Prohibited subdivision.

AND

Add a replacement non-complying activity to Rule 22.4 Subdivision, as follows:

NCX

(a) Subdivision which results in any additional lot being located on high class soil

(b) Exceptions to NCX are where an additional lot is created by either of the following:

(i) Access allotment or utility allotment

(ii) Subdivision of Maaori Freehold Land

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter commends the intention to protect high class soil.
- A prohibited activity status is overly restrictive.
- The submitter does not generally support subdivision of high class soils, although it is recognised that there are instances when growers may need to subdivide a portion of land in order to remain economically viable.
- Under a prohibited planning framework, many growers would be unduly limited in their options.
- It is considered that a non-complying activity status may be more appropriate as it would provide a possible pathway while still applying a high level of protection for high class soils.
- The ability to undertake subdivisions for conservation lots and reserve lots on high class soils will result in the creation of sporadic 8000m² lots around the district. It is inappropriate to provide an exemption for this type of subdivision on high class soils and is inconsistent with the proposed objectives and policies.
- Location of new lots as a result of reserve lot or conservation lot subdivisions should not be encouraged on high class soils.

Point Number 419.37

Summary of Decision Requested: Delete Rule 22.4.1.1 PR3 Prohibited subdivision

AND

Add a replacement new non-complying activity to Rule 22.4 Subdivision, as follows:

NCX

(a) Subdivision which results in any additional lot being located on high class soil

(b) Exceptions to NCX are where an additional lot is created by either of the following:

(i) Access allotment or utility allotment

(ii) Subdivision of Maaori freehold land

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- It is appropriate to provide for subdivision on high class soil as a non complying activity as it will provide a possible pathway, which still applying a high level of protection for high class soils.
- It is inappropriate and inconsistent with the objectives and policies to allow exemptions for conservation lot or reserve lot subdivisions as this ill result in sporadic or unplanned development on high class soils.

Point Number 419.38

Summary of Decision Requested: Delete Rule 22.4.1.2 RD1 General Subdivision.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The method provides a voucher lot subdivision based on title date and parent lot size.
- The minimum parent lot size of 20 hectares appears to have little resource management reasoning.
- The outcome is scattered countryside living elements between 8000m² and 1.6ha.
- There is no resource management reasoning based on sustainable management or a positive environmental outcome.
- Notably the same method was previously available in the former Franklin District Plan and removed during a plan review of rural subdivision methods.
- The outcome is still fragmentation of high class soil that conflicts with the objective and policy framework of the plan.

Point Number 419.39

Summary of Decision Requested: Add a new clause (vii) to Rule 22.4.1.5 RD1 (a) Rural Hamlet Subdivision, as follows:

(a) Subdivision to create a Rural Hamlet must comply with the following conditions:

...

(vii) the proposed lots must not be located on high class soils

AND

Add a new matter of discretion to Rule 22.4.1.5 RD1 (b) Rural Hamlet Subdivision as follows:

(vi) the extent to which water conservation measures and, where appropriate, low impact stormwater design and facilities have been applied.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the inclusion of reverse sensitivity and effects on rural character and amenity as matters to which discretion is restricted.
- Urban and semi-urban development creates additional pressure on natural resources and impacts the ability of legitimate rural activities from accessing those resources which are essential to rural operation.
- It is appropriate that measures to address water conservation and stormwater design should be encouraged.
- To remain consistent with the proposed objectives and policies the submitter seeks that the avoidance of high class soil should be included as a condition of Rural Hamlet Subdivision.

Point Number

419.40

Summary of Decision Requested:

Add a new clause (ix) to Rule 22.4.1.6 RD1 (a) Conservation lot subdivision, as follows:

(a) The subdivision must comply with all of the following conditions:

...

(ix) the proposed lots must not be located on high class soils.

AND

Add two new matters of discretion to Rule 22.4.1.6 RD1 (b) Conservation lot subdivision, as follows:

(v) potential for reverse sensitivity effects;

(vi) the extent to which water conservation measures and, where appropriate, low impact stormwater design and facilities have been applied.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter opposes the lack of matter of discretion considering reverse sensitivity effects for this restricted discretionary subdivision activity when all others retain this discretion.
- With the limited range of subdivision methods, this is likely to be an active method and this is a critical assessment matter.
- Consistent with the policy framework, the matters of discretion should also address water conservation.
- The avoidance of high class soil should be included as a condition of this activity. This would be consistent with the proposed objectives and policies which seek to protect high class soils.

Point Number

419.41

Summary of Decision Requested:

Add a new matter of discretion to Rule 22.4.9 RD1 (b) Subdivision - Building platform, as follows:

(vii) The relationship of the building platform and residential activity with surrounding current and future rural production activities and measures to avoid or mitigate reverse sensitivity effects.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The requirement for a specific building platform for a proposed lot is a common subdivision standard.
- This enables an assessment of the platform and the residential activity it will support, relative to a number of matters.
- This should include the relationship of the platform, its residential use and the surrounding current or future rural production activities.
- The matters of discretion should be expanded for this purpose.

Point Number

419.42

Summary of Decision Requested:

Add a new permitted activity to Rule 23.1 Land use - Activities, that provides for rural production that is existing at the time the Proposed Plan is made operative.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter considers that existing rural production activities should be provided for as a permitted activity, although no reasons have been provided.

Point Number

419.43

Summary of Decision Requested:

Add a new discretionary activity to Rule 23.1 Land use - Activities, that provides for rural production activities within the Country Living Zone.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Under the proposed planning framework, farming would be a non-complying activity.
- This is inconsistent with Policy 5.6.9 Existing non-residential activities, which supports expansion and operation of existing non-residential activities within the Country Living Zone.

Point Number

419.44

Summary of Decision Requested:

Retain Rule 23.3.7 P1 Building setbacks - All boundaries, as notified.

Decision Reasons:

- The submitter supports the 12m setback from boundaries, other than a road boundary.
- Requiring an adequate buffer between new urban/residential development from existing, legitimate rural production activities will assist in avoiding or mitigating the potential for reverse sensitivity to arise.
- Although farming noise is permitted within the zone, there are a number of other effects associated with legitimate farming activities which are part of rural character and amenity.
- Rural character and amenity is often not clearly understood by new residents and providing adequate buffers can assist in minimising complaints.

Point Number

419.45

Summary of Decision Requested:

Add a new clause (iv) to Rule 23.3.7.1 P2 (a) Building setbacks - All boundaries, as follows:

(a) Any building located on a lot containing 1000m² or less must be set back a minimum of:

...

(iv) 10m from every boundary adjoining a Rural Zone.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A 1.5m setback from all boundaries as proposed is not sufficient to avoid or mitigate potential reverse sensitivity effects that arise between residential activities and rural activities.
- When compared with the 12m setback proposed in Rule 23.3.7 for lots greater than 1000m², the 1.5m setback incentives creation of smaller lots which results in a high density of residential development in close proximity to the rural environment.
- This has the potential for greater reverse sensitivity issues.

Point Number

419.46

Summary of Decision Requested:

Add a new clause (v) to Rule 23.3.7.1 RD1 (b) Building setbacks - All boundaries as follows:

(v) reverse sensitivity effects.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- An additional matter is sought to enable the potential for reverse sensitivity effects to be included as a matter to which discretion is restricted in determining the location of buildings within the relevant setbacks from Rural zoned land.
- This is a matter of restricted discretion in Rule 26.3.6.1 of the Village Zone and is also relevant to the Country Living Zone.

Point Number

419.47

Summary of Decision Requested:

Add a new clause (vii) to Rule 23.3.7.2 P1 (a) Building setbacks - Sensitive land use, as follows:

(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:

...

(vii) 100m from any boundary adjoining a Rural Zone where the sensitive activity is not a residential activity.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- An additional standard is sought to ensure adequate management of the rural-urban interface and to avoid and mitigate the potential for reverse sensitivity effects between sensitive land uses and legitimate farming activities.
- Greater setbacks should be provided to avoid or mitigate reverse sensitivity effects.

Point Number

419.48

Summary of Decision Requested:

Retain Rule 23.3.7.2 D1 Building setback - Sensitive land use, as notified.

Decision Reasons:

- The discretionary activity status is supported.

Point Number

419.49

Summary of Decision Requested:

Add a new matter of discretion to Rule 23.4.2 RD1 (b) General Subdivision as follows:

(b) Council's discretion is restricted to the following matters:

...

(iii) measures to mitigate and minimise reverse sensitivity effects on adjoining Rural Zone land.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks that an additional clause to the matters to which discretion is restricted.
- Measure taken to minimise potential reverse sensitivity effects is appropriate to consider given the significance of horticultural land in the Waikato District.
- This aligns with the objectives and policies which seek to protect high class soil and support ongoing operation and development of existing farming activities.

Point Number

419.50

Summary of Decision Requested:

Add a new clause (v) to Rule 24.3.6.1 P1 (a) Building setbacks - All boundaries, as follows:

(a) Any building must be setback a minimum of:

...

(v) 8m from any boundary adjoining a Rural Zone

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A 1.5m setback from all boundaries as proposed is not sufficient to avoid or mitigate potential reverse sensitivity effects that arise between residential activities and rural activities.
- There are pockets of land that have been rezoned from Rural to Village around the Tuakau area and the potential for reverse sensitivity from a new rural-urban boundary should be avoided.

Point Number 419.51

Summary of Decision Requested: Retain Rule 24.3.6.1 RD1 Building setbacks - All boundaries, as notified.

Decision Reasons:

- The submitter supports the inclusion of reverse sensitivity effects as a matter to which discretion is restricted for buildings that do not meet the permitted boundary setbacks.

Point Number 419.52

Summary of Decision Requested: Add a new clause (vi) to Rule 24.3.6.2PI Building setback - Sensitive land use, as follows:

(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:

....

(vi) 100m from any boundary adjoining a Rural Zone where the sensitive activity is not a residential activity.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Additional standards are sought to ensure adequate management of the rural-urban interface and to avoid and mitigate the potential for reverse sensitivity effects between habitable residential buildings and legitimate farming activities.
- There are many sensitive land uses that are incompatible with horticulture and greater setbacks should be provided to avoid or mitigate reverse sensitivity effects.

Point Number 419.53

Summary of Decision Requested: Retain Rule 24.3.6.2 D Building setback - Sensitive land use, as notified.

Decision Reasons:

- The discretionary activity status is supported.

Point Number 419.54

Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- The submitter supports the provision on productive versatility of rural resources.

Point Number 419.55

Summary of Decision Requested: Retain Policy 5.2.3 Effects of subdivision and development on soils, as notified.

Decision Reasons:

- The submitter supports the provision on productive versatility of rural resources.

Point Number 419.56

Summary of Decision Requested: Retain Objective 5.3.1 Rural character and amenity, as notified.

Decision Reasons:

- An objective seeking to maintain rural character and amenity is supported.
- It is important that the policy framework clearly establishes the rural character and amenity and expectations for the Waikato District.

Point Number 419.57

Summary of Decision Requested: Add a new policy within Section 5.3 Rural Character and Amenity, as follows:

Rural character and amenity includes the following elements:

(a) A rural working environment

(b) Some activities are seasonal in nature

(c) Intensity of development reflecting the rural production environment, such as buildings and structures for rural production and domestic purposes

(d) Varying levels of noise associated with seasonal and intermittent rural production activities.

(e) Relatively open space and low density of development.

(f) Odours, noise and dust typical of rural activities.

(g) Generally low levels of vehicle traffic with seasonal fluctuations.

(h) The presence of large numbers of farmed animals and extensive areas of plant vine or fruit crops and areas of forestry.

(i) Accessory buildings and structures (including crop support and artificial crop, protection structures) across the landscape.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks a new policy to clearly identify and recognise the rural character and amenity.
- This is important to ensure the appropriate and effective implementation of the proposed planning framework which seeks to avoid or minimise adverse effects on rural character and amenity.

Point Number

419.58

Summary of Decision Requested:

Retain Policy 5.3.2 Productive rural activities, as notified.

Decision Reasons:

- The policy recognises and protects the continued operation of the rural environment as a productive working environment is supported.
- Recognising that buildings and structures associated with farming and forestry and other operational structures for productive rural activities contribute to rural character and amenity values, is supported.
- The plan proposes limitations on building coverage that conflicts with this policy.
- Those establishing rural production activities look at the regulatory regime before making decisions on location choice. The methods proposed in this plan will discourage rural production activity from locating and investing in the Waikato district.

Point Number

419.59

Summary of Decision Requested:

Amend Policy 5.3.3 Industrial and commercial activities, to further clarify and refine the policy

OR

Amend Policy 5.3.3 Industrial and commercial activities by combining it with Policy 5.3.9 Non-rural activities.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports avoiding locating industrial and commercial activities in rural areas that do not have a genuine functional connection with the rural land or soil resource.
- There is some confusion between this policy and Policy 5.3.9 Non-rural activities, which appears to cover the same activities and could potentially be combined.
- Rural industry is defined but it is not clear what "services" or "commercial activities" are anticipated or accommodated in the rural areas by this policy.

Point Number

419.60

Summary of Decision Requested:

Retain Policy 5.3.4 Density of dwellings and buildings within the rural environment, as notified.

Decision Reasons:

- Dwellings to support workers accommodation are a critical requirement of many rural production activities.
- The policy is supported, however the method limits the accommodation unit size to be too small to support a farm worker family situation or seasonal workers accommodation that might require a shared living arrangement.

Point Number

419.61

Summary of Decision Requested:

Retain Policy 5.3.5 Earthworks activities, as notified.

Decision Reasons:

- The submitter supports the policy and methods proposed for ancillary rural earthworks, although no reasons have been provided.

Point Number

419.62

Summary of Decision Requested:

Amend Policy 5.3.7 Reverse sensitivity effects, as follows:

(a) Recognise the following features are typical of the rural environment and the effects are accepted and able to be managed:

(i) Large numbers of animals being farmed, extensive areas of commercial vegetable production, plants, vines or fruit crops, plantation forests and farm forests;

...

(c) Avoid or mitigate the adverse effects of reverse sensitivity through the use of setbacks and the design of subdivisions and development.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the recognition that extensive areas of plants, vines or fruit crops are typical features of the rural environment.
- Commercial vegetable production is defined term in Waikato Regional Plan Change 1.
- The design of subdivisions and development should, in the first instance, seek to avoid reverse sensitivity through the use of setbacks and design.

Point Number

419.63

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as notified.

Decision Reasons:

- The policy provides clear direction for managing effects on rural character and amenity from rural subdivision.

Point Number

419.64

Summary of Decision Requested:	<p>Amend the title of Policy 5.3.9 Non-rural activities, as follows:</p> <p>Policy 5.3.9 Other Non- rural activities</p> <p>AND</p> <p>Amend Policy 5.3.9 Non-rural activities, to further clarify and refine the policy</p> <p>OR</p> <p>Amend Policy 5.3.9 Non-rural activities by combining it with Policy 5.3.3 Industrial and commercial activities.</p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The policy describes the listed activities as non-rural activities but, by their nature, these are rural activities that require a rural location to exist and operate. This is particularly the case for packing sheds and post harvest facilities.
Point Number	419.65
Summary of Decision Requested:	Retain Policy 5.3.15 Noise and vibration, as notified.
Decision Reasons:	<ul style="list-style-type: none"> A policy framework for methods for managing the location of sensitive land uses, particularly in relation to lawfully-established activities is supported.
Point Number	419.66
Summary of Decision Requested:	<p>Amend Objective 5.6.1 Country Living Zone, as follows:</p> <p><i>(a) Subdivision, use and development in the Country Living Zone maintains or enhances the character and amenity values of the zone <u>and avoids compromising rural production land or activities.</u></i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The objective is inward focused. It fails to address the rural interface that is apparent with all Countryside Living Zones and often an area of rural production.
Point Number	419.67
Summary of Decision Requested:	Retain Policy 5.6.3 Subdivision within the Country Living Zone, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The policy requires that subdivision, building and development within the Country Living Zone ensures existing lawfully-established activities are protected from reverse sensitivity effects.
Point Number	419.68
Summary of Decision Requested:	<p>Add Clause (vii) to Policy 6.1.2 (a) Development, operation and maintenance, as follows:</p> <p><i>(a) Provide for the development, operation, maintenance, repair, replacement, upgrading and removal of infrastructure throughout the district by recognising:</i></p> <p>...</p> <p><i><u>(vii), potential for impacts on affected landowners and property on which infrastructure is located.</u></i></p> <p>AND</p> <p>Amend Chapter 14 Infrastructure and Energy, to ensure that minor upgrading is clearly defined and does not include development or increase voltage of electricity lines.</p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter recognises the need to provide for infrastructure but considers that impacts on affected landowners should be recognised. In addition, the extent of "upgrading" needs to be defined so that it does not include development in terms of scale and effects.
Point Number	419.69
Summary of Decision Requested:	Delete Policy 6.1.4(a)(iv) Infrastructure benefits.
Decision Reasons:	<p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p> <ul style="list-style-type: none"> Policy 6.1.4 includes managing adverse effects on the environment as an infrastructure benefit. It is unclear how adverse effects on the environment are considered a benefit.
Point Number	419.70
Summary of Decision Requested:	<p>Amend Objective 6.1.6 (a) Reverse sensitivity, as follows:</p> <p><i>(a) <u>Infrastructure is protected from reverse sensitivity effects, and infrastructure (including the National Grid) is not compromised. Manage activities to the extent reasonably possible to reduce the potential for reverse sensitivity effects on infrastructure.</u></i></p> <p>AND</p>

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The objective seeks an outcome to protect. Even the National Policy Statement for Electricity Transmission does not have an objective to 'protect', however it seeks to manage activities to the extent reasonably possible.
- The important matter is that activities are managed to reduce the potential for reverse sensitivity effects on infrastructure.
- In essence the objective is seeking to apply an objective for the National Grid, which is recognised as nationally significant on all infrastructure, therefore the general objective for infrastructure should be differentiated from specific Objective 6.2.1 National Grid.

Point Number 419.71

Summary of Decision Requested: Delete Policy 6.1.7 Reverse sensitivity and infrastructure

AND

Add a new replacement Policy 6.1.7 Reverse sensitivity and infrastructure, as follows:

Manage the potential adverse effects of activities adjacent to infrastructure, including to reduce the potential for reverse sensitivity effects, by ensuring sensitive activities, and inappropriate subdivision, use and development do not occur in a location or form that significantly constrains the safe, effective and efficient operation, maintenance, upgrade and development of the infrastructure.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A policy of 'avoid' is absolute, which will severely limit activities adjacent to infrastructure.
- The policy should be to manage the potential is reduced.

Point Number 419.72

Summary of Decision Requested: Amend Objective 6.1.8 (a) Infrastructure in the community and identified areas, as follows:

(a) Infrastructure takes into account the qualities, land use and characteristics of surrounding environments and community well-being.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Infrastructure should also take into account the land use of the surrounding environment.

Point Number 419.73

Summary of Decision Requested: Retain Policy 6.1.16 Water conservation, as notified.

Decision Reasons:

- The submitter supports policy that encourages water conservation. This is important in urban and rural situations.
- Notably, the scattered countryside living lots will all have a permitted activity allocation of water; a resource also in demand for rural production.
- Water conservation should be encouraged through subdivision and land use design requirements and assessment criteria.

Point Number 419.74

Summary of Decision Requested: Amend Objective 6.2.1 National Grid, as follows:

(a) The national significance of the National Grid is recognised and ~~protected~~ provided for.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The objective seeks an outcome of 'protect'.
- The National Policy Statement for Electricity Transmission does not have an objective to 'protect', however it seeks to manage activities to the extent reasonably possible.
- The important matter is that activities are managed to reduce the potential for reverse sensitivity effects on infrastructure.

Point Number 419.75

Summary of Decision Requested: Delete Policy 6.2.6 (a) Reverse sensitivity and the National Grid, and replace with the following policy:

Provide for the National Grid by:

(a) Managing subdivision, use and development to the extent reasonably possible to avoid reverse sensitivity effects on the National Grid and ensure that the functional needs of the National Grid are not compromised by;

(i) Identifying the existing National Grid on Planning Maps; and

(ii) Establish the National Grid Yard where sensitive land uses and intensive farming activities, commercial greenhouses and milking/dairy sheds will generally be avoided;

(iii) Establish the National Grid Subdivision Corridor for managing subdivision and subsequent land use near the National Grid; and

(iv) Not allowing existing activities in the identified corridors to intensify in a way that increases their incompatibility with existing National Grid infrastructure.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- This policy is absolute in its direction.
- Policy 10 of the National Policy Statement for Electricity Transmission (NPSET) includes 'to the extent reasonably possible' so the direction in the NPSET is not as absolute as the proposed policy.

Point Number 419.76

Summary of Decision Requested:	<p>Add a new clause (viii) to Policy 6.4.7 Stormwater, as follows:</p> <p>(a) <i>Ensure that stormwater and drainage infrastructure for subdivision, land use and development:</i></p> <p>...</p> <p><u>(viii) Avoid the generation and discharge of contaminants from urban development, particularly from high contaminant generating car parks and high use roads and into sensitive receiving environments.</u></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The development of land from rural to urban land use results in a degradation of water quality. Degradation of water quality should be avoided where possible to ensure no adverse effects on the downstream users of freshwater for rural production.
Point Number	419.77
Summary of Decision Requested:	Retain Objective 10.1.1 Effects of hazardous substances, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The objective is very similar to the objective in the Christchurch decision.
Point Number	419.78
Summary of Decision Requested:	<p>Amend Policy 10.1.2 Location of new hazardous facilities, as follows:</p> <p>(a) <i>New hazardous facilities <u>to store hazardous substances</u> minimise the risk to the environment (including people and property) to acceptable levels by:</i></p> <p>...</p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter opposes the approach in Policy 10.1.2 because of the definition of hazardous facility that includes vehicles for the transport of hazardous substances located at a facility for more than short periods of time. It is uncertain what a short period of time is and would make a whole farm of rural property a hazardous facility as a vehicle may be used to transport agrichemicals or fertiliser for application. The application of the policy to such use of hazardous substances is inappropriate. The policy should only apply to new facilities to store hazardous substances, excluding vehicles.
Point Number	419.79
Summary of Decision Requested:	<p>Amend Policy 10.1.3 (a) Residual risks of hazardous substances, as follows:</p> <p>(a) Facilities for the <i>The use, storage or disposal of hazardous substances shall identify and assess potential adverse effects (including cumulative risks and potential effects of identified natural hazards) to prevent unacceptable levels of risk to human health, safety, property and the natural environment.</i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The policy sets out considerations that are required for use, storage or disposal of hazardous substances that are required under other regulations. However, it should apply to the use, storage or disposal of hazardous substances and not be limited to 'facilities'.
Point Number	419.80
Summary of Decision Requested:	<p>Amend Policy 10.1.4(a) Reverse sensitivity effects, as follows:</p> <p>(a) <i>Separate sensitive land use activities from <u>areas where use and storage of hazardous substances is lawfully established</u> hazardous facilities;</i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The policy relating to reverse sensitivity effects is supported to the extent that sensitive land use activities be separated from areas where hazardous substances are used. However, the policy is contingent on the definition of "hazardous facility" which the submitter considers to be inappropriate.
Point Number	419.81
Summary of Decision Requested:	<p>Amend activity specific conditions 14.3.1.1 (2) in Rule 14.3.1 Permitted Activities, relating to P2 Minor upgrading of existing infrastructure, as follows:</p> <p>(2) <i>Alterations and additions to overhead electricity and telecommunication lines on existing poles or support structures involving any of the following:</i></p> <p>...</p> <p>(b) <i>The reconductoring of the line with higher capacity conductors <u>if the line was previously designed to operate at the higher capacity</u>;</i></p> <p>...</p> <p>(j) <i>The increase in voltage of electric lines up to 110kV <u>if the line was previously designed to operate at the higher capacity</u>; or</i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter seeks to ensure that reconductoring of lines at higher capacity do not affect landowners. The rules permit minor upgrading of existing infrastructure which includes reconductoring lines at a higher capacity and any increase in voltage up to 110kV. If the lines are on private property the distances in the New Zealand Code of Practice for Electrical Safe Distances will apply, meaning that the greater the voltage, the greater the clearance distance required for buildings and structures below the lines. The increase in voltage can affect landowners and should not be able to done as a permitted activity.

Point Number 419.82

Summary of Decision Requested: **Amend** activity specific conditions 14.3.1.4 in Rule 14.3.1 Permitted Activities, relating to P5 Trimming, maintenance or removal of vegetation or trees associated with infrastructure, by adding "or" at the end of 2) (ii).

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- No specific reasons have been provided for the request to add the word "or".

Point Number 419.83

Summary of Decision Requested: **Add** a new matter of discretion to Rule 14.3.3 RD1 Restricted Discretionary Activities, as follows:

x. effects on affected landowners.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- It is important that the effects on owners of land, where infrastructure is to be located, is a matter of discretion for restricted discretionary activities.

Point Number 419.84

Summary of Decision Requested: **Amend** activity specific condition 14.4.1.2 (1) in Rule 14.4.1 Permitted Activities, relating to P2 Buildings, structures and sensitive land use within the National Grid Yard in all other zones as of 18 July 2018, as follows:

1) Within the National Grid Yard in the Business, Industrial, Country Living, Heavy Industrial, Rural, Town Centre Business, Te Kowhai Airpark, or Reserves Zone:

...

(b) Infrastructure ~~other than for the reticulation and storage of water for irrigation purposes~~ undertaken by a network utility operator as defined in the Resource Management Act 1991; or

(c) Non-habitable buildings or structures for ~~farming~~ primary production activities in rural zones (but not including any intensive farming buildings, commercial greenhouses and milking/dairy sheds); or

...

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The rule sets out the activities that are permitted within the National Grid Yard.

Point Number 419.85

Summary of Decision Requested: **Amend** Policy 4.1.3 Location of development, by expanding the policy to avoid the location of development on high class soils.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter opposes the policy direction for the location of development. This should be expanded to avoid high class soils even if this conflicts with the Future Proof Strategy Planning for Growth 2017 which was deficient in not considering this matter.

Point Number 419.86

Summary of Decision Requested: **Amend** Policy 4.3.3 Future development - Tuakau and Te Kowhai, by expanding the policy to recognise the unique situation of Tuakau to the Pukekohe 'hub' of nationally significant rural production land.

AND

Amend Policy 4.3.3 Future development - Tuakau and Te Kowhai, to address the actual and potential effects of reverse sensitivity for rural production activities at the rural/urban interface.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter opposes the lack of recognition of the unique situation of Tuakau to the Pukekohe 'hub' of nationally significant rural production land.

Point Number 419.87

Summary of Decision Requested: **Add** a new clause (viii) to Policy 4.7.2 (a) Subdivision location and design, as follows:

(a) Ensure subdivision, is located and designed to:

...

(viii) recognises and addresses issues at the rural/urban interface.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- While reverse sensitivity is addressed in Policy 4.7.11 as an urban outcome, Policy 4.7.2 Subdivision location and design, would also be improved by putting this at the forefront of subdivision location and design consideration.

Point Number 419.88

Summary of Decision Requested: Add a new clause (c) to Policy 4.7.4 Lot sizes, as follows:

(c) encourage a density of development that supports intensification of existing urban areas rather than urban sprawl on to rural production land.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Achieving sufficient density is an outcome to support infrastructure provision and is important to encourage intensification and avoid urban sprawl onto rural production land.

Point Number 419.89

Summary of Decision Requested: Add a new clause (c) to Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services, as follows:

(c) encourage a density of development that supports intensification of existing urban areas rather than urban sprawl on to rural production land.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Achieving sufficient density is not only an outcome to support infrastructure provision but is also important to encourage intensification and avoid urban sprawl onto rural production land.

Point Number 419.90

Summary of Decision Requested: Amend Policy 4.7.11 (b) Reverse sensitivity, as follows:

(b) Avoid potential reverse sensitivity effects of locating new dwellings in the vicinity of farming including horticulture, an intensive farming, extraction industry or industrial activity.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A policy of avoidance of potential reverse sensitivity effects should not be limited to existing intensive farming and industrial activities in Tuakau.

Point Number 419.91

Summary of Decision Requested: Amend Policy 4.7.14 (a) Structure and master planning, as follows:

(a) Ensure that development and subdivision within approved structure or master plan areas is integrated with the development pattern and infrastructure requirements specified in an approved structure or master plan and addresses issues at the rural/urban interface.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Structure or master plans in other areas of the Pukekohe 'hub' have failed to account for the relationship of rural production activities at the rural/urban interface.

Point Number 419.92

Summary of Decision Requested: Add a new clause (iv) to Objective 5.1.1 The rural environment, as follows:

(a) Subdivision, use and development within the rural environment where:

...

(iv) Countryside living is directed to defined locations and the effects of scattered countryside living and rural production is avoided.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports an objective to protect high class soils for rural production.
- The submitter supports an objective protecting productive rural activities.
- Rural production is not limited to high class soils only.
- The objective seeking to avoid urban subdivision, use and development is also supported while noting this could be improved by also avoiding scattered countryside living that compromises rural production.

Point Number 419.93

Summary of Decision Requested: Retain Objective 5.2.1 Rural resources, as notified.

Decision Reasons:

- The submitter supports the provision on productive versatility of rural resources.

Point Number 419.94

Summary of Decision Requested: Amend the zoning of approximately 181ha of land on the northern and western side of Tuakau township from Residential Zone to Rural Zone. Refer to Figure 2 in the submission for details.

AND

Amend the zoning of land at the eastern end of Dominion Road to the west of Ridge Road, Tuakau from Rural Zone to Residential Zone (See Figure 2 in the submission for details).

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- There are locational reasons why the rural sector is so productive in Tuakau related to the quality of soil, freshwater, transport linkages, post-harvest facilities, access to labour, the proximity to the market and a diverse land parcel structure.
- There is a need to preserve areas of rural production for rural production and provide for growth and sustained access to land and water.
- There is a need to ensure land owners have flexibility to change rural production land use activities and that the regulatory regime is practical and supportive.
- There are areas in Figure 1 identified as having high class soil and therefore the rezoning of these sites from Rural to Residential Zone does not protect or manage adverse effects on high class soils.
- Objectives 5.1.1 and 5.2.1 seek to protect, maintain and enhance high class soils.
- Policies 5.2.2 and 5.2.3 seek to protect high class soils by retaining their primary productive values and minimising fragmentation.
- The policy framework and section 32 reports seem to recognise the finite nature of high class soils. This is not reflected in the proposed planning framework.
- These areas of land contribute significantly to New Zealand's domestic food supply.
- It is critical that the land is protected and that cultivation be allowed to continue.
- The Growth Areas topic in the section 32 report comments that there will be a loss of high class soil if used for urban development, there is a low to moderate probability of high class soils being retained for primary value and avoidance of adverse effects from proposed objectives and policies, and there is a low probability that the productive value of farming will be encouraged to be protected from new residential growth in Tuakau.
- The areas have a classification of Land Use Capability (LUC) 2 High Class Soils and rezoning is inconsistent with the intent of the Proposed Plan to protect and manage adverse effects on high class soils.
- The section 32 report acknowledges there will be reverse sensitivity effects on rural production as a result of the new urban boundary. Yet the analysis deems this acceptable, as it considers those most impacted are likely to be smaller operations and lifestyle properties. However, the submitter does not agree with this.
- The section 32 report notes that rural landowners will benefit from the sale of rezoned land. What this fails to take into account is that many horticultural operations are located on leased land.
- The financial costs to growers who are leasing land as a result of loss of production and having to find new land to lease for cropping.
- Under Waikato Regional Council Proposed Plan Change 1, growers are unable to undertake a land use change for commercial vegetable production. This would be a non-complying activity and require a grower to identify a nitrogen reference point. Neither the Waikato Regional Council or wider horticultural industry have the means to calculate the nitrogen reference point.
- Relocation to another site would likely be outside of the Waikato Region as a result of Proposed Plan Change 1, resulting in loss of employment and economic value to the local district and regional economy.
- There is the potential for greater adverse effects on the environment as lower class soils do not have the same capacity as high class soils to cope with commercial vegetable cropping.
- The potential cost to consumers from increased produce prices resulting from increased costs to growers from cropping on less versatile land.
- The ability to meet increased demands for domestic food supply in the face of reduces access to high class soil, increased reverse sensitivity effects from new rural-urban boundaries and increased population growth.
- The submitter supports reference to the Electricity (Hazards from Trees) Regulations 2003, however the word "managed" needs to be added.
- The note has limited status in the Plan.

Point Number 419.95

Summary of Decision Requested: **Add** land preparation for horticultural activities as a permitted activity, with a possible condition being:

The activity complies with the Horticulture New Zealand Code of Practice 'Erosion and Sediment Control Guidelines for Vegetable Production' (June 2014)

Decision Reasons:

- The submitter has developed a code of practice for erosion and sediment control to provide guidance at an industry level for cultivation of vegetable crops which has been adopted by Auckland Council, Environment Canterbury and Waikato Regional Council.
- The submitter does not support inclusion of land preparation in volume based thresholds for earthworks, as the potential for adverse effects can be managed appropriately through this code of practice.

Point Number 419.96

Summary of Decision Requested: No specific decision sought, however the submitter opposes the approach to hazardous substances in the Proposed District Plan and seeks amendments to the provisions for hazardous substances.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- It involves the introduction of regulations which is unnecessary as they are provided for under the HSNQ and Health and Safety at Work regulations.
- The 2017 RMA Amendment Act deleted specific requirements for the Council to include control of hazardous substances in the Proposed District Plan.
- The section 32 report justified the approach by needing to provide for integrated management and to meet section 5 of the Act.
- Other existing regulations address the health and safety of communities and do not need to also be considered as proposed in the District Plan.
- The section 32 report considers the provisions that currently exist in the Franklin Section of the Waikato District Plan and also the Waikato Section. The Franklin Section has a lesser regulatory approach than the Waikato Section. There is no analysis that the Franklin approach has led to unacceptable outcomes in terms of managing hazardous substances in the Franklin area. The comments are limited to the provisions being of limited use and out-of-date.
- The submitter does not agree with the assessment as the Franklin provisions are more aligned with the Christchurch City Council approach.
- The assessment fails to take into account the costs that would be imposed on those located within the Franklin area by the imposition of a greater regulatory regime than currently exists.
- Activity status tables are a screening tool that sets thresholds over which consent would be required. The identification is not based on specific effects that may arise from the activity but on the premise that storage of specified quantities of hazardous substances, dependent on location, may have the potential to create adverse effects.
- The substances and quantities of hazardous substances that a grower may have in a store can vary day to day etc.
- Growers do not purchase large quantities to hold in storage, therefore the time in storage tends to be short. They also purchase in response to a crop requirement or pest incursion which can vary season to season.
- Taking a stocktake and doing the calculations to establish quantity limits for all hazard classifications could be out of date within days. Therefore it is impractical to continually update the calculations to ensure the Activity Status tables are met.
- The consideration that provisions should be aligned assumes that the Waikato Section approach is the most appropriate and does not give due consideration to the matters identified in the Christchurch decision, even though this was provided to the Council.
- Where there is a clear resource management issue that is not addressed by HSNQ, then it would be appropriate to include specific provisions within the plan to address the issue.

Point Number 419.97

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure the safe, responsible and appropriate storage and use of hazardous substances that does not require unnecessary compliance

AND

Amend the Proposed District Plan to incorporate an approach to managing hazardous substances that ensures most appropriate, effective and efficient methods are used for storage and use of hazardous substances, which are simple and clear, do not duplicate the requirements under the Hazardous Substances and New Organisms Act 1996 and avoid confusion for users.

AND

Delete the use of Activity Status Tables or quantity trigger limits for the management of hazardous substances.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- There is a need to avoid duplication of the Hazardous Substances and New Organisms Act 1996.
- There is no consideration of specific provisions deemed necessary for Waikato District.
- The Activity Status Table approach is unworkable for horticulture growers.
- It does not implement best practice for management of hazardous substances.
- It is not required as a result of the Resource Management Amendment Act 2017.
- Activity status tables are not based on specific effects that may arise from the activity.

Point Number

419.98

Summary of Decision Requested:

Amend the planning maps and rules to clarify the purpose of the Hamilton Basic Ecological Area.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- There are no specific rules relating to the overlay and no clarification is provided in the section 32 reports.
- The submitter has been informed that the Hamilton Basin Ecological Area overlay is a Environmental Protection Area. However it is noted that the proposed planning maps have a separate key for Environmental Protection Areas, which is a different from the key for the Hamilton Basin Ecological Area.
- Council staff advised that Rule 22.4.1.6 Conservation lot subdivision relates to the Hamilton Basin Ecological Area and that Rule 22.3.7.6 Building setback - Environmental Protection Area relates to areas identified in the Te Kauwhata Structure Plan.

Point Number

419.99

Summary of Decision Requested:

Consider rates relief for situations where high class soils are rezoned for residential use.

Decision Reasons:

- Growers are provided a perverse incentive to subdivide as they are rated for the potential use of the land, rather than the actual use of the land. This incentive is maximised when land is rezoned from rural to residential. HortNZ has had feedback that even though growers don't want to leave the land, the cost of rates inhibits the viability of the growing operation.
- With a diminished supply of high class soils and versatile land, combined with other regulatory constraints (such as Proposed Plan Change 1) and the general cost of land are significant constraints which impact the long-term survival of the horticulture industry. This in term has repercussions for domestic food supply as outlined above.

Point Number

419.100

Summary of Decision Requested:

Add two new clauses (vii) and (viii) to Section 1.12.8 (b) Strategic objectives as follows:

(b) In summary, the overarching directions include the following:

...

(vii) promote the on-going operation and development of rural production activities, including rural industry and services

(viii) plan for future development and growth that supports the district's rural communities and rural economy.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The directions in Section 1.12.8 (b) fail to recognise the need to provide and plan for growth of the rural economy and communities.
- The section 32 report notes that the rural area contains up to 72% of the district businesses and 52% of the population. Planning for future rural growth is as important as planning for future urban growth.
- It is relevant that a direction should be included to ensure the on-going vitality and sustainable growth of rural communities.

Point Number

419.101

Summary of Decision Requested:

Retain Objective 4.1.2 Urban growth and development, as notified.

Decision Reasons:

- The submitter supports the consolidation of urban growth in and around existing towns and villages in the district, where that does not compromise rural production activities.

Point Number

419.102

Summary of Decision Requested:

Amend Policy 4.1.10 (a)(ii) Tuakau, as follows:

(a) Tuakau is developed to ensure:

...

(ii) Existing farming including horticulture, intensive farming and industrial activities are protected from the effects of reverse sensitivity by considering the location of new residential development; and

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A policy of avoidance of potential reverse sensitivity effects should not be limited to existing intensive farming and industrial activities in Tuakau.

Point Number 419.103

Summary of Decision Requested: **Amend** the activity specific conditions in 14.4.1.3 in Rule 14.4.1 Permitted Activities, relating to P3 Earthworks activities within the National Grid Yard, as follows:

~~(1) Earthworks for National Grid support poles and any stay wires that comply with the following conditions Earthworks in the National Grid Yard that comply within the following conditions:~~

...

~~(2) Earthworks for National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) that comply with all of the following conditions Earthworks in the National Grid Yard that comply within the following conditions:~~

...

(3) The following earthworks activities are exempt from Rules 14.4.1.3(1) and (2):

(a) Earthworks that are undertaken by a network utility operator ~~(other than for the reticulation and storage of water for irrigation purposes)~~ as defined by the Resource Management Act 1991;

...

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The purpose of the provisions is to provide for earthworks within the National Grid Yard as 14.4.1.3 states 'Earthworks for National Grid support poles and stay wires'.

Point Number 419.104

Summary of Decision Requested: **Retain** Rule 14.4.2 RD3 Restricted Discretionary Activities, as notified.

Decision Reasons:

- The submitter supports a restricted discretionary activity rule for earthworks that are not permitted activities.

Point Number 419.105

Summary of Decision Requested: **Amend** Rule 14.4.4(a)NC8 Non-Complying Activities as follows:

~~Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line. The storage and handling of hazardous substances HSNO Classes 2-4 with explosive or intrinsic flammable properties in the National Grid Yard.~~

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The identification of hazardous substances to be stored in the National Grid Yard should be defined by HSNO class.
- The classes for explosive or flammable properties are Class 2-4.

Point Number 419.106

Summary of Decision Requested: **Delete** the activity specific condition 14.5.1.3 in Rule 14.5.1 Permitted Activities, relating to P5 Construction or alteration of a building for a sensitive land use.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- NZECP34:2001 sets out distances that apply within proximity to electrical distribution lines.
- The submitter does not consider that it is necessary to require additional requirements in the District Plan. The distances sought in 14.5.1.3 are greater than those required by NZECP34:2001.

Point Number 419.107

Summary of Decision Requested: **Amend** activity specific condition 14.12.1.4 (1)(d)(i) in Rule 14.12.1 Permitted Activities, as it relates to P4 Traffic Generation, as follows:

(d) Within the Rural Zone:

~~(i) There is a maximum 200 vehicle movements per day and no more than 15% of these vehicle movements are heavy vehicle movements; or~~

For activities directly associated with horticulture harvesting, a maximum of 300 vehicle movements once in a 12 month period and no more than 33% of these vehicle movements are heavy vehicle movements; or

...

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The proposed maximum permitted traffic movements for rural activities is sufficient for everyday horticultural operations. However, at harvest time the volume of product significantly increases and requires a considerably higher number of trucks to transport produce for processing and distribution.
- The 15% maximum heavy vehicles equate to 30 trucks.
- The submitter seeks an exemption to allow for an increased volume of traffic movements once every 12 months, and only associated with harvest time.
- A total of 50 trucks or 100 vehicle movements is sought to allow for the contingency.

Point Number 419.108

Summary of Decision Requested:	<p>Add provisions to Table 14.12.5.7 Required parking spaces and loading bays, as follows:</p> <ul style="list-style-type: none"> • <u>Coolstores 1 space per 1000m2 GFA</u> • <u>Workers' accommodation 1 space per 12 workers accommodated</u> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter seeks that specific consideration is given to parking provision for seasonal worker accommodation and coolstores. • Coolstores may have a large floor area but very few people working in the area. • The requirements for parking are less than that for industrial activities. • Seasonal workers are usually transported by car so parking requirements are less than travellers' accommodation.
Point Number	419.109
Summary of Decision Requested:	<p>Add a new clause (ii) to Rule 24.4.2 RD1 (a) Subdivision - Te Kowhai and Tuakau, as follows:</p> <p><i>(a) Subdivision in Te Kowhai and Tuakau must comply with all of the following conditions:</i></p> <p>...</p> <p><i>(ii) Where a subdivision adjoins Rural Zone land, a buffer strip no less than 10m wide must be provided along the adjoining boundary.</i></p> <p>AND</p> <p>Add a new matter of discretion to Rule 24.4.2 RD1 (b) Subdivision - Te Kowhai and Tuakau, as follows:</p> <p><i>(ix) reverse sensitivity effects on land identified as high class soil, on land with rural production potential and on permitted farming activities.</i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter is concerned at the extent of rural land proposed to be rezoned for residential/urban purposes in Tuakau. • The area north of the Waikato River is critical to New Zealand's domestic food supply. • Any further development in this area needs to be appropriately located to avoid high class soil and versatile land, and to be managed appropriately to avoid reverse sensitivity effects. • It is appropriate that additional standards be provided to support on-going operation and development of horticulture in this district. This aligns with the proposed policies.
Point Number	419.110
Summary of Decision Requested:	<p>Add a new clause (ii) to Rule 24.4.2 RD2 (a) Subdivision - Te Kowhai and Tuakau, as follows:</p> <p><i>(a) Subdivision in Te Kowhai and Tuakau must comply with all of the following conditions:</i></p> <p>...</p> <p><i>(ii) Where a subdivision adjoins Rural Zone land, a buffer strip no less than 8m wide must be provided along the adjoining boundary.</i></p> <p>AND</p> <p>Add a new matter of discretion to Rule 24.4.2 RD2 (b) Subdivision - Te Kowhai and Tuakau, as follows:</p> <p><i>(ix) reverse sensitivity effects on land identified as high class soil, on land with rural production potential and on permitted farming activities.</i></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • It is appropriate that additional standards be provided to ensure reverse sensitivity effects are avoided or mitigated.
Point Number	419.111
Summary of Decision Requested:	Retain the definition of "Agricultural and horticultural research activities" in Chapter 13: Definitions, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • These activities are an integral component of rural production, require a rural location and access to the rural resources and are necessary to continue to maintain and grow rural production in New Zealand.
Point Number	419.112
Summary of Decision Requested:	<p>Add the following to the definition of "Accessory building" in Chapter 13 Definitions:</p> <p><u>Auxiliary building has the same meaning.</u></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The definition sought for primary production uses the term auxiliary building which has the same meaning as an accessory building.
Point Number	419.113
Summary of Decision Requested:	<p>Amend the definition of "Airfield" in Chapter 13 Definitions, as follows:</p> <p><u>Means an area of land set aside from other uses for the purposes of enabling aircraft to land and take off and includes rural airstrips and helicopter landing areas.</u></p> <p>AND</p> <p>Any consequential or additional amendments as a result of changes sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • It should be clear if the definition of airfield is meant to include rural airstrips and helicopter landing areas.

Point Number 419.114

Summary of Decision Requested: EITHER:

Add a new definition for "Land preparation" in Chapter 13 Definitions, as follows:

Means the disturbance of soil by machinery for planting, replanting, tending or harvesting pasture or crops. Land preparation includes blading, contour ploughing, ripping, mounding, stepping, contouring, bunding and sediment control measures and drainage associated with horticultural crops but does not include direct drilling or mechanical land preparation associated with plantation forestry.

AND

Amend the definition of "ancillary rural earthworks" in Chapter 13 Definitions, as follows:

Means any earthworks or disturbance of soil associated with:

1. cultivation and land preparation ~~(including establishment of sediment and erosion control measures)~~ for planting and growing operations;
2. harvesting of agricultural and horticultural crops (farming) and forestry (forestry); and
3. maintenance and construction of facilities typically associated with farming and forestry activities including, but not limited to, farm/forestry tracks, roads and landings, stock races, silage pits, farm drains, farm effluent ponds, feeding pads, fencing and sediment control measures.

AND

Amend the definition of "Earthworks" in Chapter 13 Definitions, to specifically exclude "Ancillary rural earthworks" for clarity.

OR

Amend the definition of "Ancillary rural earthworks" in Chapter 13 Definitions, to include contouring, ripping and blading

AND

Amend the definition of "Earthworks" in Chapter 13 Definitions, to specifically exclude "Ancillary rural earthworks".

AND

Any consequential or additional amendments as a result of changes sought in the submission.

- Decision Reasons:**
- The submitter supports the inclusion of ancillary earthworks activities which are typical of rural operations.
 - The submitter supports the inclusion of cultivation, land preparation and works to enable sediment control measures and farm drainage.
 - While this definition applies to some horticulture grower activities, there are a range of activities that could potentially be classes as earthworks but which have effects that can be sufficiently managed through Horticulture New Zealand's code of practice and have minimal potential for creation of sediment laden stormwater.
 - The submitter seeks that the term 'land preparation' be broadened and included in the definitions.
 - This approach has recently been supported and adopted in the Proposed Northland Regional Plan.
 - Ancillary farming earthworks should be specifically excluded from the definition of earthworks for clarity.

Point Number 419.115

Summary of Decision Requested: **Add** a definition for "Artificial crop protection structures" to Chapter 13 Definitions, as follows:

Artificial crop protection structures

Means structures with material used to protect crops and/or enhance growth (excluding greenhouses).

AND

Any consequential or additional amendments as a result of changes sought in the submission.

- Decision Reasons:**
- As the term artificial crop protection structure is used in the Plan, it should be defined.

Point Number 419.116

Summary of Decision Requested: **Delete** (e) in the definition of "Building" in Chapter 13 Definitions, and replace with the following:

Has the meaning the Building Act 2004, excluding:

...

(e) artificial crop protection structures and crop support structures

OR

Amend (e) in the definition of "Building" in Chapter 13 Definitions, as follows:

Has the meaning in the Building Act 2004, excluding:

...

(e) a structure that is permeable and less no greater than 4.8 metres in height to protect crops from agricultural use.

OR

Delete the definition of "Building" in Chapter 13 Definitions, and replace with the following:

Means any impervious structure, whether temporary or permanent, moveable or fixed, that is enclosed with 2 or more walls and a roof, or any structure that is similarly enclosed.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

- Decision Reasons:**
- The submitter supports the exclusion of structures to protect crops for agricultural use.
 - The 4m height restriction is not practical.
 - To be effective, most crop protection structures need to be at least 8m high. These structures are necessary to ensure high quality fruit production through protection from hail, wind and frost.
 - All artificial crop protection structures would automatically trigger building coverage, height and setback controls.
 - These structures are permeable to control temperature and allow rain through. Therefore, coverage and platform rules are irrelevant.
 - These structures are a necessary function of horticulture.
 - It is more appropriate to control height through rules in the Plan.
 - This definition deviates from the Draft National Planning Standards.

Point Number 419.117

Summary of Decision Requested: **Amend** the definition of "Building coverage" in Chapter 13 Definitions, as follows:

Means the proportion of the net site area which is covered by any building. It includes:

(a) overhanging or cantilevered parts of buildings or structures

(b) covered decks

...

It excludes:

...

(e) artificial crop protection structures and crop support structures.

OR

Amend the definition of "building" in Chapter 13: Definitions as sought elsewhere in the submission.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Artificial crop protection structures are permeable by design to manage temperature and allow for rain penetration.
- Accordingly, there is no impact on stormwater runoff as a result of these structures.

Point Number

419.118

Summary of Decision Requested:

Amend the definition of "Earthworks" in Chapter 13 Definitions, as follows:

Means modification of land surfaces by blading, contouring, ripping, moving, removing, placing, or replacing soil or earth, or by excavation, or by cutting or filling operations, but excludes ancillary rural earthworks and burying of plant material that is infected by an unwanted organism as declared by the Ministry of Primary Industries Chief Technical Officer or an emergency declared by the Minister under the Biosecurity Act 1993.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Blading, contouring and ripping are ancillary earthworks for horticulture. The definition should exclude ancillary rural earthworks.
- There needs to be provision to enable a rapid response to biosecurity matters.
- Burying of plant material is one means of a biosecurity response and was applied during the PSA incursion on kiwifruit.

Point Number

419.119

Summary of Decision Requested:

No specific decision requested, but the submission is seeking clarification of the definition of "Energy Corridor" in Chapter 13 Definitions.

Decision Reasons:

- The term "Energy Corridor" has the same definition as "Emergency generator".

Point Number

419.120

Summary of Decision Requested:

Delete the term "Farming" in Chapter 13 Definitions, and replace with the term "Primary production" as follows:

Primary production

Means

(a) any agricultural, pastoral, horticultural, forestry or aquaculture activities for the purpose of commercial gain or exchange; and

(b) includes any land and auxiliary buildings used for the production of the products, including storing, washing and packing of product for market, that result from the listed activities; but

(c) does not include processing of those products into a different product.

AND

Amend the Proposed District Plan by replacing all uses of the term "farming" with "primary production"

OR

Amend the definition of "Farming" in Chapter 13 Definitions, as follows:

Means an agricultural, horticultural or apicultural activity having as its primary purpose the production of any livestock or crop using the in-situ soil, water and air as the medium for production, or the indoor production of plants.

It includes:

(a) Ancillary produce stalls;

(b) Processing of farm produce grown on the land, such as cutting, cleaning, grading, chilling, freezing, packaging and storage.

(c) Greenhouses

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The Draft National Planning Standards has a definition for "primary production".
- The submitter prefers the use of the term "primary production" and seeks that all references to farming be amended to primary production.
- Alternatively, the submitter seeks that the definitions of "farming" is amended to include indoor horticulture.

Point Number

419.121

Summary of Decision Requested:

Amend the definition of "Farming noise" in Chapter 13 Definitions, as follows:

~~Farming~~Primary production noise

Means noise generated by ~~primary production agricultural~~ vehicles, machinery or equipment, any aircraft used for aerial spraying or fertiliser application, ~~agricultural machinery or equipment~~ and farm animals, including farm dogs. It does not include bird scaring devices and frost fans.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition of "farming noise" is supported but the submitter notes that aircraft are used for both spraying and fertiliser application.
- To be consistent with the change of farming to primary production, the terms should be amended to "primary production noise".
- The term should not be limited by 'agricultural' activities as these are only one type of primary production activity.

Point Number 419.122

Summary of Decision Requested: **Add** a definition for "Greenhouse" to Chapter 13 Definitions, as follows:

Greenhouses are a totally enclosed structure where plants are grown in a controlled environment.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- A definition for greenhouses may assist in interpreting the proposed amendment to the definition of primary production.

Point Number 419.123

Summary of Decision Requested: **Delete** the definition of "Hazardous facility" from Chapter 13 Definitions.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter does not consider that there is a need for a definition of "hazardous facility" given the approach that is sought for hazardous substances.
- The proposed definition would include a tractor or quad bike with a spray tank with agrichemicals as a hazardous facility and would hence make the whole farm a hazardous facility.

Point Number 419.124

Summary of Decision Requested: **Amend** the definition of "High class soils" in Chapter 13 Definitions, as follows:

Means those soils in the Land Use Capability Classes I and II (excluding peat soils) and soils in Land Use Capability IIIc and IIIe5, classified as Allophanic Soils, and III using the New Zealand Soil Classification.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition of "High class soils" is the key to the implementation of the proposed rural subdivision framework.
- The proposed definition is wholly reliant on the New Zealand Soil Classification System to define these areas.
- While this is a useful starting point, it is the experience of Horticulture New Zealand that there is other land and other factors that make land capable of high value rural production.
- The proposed definition is too limited.
- There are areas of peat soil which are currently high producing for commercial vegetable growing, for instance some areas around Buckland, Te Kauwhata, Waikati and Mercer.
- There are areas where the broader units of LUC III are utilised for commercial vegetable growing, including numerous areas around Pukekawa.

Point Number 419.125

Summary of Decision Requested: **Retain** the definition of "Indigenous vegetation" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The exclusion of planted shelter belts comprising indigenous species from the definition of indigenous vegetation is supported.

Point Number 419.126

Summary of Decision Requested: **Delete** the definition of "Intensive farming" in Chapter 13 Definitions and replace with a definition of "intensive primary production" as follows:

Intensive primary production

Means primary production activities that involve the production of fungi, livestock or poultry that principally occur within buildings.

OR

Amend the definition of "Intensive farming" in Chapter 13 Definitions, as follows:

Means farming

It excludes the following, provided the building is used for the purpose for which it was built:

(a) woolsheds;

(b) dairy sheds;

(c) calf pens or wintering accommodation for less than 30 stock (except where stock are being reared for the replacement of breeding stock to be used on the same property); and

(d) ~~glasshouse~~ greenhouse production or nurseries

AND

Delete reference to the number of stock if the definition of "Intensive primary production" is retained, and instead include those in the rules or conditions.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports the definition of "Intensive farming", particularly the exclusion of glasshouses, however suggests using the term 'greenhouse' (although no reasons have been provided).
- The proposed National Planning Standards has a definition for "intensive primary production" which would be appropriate to include in the Proposed District Plan.
- Standards relating to the number of stock should be included in the rules or conditions.

Point Number 419.127

Summary of Decision Requested: **Amend** the definition of "Minor upgrading of existing infrastructure" in Chapter 13 Definitions, as follows:

Means an increase in the capacity, efficiency or security of existing infrastructure where this utilises existing structures and networks and/or structures and networks of a similar scale and character.

An increase in voltage of the National Grid or electricity distribution lines can only occur as minor upgrading if the line was constructed for the increased voltage.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition is supported in that the work should be of similar scale and character.
- It should be clear that an increase in voltage can only be undertaken if the line was constructed for that voltage.

Point Number 419.128

Summary of Decision Requested: **Amend** the term "National Grid yard" in Chapter 13: Definitions to "National Grid subdivision corridor" .

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition for "National Grid yard" sets out the distances that should apply to the "National Grid corridor".
- The "National Grid corridor" is specific to subdivision so the words "Subdivision Corridor" should be included.

Point Number 419.129

Summary of Decision Requested: **Amend** the term "National Grid corridor" in Chapter 13: Definitions to "National Grid yard."

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition of "National Grid corridor" sets out the distances that should apply to the "National Grid yard".

Point Number 419.130

Summary of Decision Requested: **Amend** the definition of "Noise-sensitive activity" in Chapter 13 Definitions, as follows:

Means the following:

(a)...

(b) ~~marae and marae complex sensitive land uses within marae complex~~

...

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition of "Noise-sensitive activity" includes a marae complex as defined in the Proposed District Plan.
- The definition should be limited to the buildings where sensitive activities are undertaken.

Point Number 419.131

Summary of Decision Requested: **Delete** the definition of "Noxious, dangerous, offensive or toxic activities" from Chapter 13 Definitions.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Discharges to air are managed by the Waikato Regional Council.

Point Number 419.132

Summary of Decision Requested: **Amend** the definition for "Reservoir" in Chapter 13 Definitions, to include water storage for irrigation.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- There should be inclusion of water storage for irrigation.

Point Number 419.133

Summary of Decision Requested: **Add** a definition for "Reverse Sensitivity" to Chapter 13 Definitions, as follows:

means the potential for the operation of an existing lawfully established activity to be compromised, constrained, or curtailed by the more recent establishment or alteration of another activity which may be sensitive to the actual, potential or perceived adverse environmental effects generated by an existing activity.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- Terms used in the plan should be defined.
- The Draft National Planning Standard includes a definition of "reverse sensitivity".

Point Number 419.134

Summary of Decision Requested: **Delete** the definition for "Rural ancillary earthworks" from Chapter 13 Definitions.
AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- This is the same definition as "Ancillary Rural Earthworks".
- It is unnecessary repetition.

Point Number 419.135

Summary of Decision Requested: **Delete** the definition of "Rural Industry" from Chapter 13 Definitions
AND

Add a new definition for "Rural Industry and Services" to Chapter 13 Definitions, as follows:

Rural industry and services

means an activity undertaken within a rural area where the activity is directly related to rural production activities and includes:

- facilities for processing, packing and storing primary products and
- activities which service rural production
- rural contractors depots
- post harvest facilities
- research facilities

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The proposed definition is too narrow.
- There are a number of activities which are undertaken within the rural area that support primary production and are appropriately located within rural areas.
- These supporting activities are critical to the future growth of the wider horticulture industry.

Point Number 419.136

Summary of Decision Requested: **Add** a new definition for "Farm worker accommodation" to Chapter 13 Definitions, as follows:

Accommodation for people whose duties require them to live on-site, and in the rural zones for people who work on the site or in the surrounding rural area.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The provision of seasonal worker accommodation is becoming a necessary supporting activity to horticultural operations.

Point Number 419.137

Summary of Decision Requested: **Delete** the acronym "SNA" in Chapter 13 Definitions
AND

Add a glossary of abbreviations in the Proposed District Plan.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition of "SNA" refers to the definition of Significant Natural Area which is unnecessarily repetitive.
- The submitter considers that abbreviations could be placed in a separate glossary.

Point Number 419.138

Summary of Decision Requested: **Amend** the definition of "Storage" in Chapter 13 Definitions, as follows:

Means in the context of a hazardous substance or hazardous waste, the containment of a hazardous substance or hazardous waste, either above ground or underground, in enclosed packages, containers or tanks. ~~It includes vehicles used to transport any hazardous substance that are stationary within a hazardous facility for more than short periods of time.~~

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The proposed definition would mean that a tractor or quad bike with a spray tank containing agrichemicals is a storage facility.

Point Number 419.139

Summary of Decision Requested: **Amend** the definition of "Use" in Chapter 13 Definitions, so that the application of agrichemicals and fertiliser is excluded.
AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The definition should specifically exclude the application of agrichemicals and fertilisers for the intended use.
- Applications of agrichemicals and fertilisers are managed by the Waikato Regional Council as discharges and Waikato District Council should not also be regulating them.

Point Number 419.140

Summary of Decision Requested: Amend the definition of "Vegetation clearance" in Chapter 13 Definitions, as follows:

Indigenous Vegetation clearance

Includes the modification, burning, cutting, crushing, spraying and removal by physical, mechanical, chemical or other means of indigenous vegetation, of all forms of vegetation, including indigenous, and may include exotic plants. It does not include vegetation clearance relating to routine cultivation or grazing clearing;

(a) hedges, shelter belts and amenity plants, or

(b) vegetation along fences and around dams and ponds, or

(c) vegetation around public utility networks, or

(d) vegetation that impedes or is likely to impede flood flows

(e) vegetation for the maintenance of roads and tracks, or

(f) scattered trees, shrubs or regenerating bush amongst pasture or horticultural crops, or

(g) vegetation that is infected by an unwanted organism as declared by the Ministry of Primary Industries Chief Technical Officer or an emergency declared by the Minister under the Biosecurity Act 1993.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter seeks clarity with the relationship between the use of "indigenous vegetation" and "vegetation clearance" used in the Proposed District Plan.
- Throughout the Proposed District Plan, the wording in rules relates to "indigenous vegetation clearance".
- The submitter is unable to locate any rules within the Proposed District Plan that relate to vegetation clearance of non-indigenous species. All relevant rules appear to apply to indigenous vegetation only.
- The submitter supports the exclusion of vegetation clearance relating to routine cultivation.
- Productive rural land use requires the ability to manage vegetation species and growth to ensure production activities are not compromised.

Point Number 419.141

Summary of Decision Requested: No specific decision sought, however the submitter opposes the use of Activity Status Tables or quantity trigger limits for the management of hazardous substances.

Decision Reasons:

- There is a need to avoid duplication with the Hazard Substances and New Organisms Act 1996.
- There is no consideration of specific provisions deemed necessary for Waikato District.
- The Activity Status Table approach is unworkable for horticulture growers.
- It does not implement best practice for management of hazard substances.
- It is not required as a result of the Resource Management Amendment Act 2017.

Point Number 419.142

Summary of Decision Requested: Delete the note in 14.3.1.4 relating to P5 Trimming or removal of vegetation or trees associated with infrastructure

AND

Add a new activity specific condition 14.3.1.4 in Rule 14.3.1 Permitted Activities, relating to P5 Trimming or removal of vegetation or trees associated with infrastructure, as follows:

(2) Trimming, maintenance or removal of vegetation or trees in and around electrical assets shall be managed in accordance with the Electricity (Hazards from Trees) Regulations 2003.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- The submitter supports reference to the Electricity (Hazards from Trees) Regulations 2003, however the word "managed" needs to be added.
- The note has limited status in the Plan.

Point Number 419.143

Summary of Decision Requested: Amend the definition of "hazardous facilities" in Chapter 13: Definitions, as follows:

Means activities involving hazardous substances and premises at which these substances are used, stored or disposed of. Storage includes vehicles for their transport locally at a facility for more than short periods of time. Storage and use does not include vehicles transporting hazardous substances for their intended use, such as agricultural spraying or application of fertiliser.

AND

Any consequential or additional amendments as a result of changes sought in the submission.

Decision Reasons:

- It is uncertain what a "short period of time" is and would make a whole farm or rural property a hazardous facility, as a vehicle may be used to transport agrichemicals or fertiliser for application.

Submitter Number: 420

Submitter: Ben Young

Organisation: Madsen Lawrie Consultants Limited

Point Number 420.1

Summary of Decision Requested:	<p>Add a new clause (iii) to Rule 22.4.1.1 PR3 (c) Prohibited subdivision as follows:</p> <p><i>(iii) Any lot created by amalgamation for the purposes of a transferable rural lot subdivision under the Waikato District Plan – Franklin Section where the amalgamation was between records of title that existed prior to 6 December 1997.</i></p> <p>AND</p> <p>Amend Rule 22.4.1.1 Prohibited Subdivision to remove references to the 6th December 1997.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Titles amalgamated under the Operative District Plan - Franklin section should not be penalised for moving their titles from the property.
Point Number	420.2
Summary of Decision Requested:	No specific decision sought, but submission opposes the use of the 6 th December 1997 CT date in Rule 22.4.1.2 (a)(i) General subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • The CT date should be brought forward to the date the Proposed District Plan is operative. • The rule should be inclusive of the whole of the District and not reference a redundant and archaic rule that relates to only part of the district. • If the CT date of the 6th December 1997 is persisted with, then further exceptions need to be made to include titles with a title date newer than the 6th of December 1997 that were created by transferable rural lot right subdivision.
Point Number	420.3
Summary of Decision Requested:	Amend Rule 22.4.1.4 RD1 (a)(i) Boundary relocation, to remove specification of a date for titles undergoing the boundary relocation.
Decision Reasons:	<ul style="list-style-type: none"> • Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation. • It is unclear as to what will be achieved by the imposition of such a date.
Point Number	420.4
Summary of Decision Requested:	Retain the alignment of the Village Zone and Rural Zone Boundary of the property at 3660 Highway 22, Naikē, to match the property boundaries.
Decision Reasons:	<ul style="list-style-type: none"> • The Operative District Plan – Franklin Section had not accurately plotted this line.
Point Number	420.5
Summary of Decision Requested:	Retain Rule 22.4.1.2 (a)(ii) General subdivision as notified requiring a minimum of 20ha parent title size.
Decision Reasons:	No reason provided.
Point Number	420.6
Summary of Decision Requested:	<p>Amend Rule 22.4.1.2 (a)(iii) General subdivision as follows:</p> <p><i>The proposed subdivision must create no more than one additional lot, excluding an access allotment, <u>for every compliant parent certificate of title.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Clause (iii) needs to be clarified. • As the rule reads in its current form, it is not clear that subdivision must not create more than one lot for every compliant parent certificate of title. • The rule could be interpreted that no more than one lot is created per subdivision regardless of number of compliant parent certificate of titles that are involved.
Point Number	420.7
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a)(iv) General subdivision to reduce the minimum lot size from 8,000m ² to 4,000m ² .
Decision Reasons:	<ul style="list-style-type: none"> • A minimum lot size requirement of 4,000m² will allow for some flexibility while still provided generous-sized lots that are appropriate in the rural zone. • A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots. • For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential. • Waikato Regional Council has a 2,500m² minimum in the rural zone, which should be considered when designating lot minimum area to minimise urban sprawl and best maintain the rural land resources in the district. • This is relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.
Point Number	420.8
Summary of Decision Requested:	<p>Amend Rule 22.4.1.4 RD1 (a)(iv) Boundary relocation to reduce the minimum lot size from 8,000m² to 4,000m², if not 2,500m².</p> <p>OR</p>

Add a new clause to Rule 22.4.1.4 Boundary relocation (if the minimum lot size is not reduced to 2500m2) enabling boundary relocation for pre-existing lots smaller than 8,000m2 that were previously created in compliance with the Franklin section of the Operative District Plan.

Decision Reasons:

- Under the current Operative District Plan – Franklin section there is provision for lot size of down to 2,500m2 in the Rural Zone, therefore by imposing a minimum lot size requirement of 8,000m2 for lots resulting from boundary relocation subdivision in the future.
- A minimum lot size of 8,000m2 will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential.
- This will not promote efficient rural usage of land jeopardises Policy 5.2.3 (a) Effects of subdivision and development on soils.
- Waikato Regional Council has a 2,500m2 minimum in the Rural Zone, which should be considered and implemented when designating the minimum lot area to minimise urban sprawl, and best maintain and enable usage of rural land resources in the district.

Submitter Number: 421 **Submitter:** Tracy Hayson
Organisation: Wasley Knell

Point Number 421.1

Summary of Decision Requested: **Add** a new new clause to Rule 22.4.1.1 PR2 Prohibited subdivision as follows:

(c) PR2(a) does not apply to the following:

Land deemed not high-class soil prior to any soil improvement works being undertaken. In this regard confirmation of the soils class shall be obtained from Council and shall continue to be the accepted soil classification specific to the provisions of this District Plan.

AND

Add a new clause to Rule 22.4.1.1 PR3(c) Prohibited subdivision as follows:

(c)(iii) Land deemed not high-class soil prior to any soil improvement works being undertaken. In this regard confirmation of the soils class shall be obtained from Council and shall continue to be the accepted soil classification specific to the provisions of this District Plan.

Decision Reasons:

- If, subsequent to the soil classification being recorded, land improvement work is carried out that was raised the standard to meet the High Class Soils definition may consequently be interpreted as applying prohibited activity status. This interpretation would be a disincentive to land improvement work.
- This submission proposes exceptions to prohibited activities.
- This would provide for land to be exempt to the prohibited subdivision activities which are triggered when a site has high class soil. This is subject to that prior to improvement works on the land, Council confirms the soils on the site do not meet this standard, accepting that this will remain the recorded soil classification regardless of subsequent soil improvement work.

Submitter Number: 422 **Submitter:** Malcolm MacDonald

Point Number 422.1

Summary of Decision Requested: **Amend** the zoning of part of the property located at 133 Greenhill Road, Puketaha (Lot 2 DP 304594) from Rural Zone to Business Zone with an overlay of Motorway Service Area, which enables the establishment of a motorway service centre (see map attached to submission for extent of rezoning sought).

Decision Reasons:

- The requested zone amendment would enable the establishment of a service station, food retail and associated activities including parking truck stop, amenities and a layby.
- The subject site is unique as it would provide for these activities which are not appropriate elsewhere, and it is adjacent to on- and off-ramps beside the Greenhill Road interchange.
- The proposal would also achieve the purpose of the Resource Management Act by enabling people and the community to provide for their welfare subject to the appropriate management of adverse effects on the environment.
- The remaining Rural Zoned portion within this large landholding will remain available for productive rural purposes.
- The rezoning of the land and the provision of infrastructure will assist in providing refuge areas and services for motorists using the Waikato Expressway.

Submitter Number: 423 **Submitter:** Lindsay Wilson
Organisation: Watercare Services Limited

Point Number 423.1

Summary of Decision Requested: **Provide** confirmation that existing and planned infrastructure capacity is available to service anticipated growth in the Proposed District Plan in a manner that gives effect to the National Policy Standard: Urban Development Capacity.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- The availability of infrastructure capacity needs to be a key consideration through the resource consent process.
- This is needed to give effect to Objective OD2, and Policy PA2 and PA3 of the NPS-UDC.

Point Number 423.2

Summary of Decision Requested: **Retain** Policy 4.7.5 Servicing requirements, subject to the provision of adequate structure planning guidance that provides sufficient requirements (among other matters) regarding the integration of development and infrastructure provision being included in the Proposed District Plan.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- It is critical that the Proposed District Plan includes sufficiently robust objectives, policies and methods to ensure appropriate land use and infrastructure integration.

Point Number 423.3

Summary of Decision Requested: **Retain** Policy 4.7.6 Co-ordination between servicing and development and subdivision subject to the provision of adequate structure planning guidance that provides sufficient requirements (amongst other matters) regarding the integration of development and infrastructure provision being included in the Proposed District Plan.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- It is critical that the Proposed District Plan includes sufficiently robust objectives, policies and methods to ensure appropriate land use and infrastructure integration.

Point Number 423.4

Summary of Decision Requested: **Retain** Policy 4.7.8 Staging of subdivision, subject to the provision of adequate structure planning guidance that provides sufficient requirements (among other matters) regarding the integration of development and infrastructure provision being included in the Proposed District Plan.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- It is critical that the Proposed District Plan includes sufficiently robust objectives, policies and methods to ensure appropriate land use and infrastructure integration.

Point Number 423.5

Summary of Decision Requested: **Amend** the Proposed District Plan to include sufficiently robust rules in relation to subdivision and development to ensure appropriate land use and infrastructure integration and to (amongst other matters) adequately give effect to Policies 4.7.5, 4.7.6 and 4.7.8.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Objective ODI of the National Policy Statement: Urban Development Capacity requires the integration of land use, development and development infrastructure.
- It is critical that the Proposed District Plan includes sufficiently robust objectives, policies and methods to ensure appropriate land use and infrastructure integration.

Point Number 423.6

Summary of Decision Requested: **Amend** the Proposed District Plan (among other matters) to adequately give effect to Policy 4.7.5 Servicing requirements, Policy 4.7.6 Coordination between servicing and development and Subdivision and Policy 4.7.8 Staging of Subdivision.

Decision Reasons:

- It is critical that the Proposed District Plan includes sufficiently robust objectives, policies and methods to ensure appropriate land use and infrastructure integration.
- The approach to managing landuse and infrastructure integration primarily within;
 - Chapter 4: Urban Environment (and in particular 4.7 Urban Subdivision and development);
 - Chapter 5: Rural Environment (which currently does not include objectives and policies regarding the integration of landuse and infrastructure in relation to residential development in the Country Living Zone); and
 - Any other Chapters that contain methods implementing the landuse and integration matters in Chapter 4 and 5.
- Any other parts of the Proposed District Plan to which consequential amendments are required to address the concerns raised by Watercare in this submission.

Point Number 423.7

Summary of Decision Requested: **Amend** the Proposed District Plan to include appropriate objectives, policies and rules to refuse resource consent for development that is unable to be serviced by infrastructure in an efficient and cost effective manner.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- The availability of infrastructure capacity needs to be a key consideration through the resource consent process.
- The ability to decline resource consents for development that is unable to be efficiently and cost-effectively serviced by infrastructure or that does not have an appropriate infrastructure solution needs to be provided for in the Proposed District Plan.
- Clear guidance as to the sequencing of development in the areas zoned for growth and the necessity for infrastructure capacity to be available to service development is needed.

Point Number 423.8

Summary of Decision Requested: **Amend** Activity specific condition 14.2.1.1(1)(a) Permitted Activities relating to P1 new infrastructure as follows:

Not exceed ~~40m²~~ 40m² in area above ground;

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable provision of infrastructure or recognise the technical or operational needs of infrastructure.
- Most Watercare pump stations (at least the area above ground) are likely to exceed 20m² in above ground area and will consistently be up to 40m².

Point Number 423.9

Summary of Decision Requested: **Amend** Activity specific condition 14.2.1.1(1)(b) Permitted Activities relating to PI new infrastructure as follows:

Not exceed ~~2.5m~~ 3m in height.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable the provision of infrastructure or recognise the technical or operational needs of infrastructure.
- Most Watercare pump stations are likely to be up to 3m in height.

Point Number 423.10

Summary of Decision Requested: **Add** an 'advice note' to section E Designations as follows:

Any works undertaken in accordance with the purpose of a designation are not subject to the requirements of any district plan rules including any overlay rules.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Watercare is concerned that the proposed overlays could be interpreted in a way that means Watercare is (incorrectly) required to comply with any requirements in the overlays when undertaking activities pursuant to one of its designations.

Point Number 423.11

Summary of Decision Requested: **Amend** the Proposed District Plan to include appropriate objectives, policies and rules to ensure the timing and sequencing of proposed growth is sufficiently integrated with the planned development of necessary infrastructure.

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- It is critical that the Proposed District Plan includes sufficiently robust objectives, policies and methods to ensure appropriate land use and infrastructure integration.
- The availability of infrastructure capacity needs to be a key consideration through the resource consent process.
- The ability to decline resource consents for development that is unable to be efficiently and cost-effectively serviced by infrastructure or that does not have an appropriate infrastructure solution needs to be provided for in the Proposed District Plan.
- Clear guidance as to the sequencing of development in the areas zoned for growth and the necessity for infrastructure capacity to be available to service development is needed.

Point Number 423.12

Summary of Decision Requested: **Amend** the Proposed District Plan to:

- Assist with the workability and clarity of the Proposed District Plan and
- Remove ambiguities to avoid disputes or interpretations.

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- No reason provided.

Point Number 423.13

Summary of Decision Requested: **Amend** the Proposed District Plan to better provide for the integration of land use and infrastructure.

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- No reasons provided.

Point Number 423.14

Summary of Decision Requested: **Amend** the Proposed District Plan to better enable the provision of necessary infrastructure and associated works, e.g. earthworks, and recognise the technical and operational needs of infrastructure throughout the Waikato District.

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- The provisions relevant to infrastructure provision and associated works do not appropriately enable the provision of infrastructure or recognise the technical or operational needs of infrastructure, e.g. pump stations are constantly up to 40m² and up to 3m in height.

Point Number 423.15

Summary of Decision Requested: Amend the Infrastructure provisions to better:

- Enable the provision of necessary infrastructure;
- Recognise that, in some cases technical and/or operation needs of infrastructure will result in unavoidable adverse effects;
- Recognise that, in some cases technical and/or operation needs of infrastructure necessitate infrastructure to be provided in certain locations; and
- Recognise the importance of the provision of resilient infrastructure.

Decision Reasons:

Enablement of Infrastructure and associated works:

- Infrastructure is critical to the social, economic, and cultural well-being of people and communities and the quality of the environment. Infrastructure is a critical enabler of the economy, the well-being of people and communities and of growth. A crucial element of any development is the infrastructure to support it, both to enable it and to assist in avoiding, remedying or mitigating the adverse effects of development and ensuring that this is done in an efficient and cost effective way.
- Watercare's infrastructure assets are generally buildings and associated structures (e.g. pumping stations) or linear structures (e.g. pipes) and in many cases need to be located in specific locations to be able to provide an appropriate level of service.
- watercare considers the objectives, policies and rules in the PWDP relating to infrastructure raise three broad issues which it seeks be addressed through this submission:
 - (a) First, the permitted activity rules for "all infrastructure" in Rule 14.2.1, and the permitted activity rules for "water, wastewater and stormwater" in Rule 14.1.1 are not sufficiently enabling;
 - (b) Second, the permitted activity rules for "all infrastructure" and for "water, wastewater and stormwater" may be effectively "overridden" by rules triggering requirements for consent elsewhere in the PWDP. These additional requirements for consent in other chapters of the PWDP (e.g. Chapter 3 Natural Values - which primarily relates to section 6 matters, and the zone rules) mean that important infrastructure may in fact not be permitted; and
 - (c) Third, the objectives and policies of the PWDP do not recognise the importance of the provision of resilient infrastructure provision in supporting communities.

Point Number 423.16

Summary of Decision Requested: Amend the Proposed District Plan to:

- Meet the requirements of the Resource Management Act, and in particular Part 2;
- Represent the most appropriate means of achieving the purpose of the Resource Management Act;
- Give effect to the National Policy Statement on Urban Development Capacity 2016; and
- Give effect to the Waikato Regional Policy Statement.

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- The submitter is in principle supportive of the Proposed District Plan, but there are a number of provisions that do not meet the statutory requirements.

Point Number 423.17

Summary of Decision Requested: Amend Activity specific condition 14.3.1.1(I) Permitted Activities relating to PI Minor Upgrading of existing infrastructure as follows:

(1) The realignment, configuration, relocation or replacement of infrastructure and associated structures that meet all of the following conditions:

(a) Are within 15m of the existing alignment or location;

...

(d) Do not increase the diameter of any existing above-ground pipe by more than +50% and

(e) Do not increase the area of any existing above-ground structure by more than +50%.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable provision of infrastructure or recognise the technical or operational needs of infrastructure.
- Rule 14.3.1.1 sets the permitted standards for the minor upgrading of existing infrastructure. Watercare considers these standards are overly restrictive.

Point Number 423.18

Summary of Decision Requested: Amend the Proposed District Plan to provide for the operation, maintenance, repair and upgrade of infrastructure in existence prior to the notification of the Proposed District Plan and that has been lawfully established as a permitted activity.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable provision of infrastructure or recognize the technical or operational needs of infrastructure.
- The Proposed District Plan doesn't enable the ongoing operation, maintenance or upgrading of existing infrastructure as a permitted activity.

Point Number 423.19

Summary of Decision Requested: Add specific rules in the Proposed District Plan to enable infrastructure within transport corridors as a permitted activity where it will not compromise the safe and efficient functioning of the transport network.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable the provision of infrastructure or recognize the technical or operational needs of infrastructure.
- The Proposed District Plan doesn't provide methods (e.g. assigning specific activity status to infrastructure activities within the road corridor) to adequately implement proposed policy 6.5.6a.) regarding the encouragement of network utility infrastructure within transport corridors.

Point Number 423.20

Summary of Decision Requested: Amend the definition of "Infrastructure" in Chapter 13 Definitions to include the following:

(i) Storage and treatment facilities for water supply distribution; and

(ii) Storage, treatment and discharge facilities for drainage or sewerage systems.

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable the provision of infrastructure or recognize the technical or operational needs of infrastructure.
- The Proposed District Plan definition of infrastructure doesn't include the storage and treatment of water and wastewater.

Point Number 423.21

Summary of Decision Requested: Amend Chapter 14 Infrastructure and Energy to include comprehensive rules specifying the activity status for infrastructure (including water, wastewater and storm water infrastructure) in all zones, overlays and areas covered by the Proposed District Plan including permitted activity rules, on a similar basis to Chapter E26 Infrastructure in the Auckland Unitary Plan (Operative in Part).

AND

Any consequential amendments or further relief to address the matters raised in the submission.

Decision Reasons:

- Does not appropriately enable the provision of infrastructure or recognize the technical or operational needs of infrastructure.
- With respect to the potential for rules in other chapters of the Proposed District Plan (e.g. Chapter 2 and the zone chapters) to effectively override the permitted activity rules for infrastructure in chapter 14, Watercare seeks that this be addressed in the same manner as in chapter E26 infrastructure of the Auckland Unitary Plan Operative in Part. In other words, that the Proposed District Plan includes rules setting out the activity status for infrastructure in all zones, overlays and areas covered by the Proposed District Plan and permitted activity rules for infrastructure with appropriate standards in all zones, overlays and areas.

Submitter Number: 424 **Submitter:** Grant Ryan

Point Number 424.1

Summary of Decision Requested: Amend Rule 22.4.1 Subdivision - General to be less restrictive for areas that have already been allowed to subdivide.

Decision Reasons:

- The submitter has 19 lifestyle blocks on Pook Road, Pukekohe so that area is no longer rural.
- A review of the Rural Zone and its restrictions is most logical.

Point Number 424.2

Summary of Decision Requested: Amend Rule 22.4.2 Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas to review or delete the property size.

Decision Reasons:

- The submitter has 19 lifestyle properties on Pool Road, Pukekohe and these are no longer rural properties.
- This needs to be reduced to allow for property exit strategy.

Point Number 424.3

Summary of Decision Requested: No specific decision sought, but submission opposes the restrictions on subdivision of high-class soils, especially on Pook Road, Pukekohe, in Rule 22.4 Subdivision.

Decision Reasons:

- The submitters have a total of 9.45ha which is uneconomic as a rural property to farm, and currently operate a high value plant breeding operation from this site.
- If they wanted to expand they would need to sell and relocate and the ability to sell 9.45ha as an economic unit rural is not feasible.
- They have 19 lifestyle properties and rural activity with reverse sensitivity is becoming a challenge.

Point Number 424.4

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision after reviewing the property size and the restrictions to subdivide on high-class soils when there are no better options.

Decision Reasons:

- The submitter farms on 9.45ha only due to a low land use activity with their plant breeding operation; this land size is uneconomic for a general farm operation.
- If and when the submitter is required to expand they would need to sell to buy a larger property. To sell 9.45ha as a rural property would not be viable.
- The ability to sell as lifestyle would be more economic.
- They currently have 19 lifestyle properties on Pook Road, Pukekohe. No one else is farming or operating a rural property, so to restrict them after everyone else has already capitalized would be unreasonable.

Submitter Number: 425 **Submitter:** Envirofert Limited

Point Number 425.1

Summary of Decision Requested: Retain the definition for "Waste management" in Chapter 13 Definitions.

Decision Reasons:

- This definition is supported.

Point Number 425.2

Summary of Decision Requested: **Retain** the definition for "Waste management facility" in Chapter 13 Definitions.

Decision Reasons: None

- The definition is supported.

Point Number 425.3

Summary of Decision Requested: Amend the zoning for the southern/western portion of 74 Geraghtys Road, Tuakau, from Rural Zone to a Specific Area zone, or a similar change that addresses the matters outlined in the submission (Refer to Figure 1 attached to the submission).

AND

Add specific provisions appropriate for a waste management facility on the site at 74 Geraghtys Road, Tuakau.

Decision Reasons:

- The Council proposed zoning does not reflect the existing environment which includes an established waste management facility.
- It is considered that a Specific Area zone is more appropriate for the site as it will allow the existing operation to continue effectively.
- The Envirofert facility provides a regionally significant service, as one of the eleven commercial composting plants in the country. The service promotes sustainability and reduction in organic waste to landfills which is accordance with the purpose of the Resource Management Act 1991 (refer to section 1.9.2(a)).
- The continued operation of the waste management facility should be encouraged and enabled by a more appropriate zone with standards conducive to a waste management facility, that are of benefit to the public.

Point Number 425.4

Summary of Decision Requested: **Amend** the zoning for the northern/eastern portion of 74 Geraghtys Road, Tuakau, from Rural Zone to Residential Zone (Refer to Figure 2 attached to the submission).

Decision Reasons:

- The proposed Rural Zoning is not appropriate for this land
- Residential Zoning would allow for development, which is responsive to the strategic direction of the Proposed Waikato District Plan.
- The submission area is currently serviced by the reticulated water supply system and there is opportunity to extend public storm water and wastewater lines to serve this area.
- The submission area is appropriate for residential development given that there is existing social and physical infrastructure, as well as employment opportunities in the area, which are underutilised.
- Given the costs associated with infrastructure provision, zoning only half 8-12 Geraghtys Road as Residential Zone would be an inefficient use of resources and a larger extent of Residential Zoning within this area is more appropriate.

Submitter Number: 426 **Submitter:** Kim Angelo Libre

Point Number 426.1

Summary of Decision Requested: **Amend** the proposed zoning of the land between the Waikato Expressway and the Tamahere Country Living Zone (including Yumelody Lane) from Rural Zone to Country Living Zone.

Decision Reasons:

- The land around Yumelody Lane is already subdivided into small lots and it is not suitable for economic farming.
- A Country Living Zone is suitable because this area is adjacent to the Tamahere Country Living Zone and is cut off from other rural areas by the expressway.

Point Number 426.2

Summary of Decision Requested: **Retain** Rule 22.3.2 PI Minor dwelling and that it does not include reference to dependent persons in the rule.

Decision Reasons:

- There is no need to stipulate that dependent persons live in a minor dwelling.

Point Number 426.3

Summary of Decision Requested: **Delete** Rule 22.3.2 PI (b) (i) Minor dwelling requiring the minor dwelling to be within 20 metres of the main dwelling.

Decision Reasons:

- This requirement is unnecessary.
- It takes no account of the topography and other features of the site.
- There may be a better site on the land further away.

Submitter Number: 427 **Submitter:** Monica de la Cruz Carballo

Point Number 427.1

Summary of Decision Requested:	Add a Special Character Area for Raglan.
Decision Reasons:	<ul style="list-style-type: none"> • Concern that Raglan's special character is being eroded. • Want better protection of that character. • Want a pedestrian and bike friendly town. • Want friendly and diverse buildings, not more than two stories high.
Point Number	427.2
Summary of Decision Requested:	Amend the Proposed District Plan so that any building activity that does not comply with the District Plan in Raglan will be publicly notified.
Decision Reasons:	<ul style="list-style-type: none"> • Want friendly and diverse buildings, no more than two stories high. • Concern that Raglan's special character is being eroded. • Want better protection of that character.

Submitter Number:	428	Submitter:	David Peacocke
On behalf of:	Ohinewai Land Limited		
Point Number	428.1		
Summary of Decision Requested:	Amend the Proposed District Plan to include a growth area at Ohinewai in accordance with the plan attached to the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • The growth area is in close proximity to Huntly and could be connected to Council Services. • Ohinewai is centrally located between Auckland and Hamilton, and has an existing interchange on the Waikato Expressway. • There is already Ohinewai School, and Living, Country Living and Business zoned land on the western of the Waikato Expressway. • Soil types in the area typically limit productive uses during winter. 		

Submitter Number:	429	Submitter:	Olivia Henwood
Point Number	429.1		
Summary of Decision Requested:	Retain Chapter 9 Te Kowhai Airpark as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Te Kowhai is an asset to the aviation community. • As the surrounding area is facing big development, it is vital to secure the aerodrome for the future. • The proposal will allow the aerodrome to evolve and adapt to technological changes. 		
Point Number	429.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Te Kowhai Aerodrome is an asset to the aviation community. • As the surrounding area is facing big development, it is vital to secure the aerodrome for the future. • The proposal will allow the aerodrome to evolve and adopt to technological changes. 		

Submitter Number:	430	Submitter:	Yannis Petzold
Point Number	430.1		
Summary of Decision Requested:	Add a Special Character Area for Raglan, focused on the following qualities: diverse buildings and diverse people, relaxed, no multi story buildings, pedestrian and bike friendly, water views and human scale buildings. OR Amend the Proposed District Plan to require any building activity that does not comply with the District Plan in Raglan to be publicly notified.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		
Point Number	430.2		
Summary of Decision Requested:	Amend the Proposed District Plan to control how much of Raglan is being turned into permanent holiday accommodation like Air BnB.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		

Submitter Number:	433	Submitter:	Mischa Davis
Organisation:	Auckland Waikato Fish and Game Council		

Point Number 433.1

Summary of Decision Requested: **Amend** Objective 5.2.1 (a) Rural resources, as follows:

(a) Maintain ~~or~~ and where required, enhance the:

...

(iv) Life-supporting characteristics and intrinsic ~~natural characteristics~~ values of ecosystems of water bodies and coastal waters and the catchments between them ;

(v) The ecological health of fresh water bodies and ground water, including their catchments and connections.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The Vision and Strategy is intended to be the primary direction setting document for the Waikato River. The restoration and protection of the Waikato River is to be regarded as a primary objective guiding policy and outcomes under the Resource Management Act and this includes improving the quality of Waikato River water quality over a reasonable period.
- The phrase 'intrinsic natural characteristics' used in sub-clause (iv) needs to be either defined or reworded to be consistent with the term in the Resource Management Act.

Point Number 433.2

Summary of Decision Requested: **Retain** Policy 5.3.2 Productive rural activities as notified.

Decision Reasons:

- Game bird hunting can be constrained by surrounding land use when urban and lifestyle encroachment occurs in traditionally hunted sites.
- Supports the wording of the policy.

Point Number 433.3

Summary of Decision Requested: **Amend** Policy 5.3.5 Earthworks activities, as follows:

(a) Provide for earthworks where they support rural activities or are for ecosystem protection, rehabilitation or restoration works, including:

...

(iv) wetland enhancement work

...

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified policy does not provide for earthworks for ecosystem protection, rehabilitation or restoration works.

Point Number 433.4

Summary of Decision Requested: **Add** a new clause to Policy 5.3.7 (a) Reverse sensitivity effects, as follows:

(vi) recreational hunting

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Recreational hunting is typical of the rural environment and therefore the policy needs to recognise that noise from this activity should be accepted and can be managed.

Point Number 433.5

Summary of Decision Requested: **Add** a new clause to Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

(g) Ensure that the form and location of subdivision does not compromise public access to rivers, streams, lakes and wetlands and the quality of these environments.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The recreational values of waterbodies can be constrained by limited public access. Fish and Game has a statutory obligation to maintain and enhance access to sports fisheries and game bird hunting areas and public spaces can be fragmented by the subdivision process if not carefully managed.
- Furthermore, section 6(d) of the Resource Management Act notes that the maintenance and enhancement of public access to and along the coastal marine area, lakes and rivers is a matter of national importance and the Waikato Regional Policy Statement places an obligation on Council to recognise the importance of public access to these areas.

Point Number 433.6

Summary of Decision Requested: **Retain** Policy 5.3.14 (d) Signs, as notified.

Decision Reasons:

- Fish and Game signs, which would qualify under the definition of 'advertising sign', are a fundamental aspect of managing game bird shooting and sports fish angling activities and are permitted throughout much of New Zealand.

Point Number 433.7

Summary of Decision Requested:	Retain Policy 5.3.15 (v) Noise and Vibration, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Shotgun noise associated with recreational hunting should be permitted and considered as a potential reverse sensitivity effect when urban and lifestyle encroachment occurs near traditionally hunted sites.
Point Number	433.8
Summary of Decision Requested:	Retain Policy 5.6.3 (a)(v) Subdivision within the Country Living Zone, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Existing game bird hunting activities are often constrained by surrounding land use, and generally becomes untenable when this land use changes; for example, when urban and lifestyle encroachment occurs near traditionally hunted sites. Recreational game bird hunting is a very popular activity in the rural environment. The game bird season involves the discharge of shotgun noise. This is not like other constant noises rather it is very brief in duration. Game bird hunting begins at 6:30am in the morning and concludes at 6:30pm at night for the length of the season. Introducing new dwelling areas near areas of recreational significance to hunters can have implications on the future of hunting in these areas. For example, complaints can be made under the Arms Act 1983 which makes clear that anyone discharging a firearm in a public place so as to deliberately endanger, frighten or annoy any other person is guilty of a serious offence. Shotgun noise may also be a particular issue for public places such as any equestrian arena in the vicinity of maimais used during the game bird hunting season. Method 6.1.2 'Reverse sensitivity' of the RPS requires local authorities to have particular regard to the potential for reverse sensitivity when assessing resource consent applications, preparing, reviewing or changing district plans. It states that particular consideration should be given to discouraging new sensitive activities near existing and planned land uses or activities that could be subject to effects including the discharge of noise, which could lower the amenity values of the surrounding area.
Point Number	433.9
Summary of Decision Requested:	Delete Policy 5.6.7 (a)(iii) Earthworks. AND/OR Any alternative relief to address the issues and concerns raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> Assessing changes to natural water flows and established drainage paths is a function of Waikato Regional Council. Therefore, retaining clause (a)(iii) is considered a duplicate function.
Point Number	433.10
Summary of Decision Requested:	Retain Policy 5.6.13 Enabling signage, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Fish and Game has a statutory role to main and enhance access to sports fisheries and game bird hunting areas. Signage is therefore a fundamental aspect of managing game bird shooting and sports fish angling activities and is accepted as a permitted activity throughout much of New Zealand.
Point Number	433.11
Summary of Decision Requested:	Add a new policy in section 5.3 Rural Character and Amenity, as follows: <u>5.3.19 - Public access to wetlands, streams, rivers, lakes and the coast</u> <u>(a) Opportunities for public access to wetlands, streams, rivers, lakes and the coast are supported by:</u> <u>(i) Settlement development and growth providing access to wetlands, streams, rivers, lakes and the coast;</u> <u>(ii) Esplanade reserves or strips providing access to wetlands, streams, rivers, lakes and the coast at subdivision stage;</u> <u>(iii) Public access to and along the margins of wetlands, streams, rivers, lakes with high natural character, and conservation, recreation, amenity, heritage and cultural values are maintained and enhanced.</u> AND/OR Any alternative relief to address the issues and concerns raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The Proposed District Plan needs to support opportunities for public access to and along wetlands, rivers, lakes and the coast.
Point Number	433.12
Summary of Decision Requested:	Retain Policy 8.1.3 Esplanade reserves and walkways, as notified.
Decision Reasons:	<ul style="list-style-type: none"> This policy encourages Council to acquire esplanade reserves or strips around rivers, lakes and wetlands during subdivision to enable the creation of trails and public access.
Point Number	433.13
Summary of Decision Requested:	Retain Objective 8.2.1 Natural values, as notified.
Decision Reasons:	<ul style="list-style-type: none"> This objective supports the maintenance and enhancement of the natural values of public open space, natural reserves and parks.
Point Number	433.14
Summary of Decision Requested:	Retain Policy 8.2.2 Natural values, as notified.
Decision Reasons:	

- This policy supports the enhancement of the natural environment during the use and development of reserves by all three means described.

Point Number 433.15

Summary of Decision Requested: **Add** a definition for "lake" to Chapter 13: Definitions as follows:

Lake means a body of fresh water which is entirely or nearly surrounded by land.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- To avoid doubt, the term 'lake' should be defined as per the Resource Management Act.

Point Number 433.16

Summary of Decision Requested: **Add** a definition for "river" to Chapter 13: Definitions as follows:

River means a continually or intermittently flowing body of fresh water, and includes a stream and modified watercourse, but does not include any artificial watercourse, (including an irrigation canal, water supply race, canal for the supply of water for electricity, power, generation, and farm drainage canal.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- To avoid doubt, the term 'river' needs to be defined as per the Resource Management Act.

Point Number 433.17

Summary of Decision Requested: **Add** a definition for "water" to Chapter 13: Definitions as follows:

Water -

(a) means water in all its physical forms whether flowing or not and whether over or under the ground;

(b) includes fresh water, coastal water, and geothermal water.

(c) does not include water in any form while in any pipe, tank, or cistern.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- To avoid doubt, the term 'water' needs to be defined as per the Resource Management Act.

Point Number 433.18

Summary of Decision Requested: **Add** a definition for "water body" Chapter 13: Definitions as follows:

Water body means fresh water or geothermal water, in a river, lake, stream, pond, wetland, or aquifer, or any part thereof that is not located within the coastal marine area.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- To avoid doubt, the term 'water body' needs to be defined as per the Resource Management Act.

Point Number 433.19

Summary of Decision Requested: **Add** a definition for "maimai" to Chapter 13: Definitions as follows:

Maimai - game bird shooting shelter structures.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- A definition for 'maimai' is required which is consistent with the Building Act 2004. These structures are accepted around much of New Zealand as a permitted activity.

Point Number 433.20

Summary of Decision Requested: **Add** a definition for "biodiversity offsets" to Chapter 13: Definitions as follows:

Biodiversity offsets are measurable conservation outcomes resulting from actions designed to compensate for significant residual adverse biodiversity impacts arising from project development after appropriate prevention and mitigation measures have been taken. The goal of biodiversity offsets is to achieve no net loss and preferably a net gain of biodiversity on the ground.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- A definition of 'biodiversity offsets' is needed to reflect the 'Guidance for Biodiversity Offsetting in New Zealand'.

Point Number 433.21

Summary of Decision Requested: Add a definition for "environmental compensation" to Chapter 13: Definitions as follows:
Environmental compensation comprises actions offered as a means to address residual adverse effects on the environment arising from project development that are not intended to result in no net loss or a net gain of biodiversity on the ground.
AND/OR
Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- A definition for "environmental compensation" is needed to reflect the 'Guidance for Biodiversity Offsetting in New Zealand'.

Point Number 433.22

Summary of Decision Requested: Amend Rule 16.3.9.3 P1 Building setback - Water bodies, as follows:
(a) Any building that is not a maimai must be setback a minimum of:
...
AND/OR
Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Maimai should be exempt from this rule because they are already controlled by the Building Act 2004 and need to be an adequate size to maintain safe shooting zones and not compromise hunter safety.
- There should be the same or similar provisions as the Waikato Regional Plan which permits maimai subject to a maximum area of 10m2 and height of 2.5m measured from floor level.

Point Number 433.23

Summary of Decision Requested: Amend Rule 16.3.9.4 P1 Building setback - Environmental Protection Area, as follows:
A building that is not a maimai must be set back a minimum of 3m from an Environmental Protection Area.
AND/OR
Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Maimai should be exempt from this rule because they are already controlled by the Building Act 2004 and need to be an adequate size to maintain safe shooting zones and not compromise hunter safety.
- There should be the same or similar provisions as the Waikato Regional Plan which permits maimai subject to a maximum area of 10m2 and height of 2.5m measured from floor level.

Point Number 433.24

Summary of Decision Requested: Amend Rule 24.3.6.3 Building setback - Water bodies, as follows:
P1 (a) A building that is not a maimai must be set back a minimum of 30m from:
...
P2 A building that is not a maimai must be setback at least 50m from a bank of the Waikato River and Waipa River.
...
P3 A building that is not a maimai must be set back a minimum of 10m from the bank of a perennial or intermittent stream.
AND/OR
Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Maimai should be exempt from this rule because they are already controlled by the Building Act 2004 and need to be an adequate size to maintain safe shooting zones and not compromise hunter safety.
- There should be the same or similar provisions as the Waikato Regional Plan which permits maimai subject to a maximum area of 10m2 and height of 2.5m measured from floor level.

Point Number 433.25

Summary of Decision Requested: Amend Rule 23.2.6.1 P1 Signs - General, as follows:
A public information sign erected by a government agency and Auckland Waikato Fish and Game Council.
AND/OR
Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Fish and Game erects important public information signs but it is not a recognised government agency.

Point Number 433.26

Summary of Decision Requested: Delete Rule 23.2.6.1 P2 (a) (i) and (vii) Signs - General, relating to a single sign
AND
Delete Rule 23.2.6.1 P2 (a) (viii) Signs-General relating to the Waikato Expressway
AND/OR
Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- These conditions are too restrictive for signs required by Auckland Waikato Fish and Game as there may be occasions when they need to be breached in order to main and enhance access to sports fisheries and game bird hunting areas and maintain public safety.

- Resource consent should not be required in these instances as Fish and Game signs are permitted around much of New Zealand.

Point Number 433.27

Summary of Decision Requested: **Amend** Rule 23.3.3 D1 Buildings and structures in Landscapes and Natural Character Areas, as follows:

(a) Any building or structure that is not a maimai that is located within any:

...

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Supports an appropriate buffer between any development and freshwater.
- Maimai should be exempt from this rule because they need to be located in Landscape and Natural Character Areas for access to game birds.
- Maimai are controlled by the Building Act 2004 and consistency with the Waikato Regional Plan is required which permits maimai subject to them not exceeding an area of 10m2 and a height of 2.5m measured from floor level.

Point Number 433.28

Summary of Decision Requested: **Amend** Rule 23.3.7.5 P1 Building setback - Waterbodies, as follows:

(a) Any building that is not a maimai must be set back a minimum of:

...

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Supports an appropriate buffer between any development freshwater bodies.
- Maimai should be exempt from this rule as they are controlled by the Building Act 2004. Consistency is required with the Waikato Regional Plan which permits maimai subject to them not exceeding an area of 10m2 and a height of 2.5m measured from floor level.

Point Number 433.29

Summary of Decision Requested: **Amend** Rule 23.3.7.6 P1 Building setback - Environmental Protection Area, as follows:

A building that is not a maimai must be set back a minimum of 3m from an Environmental Protection Area.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Supports and appropriate buffer between any development and a Environmental Protection Area.
- Maimai should be exempt from this rule as they are controlled by the Building Act 2004. Consistency is required with the Waikato Regional Plan which permits maimai subject to them not exceeding an area of 10m2 and a height of 2.5m measured from floor level.

Point Number 433.30

Summary of Decision Requested: **Amend** Rule 22.2.1.1 P1 Noise - General, as follows:

Farming noise, and noise generated by recreational hunting, emergency generators and emergency sirens.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Noise from recreational hunting is not recognised and consistency is required across all of the districts in the Waikato Region to eliminate cross boundary issues.

Point Number 433.31

Summary of Decision Requested: **Add** a new clause to Rule 22.2.3.1 P1 (a) Earthworks - General, as follows:

(y) Ecosystem protection, restoration or enhancement (e.g. conservation covenants, works involved with wetland enhancement),

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified rule could severely curtail the size, construction, restoration, maintenance and enhancement of wetlands which would otherwise be permitted under the Waikato Regional Plan.

Point Number 433.32

Summary of Decision Requested: **Retain** Section 1.4.3.1 Rural Activities, except for the amendments sought below

AND

Amend Section 1.4.3.1 (b) Rural Activities as follows:

(b) ... The recreational use of the rural environment is also important to the district, with activities such as hunting, fishing, tramping, and cycling being very important in terms of tourism and for the benefit of residents within the district, including those living in urban areas.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- While rural recreational opportunities are important for tourism (from outside the district), it is also important to provide these same opportunities to the district's residents and particularly given urban population increase.
- The significant recreational and cultural aspect of the district deserves recognition, particularly given the projected increasing footprint of settlement and industry.

Point Number 433.33

Summary of Decision Requested: **Retain** Section 1.4.3.2 (b) Protecting the rural environment as notified.

Decision Reasons:

- Supports the recognition that activities that affect recreational activities need to be managed to avoid adverse effects on the environment. This should occur through limiting the extent that non-rural activities can establish in the Rural Zone.

Point Number 433.34

Summary of Decision Requested: **Amend** Section 1.4.4 (a) The Urban Environment as follows:
(a) A key issue for the district is to maintain the ecological integrity, natural hydrological characteristics and processes, soil stability, landscape, recreational and amenity values and productive capacity of the rural resource ...
 AND/OR
 Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified statement in (a) only recognises the productive capacity of the rural resource and there are other values relevant to urbanisation and population increase. The linkages between the urban and rural environment should be acknowledged.

Point Number 433.35

Summary of Decision Requested: **Add** a new paragraph in section 1.7.1 Settlement as follows:
1.7.1.9 Te Kauwhata Wastewater Consent Agreement
There is an Agreement between Waikato District Council, Waikato-Tainui, Nga Muka Development Trust, Auckland Waikato Fish and Game, the Department of Conservation and River and Catchment Services Group - Waikato Regional Council which relates to the operation of the wastewater treatment at Te Kauwhata, including the discharge of treated wastewater to Lake Waikare. The agreement includes undertakings and obligations by the Waikato District Council.
 AND/OR
 Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- This section should acknowledge the Te Kauwhata Wastewater Consent Agreement 2012 which pertains to the wastewater treatment plant that receives and treats wastewater from Rangiriri, Te Kauwhata township and Springhill Prison and currently discharges the treated wastewater to Lake Waikare.

Point Number 433.36

Summary of Decision Requested: **Retain** Objective 3.1.1 - Biodiversity and ecosystems, as notified.

Decision Reasons:

- This objective ensures the maintenance and enhancement of biodiversity and ecosystems and promotes sustainable management.

Point Number 433.37

Summary of Decision Requested: **Amend** Policy 3.2.4 Biodiversity Offsetting as follows:
(b) Within a Significant Natural Area, a biodiversity offset will only be considered appropriate where adverse effects have been preferentially avoided, then remedied or mitigated in accordance with the hierarchy established in Policy 3.2.3; and
 ...
(c) Where biodiversity cannot be reasonably achieved as to address environmental effects that cannot be avoided, remedied or mitigated, consideration of environmental compensation must be made.
 AND/OR
 Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Supports the inclusion of a policy to address biodiversity offsetting.
- This policy needs to better reflect the management hierarchy in 3.2.2 and environmental compensation should be provided for in cases where it is demonstrated that biodiversity offsetting cannot achieve its no net loss goal.

Point Number 433.38

Summary of Decision Requested: **Amend** Policy 3.2.7 (a)(iv) Managing Significant Natural Areas, as follows:
(iv) maintaining and restoring natural wetland hydrology which in some cases may require artificial raising of water levels due to the adverse effects of drainage.
 AND/OR
 Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Natural wetland hydrology may, in some cases, require artificial raising of water levels due to the adverse effects of drainage.

Point Number 433.39

Summary of Decision Requested: **Delete** Policy 3.2.8 - Incentivise subdivision.

AND

Add new policy 3.2.8 as follows:

3.2.8A Policy - Incentivise Protection of Significant Natural Areas by enabling subdivision in the Rural Zone

(g) Incentivise the legal and physical protection of Significant Natural Areas by enabling appropriate subdivision in the Rural Zone which is consistent with protecting the rural environment and only occurs where the Significant Natural Areas protected are of a suitable size and quality to achieve a functioning ecosystem.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified Policy 3.2.8 focuses incorrectly on incentivising subdivision rather than legal and physical habitat protection. This contradicts issues which the Proposed Plan seeks to address and the guiding principles of Future Proof.

Point Number 433.40

Summary of Decision Requested: **Retain** Policy 3.3.2 Recognising values and qualities, except for the amendment sought below

AND

Amend Policy 3.3.2 (b) Recognising values and qualities, as follows:

(b) Recognise the attributes of the Waikato River delta and wetlands, Whangamarino Wetland and Lake Whangape identified as Outstanding Natural Features, including:

(i) natural geomorphology, ~~and~~ hydrological processes, biodiversity and ecological processes;

(ii) significant habitat values;

(iii) significant indigenous vegetation;

(iv) cultural heritage values associated with these areas;

(v) recreational use of these areas including but not limited to walking, fishing, bird watching, game bird hunting and boating;

(vi) existing pastoral farming activities on the margins of these areas.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Introductory Paragraph 1.4.3.1 Rural activities refers to hunting and fishing as important rural activities. Therefore, for consistency, this policy should include reference to hunting and fishing as recreational attributes in outstanding natural features and landscapes. It should also ensure that regard is given to the intrinsic values of ecosystems by recognising the significant ecological biodiversity and habitat values in order to promote sustainable management.
- Pastoral farming activities are often the cause of adverse effects on these areas including through nutrient enrichment of waterways and affecting natural wetland hydrology.

Point Number 433.41

Summary of Decision Requested: **Retain** Objective 3.5.1 (b) - Natural Character as notified.

Decision Reasons:

- This objective supports Method 12.1.1 of the Waikato Regional Policy Statement which requires district plans to identify and provide for the protection of the values and characteristics of outstanding natural features and landscapes from inappropriate subdivision, use and development.

Point Number 433.42

Summary of Decision Requested: **Retain** Policy 3.5.4 Protecting the natural character of wetlands, and lakes and rivers and their margins, except for the amendments sought below

AND

Amend Policy 3.5.4 (a) (iii) Protecting the natural character of wetlands, and lakes and rivers and their margins as follows:

(iii) encouraging any new activities to consolidate within, and around, existing developments ~~and or where the natural character and landscape values have already been compromised~~, to avoid development sprawling; and

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Whether values have been compromised or not is highly subjective and this proviso should be removed for the policy to be clear, effective and non-contentious.

Point Number 433.43

Summary of Decision Requested: **Add** a new clause to Policy 4.1.11 (a) Pokeno, as follows:

(iv) The effects, including reverse sensitivity effects of development on existing recreational activities including hunting, ecological processes, biological diversity, including avian biodiversity, are had regard to and avoided, remedied or mitigated.

AND

Any further amendments required to give effect to the provisions and reasons stated.

Decision Reasons:

- This policy should recognise the increasing urban expansion, potential effects of development to the south west and the effects on the significant Mangatawhiri Wetland, including its ecological, biodiversity and hunting values.

Point Number 433.44

Summary of Decision Requested: **Retain** Policy 4.1.12 (a)(ii) Te Kauwhata

AND

Add two new clauses to Policy 4.1.12 (a) Policy Te Kauwhata as follows:

(iv) Development is avoided where it cannot demonstrate adequate capacity within the wastewater and stormwater networks, proposed or available to ensure the development does not contribute to additional contaminant loading to Lake Waikare and Whangamarino wetland.

(v) The effects of development on biological diversity, including avian biological diversity, are had regard to and avoided, remedied or mitigated.

AND

Any further amendments to give effect to the provisions and reasons stated.

Decision Reasons:

- Discharges of contaminants contribute to the on-going degradation of water bodies and ecosystems. This does not promote sustainable management or give effect to Objective 3.1.1 and is not consistent with Policy 3.5.4 and the Waikato Regional Policy Statement.
- Lake Waikare and Lake Kopuera are recognised habitats for various indigenous species that include waterfowl, game species and threatened species. The significant biodiversity level of these habitats should be recognised and provided for to be consistent with Policy 3.3.2 and the Waikato Regional Policy Statement.

Point Number 433.45

Summary of Decision Requested: **Amend** Policy 4.1.12 (b)(ii) Te Kauwhata, as follows:

(ii) Manages the balance between creating areas for growth and open space, and retaining an appropriate size and capacity flood plain, ensuring no further reduction of existing flood capacity, and no further drainage to assist flood management within the Waikato River System.

AND

Any further amendments required to give effect to the provisions and reasons stated.

Decision Reasons:

- Development should not be enabled where drainage is required or existing flood storage is reduced. This is necessary to promote sustainable management and give effect to the Waikato Regional Policy Statement.

Point Number 433.46

Summary of Decision Requested: **Add** clause (vii) to Policy 4.1.12 (b) Te Kauwhata, as follows:

(vii) Recognises and provides for existing recreational use of the Lake Waikare and its margins, including gamebird hunting, and manages the balance between these and increased settlement and access for walking and cycling, including avoiding and mitigating reverse sensitivity effects on hunting activities.

AND

Any further amendments required to give effect to the provisions and reasons stated.

Decision Reasons:

- Lake Waikare, including its margins, is a regionally and nationally significant recreational gamebird hunting resources, These values should be recognised in this policy and any reverse sensitivity effects associated with development should be managed.

Point Number 433.47

Summary of Decision Requested: **Add** three new clauses to Objective 5.1.1 The rural environment, as follows:

(iv) natural ecological and hydrological integrity are protected;

(v) existing recreational uses are protected and maintained;

(vi) landscape and amenity values are protected and maintained.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- This objective appears to be incomplete having noted that Objective 5.1.1 is the strategic objective for the rural environment which has primacy over all other objectives in Chapter 5. The linkages between the urban and rural environment should be acknowledged as there are other values relevant to urbanisation and population increase.

Point Number 433.48

Summary of Decision Requested: **Add** a new definition to Chapter 13: Definitions for "urban subdivision, use and development".

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number 433.49

Summary of Decision Requested: **Add** a new definition to Chapter 13: Definitions for "productive rural activities".

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number 433.50

Summary of Decision Requested: **Delete** Rule 22.2.3.1 P2 (a) (v) and (vi) Earthworks - General

AND

Add a new Note to Rule 22.2.3.1 P2 Earthworks - General, as follows:

Note:

- Where earthworks are specifically for small dams and damming water as allowed by Rule 3.6.4.4 of the Waikato Regional Plan then (i) and (ii) do not apply.
- Where earthworks are specifically for the maintenance and enhancement of existing lawfully established damming of perennial water bodies, as allowed by Rule 3.6.4.5 of the Waikato Regional Plan, then (i) and (ii) above do not apply.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified rule could severely curtail the size, construction, restoration, maintenance and enhancement of wetlands which would otherwise be permitted under the Waikato Regional Plan.
- Water flow is controlled by the Waikato Regional Council and is not a Waikato District Council function.

Point Number 433.51

Summary of Decision Requested: Amend Rule 22.2.3.1 RDI (B) Earthworks - General, as follows:

...

(v) location of the earthworks to ~~waterways~~; significant indigenous vegetation and habitat

...

(x) flood risk, ~~including natural water flows and established drainage paths~~;

...

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The assessment matters requested to be deleted are considered by Waikato Regional Council rather than being a function of a district council.

Point Number 433.52

Summary of Decision Requested: Delete Rule 22.2.3.3 P1 (a)(vii) Earthworks - Significant Natural Area

AND

Add new note to Rule 22.2.3.3 Earthworks - Significant Natural Area, as follows:

Note:

- Where earthworks are specifically for ecosystem protection, restoration or enhancement (e.g. conservation covenants, works involved with wetland enhance) then P1, P2 and RDI do not apply.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified rule is too restrictive for most of the maintenance and enhancement activities carried out by Auckland Waikato Fish and Game in wetlands, particularly with the proposal to change most of the wetland areas in Waikato District from Wetland Conservation Area to Significant Natural Area. Earthworks for ecosystem protection, restoration or enhancement need to be exempt from this rule. Furthermore, any change to natural water flows, water bodies or drainage paths is to be considered by Waikato Regional Council and this is not a district council function.

Point Number 433.53

Summary of Decision Requested: Delete Rule 22.2.3.4 P1 (a) (vii) Earthworks - within Landscape and Natural Character Areas

AND

Add new note to Rule 22.2.3.4 Earthworks - within Landscape and Natural Character Areas, as follows:

Note:

- Where earthworks are specifically for ecosystem protection, restoration or enhancement (e.g. conservation covenants, works involved with wetland enhancement) then P1 does not apply.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified rule is restrictive for most of the maintenance and enhancement activities carried out by Auckland Waikato Fish and Game in wetlands which have been identified as Outstanding Natural Features or Significant Amenity Landscapes. Earthworks for ecosystem protection, restoration or enhancement should therefore be exempt. Furthermore, any change to natural water flows, water bodies or drainage paths is a consideration of Waikato Regional Council and is not a function of a district council.

Point Number 433.54

Summary of Decision Requested: Amend Rule 22.2.6.1 P1 Signs - General, as follows:

A public information sign erected by a government agency and Auckland Waikato Fish and Game Council.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Auckland Fish and Game erects public information signs but it is not a recognised government agency.

Point Number 433.55

Summary of Decision Requested:	Delete Rule 22.2.6.1 P2 (a)(i) and (vii) Signs - General. AND/OR Any alternative relief to address the issues and concerns raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> These notified conditions are too restrictive for signs that need to be erected by Auckland Waikato Fish and Game. In some instances, these conditions would need to be breached and resource consent should not be required, particularly when such signs are permitted around much of New Zealand.
Point Number	433.56
Summary of Decision Requested:	Retain Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the list of activities for which rural vegetation clearance inside a Significant Natural Area is permitted.
Point Number	433.57
Summary of Decision Requested:	Retain Rule 22.2.8 Vegetation clearance - outside a Significant Natural Area, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the list of activities for which rural vegetation clearance outside a Significant Natural Area is permitted.
Point Number	433.58
Summary of Decision Requested:	Amend Rule 22.3.3 D1 Buildings and structures in Landscape and Natural Character Areas, as follows: (a) Building or structure <u>that is not a maimai</u> located within any: ... AND/OR Any alternative relief to address the issues and concerns raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> Supports building restrictions in areas of high natural character. Maimai are controlled by the Building Act 2004 and should be exempt from this rule. Consistency is required with the Waikato Regional Plan which permits maimai subject to them not exceeding an area of 10m2 and a height of 2.5 metres measured from floor level.
Point Number	433.59
Summary of Decision Requested:	Amend Rule 22.3.7.5 P1 Building setback - water bodies, as follows: (a) Any building <u>that is not a maimai</u> must be set back a minimum of: ... AND/OR Any alternative relief to address the issues and concerns raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> Supports an appropriate buffer between any development and freshwater bodies. Maimai are controlled by the Building Act 2004 and should be exempt from this rule. Consistency is required with the Waikato Regional Plan which permits maimai subject to them not exceeding an area of 10m2 and a height of 2.5 metres measured from floor level.
Point Number	433.60
Summary of Decision Requested:	Amend Rule 22.2.7.6 P1 Building setback - Environmental Protection Area, as follows: Any building <u>that is not a maimai</u> must be set back a minimum of 3m from an Environmental Protection Area identified on the planning maps. AND/OR Any alternative relief to address the issues and concerns raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> Supports building setbacks from Environmental Protection Areas to ensure the ecological health and functioning of these areas are protected. Maimai are controlled by the Building Act 2004 and should be exempt from this rule. Consistency is required with the Waikato Regional Plan which permits maimai subject to them not exceeding an area of 10m2 and a height of 2.5 metres measured from floor level.
Point Number	433.61
Summary of Decision Requested:	Add two new subdivision rules in Rule 22.4.1.6 that provides for Environmental Benefits Lots, as follows: <u>Discretionary activity</u> <u>An environmental benefit lot subdivision is a discretionary activity if the following conditions are met:</u> <u>1. The site to be subdivided offers the opportunity to achieve at least one of the following:</u> a) <u>Restoration or enhancement of an identified under-represented ecosystem; or</u> b) <u>Restoration of indigenous biodiversity; or</u> c) <u>Enhancement of indigenous biodiversity; or</u> d) <u>Creation of a buffer to an under-represented or threatened indigenous ecosystem[s]; or</u> e) <u>Creation of an ecological stepping stone or corridor to link indigenous ecosystems; or</u>

- f) Restoration or enhancement of a wetland or dune habitat; or*
- g) Legal protection and restoration or enhancement of a modified or degraded area of natural character.*
- 2. The area to be set aside for restoration or enhancement and protection is at least the equivalent to the total area of new lots created; and*
- 3. The minimum area of new lot created is 5000m²; and*
- 4. The application is accompanied by a report prepared by a suitably qualified professional that:*
- a) Identifies the area/feature to be created, restored or enhanced and protected; and*
- b) Confirms that the area/feature, or part of it, (where it forms part of a larger natural area) that has been identified for protection and restoration or enhancement will provide the greatest biodiversity gains or outcomes for the protection of natural character for the site; and*
- c) Includes a management plan specifying the steps to be taken to create, restore or enhance the area/feature and its ongoing management and monitoring requirements to ensure that the biodiversity gains are maintained;*
- d) Specifies how the area/feature will be legally protected in perpetuity; and*
- 5. The new lots created are not dependent upon public water and wastewater infrastructure.*
- 6. No more than four environmental benefit lots are created per lot.*

Non-complying activity

Any activity that does not meet a condition for a discretionary activity is a non-complying activity.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The conservation lot provision has had variable success in producing environmental gains and the notified rule limits the possible biodiversity gains.
- The aim of the new rule is to recreate and restore or enhance areas of natural character or indigenous biodiversity that might not yet be identified as significant but have the potential to be in the future.

Point Number 433.62

Summary of Decision Requested: **Amend** Rule 22.4.7 Esplanade reserves and esplanade strips, as follows:

~~RD 1 PL (a)~~ An esplanade reserve or strip 20m wide (or such other width stated in Appendix 4 (Esplanade Priority Areas) ~~is required to shall~~ be created and vested in Council from every subdivision where the land being subdivided is:

...

AND

Delete Rule 22.4.7 RD1 (b) Esplanade reserves and esplanade stripes

AND

Amend Rule 22.4.7 D1 Esplanade reserves and strips as follows:

~~RD 1 RD 1~~ Subdivision that does not comply with Rule 22.4.7 RD1 PL

Council's discretion is restricted to the following matters:

(i) the type of esplanade, provided reserve or strip;

(ii) width of the esplanade reserve or strip;

(iii) provision of legal access to the esplanade reserve or strip;

(iv) matters provided for in an instrument creating an esplanade strip or access strip;

(v) works required prior to vesting any reserve in the Council, including pest plant control, boundary fencing and the removal of structures and debris

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- The notified rule is too restrictive as a means of creating esplanade strips.
- The Waikato Regional Policy Statement requires local authorities to enhance public access to and along the coastal marine area, wetlands, and lake and rivers and their margins and the rule should allow for esplanade reserves and esplanade strips to be created as a permitted activity.
- The council should make the most of every opportunity to increase the coverage of esplanade strips along Waterbodies.

Point Number 433.63

Summary of Decision Requested: **Amend** Appendix 6: Biodiversity Offsetting, as follows:

The following sets out a framework for the use of biodiversity offsets. It should be read in conjunction with the New Zealand government Guidance on Good Practice Biodiversity Offsetting in New Zealand, New Zealand Government et al; August 2014 (or any successor document).

...

2. A proposed biodiversity offset will contain ~~an~~ quantitative assessment of losses and gains commensurate with the scale of effects of the activity, and should demonstrate the manner in which no net loss can be achieved.

AND/OR

Any alternative relief to address the issues and concerns raised in the submission.

Decision Reasons:

- Generally supports Appendix 6.
- Appendix 6 should better reflect the document 'Guidance on Biodiversity Offsetting' as set out in this website link: <https://www.doc.govt.nz/about-us/our-policies-and-plans/guidance-on-biodiversity-offsetting/>

Point Number 433.64

Summary of Decision Requested: **Amend** the Proposed District Plan to provide for earthworks as permitted for ecosystem protection, restoration and enhancement.

Decision Reasons:

- The proposed rule framework dictates that any time an entity such as AWFG or individual wishes to put a small bund or dam in place as part of a wetland restoration project, or to mitigate loss of contaminants from a rural land use, even where this falls under the permitted activity rules of the Waikato Regional Plan, a Waikato District Council Restricted discretionary consent would be required as Permitted Activity Rule 22.2.3.1 P2 (vi) would not be complied with.

Point Number 433.65

Summary of Decision Requested: **Amend** the Proposed District Plan to provide that where earthworks are specifically for small dams and damming water and the maintenance and enhancement of existing lawfully established damming of perennial water bodies, as allowed by rules 3.6.4.4 and 3.6.4.5 of the Waikato Regional Plan, then restrictions as to volume, area and depth do not apply.

Decision Reasons:

- In regards to Rule 22.2.3.1 P2 (vi), the submitter considers that Waikato District Council does not have authority to control water flow via rules relating to the taking, use, damming and diverting of water in the District Plan, and that it is in fact a matter reserved to the Regional Council.
- Similarly, the areas of discretion for Rule 22.2.3.1 RD1 (v) location of earthworks to waterways is more appropriately managed as a Regional Council function, with the Council's discretion under the District Plan rule constrained to the maintenance of significant indigenous vegetation and habitat.
- Section 30 (c) of the RMA provides that Regional Councils have control of the use of land for the purpose of soil conservation (including large earthworks), the maintenance and enhancement of the quality of water in water bodies, the maintenance of the quantity of water in water bodies, and the maintenance and enhancement of ecosystems in water bodies. This is recognised in the RPS in method 8.3.2 and 14.1.1.
- Regional councils also control of the taking, use, damming and diversion of water, the control of the quantity, level or inflow of water in any water body, and the discharges of contaminants into or on to land, air or water and discharges of water into water. While section 31 provides territorial authorities with the control of effects of the use, development, or protection of land for the purpose of the maintenance of indigenous biodiversity and the control of any effects of activity in relation to the surface of water in rivers and lakes, these functions are significantly more constrained and should not impose standards above and beyond those required to conform to permitted activities under the relevant regional plan.

Point Number 433.66

Summary of Decision Requested: **Amend** the rules that duplicated a regional planning function such as to do with waterways, natural water flows and established drainage paths.

Decision Reasons:

- In regards to Rule 22.2.3.1 P2 (vi), the submitter considers that Waikato District Council does not have authority to control water flow via rules relating to the taking, use, damming and diverting of water in the District Plan, and that it is in fact a matter reserved to the Regional Council.
- Similarly, the areas of discretion for Rule 22.2.3.1 RD1 (v) location of earthworks to waterways is more appropriately managed as a Regional Council function, with the Council's discretion under the District Plan rule constrained to the maintenance of significant indigenous vegetation and habitat.
- Section 30 (c) of the RMA provides that Regional Councils have control of the use of land for the purpose of soil conservation (including large earthworks), the maintenance and enhancement of the quality of water in water bodies, the maintenance of the quantity of water in water bodies, and the maintenance and enhancement of ecosystems in water bodies. This is recognised in the RPS in method 8.3.2 and 14.1.1.
- Regional councils also control of the taking, use, damming and diversion of water, the control of the quantity, level or inflow of water in any water body, and the discharges of contaminants into or on to land, air or water and discharges of water into water. While section 31 provides territorial authorities with the control of effects of the use, development, or protection of land for the purpose of the maintenance of indigenous biodiversity and the control of any effects of activity in relation to the surface of water in rivers and lakes, these functions are significantly more constrained and should not impose standards above and beyond those required to conform to permitted activities under the relevant regional plan.

Point Number 433.67

Summary of Decision Requested: **Add** to the Proposed District Plan provisions that constrain housing and industrial developments near areas with recreational hunting values.

Decision Reasons:

- Existing game bird hunting activities are often constrained by surrounding land use, and generally becomes untenable when this land use changes; for example, when urban and lifestyle encroachment occurs near traditionally hunted sites.
- Recreational game bird hunting is a very popular activity in the rural environment.
- Game bird season involves the discharge of shotgun noise. This is not like other constant noises rather it is very brief in duration. Game bird hunting beings at 6:30am in the morning and concludes at 6:30pm at night for the length of the season.
- Introducing new dwelling areas near areas of recreational significance to hunters can have implications on the future of hunting in these areas, e.g. complaints can be made under the Arms Act 1983.

Point Number 433.68

Summary of Decision Requested: **Add** provisions to the Proposed District Plan that provide for the associated discharge of noise of firearms for all informal and legitimate purposes, such as recreational hunting, pest control and sigh adjustment, as permitted activities.

Decision Reasons:

- Recreational game bird hunting is a very popular activity in the rural environment.
- Game bird season involves the discharge of shotgun noise. This is not like other constant noises rather it is very brief in duration. Game bird hunting beings at 6:30am in the morning and concludes at 6:30pm at night for the length of the season.
- Method 6.1.2 'Reverse sensitivity' of the RPS requires local authorities to have particular regard to the potential for reverse sensitivity when assessing resource consent applications, preparing, reviewing or changing district plans. It also states particular consideration should be given to discouraging sensitive activities near existing and planned land uses or activities that could be subject to effects including the discharge of noise, which could lower amenity values of the surrounding area.

Point Number 433.69

Summary of Decision Requested: **Add** provisions to the Proposed District Plan that provide for recreational hunting as a permitted activity in the Rural Zone.

Decision Reasons:

- Recreational game bird hunting is a very popular activity in the rural environment.
- Rule 22.2.1.1 'noise' in the Rural Zone does not recognise noise from recreational hunting as a permitted activity. This is despite both the Waipa District Plan and South Waikato District Plan allowing for hunting as a permitted activity in the Rural Zone. The same provision should be included in the Proposed Plan to appropriately address the issue of reverse sensitivity for hunting activities and ensure a consistent approach across all of the districts in the Waikato Region and eliminate cross boundary issues.

Point Number 433.70

Summary of Decision Requested: **Amend** the Proposed District Plan to give specific reference is given to recreational hunting, especially in relation to subdivisions and new growth, where reverse sensitivity issues are discussed.

Decision Reasons:

- In the introduction of the Proposed Plan under 1.4.3.1 'Rural activities', the recreational use of the rural environment is recognised as important and includes such activities as hunting being important in terms of tourism, which the submitter strongly supports. However, Policy 5.3.7 'Reverse sensitivity effects' of the Proposed Plan does not recognise recreational hunting as a feature typical of the rural environment and it's effects being accepted and able to be managed.
- Further, Rule 22.2.1.1 'noise' in the rural zone does not recognise noise from recreational hunting as a permitted activity. This is despite both the Waipa District Plan and South Waikato District Plan allowing for hunting as a permitted activity in the Rural Zone. The same provision should be included in the Proposed Plan to appropriately address the issue of reverse sensitivity for hunting activities and ensure a consistent approach across all of the districts in the Waikato Region and eliminate cross boundary issues.

Point Number 433.71

Summary of Decision Requested: Add new policies to the Proposed District Plan that ensure that it maintains and enhances public access to and long wetlands, streams, lakes and rivers.

Decision Reasons:

- The recreational values of waterbodies can be constrained by limited public access; therefore, it is important to provide such access. Rivers and streams in the Waikato District support significant and well used trout fisheries, and many wetlands support game bird hunting, but outside of urban areas there is relatively little legal public access to and along waterbodies. While unformed legal roads do provide some access to rivers, they often wander over farmland and it is not obvious where they lie. Once at the river, there are few esplanade reserves and strips, marginal strips, recreation and road reserves and so most riverbanks are in private ownership, potentially with ad medium filium rights.
- Public access to lakes, rivers and public spaces can be fragmented by the subdivision process if not carefully managed.

Point Number 433.72

Summary of Decision Requested: Add provisions to provide for the creation and protection of esplanade reserves and strips as a permitted activity.

Decision Reasons:

- The recreation of esplanade reserves for example can provide for the protection of conservation values of riparian margins, maintenance of water quality and aquatic habitats and the enhancement of public access and recreational opportunities, including sports fish angling and game bird hunting.
- Section 6(d) of the RMA recognises that the maintenance and enhancement of public access to and along the coastal marine area, lakes and rivers is a matter of national importance. There are also several provisions in the RPS that place an obligation on the Council to recognise the importance of public access to and along riparian margins, and to provide for it, including through the creation of esplanade reserves and strips. These provisions include:
 - Method 8.3.10 which requires territorial authorities to manage the effects of subdivision, use and development including through district plans by considering providing for the creation and protection of esplanade reserves and/or strips and riparian habitat, including appropriately vegetated riparian margins where this will have a positive effect on a fresh water body and it's ecological, amenity and recreational values.
 - Method 11.1.1 which requires that district plans to maintain or enhance indigenous biodiversity, including by (a) creating buffers, linkages, and corridors to protect and support indigenous biodiversity values, including esplanade reserves and esplanade strips to maintain and enhance indigenous biodiversity values.
 - Policy 12.4 which requires that public access to and along lakes, and rivers to be maintained and enhanced by ensuring subdivision, use and development do not result in inappropriate loss of existing public access.
 - Method 12.4.1 which requires district plans to provide for the enhancement of public access to and along wetlands, and lakes and rivers and their margins by:
 - a. identifying areas where it is appropriate; or
 - b. establishing criteria to enable assessment through resource consent processes of when it would be appropriate; and c. including provisions to ensure it occurs in appropriate circumstances and locations.

Point Number 433.73

Summary of Decision Requested: Amend the Proposed District Plan by including similar or the same provisions for maimai as under the Waikato Regional Plan.

Decision Reasons:

- The right to build, tag and use maimai is a fundamental part of duck shooting in New Zealand and managing this activity is a core function of the submitter.
- The maximum floor size for maimai (10m²) is already controlled by the Building Act 2004 under s41(1)b and Schedule 1(3). It is further provided for in the Waikato Regional Plan under Rule 4.2.7 which states that maimai are a permitted activity subject to the floor area not exceeding 10 square metres and the overall height not exceeding 2.5 metres from the floor height.
- Maimai need to be of adequate size to maintain safe shooting zones and not to compromise hunter safety.

Point Number 433.74

Summary of Decision Requested: Add provisions to the Proposed District Plan that provide for building of maimai on wetlands or near a lake or river as a permitted activity.

Decision Reasons:

- The submitter enforces the relevant legislation that regulates maimai use in the field (Wildlife Act, 1953, Wildlife Regulations 1955).
- A wide range of structures are used as maimai, including permanent and temporary structures. Such structures are accepted around much of New Zealand as a permitted activity.
- The maximum floor size for maimai (10m²) is already controlled by the Building Act 2004 under s41(1)b and Schedule 1(3). It is further provided for in the Waikato Regional Plan under Rule 4.2.7 which states that maimai are a permitted activity subject to the floor area not exceeding 10 square metres and the overall height not exceeding 2.5 metres from the floor height.

Point Number 433.75

Summary of Decision Requested: Amend the Proposed District Plan to allow for all signs erected by the submitter to be a permitted activity, notwithstanding that they may not be located on the site angling/hunting activity to which the sign relates is occurring.

Decision Reasons:

- The submitter erects interpretative signage at access points to sports fisheries and game bird hunting areas.

- The construction, maintenance, use and removal of these signs is a fundamental aspect of managing game bird shooting and sports fish angling activities in New Zealand and are important functions of the submitter. Such signs are accepted around much of New Zealand as a permitted activity.
- The submitter's signs typically have brief information about legal access points, licence requirements, applicable hunting/angling regulations (i.e. local restrictions like "fly fishing only"), and /or the need for licence holders to take precautions against the spread of aquatic pests.
- In some court proceedings involving illegal fishing and similar offending, the presence of adequate signage has been pivotal, in pre-warning the person charged that they were committing an offence.
- The submitter's signs would be covered by the definition of 'advertising sign' and therefore subject to the conditions set out in several rules throughout the plan including in the Rural Zone. However, there are some instances in which the submitter may need to breach these rules, for example in the case of in the Rural Zone, by erecting more than one sign on a site, on a road reserve or within 50m of an expressway. The submitter should not have to apply for a resource consent to do this.

Point Number 433.76

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure that development occurs away from areas valued for their amenity characteristics which are important for culture and recreation.

Decision Reasons:

- The submitter supports separation of urban areas by defined and open space and effective rural zoning, and encouraging a more compact urban footprint through limiting rural lifestyle development. However, settlement patterns should be tightly restricted in undeveloped rural areas or in areas with high landscape and/or natural character values such as near wetlands and lakes.
- Elements of the experience sought by recreational hunters and anglers in the Waikato District include the wilderness experience, the opportunity to engage in the sports, and the opportunity to obtain fish and game birds for food or enjoyment in a natural/non-built environment, all with minimal restriction. This is a significant recreational and cultural aspect of the district which deserves recognition, particularly given the projected increasing footprint of settlement and industry. It constitutes an essential public amenity for an increasingly urbanised population. These are values that should be recognised in the District Plan.

Point Number 433.77

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure that recreational game bird hunting and recreational freshwater fishing are included as permitted activities in all rural areas.

Decision Reasons:

- The submitter supports separation of urban areas by defined and open space and effective rural zoning, and encouraging a more compact urban footprint through limiting rural lifestyle development. However, settlement patterns should be tightly restricted in undeveloped rural areas or in areas with high landscape and/or natural character values such as near wetlands and lakes.
- A proliferation of rural 'lifestyle' blocks in the Waikato region will allow future landowners to object to hunting activities; for example, by complaining under s48 of the Arms Act regarding the discharge of a firearm in or near a dwelling, house or public place to "annoy or frighten any persons".
- Land owners restricting the activities of game bird hunters on public reserves has been an issue in the Waikato Region. In some instances, this has led to the cessation of this activity.

Point Number 433.78

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure development is directed away from known hazard areas (i.e. flooding hazards).

Decision Reasons:

- The Future Proof Strategy Update requires that any growth expansion be consistent with the General Principles of the strategy which include:
 - *Diverse and Vibrant Metropolitan Centre linked to Thriving Town and Rural Communities and Place of Choice – Live, Work, Play, Invest and Visit;*
 - Sustainable Resource Use;
 - Protection of Natural Environments, Landscapes and Heritage and Healthy Waikato River as Heart of Region's Identity;
 - *Ensure development is directed away from potential and known hazard areas as well as areas suited to energy generation and transmission, and important mineral resources (including sand and aggregate) and access routes to these resources.*
 - *Ensure that planning for the future use of water maintains or improves water quality and promotes efficient use.*

Point Number 433.79

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure existing ponding zones are implemented and there is no further drainage to support growth of settlement areas.

Decision Reasons:

- Growth of settlement into as-yet undeveloped land is a threat in terms of potential effects on sensitive ecosystems, particularly wetlands, and fauna (particularly avifauna). The following issues are of significance to the submitter:
 - Runoff of heavy metals and other contaminants from hard surfaces into waterbodies;
 - Drainage of wetland and bog areas for protection of increased settlement;
 - Increased predation of avifauna from pets and pests associated with human population.

Point Number 433.80

Summary of Decision Requested: **Amend** the Proposed District Plan to encourage and prioritise Water Sensitive Design Principles (as used in the Auckland Unitary Plan) for new developments to reduce the creation of runoff and the sources of contaminants.

Decision Reasons:

- Growth of settlement into as-yet undeveloped land is a threat in terms of potential effects on sensitive ecosystems, particularly wetlands, and fauna (particularly avifauna). The following issues are of significance to the submitter:
 - Runoff of heavy metals and other contaminants from hard surfaces into water bodies;
 - Drainage of wetland and bog areas for protection of increased settlement;
 - Increased predation of avifauna from pets and pests associated with human population.

Point Number 433.81

Summary of Decision Requested: **Amend** the Proposed District Plan to acknowledge the effects of settlement expansion on avifauna and sustainably manage such effects.

Decision Reasons:

- Growth of settlement into as-yet undeveloped land is a threat in terms of potential effects on sensitive ecosystems, particularly wetlands, and fauna (particularly avifauna). The following issues are of significance to the submitter:
- Runoff of heavy metals and other contaminants from hard surfaces into water bodies;
- Drainage of wetland and bog areas for protection of increased settlement;
- Increased predation of avifauna from pets and pests associated with human population.

Submitter Number:

Madsen Lawrie Consultants Ltd

Point Number

434.1

Summary of Decision Requested:

Amend Rule 22.4.1 Subdivision so that the issue date regarding a Record of Title is changed to the operative date of the Proposed Plan for all titles, especially for Franklin titles.

Decision Reasons:

- The Proposed District Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously, so they should not be penalised by the implementation of the date restriction.
- The date restriction is only relevant to the Waikato section of the current District Plan.
- The submitter currently has a title much older than 6 December 1997 and wishes to make an application in the future for subdivision. Part of the submitter's land is in the process of purchase under the Public Works Act 1981 for the relocation of State Highway 2. This transaction will generate a title date newer than 6 December 1997 and therefore preclude a potential subdivision proceeding as a Restricted Discretionary Activity. The submitter has no control over this procedure and therefore should not be penalised for a subdivision creating a date newer than the cutoff date.

Point Number

434.2

Summary of Decision Requested:

Amend Rule 22.4.1.1 PR3 (c) Prohibited subdivision to include any title where the title date is newer than 6 December 1997 as a result of land required under the Public Works Act 1981 or the Local Government 1974.

Decision Reasons:

- The submitter currently has a title much older than 6 December 1997 and wishes to make an application in the future for subdivision. Part of the submitter's land is in the process of purchase under the Public Works Act 1981 for the relocation of State Highway 2. This transaction will generate a title date newer than 6 December 1997 and therefore preclude a potential subdivision proceeding as a Restricted Discretionary Activity. The submitter has no control over this procedure and therefore should not be penalised for a subdivision creating a date newer than the cutoff date.

Point Number

434.3

Summary of Decision Requested:

Amend Rule 22.4.1 Subdivision so that exceptions to this rule are noted (such as those classified as Prohibited Subdivision) as it currently in the Operative District Plan.

Decision Reasons:

- Specification of exceptions will ease interpretation and understanding of the rule.

Submitter Number:

435

Submitter:

Jade Hyslop

Point Number

435.1

Summary of Decision Requested:

Amend Section 2.10 (a) Tangata Whenua Iwi Management Plans to so that the use of Iwi/Hapu management plans must be adhered to (not merely considered) by working in partnership with iwi representatives/planners.

Decision Reasons:

- Iwi Management Plans should have equal status to the District Plan.
- District Council Planners should sit down with Iwi Authority/Planners for directive on how to use and understand Iwi Management Plans.

Point Number

435.2

Summary of Decision Requested:

Retain Strategic Objective 2.11 Tautoko te Whakaturanga.

Decision Reasons:

- No reasons provided.

Point Number

435.3

Summary of Decision Requested:

Retain Objective 2.12 Whakapapa (connection to nature).

Decision Reasons:

- No reasons provided.

Point Number

435.4

Summary of Decision Requested:

Add total limits to the earthworks rules in all zones that prescribe time limits (e.g. within a 12 month period) consistent with maintaining the values of the site.

Decision Reasons:

- Incremental annual changes can amount to significant destruction of areas which should be protected.

Point Number 435.5

Summary of Decision Requested: Undertake a survey of notable trees
AND

Amend Schedule 30.2- Notable trees to include the following trees to the Raglan list:

- Trees within 30m of the high water mark between Bow St Jetty and Helen Place.
- Trees adjacent to the airfield.
- Trees within 10m of Marine Parade.
- Trees between recreation ground and Lily Street.
- Trees on Wallis Street at foot of Government Road.
- Trees in the gully between Rose Street and Lily Street.
- Trees to the south west of SH23 between Hills Road and Greenslade Road.
- Trees in the Lorenzen Bay Reserve.
- Large trees should all be protected.

Decision Reasons:

- Schedule 30.2 does not cover every notable tree as there are only 160 listings for the whole district.
- Tree protection is clearly inadequate.
- Trees are important for landscape, nature and carbon storage.

Point Number 435.6

Summary of Decision Requested: **Add** rules to Chapter 22 Rural Zone, to provide for protection of defined views from public places to the harbour, coast and natural backdrops which include at least the following defined views:

- (a) From SH23, (north of Maungatawhiri Road) to Kaitoke Creek.
- (b) All existing views of the bar from Main Road, Bow Street and Norrie Avenue.
- (c) All existing views of Karioi from Raglan CBD.
- (d) From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp.
- (e) From SH23 summit to Karioi.
- (f) AroAro salt marsh, from Wallis Street.

AND

Amend the Planning maps for any consequential relief to give effect to this submission.

Decision Reasons:

- Rules in each zone chapter are needed to apply Outstanding Natural Features and Landscapes Objective 3.3.3a.) and in Raglan to apply Business and Business Town Centre Zone Policy 4.5.14a.)iii.)- Raglan Town Centre.
- Views are an inherent part of retaining Raglan's seaside character.
- Raglan's community plan, 'Raglan Naturally,' contains 6 references to views.
- RMA s5 states purpose of RMA which includes reference to social, economic and cultural wellbeings, of which Raglan Naturally sets out that the Raglan community clearly expressed such wellbeings include protection of views.
- At the last plan revision, Council accepted views were important but change needed to occur via a variation which has not happened and thus needs to be a part of the plan.
- Excluding an important part of Raglan Naturally is to deny the value of public participation.
- Plan protects views of navigation beacons.
- Other authorities' district plans show protection of other views is possible, e.g. Auckland and Hastings.

Point Number 435.7

Summary of Decision Requested: **Add** rules to Chapter 16 Residential Zone, to provide for protection of defined views from public places to harbour, coast and natural backdrops which include at least the following defined views:

- (a) From SH23, (north of Maungatawhiri Road) to Kaitoke Creek.
- (b) All existing views of the bar from Main Road, Bow Street and Norrie Avenue.
- (c) All existing views of Karioi from Raglan CBD.
- (d) From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp.
- (e) From SH23 summit to Karioi.
- (f) AroAro salt marsh, from Wallis Street.

AND

Amend the Planning maps for any consequential relief to give effect to this submission point.

Decision Reasons:

- Rules in each zone chapter are needed to apply Outstanding Natural Features and Landscapes Objective 3.3.3a.) And in Raglan to apply Business and Business Town Centre Zone Policy 4.5.14a.)iii.)- Raglan Town Centre.
- Views are an inherent part of retaining Raglan's seaside character.
- Raglan's community plan, 'Raglan Naturally,' contains 6 references to views.
- RMA s5 states purpose of RMA which includes reference to social, economic and cultural wellbeings, of which Raglan Naturally sets out that the Raglan community clearly expressed such wellbeings include protection of views.
- At the last plan revision, Council accepted views were important but change needed to occur via a variation which has not happened and thus needs to be a part of the plan.
- Excluding an important part of Raglan Naturally is to deny the value of public participation.
- Plan protects views of navigation beacons.
- Other authorities' district plans show protection of other views is possible, e.g. Auckland and Hastings

Point Number 435.8

Summary of Decision Requested: **Add** rules to Chapter 18 Business Town Centre, to provide for protection of defined views from public places to harbour, coast and natural backdrops which include at least the following defined views:

- (a) From SH23, (north of Maungatawhiri Road) to Kaitoke Creek.
- (b) All existing views of the bar from Main Road, Bow Street and Norrie Avenue.
- (c) All existing views of Karioi from Raglan CBD.
- (d) From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp.

(e) From SH23 summit to Karioi.

(f) Aroaro salt marsh from Wallis Street.

AND

Amend the Planning maps for any consequential relief required to give effect to this submission point.

Decision Reasons:

- Rules in each zone chapter are needed to apply Outstanding Natural Features and Landscapes Objective 3.3.3a.) And in Raglan to apply Business and Business Town Centre Zone Policy 4.5.14a.iii.)- Raglan Town Centre.
- Views are an inherent part of retaining Raglan's seaside character.
- Raglan's community plan, 'Raglan Naturally,' contains 6 references to views.
- RMA s5 states purpose of RMA which includes reference to social, economic and cultural wellbeings, of which Raglan Naturally sets out that the Raglan community clearly expressed such wellbeings include protection of views.
- At the last plan revision, Council accepted views were important but change needed to occur via a variation which has not happened and thus needs to be a part of the plan.
- Excluding an important part of Raglan Naturally is to deny the value of public participation.
- Plan protects views of navigation beacons.
- Other authorities' district plans show protection of other views is possible, e.g. Auckland and Hastings

Point Number

435.9

Summary of Decision Requested:

Add new rules in each zone such as follows:

Construction of a building or other structure and planting of trees and other vegetation is a permitted activity if:

(a) It can be shown that it will not significantly block views of sea, river, bush or hills from neighbouring properties, or

(b) Neighbouring property owners confirm in writing that any loss of view does not concern them, or

(c) It can be shown that the planted vegetation is of native plants and likely to contribute to reduction of river, or coastal erosion, or

(d) It can be shown that the planting would improve views from public places.

Any activity that does not comply with a condition for a permitted activity is a discretionary activity.

Decision Reasons:

- Sea and other views add many thousands of dollars to the value of properties.
- Protection of existing ratepayers property rights should take precedence over new rights of developers.
- Developers should need to get written agreement from neighbors that development doesn't concern them in regards to lost views, unless it consists of native planting to protect land from erosion, hides unsightly development or it is apparent views will not be affected significantly.
- No requirement in the RMA to protect views, there are no provisions against either.
- Only 4.7.2 requires 'view sharing,' however only applies to developments needing resource consent of which a great bulk will not.

Point Number

435.10

Summary of Decision Requested:

Add the following to the Planning maps:

- The planned Wainui Road to Te Hutewai Road walk/cycle track;
- All the tracks shown on the strategy maps and walkways through the Residential zones linking Lorenzen Bay with Kaitoke Walkway, allowing a circular walk around Raglan;
- A cycle track from Wallis Street to Violet Street;
- A link to the national Te Araroa walkway using paper roads etc. (Karioi, Bridal Veil);
- Walkways (where possible also cycle ways) along the whole coast;
- A track from Raglan to the summit of Karioi using esplanades, reserves and unformed roads; and
- A link along Wainui Stream from Wainui Reserve to Bryant Reserve.

Decision Reasons:

- Without support from District Plan is unlikely most of strategy will be achieved.
- 4.1.10 Policy- Tuakau, 4.1.11 Policy- Pokeno, 4.1.12 Policy- Te Kauwhata, 4.1.14 Policy- Taupiri, 4.1.15 Policy- Ngaruawahia, 4.1.16 Policy- Horotiu and 4.1.17 Policy- Te Kowhai all mention walking and cycling provision, however means and locations is unclear.
- Last plan revision, Council stated detailed rules for walk/cycle ways are not appropriate for a District Plan, yet have 35 pages the detail in 14.12 about vehicle turning circles, road widths etc. versus just a rule about bus space capacities and new buildings should have cycle parking.
- Page 42 Raglan Naturally states 'There is strong public support for harbor and coastal walkways' and 'Create coastal walkways.'
- Encouraging tourists to spend more time walking versus driving, could be made a much more valuable asset giving economic, health and recreation impetus to implement policies in recognition of the importance of walking and cycling.
- Lack of progress indicates opportunities are not taken with subdivisions and more detail needs to be included in the District Plan.

Point Number

435.11

Summary of Decision Requested:

Retain wastewater disposal that complies with AS/NZS 1547:2012 in Rule 14.11.1.3 Permitted Activities.

Decision Reasons:

- AS/NZS 1547:2012 covers the whole range of options which may be appropriate, including Waterless composting toilets, covered in related AS/NZS 1546.2:2008.
- Supports investigation of such systems to minimize water consumption and sewage volumes, thus making it easier to treat sewage as a valuable resource.

Point Number

435.12

Summary of Decision Requested:

Amend Rule 16.5.8.7 PI (a) Building setbacks - All boundaries, to provide for variable setbacks to suit the character of each road

OR

Amend Rule 16.5.8.7 PI (a) Building setbacks - All boundaries, to have a minimum 6m setback from the road boundary for all developments in the Residential Zone.

Decision Reasons:

- There are locations where there is no need for any setback, but it is not clear that any generic rule can be set to identify them.
- A 6m setback will generally retain village character of Raglan and protect many views.
- Submitter doesn't understand why WDC hasn't taken up the Environment Court's suggestion to undertake a more detailed assessment and there is nothing in s32 documents to explain that failure.
- s32--12--residential-zone-setbacks report lists assertions that 6m setback is odd, doesn't work and is generally not practical due to topography.
- The setback should reflect character of roads within Raglan, protect Raglan views and retain Raglan's existing character.

Point Number

435.13

Summary of Decision Requested: Amend Home stay provisions in Rule 16.1.2 Permitted Activities, to provide for registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan requires a plan similar to Queenstown to avoid more residential accommodation becoming available to only visitors.
- Since residents tend to move to and from surrounding country areas, the same policy needs to apply there.

Point Number 435.14

Summary of Decision Requested: Amend Home stay provisions in Rule 22.1.2 Permitted Activities, to provide for registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to Queenstown to avoid more residential accommodation becoming available only to visitors.
- Residents tend to move to and from surrounding country areas, the same policy needs to apply there also.

Point Number 435.15

Summary of Decision Requested: Amend Home stay provisions in Rule 23.1.1 Permitted Activities, to provide for registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to Queenstown to avoid more residential accommodation becoming available only to visitors.
- Residents tend to move to and from surrounding country areas, the same policy needs to apply there also.

Point Number 435.16

Summary of Decision Requested: Add a requirement (not discretionary) Rule 16.5.8.6 Living Court, to avoid balconies and windows that compromise privacy of neighboring outdoor spaces and living areas.

Decision Reasons:

- Follows Housing NZ's Simple Guide expectation that buildings and spaces should relate well to each other.

Point Number 435.17

Summary of Decision Requested: Add to Chapter 16 Residential Zone rules to the effect that:

Construction of commercial building within sight of SH23 at Raglan is a permitted activity if it will be screened from SH23 by planting with indigenous species that will achieve an average height of 3m after 5 years, mature to over 9m in the residential zone and 12m in the business zone and be of sufficient density to visually screen the activity from SH23.

Any activity that does not comply with a condition for a permitted activity is a discretionary activity.

Decision Reasons:

- Zone extensions have increase the extent of urban development along the main approach to Raglan, that could be mitigated by screening further development.

Point Number 435.18

Summary of Decision Requested: Add to Chapter 17 Business Zone rules to the effect that:

Construction of commercial building within sight of SH23 at Raglan is a permitted activity if it will be screened from SH23 by planting with indigenous species that will achieve an average height of 3m after 5 years, mature to over 9m in the residential zone and 12m in the business zone and be of sufficient density to visually screen the activity from SH23.

Any activity that does not comply with a condition for a permitted activity is a discretionary activity.

Decision Reasons:

- Zone extensions have increase the extent of urban development along the main approach to Raglan, that could be mitigated by screening further development.

Point Number 435.19

Summary of Decision Requested: Add to Rule 17.3.5 Horotiu Acoustic Area, so that these rules apply to Raglan Business Zones.

Decision Reasons:

- The SH23 Business Zone is next to the Lorenzen Bay Residential Zone.

Point Number 435.20

Summary of Decision Requested: Add rules for each catchment to Section C Rules to support the following:

- Onsite storm water disposal;
- Sufficient capacity to enable disposal of storm water;
- Best practice low impact design;
- On-site treatment;
- Minimises impervious surfaces;
- Retains pre-development hydrological conditions;
- Not increase the flow of storm water runoff;
- Not reduce storage capacity on-site; and
- Storm water catchment management plan.
- Promotes clean water reuse and groundwater recharge.

AND

Amend Section C Rules to provide individual limits to suit each catchment rather than permitting up to 70% impermeable cover everywhere.

Decision Reasons:

- Oppose Policies 4.2.7 and 6.4.7 as the only rules implementing them in Raglan are discretionary and ill-defined.
- No scientific storm water plan for Raglan completed, though a settling pond at AroAro was designed in 2011 as a filtration wetland for the storm water.
- Pollutants such as copper are at or near their limits and 70% impermeable.
- Application of Rule 14.11.1.2 RD2 discretion without scientific evidence will make pollution even worse.

Point Number 435.21

Summary of Decision Requested: **Amend** Policy 4.1.18 Raglan, as follows:

(a) Raglan is developed to ensure

(i) Infill and redevelopment of existing sites occurs, subject to development of a Structure Plan to identify where this can be done without loss of character, trees or other natural features.

(ii) A variety of housing densities is provided for and adequate housing reserved for low cost rentals and purchases by permanent residents.

Decision Reasons:

- There is a housing shortage in Raglan available to local people at affordable prices, not of buildings.
- Number of houses empty has risen to a third.
- Providing additional holiday homes will do nothing to solve the housing problem.
- Rangitahi will provide amply for foreseeable growth.
- It is planned to have good walking and cycling links within Rangitahi but no links to Raglan CBD, no ferry or bus service, thus need good car alternatives.
- Raglan CBD already has parking and congestion problems at peak times, never mind adding another 500 cars from Rangitahi.

Point Number 435.22

Summary of Decision Requested: **Amend** the Proposed District Plan to require housing for the elderly in all new developments, not just in Te Kauwhata, e.g. Policy 4.1.12 (b) (i) Te Kauwhata.

Decision Reasons:

- Former Lazarus Village is on fairly level ground and close to Raglan's main facilities.
- Better suited to house Raglan's above average elderly population than most sites in town and should be restored to such use.
- Without protection, likely the only non-hospital housing for elderly people in Raglan will be permanently lost.
- 1.12.3 aims for 'A district which provides a wide variety of housing forms which reflects the demands of its ageing population.'

Point Number 435.23

Summary of Decision Requested: **Delete** Policy 4.2.22-Bankart Street and Wainui Street.

AND

Add provision to Chapter 4: Urban Environment for Wi Neera Street.

Decision Reasons:

- Oppose as the area behind corrugated iron on Wi Neera Street is still be developed and residents will be forced out of their homes by rate rises, overlooking, noise etc.
- Raglan needs housing for locals far more than extra holiday apartments.

Point Number 435.24

Summary of Decision Requested: **Add** provision for new cycle/walkways to implement Council's Walking, Cycling and Bridle Trails Strategy, not only in major new developments.

Decision Reasons:

- Without support from District Plan is unlikely most of strategy will be achieved.
- 4.1.10 Policy- Tuakau, 4.1.11 Policy- Pokeno, 4.1.12 Policy- Te Kauwhata, 4.1.14 Policy- Taupiri, 4.1.15 Policy- Ngaruawahia, 4.1.16 Policy- Horotiu and 4.1.17 Policy- Te Kowhai all mention walking and cycling provision, however means and locations is unclear.
- Last plan revision, Council stated detailed rules for walk/cycle ways are not appropriate for a District Plan, yet have 35 pages the detail in 14.12 about vehicle turning circles, road widths etc. versus just a rule about bus space capacities and new buildings should have cycle parking.
- Page 42 Raglan Naturally states 'There is strong public support for harbor and coastal walkways' and 'Create coastal walkways.'
- Encouraging tourists to spend more time walking versus driving, could be made a much more valuable asset giving economic, health and recreation impetus to implement policies in recognition of the importance of walking and cycling.
- Lack of progress indicates opportunities are not taken with subdivisions and more detail needs to be included in the District Plan.

Submitter Number: 436 **Submitter:** Gerard Willis

Point Number 436.1

Summary of Decision Requested: **Amend** Rule 24.4.1 RD1 (a) Subdivision - General, so the minimum site area is 2500m2 as in the Operative District Plan.

Decision Reasons:

- The existing minimum area is 2500m2 and the Proposed Plan would effectively down-zone the land, reducing development opportunities

Point Number 436.2

Summary of Decision Requested: **Retain** the Village zoning for the property at 18 Clark and Denize Road, Pukekawa as proposed.

Decision Reasons:

- The zoning maintains the historic zoning and is appropriate given the location relative to existing development.

Submitter Number: 437 **Submitter:** KCH Trust

Point Number 437.1

Summary of Decision Requested: **Amend** the planning maps to reduce the extent of the Significant Natural Area at 170 Port Waikato-Waikaretu Road, Tuakau.

AND

Any further relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- The mapped Significant Natural Area in the Proposed District Plan is based on the criteria in Section 11A of the Waikato Regional Policy Statement.
- The Waikato Regional Policy Statement states that the identification of significant indigenous vegetation has been undertaken "primarily as a desktop analysis to which varying degrees of confidence are assigned." Further, that "Before information is included in regional or district plans further verification and validation may be required to confirm whether the identified area meet the criteria for significance in section 11A."
- The site has no property information supporting the application of the Significant Natural Area.
- The submitter appreciates the considerable cost involved in 'ground-truthing', however the District Council could include a rule in the Proposed District Plan that provides for the verification of the mapped Significant Natural Area by a suitably qualified ecologist when the Significant Natural Area is to be subject to subdivision or development or used for the purposes of conservation lot subdivision.

Point Number

437.2

Summary of Decision Requested:

Amend the assessment of a Significant Natural Area required by Rule 22.4.1.6(a)(ii) Conservation lot subdivision, to specifically refer to an outcome of the assessment being an increase or decrease in the boundary of the mapped Significant Natural Area as follows:

The area of Significant Natural Area is assessed by a suitably-qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity, a consequence of such assessment can be that the mapped Significant Natural Area may increase or decrease;

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- It is acknowledged that there is considerable cost in ground-truthing the Significant Natural Areas at a district scale.
- This provides for verification of the mapped Significant Natural Area by a suitably qualified ecologist.

Point Number

437.3

Summary of Decision Requested:

Delete Rule 22.4.3(a)(i) Title boundaries - Significant Natural Areas, heritage items, Maori sites of significance and Maori areas of significance.

AND

Any other relief or amendments to address the concerns outlined in the submission.

Decision Reasons:

- Many Significant Natural Areas are already fragmented.
- Significant Natural Areas protection relies on the implementation of a covenant.
- The retention within one title is not a key requirement.
- An efficient covenant is the most important matter (Rule 22.4.1.6(a)(iv)).

Point Number

437.4

Summary of Decision Requested:

Add a rule to the Proposed District Plan that provides for the verification of the mapped Significant Natural Area by a suitable qualified ecologist when the Significant Natural Area is to be subject to subdivision or development used for the purposes of conservation lot subdivision.

Decision Reasons:

- Appreciates that there is considerable cost involved in ground-truthing the district-scale information. Rule 22.4.1.6 (a)(i) already goes some way to achieving this outcome.

Point Number

437.5

Summary of Decision Requested:

Retain Rule 22.2.3.1 Earthworks - General.

Decision Reasons:

- These provisions are consistent with the purpose and principles of the Resource Management Act.
- These provisions meet the requirements to satisfy the criteria of section 32 of the Resource Management Act.
- These provisions will meet the reasonably foreseeable needs of future generations.
- These provisions are consistent with sound resource management practice.

Point Number

437.6

Summary of Decision Requested:

Retain Rule 22.2.3.3 Earthworks - Significant Natural Areas.

Decision Reasons:

- These provisions are consistent with the purpose and principles of the Resource Management Act.
- These provisions meet the requirements to satisfy the criteria of section 32 of the Resource Management Act.
- These provisions will meet the reasonably foreseeable needs of future generations.
- These provisions are consistent with sound resource management practice.

Point Number

437.7

Summary of Decision Requested:

Retain Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- These provisions are consistent with the purpose and principles of the Resource Management Act.
- These provisions meet the requirements to satisfy the criteria of section 32 of the Resource Management Act.
- These provisions will meet the reasonably foreseeable needs of future generations.
- These provisions are consistent with sound resource management practice.

Submitter Number:

438

Submitter:

Wendy Oliver

Point Number

438.1

Summary of Decision Requested: Amend the zoning of 50C Cedar Park Road, Tamahere from Country Living Zone to Village Zone (or create a deferred zone.)

OR

Amend the Country Living Zone rules to allow dispensation to reduce the section lot size down to 2000m2 to 3000m2.

Decision Reasons:

- Subdividing the 1.0237 ha block into two 5000m2 blocks is inefficient on the counts of land use, and sustainability.
- The section at 50C Cedar Park Road is also adjacent to the Waikato Expressway, and is on the Hamilton City side of the Waikato Expressway where more urban intensification is envisaged.
- It is now timely that Waikato District Council (WDC) also considers the draft Futureproof Strategy 2017 - 2018 (DFPS) which this submission is aligned with.
- To prioritize growth of the District in the best sustainable manner
- Tamahere should be the highest priority to be investigated for future growth and servicing
- There is proximity to Hamilton, strong transport linkages in very close proximity, latent demand for prime rural land for country living opportunities, protection of prime rural production land, infrastructure provision potential, and improved development, planning and social outcomes going forward for the Waikato District.
- This will provide for social, economic and cultural wellbeing by restraining rapid change of the rural character and a high - quality rural land resource.
- To address population growth pressure in the best manner possible and to continue the close-knit feel of the community
- To enable growth in a way that makes it sustainable and does not adversely impact on the highly productive farm and horticulture land surrounding the area, see submission for section taken from the draft Future Proof Strategy Update 2017.
- This will provide an efficient economy of scale for the provision of reticulated infrastructure.
- The vibrant and commercially successful community would benefit from more sustainable residential development without affecting the rural surrounding land use.
- Transport links have played a key role in the growth of the Tamahere area and this is becoming more predominant in recent times with new roading infrastructure. Tamahere is only a few minutes' drive by car from Hamilton city. Along with the development of the Waikato Expressway and SH25B, provide state highway linkages to the local road network. This proves that it is inevitable that there will continue to be a high latent demand for land in the Tamahere area for development.
- Waikato District population is projected to be 105,770 by 2048. Hamilton fringe areas are continuing to increase significantly due to high demand for properties and increased subdivision in the country living and urban areas with 20km of Hamilton. Some of the highest growth is currently being experienced and is predicted to continue in the Tamahere Country Living Zone (source Waikato District projected population). This proves that it is inevitable that there will continue to be a high latent demand for land in the Tamahere area for development.
- It will provide development, commercial, transport sustainability through economies of scale, development density and numbers of residents in a managed and coordinated manner.
- Thought now needs to turn to protecting the rural productive land and encouraging urban serviced lots in the surrounding areas.
- The addressing of serviced infrastructure best addresses sustainable management of natural and physical resources as distinct from sprawling 5,000m2 minimum Country Living Zone sized allotments.
- Section 6.5 of the Future Proof Strategy November 2017 supports the view that creating large non-reticulated lots will not assist integrated growth with Hamilton City's likely expansion into the future where such uses could be better accommodated with 2,000m2 service lots, than either 3,000m2 Village Zone or 5,000m2 Country Living Zone sized lots.

Point Number 438.2

Summary of Decision Requested: Add Rule 24.4.1 RD1 (c) Subdivision, which allows a reticulated service option of 3,000m2 lots for 50C Cedar Park Road, Tamahere.

Decision Reasons:

- Subdividing the 1.0237 ha block into two 5000m2 blocks is inefficient on the counts of land use, and sustainability.
- The section at 50C Cedar Park Road is also adjacent to the Waikato Expressway, and is on the Hamilton City side of the Waikato Expressway where more urban intensification is envisaged.
- It is now timely that Waikato District Council (WDC) also considers the draft Futureproof Strategy 2017 - 2018 (DFPS) which this submission is aligned with.
- To prioritize growth of the District in the best sustainable manner
- Tamahere should be the highest priority to be investigated for future growth and servicing
- There is proximity to Hamilton, strong transport linkages in very close proximity, latent demand for prime rural land for country living opportunities, protection of prime rural production land, infrastructure provision potential, and improved development, planning and social outcomes going forward for the Waikato District.
- This will provide for social, economic and cultural wellbeing by restraining rapid change of the rural character and a high - quality rural land resource.
- To address population growth pressure in the best manner possible and to continue the close-knit feel of the community
- To enable growth in a way that makes it sustainable and does not adversely impact on the highly productive farm and horticulture land surrounding the area, see submission for section taken from the draft Future Proof Strategy Update 2017.
- This will provide an efficient economy of scale for the provision of reticulated infrastructure.
- The vibrant and commercially successful community would benefit from more sustainable residential development without affecting the rural surrounding land use.
- Transport links have played a key role in the growth of the Tamahere area and this is becoming more predominant in recent times with new roading infrastructure. Tamahere is only a few minutes' drive by car from Hamilton city. Along with the development of the Waikato Expressway and SH25B, provide state highway linkages to the local road network. This proves that it is inevitable that there will continue to be a high latent demand for land in the Tamahere area for development.
- Waikato District population is projected to be 105,770 by 2048. Hamilton fringe areas are continuing to increase significantly due to high demand for properties and increased subdivision in the country living and urban areas with 20km of Hamilton. Some of the highest growth is currently being experienced and is predicted to continue in the Tamahere Country Living Zone (source Waikato District projected population). This proves that it is inevitable that there will continue to be a high latent demand for land in the Tamahere area for development.
- It will provide development, commercial, transport sustainability through economies of scale, development density and numbers of residents in a managed and coordinated manner.
- Thought now needs to turn to protecting the rural productive land and encouraging urban serviced lots in the surrounding areas.
- The addressing of serviced infrastructure best addresses sustainable management of natural and physical resources as distinct from sprawling 5,000m2 minimum Country Living Zone sized allotments.
- Section 6.5 of the Future Proof Strategy November 2017 supports the view that creating large non-reticulated lots will not assist integrated growth with Hamilton City's likely expansion into the future where such uses could be better accommodated with 2,000m2 service lots, than either 3,000m2 Village Zone or 5,000m2 Country Living Zone sized lots.

Submitter Number: 440 **Submitter:** Ben Young

Organisation: Madsen Lawrie Consultants Ltd

Point Number 440.1

Summary of Decision Requested: Amend Rule 22.4.1.2(a)(i) General Subdivision, to match the issue of the title date to the operative date of the Proposed District Plan, if not for all titles then for Franklin titles.

Decision Reasons:

- The Proposed District Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction, which is only relevant to the Waikato Section of the current District Plan.

Point Number 440.2

Summary of Decision Requested: Amend Rule 22.4.1.2 (a) (iv) General Subdivision, to reduce the minimum lot size from 8,000m2 to 4,000m2.

Decision Reasons:

- A minimum lot size requirement of 4,000m² will allow for some flexibility while still provided generous sized lots appropriate in the Rural Zone.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use for large residential lots.
- For many people, 8,000m² is not a manageable sized lot and will result in land not being used to its full potential.
- Regional Council requires a 2,500m² minimum lot size in the Rural Zone, which should be considered to minimise urban sprawl and best maintain the rural land resources in the district. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number 440.3

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(i) Boundary Relocation, to remove the specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date for titles subject to a boundary relocation proposal is an excessive restriction.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 440.4

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(iv) Boundary Relocation, to reduce the minimum lot size resulting from a boundary relocation to at least 4,000m² or 2,500m²

OR

Amend Rule 22.4.1.4 (a)(iv) Boundary relocation, to insert a specific clause enabling boundary relocations for pre-existing lots smaller than 8000m² that were created via compliance with the Franklin Section of the District Plan, if the minimum lot is not reduced to 2,500m².

Decision Reasons:

- The Franklin Section in the Operative District Plan contains a provision for a minimum lot size of 2,500m² in the Rural Zone.
- Imposing a minimum lot size requirement of 8,000m² would preclude lots less than 8,000m² created under the Franklin Section from being used for boundary relocations in the future.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- For many people, 8,000m² is not a manageable sized lot and rural land will not be used to its full potential.
- This will not promote efficient rural usage of land and will jeopardise Policy 5.2.2 of the Proposed District Plan which states that "Subdivision, use and development minimises the fragmentation of productive rural land, particularly where high class soils are located".
- Regional Council requires a 2,500m² minimum lot size in the Rural Zone, which should be considered and implemented to minimise urban sprawl, and best maintain and enable efficient use of rural land resources in the district.

Point Number 440.5

Summary of Decision Requested: **Retain** the indicated areas to be legally protected and the resultant maximum number of new Records of Title in Rule 22.4.1.6 RD1 (a)(i) Conservation Lot Subdivision, as notified.

Decision Reasons:

- The proposed contiguous areas required for the production of new Records of Title are achievable and appropriate within the region and will serve to protect generous regions of Significant Natural Areas.

Point Number 440.6

Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (viii) Conservation Lot Subdivision, as follows:

This rule or its equivalent in a previous district plan has not previously been used to gain an additional subdivision entitlement;

Decision Reasons:

- This rule appears to preclude any protection of existing unprotected qualifying or Significant Natural Features that would qualify under the proposed rules since the previous environmental lot subdivision.
- This rule should only reference any feature protected under the Proposed Plan.

Point Number 440.7

Summary of Decision Requested: **Amend** the zoning of the property at 598 Kohanga Road, Onewhero to extend the Village Zone on to Lot 1 DOS 62348 from Rural Zone to Village Zone.

Decision Reasons:

- This land provides a logical extension of the village zoning.
- Onewhero is a growing area and additional development must be planned to cater for the additional demand.

Point Number 440.8

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General Subdivision, to note or refer to exceptions to this rule as in the Operative District Plan i.e. those subdivisions that are classified as prohibited activities.

Decision Reasons:

- Specifications of exceptions to this rule will ease interpretation and understanding of the rule.

Submitter Number: 441

Submitter:

Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 441.1

Summary of Decision Requested: **Delete** the specified date for titles undergoing the boundary relocation in Rule 22.4.1.4(a)(i) Boundary Relocation.

Decision Reasons:

- Imposing a specific date for titles subject to a boundary relocation proposal is an excessive restriction.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 441.2

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(iv) Boundary Relocation, to reduce the minimum lot size resulting from boundary relocation to at least 4,000m² if not 2,500m²

OR

Amend Rule 22.4.1.4(a)(iv) Boundary Relocation, to insert a specific clause enabling boundary relocation for pre-existing lots smaller than 8,000m² that have been previously been created via compliance with the Franklin Section of the District Plan if the minimum lot size is not reduced to 2,500m².

Decision Reasons:

- The Franklin Section of the Operative Waikato District Plan contains a provision for a lot size of 2,500m² in the Rural Zone.
- Imposing a minimum lot size requirement of 8,000m² would preclude lots less than 8,000m² that have been created under the operative Franklin Section from being able to undertake boundary relocation subdivision in the future
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- For many people, 8,000m² is not a manageable sized lot and will result in rural land not being used to its full potential.
- This will not promote efficient rural use of land and will jeopardises Policy 5.2.2 of the Proposed District Plan which states "Subdivision, use and development minimises the fragmentation of productive rural land, particularly where high class soils are located".
- Regional Council requires a 2,500m² minimum lot size in the Rural Zone which should be considered and implemented to minimise urban sprawl, and best maintain and enable efficient use of rural land resources in the district.

Point Number 441.3

Summary of Decision Requested: **Retain** the indicated areas to be legally protected and the resultant maximum number of new records of title in Rule 22.4.1.6 RD1 (a)(i) Conservation Lot Subdivision, as notified.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the region and will serve to protect generous regions of Significant Natural Areas.

Point Number 441.4

Summary of Decision Requested: **Add** clarification and further description of the term "contiguous area" as used in Rule 22.4.1.6 RD1 (a)(i) Conservation Lot Subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number 441.5

Summary of Decision Requested: **Add** to Rule 22.4.1.1 PR3 (c) Prohibited subdivision the following:
a transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.

Decision Reasons:

- No reasons provided.

Point Number 441.6

Summary of Decision Requested: **Amend** Rule 22.4.1.2 RD1 (a)(i) General Subdivision, to match the issue of the title date to the operative date of the proposed plan, if not for all titles then for Franklin titles.

Decision Reasons:

- The Proposed District Plan is incorporating Franklin Section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction, which is only relevant to the Waikato Section of the current District Plan.
- This date is a reference to a redundant plan and historic rule.

Point Number 441.7

Summary of Decision Requested: **Retain** the minimum size for subdivision entitlement at 20ha in Rule 22.4.1.2(a)(ii) General Subdivision, as proposed.

Decision Reasons:

- This is appropriate for the rural area, and will avoid land fragmentation within the district.

Point Number 441.8

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(iii) General Subdivision, as follows:
"The proposed subdivision must create no more than one additional lot, excluding an access allotment for every compliant parent certificate of title".

Decision Reasons:

- Currently it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of number of compliant parent certificate of titles that are involved.

Point Number 441.9

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(iv) General Subdivision, to reduce the minimum lot size from 8,000m² to 4,000m².

Decision Reasons:

- A minimum lot size requirement of 4,000m² will allow for some flexibility while still providing generous sized lots appropriate in the Rural Zone.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- Regional Council has a 2,500m² minimum in the Rural Zone, which should be considered when designating lot minimum area to minimize urban sprawl and best maintain the rural land resources in the district. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number 441.10

Summary of Decision Requested: **Add** clarification and further description of the term "Significant Natural Area" in the context of Rule 22.4.1.6 RD1 (a)(i) Conservation Lot Subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number 441.11

Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a)(vi) Conservation lot subdivision, to reduce the minimum lot size requirement from 8,000m² to 2,500m² or 4,000m².

Decision Reasons:

- A minimum lot size of 8,000m² is not appropriate for all properties and areas.
- The Franklin region has been allowed to subdivide down to 2,500m² in the Rural Zone and this needs to be considered and incorporated into any future District Plan, especially if future development is to be in keeping with the existing rural character and amenity of areas within Franklin.
- A minimum lot size of 8,000m² is very generous and has a high probability of resulting in fragmentation of rural land
- A minimum lot size of 8,000m² will potentially designate productive land for inappropriate use in large residential lots.
- For many people, 8,000m² is not a manageable sized lot and will result in rural land not being utilised to its full potential.
- Regional Council has a 2,500m² minimum in the Rural Zone, which should be considered and implemented to minimise urban sprawl, and best maintain and enable efficient use of rural land resources in the district.

Point Number 441.12

Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a)(vii) Conservation lot subdivision, to increase the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots larger than 1.6ha if it is appropriate for the site and will enhance rural activities or is more in character with the surrounding area.

Point Number 441.13

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General Subdivision, to note or refer to exceptions to this rule as in the Operative District Plan i.e. subdivisions that are classified as prohibited activities.

Decision Reasons:

- Specification of exceptions to this rule will ease interpretation and understanding of the rule.

Submitter Number: 443 **Submitter:** Graham Wallace Ray

Point Number 443.1

Summary of Decision Requested: **Amend** the planning map by reducing the extent of the Significant Amenity Landscape on the property at 286D Newell Road, Tamahere so that this annotation only applies to the area within the riparian setback from the river.

Decision Reasons:

- The notified Significant Amenity Landscape affecting this property includes an area now cleared of gorse and replanted with other vegetation including flax, griselinia, red robin and cabbage trees as well as lawn and paddock areas which are kept tidy, maintained and free of weeds. These areas do not comprise a significant landscape.

Submitter Number: 444 **Submitter:** Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 444.1

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(i) Boundary Relocation, by removing the specification of a date for titles undergoing a boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 444.2

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(iv) Boundary relocation, to reduce the minimum lot size resulting from boundary relocation to at least 4000m², if not 2500m².

OR

Add a clause in Rule 22.4.1.4(a)(iv) Boundary relocation, to enable boundary relocation for pre-existing lots smaller than 8,000m² that have previously been created under and complied with the Franklin Section of the Operative District Plan, if the minimum lot size is not reduced to 2500m².

Decision Reasons:

- Under the Franklin Section of the Operative District Plan there is provision for 2,500m² lots in the Rural Zone.
- Therefore, imposing a minimum lot size requirement of 8,000m² for lots resulting from a boundary relocation would preclude lots smaller than 8,000m² created under the Franklin Section of the Operative District Plan.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- 8,000m² is not a manageable sized lot and rural usage of the site will not be utilised to its full potential.
- This rule will not achieve Policy 5.2.2 of the Proposed District Plan.
- Waikato Regional Council has a 2,500m² minimum requirement within the Rural Zone, which should be considered and implemented when designating the minimum lot area to ensure minimal urban sprawl and maintain efficient use of rural land resources in the district.

Point Number

444.3

Summary of Decision Requested:

Retain the indicated areas to be legally protected and the resultant maximum number of new records of title in Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the region and will serve to protect generous regions of significant natural areas.

Point Number

444.4

Summary of Decision Requested:

Add clarification and further description of the term 'contiguous area' in the context of Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of these terms will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number

444.5

Summary of Decision Requested:

Add the following to Rule 22.4.1.1 PR3 (c) Prohibited subdivision:

(c) A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.

Decision Reasons:

- No reasons provided.

Point Number

444.6

Summary of Decision Requested:

Amend Rule 22.4.1.2(a)(i) General subdivision, to replace the issue of title date from 6 December 1997 with the operative date of the Proposed District Plan, if not for all titles, then for Franklin titles.

Decision Reasons:

- The Proposed District Plan incorporates titles within the Franklin area that have not had an opportunity for subdivision.
- This date is a reference to a redundant plan and historic rule.

Point Number

444.7

Summary of Decision Requested:

Retain the minimum size for subdivision entitlement at 20ha in Rule 22.4.1.2(a)(ii) General Subdivision, as proposed.

Decision Reasons:

- The minimum parent title size is appropriate for the rural area and will serve to not fragment land within the district.

Point Number

444.8

Summary of Decision Requested:

Amend Rule 22.4.1.2(a)(iii) General subdivision, as follows:

The proposed subdivision must create no more than one additional lot, excluding an access, for every compliant parent certificate of title.

Decision Reasons:

- This rule is not clear on whether or not subdivision must not create more than one lot per every compliant parent certificate of title.
- This rule could be interpreted so that no more than one lot is created per subdivision regardless of the number of compliant parent titles are involved.

Point Number

444.9

Summary of Decision Requested:

Amend Rule 22.4.1.2(a)(iv) General subdivision to reduce the minimum lot size to 4,000m².

Decision Reasons:

- A minimum lot size requirement of 4,000m² will allow for some flexibility while still providing generous sized lots appropriate in the rural zone.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- 8,000m² is not a manageable size lot and rural usage of the land within many 8,000m² lots will not be utilised to its fullest potential.
- Regional Council has a 2,500m² minimum in the rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the rural land resources in the district.
- This is particularly relevant for the Franklin area as subdivision is currently allowable to 2500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number

444.10

Summary of Decision Requested: Amend the minimum lot size in Rule 22.4.1.6(a)(vi) Conservation lot subdivision from 8,000m² to 2,500m² or 4,000m².

Decision Reasons:

- A minimum lot size is not appropriate for all properties and areas.
- The Franklin region has been allowed to subdivide down to 2,500m in the Rural Zone and this needs to be considered and incorporated into the Proposed District Plan, particularly to retain the existing rural character and amenity within the Franklin area.
- A minimum lot size of 8,000m² is very generous and has a high probability of resulting in fragmentation of rural and will potentially designate productive land for inappropriate use in large residential lots.
- 8,000m² is not a manageable sized lot and rural usage of land within many 8,000m² lots will not be utilised to its full potential.
- The Waikato Regional Council has a 2,500m² minimum in the rural zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of rural land resources in the Waikato District.

Point Number 444.11

Summary of Decision Requested: Amend Rule 22.4.1.6(a)(vii) Conservation lot subdivision to increase the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots large than 1.6ha if it is appropriate for the site and will enhance rural activities or is more in character with the surrounding area.

Point Number 444.12

Summary of Decision Requested: Amend Rule 22.4.1.2(a)(i) General subdivision, to note or refer exceptions to this rule (i.e. those that are classified as a Prohibited subdivision) as is the case in the Operative District Plan.

Decision Reasons:

- Specification of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number 444.13

Summary of Decision Requested: Add clarification and further description of the term 'Significant Natural Area' in the context of Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of these terms will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number: 445 **Submitter:** Heather Perring

Organisation: BTW Company

Point Number 445.1

Summary of Decision Requested: Retain the urban growth and strategic development directions in Section 1.12.1 Strategic direction
AND

Amend or **add** provisions to encourage structure planned growth cells and comprehensively developed areas where they are in accordance with urban design guidelines and settlement patterns, and where it can be demonstrated that the adverse effects of land use and development can be adequately avoided, remedied or mitigated.

Decision Reasons:

- BTW Company supports the strategic direction of the Proposed District Plan - in particular Section 1.12.1 master planning approach for meeting the National Policy Statement - Urban Development Capacity housing supply targets and Future Proof growth objectives, as a flexible and integrated basis for achieving quality and efficient urban growth outcomes for the Waikato District.
- The submitter also supports the rezoning of land to residential around existing towns or villages.
- However, the use of master or structure planning has not been carried through to all relevant sections of the Proposed District Plan to comprehensively and effectively implement this strategic direction.

Point Number 445.2

Summary of Decision Requested: Add a new Appendix headed 'Structure Plan Content' into Chapter 29 Appendices, which specifies the type of development rules that can be created within a structure plan (aligned with design guidelines) and which replace other zone rules. This should outline a streamlined process for structure planning and not require the same developer to subdivide as well as build.

Decision Reasons:

- This new appendix will enable the district plan to remain efficient, flexible and practical for enabling sufficient growth and ensuring quality outcomes. The appendix needs to outline a streamlined process for structure planning and not require a developer to subdivide and build so that smaller developments/developers also have access and flexibility within each structure plan area.
- The structure plan is an effective planning tool, and utilised in the way suggested, should not become a tome of planning rules such that the structure plan becomes too restrictive.

Point Number 445.3

Summary of Decision Requested: Amend Objective 4.1.1 (b) Strategic, to provide flexibility for Future Proof updates, as follows:
(b) An additional 13,300-17,500 or greater dwellings are created during the period 2018-2045.

Decision Reasons:

- The review of the Future Proof Strategy may result in amendments to the settlement pattern and future growth targets. The Proposed District Plan does not include flexibility to accommodate such changes. The requested developer-led structure planning approach would provide a flexible tool to open up new growth areas without having to effect significant variations to the district plan.

Point Number 445.4

Summary of Decision Requested: **Amend** Policy 4.1.3 (b) Location of development to create flexibility for Future Proof updates, as follows:

(b) *Locate urban growth areas only where they are consistent with the Future Proof Strategy Planning for Growth 2017, and any subsequent updates.*

Decision Reasons:

- The review of the Future Proof Strategy may result in amendments to the settlement pattern and future growth targets. The Proposed District Plan does not include flexibility to accommodate such changes. The requested developer-led structure planning approach would provide a flexible tool to open up new growth areas without having to effect significant variations to the district plan.

Point Number 445.5

Summary of Decision Requested: **Amend** Policy 4.1.16 Horotiu, so that development is not unduly restricted, in contradiction to the provision of residential zoning immediately adjacent to major roads, as follows:

(a) *Horotiu is developed to ensure:*

...

(ii) *Future residential development ~~avoids or minimises~~ ~~does not impact~~ on the existing local road network;*

(iii) *Reverse sensitivity effects from the strategic transport infrastructure networks are ~~avoided or~~ minimised;*

Decision Reasons:

- Some of the growth cells (around Ngaruawahia and Horotiu) are subject to limitations given the existing intensive farming activities, major roads, servicing difficulties or archaeological sites. These limitations may therefore affect achievement of the growth targets.

Point Number 445.6

Summary of Decision Requested: **Retain** Policy 4.7.6 (ii) and (iii) Co-ordination between servicing and development and subdivision.

Decision Reasons:

- Developer led and Council led structure planning should be encouraged to reach up front agreements with local communities on the essential bulk and location standards to create developments suited to the location rather than a 'one size fits all' approach or ad hoc development.

Point Number 445.7

Summary of Decision Requested: **Retain** 4.7.14 Policy - Structure and master planning as notified.

Decision Reasons:

- Developer led and Council led structure planning should be encouraged to reach up front agreements with local communities on the essential bulk and location standards to create developments suited to the location rather than a 'one size fits all' approach or ad hoc development.

Point Number 445.8

Summary of Decision Requested: **Add** a new activity to Rule 16.1.2 Permitted Activities to facilitate ease of residential building in new structure planned areas as follows:

P2 Residential or multi-unit development, in accordance with an approved structure plan created after 18 July 2018.

Decision Reasons:

- Developer led and Council led structure planning should be encouraged to reach up front agreements with local communities on the essential bulk and location standards to create developments suited to the location rather than a 'one size fits all' approach or ad hoc development. Provisions are needed to enable well planned multi-unit developments on smaller sites, rather than across a multiple owned structure planned area.

Point Number 445.9

Summary of Decision Requested: **Amend** Rule 16.1.3 Restricted Discretionary Activities, by deleting RD1 (a multi-unit development) and consequently creating a new controlled activity rule for multi-unit development.

Decision Reasons:

- Developer led and Council led structure planning should be encouraged to reach up front agreements with local communities on the essential bulk and location standards to create developments suited to the location rather than a 'one size fits all' approach or ad hoc development. Provisions are needed to enable well planned multi-unit developments on smaller sites, rather than across a multiple owned structure planned area.

Point Number 445.10

Summary of Decision Requested: **Add** a new controlled activity to Rule 16.4 Subdivision, to facilitate ease of subdivision in new structure planned areas:

C1 Subdivision in accordance with an approved structure plan created after 18 July 2018.

Decision Reasons:

- Developer led and Council led structure planning should be encouraged to reach up front agreements with local communities on the essential bulk and location standards to create developments suited to the location rather than a 'one size fits all' approach or ad hoc development.

Point Number 445.11

Summary of Decision Requested: **Add** a new policy after Policy 4.1.3 Location of development, as follows:

Structure Planning

Provide for and encourage planned, integrated and flexible development through both developer and council led structure planning for areas consistent with the Future Proof settlement pattern, and in accordance with relevant urban design guidelines.

Encourage residential development within those approved structure planned areas through permitted activity status where effects can be managed.

Multi-unit developments

Encourage comprehensive residential developments outside of structure planned areas, by way of multi-unit developments.

Decision Reasons:

- Facilitates increased growth by structure planning and development within approved structure planned areas and encourage the take up of the multi-unit development activity.
- The submitter supports the strategic direction of the Proposed District Plan, in particular Section 1.12.1.
- The use of master or structure planning has not been carried through to all relevant sections of the Proposed District Plan to comprehensively and effectively implement this strategic direction.
- Structure planning would provide a flexible tool to open up new growth areas aligned with Future Proof without having to effect significant variations to the Proposed District Plan.
- Developer led and Council led structure planning should be encouraged to reach up front agreements with local communities on the essential bulk and location standards to create developments suited to the location rather than a 'one size fits all' approach or ad hoc development.
- Provisions are needed to enable well planned multi-unit developments on smaller sites, rather than across a multiple owned structure planned area.

Point Number

445.12

Summary of Decision Requested:

Amend Policy 4.1.15 Ngaruawahia, to provide more certainty for development of the growth cells on the likely timing of the shut down of the poultry farms and consider whether the 300m buffer (set out in Rule 16.4.7 RD1 (a)(iii)(A) is really necessary based on actual effects rather than rolling over a rule automatically from a older version of the plan.

Decision Reasons:

- Some of the growth cells (around Ngaruawahia and Horotiu) are subject to limitations given the existing intensive farming activities, major roads, servicing difficulties or archaeological sites. These limitations may therefore affect achievement of the growth targets.

Submitter Number:

Submitter:

Ben Young

Organisation:

Madsen Lawrie Consultants

Point Number

446.1

Summary of Decision Requested:

Delete the date specification for titles undergoing boundary relocations in Rule 22.4.1.4 (a)(i) Boundary relocation.

Decision Reasons:

- Excessive restriction.
- Constraints of this level are not appropriate for boundary relocations.
- Unclear what will be achieved by date imposition.

Point Number

446.2

Summary of Decision Requested:

Amend Rule 22.4.1.4 (a)(iv) Boundary relocation, to reduce the minimum lot sizes to at least 4,000m2, if not 2,500m2.

OR

Amend Rule 22.4.1.4 (a) (iv) Boundary relocation to include a specific clause enabling boundary relocation for existing lots smaller than 8,00m2 that have been previously created via compliance with the Franklin Section of the District Plan, in the vent that the lot size is not reduced to 2,500m2.

Decision Reasons:

- The Operative District Plan allows for a 2,500m2 lot size in the Rural Zone.
- Imposing an 8,000m2 minimum lot size would preclude lots less than 8,000m2 in the Franklin Section from any boundary relocation proposal in the future.
- 8,000m2 will fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- 8,000m2 lots are not manageable for many people and rural land will not be used to its full potential.
- Will not promote efficient rural land use and will jeopardise Policy 5.2.2 which states "Subdivision, use and development minimises the fragmentation of productive rural land, particularly where high class soils are located".
- Regional Council requires a 2,500m2 minimum lot size requirement in the Rural Zone and this should be considered to minimise urban sprawl and enable efficient use of rural land resources in the district.

Point Number

446.3

Summary of Decision Requested:

Retain the indicated areas to be legally protected and the resultant maximum number of new records of title in Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for production of new Records of Title are achievable and appropriate within the region.
- Will serve to protect generous regions of Significant Natural Areas.

Point Number

446.4

Summary of Decision Requested:

Amend the Proposed District Plan to clarify and further describe/define "contiguous area" in the context of Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition will aid in interpretation of this rule and will assist in identification of areas eligible for subdivision.

Point Number

446.5

Summary of Decision Requested:

Add the following to Rule 22.4.1.1 PR3 (c) Prohibited subdivision, as follows:

(c) PR3(a) does not apply to the following:

...

Decision Reasons:

- No reason provided.

Point Number

446.6

Summary of Decision Requested:

Amend Rule 22.4.1.2 (a)(i) General Subdivision, to match the issue of title date with the operative date of the Proposed District Plan, then if not all titles at least for the Franklin titles.

Decision Reasons:

- Titles should match the operative date of the Proposed District Plan for at least the Franklin Section titles that have not used rule in the past.
- The Proposed District Plan incorporates Franklin Section titles that have not been previously subdivided.
- Franklin Section titles should not be penalised by a date restriction that is only relevant to the Waikato Section of the Operative District Plan.
- Specifications of exemptions will ease understanding.
- The date references a redundant plan and pre-historic rule.

Point Number

446.7

Summary of Decision Requested:

Retain the minimum parent lot size of 20 ha for subdivision in Rule 22.4.1.2 (a)(ii) General Subdivision.

Decision Reasons:

- This minimum parent title size is appropriate.
- Will serve to not fragment land within the district.

Point Number

446.8

Summary of Decision Requested:

Amend Rule 22.4.1.2 (a)(iii) General Subdivision as follows:

(iii) the proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.

Decision Reasons:

- The current form of the rule does not make it clear that the subdivision must not create more than one lot per every compliant parent certificate of title.
- The rule could be interpreted to mean that no more than one is lot created per subdivision regardless of the number of compliant parent certificate of titles involved.

Point Number

446.9

Summary of Decision Requested:

Amend Rule 22.4.1.2 (a)(iv) General Subdivision to reduce the minimum lot size to 4,000m².

Decision Reasons:

- A 4,000m² lot size will allow some flexibility while providing generous lots appropriate for the Rural Zone.
- A 8,000m² minimum lot size will only fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- 8,000m² lots are not manageable for many people and will not be utilised to their full potential.
- Regional Council requires a 2,500m² minimum lot size in the Rural Zone and this should be considered to minimise urban sprawl and best maintain rural land resources in the district.
- This is relevant for the Franklin area where 2,500m² lot sizes are currently allowed.
- This will allow future development to be consistent with existing development.

Point Number

446.10

Summary of Decision Requested:

Amend Rule 22.4.1.6 (a)(vi) Conservation lot subdivision to reduce the minimum lot size from 8,000m² to 2,500m² or 4,000m².

Decision Reasons:

- An 8,000m² minimum lot size is not appropriate for all properties.
- The Franklin region has been allowed to subdivide to 2,500m² in the Rural Zone. This needs to be incorporated in any future District Plan if future development is to be in keeping with the Franklin rural character and amenity.
- An 8,000m² minimum lot size is generous, has high probability of resulting in fragmentation of rural land and will potentially designate productive land for inappropriate use in large residential lots.
- 8,000m² is not manageable for many people and will not be utilised to its full potential.
- The Regional Council requires a 2,500m² minimum lot size in the Rural Zone and this should be considered and implemented to minimise urban sprawl and best maintain and enable efficient use of rural land resources in the District.

Point Number

446.11

Summary of Decision Requested:

Amend Rule 22.4.1.6 (a)(vii) Conservation lot subdivision, to increase the maximum lot size to more than 1.6ha for proposed lots (excluding the balance lot).

Decision Reasons:

- There should be the opportunity to create lots larger than 1.6ha.
- It is appropriate for the site and will enhance rural activities or is more in character with the surrounding area.

Point Number

446.12

Summary of Decision Requested:

Amend Rule 22.4.1.2 General subdivision, to include a note or reference for exceptions to this rule (i.e. those subdivisions that are classified as a prohibited activity as per the Operative District Plan).

Decision Reasons:

- Specifications of exemptions will ease understanding of the rule.

Point Number

446.13

Summary of Decision Requested: Amend the Proposed District Plan to clarify and describe/define 'Significant Natural Area' in the context of Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition will aid in interpretation of this rule and will assist in identification of areas eligible for subdivision.

Submitter Number: 447 **Submitter:** Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 447.1

Summary of Decision Requested: Retain the indicated contiguous areas to be legally protected and the resultant maximum number of new records of title in Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the region and will serve to protect generous regions of significant natural areas.

Point Number 447.2

Summary of Decision Requested: Amend the Proposed District Plan to clarify and further describe a 'contiguous area' in the context of Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of the term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number 447.3

Summary of Decision Requested: Amend Rule 22.4.1.6 (a)(vi) Conservation lot subdivision, to reduce the minimum lot size requirement from 8,000m² to 2,500m² or 4,000m².

Decision Reasons:

- A minimum lot size of 8,000m² is not appropriate for all properties and areas.
- The Franklin region has been allowed to subdivide down to 2,500m² in the Rural Zone and this needs to be considered and incorporated into any future District Plan, especially if future development is to be in keeping with the existing rural character and amenity of areas within Franklin.
- A minimum lot size of 8,000m² is very generous and has a high probability of resulting in fragmentation of rural land and will potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- Waikato Regional Council has a 2,500m² minimum in the rural zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of rural land resources in the district.

Point Number 447.4

Summary of Decision Requested: Amend Rule 22.4.1.6 (a) (vii) Conservation lot subdivision, to increase the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots larger than 1.6ha where it is appropriate for the site and will enhance rural activities, or is more in character with the surrounding area.

Point Number 447.5

Summary of Decision Requested: Amend Rule 22.4.1.2 (a) (i) General Subdivision, to match the date of issue of title to the operative date of the Proposed District Plan - if not for all titles, then for Franklin titles.

Decision Reasons:

- The proposed plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction which is only relevant to the Waikato section of the current District Plan.

Point Number 447.6

Summary of Decision Requested: Amend Rule 22.4.1.2 (a)(iii) General Subdivision, as follows:

the proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant certificate of title.

Decision Reasons:

- It is not clear that subdivision must not create more than one lot per every compliant parent certificate of title.
- It could be interpreted that no more than one lot is created per subdivision regardless of number of compliant parent certificate of titles that are involved.

Point Number 447.7

Summary of Decision Requested: Amend Rule 22.4.1.2 (a)(iv) General Subdivision to reduce the minimum lot size to 4,000m².

Decision Reasons:

- A minimum lot size requirement of 4,000m² will allow for some flexibility while still provided generous sized lots appropriate in the rural zone.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.

- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- Regional Council has a 2,500m² minimum in the rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the rural land resources in the district. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number 447.8

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(i) Boundary relocation, to remove specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 447.9

Summary of Decision Requested: **Amend** Rule 22.4.1.4 (a)(iv) Boundary relocation, to reduce the minimum lot size resulting from boundary relocation to at least 4000m² if not 2500m².

OR

Amend Rule 22.4.1.4(a)(iv), to include a specific clause enabling boundary relocation for pre-existing lots smaller than 8,000m² that have been previously created via compliance with the Franklin Section of the District Plan, in the event that the lot size is not reduced to 2,500m².

Decision Reasons:

- Under the current Operative Waikato District plan Franklin section there is provision for lot size of down to 2,500m² in the rural zone therefore, by imposing a minimum lot size requirement of 8,000m² for lots resulting from boundary relocation it would preclude lots less than 8,000m² that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- This will not promote efficient rural usage of land and jeopardises Policy 5.2.2 of the proposed District Plan which states that "Subdivision, use and development minimises the fragmentation of productive rural land, particularly where high class soils are located".
- Waikato Regional Council has a 2,500m² minimum in the rural zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of rural land resources in the district.

Point Number 447.10

Summary of Decision Requested: **Amend** Rule 22.4.1.6 (viii) Conservation lot subdivision, to remove reference to "or its equivalent in a previous District Plan".

Decision Reasons:

- This rule appears to preclude any protection of existing unprotected Qualifying or Significant Natural Features that would since the previous environmental lot subdivision qualify for protection under the proposed rules.
- This rule should instead reference any feature protected under the proposed plan only.

Point Number 447.11

Summary of Decision Requested: **Amend** zoning of both sides of McKenzie Road, Mangatawhiri from Rural Zone to Village Zone.

Decision Reasons:

- The area contains many Village zoned lots and proliferated with residentially used properties.
- Productive land use has become limited by these many dwellings.
- The Road is ideally located adjoining local primary school, kindergarten and hall.
- From a planning perspective it makes sense to rezone land to provide a sense of community.
- Access to and from State Highway 2 is easily achieved and land is not subject to any natural hazards.

Point Number 447.12

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General Subdivision, to include notes or references where there are exceptions to the rule (i.e. those that are classified as Prohibited subdivision).

Decision Reasons:

- Specification of exceptions to this rules will ease interpretation and understanding of the rule.

Point Number 447.13

Summary of Decision Requested: **Amend** the Proposed District Plan to clarify and further describe a "Significant Natural Area" in the context of Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of the term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number: 449

Submitter: Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 449.1

Summary of Decision Requested: **Amend** Rule 22.4.1.4 (a) (i) Boundary relocation, by removing the specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number

449.2

Summary of Decision Requested:

Amend Rule 22.4.1.4 (a) (iv) Boundary relocation, by reducing the minimum lot size resulting from boundary relocation to at least 4,000m², if not 2,500m²

OR

Add a clause to Rule 22.4.1.4 (a) (iv) Boundary relocation, to enable boundary relocation for pre-existing lots smaller than 8,000m² that have been created via compliance with the Operative District Plan - Franklin Section, in the event that the minimum lot size is not reduced to 2,500m².

Decision Reasons:

- Under the current Operative Waikato District Plan Franklin Section there is provision for lot size of down to 2,500m² in the Rural Zone therefore, by imposing a minimum lot size requirement of 8,000m² for lots resulting from boundary relocation it would preclude lots <8,000m² that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future.
- A minimum lot size of 8,000m² will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.
- For many people, 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- This will not promote efficient rural usage and jeopardises Policy 5.2.2 of the Proposed District Plan.
- The Regional Council has a 2,500m² minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number

449.3

Summary of Decision Requested:

Retain the areas to be legally protected and the maximum number of new records of title in Rule 22.4.1.6 RD1 (a) (i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the Region and will serve to protect generous regions of significant natural areas.

Point Number

449.4

Summary of Decision Requested:

Amend the Proposed District Plan to clarify and further describe a 'contiguous area', as contained in Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule
- Will assist in the identification of areas eligible for subdivision under this rule.

Point Number

449.5

Summary of Decision Requested:

Add a new clause to Rule 22.4.1.1 PR3 (c) Prohibited Subdivision, by adding the following:

(c) A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.

Decision Reasons:

- No reasons provided.

Point Number

449.6

Summary of Decision Requested:

Amend Rule 22.4.1.2 (a) (i) General subdivision, by bringing the issue of title date up to match the operative date of the Proposed Plan.

Decision Reasons:

- The issue of title date should be brought up to the Operative date of the Proposed Plan. If not for all titles then certainly for Franklin titles which have not had the use of this rule in the past.
- The Proposed Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction which is only relevant to the Waikato section of the current District Plan.
- The date is a reference to a redundant plan and pre-historic rule.

Point Number

449.7

Summary of Decision Requested:

Retain the minimum size for subdivision entitlement of 20ha in Rule 22.4.1.2 (a) (ii) General subdivision.

Decision Reasons:

- The minimum parent title size is appropriate for the Rural area and will serve to not fragment land within the District.

Point Number

449.8

Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (iii) General subdivision, as follows: <i>The proposed subdivision must create no more than one additional lot, excluding an access allotment, <u>for every compliant parent certificate of title.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> As the Rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of the number of compliant parent certificate of titles that are involved.
Point Number	449.9
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (iv) General subdivision, by reducing the minimum lot size to 4,000m2.
Decision Reasons:	<ul style="list-style-type: none"> A minimum lot size requirement 4,000m2 will allow for some flexibility while still providing generous sized lots appropriate in the Rural zone. A minimum lot size of 8,000m2 will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots. For many people 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential. The Regional Council has a 2,500m2 minimum in the Rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the Rural land resources in the District. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m2 and for future development to be consistent with existing development a smaller lot size than 8,000m2 would be more appropriate.
Point Number	449.10
Summary of Decision Requested:	Amend Rule 22.4.1.6 (a) (vi) Conservation lot subdivision by reducing the lot size requirement to 2,500m2, or 4,000m2.
Decision Reasons:	<ul style="list-style-type: none"> A minimum lot size of 8,000m2 is not appropriate for all properties and areas. The Franklin Region has been allowed to subdivide down to 2,500m2 in the Rural Zone and this needs to be considered and incorporated into any future District Plan. A minimum lot size of 8,000m2 is very generous and has a high probability of resulting in fragmentation of Rural land and will potentially designate productive land for inappropriate use in large residential lots. For many people 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential. Regional Council has a 2,500m2 minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.
Point Number	449.11
Summary of Decision Requested:	Amend Rule 22.4.1.6 (a) (vii) Conservation lot subdivision by increasing the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.
Decision Reasons:	<ul style="list-style-type: none"> There should be the opportunity to make lots larger than 1.6ha it is appropriate for the site and will enhance Rural activities or is more in character with the surrounding area.
Point Number	449.12
Summary of Decision Requested:	Amend Rule 22.4.1.2 General subdivision, so exceptions to the rule (i.e. those that are classified as Prohibited Subdivision) are noted or referred to this rule as is the case in the current Operative Plan.
Decision Reasons:	<ul style="list-style-type: none"> Specifications of exceptions to this rule will ease interpretation and understanding of the rule.
Point Number	449.13
Summary of Decision Requested:	Amend the Proposed District Plan to clarify and further describe a 'Significant Natural Area' in the context of Rule 22.4.1.6 (a) (i) Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> Further definition of this term will aid in the interpretation of the rule. Will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number:	450	Submitter:	Alison Green
Organisation:	Rushala Farm Ltd		
Point Number	450.1		
Summary of Decision Requested:	No specific decision sought, but the submitter refers to Policy 3.2.7 Managing Significant Natural Areas, and considers costs for protecting these should be borne by Council rather than farmers.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers that because it is Council's decision to protect Significant Natural Areas, the costs of protection should be borne by Council rather than landowners. 		
Point Number	450.2		

Summary of Decision Requested: No specific decision sought, but the submitter opposes Objective 5.1.1 (iii) The rural environment.

Decision Reasons:

- The submitter considers that it should be the right of the landowner to have input into subdivision and land use. Farming is becoming less viable as a result of compliance costs and restrictions. Subdivision enables farmers to survive and reduce debt.

Point Number 450.3

Summary of Decision Requested: No specific decision sought, but the submitter opposes Policy 5.3.8 Effects on rural character and amenity from rural subdivision.

Decision Reasons:

- The submitter considers that it should be the right of the landowner to decide what to do with their land. Farming is becoming less viable as a result of compliance costs and restrictions. Subdivision enables farmers to survive and reduce debt.

Point Number 450.4

Summary of Decision Requested: No specific decision sought, but the submitter refers to Policy 5.3.14 (b) Signs.

Decision Reasons:

- The submitter considers that local landowners need to be consulted regarding what gets done in their area and cites an example of huge and wasteful costs that have been incurred with the painting of double yellow lines on Kaiaua Road which has made it more dangerous for all local residents.

Submitter Number: 451 **Submitter:** Steven & Teresa Hopkins

Point Number 451.1

Summary of Decision Requested: Amend the zoning at 67 Pioneer Road, Pokeno from Rural Zone to Village Zone.

Decision Reasons:

- The submitter is seeking to undertake residential development of the site that cannot be realised under the provisions of the Rural Zone.
- The site is located in close proximity to the Pokeno Town Centre and therefore means that residential development would allow for greater convenience for additional residents.
- There are no features or constraints.
- The underlying topographical conditions of the site are such that extensive earthworks are not necessary.
- There is a strong desire for a variety of residential lifestyle options to be provided as part of the future growth.
- The Proposed District Plan identifies no areas of Significant Ecological Value.
- The growth projections for Pokeno indicate a strong need for additional development to cater for the population increase.
- Provides alternative lifestyle options.
- Site is not economic for farming.

Point Number 451.2

Summary of Decision Requested: Retain Objective 4.1.1 Strategic.

Decision Reasons:

- Supports this objective for additional dwellings throughout the Waikato District.

Point Number 451.3

Summary of Decision Requested: Retain Policy 4.3.2 Character.

Decision Reasons:

- Supports the policy outlining the character of the Village Zone.
- Proposed residential development for the submission site would align with this policy being low density, semi-rural in character and provided with on-site three waters infrastructure.

Point Number 451.4

Summary of Decision Requested: Amend Policy 4.7.11(b) Reverse sensitivity, as follows:
Avoid/Manage potential reverse sensitivity effects of locating new dwellings in the vicinity of an intensive farming, extraction industry or industrial activity.

Decision Reasons:

- The use of the word 'avoid' makes this policy too onerous with regards to the relationship between sensitive activities and effects-intensive activities.
- Multiple options exist for the mitigation of potential reverse sensitivity.

Submitter Number: 452 **Submitter:** R Mitchell

Point Number 452.1

Summary of Decision Requested: No specific decision sought, but the submitter opposes Rule 22.1.2 Permitted Activities, and any change or restriction for their old historic title.

Decision Reasons:

- The submitter states that the property at 12 Koheroa Road is family land and the permitted activities (i.e. childcare facility and the like) should not change.

Point Number	452.2
Summary of Decision Requested:	No specific decision sought, but the submitter supports Rule 22.3.2 Minor dwelling as it would enable minor dwellings for use as per their original historic title.
Decision Reasons:	<ul style="list-style-type: none"> The submitter states that they "wanted to use for the purpose allowed."

Submitter Number:	453	Submitter:	Ben Young
Organisation:	Madsen Lawrie Consultants		

Point Number	453.1
Summary of Decision Requested:	<p>Add a new clause to Rule 22.4.1.1 PR3 (c) Prohibited Subdivision, as follows:</p> <p><i>(c) A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Point Number	453.2
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (i) General subdivision, by matching the issue of title date with the operative date of the Proposed Plan, if not for all titles then amend for the Franklin titles.
Decision Reasons:	<ul style="list-style-type: none"> The issue of title date should be brought up to the Operative date of the Proposed Plan. If not for all titles then certainly for Franklin titles which have not had the use of this rule in the past. The date is reference to a historic rule and redundant plan.

Point Number	453.3
Summary of Decision Requested:	Retain the minimum size for subdivision entitlement of 20ha in Rule 22.4.1.2 (a) (ii) General subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The minimum parent title size is appropriate for the Rural area and will serve to not fragment land within the District.

Point Number	453.4
Summary of Decision Requested:	<p>Amend Rule 22.4.1.2 (a) (iii) General subdivision, as follows:</p> <p><i>The proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> As the Rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of the number of compliant parent certificate of titles that are involved.

Point Number	453.5
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (iv) General subdivision, by reducing the minimum lot size to 4,000m ² .
Decision Reasons:	<ul style="list-style-type: none"> A minimum lot size requirement 4,000m² will allow for some flexibility while still provided generous sized lots appropriate in the Rural zone. A minimum lot size of 8,000m² will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots. For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential. The Regional Council has a 2,500m² minimum in the Rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the Rural land resources in the District. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number	453.6
Summary of Decision Requested:	Amend Rule 22.4.1.4 (a) (i) Boundary relocation, by removing the specification of a date for titles undergoing the boundary relocation.
Decision Reasons:	<ul style="list-style-type: none"> Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation. It is unclear as to what will be achieved by the imposition of such a date.

Point Number 453.7

Summary of Decision Requested: **Amend** Rule 22.4.1.4 (a) (iv) Boundary relocation, by reducing the minimum lot size resulting from boundary relocation to at least 4,000m², if not 2,500m².

OR

Add a clause to Rule 22.4.1.4 (a) (iv) Boundary relocation, enabling boundary relocation for pre-existing lots smaller than 8,000m² that have been created via compliance with the Operative District Plan- Franklin section in the event that the reduction of the minimum lot size of 2,500m² is not accepted.

Decision Reasons:

- Under the current Operative Waikato District Plan Franklin Section there is provision for lot size of down to 2,500m² in the Rural Zone therefore, by imposing a minimum lot size requirement of 8,000m² for lots resulting from boundary relocation it would preclude lots less than 8,000m² that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future.
- A minimum lot size of 8,000m² will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.
- For many people, 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- This will not promote efficient rural usage and jeopardises Policy 5.2.2 of the Proposed District Plan.
- The Regional Council has a 2,500m² minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 453.8

Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (i) General subdivision, so exceptions to the rule (i.e. those that are classified as Prohibited Subdivision) are noted or referred to in this rule as is the case in the current Operative Plan.

Decision Reasons:

- Specification of exceptions to this rule will ease interpretation and understanding of the rule.

Submitter Number: 454 **Submitter:** Troy Fell

Point Number 454.1

Summary of Decision Requested: **Amend** Section 6.2 National Grid to allow for all households to access renewable energies such as solar and wind generation and move away from the National Grid.

Decision Reasons:

- There is a need to move away from reliance on the National Grid because of increasing electricity prices.
- Solar-generated power is more affordable but access to it is made difficult because of the amount of capital investment needed and this usually involves individual house installations rather than a community scale installation.
- Refer to original submission for the submitter's suggestions for how local and regional councils could manage investments in solar farms for the benefit of ratepayers.
- If local and regional government was able to assist through subsidies and sponsorship, construction of solar farms on council land, then this cost would be eliminated and direct savings would be passed on to households.

Point Number 454.2

Summary of Decision Requested: **Retain** Chapter 9.3 Rangitahi Peninsula.

Decision Reasons:

- No reasons provided.

Point Number 454.3

Summary of Decision Requested: **Amend** Section 6.3 Energy to allow access for all households to access renewable energies such as solar and wind generation and move away from the National Grid.

Decision Reasons:

- There is a need to move away from reliance on the National Grid because of increasing electricity prices.
- Solar-generated power is more affordable but access to it is made difficult because of the amount of capital investment needed and this usually involves individual house installations rather than a community scale installation.
- Refer to original submission for the submitter's suggestions for how local and regional councils could manage investments in solar farms for the benefit of ratepayers.
- If local and regional government was able to assist through subsidies and sponsorship, construction of solar farms on council land, then this cost would be eliminated and direct savings would be passed on to households.

Submitter Number: 455 **Submitter:** Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 455.1

Summary of Decision Requested: **Amend** Rule 22.4.1.4 (a) (i)- Boundary relocation by removing the specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number	455.2
Summary of Decision Requested:	<p>Amend Rule 22.4.1.4 (a) (iv)- Boundary relocation by reducing the minimum lot size resulting from boundary relocation to at least 4,000m2, if not 2,500m2.</p> <p>OR</p> <p>Add a clause to Rule 22.4.1.4 (a) (iv)- Boundary relocation to enable boundary relocation for pre-existing lots smaller than 8,000m2 that have been created via compliance with the Operative District Plan- Franklin section, in the event that the minimum lot size is not reduced to 2,500m2.</p>
Decision Reasons:	<ul style="list-style-type: none"> Under the current Operative Waikato District Plan Franklin Section there is provision for lot size of down to 2,500m2 in the Rural Zone therefore, by imposing a minimum lot size requirement of 8,000m2 for lots resulting from boundary relocation it would preclude lots <8,000m2 that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future. A minimum lot size of 8,000m2 will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots. For many people, 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential. This will not promote efficient rural usage and jeopardises Policy 5.2.2 of the Proposed District Plan. The Regional Council has a 2,500m2 minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.
Point Number	455.3
Summary of Decision Requested:	Retain the areas to be legally protected and the maximum number of new records of title in Rule 22.4.1.6 RD1 (a) (i)- Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the Region and will serve to protect generous regions of significant natural areas.
Point Number	455.4
Summary of Decision Requested:	Amend the Proposed District Plan to clarify and further describe a "contiguous area", as contained in Rule 22.4.1.6 (a)(i) Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> Further definition of this term will aid in the interpretation of the rule. Will assist in the identification of areas eligible for subdivision under this rule.
Point Number	455.5
Summary of Decision Requested:	<p>Add a new clause to Rule 22.4.1.1 PR3 (c) Prohibited subdivision, as follows:</p> <p><i>(c) A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	455.6
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (i) General subdivision, by bringing the issue of title date up to match the operative date of the Proposed Plan, if not for all titles then amend for the Franklin titles.
Decision Reasons:	<ul style="list-style-type: none"> The issue of title date should be brought up to the Operative date of the Proposed Plan. If not for all titles then certainly for Franklin titles which have not had the use of this rule in the past. The Proposed Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction which is only relevant to the Waikato section of the current District Plan. The date is a reference to a redundant plan and pre-historic rule.
Point Number	455.7
Summary of Decision Requested:	Retain the minimum size for subdivision entitlement of 20ha in Rule 22.4.1.2 (a) (ii) General subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The minimum parent title size is appropriate for the Rural area and will serve to not fragment land within the District.
Point Number	455.8
Summary of Decision Requested:	<p>Amend Rule 22.4.1.2 (a) (iii) General subdivision, as follows:</p> <p><i>The proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> As the Rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of the number of compliant parent certificate of titles that are involved.
Point Number	455.9
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (iv) General subdivision by reducing the minimum lot size to 4,000m2.
Decision Reasons:	<ul style="list-style-type: none"> A minimum lot size requirement 4,000m2 will allow for some flexibility while still providing generous sized lots appropriate in the Rural zone. A minimum lot size of 8,000m2 will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.

- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- The Regional Council has a 2,500m² minimum in the Rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the Rural land resources in the District. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number 455.10

Summary of Decision Requested: Amend Rule 22.4.1.6 (a) (vi) Conservation lot subdivision, by reducing the lot size requirement to 2,500m², or 4,000m².

Decision Reasons:

- A minimum lot size of 8,000m² is not appropriate for all properties and areas.
- The Franklin Region has been allowed to subdivide down to 2,500m² in the Rural Zone and this needs to be considered and incorporated into any future District Plan.
- A minimum lot size of 8,000m² is very generous and has a high probability of resulting in fragmentation of Rural land and will potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- Regional Council has a 2,500m² minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 455.11

Summary of Decision Requested: Amend Rule 22.4.1.6 (a) (vii) Conservation lot subdivision, by increasing the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots larger than 1.6ha it is appropriate for the site and will enhance Rural activities or is more in character with the surrounding area.

Point Number 455.12

Summary of Decision Requested: Amend Rule 22.4.1.2 (a)(i) General subdivision, so exceptions to the rule (i.e. those that are classified as Prohibited Subdivision) are noted or referred to this rule as is the case in the current Operative Plan.

Decision Reasons:

- Specifications of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number 455.13

Summary of Decision Requested: Amend the Proposed District Plan to clarify and further describe a "Significant Natural Area" in the context of Rule 22.4.1.6 Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule.
- Will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number: 456

Submitter: Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 456.1

Summary of Decision Requested: Amend Rule 22.4.1.4 (a) (i) Boundary relocation, by removing the specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 456.2

Summary of Decision Requested: Amend Rule 22.4.1.4 (a) (iv) Boundary relocation, by reducing the minimum lot size resulting from boundary relocation to at least 4,000m², if not 2,500m²

OR

Add a clause to Rule 22.4.1.4 (a) (iv), to enable boundary relocation for pre-existing lots smaller than 8,000m² that have been created via compliance with the Operative District Plan - Franklin section, in the event that the reduction of the minimum lot size to 2,500m² is not accepted.

Decision Reasons:

- Under the current Operative Waikato District Plan Franklin Section there is provision for lot size of down to 2,500m² in the Rural Zone therefore, by imposing a minimum lot size requirement of 8,000m² for lots resulting from boundary relocation it would preclude lots <8,000m² that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future.
- A minimum lot size of 8,000m² will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.
- For many people, 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- This will not promote efficient rural usage and jeopardises Policy 5.2.2 of the Proposed District Plan.

- The Regional Council has a 2,500m² minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 456.3

Summary of Decision Requested: **Retain** the areas to be legally protected and the maximum number of new records of title in Rule 22.4.1.6 RD1 (a) (i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the Region and will serve to protect generous regions of significant natural areas.

Point Number 456.4

Summary of Decision Requested: **Amend** the Proposed District Plan to clarify and further describe a "contiguous area" as contained in Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule.
- Will assist in the identification of areas eligible for subdivision under this rule.

Point Number 456.5

Summary of Decision Requested: **Add** a new clause to Rule 22.4.1.1 PR3 (c) Prohibited Subdivision, by adding the following:
(c) A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.

Decision Reasons:

- No reasons provided.

Point Number 456.6

Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (i) General subdivision, by matching the issue of title date with the operative date of the Proposed Plan, if not for all titles then amend for the Franklin titles.

Decision Reasons:

- The issue of title date should be brought up to the Operative date of the Proposed Plan. If not for all titles then certainly for Franklin titles which have not had the use of this rule in the past.
- The Proposed Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction which is only relevant to the Waikato section of the current District Plan.
- The date is a reference to a redundant plan and pre-historic rule.

Point Number 456.7

Summary of Decision Requested: **Retain** minimum size for subdivision entitlement of 20ha in Rule 22.4.1.2 (a) (ii) General subdivision.

Decision Reasons:

- The minimum parent title size is appropriate for the Rural area and will serve to not fragment land within the District.

Point Number 456.8

Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (iii) General subdivision, as follows:
The proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.

Decision Reasons:

- As the Rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of the number of compliant parent certificate of titles that are involved.

Point Number 456.9

Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (iv) General subdivision, by reducing the minimum lot size to 4,000m².

Decision Reasons:

- A minimum lot size requirement 4,000m² will allow for some flexibility while still providing generous sized lots appropriate in the Rural zone.
- A minimum lot size of 8,000m² will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- The Regional Council has a 2,500m² minimum in the Rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the Rural land resources in the District. This is particularly relevant for the Franklin area as

subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number 456.10

Summary of Decision Requested: Amend Rule 22.4.1.6 (a) (vi) Conservation lot subdivision, by reducing the lot size requirement to 2,500m², or 4,000m².

Decision Reasons:

- A minimum lot size of 8,000m² is not appropriate for all properties and areas.
- The Franklin Region has been allowed to subdivide down to 2,500m² in the Rural Zone and this needs to be considered and incorporated into any future District Plan.
- A minimum lot size of 8,000m² is very generous and has a high probability of resulting in fragmentation of Rural land and will potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- Regional Council has a 2,500m² minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 456.11

Summary of Decision Requested: Amend Rule 22.4.1.6 (a) (vii) Conservation lot subdivision, by increasing the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots larger than 1.6ha it is appropriate for the site and will enhance Rural activities or is more in character with the surrounding area.

Point Number 456.12

Summary of Decision Requested: Amend Rule 22.4.1.2 (a)(i) General subdivision, so exceptions to the rule (i.e those that are classified as Prohibited Subdivision) are noted or deferred to this rule as is the case in the current Operative Plan.

Decision Reasons:

- Specifications of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number 456.13

Summary of Decision Requested: Amend the Proposed District Plan to clarify and further describe a "Significant Natural Area" in the context of Rule 22.4.1.6 Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule.
- Will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number: 457 **Submitter:** Anna Cunningham

Point Number 457.1

Summary of Decision Requested: Amend Rule 16.1.2 P4(b) Home occupation, by reinstating the condition in Rule 21.11 in the Operative Waikato District Plan that requires the storage of materials or machinery associated with the non-residential activity to not be visible from a public road or neighbouring residential property.

Decision Reasons:

- The proposed rule that requires materials or machinery to be stored within a building is very restrictive and not always possible. If the equipment is shielded from view by a fence (for example), no person is adversely affected.

Point Number 457.2

Summary of Decision Requested: Amend Rule 16.4.1 Subdivision - General, by reinstating the condition in Rule 21.69.1 (b) of the Operative Waikato District Plan which enables alternative methods of water supply and stormwater, land drainage and wastewater disposal that comply with the engineering standards in Appendix B.

Decision Reasons:

- On-site water collection and wastewater disposal are very feasible and this is often the most cost-effective and ecologically sound option for sections (currently an option for sections over 2500m²). It would be a shame to lose this option.

Submitter Number: 458 **Submitter:** David Lawrie

Organisation: Madsen Lawrie Consultants

Point Number 458.1

Summary of Decision Requested: Amend the zoning of the property at 114 Dean Road, Pokeno to Residential Zone.

Decision Reasons:

- There is potential for the property at 114 Dean Road, Pokeno to be provided with wastewater services which would enable an increased density of development and more efficient land use.
- The land is not high quality, unlike the adjoining flats, and is not subject to natural hazards.
- By providing these sites with these services it would be of considerable benefit to the land and soil resources.

Point Number 458.2

Summary of Decision Requested: **Amend** the zoning of the property at 126 Baird Road, Pokeno Rural Zone to Residential Zone.

Decision Reasons:

- Rezoning this property to Residential Zone would provide a logical continuity of residential development in this location (alongside the requested residential development of 114 Dean Road).
- The land is not of high quality unlike the flats adjoining and is not subject to natural hazards.

Submitter Number: 459 **Submitter:** Ben Young

Organisation: Madsen Lawrie Consultants

Point Number 459.1

Summary of Decision Requested: **Amend** Rule 22.4.1.4 (a) (i) Boundary relocation, by removing the specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 459.2

Summary of Decision Requested: **Amend** Rule 22.4.1.4 (a) (iv) Boundary relocation, by reducing the minimum lot size resulting from boundary relocation to at least 4,000m2, if not 2,500m2

OR

Add a clause to Rule 22.4.1.4 RD1 (a) (iv), enabling boundary relocation for pre-existing lots smaller than 8,000m2 that have been previously been created via compliance with the Operative District Plan- Franklin Section, if the minimum lot size is not reduced to 2,500m2.

Decision Reasons:

- Under the current Operative Waikato District Plan Franklin Section there is provision for lot size of down to 2,500m2 in the Rural Zone therefore, by imposing a minimum lot size requirement of 8,000m2 for lots resulting from boundary relocation it would preclude lots <8,000m2 that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future.
- A minimum lot size of 8,000m2 will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.
- For many people, 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential.
- This will not promote efficient rural usage and jeopardises Policy 5.2.2 of the Proposed District Plan.
- The Regional Council has a 2,500m2 minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 459.3

Summary of Decision Requested: **Retain** the areas to be legally protected and the maximum number of new records of title in Rule 22.4.1.6 RD1 (a) (i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the Region and will serve to protect generous regions of significant natural areas.

Point Number 459.4

Summary of Decision Requested: **Amend** the Proposed District Plan to clarify and further describe a "contiguous area" as contained in Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of these terms will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number 459.5

Summary of Decision Requested: **Add** a new clause to Rule 22.4.1.1 PR3 (c) Prohibited Subdivision, as follows:

(c) A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.

Decision Reasons:

- No reasons provided.

Point Number 459.6

Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (i) General subdivision, by matching the issue of title date with the Operative date of the Proposed Plan, if not for all titles then amend for the Franklin titles.

Decision Reasons:

- The issue of title date should be brought up to the Operative date of the Proposed Plan. If not for all titles then certainly for Franklin titles which have not had the use of this rule in the past.
- The Proposed Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction which is only relevant to the Waikato section of the current District Plan.
- The date is a reference to a redundant plan and pre-historic rule.

Point Number 459.7
Summary of Decision Requested: **Retain** minimum size for subdivision entitlement of 20ha in Rule 22.4.1.2 (a) (ii) General subdivision.
Decision Reasons:

- The minimum parent title size is appropriate for the Rural area and will serve to not fragment land within the District.

Point Number 459.8
Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (iii) General subdivision, as follows:

The proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.

Decision Reasons:

- As the Rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of the number of compliant parent certificate of titles that are involved.

Point Number 459.9
Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a) (iv) General subdivision, by reducing the minimum lot size to 4,000m².

Decision Reasons:

- A minimum lot size requirement 4,000m² will allow for some flexibility while still providing generous sized lots appropriate in the Rural zone.
- A minimum lot size of 8,000m² will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large Residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- The Regional Council has a 2,500m² minimum in the Rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the Rural land resources in the District. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number 459.10
Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a) (vi) Conservation lot subdivision, by reducing the minimum lot size requirement to 2,500m², or 4,000m².

Decision Reasons:

- A minimum lot size of 8,000m² is not appropriate for all properties and areas.
- The Franklin region has been allowed to subdivide down to 2,500m² in the Rural Zone and this needs to be considered and incorporated into any future District Plan.
- A minimum lot size of 8,000m² is very generous and has a high probability of resulting in fragmentation of Rural land and will potentially designate productive land for inappropriate use in large residential lots.
- For many people 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential.
- The Regional Council has a 2,500m² minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 459.11
Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a) (vii) Conservation lot subdivision, by increasing the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots larger than 1.6ha it is appropriate for the site and will enhance Rural activities or is more in character with the surrounding area.

Point Number 459.12
Summary of Decision Requested: **Amend** Rule 22.4.1.2 (a)(i) General subdivision, so exceptions to the rule (i.e. those that are classified as Prohibited Subdivision) are noted or referred to this rule as is the case in the current Operative Plan.

Decision Reasons:

- Specifications of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number 459.13
Summary of Decision Requested: **Amend** the Proposed District Plan to clarify and further describe a "Significant Natural Area" in the context of Rule 22.4.1.6 Conservation lot subdivision.

Decision Reasons:

- Further definition of these terms will aid in the interpretation of the rule.
- Will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number: 460 **Submitter:** Ben Young
Organisation: Madsen Lawrie Consultants

Point Number 460.1

Summary of Decision Requested: Amend Rule 22.4.1.4 RD1 (a) (i) Boundary relocation, by removing specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Point Number 460.2

Summary of Decision Requested: Amend Rule 22.4.1.4 RD1 (a) (iv) Boundary relocation, by reducing the minimum lot size to at least 4,000m2, if not 2,500m2

OR

Add a specific clause to Rule 22.4.1.4 RD1 (a) (iv) Boundary relocation, to enable boundary relocation for pre-existing lots smaller than 8,000m2 that have been created via compliance with the District Plan- Franklin Section, if the minimum lot size is not reduced to 2,500m2.

Decision Reasons:

- Under the current Operative Waikato District Plan Franklin section there is provision for lot size of down to 2,500m2 in the Rural Zone, therefore by imposing a minimum lot size requirement of 8,000m2 for lots resulting from boundary relocation it would preclude lots <8,000m2 that have been created under the current Franklin section of the District Plan from being able to undertake boundary relocation subdivision in the future.
- A minimum lot size of 8,000m2 will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large residential lots.
- For many people, 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential. This will not promote efficient rural usage of land and jeopardises Policy 5.2.2 of the Proposed District Plan.
- The Regional Council has a minimum lot size of 2,500m2 in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number 460.3

Summary of Decision Requested: Retain the areas to be legally protected and the resultant maximum number of new records of title in Rule 22.4.1.6 (a) (i) Conservation lot subdivision.

Decision Reasons:

- The proposed contiguous areas required for the production of new records of title are achievable and appropriate within the Region and will serve to protect generous regions of significant natural areas.

Point Number 460.4

Summary of Decision Requested: Amend the Proposed District Plan to clarify and further describe a "contiguous area" as contained in Rule 22.4.1.6- Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule.
- Will assist in the identification of areas eligible for subdivision under this rule.

Point Number 460.5

Summary of Decision Requested: Add a new clause to Rule 22.4.1.1 PR3 (c) Prohibited subdivision, as follows:

A transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.

Decision Reasons:

- No reasons provided.

Point Number 460.6

Summary of Decision Requested: Amend Rule 22.4.1.2 (a)(i) General subdivision, by matching the issue of title date with the operative date of the Proposed Plan, if not for all titles then amend the rule for Franklin titles.

Decision Reasons:

- The Proposed Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalized by the implementation of the date restriction which is only relevant to the Waikato section of the current District Plan.
- The date is a reference to a redundant plan and pre-historic rule.

Point Number 460.7

Summary of Decision Requested: Retain the minimum size for subdivision entitlement of 20ha in Rule 22.4.1.2 (a) (ii) General subdivision.

Decision Reasons:

- The minimum parent title size is appropriate for the Rural area and will serve to not fragment land within the District.

Point Number 460.8

Summary of Decision Requested: Amend Rule 22.4.1.2 (a) (iii) General Subdivision, as follows:

The proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.

Decision Reasons:

- As the rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. It could be interpreted that no more than one lot is created per subdivision regardless of number of compliant parent certificate of titles that are involved.

Point Number	460.9
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) (iv) by reducing the minimum lot size to 4,000m2.
Decision Reasons:	<ul style="list-style-type: none"> • A minimum lot size requirement of 4,000m2 will allow for some flexibility while still providing generous sized lots appropriate in the Rural zone. • A minimum lot size of 8,000m2 will only serve to fragment Rural land and potentially designate productive land for inappropriate use in large residential lots. • For many people, 8,000m2 is not a manageable sized lot and Rural usage of the land within many 8,000m2 lots will not be utilised to its full potential. • The Regional Council has a 2,500m2 minimum lot size in the Rural zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the Rural land resources in the District. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m2 and for future development to be consistent with existing development a smaller lot size than 8,000m2 would be more appropriate.

Point Number	460.10
Summary of Decision Requested:	Amend Rule 22.4.1.6 (a) (vi) Conservation lot subdivision, by reducing the lot size requirement to 2,500m2, or 4,000m2.
Decision Reasons:	<ul style="list-style-type: none"> • A minimum lot size of 8,000m2 is not appropriate for all properties and areas. • The Franklin Region has been allowed to subdivide down to 2,500m2 in the Rural Zone and this needs to be considered and incorporated into any future District Plan. • A minimum lot size of 8,000m2 is very generous and has a high probability of resulting in fragmentation of Rural land and will potentially designate productive land for inappropriate use in large residential lots. • For many people 8,000m2 is not a manageable sized lot and rural usage of the land within many 8,000m2 lots will not be utilised to its full potential. • Regional Council has a 2,500m2 minimum in the Rural Zone which should be considered and implemented when designating the minimum lot area so as to minimise urban sprawl and best maintain and enable efficient usage of Rural land resources in the District.

Point Number	460.11
Summary of Decision Requested:	Amend Rule 22.4.1.6 (a) (vii) Conservation lot subdivision, by increasing the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.
Decision Reasons:	<ul style="list-style-type: none"> • There should be the opportunity to make lots larger than 1.6ha it is appropriate for the site and will enhance Rural activities or is more in character with the surrounding area.

Point Number	460.12
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a)(i) General subdivision, so exceptions to the Rule (i.e. those that are classified as Prohibited Subdivision) are noted or referred to in this rule as is the case in the current Operative Plan.
Decision Reasons:	<ul style="list-style-type: none"> • Specifications of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number	460.13
Summary of Decision Requested:	Amend the Proposed District Plan to clarify and further describe a "Significant Natural Area" in the context of Rule 22.4.1.6 Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • Further definition of this term will aid in the interpretation of the rule. • Will assist in the identification of areas eligible for subdivision under this rule.

Submitter Number:	461	Submitter:	Donna-Maria Lincoln
Point Number	461.1		
Summary of Decision Requested:	No specific decision sought, but submission states support for Rule 22.3.7.2 Building setback - sensitive land use. AND No specific decision sought, but submission expresses concern that a major and minor dwelling cannot be built on each of the 4 titles on the property at 100 McGovern Road, Waerenga.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter purchased this property in 2015 with the intention of building a primary dwelling and minor dwelling on each of their four titles located at 100 McGovern Road, Waerenga. The current regime does not enable these developments, contrary to what Council advised at the time of purchase. 		

Submitter Number:	463	Submitter:	Environmental Management Solutions Limited
Point Number	463.1		
Summary of Decision Requested:	Retain Objective 10.2.1 Contaminated land, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports this objective. 		

Point Number 463.2

Summary of Decision Requested: **Retain** Policy 10.2.2 Managing the use of contaminated land, except for the amendments sought below

AND

Amend Policy 10.2.2 (d) Managing the use of contaminated land, as follows:

Ensure that the use, subdivision and development of contaminated land management approaches include where appropriate:

...

Decision Reasons:

- The submitter supports the Policy but considers that the words “where appropriate” should be added to encourage the appropriate option to be adopted as required.
- Not all options identified will be required for each site.

Point Number 463.3

Summary of Decision Requested: **Delete** contaminated land from Rule 16.4.7 Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas.

AND

Add a new set of rules specifically relating to contaminated land that align with National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health provisions (sections 30 and 31 of the Wellington City Council Plan provides an example of this).

Decision Reasons:

- The submitter considers it unacceptable and nonsensical to include Contaminated Land in with notable trees, intensive farming and aggregate extraction areas, significant amenity landscapes etc.
- The provisions set out within the rules contradict those detailed within the Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health) Regulations 2011 which overrides any planning provision.
- Regulation 5(5) of the NESCS specifies subdivision as an activity to which the standard applies where an activity that can be found on the Ministry for Environment Hazardous Activities and Industries List has, is or is more likely than not to have occurred on a property. The regulations have a specific pathway to follow.
- In many cases, it is through the subdivision application that a report investigating and identifying the contamination on a property is identified. This may include several areas, large or small irrespective of proposed subdivision boundaries.
- For subdivision to be enabled, soil contaminant concentrations have to meet the soil contaminant standards set by the NESCS or the site has to be satisfactorily managed.
- It is considered most appropriate for potentially contaminated land to have a separate rule that reflects the requirements of the NESCS.

Point Number 463.4

Summary of Decision Requested: **Delete** contaminated land from Rule 22.4.2. Title boundaries – natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas

AND

Add a new set of rules specifically relating to contaminated land that align with National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health provisions (sections 30 and 31 of Wellington City Council Plan provides an example of this).

Decision Reasons:

- The submitter considers it unacceptable and nonsensical to include Contaminated Land in with notable trees, intensive farming and aggregate extraction areas, significant amenity landscapes etc.
- The provisions set out within the rules contradict those detailed within the Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health) Regulations 2011 which overrides any planning provision.
- Regulation 5(5) of the NESCS specifies subdivision as an activity to which the standard applies where an activity that can be found on the Ministry for Environment Hazardous Activities and Industries List has, is or is more likely than not to have occurred on a property. The regulations have a specific pathway to follow.
- In many cases, it is through the subdivision application that a report investigating and identifying the contamination on a property is identified. This may include several areas, large or small irrespective of proposed subdivision boundaries.
- For subdivision to be enabled, soil contaminant concentrations have to meet the soil contaminant standards set by the NESCS or the site has to be satisfactorily managed.
- It is considered most appropriate for potentially contaminated land to have a separate rule that reflects the requirements of the NESCS.

Point Number 463.5

Summary of Decision Requested: **Delete** the definition for "Hazardous Facility" from Chapter 13 Definitions.

Decision Reasons:

- The submitter does not support the definition provided for a hazardous facility.
- The definition currently relates to both activities involving hazardous substances with no quantification, and premises at which these substances are used, stored or disposed of, including vehicles for their transport located at a facility for more than 'short periods of time'. It is considered that the Council has likely tried to make reference to terminology derived from the MfE HAIL, however, the way this definition is written makes no sense.
- Ultimately the definition could include every quad bike and garage in the District. HSNO and the NES govern the location certification, management and detection of hazardous substances respectively.
- It is considered that no definition is required in the District Plan.

Submitter Number: 464 **Submitter:** Perry Group Limited

Point Number 464.1

Summary of Decision Requested: **Amend** Policy 4.1.3 Location of development, as follows:

(a) Subdivision and development of a residential, commercial and industrial nature is to occur within or near towns and villages where infrastructure and services can be efficiently and economically provided.

(b) ~~Locate~~ Give preference to urban growth areas ~~only~~ where they are consistent with the Future Proof Strategy Planning for Growth 2017, any amended Future Proof documents, the Corridor Plan, and any central government directives on land use.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991.
- It is not contrary to Part 2 and other provisions of the Resource Management Act 1991.
- Economic benefits exist through the promotion and development of tourism and recreation in the corridor.

Point Number 464.2

Summary of Decision Requested: **Add** a new clause (c) to Policy 4.1.6 Commercial and industrial activities, as follows:
(c) Encourage linkages and connections between commercial, industrial, and residential activities.
 AND
 Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991.
- It is not contrary to Part 2 and other provisions of the Resource Management Act 1991.
- Cycling and walking should be promoted for a healthy and active lifestyle.

Point Number 464.3

Summary of Decision Requested: **Add** a new point (c) to Policy 4.1.8 Integration and connectivity, as follows:
(c) Encourage greater connectivity and integration between commercial, industrial, and residential activities.
 AND
 Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991.
- It is not contrary to Part 2 and other provisions of the Resource Management Act 1991.
- Residential and Industrial can live suitably together to create a live, work, play lifestyle for Horotiu.

Point Number 464.4

Summary of Decision Requested: **Amend** Policy 4.1.16 Horotiu, as follows:
(a) Horotiu is developed to ensure:
(i) Future residential areas are connected to or near the existing village;
(ii) Future residential development ~~does not~~ minimises impact on the existing local road network;
(iii) Future residential development acknowledges the benefits of Horotiu's proximity to Hamilton City.
(iii) ~~Effects on amenity from the strategic transport infrastructure are appropriately mitigated~~ Reverse sensitivity effects from the strategic transport infrastructure networks are avoided or minimised
(iv) The strategic industrial node is protected by having an acoustic overlay on neighbouring sensitive land uses while recognising the importance of current and future residential activities.
(v) Future roads, parks, pedestrian and cycle networks are developed in accordance with the Horotiu section of Ngaruawahia, Hapuhopu, Taupiri, Horotiu, Te Kowhai and Glen Massey Structure Plan.
 AND
 Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991.
- It is not contrary to Part 2 and other provisions of the Resource Management Act 1991.
- It will meet the reasonably foreseeable needs of future generations by enabling growth and further land for residential development at Horotiu and the wider District.
- It will enable the social, economic and cultural well-being of the Horotiu community.
- Horotiu is changing into a more urbanised village and so needs sufficient local centre amenities to service its population such as shops, and other services.
- Residential zoning at Horotiu is supported by links to Horotiu Village, the Horotiu Primary School and opportunities to align with the Te Awa Lakes Special Housing Area, which is on adjacent land.
- Horotiu can act as a gateway for a recreation hub that includes the Te Awa River Ride to Ngaruawahia, then onto Hakarimata Reserve and beyond.
- There is the opportunity to strengthen connections from Horotiu back other surrounding areas by cycle way, river and potentially train.

Point Number 464.5

Summary of Decision Requested: **Amend** Policy 4.2.18 Multi-unit development, as follows:
(a) ~~Enable~~ Enable multi-unit residential subdivision and mixed use development ~~is to be~~ designed in a way that:
(i) provides a wide range of housing types;
(ii) Addresses and integrates with adjacent residential development, town centres and public open space while recognising the importance of multi-unit developments role in addressing housing supply.
 ...
(v) Maintains the amenity values of neighbouring sites.
(b) Encourage developments that promote the outcomes of the Waikato District Council's multi-unit development urban design guidelines (Appendix 3.4), in particular section 3
 ...
(iv) ~~Ensuring design is contextually appropriate and promotes local characteristics to contribute to community identity.~~
(v) Designs that respond to and promote the public interface by the provision of:
 A. Streets, communities and public places;
 ...
 AND
 Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991.
- It is not contrary to Part 2 and other provisions of the Resource Management Act 1991.
- The Plan contains provisions to enable higher density residential outcomes which is beneficial.

Point Number 464.6

Summary of Decision Requested: **Amend** Policy 4.7.6 Co-ordination between servicing and development and subdivision, as follows:

Increasingly, infrastructure is put in pursuant to private development agreements and other arrangements, and it should not depend on Council funding or Long-Term Plan arrangements.

(a) ~~Ensure~~ **Encourage** development and subdivision:

(i) ~~To be~~ located in areas where infrastructural capacity has been planned and funded;

(ii) ~~To be~~ located in areas subject to an approved structure plan and provide sufficient infrastructure capacity to meet the demand identified in the structure plan;

(iii) **To** achieves the lot yield anticipated in an approved structure plan; and

(iv) **To** includes infrastructure provision for both the strategic infrastructure network and local infrastructure connections;

while acknowledging that there may be exceptions to the above, for example in the case of a new housing development with infrastructure being provided and paid for in whole or in part by central government or private or public-private funding.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991.
- It is not contrary to Part 2 and other provisions of the Resource Management Act 1991.

Point Number 464.7

Summary of Decision Requested: **Amend** Policy 4.7.11 Reverse sensitivity, as follows:

Reverse sensitivity effects can be mitigated in many circumstances (for example, through consent conditions or land covenants).

(a) Development and subdivision design minimises reverse sensitivity effects arising from current uses on adjacent sites, adjacent activities, or the wider environment; and

(b) Avoid, ~~minimise or appropriately mitigate~~ potential reverse sensitivity effects of locating new dwellings in the vicinity of an intensive farming, extraction industry or industrial activity.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It will promote the sustainable management of resources.
- It will achieve the purpose of the Resource Management Act 1991 ("the RMA").
- It is not contrary to Part 2 and other provisions of the RMA.

Point Number 464.8

Summary of Decision Requested: **Delete** the minimum lot size from Rule 16.1.3 RD1 (c) Restricted Discretionary Activities

AND

Add a matter of discretion to Rule 16.1.3 RD1 Restricted Discretionary Activities, to address lot size

AND

Delete the minimum living court areas and dimensions from Rule 16.1.3 RD1 (h) Restricted Discretionary Activities.

AND

Add a matter of discretion to Rule 16.1.3 RD1 Restricted Discretionary Activities, to address living court areas and dimensions.

AND

Amend Rule 16.1.4 D3 Discretionary Activities as follows:

Any Multi-unit development that does not comply with Rule 16.1.3 RD1 except for Rules 16.1.3 RD1 (c) and (h).

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The requirement per unit and living court areas should be based on specific design considerations for a Multi-Unit development rather than a nominal area.
- The matter should be assessed as part of Council's restricted discretion for a Restricted Discretionary Activity application.
- To reflect previous submission points, as a consequential amendment. The amendment retains these matters as a specific matter of restricted discretion under RD1.
- To reflect correct cross referencing.

Point Number 464.9

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (a) (i) Subdivision – General, to reduce the minimum lot size as follows:

(a)(i) *Proposed lots must have a minimum net site area of ~~450m²~~ 400m², except where the proposed lot is an access allotment or utility allotment or reserve to vest;*

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- Greater residential density will better meet housing needs in the District and help avoid sprawl.

- The Plan contains provisions to enable higher density residential outcomes, which is beneficial.

Point Number 464.10

Summary of Decision Requested: **Delete** Rule 23.4.2 RD1 (a)(i) General Subdivision.
AND
Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- Council should be concerned with amenity values, not with minimum lot sizes in the Country Living Zone.

Point Number 464.11

Summary of Decision Requested: **Amend** the zoning at properties Pt Lot 5 DPS 5176, Lots 1-3 DPS 5176 and Lt Allot 105 Horotiu Parish from Residential Zone to Business Zone (see submission for map of sites Marked Area A).
AND
Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- This will reflect the need for commercial land required to service the adjacent residential areas which also provides a buffer between the Residential Zone and adjacent industrial land.
- It will enable the social, economic and cultural well-being of the Horotiu community.
- Residential and industrial can live suitably together to create a live, work, play, lifestyle for Horotiu.
- Rural residential zoning is not an efficient use of land.

Point Number 464.12

Summary of Decision Requested: **Amend** the zoning of part of the properties Allotment 106 Horotiu Parish and Section 2 SO 486608 from Rural Zone to Residential Zone (see submission for maps).
AND
Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The land is isolated and fragmented from the remainder of the zone.
- The most appropriate zoning of this land is residential.
- It will enable the social, economic and cultural well-being of the Horotiu community.
- Residential and industrial can live suitably together to create a live, work, play, lifestyle for Horotiu.
- Rural residential zoning is not an efficient use of land.

Point Number 464.13

Summary of Decision Requested: **Add** the following specific policy basis for Horotiu which promotes the relationship of Horotiu with the river and its cultural and recreational values as follows:

Development on or near the Waikato River should be reflective of the visual and physical qualities of the river and its cultural importance.

Recreational uses and activities which promote the rich history and recognize the cultural importance of the river edge are promoted.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The plan should promote the relationship of Horotiu with the river and its cultural and recreational values.
- The plan does not acknowledge this.
- It will enable the social, economic and cultural well-being of the Horotiu community.
- Development on or near the Waikato River should be reflective of the environmental, visual and physical amenity of our regions greatest asset and its cultural significance.
- Recreational uses should be promoted along the river to enhance peoples' lifestyles, cultural appreciation and the value of the natural assets within the region.

Point Number 464.14

Summary of Decision Requested: **Add** a further policy/explanatory statement to the Proposed Plan to consider the future and on-going use of mineral extraction and processing sites that have been closed and rehabilitated as follows:

There are a number previously developed mineral extraction and processing sites in the District, some of which have the potential to meet the communities needs for recreation, conservation and reserve needs.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The Rural Zone and the Aggregate Extraction overlay provisions do not consider the future and ongoing use of mineral extraction and processing sites that have been closed and rehabilitated. Such sites provide significant opportunities for recreation activities, wetlands and reserve areas.

Point Number 464.15

Summary of Decision Requested: **Amend** Rule 16.1.3 RD1 (b) Restricted Discretionary Activities, to correct the cross-referencing as follows:

(ii) ~~16.3.8~~ 16.3.6

(iii) ~~16.3.9~~ 16.3.7

(iv) ~~16.3.10~~ 16.3.8

Decision Reasons:

- Correcting cross referencing error.
- The matter should be assessed as part of Council's restricted discretion for a Restricted Discretionary Activity application.

- To reflect previous submission points, as a consequential amendment. The amendment retains these matters as a specific matter of restricted discretion under RDI.
- To reflect correct cross referencing.

Point Number 464.16

Summary of Decision Requested: **Retain** the Residential Zoning at Horotiu and Council's comprehensive approach to this zoning.

Decision Reasons:

- No reasons provided.

Point Number 464.17

Summary of Decision Requested: **Amend** Rule 16.4.1 RDI (b) Subdivision – General, by setting fewer matters of discretion as follows:

(b) Council's discretion shall be restricted to the following matters:

(i) Subdivision layout;

~~(ii) Shape of lots and variation in lot sizes;~~

(iii) Ability of lots to accommodate a practical building platform including geotechnical stability for building;

~~(iv) Likely location of future buildings and their potential effects on the environment;~~

(v) Avoidance or mitigation of natural hazards;

~~(vi) Amenity values and streetscape landscaping;~~

(vii) Consistency with the matters contained within Appendix 3.1 (Residential Subdivision Guidelines);

(viii) Vehicle and pedestrian networks;

(ix) Consistency with any relevant structure plan or master plan including the provision of neighbourhood parks, reserves and neighbourhood centres; and

(x) Provision of infrastructure.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- It represents the most appropriate means of exercising the Waikato District Council's functions, having regard to the efficiency and effectiveness of other available means.
- Some of the changes proposed are therefore not more appropriate in terms of section 32 and other provisions of the Resource Management Act 1991.

Point Number 464.18

Summary of Decision Requested: **Delete** Rule 16.4.4 RDI (a) (iii) Subdivision - Multi-unit development.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The rule is confusing and poorly drafted.
- Subdivision should be guided by the land use consent process and there should be no minimum lot size for Multi-Unit development subdivision where a land use consent has been proposed under Rule 16.1.3.
- There should be no minimum lot size applicable to the underlying site as this is subject to a separate land use consent process (which is design led).

Point Number 464.19

Summary of Decision Requested: **Amend** Rule 16.1.3 RDI Restricted Discretionary Activities, to specify that any application for a resource consent for a Multi-Unit development made under this rule shall not be notified or served on affected persons.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The proposed amendment provides certainty and efficiency in terms of process.
- Council's matters of restricted discretion and compliance with land use effects under Rule 16.2 adequately address matters of adverse effects at external boundaries.

Point Number 464.20

Summary of Decision Requested: **Add** to Rule 16.3.3.1 PI Height – Building general an exception for multi-unit development as follows:

The exception shall be Multi-unit development where the height of any building must not exceed 10m.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- A building height of 7.5m is insufficient to effectively and efficiently provide for Multi-Unit development.

Point Number 464.21

Summary of Decision Requested: **Amend** Rule 16.4.4 RDI (b) (vii) Multi-unit development, by removing reference to the use of design guidelines as a criteria

AND

Add a matter of discretion to Rule 16.1.3 RDI Restricted Discretionary Activities, as follows:

A design report shall be submitted by a suitably qualified and experienced professional which assesses the Multi Unit Development in accordance with the NZ Urban Design Protocol.

AND

Any consequential amendments or further relief to address the concerns raised in the submission.

Decision Reasons:

- The consideration of consistency with design guidance should more appropriately be considered as a matter at the time of the land use consent, in accordance with Rule 16.1.3 RD1 (a) in the right-hand column of the table, (rather than at subdivision stage).
- Requiring consistency with design "guidelines" as a "criteria" is inappropriate as the guidelines provide "guidance" only and may restrict the consideration of changes to design and innovation.
- The submitter sees no reason why the guidelines cannot remain in the plan for reference, however the criteria should instead reflect (in terms of a level of detail provided) those requirements in the NZ Urban Design Protocol.

Submitter Number: 465 **Submitter:** Buckland Marine Limited

Point Number 465.1

Summary of Decision Requested: Add the following activities to Rule 20.1.1 Permitted Activities:

P7 Mechanical workshop

P8 Ancillary yard

P9 New buildings

Include activity specific conditions specifying that building must be related to industrial activity.

P10 Additions and Alterations to buildings

P11 Demolition of buildings

AND

Add the following terms to Chapter 13 Definitions :

- Mechanical workshop - to include Marine outboard servicing centre
- Ancillary yard

Decision Reasons:

- There is currently no provision to allow for a mechanical workshop within the Industrial Zone, nor is there provision within for an ancillary yard.
- The submitter's are a Marine Outboard Servicing Centre (including mechanical workshop) located specifically in the Industrial Zone because that is the most suitable area for their business to be situated, yet under the proposed rule framework this activity would be considered a Non-Complying activity.
- There is no provision for new buildings associated with industrial activities to develop on an industrial site, alterations to existing industrial premises to carry out or for demolition of buildings.

Point Number 465.2

Summary of Decision Requested: Retain Rule 20.2.1 P1 Servicing and hours of operation, as notified.

Decision Reasons:

- The submitter supports the proposed hours of operation adjoining zones of more sensitive land use.

Point Number 465.3

Summary of Decision Requested: Delete Rule 20.2.2 C1 Landscape planting, and impose buffer strips between zones at the time of rezoning and/or during subdivision.

Decision Reasons:

- The submitter supports the use of landscaping strips but considers that this provision would be more appropriately imposed during rezoning and at the time of subdivision as a buffer between zones and not imposed upon individual industrial development.
- Many industrial lots require hard fill and security fencing that will short if vegetation contacts this.
- Industrial land is expensive and often the entire area is required for the proposed industrial activity.

Point Number 465.4

Summary of Decision Requested: Delete Rule 20.2.5.1 P1 (vi) Earthworks.

Decision Reasons:

- The submitter considers that a 1.5m setback from all boundaries is unnecessary where erosion and sediment controls are established on site in accordance with the Waikato Regional Council Erosion and Sediment Control: Guidelines for Soil Disturbing Activities, Report: TR 2009/02.
- The rules should be effects-based.
- A 1.5m setback would be impractical for many industrial sites levelling the site for hard fill up to the boundary.
-

Point Number 465.5

Summary of Decision Requested: Retain Objective 4.6.1 Economic growth of industry, as notified.

Decision Reasons:

- The submitter supports the intention of this objective.

Point Number 465.6

Summary of Decision Requested: Retain Policy 4.6.2 Provide Industrial Zones with different functions, as notified.

Decision Reasons:

- The submitter supports the effects-based basis for this policy.

Point Number 465.7

Summary of Decision Requested: Retain Policy 4.6.3 Maintain a sufficient supply of industrial land, as notified.

Decision Reasons:

- The submitter supports locating industry in the Industrial Zone and ensuring adequate land is available to meet growing demands.

Point Number 465.8

Summary of Decision Requested: Retain Objective 4.6.6 Manage adverse effects, as notified.

Decision Reasons:

- It is important the amenity values of sensitive land uses be protected.

Point Number 465.9

Summary of Decision Requested: Amend Policy 4.6.7 Management of adverse effects within industrial zones, as follows:
(a) Manage adverse effects including visual impact from buildings, parking, loading spaces and outdoor storage, lighting, noise, odour and traffic by managing the location of industrial uses, bulk and form of buildings, landscaping and screening where appropriate.

Decision Reasons:

- The submitter supports the management of adverse effects from within the Industrial Zone.
- It is considered that road frontage is an important aspect for many industrial premise and requiring screening at the interface with roads is impractical.
- Landscaping is supported if it is consistent with the nature and purpose of the Industrial Zone and does not impact on the proposed land use.

Point Number 465.10

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 20.2.6 PI Hazardous substances
 AND
 Delete Table 5.1 Activity Status Table – Permitted Activity Thresholds, from Appendix 5 Hazardous Substances.

Decision Reasons:

- The submitter considers that Hazardous Substances are managed through existing legislation including the Hazardous Substances and New Organisms Act and through the Health and Safety at Work Regulations, 2017.

Point Number 465.11

Summary of Decision Requested: Amend Rule 20.4.1 RD1 Subdivision – General, to allow for the creation of smaller industrial lot sizes to cater for smaller industrial operations.

Decision Reasons:

- An average lot size of 2000m2 with a minimum net site area of 1000m2 is too stringent.
- There are opportunities for smaller industrial activities to operate within the Industrial Zone and these lot sizes will exclude some suitable activities from relocating to this zone.

Point Number 465.12

Summary of Decision Requested: Amend Rule 20.4.3 RD1 (a) Road Frontage, to reduce the road frontage requirements from 15m to 10m.

Decision Reasons:

- The submitter supports the inclusion of a road frontage provision but considers that road frontage is an important aspect for some businesses within the Industrial Zone and considers that 15m is too wide.

Point Number 465.13

Summary of Decision Requested: Amend Rule 20.2.5.1 PI (vii), as follows:
(vii) areas exposed by earthworks are ~~re-vegetated~~ stabilised through vegetation or another suitable mechanism to achieve 80% ground cover.

Decision Reasons:

- It is considered that areas exposed by earthworks may not require re-vegetation, where other stabilising mechanisms such as hard fill are being used.

Submitter Number: 466 **Submitter:** Brendan Balle

Organisation: Balle Bros Group Limited

Point Number 466.1

Summary of Decision Requested: Delete the definition for "Hazardous Facility" from Chapter 13 Definitions.

Decision Reasons:

- The submitter does not support the definition provided for a hazardous facility.
- The definition currently relates to both activities involving hazardous substances (with no quantification) and premises at which these substances are used, stored or disposed of, including vehicles for their transport located at a facility for more than 'short periods of time'.

- The submitter considers that the Council has likely tried to refer to terminology derived from the MfE HAIL; however, the way this definition is written makes no sense.
- Ultimately, the definition could include every quad bike and garage in the District. HSNO and the NESCS govern the location certification, management and detection of hazardous substances respectively.
- No definition for this is required in the District Plan.

Point Number 466.2

Summary of Decision Requested: **Amend** Policy 10.1.4 Reverse sensitivity effects to separate sensitive land use activities from areas where use and storage of hazardous substances is lawfully established.

Decision Reasons:

- The submitter supports locating hazardous substances remote from sensitive land use activities however does not support the current definition of hazardous facilities.

Point Number 466.3

Summary of Decision Requested: **Amend** Rule 14.12.1.4 P4 Traffic Generation to enable annual exemption for horticultural activities during harvest time.

Decision Reasons:

- It is too restrictive for harvest time.
- It is considered that for most of the year this level is achievable however, once a year during harvest time this will be unachievable.
- Commercial vegetable growers do not want to be in a position that they require a consent to harvest.

Point Number 466.4

Summary of Decision Requested: **Amend** Rule 16.1.2 P10 Permitted Activities to encompass all existing commercial vegetable production activities on land that has been rezoned residential/urban.

Decision Reasons:

- The submitter supports commercial vegetable production being a Permitted Activity in the Residential West Te Kauwhata area, however, considers that this Permitted Activity status should be extended to encompass all areas of existing commercial vegetable production that has been rezoned residential.

Point Number 466.5

Summary of Decision Requested: **Add** a new permitted activity to Rule 16.2.4.1 Earthworks – General for Ancillary Rural Earthworks where existing commercial vegetable production operations have been rezoned residential.

Decision Reasons:

- Ancillary rural earthworks should be provided for as a permitted activity to enable the continued operation of existing commercial vegetable production operations.

Point Number 466.6

Summary of Decision Requested: **Amend** Rule 16.2.4.1 RD1 Earthworks to avoid reverse sensitivity effects on any adjoining Rural Zoned land.

Decision Reasons:

- The submitter supports this rule however considers that reverse sensitivity issues should be addressed.

Point Number 466.7

Summary of Decision Requested: **Amend** Rule 16.2.4.3 Earthworks – Significant Natural Area to allow for ground truthing of all Significant Natural Areas prior to inclusion as a property record and on planning maps.

Decision Reasons:

- Many of the identified SNA's do not meet the criteria set out in section 11A of the Waikato Regional Policy Statement.
- Edge effects, fragmentation, cost of management and lack of ecological significance of some of the areas identified raises concerns.
- Ground truthing should be enabled, for all Significant Natural Areas, prior to inclusion on a property record or planning map.
- Where Significant Natural Areas have been ground truthed and confirmed as significant then this rule should apply.

Point Number 466.8

Summary of Decision Requested: **Amend** Rule 16.2.8 P1 Indigenous vegetation clearance inside a Significant Natural Area P1 to allow for ground truthing of all Significant Natural Areas prior to inclusion as a property record and on planning maps.

Decision Reasons:

- The submitter supports this rule, if provision is made for ground truthing of Significant Natural Area at a property level.

Point Number 466.9

Summary of Decision Requested: **Amend** Rule 16.3.9.3 Building setback – Waterbodies to change setback requirements to 30m from a lake and 20m from a watercourse.

Decision Reasons:

- The submitter supports this rule, however question the basis for a 23m setback and consider that setback distances should be aligned throughout the plan and consistent with existing setback requirements.

- Wetland as described in the RMA includes permanently or intermittently wet areas, shallow water, and land water margins that support a natural ecosystem of plants and animals that are adapted to wet conditions.
- Without a size requirement or specification to indigenous vegetation, it is considered that this could refer to any intermittently wet area that has plant life and therefore careful consideration should be given to required setback.

Point Number 466.10

Summary of Decision Requested: Retain Rule 22.1.2 P7 Farming as notified.

Decision Reasons:

- The submitter supports the definition of farming and supports commercial vegetable production being a permitted activity.

Point Number 466.11

Summary of Decision Requested: Retain Rule 22.1.3 RD2 Rural Industry as notified.

Decision Reasons:

- The submitter supports the restricted discretionary status for Rural Industry.

Point Number 466.12

Summary of Decision Requested: Amend Rule 22.1.5 Discretionary Activities to read as 22.1.4 Discretionary Activities.

Decision Reasons:

- Rule 22.1.4 is omitted.
- The numbering should be corrected.

Point Number 466.13

Summary of Decision Requested: Retain Rule 22.2.1.1 P1 Noise – General as notified.

Decision Reasons:

- The submitter supports farming noise being a permitted activity.

Point Number 466.14

Summary of Decision Requested: Retain Rule 22.2.3.1 P1 Earthworks – General as notified.

Decision Reasons:

- The submitter supports the permitted activity status of Ancillary Farming Earthworks.

Point Number 466.15

Summary of Decision Requested: Delete Rule 22.2.3.1 P2 (iii) Earthworks – General.

Decision Reasons:

- The submitter questions the 1.5m setback for earthworks from all boundaries.
- Provided appropriate erosion and sediment controls are in place and all effects are mitigated, there should be no imposed setback for earthworks from the boundary.

Point Number 466.16

Summary of Decision Requested: Amend Rule 22.2.3.3 P1 Earthworks – Significant Natural Area to allow for ground truthing of all Significant Natural Areas prior to inclusion as a property record and on planning maps.

Decision Reasons:

- Many of the identified Significant Natural Areas do not meet the criteria set out in section 11A of the Waikato Regional Policy Statement.
- Edge effects, fragmentation, cost of management and lack of ecological significance of some of the areas identified raises concerns.
- Ground truthing should be enabled, for all Significant Natural Areas, prior to inclusion on a property record or planning map.
- Where Significant Natural Areas have been ground truthed and confirmed as significant then this rule should apply.

Point Number 466.17

Summary of Decision Requested: Delete Table 5.1 Activity Status Table – Permitted Activity Thresholds from Appendix 5 Hazardous Substances, in the context of opposing Rule 22.2.4 P1 Hazardous Substances.

Decision Reasons:

- The submitter opposes the inclusion of a Table specifying quantities of hazardous substances for the Rural Zone.
- This is managed through existing legislation and this is an unnecessary additional level of regulation.

Point Number 466.18

Summary of Decision Requested: Amend Rule 22.2.7 P1 Indigenous vegetation clearance inside a Significant Natural Area to allow for ground truthing of all Significant Natural Areas prior to inclusion as a property record and on planning maps.

Decision Reasons:

- The submitter supports this rule, if provision is made for ground truthing of Significant Natural Areas at a property level.

Point Number 466.19

Summary of Decision Requested: **Amend** Rule 22.3.4.1 Height – Building General so that the height of any building associated with a farming or rural services activity must not exceed 15m.

Decision Reasons:

- The submitter supports having a height restriction on buildings within the Rural Zone, however, consider that a 10m restriction is not practical for sheds/buildings associated with commercial vegetable production storage activities.
- A 15m height restriction would be more realistic.

Point Number 466.20

Summary of Decision Requested: **Delete** reference to 500m2 maximum or 2% of site area from Rule 22.3.6 Building coverage.

Decision Reasons:

- The submitter understands the need to manage building coverage but consider that the outlined parameters are too prescriptive for buildings commonly associated with commercial vegetable production, such as pack houses or cool stores.
- The submitter needs to retain the ability to provide buildings appropriate to the rural production and servicing.
- The submitter needs to ensure that soil removed to enable building and yard cover, is utilized to add to the versatility of existing production land in the same locality.

Point Number 466.21

Summary of Decision Requested: **Amend** Rule 22.3.6 D1 Building coverage to be classified as a Restricted Discretionary Activity rather than a Discretionary Activity
AND

Add new matters of discretion to Rule 22.3.6 Building coverage as follows:

- a. Effects on character and amenity.
- b. Management of effects of stormwater run-off.

Decision Reasons:

- The submitter considers that where the building coverage cannot be met, then the activity status should be Restricted Discretionary.

Point Number 466.22

Summary of Decision Requested: **Amend** Rule 22.3.7.5 P1 Building setback to change the setback to 30m from a lake and 20m from a watercourse.

Decision Reasons:

- The submitter opposes the designated setbacks and consider that it would be more appropriate for these to align with existing setbacks of 30m from a lake and 20m from a watercourse.
- Wetland as described in the RMA includes permanently or intermittently wet areas, shallow water, and land water margins that support a natural ecosystem of plants and animals that are adapted to wet conditions.
- Without a size requirement or specification to indigenous vegetation it is considered that this could refer to any intermittently wet area that has plant life and therefore careful consideration should be given to required setback.

Point Number 466.23

Summary of Decision Requested: **Delete** Rule 22.4.1.1 PR2 and PR3 Prohibited subdivision and replace with a new non-complying rule.

Decision Reasons:

- The submitter supports the protection of high-class soils but consider a prohibited activity status to be too restrictive.
- There may be circumstances where subdivision is a suitable option and consider that there should be a pathway to allow for this.
- On this basis, a non-complying activity status would be more appropriate.
- This activity status will still offer a high level of protection for high-class soils while enabling a pathway if required.

Point Number 466.24

Summary of Decision Requested: **Delete** 22.4.1.2 RD1 General Subdivision.

Decision Reasons:

- The submitter considers that the date that the Record of Title was issued should have no bearing on the subdivision of high-class soils, if to be avoided as per the objectives and policies of the Plan.
- It is considered that a Non-Complying pathway should be provided for the subdivision of high-class soils, as highlighted in 22.4.1.1. This rule would therefore be redundant.

Point Number 466.25

Summary of Decision Requested: **Amend** Rule 22.4.1.5 RD1 Rural Hamlet Subdivision to ensure that proposed lots shall not be located on high class soils, except where primary productive use is no longer viable.

Decision Reasons:

- The rural hamlet subdivision is a sensible provision to avoid fragmentation in rural areas.
- High-class soils should be protected through subdivision unless the area is no longer viable for primary production use.

- This should be reflected within the rule framework, to remain consistent with policies and objectives of the Plan.

Point Number 466.26

Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a)(i) Conservation lot subdivision to remove "Less than 2ha in all other areas" and replace with "between 1ha and 2ha in all other areas = 1 maximum number of new Records of Title".

Decision Reasons:

- The submitter supports the intention of the Conservation Lot subdivision but consider that the number of lots obtained should be relative to the inherent quality to the feature to be protected and not just size.
- The submitter understands that the Significant Natural Area would need to be previously identified, or determined by an ecologist, however, not all features are equal and that in some cases it may be suitable to grant a Record of Title for areas between 1 hectare and 2 hectares in areas other than the Hamilton Basin.
- There should be a 1 hectare minimum for all areas and restricted discretion should also include provision to assess the feature relative to section 11A of the Waikato Regional Policy Statement.
- Factors such as flora, fauna, under-represented habitat or ecosystem type, uncommon systems, healthy and representative example of type, self-supporting capability, ecological sequence, ecological buffer, linkage or corridor and edge effects should all be considered in the assessment to determine the appropriate size of the feature.
- A 1 hectare densely populated, healthy, block in proximity to other features may offer more ecological value than a less dense, isolated feature and should at least be considered for subdivision.
- The submitter questions the value of relying solely on a pre-determined Significant Natural Area, which is unlikely to have been ground truthed, and may not in fact meet the criteria of section 11A.
- The location of created lots is important to ensure that reverse sensitivity from surrounding rural land uses is minimised.

Point Number 466.27

Summary of Decision Requested: **Add** a new discretionary rule to Rule 22.4.1.6 Conservation lot subdivision to allow for transferable development right subdivision. (Refer to Section E39 of the Auckland Unitary Plan for an example).

Decision Reasons:

- The submitter supports enabling transferable rural site subdivision to incentivize the protection of indigenous vegetation in the rural environment while avoiding fragmentation of productive areas.
- It is considered that Waikato District Council should adopt a similar approach to Auckland Council whereby protection of indigenous vegetation that met specified criteria, resulted in titles that could be transferred out of the rural zone to other specified zones.

Point Number 466.28

Summary of Decision Requested: **Amend** Rule 23.1 Land Use – Activities to include farming as a specified activity within the Country Living Zone.

Decision Reasons:

- Lot sizes within the Country Living Zone area must have a net site area of 5000m².
- Many people will buy these as lifestyle lots.
- Farming however, has not been listed as PA, RDA or DA within this zone and by default is therefore considered to be noncomplying in accordance with NC12.

Point Number 466.29

Summary of Decision Requested: **Retain** Rule 23.3.7 PI Building setbacks as notified.

Decision Reasons:

- The submitter supports this.
- An adequate buffer is essential in managing reverse sensitivity matters.

Point Number 466.30

Summary of Decision Requested: **Amend** Rule 23.3.7 RD1 Building setbacks to include consideration of reverse sensitivity as a matter of discretion.

Decision Reasons:

- An additional provision is sought to enable the potential for reverse sensitivity effects to be included as a matter to which discretion is restricted, particularly about the siting of buildings adjoining land used for commercial vegetable production.

Point Number 466.31

Summary of Decision Requested: **Amend** Rule 23.4.2 RD1 General Subdivision to include consideration of reverse sensitivity as a matter of discretion.

Decision Reasons:

- An additional provision is sought to enable the potential for reverse sensitivity effects to be included as a matter to which discretion is restricted, particularly about the siting of buildings adjoining land used for commercial vegetable production.

Point Number 466.32

Summary of Decision Requested: **Retain** Objective 4.1.2 Urban growth and development as notified.

Decision Reasons:

- The submitter supports the consolidation of future settlement in and around towns and villages, if the rezoning protects high-class soils where it is appropriate to do so.
- It is noted that the rezoned land in and around Tuakau is predominantly located on high-class soils, which is currently inconsistent with the objectives and policies of the Plan.

Point Number 466.33

Summary of Decision Requested: **Amend** Policy 4.1.3 Location of development to avoid development on high-class soils where it can demonstrate that the area provides opportunity for viable primary production activities.

Specific regard should be given to:

- Topography
- Productivity
- Sustainability (specifically avoidance of soil pests and diseases, suitably consented irrigation water)
- Reverse sensitivity
- Economic viability

Decision Reasons:

- The submitter supports directing the location of development and considers that this should be expanded to avoid development on high-class soils where viable commercial vegetable production activities can occur.
- There is a scarcity of elite soils in this area.
- It is noted that high-class soils are one component of a viable commercial vegetable production operation with other considerations including topography, productivity, sustainability (specifically avoidance of soil pests and diseases; suitably consented irrigation water), reverse sensitivity and economic viability.
- Specific regard should be given to: Topography, Productivity, Sustainability (specifically avoidance of soil pests and diseases; suitably consented irrigation water), Reverse sensitivity, and Economic viability.

Point Number 466.34

Summary of Decision Requested: **Amend** Policy 4.1.10 Tuakau to reconsider the location of Tuakau residential growth, taking into account the viability of primary production activities in this location.

Specific regard should be given to:

- Topography
- Productivity
- Sustainability (specifically avoidance of soil pests and diseases, suitably consented irrigation water)
- Reverse sensitivity
- Economic viability

AND

Amend Policy 4.1.10 Tuakau to include farming activities and commercial vegetable production with regard to protection from the effects of reverse sensitivity.

Decision Reasons:

- The submitter supports the intention of this policy; however, consider that the area zoned residential to the north and northwest of Tuakau should be reconsidered, particularly with regard to protecting high-class soils.
- The area of rezoned residential land is currently largely market garden land located on high-class soils.
- With limited soils available for this land use and the Waikato Regional Council Healthy Rivers Plan Change 1 restricting a change in land use, it is unlikely that the activities will be able to move.
- Specific assessment should be undertaken with regard to factors that contribute to viable commercial vegetable production activities such as; topography, productivity, sustainability (specifically avoidance of soil pests and diseases; suitably consented irrigation water), reverse sensitivity, and economic viability.

Point Number 466.35

Summary of Decision Requested: **Amend** Policy 4.2.15 (c) Earthworks to include provision for ancillary rural earthworks associated with existing activities

AND

Amend Policy 4.2.15 Earthworks to consider reverse sensitivity issues associated with ancillary rural earthworks associated with existing activities.

Decision Reasons:

- Where rezoning has included high-class soils that are currently used for commercial vegetable production, then ancillary rural earthworks should be enabled and this policy should reflect this.
- The policy should also consider the reverse sensitivity issues likely to develop from residential development occurring around ongoing commercial vegetable production activities that are unable to relocate elsewhere.

Point Number 466.36

Summary of Decision Requested: **Amend** Policy 4.3.3 Future development – Tuakau and Te Kowhai by expanding policy to protect high-class soils for commercial vegetable production, taking into account the viability of commercial vegetable production activities in this location.

Specific regard should be given to:

- Topography
- Productivity
- Sustainability (specifically avoidance of soil pests and diseases, suitably consented irrigation water)
- Reverse sensitivity
- Economic viability

AND

Amend Policy 4.3.3 Future development – Tuakau and Te Kowhai to ensure that reverse sensitivity matters are acknowledged and addressed through the Plan.

Decision Reasons:

- The submitter supports the consolidation of future settlement in and around towns and villages, if the rezoning protects high-class soils where it is appropriate to do so, for reasons outlined elsewhere in this submission in relation to viable commercial vegetable production operations.
- It is noted that the rezoned land in and around Tuakau is predominantly located on high-class soils, which is inconsistent with the objectives and policies of the Plan and is likely to lead to reverse sensitivity issues.
- Specific regard should be given to: Topography, Productivity, Sustainability (specifically avoidance of soil pests and diseases; suitably consented irrigation water), Reverse sensitivity, and Economic viability.

Point Number 466.37

Summary of Decision Requested: Amend Policy 4.3.15 (c) Earthworks to include provision for ancillary rural earthworks associated with existing activities.
AND
Amend Policy 4.3.15 Earthworks to consider reverse sensitivity issues associated with ancillary rural earthworks associated with existing activities.

Decision Reasons:

- Where rezoning has included high-class soils that are currently used for commercial vegetable production, then earthworks provisions must also cater for ongoing earthworks activities associated with this land use and the policy should reflect this.
- Policy should also consider the reverse sensitivity issues likely to develop from residential development occurring around ongoing commercial vegetable production activities that are unable to relocate elsewhere.

Point Number 466.38
Summary of Decision Requested: Amend Policy 4.7.2 Subdivision location and design to consider reverse sensitivity.

Decision Reasons:

- This policy should be expanded to address reverse sensitivity at the interface between rural and urban zones.

Point Number 466.39
Summary of Decision Requested: Amend Policy 4.7.11 Reverse sensitivity to avoid potential reverse sensitivity effects of locating new dwellings near existing commercial vegetable production activities.

Decision Reasons:

- Minimising reverse sensitivity should include commercial vegetable production activities.

Point Number 466.40
Summary of Decision Requested: Retain Objective 5.1.1 The Rural Environment as notified.

Decision Reasons:

- It is considered that the rezoning of high-class soils for residential development surrounding Tuakau, however, contradicts the intention of the Plan and areas of rezoning should be readdressed to protect high class soils where it is appropriate to do so, taking in to account the viability of primary production operations.

Point Number 466.41
Summary of Decision Requested: Retain Objective 5.2.1 Rural resources as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 466.42
Summary of Decision Requested: Retain Policy 5.2.2 High class soils as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 466.43
Summary of Decision Requested: Retain Policy 5.2.3 (a) Effects of subdivision and development on soils to avoid fragmentation.
AND

Amend Policy 5.2.3 (b) Effects of subdivision and development on soils to reflect that subdivision is directed away from high-class soils where viable primary production can occur.

Decision Reasons:

- The submitter supports directing the location of development and avoiding fragmentation.
- The submitter supports avoiding development on high-class soils where viable primary production activities can occur, particularly given the scarcity of elite soils in this area.
- It is noted that high-class soils are one component of a viable primary production operation with other considerations including topography, productivity, sustainability (specifically avoidance of soil pests and diseases; suitably consented irrigation water), reverse sensitivity and economic viability.

Point Number 466.44
Summary of Decision Requested: Retain Objective 5.3.1 (a) Rural character and amenity as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 466.45
Summary of Decision Requested: Retain Policy 5.3.5 Earthworks activities as notified, except for the amendments outlined below
AND
Add a new point to Policy 5.3.5 Earthworks activities as follows:

Decision Reasons:

- It is noted that commercial vegetable production requires cultivation of paddocks and redirection of water flow around the paddock under usual circumstances.
- High class soils are a valuable commodity and should be managed sustainably.
- The re-use of high class soils on sites should be encouraged.

Point Number 466.46

Summary of Decision Requested: **Amend** Policy 5.3.6 Intensive farming activities as follows:

Enable intensive farming activities provided that they operate in accordance with industry best practice and management of any adverse effects both on the site and at the boundary of any adjoining sites.

Decision Reasons:

- The submitter supports this policy, although suggests improved wording.

Point Number 466.47

Summary of Decision Requested: **Retain** Policy 5.6.3 Subdivision within the Country Living Zone as notified, except for the amendments outlined below
AND

Amend Policy 5.6.3 (v) Subdivision within the Country Living Zone as follows:
existing lawfully-established activities, and new development and activities, are protected from reverse sensitivity effects

Decision Reasons:

- The submitter supports this objective; however consider that the provision should ensure that both new development and existing lawfully established development and activities are protected from reverse sensitivity effects.
- This is of particular importance where this zone abuts the Rural Zone.

Point Number 466.48

Summary of Decision Requested: **Retain** Policy 6.1.16 Water conservation as notified.

Decision Reasons:

- A reliable water resource (for human consumption, stock water and crop production) is fundamental to our industry and the submitter supports the encouragement of water conservation.

Point Number 466.49

Summary of Decision Requested: No specific decision sought but submission considers that the provisions set out within the Plan should not duplicate requirements set out in the Hazardous Substances and New Organisms Act and in the Health and Safety at Work Regulations, 2017, and that the submitter 'opposes in part' Section 10.1 Hazardous substances.

Decision Reasons:

- The Plan should not duplicate the Hazardous Substances and New Organisms Act and the Health and Safety at Work Regulations 2017.

Point Number 466.50

Summary of Decision Requested: **Delete** the requirement for 1.5m setback from the boundary where effects are mitigated from Rule 24.2.4.1 PI Earthworks.

Decision Reasons:

- The submitter questions the requirement for a 1.5m setback from all boundaries where appropriate erosion and sediment controls are in place and effects are mitigated.
- This is unworkable.

Point Number 466.51

Summary of Decision Requested: **Amend** Rule 24.3.6.2 PI Building setbacks – sensitive land use to ensure adequate setbacks are maintained for sensitive land uses.

Decision Reasons:

- The submitter seeks measures to adequately avoid and mitigate the potential for reverse sensitivity effects between sensitive land uses and farming activities.

Point Number 466.52

Summary of Decision Requested: **Retain** the definition for "agricultural and horticultural research activities" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports this definition.

Point Number 466.53

Summary of Decision Requested: **Amend** the definition of "Ancillary Rural Earthworks in Chapter 13 Definitions to provide clarity around the term land preparation, specifically to include:

means the disturbance of soil by machinery for planting, replanting, tending or harvesting pasture or crops. Land preparation includes blading, contour ploughing, ripping, mounding, stepping, contouring, bunding and sediment control measures and drainage associated with horticultural crops but does not include direct drilling or mechanical land preparation associated with plantation forestry.

AND

Amend the definition for "Earthworks" in Chapter 13 Definitions to exclude ancillary rural earthworks as follows:

Means modification of land surfaces by blading, contouring, ripping, moving, removing, placing or replacing soil or earth, or by excavation, or by cutting or filling operations, but excludes ancillary rural earthworks.

Decision Reasons:

- The submitter supports the definition of Ancillary rural earthworks but consider clarification of land preparation should be further clarified within the definition.
- Ancillary rural earthworks are a fundamental part of commercial vegetable production operations and should be specifically excluded from the definition of earthworks.

Point Number

466.54

Summary of Decision Requested:

Amend the definition for "High Class Soils" in Chapter 13 Definitions after consultation with Pukekohe Vegetable Growers Association and HortNZ to further define high class soils.

Decision Reasons:

- The submitter supports the definition of High Class Soils, however consider that other soils should also be included, such as areas of peat soil which are currently high producing areas for commercial vegetable growing, examples of such areas are located in Te Kawwhata, Waikati and Mercer.
- There are also areas where LUC III are used for commercial vegetable production, such as areas around Pukekawa.

Point Number

466.55

Summary of Decision Requested:

Add a definition for "Reverse Sensitivity" into Chapter 13 Definitions as follows:

means the potential for the operation of an existing lawfully established activity to be compromised, constrained, or curtailed by the more recent establishment or alteration of another activity which may be sensitive to the actual, potential or perceived adverse environmental effects generated by an existing activity.

Decision Reasons:

- Terms used in the plan should be defined.
- The Draft National Planning Standards includes a definition of reverse sensitivity.

Point Number

466.56

Summary of Decision Requested:

Delete the definition for "Rural ancillary earthworks" from Chapter 13 Definitions.

Decision Reasons:

- This is a duplication of the definition for Ancillary Rural Earthworks.

Point Number

466.57

Summary of Decision Requested:

Retain Rule 22.1.5 Non-Complying Activities as notified, except for NC5.

Decision Reasons:

- The submitter supports NC1, NC2, NC3 and NC4.

Point Number

466.58

Summary of Decision Requested:

Retain Policy 5.3.2 Productive rural activities as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number

466.59

Summary of Decision Requested:

Retain Policy 5.3.3 Industrial and commercial activities as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number

466.60

Summary of Decision Requested:

Retain Policy 5.3.4 Density of dwellings and buildings within the rural environment as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number

466.61

Summary of Decision Requested:

Retain Policy 5.3.7 Reverse sensitivity as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number	466.62
Summary of Decision Requested:	Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this policy. The submitter supports the intention of Policy 5.3.8 to protect productive rural areas by directing urban forms of subdivision, use and development to within the boundaries of the towns and villages. However, it is considered that the rezoning of high-class soils for residential use surrounding townships, contradicts the intention of the Plan and areas of rezoning should be readdressed to protect high-class soil where it is appropriate to do so.
Point Number	466.63
Summary of Decision Requested:	Retain Policy 5.3.9 Non-rural activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this policy.
Point Number	466.64
Summary of Decision Requested:	No specific decision sought but submission opposes in part Policy 10.1.3 Residual risks of hazardous substances and considers the Plan should avoid duplication of effort with existing legislation/regulation in managing residual risks from hazardous substances.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	466.65
Summary of Decision Requested:	Delete requirement for 1.5m setback from boundary where effects are mitigated from Rule 16.2.4.1 PI Earthworks – General.
Decision Reasons:	<ul style="list-style-type: none"> The submitter questions the requirement for 1.5m setback from all boundaries where appropriate erosion and sediment controls are in place and effects are mitigated and consider that this is unworkable.
Point Number	466.66
Summary of Decision Requested:	Amend Rule 16.2.4.3 Earthworks – Significant Natural Area to remove the 1.5m setback for earthworks, provided all effects be mitigated.
Decision Reasons:	<ul style="list-style-type: none"> The submitter questions a 1.5m setback for earthworks from all boundaries and consider that the rule should be effects based and therefore the setback is not required where effects can be mitigated.
Point Number	466.67
Summary of Decision Requested:	Add a new clause (vi) to Rule 16.2.8 PI Indigenous vegetation clearance inside a Significant Natural Area as follows: <i>(vi) removal of vegetation for pest management and biosecurity works.</i>
Decision Reasons:	<ul style="list-style-type: none"> Vegetation clearance may occur in a Significant Natural Area adjoining commercial vegetable production land where the area may contain a known biosecurity risk.
Point Number	466.68
Summary of Decision Requested:	Amend Rule 22.2.3.3 PI Earthworks – Significant Natural Area to remove the 1.5m setback for earthworks, provided all effects be mitigated.
Decision Reasons:	<ul style="list-style-type: none"> The submitter questions a 1.5m setback for earthworks from all boundaries.
Point Number	466.69
Summary of Decision Requested:	Add a new clause (vi) to Rule 22.2.7 PI Indigenous vegetation clearance inside a Significant Natural Area as follows: <i>(vi) removal of vegetation for pest management and biosecurity works.</i>
Decision Reasons:	<ul style="list-style-type: none"> Vegetation clearance may occur in a Significant Natural Area adjoining commercial vegetable production land where the area may contain a known biosecurity risk.
Point Number	466.70
Summary of Decision Requested:	Amend Rule 22.3.6 Building coverage to specify that buildings associated with farming activities are a permitted activity.
Decision Reasons:	<ul style="list-style-type: none"> The submitter understands the need to manage building coverage but consider that the outlined parameters are too prescriptive for buildings commonly associated with commercial vegetable production, such as pack houses or cool stores. The submitter needs to retain the ability to provide buildings appropriate to the rural production and servicing. The submitter needs to ensure that soil removed to enable building and yard cover, is utilized to add to the versatility of existing production land in the same locality.

Point Number 466.71

Summary of Decision Requested: Amend Rule 22.4.1.6 Conservation lot subdivision to allow for ground truthing of Significant Natural Areas.

Decision Reasons:

- The submitter supports the intention of the Conservation Lot subdivision but consider that the number of lots obtained should be relative to the inherent quality to the feature to be protected and not just size.
- The submitter understands that the Significant Natural Area would need to be previously identified, or determined by an ecologist, however, not all features are equal and that in some cases it may be suitable to grant a Record of Title for areas between 1 hectare and 2 hectares in areas other than the Hamilton Basin.
- There should be a 1 hectare minimum for all areas and restricted discretion should also include provision to assess the feature relative to section 11A of the Waikato Regional Policy Statement.
- Factors such as flora, fauna, under-represented habitat or ecosystem type, uncommon systems, healthy and representative example of type, self-supporting capability, ecological sequence, ecological buffer, linkage or corridor and edge effects should all be considered in the assessment to determine the appropriate size of the feature.
- A 1 hectare densely populated, healthy, block in proximity to other features may offer more ecological value than a less dense, isolated feature and should at least be considered for subdivision.
- The submitter questions the value of relying solely on a pre-determined Significant Natural Area, which is unlikely to have been ground truthed, and may not in fact meet the criteria of section 11A.
- The location of created lots is important to ensure that reverse sensitivity from surrounding rural land uses is minimized.

Point Number 466.72

Summary of Decision Requested: Amend the matters of discretion in Rule 22.4.1.6 Conservation lot subdivision to include compliance with criteria set out in section 11A of Waikato Regional Policy Statement.

Decision Reasons:

- The submitter supports the intention of the Conservation Lot subdivision but consider that the number of lots obtained should be relative to the inherent quality to the feature to be protected and not just size.
- The submitter understands that the Significant Natural Area would need to be previously identified, or determined by an ecologist, however, not all features are equal and that in some cases it may be suitable to grant a Record of Title for areas between 1 hectare and 2 hectares in areas other than the Hamilton Basin.
- There should be a 1 hectare minimum for all areas and restricted discretion should also include provision to assess the feature relative to section 11A of the Waikato Regional Policy Statement.
- Factors such as flora, fauna, under-represented habitat or ecosystem type, uncommon systems, healthy and representative example of type, self-supporting capability, ecological sequence, ecological buffer, linkage or corridor and edge effects should all be considered in the assessment to determine the appropriate size of the feature.
- A 1 hectare densely populated, healthy, block in proximity to other features may offer more ecological value than a less dense, isolated feature and should at least be considered for subdivision.
- The submitter questions the value of relying solely on a pre-determined Significant Natural Area, which is unlikely to have been ground truthed, and may not in fact meet the criteria of section 11A.
- The location of created lots is important to ensure that reverse sensitivity from surrounding rural land uses is minimized.

Point Number 466.73

Summary of Decision Requested: Add a new matter of discretion to Rule 22.4.1.6 Conservation lot subdivision regarding the potential for reverse sensitivity effects.

Decision Reasons:

- The submitter supports the intention of the Conservation Lot subdivision but consider that the number of lots obtained should be relative to the inherent quality to the feature to be protected and not just size.
- The submitter understands that the Significant Natural Area would need to be previously identified, or determined by an ecologist, however, not all features are equal and that in some cases it may be suitable to grant a Record of Title for areas between 1 hectare and 2 hectares in areas other than the Hamilton Basin.
- There should be a 1 hectare minimum for all areas and restricted discretion should also include provision to assess the feature relative to section 11A of the Waikato Regional Policy Statement.
- Factors such as flora, fauna, under-represented habitat or ecosystem type, uncommon systems, healthy and representative example of type, self-supporting capability, ecological sequence, ecological buffer, linkage or corridor and edge effects should all be considered in the assessment to determine the appropriate size of the feature.
- A 1 hectare densely populated, healthy, block in proximity to other features may offer more ecological value than a less dense, isolated feature and should at least be considered for subdivision.
- The submitter questions the value of relying solely on a pre-determined Significant Natural Area, which is unlikely to have been ground truthed, and may not in fact meet the criteria of section 11A.
- The location of created lots is important to ensure that reverse sensitivity from surrounding rural land uses is minimized.

Point Number 466.74

Summary of Decision Requested: Explore rates relief for the following situations:

- Where high class soils are rezoned for urban growth but remain in primary production use to assist in retaining economic viability.
- Large scale ecological enhancement areas retired from productive use.

Decision Reasons:

- No reasons provided.

Point Number 466.75

Summary of Decision Requested: No specific decision sought, but submission considers that hazardous substances are managed through existing legislation and the approach of the Proposed District Plan is over-regulation and unnecessary.

Decision Reasons:

- The justification I the s32 is inadequate.

Point Number 466.76

Summary of Decision Requested: No specific decision sought, but submission considers the rezoning of High Class Soils for residential use may be inconsistent with the policies and objectives of the Proposed District Plan in some instances.

Decision Reasons:

- The s32 analysis notes that 50% of growth areas contain high class soils and that 57% are in Tuakau.

Point Number	466.77
Summary of Decision Requested:	No specific decision sought, but submission supports avoiding rural land fragmentation through the concentration of housing development in growth nodes, in and around town centres.
Decision Reasons:	<ul style="list-style-type: none"> Submission supports avoiding rural land fragmentation through the concentration of housing development in growth nodes, in and around town centres.

Point Number	466.78
Summary of Decision Requested:	No specific decision sought, but submission considers that significant ecological enhancement (wherever it occurs) should be given a significant weighting, and current rules around environmental and enhancement provisions are too restrictive and provide minimal incentivisation for ecological management.
Decision Reasons:	<ul style="list-style-type: none"> Submission considers that significant ecological enhancement (wherever it occurs) should be given a significant weighting, and current rules around environmental and enhancement provisions are too restrictive and provide minimal incentivisation for ecological management.

Submitter Number:	467	Submitter:	Ben Young
Organisation:	Madsen Lawrie Consultants		

Point Number	467.1
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a)(i) General Subdivision, to match the issue of title date to the operative date of the Proposed District Plan, if not for all titles, then at least for Franklin titles.
Decision Reasons:	<ul style="list-style-type: none"> The Proposed District Plan is incorporating Franklin Section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction, which is only relevant to the Waikato Section of the Operative District Plan.

Point Number	467.2
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a)(iii) General Subdivision, as follows: <i>The proposed subdivision must create no more than one additional lot, excluding an access allotment, for every compliant parent certificate of title.</i>
Decision Reasons:	<ul style="list-style-type: none"> As the rule reads in its current form, it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title. The rule could be interpreted that no more than one lot is created per subdivision regardless of number of compliant parent certificate of titles that are involved.

Point Number	467.3
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a)(iv) General Subdivision, to reduce the minimum lot size from 8,000m ² to 4,000m ² .
Decision Reasons:	<ul style="list-style-type: none"> A minimum lot size of requirement of 4,000m² will allow for some flexibility while still provided generously sized lots appropriate in the Rural Zone. A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots. For many people, 8,000m² is not a manageable sized lot and rural usage of the land within many 8,000m² lots will not be utilised to its full potential. Waikato Regional Council has a 2,500m² minimum in the Rural Zone, which should be considered when designating lot minimum area to minimise urban sprawl and best maintain the rural land resources in the district. This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m² and for future development to be consistent with existing development a smaller lot size than 8,000m² would be more appropriate.

Point Number	467.4
Summary of Decision Requested:	Amend Rule 22.4.1.4 (a)(i) Boundary relocation, to remove the specification of a date for titles undergoing the boundary relocation.
Decision Reasons:	<ul style="list-style-type: none"> Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation. It is unclear as to what will be achieved by the imposition of such a date.

Point Number	467.5
Summary of Decision Requested:	Amend the Proposed District Plan to clarify and further describe a "contiguous area" in the context of Rule 22.4.1.6 (a)(i) Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> Further definition of this term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number	467.6
Summary of Decision Requested:	Amend Rule 22.4.1.6 (a)(vi) Conservation lot subdivision, to reduce the minimum lot size requirement from 8,000m ² to 4,000m ² or 2,500m ² .

Decision Reasons:

- A minimum lot size of 8,000m² is not appropriate for all properties and areas.
- The Franklin region has been allowed to subdivide down to 2,500m² in the Rural Zone and this should be considered and incorporated into any future District Plan, especially if future development is to be in keeping with the existing rural character and amenity of areas within Franklin.
- A minimum lot size of 8,000m² is very generous, has a high probability of resulting in fragmentation of rural land, and will potentially designate productive land for inappropriate use in large residential lots.
- For many people, 8,000m² is not a manageable sized lot and rural land will not be utilised to its full potential.
- Waikato Regional Council requires a 2,500m² minimum lot size in the Rural Zone, which should be considered and implemented to minimise urban sprawl, and best maintain and enable efficient use of rural land resources in the district.

Point Number

467.7

Summary of Decision Requested:

Amend Rule 22.4.1.6 (a)(vii) Conservation lot subdivision, to increase the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be opportunity to make lots larger than 1.6ha if it is appropriate for the site and will enhance rural activities or is more in character with the surrounding area.

Point Number

467.8

Summary of Decision Requested:

Amend Rule 22.4.1.6 (a)(viii) Conservation lot subdivision, as follows:

This rule or its equivalent in a previous District Plan has not previously been used to gain an additional subdivision entitlement;

Decision Reasons:

- This rule appears to preclude any protection of existing unprotected qualifying Significant Natural Features that would qualify for protection since the previous environmental lot subdivision.
- This rule should only reference any feature protected under the Proposed District Plan.

Point Number

467.9

Summary of Decision Requested:

Amend Rule 22.4.1.2 (a)(i) General Subdivision, to note or refer to the exceptions to this rule such as prohibited subdivision, as is the case in the Operative District Plan.

Decision Reasons:

- Specification of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number

467.10

Summary of Decision Requested:

Amend the Proposed District Plan to clarify and further describe a "Significant Natural Area" in the context of Rule 22.4.1.6 (a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number

467.11

Summary of Decision Requested:

Amend Rule 22.4.1.4 (a)(iv) Boundary relocation, to reduce the minimum lot size from 8,000m² to 4,000m² or 2,500m²

OR

Add a new clause to Rule 22.4.1.4 (a)(iv) Boundary relocation to enable boundary relocation for pre-existing lots smaller than 8,000m² that have been previously created in compliance with the Franklin Section of the District Plan, in the event that the minimum lot size is not reduced to 2,500m².

Decision Reasons:

- The operative Franklin Section in the Operative District Plan contains a provision for a minimum lot size of 2,500m² in the Rural Zone.
- Imposing a minimum lot size requirement of 8,000m² for lots resulting from a boundary relocation would preclude lots less than 8,000m² that have been created under the operative Franklin Section from being used for a boundary relocation in the future.
- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially result in productive land being used inappropriately for large residential lots.
- For many people, 8,000m² is not a manageable sized lot and rural land will not be used to its full potential.
- This will not promote efficient rural use of the land and will jeopardise Policy 5.2.3 (a) Effects of subdivision and development on soils.
- Waikato Regional Council requires a 2,500m² minimum lot size in the Rural Zone which should be considered to minimise urban sprawl and best maintain and enable efficient use of rural land resources in the district.

Point Number

467.12

Summary of Decision Requested:

Retain the areas to be legally protected and the resultant maximum number of new Records of Title in Rule 22.4.1.6 (a)(i) Conservation lot subdivision, as notified.

Decision Reasons:

- The proposed contiguous areas required for the production of new Records of Title are achievable and appropriate within the region and will serve to protect generous regions of Significant Natural Areas.

CKL

Point Number

471.1

Summary of Decision Requested:

Amend Rule 22.1.5 NCI Non-Complying Activities, as follows:

Construction of a building located on an indicative road that has not yet been vested.

AND

Any consequential amendments necessary.

Decision Reasons:

- The requested amendment will avoid the need for resource consent when a road has been located on a different alignment to that shown on the planning maps.

Point Number

471.2

Summary of Decision Requested:

Amend Rule 22.2.3.1 P1 (a)(iv) Earthworks - General, as follows:

(iv) A building platform for a residential activity, including accessory buildings and access.

AND

Any consequential amendments necessary.

Decision Reasons:

- Include provision of access within the scope of permitted earthworks.

Point Number

471.3

Summary of Decision Requested:

Delete Rule 22.2.3.1 P2 (a)(iii) Earthworks - General.

AND

Any consequential amendments necessary.

Decision Reasons:

- Earthworks within 1.5m of a boundary are inevitable and even the most minor activity, such as digging a post hole, would trigger a requirement for resource consent.

Point Number

471.4

Summary of Decision Requested:

Amend Rule 22.2.3.1 P4 (a)(i) Earthworks - General, as follows:

(i) not exceed a volume of ~~200m³~~ 1000m³;

AND

Any consequential amendments necessary.

Decision Reasons:

- A maximum volume of 200m³ for fill material is too restrictive.

Point Number

471.5

Summary of Decision Requested:

Amend Rule 22.3.1 Number of dwellings within a lot, so that the term "lot" is replaced with "site".

AND

Any consequential amendments necessary.

Decision Reasons:

- The term "lot" is not defined in Chapter 13.

Point Number

471.6

Summary of Decision Requested:

Amend Rule 22.3.2 Minor dwelling, so that the term "lot" is replaced with "site"

AND

Amend Rule 22.3.2 P1 (a) Minor dwelling as follows:

(a) One minor dwelling not exceeding 70m² gross floor area (excluding garage), within a lot.

AND

Any consequential amendments necessary.

Decision Reasons:

- The term "lot" is not defined in Chapter 13.
- The submitter considers that garages should be excluded from the area of a minor dwelling.

Point Number

471.7

Summary of Decision Requested:

Delete several terms such as "Outstanding Natural Character Area" and "High Natural Character Area" from Rule 22.3.3 Buildings and structures in Landscape and Natural Character Areas

OR

Add definitions for areas such as Outstanding Natural Character Area and High Natural Character Area to Chapter 13 Definitions.

AND

Any consequential amendments necessary.

Decision Reasons:

- There are no definitions for several of the areas in this rule.

Point Number	471.8
Summary of Decision Requested:	<p>Amend Rule 22.3.4.1 P2 Height - Building General, as follows:</p> <p>P2 The <u>maximum</u> height of any dwelling or building must not exceed 7.5m in a Significant Amenity Landscape.</p> <p>AND</p> <p>Any consequential amendments necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> • A dwelling is a building.
Point Number	471.9
Summary of Decision Requested:	<p>Amend Rule 22.3.7.1 Building Setbacks - All boundaries, by deleting the term "Record of Title" and replacing with "site".</p> <p>AND</p> <p>Any consequential amendments necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The term "site" is more appropriate and is defined in Chapter 13.
Point Number	471.10
Summary of Decision Requested:	<p>Amend Rule 22.3.7.1 P1, P2, P3 and P4 Building Setbacks - All boundaries, as follows:</p> <p>P1 (a)(ii) 17.5m from the centre line of an indicative road <u>that has not yet been vested</u>;</p> <p>P2 (a)(ii) 17.5m from the centre line of an indicative road <u>that has not yet been vested</u>;</p> <p>P3 (a)(ii) 22m from the centre line of an indicative road <u>that has not yet been vested</u>;</p> <p>P4 (a)(ii) 22m from the centre line of an indicative road <u>that has not yet been vested</u>;</p> <p>AND</p> <p>Any consequential amendments necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The requested amendments will avoid the need for resource consent when a road has been located in a different alignment to that shown on the planning maps.
Point Number	471.11
Summary of Decision Requested:	<p>Amend Rule 22.3.7.1 Building Setbacks - All boundaries to rationalise building setbacks in the Rural Zone. All sites less than 1.6 ha shall have side and rear boundary setbacks of 12m and a road setback of 7.5m.</p> <p>AND</p> <p>Any consequential amendments necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> • A 25m setback on a small lot restricts development on a site. • The intent of the rule traditionally relates to reverse sensitivity, however a landowner should be able to build where they like within reasons. • The requested amendments bring the Proposed District Plan more in line with Permitted Boundary Activities.
Point Number	471.12
Summary of Decision Requested:	<p>Amend Rule 22.3.7.5 P1 Building setback - water bodies, as follows:</p> <p>P1 (a) Any building must be set back a minimum of <u>32m</u>:</p> <p>(i) 32m from the margin of any:</p> <p>A. Lake; with a <u>bed area of 8ha or more or and</u></p> <p>B. Wetland <u>with an area greater than 1ha; and</u></p> <p>(ii) 22m from the C, river bank of any river other than the Waikato River and Waipa River whose bed has an average width 3m or more; and</p> <p>AND</p> <p>Any consequential amendments necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> • There needs to be parameters as to when this rule applies. • Existing parameters from the Operative District Plan are sought.
Point Number	471.13
Summary of Decision Requested:	<p>Amend Rule 22.4 Subdivision, by replacing the term "lot" with "Record of Title".</p> <p>AND</p> <p>Any consequential amendments necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Need consistency in terminology • Need to avoid complication of any boundary relocation involving an amalgamation.
Point Number	471.14
Summary of Decision Requested:	<p>Amend Rule 22.4.1.1 P1 Prohibited Subdivision, as follows:</p>

Any subdivision within the Urban Expansion Area involving the creation of any additional ~~lot~~ record of title excluding one containing a dwelling existing as at 18 July 2018.

AND

Any consequential amendments necessary.

Decision Reasons:

- Subdivisions involving existing dwellings can assist with the creation of large land holdings suitable for future urban development.

Point Number 471.15

Summary of Decision Requested: **Add** the following exception to Rule 22.4.1.1 PR2 (b) Prohibited subdivision:

(v) Rural Hamlet (Rule 22.4.1.5).

AND

Add a further exception to Rule 22.4.1.1 PR2 (b) Prohibited subdivision as follows if the requested relief in relation to Rule 22.4 is not accepted:

(vi) Boundary Relocation (Rule 22.4.1.4).

AND

Any consequential amendments necessary.

Decision Reasons:

- No reasons provided.

Point Number 471.16

Summary of Decision Requested: **Add** the following exception to Rule 22.4.1.1 PR3 (b) Prohibited subdivision:

(v) Rural Hamlet (Rule 22.4.1.5).

AND

Add a further exception to Rule 22.4.1.1 PR3 (b) Prohibited subdivision as follows if the requested relief in relation to Rule 22.4 Subdivision is not accepted:

(vi) Boundary Relocation (Rule 22.4.1.4).

AND

Any consequential amendments necessary.

Decision Reasons:

- No reasons provided.

Point Number 471.17

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR3 (c)(i) Prohibited subdivision, as follows:

(c) Rule PR3(a) does not apply to the following:

(i) ~~a boundary relocation or adjustment between Records of Title that existed prior to 6 December 1997 (refer to Rule 22.4.1.4) Where the Record of Title was created as a result of a boundary relocation or boundary adjustment under the former District Plan; or~~

AND

Any consequential amendments necessary.

Decision Reasons:

- No reasons provided.

Point Number 471.18

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General Subdivision so that a subdivision activity that fails a rule defaults to either a restricted discretionary activity or discretionary activity at worst.

AND

Any consequential amendments necessary.

Decision Reasons:

- Non-complying activities should be strategically used where subdivision is generally discouraged.
- Having all rule non-compliances (no matter how minor) default to a non-complying activity is not good planning practice.
- The submitter states that a restricted discretionary activity is entirely appropriate and that a discretionary activity should be considered 'at worst'.

Point Number 471.19

Summary of Decision Requested: **Delete** Rule 22.4.1.2 RD1 (a)(v) General subdivision, which relates to the required percentages of high class soil within the proposed lots.

AND

Any consequential amendments necessary.

Decision Reasons:

- The rule is confusing, difficult to administer and complicates the consenting process.

Point Number 471.20

Summary of Decision Requested: **Amend** Rule 22.4.1.4 RD1 (a)(i) Boundary relocation, as follows:

(i) Relocate a common boundary or boundaries between two or more Records of Title ~~that existed prior to 18 July 2018;~~

AND

Any consequential amendments necessary.

Decision Reasons:

- Boundary relocations between more than two Records of Title will be necessary from time to time.
- There is no reason why boundary relocations should not be able to occur between Records of Title that are created after 18 July 2018.

Point Number 471.21

Summary of Decision Requested: **Add** "Rural Hamlet Subdivision" as a defined term in Chapter 13 Definitions in the context of Rule 22.4.15 Rural Hamlet Subdivision.

AND

Any consequential amendments necessary.

Decision Reasons:

- A clear definition will help avoid confusion in application of the rule.

Point Number 471.22

Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a)(i) Conservation lot subdivision, as follows:

(i) The lot must contain a ~~contiguous~~ area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist in accordance with the table below:

AND

Any consequential amendments necessary.

Decision Reasons:

- Legal and physical protection of Significant Natural Areas should be encouraged regardless of being physically contiguous or not.

Point Number 471.23

Summary of Decision Requested: **Amend** Rule 22.4.2-Title boundaries – natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas to clarify the intent. However, no specific details of the relief sought are provided.

AND

Any consequential amendments necessary.

Decision Reasons:

- It is not clear when this rule would apply and why it would affect built form in a subdivision.
- The reference to contaminated land is likely to catch activities covered under the National Environmental Standard for Contaminated Soil where central government has recommended that local authorities remove provisions from their district plans to avoid duplication of planning processes.

Point Number 471.24

Summary of Decision Requested: **Add** a definition for the term "Environmental Protection Area" to Chapter 13: Definitions

AND

Add "Environmental Protection Area" to the planning maps.

AND

Any consequential amendments necessary.

Decision Reasons:

- The intent and extent is not clear.

Point Number 471.25

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.4.7 RD1 (b) Esplanade reserves and esplanade strips, as follows:

(y) ~~costs and benefits of acquiring the land.~~

AND

Any consequential amendments necessary.

Decision Reasons:

- The requested matter of discretion will allow Council to consider the costs and benefits of a land purchase.

Point Number 471.26

Summary of Decision Requested: **Amend** Rule 22.4.9 RD1 (a)(i) Subdivision - Building platform, as follows:

(i) ~~Has an area of 1000m² exclusive of boundary setbacks;~~

A shape factor, being either:

- *A circle with a diameter of at least 30m, exclusive of boundary setbacks, or*
- *A rectangle of at least 1000m², exclusive of setbacks, and;*
- *Containing a building platform being a circle with a diameter of at least 18m.*

AND

Delete Rule 22.4.9 RD1 (a) (iii).

AND

Any consequential amendments necessary.

Decision Reasons:

- Retain the shape factor and building platform dimensions from the Operative District Plan which have been proven effective.

- Certification of a building platform by a geotechnical engineer is not always necessary. Council can require this on a case by case basis by retaining discretion over this matter in respect to clause (b)(ii).

Point Number 471.27

Summary of Decision Requested: **Amend** Rules 22.4.1.3-Subdivision of Maori Freehold Land, so that a subdivision activity that fails a rule defaults to either a restricted discretionary activity or discretionary activity at worst.

AND

Any consequential amendments necessary.

Decision Reasons:

- Non-complying activities should be strategically used where subdivision is generally discouraged.
- Having all rule non-compliances (no matter how minor) default to a non-complying activity is not good planning practice.
- The submitter states that a restricted discretionary activity is entirely appropriate and that a discretionary activity should be considered 'at worst'.

Point Number 471.28

Summary of Decision Requested: **Amend** Rule 22.4.1.4 Boundary relocation, so that a subdivision activity that fails a rule defaults to either a restricted discretionary activity or discretionary activity at worst.

AND

Any consequential amendments necessary.

Decision Reasons:

- Non-complying activities should be strategically used where subdivision is generally discouraged.
- Having all rule non-compliances (no matter how minor) default to a non-complying activity is not good planning practice.
- The submitter states that a restricted discretionary activity is entirely appropriate and that a discretionary activity should be considered 'at worst'.

Point Number 471.29

Summary of Decision Requested: **Amend** Rule 22.4.1.5 Rural Hamlet Subdivision, so that a subdivision activity that fails a rule defaults to either a restricted discretionary activity or discretionary activity at worst.

AND

Any consequential amendments necessary.

Decision Reasons:

- Non-complying activities should be strategically used where subdivision is generally discouraged.
- Having all rule non-compliances (no matter how minor) default to a non-complying activity is not good planning practice.
- The submitter states that a restricted discretionary activity is entirely appropriate and that a discretionary activity should be considered 'at worst'.

Point Number 471.30

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision, so that a subdivision activity that fails a rule defaults to either a restricted discretionary activity or discretionary activity at worst.

AND

Any consequential amendments necessary.

Decision Reasons:

- Non-complying activities should be strategically used where subdivision is generally discouraged.
- Having all rule non-compliances (no matter how minor) default to a non-complying activity is not good planning practice.
- The submitter states that a restricted discretionary activity is entirely appropriate and that a discretionary activity should be considered 'at worst'.

Point Number 471.31

Summary of Decision Requested: **Amend** Rule 16.3.1 D1 - Dwelling to be a restricted discretionary activity as follows:

~~DRD1~~ A dwelling that does not comply with Rule 16.3.1 P1.

AND

Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.32

Summary of Decision Requested: **Add** "Outstanding Natural Character Areas" and "High Natural Character Areas" to the planning maps.

AND

Any consequential amendments necessary.

Decision Reasons:

- These terms are used in the Proposed District Plan but they are not identified on the planning maps.

Point Number 471.33

Summary of Decision Requested: **Amend** the discretionary activity or non-complying activity status where activities fail development standards to instead provide for these as a restricted discretionary activity.

AND

Any consequential amendments necessary.

Decision Reasons:

- More consistency is required across the various chapters with less use of the discretionary activity or non-complying activity status.
- Discretionary activities and non-complying activities should be reserved for activities (not rule failures) where there are genuine concerns for their establishment in given areas.
- Hamilton City should be used as an example in respect to the use of a restricted discretionary activity status.

Point Number 471.34

Summary of Decision Requested: **Amend** the provisions for earthworks throughout the Proposed District Plan to provide more consistency.
AND
Any consequential amendments necessary.

Decision Reasons:

- More consistency is required across the district in respect to the assessment of earthworks.
- The current provisions for earthworks differ between zones, are ambiguous and do not have a resource management focus.

Point Number 471.35

Summary of Decision Requested: **Amend** Rule 16.1.2 P3 (a) Permitted Activities, to enable retirement villages on a site that has a net area less than 3ha or require resource consent at this scale.
AND
Any consequential amendments necessary.

Decision Reasons:

- There should be better use of standards for a permitted retirement village if that are to be a permitted activity.

Point Number 471.36

Summary of Decision Requested: **Amend** Rule 16.1.2 P4 (e) Permitted Activities, as follows:
(e) Machinery may only be operated between 7.30am and 9pm on any day.
AND
Any consequential amendments necessary.

Decision Reasons:

- Insert text for clarification.

Point Number 471.37

Summary of Decision Requested: **Amend** Rule 16.1.3 RD1 (c) Restricted Discretionary Activities, so that the minimum net site area for multi-unit developments is reduced to 150m² or 200m² per residential unit based on average site area (rather than 300m² per residential unit based on net site area).
AND
Any consequential amendments necessary.

Decision Reasons:

- A minimum average of 300m² net site area does not encourage intensification of infill sites, more so on greenfields land, which often is not inappropriate.
- There needs to be more alignment with minimum unit sizes in the subdivision standards for the Residential Zone.

Point Number 471.38

Summary of Decision Requested: **Amend** Rule 16.2.4.1 P1 (a)(ii) Earthworks - General, by increasing the allowable volume from 250m³ to 500m³.
AND
Any consequential amendments necessary.

Decision Reasons:

- A volume of 250m³ can easily be exceeded and due to topography or ground conditions resource consent should not be required in this instance.
- A maximum volume of 500m³ will allow for variations in topography or ground conditions.
- The effects of earthworks are well understood and can be managed via performance standards.
- The volumes are very restrictive and have no bearing on building or development scale.

Point Number 471.39

Summary of Decision Requested: **Amend** Rule 16.3.2 P1(a)(i) Minor dwelling, by reducing the net site area requirement from 900m² to 600m².
AND
Any consequential amendments necessary.

Decision Reasons:

- A net site area of 900m² is too large given the maximum gross floor area of 70m² for a minor dwelling.
- A net site area of 900m² is very near to enabling the creation of a new site.

Point Number 471.40

Summary of Decision Requested: **Amend** Rule 16.3.7 P1 Living court, to reduce the minimum living court area from 80m² to 60m² per single standalone dwelling, with the potential to require larger dwellings to have an additional 20m².
AND

Any consequential amendments necessary.

Decision Reasons:

- The requirement for the living court to be 80m² is excessive.
- A 60m² living court will provide for larger dwellings or additional bedrooms.

Point Number

471.41

Summary of Decision Requested:

Amend Rule 16.3.9.1 P1 (a)(ii) Building setbacks - All boundaries, as follows:

(ii) 13m from the ~~edge of an indicative road~~, centre line of an indicative road if it has not been constructed and vested.

AND

Any consequential amendments necessary.

Decision Reasons:

- Indicative roads do not have legal boundaries and therefore the planning maps show only their indicative location.
- The planning maps are not drawn at a scale to accurately determine a boundary.
- The centre of an indicate road provides a useful degree of variance.

Point Number

471.42

Summary of Decision Requested:

Amend Rule 16.3.9.1 P3 Building setbacks - All boundaries, as follows:

A garage door facing the street must be set back behind the front facade of the dwelling.

AND

Any consequential amendments necessary.

Decision Reasons:

- Not all garages in front of dwelling facades result in bad design outcomes.

Point Number

471.43

Summary of Decision Requested:

Delete the term "lot" from Rule 16.4.1 RD1 Subdivision - General, and replace with "site"

AND

Any consequential amendments necessary to give effect to the relief sought and ensure consistency across the District Plan.

Decision Reasons:

- Consistency is required across the District Plan.

Point Number

471.44

Summary of Decision Requested:

Amend Rule 16.4.1 RD1 (a)(ii) Subdivision - General, as follows:

(ii) Where roads are to be vested in Council, they ~~must~~ should follow a grid layout;

AND

Any consequential amendments to give effect to the relief sought.

Decision Reasons:

- It may not always be possible for roads to follow a grid layout as topography make require a curvilinear layout.
- Use of the word "must" will result in forced failure of the performance standard and a resulting discretionary activity status.

Point Number

471.45

Summary of Decision Requested:

No specific decision sought, but the submission considers minimum unit size standards (as contained in Rule 16.4.4 Subdivision-Multi unit development) should be a land use requirement. Subdivision around existing or lawfully established units should be enabled.

Decision Reasons:

- The minimum standards should be a land use requirement.
- Subdivision around existing or lawfully established units should be enabled.

Point Number

471.46

Summary of Decision Requested:

Amend Rule 16.4.5 C1 Subdivision - Boundary adjustments to be a permitted activity rather than a controlled activity.

AND

Any consequential amendments necessary.

Decision Reasons:

- Minor boundary adjustments that maintain compliance with bulk and location standards should be a permitted activity subject to appropriate standards.

Point Number

471.47

Summary of Decision Requested:

Amend Rule 16.4.6 Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold, by:

- deleting references to alterations to exclusive use areas; and
- enabling permitted activity amendments in certain circumstances.

AND

Any consequential amendments necessary.

Decision Reasons:

- A change to an exclusive use area is not deemed to be a subdivision under section 218 of the Resource Management Act and, because this is a private covenant matter, it is not able to be controlled by Council.
- It is appropriate for some amendments to flats plans and/or units plans to be a permitted activity.

Point Number 471.48

Summary of Decision Requested: **Add** "residential activity" as a permitted activity to Rule 22.1.2 Permitted Activities.
AND
Any consequential amendments necessary.

Decision Reasons:

- This omission needs to be corrected.

Point Number 471.49

Summary of Decision Requested: **Add** "travellers' accommodation for less than 5 people" as a permitted activity to Rule 22.1.2 Permitted Activities.
AND
Any consequential amendments necessary.

Decision Reasons:

- Retain consistency with the Operative District Plan.
- Rule 22.1.5 D5 lists "travellers' accommodation for more than 5 people".

Point Number 471.50

Summary of Decision Requested: **Amend** Rule 16.3.2 D1 Minor dwelling to be restricted discretionary activity as follows:
~~RD~~ A minor dwelling that does not comply with Rule 16.3.2 P1.
AND
Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.51

Summary of Decision Requested: **Amend** Rule 16.3.3.1 D1 Height - Building general to be a restricted discretionary activity as follows:
~~RD~~ Any building that does not comply with Rule 16.3.3.1 P1.
AND
Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.52

Summary of Decision Requested: **Amend** Rule 16.3.3.3 D1 Height- Buildings, structures and vegetation within an airport obstacle limitation surface to be a restricted discretionary activity as follows:
~~RD~~ A building, structure or vegetation that does not comply with Rule 16.3.3.3 P1.
AND
Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.53

Summary of Decision Requested: **Amend** Rule 16.3.6 D1 Building coverage to be a restricted discretionary activity as follows:
~~RD~~ Total building coverage that does not comply with Rule 16.3.6 P1, P2 or P3.
AND
Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.54

Summary of Decision Requested: **Amend** Rule 16.3.7 D1 Living court to be a restricted discretionary activity as follows:
~~RD~~ A living court that does not comply with Rule 16.3.7 P1 or P2.
AND
Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.55

Summary of Decision Requested: **Amend** Rule 16.3.8 D1 Service court to be a restricted discretionary activity as follows:

~~DRD1~~ A service court that does not comply with Rule 16.3.8 P1.

AND

Any consequential amendments necessary.

Decision Reasons:

- Activities failing a permitted standard should be a restricted discretionary activity, not a discretionary activity.

Point Number 471.56

Summary of Decision Requested: **Delete** Rule 16.1.4 D1 and D2 Discretionary activities

AND

Add these rules to Rule 16.1.3 Restricted Discretionary activities.

AND

Any consequential amendments necessary.

Decision Reasons:

- Permitted activities failing standards should be restricted discretionary activities not discretionary.

Submitter Number: 472

Submitter:

Grant Clune

Organisation:

Jagco 2014 Limited

Point Number 472.1

Summary of Decision Requested: **Amend** the zoning of the 44.543ha properties at 20 and 42 Plantation Road, Te Kauwhata from Rural Zone to the Country Living/Residential Zone (see map attached to submission 474 to which this submission refers).

Decision Reasons:

- The property has access to water supply.
- Proximity to Te Kauwhata town (walkable distance).
- Proximity to State Highway 1 (1 minute drive).
- Perfectly positioned between Auckland, Hamilton and Coastlines.
- Proximity to rail for commuter services.
- Availability of services to meet immediate needs.
- Employment opportunities both locally and for commuters.
- Demand for lifestyle properties.
- Countryside living largely taken up and sold in Te Kauwhata.

Submitter Number: 473

Submitter:

James Walker

Point Number 473.1
