- Education facilities are not listed in the Residential Zone and are therefore a non-complying activity in terms of Rule 16.1.5. However, the majority of education facilities including community education, early childhood education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments located within residential areas are essential social infrastructure that supports these areas.

Point Number 781.11

Summary of Decision Requested: Add new noise standards for education facilities to Rule 16.2.1 Noise as follows:

16.2.1.2 Noise - Education facilities

The operation of any education facilities shall comply with the following noise limits at the boundary of any site within the residential zone, at a point 20m from the facade of any dwelling, or the site boundary, whichever is closest to the dwelling;

- Mon-Sun, 7.00am-10.00pm (0700-2200) 55dBA (Leg)

- Mon-Sun, 10.00pm-7.00am (2200-0700) 45 dBA (Leg)

- LMAX= 75dBA

These noise levels shall not apply to noise from outdoor school activities occurring between 0800 and 1800 hours Monday to Saturday.

Noise levels shall be measured and assessed in accordance with NZS 6801:2008 "Measurement of Environmental Sound" and NZS 6802:2008 "Environmental Noise".

Decision Reasons:

- Noise standards for education facilities in the Residential Zone are needed to enable them to operate without hindrance while recognising the surrounding residential environment.

Point Number 781.12

Summary of Decision Requested: Add a rule for education facilities to Rule 18.1.3 Restricted Discretionary Activities as follows:

Activity

RD3 Education Facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity within the Business Town Centre Zone
- b. Reverse sensitivity effects of adjacent activities
- c. The extent to which the activity may adversely impact on the transport network
- d. The extent to which the activity may adversely impact on the streetscape
- e. The extent to which the activity may adversely impact on the noise environment

Decision Reasons:

- Education facilities are not listed in the Business Town Centre Zone and are therefore a non-complying activity in terms of Rule 18.1.5. Education facilities such as tertiary education institutions, work skills training centres and early childhood education centres may need to be located within this zone for the convenience of parents and students.

Point Number 781.13

Summary of Decision Requested: Add a rule for education facilities to Rule 19.1.2 Restricted Discretionary Activities as follows:

Activity

RD2 Education Facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity within the Business Zone Tamahere.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Education facilities are not listed in the Business Zone Tamahere and are therefore a non-complying activity in terms of Rule 19.1.4. Education facilities such as tertiary education institutions, work skills training centres and early childhood education centres may need to be located within this zone for the convenience of parents and students.

Point Number 781.14

Summary of Decision Requested: Delete Rule 22.8.4 D6 Discretionary Activities for an education facility.

AND

Amend Rule 22.8.3 Restricted Discretionary Activities as follows:

Activity

RD3 Education facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity in the Lakeside Te Kauwhata Precinct.

- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Opposes the activity status given to education facilities in this zone.
- Education facilities such as schools, community education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments within rural areas are essential social infrastructure.
- The submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.15

Summary of Decision Requested: Delete Rule 23.1.2 D5 Discretionary Activities for an education facility
AND
Add a Restricted Discretionary activity rule that provides for education facilities in Rule 23.1.2 as follows:

23.1.2 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities

Activity

RD1 Education facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity in the Country Living Zone.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Opposes the activity status of education facilities in this zone.
- Education facilities such as schools, community education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments within rural areas are essential social infrastructure.
- The submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.16

Summary of Decision Requested: Add a new restricted activity rule to Rule 24.1 Land Use - Activities as follows:

24.1.2 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table:

Activity

RD1 Education facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity in the Village Zone.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Education facilities are not listed in the Village Zone.
- Opposes the non-complying activity status.
- Education facilities such as schools, community education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments within village areas are essential social infrastructure.
- The submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.17

Summary of Decision Requested: Add a new Restricted Discretionary Activity rule to Rule 25.1 Land Use - Activities as follows:

25.1.3 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table:

Activity

RD1 Education facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity in the Reserve Zone.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Education facilities are not listed in the Reserve Zone. Education facilities such as schools, community education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments within village areas are essential social infrastructure.
- The submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.18

Summary of Decision Requested: **Add** a restricted discretionary activity rule to Rule 26.1 Land Use - Activities, as follows:

26.1.3 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities.

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table:

Activity

RD1 Education facilities

Matters of discretion

a. The extent to which it is necessary to locate the activity in the Hampton Downs Sport and Recreation Zone (including Precinct B)

b. Reverse sensitivity effects of adjacent activities

c. The extent to which the activity may adversely impact on the transport network

d. The extent to which the activity may adversely impact on the streetscape

e. The extent to which the activity may adversely impact on the noise environment

Decision Reasons:

- Education facilities are not listed in the Hampton Downs Motor Sport and Recreation Zone.
- Education facilities such as outdoor education centres, sports training establishments and driving schools may need to be located within this zone. The inference is that the submitter requests consistency with their requested definition of 'Education facilities'.
- Opposes the non-complying status.

Point Number 781.19

Summary of Decision Requested: **Amend** Rule 27.1.1 Activity Status Table as follows:

27.1.1 Activity Status Table

~~Teaching and Conference Education Facilities~~

Precinct A: ~~Non-complying~~ Restricted Discretionary

Precinct B: Permitted

Precinct C: ~~Discretionary~~ Restricted Discretionary

Precinct D: ~~Discretionary~~ Restricted Discretionary

AND

Add the following matters of discretion to Rule 27.1 Land Use Activities as follows:

27.1.2 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table:

Activity

RD1 Education facilities

Matters of discretion

a. The extent to which it is necessary to locate the activity in the Te Kowhai Airpark Zone

b. Reverse sensitivity effects of adjacent activities

c. The extent to which the activity may adversely impact on the transport network

d. The extent to which the activity may adversely impact on the streetscape

e. The extent to which the activity may adversely impact on the noise environment

Decision Reasons:

- Opposes the activity status for education facilities.
- Teaching facilities such as tertiary education institutions, work skills training centres, flight schools and early childhood education centres may need to be located within the Te Kowhai Airpark Zone for the convenience of parents and students.
- The submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.20

Summary of Decision Requested: **Add** a new rule for education facilities to Rule 28.1.3 Specific Activities - Restricted Discretionary Activities as follows:

Activity

RD4 Education Facilities

Council's discretion shall be restricted to the following matters:

a. The extent to which the location, bulk, scale and built form of building(s) impacts on natural, ecological, landscape and/or historic heritage values.

b. The extent to which the activity may adversely impact on the transport network.

c. Ability to soften the visual impact of buildings from adjoining residential properties.

d. The extent to which the activity may adversely impact on the streetscape.

e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Opposes the non-complying activity status.

- Education facilities are not listed in the Rangitahi Peninsula Zone. The majority of education facilities including community education, early childhood education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments are located within residential areas like the Rangitahi Peninsula and are essential social infrastructure.
- The submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.21

Summary of Decision Requested: Delete the Te Mata School building (ID 184) from Appendix 30.1 Historic Heritage Items.

Decision Reasons:

- As a requiring authority under section 176.1.a of the RMA, the Ministry is not required to give effect to, or consider the rules of, the district plan. Including the site can unreasonably raise the expectations of school communities that the school site is protected under the district plan.
- Removal of these items will avoid confusion.

Point Number 781.22

Summary of Decision Requested: Delete Harrisville School Teacher's house (ID7) from Appendix 30.1 Historic Heritage Items.

Decision Reasons:

- As a requiring authority under s176 (1) (a) of the RMA 1991 the Ministry is not required to give effect to or consider the rules of the District Plan. By including the site in the Proposed District Plan this can unreasonably raise the expectations of school communities that the school site is protected under the District Plan.
- Removal of these items will avoid confusion.

Point Number 781.23

Summary of Decision Requested: Delete Tamahere School Building (ID 177) from Appendix 30.1 Historic Heritage Items.

Decision Reasons:

- As a requiring authority under a176 (1) (a) of the RMA 1991 the Ministry is not required to give effect to or consider the rules of the District Plan. By including the site in the Proposed District Plan this can unreasonably raise the expectations of school communities that the school site is protected under the District Plan.
- Removal of these items will avoid confusion.

Point Number 781.24

Summary of Decision Requested: Amend Rule 20.1.1 P2 Permitted Activities as follows:

P2 Trade and industry training activity

Any education facility which is not incidental to a trade and industry training activity is a restricted discretionary activity.

AND

Add a new restricted discretionary activity rule for educational facilities in the Industrial Zone as follows:

20.1.2 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities.

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table.

Activity

RD1 Education Facilities

Matters of discretion

- The extent to which it is necessary to locate the activity within the Industrial Zone.
- Reverse sensitivity effects of adjacent activities.
- The extent to which the activity may adversely impact on the transport network.
- The extent to which the activity may adversely impact on the streetscape.
- The extent to which the activity may adversely impact on the noise environment.

AND

Amend Rule 20.1.3 Non-Complying Activities as follows:

NC1 Any activity that is not listed as a permitted, restricted discretionary, or discretionary activity.

Decision Reasons:

- The Ministry supports the permitted activity status for trade and industry training activities, although education facilities that are not incidental to these activities may need to be located in industrial areas as a convenience to parents and students and should not be non-complying activities.
- Education facilities that are not incidental to trade and industry training need to be considered as a restricted discretionary activity rather than a non-complying activity.

Point Number 781.25

Summary of Decision Requested: Amend Rule 20.5.2 P10 Permitted Activities as follows:

Activity

~~P10~~ Education facilities

Activity-specific conditions

For no more than 10 students

Any education facility which exceeds this number of staff or students is a restricted discretionary activity.

AND

Add a new restricted discretionary activity rule to provide for educational facilities in the Nau Mai Business Park as follows:

20.5.3 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities.

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table.

Activity

RD1 Education facilities

Matters of discretion

- a. The extent to which it is necessary to locate the activity within the Nau Mai Business Park Specific Area.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

AND

Amend Rule 20.5.4 Non-Complying Activities as follows:

NCI Any activity that is not listed as a permitted activity Rule 20.5.2 or restricted discretionary.

Decision Reasons:

- Many education facilities may need to be located within the Nau Mai Business Park that will exceed the maximum of 10 students and a non-complying activity status is not appropriate. The inference is that the submitter requests consistency with their requested definition of 'Education facilities'.
- Education facilities in the Nau Mai Business Park that involve more than 10 students need to be considered as a restricted discretionary activity rather than a non-complying activity.

Point Number

781.26

Summary of Decision Requested:

Amend Rule 21.1.1 P2 Permitted Activities as follows:

P2 Trade and industry training activity

Any education facility which is not incidental to a trade and industry training activity is a restricted discretionary activity.

AND

Add a new restricted discretionary activity rule for educational facilities as follows:

21.1.2 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities.

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table.

Activity

RD1 Education Facilities

Matters of discretion

- a. The extent to which it is necessary to locate the activity within the Industrial Zone Heavy.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

AND

Amend Rule 21.1.3 NCI Non-Complying Activities as follows:

NCI: Any activity that is not listed as a permitted, restricted discretionary, or discretionary activity.

Decision Reasons:

- Supports the activity status for trade and industry training programs.
- Education facilities in the Industrial Zone Heavy that involve more than 10 students need to be considered as a restricted discretionary activity rather than a non-complying activity. Other education facilities such as tertiary education institutions and early childhood education centres may need to be located in industrial areas for the convenience of parents and student.
- Education facilities in the Industrial Zone Heavy that are not incidental to a trade and industry training activity need to be considered as a restricted discretionary activity.

Point Number

781.27

Summary of Decision Requested:

Delete Rule 22.1.5 D6 Discretionary Activities relating to an education facility.

AND

Amend Rule 22.1.3 Restricted Discretionary Activities as follows:

Rule 22.1.3 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities

(2) Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table:

Activity

RD3 Education facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which it is necessary to locate the activity within the Rural Zone.
- b. Reverse sensitivity effects of adjacent activities.
- c. The extent to which the activity may adversely impact on the transport network.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:

- Education facilities such as schools, community education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments within rural areas are essential social infrastructure.
- Submitter requests consistency with their requested definition of 'Education facilities'.

Point Number 781.28

Summary of Decision Requested: Amend Rule 22.5.2 P2 Permitted Activities - Agricultural and Horticultural Research as follows:

P2 An education facilities that is incidental to agricultural or horticultural research.

Any education facilities which are not incidental to agricultural or horticultural research is a restricted discretionary activity.

AND

Add a new Rule 22.5.3 Restricted Discretionary Activities as follows:

22.5.3 Restricted Discretionary Activities

(1) The activities listed below are restricted discretionary activities

Activity

RD3 Education facilities

Council's discretion shall be restricted to the following matters:

- a. *The extent to which it is necessary to locate the activity within the Rural Zone.*
- b. *Reverse sensitivity effects of adjacent activities.*
- c. *The extent to which the activity may adversely impact on the transport network.*
- d. *The extent to which the activity may adversely impact on the streetscape.*
- e. *The extent to which the activity may adversely impact on the noise environment.*

Decision Reasons:

- The submitter supports the permitted activity status for agricultural and horticultural research in the Rural Zone.
- However, other education facilities such as schools, community education, early childhood education, tertiary education institutions, outdoor education centres and sports training establishments locate within rural areas are an essential social infrastructure.
- A restricted discretionary activity status is therefore requested for education facilities that are not incidental to agricultural and horticultural research.

Submitter Number: 782

Submitter: Jack Macdonald

Point Number 782.1

Summary of Decision Requested: Amend Chapter 22.4 Subdivision by enabling transferable rural lot right subdivision as a restricted discretionary activity and discretionary activity throughout the Waikato District.

Decision Reasons:

- The transferable Rural Lot process allows for the transfer of existing titles or consented conservation lots to more appropriate areas in the district.
- There is no net increase in the overall number of development rights across the district.
- On the whole the submitter believes that the process has been working well for many years in the Former Franklin area and is an effective mechanism for promoting development in more appropriate areas whilst protecting high quality versatile soils.
- To remove the provision for Transferable Rural Lot subdivisions and making it a prohibited activity is unnecessary and compromises the current and proposed objectives for the rural area.
- The natural outcome of the Transferable Rural Lot process is to transfer existing/consented titles from less intensively developed outlying areas to the more intensively developed central areas.
- It seeks to manage growth in the rural zones and to avoid the wide dispersal of lots and protection of larger rural blocks.
- The Transferable Rural Lot provisions of the former Franklin District Plan were designed to protect and enhance the potential use of high quality versatile soils by encouraging the transfer of surplus titles to more environmentally sustainable locations.
- This is consistent with the draft District Plan objectives and policies and the objectives of the Resource Management Act 1991.
- The fact that the former Franklin District is now administered by Waikato District Council does not remove the underlying objectives of wiser use of resources.
- The same resources remain in the same district. The fact that the administering authority may want a consistent set of subdivision rules across the district is not relevant.
- By prohibiting the transfer of lots within the District, the proposed objectives and policies may not be able to be met.
- In particular the removal of the process:
 - Will prevent the consolidation of existing titles
 - Will not promote the protection of productive land or versatile soils within the District;
 - Will not assist in the reorganisation of the wide dispersal of and reduction in rural titles, and will negate opportunities for the retention of land versatility and larger lot sizes in rural areas and for productive farming units to better manage the use of soils and rural land;
 - Will not promote positive effects on the rural environment, rural character and rural amenity;
 - Will not reduce reverse sensitivity effects when existing title rights are developed in rural production areas of the District; and
 - Will not promote positive effects on the rural environment, rural character and rural amenity;
 - Will not reduce reverse sensitivity effects when existing title rights are developed in rural production areas of the District; and
 - Will not promote outcomes that are consistent with the rural objectives and policies.
- The majority of transferable rural lot subdivision applications in the Waikato District are removing titles for the larger productive land holdings, thus reducing or eliminating adverse effects on unplanned and scattered rural residential development in the more remote rural Waikato, and reducing the burden on infrastructure, particularly in more remote areas.
- If these rights are now restricted to where they currently are within the Waikato District, they will result in the uptake and development of latent capacity in outlying areas of the District, which is inconsistent with and contrary to the objectives and policies.

Point Number 782.2

Summary of Decision Requested: Amend Rule 22.4.1.2 RD1 (a) (iv) General subdivision, as follows:

RD1 (a) Subdivision must comply with all of the following conditions:

...

(iv) The additional lot must have a proposed area of between ~~0,000m²~~ 4000m² and 1.6 ha;

Decision Reasons:

- A lot area range of 8000m²-1.6ha will result in a lifestyle block that is too large and will force developers to turn potentially productive farming paddocks into areas that will not be used for farming and become neglected.
- The best maintenance of open pasture (all classes of soils) is grazing animals.
- The lots created will be too small to be productive or grazed, yet they are too big to be easily managed as lifestyle properties.
- If a landowner is subdividing off an existing farm cottage, the house and curtilage area will be approximately 2000m².
- This will result in at least 6000m² of potentially productive farming land being wasted or not utilised.
- The high class soil rule will restrict this to some degree because an area of land is not classified as 'high class soil', it doesn't mean that it can't be used for productive purposes or add valuable support to a farming operation.

Point Number 782.3

Summary of Decision Requested: Delete Rule 22.4.1.4 (a)(i) Boundary relocation.
OR
Amend Rule 22.4.1.4 (a)(i) Boundary relocation to allow application of this rule to more than two existing Records of Title.

Decision Reasons:

- The rule needs to allow for two or more existing titles as many landholdings in the Waikato District are comprised of several titles and the proposed rule will therefore restrict logical layouts.
- Titles created after 18 July 2018 may be the result of a minor boundary adjustment or the balance of a general subdivision application and it is unreasonable to a discretionary activity test to apply in this instance if rural land use is to be supported and better environmental outcomes achieved.
- Boundary relocations are a legitimate way to adjust legal boundaries and the potential adverse effects of moving a boundary or title are generally minimal.
- The assumption is that the intent of Rule (a)(i) is to prevent making new conservation lots or the additional title created from the General subdivision rule, larger in size.
- This intent will now potentially restrict or make boundary adjustments tougher for larger rural blocks that may have a title created after 18 July 2018 for whatever reason.
- These newer titles could have been subject to another minor boundary adjustment or could be the larger balance lot of a General subdivision application.
- The submitter does not think that a further boundary relocation of these larger lots should be a discretionary activity as it then becomes too restrictive on larger land holdings that may be relocating boundaries for legitimate reasons.
- Rule (a)(i) does not recognise the legitimate need to adjust rural lot boundaries to support rural land use and create a better environmental outcome.
- It also doesn't allow for the logical restructure of landholdings with more than two existing larger titles.
- It also doesn't allow for the logical restructure of landholdings with more than two existing larger titles.
- What if the two titles subject to the boundary relocation are less than 8000m² to begin with?

Point Number 782.4

Summary of Decision Requested: Delete the maximum number of titles from Rule 22.4.1.5 Rural Hamlet Subdivision.

Decision Reasons:

- The current Rural Hamlet subdivision rule will not be a wholesale provision for better restructuring existing titles on many rural properties, especially larger landholdings.
- The rural zone varies drastically throughout the district from open flat countryside predominantly used for dairy farming, to more undulating hilly terrain with scattered mature vegetation predominantly used for dry-stock farming.
- Often the most logical subdivision layout on rural properties that preserve the largest area of land for productive purposes and have the least potential for adverse effects on the surrounding environment, are influenced by the site specific characteristics such as topography, vegetation, road frontage and existing building development on that particular property.
- Ideally, all new lots clustered together as a hamlet styled subdivision would be great but (unlike the residential zoned land) planning ideology such as the proposed only works on a small minority of the rural zoned land in the District and provision or more desecration needs to be allowed to cater for these other landholdings.
- In the rural environment, especially in the upper Waikato, these physical restraints greatly restrict such a logical layout. Often it may be a far better result for that particular environment to position the existing titles around existing development on the property or at other ends of the property from each other which could be km's apart and even accessed off different public roads.
- Making a rural subdivision application a Non-Complying activity for creating a better overall result for that particular environment is too restrictive and needs to be at least a Discretionary activity.

Point Number 782.5

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision, so that this rule provides for riparian planting and clarification on enhancement planting for Significant Natural Areas.

Decision Reasons:

- Allowing conservation lots to be created in exchange for riparian planting will incentivise farms to produce significant ecological gains for the district and increase the amount of native vegetation.
- The cost of planting, fencing and on-going maintenance is substantial and needs to be offset in order to incentivise ecological enhancement.
- The Auckland Unitary Plan has resulted in a significant drop in riparian planting and Waikato District Council should not follow this example.
- The rules imply that the current amount of native vegetation is adequate.
- A sign-off from an ecologist to certify that the riparian planting is self-sustaining would be necessary.

Point Number 782.6

Summary of Decision Requested: **Amend** Rule 22.3.2 P1(b)(i) Minor dwelling, as follows:
(i) The minor dwelling must be located within ~~20m~~ 150m of the dwelling;

Decision Reasons:

- Submitter supports specifying a separation distance.
- The proposed 20m separation distance is too small as it does not allow for existing site constraints such as curtilage area, effluent disposal fields and other ancillary buildings.
- The requested 150m distance will make a huge difference in terms of functionality of the property while providing some degree of privacy between the main dwelling and minor dwelling.

Point Number 782.7

Summary of Decision Requested: **Amend** Rule 22.3.7.1 Building Setbacks - All boundaries, by deleting P1 (a)(iii) and amending P1 (a)(iv) as shown below:
P1 (a) A habitable building located on a site less than 1.6ha must be set back a minimum of
...
~~(iii) 25m from the boundary of an adjoining site that is 6ha or more;~~
(iv) 12m from the boundary of an adjoining site that is less than 6ha.

Decision Reasons:

- The operative rule in the Franklin Section which requires a 10m setback has worked well.
- A 25m setback is too restrictive and not justified.
- There is no discernible difference between a 25m setback and 12m setback.
- A 25m setback restricts houses from being built on more appropriate sites.

Point Number 782.8

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P2 (a)(iii) Building Setbacks - All boundaries, as follows:

P2 (a) A non-habitable building located on a Record of Title less than 1.6ha must be set back a minimum of:

...

(iii) ~~12m~~ 5m from every boundary other than a road boundary.

Decision Reasons:

- The proposed 12m setback is too restrictive for a non-habitable building and many people move to rural blocks so that they have space for a garage or shed.

Point Number 782.9

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P3 (a)(iii) Building Setbacks - All boundaries, as follows:

P3 (a) A habitable building located on a Record of Title 1.6ha or more must be set back a minimum of:

...

(iii) ~~25m~~ 12m from every boundary other than a road boundary.

Decision Reasons:

- The proposed 25m setback is too restrictive and not justified.
- Small rural blocks are usually created on undulating land with low class soils and a 25m setback will restrict the location of a dwelling.

Point Number 782.10

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (a)(i) Subdivision - General, as follows:

RD1 (a) Subdivision must comply with all of the following conditions:

(i) Proposed lots must have a minimum net site area of ~~450m²~~ 400m², except where the proposed lot is an access allotment or utility allotment or reserve to vest;

Decision Reasons:

- The proposed minimum net site area of 450m² is too large and restrictive.
- Smaller lots are generally more popular for easy maintenance and the request for 400m² will still be large enough to fit a decent sized dwelling.

Point Number 782.11

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (a)(iv) Subdivision - General, to include an area requirement before triggering a "rear lot" rule, e.g. 1 hectare.

Decision Reasons:

- The proposed rule is not fully workable for smaller infill subdivisions and should only apply to larger sites.
- The submitter suggests that a threshold of over 1 ha is appropriate.

Point Number 782.12

Summary of Decision Requested: **Amend** Rule 22.4.1.5 Rural Hamlet Subdivision to be a discretionary activity rather than a non-complying activity if there is non-compliance with Rule 22.4.1.5 RD1 (a)(i)-(v).

Decision Reasons:

- The default activity status of non-complying is too restrictive and it is more appropriate for applications that breach this rule to be considered as a discretionary activity when there is logic for the final title layout.

Point Number 782.13

Summary of Decision Requested: **Delete** Rule 22.4.1.2 (v) General Subdivision regarding high class soils.

Decision Reasons:

- Land Use Capability Assessments are expensive and the 80%/20% requirement is difficult to understand given the objective of retaining high class soil.
- It would be more appropriate for the rule to refer to the actual size of the high class soils. For instance, a larger rural property that only has 10% high class soils may have significantly more of these soils than a smaller property that has 80% high class soils.
- The rule is open to interpretation.
- This rule will be difficult to administer.
- This rule makes compliance harder with no actual gain.

Point Number 782.14

Summary of Decision Requested: **Amend** Rule 22.3.7.1 Building Setbacks - All boundaries, so that P4 (a)(iii) reads as follows:

P4 (a) A non-habitable building located on a Record of Title 1.6ha or more must be set back a minimum of:

...

(iii) ~~12m~~ 5m from every boundary other than a road boundary.

Decision Reasons:

- The proposed 12m setback is too restrictive for a non-habitable building.
- Many people move to rural properties to have space for a garage or shed.
- Having these 12m from the boundary is going to be too restrictive.

Point Number 782.15

Summary of Decision Requested: **Amend** Rule 22.3.7.2 Building setback - sensitive land use, by adding text to P1 (a) (iv) and (v) to confirm that the specified separation distances

are measured from the identified Aggregate Extraction Area rather than the title boundaries that contain this extraction area

OR

Amend the definition of 'Aggregate Extraction Area' in Chapter 13: Definitions so that it refers to the consented extraction area, rather than the title boundary of the subject site.

Decision Reasons:

- The submitter has stated that some resource consent applications involving an Aggregate Extraction Area have been incorrectly assessed by Council staff and expensive legal opinions have had to be sought in order to confirm how the separation distance is to be calculated.

Point Number 782.16

Summary of Decision Requested: **Amend** Rule 22.3.7.2 P1 (a)(vii) Building setback - sensitive land use, as follows:

(a) Any building for a sensitive land use must be set back a minimum of:

...

(vii) 300m from the actual boundary of another site containing an intensive farming activity;

Decision Reasons:

- This rule needs to be clarified so that the 300m buffer distance applies to the intensive farming activity rather than the boundary of a title that contains that activity. For example, an intensive farming activity may be located at one end of a very large site. It would then be unfair to require an owner of an opposite property, which may be several hundred metres away, to locate their buildings at least 300m from the site that contains the intensive farming activity.

Point Number 782.17

Summary of Decision Requested: **Amend** Rule 22.4.9 RD1 (a)(iii) Subdivision - Building platform, as follows:

(a) Subdivision, other than an access or utility allotment, must provide a building platform on the proposed lot that:

...

(ii) Has an average gradient not steeper than ~~1:8~~ 1:6;

Decision Reasons:

- The proposed maximum gradient of 1:8 is too restrictive for the Rural Zone, particularly in the upper Waikato District where building sites are more likely to be on undulating topography.
- The objectives and policies promote the location of new lots away from high class soils and the rule will therefore force new lots and building sites to locate on steeper topography.
- A grade of 1:6 is still workable and as long as a geotechnical report supports the location.

Point Number 782.18

Summary of Decision Requested: **Delete** Rule 23.4.2 RD1 (a)(i) General Subdivision

AND

Amend the zoning of properties from Country Living Zone to Village Zone

AND

Amend Rule 24.4.1 RD1 (a) General Subdivision, as follows:

(a) Proposed lots must have a minimum net site area of ~~3,000m²~~ 2000m², except where the proposed lot is an access allotment, utility allotment or reserve to vest.

Decision Reasons:

- The submitter states that all Village zoned lots must have a minimum net site area of 2000m².
- The Country Living Zone which requires a minimum lot size of 5000m² creates lots too small to be productive or grazed and too big to be easily managed for lifestyle purposes.
- A smaller lot of 2000m² is efficient and it still retains an open rural residential character which can be planted, fenced, mowed and easily maintained.
- New houses are generally no larger than 3000m² and with an effluent disposal field of approximately 600m², this would leave more than 1000m² for additional curtilage.
- This outcome would remain consistent with the objectives and policies for the Country Living Zone.

Submitter Number: 783

Submitter: Reid Investment Trust

Point Number 783.1

Summary of Decision Requested: **Amend** Rule 26.2.9 P1 (a) (i) Hazardous Substances - All Precincts as follows:

(a) The use, storage or disposal of hazardous substances where:

(i) The aggregate quantity of hazardous substances of any hazardous substances of any hazard classification on a site is less than the quantity specified for the Motorsport and Recreation Zone in Table ~~26.1~~ 26 contained within Appendix ~~26~~ (Hazardous Substances).

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- Minor referencing correction.

Point Number 783.2

Summary of Decision Requested: **Amend** Rule 26.3.2 P2 (a) (iv) Height - All Precincts as follows:

(a) A building or structure in:

...

(iv) Precinct E (Industrial Units) as identified on the planning maps shall not exceed 15.0m in height.

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The building height of 10m is considered too restrictive for industrial units.
- In the Industrial Zone, the permitted building height is 15m.
- There are economic benefits of aligning the permitted building height within the Hampton Downs Motorsport and Recreation zone with the Industrial Zone.
- The interface between the zone and Rural Zone will be managed by building setback and daylight admission standards.

Point Number

783.3

Summary of Decision Requested:

Amend Rule 26.3.3 P1 Daylight admission - All precincts as follows:

A building in all precincts identified on the planning maps must not protrude through a height control plane rising at an angle of 37 degrees commencing at an elevation of 2.5m above ground level at every point along the Motorsport and Recreation Zone boundary. Where the zone boundary adjoins a public road, the standard applies from the farthest boundary of that road.

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- Where the Motorsport and Recreation Zone boundary abuts a road corridor, daylight admission to adjoining sites is not being compromised.
- The control can be taken from the farthest boundary of the road without creating potential effects on adjoining sites.

Point Number

783.4

Summary of Decision Requested:

Delete Rule 26.3.4 P5 Site Coverage;

OR

Amend Rule 26.3.4 P5 Site Coverage as follows:

A building or structure in Precinct E (Industrial Units) identified on the planning maps shall not exceed ~~60~~⁴⁵% site coverage of any site area

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- Building coverage of 45% is too onerous for industrial land use activities.
- The rule should be relaxed to 60% to allow for greater design flexibility or deleted to align with the Industrial Zone rules

Point Number

783.5

Summary of Decision Requested:

Amend the zoning of the property with the legal description of Lot 6 DP 411257 at Hampton Downs Road from Rural Zone to Hampton Downs Motorsport and Recreation Zone, Precinct E or a similar relief (see Figure 1 of the submission for the location of the site).

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Rural Zone does not reflect the nature and opportunity of the site and its close proximity and association with the Hampton Downs Motorsport Park.
- The site has been earthworked and been used for overflow parking during the events at Hampton Downs Motorsport Park. The association is reflected in the Operative District Plan through inclusion of the site in the Hampton Downs Motorsport Park subdivision scheme in schedule 25D.
- The objectives and policies for the Hampton Downs Motorsport and Recreation Zone aim to enable the continued operation and development of activities within the Zone and introduce a precinct based approach.
- The site is located in close proximity to Precinct E which allows for industrial activities. Therefore, it is considered that the site be included in Precinct E
- The site is intended to be developed for industrial purposes such as warehousing.
- Including the site in Precinct E will complement and expand industrial uses in the vicinity of the site.

Point Number

783.6

Summary of Decision Requested:

Amend Policy 9.1.1.1 (ii) Operation and development, as follows:

(a) Enable the continued operation and development of activities, facilities and events within the Motor Sport and Recreation Zone by providing for:

...

(ii) The development of activities and facilities to support the motor sport and recreation activities and events.

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The addition broadens the meaning of the policy to include land use activities as well as facilities.

Point Number

783.7

Summary of Decision Requested:

Amend Policy 9.1.1.2 (v) Precinct-based development as follows:

(a) A precinct-based approach enables the ongoing operation and development of the Hampton Downs Motorsport Park by:

...

(v) Precinct E providing for industrial activities and other land uses that support the continued development and operation of the Hampton Downs Motorsport Park ~~within the industrial units.~~

AND

Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The struck out words are superfluous and imply that industrial activities can only be undertaken in existing buildings rather than enabling new industrial buildings and activities.

- The proposed amendments links the policy to the zones primary objective of enabling continued development and operation.
- Enables a wider range of activities in support of zone's objective.

Point Number 783.8

Summary of Decision Requested: **Amend** Rule 26.1.1.5 Permitted activities - Industrial Units - Precinct E as follows:
~~An Industrial activities, car parking, y within the industrial units~~ automotive and non-automotive activities.
 AND
 Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The proposed changes enable car parking, automotive and non-automotive activities to be established within Precinct E, in addition to industrial activities.
- This is considered congruent with the zone's primary objective of continued development and operation of the Motorsport Park and allows a wider range of compatible activities to be established within Precinct E, similar to Precinct B.

Point Number 783.9

Summary of Decision Requested: **Amend** Rule 26.2.5 P1 (a)(ii) Earthworks - All Precincts as follows:
 (a) Earthworks within a site must meet the following conditions:
 ...
 (ii) Not exceed a volume of more than ~~250m³~~ 1,000m³ and an area of more than ~~+000m³~~ 2,000m³ within a site...
 AND
 Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The proposed thresholds for requiring earthworks consent in the Hampton Downs Motorsport and Recreation Zone are considered too onerous, given the surrounding rural land uses.
- Amend to align the thresholds for earthworks consents with those of the Rural Zone. These are considered appropriate to adequately manage the effects of earthworks.

Point Number 783.10

Summary of Decision Requested: **Amend** Rule 26.3.5 P1 (a) (iii) Building Setback as follows:
 (a) A building or structure in all precincts identified on the planning maps must be set back at least...
 AND
 Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The addition seeks to clarify that the building setback standard does not apply along road boundaries.
- This increases design flexibility and allows buildings to address the street whilst maintaining the amenity of adjoining rural zoned sites.

Point Number 783.11

Summary of Decision Requested: **Amend** Attachments A, E and L within Appendix 12 Hampton Downs Motor Sport and Recreation to remove references and annotations of "car parking" from the property at Lot 6 DP 411257 Hampton Downs Road, Hampton Downs, including deleting the site from Area B and deleting the annotation of 233 spaces from the site.
 AND
Amend Rule 26.2.8 P1 (a) Car parking access and Roading as necessary as a consequential amendment.
 AND
 Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- These changes reflect that the site is no longer used for event car parking, and in anticipation of the site's inclusion into the Hampton Downs Motorsport and Recreation Zone, Precinct E.

Point Number 783.12

Summary of Decision Requested: **Delete** Attachment M of Appendix 12 Hampton Downs Motor Sport and Recreation
 AND
Amend Rule 14.12.5.7 Required parking spaces and loading bays as a consequential amendment.
 AND
 Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The need for car parking and loading bay standards specific to the Hampton Downs Motorsport and Recreation Zone, with the exemption of event parking appears superfluous and is not assessed in the section 32 report

Point Number 783.13

Summary of Decision Requested: **Amend** the extent of Designation J11a as contained within Figure 2 in Annexure 2 of the submission.
 AND
 Any consequential amendments or further relief to give effect to the matters raised in the submission.

Decision Reasons:

- The construction of the Waikato Expressway has been completed in the Hampton Downs area.
- A petrol station has recently been constructed on the land north-east of the subject site (20 Hampton Downs Road) that indicates that the extent of Designation J11a is no longer required for State Highway purposes.

Submitter Number: 784 **Submitter:** Bryan Morris

Point Number 784.1

Summary of Decision Requested: Add a "Kimihi Lakes Recreation and Events Zone" and associated provisions to the former Huntly East mine complex to enable lake-associated activities and education, recreation and economic development. (Refer to the attachment to the submission prepared by Chow Hill which illustrates the area subject to this submission and the range of potential activities.)

Decision Reasons:

- The Huntly community needs a new direction and a game changing plan to lead the way forward for the revitalisation of Huntly.
- It is an opportunity to restore the opencast mine to an accessible lake and shoreline.
- Restoration funds have been set aside by Solid Energy to kick start the rehabilitation effort.

Submitter Number: 785 **Submitter:** Z Energy Limited, BP Oil NZ Limited and Mobil Oil NZ Limited

Organisation: 'Oil Companies'

Point Number 785.1

Summary of Decision Requested: Delete Rule 21.2.6 – Hazardous Substances.
AND
Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number	785.2
Summary of Decision Requested:	Delete Rule 22.2.4 – Hazardous Substances. AND Any consequential amendments or further relief to give effect to the submission.
Decision Reasons:	<ul style="list-style-type: none"> • The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites. • The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis. • These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required. • The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource management Act 1991 (RMA). • The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015. • The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including: <ul style="list-style-type: none"> a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment; b. the safe transportation of hazardous substances; c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and d. how the substance may be disposed of. • The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances. • The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. - In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.4

Summary of Decision Requested: Delete Rule 24.2.5 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.

- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.5

Summary of Decision Requested: Delete Rule 25.2.5 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rationale/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.6

Summary of Decision Requested: Delete Rule 26.2.9 – Hazardous Substances- All Precincts.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and

Safety At Work Act 2015.

- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.7

Summary of Decision Requested: Delete Rule 27.2.1.1 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".

- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, “the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.8

Summary of Decision Requested: Delete Rule 28.2.5 – Hazardous Substances.
AND
Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the “Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them”.
- The report further recognizes that “rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity”.
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, “the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.9

Summary of Decision Requested: Retain Objective 10.2.1 – Contaminated Land as notified.

Decision Reasons:

- It is appropriate to recognise the potential adverse effects of the subdivision, use and development of contaminated land on both human health and the environment.
- The submitter supports the proposed approach to allow the activity status of activities involving contaminated or potentially contaminated land (i.e. HAIL sites) to be governed by the National Environmental Standards for Assessing and Managing Contaminants in Soil to Protect Human Health – rather than duplicating the National Environmental Standards for Assessing and Managing Contaminants in Soil to Protect Human Health within the Proposed District Plan rule framework.

Point Number 785.10

Summary of Decision Requested: **Retain** Policy 10.2.2 – Managing the use of contaminated land, except for the amendments sought below

AND

Amend Policy 10.2.2 Managing the use of contaminated land as follows:

a. ~~Contaminated land is managed, which may include remediation, or remediated to ensure that contaminants are at a level acceptable for the proposed land use.~~

...

d. *Ensure that the use, subdivision and development of contaminated land management approaches include:*

i. *Undertaking a site investigation of any land identified as actually or potentially contaminated, prior to any new subdivision or change of use of land, that could result in an increase in any adverse effects from the contamination of a piece of land;*

ii. **Remedial action plans;**

iii. *Site validation reports;*

iv. *Site management plans as appropriate for identifying, monitoring and managing contaminated land.*

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports the inclusion of a contaminated land policy framework given the absence of objectives and policies within the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health.
- Any applications that may require consent pursuant to the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health can therefore be assessed against the proposed policy provisions.
- The submitter understands that remediation is a form of management and seeks clause (a) be amended to reflect this.
- The submitter notes that a remedial action plan will only be required if necessary i.e. no remediation may actually be required/necessary for works on contaminated land.
- Remedial action plans can be considered in any event through clause (d)(iv). Therefore the submitter seeks the deletion of clause (d)(ii).

Point Number 785.11

Summary of Decision Requested: **Retain** Rule 17.2.5.1 PI Earthworks - General, except for the amendments sought below

AND

Amend Rule 17.2.5.1 PI Earthworks - General as follows:

PI

a. *Earthworks within a site must meet the following conditions:*

i. *Be located more than 1.5m from a public sewer, open drain, overland overland flow path or other public service pipe;*

ii. *Not exceed a volume of more than 250m³ and an area of more than 1000m² within a site;*

iii. *The height of the resulting cut, filled areas or fill batter face in stable ground, not including any surcharge, does not exceed 1.5m, with a maximum slope of 1:2 (1 vertical to 2 horizontal);*

iv. *Areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 months of the commencement, or otherwise stabilised as soon as practicable at the completion of the earthworks;*

v. *Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;*

vi. *Do not divert or change the nature of natural water flows, water bodies or established drainage paths.*

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports in part the General Earthworks rules for the Business Zone, except for the amendments sought.
- The submitter seeks the retention of Rules 17.2.5.1. PI Earthworks - General, subject to ensuring that the separation distances required are clearly from public service pipes and not pipes per se, and clarifying that earthworks areas need to be stabilised appropriately (which may include re-vegetation, but which may also include an alternative form of reinstatement) in order to improve clarity and practical application.
- The submitter notes there is no specific Section 32 Report for earthworks. While earthworks are discussed within the Section 32 report for Infrastructure, this relates to earthworks associated with subdivision activities only.
- The submitter seeks that PI (a) (i) only applies to public infrastructure and will not capture earthworks within 1.5m of on-site service pipes (such as onsite storm water pipes within the forecourt of a service station).
- A 'service pipe' is not defined within the proposed definition and therefore earthworks undertaken within 1.5m of onsite stormwater infrastructure could be interpreted to require restricted discretionary activity consent.
- This is not considered appropriate in the context of earthworks within 1.5m of private service pipes (i.e. onsite stormwater pipes) or considered to be the intent of the proposed control.
- The submitter supports the requirement to re-vegetate groundcover within 6 months of the commencement of earthworks as PI(a) (iv).
- Earthworks undertaken in areas of hardstanding cannot be 're'-vegetated. Given there are no proposed controls to require the general reinstatement of areas disturbed by earthworks that are not vegetated, such areas are not required to be reinstated as a permitted activity.
- The submitter considers it appropriate to include additional wording to clause PI (a) (iv) to ensure areas disturbed by earthworks without vegetation are still reinstated to avoid potential erosion and sediment issues effects.

Point Number 785.12

Summary of Decision Requested: **Retain** Rule 18.2.4.1 PI Earthworks - General, except for the amendments sought below

AND

Amend Rule 18.2.4.1 PI Earthworks – General as follows:

PI

a. *Earthworks within a site must meet the following conditions:*

i. *Be located more than 1.5m from a public sewer, open drain, overland overland flow path or other public service pipe;*

ii. *Not exceed a volume of more than 250m³ and an area of more than 1000m² within a site;*

- iii. The height of the resulting cut, filled areas or fill batter face in stable ground, not including any surcharge, does not exceed 1.5m, with a maximum slope of 1:2 (1 vertical to 2 horizontal);
- iv. Areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 months of the commencement, or otherwise stabilised as soon as practicable at the completion of the earthworks;
- v. Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
- vi. Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports in part the General Earthworks rules for the Business Town Centre Zone.
- The submitter seeks the retention of Rule 18.2.4.1.P1 subject to ensuring that the separation distances required are clearly from public service pipes and not pipes per se, and clarifying that earthworks areas need to be stabilised appropriately (which may include re-vegetation, but which may also include an alternative form of reinstatement) in order to improve clarity and practical application.
- The submitter notes there is no specific Section 32 Report for earthworks. While earthworks are discussed within the Section 32 report for Infrastructure, this relates to earthworks associated with subdivision activities only.
- The submitter seeks that P1 (a) (i) only applies to public infrastructure and will not capture earthworks within 1.5m of on-site service pipes (such as onsite storm water pipes within the forecourt of a service station).
- A 'service pipe' is not defined within the proposed definition and therefore earthworks undertaken within 1.5m of onsite stormwater infrastructure could be interpreted to require restricted discretionary activity consent.
- This is not considered appropriate in the context of earthworks within 1.5m of private service pipes (i.e. onsite stormwater pipes) or considered to be the intent of the proposed control.
- The submitter supports the requirement to re-vegetate groundcover within 6 months of the commencement of earthworks as P1(a) (iv).
- Earthworks undertaken in areas of hardstanding cannot be 're'-vegetated. Given there are no proposed controls to require the general reinstatement of areas disturbed by earthworks that are not vegetated, such areas are not required to be reinstated as a permitted activity.
- The submitter considers it appropriate to include additional wording to clause P1 (a) (iv) to ensure areas disturbed by earthworks without vegetation are still reinstated to avoid potential erosion and sediment issues effects.

Point Number 785.13

Summary of Decision Requested: **Retain** Rule 17.2.5.1 P2 Earthworks – General, except for the amendments sought below

AND

Amend Rule 17.2.5.1 P2 (a)(i) Earthworks - General as follows:

P2

a. The importation of infill material to a site must meet all of the following conditions in addition to Rule 17.2.5.1 P1:

i. Does not exceed a total volume of 500m³ per site and a depth of 1m (excluding backfill);

...

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks the retention of Rules 17.2.5.1.P2 subject to amendments to ensure that any cut to the permitted depth can be backfilled as a permitted activity.
- P1 (a) (iii) permits the maximum permitted cut in stable ground to a depth of 1.5m. P2 (a) (i) permits the maximum permitted fill to be 1m. It could be interpreted that a 1.5m cut cannot be backfilled to ground level as a permitted activity and therefore restricted discretionary activity consent is required.
- The submitter seeks inclusion for clean fill that is used as backfill within P2 (a) (i) to reflect the intent of the rule.

Point Number 785.14

Summary of Decision Requested: **Retain** Rule 18.2.4.1 P2 Earthworks – General, except for the amendments sought below

AND

Amend Rule 18.2.4.1 P2 Earthworks – General as follows:

P2

a. The importation of infill material to a site must meet all of the following conditions in addition to Rule 18.2.4.1 P1:

i. Does not exceed a total volume of 500m³ per site and a depth of 1m (excluding backfill);

...

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks the retention of Rule 18.2.4.1.P2 subject to amendments to ensure that any cut to the permitted depth can be backfilled as a permitted activity.
- P1 (a) (iii) permits the maximum permitted cut in stable ground to a depth of 1.5m. P2 (a) (i) permits the maximum permitted fill to be 1m. It could be interpreted that a 1.5m cut cannot be backfilled to ground level as a permitted activity and therefore restricted discretionary activity consent is required.
- The submitter seeks inclusion for clean fill that is used as backfill within P2 (a) (i) to reflect the intent of the rule.

Point Number 785.15

Summary of Decision Requested: **Retain** Rule 17.2.5.1 RD1 Earthworks – General as notified.

Decision Reasons:

- The submitter supports the Restricted Discretionary activity status for earthworks that do not comply with the permitted activity criteria.

- Any potential adverse effects resulting from earthworks can be adequately managed and controlled by way of matters of discretion.

Point Number 785.16

Summary of Decision Requested: **Retain** Rule 18.2.4.1 RD1 Earthworks – General as notified.

Decision Reasons:

- The submitter supports the Restricted Discretionary activity status for earthworks that do not comply with the permitted activity criteria.
- Any potential adverse effects resulting from earthworks can be adequately managed and controlled by way of matters of discretion.

Point Number 785.17

Summary of Decision Requested: **Retain** Rule 20.2.5.1 P1 Earthworks - General, except for the amendments sought below;

AND

Amend Rule 20.2.5.1.P1 – Earthworks – General, as follows:

PI

(a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:

....

~~*(vi) earthworks are set back 1.5m from all boundaries;*~~

(vii) Areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 months of the commencement, or stabilised as soon as practicable at the completion of the earthworks;

(viii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls; and

(ix) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks the retention of Rule 20.2.5.1.P1, subject to the deletion of the setback from boundaries standard and to clarify that earthwork areas must be stabilized, which may or may not include re-vegetation.
- There is no justification for setting all earthworks back 1.5m from the boundary.
- This control is not within the Business Zone or Business Town Centre Zone.
- The definition of earthworks would render a post hole within 1.5m of a boundary as a restricted discretionary activity (i.e earthworks within 1.5m of a boundary).
- In the absence of a Section 32 Report justifying its inclusion, it is considered that this control is unnecessary and unjustified and should be deleted.
- The submitter supports the intent of the requirement to re-vegetate exposed areas within 6 months of the commencement of earthworks as per P1 (a)(iv) – ie: to achieve stabilization of the exposed surface.
- However it is considered inappropriate to simply require areas exposed by earthworks to be re-vegetated. For example, earth-worked areas that are to be finished in hardstand will be stabilized, but will not be re-vegetated.
- Therefore, the submitter considers it appropriate to include additional wording to clause P1 (a) (vii) to ensure areas disturbed by earthworks are stabilized (which may or may not include re-vegetation) to avoid potential erosion and sediment issues effect.
- P1 (a) (iv) provides for the total depth of any excavation or filling at 1.5m above or below ground level.
- P2 (a) (ii) restricts imported fill material to 1m. This is contrary to the 1.5m maximum permitted depth provided through P1 (a) (iv).
- Therefore the submitter seeks the maximum permitted depth of imported fill material to 1.5m (from 1m).
- The intent of the difference in levels is not known in the absence of justification via a Section 32 Report.
- The control is unnecessary and unjustified and should be deleted.

Point Number 785.18

Summary of Decision Requested: **Retain** Rule 21.2.5.1 P1 Earthworks - General, except for the amendments sought below;

AND

Amend Rule 21.2.5.1 P1 Earthworks – General as follows:

PI

(a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:

...

~~*(vi) earthworks are set back 1.5m from all boundaries;*~~

(vii) Areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 months of the commencement, or stabilised as soon as practicable at the completion of the earthworks;

(viii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls; and

(ix) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks the retention of Rules 20.2.5.1.P1 and 21.2.5.1.P1 subject to the deletion of the setback from boundaries standard and to clarify that earthwork areas must be stabilized, which may or may not include re-vegetation.
- There is no justification for setting all earthworks back 1.5m from the boundary. This control is not within the Business Zone or Business Town Centre Zone.
- The definition of earthworks would render a post hole within 1.5m of a boundary as a restricted discretionary activity (i.e earthworks within 1.5m of a boundary).

- In the absence of a Section 32 Report justifying its inclusion, it is considered that this control is unnecessary and unjustified and should be deleted.
- The submitter supports the intent of the requirement to re-vegetate exposed areas within 6 months of the commencement of earthworks as per P1 (a)(iv) – ie: to achieve stabilization of the exposed surface.
- It is considered inappropriate to simply require areas exposed by earthworks to be re-vegetated. For example, earth-worked areas that are to be finished in hardstand will be stabilized, but will not be re-vegetated.
- Therefore, the submitter considers it appropriate to include additional wording to clause P1 (a) (vii) to ensure areas disturbed by earthworks are stabilized (which may or may not include re-vegetation) to avoid potential erosion and sediment issues effect.
- P1 (a) (iv) provides for the total depth of any excavation or filling at 1.5m above or below ground level. P2 (a) (ii) restricts imported fill material to 1m.
- This is contrary to the 1.5m maximum permitted depth provided through P1 (a) (iv).
- The submitter seeks the maximum permitted depth of imported fill material to 1.5m (from 1m). The intent of the difference in levels is not known in the absence of justification via a Section 32 Report.
- The control is unnecessary and unjustified and should be deleted.

Point Number 785.19

Summary of Decision Requested: Delete Rule 20.2.5.1 P2 – Earthworks - General.
AND
Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- Rule 20.2.5.1.P2 permits earthworks for the purpose of creating a building platform for residential purposes within the Industrial Zone.
- Residential activities are non-complying activities in this zone and therefore it is not considered appropriate to include a permitted activity rule for residential activities within the zone.

Point Number 785.20

Summary of Decision Requested: Delete Rule 21.2.5.1 P2 – Earthworks – General.
AND
Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- Rule 21.2.5.1.P2 permits earthworks for the purpose of creating a building platform for residential purposes within the Industrial Zone Heavy.
- Residential activities are non-complying activities in this zone (a status that the Oil Companies support) and therefore it is not considered appropriate to include a permitted activity rule for residential activities within the zone.

Point Number 785.21

Summary of Decision Requested: Retain Rule 20.2.5.1 P3 Earthworks - General, except for the amendments sought below;
AND
Amend Rule 20.2.5.1 P3 Earthworks – General, as follows:
(a) Earthworks for purposes other than creating a building platform for residential purposes within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions:

(i) not exceed a total volume of 500m³;

(ii) not exceed a depth of 1.5m;

(iii) the slope of the resulting filled area in stable ground must not exceed a maximum slope of 1:2 (1 vertical to 2 horizontal);

(iv) fill material is setback 1.5m from all boundaries;

(v) areas exposed by filling are re-vegetated to achieve 80% ground cover within 6 months of the commencement, or stabilised as soon as practicable at the completion of the earthworks;

(vi) sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls; and

Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

AND
Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks the retention of Rule 20.2.5.1.P3 subject to clarification that earthwork areas must be stabilized, (which may or may not include re-vegetation) and an increase in depth of fill allowed from 1m to 1.5m.
- The submitter supports the intent of the requirement to re-vegetate groundcover within 6 months of the commencement of earthworks as per P3 (a) (v) – ie: to achieve stabilization of the exposed surface.
- However, it is considered inappropriate to simply require areas exposed by earthworks to be re-vegetated. For example, earth-worked areas that are to be finished in hardstand will be stabilized, but will not be re-vegetated.
- The submitter considers it appropriate to include additional wording to clause P3 (a)(v) to ensure areas disturbed by earthworks are stabilized (which may include re-vegetation) to avoid potential erosion and sediment issues effects.
- P1 (a) (iv) provides for the total depth of any excavation or filling at 1.5m above or below ground level. P3 (a) (iii) restricts imported fill material to 1m. This is contrary to the 1.5m maximum permitted depth provided through P1 (a) (iv).
- Therefore the submitter seeks the maximum permitted depth of imported fill material to 1.5m (from 1m).
- The intent of the difference in levels is not known in the absence of justification via a Section 32 Report. The control is unnecessary and unjustified and should be deleted.

Point Number 785.22

Summary of Decision Requested: **Retain** Rule 21.2.5.1 P3 Earthworks - General, except for the amendments sought below;

AND

Amend Rule 21.2.5.1.P3 – Earthworks – General, as follows:

a. *Earthworks for purposes other than creating a building platform for residential purposes within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions:*

i. *not exceed a total volume of 500m³;*
ii. *not exceed a depth of 1.5m;*
iii. *the slope of the resulting filled area in stable ground must not exceed a maximum slope of 1:2 (1 vertical to 2 horizontal);*
iv. *fill material is setback 1.5m from all boundaries;*
v. *areas exposed by filling are re-vegetated to achieve 80% ground cover within 6 months of the commencement, or stabilised as soon as practicable at the completion of the earthworks;*
vi. *sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls; and*

do not divert or change the nature of natural water flows, water bodies or established drainage paths.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks the retention of Rule 21.2.5.1.P3 subject to clarification that earthwork areas must be stabilized, (which may or may not include re-vegetation) and an increase in depth of fill allowed from 1m to 1.5m.
- The submitter supports the intent of the requirement to re-vegetate groundcover within 6 months of the commencement of earthworks as per P3 (a) (v) – ie: to achieve stabilization of the exposed surface.
- However, it is considered inappropriate to simply require areas exposed by earthworks to be re-vegetated. For example, earth-worked areas that are to be finished in hardstand will be stabilized, but will not be re-vegetated.
- Therefore, the submitter considers it appropriate to include additional wording to clause P3 (a)(v) to ensure areas disturbed by earthworks are stabilized (which may include re-vegetation) to avoid potential erosion and sediment issues effects.
- P1 (a) (iv) provides for the total depth of any excavation or filling at 1.5m above or below ground level. P3 (a) (iii) restricts imported fill material to 1m. This is contrary to the 1.5m maximum permitted depth provided through P1 (a) (iv).
- Therefore the submitter seeks the maximum permitted depth of imported fill material to 1.5m (from 1m).
- The intent of the difference in levels is not known in the absence of justification via a Section 32 Report. The control is unnecessary and unjustified and should be deleted.

Point Number 785.23

Summary of Decision Requested: **Retain** Rule 20.2.5.1 RD1 Earthworks – General as notified.

Decision Reasons:

- The submitter supports the Restricted Discretionary activity status for earthworks that do not comply with the permitted activity criteria.
- Any potential adverse effects resulting from earthworks can be adequately managed and controlled by way of matters of discretion.

Point Number 785.24

Summary of Decision Requested: **Retain** Rule 21.2.5.1 RD1 Earthworks – General as notified.

Decision Reasons:

- The submitter supports the Restricted Discretionary activity status for earthworks that do not comply with the permitted activity criteria.
- Any potential adverse effects resulting from earthworks can be adequately managed and controlled by way of matters of discretion.

Point Number 785.25

Summary of Decision Requested: **Retain** Rule 17.2.1.2 Noise – Construction as notified.

Decision Reasons:

- The submitter supports the measurement and assessment of construction noise against the limits in NZS 6803:1999 Acoustics – Construction Noise.
- The submitter supports a restricted discretionary activity requirement for construction noise which exceeds those limits identified within NZS 6803:1999.

Point Number 785.26

Summary of Decision Requested: **Retain** Rule 18.2.1.2 Noise – Construction as notified.

Decision Reasons:

- The submitter supports the measurement and assessment of construction noise against the limits in NZS 6803:1999 Acoustics – Construction Noise.
- The submitter supports a restricted discretionary activity requirement for construction noise which exceeds those limits identified within NZS 6803:1999.

Point Number 785.27

Summary of Decision Requested: **Retain** Rule 20.2.3.2 Noise – Construction as notified.

Decision Reasons:

- The submitter supports the measurement and assessment of construction noise against the limits in NZS 6803:1999 Acoustics – Construction Noise.

- The submitter supports a restricted discretionary activity requirement for construction noise which exceeds those limits identified within NZS 6803:1999.

Point Number 785.28

Summary of Decision Requested: **Retain** Rule 21.2.3.3 Noise – Construction as notified.

Decision Reasons:

- The submitter supports the measurement and assessment of construction noise against the limits in NZS 6803:1999 Acoustics – Construction Noise.
- The submitter supports a restricted discretionary activity requirement for construction noise which exceeds those limits identified within NZS 6803:1999.

Point Number 785.29

Summary of Decision Requested: **Retain** Rule 17.2.4 Glare and artificial light spill as notified.

Decision Reasons:

- The submitter supports the maximum permitted light spill standard (i.e. 10 lux).
- The submitter supports a restricted discretionary activity requirement for non-compliance with the permitted glare and artificial lighting standards.
- The potential adverse effects from glare and artificial lighting can adequately be managed and controlled through matters of discretion.

Point Number 785.30

Summary of Decision Requested: **Retain** Rule 18.2.3 Glare and Artificial light spill as notified.

Decision Reasons:

- The submitter supports the maximum permitted light spill standard (i.e. 10 lux).
- The submitter supports a restricted discretionary activity requirement for non-compliance with the permitted glare and artificial lighting standards.
- The potential adverse effects from glare and artificial lighting can adequately be managed and controlled through matters of discretion.

Point Number 785.31

Summary of Decision Requested: **Retain** Rule 20.2.4 Glare and artificial light spill as notified.

Decision Reasons:

- The submitter supports the maximum permitted light spill standard (i.e. 10 lux).
- The submitter supports a restricted discretionary activity requirement for non-compliance with the permitted glare and artificial lighting standards.
- The potential adverse effects from glare and artificial lighting can adequately be managed and controlled through matters of discretion.

Point Number 785.32

Summary of Decision Requested: **Amend** the definition of "commercial activity" in Chapter 13: Definitions to be more detailed and specific and based on the effects that the activity generates as opposed to being based on the nature of the consumer.

AND

Amend the definition of "commercial activity" in Chapter 13: Definitions to include service stations.

AND

Amend the definition of "commercial activity" in Chapter 13: Definitions to specifically exclude service stations if separate and specific provision is made for service stations as an activity.

OR

Amend the definition of "commercial activity" in Chapter 13: Definitions to specifically exclude service stations if separate and specific provision is made for service stations as an activity.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The submitter opposes in part the definition of 'commercial activities' (*Means activities involving the sale or distribution of goods and services*) and 'retail activities' (*Means the sale or hire of goods or services or equipment directly to the public*) as these definitions are uncertain and ambiguous and service stations could be included within both.
- Submitter supports making specific provision for service stations and seeks to either specifically exclude service stations from either activity or to include them in both.
- As currently drafted commercial and retail activities can be interchangeable insofar as an activity that 'involves the sale of goods and services' falls under both definitions.
- While the definition of retail activity specifies that the sale is to be directly to the public, there is nothing stopping direct sales to the public as also being a commercial activity.
- There does not appear to be any particular effects based justification for differentiating between the two activities based on the consumer.

Point Number 785.33

Summary of Decision Requested: **Amend** the definition of "retail activity" in Chapter 13: Definitions to be more detailed and specific and one that is based on the effects that the activity generates as opposed to being based on the nature of the consumer.

AND

Amend the definition of "retail activity" in Chapter 13: Definitions to include service stations.

AND

Amend the definition of "retail activity" in Chapter 13: Definitions to specifically exclude service stations if separate and specific provision is made for service stations as an activity.

AND

Amend the definition of "retail activity" in Chapter 13: Definitions to specifically exclude service stations if separate and specific provision is made for service stations as an activity.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The submitter opposes in part the definition of 'commercial activities' (Means activities involving the sale or distribution of goods and services) and 'retail activities' (Means the sale or hire of goods or services or equipment directly to the public) as these definitions are uncertain and ambiguous and service stations could be included within both.
- Submitter supports making specific provisions for service stations on that basis seeks to either specifically exclude service stations from either activity or to include them in both.
- As currently drafted commercial and retail activities can be interchangeable insofar as an activity that 'involves the sale of goods and services' falls under both definitions.
- While the definition of retail activity specifies that the sale is to be directly to the public, there is nothing stopping direct sales to the public as also being a commercial activity.
- There does not appear to be any particular effects based justification for differentiating between the two activities based on the consumer.

Point Number

785.34

Summary of Decision Requested:

Add a separate and specific definition for "service station activities" to Chapter 13 – Definitions that includes activities ordinarily considered to be ancillary to service stations as follows:

Service Stations: A facility where the primary business is selling motor vehicle fuels and can include the following accessory activities:

- Retail
- Administrative, storage and ablution facilities;
- Car wash facilities;
- Mechanical repair, servicing and testing of motor vehicles;
- Sale of lubricating oils, kerosene, LPG, or spare parts and accessories for motor vehicles;
- Trailer hire.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The submitter considers that a separate and specific definition for service station activities should be included in the Proposed Plan.
- Such a definition would appropriately ensure service stations (including activities accessory to service stations) are explicitly provided for and would avoid ambiguity around whether service stations are considered to be a 'commercial activity' or a 'retail activity' (or both).

Point Number

785.35

Summary of Decision Requested:

Delete the definition for "cumulative risk" from Chapter 13: Definitions.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- In other submission points, the submitter seeks the deletion of Policy 10.1.3 as it is the only Policy which addresses "cumulative risk".
- In the absence of the Policy, it is not considered necessary to define the term "cumulative risk".

Point Number

785.36

Summary of Decision Requested:

Retain the definition for "earthworks" in Chapter 13: Definitions without further modification as follows:

Means modification of land surfaces by blading, contouring, ripping, moving, removing, placing, or replacing soil or earth, or by excavation, or by cutting or filling operations.

Decision Reasons:

- The submitter supports the definition of 'earthworks'.

Point Number

785.37

Summary of Decision Requested:

Retain the definition of "signs" in Chapter 13: Definitions, except for the amendments sought below

AND

Amend the definition of "signs" in Chapter 13: Definitions as follows:

Sign

Means any device, graphic or display of whatever nature that is ~~visible from~~ directed to and legible to a person in a public place, for the purposes of:

1. *Providing information to the general public;*
2. *Identifying and providing information about any activity, site or building;*
3. *Providing directions; or*
4. *Promoting goods, services or forthcoming events.*

A building or structure that is painted in whole or part in corporate colours does not, of itself, constitute a sign or signage.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The submitter opposes in part the proposed definition of 'Sign' to the extent that the definition is exceptionally broad and could be read to include any face of a building or structure that is painted in recognizably "corporate colours".
- The definition could capture any sign necessary for traffic direction or instruction within a site (e.g. a sign identifying accessibility parking, opening hours inscribed onto a shop door or signs limiting parking to, say 120 mins, or internal traffic signs).
- The test of "visibility" from outside the site is too restrictive: the test should relate to whether the signage is directed to and clearly legible to people outside the site.

Point Number 785.38

Summary of Decision Requested: **Add** a new activity to Rule Chapter 17.1.2 – Permitted Activities as follows:

Service Station activity, Activity Specific Conditions Nil

OR

Retain commercial and retail activities as permitted activities in Rule 17.1.2 Permitted Activities, with service stations being clearly defined as one or both activities).

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The Submitter seeks to retain the activity status of Service Stations as permitted activities in the Business Zone, not subject to any Activity Specific Conditions.
- The submitter has sought to include a new definition for a 'service station activity' (refer to submission point 785.3)
- The submitter's service station activities are afforded to the following Business zonings under the Proposed District Plan:
 - Z Ngaruawahia
 - BP2Go Raglan and Hungry As Café
 - Mobil Mercer
 - Mobil Huntly
- In the Business Zone service stations are considered to be Permitted (as either a Retail or Commercial Activity).
- That activity status is supported, irrespective of whether service stations are provided for as commercial or retail activities or as separate service station activities.

Point Number 785.39

Summary of Decision Requested: **Add** a new activity to Rule 18.1.2 Permitted Activities; as follows:

Service Station activity, Activity Specific Conditions: Nil

OR

Retain commercial and retail activities as permitted activities, with service stations being clearly defined as one or both activities).

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The Submitter seeks to retain the activity status of Service Stations as permitted activities in the Business Town Centre Zone, not subject to any Activity Specific Conditions.
- The submitter has sought to include a new definition for a 'service station activity'.
- The submitter's service station activities are afforded the following zonings under the proposed District Plan:
 - Z Pokeno Truckstop
- In the Business Town Centre Zone service stations are considered to be Permitted (as either a Retail or Commercial Activity).
- That activity status is supported, irrespective of whether service stations are provided for as commercial or retail activities or as separate service station activities.

Point Number 785.40

Summary of Decision Requested: **Add** a new activity to Rule 20.1.1 Permitted Activities, as follows:

Service Station activity, Activity Specific Conditions: Nil

OR

Retain commercial and retail activities as permitted activities in Rule 20.1.1 Permitted Activities, with service stations being clearly defined as one or both activities.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The activity status of service stations in the Industrial Zone is considered inappropriate and inefficient. Service stations are inappropriately categorised as discretionary or non-complying activities within the Industrial Zone (assuming they are considered to be a retail activity or commercial activity respectively). Service stations should be permitted activities in the Industrial Zone.
- The submitter has sought to include a new definition for a 'service station activity'.
- The submitter's service station activities are afforded the following Industrial zoning under the proposed District Plan:
 - Z Huntly
 - BP Ngaruawahia.

Point Number 785.41

Summary of Decision Requested: **Retain** Objective 10.1.1 Effects of hazardous substances, except for the amendments sought below

AND

Amend Objective 10.1.1 Effects of hazardous substances to recognise the benefits of the storage and disposal of hazardous substances, as follows:

Residual risk associated with the storage, use, or disposal of hazardous substances is managed to ensure that the effects on people, property and the environment are acceptable, while recognizing the benefits of facilities storing, using or disposing of hazardous substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The submitter supports Objective 10.1.1 but also seeks to amend it to recognize the benefits of the storage and disposal of hazardous substances.
- The submitter supports the objective to 'manage' risk to a level that is 'acceptable' in the context of the activity and the surrounding uses, and also support the intent to recognize the benefits of facilities using hazardous substances should be similarly recognized.

Point Number 785.42

Summary of Decision Requested: Delete Policy 10.1.2 Location of new hazardous facilities.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- Policy 10.1.2 is not supported by the submitter insofar as it generally focusses on the minimisation of risk of hazardous facilities, which is largely a matter for HSN0 and the Health and Safety at Work Act.
- The Policy fails to focus on what additional controls on hazardous substance use (if any) are needed in the Proposed District Plan to address specific or potential environmental effects that are not covered by that other legislation.
- The adoption of the Policy is not justified by the Section 32 analysis. The policy fails to:
 - Address or recognise the issue of encroachment of sensitive activities;
 - Recognise that not all hazardous activities can be or need to be located away from sensitive activities, especially where the facility is part of a wider distribution network servicing the public or where the potential risks of the hazardous activity can be appropriately managed. As an example, many service stations are located adjacent to residential development;
 - Recognize that the RMA is not a zero risk statute and that risk does not need to be avoided (i.e. contained to within a site).

Point Number 785.43

Summary of Decision Requested: Delete Policy 10.1.3 – Residual risks of hazardous substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The submitter opposes Policy 10.1.3.
- The Policy generically requires that any facility for the storage or disposal of hazardous substances identifies and assesses adverse effect and risk.
- The Policy fails to recognize that the Council no longer has general functions in respect of the control of hazardous through the RMA, unless there is an identified regulatory gap to be addressed.
- RMA policy should focus on providing guidance for the assessment of resource consents – which in the context of hazardous substances management under the RMA should be very specific and properly justified through a Section 32 analysis.

Point Number 785.44

Summary of Decision Requested: Amend Policy 10.1.4 – Reverse Sensitivity Effects as follows:

- ~~Separate-Ensure that the expansion and value of existing and future investment by hazardous facilities is recognized by avoiding reverse sensitivity effects between sensitive land use activities and lawfully established hazardous facilities;~~
- ~~Separate new hazardous facilities from existing sensitive land use activities; and~~
- ~~Avoid the storage, processing or disposal of hazardous waste in sensitive environments.~~

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The policy is supported in part subject to amending.
- The requirement for activities to be separated to a requirement for reverse sensitivity effects to be managed by avoidance and the deletion of clause (b) and (c).
- Reverse Sensitivity is not provided for in HSN0 and/or Health and Safety Legislation.
- It is considered appropriate for Council's to recognize and manage the potential reverse sensitivity effects that may be associated with the storage, use or disposal of hazardous substances.
- Policy 10.1.4 simply does this by requiring 'separation' between activities. Separation may be one means of managing reverse sensitivity effects but it may not be the only means.
- The policy should seek to avoid reverse sensitivity effects: to both recognize the value of the existing facilities and to provide for their future development.
- The storage, processing or disposal of hazardous waste in sensitive environments is not considered appropriate in the context of reverse sensitive effects and therefore should be detailed from the policy.

Point Number 785.45

Summary of Decision Requested: Delete Rule 16.2.5 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:

- a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
 - The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
 - The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
 - The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
 - The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
 - The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
 - However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
 - As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
 - No rationale/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
 - The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
 - In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.46

Summary of Decision Requested: Delete Rule 17.2.5.4 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
 - These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
 - The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource management Act 1991 (RMA).
 - The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
 - The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
 - The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
 - The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
 - The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
 - The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
 - The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
 - The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
 - However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
 - As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these

substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.

- No rationale/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.47

Summary of Decision Requested: Delete Rule 18.2.5 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rationale/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.48

Summary of Decision Requested: Delete Rule 19.2.5 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.

- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.
- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.49

Summary of Decision Requested: Delete Rule 20.2.6 – Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the submission.

Decision Reasons:

- The proposed provisions are opposed and the submitter seeks the deletion of all proposed hazardous substances controls relating to storage, use, disposal or transportation of hazardous substances at service station sites (as broadly defined) or refuelling sites.
- The submitter also supports the deletion of all rules pertaining to control hazardous substances where such controls are inappropriate, unnecessary, ineffective, inefficient and unable to be justified via a Section 32 analysis.
- These rules are all designed to address risk associated with hazardous substances. Risk is appropriately managed via other legislation and the Section 32 Report fails to identify why additional controls are required.
- The Resource Legislation Amendment Act 2017 removed the explicit function of district and regional councils to control adverse effects of the storage, use, disposal, or transportation of hazardous substances under sections 30 and 31 of the Resource Management Act 1991 (RMA).
- The changes came into effect on 19 April 2017 and are intended to ensure councils only place controls on hazardous substances where necessary to control effects under the RMA that are not covered by Hazardous Substance New Organisms Act 1996 or Health and Safety At Work Act 2015.
- The purpose of the Hazardous Substances New Organisms Act is to protect the environment, and the health and safety of people and communities, by preventing or managing the adverse effects of hazardous substances and new organisms. The Hazardous Substances New Organisms Act covers a range of matters including:
 - a. site and building requirements for where a hazardous substance may be used, including requirements for storage and primarily requiring primary and secondary containment;
 - b. the safe transportation of hazardous substances;
 - c. emergency management requirements in relation to the substance in the event of a spill or other emergency; and
 - d. how the substance may be disposed of.
- The Health and Safety At Work Act 2015 provides a framework to secure the health and safety of works and workplaces and integrates the regulation of workplace use of hazardous substances.
- The Resource Legislation Amendment Act 2017 followed the decision of the Independent Hearing Panel on the Christchurch Replacement District Plan. That decision was to reject Christchurch City Council's hazardous substance controls (which were based on an activity status table (AST) approach and to only retain controls relating to hazardous substances in close proximity to the National Grid.
- The Ministry for the Environment considers that in most cases the Hazardous Substances New Organisms Act and the Health and Safety At Work Act 2015 controls will be adequate to avoid, remedy or mitigate adverse environmental effects of hazardous substances and

that RMA controls may be used if existing HSNO or Work safe controls are not adequate to address the environmental effects of hazardous substances in any particularly case. The submitter strongly supports the Ministry for the Environment's position in this regard.

- The submitter seeks that any proposed controls around hazardous substances do not duplicate those controls addressed under other legislation. Any duplication is considered unnecessary and inefficient.
- The section 32 report for Hazardous Substances acknowledges the removal of Council's functions in regards to hazardous substances and recognizes the "Resource Management Plans should not be in conflict with HSNO requirements and should not repeat them".
- The report further recognizes that "rationale for a higher level of protection through additional land use controls under the Act may be appropriate for substances both controlled by the Hazardous Substances New Organisms Act or for issues which are not within the scope of the Hazardous Substances New Organisms Act, such as reverse sensitivity".
- However there is a significant disconnect between the overview and purpose sections of the Section 32 Report and the regulatory provisions in the Proposed District Plan.
- As an example, in regard to service stations the Section 32 Report concludes that, "the controlled activity status has been assigned to the storage and retail sale of fuel within service stations above a certain level in some zones to recognize that these substances are well managed through standards and industry practice. However, above these thresholds, the opportunity to consider potential adverse effects on the surrounding environment is considered.
- No rational/analysis is provided within the section 32 report to justify why specific volume thresholds apply to service stations or why the opportunity to consider potential adverse effects on the surrounding environment is considered reasonable if quantities are above those limits.
- The Section 32 Report does not provide analysis to justify why hazardous substances associated with service stations are only addressed in certain zones and in what way the Council considers the Hazardous Substances New Organisms Act to not adequately control potential adverse effects associated with hazardous substances at service station - for example, why the Council considers site design, layout and monitoring and reporting of incidents are matters that the Council should reserve control over.
- In light of the Resource Legislation Amendment Act 2017 and controls under other legislation and the lack of rationale/analysis within the Section 32 Report for hazardous substances, it is considered the proposed hazardous substance controls are largely unnecessary and should therefore be deleted.

Point Number 785.50

Summary of Decision Requested: Retain Rule 21.2.4 Glare and artificial light spill as notified.

Decision Reasons:

- The submitter supports the maximum permitted light spill standard (i.e. 10 lux).
- The submitter supports a restricted discretionary activity requirement for non-compliance with the permitted glare and artificial lighting standards.
- The potential adverse effects from glare and artificial lighting can adequately be managed and controlled through matters of discretion.

Point Number 785.51

Summary of Decision Requested: Add a new Permitted Activity Rule to Chapter 17 – Business Zone as follows:

PX

Any Healthy and Safety signage required by legislation.

AND

Add an additional definition (if necessary) of 'health and safety' sign as follows:

Health and Safety sign means any sign necessary to meet other legislative requirements (e.g. HSNO/Work-safe).

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- There is no existing provision for Health and Safety signs – a new provision is sought by the submitter who opposes this omission.
- The submitter seeks a permitted activity rule in Chapter 17 to provide for health and safety required by legislation.
- The proposed policy framework does not exempt health and safety signage or signage required by legislation. It is not appropriate or necessary to require such signage to be assessed against the Proposed District Plan signage provisions and therefore a dedicated permitted activity rules is required.
- If further clarification of what is considered of what is considered as 'health and safety' signs is required then a definition that includes any signs required by other legislation, should be adopted.

Point Number 785.52

Summary of Decision Requested: Add a new Permitted Activity Rule to Chapter 18 – Business Town Centre Zone as follows:

PX

Any Healthy and Safety signage required by legislation.

AND

Add an additional definition (if necessary) of 'health and safety' sign as follows:

Health and Safety sign means any sign necessary to meet other legislative requirements (e.g. HSNO/Work-safe).

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- There is no existing provision for Health and Safety signs – a new provision is sought by the submitter who opposes this omission.
- The submitter seeks a permitted activity rule in Chapter 18 to provide for health and safety required by legislation.
- The proposed policy framework does not exempt health and safety signage or signage required by legislation. It is not appropriate or necessary to require such signage to be assessed against the Proposed District Plan signage provisions and therefore a dedicated permitted activity rules is required.
- If further clarification of what is considered of what is considered as 'health and safety' signs is required then a definition that includes any signs required by other legislation, should be adopted.

Point Number 785.53

Summary of Decision Requested: Add a new Permitted Activity Rule to Chapter 20 – Industrial Zone as follows:

PX

Any Healthy and Safety signage required by legislation.

AND

Add an additional definition (if necessary) of 'health and safety' sign as follows:

Health and Safety sign means any sign necessary to meet other legislative requirements (e.g. HSNO/Work-safe).

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- There is no existing provision for Health and Safety signs – a new provision is sought by the submitter who opposes this omission.
- The submitter seeks a permitted activity rule in Chapter 20 to provide for health and safety required by legislation.
- The proposed policy framework does not exempt health and safety signage or signage required by legislation. It is not appropriate or necessary to require such signage to be assessed against the Proposed District Plan signage provisions and therefore a dedicated permitted activity rules is required.
- If further clarification of what is considered of what is considered as 'health and safety' signs is required then a definition that includes any signs required by other legislation, should be adopted.

Point Number 785.54

Summary of Decision Requested: Add a new Permitted Activity Rule to Chapter 21 – Industrial Zone Heavy as follows:

PX

Any Healthy and Safety signage required by legislation.

AND

Add an additional definition (if necessary) of 'health and safety' sign as follows:

Health and Safety sign means any sign necessary to meet other legislative requirements (e.g. HSNO/Work-safe).

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- There is no existing provision for Health and Safety signs – a new provision is sought by the submitter who opposes this omission.
- The submitter seeks a permitted activity rule in Chapter 21 to provide for health and safety required by legislation.
- The proposed policy framework does not exempt health and safety signage or signage required by legislation. It is not appropriate or necessary to require such signage to be assessed against the Proposed District Plan signage provisions and therefore a dedicated permitted activity rules is required.
- If further clarification of what is considered of what is considered as 'health and safety' signs is required then a definition that includes any signs required by other legislation, should be adopted.

Point Number 785.55

Summary of Decision Requested: Add a new Permitted Activity Rule to any other Zone Chapters not covered by other submission points as follows:

PX

Any Healthy and Safety signage required by legislation.

AND

Add an additional definition (if necessary) of 'health and safety' sign as follows:

Health and Safety sign means any sign necessary to meet other legislative requirements (e.g. HSNO/Work-safe).

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- There is no existing provision for Health and Safety signs – a new provision is sought by the submitter who opposes this omission.
- The submitter seeks a permitted activity rule in all zone chapters to provide for health and safety required by legislation.
- The proposed policy framework does not exempt health and safety signage or signage required by legislation. It is not appropriate or necessary to require such signage to be assessed against the Proposed District Plan signage provisions and therefore a dedicated permitted activity rules is required.
- If further clarification of what is considered of what is considered as 'health and safety' signs is required then a definition that includes any signs required by other legislation, should be adopted.

Point Number 785.56

Summary of Decision Requested: Retain Policy 4.5.36 Signage, except for the amendments sought below;

AND

Amend Policy 4.5.36 (a)(i) Signage, to include health and safety signage as follows:

(a) In the Business Town Centre and Business Zone provide for:

(i) The establishment of signs where they are associated with the activity carried out on the site on which they are located;

(ii) Public information and Health and Safety signs that are of benefit to community well-being; and

...

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- Submitter seeks the retention of Policy 4.5.36 with amendments

- The proposed policy framework for signage within the Business zone and Business Town Centre Zone does not provide for Health and Safety signage.
- The submitter seeks a permitted activity rule for Health and Safety signage within the Business, Business Town Centre and Business Tamahere Zones.
- The submitter seeks that Health and Safety signage is provided for within the relevant policy framework.

Point Number 785.57

Summary of Decision Requested: Retain Policy 4.5.37 Managing the adverse effects of signs as notified.

Decision Reasons:

- The submitter supports the intent of the policy framework for signage within the Business Zone and the Business Town Centre Zone.

Point Number 785.58

Summary of Decision Requested: Add to Chapter 4.6 Industrial and Heavy Industrial Zones new policies as follows:

4.6.10 – Policy - Signage

(g) In the Industrial Zone and Industrial Heavy Zone, provided for:

(i) The establishment of signs where they are associated with the activity carried out on the site on which they are located;

(ii) Public information and Health and Safety signs that are of benefit to community well-being; and

(iii) Establishment of signage commensurate with the lower amenity and industrial function of the zones with controls on the size, location appearance and number of signs to ensure they do not detract from the visual amenity of the surrounding environment.

4.6.11 – Policy- Managing the adverse effects of signs

(g) In the Industrial Zone and Industrial Heavy Zone ensure that:

(i) The location, colour, content and appearance of signs directed at traffic are controlled to ensure signs do not distract, confuse or obstruct motorists, pedestrians and other road users;

(ii) Signs that generate adverse effects from illumination, light spill, flashing or reflection are avoided;

(iii) the placement of signs do not obstruct the free movement of:

A Pedestrians along the footpath;

B Vehicle use of the road carriageway.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter seeks a similar Policy to 4.5.36 and 4.5.37 are incorporated into the Industrial and Heavy Zones, including the proposed amendment sought by the submitter with regards to Health and Safety signage and a reference to industrial rather than commercial function of the zone and the lower amenity of the industrial zone (as opposed to the 'commercial vibrancy' referenced in the policy relevant to the business zones), to complement the proposed signage rule framework.
- There is no proposed policy framework for signage within the Industrial and Heavy Industrial Zones framework. The submitter seeks that the policy framework proposed in the Business Zone and Business Town Centre Zone is carried across to the Industrial Heavy policy framework.

Point Number 785.59

Summary of Decision Requested: Retain Rule 17.2.7.1 P2 Signs – General as notified.

Decision Reasons:

- The submitter supports the rules pertaining to signage in the Business Zone, specifically the maximum height limit of 10m (noting that a prime sign is a standard and integral feature of service station sites and is important to ensure the safe and efficient movement of traffic from the surrounding road network).

Point Number 785.60

Summary of Decision Requested: Retain Rule 18.2.7.1 P2 Signs – General as notified.

Decision Reasons:

- The submitter supports the rules pertaining to signage in the Business Town Centre Zones, specifically the maximum height limit of 10m (noting that a prime sign is a standard and integral feature of service station sites and is important to ensure the safe and efficient movement of traffic from the surrounding road network).

Point Number 785.61

Summary of Decision Requested: Retain Rule 20.2.7.1 P2 Signs - General, except for the amendments sought below;

AND

Amend Rule 20.2.7.1.P2 – Signs – General, as follows:

P2

(a) A sign must comply with all of the following conditions:

(i) The sign height does not exceed 1.5m;

...

(c) Where the sign is a freestanding sign, it must:

(i) not exceed an area of 3m² for one sign per site, and 1m² for any other freestanding sign on the site; and

(ii) be set back at least 5m from the boundary of any site a Residential, Village or Country Living Zone; and

(iii) In addition to (A), above, one free standing sign not exceeding 1.5m per service station.

...

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports in part the rule pertaining to signage in the Industrial Zone.
- The submitter considers the maximum permitted height of signage in the Industrial Zone Heavy (i.e 15m) to similarly apply to the Industrial Zone, and therefore seeks the maximum height limit of the Industrial Zone be increased from 10m to 15m.
- There is no expressed reason why a sign (which meets the definition of building) should have to conform to a lower height than buildings per se.
- A prime sign is a standard and integral feature of service station sites and is important to ensuring the safe and efficient movement of traffic from the surrounding road network (as opposed to attracting attention from people across the street), it is considered that provision should be made for prime signs at service station sites in Industrial Zones.

Point Number

785.62

Summary of Decision Requested:

Retain Rule 21.2.7.1 P2 Signs - General, except for the amendments sought below;

AND

Amend Rule 21.2.7.1 P2 Signs General, as follows:

P2

(a) A sign must comply with all of the following conditions:

...

(iv) Where the sign is a freestanding sign, it must:

A. Not exceed an area of 3m² for one sign per site, and 1m² for any other freestanding sign on the site; and

B. Be set back at least 5m from the boundary of the Residential Zone or Reserve Zone; and

C. In addition to (A) above, one free standing sign not exceeding 1.5m² per service station.

...

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports Rule 21.2.7.1 P2 within the Industrial Zone Heavy, however notes that a prime sign is a standard and integral feature of service station sites and is important to ensuring the safe and efficient movement of traffic from the surrounding road network (as opposed to attracting attention from people across the street).
- It is considered that provision should be made for prime signs at service station sites in Industrial Heavy zones.

Point Number

785.63

Summary of Decision Requested:

Retain Rule 17.2.7.1 Signs – General, except for the amendments sought below

AND

Amend Rule 17.2.7.1 RD1 Signs – General to be consistent with equivalent rules in Chapter 18, 20 and 21 as follows:

RD1

(a) A sign that does not comply with Rule XXX PX or PX.

(b) Council's discretion shall be restricted to the following matters:

(i) Amenity values;

(ii) Character of the locality;

(iii) Effects on traffic safety;

(iv) Glare and artificial light spill;

(v) Effects on a notable tree;

(vi) Effects on the heritage values of any heritage item due to the size, location, design and appearance of the sign;

(vii) Effects on cultural values of any Maaori Site of Significance; and

(viii) Effects on notable architectural features of a building.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports the rule and seeks a consistent approach to the RDA matters of discretion for signage across Chapters 17, 18, 20 and 21.
- There is no section 32 report which specifically addresses signage. The section 32 reports addressing the various zones do not include a specific section for signage.
- Signage that does not comply with the permitted activity criteria is considered Restricted Discretionary Activities. The submitter supports this activity status.
- The matters of discretion for signage which does not comply with the permitted activity criteria are inconsistent across the various zone chapters.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.

Point Number

785.64

Summary of Decision Requested:

Retain Rule 18.2.7.1 Signs – General, except for the amendments sought below

AND

Amend Rule 18.2.7.1 RD1 Signs – General as follows:

RD1

a. A sign that does not comply with Rule XXX PX or PX.

b. Council's discretion shall be restricted to the following matters:

- i. Amenity values;
- ii. Character of the locality;
- iii. Effects on traffic safety;
- iv. Glare and artificial light spill;
- v. Effects on a notable tree;
- vi. Effects on the heritage values of any heritage item due to the size, location, design and appearance of the sign;
- vii. Effects on cultural values of any Maaori Site of Significance; and
- viii. Effects on notable architectural features of a building.

Decision Reasons:

- There is no section 32 report which specifically addresses signage.
- The section 32 reports addressing the various zones do not include a specific section for signage.
- Signage that does not comply with the permitted activity criteria is considered Restricted Discretionary Activities. The submitter supports this activity status.
- The matters of discretion for signage which does not comply with the permitted activity criteria are inconsistent across the various zone chapters.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.
- The submitter supports the rule and seeks a consistent approach to the RDA matters of discretion for signage across Chapter 17, 18, 20 and 21.

Point Number

785.65

Summary of Decision Requested:

Retain Rule 20.2.7.1 Signs – General, except for the amendments sought below.

AND

Amend Rule 20.2.7.1 RD1 Signs – General to be consistent with the equivalent rules in Chapter 17, 18 and 21 as follows:

RD1

(g) A sign that does not comply with Rule XXX PX or PX.

(b) Council's discretion shall be restricted to the following matters:

(i) Amenity values;

(ii) Character of the locality;

(iii) Effects on traffic safety;

(iv) Glare and artificial light spill;

(v) Effects on a notable tree;

(vi) Effects on the heritage values of any heritage item due to the size, location, design and appearance of the sign;

(vii) Effects on cultural values of any Maaori Site of Significance; and

(viii) Effects on notable architectural features of a building.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports the rule and seeks a consistent approach to the RDA including matters of discretion for signage across the Chapters 17, 18, 20 and 21
- There is no section 32 report which specifically addresses signage. The section 32 reports addressing the various zones do not include a specific section for signage.
- Signage that does not comply with the permitted activity criteria is considered Restricted Discretionary Activities. The submitter supports this activity status.
- The matters of discretion for signage which does not comply with the permitted activity criteria are inconsistent across the various zone chapters.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.
- The submitter supports the rule and seeks a consistent approach to the RDA including matters of discretion for signage across the Chapters 17, 18, 20 and 21.

Point Number

785.66

Summary of Decision Requested:

Retain Rule 21.2.7.1 Signs – General, except for the amendments sought below

AND

Amend Rule 21.2.7.1 RD1 Signs – General to be consistent with the equivalent rules in Chapter 17, 18 and 20 as follows:

RD1

(g) A sign that does not comply with Rule XXX PX or PX.

(b) Council's discretion shall be restricted to the following matters:

(i) Amenity values;

(ii) Character of the locality;

(iii) Effects on traffic safety;

(iv) Glare and artificial light spill;

(v) Effects on a notable tree;

(vi) Effects on the heritage values of any heritage item due to the size, location, design and appearance of the sign;

(vii) Effects on cultural values of any Maaori Site of Significance; and

(viii) Effects on notable architectural features of a building.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports the rule and seeks a consistent approach to the RDA including matters of discretion for signage across the Chapters 17, 18, 20 and 21.
- There is no section 32 report which specifically addresses signage. The section 32 reports addressing the various zones do not include a specific section for signage.
- Signage that does not comply with the permitted activity criteria is considered Restricted Discretionary Activities. The submitter supports this activity status.
- The matters of discretion for signage which does not comply with the permitted activity criteria are inconsistent across the various zone chapters.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.

Point Number

785.67

Summary of Decision Requested:

Amend Rule 17.2.7.2 Signs – Effects on traffic as follows:

PL

(a) Any sign directed at road users must:

(i) Not imitate the content, colour or appearance of any traffic control sign;

(ii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections;

(iii) Contain no more than 40 characters and no more than 6 symbols;

(iv) Have lettering that is at least 150mm high;

DL

Any sign that does not comply with Rule XXXX PL.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter supports the rule and seeks a consistent approach to the RDA including matters of discretion for signage across the Chapters 17, 18, 20 and 21.
- There is no specific section 32 report which specifically addresses signage. The section 32 reports addressing the various zones do not include a specific section for signage.
- The rules addressing the effects of signage on traffic are inconsistent across the various zone chapters and The current signage rules in the proposed zone chapters include controls that are considered inappropriate, such as:
 - Preventing signage directed at road users from locating within 60m of a controlled intersection, pedestrian crossing or any other sign as a permitted activity; and
 - Preventing signage directed at road users from locating within 130m of a site entrance (where the sign directs traffic to the entrance) as a permitted activity.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.

Point Number

785.68

Summary of Decision Requested:

Amend Rule 18.2.7.2 Signs – Effects on Traffic to be consistent with the equivalent rules in Chapter 17, 20 and 21 as follows:

PL

(a) Any sign directed at road users must:

(i) Not imitate the content, colour or appearance of any traffic control sign;

(ii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections;

(iii) Contain no more than 40 characters and no more than 6 symbols;

(iv) Have lettering that is at least 150mm high;

DL

Any sign that does not comply with Rule XXXX PL.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- Submitter seeks a consistent approach to signage across Chapters 17, 18, 20 and 21.
- There is no specific section 32 report which specifically addresses signage. The section 32 reports addressing the various zones do not include a specific section for signage.
- The rules addressing the effects of signage on traffic are inconsistent across the various zone chapters.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis and The current signage rules in the proposed zone chapters include controls that are considered inappropriate, such as:
 - Preventing signage directed at road users from locating within 60m of a controlled intersection, pedestrian crossing or any other sign as a permitted activity; and
 - Preventing signage directed at road users from locating within 130m of a site entrance (where the sign directs traffic to the entrance) as a permitted activity.

Point Number

785.69

Summary of Decision Requested:

Amend Rule 20.2.7.2 Signs – Effects on Traffic to be consistent with the equivalent rule in Chapters 17, 18 and 21 as follows:

PL

(a) Any sign directed at road users must:

(i) Not imitate the content, colour or appearance of any traffic control sign;

(ii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections;

(iii) Contain no more than 40 characters and no more than 6 symbols;

(iv) Have lettering that is at least 150mm high;

DI

Any sign that does not comply with Rule XXXX PL

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- Submitter seeks a consistent approach to signage across Chapters 17, 18, 20 and 21.
- There is no specific section 32 report which specifically addresses signage. The section 32 reports addressing the various zones do not include a specific section for signage.
- The rules addressing the effects of signage on traffic are inconsistent across the various zone chapters and The current signage rules in the proposed zone chapters include controls that are considered inappropriate, such as:
 - Preventing signage directed at road users from locating within 60m of a controlled intersection, pedestrian crossing or any other sign as a permitted activity; and
 - Preventing signage directed at road users from locating within 130m of a site entrance (where the sign directs traffic to the entrance) as a permitted activity.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.

Point Number

785.70

Summary of Decision Requested:

Amend Rule 21.2.7.2 Signs – Effects on Traffic to be consistent with the equivalent rule in Chapters 17, 18 and 20 as follows:

PL

(g) Any sign directed at road users must:

(i) Not imitate the content, colour or appearance of any traffic control sign;

(ii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections;

(iii) Contain no more than 40 characters and no more than 6 symbols;

(iv) Have lettering that is at least 150mm high;

DI

Any sign that does not comply with Rule XXXX PL

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- Submitter seeks a consistent approach to signage across Chapter 17, 18, 20 and 21.
- There is no specific section 32 report which specifically addresses signage and the section 32 reports addressing the various zones do not include a specific section for signage.
- The rules addressing the effects of signage on traffic are inconsistent across the various zone chapters and The current signage rules in the proposed zone chapters include controls that are considered inappropriate, such as:
 - Preventing signage directed at road users from locating within 60m of a controlled intersection, pedestrian crossing or any other sign as a permitted activity; and
 - Preventing signage directed at road users from locating within 130m of a site entrance (where the sign directs traffic to the entrance) as a permitted activity.
- There is not rationale provided by Council to justify these inconsistencies in the absence of a section 32 analysis.

Point Number

785.71

Summary of Decision Requested:

Retain the mapping of the Coastal Environment, insofar the only relevant provisions are Objective 3.5.1 (a) and maximum permitted earthworks thresholds within mapped High or Outstanding Natural Character areas of the coastal environment.

AND

Retain Objective 3.5.1 (a) Natural Character as notified.

AND

Retain the maximum permitted earthwork thresholds of 50m² area and 250m³ volume within mapped High or Outstanding Natural Character areas of the coastal environment, noting these earthworks provisions apply to all zones with the exception of the Business Zone.

Decision Reasons:

- The submitter supports the mapping of the Coastal Environment, insofar as outlined in Objective 3.5.1 and the relevant earthworks thresholds.
- Given the sensitive nature of High or Outstanding Natural Character areas of the coastal environment and the fact that they are mapped in the proposed District Plan, the submitter supports a more conservative approach in regards to the permitted earthworks volumes within this overlay.
- The submitter notes that the earthwork volumes do not apply to the Business Zone.

Point Number

785.72

Summary of Decision Requested:

Delete the Hamilton Basin Ecological Management Area Overlay from the Planning Maps.

AND

Any consequential amendments or additional relief to give effect to the submission.

Decision Reasons:

- The submitter opposes the Hamilton Basin Ecological Management Area Overlay on the basis that no policy or regulatory framework has been included within the proposed District Plan to address this specific overlay.
- There is no definition for "Hamilton Basin Ecological Management Area" and the overlay is not considered to fall under the definition of "Significant Natural Area"
- The submitter cannot find any specific section 32 report which addresses the mapping overlays and is unable to establish the rationale for the inclusion and purpose of the overlay.
- Without any justification for its inclusion in the plan nor a proposed policy or regulatory framework to support the overlay, the submitter considers the removal of this overlay appropriate.

Point Number 785.73

Summary of Decision Requested: **Retain** the Waikato River Catchment overlay insofar as consultation with Iwi is to be determined on a case by case basis, as it relevant to the application and its associated effects.

Decision Reasons:

- The submitter supports the Waikato River Catchment overlay.

Point Number 785.74

Summary of Decision Requested: **Retain** the non-complying activity status for residential activities in the Industrial Zone (Rule 20.1.3 NCI Non-Complying Activities).

Decision Reasons:

- It is not considered appropriate to include a permitted activity rule for residential activities in this zone.

Point Number 785.75

Summary of Decision Requested: **Retain** the non-complying activity status for residential activities in the Industrial Heavy Zone (Rule 21.1.3 NCI Non-Complying Activities).

Decision Reasons:

- It is not considered appropriate to include a permitted activity rule for residential activities in this zone.

Submitter Number: 786 **Submitter:** Huntly Karioi Outdoor Trust Incorporated

Point Number 786.1

Summary of Decision Requested: **Add** a Kimihia Lakes Recreation and Events Zone and associated provisions to the former Huntly East mine complex to enable lake-associated activities and education, recreation and economic development (Refer to the attachment to the submission prepared by Chow Hill which illustrates the area subject to this submission and the range of potential activities).

Decision Reasons:

- Huntly community needs a new direction and game changing plan to lead the way forward for the towns revitalisation.
- The zone can serve as the catalyst for this sought after renaissance.

Submitter Number: 787 **Submitter:** Steve Doyle

Point Number 787.1

Summary of Decision Requested: **Add** provisions to enable development of an events and recreation facility at the former Huntly East Mine.

Decision Reasons:

- This is a positive development for Huntly.
- Add value to the community.
- Benefit to the town.

Submitter Number: 788 **Submitter:** Susan Hall

Point Number 788.1

Summary of Decision Requested: **Amend** the Coastal Environment Overlay to become a conservation area (including Raglan), where all major changes and consents which infringe District Plan rules, or which exceed one storey, are publicly notified.

Decision Reasons:

- The Proposed District Plan is hard to understand for the average person. The Raglan Naturally Plan is the 'true voice' of Raglan, and should form the basis of the planning in this area. Section 1.6.1 of the Proposed District Plan currently says "Raglan will retain its seaside village character as it grows, while protecting the harbour." Raglan Naturally has firm regulations around this.
- Most of the coast is visible from Raglan, is part of its character and should therefore have the same protection, e.g. no apartment style housing and no development of buildings that repeat the same shape and design along the front of a section.
- Views should be protected, not just from peoples house, but also as people walk around the town.
- The sea and mountain views are what makes Raglan special, not with the tall buildings.

Point Number 788.2

Summary of Decision Requested: **Delete** Policy 4.5.14 (a)(v)F Raglan Town Centre.

Decision Reasons:

- The Proposed District Plan is hard to understand for the average person. The Raglan Naturally Plan is the 'true voice' of Raglan, and should form the basis of the planning in this area. 1.6.1 of the Proposed District Plan currently says "Raglan will retain its seaside village character as it grows, while protecting the harbour." Raglan Naturally has firm regulations around this.
- Most of the coast is visible from Raglan, is part of its character and should therefore have the same protection, e.g. no apartment style housing and no development of buildings that repeat the same shape and design along the front of a section.
- Views should be protected, not just from peoples house, but also as people walk around the town.
- The sea and mountain views are what makes Raglan special, not with the tall buildings.

Point Number 788.3

Summary of Decision Requested: **Retain** Rule 16.1.2 P9 (a) Permitted Activities as notified, except for the amendments sought below.

AND

Amend Rule 16.1.2 P9 Permitted Activities for homestays, to be more regulated in Raglan, all homestays and holiday house accommodation to be registered with Council, and to prohibit new owners of existing houses or newly built houses from offering homestay accommodation or holiday rentals, unless they live onsite at the time of guests staying.

Decision Reasons:

- The submitter agrees with having no more than four temporary residents.
- The submitters had spoken with Waikato District Council regarding at least two residentially zoned properties having 15 or more short-term guests per night. However, the submitters were told that Council could investigate the complaints but not enter a property, nor had they any means to enforce the more than four persons per night rule. The submitters were told to bring this up at the next District Plan Review, hence this submission.
- Most 'Airbnb' and 'bookabach' listings in Raglan allow over five people to stay per night. It should be simple to regulate this as all of these are non-complying activities are listed online.
- This would allow the rules to be explained and therefore allow the Council to enforce these rules.
- As it is important for commercial businesses to have fire service and building warrants checked every year, it should be important for property owners running similar businesses out of residentially zoned properties.
- Raglan has a severe housing shortage for long-term tenants, but this can be helped by regulating the use of holiday houses, similar to what is done in Canada, European cities like Berlin, and other holiday towns in New Zealand like Queenstown.
- It would be easier to ban the use of new houses or new ownership from short-term rental use than retrospectively introducing this to those already relying on the income (as long as these existing house stick to the under five-person rule.)
- It should be possible for neighbours to complain if guest numbers and/or noise gets out of hand in a country living property as well.

Point Number 788.4

Summary of Decision Requested: **Amend** Rule 22.1.2 P10 Permitted Activities for homestays to be more regulated in Raglan, all homestays and holiday house accommodation to be registered with Council, to prohibit new owners of existing houses or newly built houses from offering homestay accommodation or holiday rentals, unless they live onsite at the time of guests staying, and a maximum of 4 temporary residents.

Decision Reasons:

- The submitters had spoken with Waikato District Council regarding at least two residentially zoned properties having 15 or more short-term guests per night. However, the submitters were told that Council could investigate the complaints but not enter a property, nor had they any means to enforce the more than four persons per night rule. The submitters were told to bring this up at the next District Plan Review, hence this submission.
- Most 'Airbnb' and 'bookabach' listings in Raglan allow over five people to stay per night. It should be simple to regulate this as all of these are non-complying activities are listed online.
- This would allow the rules to be explained and therefore allow the Council to enforce these rules.
- As it is important for commercial businesses to have fire service and building warrants checked every year, it should be important for property owners running similar businesses out of residentially zoned properties.
- Raglan has a severe housing shortage for long-term tenants, but this can be helped by regulating the use of holiday houses, similar to what is done in Canada, European cities like Berlin, and other holiday towns in New Zealand like Queenstown.
- It would be easier to ban the use of new houses or new ownership from short-term rental use than retrospectively introducing this to those already relying on the income (as long as these existing house stick to the under five-person rule.)
- It should be possible for neighbours to complain if guest numbers and/or noise gets out of hand in a country living property as well.

Point Number 788.5

Summary of Decision Requested: **Add** a new set of rules to Chapter 16 Residential Zone to provide for the protection of defined views from public places in Raglan to the harbour, coast and natural backdrops in the chapters on rural, residential, and business town centre zones, to include at least the following defined views:

(a) From SH23 (north of Maungatawhiri Road) to Kaitoke Creek;

(b) All existing views of the bar from Main Road, Bow Street, and Norrie Avenue;

(c) All existing views of Karioi from Raglan CBD;

(d) From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp;

(e) From SH23 summit to Karioi; and

(f) AroAro salt marsh from Wallis Street.

AND

Amend the planning maps to identify defined views.

Decision Reasons:

- Views are an inherent part of retention of Raglan's seaside Character.
- The Raglan Naturally community plan contains six references to views as follows:
 - "Relaxed lifestyles, a tranquil harbour, safe swimming beaches, black sand, internationally renowned surf and spectacular coastal views are characteristic – the Waikato District's only seaside resort."
 - "What We Don't Want – Buildings blocking views of harbour, coast and mountain."
 - "Priorities for Action – The retention of access to, and views of the harbour, coast, and mountain from within Raglan."
 - "What We Don't Want – Loss of access to or views of the harbour from parked cars, large trees or buildings."
 - "Safeguard coastal views from Wainui Reserve."
 - "Safeguarding the Environment – Maintain the coastal and harbour views, e.g. do not allow the planting of big trees, or the building of high fences or large buildings that destroy existing views."
- Section 5 of the RMA sets out the purpose (including District Plans) "protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural wellbeing."
- Raglan Naturally sets out how the Raglan community has expressed its views on their well-beings. These very clearly include protection of views.
- At the last Plan revision, the Council accepted views as important, but said any change would need to occur through a variation to the District Plan. That has not happened, so it should be a part of this plan. To exclude such an important part of Raglan Naturally in the district plan review is to deny the value of public participation in which over 10% of Raglan's population took part.
- The plan protects views of the navigation beacons and district plans of other authorities, such as Auckland and Hastings show that protection of other views is possible.
- A policy should protect views, e.g. Auckland's protection of volcanic view shafts.

• Each chapter needs to apply Policy 3.3.3.

Point Number 788.6

Summary of Decision Requested: **Add** a resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social well-being considerations

Decision Reasons:

- Several councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place. A report prepared for Whangarei, Far North, Kaipara and Rodney District Councils and Local Government

- New Zealand, and based on an opinion from Dr Royden Somerville QC, says "If an agent making use of GMOs has inadequate financial resources to cover environmental damage resulting from its activities, the burden will tend to fall on local government"
- As central government has failed to put in place a strict liability regime for Genetically Modified Organisms, liability for clean-ups, removal and elimination of escaped GE organisms, could lie with ratepayers. Ratepayers should not face the burden of paying for the clean-up of potential contaminated sites.
 - The Law Commission said "it is possible that environmental damage caused by GMOs could be dealt with under the RMA Section 17(1) states that "every person has a duty to avoid, remedy or mitigate any adverse effect on the environment arising from an activity carried on by or on behalf of that person, whether or not the activity is in accordance with a rule in a plan (or) resource consent...". That duty is not itself enforceable but in Part XII of the RMA there are powers to issue an abatement.
 - The continuing involvement with GE will harm all other farmers through tarnishing the 'clean green' image and could potentially end conventional farming, especially organic farmers.
 - Section 5 of the RMA refers to enabling people to provide for their economic wellbeing, so there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture, and forestry in the Waikato district until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
 - Section 5 of the RMA states "enables people and communities to provide for their social, economic, and cultural wellbeing and for their health and safety while (a) Sustaining the potential of natural and physical resources to meet the reasonably foreseeable needs of future generations.
 - The Council is applying the precautionary principle in the case of high voltage transmission lines and global warming.
 - Section 5.2.9 of the RMA states "Development should be designed and located to avoid or mitigate the predicted effects of global climate change on natural hazards, especially increased flooding, erosion, fire, and storms. Where there is incomplete information, a precautionary approach should be taken."
 - Section 5.3.8 of the RMA states "Scientific opinion differs about the possible impacts of global climate change, but majority opinion predicts that the effects could include a greater frequency and intensity of extreme weather events. Increased storms, floods and droughts may occur. The extent of these is uncertain and a precautionary approach is taken, because of the high potential for harm"
 - Genetically modified organisms have potentially even more irreversible significant adverse impacts and the level of scientific uncertainty was recognised by the Law Commission, which states "It is difficult to estimate the level of risk posed by GMOs; it is difficult to assess the magnitude of the potential damage that could be caused; GMOs have the potential to create catastrophic levels of harm; GMOs have the potential to cause irreversible damage; Some of the potential negative effects of GMOs will likely manifest in the long term and be diffuse in nature."
 - If the benefits were significant, the risk might be worth taking. However, it is increasingly clear that the main markets do not want GE food.
 - The WISE group recognise the research employment and the value of better understanding GE, if only to minimise the extent of any disaster, so research contained within Ruakura should be exempt.
 - Any other GE experiments and releases should be prohibited in the Waikato District due to the risks to the environment, economy and the public health.
 - This is to protect finite resources including indigenous biodiversity from transgenic pollution.
 - Conventional and organic reproductive crops must be protected and the integrity of heritage seeds is critical.
 - The Hazard Risks chapter is 'under review', but, so far there is no mention in the Hazards draft of genetically modified organisms.
 - The submitter supports the response made by GE Free New Zealand.
 - Submissions were made on this in 2005 and January 2019, and the issue has not been addressed, therefore it is urgent that these are addressed before any risks or liabilities arise.

Point Number

788.7

Summary of Decision Requested:

Add a new set of rules to Chapter 18 Business Town Centre Zone to provide for the protection of defined views from public places in Raglan to the harbour, coast and natural backdrops in the chapters on rural, residential, and business town centre zones, to include at least the following defined views:

- (a) From SH23 (north of Maungatawhiri Road) to Kaitoke Creek;
- (b) All existing views of the bar from Main Road, Bow Street, and Norrie Avenue;
- (c) All existing views of Karioi from Raglan CBD;
- (d) From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp;
- (e) From SH23 summit to Karioi; and
- (f) AroAro salt marsh from Wallis Street.

AND

Amend the planning maps to identify defined views.

Decision Reasons:

- Views are an inherent part of retention of Raglan's seaside Character.
 - The Raglan Naturally community plan contains six references to views as follows:
 - "Relaxed lifestyles, a tranquil harbour, safe swimming beaches, black sand, internationally renowned surf and spectacular coastal views are characteristic – the Waikato District's only seaside resort."
 - "What We Don't Want – Buildings blocking views of harbour, coast and mountain."
 - "Priorities for Action – The retention of access to, and views of the harbour, coast, and mountain from within Raglan."
 - "What We Don't Want – Loss of access to or views of the harbour from parked cars, large trees or buildings."
 - "Safeguard coastal views from Wainui Reserve."
 - "Safeguarding the Environment – Maintain the coastal and harbour views, e.g. do not allow the planting of big trees, or the building of high fences or large buildings that destroy existing views."
 - Section 5 of the RMA sets out the purpose (including District Plans) "protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural wellbeing."
 - Raglan Naturally sets out how the Raglan community has expressed its views on their well-beings. These very clearly include protection of views.
 - At the last Plan revision, the Council accepted views as important, but said any change would need to occur through a variation to the District Plan. That has not happened, so it should be a part of this plan. To exclude such an important part of Raglan Naturally in the district plan review is to deny the value of public participation in which over 10% of Raglan's population took part.
 - The plan protects views of the navigation beacons and district plans of other authorities, such as Auckland and Hastings show that protection of other views is possible.
 - A policy should protect views, e.g. Auckland's protection of volcanic view shafts.
- Each chapter needs to apply Policy 3.3.3.

Point Number

788.8

Summary of Decision Requested:

Add a new set of rules to Chapter 22 Rural Zone, to provide for the protection of defined views from public places in Raglan to the harbour, coast and natural backdrops in the chapters on rural, residential, and business town centre zones, to include at least the following defined views:

- (a) From SH23 (north of Maungatawhiri Road) to Kaitoke Creek;
- (b) All existing views of the bar from Main Road, Bow Street, and Norrie Avenue;
- (c) All existing views of Karioi from Raglan CBD;
- (d) From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp;
- (e) From SH23 summit to Karioi; and
- (f) AroAro salt marsh from Wallis Street.

AND

Amend the planning maps to identify defined views.

Decision Reasons:

- Views are an inherent part of retention of Raglan's seaside Character.
- The Raglan Naturally community plan contains six references to views as follows:

- o "Relaxed lifestyles, a tranquil harbour, safe swimming beaches, black sand, internationally renowned surf ad spectacular coastal views are characteristic – the Waikato District's only seaside resort."
- o "What We Don't Want – Buildings blocking views of harbour, coast and mountain."
- o "Priorities for Action – The retention of access to, and views of the harbour, coast, and mountain from within Raglan."
- o "What We Don't Want – Loss of access to or views of the harbour from parked cars, large trees or buildings."
- o "Safeguard coastal views from Wainui Reserve."
- o "Safeguarding the Environment – Maintain the coastal and harbour views, e.g. do not allow the planting of big trees, or the building of high fences or large buildings that destroy existing views."
- Section 5 of the RMA sets out the purpose (including District Plans) "protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural wellbeing."
- Raglan Naturally sets out how the Raglan community has expressed its views on their well-beings. These very clearly include protection of views.
- At the last Plan revision, the Council accepted views as important, but said any change would need to occur through a variation to the District Plan. That has not happened, so it should be a part of this plan. To exclude such an important part of Raglan Naturally in the district plan review is to deny the value of public participation in which over 10% of Raglan's population took part.
- The plan protects views of the navigation beacons and district plans of other authorities, such as Auckland and Hastings show that protection of other views is possible.
- A policy should protect views, e.g. Auckland's protection of volcanic view shafts.
- Each chapter needs to apply Policy 3.3.3.

Point Number

788.9

Summary of Decision Requested:

Add strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same or similar to those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- Several councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place. A report prepared for Whangarei, Far North, Kaipara and Rodney District Councils and Local Government New Zealand, and based on an opinion from Dr Royden Somerville QC, says "If an agent making use of GMOs has inadequate financial resources to cover environmental damage resulting from its activities, the burden will tend to fall on local government"
- As central government has failed to put in place a strict liability regime for Genetically Modified Organisms, liability for clean-ups, removal and elimination of escaped GE organisms, could lie with ratepayers. Ratepayers should not face the burden of paying for the clean-up of potential contaminated sites.
- The Law Commission said "it is possible that environmental damage caused by GMOs could be dealt with under the RMA Section 17(1) states that "every person has a duty to avoid, remedy or mitigate any adverse effect on the environment arising from an activity carried on by or on behalf of that person, whether or not the activity is in accordance with a rule in a plan (or) resource consent...". That duty is not itself enforceable but in Part XII of the RMA there are powers to issue an abatement.
- The continuing involvement with GE will harm all other farmers through tarnishing the 'clean green' image and could potentially end conventional farming, especially organic farmers.
- Section 5 of the RMA refers to enabling people to provide for their economic wellbeing, so there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture, and forestry in the Waikato district until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- Section 5 of the RMA states "enables people and communities to provide for their social, economic, and cultural wellbeing and for their health and safety while (a) Sustaining the potential of natural and physical resources to meet the reasonably foreseeable needs of future generations.
- The Council is applying the precautionary principle in the case of high voltage transmission lines and global warming.
- Section 5.2.9 of the RMA states "Development should be designed and located to avoid or mitigate the predicted effects of global climate change on natural hazards, especially increased flooding, erosion, fire, and storms. Where there is incomplete information, a precautionary approach should be taken."
- Section 5.3.8 of the RMA states "Scientific opinion differs about the possible impacts of global climate change, but majority opinion predicts that the effects could include a greater frequency and intensity of extreme weather events. Increased storms, floods and droughts may occur. The extent of these is uncertain and a precautionary approach is taken, because of the high potential for harm"
- Genetically modified organisms have potentially even more irreversible significant adverse impacts and the level of scientific uncertainty was recognised by the Law Commission, which states "It is difficult to estimate the level of risk posed by GMOs; it is difficult to assess the magnitude of the potential damage that could be caused; GMOs have the potential to create catastrophic levels of harm; GMOs have the potential to cause irreversible damage; Some of the potential negative effects of GMOs will likely manifest in the long term and be diffuse in nature."
- If the benefits were significant, the risk might be worth taking. However, it is increasingly clear that the main markets do not want GE food.
- The WISE group recognise the research employment and the value of better understanding GE, if only to minimise the extent of any disaster, so research contained within Ruakura should be exempt.
- Any other GE experiments and releases should be prohibited in the Waikato District due to the risks to the environment, economy and the public health.
- This is to protect finite resources including indigenous biodiversity from transgenic pollution.
- Conventional and organic reproductive crops must be protected and the integrity of heritage seeds is critical.
- The Hazard Risks chapter is 'under review', but, so far there is no mention in the Hazards draft of genetically modified organisms.
- The submitter supports the response made by GE Free New Zealand.
- Submissions were made on this in 2005 and January 2019, and the issue has not been addressed, therefore it is urgent that these are addressed before any risks or liabilities arise.

Point Number

788.10

Summary of Decision Requested:

Amend the Proposed District Plan so that consents which would require exemption from plan rules should automatically be publicly notifiable, whether the rules are on Genetically Modified Organisms, or any other matter.

Decision Reasons:

- No reasons provided.

Point Number

788.11

Summary of Decision Requested:

Amend Rule 23.1.1 P2 Permitted Activities for homestays, to be more regulated in Raglan, all homestays and holiday house accommodation to be registered with Council, to prohibit new owners of existing houses or newly built houses from offering homestay accommodation or holiday rentals, unless they live onsite at the time of guests staying, and a maximum of 4 temporary residents.

Decision Reasons:

- The submitters had spoken with Waikato District Council regarding at least two residentially zoned properties having 15 or more short-term guests per night. However, the submitters were told that Council could investigate the complaints but not enter a property, nor had they any means to enforce the more than four persons per night rule. The submitters were told to bring this up at the next District Plan Review, hence this submission.
- Most 'Airbnb' and 'bookabach' listings in Raglan allow over five people to stay per night. It should be simple to regulate this as all of these are non-complying activities are listed online.
- This would allow the rules to be explained and therefore allow the Council to enforce these rules.
- As it is important for commercial businesses to have fire service and building warrants checked every year, it should be important for property owners running similar businesses out of residentially zoned properties.
- Raglan has a severe housing shortage for long-term tenants, but this can be helped by regulating the use of holiday houses, similar to what is done in Canada, European cities like Berlin, and other holiday towns in New Zealand like Queenstown.
- It would be easier to ban the use of new houses or new ownership from short-term rental use than retrospectively introducing this to those already relying on the income (as long as these existing house stick to the under five-person rule.)
- It should be possible for neighbours to complain if guest numbers and/or noise gets out of hand in a country living property as well.

Point Number

788.12

Summary of Decision Requested:**Amend Policy 4.1.18 Raglan, as follows:**

(a) Raglan is developed to ensure:

(i) Infill and redevelopment of existing sites occurs, subject to development of a Structure Plan to identify where this can be done without loss of character, trees, or other natural features.(ii) A variety of housing densities is provided for and adequate housing reserved for low cost rentals and purchases by permanent residents;(iii) Rangitahi is the only area that provides for the medium term future growth and is developed in a manner that ~~connects~~ has cycle, footway and public transport connections to the existing town and maintains and enhances the natural environment; and(iv) There are good quality cycle, footway and public transport connections between the town centre, the Papahua Reserve and Raglan Wharf.**Decision Reasons:**

- There is a housing shortage in Raglan, but that is a shortage of housing available to local people at affordable prices, not of buildings. About a quarter of houses were empty at the 2006 census and that had risen to a third at the 2013 census.
- Providing additional holiday homes will do nothing to solve the housing problem.
- Rangitahi will provide amply for foreseeable growth. Currently it is planned to have good walking and cycling links within Rangitahi, but no such links to Raglan CBD. Raglan CBD already has parking and congestion problems at peak times, without adding another 500 cars from Rangitahi. Therefore, good alternatives to cars need to be provided.
- The submitter bikes from home to work, however feels very unsafe on the roads.
- This policy needs to take account of Policy 4.1.12 (b) (v), "particularly walking and cycling" provision, especially for the connections between the town centre, the Papahua Reserve, and the beaches, and Raglan Wharf.
- This policy needs to take account Raglan Naturally's 2001 proposal "to provide a free shuttle service between the central business area and the beaches e.g. a free, council supported electric bus to run on the hour to the beach and back to town centre.
- Parking at the beach is overflowing out onto Wainui Road now in summer, as it has reached maximum capacity.

Submitter Number:

789

Submitter:

Graham Shepherd

Organisation:

BioAgriNomics Ltd

Point Number

789.1

Summary of Decision Requested:**Add** strong precautionary and prohibitive policies and rules relating to the management of Genetically Modified Organisms that are the same or similar to those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.**Decision Reasons:**

- Submitter supports submission by Simon Thomson for the Proposed Waikato District Plan (in particular Clause 8).
- Submitter has concerns about risks posed by GMO's into the environment.
- GMO's have potential to adversely affect ecological, economic, and resource management values, and the social wellbeing of people, communities and tangata whenua.
- Release of GMOs has potential to cause significant adverse effects on environment (e.g. biological or ecosystem harm, harm to tangata whenua cultural values such as mauri and tikanga, harm to cultural values and lifestyle decisions).
- Harm from GMO contamination to existing or potential land uses (e.g. farming, forestry, beekeeping, marine farming and other primary production activities dependant on an uncontaminated environmental brand).
- Adverse effects can include a loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce, loss of livelihood, loss of food quality and the contamination of the food chain, development of increased pest resistance.
- There inevitably remains a risk that conditions of consent for GMOs are breached.
- Once GMOs are released into environment they are impossible to eradicate.
- Integrated management and a precautionary approach to GMOs under the Resource Management Act (RMA) is the best available technique for managing potential adverse effects.
- Establishing District Plan provisions to manage GMOs is consistent with Part 2 of RMA (sustainable management).

Point Number

789.2

Summary of Decision Requested:**Add** a resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social well-being considerations.**Decision Reasons:**

- Submitter supports submission by Simon Thomson for the Proposed Waikato District Plan (in particular Clause 8).
- Submitter has concerns about risks posed by GMO's into the environment.
- GMO's have potential to adversely affect ecological, economic, and resource management values, and the social wellbeing of people, communities and tangata whenua.
- Release of GMOs has potential to cause significant adverse effects on environment (e.g. biological or ecosystem harm, harm to tangata whenua cultural values such as mauri and tikanga, harm to cultural values and lifestyle decisions).
- Harm from GMO contamination to existing or potential land uses (e.g. farming, forestry, beekeeping, marine farming and other primary production activities dependant on an uncontaminated environmental brand).
- Adverse effects can include a loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce, loss of livelihood, loss of food quality and the contamination of the food chain, development of increased pest resistance.
- There inevitably remains a risk that conditions of consent for GMOs are breached.
- Once GMOs are released into environment they are impossible to eradicate.
- Integrated management and a precautionary approach to GMOs under the Resource Management Act (RMA) is the best available technique for managing potential adverse effects.
- Establishing District Plan provisions to manage GMOs is consistent with Part 2 of RMA (sustainable management).

Point Number

789.3

Summary of Decision Requested:

Seeks Genetically Modified Organisms and all genetically engineered products completely banned from being introduced into New Zealand.

Decision Reasons:

- Claims by companies that GMO's and GE products increase yield and have greater resistance to insect pests and diseases is unsubstantiated.
- GMOs are scientifically proven to cause human health issues including cancer, bowel, liver and kidney disease, infertility and environmental pollution.
- GMOs and GE crops showed greater resistance to beneficial strains of micro-organisms resulting in resistant weeds, diseases and insect pests.
- There are no independent peer-reviewed scientific papers establishing the safety of GMO crops.
- Given the deleterious nature of GMOS and GEs, it is imperative that NZ is kept GMO and GE free.

Submitter Number:

790

Submitter:

Northgate Developments Ltd & Northgate Industrial Park Ltd

Point Number 790.1

Summary of Decision Requested: **Retain** the Industrial zoning as notified of land within the Horotiu Industrial Park, Horotiu as per Planning Map 26.1, comprising:

- Lot 1 DP 390831 (364687), Lot 18 DP 494347 (723133), Lot 1 DPS 61620 (SA50B/598), Lot 2 DPS 61260 (SA50B/599), Lot 3 DPS 61260 (SA50B/600), Lot 16 DP 494347 (723131), Lot 17 494347 (723132), Lot 1 DP 499692 (742155) and Lot 2 DP 499692 (822899); and
- The certificates of title that have frontage to Gateway Drive, Evolution Drive and Innovation Way.

Decision Reasons:

- Northgate Developments Ltd and Northgate Industrial Park (Northgate) owns significant portion of land within Horotiu Industrial Park located directly west of Great South Road and south of Horotiu Industrial Park.
- Also developed Northgate Business Park that uses vehicle access via Gateway Drive, Evolution Drive and Innovation Way.
- Existing zoning of Horotiu Industrial Park and associated rule framework established due to an appeal to amend zoning from Rural to Industrial under the previous Waikato District Plan.
- Chapter 24B of the Operative Waikato District Plan enables staged development through the provisions outlined for Horotiu Industrial Park.
- Aligns with sites current zoning and activities being developed on land.

Point Number 790.2

Summary of Decision Requested: **Amend** the zoning of approximately 48ha of the property at 139 Onion Road, Horotiu (Lot 3 DPS 76353 (SA60D/2) from Rural to Industrial (see Attachment A to the submission for the extent of rezoning).

OR

Any further amendments as necessary to support the Northgate position.

Decision Reasons:

- Horotiu Industrial Park rezoned Industrial since 2011 with development provided for in Schedule 24B of the ODP.
- Table 6-2 of the Regional Policy Statement (RPS) provides for up to 150ha of growth at Horotiu from 2010-20161.
- Policy 6.14 of the Future Proof Growth Strategy document provides specific policy direction for Horotiu, clause (C) most relevant to submission.
- Methods 6.14.1 and 6.14.2 of the RPS require District Plans to zone land and prepare structure plans to give effect to Industrial allocations provided in Table 6-2.
- Therefore District Plan provisions define land use zones with principles in Table 6-2 of the RPS specifying broad strategic location of land allocation.
- Land allocations and staging based on principles in the RPS such as ensuring land development does not outstrip infrastructure provisions, ensuring industrial development locations fit with strategic infrastructure and ensuring reasonable match of supply and demand.
- ODP has established land use zones based on land allocations in Table 6-2 of the RPS.
- Land use zones and related provisions in ODP aim to identify Horotiu as a strategic industrial node, enable 56ha of development until 2021 and enable 94ha of development after 2021.
- ODP prioritises development within the Horotiu Industrial Zone into stages 1, 2 and 3 to align with timing in Table 6-2 of the RPS.
- ODP gives effect to the RPS as land areas in ODP closely matched land areas contained in Table 6-2 of the RPS.
- 14ha of Industrial land within Stage 3C of the Horotiu Industrial Park Zone rezoned in 2017 as part of Plan Change 17, reducing industrial development enabled by the RPS by 14ha.
- Industrial land allocated by Hamilton City Council within the Te Rapa North strategic industrial node as per Table 6-2 of the RPS will affect the wider industrial land allocation.
- Perry's seeking for their industrial zoned land to be amended to allow for commercial and residential development across their site.
- Perry's site accounted for 30ha of the 85ha of land allocated under Table 6-2 of the RPS.
- Perry's site zoned Industrial under Hamilton City Council District Plan however a special housing area is proposed to allow for residential and commercial purposes.
- As a result these changes in development may create a shortfall of around 44ha of industrial land outlined in Table 6-2 of the RPS.
- 48ha of Dixon's land which neighbours Northgate could be suitable for Industrial development for the following reasons; sites are adjacent which enable contiguous industrial zoning to be established, most logical extension of Horotiu Industrial Zone, logical extensions to infrastructure and roading connections, topography relatively flat and land is generally away from any sensitive receivers.
- Refer to Attachment A for topographical maps.
- The land is directly adjacent to the existing Horotiu Industrial Park and would enable a contiguous industrial zoning to be established that adjoins land owned by Ports of Auckland and Northgate Developments Ltd.
- It is the most logical extension of the Horotiu Industrial Zone due to its location and the fact that it is owned by one landowner.
- Infrastructure and roading connections be extended into the site from the Horotiu Industrial Park.
- The topography of the land is relatively flat compared to the balance of the site; and
- The land is generally located away from any sensitive receivers.

Point Number 790.3

Summary of Decision Requested: **Amend** Rule 20.2.3.1 P2 Noise General, to revert back to Rule 24B.19 of the Operative Waikato District Plan for the Industrial Zone at Horotiu (Horotiu Industrial Park comprising the following titles:

- Lot 1 DP 390831 (364687), Lot 18 DP 494347 (723133), Lot 1 DPS 61620 (SA50B/598), Lot 2 DPS 61260 (SA50B/599), Lot 3 DPS 61260 (SA50B/600), Lot 16 DP 494347 (723131), Lot 17 494347 (723132), Lot 1 DP 499692 (742155) and Lot 2 DP 499692 (822899); and
- The certificates of title that have frontage to Gateway Drive, Evolution Drive and Innovation Way.)

OR

Any further amendments as necessary to support the submission.

Decision Reasons:

- Rule 24B.19 of the Operative District Plan enables noise limits up to 75dBA of noise 24hours per day. Rule 24B.19 requires noise levels to be less when received by other zones.
- Activities within Industrial zone which are near to other zone boundaries will need to constrain activities to achieve compliance with Rule 24B.19 of the Operative District Plan.
- Centralised Industrial activities are able to make higher noise levels over 24 hours as per Operative District plan Rule 24B.19.
- Rule 20.2.3.1 -P2 of the Operative District Plan seeks to reduce nighttime noise level limits from 75dB to 55dB between 10pm and 7am.
- Noise level limit changes may curtail industrial activities who were established because of current 24hour noise standard.
- Current landowners bought into industrial zoning knowing noise levels higher than other industrial environments.
- No justification in s32A analysis for noise level reduction limits in Proposed District Plan.
- It is not considered that 75dB noise level over 24hour period will increase external effects given adjoining zones will still need to comply with lower noise level limits such as the Living Zone.
- Define Horotiu Industrial Park in PDP and allow for current noise limits as per Rule 24B.19 of the Operative District Plan.

Point Number 790.4

Summary of Decision Requested: **Amend** Rule 20.2.3.1 P3 Noise General, to revert back to Rule 24B.19 of the Operative District Plan for the Industrial Zone at Horotiu (Horotiu Industrial Park comprising the following titles:

- Lot 1 DP 390831 (364687), Lot 18 DP 494347 (723133), Lot 1 DPS 61620 (SA50B/598), Lot 2 DPS 61260 (SA50B/599), Lot 3 DPS 61260 (SA50B/600), Lot 16 DP 494347 (723131), Lot 17 494347 (723132), Lot 1 DP 499692 (742155) and Lot 2 DP 499692 (822899); and
- The certificates of title that have frontage to Gateway Drive, Evolution Drive and Innovation Way.)

See submission for details of the rule.

OR

Any further relief or amendments as necessary to support the submission.

Decision Reasons:

- Rule 20.2.3.1 P3 requires noise to comply with noise standards in each Zone other than the Industrial Zone. This approach is generally consistent with current Horotiu Industrial Park Rule 24.19.1 (b) and (c).
- The land adjoining Horotiu Industrial Park is proposed to adjoin Rural or Residential land.
- The Proposed District Plan will introduce new noise levels between 7pm and 10pm. The Operative District Plan has continuous noise standard from 7am to 10pm, which drops after 7pm.
- The Proposed District Plan reduces day time noise from 55dBA (L10) to 50dB (LAeq) and introduces a 40dB (LAeq) noise level for activities between 10pm and 7am.
- The change may curtail Industrial activities established because of Horotiu Industrial Park or due to noise levels permitted at adjoining sites.
- Request Horotiu Industrial Park be defined in Proposed District Plan with noise standards for adjoining sites being consistent with current Rule 24B.19 (b) and (c) of the ODP.

Point Number

790.5

Summary of Decision Requested:

Delete Rule 20.2.5.1 P1 (a)(vi) Earthworks - General, or any further amendments.

OR

Any relief as necessary to support the submission.

Decision Reasons:

- It is likely earthworks undertaken within 1.5m of boundaries.
- Buildings can be built up to the boundary in Industrial Zone resulting in automatic resource consents required for earthworks even if volume and area are met in clauses (a)(ii) and (iii).
- It is unclear what environmental effect is proposed to be controlled as clause (a)(v) seeks to ensure appropriate fall is achieved. i.e. 1 vertical to 2 horizontal. This clause addresses stability issues for adjoining properties.
- The inclusion of this provision will have the consequence of requiring resource consents creating a time and cost disadvantage to landowners/developers.

Point Number

790.6

Summary of Decision Requested:

Delete reference to "residential purposes" in Rule 20.2.5.1 P3 Earthworks - General

OR

Any further amendments or relief as necessary to support the submission.

Decision Reasons:

- Clause (a) of Rule 20.2.5.1 - P3 states that "earthworks for purposes other than creating a building platform for residential purposes within the site...", but these are not residential purposes proposed for Industrial Zone.
- Reference to residential activities in Industrial Zone not considered appropriate, should be amended to refer to either 'development' or 'industrial land uses'.

Point Number

790.7

Summary of Decision Requested:

Amend Rule 20.2.7.1 P2(c)(i) Signs - General, to permit larger signage as site size increases

OR

Any further amendments or relief as necessary to support the submission.

Decision Reasons:

- Provision does not take into consideration site size and imposes a one size fits all rule.
- Acknowledge the purpose to avoid proliferation of signage while maintaining suitable visual, streetscape and amenity effects. Provision should enable increased signage as permitted activity when site size increases.
- Rule 20.4.1 of the PDP requires 1000m2 minimum for Industrial Subdivision. It would then follow that a site twice as large could have 6m2 signage for sites 2000m2 in size. This would not result in an unreasonable adverse effect when baseline is 3m2 per 1000m2.
- It is requested that the provision be amended to incrementally increase allowable signage on site as size of site increases. Would enable larger sites with larger buildings to have signage that reflects the size of activities.

Point Number

790.8

Summary of Decision Requested:

Add a clause to Rule 20.3.1 - P1 Building height that enables building height within Horotiu Industrial Park to be consistent with that provided for in Rule 24B.22 of the Operative District Plan. Horotiu Industrial Park comprises the following titles:

- Lot 1 DP 390831 (364687), Lot 18 DP 494347 (723133), Lot 1 DPS 61620 (SA50B/598), Lot 2 DPS 61260 (SA50B/599), Lot 3 DPS 61260 (SA50B/600), Lot 16 DP 494347 (723131), Lot 17 494347 (723132), Lot 1 DP 499692 (742155) and Lot 2 DP 499692 (822899).

OR

Any further amendments or relief as necessary to support the submission.

Decision Reasons:

- Northgate Developments Ltd and Northgate Industrial Park owns significant portion of land within Horotiu Industrial Park located west of Great South Road and south of Horotiu Road, Horotiu.
- Northgate developed Northgate Business Park that has access via Gateway Drive, Evolution Drive and Innovation Way.
- Land remaining Industrially zoned under PDP.
- Horotiu Industrial Park zoning and framework established as a result of an appeal to the previous Waikato District Plan. Consent order agreement enforced by Environment Court.
- Horotiu Industrial Park provisions provided as a permitted activity in Chapter 24B of the ODP subject to timing of land release, scale of activities and management of potential effects.
- Provisions provide Industrial development as Permitted activity given compliance with performance standards that govern timing land release, scale of activities and management of potential external effects such as noise, bulk, height, setbacks, landscaping and traffic.
- Rule 20.3.1 -P3 of PDP specifies 15m maximum building height.
- Rule differs from provisions for Horotiu Industrial Park as per Rule 24B.22 of the ODP which enables/restricts development to: 25m maximum height when located over 400m from Horotiu Road provided 15m maximum height for 15% of site for Stages 1, 2, 3A and 3B, and up to 15m or 10m when located within 50m of Horotiu Road or within 50m of Stage 3C boundaries as per Rule 24B.22.1(a) of the ODP.
- Operative provisions demonstrate the closer development to external boundaries of Horotiu Industrial Park the more stringent height is. Buildings 15-25m can be accommodated within Horotiu Industrial Park.
- Rule changes may curtail Industrial activities in Horotiu Industrial Park which have been bought due to higher height limits.
- All current landowners bought sites knowing height requirements. Consistent with amenity values for area.
- Requested Horotiu Industrial Park be defined in PDP while retaining existing height rules in Rule 24B.22 of the ODP.
- Northgate would accept further relief/amendments to the PDP to support the Northgate position.

Point Number	790.9
Summary of Decision Requested:	Delete Rule 20.4.1 RD1 (a)(ii) Subdivision General. OR Any further relief or amendments as necessary to support the submission.
Decision Reasons:	<ul style="list-style-type: none"> • Rule 20.4.1 (a) (ii) - RD1 imposes an averaging requirement of 2000m2 for subdivision within Industrial Zone being twice the size of minimum net site area enabled by clause (a)(i), reduces development potential. • It is unclear the effect of averaging standard trying to achieve when minimum lot size is 1000m2. • If issue was around suitable lot sizes and shapes to accommodate future land uses an alternative approach would be minimum shape factor requirements. • The lot size required for Industrial land is based on market demand as land is bought per m2 rate. • Purchasers set lot sizes based on what is most cost effective. Industrial subdivision follows sale and purchase agreements. • If subdivision standards require double minimum lot size as an average, it will lead to inefficient use of Industrial land.

Submitter Number:	791	Submitter:	Andrew Michael Basford Green
Organisation:	Meremere Dragway Inc		
Point Number	791.1		
Summary of Decision Requested:	Amend the area shown on the planning maps as "Meremere Dragway" to "Drag Way Park Specific Area". AND Any consequential amendments to the Proposed District Plan to give effect to the relief sought in this submission.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter seeks the name change as it better reflects the diverse range of non-motorised activities sought in the submission to take place at the site. 		

Point Number	791.2
Summary of Decision Requested:	Amend Activity specific condition 14.12.1.4 (1)(d)(i) relating to P4, to increase the maximum vehicle movements per day from 200 to 350 vehicle movements per day with no more than 15% of these vehicle movements being heavy vehicles. AND Any consequential amendments to the Proposed District Plan to give effect to the relief sought in this submission.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter considers that 200 vehicle movements a day is overly restrictive within the Rural Zone. • Many activities within the Rural Zone are reliant upon vehicle movements and there are no other viable transport alternatives due to the distances involved. • The submitter considers that 350 vehicle movements a day is more appropriate and accordingly seeks relief.

Point Number	791.3
Summary of Decision Requested:	Add a new section to Chapter 22 Rural Zone entitled "22.9 Specific Area – Drag Way Park" (Drag Way Park Specific Area), based on Schedule 25E Meremere Dragway of the Operative District Plan, subject to amendments to provide for non-motorised activities. See Appendix A of the submission for provisions sought. AND Add the "Rule Table for Land Use Activities" from Schedule 25E of the Operative District Plan, subject to amendments to provide for non-motorised activities. See Appendix A of the submission for the table. AND Any consequential amendments to the Proposed District Plan to give effect to the relief sought in this submission.
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan proposes that the Meremere Dragway remains zoned Rural. However, the Rural Zone fails to recognise nearly 50 years of use of the site for motorised activities, and does not identify all activities that may take place within a rural setting, subject to meeting appropriate performance standards, including recognising Meremere Dragway as a resource for non-motorised activities. • The proposed Rural Zone provisions do not adequately provide for the Meremere Dragway's social and economic contributions to the district, the region and the nation. • Appropriate provision should be made for the activities that are currently being undertaken on the site and future activities, which are not incompatible with the existing environment that includes Hampton Downs Motorsport Park, landfill and prison. • The Proposed District Plan does not take into account the industrial nature of the nearby landfill or the commercial nature of the prison complex and the Hampton Downs Motorsport Park. • The Proposed District Plan does not realise the potential of the Meremere Dragway as a multipurpose site, including for the provision of non-motorised activities. A number of organisations have approached the Meremere Dragway seeking to use the facility. • The Meremere Dragway is a specialist facility needed for the safe conduct of potentially harmful activities that may be inappropriate elsewhere. • The Meremere Dragway is an ideal location for motorsport activity that is not acceptable in an urban area. • The proposed approach of including the dragway in the rural Zone is contrary to Part 2 of the Resource Management Act, including: <ul style="list-style-type: none"> • It is contrary to Part 2 of the Resource Management Act. • It does not promote sustainable or integrated management. • It does not manage the use, development and protection of natural and physical resources. • It does not avoid, remedy or mitigate adverse effects. • It is not the most appropriate way to achieve the purpose of the Act. • It does not meet section 32 of the Act. • It does not represent sound resource management practice.

Point Number	791.4
---------------------	-------

Summary of Decision Requested: Amend the definition of "Meremere Dragway activity" in Chapter 13 Definitions to read as "Drag Way Park Specific Activity".

AND

Amend the definition of "Meremere Dragway activity" in Chapter 13 Definitions to provide for the addition of non-motorised activities as follows (or a similar variation):

~~Meremere Dragway activity~~ Drag Way Park Specific Activity

~~Means an activity at Meremere Dragway activity~~ Drag Way Park Specific Area as shown on the planning maps that involves ~~motor propulsion to provide entertainment, education or training for the general public or to an individual participating in the activity, and includes but is not limited to driver training or education, police or security training, and vehicle testing~~ motorised recreational activity, non-motorised recreational activity, static-automotive activity and a film and advertising production activity.

AND

Any consequential amendments to the Proposed District Plan to give effect to the relief sought in this submission.

Decision Reasons:

- The submitter seeks the name change to provide consistency with the name change of the overlay sought in this submission.
- Appropriate provision should be made for the activities that are currently being undertaken on the site and future activities, which are not incompatible with the existing environment that includes Hampton Downs Motorsport Park, landfill and prison.
- The Proposed District Plan does not realise the potential of the Meremere Dragway as a multipurpose site, including for the provision of non-motorised activities. A number of organisations have approached the Meremere Dragway seeking to use the facility.
- The Meremere Dragway is a specialist facility needed for the safe conduct of potentially harmful activities that may be inappropriate elsewhere.
- The Meremere Dragway is an ideal location for motorsport activity that is not acceptable in an urban area.

Submitter Number: 792 **Submitter:** Lisa Kerrisk

Point Number 792.1

Summary of Decision Requested: Provide for free access to ride horses down beach track.

Decision Reasons:

- Really dangerous to take horses along the road which is the only other option.
- Opposes the restriction on horses down the beach track.

Submitter Number: 793 **Submitter:** Ohinewai Area Committee

Point Number 793.1

Summary of Decision Requested: Amend the zoning of the properties 10, 12, 14, 16 and 18 Ohinewai North Road, Ohinewai from Business Zone to Residential Zone.

Decision Reasons:

- The properties are being used for residential purposes.
- Neighbouring sites are zoned Residential.
- Rezoning land to Commercial may have a negative impact on residents surrounding it.
- Expansion of Auckland causing more commercial businesses moving south.
- Owners do not want to live next to a commercial operation.

Submitter Number: 794 **Submitter:** Middlemiss Farm Holdings Limited

Point Number 794.1

Summary of Decision Requested: Amend Section 1.4.2.3 Challenges as follows:

(a) Economic development challenges facing the district are as follows:

(i) Growth across the district is uneven. Population and associated economic growth is occurring predominantly in the north (Tuakau, Pokeno, Te Kawhata) and in the south around the Hamilton periphery. This challenge, which can be managed, is also an opportunity as new residents and businesses diversify and strengthen the economic base of the District.

...

(vi) Soil resources, including soil quality, are under threat ~~due to~~ where subdivision and intensification of land use is inappropriate.

...

(ix) With growth pressure in both the Urban and Rural sectors, maintaining and enhancing the natural , and ensuring the sustainability of ecosystem services.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- Cabra v Auckland Council case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent

conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.

- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.2

Summary of Decision Requested:

Amend Section 1.4.3 The Rural environment as follows:

(a) The district benefits from an extensive rural area which contains a range of attributes necessary for productive rural activities, including a variety of soils, mineral resource and landscapes that are able to sustain diverse range of economic activities. A productive rural area is important to the economic health of the district and wider subregion, and needs to be recognised as a productive resource.

(b) In addition, the rural parts of the district are valued for their landscape, character and amenity values and indigenous habitats and waterways.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.3

Summary of Decision Requested:

Amend Section 1.4.3.1 Rural Activities as follows:

(a) Productive rural activities ~~are include~~ those activities that use rural resources for economic gain or which cannot be carried out easily or appropriately in an urban setting. Farming activities, including dairy, dry stock, horse breeding/training, honey production, horticulture, pig and poultry, mining, and forestry are all significant industries in economic terms for the Waikato district. Other productive rural activities include housing for people working in rural environments and ecosystem services that provide inputs for rural production (such as clean water) and assimilate output pollutants (such as nitrate and sediment run off).

(b) Rural-based activities that do not use rural resources directly include rural service industries and major facilities such as Hampton Downs. The recreational use of the rural environment is also important to the district, with activities such as hunting, fishing, tramping, and cycling being very important in terms of tourism. Lifestyle uses can be sensitive to the effects of mining, farming and horticulture operations and other significant activities. There is therefore potential for conflict between rural activities and other land uses. ~~Excessive~~ Lifestyle development in rural areas can have a number of adverse effects that need to be avoided/managed. These effects may include the loss of rural amenity, rural production, and high quality soils, resulting in the potential for reverse sensitivity conflicts, demands for improved rural infrastructure and services that are difficult to provide economically, and reduced growth in urban areas, which affects the prosperity of urban areas. However, through a design led site development process, and robust assessment criteria, rural residential development can be integrated into working rural environments in appropriate locations.

(c) ~~Rural areas are vulnerably to small scale change that, cumulatively, can have a profound effect on their efficient use for rural production and other rural activities. The continued modification of the rural environment through land use subdivision, and development as a result of residential and commercial growth, can adversely affect their natural and physical qualities and character. These qualities and character are important in maintaining investment in rural activities, which proportionally contribute the most to the district's GDP and provide a context to the development and sustainability of rural towns and villages.~~

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- No reasons provided.

Point Number

794.4

Summary of Decision Requested:

Amend Section 1.4.3.2 Protecting the rural environment as follows:

(a) The continued use of the rural areas for productive rural activities and other land and soil resource-dependent rural-based activities, as well as access to and the extraction of mineral resources, are important to the economic health and well-being of the district and wider subregion. It is therefore necessary to ensure that the continued, effective operations of farming activities or productive rural activities are not adversely affected by manage growth in lifestyle activities including rural residential development. A key focus is to ensure that resource does not become so fragmented that its attraction for activities that require a rural setting is diminished.

(b) Activities affecting landscape, historic and amenity values including rural character, recreational activities, high quality soils, significant mineral resources and ecological values need to be managed to avoid adverse effects on the environment, including cumulative effects. This should occur through ~~limiting~~ managing the extent to which non-rural activities are able to establish in the Rural Zone. ~~There is a need to uphold the increased level of control the Council has placed over subdivision activities in the Rural and Country Living Zones, particularly within the north Waikato and around the Hamilton City boundary. Any additional areas for rural residential development should be considered within identified growth areas of towns or villages. Non-rural activities must occur in towns, villages and defined growth areas, and the expansion of such areas should be managed so that adverse effects on rural areas are minimised.~~

(c) In line with the Regional Policy Statement, the district plan must ensure that rural-residential built development is directed away from natural hazard areas, regionally significant industry, high class soils, primary production activities on high class soils, electricity transmission, and locations identified as likely renewable energy generation sites and from identified significant mineral resources and their identified access routes.

(d) Rural areas also contain degraded natural and physical resources, including soil, water and indigenous habitats, because of inappropriate rural productive activities. For example, the loss of indigenous biodiversity and habitats in the Waikato District is significant, and the mauri of the Waikato River has been compromised and it is no longer a healthy and reliable food source for tangata whenua. Degraded natural and physical resources urgently need protection, enhancement and restoration, including the establishment of new ecological habitats. This work is expensive and labour intensive to undertake at the scale required to meet the Purpose of the Act. In situ incentivised subdivision is an important method to manage the demand for residential/lifestyle growth in rural areas, while at the same time achieving significant environmental restoration benefits.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.5

Summary of Decision Requested:

Amend Objective 3.1.1 Biodiversity and ecosystems as follows:

(a) Indigenous biodiversity values and the life-supporting capacity of indigenous ecosystems are maintained or enhanced.

(b) New areas of indigenous biodiversity are established.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.6

Summary of Decision Requested:

Amend Policy 3.1.2 Policies as follows:

(a) Enable activities that maintain or enhance indigenous biodiversity including:

(i) planting using indigenous species suitable to the habitat;

(ii) the removal or management of pest plant and animal species;

(iii) biosecurity works.

(iv) incentivised subdivision

(b) Consider the following when avoiding, remedying or mitigating adverse effects on indigenous biodiversity:

....

(x) ecological corridors, natural processes and buffer areas;

(xi) connections and linkages that integrate habitats and resources;

~~*(xii) the appropriateness of landuse activities, including primary production;*~~

~~*(xiii) legal and physical production of existing habitat;*~~

(c) Provide for the removal of manuka or kanuka on a sustainable basis.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.

- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils where practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.7

Summary of Decision Requested: Retain Objective 3.2.1 Significant Natural Areas

Decision Reasons:

- No reasons provided.

Point Number 794.8

Summary of Decision Requested: Amend Policy 3.2.2 Identify and Recognise as follows:

(a) *Identify significant indigenous vegetation and habitats of indigenous fauna in accordance with the Waikato Regional Policy Statement and identify as Significant Natural Areas.*

(b) *Recognise and protect Significant Natural Areas by ensuring the characteristics that contribute to their significance are not adversely affected.*

(c) *Incentivise subdivision for ecological enhancement where it will maintain and support the viability of existing Significant Natural Areas.*

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park* and *Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils where practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.9

Summary of Decision Requested: Amend Policy 3.2.7 (a) (i) Managing Significant Natural Areas as follows:

(a) *Promote the management of Significant Natural Areas in a way that protects their long-term ecological functioning and indigenous biodiversity values, through such means as:*

(i) *permanently excluding stock through voluntary covenants and ~~conservation~~ incentive subdivisions*

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park* and *Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils where practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.10

Summary of Decision Requested: Amend Policy 3.2.8 Incentivise subdivision as follows:

(a) *Incentivise subdivision in the Rural Zone when there is the legal and physical protection of Significant Natural Areas, provided the areas are of a suitable size and quality to achieve a functioning ecosystem.*

(b) *Incentivise in situ subdivision in the Rural Zone where there are significant ecological benefits.*

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. - The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.11

Summary of Decision Requested:

Amend Objective 5.1.1 The rural environment as follows:

Objective 5.1.1 is the strategic objective for the rural environment and has primacy over all other objectives in Chapter 5.

(a) Subdivision, use and development within the rural environment where:

(i) high class soils are protected for ~~productive~~ rural activities;

(ii) ~~productive~~ rural activities are supported, while maintaining and enhancing the rural environment;

(iii) urban subdivision, use and development in the rural environment is avoided, and other subdivision is managed.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.12

Summary of Decision Requested:

Retain Objective 5.2.1 Rural resources.

Decision Reasons:

- No reasons provided.

Point Number

794.13

Summary of Decision Requested:

Amend Policy 5.2.2 High class soils as follows:

(a) Soils, in particular high class soils, are retained for their ~~primary~~ productive value.

(b) Ensure the adverse effects of activities do not compromise the physical, chemical and biological properties of high class soils.

AND

Add the distinction between "elite" and "prime" high class soils into the Proposed District Plan (similar to the Auckland Unitary Plan) to better manage soil resources, including appropriate changes to the objectives, policies and rules.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.

- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.14

Summary of Decision Requested: **Amend** Policy 5.3.8 Effects on rural character and amenity from rural subdivision as follows:

(a) Protect ~~productive~~ the amenity values of rural areas by directing urban forms of subdivision, use and development to within the boundaries of towns and villages.

...

(d) Rural hamlet subdivision, in situ environmental enhancement incentive subdivision, and boundary relocations ensure the following:

(i) ~~Protection of~~ Rural land can continue to be used for productive purposes.

...

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.15

Summary of Decision Requested: **Add** a new policy into Section 5.3 Rural Character and Amenity as follows:

Policy 5.3.8B - Environmental enhancement and restoration of ecosystem services

(a) Enable environmental enhancement and the restoration of degraded ecosystem services by the provision of in situ incentive subdivision opportunities;

(b) Avoid, remedy and mitigate any potential adverse effects of subdivision and development on other rural activities, soil and mineral resources, and rural amenity values;

(c) Ensure that areas identified and restored are properly protected for the long term through appropriate legal mechanisms.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.16

Summary of Decision Requested: **Delete** Rule 22.3.1 Number of dwellings within a lot;

AND

Add a more enabling provision.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.17

Summary of Decision Requested:

Delete Rule 22.3.2 PI (b)(i) Minor dwelling requiring the minor dwelling to be no more than 20m from the main dwelling.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To remove requirement for a dwelling to be no more than 20m from the main dwelling.

Point Number

794.18

Summary of Decision Requested:

Delete Rule 22.3.7.5 Building setback - water bodies;
AND
Amend rules to relax the setback distances.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Relax the rules for setback distances.

Point Number

794.19

Summary of Decision Requested:

Delete Rule 22.4.1.1 Prohibited subdivision;
AND
Add more enabling provisions for subdivision.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number

794.20

Summary of Decision Requested:

Delete Rule 22.4.1.2 General subdivision;
AND
Add more enabling provisions as a replacement.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.

Point Number 794.21

Summary of Decision Requested: **Delete** Rule 22.4.1.4 Boundary relocation;
AND
Add more enabling provisions as a replacement.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.

Point Number 794.22

Summary of Decision Requested: **Delete** Rule 22.4.1.5 Rural Hamlet Subdivision;
AND
Add more enabling provisions as a replacement.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.

Point Number 794.23

Summary of Decision Requested: **Delete** Rule 22.4.1.6 Conservation lot subdivision;
AND
Add more enabling provisions as a replacement.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.

Point Number 794.24

Summary of Decision Requested: **Delete** Rule 22.4.6 Subdivision of land containing all or part of an Environmental Protection Area
and
Add more enabling provisions as a replacement.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.

Point Number 794.25

Summary of Decision Requested: **Delete** Rule 22.4.9 Subdivision - Building platform
AND
Add more enabling subdivision as a replacement.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.

Point Number 794.26

Summary of Decision Requested: **Add** a new rule to provide for in-situ incentive subdivision for environmental enhancement. Submission suggests the Auckland Unitary Plan could be used for guidance.
AND
Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- To enable appropriate subdivision.
- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.

- Several court decisions including *Di Andre Estates Ltd v Rodney District Council*, *Arrigato Investments v Auckland Regional Council*, *Omaha Park and Cabra v Auckland Council* are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- *Cabra v Auckland Council* case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the *Cabra* case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.27

Summary of Decision Requested: **Add** a transferable development right subdivision regime, particularly to relocate lots from elite soils that are inappropriately located. The submission suggests the Auckland Unitary Plan could be used for guidance.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Potential inclusion of transferable development right subdivision regime, particularly to relocate small lots from elite soils that are inappropriately located.
- While not finally determined yet, and with spatial and temporal issues still to be finally addresses through the appeal process, the Auckland Unitary Plan provisions could be used for guidance.

Point Number 794.28

Summary of Decision Requested: **Amend** the Proposed District Plan by introducing provisions from the Auckland Unitary Plan, including incentivised subdivision rules for the General Rural Area for Ecological benefit.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- The natural and physical environments of the Auckland Region, particularly in the southern part, and the Waikato District are reasonably similar.
- Issues such as the protection of high-class soils, Significant Ecological Areas, the need for ecological enhancement, and the need to manage growth in rural areas are common in both jurisdictions.
- The Auckland Unitary Provisions were developed by an expert Hearings Panel with the benefit of a substantial amount of expert evidence and legal submissions.
- The provisions have been recently tested in several appeals to the High Court and the Environment Court and have generally been found to be robust and meet the purposes of the Resource Management Act.

Point Number 794.29

Summary of Decision Requested: **Amend** the Proposed District Plan maps to include the riparian areas on the property at 95 Jericho Road, Pukekohe shown in Appendix 2 of the submission as an Ecological Corridor or a similar layer.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- The site was granted a subdivision consent for the protection of some streams and ecological enhancement.
- The submitter would like to extend the planting over the rest of the property to exclude stock from accessing the waterways.
- Fencing and planting around streams is expensive.
- Submitter believes that a subdivision incentive mechanism is appropriate and necessary to afford the degraded stream protection.

Point Number 794.30

Summary of Decision Requested: **Amend** the Proposed District Plan to enable the creation of up to 2 additional lots at 95 Jericho Road, Pukekohe East for a minimum 3ha of restoration and protection of indigenous vegetation. The size of the new lots could be between 5000m² to 1.5ha.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Incentive mechanisms are appropriate and necessary to afford the degraded stream on the property the protection it requires.

Point Number 794.31

Summary of Decision Requested: No specific decision sought, but the submission supports any opportunity for 95 Jericho Road, Pukekohe East that is available under any rules in the Proposed District Plan, including for sites with older titles and larger than 20ha.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- The submitter support further subdivision opportunities at 95 Jericho Road, Pukekohe East.

Point Number 794.32

Summary of Decision Requested: **Amend** the provisions within Chapter 22.4 Subdivision, to provide for incentivised subdivision rules to enable ecological benefit within the rural area as a restricted discretionary activity as follows:

(b) In situ opportunity in all rural zones but which are subject to overlay rules for outstanding landscapes, features etc.

(c) Lot yields

- Restoration planting: 1 new lot for every 2ha minimum
- Retirement succession: 1 new lot for every 4ha minimum
- Wetland establishment: 1 new lot for every 0.5ha establishment (excluding buffer areas)
- Riparian protection: 1 new lot for every 1.5ha minimum (minimum width of 10m and an average minimum of 15m either side of the stream bank or wetland.

(d) the submitter considers whether a maximum cap be applied

(e) lots with sizes ranging between 5000m² and 1.5ha.

(f) clustering of lots is encouraged but not required as it is a design response issue and site dependent.

AND

Amend the provisions within Chapter 22.4 Subdivision for incentivise subdivision rules to enable ecological benefit within rural areas by incorporating the following Restricted Discretionary Assessment Criteria as follows:

(a) Site specific design led approach to the identification of protection/enhancement areas, lot boundaries and building platforms;

(b) Priority, provided for the LENZ 4 most at-risk land, wetlands and streams;

(c) Opportunity for linkages to other existing or future ecological areas;

(d) The qualities and features of the resources to be protected/enhanced;

(e) Locating accessways and building platforms, where practicable;

- off elite soils;
- where reverse sensitivity risk is managed;
- to maintain rural production (broadly defined); and
- to maintain and enhance rural amenity values.

(f) The ecological and other benefits of the enhancement; and

(g) Legal long-term protection and maintenance mechanisms.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Introduce the Auckland Unitary Plan provisions because the natural and physical environments of the Auckland Region and the Waikato District are reasonably similar and addresses issues such as the protection of high-class soils, Significant Ecological Areas, the need for ecological enhancement, and the need to manage growth in rural areas are common in both jurisdictions.
- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- Cabra v Auckland Council case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the Cabra case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils were practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.33

Summary of Decision Requested: **Amend** the rules in Chapter 22: Rural Zone to give effect to the indicative changes sought to the issues, objectives and policies.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Various as outlined in submission.

Point Number 794.34

Summary of Decision Requested: **Amend** Policy 5.2.3 Effects of subdivision and development on soils as follows:

(a) Subdivision, use and development minimises the fragmentation of productive rural land, particularly where high class soils are located.

(b) Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, where practicable.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- Cabra v Auckland Council case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the Cabra case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.

- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils where practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.35

Summary of Decision Requested: Retain Objective 5.3.1 Rural character and amenity.

Decision Reasons:

- No reasons provided.

Point Number 794.36

Summary of Decision Requested: Amend Policy 5.3.2 Productive rural activities as follows:

(a) Recognise and ~~protect~~ **enable** the continued operation of the rural environment as a ~~productive~~ working environment by:

(i) Recognising that buildings and structures associated with farming and forestry and other operational structures for productive rural activities contribute to rural character and amenity values;

(ii) Ensuring ~~productive~~ rural activities are supported by appropriate rural industries and services;

(iii) Providing for lawfully-established rural activities and protecting them from sensitive land uses.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- Cabra v Auckland Council case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the Cabra case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils where practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Point Number 794.37

Summary of Decision Requested: Retain Policy 5.3.3 Industrial and commercial activities.

Decision Reasons:

- No reasons provided.

Point Number 794.38

Summary of Decision Requested: Amend Policy 5.3.4 Density of dwellings and buildings within the rural environment as follows:

(a) Retain open spaces to ensure rural character is maintained.

(b) Additional dwellings support workers' accommodation for large productive rural activities.

(c) Require site specific design responses for subdivision provisions that avoid, remedy and mitigate, any potential significant adverse effects of buildings on rural character and amenity.

AND

Amend the Proposed District Plan consequential or additional amendments as necessary to give effect to the submission.

Decision Reasons:

- Based on the Council's own evidence there is no doubt that a significant resource management issue for the District is biodiversity loss, which continues to be at risk due to vegetation clearance, stock intrusion, animal and pest degradation, degradation of the margins for estuarine wetlands by stock.
- The submitter is concerned that the Proposed District Plan is largely focused on only protecting existing Significant Natural Areas and ignores restoring, linking and expanding indigenous biodiversity that does not qualify as Significant Natural Areas.
- There is no regulatory framework to increase indigenous vegetation and wetlands to a target vegetation cover of 30%, actively manage areas that can be considered Significant Natural Areas in the future, increase vegetation cover on steep and erosion prone land, incentivize fencing of riparian areas, incentivize the creation of new corridors, pest control, enrichment planting and restoration.
- No comprehensive research supports the claim that incentive-based planting in the district has resulted in sporadic, adhoc development.
- There appears to be no robust analysis of the success or failures of the limited amount of enhancement subdivision that has previously been undertaken in the Franklin part of the District that had these provisions.
- Several court decisions including Di Andre Estates Ltd v Rodney District Council, Arrigato Investments v Auckland Regional Council, Omaha Park and Cabra v Auckland Council are useful for establishing current best practice to meet the requirements of Part 2 of the RMA.
- Cabra v Auckland Council case law notes that the Council could not use the fact that there may be issues with weeds, or poor fencing, as a reason to oppose the inclusion of incentive provisions in the Plan, because it had the authority and responsibility to monitor consent conditions. There are a range of enforcement mechanisms available to a council, and the ability to recover costs from a consent holder, that mean managing compliance in these areas should not be onerous for a council.
- The court in the Cabra case has taken a far sighted and future oriented approach to the maintenance and enhancement of biodiversity.
- The Proposed District Plan does not give effect to the New Zealand Coastal Policy Statement.
- The Proposed District Plan does not give effect to the National Policy Statement for Freshwater Management.
- The Proposed District Plan does not adopt the vision of the Waikato River Settlement Act as there is not a strong emphasis in the vision on restoration.
- The Proposed District Plan does not give effect to the Waikato Regional Policy Statement.
- The submitter supports appropriate protection of high-class soils where practicable and where they are alternatives to using this land. However, sustainable land management may mean that subdivision on these soils is not always inappropriate.

Submitter Number:	795	Submitter:	Hinemaria Ward-Holmes
Point Number	795.1		
Summary of Decision Requested:	Add strong precautionary and prohibitive policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan, to ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues.		
Decision Reasons:	<ul style="list-style-type: none"> Eating is crucial for health, wellbeing and life. Unknown effects of GMO's. Must stop thinking about technology solving the problems. The way forward is smaller forms and be more productive, reducing chemicals. Concerned at the potential risks posed by GMO's. GMO's have the potential to adversely effect ecological, economic and resource management values and the social and cultural wellbeing of people, communities and tangata whenua. No matter how carefully crafted conditions of consent for GMOs, there is still a residual risk that these may be breached by poor management, human error, natural events or sabotage. Once GMOs have been released into the environment, it would be very difficult if not impossible to eradicate. Management of GMOs is consistent with the purpose and Part 2 of the RMA. 		
Point Number	795.2		
Summary of Decision Requested:	Add a resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and well-being considerations.		
Decision Reasons:	<ul style="list-style-type: none"> Eating is crucial for health, wellbeing and life. Unknown effects of GMO's. Must stop thinking about technology solving the problems. The way forward is smaller forms and be more productive, reducing chemicals. Concerned at the potential risks posed by GMO's. GMO's have the potential to adversely effect ecological, economic and resource management values and the social and cultural wellbeing of people, communities and tangata whenua. No matter how carefully crafted conditions of consent for GMOs, there is still a residual risk that these may be breached by poor management, human error, natural events or sabotage. Once GMOs have been released into the environment, it would be very difficult if not impossible to eradicate. Management of GMOs is consistent with the purpose and Part 2 of the RMA. 		

Submitter Number:	796	Submitter:	New Zealand Defence Force
Point Number	796.1		
Summary of Decision Requested:	Add a definition for "Temporary Military Training Activities" into Chapter 13 Definitions, as follows: <u>Temporary Military Training Activity means a temporary training activity undertaken for defence purposes in accordance with the Defence Act 1990.</u>		
Decision Reasons:	<ul style="list-style-type: none"> There currently is no definition. A definition is necessary to identify that temporary military training activities are separate from other temporary events. It will provide clarity and ensure particular controls that are appropriate for social, cultural and recreational events do not apply to temporary military training activities. Specific rules would then apply for temporary military training activities to ensure any potential adverse effects are appropriately managed. Use a standardised definition for all district plans nationwide to be consistent with national planning standards approach. A number of district councils have incorporated the recommended definition or similar during their district plan review process. 		
Point Number	796.2		
Summary of Decision Requested:	Amend the definition of "Infrastructure" in Chapter 13 Definitions to include "national defence facilities" as clause (m).		
Decision Reasons:	<ul style="list-style-type: none"> The submitter would like to see the significance of defence activities recognised. Although the submitter does not currently have any permanent facilities in the Waikato District, this does not preclude the need for future defence infrastructure in the district. Defence facilities are critical for New Zealand's security and for the safety and well-being of the community. National defence facilities should be identified as significant infrastructure. Consistent with the approach taken in a number of district and regional plans throughout New Zealand. 		
Point Number	796.3		
Summary of Decision Requested:	Add a permitted activity rule for temporary military training activities within a general district wide chapter that applies across all zones, subject to appropriate noises standards; OR Add a new permitted activity rule as shown below for temporary military training activities to the following chapters:		
	<ul style="list-style-type: none"> Chapter 16 Residential Zone Chapter 17 Business Zone Chapter 18 Business Town Centre Zone Chapter 19 Business Zone Tamahere Chapter 20 Industrial Zone Chapter 21 Industrial Zone Heavy Chapter 22 Rural Zone Chapter 23 Country Living Zone Chapter 24 Village Zone Chapter 25 Reserve Zone Chapter 26 Hampton Downs Motor Sport Recreation Zone Chapter 27 Te Kowhai Airpark Zone Chapter 28 Rangitahi Peninsula Zone 		

P*: Temporary military training activities

Activity-specific conditions

The activity must comply with the permitted activity noise standards for temporary military training activities.

Decision Reasons:

- Due to temporary and specialised nature of temporary military training activities, the submitter considers it generally appropriate that those activities be exempt from other rules in other chapters such as transportation and structures.
- As the Proposed District Plan is currently drafted, temporary military training activities would be a non-complying activity as they are not provided for as a permitted, restricted discretionary, discretionary or prohibited activity. Considered inappropriate and onerous.
- A permitted activity status would have little or no environmental effects, such as search and rescue operations or small construction tasks undertaken for training purposes would require resource consent as a non-complying activity, which is not effects-based or a good resource management process.
- The submitter must undertake training in order to fulfil statutory obligations under the Defence Act. Including provision for temporary military training activities as a permitted activity provides certainty that such activities can occur when required, while providing adequate protection of the environment through compliance with noise standards.

Point Number

796.4

Summary of Decision Requested:

Add permitted activity noise standards in a general district-wide chapter that applies across all zones for temporary military training activities (see Attachment 2 to the submission for specific standards);

OR

Add new permitted activity noise standards for temporary military training activities (see Attachment 2 to the submission for specific standards) to the following chapters:

- Chapter 16 Residential Zone
- Chapter 17 Business Zone
- Chapter 18 Business Town Centre Zone
- Chapter 19 Business Zone Tamahere
- Chapter 20 Industrial Zone
- Chapter 21 Industrial Zone Heavy
- Chapter 22 Rural Zone
- Chapter 23 Country Living Zone
- Chapter 24 Village Zone
- Chapter 25 Reserve Zone
- Chapter 26 Hampton Downs Motor Sport Recreation Zone
- Chapter 27 Te Kowhai Airpark Zone
- Chapter 28 Rangitahi Peninsula Zone

Decision Reasons:

- There are currently no permitted activity standards relating to temporary military training activities.
- The submitter has prepared noise standards specific to temporary military training activities and has requested that these standards be included in the Waikato District Plan.
- See Attachment 3 in the submission for an explanation of the standards.

Point Number

796.5

Summary of Decision Requested:

Add a controlled activity rule within a general district wide chapter of the District Plan for temporary military training activities that do not meet Permitted Activity standards;

OR

Add a new controlled activity rule as shown below for temporary military training activities that do not meet the permitted activity standards to the following chapters:

- Chapter 16 Residential Zone
- Chapter 17 Business Zone
- Chapter 18 Business Town Centre Zone
- Chapter 19 Business Zone Tamahere
- Chapter 20 Industrial Zone
- Chapter 21 Industrial Zone Heavy
- Chapter 22 Rural Zone
- Chapter 23 Country Living Zone
- Chapter 24 Village Zone
- Chapter 25 Reserve Zone
- Chapter 26 Hampton Downs Motor Sport Recreation Zone
- Chapter 27 Te Kowhai Airpark Zone
- Chapter 28 Rangitahi Peninsula Zone

C*: Any temporary military training activities that do not comply with the permitted activity noise standard.

Council's discretion shall be restricted to the following matters:

(g) Noise effects

Decision Reasons:

- The submitter must undertake training to fulfil its statutory obligations under the Defence Act 1990.
- A controlled activity status provides a level of certainty to the submitter that an activity can proceed.
- Allows Council discretion to ensure relevant effects (being noise) are appropriately managed.
- In determining what conditions to impose, Council should limit its discretion to effects relating to the permitted activity noise standards only.

Submitter Number:

797

Submitter:

Fonterra Limited

Point Number

797.1

Summary of Decision Requested:

Retain Section 1.4.2 Economic growth as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the significance of primary industry to the district's economy.

Point Number

797.2

Summary of Decision Requested:

Retain Section 1.4.2.1 Economic sectors as notified.

Decision Reasons:

- The provisions provide appropriate recognition to the significance of the dairy sector to the district's economy.

Point Number 797.3

Summary of Decision Requested: **Retain** Section 1.4.2.3 Challenges, except for the amendments sought below;

AND

Amend Section 1.4.2.3 Challenges to include (or words to similar effect):

Primary production and processing activities are increasingly subject to reverse sensitivity effects.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the identification of the challenges facing economic activity.
- Considers additional reference needs to be made to reverse sensitivity effects.
- The challenges have the potential to impose additional restrictions and costs on primary production and processing activities.

Point Number 797.4

Summary of Decision Requested: **Retain** Section 1.4.3.1 Rural activities as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the significance of the dairy sector to the district's economy.

Point Number 797.5

Summary of Decision Requested: **Retain** Section 1.4.3.2 Protecting the rural environment as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the need to manage activities to ensure the efficient operation of the primary production sector.

Point Number 797.6

Summary of Decision Requested: **Retain** Section 1.4.4 The urban environment as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the need to manage urban development to ensure the productive capacity of rural resources.

Point Number 797.7

Summary of Decision Requested: **Retain** Paragraph 1.5.4 Urban growth as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the potential adverse of urban development, including reverse sensitivity effects and access to high quality soils and minerals.

Point Number 797.8

Summary of Decision Requested: **Retain** Policy 3.2.3 Management heirachy as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the need to enable activities within Significant Natural Areas.

Point Number 797.9

Summary of Decision Requested: **Retain** Policy 3.2.6 Providing for vegetation clearance as notified.

Decision Reasons:

- The provisions provide appropriate recognition of the need to provide for vegetation clearance to enable the maintenance of farm tracks, drains and fences.

Point Number 797.10

Summary of Decision Requested: **Retain** Policy 4.7.1.1 Reverse sensitivity as notified.

Decision Reasons:

- The provisions provide appropriate direction in respect of the avoidance of reverse sensitivity effects.

Point Number 797.11

Summary of Decision Requested: **Retain** Objective 5.1.1 The Rural environment as notified.

Decision Reasons:

- Supports the primacy of the objective and the clear direction set out in respect of support for productive rural activities and resources.

Point Number 797.12

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Delete Objective 5.2.1(a)(iii) Rural resources.
AND
Any consequential amendments and/or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- This matter is regulated through the Regional Plan.
- Amend the policy direction to delete reference to water quality.
- Supports the policy direction.

Point Number 797.13

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils as notified.

Decision Reasons:

- The Policy provides appropriate recognition and protection of a critical resource.

Point Number 797.14

Summary of Decision Requested: **Retain** Policy 5.3.15 Noise and vibration, except for the amendments sought below
AND
Amend Policy 5.3.15 (a) (vi) Noise and vibration to include "the Te Rapa Dairy Manufacturing Facility" (or words to similar effect).
AND
Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the policy subject to the inclusion of reference to development within the noise control boundary associated with the Te Rapa Dairy Manufacturing Facility.

Point Number 797.15

Summary of Decision Requested: **Retain** Objective 5.4.1 Minerals and extractive industries as notified.

Decision Reasons:

- Supports the recognition of economic value of the districts mineral resources.

Point Number 797.16

Summary of Decision Requested: **Retain** Policy 5.4.2 Access to minerals and extractive industries except for the amendments sought below.
AND
Amend Policy 5.4.2 (a) Access to minerals and extractive industries as follows (or words to similar effect):
Enable the continued operation and development of extractive industries provided that adverse effects are avoided, remedied or mitigated.
AND
Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the policy support for extractive industries subject to clarification that the continued operation and expansion of those regionally significant industries is provided for.

Point Number 797.17

Summary of Decision Requested: **Amend** Policy 5.5.2 (a) Activities within Hamilton Urban Expansion Area as follows (or words to similar effect):
Manage subdivision, use and development within Hamilton's Urban Expansion Area to avoid reverse sensitivity effects in respect of the Te Rapa Dairy Manufacturing Facility and to ensure that future urban development is not compromised.
AND
Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Urban Expansion Area includes land in close proximity to the Te Rapa Dairy Manufacturing Facility.
- Additional reference is required to ensure that reverse sensitivity effects in respect to the factory are avoided.

Point Number 797.18

Summary of Decision Requested: **Delete** Section 10.1 Hazardous Substances, comprising Objective 10.1.1 and Policies 10.1.2, 10.1.3 and 10.1.4.
AND
Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Resource Legislation Amendments Act 2017 amended the RMA to remove hazardous substances as an explicit function of Council.

- The Proposed District Plan does not provide justification for inclusion of provisions.

Point Number 797.19

Summary of Decision Requested: **Add** a definition of "Lifestyle Uses" to Chapter 13 Definitions, as follows (or words to similar effect):
residential activity outside of a defined urban area or village boundary.
 AND
 Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The term is referenced within various plan provisions.
- Term is undefined.

Point Number 797.20

Summary of Decision Requested: **Add** a definition of "productive rural activities" to Chapter 13 Definitions as follows (or words to similar effect):
farming, forestry, horticulture and mineral extraction.
 AND
 Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The term is referenced within various plan provisions.
- Term is undefined.

Point Number 797.21

Summary of Decision Requested: **Add** a definition of "reverse sensitivity" to Chapter 13 Definitions as follows (or words to similar effect):
the vulnerability of a lawfully established activity to a new activity or land use. It arises when a lawfully established activity causes potential, actual or perceived adverse environmental effects on the new activity, to a point where the new activity may seek to restrict the operation or require mitigation of the effects of the established activity.
 AND
 Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The term is referenced in various plan provisions.
- Term is undefined.

Point Number 797.22

Summary of Decision Requested: **Add** a definition of "factory wastewater irrigation farm" to Chapter 13 Definitions as follows (or words to similar effect):
The operation of wastewater irrigation on land at Bruntwood Road comprising Lots 2-4 DPS 14934.
 AND
 Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The term is referenced with Fonterra's proposals for further plan provisions.
- The term requires a definition.

Point Number 797.23

Summary of Decision Requested: **Retain** the definition of "ancillary rural earthworks" in Chapter 13: Definitions as notified.

Decision Reasons:

- Supports inclusion of a specific definition for ancillary rural earthworks.
- The definition will assist understanding and interpretation of the Plan.

Point Number 797.24

Summary of Decision Requested: **Retain** the definition of "sensitive land use" in Chapter 13 Definitions as notified.

Decision Reasons:

- Supports inclusion of specific definition for sensitive land use.
- The definition will assist understanding and interpretation of the Plan.

Point Number 797.25

Summary of Decision Requested: **Retain** Rule 22.2.3.1 Earthworks General except for the amendments sought below.
 AND
Amend Rule 22.2.3.1 P2 (a)(i) Earthworks General as follows (or words to similar effect):
 Do not exceed ~~a volume of more than 1000m³ and an area of more than 2000m²~~ over any single consecutive 12 month period.
 AND
 Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the rule subject to deletion of reference to volume limit.

- Adverse effects of earthworks within rural environment are appropriately addressed through controls over area and cut and fill heights, revegetation requirements and erosion and sediment control measures.

Point Number 797.26

Summary of Decision Requested: **Retain** Rule 22.2.3.3 Earthworks in Significant Natural Areas except for the amendments sought below.

AND

Delete Rule 22.2.3.3 P1 (a)(i) Earthworks in Significant Natural Areas.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the rule subject to deletion of reference to volume limit.
- Adverse effects of earthworks are appropriately addressed through controls over the area, cut and fill heights, revegetation requirements and erosion and sediment control measures.

Point Number 797.27

Summary of Decision Requested: **Delete** Rule 22.2.4 Hazardous substances.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The Resource Legislation Amendments Act 2017 amended RMA to remove hazardous substances as an explicit function of Council.
- The Plan does not provide justification for inclusion of provisions.

Point Number 797.28

Summary of Decision Requested: **Retain** Rule 22.2.7 Indigenous Vegetation Clearance within a Significant Natural Area as notified.

Decision Reasons:

- Rule provides appropriate flexibility to enable maintenance of farm tracks, drains and fences as part of rural production activity.

Point Number 797.29

Summary of Decision Requested: **Retain** Rule 22.2.8 Indigenous Vegetation Clearance outside of a Significant Natural Area as notified.

Decision Reasons:

- The rule provides appropriate flexibility to enable maintenance of farm tracks, drains and fences as part of rural production activity.

Point Number 797.30

Summary of Decision Requested: **Retain** Rule 22.3.1 Number of dwellings within a lot as notified.

Decision Reasons:

- Supports restriction to 1 dwelling per 40ha.
- This will assist in avoiding potential for reverse sensitivity effects to arise in respect to primary production activities and mining.

Point Number 797.31

Summary of Decision Requested: **Retain** Rule 22.3.2 Minor Dwelling as notified.

Decision Reasons:

- Supports restriction to 1 minor dwelling.
- This will assist in avoiding potential for reverse sensitivity effects to arise in respect of primary production activities and mining.

Point Number 797.32

Summary of Decision Requested: **Retain** Rule 22.3.7.1 Building setbacks- All boundaries, except for the amendments sought below

AND

Amend Rule 22.3.7.1 P1, P2, P3 and P4 Building setbacks - All boundaries to include (or words to similar effect):

Providing that the setback requirements shall not apply to any boundary with land held in common ownership,

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports proposed setback requirements subject to them not applying in respect of land parcels held in common ownership.

Point Number 797.33

Summary of Decision Requested: **Retain** Rule 22.3.7.2 Building setbacks sensitive land use, except for the amendments sought below

AND

Amend Rule 22.3.7.2 Building setbacks sensitive land uses to include the additional locations as follows (or words to similar effect):

200m from an identified Coal Mining Area.

300m from the boundary of another site containing a Factory Wastewater Irrigation Farm.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports proposed requirements subject to inclusion of reference to 'Coal Mining Areas' and the Bruntwood Wastewater Irrigation Farm' which are critically important to the continued operation of dairy processing activities.

Point Number 797.34

Summary of Decision Requested: **Retain** Rule 22.3.7.4 Building Noise sensitive activities except for the amendments sought below.

AND

Amend Rule 22.3.7.4 Building setbacks - Noise Sensitive Activities to include (or words to similar effect):

The Te Rapa Dairy Manufacturing Facility Noise Control Boundary.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the Rule subject to the inclusion of reference to the Te Rapa Dairy Manufacturing Site Noise Control Boundary which extends into the District.

Point Number 797.35

Summary of Decision Requested: **Retain** Rule 22.4.1.5 (b)(iv) Rural Hamlet subdivision as notified.

Decision Reasons:

- Supports the inclusion of reference to reverse sensitivity as a matter reserved for discretion.

Point Number 797.36

Summary of Decision Requested: **Add** a new activity to Rule 23.1.3 Non Complying activities as follows (or words to similar effect):

NC13 (g) Within the Te Rapa Dairy Manufacturing Site Noise Control Boundary;

(i) a child care facility;

(ii) a hospital or hospice;

(iii) an education facility;

(iv) travellers accommodation.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Supports the identified activities as non-complying activities.
- Seeks amendment to include additional activities as non-complying activities to avoid reverse sensitivity effects in respect to the Te Rapa Dairy Manufacturing site.

Point Number 797.37

Summary of Decision Requested: **Add** Appendix 1.1 (a)(i) Acoustic Insulation to include (or words to similar effect):

The Te Rapa Dairy Manufacturing Facility Noise Control Boundary.

AND

Add new Appendix 1.2 Acoustic Insulation to include (or words to similar effect):

The Te Rapa Dairy Manufacturing Facility Noise Control Boundary identifies an area that experiences high noise levels from activities undertaken on the manufacturing site. Sensitive land uses, including dwellings within the Noise Control Boundary are required to be acoustically insulated to achieve the internal noise standards specified below.

Prior to the issue of a building consent for any building to which this rule applies, compliance with the requirements of the rule shall be demonstrated through the production of a design certificate from an appropriately qualified and experienced acoustic specialist certifying that an internal noise level will not exceed Ldn 40dBA within any habitable room.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Fonterra seeks the inclusion of additional provisions to avoid reverse sensitivity effects arising from sensitive activities within the Noise Control Boundary of the Te Rapa Dairy Manufacturing Facility.

Point Number 797.38

Summary of Decision Requested: **Delete** Appendix 5 Hazardous Substances.

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Control of hazardous substances is not a matter that requires RMA management.

Point Number 797.39

Summary of Decision Requested: **Amend** the Planning maps to identify the extent of the Te Rapa Dairy Manufacturing Facility Noise Control Boundary (See submission for map).

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The amendment will identify the extent of the Te Rapa Dairy Manufacturing Facility Noise Control Boundary.

Point Number

797.40

Summary of Decision Requested:

Amend the Planning Maps to identify the full extent of the Kopuku Mine as a "Coal Mining Area", comprising the additional parcels legally described as:

- Lots 2 and 3 DPS 78583
- Lots 1 and 8 DPS 519025
- Part Lots 1, 4 and 5 DPS 74265
- Part Lot 5 DP 405637
- Sec 7 SO 449648

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- The amendment will identify the extent of the Kopuku Mine.

Point Number

797.41

Summary of Decision Requested:

Retain Policy 5.2.3 Effects of subdivision and development on soils as notified.

Decision Reasons:

- The Policy provides appropriate recognition and protection of a critical resource.

Point Number

797.42

Summary of Decision Requested:

Retain Policy 5.3.2 Productive rural activities as notified.

Decision Reasons:

- The Policy provides appropriate recognition and protection of rural production and lawfully established activities.

Point Number

797.43

Summary of Decision Requested:

Retain Policy 5.3.5 Earthworks activities as notified.

Decision Reasons:

- The Policy provides appropriate recognition of the need to enable earthworks to support rural activities.

Point Number

797.44

Summary of Decision Requested:

Retain Policy 5.3.7 Reverse sensitivity effects except for the amendments sought below.

AND

Amend Policy 5.3.7(c) Reverse sensitivity effects to read (or words to similar effect):

Mitigate the adverse effects of reverse sensitivity through the use of setbacks for sensitive activities and the design of subdivisions and development.

AND

Delete Policy 5.3.7 (d) Reverse sensitivity effects

AND

Any consequential amendments or further relief to give effect to the concerns raised in the submission.

Decision Reasons:

- Amendment clarifies setbacks and design requirements should apply to sensitive activities rather than activities that are appropriate within a rural environment.
- Rural environments are unnecessarily restricted.
- Supports the policy subject to amendments.

Point Number

797.45

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision as notified.

Decision Reasons:

- Supports policy of directing urban development away from productive rural areas.

Submitter Number:

798

Submitter:

Ngati Te Ata

Point Number

798.1

Summary of Decision Requested:

No specific decision sought, but submission generally supports the Proposed District Plan, including:

- Protection of culture and heritage;
- Innovative ways to encourage development on Maori Freehold Land with Papakainga housing developments etc;
- Adding approximately 60 heritage sites and buildings;

- Adding 16 notable trees; and
- Rules being amended to provide for ongoing maintenance and care or repair.

Decision Reasons:

- No reasons provided.

Point Number 798.2

Summary of Decision Requested: No specific decision sought, but submission considers the Proposed District Plan does not adequately cover future environmental effects.

Decision Reasons:

- No reason provided.

Point Number 798.3

Summary of Decision Requested: **Amend** Section 1.1 What is a district plan? as follows:
...It must include objectives and policies and rules to manage the environmental effects of land use activities. Rules set within the Plan are a minimum requirement, not an aspiration but a starting point.

Decision Reasons:

- No reasons provided.

Point Number 798.4

Summary of Decision Requested: **Amend** Section 1.5.7.3 Water as follows:
clean groundwater recharge should be encouraged where soils allow.

Decision Reasons:

- No reason provided.

Point Number 798.5

Summary of Decision Requested: **Add** a new clause (c) to Objective 4.1.1 Objective - Strategic as follows:
(c) natural waterbodies are maintained or enhanced within integrated development for all towns
promote park edge development for all open spaces, especially adjacent to water bodies.
 AND
Add the following to all town centre objectives:
natural waterbodies are maintained or enhanced within integrated development for all towns
promote park edge development for all open spaces, especially adjacent to water bodies.

Decision Reasons:

- No reasons provided.

Point Number 798.6

Summary of Decision Requested: **Amend** Objective 4.5.12 (c) Business Town Centre - Character as follows:
 (c) Development of town centres is designed in a functional, ~~and~~ attractive and environmentally sustainable manner...
 AND
Add the following to all town centre objectives:
 ...In a functional, attractive and environmentally sustainable manner.

Decision Reasons:

- No reasons provided.

Point Number 798.7

Summary of Decision Requested: **Amend** Objective 4.6.1 Economic growth of industry as follows:
 The economic growth of the district's industry is supported and strengthened in Industrial zones while maintaining a healthy environment.

Decision Reasons:

- No reasons provided.

Point Number 798.8

Summary of Decision Requested: **Add** a new clause (viii) to Policy 4.7.2 Subdivision location and design as follows:
(viii) promote park edge design that enhances the interface with urban design and public access and amenity.

Decision Reasons:

- No reasons provided.

Point Number 798.9

Summary of Decision Requested: **Add** a new clause to Policy 5.3.6 Intensive farming activities as follows:

(b), promote the use of earth-bunds and silt traps for all cropping, tree clearance and harvesting activities.

Decision Reasons:

- No reasons provided.

Point Number 798.10

Summary of Decision Requested: **Add** a new clause (vii) to Policy 6.1.2 Policy-Development, operation and maintenance as follows:

(vii) is environmentally sustainable.

Decision Reasons:

- No reasons provided.

Point Number 798.11

Summary of Decision Requested: **Add** a new clause (b) to Policy 6.1.16 - Water Conservation as follows:

(b) clean water is captured for reuse and groundwater recharge.

Decision Reasons:

- No reasons provided.

Point Number 798.12

Summary of Decision Requested: **Add** a new clause (c) to Policy 7.1.8 Tree Protection as follows:

(c) trees over 200 years old unless in poor health are automatically protected.

AND

Add "trees over 200 years old unless in poor health are automatically protected" to all sections of the Proposed District Plan where "notable trees" are referred to including Rule 16.2.6- Notable trees.

Decision Reasons:

- No reasons provided.

Point Number 798.13

Summary of Decision Requested: **Add** the following text to Section 12.1 Introduction to rules:

Rules set within the Plan are a minimum requirement, not an aspiration but a starting point. Each activity must set how the development/activity will aspire to more than minimum requirements.

Decision Reasons:

- No reasons provided.

Point Number 798.14

Summary of Decision Requested: **Add** the following activity specific condition to Rule 22.8.2 P18 Horticulture:

appropriate silt control through silt traps and bunding.

Decision Reasons:

- No reasons provided.

Point Number 798.15

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.8.3 RDI Restricted discretionary activities as follows:

(y) effects on the environment.

Decision Reasons:

- No reasons provided.

Point Number 798.16

Summary of Decision Requested: **Amend** the Waikato Urban Design Guidelines Section 4 Connectivity and Movement networks to include "Small" and "Medium" to all guidelines.

Decision Reasons:

- No reasons provided.

Point Number 798.17

Summary of Decision Requested: **Amend** the Waikato Urban Design Guidelines Section 5.3 Guidelines for Neighbourhood Character to include "Small" in all tick boxes.

Decision Reasons:

- Over time often small developments intensify.
- If there is not good urban design from the outset, a good outcome can never be attained.

Point Number 798.18

Summary of Decision Requested:	Amend the Waikato Urban Design Guidelines to include "small" and "medium" options to Sections 6 and 7 Urban Design.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	798.19
Summary of Decision Requested:	Amend Section 8.3 Guidelines in the Waikato Urban Design Guidelines to clarify that stormwater can only be discharged into natural wetlands, streams, ponds and watercourses following pre-treatment and that these water bodies are protected outside stormwater devices.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	798.20
Summary of Decision Requested:	Amend the Tuakau Urban Design Guidelines to address: <ul style="list-style-type: none"> Sustainable development; Road contaminants being treated through vegetated swales or rain gardens; and Enhancement of significant streams- there does not appear to be any discussion around enhancement of these areas.
Decision Reasons:	<ul style="list-style-type: none"> Questions whether this is an intended omission.
Point Number	798.21
Summary of Decision Requested:	Amend Planning Map Pukekawa 7.9 to remove the area included in Plan Change 14 so that development is not able to be "up the sides" of the Hill around Pukekawa Pa.
Decision Reasons:	<ul style="list-style-type: none"> Pukekawa Pa is a site of significance to Ngati Tamaoho.
Point Number	798.22
Summary of Decision Requested:	No specific decision sought, but submission opposes inclusion of land within Pokeno which is steep and undevelopable without major earthworks.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	798.23
Summary of Decision Requested:	No specific decision sought, but submission opposes the inclusion of the Pa in Pokeno within proposed future urban or industrial zones.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	798.24
Summary of Decision Requested:	No specific decision sought, but submission opposes the inclusion of land in Pokeno that can impact on the Whangamarino wetland RAMSAR site or any other significant ecological area.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	798.25
Summary of Decision Requested:	Amend Section 8.3 Guidelines in the Waikato Urban Design Guidelines to require all stormwater treatment to be offline to any natural waterbody.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	798.26
Summary of Decision Requested:	Amend the pictures showing ponds as treatment devices in Section 8.3 Guidelines in the Waikato Urban Design Guidelines.
Decision Reasons:	<ul style="list-style-type: none"> Ponds are proven to be unsuccessful in maintaining water quality. Where possible wetlands should be promoted. Wetlands provide shade, terrestrial habitat and the plants provide contaminant removal once stormwater has passed through the fore bay.
Point Number	798.27
Summary of Decision Requested:	Amend Section 8.3 Guidelines in the Waikato Urban Design Guidelines to show intention for offline stormwater treatment.
Decision Reasons:	

- No reasons provided.

Point Number 798.28

Summary of Decision Requested: **Amend** the Pokeno Town Centre Design Guidelines to address:

- Sustainable development;
- Road contaminants being treated through vegetated swales or rain gardens; and
- Enhancement of significant streams- there does not seem to be any discussion around enhancement of these areas.

Decision Reasons:

- No reasons provided.

Point Number 798.29

Summary of Decision Requested: **Add** the following text to Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips:
must be bordered by Park edge roading for safety, environment, amenity and urban design purposes.
AND
Add "must be bordered by park edge roading for safety, environment, amenity and urban design purposes" into all sections, i.e. Business, Industrial, Village, Town Centre etc.

Decision Reasons:

- This is recommended as an esplanade strip can be a stream, river or coastal.
- If sections "back onto" a waterbody, they are often treated as a dumping ground.
- If the esplanade has a road frontage, and walkway, it tends to provide passive surveillance and a healthy environment for both the waterbody and the people using it.

Point Number 798.30

Summary of Decision Requested: **Add** a new matter of discretion to Rule 22.1.3 RD1 Restricted Discretionary Activities for Intensive farming as follows:
(v) environmental effects.

Decision Reasons:

- No reasons provided.

Point Number 798.31

Summary of Decision Requested: **Add** a new matter of discretion to Rule 22.1.3 RD2 Matters of discretion for Rural Industry as follows:
(vi) environmental effects.

Decision Reasons:

- No reasons provided.

Point Number 798.32

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision to include wetland protection in a separate box.

Decision Reasons:

- Assumed conservation lot can be a stream, wetland or bush covenant.
- A wetland over 2ha in size is rather large.
- With few wetlands remaining this is not considered to be an incentive to protect remaining wetlands.

Point Number 798.33

Summary of Decision Requested: **Amend** Rule 22.8.2 P7 Permitted Activities to include "deforestation"
AND
Add the following activity specific conditions to Rule 22.8.2 P7 Permitted Activities:
appropriate site and sediment control

Decision Reasons:

- No reasons provided.

Submitter Number: 799 **Submitter:** Leo Koppens

Point Number 799.1

Summary of Decision Requested: **Delete** Chapter 3: Natural Environment.

Decision Reasons:

- Chapter 3 and Council's maps do not meet Waikato Regional Policy Statement requirement that significant indigenous areas be identified on Council maps.
- Maps do not show all significant area of bush (mainly Kahikatea) throughout the District.

Point Number 799.2

Summary of Decision Requested: Amend the Proposed District Plan to allow all significant indigenous areas to be protected the same as identified Significant Natural Areas.

Decision Reasons:

- Chapter 3 and Councils maps do not meet Waikato Regional Policy Statement requirement that significant indigenous areas be identified on Council maps.
- Maps do not show all significant area of bush (mainly Kahikatea) throughout the District.
- Rule 22.2.8 offers very little protection for bush areas.

Point Number 799.3

Summary of Decision Requested: Amend the Proposed District Plan to prevent cattle grazing in Significant Natural Areas.

Decision Reasons:

- No reasons provided.

Submitter Number: 800 **Submitter:** Environmental Management Solutions Limited

Point Number 800.1

Summary of Decision Requested: Retain Objective 10.2.1 Contaminated Land as notified.

Decision Reasons:

- Submitter supports the objective.

Point Number 800.2

Summary of Decision Requested: Retain Policy 10.2.2 Managing the use of contaminated land, except for the amendments sought below.

AND

Amend Policy 10.2.2 (d) Managing the use of contaminated land, as follows:

Ensure that the use, subdivision and development of contaminated land management approaches include where appropriate:

...

Decision Reasons:

- The submitter supports Policy 10.2.2 Managing the use of contaminated land but considers that the words “where appropriate” should be added to encourage the appropriate option to be adopted as required.
- Not all options identified will be required for each site.

Point Number 800.3

Summary of Decision Requested: Delete all provisions regarding contaminated land from Rule 16.4.7 (Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas);

AND

Add a new set of rules specifically relating to contaminated land that align with the Resource Management National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health (Regulations 2011), such as Sections 30 and 31 of the Wellington City Council Plan.

Decision Reasons:

- The submitter considers it unacceptable and nonsensical to include contaminated land in with notable trees, intensive farming and aggregate extraction areas, significant amenity landscapes etc. as is proposed.
- The provisions set out within the rules contradict those detailed within the Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health) Regulations 2011 (NESCS) which overrides any planning provision.
- Regulation 5(5) of the NESCS specifies subdivision as an activity to which the standards applies where an activity that can be found on the Ministry for the Environment Hazardous Activities and Industries List (HAIL) has, is or is more likely than not to have occurred on a property. The regulations have a specific pathway to follow.
- In many cases it is through the subdivision application that a report investigating and identifying the contamination on a property is identified. This may include several areas, large or small irrespective of proposed subdivision boundaries. For subdivision to be enabled soil contaminant standards set by the NESCS or the site has to be satisfactorily managed. It is considered most appropriate for potentially contaminated land to have a separate rule that reflects the requirements of the NESCS.
- Sections 30 and 31 of the Wellington City Council Plan provide an example of this.

Point Number 800.4

Summary of Decision Requested: Delete all provisions regarding contaminated land from Rule 22.4.2 (Title boundaries – natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas);

AND

Add a new set of rules specifically relating to contaminated land that align with the Resource Management National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health (Regulations 2011), such as Sections 30 and 31 of Wellington City Council Plan.

Decision Reasons:

- The submitter considers it unacceptable and nonsensical to include contaminated land in with notable trees, intensive farming and aggregate extraction areas, significant amenity landscapes etc. as is proposed.
- The provisions set out within the rules contradict those detailed within the Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to protect Human Health) Regulations 2011 (NESCS) which overrides any planning provision.
- Regulation 5(5) of the NESCS specifies subdivision as an activity to which the standards applies where an activity that can be found on the Ministry for the Environment Hazardous Activities and Industries List (HAIL) has, is or is more likely than not to have occurred on a property. The regulations have a specific pathway to follow.
- In many cases it is through the subdivision application that a report investigating and identifying the contamination on a property is identified. This may include several areas, large or small irrespective of proposed subdivision boundaries. For subdivision to be enabled

soil contaminant standards set by the NESCS or the site has to be satisfactorily managed. It is considered most appropriate for potentially contaminated land to have a separate rule that reflects the requirements of the NESCS.

Point Number 800.5

Summary of Decision Requested: **Delete** the definition of "hazardous facility" from Chapter 13 Definitions.

Decision Reasons:

- EMS does not support the definition provided for a hazardous facility
- The definition currently relates to both activities involving hazardous substances with no quantification, and premises at which these substances are used, stored or disposed of, including vehicles for their transport located at a facility for more than 'short periods of time'.
- Council has likely tried to refer to terminology derived from the MfE HAIL, however, the way this definition is written makes no sense.
- Ultimately, the definition could include every quad bike and garage in the District. HSNO and the NES govern the location certification, management and detection of hazardous substances respectively.

Submitter Number: 802

Submitter:

Vera van der Voorden

Point Number 802.1

Summary of Decision Requested: **Add** strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms, that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- As a person living on a "life style" block the submitter does not wish to be liable for any accidental cross pollination or unintentional theft of genetic material
- GMOs have the potential to have significant adverse effects on ecological, economic, and resource management values, the social and cultural wellbeing of people, communities and Tangata whenua, cause biological or ecosystem harm, and GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependent on an uncontaminated environmental brand.
- The new GM methods can cause much bigger and more dangerous genetic disruptions. New GM organisms have scant history of safe use, as they were only invented in the past 5 years and could cause more harm than first assumed.
- The Waikato has three major milk suppliers. Tatua, Fonterra and Miraka Milks have a GMO Free requirement for the milk products and rely on shareholder farmers' milk supply. The ability to control the grass genetic pollution is a major concern and it is important to have precautionary approach to any escape and release of GM until the negative effects are known on the region. Additionally there are also several other organic producers in Waikato.
- Once GMOs have been released into the environment, they would be very difficult if not impossible to eradicate. In the case of a food product, the "GE free" status of a district would likely be lost permanently along with the market advantages of that status.
- Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region.
- It is consistent with the sustainable management purpose and Part 11 of the RMA to establish district plan provisions (e.g. issues, objectives, policies, rules and methods) that manage the release, location and management of GMOs where they have the potential to adversely affect the environment and other land use activities.
- This will ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues.

Point Number 802.2

Summary of Decision Requested: **Amend** the Proposed District Plan to require all consents that would require exemption from plan rules to be automatically publicly notified, whether the rules are on Genetically Modified Organisms, or any other matter.

Decision Reasons:

- No reasons provided.

Point Number 802.3

Summary of Decision Requested: **Create** a register of septic tanks to show proof of regular maintenance to avoid adverse impacts to waterways, and a control team to monitor.
OR
Develop a bylaw to manage septic tanks.

Decision Reasons:

- If it is possible to have a dog registration team employed at council, it must be possible to create a septic tank registration and control team.
- Wandering septic overflows are more dangerous to the environment than wandering dogs.
- There should be no direct discharge of wastewater into the Whaingaroa harbour.

Point Number 802.4

Summary of Decision Requested: **Retain** the Maaori provisions in Policy 2.16.1 Whaanga Coast Specific Area.

Decision Reasons:

- It is appropriate that the for Marae and papakainga are recognized and provided for in the Waikato Proposed District plan as it gives effect to the policies in the New Zealand Coastal Policy Statement 2010 in Policy (d) and the Waikato Regional Policy Statement, 2016 Policy 6.4 Marae and papakainga provisions, and
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15.

Point Number 802.5

Summary of Decision Requested: Retain the Maaori provisions in Policy 2.16.2 Aahuatanga Motuhake (special features).

Decision Reasons:

- It is appropriate that the for Marae and papakāinga are recognized and provided for in the Waikato Proposed District plan as it gives effect to the policies. In the New Zealand Coastal Policy Statement 2010 in Policy (d) and the Waikato Regional Policy Statement, 2016 Policy 6.4, and
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15.

Point Number 802.6

Summary of Decision Requested: Retain the Maaori provisions in Rule 22.1.2 Permitted Activities.

Decision Reasons:

- It is appropriate that the for Marae and papakāinga are recognized and provided for in the Waikato Proposed District plan as it gives effect to the policies. In the New Zealand Coastal Policy Statement 2010 in Policy (d) and the Waikato Regional Policy Statement, 2016 Policy 6.4, and
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15.

Point Number 802.7

Summary of Decision Requested: Retain the Maaori provisions in Rule 22.7 Whaanga Coast Development Areas.

Decision Reasons:

- It is appropriate that the for Marae and papakāinga are recognized and provided for in the Waikato Proposed District plan as it gives effect to the policies. In the New Zealand Coastal Policy Statement 2010 in Policy (d) and the Waikato Regional Policy Statement, 2016 Policy 6.4, and
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15.

Point Number 802.8

Summary of Decision Requested: Retain the Maaori provisions in Rule 22.7.1.1 Permitted Activities.

Decision Reasons:

- It is appropriate that the for Marae and papakāinga are recognized and provided for in the Waikato Proposed District plan as it gives effect to the policies. In the New Zealand Coastal Policy Statement 2010 in Policy (d) and the Waikato Regional Policy Statement, 2016 Policy 6.4, and
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15.

Point Number 802.9

Summary of Decision Requested: Amend the zoning in Raglan to decentralise Raglan growth and support the movement of growth away from stress points by allowing the development of villages in the rural areas.

Decision Reasons:

- This would have the added benefit of bolstering existing schools and infrastructure in the rural areas.
- It is time for WDC to look at areas like Te Uku which is sited along State Highway 23. It has huge tracts of flat land that would lend itself well and more easily and therefore cheaper to develop infrastructure. It would be a great place to allow for affordable housing projects. It already has a school and general store with a second primary school not far away at Waitetuna. Small cluster villages could be Raglan's solution to the affordable housing issue faced by tourist meccas like Queenstown.

Point Number 802.10

Summary of Decision Requested: Amend the Proposed District Plan to stop development on areas known as flood prone due to rising sea levels with global warming.

Decision Reasons:

- To avoid future cost to Council and thus ratepayers.

Point Number 802.11

Summary of Decision Requested: Amend Rule 22.3.2 (b)(i) Minor dwelling to relax the 20m minimum distance of an ancillary dwelling from the main house.
AND
Retain the approach to Minor dwellings which no longer requires use by dependent relatives.

Decision Reasons:

- To allow deviation from the current intent which is to house dependent relatives.
- Potential fix for affordable housing issues.

Point Number 802.12

Summary of Decision Requested: Add a Raglan Structure Plan into the Proposed District Plan. It needs to take account of Raglan Naturally statements and the changes likely to result from the current revision of the Raglan Naturally community plan.

Decision Reasons:

- Without a Structure Plan there is no evidence that the proposed Plan will work for Raglan ward
- According to statistics, Raglan increased by 40% over the period 1991-2001 and the submitter assumes that this could more than double over the next 10 years if all the development options are taken up.

- Nowhere in the Plan is there any indication of the population it would be servicing, so how do we know what the Plan is planning for or how adequate it is going to be.
- In the absence of any estimate of demand or likely development, it is hard to envisage the effects on our social, economic or environmental wellbeing, or pre-empt problems.

Point Number 802.13

Summary of Decision Requested: **Add** design guidelines for Raglan that protect and develop the character without suppressing individual expression and lifestyle choice, incorporating the Raglan Naturally Community Plan, Raglan Town Centre: Draft Design Guide and MfE Draft New Zealand Urban Design Protocol developed through consultation with all parts of the community and assisted by a qualified committee.

AND

Add a design manual for the entire built area of Raglan which sets policy on all details of development density, design, height, setback, fabric, finish, form and texture, including all elements of the built environment, roads, courtyards and footpaths.

AND

Amend the Proposed District Plan to maintain the value of Raglan as follows:

- Commercial buildings in the CBD that have the 'Raglan look' and are single storey (or at the most not more than two levels high).
- Align indicative roads to minimise their impact on storm water and on existing dangerous roads
- Align walkways and cycle routes to provide all parts of the town with safe attractive alternatives to car use
- Permit compost toilets
- Provide for vetting future consent applications through the same consultation structure.
- Permit extensions to the existing CBD in an orderly manner through the same consultative process in order to achieve an expansion of the CBD to avoid shortage of commercial property, whilst not promoting speculation, or premature development of areas presently remote from the existing CBD.
- Views should not be able to be "stolen" from existing property by neighbouring development without the written consent of potentially affected neighbours.
- Retain Raglan's unique character by a green belt with very limited development to be defined through a consultative process.

Decision Reasons:

- In Arrowtown, the "value" of Arrowtown was acknowledged and its historic character has been skillfully preserved. This flavor is what makes our town different from other places, brings our tourism dollar and creates employment.
- To avoid destruction of the flavour and value of Raglan let the Proposed Waikato District Plan avoid development that is out of context with the seaside village character of Raglan.

Point Number 802.14

Summary of Decision Requested: **Add** a resource management framework for the management of Genetically Modified Organisms that is regionally specific, taking into account environmental, economic and social well-being considerations.

Decision Reasons:

- As a person living on a "life style" block the submitter does not wish to be liable for any accidental cross pollination or unintentional theft of genetic material
- GMOs have the potential to have significant adverse effects on ecological, economic, and resource management values, the social and cultural wellbeing of people, communities and tangata whenua, cause biological or ecosystem harm, and GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependent on an uncontaminated environmental brand.
- The new GM methods can cause much bigger and more dangerous genetic disruptions. New GM organisms have scant history of safe use, as they were only invented in the past 5 years and could cause more harm than first assumed.
- The Waikato has three major milk suppliers. Tatura, Fonterra and Miraka Milks have a GMO Free requirement for the milk products and rely on shareholder farmers' milk supply. The ability to control the grass genetic pollution is a major concern and it is important to have precautionary approach to any escape and release of GM until the negative effects are known on the region. Additionally there are also several other organic producers in Waikato.
- Once GMOs have been released into the environment, they would be very difficult if not impossible to eradicate. In the case of a food product, the "GE free" status of a district would likely be lost permanently along with the market advantages of that status.
- Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region.
- It is consistent with the sustainable management purpose and Part I I of the RMA to establish district plan provisions (e.g. issues, objectives, policies, rules and methods) that manage the release, location and management of GMOs where they have the potential to adversely affect the environment and other land use activities.
- This will ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues.

Point Number 802.15

Summary of Decision Requested: No specific decision sought, but submission expresses concern at the dearth of rental accommodation and lack of affordable housing.

Decision Reasons:

- The growing dearth of rental accommodation and the affordable housing issue, especially in Raglan where our tourist town needs affordable housing for its lower income employees of is a concern.
- The issue of housing needs to be looked into at council level.
- To date, all focus in Raglan has been that small part called Raglan village and seaside areas at the cost of blinding us to the potential of its outlying areas.

Submitter Number: 803 **Submitter:** Kristel Lendfield

Point Number 803.1

Summary of Decision Requested: **Remove** the "No Horse Riding" sign and barrier from the grass walkway leading to Ngarunui Beach.

Decision Reasons:

- The submitter believes that the track is for everyone to enjoy including horse riders. By limiting safe access areas for riders to get to the beach, it severely limits that right.
- Riders are forced to use the road, which makes for potential accidents between horses, riders and motorists.

Submitter Number:	804	Submitter:	PLB Construction
Point Number	804.1		
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to recognise at the policy level that there is a need for more Industrial Zoned land to be provided within the Waikato District.		
Decision Reasons:	<ul style="list-style-type: none"> • To adhere to proposed Policy 4.6.3 Maintain a sufficient supply of industrial land • The Ohinewai area is underdeveloped and largely constrained under the current Country Living Zone provisions • The economic potential for the Ohinewai area should be suitably realised in the Proposed District Plan. 		
Point Number	804.2		
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to explicitly indicate that land to the north of Huntly (in and surrounding the Ohinewai area) possesses suitable qualities for being rezoned to Industrial Zone (e.g. location to SH1 for transport purposes, flat and sparsely populated).		
Decision Reasons:	<ul style="list-style-type: none"> • The Ohinewai area is underdeveloped and largely constrained under the current Country Living Zone provisions • The land surrounding the Ohinewai area has an easy access to SH1 and presents a high potential concerning economic growth for the District. • The submitter notes that Council will be discussing a Blueprinting initiative with the local community – in which potential economic enhancements to the Huntly environs (such as Ohinewai) would be relevant. 		
Point Number	804.3		
Summary of Decision Requested:	Add a preamble to Section 4.6 Industrial and Heavy Industrial Zones to refer to rezoning land in the Ohinewai area to Industrial Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The Ohinewai area is undeveloped and largely constrained under the current Country Living Zone provisions. • The land surrounding the Ohinewai area has an easy access to SH1 and presents a high potential concerning economic growth for the District. • The submitter notes that Council will be discussing a Blueprinting initiative with the local community – in which potential economic enhancements to the Huntly environs (such as Ohinewai) would be relevant. • The economic potential for the Ohinewai area should be suitably realised in the Proposed District Plan. 		

Submitter Number:	805	Submitter:	Howard Lovell and Rudi Van Dam
Point Number	805.1		
Summary of Decision Requested:	Amend the zoning of land in Taupiri, located between Gordon Road (State Highway 1B) on the eastern boundary, Te Putu Street and Murphy Lane, the North Island Main Trunk Rail Line to the east and Great South Road to enable urban growth and development (see submission for map of area and indicative concept plans).		
Decision Reasons:	<ul style="list-style-type: none"> • The National Policy Statement on Urban Development Capacity 2016 identifies Waikato District as a high growth area, a contingency of at least 20%-15%. The appropriate expansion of growth areas - such as the Taupiri Village Expansion Area (TVEA) can be rationalised against the higher-level NPS under the PWDP review process. • TVEA is consistent with the indicative urban limits of Future Proof and will give effect to higher level strategic growth objectives and policies without compromising the urban growth intent. • The land use pattern proposed is strategically appropriate for meaningful consideration. • TVEA aligns with the relevant philosophies underpinning urban growth management in the district. • An appropriate transportation (indicative) roading layout that would apply to the TVEA envelope. • The Hopuhopu reserve project is expected to be in service by mid-2019, hence providing additional water supply to the TVEA. • Waste water servicing will require further analysis from both the Council and developer so as to confirm the current serviceability levels in the area and any upgrades required. • Area of land involved within the TVEA is of a scale that can accommodate services growth; land to the south of the TVEA provides adequate scope for network facilities (such as supply reservoirs and or treatment plant). • The TVEA can accommodate an integrated stormwater solution (subject to a more site-specific analysis). • Separating the higher density residential land use in the TVEA from that of rural production land use by the lower density residential zone meets the purpose of the Country living zone. • The lower density land use as indicated in the attached concept plan, appropriate mitigation can be provided to the residential land use in the TVEA, as well as mitigating reverse sensitivity effects of residential land use on the rural land use to the south of the TVEA. • The TVEA will enable the strategic vision of Plan Change 17 (detailed in section 3.64 of the original submission) to occur. Dwellings to the east of the TVEA will be of an affordable nature, with land parcels towards the centre of the area providing development opportunities of higher calibre dwellings. • Rezoning the area as a part of the PWDP review process represents an efficient use of statutory process. • Vesting of the extensive gully network to Council for public access presents an option for the Submitter to ensure that the wider Taupiri community benefits from the residential zoning of the area. • Gully system on site can be subject to enhancement and provide cycle/pedestrian access and provide a connection between Hopuhopu and Taupiri. 		

- TVEA concept plan has been appropriately influenced via the recognition of the culturally significant (and archeologically protected) Tarakehehe Pā. The historic Pa site has been provided for via a land parcel to be protected and managed as a reserve.
- This submission contains an Objective and Policy assessment - contained within Attachment B of the original submission, along with an assessment against the relevant RPS and it is the submitters opinion that the rezoning would not be contrary to the applicable objectives and policies.

Submitter Number:	807	Submitter:	Pukekohe Motorcycle Club
Point Number	807.1		
Summary of Decision Requested:	<p>Amend the zoning at 111 Harrisville Road, 115 Harrisville Road, 131 Harrisville Road, 21A Percy Graham Road, Tuakau from Residential Zone to Rural Zone.</p> <p>AND</p> <p>Any further or consequential relief to give effect to the relief sought in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • This zoning is not the appropriate zone for the land. • The proposal to rezone the land immediately adjacent to the site for residential use has a real potential to limit the current and future activities on the motocross track site due to the creation of reverse sensitivity and the inevitable complaints from future residents about noise, dust and odours etc. • An initial review indicates that the plan does not contain suitable provisions to protect the existing track from these effects or to suitably control the establishment of noise sensitive activities unacceptably close to the existing lawfully established use. • Whilst the existing operation would be protected by existing use rights, the continued expansion of the track could be limited or completely prevented by the establishment of new sensitive receivers on the adjacent land. • Allowing residential development so close to the track will likely result in the curtailment of the existing activity and in the long-term, potential loss of this regionally important recreational facility. • To prevent the encroachment of activities sensitive to noise into areas where noise, dust and odour effects are generated. • The current Proposed Plan does not promote sustainable management of resources, will not achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA; • The current Proposed Plan will not enable the social and economic wellbeing of the community in the Waikato region • The current Proposed Plan does not represent the most appropriate means of exercising the Councils functions, having regard to the efficiency and effectiveness of the provisions relative to other means. 		
Point Number	807.2		
Summary of Decision Requested:	<p>Add a minimum 300m buffer around the track at 115 Geraghty Maber Road, Tuakau, preventing the establishment of any new activity sensitive to noise.</p> <p>AND</p> <p>Any further or consequential relief to give effect to the relief sought in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • This is to prevent the establishment of activities sensitive to noise. • The Tuakau Structure Plan did propose additional residential along Harrisville Road but also included a buffer zone. This buffer is shown in green in Figure 3 of the submission and provided a buffer of some 250m from the motocross track. • The use of a buffer is considered an appropriate response to balance the need to protect the existing lawfully established motocross track from the potential reverse sensitivity effects of noise sensitive activities and accords with Policy 5.3.15(a)(iii) and 5.3.15(a)(v) of the Proposed Plan • The current Proposed Plan does not promote sustainable management of resources, will not achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA; • The current Proposed Plan will not enable the social and economic wellbeing of the community in the Waikato region • The current Proposed Plan does not represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means. 		
Point Number	807.3		
Summary of Decision Requested:	<p>Add a Noise Control Boundary overlay to the land surrounding the track at 115 Geraghty Maber Road, Tuakau, with a distance of at least 500m and taking into account the noise generated from the track. Submitter seeks a similar approach to the Noise Control Boundary over the Waikato Gun Club at 556 Holland Road, Eureka, where a Noise Control Boundary was added to the Operative District Plan Maps.</p> <p>AND</p> <p>Any further or consequential relief to give effect to the relief sought in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • This accords with Policy 5.3.15(a)(vi) of the Proposed Plan • The current Proposed Plan does not promote sustainable management of resources, will not achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA; • The current Proposed Plan will not enable the social and economic wellbeing of the community in the Waikato region • The current Proposed Plan does not represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means. 		
Point Number	807.4		
Summary of Decision Requested:	<p>Amend Appendix I: Acoustic Insulation to include reference to the Harrisville Motocross Track and the Noise Control Boundary overlay.</p> <p>AND</p> <p>Add a specific acoustic insulation/ventilation requirement for any new noise sensitive activity along with suitable internal noise levels to be achieved by any new noise sensitive spaces established within the overlay.</p> <p>AND</p> <p>Any further or consequential relief to give effect to the relief sought in the submission.</p>		

Decision Reasons:

- The current Proposed Plan does not promote sustainable management of resources, will not achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA;
- The current Proposed Plan will not enable the social and economic wellbeing of the community in the Waikato region
- The current Proposed Plan does not represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means.

Point Number

807.5

Summary of Decision Requested:

Amend Policy 5.3.15 (a)(vi) Noise and vibration to include reference to the Harrisville Motocross Track.

AND

Any further or consequential relief to give effect to the relief sought in the submission.

Decision Reasons:

- The current Proposed Plan does not promote sustainable management of resources, will not achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA
- The current Proposed Plan will not enable the social and economic wellbeing of the community in the Waikato region
- The current Proposed Plan does not represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means.

Point Number

807.6

Summary of Decision Requested:

Add any other suitable provisions to the plan to control, restrict or prevent development on land adjacent to the motocross track at 115 Geraghty Maber Road, Tuakau without sufficient consideration of the potential for reverse sensitivity effects on the ongoing operation and intensification of the current activity, and any further or consequential relief to give full effect to all previous submission points.

AND

Any further or consequential relief to give effect to the relief sought in the submission.

Decision Reasons:

- The current Proposed Plan does not promote sustainable management of resources, will not achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA
- The current Proposed Plan will not enable the social and economic wellbeing of the community in the Waikato region
- The current Proposed Plan does not represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means.

Submitter:

Gordon H L Swan

Point Number

809.1

Summary of Decision Requested:

Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- For many years the submitter held the position of President of the Auckland Regional Microlight Club Inc. and during those years a sustainable aviation airfield dedicated to the lighter aircraft gave hours of safe flying, good instruction and was where many of today's pilots learnt to fly.
- This airfield gives another airfield close to Auckland City and hospitals in emergencies.
- The submitter sees this same situation in the Te Kowhai Airfield.
- The aerodrome is an asset that can afford much pleasure to all the public area but in times of emergency, it can give the council and authorities a much-needed second option.
- The Te Kowhai airfield would have a sustainable future.
- The Te Kowhai airfield is an asset that must not end up disappearing like a lot of other small airfields around the country.

Point Number 809.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- For many years the submitter held the position of President of the Auckland Regional Microlight Club Inc. and during those years a sustainable aviation airfield dedicated to the lighter aircraft gave hours of safe flying, good instruction and was where many of today's pilots learnt to fly.
- This airfield gives another airfield close to Auckland City and hospitals in emergencies.
- The submitter sees this same situation in the Te Kowhai Airfield.
- The aerodrome is an asset that can afford much pleasure to all the public area but in times of emergency, it can give the council and authorities a much-needed second option.
- The Te Kowhai airfield would have a sustainable future.
- The Te Kowhai airfield is an asset that must not end up disappearing like a lot of other small airfields around the country.

Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- No reasons provided.

Point Number 810.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- No reasons provided.

Submitter Number: 811 **Submitter:** Martyn Seay

Point Number 811.1

Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Will protect the future of the airfield, which is a scarce resource becoming increasingly rare.
- Small airfields suitable for microlight aircraft are closing up all over New Zealand and few are left.
- Microlight aviation is far more affordable and accessible than other aviation activity and is prevented from using most other airfields due to changes in aviation law.

Point Number 811.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- It will protect the future of the airfield, which is a scarce resource becoming increasingly rare.
- Small airfields suitable for microlight aircraft are closing up all over New Zealand and few are left.
- Microlight aviation is far more affordable and accessible than other aviation activity and is prevented from using most other airfields due to changes in aviation law.

Submitter Number: 812 **Submitter:** Ruruhira Cila Henry

Point Number 812.1

Summary of Decision Requested: **Amend** the Proposed Waikato District Plan to include the Karamu Paa and Urupa as waahi tapu on the corner of Gordonton Road and Piako Road.

Decision Reasons:

- Supports all paa sites in the district to be protected.
- Submission notes that the written history may need to be looked at.

Point Number 812.2

Summary of Decision Requested: **Amend** the Proposed Waikato District Plan to keep the Komakorau Stream as a historical area.

Decision Reasons:

- The stream running under the bridge in Taupiri into the Waikato River comes from Komakorau.
- It is recorded that this was the original Waikato River.
- Was used for floating logs to the mill in Orini.
- According to Maori, it was the Tarawera which could have begun from the Tongariro eruption.
- Submission notes that the written history may need to be looked at.

Submitter Number:	813	Submitter:	Hamish Noakes
Point Number	813.1		
Summary of Decision Requested:	<p>Delete the definition of "Intensive farming" in Chapter 13 Definitions;</p> <p>OR</p> <p>Amend the definition of "Intensive farming" in Chapter 13 Definitions, to remove confusion.</p> <p>e.g. Farming dependent on the soils of the site should not be classed as intensive and intensive farming is reliant on food being brought in.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Farming dependent on the soils of the site should not be classed as intensive (i.e. goat farming). • Intensive farming is reliant on brought in food and not on the soil quality where it is sited. Rule should be stating that. 		

Submitter Number:	814	Submitter:	Jenny Goodwright
Organisation:	Awaroa Farm Ltd		
Point Number	814.1		
Summary of Decision Requested:	<p>Amend Rule 22.3.2 Minor dwelling - P1 (b)(i), as follows:</p> <p><i>The minor dwelling must be located within 20100m of the dwelling;</i></p>		
Decision Reasons:	<ul style="list-style-type: none"> • 20m away from a main dwelling is far too close. Especially in a rural environment, creating privacy is paramount. 		
Point Number	814.2		
Summary of Decision Requested:	Amend Rule 22.4 Subdivision and 22.4.1 PR4 (a) Prohibited subdivision, to maintain the Transferable Rural Lot subdivision provisions.		
Decision Reasons:	<ul style="list-style-type: none"> • The Transferable rural lot process simply reshuffles existing titles or lots created through environmental bush protection to more appropriate areas within the district. • There is no increase in the number of development rights. • Will end up with land locked titles that no one will be able to build on. This will not help the housing shortage. 		
Point Number	814.3		
Summary of Decision Requested:	<p>Amend Rule 22.3.6 Rural Zone - Building Coverage - P1 (a)(ii), as follows:</p> <p><i>(ii) 5007000m².</i></p>		
Decision Reasons:	<ul style="list-style-type: none"> • 500m² for total building coverage is unacceptable for a possible dairy farm herd home. Like to see this changed to 7000m², especially for possible expansion. 		

Submitter Number:	815	Submitter:	Louise Milne
On behalf of:	H&P Fyers Ltd		
Point Number	815.1		
Summary of Decision Requested:	Delete the Significant Natural Areas from the property at 442 Waikare Road, Ohinewai.		
Decision Reasons:	<ul style="list-style-type: none"> • The land has recently been inherited and has been managed by the same family for 100 years and will continue in the future, as such, it has been proven that the land has been taken care of. • The Significant Natural Areas significantly reduces the area of land available causing decreased income, rates etc will still need to be paid, increasing costs. • The Significant Natural Areas decreases the value of the farm and makes it less attractive for sale to potential purchasers if it is to be sold. • As the current custodian the submitter will not be planting any more natives during my tenure as they do not want future generations to have to experience what is effectively a private property land-grab, carbon credits etc in 10-20 years time. This is New Zealand, not South Africa or Zimbabwe. • It renders the land incapable of reasonable use now and in the future. • It is private property. 		

Submitter Number:	817	Submitter:	GW & PJ Thomson and The Thomson Family Trust
--------------------------	-----	-------------------	--

Point Number 817.1

Summary of Decision Requested: Amend the zoning of the properties at 111 and 117 Mason Road, Whatawhata from Rural Zone to Industrial Zone.

AND

Any further relief or amendments to the Proposed Waikato District Plan as necessary to support the submitter, as set out in this submission.

Decision Reasons:

- The sites are standalone-developed properties that are owned by the submitter. The sites are separated from the proposed (and existing) Residential Zone by a site that is zoned Rural and is owned by the submitter.
- Both sites are developed and presently used for industrial activities; comprising a new builder's trade depot and storage yard at 111 Mason Road, and a timber framing and truss manufacturing business) at 117 Mason Road.
- The submitters operations have existed on the site since 1989 when resource consent was granted to establish and operate a sawmill on a site formerly operated by the Waikato Electricity Board. Since then multiple consents have been granted for the incremental growth of the submitter and for the development of 111 Mason Road.
- In addition to those consents, further resource consents (LU/0377/08.01 and LUC0517/18) have recently been lodged with Council that provides for the expansion of the hard stand and a new building within this hardstand area. This would effectively see the whole of the site being used for industrial activities.
- Council has enabled the incremental expansion of the development of the site in such a manner that it no longer maintains any characteristics that would normally be exhibited for a Rural zoned site.
- The overarching position of this submission that the Waikato District Council protects industrial activities that have legally established on the site through Industrial zoning, and in particular the sites, where those activities contribute to the development of the wider District and the realisation of social, economic and cultural benefits. It is in accordance with Part 2 of the RMA.
- The protection and use of these sites for industrial activities is limited and constrained whereby the present zoning requires continual resource consents to undertake changes to the site operations.
- The industrial uses of those sites are therefore subject to continual reverse sensitivity assessments against rules that are unworkable and do not provide flexibility for the activity to undertake its day-to-day operations.
- The site's inability to avoid RMA consent triggers is proving to a time-consuming and costly drain on resources.
- The recurring need for consents is an indication that, as it stands, the Rural Zone provisions are not conducive to sustainable management of the facility.
- The submitter needs greater flexibility to respond to the changing needs of their businesses and the use of these two sites.
- As the activities are already operating from the site, it is not expected that the change in zoning will give rise to any effects that are not already occurring or experienced by adjacent landowners.
- The industrial zone noise provisions protect adjacent rural and residential uses through rule 20.2.3.1-p3 that requires noise measured at any site in any zone, other than the Industrial Zone, to meet the permitted noise levels for that zone.
- It currently inhibits the productive capacity of the site.

Submitter Number: 818 **Submitter:** Valerie Lubrick

Point Number 818.1

Summary of Decision Requested: Add a special character status for Raglan.

Decision Reasons:

- Concerned that Raglan's special character is being eroded.
- Moved to Raglan because of its character, the submitter is an active member of the community and wants to see Raglan's unique nature continue.
- Character includes an extreme respect, preservation and augmentation of the natural environment.
- Wants to see better protection of that character.
- Enjoys the non-commercialism of the area, lack of neon signs and chain stores.
- Likes the diverse buildings and people and relaxed lifestyle.
- Submitter likes that they live in a small town where the business area is confined to a small walking distance.
- Does not want multi-storey buildings.
- Enjoys that Raglan is limited in population in the centre where people have space and there are lots of natural areas, pedestrian areas, ways for cycles and water views without buildings crowding each other out.
- Does not want massive subdivision of properties so everyone lives on top of each other.

Point Number 818.2

Summary of Decision Requested: Amend the provisions to require all activities that do not comply with the District Plan be publicly notified.

Decision Reasons:

- Concerned that Raglan's special character is being eroded.
- Moved to Raglan because of its character, am an active member of the community and want to see Raglan's unique nature continue.
- Character includes an extreme respect, preservation and augmentation of the natural environment.
- Wants to see better protection of that character.
- Likes the diverse buildings and people and relaxed lifestyle.
- Submitter likes that they live in a small town where the business area is confined to a small walking distance.
- Does not want multi-storey buildings.
- Enjoys that Raglan is limited in population in the centre where people have space and there are lots of natural areas, pedestrian areas, ways for cycles and water views without buildings crowding each other out.

Point Number 818.3

Summary of Decision Requested: Amend the Proposed District Plan to restrict the amount of permanent holiday accommodation in Raglan.

Decision Reasons:

- It is challenging for local people to find suitable accommodation.
- When a street is full of book a bach/Airbnb places, there is no community on that street. Cambrae Road was like that and has now finally has enough local full time residents to have a community watch program and sense of fellowship.

Point Number	818.4
Summary of Decision Requested:	Introduce a tourist tax paid directly to Raglan to fund things such as parking lots, more public toilets through a \$1 per night (collected from hotels and airbnb) charge and enforcing bylaws through fines.
Decision Reasons:	<ul style="list-style-type: none"> • A strong tourist body helps fund Raglan. • A tourist tax will help fund parking lots and more public toilets.
Point Number	818.5
Summary of Decision Requested:	No specific decision sought, but the submission opposes the proposed developments in Raglan.
Decision Reasons:	<ul style="list-style-type: none"> • Concerned that Raglan's special character is being eroded. • Does not want multi-storey buildings (ground floor and one other floor is enough). • Likes the town to be limited in population where people have space and there are lots of natural areas, pedestrian areas, ways for cycles, and water views without buildings crowding each other out.
Point Number	818.6
Summary of Decision Requested:	No specific decision sought, but the submission opposes the condominiums proposed for the corner of Wainui Road and Stewart Street, Raglan.
Decision Reasons:	<ul style="list-style-type: none"> • Concerned that Raglan's special character is being eroded. • Does not want multi-storey buildings (ground floor and one other floor is enough). • Likes the town to be limited in population where people have space and there are lots of natural areas, pedestrian areas, ways for cycles, and water views without buildings crowding each other out.

Submitter Number:	819	Submitter:	Dominic O'Rourke
Point Number	819.1		
Summary of Decision Requested:	No specific decision sought, but the submission opposes heavy development in Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • Concerned that Raglan's special character is being eroded. • Moved to Raglan because of its character, am an active member of the community and want to see Raglan's unique nature continue. 		
Point Number	819.2		
Summary of Decision Requested:	Add a special character status for Raglan and include provisions that result in the following:		
	<ul style="list-style-type: none"> • Preservation and augmentation of the natural environment • Maintain diverse local businesses. Ban the introduction of big box chain stores. • Maintain diverse buildings and diverse people and relaxed lifestyle. • Maintain business area being confined to a small zone which is pedestrian and cycle friendly. • Limit the population in the town centre, limit subdivision so residents do not live on top of each other. • Limit businesses in the town centre so businesses are not on top of each other. • Limit heights of buildings to 2 storey to preserve character • Preserve and augment pedestrian walkways, cycleways, sea views for all – do not build each other out. • Limit the amount of holiday accommodation so there is a true community, not a tourist centred economy where locals cannot find accommodation. • Use tourist dollars to fund public parking lots, lighting, upgrade sewage system, for example, introduce a per night tourist tax where the money goes directly back to Raglan to fund services. 		
Decision Reasons:	<ul style="list-style-type: none"> • Concerned that Raglan's special character is being eroded. • Moved to Raglan because of its character, the submitter is an active member of the community and wants to see Raglan's unique nature continue. 		
Point Number	819.3		
Summary of Decision Requested:	Undertake selective community consultation for Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • Raglan is special and now becoming a "place to be and visit". 		
Point Number	819.4		
Summary of Decision Requested:	No specific decision sought, but the submission opposes the condominiums proposed for the corner of Wainui Road and Stewart Road.		
Decision Reasons:	<ul style="list-style-type: none"> • Concerned that Raglan's special character is being eroded. 		
Point Number	819.5		
Summary of Decision Requested:	Amend the Proposed District Plan provisions so that any building activity that does not comply with the District Plan to be publicly notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Concerned that Raglan's special character is being eroded. • Moved to Raglan because of its character, am an active member of the community and want to see Raglan's unique nature continue. 		

Submitter Number:	820	Submitter:	Leo Koppens
Point Number	820.1		
Summary of Decision Requested:	Delete Rule 23.4.2 RD1 (a)(ii) and (iii) General subdivision, so the minimum lot area defaults to 5,000m2.		
Decision Reasons:	<ul style="list-style-type: none"> • The rule is now redundant. • Only a limited number of lots that can be subdivided if this rule were to change as per the relief sought. • Lots of 1.1 or in many cases 2.0 are difficult to manage. What are owners meant to do with grass paddocks. 		

Submitter Number:	821	Submitter:	The Poultry Industry Association of New Zealand; I Brinks NZ Chicken; The Egg Producers Federation of
Point Number	821.1		
Summary of Decision Requested:	Amend the definition of "Farming" in Chapter 13 Definitions, as follows: <i>Means an agricultural, horticultural or apicultural activity having as its primary purpose the production of any livestock, (including ranging poultry), or crop using the in-situ soil, water and air as the medium for production...</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Wishes to have ranging poultry as permitted livestock. Poultry have access to outdoor areas and should be similarly treated to other farmed animals. • The reference to "in-situ" is irrelevant to whether it is farming if the animal is farmed on soil that has fertiliser or some other additive. 		

Point Number	821.2		
Summary of Decision Requested:	Amend the definition of "Intensive Farming" in Chapter 13 Definitions as follows: <i>Means farming which is not dependent on the fertility of the soils on which it is located and which may be under cover or within an outdoor enclosure, and be dependent on supplies of food produced on and/or off the land where the operation is located.</i> ... (c) <i>poultry or game bird farming undertaken wholly or principally within sheds or other shelters or buildings;</i> (d) <i>free-range poultry or game bird farming while inside an enclosure;</i> ...		
Decision Reasons:	<ul style="list-style-type: none"> • Amend to exclude range areas for free range poultry if the birds are outside they are livestock that are permitted under the definition of farming. • All paddocks are outdoor enclosures. This definition does not limit or describe what is meant by "enclosure" and it should be deleted. 		

Point Number	821.3		
Summary of Decision Requested:	Add a definition for "Poultry Hatchery" in Chapter 13 Definitions, as follows: <i>Poultry Hatchery means a place where eggs are incubated and hatched in a managed process.</i> OR Amend the definition of "Rural Industry" in Chapter 13 Definitions, as follows: <i>Means an industry that involves the direct handling or processing to the first stage of manufacture of any raw produce harvested from farming, rural contractors' depots, poultry hatcheries or any other land-related agricultural activity, but excludes waste disposal, extractive industries and electricity generation.</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Wants a separate definition for 'poultry hatchery' as a hatchery is different from poultry farming and is closer to an industrial activity. Due to the effects, poultry hatcheries can be an activity provided for in the Rural or Industrial Zones. 		

Point Number	821.4		
Summary of Decision Requested:	Amend the definition of "Industrial activity" in Chapter 13 Definitions, as follows: <i>Means the production, processing, bulk moving or storage in bulk of any materials, goods or products and includes poultry hatcheries;</i> <i>Production includes:</i> ...		
Decision Reasons:	<ul style="list-style-type: none"> • Due to the effects, poultry hatcheries can be an activity provided for in the Rural or Industrial Zones. 		

Point Number	821.5		
Summary of Decision Requested:	Add to Chapter 5 Rural Environment a separate policy for poultry hatcheries, as follows: <i>To enable poultry hatchery operations to be located where the anticipated effects are consistent with the underlying zone.</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Include a separate policy for poultry in the Rural Zone. 		

Point Number	821.6
Summary of Decision Requested:	Add to Chapter 4.6 Industrial and Heavy Industrial Zones, a separate policy for poultry hatcheries as follows: <u>To enable poultry hatchery operations to be located where the anticipated effects are consistent with the underlying zone.</u>
Decision Reasons:	<ul style="list-style-type: none"> • Include a separate policy for poultry hatcheries in the Industrial Zone chapter.
Point Number	821.7
Summary of Decision Requested:	Retain Policy 5.3.2 Productive rural activities, except for the amendments outlined below; AND Amend Policy 5.3.2(a)(i) Productive rural activities, as follows: (a) <i>Recognise and protect the continued operation of the rural environment as a productive working environment by:</i> (i) <i>Recognising that buildings and structures associated with farming, <u>intensive farming</u>, and forestry and other operational structures for productive rural activities contribute to rural character and amenity values;</i> ...
Decision Reasons:	<ul style="list-style-type: none"> • Intensive farming is a productive rural activity that can only locate in the Rural Zone. Should be recognised in the plan that these types of activities also contribute to rural character.
Point Number	821.8
Summary of Decision Requested:	Retain Policy 5.3.6 Intensive farming activities, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Poultry farming is a positive feature in the rural environment and should be enabled in the Rural Zone as it cannot locate in other areas.
Point Number	821.9
Summary of Decision Requested:	Retain Policy 5.3.7 Reverse sensitivity effects; AND Add an additional point (i) to Policy 5.3.7 Reverse sensitivity effects as follows: ... (h) <i>Provide for intensive farming activities, recognising the potential adverse effects that need to be managed, including noise, visual amenity, rural character or landscape effects, and odour.</i> (i) <u>Protect existing intensive farming activities from sensitive land uses to avoid future conflicts between users.</u>
Decision Reasons:	<ul style="list-style-type: none"> • While the policy specifies that intensive farming activities are provided for, it is also important that existing intensive farming activities are protected from new dwellings and other sensitive activities.
Point Number	821.10
Summary of Decision Requested:	Retain Rule 22.2.1.1 P1 Noise General.
Decision Reasons:	<ul style="list-style-type: none"> • Farming noise (including that from ranging poultry) is anticipated in the rural environment.
Point Number	821.11
Summary of Decision Requested:	Amend Rule 22.3.7.2 P1 (a)(vii) Building setbacks - setback land use, as follows: (vii) <i>300m from the boundary of <u>closest point of a building on</u> another site containing an intensive farming activity;</i>
Decision Reasons:	<ul style="list-style-type: none"> • It is reasonable that a building for a sensitive use should be set back from an intensive farming activity at the same distance as required for buildings used for that farming activity.
Point Number	821.12
Summary of Decision Requested:	Retain Rule 22.4.9 RDI(a)(vi) Building platform.
Decision Reasons:	<ul style="list-style-type: none"> • It is appropriate that building platforms must be identified where they can comply with the rules for permitted buildings.
Point Number	821.13
Summary of Decision Requested:	Add the following matters of discretion to Rule 22.4.9 Subdivision - Building platform: <ul style="list-style-type: none"> • <u>Proximity to an intensive farming activity</u> • <u>Reverse sensitivity effects</u>

Decision Reasons:

- No reasons provided.

Point Number 821.14

Summary of Decision Requested: **Amend** Rule 14.12.1 P4 (l)(e)(i) Permitted Activities relating to traffic generation, as follows:

- (e) *Within the Industrial Zone and Heavy Industrial Zone (excluding the Huntly Power Station and Huntly Quarry):*
- (i) *Maximum 250 vehicle movements per day ~~and no more than 15% of these vehicle movements are heavy vehicle movements, or~~*
- ...

Decision Reasons:

- The purpose of the Industrial and Heavy Industrial Zone is to provide for industrial activities, which typically have a large volume of heavy vehicles.
- Restrictions on the number of heavy vehicles to an industrial site is unwarranted, as the zone should be supportive of the activities and their anticipated effects.

Point Number 821.15

Summary of Decision Requested: **Include** information regarding the proximity of intensive farming activities into LIM reports.

Decision Reasons:

- Include information on the location on LIM reports for neighbouring properties to ensure new owners can be aware of an intensive farming activity occurring nearby and impact that it may have when constructing a new sensitive activity.

Point Number 821.16

Summary of Decision Requested: **Add** a new rule (P13) to Rule 22.1.2 Permitted Activities, as follows:

- P13**
For poultry farming.
- (a) buildings are set back at least:*
 - (i) 100 metres from any site boundary (other than a road boundary); and*
 - (ii) 300m from a sensitive activity; and*
 - (iii) 500 metres from any boundary of a Residential, Village and Country Living Zone and*
 - (b) for free range, a vegetated range area is maintained.*

Decision Reasons:

- Where any adverse effects of Poultry Farming are mitigated through provision of setbacks so that the activity is consistent with other rural activities, Poultry Farming should be a permitted activity.
- Buildings associated with the activity would still need to meet performance standards that apply to permitted activities within the Rural Zone.

Point Number 821.17

Summary of Decision Requested: **AMEND** Rule 22.1.3 RD1(d) Restricted Discretionary Activities relating to free-range poultry farming, as follows:

- (d) For free-range poultry farming, buildings and outdoor enclosures are set back at least:*
- (i) ~~400~~ 50 metres from any site boundary (other than a road boundary); and*
- (ii) 200m from a sensitive activity; and*
- ~~(iii)~~ 500 metres from any boundary of a Residential, Village and Country Living Zone; and*
- (iv) a vegetated range area is maintained.*
- ...

Decision Reasons:

- Amend the setbacks so that they apply from the nearest point of the intensive activity - which does not include the range areas (the submitter is seeking a change to the "farming" definition to recognise that the outdoor poultry are livestock and permitted).
- Amend the minimum setback from an internal boundary to be 50m from the nearest building associated with the activity and 200m in total for separation of farm building from sensitive activity.
- Road boundaries should be excluded because the road itself is a separation and any dwelling on the other side has a further separation
- The requirement for a vegetated range area ensures mitigation against the potential for dust to be created.

Point Number 821.18

Summary of Decision Requested: **AMEND** Rule 22.1.3 RD1(e) Restricted Discretionary Activities relating to Housed poultry farming, as follows"

- (e) For housed poultry, free-range poultry that does not comply with 22.1.3 RD1 (d), and all other intensive farming, buildings and adjacent yard areas are set back at least:*
- (i) ~~300~~ 50 metres from any site boundary (other than a road boundary); and*
- (ii) 300 metres from a sensitive activity; and*
- (iii) 500 metres from any boundary of a Residential, Village and Country Living Zone.*

Decision Reasons:

- 100m setback from the boundary is unreasonable and results in requirement for a very large property which is uneconomic and inefficient use of land.
- 50m setback from the boundary is reasonable if in combination with an overall 300m setback from a sensitive activity (includes a dwelling).
- Road boundaries should be excluded as the road itself has a separation and any dwelling on the other side has a further separation.

Point Number 821.19

Summary of Decision Requested: **Amend** Rule 22.1.3 RD1(a)(iii) Restricted Discretionary Activities relating to Intensive farming, as follows:

(a) *Intensive farming that meets all of the following conditions:*

(i) *Land Use – Effects in Rule 22.2*

(ii) *Land Use – Building in Rule 22.3*

~~(iii) *Building coverage does not exceed 3% of the site;*~~

...

Decision Reasons:

- Submitter recognises that the building coverage for intensive farms has increased to 3% of the site but this may still not be enough for poultry farming.
- Given that visual effects and amenity effects (and other effects) are considered in relation to non-compliance with the performance standards we consider that any adverse effects from building coverage should be part of the Restricted Discretionary assessment for the activity. The buildings are intrinsic to intensive poultry farming activities.

Submitter Number: 822 **Submitter:** Bob MacLeod

Point Number 822.1

Summary of Decision Requested: **Add** clauses to Policy 6.1.16 Water conservation, as follows:

(a) *Encourage water conservation measures and, where appropriate, low impact stormwater design and facilities.*

(b) *Encourage the installation of rain water tanks (storage) to provide:*

i. *To reduce the annual water bill*

ii. *To mitigate the costs and impact of water restrictions on lifestyle, amenity and property value.*

iii. *To help avoid the environmental impacts of construction a new water sources; and*

iv. *Community - mindedness (i.e. easing the burden on the Raglan water supply).*

Decision Reasons:

- Financial benefit of rainwater tanks to the community through the reduction in the cost of water and stormwater infrastructure. Ability of Council to reduce the cost of water and stormwater infrastructure is dependent on the cost benefit of 'Long Run Marginal Cost'. This is used for creating new water supplies and represent the change in cost if new water sources are brought forward or delayed.

Point Number 822.2

Summary of Decision Requested: **Add** a new activity to Rule 14.11.1 Permitted Activities, as follows:

PI1 - Rain harvesting

4.11.1.1 - Installation of rain tanks (storage), for water conservation.

Decision Reasons:

- Financial benefit of rainwater tanks to the community through the reduction in the cost of water and stormwater infrastructure. Ability of Council to reduce the cost of water and stormwater infrastructure is dependent on the cost benefit of 'Long Run Marginal Cost'. This is used for creating new water supplies and represent the change in cost if new water sources are brought forward or delayed.

Point Number 822.3

Summary of Decision Requested: **Add** to Appendix 3.1 Residential Subdivision Guidelines, details and illustrations of water harvesting systems as per those attached to the submission.

Decision Reasons:

- Financial benefit of rainwater tanks to the community through the reduction in the cost of water and stormwater infrastructure.
- Ability of Council to reduce the cost of water and stormwater infrastructure is dependent on the cost benefit of 'Long Run Marginal Cost'. This is used for creating new water supplies and represent the change in cost if new water sources are brought forward or delayed.

Point Number 822.4

Summary of Decision Requested: **Amend** Objective 4.1.1(a) Objective – Strategic, as follows:

(a) *Liveable, thriving and connected communities that are sustainable, affordable, efficient and co-ordinated.*

Decision Reasons:

- Only mention of affordability is in 1.12.3. Affordability should be a core principle to support Objective 4.1.1 (a). Lack of affordability affects at and below median income and extends into a third quarter of income.
- Strategy for the District Plan should recognise the environment that surrounds housing affordability and the impact that it has on the community.
- The Plan should enable innovative housing developments that deliver affordable housing options for all incomes.
- Submission refers to the Raglan Housing Study (August 2018).

Point Number 822.5

Summary of Decision Requested: **Add** a new objective and policies to Section 4.2 Residential Zone, as follows:

Objective: To provide for a range of opportunities for affordable housing that enables low and moderate income people to live in the district in accommodation that suits their needs.

Policies:

1) Enable affordable housing by allowing residential densities that make economical and best use of available land in existing residential areas.

2) New housing developments will include affordable housing as part of the development plan.

3) Allow access for developers of affordable housing to lower cost structure of consent and regulation requirements.

4) Encourage multi-unit residential developments subject to appropriate safeguards to amenities and the environment.

5) Take into account the positive effects for the community of affordable housing when assessing resource consent applications.

Decision Reasons:

- Affordability of housing should be enabled by the objectives and rules of the district plan.
- Submission makes reference to the Raglan Housing study 2018 and Whaingaroa/Raglan Affordable Housing Project.

Point Number 822.6

Summary of Decision Requested: Amend Policy 4.1.18(iii) Raglan, as follows:

(a) Raglan is developed to ensure:

...

(iii) Rangitahi is the only area that provides for the medium future growth and it will provide for medium term growth above the multiple median of affordability for Raglan. Developments that propose affordable housing to cater for the quartiles below the multiple median and that are developed in a manner that connects to the existing town and maintains and enhances the natural environment will be considered as a preferred option for additional green fields development.

Decision Reasons:

- Allow for other developments that support affordable development to occur.
- The submitter acknowledges this will require a negotiated definition of 'affordable' and acceptance that the 'multiple median' is the international standard by which housing affordability is determined.

Point Number 822.7

Summary of Decision Requested: No specific decision sought, but submission supports the work and the submissions presented by Whaingaroa Raglan Affordable Housing Project and Raglan Naturally.

Decision Reasons:

- This community board has invested a lot of time and energy promoting Raglan and a community that has a heart as a liveable, thriving and connected community.

Submitter Number: 823

Submitter:

NZTE Operations Limited

Point Number 823.1

Summary of Decision Requested: Add new Objective 9.2.3 as follows:

Objective 9.2.3

The operational needs of Te Kowhai Airpark are not compromised by sensitive land use activities with the potential for reverse sensitivity conflict.

AND

Add a new Policy 9.2.3.1 as follows:

Policy 9.2.3.1

Manage reverse sensitivity risk by:

(i) ensuring that noise sensitive activities within the Te Kowhai Airpark Noise Control Boundaries are acoustically insulated to appropriate standards; and

(ii) ensuring that Te Kowhai aerodrome operates within the noise limits specified by the Te Kowhai Airpark Noise Control Boundaries.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- While Policy 9.2.1.6 partially addresses reverse sensitivity, a more specific objective and corresponding policy is required which recognises the importance of that issue in the context of existing infrastructure.
- The additional objective and policy proposed in Appendix A will ensure that the operational needs of the Airfield are not compromised by sensitive land use activities with the potential for reverse sensitivity conflict.

Point Number 823.2

Summary of Decision Requested: Delete Rule 14.11.4- Non-Complying Activities NC2 (g).

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- Intends to have on-site treatment and disposal of wastewater in the form of a Packed Bed Reactor (or similar) to meet relevant Waikato Regional Council standards. As such, a wastewater treatment plan is a permitted activity in Chapter 27.1.1. Chapter 14 (Infrastructure and Energy) is inconsistent with this rule because Rule 14.11.4 classifies wastewater treatment plants as a non-complying activity for the Te Kowhai Airpark Zone.
- The permitted activity rule in Chapter 27 should therefore take precedence over the general rule in Chapter 14.

Point Number 823.3

Summary of Decision Requested: Amend Rule 14.12.1.4 -Permitted Activities relating to P4 Traffic generation, as follows:

...

(h) Within Precincts A and B of the Te Kowhai Airpark Zone there is a maximum 250 vehicle movements per site per day and no more than 15% of these vehicle movements are heavy vehicle movements.

(j) Within Precincts C and D of the Te Kowhai Airpark Zone there is a maximum of 30 vehicle movements per site per day and no more than 4 of these vehicle movements are heavy vehicle movements except:

(j) Movement restrictions do not apply if the activity is an event or promotion (including temporary events) in Precinct C or a community facility in Precinct C.

...

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- Precincts A and B are limited to 250 vehicles and Precincts C and D are limited to 30 vehicles before a restricted discretionary status is triggered. However it is not clear that these limits are per site limits and they could be interpreted as being limits that apply to the whole of the precincts.
- The insertions will clarify that this limit does not apply for the whole of the precincts taken together.

Point Number

823.4

Summary of Decision Requested:

Amend Rule 14.12.1.7 - Permitted Activities relating to P7 Access and New Roads – Te Kowhai Airpark Zone, as follows:

...

(2) Road alignment and the taxiway network within the Te Kowhai Airpark Zone shall be in general accordance with Appendix 9 – The Te Kowhai Airpark Framework Plan.

(3) The western boundary of the Te Kowhai Airpark Zone shall provide for future connectivity options (vehicular and / or pedestrian) in general accordance with the location identified in Appendix 9 – The Te Kowhai Airpark Framework Plan.

...

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The rules are too prescriptive and will not allow for minor amendments in layout that are in general accordance with the road alignment and taxiway network detailed in Appendix 9.

Point Number

823.5

Summary of Decision Requested:

Delete Rule 27.2.14 (d) - Temporary Events.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- Rule 27.2.14(d) does not allow direct site access from a 'national route' or 'regional arterial' road for Temporary Events as a permitted activity. The terminology is not in accord with the One Network Road Classification used by the New Zealand Transport Agency. The One Network Road Classification for Limmer Road (State Highway 39) is 'Arterial'.
- Currently, the only vehicular access into the Te Kowhai Airpark Zone is off State Highway 39, meaning that there is effectively no permitted activity status for temporary events. Submission notes that this appears to be a carry-over from the Operative District Plan Rural Zone rules.

Point Number

823.6

Summary of Decision Requested:

Amend the Zoning Plan in Chapter 29 – Appendix 9 – Te Kowhai Airfield precincts zoning, to read "Te Kowhai Airpark Zone" rather than "Special Activity Zone Te Kowhai Airpark" to align with the terminology in Chapter 27.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The Zoning Plan in Appendix 9 refers to 'Special Activity Zone Te Kowhai Airpark'. In the interests of consistency, the Zoning Plan should be changed to refer to the 'Te Kowhai Airpark Zone', which better aligns with the terminology in Chapter 27.

Point Number

823.7

Summary of Decision Requested:

Amend Rule 16.3.3.3 – Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:

PI

Any building, structure, tree or other vegetation must not protrude through any airport obstacle limitation surface identified in Appendix 9 Te Kowhai Airpark and as shown on the planning maps.

DI

Any building, structure, tree or other vegetation that does not comply with Rule 16.3.3.3 PI.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code 1 aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation. It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.8

Summary of Decision Requested:

Amend Rule 17.3.1.2 – Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:

PI

Any building, structure, tree or other vegetation must not protrude through the airport obstacle limitation surfaces as shown on the planning maps.

DI

Any building, structure, tree or other vegetation that does not comply with Rule 17.3.1.2 PI.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code 1 aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation.
- It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.9

Summary of Decision Requested:

Amend Rule 20.3.3 – Height - Buildings, structures and vegetation within an airport obstacle limitation surface as follows:

PI

Any building, structure, tree or other vegetation must not protrude through an airport obstacle limitation surface as shown on the planning maps.

NCI

Any building, structure, tree or other vegetation that does not comply with Rule 20.3.3. PI

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code 1 aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation.
- It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.10

Summary of Decision Requested:

Amend Rule 22.3.4.3 – Height - Buildings, structures and vegetation within an airport obstacle, as follows:

PI

Any building, structure, tree or other vegetation must not protrude through any Airport Obstacle Limitation Surface as identified in Appendix 9 Te Kowhai Airpark and shown on the planning maps.

NCI

Any building, structure, tree or other vegetation that does not comply with Rule 22.3.4.3 PI

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code 1 aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation.
- It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.11

Summary of Decision Requested:

Amend Rule 23.3.4.2 – Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:

PI

Any building, structure, tree or other vegetation ~~must~~ ~~that does~~ not protrude through any airport obstacle limitation surface identified in Appendix 9 Te Kowhai Airpark and as shown on the planning maps.

~~NCI~~

Any building, structure, tree or other vegetation that does not comply with Rule 23.3.4.2 PI.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code 1 aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation.
- It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.12

Summary of Decision Requested:

Amend Rule 24.3.3.2 –Height - Buildings, structures or vegetation within an airport obstacle limitation surface, as follows:

PI

Any building, structure, tree or other vegetation must not protrude through the airport obstacle limitation surface as identified in Appendix 9 - Te Kowhai Airpark and as shown on the planning maps.

DI

Any building, structure, tree or other vegetation that does not comply with Rule 24.3.3.2 PI.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code I aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation.
- It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.13

Summary of Decision Requested:

Amend Rule 25.3.1.2 – Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:

PI

Any building, structure, tree or other vegetation must not protrude through any Airport Obstacle Limitation Surfaces as identified in Appendix 9 – Te Kowhai Airfield and defined in Section E, Designation N - Waikato Regional Airport.

~~*NDI*~~

Any building, structure, tree or other vegetation that does not comply with Rule 25.3.1.2 PI.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- The OLS (as notified) is necessary to ensure compliance with Civil Aviation Circular AC139-7 Aerodrome Standards and Requirements for Code I aerodromes operating on a VFR and an IFR (non-air transport) basis. The extent of the OLS is described in Chapter 29 – Appendix 9.
- Rules are also provided in the PWDP to protect the OLS from being breached by buildings, structures and vegetation.
- Although Rule 27.3.1 as notified correctly protects the proposed OLS from buildings, structures, trees and other vegetation, the corresponding height rules in other zones omits reference to 'trees'.
- It is critical that there is consistency amongst OLS provisions and that the provisions control 'trees' as well as buildings, structures and other vegetation.
- It is proposed that the relevant rules in each chapter are amended to align with the (correct) wording in Chapter 27, Rule 27.3.1.

Point Number

823.14

Summary of Decision Requested:

Delete Rule 27.2.7- Noise- Taxiways.

AND

Add a new Rule 27.2.7- Noise- Aircraft Operations as follows:

27.2.7 Noise- Aircraft Operations

Noise from aircraft operations in ALL PRECINCTS, including aircraft movements on taxiways, shall not exceed 65dB Ldn outside the Air Noise Boundary and 55dB Ldn outside the Outer Control Boundary as shown in the Planning Maps. These limits do not apply inside the Te Kowhai Airpark Zone. For the purpose of this control aircraft noise shall be assessed in accordance with NZS6805:1992 "Airport Noise Management and Land Use Planning" and logarithmically averaged over a three month period. For the purposes of this Rule aircraft operations shall include aircraft taking-off, landing, taxiing and flying on circuit flight paths. The following operations are excluded from the calculation of noise for compliance with noise limits:

- Aircraft engine testing and maintenance
- Aircraft landing or taking off in an emergency
- Emergency flights required to rescue persons from life threatening situations or to transport patients, human vital organs or medical personnel in a medical emergency.
- Flights required to meet the needs to a national or civil defence emergency declared under the Civil Defence Emergency Management Act 2002
- Aircraft using the airfield due to unforeseen circumstances as an essential alternative to landing at a scheduled airport elsewhere
- Aircraft undertaking firefighting duties
- Air Shows (for one air shows per year).

Aircraft movements shall be recorded monthly and once the total movements in the busiest three month period reaches 4,500, noise contours for the purpose of assessing compliance with Rule 27.2.7 shall be calculated once every three years. When the calculated noise level is within 1 decibel of the limit, noise contours for the purpose of assessing compliance with Rule 27.2.7 shall be calculated annually and verified with infield monitoring once every three years.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Taxiing noise is not currently anticipated in the notified OCNB but is provided for through the Te Kowhai Buffer Zone and specific rules in Chapter 27 Rule 27.2.7.
- Taxiing noise is included in the proposed ANCB therefore Rule 27.2.7 needs to be deleted and replaced with wording to reflect this.

Point Number

823.15

Summary of Decision Requested:

Add new rule 16.3.12- Noise Sensitive Activities to Chapter 16: Residential, as follows:

16.3.12 Noise Sensitive Activities

PI – Construction, addition, or alteration to a building containing a Noise Sensitive Activity located between the Waikato Regional Airport or Te Kowhai Air Noise Boundary and the Outer Control Boundary must comply with Appendix I – Acoustic Insulation.

RD1(a) Construction of, or addition, or alteration to a building that does not comply with a condition in Rule 16.3.12 PL.

(b) Council's discretion is restricted to the following matters:

(i) internal design sound levels;

(ii) on-site amenity values; and

(iii) Potential for reverse sensitivity effects.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Chapter 16 Rule 16.3 does not provide for ANCB's as proposed by this submission.
- A new rule (16.3.12) is required to address ANB requirements.

Point Number 823.16

Summary of Decision Requested: **Delete** Rule 22.3.7.3– Building – Te Kowhai Noise Buffer.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- The Te Kowhai Noise Buffer is no longer required as the noise from Taxiing aircraft is proposed to be controlled by the new proposed Te Kowhai ANCB's, therefore Rule 22.3.7.3 can be deleted.

Point Number 823.17

Summary of Decision Requested: **Add** a new rule to Rule 22.1.5- Non-Complying Activities as follows:

...

NC5 (g) Noise Sensitive Activities within the Te Kowhai Air Noise Boundary (Ldn management methods will be in place. 65), except this restriction does not apply to Noise Sensitive Activities associated with Te Kowhai Airpark Zone.

AND

Amend Rule 22.1.5 NC5 consequentially as follows:

NC5 Any other activity that is not listed as Prohibited, Permitted, Restricted Discretionary or Discretionary.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Amendment is required to Rule 22.1.5 to clarify that noise sensitive activities within the ANB (inner control boundary) are a Non-Complying Activity unless the dwelling comprises part of Te Kowhai Airpark, in which case alternative site-specific noise management methods will be in place.

Point Number 823.18

Summary of Decision Requested: **Amend** Rule 22.3.7.4 PI (i) Building - Noise Sensitive Activities, as follows:

(i) The Waikato Regional Airport and Te Kowhai Airpark Zone Air noise boundary and Airport Noise Outer Control boundary;

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Rule 22.3.7.4 refers to the need for compliance with Appendix 1 (Acoustic Insulation) within 'The Airport Outer Control Boundary' but does not specify which airport is being referred to.

Point Number 823.19

Summary of Decision Requested: **Add** an additional activity to Rule 24.1.3- Non-Complying Activities as follows:

NC2

Noise Sensitive Activities within Te Kowhai Airpark Air Noise Boundary, (Ldn 65), except this restriction does not apply to Noise Sensitive Activities within Te Kowhai Airpark.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Rule 24.1.3 does not provide for the proposed ANCB as notified.
- Amendment is required to Rule 24.1.3 to clarify that noise sensitive activities within the ANB (inner control boundary) are a Non-Complying Activity unless the dwelling comprises part of Te Kowhai Airpark, in which case alternative site-specific noise management methods will be in place.

Point Number 823.20

Summary of Decision Requested: **Amend** Rule 24.3.7 Building- Airport Noise Outer Control Boundary, as follows:

24.3.7 Building - Airport Noise Outer Control Boundary-Noise Sensitive Activities

PI

Construction, addition to or alteration of a dwelling building containing a Noise Sensitive Activity located between the Te Kowhai Airpark Air Noise Boundary and the Outer Control Boundary must achieve the internal design sound levels specified in Appendix 1 – Acoustic Insulation, Section 3 Table 6: comply with Appendix 1 – Acoustic Insulation, Section 3.

RD1

(a) Construction, addition to or alteration of a dwelling building that does not comply with Rule 24.3.7 PI.

(b) Council's discretion is restricted to the following matters:

- (i) On-site amenity values;
- (ii) Noise levels received at the notional boundary of the ~~dwelling building~~;
- (iii) Timing and duration of noise received at the notional boundary of the ~~dwelling building~~; and
- (iv) Potential for reverse sensitivity effects.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Rule 24.3.7 does not provide for the proposed ANCBs in Figure 3 of the Marshall Day Report, therefore it is required to be amended.

Point Number 823.21

Summary of Decision Requested: **Add** a new Figure 3 to Appendix 1 (being Figure 4 of the Marshall Day Report attached to the original submission as Appendix B).

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is consequential amendments of introducing new Te Kowhai Airpark Airport Noise Control boundaries.
- In order to appropriately determine the level of acoustic treatment for noise sensitive activities between the 55 and 65 dB Ldn OCB a new figure 3 should be included in Appendix 1 showing 2 decibel contours within the OCB.

Point Number 823.22

Summary of Decision Requested: **Retain** the Te Kowhai Airpark Zone and the relevant rules that relate to the functioning of the zone (subject to amendments sought in the submission).

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- Recognises existing Airfield infrastructure and enables the establishment of a complementary residential 'airpark.'
- The Airfield operates separately as an existing piece of infrastructure and, while being part of Te Kowhai Airpark Zone, needs to be protected through the provision of operation, growth and reverse sensitivity effects are adequately managed.

Point Number 823.23

Summary of Decision Requested: **Retain** the objectives and policies in Section 9.2: Te Kowhai Airpark as notified.

Decision Reasons:

- The objectives and policies for Te Kowhai Airpark Zone give direction to the rules and other methods that are necessary to manage development of the Airfield and the airpark.

Point Number 823.24

Summary of Decision Requested: **Amend** Appendix 1- Acoustic Insulation Section 3 Te Kowhai Airpark to introduce the Te Kowhai Airpark Noise Control Boundaries (ANCB) as recommended in the Marshall Day Report (attached to the original submission as Appendix B).

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- The old OCNB has been rolled over from the Operative District Plan and does not adequately control aircraft noise, future proof the existing Airfield and protect against reverse sensitivity effects.

Point Number 823.25

Summary of Decision Requested: **Amend** Appendix 1- Acoustic Insulation Section 3 Te Kowhai Airpark- Figure 2 "Te Kowhai Airpark, Ldn Contours for Sound Insulation Design" to be replaced by Figure 3 of the Marshall Day Report (attached to the original submission as Appendix B).

AND

Amend Appendix 1- Acoustic Insulation Section 3 Te Kowhai Airpark as follows:

3. Te Kowhai Airpark

~~The Te Kowhai Airpark Outer Noise Control Boundaries identify areas that experience high noise levels from aircraft landing and taking off from the Te Kowhai Airpark. The Te Kowhai Airpark Noise Buffer identifies land within the Rural Zone around the Te Kowhai Airfield that experiences high noise levels from aircraft using the taxiways. Noise Sensitive Activities Dwellings within the Te Kowhai Airpark Outer Noise Control Boundaries that are required to be acoustically insulated, must to achieve the internal noise standards specified in sections 3.1 and 3.2 below.~~

AND

Amend Appendix 1- Acoustic Insulation 3.1- Conditions for Permitted Activities inside the Te Kowhai Airpark Outer Control Noise Boundary, as follows:

3.1 Conditions for ~~Permitted Activities~~ **Noise Sensitive Activities** inside the Te Kowhai Airpark ~~Outer Control Noise Boundaries~~

...

(3) Where a building is partly or wholly contained within the Te Kowhai Airpark ~~outer Noise control noise boundaries~~, a mechanical ventilation system or systems that will allow windows to be closed if necessary to achieve the required internal design sound level for habitable rooms is required to be installed. The mechanical systems or systems are to be designed, installed and operating so that a habitable space (with windows and doors closed) is ventilated with fresh air in accordance with the New Zealand Building Code, Section G4- Ventilation.

AND

Delete Rule 3.2- Conditions for Permitted Activities the Te Kowhai Airpark Noise Buffer in Appendix 1.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- The rule refers to the old Te Kowhai Outer Control Noise Boundary (OCNB) which is to be replaced and Te Kowhai Airpark Noise Buffer which is to be deleted.
- The Proposed ANCB's includes taxing noise from aircraft which negates the need for the Te Kowhai Airpark Noise Buffer.

Point Number

823.26

Summary of Decision Requested:

Amend the Planning Maps to show the Proposed ANCB (as shown in Figure 3 of the Marshall Day Report attached to the original submission as Appendix B).

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- As notified, the planning maps shows the OCB from the Operative District Plan.

Point Number

823.27

Summary of Decision Requested:

Amend the title of Rule 27.2.6- Noise- Other than Taxiways as follows:

27.2.6- Noise- Other than Aircraft Operations ~~than Taxiways~~.

AND

Amend the Proposed District Plan for any consequential relief required to give effect to this submission.

Decision Reasons:

- This change is a consequential amendment of introducing new Te Kowhai Airpark Airport Noise Control Boundaries.
- Rule 27.2.6 as notified does not anticipate the proposed ANCB's, so needs to be amended accordingly.

Submitter Number:

824

Submitter:

Bob MacLeod

Organisation:

Raglan Community Board

Point Number

824.1

Summary of Decision Requested:

No specific decision sought, but submission supports the work and the submission presented by Whaingaroa Raglan Affordable Housing Project.

Decision Reasons:

- The community board has invested a lot of time and energy promoting Raglan as a livable, thriving, and connected community.

Point Number

824.2

Summary of Decision Requested:

No specific decision sought, but submission supports the work and the submission presented by Raglan Naturally.

Decision Reasons:

- The community board has invested a lot of time and energy promoting Raglan as a livable, thriving, and connected community.

Point Number

824.3

Summary of Decision Requested:

Add to Policy 6.1.16 Water conservation, as follows:

b) encourage the installation of rain water tanks (storage) to provide:

i. to reduce the annual water bill

ii. to mitigate the costs and impact of water restrictions on lifestyle, amenity and property value

iii. to help avoid the environmental impacts of construction of new water sources; and

iv. community-mindedness (i.e. easing the burden on the Raglan water supply).

Decision Reasons:

- The primary financial benefit of rainwater tanks to the community (in contrast to the individual property owner) is the potential reduction in the cost of water and stormwater infrastructure.
- The ability of Waikato District Council as the water authorities to reduce the cost of water and storm water infrastructure will depend on the economic cost benefit Long Run Marginal Cost.

Point Number

824.4

Summary of Decision Requested:

Add to Rule 14.1.1.1 Permitted Activities, as follows:

PII Rain harvesting

14.1.1.1 Installation of rain tanks (storage), for water conservation.

Decision Reasons:

- The primary financial benefit of rainwater tanks to the community (in contrast to the individual property owner) is the potential reduction in the cost of water and stormwater infrastructure.
- The ability of Waikato District Council as the water authorities to reduce the cost of water and storm water infrastructure will depend on the economic cost benefit Long Run Marginal Cost.

Point Number 824.5

Summary of Decision Requested: **Amend** Appendix 3.1 Section 8 Residential Subdivision Guidelines – Low Impact Urban Design, to add details and illustrations of water harvesting systems, similar to those attached to the submission.

Decision Reasons:

- The primary financial benefit of rainwater tanks to the community (in contrast to the individual property owner) is the potential reduction in the cost of water and stormwater infrastructure.
- The ability of Waikato District Council as the water authorities to reduce the cost of water and storm water infrastructure will depend on the economic cost benefit Long Run Marginal Cost.

Point Number 824.6

Summary of Decision Requested: **Amend** Objective 4.1.1 (a) Strategic, as follows:
(a) *Livable, thriving, and communities that are sustainable, affordable, efficient and co-ordinated.*

Decision Reasons:

- The only mention of affordability in the plan is in section 1.12.3 which calls for “affordable options.”
- Affordability should be a core principle of the District Plan in order to support the overarching goal of the objective.
- Lack of affordability now affects all at and below the median income and extends into the third quarter of income.
- Strategy for the District Plan should recognize the environment that now surrounds housing affordability and the impact that this is having on our communities. The plan should enable innovative housing developments that deliver highly affordable housing options for all income streams.

Point Number 824.7

Summary of Decision Requested: **Add** objectives and policies to Section 4.2 Residential Zone, as follows:
Objective: To provide for a range of opportunities for affordable housing that enables low and moderate income people to live in the district in accommodation that suits their needs.
Policy 1: enable affordable housing by allowing residential densities that make economical and best use of available land in existing residential areas.
Policy 2: new housing developments will include affordable housing as part of the development plan.
Policy 3: allow access for developers of affordable housing to lower cost structure of consent and regulation requirements.
Policy 4: encourage multi-unit residential developments subject to appropriate safeguards to amenities and the environment.
Policy 5: take into account the positive effects for the community of affordable housing when assessing resource consent applications.

Decision Reasons:

- Affordability of housing should be enabled by the objectives and rules of the plan.

Point Number 824.8

Summary of Decision Requested: **Delete** Policy 4.1.18(iii) and replace with the following:
Rangitahi will provide for medium term growth above the multiple median of affordability for Raepan. Developments that propose affordable housing to cater for the quartiles below the multiple median and that are developed in a manner that connects to the existing low and maintains and enhances the natural environment will be considered as preferred options for additional green fields development.

Decision Reasons:

- This will require a negotiated definition of affordable and acceptance that the multiple median is the international standard by which housing affordability is determined.
- Allow other developments that support affordable development to occur.

Submitter Number: 825 **Submitter:** John Lawson

Point Number 825.1

Summary of Decision Requested: **Add** areas of Significant Indigenous vegetation or habitat by use of LENZ and in consultation with conservation and environment groups.
AND
Add rules for significant indigenous vegetation and habitat as follows:
In a significant indigenous vegetation or habitat area the following are discretionary activities:

- Cultivation.
- Spreading soil or other material (including fertilizer or lime) in excess of existing routine application rates.
- Drainage works apart from routine maintenance.
- Land reclamation from estuary or other wetlands.
- Modifications to watercourses apart from routine maintenance.
- Flood defences.
- Infilling ditches, ponds, pits, pools, marshes or historic earthwork features.
- Clearing vegetation or land (by physical removal, burning, application of herbicides, or deliberate overgrazing, trampling, or rooting by livestock) in preparation for cultivation.
- Introducing livestock (including poultry) at intensive stocking rates, or increasing stocking rates to intensive levels.

Decision Reasons:

- The 2005 WDC State of Environment Report (page 66) states that "Since 1992 the Waikato District has experienced a of approximately 1,345 ha (which could be as high as 1,508ha) of indigenous forest and 1,388ha (which could be as high as 1,706 ha) of indigenous scrub.
- Large amount of indigenous forest and scrub in the Waikato District and that up to 50% of it is threatened and most of that is not legally protected.
- The NZ Biodiversity Strategy (page 33) set the 2020 goal as, "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats (such as lowland forests and grasslands, wetlands and dunelands) have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number	825.2
Summary of Decision Requested:	<p>Add rules to Chapter 16 Residential Zone to provide for protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:</p> <p>(a) from SH23 (north of Maungatawhiri Rd) to Kaitoke Creek</p> <p>(b) all existing views of the bar from Main Road, Bow St and Norrie Avenue</p> <p>(c) all existing views of Karioi from Raglan Central Business District</p> <p>(d) from Wainui Rd to the coast between the Bryant Reserve and the Bible Crusade Camp</p> <p>(e) from SH23 summit to Karioi</p> <p>(f) AroAro salt marsh from Wallis St.</p> <p>AND</p> <p>Amend the planning maps for any consequential relief required to give effect to this submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Rules in each zone are required to give effect to Policies 3.3.3 (a) and 4.5.14 (a) (iii). • Views are a part of Raglan's character. Raglan Naturally makes various references to 'view'. The original submission notes these references in detail. • RMA (Section 5) includes "well being" which was included in Raglan Naturally and this clearly includes protection of views. • Raglan Naturally needs to be considered as a part of the district plan review. • Other district plans protect views (Auckland and Hastings).

Point Number	825.3
Summary of Decision Requested:	<p>Add rules to Chapter 18 Business Town Centre Zone to provide for protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:-</p> <p>(a) from SH23 (north of Maungatawhiri Rd) to Kaitoke Creek</p> <p>(b) all existing views of the bar from Main Road, Bow St and Norrie Avenue</p> <p>(c) all existing views of Karioi from Raglan CBD</p> <p>(d) from Wainui Rd to the coast between the Bryant Reserve and the Bible Crusade Camp</p> <p>(e) from SH23 summit to Karioi</p> <p>(f) AroAro salt marsh from Wallis St.</p> <p>AND</p> <p>Amend the planning maps for any consequential relief required to give effect to this submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Rules in each zone are required to give effect to Policies 3.3.3 (a) and 4.5.14 (a) (iii). • Views are a part of Raglan's character. Raglan Naturally makes various references to 'view'. The original submission notes these references in detail. • RMA (Section 5) includes "well being" which was included in Raglan Naturally and this clearly includes protection of views. • Raglan Naturally needs to be considered as a part of the district plan review. • Other district plans protect views (Auckland and Hastings).

Point Number	825.4
Summary of Decision Requested:	<p>Add rules to Chapter 22 Rural Zone to provide for protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:</p> <p>(a) from SH23 (north of Maungatawhiri Rd) to Kaitoke Creek</p> <p>(b) all existing views of the bar from Main Road, Bow St and Norrie Avenue</p> <p>(c) all existing views of Karioi from Raglan CBD</p> <p>(d) from Wainui Rd to the coast between the Bryant Reserve and the Bible Crusade Camp</p> <p>(e) from SH23 summit to Karioi</p> <p>(f) AroAro salt marsh from Wallis St.</p> <p>AND</p> <p>Amend the planning maps for any consequential relief required to give effect to this submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Rules in each zone are required to give effect to Policies 3.3.3 (a) and 4.5.14 (a) (iii). • Views are a part of Raglan's character. Raglan Naturally makes various references to 'view'. The original submission notes these references in detail. • RMA (Section 5) includes "well being" which was included in Raglan Naturally and this clearly includes protection of views. • Raglan Naturally needs to be considered as a part of the district plan review. • Other district plans protect views (Auckland and Hastings).

Point Number	825.5
Summary of Decision Requested:	<p>Add new rules for all zones as follows:</p> <p><u>Construction of a building or other structure and planting of trees and other vegetation is a permitted activity if:</u></p> <p><u>(a) it can be shown that it will not significantly block views of sea, river, bush or hills from neighbouring properties, or</u></p> <p><u>(b) neighbouring property owners confirm in writing that any loss of view does not concern them, or</u></p> <p><u>(c) it can be shown that the planted vegetation is of native plants and likely to contribute to reduction of river, or coastal erosion, or</u></p> <p><u>(d) it can be shown that the planting would improve views from public places.</u></p>

Decision Reasons:

- Sea and other views add monetary value to properties.
- Property rights of owners should take precedence over developers. Developers should be required to obtain written agreement from neighbours that the development does not concern them in terms of views lost, unless it is native planting to protect land from erosion, hides unsightly developments or will not significantly affect views.
- While no requirement under the RMA to protect views, no provisions against either. Feasible to protect views as shown by other district plans.
- Only 4.7.2 requires view sharing and this will not apply to most developments as they do not require consent.

Point Number 825.6

Summary of Decision Requested: **Add** provisions to Chapter 16 – Residential Zone, to restrict further holiday accommodation in Raglan's residential and business areas.
AND

Add provisions for an area of high density development near the cement silos, of similar height to them and to the density and design of a traditional European fishing village, available for low cost purchase and rental by permanent residents for leases of no less than a year.

Decision Reasons:

- Raglan is very short of permanent accommodation and the Plan makes no provision for affordable properties protected from use for holiday occupation.

Point Number 825.7

Summary of Decision Requested: **Add** provisions to Chapter 17 – Business Zone, to restrict further holiday accommodation in Raglan's residential and business areas.
AND

Add provisions for an area of high density development near the cement silos, of similar height to them and to the density and design of a traditional European fishing village, available for low cost purchase and rental by permanent residents for leases of no less than a year.

Decision Reasons:

- Raglan is very short of permanent accommodation and the Plan makes no provision for affordable properties protected from use for holiday occupation.

Point Number 825.8

Summary of Decision Requested: **Add** provisions to Chapter 18 – Business Town Centre Zone, to restrict further holiday accommodation in Raglan's residential and business areas.
AND

Add provisions for an area of high density development near the cement silos, of similar height to them and to the density and design of a traditional European fishing village, available for low cost purchase and rental by permanent residents for leases of no less than a year.

Decision Reasons:

- Raglan is very short of permanent accommodation and the Plan makes no provision for affordable properties protected from use for holiday occupation.

Point Number 825.9

Summary of Decision Requested: **Add** a Raglan structure plan
AND
Consider postponing the application of the Proposed Waikato District Plan to Raglan ward until such structure plan is in place.

Decision Reasons:

- Plan is missing important sections, marked with "placeholders".
- Website is difficult to load/read and compare to existing plan.
- Issues with online submission process.
- Structure Plan for Raglan is still incomplete.
- Good case for not applying the Plan to Raglan until more complete and better consultation methods have been devised.
- Most other growth areas have Structure Plans. Without a Structure Plan it is not apparent that the proposed Plan will work for Raglan ward. Raglan increased by 40% over the period 1991-2001 and could more than double over the next 10 years if all the development options are taken up.
- The Plan does not estimate population might be and services required. Without estimates hard to know what areas to set aside or what environmental problems might arise.
- Structure Plan is needed to take account of Raglan Naturally (2001) and to expand on it, including any revisions. The submission goes into detail as to what the Raglan Naturally document entails, including aspirations and priorities for action.

Point Number 825.10

Summary of Decision Requested: **Add** rules to each catchment to Section C Rules - to provide to support the following:

- on-site stormwater disposal
- sufficient capacity to enable disposal of stormwater
- best-practice low impact design
- on-site treatment
- minimises impervious surfaces
- retains pre-development hydrological conditions
- not increase the flow of stormwater runoff
- not reduce storage capacity on-site
- stormwater catchment management plan
- promotes clean water reuse and groundwater recharge

AND

Amend Section C Rules to provide rules for individual limits to suit each catchment, rather than permitted up to 70% impermeable cover everywhere.

AND

No specific decision sought, but submission opposes Policy 4.2.7 Site coverage and permeable surfaces, Policy 6.4.7 Storm water and Rule 14.1.1.2 RD2.

Decision Reasons:

- The submitter opposes policies 4.2.7 and 6.4.7, as the only rules implementing them in Raglan are discretionary and ill-defined. For example, "where appropriate" is not defined.
- No scientific stormwater plan for Raglan has been completed, though a settling pond at AroAro was designed in 2011 as a filtration wetland for the stormwater. Pollutants such as copper are at or near their limits and addition of more sites with 70% impermeable cover will exacerbate the pollution. Application of Rule 14.1.1.2 RD2's discretion without clear scientific evidence of effects will make pollution even worse.

Point Number 825.11

Summary of Decision Requested: **Add** rules to support Policy 4.2.7 - Site Coverage and Permeable Surfaces.

Decision Reasons:

- The submitter supports the policies of having sufficient open space to provide for landscaping, on-site stormwater disposal in the Residential Zone, but objects that they do not appear to have any corresponding rules, except for Te Kowhai Airpark Zone Rule 27.3.3.

Point Number 825.12

Summary of Decision Requested: **Retain** Activity Specific Standard 14.1.1.1 (a)(iii) Water, wastewater and stormwater - Permitted Activities pertaining to P3 wastewater services which requires wastewater to comply with AS/NZS 1547:2012.

Decision Reasons:

- AS/NZS 1547:2012 covers the whole range of options which may be appropriate, including Waterless composting toilets, covered in the related AS/NZS 1546.2:2008. I support investigation of such systems to minimise water consumption and sewage volumes, thus making it more possible to treat sewage as a valuable resource, rather than an expensive waste.

Point Number 825.13

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays - to provide for an option for developments to meet much lower standards of provision for parking, etc, depending on the extent to which they provide for use of public transport, walking, or cycling by people using the site. Submission makes reference to 7.3.1(4) of the Christchurch Plan as an example.

Decision Reasons:

- For reasons of climate change, resource use, safety and congestion, the current average of roughly one car per person needs to be reduced. Maintenance of inflexible rules on parking, etc perpetuates the current problem and requires developers to subsidise car transport. Alternatives should be encouraged, as they already are in Auckland, Christchurch, Queenstown, etc.

Point Number 825.14

Summary of Decision Requested: **Amend** the Planning Maps to differentiate between Business Town Centre, Business and Industrial Zone. Submission references Appendix 2.30 Raglan Map, and seeks clarification of the term "Commercial Area".

Decision Reasons:

- Commercial Area is indicated in purple, yet in the text of the Plan the term is only used to define land at Tamahere. Submitter opposes use of this map until the meaning of Commercial Area is clarified.

Point Number 825.15

Summary of Decision Requested: **Amend** Rule 16.5.8.7 Building setbacks - All boundaries to provide for variable setbacks to suit the character of each road
OR

Amend Rule 16.5.8.7 Building setbacks - All boundaries to require a minimum 6m setback from the road boundary for all developments in the Residential Zone.

Decision Reasons:

- There are locations where there is no need for any setback, but it is not clear that any generic rule can be set to identify them.
- A 6m setback will generally retain the village character of Raglan and protect many views.
- The submitter does not understand why Council is not accounting for the Environment Court decision (NZEVC 411 - paragraph 59, page 17) and there is no reference to it in the s32 documents.
- The 2017 Infrastructure Issues and Options report for item 21.49 - Building set back, makes no mention of the environment court decision and only mentions the Roading Team's view on technical matters, not amenity.
- The s32 – 12 – residential zone – setback report lists assertions that the 6m setback is odd, doesn't work and is generally not practical due to topography, set against other assertions that setback should reflect the character of the roads within Raglan, protect Raglan views and retain Raglan's existing character. None of these seems to have been evaluated by the s32 report, which is silent about the Environment Court.

Point Number 825.16

Summary of Decision Requested: **Amend** Policy 4.1.5 Density to identify density ranges for each street.

Decision Reasons:

- A minimum density of 12-15 households per hectare is imprecise (is it 12, 15, or what, where and why?) and not suitable for parts of the Residential Zone. Some streets could take much more and some less. Submitter opposes the policy unless sites are assessed for wildlife, stormwater, visual attraction and transport factors.

Point Number 825.17

Summary of Decision Requested: **Amend** Policy 4.1.18 Raglan as follows:

(a) Raglan is developed to ensure:

(i) Infill and redevelopment of existing sites occurs, subject to development of a Structure Plan to identify where this can be done without loss of character, trees, or other natural features.

(ii) A variety of housing densities is provided for and adequate housing reserved for low cost rentals and purchases by permanent residents;

(iii) Rangitahi is the only area that provides for the medium term future growth and is developed in a manner that ~~connects~~ has cycle, footway and public transport connections to the existing town and maintains and enhances the natural environment; and

(iv) There are good quality cycle, footway and public transport connections between the town centre, the Papahua Reserve and Raglan Wharf.

Decision Reasons:

- 2009 Raglan Structure Plan Issues and Options report said; "In simple terms the existing District Plan already zones enough land in the immediate Raglan area to provide for around 1.6 times the amount of land that will be needed up to 2061."
- Rangitahi development will add 500 houses.
- There is a lack of detailed population figures but there is apparent that Raglan needs infill and redevelopment. Without the detailed analysis of sites, it is likely that some would lose their character, trees and other features. Opposes Policy unless sites are differentiated.
- There is a housing shortage in Raglan, but the shortage is for housing available to local people at affordable prices. Providing more holiday homes will not solve housing problem.
- Rangitahi will provide for future growth and will have good walking and cycle links within it, but not to the CBD and no ferry/bus service. CBD has parking and congestion issues at peak times without adding cars from Rangitahi. Therefore good alternatives to cars are needed.
- Papahua Reserve and Raglan Wharf need to account for 4.1.12 (b)(v) "particularly walking and cycling" provision, along with the proposal in Raglan Naturally to provide for a free shuttle.

Point Number

825.18

Summary of Decision Requested:

Add a new clause (iii) to Policy 7.1.4 Policy Matangi and Huntly Heritage precinct for Raglan (similar to those for Matangi and Huntly (i and ii))

Decision Reasons:

- In 2017, Waikato District Council often used the phrase "Raglan is the jewel in the crown of the Waikato". The proposed Waikato District Plan still mentions Raglan's "seaside village character" but reduced from 12 in the current plan to 3 in the proposed one and that is only for Rangitahi.
- The original submission makes reference to 1.6.1 of the current plan ("Raglan will retain its seaside village character as it grows, while protecting the harbour."), as well as a description of Raglan from Lonely Planet. The submission wants "Raglan will retain its seaside village character as it grows, while protecting the harbour." from the current plan included in the proposed.
- Submitter is of the opinion that Policy 7.1.4 also applies to Raglan.

Point Number

825.19

Summary of Decision Requested:

Amend the Proposed Waikato District Plan by making the Coastal Overlay a conservation area and including provisions where all major changes and consents which infringe District Plan rules, or which exceed one storey, are publicly notified.

AND

Delete Policy 4.5.14(f) Raglan Town Centre

Decision Reasons:

- In 2017, Waikato District Council often used the phrase "Raglan is the jewel in the crown of the Waikato". The proposed Waikato District Plan still mentions Raglan's "seaside village character" but reduced from 12 in the current plan to 3 in the proposed one and that is only for Rangitahi.
- The original submission makes reference to 1.6.1 of the current plan ("Raglan will retain its seaside village character as it grows, while protecting the harbour."), as well as a description of Raglan from Lonely Planet.
- The Lonely Planet comment that "It's small enough to have escaped mass development" is of value and should be enforced by limiting developments to one storey and features in accordance with the Waikato District Council 2003 design guide.
- Developments can occur but needs to avoid changing Raglan's character which can be done by public notification (of consents).
- Most of the coast is visible from Raglan and as such, is a part of its character and should be protected.
- Most street corners have single storey buildings which are or should be listed as historic heritage buildings.
- As the character statement for Raglan Town Centre says it is characterised by "Small scale (one to two level, narrow frontages) buildings". It also says "Encourage new development that is sympathetic to the existing main street built form (height, scale, form) and the surrounding context, whilst still promoting the eclectic and artistic nature of the town".
- A possible alternative could be similar to Hamilton's Special Character areas.

Point Number

825.20

Summary of Decision Requested:

Delete Rule 18.3.5 P1(a)(vi) Verandahs

Decision Reasons:

- It is inconsistent with Policy 4.5.14 (v)(B) which refers to post supported verandahs (for the Raglan Town Centre)

Point Number

825.21

Summary of Decision Requested:

Add policies and rules to protect ridgelines from development.

AND

Amend Policy 3.3.2 (a)(i) t not just recognise but protect.

Decision Reasons:

- Policy 3.3.2 (a) (i) only recognises the attributes. Ridgelines are widely visible, so development of them has a disproportionate effect.

Point Number

825.22

Summary of Decision Requested:

Amend Rule 16.1.2 P9 Permitted Activities to provide for the registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. Queenstown has rules

requiring registration as a Homestay, or a Holiday Home and, for larger properties, resource consent for change of use. Raglan needs similar rules.

Point Number 825.23

Summary of Decision Requested: **Amend** Rule 22.1.2 P10 Permitted Activities to provide for the registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. Queenstown has rules requiring registration as a Homestay, or a Holiday Home and, for larger properties, resource consent for change of use. Raglan needs similar rules.

Point Number 825.24

Summary of Decision Requested: **Amend** Rule 23.1.1 P2 Permitted Activities to provide for the registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. Queenstown has rules requiring registration as a Homestay, or a Holiday Home and, for larger properties, resource consent for change of use. Raglan needs similar rules.

Point Number 825.25

Summary of Decision Requested: **Delete** Policy 4.2.22 Bankart Street and Wainui Street

AND

Add provision for Wi Neera Street

Decision Reasons:

- The area behind the corrugated iron on Wi Neera St is still be developed and residents will be forced out of their homes by rate rises, overlooking, noise, etc. Raglan needs housing for locals far more than extra holiday apartments.

Point Number 825.26

Summary of Decision Requested: **Amend** Rule 17.1.3 RD1 (a)(i) Restricted Discretionary activities as follows:

The extent to which the development is consistent with 4.5.3 Policy - Commercial purpose: Business Town Centre Zone, in strengthening those areas as the primary retail, administration, commercial service and civic centre for each town and with Town Centre Guidelines contained in Appendix 3.3

Decision Reasons:

- The 2006 Supporting Information for Lorenzen Bay Business Zone said at 4.4.3 that "It is likely that a Service Centre would comprise convenience shops such as a dairy or fruit and vegetable shop." It was on that basis that the area was rezoned from Residential to Business. By specifying a minimum lot size of 225m² it is unlikely that such small shops are going to occupy the site. A large supermarket is more likely, which would affect the viability of Raglan CBD.

Point Number 825.27

Summary of Decision Requested: **Amend** Rule 17.4.1 - RD1 (a)(i) General subdivision as follows:

(a) Subdivision of land must comply with all of the following conditions:

- (i) Proposed lots must have a minimum size of 225m² net site area with the exception of access or utility allotments or reserves to vest;*
- (ii) Proposed lots must be connected to public-reticulated water supply and wastewater.*

Decision Reasons:

- It is inconsistent with Policy 4.5.3- Commercial purpose: Business Town Centre Zone, which aims to strengthen town centres as the primary retail, administration, commercial service and civic centre for each town.

Point Number 825.28

Summary of Decision Requested: **Retain** Rule 18.3.1.1 Height – Building general.

Decision Reasons:

- Submitter is pleased that note was taken of objections to the proposed increase to 12m. However, 10m should not become a target and most buildings should remain single storey.

Point Number 825.29

Summary of Decision Requested: **Amend** Section C Rules to delete the Raglan navigation beacon rules from Zone rules to which they have no relevance.

Decision Reasons:

- Although the Raglan navigation beacons are only in Business Town Centre, Reserve and Residential Zones, this policy applies also to Business and Rural zones! Only policies relevant to zones should be included in their chapters. There is already too much repetition in the Plan, which makes it hard to comprehend.

Point Number 825.30

Summary of Decision Requested: **Add** a new clause (iv) to Policy 4.5.38 Artificial outdoor lighting as follows (or similar wording):

iv. Artificial outdoor lighting is installed and operated so that light spill does not contribute to pollution of the night sky.

Decision Reasons:

- Light pollution can cause adverse impacts to wildlife and migratory birds and disrupt their normal patterns of behaviour. Collectively our villages and towns contribute to the wider adverse impacts. All exterior lighting should have shields to force lighting towards the ground.
- While there are rules such as 6.2.3 relating to glare and artificial light spill that must not exceed 10 lux measured horizontally and vertically within any other site, there are no policies dealing with the adverse effects of night sky pollution. As there is a rush to LED use because of cost savings, LED lights need to be coated with phosphor that converts the blue light to yellow to avoid the adverse effects of blue light.

Point Number 825.31

Summary of Decision Requested: **Amend** the Proposed District Plan to require consents requiring exemption from plan rules to be automatically publicly notified, whether the rules are on genetically modified organisms or not.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- The submission raises concern regarding liability and potential cost to ratepayers as well as the implications under the Resource Management Act.
- Submission also raises concerns regarding harm to farmers, clean green image, irreversible impacts from GMO's, scientific uncertainty, lack of demand for GE food from main markets, transgenic pollution.
- Wants GE experiments and releases prohibited except in Ruakura.
- Conventional and organic reproductive crops must be protected and integrity of heritage seeds is critical.
- No mention is made of the hazards of genetically modified substances in the Proposed District Plan.
- GE poses risks to our environment, economy and public health.
-

Point Number 825.32

Summary of Decision Requested: **Amend** the earthworks rules for all zones that prescribe limits over a specified timeframe e.g. 12 month period to add limits to total development, consistent with maintaining the values of the site.

Decision Reasons:

- Incremental annual changes can amount to significant destruction of areas which should be protected.

Point Number 825.33

Summary of Decision Requested: **Amend** Rule 17.2.9 P2 Indigenous vegetation clearance inside a Significant Natural Area as follows:

Removing of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per single consecutive 12 month period per property for domestic firewood purposes or arts and craft, provided the removal will not directly result in the death, destruction or irreparable damage to any other tree, bush or plant.

Decision Reasons:

- Manuka/Kanuka are important environments and 3m3 is adequate for heating a well insulated house.

Point Number 825.34

Summary of Decision Requested: **Add** policies and rules to all zones for energy efficiency (refer to the original submission for details)

Decision Reasons:

- The Resource Management Act requires Council's to have regard to effects of climate change and benefits of renewable energy. The Proposed Waikato District Plan only makes passing reference to climate change and makes no mention of the drivers of climate change. There is also no commitment to solar and wind energy and micro-hydro reference has been removed.
- The submitter is disappointed on timing of Stage 2 and wants adequate considerations for energy and climate change and noted that the IPCC report came out 24 hours before close of submissions.

Point Number 825.35

Summary of Decision Requested: **Add** a new requirement to Rule 16.5.8.6 RD1(b)(iv) Living Court that windows and balconies overlooking adjacent outdoor spaces and living areas have been avoided so as to respect the amenity and comfort of neighbouring properties.

Decision Reasons:

- This follows Housing NZ's Simple Guide expectation that buildings and spaces should relate well to each other.

Point Number 825.36

Summary of Decision Requested: **Add** provision for new cycle/walkways to implement Council's Walking, Cycling and Bridle Trails Strategy, not only in major new developments. Submission makes reference to Policies 8.1.3 Esplanade reserves and walkways and Rule 16.5.3 Restricted Discretionary Activities.

Decision Reasons:

- 1.10.2.3 of the Proposed Waikato District Plan includes the Strategy as relevant, yet there is no timeframe for implementation of the Strategy. Without support from the District Plan it is unlikely that most of the Strategy will be achieved. The submission goes on further to quote the relevant sections of Policy 4.1.8. Refer to original submission for details.
- 4.1.10 Policy - Tuakau, 4.1.11 Policy - Pokeno, 4.1.12 Policy - Te Kauwhata, 4.1.14 Policy - Taupiri, 4.1.15 Policy - Ngaruawahia, 4.1.16 Policy - Horotiu and 4.1.17 Policy - Te Kowhai all mention walking and cycling provision, though leave the means and locations unclear.
- 4.1.18 Policy - Raglan is the only town policy not to mention cycling and walking, despite a May 2018 staff report to Council saying, "Raglan has the district's highest walking/cycling communities".
- The Proposed Waikato District Plan has a disproportionate amount of rules relating to roading and vehicles, compared to public transportation and cycling.
- On page 42 Raglan Naturally says, "There is strong public support for harbour and coastal walkways." and "Create coastal walkways, eg Raglan to Whale Bay, Whale Bay to Te Toto Gorge." This local support reflects national trends; time use surveys show walking as being ahead of all other active sports and pursuits. European surveys have similar results, so that environmental tourism, encouraging tourists to spend more time walking than driving, could be made a much more valuable asset, giving an economic, as well as health and recreation, impetus to the need to implement policies in recognition of the importance of walking and cycling as noted at

1.4.3.1. The lack of progress indicates that opportunities are not taken with subdivisions and that more detail needs to be included in the District Plan.

Point Number 825.37

Summary of Decision Requested: **Add** the following to the planning maps:

- The planned Wainui Rd to Te Hutewai Rd walk/cycle track.
- All the tracks shown on the Strategy maps and walkways through the residential zones linking Lorenzen Bay with Kaitoke Walkway, allowing a circular walk around Raglan.
- A cycle track from Wallis St to Violet St.
- A link to the national Te Araroa walkway using paper roads, etc (via Karioi, Bridal Veil).
- Walkways (and where possible cycleways) along the whole coast.
- A track from Raglan to the summit of Karioi using esplanades, reserves and unformed roads.
- A link along Wainui Stream from Wainui Reserve to Bryant Reserve.

Decision Reasons:

- 1.10.2.3 of the Proposed Waikato District Plan includes the Strategy as relevant, yet there is no timeframe for implementation of the Strategy. Without support from the District Plan it is unlikely that most of the Strategy will be achieved. The submission goes on further to quote the relevant sections of Policy 4.1.8. Refer to original submission for details.
- 4.1.10 Policy - Tuakau, 4.1.11 Policy - Pokeno, 4.1.12 Policy - Te Kauwhata, 4.1.14 Policy - Taupiri, 4.1.15 Policy - Ngaruawahia, 4.1.16 Policy - Horotiu and 4.1.17 Policy - Te Kowhai all mention walking and cycling provision, though leave the means and locations unclear.
- 4.1.18 Policy - Raglan is the only town policy not to mention cycling and walking, despite a May 2018 staff report to Council saying, "Raglan has the district's highest walking/cycling communities".
- The Proposed Waikato District Plan has a disproportionate amount of rules relating to roading and vehicles, compared to public transportation and cycling.
- On page 42 Raglan Naturally says, "There is strong public support for harbour and coastal walkways." and "Create coastal walkways, eg Raglan to Whale Bay, Whale Bay to Te Toto Gorge." This local support reflects national trends; time use surveys show walking as being ahead of all other active sports and pursuits. European surveys have similar results, so that environmental tourism, encouraging tourists to spend more time walking than driving, could be made a much more valuable asset, giving an economic, as well as health and recreation, impetus to the need to implement policies in recognition of the importance of walking and cycling as noted at 1.4.3.1. The lack of progress indicates that opportunities are not taken with subdivisions and that more detail needs to be included in the District Plan.

Point Number 825.38

Summary of Decision Requested: **Amend** the Proposed District Plan to require housing for the elderly is required in all new developments, not just Te Kauwhata (e.g. Policy 4.1.12(b)(i) Te Kauwhata).

Decision Reasons:

- Wants the former Lazarus village restored for use of the elderly and thinks that without protection, the only non-hospital housing for elderly people in Raglan will be permanently lost.
- Refers to Section 1.12.3 "A district which provides a wide variety of housing forms which reflect the demands of its ageing population".

Point Number 825.39

Summary of Decision Requested: **Add** a new chapter that provides the following:

- A resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social well-being considerations.
- Strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan, to ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- The submission raises concern regarding liability and potential cost to ratepayers as well as the implications under the Resource Management Act.
- Submission also raises concerns regarding harm to farmers, clean green image, irreversible impacts from GMO's, scientific uncertainty, lack of demand for GE food from main markets, transgenic pollution.
- Wants GE experiments and releases prohibited except in Ruakura.
- Conventional and organic reproductive crops must be protected and integrity of heritage seeds is critical.
- No mention is made of the hazards of genetically modified substances in the Proposed District Plan.
- GE poses risks to our environment, economy and public health.

Point Number 825.40

Summary of Decision Requested: **Undertake** a survey of notable trees

AND

Add the following trees in Raglan to Schedule 30.2 - Notable Trees;

- trees within 30m of the high water mark between Bow St jetty and Helen Pl
- trees adjacent to the airfield
- trees within 10m of Marine Parade
- trees between the recreation ground and Lily St
- trees on Wallis St at the foot of Government Rd
- trees in the gully between Rose St and Lily St
- trees to the south west of SH23 between Hills Rd and Greenslade Rd
- trees in the Lorenzen Bay reserve
- large trees should all be protected.

Decision Reasons:

- Schedule 30.2 clearly doesn't cover every notable tree, as there are only 160 listings for the whole District. Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.

Point Number 825.41
Summary of Decision Requested: Retain Policy 2.16.1 Whaanga Coast Specific Area
Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 825.42
Summary of Decision Requested: Retain Policy 2.16.2 Aahuatanga Motuhake (special features)
Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (Policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 825.43
Summary of Decision Requested: Retain Rule 22.1.2 Permitted Activities
Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (Policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 825.44
Summary of Decision Requested: Retain Section 22.7 Specific Area – Whaanga Coast Development Areas.
Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (Policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 825.45
Summary of Decision Requested: Add a rule to Section 16.3 Land Use - Building to the effect that:
(a) Construction of a building or other structure within sight of SH23 at Raglan is a permitted activity if it will be screened from SH23 by planting with indigenous species that will achieve an average height of 3m after 5 years, mature to over 9m in the residential zone and 12m in the Business Zone and be of sufficient density to visually screen the activity from SH23.
(b) Any activity that does not comply with a condition for a permitted activity is a discretionary activity.
Decision Reasons:

- The zone extensions have increased the extent of urban development along the main approach to Raglan. That could be mitigated by screening further development.

Point Number 825.46
Summary of Decision Requested: Add a rule to Section 17.3 Land Use - Building to the effect that:
(a) Construction of a building or other structure within sight of SH23 at Raglan is a permitted activity if it will be screened from SH23 by planting with indigenous species that will achieve an average height of 3m after 5 years, mature to over 9m in the residential zone and 12m in the business zone and be of sufficient density to visually screen the activity from SH23.
(b) Any activity that does not comply with a condition for a permitted activity is a discretionary activity.
Decision Reasons:

- The zone extensions have increased the extent of urban development along the main approach to Raglan. That could be mitigated by screening further development.

Point Number 825.47
Summary of Decision Requested: Amend Rule 17.3.5 Horotiu Acoustic Area, to also apply to the Raglan business zones.
Decision Reasons:

- The SH23 business zone is next to the Lorenzen Bay residential zone.

Point Number 825.48
Summary of Decision Requested: Amend the Proposed District Plan so that all resource consents for vegetation clearance are publicly notified, including informing adjoining authorities and the regional council. The submission makes reference to section 1.5.7 Natural Environment, Chapter 3 and Maps.
Decision Reasons:

- As per Section 1.5.7 which ensures Council will inform adjoining authorities and the regional council are informed of all resource consent applications received for vegetation clearance, this requirement should be extended to public notification of all such

applications.

Point Number 825.49

Summary of Decision Requested: **Add** to the planning maps areas such as Hauroto Bay and other sites of indigenous vegetation, as recorded in Estuarine vegetation survey - Raglan (Whaingaroa) Harbour.

Decision Reasons:

- No reasons provided.

Point Number 825.50

Summary of Decision Requested: **Retain** Chapter 22 Rural Zone

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 825.51

Summary of Decision Requested: **Retain** Rule 22.7.1.1 Permitted Activities

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 825.52

Summary of Decision Requested: **Add** areas of Significant Indigenous vegetation or habitat by use of LENZ and in consolidation with conservation and environment groups.

Decision Reasons:

- The 2005 Waikato District Council State of the Environment Report stated "Since 1992 the Waikato District experienced a of approximately 1,346ha (which could be as high as 1,508ha) of indigenous forest and 1,388ha (which could be as high as 1,706ha) of indigenous scrub."
- The 2013 report said, "There is evidence to indicate that over 50% of remaining indigenous cover is classified as threatened and much of this land is not legally protected." It also said an average of 2 consents for vegetation clearance are issued each year.
- The NZ Biodiversity Strategy (page 33) set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats (such as lowland forests and grasslands, wetlands and dune lands) have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored.

Submitter Number: 826 **Submitter:** Kym Holland

On behalf of: Friends of Kimihia Lake

Point Number 826.1

Summary of Decision Requested: **Reject** the name 'Kimihia Lakes Recreation and Events Park' for the proposed development of the former mine as it is a Huntly East Mines Development.

Decision Reasons:

- As a Friend of Kimihia Lake the submitter sees that adding an 's' onto their lake's name is not enough of a difference.
- Kimihia Lake already exists.
- This is a new development, so get a new name.
- The submitter is concerned about the documentation and submission using this name.
- You will start to normalise a name and then it becomes difficult to make a change.

Point Number 826.2

Summary of Decision Requested: **Avoid** discharge of water from the proposed Huntly East Mines Development into Kimihia Lake.

Decision Reasons:

- Water discharge is too important to just copy what was done 40-50 years ago.
- Surely we have come further than just relying on repeating what was done in the past without proving any impact to the current Kimihia Lake.
- The group has worked very hard to maintain current lake levels.
- The casual attitude to discharging water into Kimihia Lake from Huntly East Mines development would destroy our lake and the years of hard work we have done so far.

Point Number 826.3

Summary of Decision Requested: **Request** more information and assessment of major impacts before the change of zoning to ensure that development of the former Huntly East Mine is acceptable.

Decision Reasons:

- The proposal for development of the former Huntly East Mine, including rezoning and renaming, is based on inaccurate information.
- Major effects like water discharge are only part of the picture.

Submitter Number:	827	Submitter:	New Zealand Steel Holdings Ltd
Point Number	827.1		
Summary of Decision Requested:	No specific decision sought, but submission does not oppose section 3.2 Significant Natural Areas provided that the amendments are made to Policy 3.2.6 as sought below.		
Decision Reasons:	<ul style="list-style-type: none"> • There is a need to recognise the ironsand mining operations at Waikato North Head. 		
Point Number	827.2		
Summary of Decision Requested:	Add a clause (v) to Policy 3.2.6 Providing for vegetation clearance as follows (or words to similar effect): <i>(v) located in the Aggregate Extraction Area in Waikato North Head</i>		
Decision Reasons:	<ul style="list-style-type: none"> • The mining licence authorises all land use activities associated with ironsand mining operation at WNH. • No further authorisation is required under the Resource Management Act 1991, including for vegetation clearance. • Accordingly Policies 3.2.2 to 3.2.5 and 3.2.7 should not apply to the mine site and an exception should be included in Policy 3.2.6 		
Point Number	827.3		
Summary of Decision Requested:	Add a new clause to Rule 22.2.7 PI Indigenous vegetation clearance inside a Significant Natural Area as follows (or words to similar effects): <i>PI</i> <i>(a) Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) for the following purposes:</i> <i>(ia) Removing vegetation within the Aggregate Extraction Area at Waikato North Head;</i> <i>(i) Removing vegetation that endangers human life or existing buildings or structures;</i> ...		
Decision Reasons:	<ul style="list-style-type: none"> • The mining licence authorises all land use activities associated with ironsand mining operation at the mine. • No further authorisations are required under the Resource Management Act 1991, including for vegetation clearance. • An exception should be included in Rule 22.2.7 PI 		
Point Number	827.4		
Summary of Decision Requested:	Delete the Significant Natural Areas on the Waikato North Head site as shown on Figure 3, Appendix A of the submission including: <ul style="list-style-type: none"> • on the northern side of the site near Boundary Road. • running north-south along the western coastal edge of the site. • in the middle of the site. • surrounding the lagoon. 		
Decision Reasons:	<ul style="list-style-type: none"> • The Significant Natural Areas have been applied in this instance to a highly modified areas. which will continue to be mined. • Seeks clarification on how these sites were identified as this is potentially misleading. • Regardless if the Significant Natural Area is correctly identified, the mining license authorises all land uses in relation to the Waikato North Head Mining site and therefore the Proposed District Plan should recognise that the Significant Natural Areas protections do not apply. • Inappropriate to set such an expectation. 		
Point Number	827.5		
Summary of Decision Requested:	Amend the extent of the Aggregate Extraction Area on the planning maps (and the Maiora Mining Zone if the relief is accepted) to ensure that the entire Waikato North Head site, including Sec 1 SO 40757, Allot 98 Parish of Waiuku West and Sec 2 SO 40757, the recycle ponds, water intake lagoon and adjacent area as sought in Figure 1, Appendix A within the submission. AND Any other further or consequential amendments required.		
Decision Reasons:	<ul style="list-style-type: none"> • All parts of the Waikato North Head mine should be subject to the same zone, overlay and rule framework to ensure they are addressed in a consistent manner. • There are some parts of the mine activity that are located outside the mining licence area, this includes the lagoon. • The lagoon is a man-made structure and does not appear to be formally zoned. 		
Point Number	827.6		
Summary of Decision Requested:	Amend rules relating to the Coastal Environment overlay to ensure they do not apply to the Waikato North Head mine site. AND Any other further or consequential amendments required.		
Decision Reasons:	<ul style="list-style-type: none"> • Considers that the mine site is sufficiently unique that it warrants specific treatment through the application of a mining zone. • This would override any rules associated with the Coastal Environment overlay. • That approach is justified given the status of the mining licence. 		
Point Number	827.7		
Summary of Decision Requested:	Retain the Aggregate Extraction Area overlay (or Mineral Extraction Area)		

Decision Reasons:

- The submitter supports the retention of the overlay as a tool to manage reverse sensitivity issues.

Point Number 827.8

Summary of Decision Requested: **Retain** the Significant Amenity Landscapes overlay mapping in relation to the Waikato North Head mine site.

Decision Reasons:

- There are no significant amenity landscapes identified on the mine site.

Point Number 827.9

Summary of Decision Requested: **Retain** the Natural Character overlay mapping in relation to the Waikato North Head mine site.

Decision Reasons:

- There are no high or outstanding natural character areas identified on the Waikato North Head site.

Point Number 827.10

Summary of Decision Requested: **Amend** the provisions to clarify that the Natural Character overlay includes both high and outstanding natural character areas.

AND

Any other further or consequential amendments required.

Decision Reasons:

- There are no high outstanding natural character areas identified on the mine site.

Point Number 827.11

Summary of Decision Requested: **Retain** Objective 6.1.1 Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.12

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.13

Summary of Decision Requested: **Retain** Policy 6.1.3 Technological advances as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.14

Summary of Decision Requested: **Retain** Policy 6.1.4 Infrastructure benefits as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.15

Summary of Decision Requested: **Retain** Policy 6.1.5 Natural hazards and climate change as notified

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.16

Summary of Decision Requested: **Retain** Policy 6.1.6 Reverse sensitivity as notified

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.17

Summary of Decision Requested: Retain Policy 6.1.7 Reverse sensitivity and infrastructure as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.18

Summary of Decision Requested: Retain Objective 6.1.8 infrastructure in the community and identified areas as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.19

Summary of Decision Requested: Amend Policy 6.1.9 Environmental effects, community health, safety and amenity as follows (or words to similar effect):

Require the development, operation, maintenance, repair, replacement, upgrading and removal of infrastructure and its associated structures to avoid, remedy or mitigate adverse effects on the environment, community health, safety and amenity in a manner that corresponds to the scale and significance of effects.

AND

Any other further or consequential amendments required.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.20

Summary of Decision Requested: Retain Policy 6.1.10 Infrastructure in identified areas as notified.

Decision Reasons:

- Supports the inclusion of specific provisions that provide for, recognise and enable infrastructure, which is considered to cover the water supply system for the mining site and the pump station at Allcock Road and which should include the slurry pipeline infrastructure.

Point Number 827.21

Summary of Decision Requested: Amend Chapter 14: Infrastructure and Energy by moving the permitted activity contained in General Infrastructure (Rule 14.3.1 PI The operation, maintenance, repair and removal of existing infrastructure) to Rule 14.2 applying to all infrastructure.

AND

Any other further or consequential amendments required.

Decision Reasons:

- Considers that the rules in section 14 are generally appropriate, however amendments are required to provide certainty for existing infrastructure, particularly infrastructure that is subject to identified areas.
- The provisions for maintenance, repair, replacement, upgrading or removal of existing infrastructure are duplicated and should be streamlined for clarity.

Point Number 827.22

Summary of Decision Requested: Retain Objective 10.1.1 Effects of hazardous substances as notified.

Decision Reasons:

- Support these provisions.

Point Number 827.23

Summary of Decision Requested: Retain Policy 10.1.2 Location of new hazardous facilities as notified.

Decision Reasons:

- Supports these provisions

Point Number 827.24

Summary of Decision Requested: Retain Policy 10.1.3 Residual risks of hazardous substances as notified.

Decision Reasons:

- Supports these provisions.

Point Number	827.25
Summary of Decision Requested:	Retain Policy 10.1.4 Reverse sensitivity effects as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Supports these provisions.
Point Number	827.26
Summary of Decision Requested:	Delete Rule 12.3 Additional Matters of Control, Matters of Discretion and Matters for Discretionary and Non-Complying Activities
Decision Reasons:	<ul style="list-style-type: none"> • Additional matters of control or discretion are extremely broad, many of them unnecessary as they duplicate Council's powers under the RMA. • Some effectively extend Council's control or discretion to a level anticipated as part of a discretionary or non-complying activity.
Point Number	827.27
Summary of Decision Requested:	Add a new clause (m) to the definition of 'Infrastructure'in Chapter 13 Definitions as follows (or word to similar effect): <u>m. Material slurry pipelines and associated facilities including pump stations are considered to be infrastructure.</u>
Decision Reasons:	<ul style="list-style-type: none"> • The district-wide rules relating to infrastructure should also apply to the material slurry pipelines. • It is noted that the approach of specifically recognising important regional infrastructure within the definition of infrastructure in order to meet objectives and policies. • The slurry pipeline and slurry pump station are similar in nature to other infrastructure. • It fits within "any other means" in clause (g).
Point Number	827.28
Summary of Decision Requested:	Delete the definition of "Aggregate Extraction Activities" in Chapter 13 Definitions AND Amend the Proposed District Plan to replace references to "Aggregate Extraction Activities" with "Extractive Activities." AND Any other further or consequential amendments required.
Decision Reasons:	<ul style="list-style-type: none"> • 'Mineral extraction and processing', 'Aggregate Extraction Activities' and 'Extractive Industry' are all defined in the Proposed District Plan. There is overlap between the terms and creates potential for confusion and inconsistency. • Definitions need to be streamlined. • There is no clear reasons for distinguishing between aggregate and mineral extraction activities and therefore it is considered that it is more efficient to regulate and assess those activities jointly.
Point Number	827.29
Summary of Decision Requested:	Delete the definition of "Mineral extraction and processing" in Chapter 13 Definitions AND Amend the Proposed District Plan to replace references of "Mineral extraction and processing" with "Extractive Activity." AND Any other further or consequential amendments required.
Decision Reasons:	<ul style="list-style-type: none"> • 'Mineral extraction and processing', 'Aggregate Extraction Activities' and 'Extractive Industry' are all defined in the Proposed District Plan. There is overlap between the terms and creates potential for confusion and inconsistency. • Definitions need to be streamlined. • There is no clear reasons for distinguishing between aggregate and mineral extraction activities and therefore it is considered that it is more efficient to regulate and assess those activities jointly.
Point Number	827.30
Summary of Decision Requested:	Amend the Proposed District Plan to rename the 'Aggregate Extraction Area" to 'Mineral Extraction Area.' AND Any other further or consequential amendments required.
Decision Reasons:	<ul style="list-style-type: none"> • Enable consistency and clarity
Point Number	827.31
Summary of Decision Requested:	Amend the definition of "Mineral" in Chapter 13: Definitions to cross-reference the Crown Minerals Act 1991. AND Any other further or consequential amendments required.
Decision Reasons:	<ul style="list-style-type: none"> • Coal Mining Area is separately defined and includes reference to the Crown Minerals Act 1991. This approach is supported and therefore it is proposed that the definition of minerals should cross reference the Crown Minerals Act 1991.
Point Number	827.32

Summary of Decision Requested: Amend the zoning of the Waikato North Head mine from Rural Zone to a new zone titled "Maioiro Mining Zone" (see submission for extent of the new zone);

AND

Retain the Aggregate Extraction Area overlay for Waikato North Head mine site;

OR

Retain the Rural Zoning of the Waikato North Head mining site;

AND

Add appropriate objectives, policies and rules in Chapter 5 Rural Environment and Chapter 22 Rural Zone;

AND

Add appropriate objectives, policies and rules in Chapter 5 Rural Environment and Chapter 22 Rural Zone.

Decision Reasons:

- New Zealand Steel considers that the Waikato North Head Mine is unique and requires its own specific mining zone.
- This approach recognises the long-standing existing nature of the Waikato North Head mine site.
- Consistent with the Operative Waikato District Plan provisions, which identify the mine site as a "Maioiro mining Zone" and provide for specific permitted activities.
- It is important to recognise the contribution the Waikato North Head mine makes to the social and economic wellbeing of the district.
- The Proposed District Plan already contains a number of 'other' special zones
- There is little efficiency gained by addressing the mine site within the Rural Zone because specific objectives, policies and rules for New Zealand Steel's activities will still be required.

Point Number 827.33

Summary of Decision Requested: Amend the planning maps to rezone the North Head mine site as the Maioiro Mining Zone

AND

Add provisions for a 'Maioiro Mining Zone' within Chapter 9: Specific Zones as follows (or words to similar effect):

Maioiro Mining Zone

Objective

(1) The iron sand resource at Waikato North Head is effectively and efficiently utilised.

Policies

(1) Provide for iron sand mining and associated activities at Waikato North Head.

(2) Avoid, remedy or mitigate any significant adverse effects associated with activities that require resource consent under the Waikato District Plan.

AND

Add a new chapter for Maioiro Mining Zone within Section C Rules (see submission for specific details).

AND

Any other further or consequential amendments required.

Decision Reasons:

- New Zealand Steel considers that the Waikato North Head Mine is unique and requires its own specific mining zone.
- This approach recognises the long-standing existing nature of the Waikato North Head mine site.
- Consistent with the Operative Waikato District Plan provisions, which identify the mine site as a "Maioiro mining Zone" and provide for specific permitted activities.
- Important to recognise the contribution the Waikato North Head mine makes to the social and economic wellbeing of the district.
- The Proposed District Plan already contains a number of 'other' special zones
- There is little efficiency gained by addressing the mine site within the Rural Zone because specific objectives, policies and rules for New Zealand Steel's activities will still be required.

Point Number 827.34

Summary of Decision Requested: Add provisions within Chapter 5: Rural Environment as follows (or words to similar effect), if the Waikato North Head mine sites retains a Rural Zone

Objective

(1) The iron sand resource at Waikato North Head is effectively and efficiently utilised.

Policies

(1) Provide for iron sand mining and associated activities at the Aggregate Extraction Area identified at Waikato North Head.

(2) Avoid, remedy or mitigate any significant adverse effects associated with activities at the Aggregate Extraction Area identified at Waikato North Head that require resource consent under the Waikato District Plan.

AND

Add rules to Chapter 22 Rural Zone to enable specified activities within the Aggregate Extraction Area at Waikato North Head to be a permitted activity (see submission for specific details).

AND

Any other further or consequential amendments required.

Decision Reasons:

- Alternative to the specific zone, New Zealand Steel proposes to amend the applicable provisions within the Rural Zone.
- The Aggregate Extraction Area overlay may be amended to be made appropriate to the Waikato North Head site with update provisions which recognise the existing activities and the extent of future authorised activities, along with providing for reverse sensitivity issues adjacent to the site.
- The Proposed District Plan currently contains no specific rules which relate to mining activities within the Aggregate Extraction area, and therefore it is unclear how the Rural Zone rules apply.
- Given the context of the site, the submitter considers the Rural Zone permitted activity conditions are inappropriate, including those relating to earthworks and building height and therefore specific rules relating to the Aggregate Extraction Area would be more appropriate.

Point Number 827.35

Summary of Decision Requested: Amend Policy 5.3.7 Reverse sensitivity effects as follows (or words to similar effect):

(a) Recognise the following features are typical of the rural environment and the effects are accepted and able to be managed:

...

(iii) ~~Existing~~ Mineral extraction and processing activities;

...

(c) Mitigate the adverse effects of reverse sensitivity through the use of setbacks and design of subdivisions and development.

(cc) Avoid locating sensitive activities in a buffer area adjoining an Aggregate Extraction Area, unless those sensitive activities can avoid compromising existing and future mineral extraction...

...

OR

Add a comparable policy regarding reverse sensitivity in the event that a specific Maoro Mining Zone is introduced.

AND

Any other further or consequential amendments required.

Decision Reasons:

- New Zealand Steel wishes to see provisions to effectively manage potential reverse sensitivity effects on the mine site.
- The mine is important to the social and economic wellbeing of the district and wider New Zealand.
- The Proposed District Plan should manage sensitive land uses within the vicinity of the mine site.
- Supports the inclusion of mineral extraction and processing activities in relation to reverse sensitivity.
- Seeks to address sensitive land use in the buffer area adjacent to the Aggregate Extraction Areas.

Point Number

827.36

Summary of Decision Requested:

Add a new discretionary activity rule within Section 16.4 Subdivision as follows (or words to similar effect):

D1 Subdivision of land within 200m of an Aggregate Extraction Area.

AND

Any other further or consequential amendments required.

Decision Reasons:

- The intent of the Aggregate Extraction Area is to identify existing extractive industries, and manage reverse sensitivity issues.
- The subdivision rules apply only to the Aggregate Extraction Area and not to the 200m buffer area adjacent to that.
- The application of the Aggregate Extraction Area is not consistent with its intent.
- Seeks the same buffer area as that applied to the building setback for sensitive land use.

Point Number

827.37

Summary of Decision Requested:

Retain Rule 22.3.7.2(iv) and (v) Building setback sensitive land use

Decision Reasons:

- Effectively manages potential reverse sensitivity effects on the site.
- New Zealand Steel activities are important to the social and economic wellbeing of the district.
- Considers that this rule appropriately manages the establishment of buildings for sensitive land uses in the vicinity of an Aggregate Extraction Area.

Point Number

827.38

Summary of Decision Requested:

Retain the references to mineral resources and extraction as a productive rural activity in Section 1.4.3 The Rural environment, particularly Section 1.4.3.1 Rural activities and Section 1.4.3.2 Protecting the rural environment.

Decision Reasons:

- The extraction of mineral resources is a productive rural activity and existing extractive activities contribute to the wellbeing of the district.
- These activities cannot be located within urban setting or where it will become vulnerable to reverse sensitivity issues.

Point Number

827.39

Summary of Decision Requested:

Add a new section within Chapter 1.5 What does this mean for the Waikato district strategic objectives and directions as follows (or words to similar effect):

Mineral extraction

Waikato District contains a number of established extractive industries, including sand mining and coal mining, along with areas where extraction of mineral resources may, potentially occur in the future. These activities are important to the economic wellbeing of the district, and should be effectively and efficiently utilised in a sustainable manner. These activities are commonly located in rural areas where reverse sensitivity can be an issue, for established extractive industries.

AND

Any other further or consequential amendments required.

Decision Reasons:

- The extraction of mineral resources is a productive rural activity and existing extractive activities contribute to the wellbeing of the district.
- These activities cannot be located within urban setting or where it will become vulnerable to reverse sensitivity issues.
- Productive rural activities, and mineral extraction in particular, need to be addressed in the strategic objectives and directions.

Point Number

827.40

Summary of Decision Requested:

Amend Section 1.12.8 Strategic objectives as follows (or words to similar effect):

(a) The matters set out in paragraphs 1.4.1.1 - 1.4.1.4 provide the overarching...

(vi) Supporting productive rural activities, including mineral extraction...

AND

Any other further or consequential amendments required.

Decision Reasons:

- The extraction of mineral resources is a productive rural activity and existing extractive activities contribute to the wellbeing of the district.
- These activities cannot be located within urban setting or where it will become vulnerable to reverse sensitivity issues.
- Productive rural activities, and mineral extraction in particular, need to be addressed in the strategic objectives and directions.

Point Number 827.41

Summary of Decision Requested: **Amend** Objective 5.1.1(a)(ii) The rural environments as follows (or words to similar effect):

(ii) productive rural activities and other activities including mineral extraction are supported...

AND

Any other further or consequential amendments required.

Decision Reasons:

- The extraction of mineral resources is a productive rural activity and existing extractive activities contribute to the wellbeing of the district.
- These activities cannot be located within urban setting or where it will become vulnerable to reverse sensitivity issues.
- Productive rural activities, and mineral extraction in particular, need to be addressed in the strategic objectives and directions.

Point Number 827.42

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, subject to the amendments to Policy 5.3.2 as sought below.

Decision Reasons:

- The phrase "rural character and amenity" could mean different things to different people.

Point Number 827.43

Summary of Decision Requested: **Add** a new clause (iv) to Policy 5.3.2(a) Productive rural activities as follows:

(a) Recognise and protect the continued operation of the rural environment as a productive working environment by:

...

(iv) Recognising other productive activities that are located in the rural environment, including mineral extraction activities.

Decision Reasons:

- The extraction of mineral resources is a productive rural activity which contributes to the wellbeing of the district.
- This activity should be acknowledged and provided for.

Point Number 827.44

Summary of Decision Requested: **Amend** Policy 5.3.3(b) Industrial and commercial activities as follows (or words to similar effect):

(b) Avoid locating industrial and commercial activities in rural areas that do not have a genuine functional connection with the rural land or soil resource or other resources (such as minerals).

AND

Any other further or consequential amendments required.

Decision Reasons:

- This policy should recognise that other resources that create a locational requirement.
- Supports the ability to locate industrial and commercial activities in rural areas where there is a genuine functional requirement to do so.

Point Number 827.45

Summary of Decision Requested: **Add** a clause (iv) to Policy 5.3.5 (a) Earthworks activities as follows (or words to similar effects):

(iv) Earthworks associated with mineral extraction activities.

Decision Reasons:

- The extraction of mineral resources is a productive rural activity, and there is a need to provide for earthworks with those extraction activities within the rural environment.

Point Number 827.46

Summary of Decision Requested: **Delete** Policy 5.3.9 Non-rural activities

Decision Reasons:

- The strategic direction in section 1.4.3.1 refers to productive rural; activities including horse breeding/training, mining and forestry, however this provision suggested that its listed activities are not rural activities.
- There are a wide range of rural activities with varying effects to the district plan should be consistent in its recognition that all such activities are part of the character of the rural environment.

Point Number 827.47

Summary of Decision Requested: **Retain** Policy 5.3.15 Noise and vibration as notified.

Decision Reasons:

- Supports the policy direction to minimise the adverse effects of noise and vibration through maintaining buffers (iii) and managing the location of sensitive land uses (v).
- This policy is consistent with the Aggregate Extraction Area Overlay provisions.

Point Number 827.48

Summary of Decision Requested: **Amend** Objective 5.4.1 Minerals and extractive industries as follows (or words to similar effect):

(a) Mineral resource use provides economic and social and environmental benefits to the district.

AND

Any other further or consequential amendments required.

Decision Reasons:

- Unclear how mineral resource use can be required to provide environmental benefits.
- The use of 'environmental benefits' incorrectly implies that the environment is limited to the natural environment and does not include social and economic elements.
- Supports acknowledgement of the benefits of mineral use to the district.

Point Number 827.49

Summary of Decision Requested: Amend Policy 5.4.2 Access to minerals and extractive industries as follows (or words to similar effect):

(aa) Provide for existing extractive industries.

(a) Enable new extractive industries provided that ...

...

(d) Avoid the location of any sensitive land use within specified buffer areas adjoining existing extractive industries, which otherwise risks the effective operation of a lawfully established extractive industry.

AND

Any other further or consequential amendments required.

Decision Reasons:

- Needs to specifically recognise existing extractive industries, such as the mine site and to clarify the meaning of "specified buffer area".

Point Number 827.50

Summary of Decision Requested: Delete the definition of "Extractive Industry" in Chapter 13 and replace it with the following (or words to similar effect):

Extractive Activity;

Means taking, winning or extracting by whatever means, the naturally-occurring minerals (including but not limited to coal, rock, sand and gravel) and peat from under or on the land surface. The term includes:

- processing by such means as screening, crushing, or chemical separation of minerals at or near the site where the minerals have been taken, won or excavated.
- removal, stockpiling and filling of overburden sourced from the same site.
- all activities and structures associated with underground coal gasification, including pilot and commercial plants and the distribution of gas.
- excavation, blasting, processing (crushing, washing and blending),
- ancillary earthworks.
- storage, management and disposal of tailings.
- the storage, distribution and sale of aggregates by wholesale to industry or by retail.
- the storage, distribution and sale of mineral products.
- treatment of stormwater and wastewater.
- landscaping and rehabilitation works including cleanfilling.
- ancillary buildings and structures.
- residential accommodation necessary for security purposes.

The term excludes prospecting and exploration activities.

AND

Any other further or consequential amendments required.

Decision Reasons:

- 'Mineral extraction and processing', 'Aggregate Extraction Activities' and 'Extractive Industry' are all defined in the Proposed District Plan. There is overlap between the terms and creates potential for confusion and inconsistency.
- Definitions need to be streamlined.
- There is no clear reasons for distinguishing between aggregate and mineral extraction activities and therefore it is considered that it is more efficient to regulate and assess those activities jointly.

Point Number 827.51

Summary of Decision Requested: Delete the definition of the overlays from Chapter 13 Definitions

Decision Reasons:

- Overlays are contained in the maps and their purpose should be described in the body of the plan.
- The definitions are self-explanatory and do not need to be included in definitions.

Point Number 827.52

Summary of Decision Requested: Add a new discretionary activity rule within Section 22.4 Subdivision as follows:

DI Subdivision of land within 200m of an Aggregate Extraction Area

AND

Any other further or consequential amendments required.

Decision Reasons:

- The intent of the Aggregate Extraction Area is to identify existing extractive industries, and manage reverse sensitivity issues.
- The subdivision rules apply only to the Aggregate Extraction Area and not to the 200m buffer area adjacent to that.
- The application of the Aggregate Extraction Area is not consistent with its intent.
- Seeks the same buffer area as that applied to the Building setback for sensitive land use.

Submitter Number: 828

Submitter: Linda Young

On behalf of: 2621 and 2619 River Road, RD1 Hamilton 3281

Point Number 828.1

Summary of Decision Requested: Amend the zoning of the properties at 2621 and 2619 River Road, Ngaruawahia from Rural Zone to Village Zone.

Decision Reasons:

- The suggested reserve lot significantly devalues our property
- We are not opposed to the walkway going through, but feel as it stands we significantly lose out financially and we also lose a significant portion of our property.
- The reserve lot will allow access right onto the garden and house which in turn is unsafe if this development were to go through.
- Village Zone would enable subdivision and potentially enable building or purchase elsewhere.
- If the council were to change it to Village zone and compensate for the loss of value to the land and home of 2621 River Road, we would be happy to support this plan.

Submitter Number: 829 **Submitter:** Whenua Holdings Waikato Limited

Point Number 829.1

Summary of Decision Requested: **Retain** Rules 16.1.2 P1 Residential activity, as notified.
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of these activities in the Residential Zone as a permitted activity subject to meeting all the relevant standards.

Point Number 829.2

Summary of Decision Requested: **Retain** the activities set out under Rule 16.4.1 Subdivision - General;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of these activities in the Residential Zone - Subdivision as a permitted activity subject to meeting all the relevant Residential Zone effect, building and infrastructure conditions.

Point Number 829.3

Summary of Decision Requested: **Retain** the proposed structure and approach of Chapter 20 Industrial Zone;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- An Industrial Zone is proposed for the Wallbank Road property where a SIP home manufacturing and fabricating factory will be constructed.
- The submitter supports the activity-based structure for the Industrial Zone chapter.

Point Number 829.4

Summary of Decision Requested: **Amend** zoning of the properties at 42 and 76C Fox Road, and 5167C Great South Road, Ngaruawahia from Rural Zone to Residential Zone;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The proposed Whenua Holdings Waikato Limited development will meet the immediate residential needs of the district.
- The proposed development aligns with the aspiration of the Future Proof Settlement Strategy.
- The proposed areas for rezoning in the Proposed District Plan are within the preferred settlement pattern for growth.
- Proposes to develop new residential subdivisions adjacent to existing residential zoned areas where servicing can or is already provided.
- Enable the proposed residential development.

Point Number 829.5

Summary of Decision Requested: **Amend** the zoning of the property at Wallbank Road, Ngaruawahia (Property number 1005161) from Rural Zone to Industrial Zone;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The proposed Whenua Holdings Waikato Limited development aligns with the Governments Urban Development Capacity strategy that requires local authorities in high population growth areas such as the areas in and around Hamilton to provide sufficient development capacity to meet residential and business demand in the short to long term.
- Enable the proposed industrial/business hub development.

Point Number 829.6

Summary of Decision Requested: **Retain** Rule 16.1.2 P2 A Marae Complex or Papakainga Housing Development on Maaori Freehold Land or on Maaori Customary Land, as notified;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of these activities in the Residential Zone as a permitted activity subject to meeting all the relevant standards.

Point Number 829.7

Summary of Decision Requested: **Retain** Rule 16.1.2 P3 A new retirement village or alterations to an existing retirement village, as notified;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of these activities in the Residential Zone as a permitted activity subject to meeting all the relevant standards.

Point Number 829.8

Summary of Decision Requested: **Amend** zoning of the property at 134 Duke Street, Ngaruawahia from Rural Zone to Residential Zone;
AND
Amend the Proposed District Plan to make any consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The proposed Whenua Holdings Waikato Limited development will meet the immediate residential needs of the district.
- The proposed development aligns with the aspiration of the Future Proof Settlement Strategy.
- The proposed areas for rezoning in the Proposed District Plan are within the preferred settlement pattern for growth.
- Proposes to develop new residential subdivisions adjacent to existing residential zoned areas where servicing can or is already provided.
- Enable the proposed residential development.

Submitter Number: 830 **Submitter:** Linda Silvester

Point Number 830.1

Summary of Decision Requested: **Amend** all Earthworks rules that prescribe a time period such as within a consecutive 12 month period to add limits to the total development consistent with maintaining the values of the site.

Decision Reasons:

- Incremental annual changes can amount to significant destruction of areas which should be protected.

Point Number 830.2

Summary of Decision Requested: **Amend** Rule 17.2.9 P2 Indigenous vegetation clearance inside a Significant Natural Area as follows:
Removing up to 52m2 of Manuka and/or kanuka outside of the Coastal Environment per single...

Decision Reasons:

- Manuka and kanuka are important environments and 3m3 should be adequate for heating well insulated homes.

Point Number 830.3

Summary of Decision Requested: **Add** a new provision in Rule 16.5.8.6 RD1(b)(iv) Living court to require that windows and balconies overlooking adjacent outdoor spaces and living areas have been avoided so as to respect the amenity and comfort of neighbouring properties.

Decision Reasons:

- This follows Housing New Zealand's Simple Guide expectation that buildings and spaces should relate well to each other.

Point Number 830.4

Summary of Decision Requested: **Add** provisions in Policy 8.1.3 Esplanade reserves and walkways that will give effect to the Waikato District Council's Walking, Cycling and Bridle Trails Strategy to create links within existing and new developments.

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognises the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.
- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 830.5

Summary of Decision Requested: **Amend** the Proposed District Plan to require housing for the elderly to be included in all new developments throughout the district and not restricted to Te Kauwhata.

Decision Reasons:

- The former Lazarus village is on fairly level ground, close to Raglan's main facilities. It is therefore better suited to house Raglan's above average elderly population than most sites in the town and should be restored to that use.
- Without protection, it is likely that the only non-hospital housing for elderly people in Raglan will be permanently lost.
- Need to achieve Section 1.12.3 of the Plan.

Point Number 830.6

Summary of Decision Requested: **Add** A resource management framework for the management of Genetically Modified Organisms that is regionally specific and takes into account environmental, economic and social wellbeing.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- As central government has failed to put in place a strict liability regime for GMOs, liability for clean-ups, removal and elimination of escaped GE organisms, could lie with ratepayers.
- The Law Commission said "It is possible that environmental damage caused by GMOs could be dealt with under the RMA." The duty in itself is not enforceable, but in Part XII of the RMA there are powers to issue an abatement.
- The continuing use of Genetic Engineering will also harm other farmers through tarnishing our clean green image and could potentially bring an end to conventional farming. Organic farmers will be affected more by the image loss.
- There should be no further development and field testing of transgenic organisms envisaged for agriculture, horticulture and forestry in the district.

Point Number 830.7

Summary of Decision Requested: **Amend** Schedule 30.2 Notable Trees by undertaking a survey of notable trees.

AND

Add the following trees within Raglan to Schedule 30.2 Notable Trees:

- trees within 30m of the high water mark between Bow Street jetty and Helen Place
- trees adjacent to the airfield
- trees within 10m of Marine Parade
- trees between the recreation ground and Lily Street
- trees on Wallis Street at the foot of Government Road
- trees in the gully between Rose Street and Lily Street
- trees to the south west of State Highway 23 between Hills Road and Greenslade Road
- trees in the Lorenzen Bay reserve

Decision Reasons:

- No reasons provided

Point Number 830.8

Summary of Decision Requested: **Add** new provisions to Chapter 16 Residential Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.9

Summary of Decision Requested: **Add** new provisions to Chapter 17 Business Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.10

Summary of Decision Requested: **Add** new provisions to Chapter 18 Business Town Centre Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.11

Summary of Decision Requested: **Add** new provisions to Chapter 19 Business Zone Tamahere to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.12

Summary of Decision Requested: **Add** new provisions to Chapter 20 Industrial Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.13

Summary of Decision Requested: Add new provisions to Chapter 21 Industrial Zone Heavy to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.14

Summary of Decision Requested: Add new provisions to Chapter 27 Te Kowhai Airpark Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.15

Summary of Decision Requested: Add new provisions to Chapter 28 Rangitahi Peninsula Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.16

Summary of Decision Requested: Add provisions in Rule 16.5.3 to Restricted Discretionary Activities that will give effect to the Waikato District Council's Walking, Cycling and Bridle Trails Strategy to create links within existing and new developments.

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognises the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.
- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 830.17

Summary of Decision Requested: Add a Walkway/Cycle way/Bridle way trail on the maps to indicate the planned track from Wainui Road to Te Hutewai.

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognises the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.
- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 830.18

Summary of Decision Requested: Add all the tracks shown in the Waikato District Council's Walking, Cycling and Bridle Trails Strategy

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognises the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.

- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 830.19

Summary of Decision Requested: **Add** strong precautionary and prohibitive provisions relating to Genetically Modified Organisms that are the same or similar to those in the Far North District Plan, Whangarei District Plan and Auckland Unitary Plan

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- As central government has failed to put in place a strict liability regime for GMOs, liability for clean-ups, removal and elimination of escaped GE organisms, could lie with ratepayers.
- The Law Commission said "It is possible that environmental damage caused by GMOs could be dealt with under the RMA." The duty in itself is not enforceable, but in Part XII of the RMA there are powers to issue an abatement.
- The continuing use of Genetic Engineering will also harm other farmers through tarnishing our clean green image and could potentially bring an end to conventional farming. Organic farmers will be affected more by the image loss.
- There should be no further development and field testing of transgenic organisms envisaged for agriculture, horticulture and forestry in the district.

Point Number 830.20

Summary of Decision Requested: **Amend** the Proposed District Plan to require public notification of resource consent applications, regardless of whether the rules are Genetically Modified Organisms or any other matter.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- As central government has failed to put in place a strict liability regime for GMOs, liability for clean-ups, removal and elimination of escaped GE organisms, could lie with ratepayers.
- The Law Commission said "It is possible that environmental damage caused by GMOs could be dealt with under the RMA." The duty in itself is not enforceable, but in Part XII of the RMA there are powers to issue an abatement.
- The continuing use of Genetic Engineering will also harm other farmers through tarnishing our clean green image and could potentially bring an end to conventional farming. Organic farmers will be affected more by the image loss.
- There should be no further development and field testing of transgenic organisms envisaged for agriculture, horticulture and forestry in the district.

Point Number 830.21

Summary of Decision Requested: **Add** new provisions to Chapter 22 Rural Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.22

Summary of Decision Requested: **Add** new provisions to Chapter 23 Country Living Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.23

Summary of Decision Requested: **Add** new provisions to Chapter 24 Village Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.24

Summary of Decision Requested: **Add** new provisions to Chapter 25 Reserve Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Point Number 830.25

Summary of Decision Requested: **Add** new provisions to Chapter 26 Hampton Downs Motor Sport and Recreation Zone to include energy efficiency policies and rules (see submission for wording)

Decision Reasons:

- The Proposed District Plan only makes passing reference to climate change and says nothing about coal, gas and oil's effect on global warming.
- It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and that it is not possible to consider it in context with this part of the Plan.
- Section 1.9.5 reflects the Resource Management Act requirements around climate change and renewable energy.

Submitter Number: 831 **Submitter:** Gabrielle Parson
On behalf of: Raglan Naturally

Point Number 831.1
Summary of Decision Requested: **Add** areas of significant indigenous vegetation or habitat and rules in consultation with LENZ and environmental groups.
Decision Reasons:

- The 2013 Waikato District Council Statement of the Environment report said "there is evidence to indicate that over 50 per cent of remaining indigenous cover is classified as threatened and much of this land is not legally protected."
- The New Zealand Biodiversity Strategy set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 831.2
Summary of Decision Requested: **Amend** all earthworks rules that prescribe limits over a time frame (e.g. within a single consecutive 12 month period) by removing the phrase or reference to "consecutive 12 month period" and replace with a total development limit consistent with maintaining the value of the sites.
Decision Reasons:

- Incremental annual changes can amount to significant destruction of areas which should be protected, including sand dunes, which the Whaingaroa Beachcare group have been attempting to protect.

Point Number 831.3
Summary of Decision Requested: **Amend** Rule 17.2.9 P2 Indigenous vegetation clearance inside a Significant Natural Area as follows:
Removing of up to ~~5~~3m³ of manuka and/or kanuka ~~outside of the Coastal Environment~~ per ...

Decision Reasons:

- Manuka and kanuka are important environments and 3m³ should be adequate for heating well insulated homes.

Point Number 831.4
Summary of Decision Requested: **Add** a new chapter which addresses designing buildings and communities for disabled persons.

Decision Reasons:

- Disabilities are only mentioned twice in the Plan and then only in relation to definitions of retirement homes.
- The Ministry of Health defined 24% of people as disabled.
- The Proposed District Plan should raise awareness of disability in the design or buildings and in planning.
- Most buildings, footpaths etc are not designed for ease of use by disabled persons.

Point Number 831.5
Summary of Decision Requested: **Add** a new chapter to address the need for recycling centres in rural locations that achieve appropriate screening and vehicle access standards.

Decision Reasons:

- Rubbish dumping and areas for recycling are hardly mentioned in the Proposed District Plan.
- The locations of these have been controversial and criteria should be set by the Proposed District Plan.
- Areas such as Te Uku, Waitetuna and Te Mata need such centres to maximise recycling, but they need to avoid drawbacks such as wind-blown rubbish and noise disturbance.

Point Number 831.6
Summary of Decision Requested: **Delete** Rule 14.3.1.8 (3) relating to P12 Service connections for subdivision.
AND
Amend Plan to consider extending town water supplies to coastal developments, in particular provision of fire fighting water.
OR
Amend Plan to ensure storage tanks are provided at strategic points for fire fighting.

Decision Reasons:

- Fire hydrants should be required in wooded areas, especially if developments are distant from the main supply.
- Most of the Whaanga Coast is wooded, but has no mains supply. A lot of housing has been permitted in the area and the Proposed District Plan allows for more. This is a safety issue.

Point Number 831.7
Summary of Decision Requested: **Amend** Rule 14.5.2 RD1 Restricted Discretionary Activities, to require existing lines to be underground when new line work is undertaken.

Decision Reasons:

- Overhead power/phone lines currently obstruct views and are generally thought to be unattractive.
- The cost makes it unlikely that all lines will be underground in terms of this Proposed District Plan, nevertheless it can remain an objective.

Point Number	831.8
Summary of Decision Requested:	Retain Policy 2.16.1 Whaanga Coast Specific Area.
Decision Reasons:	<ul style="list-style-type: none"> • Gives effect to the Resource Management Act 1991 and Te Tiriti o Waitangi • Allows for resettlement of Maori lands in line with the general population.
Point Number	831.9
Summary of Decision Requested:	Retain Rule 22.1.2 Permitted Activities.
Decision Reasons:	<ul style="list-style-type: none"> • Gives effect to the Resource Management Act 1991 and Te Tiriti o Waitangi • Allows for resettlement of Maori lands in line with the general population
Point Number	831.10
Summary of Decision Requested:	Retain Rule 22.7 Specific Area - Whaanga Coast Development Areas.
Decision Reasons:	<ul style="list-style-type: none"> • Gives effect to the Resource Management Act 1991 and Te Tiriti o Waitangi • Allows for resettlement of Maori lands in line with the general population.
Point Number	831.11
Summary of Decision Requested:	Amend Rule 14.11.1 P1 Permitted Activities, to include stormwater filters.
Decision Reasons:	<ul style="list-style-type: none"> • The stormwater system tends to collect both solid and liquid contaminants and discharges them into the harbour. • It would be highly desirable to prevent this happening, preferably at source, or by somehow processing the water at the point of discharge. • Enviropods have been fitted to most of Raglan's gullies, but oil filters to only a few.
Point Number	831.12
Summary of Decision Requested:	<p>Amend Rule 14.11.1 P2 Activity-specific condition 14.11.1.2 and Rule 14.11.2 RD2 to give effect to Policy 4.2.7 Site Coverage and Permeable Surfaces and Policy 6.4.7 Stormwater</p> <p>AND</p> <p>Amend Rule 14.11.1 P2 Activity-specific condition 14.11.1.2 to replace the universal 70% impermeable cover with individual limits to suit each catchment.</p> <p>AND</p> <p>Add rules to support the following:</p> <ul style="list-style-type: none"> • on-site stormwater disposal • sufficient capacity to enable disposal of stormwater • best practice low impact design • on-site treatment • minimising of impervious surfaces • retaining pre-development hydrological conditions • not increasing the flow of stormwater runoff • not reducing storage capacity on-site • a stormwater management plan for each catchment • promoting clear water reuse and groundwater recharge
Decision Reasons:	<ul style="list-style-type: none"> • No scientific stormwater plan for Raglan has been completed, though a settling pond at Aro Aro was designed in 2011 as a filtration wetland for the stormwater. • Pollutants such as copper are at or near their limits and addition of more sites with 70% impermeable cover will exacerbate the pollution. • Application of Rule 14.11.2 RD2 without clear scientific evidence of effects will make pollution even worse.
Point Number	831.13
Summary of Decision Requested:	Add rules that support Policy 4.2.7 Site Coverage and Permeable Surfaces.
Decision Reasons:	<ul style="list-style-type: none"> • Supports having sufficient open space to provide for landscaping, on-site stormwater disposal in the Residential Zone, but objects that they do not appear to have any corresponding rules, except for Te Kowhai Airpark Zone Rule 27.3.3.
Point Number	831.14
Summary of Decision Requested:	Add new provisions to Chapters 16 to Chapter 28 regarding energy efficiency and solar power (see submission for details).
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan only makes passing reference to climate change and says nothing about the effects of coal, gas and oil on global warming. • Despite mentioning 'passive solar' in the Proposed District Plan, there is no rule requiring use of solar power. • Waipa District Plan specifically lists solar power generation collector panels up to 6m² as a permitted development. The St Kilda development has covenants covering solar power and stormwater. • It is disappointing that Stage 2 of the Proposed District Plan is to be published in 2019 and it is not possible to consider it in context with Stage 1. • There is a need for cooperation between local, regional and national governments.

Point Number 831.15

Summary of Decision Requested: **Amend** Policy 4.5.3 Commercial Purpose: Business Town Centre Zone, to acknowledge the importance of Ultra Fast Broadband in allowing businesses to develop and reduce transport needs.

Decision Reasons:

- Internet and broadband are each only mentions in the definition section of the Proposed District Plan.
- Facilitate rollout of Ultra Fast Broadband to allow businesses to connect with the global business community.
- Raglan Club and Yacht Club are in Raglan's town centre and have had problems associated with them, including noise and financial viability.

Point Number 831.16

Summary of Decision Requested: **Amend** Section 1.5.6 Transport and logistics, to acknowledge the parking issues in towns and recreation areas and preferred solutions, such as pay and display and sign posting.

Decision Reasons:

- New Zealand Transport Agency's AADT figures indicate traffic has roughly doubled in the last couple of decades. Additional parking has been provided, but it is never enough.
- The Raglan Community Board has expressed interest in pay and display.

Point Number 831.17

Summary of Decision Requested: **Amend** Table 14.12.5.10 Required bicycle spaces, to provide for secure cycle parking.

Decision Reasons:

- Cycles parked in vulnerable areas require parking that is well supervised by CCTV or which provides lockable cabinets.
- Such parking is especially valuable at bus and train stops.

Point Number 831.18

Summary of Decision Requested: **Amend** the Coastal Environment Overlay to become a conservation area that includes Raglan and require all major developments that infringe the District Plan rules or exceed one storey to be publicly notified.

Decision Reasons:

- The character of Raglan is of value and should be perpetuated by limiting developments to one storey and requiring features as described in the 2003 Waikato District Council Design Guide.
- Most of the street corners have single storey building which are, or should be, heritage buildings.
- The character statement for Raglan recognises small scale buildings (that have one or two levels with narrow frontages).

Point Number 831.19

Summary of Decision Requested: **Delete** Policy 4.5.14(a)(v)(F) Raglan Town Centre.

Decision Reasons:

- Most of the street corners have single storey buildings, which are, or should be, listed as heritage buildings.
- Raglan Town Centre is characterised by small scale buildings (one or two levels with narrow frontages). Encourage new development that is sympathetic to the existing main street built form and the surrounding context, whilst still promoting the eclectic and artistic nature of the town.
- Some of the attractive variety could be lost if all the town centre becomes two storey.
- A possible alternative could be similar to Hamilton's Special Character Areas.

Point Number 831.20

Summary of Decision Requested: **Amend** Policy 4.5.14 Raglan Town Centre, to discourage and prevent use of widely used franchise signs and symbols.

Decision Reasons:

- It should also prevent use of widely used franchise signs and symbols, so as to maintain the image of freedom from mass development.
- Development can take place, but it needs to avoid changing Raglan's character and the way to do that is to have public debate on those which may change the character.

Point Number 831.21

Summary of Decision Requested: **Retain** Policy 4.5.14 (a)(i) Raglan Town Centre, particularly the words "prioritising and providing for pedestrian movement and safety".

Decision Reasons:

- Supports a central business district mall, in whole or part.

Point Number 831.22

Summary of Decision Requested: **Amend** Rule 16.2.1.1 P2 Noise - General, to apply the noise limits and time limits to activities affecting Residential Zones, such as airfields.

Decision Reasons:

- Raglan, particularly Raglan West, suffers from aircraft noise.

Point Number 831.23

Summary of Decision Requested: **Amend** the purpose of designation M51 (Local Purpose (Aerodrome) Reserve at Raglan Harbour) to provide for alternative uses, such as sports fields.

Decision Reasons:

- Many supporting comments favour use of Raglan airfield for alternative uses, such as sports fields.

- Despite requests from Raglan Community Board, no financial information about the airfield has ever been revealed to show whether it is making a loss or profit, or bring a net financial gain to the area.
- The nearby soccer fields suffer from ponding and are becoming oversubscribed.
- This aspect of the snapshot has only had two unfavourable comments, but many more in support,

Point Number 831.24

Summary of Decision Requested: Amend the definition of "Public transport facility" in Chapter 13: Definitions, to include water and ferry transport.

Decision Reasons:

- The submitter envisages resumption of ferry services to ease congestion.
- The current definition only applies to land based public transport.

Point Number 831.25

Summary of Decision Requested: Add provisions in Policy 8.1.3 Esplanade reserves and walkways and Rule 16.5.3 Restricted Discretionary Activities, to implement Waikato District Council's Walking, Cycling and Bridle Trails Strategy to create links within new developments as well as existing developments that currently have no safe alternative to car use, such as Greenslade Road.

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognizes the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.
- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 831.26

Summary of Decision Requested: Amend matter of Discretion (a)(i) in Rule 17.1.3 RDI Restricted Discretionary Activities, as follows:

(j) To the extent which the development is consistent with 4.5.3 Policy – Commercial, purpose: Business Town Centre Zone, in strengthening those areas as the primary retail, administration, commercial service and civic centre for each town and with Town Centre Guidelines contained in Appendix 3;

Decision Reasons:

- The 2006 Supporting Information for Lorezen Bay Business Zone said at 4.5.3 that "It is likely that a Service centre would comprise convenience shops such as a dairy or fruit and vegetable shop."
- It was on that basis that the area was rezoned from Residential to Business.
- By specifying a minimum lot size of 225m² it is unlikely that such small shops are going to occupy the site.
- A large supermarket is more likely, which would affect the viability of the Raglan CBD.

Point Number 831.27

Summary of Decision Requested: Add to Policy 7.1.4- Matangi and Huntly Heritage precinct a new clause (ii) Raglan Heritage Precinct with policies similar to those for the Matangi and Huntly Heritage Precinct.

Decision Reasons:

- The Proposed District Plan still mentions Raglan as having a seaside village character.
- Raglan should retain its seaside village character as it grows, while protecting the harbour. This should be acknowledged in the Proposed District Plan.

Point Number 831.28

Summary of Decision Requested: Delete Rule 17.4.1 RDI (a)(i) General subdivision.

Decision Reasons:

- This rule is inconsistent with Policy 4.5.3 which aims to strengthen town centres as the primary retail, administration, commercial service and civic centre for each town.

Point Number 831.29

Summary of Decision Requested: Amend Policy 4.5.2 (a)(ii) Commercial function and purpose, to identify that the Raglan Wharf is not suited to large scale commercial activities

AND

Add policies and rules to address the relationship between boat owners and business people at Raglan Wharf.

Decision Reasons:

- The submitter identifies the need to address the friction between boats and business people at Raglan Wharf.

Point Number 831.30

Summary of Decision Requested: Add a chapter and maps showing provision for freedom camping and associated rules, including those for signage.

Decision Reasons:

- Other camping is regulated by the Proposed District Plan.
- The impact of freedom camping on the town and accommodation providers is a potential problem.

Point Number	831.31
Summary of Decision Requested:	Amend P9 in Rule 16.1.2 Permitted Activities, to require registration of homestay or visitor accommodation.
Decision Reasons:	<ul style="list-style-type: none"> • Air bnb does not contribute a fair share to seasonal infrastructure costs. • Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. • As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. • Queenstown has rules requiring registration as a homestay, or a holiday home and, for larger properties, resource consent for a change of use. • Raglan needs similar rules.
Point Number	831.32
Summary of Decision Requested:	Add a new provision that replicates the intent of Objective 8.4.1 Community hub in the context of Raglan and encourages the provision of a youth hub, art space and conference venue.
Decision Reasons:	<ul style="list-style-type: none"> • There is little provision for youth in Whaingaroa. This proposal was made in the RN Youth snapshot and seems likely to be supported. • RN Arts snapshot identified this need. • A conference venue was suggested at the start of public consultation. No large venues exist in Whaingaroa.
Point Number	831.33
Summary of Decision Requested:	Add more provisions about food safety to Rule 22.4.1.1 Prohibited Subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • Limiting subdivision on high class soils is only part of the solution to ensuring food security. • Other provisions should refer to organic food, fertiliser availability, climate change, biosecurity, transport disruption and other factors likely to affect continuity of food supplies. • Raglan Naturally Environment snapshot suggests more food production on a range of scales from backyard to commercial. • Raglan Naturally Education and Community Wellbeing snapshot supports community gardens. • Comments about security were made at the start of consultation and seem likely to gain wider support.
Point Number	831.34
Summary of Decision Requested:	Retain and strengthen Policy 9.3.4.1 Cultural and historic sites of significance, to celebrate and protect archaeological sites.
Decision Reasons:	<ul style="list-style-type: none"> • To celebrate and protect archaeological sites, so as to enhance understanding of our history, improve the tourist experience and preserve our inheritance for future generations.
Point Number	831.35
Summary of Decision Requested:	Retain and strengthen Rule 20.4.2 RD1 Subdivision - Boundaries for Records of Title, to celebrate and protect archaeological sites.
Decision Reasons:	<ul style="list-style-type: none"> • To celebrate and protect archaeological sites, so as to enhance understanding of our history, improve the tourist experience and preserve our inheritance for future generations.
Point Number	831.36
Summary of Decision Requested:	Retain and strengthen Rule 23.3.9.5 All heritage items - Site development, to celebrate and protect archaeological sites.
Decision Reasons:	<ul style="list-style-type: none"> • To celebrate and protect archaeological sites, so as to enhance understanding of our history, improve the tourist experience and preserve our inheritance for future generations.
Point Number	831.37
Summary of Decision Requested:	Retain and strengthen Rule 23.4.5 Site boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maori, to celebrate and protect archaeological sites.
Decision Reasons:	<ul style="list-style-type: none"> • To celebrate and protect archaeological sites, so as to enhance understanding of our history, improve the tourist experience and preserve our inheritance for future generations.
Point Number	831.38
Summary of Decision Requested:	Add rules within each zone to replicate Rule 23.3.9.5 All heritage items - site developmen, requiring that a development on a site containing a heritage item listed in Schedule 30. be set back at least 10m from the heritage item.
Decision Reasons:	<ul style="list-style-type: none"> • To celebrate and protect archaeological sites, so as to enhance understanding of our history, improve the tourist experience and preserve our inheritance for future generations.
Point Number	831.39
Summary of Decision Requested:	Amend the Proposed District Plan to require housing for the elderly to be included in all new developments throughout the district and not restricted to Te Kauwhata (Policy 4.1.12(b)(i) Te Kauwhata).
Decision Reasons:	<ul style="list-style-type: none"> • The former Lazarus village is on fairly level ground, close to Raglan's main facilities.

- It is therefore better suited to house Raglan's above average elderly population than most sites in the town and should be restored to that use.
- Without protection, it is likely that the only non-hospital housing for elderly people in Raglan will be permanently lost.
- Need to achieve strategic direction 1.12.3 "A district which provides a wide variety of housing forms which reflect the demands of its ageing population"

Point Number 831.40

Summary of Decision Requested: Amend Policy 4.1.18 Raglan to read as follows:

(a) Raglan is developed to ensure:

(i) Infill and redevelopment of existing sites occurs, subject to development of a Structure Plan to identify where this can be done without loss of character, trees, or other natural features:

(ii) A variety of housing densities is provided for and adequate housing reserved for low cost rentals and purchases by permanent residents:

(iii) Rangitahi is the only area that provides for the medium term future growth and is developed in a manner that has cycle, footway and public transport connections to the existing towns and maintains and enhances the natural environment; and

(iv) There are good quality cycle, footway and public transport connections between the town centre, the Papahua Reserve and Raglan Wharf.

(v) That Raglan is limited in size to walking distance.

Decision Reasons:

- Supports the submission by the Whaingaroa Raglan Affordable Housing Project.
- The 2009 Raglan Structure Plan Issues and Options report said that "In simple terms the existing District Plan already zones enough land in the immediate Raglan area to provide for around 1.6 times the amount of land that will be needed up to 2061."
- In the absence of detailed population figures, it is not apparent that Raglan needs infill and redevelopment.
- Without a detailed analysis of sites it is likely that some would lose their character, trees and other features.
- Raglan Naturally opposes the policy unless the sites are differentiated.
- There is a housing shortage in Raglan, but that is a shortage of housing available to local people at affordable prices. About a quarter of the houses were empty at the 2008 census and that has risen to a third at the 2013 census.
- Rangitahi will provide amply for foreseeable growth, however good alternatives to cars need to be provided.
- Connections between the town centre, Papahua Reserve and Raglan Wharf needs to replicate what is sought within Policy 4.1.12(b)(v) Te Kauwhata.
- Limiting the size of the township for walking distance is a new suggestion, but could limit extra car use.

Point Number 831.41

Summary of Decision Requested: Do not apply the Proposed District Plan to the Raglan ward until such time as a Raglan Structure Plan is developed that addresses the following matters:

- Commercial buildings in the commercial business district (CBD) that have the 'Raglan look' and are single storey (or are no higher than two levels).
- Design guidelines which support the seaside village character of Raglan.
- Development that is not out of context with the character of Raglan.
- Council working with the community to establish design guidelines for the protection and development of Raglan's 'seaside village' character, without suppressing individual expression and lifestyle choice.
- Incorporation of the Raglan Naturally Community Plan, Raglan Town Centre: Draft Design Guide and MfE Draft New Zealand Urban Design Protocol.
- Aligning of walkways and cycle routes to provide all parts of the town with safe and attractive alternatives to car use.
- Permission of compost toilets.
- Inclusion of a detailed design manual for the entire built area of Raglan which is developed through consultation with all parts of the community assisted by a qualified committee to set policy on all details of development density, design, height, setback, fabric, finish, form and texture, including all elements of the built environment, roads, courtyards and footpaths.
- Provision for vetting future consent applications through the consultation structure as described above.
- Permission of extensions to the CBD in an orderly manner through the consultation process described above to avoid a shortage of commercial property, whilst not promoting speculation, or premature developments of areas which are presently remote from the existing CBD.
- Retaining Raglan's unique character by a green belt with very limited development to be define through the consultation process described above.

Decision Reasons:

- A structure plan for Raglan is one of the areas still incomplete and the Proposed District Plan is currently difficult to manoeuvre through.
- More complete and better consultation methods need to be devised.
- Most other growth areas have a structure plan. Without a structure plan it is not apparent how the Proposed District Plan will work for Raglan.
- Raglan grew by 40% from 1991-2001 and could double in the next 10 years if all the development opportunities are taken up. The Proposed District Plan does not estimate what the population might be, or the services that may be required.
- In the absence of any estimate of demand or development it is hard to know whether the area set aside is reasonable.
- The structure plan is needed to take account of the statements prepared by Raglan Naturally and noted in the original submission.

Point Number 831.42

Summary of Decision Requested: Add a new chapter addressing satellite towns.

Decision Reasons:

- This is a concept likely to be controversial and quite likely not in the final revised Raglan Naturally.
- It is possible that proposal will be supported as a means of diverting development pressures from sensitive areas.

Point Number 831.43

Summary of Decision Requested: Amend Section 1.5.7.2 Landscape and natural character, to recognise that all natural character areas (not just those of higher value) be protected through tools such as cat free covenants and similar rules imposed by the Palmerston North District Plan.

Decision Reasons:

- The Natural Character has been lost in most of the district, so it is important that any new development shows environmental awareness and does not encroach on nature.
- Cats are major predators of native wildlife, so new developments close to natural character areas should be cat free.

Point Number 831.44

Summary of Decision Requested: Amend Chapter 3 Natural Character, to recognise that new development should not encroach on nature and that all natural character areas (not just those of higher value) be protected through tools such as cat free covenants and similar rules imposed by the Palmerston North District Plan.

Decision Reasons:

- The Natural Character has been lost in most of the district, so it is important that any new development shows environmental awareness and does not encroach on nature.
- Cats are major predators of native wildlife, so new developments close to natural character areas should be cat free.

Point Number 831.45

Summary of Decision Requested: **Amend** condition for P4 Earthworks in Rule 14.3.1 Permitted Activities, to recognise that that new development should not encroach on nature and that all natural character areas (not just those of higher value) be protected through tools such as cat free covenants and similar rules imposed by the Palmerston North District Plan.

Decision Reasons:

- The natural character has been lost in most of the district, so it is important that any new development shows environmental awareness and does not encroach on nature.
- Cats are major predators of native wildlife, so new developments close to natural character area should be cat free.

Point Number 831.46

Summary of Decision Requested: **Amend** Rule 22.1.3 Restricted Discretionary Activities to recognise that that new development should not encroach on nature and that all natural character areas (not just those of higher value) be protected through tools such as cat free covenants and similar rules imposed by the Palmerston North District Plan.

Decision Reasons:

- The Natural Character has been lost in most of the district, so it is important that any new development shows environmental awareness and does not encroach on nature.
- Cats are major predators of native wildlife, so new developments close to natural character areas should be cat free.

Point Number 831.47

Summary of Decision Requested: No specific decision is sought, however the submitter seeks that the Council publicly notifies and informs adjoining authorities and the Regional Council of all resource consent applications for vegetation clearance.

Decision Reasons:

- The 2013 Waikato District Council Statement of the Environment report said "there is evidence to indicate that over 50 per cent of remaining indigenous cover is classified as threatened and much of this land is not legally protected."
- The New Zealand Biodiversity Strategy set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 831.48

Summary of Decision Requested: **Add** new rules that read as follows

In a significant indigenous vegetation or habitat area the following are discretionary activities:

- Cultivation
- Spreading soil or other material (including fertilizer or lime) in excess of existing routine application rates
- Drainage works, apart from routine maintenance
- Land reclamation from estuary or other wetlands
- Modifications to watercourses apart from routine maintenance
- Flood defences
- Infilling ditches, ponds, pits, pools, marshes or historic earthwork features
- Clearing vegetation or land (by physical removal, burning, application of herbicides, or deliberate overgrazing, tramping, or rooting by livestock) in preparation for cultivation
- Introducing livestock (including poultry) at intensive stocking rates, or increasing stocking rates to intensive levels.

Decision Reasons:

- The 2013 Waikato District Council Statement of the Environment report said "there is evidence to indicate that over 50 per cent of remaining indigenous cover is classified as threatened and much of this land is not legally protected."
- The New Zealand Biodiversity Strategy set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 831.49

Summary of Decision Requested: **Add** sites of indigenous vegetation such as Hauroto Bay and other sites of indigenous vegetation to the planning maps, as recorded in the estuarine vegetation survey - Raglan (Whaingaroa) Harbour.

Decision Reasons:

- The 2013 Waikato District Council Statement of the Environment report said "there is evidence to indicate that over 50 per cent of remaining indigenous cover is classified as threatened and much of this land is not legally protected."
- The New Zealand Biodiversity Strategy set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 831.50

Summary of Decision Requested: **Amend** the zoning of areas that are hidden from main roads and close to town (such as behind the sewage ponds) to an Industrial Zone, to provide opportunities for industry close to Raglan.

Decision Reasons:

- Industrial areas should be located back from the main road.
- Raglan needs industrial land.
- Nau Mai is too far out of town and too prominent.

Point Number 831.51

Summary of Decision Requested: **Amend** Rule 16.2.7.1 Signs – general, to enable information on history and places to be shared in both English and Te Reo Maori.

Decision Reasons:

- The rule seems to be aimed at functional signage and therefore unreasonably limits the size and placing of interpretation and Heritage Trail signs.
- The submitter encourages the use of more bilingual signs.

Point Number 831.52

Summary of Decision Requested: Amend Rule 25.1.2 P4(a) Permitted Activities to differentiate between summer events and other events.

Decision Reasons:

- Raglan's reserves are increasingly congested in mid-summer and moving events to shoulder seasons, from the summer peak, would help ease the problem.

Point Number 831.53

Summary of Decision Requested: Consider the positive benefits and negative aspects of a Raglan bypass and do not develop by default.

Decision Reasons:

- Raglan Land Co. proposals for village clusters amount to a bypass and Rangitahi could be vulnerable to disruption if its access route from Raglan West were severed and that referred to in Policy 9.3.5.4 was not complete.
- In the past, such proposals have been rejected due to their impact on local shops.
- The submitter has noted that Industrial zoning of site-specific areas should be considered in conjunction with any proposed bypass development.

Point Number 831.54

Summary of Decision Requested: Unclear what decision is being sought but submission supports ironsand mining being omitted from Policy 5.4.2- Access to minerals and extractive industries.

Decision Reasons:

- Transport is inadequate to support land mining in the Whaingaroa area
- Offshore mining would threaten the dolphin habitat and increase erosion hazards.
- Coal is a major contributor to climate change.

Point Number 831.55

Summary of Decision Requested: Amend Policy 9.3.3.2 Coastal margins, to extend to all areas with water pollution caused by livestock.

Decision Reasons:

- The submitter identifies the problem of pollution from agricultural run-off.
- All the rivers entering Whaingaroa Harbour have unsatisfactory pollution levels, such as the Waitetuna River.

Point Number 831.56

Summary of Decision Requested: Delete Policy 3.2.6 Providing for vegetation clearance

AND

Add policies that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.57

Summary of Decision Requested: Delete Rule 16.2.8 Indigenous vegetation clearance inside a Significant Natural Area

AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.58

Summary of Decision Requested: Delete Rule 17.2.9 Indigenous vegetation clearance inside a Significant Natural Area

AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.

- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.59

Summary of Decision Requested: **Delete** Rule 20.2.9 Indigenous vegetation clearance inside a Significant Natural Area
AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.60

Summary of Decision Requested: **Delete** Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area
AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.61

Summary of Decision Requested: **Delete** Rule 23.2.8 Indigenous vegetation clearance inside a Significant Natural Area
AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.62

Summary of Decision Requested: **Delete** Rule 24.2.8 Indigenous vegetation clearance inside a Significant Natural Area
AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.63

Summary of Decision Requested: **Delete** Rule 25.2.8 Indigenous vegetation clearance in a Significant Natural Area
AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.64

Summary of Decision Requested:	Delete Rule 28.2.8 Indigenous vegetation clearance inside a Significant Natural Area AND Add provisions that will increase natural habitats.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports bush regeneration, such as that at Wainui Bush Reserve. • The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan. • Screening with trees should be applied to improve and protect views from Raglan and its beaches. • Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects. • New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image. • Alternatively, the Proposed District Plan could ban development which would detract from those views.
Point Number	831.65
Summary of Decision Requested:	Retain Policy 3.5.4 Protecting the natural character of wetlands, and lakes and rivers and their margins, and the associated rules.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the restoration of wetlands.
Point Number	831.66
Summary of Decision Requested:	No specific decision is requested, but the submitter seeks to protect the wild and natural character of the Whaanga Coast with reference to Policy 5.3.18 Specific Area - Whaanga Coast Development Areas.
Decision Reasons:	<ul style="list-style-type: none"> • The coast retains a relatively wild landscape and should be free from commercial development.
Point Number	831.67
Summary of Decision Requested:	Amend the definition of "Day-to-day activity" in Chapter 13: Definitions to provide for skateparks.
Decision Reasons:	<ul style="list-style-type: none"> • Existing skateparks within Raglan are overcrowded and additional parks are required. The Plan should identify criteria for locations.
Point Number	831.68
Summary of Decision Requested:	Add rules to Chapter 16 Residential Zone to provide for the protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined areas: <ul style="list-style-type: none"> • From SH3 (north of Maungatawhiri Road) to Kaitoke Creek • All existing views of the bard from Main Road, Bow St and Norrie Avenue • All existing views of Kariroi from Raglan CBD • From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp • From SH23 summit to Karioi • Aro Aro salt marsh from Wallis St AND Consequently amend the planning maps as necessary to satisfy the relief sought in this submission.
Decision Reasons:	<ul style="list-style-type: none"> • Views are an inherent part of Raglan's seaside character and retaining these is a priority action. • Policy 3.3.3 needs to be achieved. • The protection of views that affect the wellbeing of residents is a matter that needs to be considered in accordance with section 5 of the RMA.
Point Number	831.69
Summary of Decision Requested:	Retain Activity-specific condition 14.11.1.3(iii) Permitted Activities relating to P3 wastewater servicing.
Decision Reasons:	<ul style="list-style-type: none"> • AS/NZS 1547:2012 covers the whole range of options which may be appropriate, including waterless composting toilets, covered in the related AS/NZS 1546.2:2008 • Supports investigation of such systems to minimise water consumption and sewage volumes, thus making it more possible to treat sewage as a valuable resource, rather than an expensive waste.
Point Number	831.70
Summary of Decision Requested:	Retain Policy 7.1.8 Tree Protection AND Amend the Proposed District Plan to protect existing large trees and not just those listed in Schedule 30.2.
Decision Reasons:	<ul style="list-style-type: none"> • Notes the importance of trees in the Raglan urban scene and compares with the changes that Mount Maunganui has experienced.
Point Number	831.71
Summary of Decision Requested:	No specific decision is sought, but the submitter considers that it is not clear that the policies sufficiently identify and protect significant natural areas.
Decision Reasons:	<ul style="list-style-type: none"> • The 2013 Waikato District Council Statement of the Environment report said "there is evidence to indicate that over 50 per cent of remaining indigenous cover is classified as threatened and much of this land is not legally protected."

- The New Zealand Biodiversity Strategy set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 831.72

Summary of Decision Requested: No specific decision is sought, but the submitter considers it is not clear that the rules sufficiently identify and protect significant natural areas.

Decision Reasons:

- The 2013 Waikato District Council Statement of the Environment report said "there is evidence to indicate that over 50 per cent of remaining indigenous cover is classified as threatened and much of this land is not legally protected."
- The New Zealand Biodiversity Strategy set the 2020 goal as "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 831.73

Summary of Decision Requested: **Amend** Policy 6.1.11 Undergrounding new infrastructure, to require existing lines to be placed underground when new line work is undertaken.

Decision Reasons:

- Overhead power/phone lines currently obstruct views and are generally thought to be unattractive.
- The cost makes it unlikely that all lines will be underground in terms of this Proposed District Plan, nevertheless it can remain an objective.

Point Number 831.74

Summary of Decision Requested: **Retain** Policy 2.16.2 Aahuatanga Motuhake (special features).

Decision Reasons:

- Gives effect to the Resource Management Act 1991 and Te Tiriti o Waitangi
- Allows for resettlement of Maori lands in line with the general population

Point Number 831.75

Summary of Decision Requested: **Retain** Rule 22.7.1.1 Permitted Activities.

Decision Reasons:

- Gives effect to the Resource Management Act 1991 and Te Tiriti o Waitangi
- Allows for resettlement of Maori lands in line with the general population.

Point Number 831.76

Summary of Decision Requested: **Amend** Policy 4.5.3 Commercial purpose: Business Town Centre Zone, to acknowledge entertainment venues

AND

Add policies and rules for control and support of clubs in town centres.

Decision Reasons:

- Internet and broadband are each only mentioned in the definition section of the Proposed District Plan.
- Facilitate rollout of Ultra Fast Broadband to allow businesses to connect with the global business community.
- Raglan Club and Yacht Club are in Raglan's town centre and have had problems associated with them, including noise and financial viability.

Point Number 831.77

Summary of Decision Requested: **Amend** Section 1.5.6 Transport and Logistics, to include the importance and effect of Ultra Fast Broadband in allowing businesses to develop and reduce transport needs.

Decision Reasons:

- Internet and broadband are each only mentions in the definition section of the Proposed District Plan.
- Facilitate rollout of Ultra Fast Broadband to allow businesses to connect with the global business community.
- Raglan Club and Yacht Club are in Raglan's town centre and have had problems associated with them, including noise and financial viability.

Point Number 831.78

Summary of Decision Requested: **Add** a walkway/cycleway/bridleway to the planning maps to indicate the planned track from Wainui Road to Te Hutewai.

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognizes the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.
- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 831.79

Summary of Decision Requested: **Add** all the tracks shown in the Waikato District Council's Walking, Cycling and Bridle Trails Strategy through the residential zones, including:

- A linkage of Lorenzen Bay with Kaitoke walkway
- Allowing a circular walk around Raglan
- A cycle track from Wallis to Violet Street
- A link to the national Te Araroa walkway using paper roads, etc (via Karioi, Bridal Veil), walkways and, where possible, walkways, along the whole coast
- A track from Raglan to the summit of Karioi using esplanades, reserves and unformed roads
- A link along Wainui Stream from Wainui Reserve to Bryant Reserve.

Decision Reasons:

- The Waikato District Council Walking, Cycling and Bridle Trails Strategy is made relevant in provision 1.10.2.3 Waikato Region strategies and plans, however it is not implemented in the Proposed District Plan.
- Policy 4.1.8 Integration and connectivity recognizes the need to provide "good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle and pedestrian routes."
- Policy 4.1.10 Tuakau, Policy 4.1.11 Pokeno, Policy 4.1.12 Te Kauwhata, Policy 4.1.14 Taupiri, Policy 4.1.15 Ngaruawahia, Policy 4.1.16 Horotiu and Policy 4.1.17 Te Kowhai all mention walking and cycling provisions, though means and locations are unclear.
- Policy 4.1.18 Raglan does not mention cycling and walking despite its large pedestrian and cycle use.
- Provision 1.4.2.2 states that parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways. However, nowhere in the Proposed District Plan is it indicated that where some might be, may be a land use issue.
- Waikato District Council said that detailed rules for walk/cycle ways are not appropriate within a District Plan, yet there are detailed transport provisions.
- There is strong public support for harbour and coastal walkways.
- Encourage environmental tourism.
- The lack of progress indicated that opportunities are not taken with subdivisions and that more details need to be included in the District Plan.

Point Number 831.80

Summary of Decision Requested: **Amend** Rule 23.1.1 P2 Permitted Activities, to require registration of homestay or visitor accommodation.

Decision Reasons:

- Air bnb does not contribute a fair share to seasonal infrastructure costs.
- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors.
- As residents tend to move to and from the surrounding country areas, the same policy needs to apply there.
- Queenstown has rules requiring registration as a homestay, or a holiday home and, for larger properties, resource consent for a change of use.
- Raglan needs similar rules.

Point Number 831.81

Summary of Decision Requested: **Amend** Rule 22.1.2 D10 Discretionary Activities, to require registration of homestay or visitor accommodation.

Decision Reasons:

- Air bnb does not contribute a fair share to seasonal infrastructure costs.
- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors.
- As residents tend to move to and from the surrounding country areas, the same policy needs to apply there.
- Queenstown has rules requiring registration as a homestay, or a holiday home and, for larger properties, resource consent for a change of use.
- Raglan needs similar rules.

Point Number 831.82

Summary of Decision Requested: **Consider** the impact of coal mining on climate change, particularly through Stage 2 of the reviewed Proposed District Plan.

Decision Reasons:

- Transport is inadequate to support land mining in the Whaingaroa area.
- Offshore mining would threaten the dolphin habitat and increase erosion hazards.
- Coal is a major contributor to climate change.

Point Number 831.83

Summary of Decision Requested: **Amend** Policy 9.3.3.3 Stormwater management, to extend to all areas with water pollution caused by livestock.

Decision Reasons:

- The submitter identifies the problem of pollution from agricultural run-off.
- All the rivers entering Whaingaroa Harbour have unsatisfactory pollution levels, such as the Waitetuna River.

Point Number 831.84

Summary of Decision Requested: **Amend** Policy 9.3.3.4 Stock exclusion, to extent to all areas with water pollution caused by livestock.

Decision Reasons:

- The submitter identifies the problem of pollution from agricultural run-off.
- All the rivers entering Whaingaroa Harbour have unsatisfactory pollution levels, such as the Waitetuna River.

Point Number 831.85

Summary of Decision Requested: **Amend** Policy 9.3.3.5 Environmental improvement, to extend to all areas with water pollution caused by livestock.

Decision Reasons:

- The submitter identifies the problem of pollution from agricultural run-off.
- All the rivers entering Whaingaroa Harbour have unsatisfactory pollution levels, such as the Waitetuna River.

Point Number 831.86

Summary of Decision Requested: Amend Policy 9.3.3.6 Landscape values, to extend to all areas with water pollution caused by livestock.

Decision Reasons:

- The submitter identifies the problem of pollution from agricultural run-off.
- All the rivers entering the Whaingaroa Harbour have unsatisfactory pollution levels, such as the Waitetuna River.

Point Number 831.87

Summary of Decision Requested: Delete Policy 3.2.8 Incentivise subdivision

AND

Add policies that will increase habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.88

Summary of Decision Requested: Delete Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area

AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.89

Summary of Decision Requested: Delete Rule 23.2.9 Indigenous vegetation clearance outside a Significant Natural Area

AND

Add provisions that will increase natural habitats.

Decision Reasons:

- The submitter supports bush regeneration, such as that at Wainui Bush Reserve.
- The Proposed District Plan makes no attempt to indicate how much bush has been lost, or will be lost by these and other provisions in the Proposed District Plan.
- Screening with trees should be applied to improve and protect views from Raglan and its beaches.
- Much of the attraction of Raglan derives from its beaches and the north shore of the harbour having rural aspects.
- New subdivisions could diminish that attraction and an active policy of tree planting to establish belts of trees screening those views would help to protect the rural image.
- Alternatively, the Proposed District Plan could ban development which would detract from those views.

Point Number 831.90

Summary of Decision Requested: Add rules to Chapter 18: Business Town Centre Zone, to provide for the protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:

- From SH3 (north of Maungatawhiri Road) to Kaitoke Creek
- All existing views of the bard from Main Road, Bow St and Norrie Avenue
- All existing views of Kariroi from Raglan CBD
- From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp
- From SH23 summit to Karioi
- Aro Aro salt marsh from Wallis St

AND

Consequently amend the planning maps as necessary to satisfy the relief sought in this submission.

Decision Reasons:

- Views are an inherent part of Raglan's seaside character and retaining these is a priority action.
- Policy 3.3.3 needs to be achieved.
- The protection of views that affect the wellbeing of residents is a matter that needs to be considered in accordance with section 5 of the RMA.

Point Number 831.91

Summary of Decision Requested: Add rules to Chapter 22 Rural Zone, to provide for the protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:

- From SH3 (north of Maungatawhiri Road) to Kaitoke Creek
- All existing views of the bard from Main Road, Bow St and Norrie Avenue
- All existing views of Kariroi from Raglan CBD
- From Wainui Road to the coast between the Bryant Reserve and the Bible Crusade Camp
- From SH23 summit to Karioi
- Aro Aro salt marsh from Wallis St

AND

Consequently amend the planning maps as necessary to satisfy the relief sought in this submission.

Decision Reasons:

- Views are an inherent part of Raglan's seaside character and retaining these is a priority action.

- Policy 3.3.3 needs to be achieved.
- The protection of views that affect the wellbeing of residents is a matter that needs to be considered in accordance with section 5 of the RMA.

Submitter Number: 832 **Submitter:** Niksha Farac
On behalf of: Hounsell Holdings Limited

Point Number 832.1
Summary of Decision Requested: **Amend** the zoning of the property at 268 Te Kowhai Road, Te Kowhai from Rural Zone to Residential Zone;
AND
Amend the Proposed District Plan to make any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The site can accommodate a development of approximately 2000 dwellings.
- The site is directly north of the Rotokauri residential area, including a Special Housing Area
- The site is not subject to topographical constraints and is not subject to a significant ecological or landscape area.
- The site is well connected to transport networks, community infrastructure, employment opportunities and schooling.

Point Number 832.2
Summary of Decision Requested: **Delete** the Hamilton Basin Ecological Management Area from the property at 268 Te Kowhai Road, Te Kowhai;
AND
Amend the Proposed District Plan to make any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The site has no significant ecological constraints and should therefore not be included in the Hamilton Basin Ecological Management Area.
- Query the reasoning for the inclusion of the land in the Hamilton Basin Ecological Management area
- The Proposed District Plan does not clearly explain how the Hamilton Basin Ecological Management Area impacts the land.
- Rule 22.4.1.6 should not apply to the site.

Point Number 832.3
Summary of Decision Requested: **Amend** the Airport Obstacle Limitation Surface for the Te Kowhai Airpark reduce the area to that shown on the Operative Waikato District Plan;
AND
Amend the Proposed District Plan to make any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The reasoning for the expansion is not justified.
- The expansion of the Airport Obstacle Limitation Surface does not consider or deal with the potential impact on residential development.

Point Number 832.4
Summary of Decision Requested: **Amend** the zoning of the property at 284 Onion Road, Te Kowhai from Rural Zone to Residential Zone;
AND
Amend the Proposed District Plan to make any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The site can accommodate a development of approximately 2000 dwellings.
- The site is directly north of the Rotokauri residential area, including a Special Housing Area.
- The site is not subject to topographical constraints and is not subject to a significant ecological or landscape area.
- The site is well connected to transport networks, community infrastructure, employment opportunities and schooling.

Point Number 832.5
Summary of Decision Requested: **Delete** the Hamilton Basin Ecological Management Area from the property at 284 Onion Road, Te Kowhai;
AND
Amend the Proposed District Plan to make any consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The site has no significant ecological constraints and should therefore not be included in the Hamilton Basin Ecological Management Area.
- Query the reasoning for the inclusion of the land in the Hamilton Basin Ecological Management area
- The Proposed District Plan does not clearly explain how the Hamilton Basin Ecological Management Area impacts the land.
- Rule 22.4.1.6 should not apply to the site.

Submitter Number: 833 **Submitter:** Phil Page
On behalf of: Mainland Poultry Limited

Point Number 833.1
Summary of Decision Requested: **Amend** the definition of "Farming" in Chapter 13 Definitions, as follows:

Means an agricultural, horticultural or apicultural activity having as its primary purpose the production of any livestock (including poultry or eggs), or crop using ~~the in situ~~ soil, water and air as the medium for production. It includes...

Decision Reasons:

- The definition should include poultry. Poultry do not have adverse effects that are materially different or more adverse than livestock.
- Delete reference to in-situ soil, which otherwise adds unnecessary complexity.

Point Number 833.2

Summary of Decision Requested: **Amend** the definition of "Intensive farming" in Chapter 13 Definitions, as follows:

Means farming which is not dependent on the fertility of the soils on which it is located and which may be under cover ~~or within an outdoor enclosure~~ and be dependent on supplied of food produced on and/or off the land where the operation is located...

(c) poultry or game bird farming undertaken wholly or principally within sheds or other shelters or buildings;

(d) free-range poultry or game bird farming while inside an enclosure.

Decision Reasons:

- Amend to exclude range areas used for free-range poultry.
- If the birds are outside they are livestock that are permitted under the definition of farming.
- All paddocks are outdoor enclosures.
- This definition does not limit or describe what is meant by enclosure and it should be deleted.

Point Number 833.3

Summary of Decision Requested: **Add** a new rule to Rule 22.1.2 Permitted Activity to provide for Poultry farming as a permitted activity where it can meet the performance standards for permitted farming activities.

Decision Reasons:

- Poultry farming does not result in adverse effects on soils or in contamination of soils or water and is therefore more consistent with the policies and objectives of the Proposed District Plan and the Regional Policy Statement, than other intensive farming and many permitted farming activities.

Point Number 833.4

Summary of Decision Requested: **Amend** Policy 5.3.2 (a)(i) Productive rural activities, as follows:

Recognise and protect the continued operation of the rural environment as a productive working environment by:

(i) Recognising that buildings and structures associated with farming, intensive farming, and Forestry...

Decision Reasons:

- Intensive farming is a productive rural activity that can only locate in the Rural Zone and should be enabled.
- Buildings associated with intensive farming are a legitimate aspect of rural character.

Point Number 833.5

Summary of Decision Requested: **Add** a new permitted activity to Rule 22.1.2 Permitted Activities, as follows:

Intensive farming limited to poultry farming

Conditions:

(a) For housed poultry buildings are set back at least:

(i) 50 metres from any site boundary (other than a road boundary); and

(ii) 300 metres from a sensitive activity; and

(iii) 500 metres from any boundary of a Residential, Village and Country Living Zone;

(iv) Building coverage does not exceed 10% of the site. Rule 22.3.6 (Building Coverage does not apply);

(v) Building height does not exceed 15m. Rule 22.3.4 (Building Height) does not apply;

(b) It is not located in:

(i) An Outstanding Natural Feature;

(ii) An Outstanding Natural Landscape;

(iii) A Significant Amenity Landscape;

(iv) An Outstanding Natural Character Area; or

(v) A High Natural Area

OR

Add a new permitted activity to Rule 22.1.2 Permitted Activities that enables poultry farming as a permitted activity that complies with the proposed conditions specifically to the property at 64 Old Road, Orini, being Part Lot 1 DP 12365.

Decision Reasons:

- Adverse effects of poultry farming as a subset of Intensive farming are readily capable of mitigation through compliance with setback performance standards.
- Provided the conditions are complied with, poultry farming should be permitted.

Point Number 833.6

Summary of Decision Requested: **Amend** Rule 22.1.3 RD1 Restricted Discretionary Activity, to provide for poultry farming where it does not comply with the permitted activity conditions in Rule 22.1.2 Permitted Activities as proposed by the submission;

AND

Amend Rule 22.1.5 D1 Discretionary Activities as a consequential amendment.

Decision Reasons:

- It shall be a restricted discretionary activity with the discretion restricted to the consequences of non-compliance with relevant conditions.

Point Number 833.7

Summary of Decision Requested: **Amend** Rule 22.3.7.2P1 (a)(vii) Building setback - sensitive land use, as follows:
(vii) 300m from ~~the any boundary of building on~~ another site containing an intensive farming activity;

Decision Reasons:

- Poultry farming is a rural activity that can only happen within a Rural Zone.
- It has no greater effects than many other farming activities permitted in the Rural Zone.
- Any adverse effects of reverse sensitivity nature are likely to result from the buildings that house birds, rather than from birds ranging outside.
- 300m separation from intensive farming buildings (**instead of from the site boundary**) is adequate separation from sensitive activities.

Point Number 833.8

Summary of Decision Requested: **Amend** Chapter 5 Rural Environment to provide for poultry farming where it can meet the performance standards.

Decision Reasons:

- Poultry farming does not result in adverse effects on soils or in contamination of soils or water and is therefore more consistent with the policies and objectives of the Proposed District Plan and the Regional Policy Statement, than other intensive farming and many permitted farming activities.

Point Number 833.9

Summary of Decision Requested: **Amend** Section 4.6 Industrial and Heavy Industrial Zone to provide for poultry farming where it can meet the performance standards.

Decision Reasons:

- Poultry farming does not result in adverse effects on soils or in contamination of soils or water and is therefore more consistent with the policies and objectives of the Proposed District Plan and the Regional Policy Statement, than other intensive farming and many permitted farming activities.

Submitter Number: 834 **Submitter:** Marshall & Kristine Stead

Point Number 834.1

Summary of Decision Requested: **Delete** the Significant Natural Areas overlay from the property at 703B Te Kowhai Road, Te Kowhai.

Decision Reasons:

- The Significant Natural Area is not a true reflection of the site
- There are two man-made ponds and some native planting on our grounds and garden, which the submitter will protect.
- The driveway is occupied mainly by polar, oak, pine, and plum trees.
- The majority is man made and not natural.

Point Number 834.2

Summary of Decision Requested: **Retain** the indicative road that will provide a connection from 697 Horotiu Road through 689 Te Kowhai Road;
AND
Amend the Proposed District Plan to enable some flexibility to shape and position for the connecting road.

Decision Reasons:

- The land on either side of the indicative road would be ideal for the growth of the Village Zone and keep Te Kowhai Village in a good shape.
- To keep the village appeal and character, terrain of the properties and give ability to show consideration of existing neighbours.
- All five property owners have discussed and support this as all are too small to be high producing farmland.

Point Number 834.3

Summary of Decision Requested: **Retain** the Village Zone as notified at 703B Te Kowhai Road.

Decision Reasons:

- The land is suitable for Village Zone because it has good terrain, there is good natural drainage and it is adjacent to the existing Te Kowhai Village.

Point Number 834.4

Summary of Decision Requested: **Amend** the zoning of the property at 697 Horotiu Road from Rural Zone to Village Zone.

Decision Reasons:

- Location and suitability within the Te Kowhai Village.
- A good access point for the linking of the indicative road.
- Seems it was an oversight.

Point Number 834.5

Summary of Decision Requested: **Retain** the Airpark Zone at the Te Kowhai Airfield, as notified.

Decision Reasons:

- Unique opportunity for like minded aviation enthusiasts to have a community complementing an existing Airfield.

Point Number 834.6

Summary of Decision Requested: No specific decision sought, however the submitter supports on principle the Te Kowhai Airpark Zone, particularly in regards to their own property.

Decision Reasons:

- After a number of ongoing discussions with the Airfield, there are still many questions that do not have answers at this stage.
- It is understood more time will be required to get full and accurate answers to our concerns regarding the effects and consequences to our common boundary and property and wider community for generations to come.

Submitter Number: 835 **Submitter:** Pam Butler

On behalf of: KiwiRail Holdings Limited (KiwiRail)

Point Number 835.1

Summary of Decision Requested: Delete the Significant Natural Areas overlay from KiwiRail's designations.

Decision Reasons:

- Significant Natural Areas apply to protect and enhance indigenous biodiversity. Land transport corridors, such as KiwiRail's designations are highly modified areas and therefore do not meet the identity and management hierarchy requirements for Significant Natural Areas.

Point Number 835.2

Summary of Decision Requested: Delete Outstanding Natural Features overlays from KiwiRail's designations.

Decision Reasons:

- The objective of identifying Outstanding Natural Features and Landscapes is to ensure that these landscapes and their attributes are recognised and protected from inappropriate subdivision, use and development.
- The benefits of infrastructure are provided irrespective of location.
- Designated land transport corridors are highly modified areas.

Point Number 835.3

Summary of Decision Requested: Delete Outstanding Natural Character overlay from KiwiRail's designations.

Decision Reasons:

- The objective of identifying Outstanding Natural Character is to protect the natural character of the coastal environment and waterways from inappropriate subdivision, use and development.
- The benefits of infrastructure are provided irrespective of location.
- Designated land transport corridors are generally highly modified areas.

Point Number 835.4

Summary of Decision Requested: Delete Outstanding Natural Landscapes overlays from KiwiRail's designations.

Decision Reasons:

- The objective of identifying Outstanding Natural Landscapes is to ensure that these landscapes and their attributes are recognised and protected from inappropriate subdivision, use and development.
- The benefits of infrastructure are provided irrespective of location.
- Designated land transport corridors are highly modified areas.

Submitter Number: 836 **Submitter:** Simon Roche

On behalf of: Powerco

Point Number 836.1

Summary of Decision Requested: Retain Policy 6.1.16 Water conservation as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.2

Summary of Decision Requested: Retain Objective 6.2.1 National Grid as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.3

Summary of Decision Requested: Support Objective 6.3.1 Renewable energy as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.4

Summary of Decision Requested: **Retain** Objective 6.4.1 Integration of Infrastructure with Subdivision and Development as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3

Point Number 836.5

Summary of Decision Requested: **Retain** Objective 6.5.1 Land Transport network as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.6

Summary of Decision Requested: **Retain** the definition of "Operational need" in Chapter 13: Definitions as notified.

Decision Reasons:

- This term helps other plan users understand that requirements for infrastructure and that there is not always a choice in their design and location.
- Infrastructure often has to traverse, locate or operate in a particular environment because it can only occur in that environment or because of technical or operational constraints.
- Creates more certainty for the submitter around the ability to establish assets where necessary, particularly within sensitive environments.
- The submitter undergoes a rigorous route selection process to identify the best location for infrastructure, taking into consideration a number of environmental and economic factors.

Point Number 836.7

Summary of Decision Requested: **Retain** the definition of "Functional need" in Chapter 13: Definitions as notified.

Decision Reasons:

- This term helps other plan users understand that requirements for infrastructure and that there is not always a choice in their design and location.
- Infrastructure often has to traverse, locate or operate in a particular environment because it can only occur in that environment or because of technical or operational constraints.
- Creates more certainty for the submitter around the ability to establish assets where necessary, particularly within sensitive environments.
- The submitter undergoes a rigorous route selection process to identify the best location for infrastructure, taking into consideration a number of environmental and economic factors.

Point Number 836.8

Summary of Decision Requested: **Retain** inclusion of electricity storage, and generators (less than 10m2 in area and 2.5m in height in the definition of "Network utility operator" in Chapter 13: Definitions.

Decision Reasons:

- These small-scale generators are not visually intrusive and do not create adverse visual or dominance effects on the environment or neighbouring properties. Therefore, their use and placement should not trigger the need for a resource consent.
- They are often located in rural or isolated areas, where access to the electricity grid is not always possible or practical, which lessens any visual effects.

Point Number 836.9

Summary of Decision Requested: **Retain** the definition of "Earthworks" in Chapter 13: Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number 836.10

Summary of Decision Requested: **Add** a definition of 'Support structures' in Chapter 13: Definitions as follows (or similar words or planning options to address the issues raised):

Support Structure

Support Structure means any structure associated with a network utility and includes, but is not limited to, support poles and towers for lines, navigational aids, meteorological installations, and similar structures. It does not include lines, antennas and masts.

AND

Add exclusions for "support structures" to Rule 14.2.1.1 (1) (b) (c) and (d) Permitted activities (or alternative planning options to address the issues raised).

Decision Reasons:

- A new definition is suggested due to the locational requirements of support structures and their minimum required height to achieve safe separation distances between conductors, the public, traffic and buildings.

Point Number 836.11

Summary of Decision Requested: Amend the definition of "Minor infrastructure structure" in Chapter 13: Definitions as follows:
Means any above-ground box-like structure or enclosure associated with infrastructure or that receives or transmits to or from any part of an infrastructure network, which includes:
(a) electricity junction pillars
(b) transformers (including pole mounted transformers);
(c) regulator stations;
(d) compressor stations; and
(e) pumping stations.

Decision Reasons:

- Inclusion of regulator stations, compressor stations and pumping stations and pole mounted transformers will provide more clarity around rules.

Point Number 836.12

Summary of Decision Requested: Retain Rule 14.2.1.1 - Permitted Activities which allows for new infrastructure as a permitted activity not exceeding 10m2 in area above ground and 2.5m in height as a permitted activity.

AND

Amend Rule 14.2.1.1 (2) Permitted Activities relating to P1 New Infrastructure as follows (or alternative wording or planning approach to address the issues raised) as follows:

(2) The conditions in Rule 14.2.1.1(1) do not apply to:

...

(e) Support structures for the distribution of electricity.

Decision Reasons:

- This rule allows for new infrastructure as a permitted activity, not exceeding 10m2 in area above-ground and 2.5m in height is supported.
- The Proposed District Plan includes support structures in the definition of "infrastructure".
- Under Rule 14.12.1.1(1)(b)(c) and (d) all new infrastructure is required to comply with height to boundary within various zones and be under 2.5m in height.
- This is not practical, due to the locational requirements of support structures and their minimum required height to achieve safe separation between conductors, the public, traffic and buildings.

Point Number 836.13

Summary of Decision Requested: Retain Chapter 14.2 rules relating to all infrastructure as notified, except where rules are specifically addressed elsewhere in the submission.

Decision Reasons:

- In general, the submitter supports Chapter 14.2 as drafted apart from the sections specifically addressed.

Point Number 836.14

Summary of Decision Requested: Retain section 14.1(1) Introduction as notified.

Decision Reasons:

- Considering utilities on a district-wide basis and within a separate section will assist in the administration of the Proposed District Plan and enable both network utility operators and community to determine an activity status.
- The submitter supports the clear statement in the first sentence of section 14.1 (1).

Point Number 836.15

Summary of Decision Requested: Amend Rule 14.2.3 D1 Discretionary Activities so that Infrastructure in identified areas is a Discretionary activity rather than non complying:

Any infrastructure not specifically listed within Chapter 14, including associated earthworks, ~~not locate and those~~ within an Identified Area.

AND

Delete Rule 14.2.3 NC3 Non complying activities.

Decision Reasons:

- The submitter considers that new infrastructure in "identified areas" should be a discretionary activity rather than a non-complying activity.

Point Number 836.16

Summary of Decision Requested: Amend Rule 14.2.3 Non-Complying Activities as follows:

~~14.2.34~~ Non-Complying Activities

AND

Delete 14.2.3 NC1 Non-Complying Activities.

Decision Reasons:

- Correct the numbering of the rules.
- Rule 14.2.3NC1 is considered to be too onerous and requires providers to prove they comply with electric and magnetic field emissions standards. This would require proving compliance each time work is undertaken.
- The electric magnetic field produced by Powerco's infrastructure are well below that of the levels allowed by the International Commission on Non-ionising Radiation Protection Guidelines.
- Given the low levels, it is suggested that this rule is deleted.
- Issue of electromagnetic field emissions is adequately managed through performance standard 14.2.1.3(1)

Point Number 836.17

Summary of Decision Requested: Retain Activity specific conditions 14.3.1.4 Permitted Activities relating to P5, except for the amendments sought below

AND

Amend Activity-specific conditions 14.3.1.4 Permitted Activities relating to P5 as follows:

(1) Any trimming, maintenance or removal of vegetation or trees associated with infrastructure that meet all of the following conditions:

(a) No tree identified in Schedule 30.2 is removed;

(b) Any required trimming of a tree identified in Schedule 30.2 is either:

(i) To remove dead, dying or diseased branches and the tree work is undertaken by a works and Utilities Approved arborist and; or

...

Note: Trees in and around electrical assets are required to be in accordance with the Electricity (Hazards from Trees) Regulations 2003 and be undertaken by a Utilities Approved Arborist.

Decision Reasons:

- No reasons provided.

Point Number 836.18

Summary of Decision Requested: **Retain** Activity Table 14.5.1 Permitted Activities and in particular Activity specific condition 14.5.1.1, except where rules are specifically addressed elsewhere in the submission.

Decision Reasons:

- Provides for lines and support structures as permitted if not exceeding 110KV, a height of 25m or 30m for co-location of two operators.

Point Number 836.19

Summary of Decision Requested: **Amend** Activity specific condition 14.5.1.2 Permitted activities relating to P4 as follows:

(a) Substations and associated transformers and switching stations distributing electricity that comply with the following:

...

(ii) Are located within the Business Zone, Business Town Centre Zone, Tamahere Business zone, Te Kowhai Airpark ZONE, Industrial Zone, Heavy Industrial Zone and Motor Sport and Recreation Zone; and the Rural Zone.

...

Decision Reasons:

- The Proposed District Plan permits lines and support structures in the Rural Zone, and as it is not considered to be a sensitive receiving environment the submitter believed substations and associated transformers and switching stations should also be permitted.

Point Number 836.20

Summary of Decision Requested: **Delete** Rule 14.5.2 RD2 Restricted Discretionary Activities

AND

Add a new non-complying activity rule as follows:

14.5.4 Non-Complying Activities

The activities listed below are non-complying activities:

NC1

Construction or alteration of a building for a sensitive land use that does not comply with Rule 14.5.1.3 (g),

Decision Reasons:

- Requests this becomes a non-complying activity to ensure such activities are discouraged

Point Number 836.21

Summary of Decision Requested: **Retain** Activity Table 14.6.1 Permitted activities, in particular P1 and P4 and the associated performance standards, except where rules are specifically addressed elsewhere in the submission.

AND

Amend Activity-specific condition 14.6.1.1(j) Permitted activities relating to to read:

(j) Solar panels on the roof of a building must not exceed 1.5m in height above the existing roof; or attached to a ground mounted frame

Decision Reasons:

- The submitter has small scale electricity generation units with solar panels that are at times attached to a ground mounted frame. Solar panels attached in this manner are not covered in the plan and therefore default to a non-complying activity.
- The effects of a small scale solar panel attached to a ground mounted frame are not significantly different to those attached to a building.

Point Number 836.22

Summary of Decision Requested: No specific decision sought, however the submitter seeks to ensure that the Proposed District Plan takes into account higher order documents with regards to infrastructure.

Decision Reasons:

- Give effect to higher order documents.

Point Number 836.23

Summary of Decision Requested: No specific decision sought, but submission states it is unclear if Rule 14.5.1 supersedes Rule 14.2.1 for new infrastructure and Rule 14.5.3 which makes new infrastructure in identified areas non-complying.

Decision Reasons:

- No reasons provided.

Point Number 836.24

Summary of Decision Requested: Amend the matters of discretion in Rule 14.5.2 RD1 Restricted Discretionary Activities as follows:

(a) Discretion is restricted to:

(i) The functional need and operational need of, and benefits derived from, the infrastructure;

(ii) The extent to which alternative technologies and techniques have been considered;

(iii) The extent to which co-location of overhead lines is technically, economically and practically reasonable;

(iv) The extent to which the proposal is in accordance with relevant industry standards and meets specified clearance requirements for operational and safety reasons;

(v) The extent to which the proposal will adversely affect the amenity values of the site and locality;

(vi) The extent to which there are difficult ground conditions, topography or obstructions which make undergrounding impractical.

Decision Reasons:

- No reasons provided.

Point Number 836.25

Summary of Decision Requested: Retain Policy 6.2.2- Recognise the national grid as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.26

Summary of Decision Requested: Retain Policy 6.2.3- Operation and development of the National Grid as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.27

Summary of Decision Requested: Retain Policy 6.2.4- Maintenance and minor upgrade the National Grid as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.28

Summary of Decision Requested: Retain Policy 6.2.5- Environmental effects as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.29

Summary of Decision Requested: Retain Policy 6.2.6- Reverse sensitivity and the National Grid as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.30

Summary of Decision Requested: Retain Policy 6.3.2- Utilising energy efficiency as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.31

Summary of Decision Requested: Retain Policy 6.3.3- Enabling renewable electricity generation as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.32

Summary of Decision Requested: **Retain** Chapter 14 Infrastructure and Energy as a separate section within the Proposed Waikato District Plan.
AND
Retain Chapter 6 Infrastructure as an Infrastructure chapter covering objectives and policies for utilities on a district-wide basis.

Decision Reasons:

- Containing these in a separate chapter will assist with plan administration and allow for the determination of an activity status to be much easier.

Point Number 836.33

Summary of Decision Requested: **Amend** Policy 3.4.3(a)(i) Maintaining and enhancing Significant Amenity Landscapes as follows:
(i) requiring buildings and structures (excluding support structures) to be integrated into the Significant Amenity Land to minimise any visual impacts;
OR
Add an introduction to Chapter 6 Infrastructure to clearly state that these objectives and policies supersede underlying zone and overlay objectives and policies.

Decision Reasons:

- Support structures come in standard sizes and materials to meet a functional need and achieve electrical safety requirements.
- They cannot be painted or planted around to mitigate visual effects.
- Support structures and lines are already in the existing environment of Significant Amenity Landscapes and does not detract from these areas.
- Given the narrow width of the narrow width of support structures and limited visibility of the lines existing within these landscapes, it is considered they be excluded from this policy.

Point Number 836.34

Summary of Decision Requested: **Retain** Objective 6.1.1 Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- Provide objectives and policies for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- This sentiment is supported by the submitter.

Point Number 836.35

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Recognises the functional and operational needs of infrastructure and is supported, along with the new definitions of these terms in Chapter 13.
- Recognises the importance of allowing for flexibility for operators to use new technological advances.

Point Number 836.36

Summary of Decision Requested: **Retain** Policy 6.1.3 Technological advances as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Recognises the importance of allowing for flexibility for operators to use new technological advances.

Point Number 836.37

Summary of Decision Requested: **Retain** Policy 6.1.4 Infrastructure benefits as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.38

Summary of Decision Requested: **Retain** Policy 6.1.5 Natural hazards and climate change as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.39

Summary of Decision Requested: **Add** an introduction to Chapter 6 Infrastructure as follows (or words to similar effect):
Introduction
The provisions within this chapter of the district plan apply across the district in all zones. The underlying zone objectives and policies do not apply to infrastructure activities unless specifically referred to within this chapter.

Decision Reasons:

- Prefer a clear statement indicating that the underlying zone and overlay objectives and policies do not apply to infrastructure activities unless specifically referred to within this chapter.

Point Number	836.40
Summary of Decision Requested:	Retain Policy 6.1.7 Reverse sensitivity and infrastructure as notified.
Decision Reasons:	<ul style="list-style-type: none"> Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
Point Number	836.41
Summary of Decision Requested:	Retain Policy 6.1.8 Infrastructure in the community and identified areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
Point Number	836.42
Summary of Decision Requested:	<p>Retain Objective 6.1.6 Reverse Sensitivity, except for the amendments sought below</p> <p>AND</p> <p>Amend Objective 6.1.6 Reverse Sensitivity as follows:</p> <p><i>(a) Infrastructure is protected from reverse sensitivity effects, and infrastructure (including the National Grid <u>and regionally significant infrastructure</u>) is not compromised.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Avoiding reverse sensitivity effects on infrastructure is supported, however seek that regionally significant infrastructure is explicitly provided for.
Point Number	836.43
Summary of Decision Requested:	<p>Retain Policy 6.1.9- Environmental effects, community health, safety and amenity, except for the amendments sought below</p> <p>AND</p> <p>Amend Policy 6.1.9 Environmental effects, community health, safety and amenity as follows:</p> <p><i>(a) Require the development, operation, maintenance, repair, replacement, upgrading and removal of infrastructure and its associated structures to avoid, remedy or mitigate <u>significant adverse effects as far as reasonably practicable</u>, on the environment, community health, safety and amenity.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> The policies need to take into account that the electricity infrastructure may often traverse sensitive landscapes and multiples zones and overlays. The form and function of utilities is generally consistent irrespective of the zone in which they are located. It is difficult to meet the provision requiring the consideration of the qualities and characteristics of surrounding environments. Focus on avoiding significant adverse effects as what is reasonably practicable. Submitter would like to see recognition that network utilities cannot always be located to avoid all adverse effects on communities.
Point Number	836.44
Summary of Decision Requested:	<p>Retain Policy 6.1.10 Infrastructure in identified areas, except for the amendments sought below</p> <p>AND</p> <p>Amend Policy 6.1.10 Infrastructure in identified areas as follows:</p> <p><i>(a) <u>Where possible and taking into account the lineal needs of infrastructure, and that the form and function of utilities is generally consistent irrespective of the zone, infrastructure must ensure consideration of the values, qualities and characteristics of Significant Natural Areas, Landscape and Natural Character Areas and Heritage Items when proposing new infrastructure or undertaking significant upgrades to existing infrastructure.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> The policies need to take into account that the electricity infrastructure may often traverse sensitive landscapes and multiples zones and overlays. The form and function of utilities is generally consistent irrespective of the zone in which they are located. It is difficult to meet the provision requiring the consideration of the qualities and characteristics of surrounding environments. Focus on avoiding significant adverse effects as what is reasonably practicable. Submitter would like to see recognition that network utilities cannot always be located to avoid all adverse effects on communities.
Point Number	836.45
Summary of Decision Requested:	Retain Policy 6.1.11 Undergrounding new infrastructure as notified.
Decision Reasons:	<ul style="list-style-type: none"> Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district. The above grounding of infrastructure is often needed or required for operational, functional, technical, cultural or economic reasons.
Point Number	836.46
Summary of Decision Requested:	Retain Policy 6.1.12 Co-location of compatible facilities as notified.
Decision Reasons:	<ul style="list-style-type: none"> Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
Point Number	836.47
Summary of Decision Requested:	Retain Policy 6.1.13 Future growth areas as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.48

Summary of Decision Requested: Retain Policy 6.1.14 Electromagnetic and radio frequency fields, as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.49

Summary of Decision Requested: Retain Policy 6.1.15 Raglan navigation beacons as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.50

Summary of Decision Requested: Retain Policy 6.3.4- Future renewable electricity as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.51

Summary of Decision Requested: Retain Policy 6.3.5-Existing renewable electricity facilities as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.52

Summary of Decision Requested: Retain Objective 6.3.6- Non-renewable energy as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.53

Summary of Decision Requested: Retain Policy 6.3.7- Recognise non-renewable energy resources as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.54

Summary of Decision Requested: Retain Policy 6.4.2- Provide adequate infrastructure as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3.

Point Number 836.55

Summary of Decision Requested: Retain Policy 6.4.3- Infrastructure Location and Services as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3.

Point Number 836.56

Summary of Decision Requested: Retain Policy 6.4.4- Road and rail network as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3.

Point Number 836.57

Summary of Decision Requested: Retain Policy 6.4.5- Roading infrastructure as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3.

Point Number 836.58

Summary of Decision Requested: Retain Policy 6.4.6- Stormwater and drainage as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3.

Point Number 836.59

Summary of Decision Requested: Retain Policy 6.4.7- Stormwater as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.
- Provides for integration of infrastructure with subdivision, land use and development including electricity services, particularly Objective 6.4.1 and Policy 6.4.3.

Point Number 836.60

Summary of Decision Requested: Retain Policy 6.5.2- Construction and operation of the land transport network as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.61

Summary of Decision Requested: Retain Policy 6.5.3-Road hierarchy and function as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.62

Summary of Decision Requested: Retain Policy 6.5.4- Road standards as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.63

Summary of Decision Requested: Retain Policy 6.5.5- Road safety as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.64

Summary of Decision Requested: Retain Policy 6.5.6- Network utility location as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.65

Summary of Decision Requested: Retain Policy 6.5.7- Vehicle access as notified.

Decision Reasons:

- Provide for the development, operation and maintenance of infrastructure and recognise the role they play in social, economic, cultural and environmental well-being of the district.

Point Number 836.66

Summary of Decision Requested: Add a new introduction to Chapter 14: Infrastructure and Energy as follows:

Introduction

The provisions within this chapter of the district plan apply across the district in all zones. The underlying zone objectives and policies do not apply to infrastructure activities unless specifically referred to within this chapter.

Decision Reasons:

- Considering utilities on a district-wide basis and containing all rules in a separate section will assist with plan administration.
- Enable both network utility operators and the community to be able to easily determine the status of an activity.

Point Number 836.67

Summary of Decision Requested: Retain Rule 14.3.1.3- Permitted Activities particularly clause 3 (b) and 3 (c) as notified.

Decision Reasons:

- Submitter supports Rule 14.3.1.3, particularly clause 3 (b) and (c) as drafted, for earthworks associated with infrastructure in Significant Amenity Landscape (SAL) permitting 50m3/250m2 and allowing aggregate/metal to be used in associated with underground infrastructure.

Point Number 836.68

Summary of Decision Requested: Retain Rule 14.3.1.1 Permitted Activities relating to P9 as notified.

Decision Reasons:

- Submitter supports Rule 14.3.1.7 P9, as drafted, which allows for minor infrastructure structure provided there is no connection to an area, façade or item specifically listed in Schedule 30.1.

Point Number 836.69

Summary of Decision Requested: Retain Rule 14.3.1.7 Permitted Activities relating to P11 as notified.

Decision Reasons:

- Submitter supports Rule 14.3.1.7 P11, as drafted, allowing signage associated with infrastructure that is required for health and safety or asset identification purposes and/or required by legislation.
- Powerco uses signs on its electricity assets for the purposes of asset identification and warning people of health and safety hazards, as required by other legislation. Such signs are important for the identification of assets and to warn the public of health and safety risk associated with utilities (such as high voltage electricity) or safety requirements for temporary works within the vicinity of the assets.

Point Number 836.70

Summary of Decision Requested: Retain Rule 14.3.1.8 Permitted Activities relating to P12 as notified.

Decision Reasons:

- Submitter is support of the criteria given the growth in the Waikato region. This ensures network utility operators have early involvement in the development of land in order to provide adequate servicing.

Point Number 836.71

Summary of Decision Requested: No specific decision sought, but submission seeks clarification around the "Coastal Environment" overlay, where Powerco assets are located and how the overlay fits within the District Plan. The submission seeks clarification as to what rules apply in the Coastal Environment.

Decision Reasons:

- The plan outlines "Identified Areas" included in the activity table in the Chapter 14: Infrastructure and Energy, but "Coastal Environment" is not included. Submitter understands this may occur in stage 2 of the plan development, which covers natural hazards and climate change.

Point Number 836.72

Summary of Decision Requested: Amend the Proposed District Plan to clearly outline and cross reference any applicable zone or overlay provisions that supersede any objectives, policies and rules within the "Infrastructure" Chapters.

Decision Reasons:

- Any applicable zone or overlay provisions, that supersede any objectives, policies and rules within the "Infrastructure" chapters should be clearly outlined, and cross referenced within "Infrastructure" chapters.

Point Number 836.73

Summary of Decision Requested: Retain the generally permissive nature of rules around development, operation, maintenance, repair, replacement, upgrading and removal of infrastructure,

Decision Reasons:

- No reasons provided.

Point Number 836.74

Summary of Decision Requested: Retain Activity Table 14.2.1 relating to all infrastructure as notified except where rules are specifically addressed elsewhere in the submission.

Decision Reasons:

- No reasons provided.

Point Number

836.75

Summary of Decision Requested:

Retain Activity Table 14.3.1 relating to all infrastructure as notified except where rules are specifically addressed elsewhere in the submission.

Decision Reasons:

- No reasons provided.

Submitter Number:

837

Submitter:

Stuart Seath

Point Number

837.1

Summary of Decision Requested:

Amend the zoning at 679 Whatawhata Road, Whatawhata from Rural Zone to Country Living Zone.

Decision Reasons:

- The property is close to the Hamilton Boundary.
- The property is uneconomic and not suitable for farming activities.
- The surrounding properties are being subdivided.
- The application of the Country Living Zone would enable better utilisation of the land.

Point Number

837.2

Summary of Decision Requested:

Delete Rule 22.4.1.2 RD1 (a)(i) General Subdivision in relation to the property at 679 Whatawhata Road, Whatawhata.

Decision Reasons:

- The general subdivision rules are restrictive and unreasonable. The rules should enable the subdivision of uneconomic blocks.
- This would provide for better utilisation of the property.

Point Number

837.3

Summary of Decision Requested:

Delete Rule 22.4.1.2 RD1 (a)(iii) General Subdivision, in relation to the property at 679 Whatawhata Road, Whatawhata.

Decision Reasons:

- The general subdivision rules are restrictive and unreasonable. The rules should enable the subdivision of uneconomic blocks.
- This would provide for better utilisation of the property.

Submitter Number:

838

Submitter:

Madsen Lawrie Consultants

Point Number

838.1

Summary of Decision Requested:

Amend Rule 16.3.2(a)(i) Minor dwelling to reduce the net site area required for a minor dwelling to 600m².

Decision Reasons:

- Having a requirement for a 900m² net site area to establish a minor dwelling seems redundant given that subdivision to allow two primary dwellings on site has the same net site area requirement.
- As a result, there should be a smaller net site area requirement for a minor dwelling.
- Multi-unit development in the residential zone allows 1 residential unit per 300m³. Such multi-unit development allows greater dwelling capacity.
- The net site area requirement for a minor dwelling would be more appropriate at 600m² in line with a multi-unit development and the allowable subdivision lot size of 450m².

Point Number

838.2

Summary of Decision Requested:

Amend Rule 16.4.1(a)(i) Subdivision - General to reduce the net site area requirement from 450m² to 300-350m² for subdivisions in the Residential Zone.

Decision Reasons:

- A minimum net site of 450m² is too large to adequately reduce urban sprawl and provide concentrated areas of urban development.
- Higher density development in residential zoned areas should be promoted to preserve and maintain the regions land resources especially as land outside of residential areas is largely used for activities that produce economic gain for the district.

Point Number

838.3

Summary of Decision Requested:

Amend Rule 16.4.1(a)(iv) Subdivision - General to increase the allowable percentage of rear lots when creating 4 or more lots.

Decision Reasons:

- A rear lot percentage not exceeding 15% is unrealistic.
- If a site was to be subdivided to create 4 or more lots a requirement of less than 15% rear lots would mean that none of these lots would be able to be a rear lot.
- For many properties, the size and shape of the lot will dictate the rear lots are required to a percentage of up to 40%-50% to allow for appropriate future development and compliant building platforms and associated outdoor living/outlook spaces.

Point Number

838.4

Summary of Decision Requested:	Amend Rule 16.4.11(a) Subdivision - Road frontage to reduce the requirement for a 15m road frontage for every lot with a road boundary.
Decision Reasons:	<ul style="list-style-type: none"> • 15m of road frontage is excessive and a high width requirement such as this will promote non-compliance with rear lot percentages in certain situations.
Point Number	838.5
Summary of Decision Requested:	Amend Rule 16.4.12(a) Subdivision - Building platform to reduce the size of the building platform required.
Decision Reasons:	<ul style="list-style-type: none"> • The proposed building platform sizes are large and a smaller size would be more suitable in the Residential Zone, particularly where multi-storey dwellings are appropriate.
Point Number	838.6
Summary of Decision Requested:	Amend Rule 17.3.6(a)(i) Dwelling to clarify that this rule is relevant to multi-storey developments with road frontage only in the Business Zone.
Decision Reasons:	<ul style="list-style-type: none"> • A dwelling at ground level should be permitted, provided the dwelling does not have road frontage.
Point Number	838.7
Summary of Decision Requested:	Retain Rule 22.2.3.1(P2)(a) Earthworks - General with a threshold of 1000m3 for permitted earthworks on a site.
Decision Reasons:	<ul style="list-style-type: none"> • This is an appropriate volume for rural sites.
Point Number	838.8
Summary of Decision Requested:	Amend Rule 22.3.7.1(a)(iii) Building setbacks - all boundaries to reduce the required boundary setback from adjoining sites over 6ha.
Decision Reasons:	<ul style="list-style-type: none"> • There are a lot of titles in Franklin that are smaller than 8,000m2 specified in the Proposed District Plan as these have been approved under the Franklin Section of the Operative District Plan that allows subdivision to a lot size of 2,500m2. • Implementing a 25m setback from adjoining sites that are over 6ha could be very challenging on such sites.
Point Number	838.9
Summary of Decision Requested:	Add to Rule 22.4.1.1PR3(c) Prohibited subdivision as follows: <i>(c) Rule PR3(a) does not apply to the following:</i> ... <i>(iii) a transferable title subdivision in the former Franklin District on a parent Certificate of Title that existed prior to 6 December 1997.</i>
Decision Reasons:	<ul style="list-style-type: none"> • No reason provided.
Point Number	838.10
Summary of Decision Requested:	Amend Rule 22.4.1(a)(iv) Boundary relocation to reduce the minimum lot size resulting from boundary relocation to at least 4,000m2, if not 2,500m2. OR Amend Rule 22.4.1.4(a)(iv) Boundary relocation to include a specific clause enabling boundary relocation for pre-existing lots smaller than 8,000m2 that have been previously created via compliance with the Franklin Section of the Operative Waikato District Plan.
Decision Reasons:	<ul style="list-style-type: none"> • Under the Operative Waikato District Plan Franklin Section, there is provision for lot size of down to 2,500m2 in the Rural Zone. • By imposing a minimum lot size requirement of 8,000m2 for lots resulting from boundary relocation it would preclude lots smaller than 8,000m2 that have been created under the current Franklin section of the Operative District Plan from being able to undertake boundary relocation subdivision in the future. • A minimum lot size of 8,000m2 will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots. • 8,000m2 is not a management sized lot and rural usage of the land will not be utilised to its full potential.
Point Number	838.11
Summary of Decision Requested:	Retain the indicated areas to be legally protected and the resultant maximum number of new records of title in Rule 22.4.1.6(a)(i) Conservation lot subdivision as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The proposed contiguous area required for the production of new records of title are achievable and appropriate within the region and will serve to protect generous regions of significant natural areas.
Point Number	838.12
Summary of Decision Requested:	Add clarification of the term "contiguous area" and a "Significant Natural Area", as contained in Rule 22.4.1.6(a)(i) Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • Further definition of this term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number 838.13

Summary of Decision Requested: **Amend** Rule 22.4.1.6(a)(vi) Conservation lot subdivision to reduce the minimum lot size requirement from 8,000m² to 2,500m² or 4,000m².

Decision Reasons:

- A minimum lot size of 8,000m² will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- 8,000m² is not a manageable-sized lot and rural usage of the land will not be utilised to its full potential.
- The Franklin region has been allowed to subdivide down to 2500m² in the Rural Zone and this needs to be considered and incorporated, especially with regard to the existing rural character.
- Regional Council has a 2500m² minimum in the Rural Zone.

Point Number 838.14

Summary of Decision Requested: **Amend** Rule 22.4.1.6(a)(vii) Conservation lot subdivision to increase the maximum lot size for proposed lots (excluding the balance lot) to more than 1.6ha.

Decision Reasons:

- There should be the opportunity to make lots larger than 1.6ha it is appropriate for the site and will enhance rural activities or is more in character with the surrounding area.

Point Number 838.15

Summary of Decision Requested: **Amend** Rule 22.4.1.6(a)(vii) Conservation lot subdivision by removing references to "of its equivalent in a previous District Plan". The rule should instead reference any feature protected under the Proposed Plan only.

Decision Reasons:

- This rule appears to preclude any protection of existing unprotected qualifying or significant natural features that since the previous environmental lot subdivision qualify for protection under the proposed rules.

Point Number 838.16

Summary of Decision Requested: **Amend** Rule 23.3.6(P1) Building coverage to increase the percentage of permitted building coverage.

Decision Reasons:

- Total building coverage of 10% or 300m² is too small, rural sized dwellings with accessory buildings could easily exceed this whilst still being entirely appropriate for areas of country living.

Point Number 838.17

Summary of Decision Requested: **Amend** Rule 23.4.2(RD1)(a)(i) General subdivision to decrease the minimum net site area from 5,000m² to 2,500m²-3,500m².

Decision Reasons:

- A minimum lot size of 5,000m² is too large for an area designated as a country living zone.
- A lot size closer to 2,500m² would be more appropriate whilst maintaining a country atmosphere and density development.
- Would be consistent with the Auckland Unitary Plan.
- A minimum lot size of 5,000m² is very generous and has a high probability of resulting in fragmentation of rural land and will potentially designate productive land for inappropriate use in large residential lots.
- 5,000m² is not a manageable sized lot and rural usage of the land will not be maximised.
- Regional Council has a 2,500m² minimum in the rural zone to minimise urban sprawl and best maintain and enable efficient usage of rural land.

Point Number 838.18

Summary of Decision Requested: **Amend** Rule 22.4.1.2 General subdivision to note or refer to exceptions to this rule, as in the Operative District Plan, i.e. those that are classified as Prohibited subdivision.

Decision Reasons:

- Specification of exceptions to this rule will ease interpretation and understanding of the rule.

Point Number 838.19

Summary of Decision Requested: **Add** clarification of the term "Significant Natural Area" in the context of Rule 22.4.1.6(a)(i) Conservation lot subdivision.

Decision Reasons:

- Further definition of this term will aid in the interpretation of the rule and will assist in the identification of areas eligible for subdivision under this rule.

Point Number 838.20

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(i) General subdivision to match the issue of title date with the operative date of the Proposed District Plan.

Decision Reasons:

- The Proposed District Plan is incorporating Franklin section titles that have not had this opportunity for subdivision previously so should not be penalised by the implementation of the date restriction which is only relevant to the Waikato section of the Operative District Plan.

Point Number 838.21

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(ii) General Subdivision

Decision Reasons:

- This minimum title size is appropriate for the rural area and will serve to not fragment land within the district.

Point Number 838.22

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(iii) General subdivision as follows:

The proposed subdivision must create no more than one additional lot, excluding an access, for every compliant parent certificate of title.

Decision Reasons:

- As the rule reads in its current form it is not clear that subdivision must not create more than one lot per every compliant parent certificate of title.
- It could be interpreted that no more than one lot is created per subdivision regardless of the number of compliant parent certificate of titles that are involved.

Point Number 838.23

Summary of Decision Requested: **Amend** Rule 22.4.1.2(a)(iv) General subdivision to reduce the minimum lot size to 4,000m2.

Decision Reasons:

- A minimum lot size requirement of 4,000m2 will allow for some flexibility while still providing generous sized lots appropriate in the Rural Zone.
- A minimum lot size of 8,000m2 will only serve to fragment rural land and potentially designate productive land for inappropriate use in large residential lots.
- 8000m2 is not a manageable sized lot and rural usage of the land within many 8000m2 lots will not be utilised to its full potential.
- Regional council has a 2,500m2 minimum in the Rural Zone which should be considered when designating lot minimum area so as to minimise urban sprawl and best maintain the rural land resources in the district.
- This is particularly relevant for the Franklin area as subdivision is currently allowable to 2,500m2 and for future development to be consistent with existing development a smaller lot size than 8,000m2 would be more appropriate.

Point Number 838.24

Summary of Decision Requested: **Amend** Rule 22.4.1.4(a)(i) Boundary relocation to remove specification of a date for titles undergoing the boundary relocation.

Decision Reasons:

- Imposing a specific date that the titles undergoing boundary relocation have to have been issued before is an excessive restriction and constraints of this level are not appropriate for boundary relocation.
- It is unclear as to what will be achieved by the imposition of such a date.

Submitter Number: 839

Submitter:

Mark Woodham

Point Number 839.1

Summary of Decision Requested: **Retain** the Residential zoning of the property 6257 Great South Road, Horotiu.

Decision Reasons:

- Will provide housing for employees of businesses that have moved into the area
- Provide economic opportunities
- Close proximity to the expressway
- Provides access to river trails
- School is within walking distance
- Will be consistent with the development of surrounding properties.

Submitter Number: 840

Submitter:

Colette Brown

Point Number 840.1

Summary of Decision Requested: **Retain** the Residential zoning of the property at 6257 Great South Road, Horotiu.

Decision Reasons:

- Provides better housing opportunities for the anticipated growth in the area.
- Provide housing for the employees working for the businesses that have moved into the area.
- Close proximity to the expressway and services.
- Will fit in with neighbouring properties.

Submitter Number: 841

Submitter:

Henry Gao

Point Number 841.1

Summary of Decision Requested: **Amend** the zoning of the property at 133 Buckville Road, Buckland from Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west within Auckland Council's territory is zoned Future Urban under the Auckland Unitary Plan. This means potentially residential housing and therefore a residential environment in this locality rather than a large open space rural environment.
- The property does not contain prime soils
- Given the close proximity to Buckland and Pukekohe, a change in the zoning is a logical progression.

Submitter Number:	842	Submitter:	Patricia Honoria Rogers
On behalf of:	Matthew Rogers, Catherine Rogers, Martin Mooney, Helen Mooney		
Point Number	842.1		
Summary of Decision Requested:	Amend the zoning at 51 Jamieson Road, Buckland, from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan. This could mean residential housing and therefore a residential environment in this locality, rather than a large open space rural environment. The subject property does not contain prime soils. It is a logical progression in zoning, given the close proximity to the village of Buckland and Pukekohe. 		

Submitter Number:	844	Submitter:	Brett McDougall
On behalf of:	Churchill Property		
Point Number	844.1		
Summary of Decision Requested:	Delete the Significant Natural Area overlays from 980 Churchill Road, Otuiti, Pukekawa.		
Decision Reasons:	<ul style="list-style-type: none"> These are low areas, not suitable for maize crops. It is a drain but is grey willow and elders. The predominant vegetation dries out naturally 4-5 months per year (January to May, sometimes to June), but are also prone to flooding. See submission for photos. 		

Submitter Number:	845	Submitter:	Grace M Wilcock
Point Number	845.1		
Summary of Decision Requested:	Amend maps to show the Significant Natural Areas in Tamahere gullies as being only of local significance and no regional significance.		
Decision Reasons:	<ul style="list-style-type: none"> There is little or no endangered flora or fauna in gullies that are severely compromised due to their content being mostly exotics and weed species such as grape, ivy, hops, blackberry, even in QEII areas. 		
Point Number	845.2		
Summary of Decision Requested:	Add to the text that the Tamahere gully systems are an ecological corridor.		
Decision Reasons:	<ul style="list-style-type: none"> There are few endangered flora/fauna in gullies that are severely compromised – they are mostly exotics and weed species such as grape, ivy, hops, blackberry. 		
Point Number	845.3		
Summary of Decision Requested:	Amend to confirm that the Rosebanks/Windmill gullies are a joined corridor with no gap between 152 Rosebanks Drive and 117 Windmill Road, Hamilton.		
Decision Reasons:	<ul style="list-style-type: none"> The proposed new maps show the Rosebanks/Windmill gullies as a joined corridor with no gap. Require confirmation that this is correct. 		
Point Number	845.4		
Summary of Decision Requested:	Amend the maps to show the boundary of the Significant Natural Areas in Tamahere gullies are at the exact top edge of the gully.		
Decision Reasons:	<ul style="list-style-type: none"> The new Significant Natural Areas appears on the maps to extend beyond the gully edge. This may be a fence line set back from the gully edge. The Significant Natural Area boundary should be at the exact top edge of the gully. 		
Point Number	845.5		
Summary of Decision Requested:	Add text to assure the owners at 117 Windmill Road, RD3, Hamilton that there will be no future incremental/creep on more stringent conditions/rules on Significant Natural Area compliance but still be included as part of land calculations for possible future subdivision.		
Decision Reasons:	<ul style="list-style-type: none"> Meetings in 2015 and 2016 informed residents of Significant Natural Areas, but this review has changed the areas without directly contacting owners Some property owners may not be aware of a Significant Natural Area on their land and all the associated requirements that go along with a Significant Natural Area. The responsibility should be 100% the owners, and 0% the responsibility of the Waikato District Council. 		

Point Number	845.6
Summary of Decision Requested:	Add a new rule to Rule 23.4 Subdivision similar to Policy 3.2.8 (Natural Environment – Incentivise subdivision); AND Amend Policy 3.2.8 Incentivise subdivision, to apply to the Country Living Zone.
Decision Reasons:	<ul style="list-style-type: none"> Property owners in the Country Living Zone are equally affected by this new environmental policy.

Point Number	845.7
Summary of Decision Requested:	Delete walkway at the end of Windmill Road, Hamilton and across the private paddock and creek.
Decision Reasons:	<ul style="list-style-type: none"> This walkway serves no purpose as terrain once leaving the paddock is extremely steep; only experienced hikers would attempt to scale the sides of this gully. The creek area floods frequently and so the gully floor is then inaccessible making this walkway even more impractical. The imposed Significant Natural Area further compromises the submitter's rights.

Point Number	845.8
Summary of Decision Requested:	Amend the Proposed District Plan to ensure that Significant Natural Area land area is included as part of land calculations for possible future subdivision.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	846	Submitter:	Family Jepma
On behalf of:	Family Jepma Trust Account		
Point Number	846.1		
Summary of Decision Requested:	Amend the zoning at 472 Tauwhare Road, Matangi, from Rural Zone to Village Zone; OR Amend the zoning at 472 Tauwhare Road, Matangi, from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> Currently there is subdivision in this area and a high demand for lifestyle blocks for families. The submitters are close to the Matangi Village, schooling and social activities and Matangi Hall for sense of community, so future council services may become available this would make it more viable to build to those lots of development It would maintain the semi-rural character of Matangi Property has drain free soil and is a safe walking distance to village. 		

Submitter Number:	850	Submitter:	M & J Balchin
Point Number	850.1		
Summary of Decision Requested:	Retain the Village Zone for the property at 27 Macks Road, Pokeno as notified.		
Decision Reasons:	<ul style="list-style-type: none"> Provides for an efficient use of land resources. Enables the subdivision of land to provide for the growth of the district. The site contains limited development constraints making it an appropriate site for low density residential use. It is in close proximity to the existing urban area of Pokeno. The land comprises easy terrain that is suitable for low density residential development, and efficient use of the urban land resource. The proposal creates low density residential growth within an appropriate area, directing it away from rural and coastal areas in the District. Some of the rural areas of Pokeno contain versatile soils that are used for rural production activities, which contribute significantly to both the regional and national food supply. Intensification of urban land at higher densities should be encouraged within Pokeno residential areas to ensure that land supply requirements meet while preserving soil resources. Maximisation of the lands low density residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area past the lifetime of the Plan. Village Zone is an appropriate use of the land given its proximity to the urban area of Pokeno. 		

Submitter Number:	851	Submitter:	Windover Downs Ltd
Point Number	851.1		
Summary of Decision Requested:	Amend the zoning of 118F Barnaby Road, Tuakau, from Rural Zone to Village Zone.		
Decision Reasons:	<ul style="list-style-type: none"> Site contains limited development constraints making it an appropriate site for low density residential use (Village). Rural zoning is an inefficient use of a land resource that is in close proximity to the existing urban area of Tuakau. Approximately two-thirds of 118F Barnaby Road comprises easy terrain that is suitable for residential development. Low density residential development will represent an efficient use of the urban land resource. Rezoning the land will provide a buffer from the proposed Residential Zone of the properties immediately south of the site, providing a smoother transition in zoning and typical land uses carried out over this area of land. Water, storm water and wastewater services could be extended down Barnaby Road, or from development of residential land to the south to service the site. 		

- Areas immediately adjacent to the existing Residential zone are likely to be suited to village subdivision due to the availability of water and sewage reticulation.
- Council should give consideration to village subdivision in suitable located areas which are able to utilize urban services.
- Current zoning results in an awkward section of rural land between residential land directly to the south and village zoned land directly to the east and west.
- No assessment in s32 analysis as to why land has been zoned rural.
- Proposal creates low density residential growth within an appropriate area and directs residential growth away from rural and coastal areas in the District.
- Some of the rural areas of Tuakau contain versatile soils that are used for rural production activities, which contribute significantly to both the regional and national food supply.
- Intensification of urban land at higher densities should be encouraged within Tuakau residential areas to ensure that land supply requirements meet while preserving soil resources.
- Maximisation of the land's low density residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area past the lifetime of the Plan. This site is not made up of elite/prime soils.

Submitter Number:	853	Submitter:	Paul Manuell
Point Number	853.1		
Summary of Decision Requested:	Retain the re-zoning of land for residential use within Tuakau, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Overall submission supports the intent of the Proposed District Plan and rezoning of land for residential and business use in the Tuakau area for the following reasons: <ul style="list-style-type: none"> - Consistency with PC16 where extensive resources were invested by Council and landowners which determined the site was suitable for residential development. - Supports financial and resource commitments from land owners involved in previous plan making processes and Resource Consenting processes to develop land in the Tuakau area. - Zoning of residential land gives effect to the NPS on Urban Land Capacity which identifies the Waikato District as a high growth urban area. 		
Point Number	853.2		
Summary of Decision Requested:	Amend the zoning of the property at 36 Barnaby Road, Tuakau, from the Village Zone to Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Site contains limited development constraints making it an appropriate site for residential use. • Village zoning is an inefficient use of a land resource that is in close proximity to the existing urban area of Tuakau. • Approximately two-thirds of the site comprises easy terrain that is suitable for residential development, an efficient use of the urban land resource. • Water, storm water and wastewater services could be extended down Barnaby Road, or from development of residential land to the east to service the site. • Areas immediately adjacent to the existing Residential zone are likely have water and sewage reticulation available. • Council should give consideration to residential subdivision in suitably located areas that are able to utilize urban services. • Current zoning results in an awkward section of rural land between residential land directly to the south and village zoned land directly to the east and west. • No assessment in s32 analysis as to why land has been zoned rural. • Proposal creates low density residential growth within an appropriate area and directs residential growth away from rural and coastal areas in the District. • Some of the rural areas of Tuakau contain versatile soils that are used for rural production activities, which contribute significantly to both the regional and national food supply. • Intensification of urban land at higher densities should be encouraged within Tuakau residential areas to ensure that land supply requirements meet while preserving soil resources. • Maximisation of the lands low density residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area past the lifetime of the Plan. • Fails to give effect to the Future Proof Strategy identified in Section 1.5.1 of the Plan around control over rural-residential development and encouraging greater urban densities in existing settlements. • In respect of the strategy the proposed Village zone is considered to be an inefficient use of residential land. 		
Point Number	853.3		
Summary of Decision Requested:	Retain Rule 16.4.1 Subdivision - General, except for Rule 16.4.1 RD1(a)(iii); AND Delete Rule 16.4.1 RD1(a)(iii) Subdivision - General; AND Add new matter of discretion to Rule 16.4.1 RD1(b) Subdivision - General, as follows: <u>Where roads are to be vested in Council, they must follow a grid layout.</u>		
Decision Reasons:	<ul style="list-style-type: none"> • Provides for efficient use of the land resources. • Enables the subdivision of land to provide for the growth of the district. 		
Point Number	853.4		
Summary of Decision Requested:	Delete Rule 16.4.1 RD1(a)(iii) and make it a matter of discretion.		
Decision Reasons:	<ul style="list-style-type: none"> • Accept the grid layouts result in increased permeability, legibility and walkability of residential areas, however the establishment of formal and informal grid patterns may not be appropriate. • Sites with topographical, natural or physical constraints may be unable to practically implement a grid layout. • There may be sites where the lay of the land is best suited to an alternative roading design. • There is no analysis in s32 regarding relevance or practicality of this rule. • Grid layouts are an accepted urban design principle for good subdivision design, yet they are not an absolute response and therefore be use as a principle not enforced through a rule. 		
Point Number	853.5		
Summary of Decision Requested:	Delete Rule 16.4.13 RD1(a) Subdivision creating reserves, and make it a matter of discretion.		
Decision Reasons:			

- Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective.
- Enforcement of this rule may increase the cost of development which could be passed onto purchasers.
- It is an arbitrary standard which may not be relevant for all reserve types or developments.
- Safety and surveillance of reserves may be achieved with less road frontage.
- There is no analysis in the s32 stating why the 50% rule has been applied, and while this may be a principle to follow it should not be enforced through a plan.

Submitter Number:	854	Submitter:	Carleys Transport Limited
Point Number	854.1		
Summary of Decision Requested:	Retain the Industrial Zone of the property at 42 Rata Street, Te Kauwhata, as notified (see map attached to submission).		
Decision Reasons:	<ul style="list-style-type: none"> • Provides consistency with previous planning documents. • The zoning ensures suitable Industrial land is provided to support business activities in the Te Kauwhata area. • Ensures the existing established business is located in an appropriate zone. 		
Point Number	854.2		
Summary of Decision Requested:	Amend the zoning of the western portion of the property at 17 Scott Road, Te Kauwhata, from Residential Zone to Industrial Zone, aligning the zone boundary with the open drain (see map attached to submission).		
Decision Reasons:	<ul style="list-style-type: none"> • Rezoning the land identified will reduce the length of Industrial/Residential Zone boundary therefore reducing the number of houses backing onto the Industrial Zone, reducing the potential for conflict and ensures a higher level of amenity. • The proposed zoning does not align with landscape features including a large drain. • Accessing and developing the land on this property for residential purposes will be constrained by the drain. • Zoning has been placed along the property boundary giving little consideration to existing features and constraints of the land resulting in an inefficient and poor zoning decision. • Proposed zoning results in a larger area of residential land adjoining the Industrial Zone. • Zoning may result in conflict between residential and industrial activities as residential land is surrounded by Industrial zoning, which permits more noise, odour, light and dust than residential. • Could result in reverse sensitivity for established industrial activities. 		

Submitter Number:	855	Submitter:	Peter Buckley
Point Number	855.1		
Summary of Decision Requested:	Amend the identification of Significant Natural Areas so that any areas identified as a Significant Natural Areas remain contestable by the landowners until there has been a physical audit undertaken of the area and this audit should be carried out by a panel which should be made up of:		
	<ul style="list-style-type: none"> • An independent Rural representative; • A Council representative; • An ecologist; and • The Landowner or their representative. 		
Decision Reasons:	<ul style="list-style-type: none"> • Majority of problems landowners have with Significant Natural Areas is around the designation rather than definitions of Significant Natural Area. • By allowing the right to contest the designation at any time up until the audit is carried out means any areas that been designated as part of a desktop exercise can either then be accepted or rejected based on scientific and onsite results of an audit. • It would give time for Council to designate the areas that they deem to be Significant Natural Areas, notify all landowners of the designation of a Significant Natural Area and then allow land owners to either agree with designation or to lodge a request for an audit of the area (within a three month window of time from being notified by Council). • The requirement to allow the designation to be contestable would remove the time constraints that are imposed by the current proposal and remove the need for expensive legal action by either landowners or Council due to the arbitrary decision to make all Significant Natural Areas come into force on the date of the enabling legislation without the automatic right of challenge by the landowner. • There is unlikely to be a flood of applications to contest the designation of Significant Natural Areas, unless the Council got the original designation decision wrong based on a lack of adequate scientific information or onsite knowledge underpinning the decision. • Taking away time constraints will remove a lot of heat and angst from this issue, whilst allowing the council to protect any areas that may be Significant Natural Areas from any inappropriate use or development. • Even though contestability would be within any time frame up until a physical audit has been carried out to confirm the designation, the designation in itself would protect the areas from any inappropriate use or development in spite of the contestability remaining. 		
Point Number	855.2		
Summary of Decision Requested:	No specific decision sought, but submission opposes the Significant Natural Area on the property at 1036 Island Block Road, Te Kauwhata, due to the impact that this has on their ability to carry out day to day maintenance work like cleaning of drains within the Significant Natural Area.		
Decision Reasons:	<ul style="list-style-type: none"> • Within the area designated as a Significant Natural Area, landowners cannot carry out any work and this can have a severe effect on their livelihood and land value. 		

Submitter Number:	857	Submitter:	Black Sands Trust
Point Number	857.1		
Summary of Decision Requested:	Retain the Rural Zoning at 2759 River Road, Tuakau (Lot 1 DP 58371), as notified; AND Add a "business overlay area" to the property at 2759 River Road, Tuakau, to allow for current and possible future business activities on the site within the rural environment.		

Decision Reasons:

- The site has not been used for Aggregate Extraction for several years.
- The change in zoning to Rural Zone makes practical sense, because the Aggregate Extraction zone has become redundant.
- The change in zoning will be of similar character to several adjoining sites.
- The Rural Zone will permit one dwelling on the site and the 3.97ha site has ample space to construct a dwelling, which is able to comply the relevant rural standards and still accommodate the approved resource consent activities.
- Rural amenity remains the same as a result of the change in zoning and there will be no change to the wider environment.
- There will be no adverse effects on the Waikato River as River Road and a small Recreation Reserve buffers the site from the river.
- The change will be positive in that land can be used for rural activities.
- Waikato Council recently granted a land use consent for the site 'to utilise existing buildings on the site to establish a nursery/garden centre and a cafe on the site zone Aggregate Extraction Zone' (LUC0040/18).

Submitter Number:

859

Submitter:

Stephen Roberts

Point Number

859.1

Summary of Decision Requested:

Amend the zoning within the proposed subdivisions of Ngaruawahia South Map 20.7 from Residential Zone to Reserve Zone, to create a visual amenity area from Puke-I-aahua Pa site (Havelock Hill) to the knoll (see map attached to submission for location, between Jackson Street, Saubrey Road and the proposed Rangimarie Road extension).

Decision Reasons:

- The knoll is highly visible from the surrounding areas while giving stunning views of the surrounding countryside and therefore needs to be preserved from development as a green open space.
- This would enhance visual amenity for the surrounding district and the new intensive residential areas envisaged while providing recreational opportunities for the town and those using the proposed walk/cycle ways.
- The knoll and key ridge lines as a reserve would augment the green space already represented by Havelock Hill creating a visual green corridor and together they would create a green buffer that maintains some vestige of a rural outlook for the surrounding houses.
- Section 32 report part 2 reserves: supports the creation of new reserves and the preservation of natural landscapes consistent with the nature and character of the local environment.
- Creates opportunities to implement the Proposed District Plan - namely: Section 1.12.2 Natural Environment.
- The provision of green spaces enhances well being and maintains the towns rural tradition while allowing for staged development.
- Aligns with Section 3.4 (3.4.1, 3.4.2, 3.4.3), section 4 (4.1.9, 4.2.2, 4.2.9, 4.7.10) and section 8 (8.1 and 8.2) of the Proposed District Plan.

Submitter Number:

860

Submitter:

Aggregate and Quarry Association (AQA) and Straterra

Point Number

860.1

Summary of Decision Requested:

Retain Section 1.4.2.3 (a)(v) Challenges.

Decision Reasons:

- Note that the environmental impacts of extraction can be managed and so the negative impacts on growth from this are minimal. The positive impacts on growth from the extractives sector are significant.

Point Number

860.2

Summary of Decision Requested:

Retain 1.4.3.1 (a) Rural Activities

AND

Amend Section 1.4.3.1 Rural activities to include quarries.

Decision Reasons:

- Submitter is pleased to see the inclusion of mining in this list and recommend that quarries be included.
- It should be noted that where extractive activities are carried out is dictated/constrained by where the mineral deposits are located.

Point Number

860.3

Summary of Decision Requested:

Retain Section 1.5.7.7(a) Energy.

Decision Reasons:

- The importance of energy infrastructure including coal mines and coalfields is noted and welcome.

Point Number

860.4

Summary of Decision Requested:

Retain Policy 4.7.11(b) Reverse sensitivity

AND

Amend Policy 4.7.11 (b) Reverse sensitivity to include areas set aside where new mines and quarries may be located.

Decision Reasons:

- Due to the nature of the extractive sector and its impacts - including noise, vibration and dust, it is for the benefit and comfort of residents as well as the general public, to not allow new dwellings in the vicinity of extraction activity.
- The same should also apply to areas set aside where new mines and quarries may be located.

Point Number

860.5

Summary of Decision Requested:

Retain Policy 5.3.7 (a) (ii) and (iii) Reverse Sensitivity Effects.

Decision Reasons:

- Submitter supports this inclusion and notes its relevance to Policy 4.7.11.

Point Number 860.6

Summary of Decision Requested: **Retain** Policy 5.3.13 (a) Waste management activities
AND
Add a similar policy for mining sites.

Decision Reasons:

- The rehabilitation of quarry sites brings huge benefits for the community in the form of biodiversity or wet land sinks or a recreational or residential areas.
- The same applies to mining sites and this needs to be recognised by the plan.

Point Number 860.7

Summary of Decision Requested: **Retain** Policy 5.3.15 (a)(i) Noise and Vibration.

Decision Reasons:

- Support but note this emphasises the importance of dealing with reverse sensitivity impacts so that the area surrounding extractive sites is able to accommodate sounds and vibrations necessarily associated with the sector and that there are not incompatible land uses within the surrounding areas.

Point Number 860.8

Summary of Decision Requested: **Retain** Policy 5.3.17 (b) Specific area - Huntly Power Station - Coal and ash water.

Decision Reasons:

- No reasons provided.

Point Number 860.9

Summary of Decision Requested: **Retain** Objective 5.4.1 (a) Minerals and extractive industries.

Decision Reasons:

- The minerals and extractive sectors continue to contribute \$2453 million in GDP and directly employ 6,050 people jobs, across New Zealand. The Waikato District has one of the larger extractive sectors in the country.
- In addition to this, the sector's outputs (coal, rock sand, and gravel etc.) are crucial to the growth of the district within the infrastructure and energy sectors.

Point Number 860.10

Summary of Decision Requested: **Retain** Policy 5.3.15 (a)(vii) Noise and vibration.

Decision Reasons:

- No reason provided.

Point Number 860.11

Summary of Decision Requested: **Retain** Policy 5.4.2 (b) (i) and (ii) Access to minerals and extractive industries.

Decision Reasons:

- Strongly support the identification of potential extractive industries sites.
- To secure future supplies of minerals (including but not limited to coal, rock, sand and gravel) it is in the community's interests to have identified these key resource areas and protect them.

Point Number 860.12

Summary of Decision Requested: **Retain** Policy 5.4.2 (c) Access to Minerals and extractive industries.

Decision Reasons:

- Due to the nature of the extractive sector and its impacts- including noise, vibration and dust, it is for the benefit and comfort of residents as well as the general public, not to allow new dwellings in the vicinity of extraction activity.

Point Number 860.13

Summary of Decision Requested: **Retain** Policy 5.4.2 (d) Access to minerals and extractive industries.

Decision Reasons:

- No reasons provided.

Point Number 860.14

Summary of Decision Requested: No specific decision sought, but submission states it is important to identify key quarry resource areas and protect them, particularly given that the resources can only be sourced where they are located.

Decision Reasons:

- Growing districts need to secure supply of quarry material to provide affordable housing and infrastructure now and for future generations.
- In order to secure supplies, planning must be accommodating.
- Bad planning has the potential to sterilise existing and future resources which means lost opportunities for the local economy.

Point Number 860.15

Summary of Decision Requested: No specific decision sought, but submission considers it is important that non-compatible land uses such as residential areas are not allowed to encroach on quarries.

Decision Reasons:

- An important issue for quarries operating in areas of expanding residential growth is reverse sensitivity.
- Effects include noise, vibration and dust.
- Managing these surrounding land uses is important for the benefit and comfort of residents as well as the general public.

Point Number 860.16

Summary of Decision Requested: No specific decision requested, but submission considered planning rules need to allow for fluctuating demands and periods of quarry inactivity.

Decision Reasons:

- Quarries sometimes sit idle due to fluctuations in demand such as post disaster situations.
- Needed to create an enduring industry which can respond quickly and appropriately to changes in market conditions.

Point Number 860.17

Summary of Decision Requested: **Retain** Policy 5.4.2 (a) Access to minerals and extractive industries.

Decision Reasons:

- No reasons provided.

Point Number 860.18

Summary of Decision Requested: **Amend** the definition of "Extractive Industry" in Chapter 13 Definitions to include all the activities associated with the extraction and processing of minerals including:

- blasting;
- storing, distributing and selling mineral products;
- accessory earthworks;
- treating storm water and waste water;
- landscaping and rehabilitation;
- clean fills and managed fills;
- recycling or reusing aggregate from demolition waste such as concrete, masonry, or asphalt;
- accessory activities and accessory buildings and structures such as weighbridges, laboratories and site offices.

Decision Reasons:

- Expand the definition to be more comprehensive.

Point Number 860.19

Summary of Decision Requested: **Retain** Section 1.4.2.3 (a)(viii) Challenges.

Decision Reasons:

- Note that extractive industries are a higher value use of land than farming, that it is a temporary use of land and that it earns high wealth off a relatively small footprint.
- With respect to coal mining while reserves in existing license/permit areas are being depleted there are still significant coal resources in the Waikato region and the Waikato district and provision should be made to access those resources without the imposition of undue costs.

Point Number 860.20

Summary of Decision Requested: **Retain** Policy 5.3.7 (b) Reverse sensitivities effects.

Decision Reasons:

- No reasons provided.

Point Number 860.21

Summary of Decision Requested: **Retain** Policy 5.3.7 (c) Reverse sensitivity effects.

Decision Reasons:

- No reasons provided.

Submitter Number: 862 **Submitter:** Havelock Village Limited

Point Number 862.1

Summary of Decision Requested: **Amend** the zoning at 88, 242 (in part) and 278 Bluff Road, Pokeno, to Residential Zone (see Appendix E Figure 1 of the submission);
AND
Add a masterplan/precinct plan for the site at 88, 242 and 278 Bluff Road, Pokeno;
AND
Amend the zoning of 88, 242 and 278 Bluff Road, Pokeno to provide for a Neighbourhood Centre;
OR

If the rezoning to the Residential Zone is not accepted, **amend** the zoning of 88 Bluff Road, Pokeno, to an Aggregate Extraction Zone as it was in the Operative District Plan;

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- Significant growth within Pokeno reinforces the need to provide additional residential-zoned land. The results of these projections also suggest growth will exceed the anticipated housing supply required to accommodate this growth.
- Havelock Village offers the opportunity to accommodate a sizeable portion of this growth with an indicative yield of 1025 lots.
- The National Policy Statement on Urban Development Capacity which places obligations on Council to accommodate future growth above and beyond what is projected.
- The lifespan of a District Plan is 10 years and should enable growth within the next 10 years.
- Comprehensive residential development of the site cannot be undertaken under the provisions for the Rural Zone.
- 88 Bluff Road has an Aggregate Extraction Zone in the Operative District Plan. In the event that the proposal is to rezone this site to Residential Zone is not accepted by Council, it is appropriate for the land use and zoning currently provided for at the site can be maintained in the Proposed District Plan to enable efficient use of the land and its resources.

Point Number

862.2

Summary of Decision Requested:

Add the Havelock Village masterplan, precincts and provisions to the Proposed District Plan noted in the original submission which will provide appropriate controls to give effect to the proposed lot sizes and configuration identified on the master plan.

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- Successful development of the Havelock Village will require the implementation of a site specific design approach and the management of specific effects.
- The most appropriate way to achieve those outcomes through the inclusion of a site specific masterplan, precincts and provisions to guide future development.

Point Number

862.3

Summary of Decision Requested:

Retain Objective 4.1.1 Strategic Objective.

Decision Reasons:

- Supports providing for additional dwellings across the district, particularly within Pokeno.
- Supports consolidating additional growth around existing centres.
- Havelock Village helps achieve both of these objectives.

Point Number

862.4

Summary of Decision Requested:

Retain Policy 4.1.3 Location of Development

Decision Reasons:

- Supports this policy as it focuses development on urban growth areas identified in the Future Proof strategy.

Point Number

862.5

Summary of Decision Requested:

Amend Policy 4.1.5 Density to recognise that different housing densities may be appropriate in certain locations, particularly where such density has been included as part of an approved master plan;

OR

If the above relief is not accepted, **add** site specific objectives and policies for Havelock Village, including a new Policy 4.2.20;

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- Supports encouraging higher density housing around the identified amenity features (commercial centres, community facilities, public transport and open space).
- Supports the approach of achieving the minimum density across the urban environment.
- However, the minimum density should not be applied like a rule and there needs to be recognition in the Proposed District Plan that it is not always feasible to achieve that level of density in all developments.
- Certain locations, such as Havelock Village, can contribute to achieving the required number of dwellings but at slightly lower densities in order to achieve better landscape and amenity outcomes.

Point Number

862.6

Summary of Decision Requested:

Amend Policy 4.1.9 Maintaining Landscape Characteristics as follows:

(a) ~~Where practicable, ensure that the fundamental shape, contour and landscape characteristics are maintained during subdivision and development or alternatively any adverse effects on these characteristics are mitigated.~~

OR

If the above relief is not accepted, **add** site specific objectives and policies for Havelock Village, including a new Policy 4.2.20;

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- Supports the policy acknowledging the importance of the natural landscape characteristics, however the policy unduly constrains subdivision and development.
- Some landscapes have the capacity to visually absorb any landscape or visual effects.
- Natural landscape elements can help integrate and screen the presence of subdivision and development in the environment.
- Some landscapes are not of a high quality which is predominantly due to previous degradation.
- Subdivision or development can take place that affects the shape, contour and landscape characteristics but preserves the integrity of the landform whilst providing views and vistas form the landscape.

Point Number 862.7
Summary of Decision Requested: Retain Policy 4.1.11 Pokeno
Decision Reasons:

- Supports this policy regarding the development of Pokeno and identifies reasonable controls and desired development outcomes within the community.

Point Number 862.8
Summary of Decision Requested: Retain Objective 4.2.16 Housing options
Decision Reasons:

- Supports encouraging a wide range of housing options for the identified towns in the Waikato District.
- A range of housing types and sizes will better help to cater for future potential residents.
- Different housing options are sought at different states of life and by different consumers in general.
- Thus, being able to provide a wide range of housing options is important and supports the amendments sought by the submitter to Policy 4.1.5 Density.

Point Number 862.9
Summary of Decision Requested: Retain Policy 4.2.17 Housing types
Decision Reasons:

- Supports enabling a variety of housing types for reticulated lots in the Residential Zone.
- Despite the upward flexibility in minimum lot size to technically be self-services, it is anticipated that the majority of lots identified within the Residential Zone proposed by the submitter will be connected to public reticulation.
- Therefore, enabling a variety of housing types for reticulated lots in the 'Residential Zone' is important.

Point Number 862.10
Summary of Decision Requested: Add a new policy within section 4.2 Residential Zone (after Policy 4.2.19), as follows (See Appendix E and N of the submission for the Master Plan and Precinct Plans):
4.2.20 Policy - Havelock Village
Development of Havelock Village shall occur generally in accordance with the Havelock Village Masterplan and Precinct Plans. This includes a mixture of lot sizes and areas to be protected and set aside to protect significant landscape and ecological values.
AND
Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:

- It is appropriate to include a policy which specifically provides for the Havelock Village Masterplan and Precinct Plan.

Point Number 862.11
Summary of Decision Requested: Retain Objective 4.2.20 Maintain residential purpose.
Decision Reasons:

- Supports safeguarding the residential purpose of residential areas.
- Non-residential activities have the potential to adversely affect the residential character and amenity values of a residential areas.
- Therefore, the presence of non-residential activities should be limited.

Point Number 862.12
Summary of Decision Requested: Add a new clause to Policy 4.2.26 Neighbourhood centres in structure plan areas, as follows:
Provide for new neighbourhood centres within structure plan areas or masterplan areas, that
(i) Are for the daily retail and service needs of the community; and
(ii) Are located within a walkable catchment; and
(iii) Provide for residential activities above the ground floor.
OR
If the above relief is not accepted, add site specific objectives and policies for Havelock Village, including a new Policy 4.2.20:
AND
Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:

- Seeks to enable Neighbourhood Centres to provide for residential activities above the ground floor.
- With a focus on Neighbourhood Centres being within a walkable catchment and convenient for the community they serve, it is logical that residential activities are provided for.
- It is also noted that the Business Zone and Business Town Centre Zone in the Proposed Waikato District Plan, and the Neighborhood Centre Zone in the Auckland Unitary Plan provide for residential activities above ground floor.

Point Number 862.13
Summary of Decision Requested: Retain Policy 4.5.6 Commercial Purpose: Neighbourhood Centres
Decision Reasons:

- Supports the identified commercial purpose for Neighbourhood Centres.
- The purpose is considered commensurate with the generally accepted purpose of Neighbourhood Centres and the scale of retail and commercial service activities these centres typically provide for.

Point Number	862.14
Summary of Decision Requested:	Retain Policy 4.7.4 Lot sizes
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the use of minimum lot sizes and dimensions to enable the achievement of the character and density outcomes sought for each zone.
Point Number	862.15
Summary of Decision Requested:	Retain Policy 4.7.5 Servicing requirements
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this policy and the requirement for development to be serviced to a level that provides for the anticipated activities approved in a structure plan. Structure plans are typically developed based on robust analysis of a site. Structure plans are based on more nuanced information as opposed to more general zoning. It is logical that the provision of services is tailored to the anticipated activities in a structure plan that has been approved.
Point Number	862.16
Summary of Decision Requested:	Retain Policy 4.7.6 Co-ordination between servicing and development and subdivision
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this policy and the importance of having certainty regarding the provision of infrastructure capacity prior to development occurring.
Point Number	862.17
Summary of Decision Requested:	Retain Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports maximising the potential yield for a zone to support the provision of infrastructure.
Point Number	862.18
Summary of Decision Requested:	Retain Policy 4.7.8 Staging of Subdivision
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the staging of subdivision that is efficient and integrates infrastructure and community facilities.
Point Number	862.19
Summary of Decision Requested:	Retain Policy 4.7.9 Connected Neighbourhoods
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the development of liveable, walkable and connected neighbourhoods in subdivisions.
Point Number	862.20
Summary of Decision Requested:	Retain Policy 4.7.10 Recreation and Access
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the accessible open spaces that have provided in proportion to projected neighbourhood densities.
Point Number	862.21
Summary of Decision Requested:	<p>Amend Policy 4.7.11 Reverse Sensitivity as follows:</p> <p><i>Avoid Manage</i> potential reverse sensitivity effects of locating new dwellings in the vicinity of an intensive farming, extraction industry or industrial activity.</p> <p>OR</p> <p>If the above relief is not accepted, add site specific objectives and policies for Havelock Village, including a new Policy 4.2.20;</p> <p>AND</p> <p>Any consequential amendments or alternative relief to give effect to the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The proposed policy requires potential reverse sensitivity effects to be 'avoided'. This wording is too restrictive and does not recognise the potential for reverse sensitivity effects to be managed through appropriate design measures.
Point Number	862.22
Summary of Decision Requested:	Retain Policy 4.7.14 Structure and masterplanning
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports approved development and subdivision in approved structure or masterplan areas adhering to the approved development pattern and infrastructure requirements.

Point Number	862.23
Summary of Decision Requested:	Amend residential and subdivision rules, development and standards and assessment criteria in Chapter 16 Residential Zone to ensure that the Havelock Village master plan and precinct plan are appropriately considered and implemented at the time of subdivision and resource consents. AND Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> There may need to be amendments to the rules, development standards and matters of discretion to ensure that the site specific outcomes envisaged by the masterplan and other technical reports are achieved.
Point Number	862.24
Summary of Decision Requested:	Amend the Proposed Waikato District Plan as required to reflect the zoning and masterplan precincts for the Havelock Village development. AND Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> To enable the Havelock Village residential development, it is proposed to rezone the land with bespoke masterplan/precinct provisions. It is proposed to contain all relevant provisions of the Plan within the Residential Zone chapter; however, there are still provisions that would continue to apply in other chapters if the residential zoning is adopted. Some amendments are sought to these provisions too. Should there be a relevant chapter that the submitter had not identified changes to, to reflect this new zone, the submitter seeks the opportunity to update such a chapter accordingly.
Point Number	862.25
Summary of Decision Requested:	Amend the definition of "Neighbourhood centre" in Chapter 13: Definitions as follows: <i>Means a single or small grouping of commercial activities that service the day-to-day needs of the local community. Residential use above ground floor is provided. Neighbourhood centres are identified in masterplans, structure plans or on the planning maps.</i> AND Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The submitter seeks to amend the definition of Neighbourhood Centres to enable residential activities above the ground floor. With a focus on Neighbourhood Centres being within a walkable catchment and convenient for the community they serve, it is logical that residential activities are provided for. The Business Zone and Business Town Centre Zone under the Proposed Waikato District Plan and the Neighbourhood Centre Zone under the Auckland Unitary Plan all provide for residential activities above the ground floor.
Point Number	862.26
Summary of Decision Requested:	Amend the extent of the Significant Natural Area located between 88 and 242 Bluff Road in accordance with the plan in Appendix L of the submission. AND Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The Significant Natural Area identified by Council flanks either side of what is proposed to be a key feature road corridor connecting 88 and 242/278 Bluff Road. The Significant Natural Area has already been compromised due to previous vegetation clearance to establish the paper road. This area is required for the construction of the access road it should not be identified as Significant Natural Area.
Point Number	862.27
Summary of Decision Requested:	Delete the definition of "Significant Natural Area" in Chapter 13: Definitions and replace with a more descriptive definition of Significant Natural Area. AND Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The submitter seeks to amend the definition of Significant Natural Area as it is currently written. Significant Natural Areas can be comprised of significant indigenous vegetation, exotic vegetation and significant habitats of indigenous fauna. As such, the current definition provided for Significant Natural Areas is deemed to be inadequate by the submitter.
Point Number	862.28
Summary of Decision Requested:	Amend the objectives and policies within section 3.2 Significant Natural Areas and related rules for Significant Natural Areas and biodiversity to provide greater flexibility and to enable development subject to appropriate mitigation or offsetting. AND Any consequential amendments or alternative relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The objectives and policies in section 3.2 relating to Significant Natural Areas are overly restrictive.
Point Number	862.29
Summary of Decision Requested:	Amend the rules relating to earthworks and indigenous vegetation clearance inside a Significant Natural Area in Chapter 16 Residential Zone to enable the implementation of the masterplan attached in the original submission and the bespoke approach requested elsewhere in the

submission.

AND

Any consequential amendments and alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks a bespoke approach to the management of biodiversity including Significant Natural Areas.

Point Number

862.30

Summary of Decision Requested:

Amend the Residential Zone provisions to provide for aggregate extraction activities, for the purpose of road supply for the Havelock Village development or development on adjacent sites as a Restricted Discretionary activity, including suitable matters of discretion and assessment.

AND

Any consequential amendments and alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter considers that the best use of the site is for residential development, however given the extent of roading infrastructure to support this proposal, the potential to establish on-site extractive industries for the purpose of road supply is being explored.

Point Number

862.31

Summary of Decision Requested:

Add a schedule that reflects the outcomes of the Waikato District Landscape Study, which notes the attributes and features that lend itself to the Significant Amenity Landscape status;

OR

If a schedule is not included, **delete** all Significant Amenity Landscapes from the Proposed District Plan;

AND

Any consequential amendments and alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- There is a Significant Amenity Landscapes on the submission site.
- It is understood that the Waikato District Landscape Study was prepared to support the mapping of the Significant Amenity Landscapes and it sets out the areas of Significant Amenity Landscapes and their attributes.
- It is considered that these attributes should be included in the District Plan as a schedule.
- Without this detail it is difficult to efficiently assess a resource consent application against the objective and policies.
- Objective 3.4.1 (a), Policy 3.4.2 (a) and Policy 3.4.3 (a) (v) all make reference to attributes and features of Significant Amenity Landscapes.
- The Significant Amenity Landscape appears to be a rollover of the previous District Plan notation with no ground truthing undertaken to confirm if the attributes listed in the study are still applicable in this location.
- Attributes onsite are not aligned to those described in the study.
- An expert assessment has been undertaken (see Appendix O of the submission) which recommends its deletion.

Point Number

862.32

Summary of Decision Requested:

In the event that the proposed Havelock Village Masterplan and Precinct are not accepted, **amend** the Proposed District Plan as necessary to enable the efficient development of the Havelock Village site;

AND

Any consequential amendments and alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- To enable the enable the efficient development of the Havelock Village site.

Point Number

862.33

Summary of Decision Requested:

Add a bespoke approach regarding the management of indigenous vegetation and Significant Natural Area within the Havelock Village development at 88, 242 and 278 Bluff Road that will efficiently implement the recommendations of the Wildlands Report (attached to the submission).

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter opposes the approach (including rules) to the management of Significant Natural Areas on their land and seeks the application of a bespoke approach to the management of indigenous biodiversity and Significant Natural Areas on the Havelock Village site.
- That approach recognises that some areas of indigenous biodiversity will be removed to allow for development of the Havelock Village development but overall biodiversity across the site will be maintained through a combination of ecological mitigation, enhancement, offset, compensation and protection.
- The submitter's proposed approach to the management of Significant Natural Areas and indigenous biodiversity at the Havelock Village development is informed by the assessment and reporting undertaken by Wildlands Consultants Ltd to support the ongoing resource consent process being undertaken to enable the development of the Havelock Village.

Point Number

862.34

Summary of Decision Requested:

Retain Objective 4.1.2- Urban growth and development.

Decision Reasons:

- Supports providing additional dwellings across the district, particularly within Pokeno.
- Supports consolidating additional growth around existing centres.
- Havelock Village helps achieve both of these objectives.

Point Number

862.35

Summary of Decision Requested: Retain Policy 4.2.2.1- Maintain residential purpose.

Decision Reasons:

- Supports safeguarding the residential purpose of residential areas.
- Non-residential activities have the potential to adversely affect the residential character and amenity values of a residential area.
- Therefore, the presence of non-residential activities should be limited.

Point Number 862.36

Summary of Decision Requested: Add site specific objectives and policies for the Havelock Village in the Proposed District Plan to enable the development of Havelock Village in a manner consistent with the Havelock Village Masterplan, including a new policy 4.2.20 as sought elsewhere in the submission.

AND

Any consequential amendments and alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- In the event that the submitters proposed changes to the district wide suite of objectives and policies related to residential development are not accepted, a site specific policy approach is sought as alternative relief.

Point Number 862.37

Summary of Decision Requested: Delete the Significant Amenity Landscape from the properties at 242 and 278 Bluff Road, Pokeno.

AND

Any consequential amendments and alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- The area of this SAL on the submitter's land appears to be a rollover of the previous District Plan notation with no ground truthing undertaken to confirm if the attributes listed in the study are still applicable in this location.
- The conclusion of an expert assessment contained in Appendix O of the submission was that the attributes onsite are not aligned to those described in the study and the SAL should be removed from the site.

Point Number 862.38

Summary of Decision Requested: Retain Policy 4.5.7 Commercial Purpose: Neighbourhood Centres in Structure Plans

Decision Reasons:

- The submitter supports the ability to identify Neighbourhood Centres in structure plans/masterplans.
- New residential areas typically expand on currently established residential areas.
- The identification of Neighbourhood Centres allows for a strong network of centres at a variety of scales to be developed.

Point Number 862.39

Summary of Decision Requested: Amend Policy 4.5.11 (a) Residential upper floors: Business Town Centre Zone and Business Zone, as follows:

(a) Maintain the commercial viability of the Business Town Centre Zone ~~and~~ Business Zone and Neighbourhood Centre while:

(i) Providing for mixed use developments, ensuring residential activities are located above ground floor; and

(ii) Avoiding residential activity located at ground floor.

OR

If the above relief is not accepted, add site specific objectives and policies for Havelock Village including a new policy 4.2.20;

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to enable Neighbourhood Centres to provide for residential activities above the ground floor.
- With a focus on Neighbourhood Centres being within a walkable catchment and convenient for the community they serve, it is logical that residential activities are provided for.
- It is also noted that the Business zone and Business Town Centre Zone in the Proposed Waikato District Plan and the Neighbourhood Centre Zone in the Auckland Unitary Plan all currently provide for residential activities above ground floor.

Point Number 862.40

Summary of Decision Requested: Retain Objective 4.7.1 Subdivision and Land Use Integration

Decision Reasons:

- The submitter supports promoting the connection between subdivision layout design and the land use outcomes sought for the identified zones.

Point Number 862.41

Summary of Decision Requested: Retain Policy 4.7.2 Subdivision location and design

Decision Reasons:

- The submitter supports this policy and the desired characteristics for subdivision design.

Point Number 862.42

Summary of Decision Requested: Retain Policy 4.7.3(a)(xiii) Residential subdivision

Decision Reasons:

- The submitter supports creating lots that can accommodate a variety of density with a mix of usable lot types.
- This policy supports the amendments the submitter has sought to Policy 4.1.5 Density.

Submitter Number:	863	Submitter:	John Kirton
On behalf of:	Ribbonwood Family Trust		
Point Number	863.1		
Summary of Decision Requested:	Amend the zoning of the following properties at Ohinewai from Rural Zone to Country Living Zone bounded by Ohinewai South Road to the west and State Highway 1 (Waikato Expressway) to the east , including 53 Ohinewai South Road Ohinewai. (See map attached to submission).		
Decision Reasons:	<ul style="list-style-type: none"> The current land use is inconsistent with the zoning of the land within the area, i.e. 80% of the land is zoned Country Living lifestyle and the remaining 20% is Rural environment and represents a random patchwork. The qualifying criteria for Country Living zoning must have been satisfied and all have the same, location, soil type (fertility), environmental character and amenities irrespective of the individual titles and location of land within the area. The change is consistent with the strategic intent of the District Plan. 		

Submitter Number:	864	Submitter:	Strantz Tukiri Kendall
Point Number	864.1		
Summary of Decision Requested:	Retain Chapter 2 Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> Ngati Koata has close ties to Whaingaroa. While the submitters are owners of land blocks in the area, current restrictions make it difficult to develop the land in sustainable ways. The submitters acknowledge that the proposed changes to the District Plan provides Tangata Whenua with the ability to utilise communally owned land in accordance with their cultural values, as well as allowing opportunity for creating economic development that will allow whanau to visit the land more frequently. 		

Submitter Number:	865	Submitter:	Ian and Helen Gavin
Point Number	865.1		
Summary of Decision Requested:	Amend the zoning of the property at 474 Boyd Road, Horsham Downs (Lot 3 DP 409176 and access leg Lot 2 DP 409176) from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The site is currently used for community living and is occupied by 3 'clusters' comprised of two residential dwellings and an adjoining unit made available for respite of struggling individuals or families. The dwellings were lawfully established in the early 1980s. The property owner has expressed an interest in generating value for permanent residents of the community by creating legal estates over the existing dwellings to be held individually (either as unit titles or in fee simple). The purpose of any subdivision would be to formalise the existing land use, not increase the density for existing. Subdivision is prohibited under current Rural zoning, therefore rezoning is required for Council to consider this form of subdivision. 		

Submitter Number:	866	Submitter:	Lisa Graham
Organisation:	LG Enterprises		
Point Number	866.1		
Summary of Decision Requested:	Amend the zoning of the property at 4337 State Highway 23, Raglan from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> To create lower density subdivision maintaining natural rural values and characteristics. To provide an alternative to existing and proposed small residential sections, and attract artists and lifestyle who contribute to strong vibrant communities. The proximity of 1 km to Raglan village lends the property to becoming part of it. Land on the other side of State Highway 23 is planned for development. The property has access off Cornwall road. The property is is not suitable for any productive rural activity. 		

Submitter Number:	867	Submitter:	Steven Kearvell
On behalf of:	Kearvell Family Trust		
Point Number	867.1		
Summary of Decision Requested:	No specific decision sought, but the submission requests no further development of access to the coastal area from Raglan Wharf through to and including Cox Bay. This includes no public access to the beach boundary of the property at 46 Government Road, Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> There is already enough public access to the area at the Wharf and the walkway access at Daisy Street or Bay View Road. It is already useable. Our custom of launching our pleasure craft from the front of our property is important to us. Our property is not available. 		

Submitter Number:	868	Submitter:	Huib Volker
Point Number	868.1		
Summary of Decision Requested:	Retain Chapter 9.2 - Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter is a user of the Airfield as an aircraft operator and would like to ensure it survives. • Submitter is considering buying into an airpark development planned for this location. 		
Point Number	868.2		
Summary of Decision Requested:	Retain Chapter 27 - Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter is a user of the Te Kowhai Airpark as an aircraft operator and would like to ensure it survives. • Submitter is considering buying into an airpark development planned for this location. 		

Submitter Number:	871	Submitter:	Brendon John & Denise Louise Strong									
Point Number	871.1											
Summary of Decision Requested:	Retain the Residential Zoning of the properties at 10, 12 and 12A Harrisville Road, Tuakau, as notified.											
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports the proposed zoning. 											
Point Number	871.2											
Summary of Decision Requested:	<p>Amend Table 14.12.5.14 Access and road conditions by replacing with NZS standards - Table 3.2 Roading Design Standards.</p> <p>OR</p> <p>Amend Table 14.12.5.14: Access and road conditions by replacing with the following standards from the Waikato Operative District Plan - Franklin Section:</p> <table border="1"> <thead> <tr> <th>Users</th> <th>Legal Width</th> <th>Minimum total seal width</th> </tr> </thead> <tbody> <tr> <td>2-4</td> <td>3-5m</td> <td>2.7m</td> </tr> <tr> <td>5-8</td> <td>8m</td> <td>5m</td> </tr> </tbody> </table>			Users	Legal Width	Minimum total seal width	2-4	3-5m	2.7m	5-8	8m	5m
Users	Legal Width	Minimum total seal width										
2-4	3-5m	2.7m										
5-8	8m	5m										
Decision Reasons:	<ul style="list-style-type: none"> • The proposed access standards are excessive, and will result in inefficient use of the urban land resource and will prevent infill development in existing urban areas. • The extra seal width also increase impervious surfaces and storm water run-off without any apparent need or benefit relating to traffic effects. • Excessive width also adds additional costs to development. • NZS 4404:2010 - Land Development and Subdivision Infrastructure is a national document that covers access and road conditions so this matter should not form part of the Plan. • The current standards in the Franklin Section of the Plan are also more appropriate than the proposed provisions. 											
Point Number	871.3											
Summary of Decision Requested:	No specific decision sought, but submission recognises that the importation of fill to enable residential development is appropriate in Rule 16.2.4.1 Earthworks - General, and questions whether this would be a permitted activity (P2) or a non-complying activity (NC1).											
Decision Reasons:	<ul style="list-style-type: none"> • These provisions seem to be workable but the submitter is interested in the thoughts of other submitters. • Cleanfill may be required in residential zoned sites to enable greenfield land to be developed for residential purposes. It is unclear whether this is a P2 permitted activity or a NC1 non-complying activity. NC1 would be too restrictive and needs to be more lenient to enable greenfield development within residential zones. 											
Point Number	871.4											
Summary of Decision Requested:	<p>Amend Rule 16.3.5 P1 Daylight admission, as follows:</p> <p><i>Buildings must not protrude through a height control plane rising at an angle of 3745 degrees commencing at an elevation of 2.5m above the ground level at every point of the site boundary.</i></p>											
Decision Reasons:	<ul style="list-style-type: none"> • Opposes the height control plane rising at an angle of 37 degrees commencing at an elevation of 2.5m above the ground level at every point of the site boundary for the following reasons: <ul style="list-style-type: none"> - Inconsistency with previous Planning documents which are less restrictive. - Too restrictive for urban areas. - Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane. - The 37 degree angle is difficult to calculate. 											

Point Number	871.5
Summary of Decision Requested:	Amend Rule 16.3.6 P1 Building Coverage, as follows: <i>The total building coverage must not exceed 4050%.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Opposes the 40% building coverage as the height limit does not enable the efficient use of urban land and fails to increase the development capacity of existing urban areas. • Increasing building coverage to allow greater utilisation of residential zoned land to support the strategic direction outlined in Section A and Chapter B 4.1 of the Plan supports increase densities and housing choice throughout the district. • This approach is consistent with the Waikato District Plan - Franklin Section.
Point Number	871.6
Summary of Decision Requested:	Amend Rule 16.3.9.3 Building Setback - Water bodies, to match Rule 24.3.6.3 Building setback - water bodies; AND Amend Rule 16.3.9.3 Building setbacks - Water bodies, as follows: <i>Rule P1 (a)(ii) ...from the bank of any <u>named</u> river ...</i> <i><u>P3.A building must be set back a minimum of 10m from the bank of a perennial or intermittent named or unnamed stream.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> • These are not consistent with other zones or the existing Waikato District Plan - Franklin Section provisions; a building must be set back a minimum of 10 metres from the bank of a perennial or intermittent stream. • It is important to also define a stream to avoid confusion with the definition of a river. The RMA defines a river as "a continually or intermittently flowing body of freshwater; and includes a stream and modified watercourse." If a watercourse is named "Stream" then it should be subject to the appropriate setback by the Plan.
Point Number	871.7
Summary of Decision Requested:	Delete Rule 16.4.13(a) Subdivision creating reserves and make it a matter of discretion.
Decision Reasons:	<ul style="list-style-type: none"> • Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective. The enforcement of the rule may increase the cost of development which could be passed onto the purchasers. • This is an arbitrary standard which may not be relevant for all reserve types or developments. • Safety and surveillance of reserves may be achieved with less road frontage. • There is no analysis in the s32 stating why the 50% rule has been applied. While this may be a principle to follow it should not be enforced through a rule.
Point Number	871.8
Summary of Decision Requested:	Amend Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips, by replacing with the Operative Waikato District Plan - Franklin Section Rule 11.5. Esplanade Reserves and Strips
Decision Reasons:	<ul style="list-style-type: none"> • The submitter accepts that esplanade reserves and esplanade strips enable public access and recreation. However, this needs to be assessed on a case by case basis and Council should allow a waiver or reduction in width in certain circumstances.
Point Number	871.9
Summary of Decision Requested:	Amend Rule 17.3.1.1 P1 height - Building General, as follows: <i>The maximum height of any building must not exceed 1015m.</i>
Decision Reasons:	<ul style="list-style-type: none"> • The building height should be increased from 10m to 15m to allow for 4 storeys. • This will ensure development and re-development (especially for smaller sites) is economically viable for developers and allow for a range of uses making residential development viable on upper floors.
Point Number	871.10
Summary of Decision Requested:	Retain Chapter 17 Business Zone, with the exception of Rules 17.3.1.1 P1 Height - Building General; 17.3.2 P1 Daylight admission; 17.3.4.2 Building setbacks - Water bodies; and 17.4.1.7 Esplanade reserves and esplanade strips (which are addressed in other submission points).
Decision Reasons:	<ul style="list-style-type: none"> • Supports the general business provisions in Chapter 17 with the exception of the specific points raised elsewhere in the submission.
Point Number	871.11
Summary of Decision Requested:	Amend Rule 17.3.2 P1 (a) Daylight admission, as follows: <i>Buildings must not protrude through a height control plane rising at an angle of 3745 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.</i>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter opposes the height control plane rising at an angle of 37 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary for the following reasons: • Inconsistency with previous planning documents which are less restrictive. • Too restrictive for urban areas. • Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane., • The 37 degrees angle is difficult to calculate.
Point Number	871.12

Summary of Decision Requested: Amend Rule 17.3.4.2 Building setbacks - waterbodies, to match Rule 24.3.6.3 Building Setback - water bodies;
AND
Amend Rule 17.3.4.2 Building setbacks - waterbodies, as follows:
P1(a)(ii) ... from the bank of any named river ,...
P3. A building must be set back a minimum of 10m from the bank of a perennial or intermittent named or unnamed stream.

Decision Reasons:

- These are not consistent with other zones or the existing Waikato District Plan - Franklin Section provisions; a building must be set back a minimum of 10 metres from the bank of a perennial or intermittent stream.
- It is important to also define a stream to avoid confusion with the definition of a river: the RMA defines a river as "a continually or intermittently flowing body of fresh water; and includes a stream and modified watercourse." If a watercourse is named "Stream" then it should be subject to the appropriate setback by the Plan.

Point Number 871.13
Summary of Decision Requested: Amend Rule 17.4.1.7 Esplanade reserves and esplanade strips, by replacing with the Waikato District Plan - Franklin Section Rule 11.5 Esplanade Reserves and Strips.

Decision Reasons:

- The submitters accept the esplanade reserves and esplanade strips enable public access and recreation. However, this needs to be assessed on a case by case basis and Council should allow a waiver or reduction in width in certain circumstances.

Point Number 871.14
Summary of Decision Requested: Retain the Business Zone at 8 Harrisville Road, Tuakau, as notified (see submission for map of site).

Decision Reasons:

- Submitter supports the proposed zoning.

Point Number 871.15
Summary of Decision Requested: Retain Chapter 16 Residential zone, with the exception of Rule 16.2.4.1 Earthworks General; Rule 16.3.5 P1 Daylight admission, Rule 16.3.6 P1 Building Coverage; Rule 16.3.9.3 Building setback - waterbodies; Rule 16.4.13 (a) Subdivision creating reserves and Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips (which are addressed in other submission points).

Decision Reasons:

- Provides for the efficient use of land resources,
- Enables the subdivision of land to provide for the growth of the district.

Submitter Number: 872 **Submitter:** Tarati Farms Limited

Point Number 872.1
Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Submitter supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 872.2
Summary of Decision Requested: Retain Objective 5.2.1 Rural resources, except for the amendments sought below;
AND
Amend Objective 5.2.1(a)(i) Rural resources, as follows:
(a) Maintain or enhance the:
(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...

Decision Reasons:

- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 872.3
Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 872.4
Summary of Decision Requested: Amend Objective 5.3.1(a) Rural character and amenity, as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Support in part the intent of this objective, however needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 872.5

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports inclusion of the General Subdivision rules.

Point Number 872.6

Summary of Decision Requested: Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DL

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD1.

Decision Reasons:

- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 872.7

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);

AND

Add a new matter of discretion to Rule 22.4.1.2(b) as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- The strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 872.8

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision, which classifies creation of an additional lot between 8,000m² and 1.6ha as a restricted discretionary activity.

Decision Reasons:

- The creation of an additional vacant lot between 8000m² and 1.6ha is supported as a restricted discretionary activity.

Point Number 872.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below;

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Support in part Policy 5.3.8 with amendments.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.

- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses and are recognised as important components of primary production activities which form part of the rural environment.

Point Number 872.10

Summary of Decision Requested: **Amend** the activity status for Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, from prohibited activities to non-complying activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- In some instances it may be unavoidable to create an additional Record of Title.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities which are viable and sustainable such as greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 228 of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. Under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 872.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title.
- It may occur when stream or public road bisects land held together in one Record of Title.

Submitter Number: 873 **Submitter:** Anita Moleta & Penny Gooding

Point Number 873.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District encompasses valuable areas of high-class soils that are of primary importance for food production both regionally and nationally. Protecting these soils from adverse effects of inappropriate use and development that may affect their life-supporting capacity is of national importance, this is now recognized with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.

Point Number 873.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural Resources, except for the amendments sought below

AND

Amend 5.2.1(a)(i) Rural resources, as follows:

(a) Maintain or enhance the:

(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;

...

Decision Reasons:

- The submitter supports sub-policy (i) however accessibility to versatile land is also a key consideration in managing this resource.

Point Number 873.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High Class Soils, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 873.4

Summary of Decision Requested: **Amend** Objective 5.3.1 Rural character and amenity, as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- The submitter supports this policy, however, recognition of the variation of what defines rural character and amenity values across a large District is needed

- The District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the District which is used for higher value production activities such as intensive cropping, greenhouses, etc.

Point Number 873.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(i), (ii) and (iii) General subdivision, as notified.

Decision Reasons:

- The submitters support the inclusion of the General Subdivision rules.

Point Number 873.6

Summary of Decision Requested: **Add** a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

D1

- General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1*
- General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1*

Decision Reasons:

- There should be flexibility in lot size to ensure that the existing farming regime can continue.
- It will ensure practical boundaries and the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access a relatively small piece of land.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8000m², it is necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment, with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- The creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number 873.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2 RD1 (a)(v) General Subdivision;

AND

Add an additional matter of discretion to Rule 22.4.1.2 RD1(b) General subdivision, as follows:

(v) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- The submitters agree with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high-class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout design or productivity and fragmentation of farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give protection to high-class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high-class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high-class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Land Use Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met. This additional compliance cost does not necessarily result in a better environmental outcome and becomes a box ticking exercise for Council. Council Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 873.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision which classifies creation of an additional lot between 8000m² and 1.6ha as a Restricted Discretionary activity.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha as a Restricted Discretionary Activity is supported.

Point Number 873.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

- Amend** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
- Protect productive rural areas by directing urban forms of subdivision, use and development to within the boundaries of towns and villages.*
 - ~~*Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~
 - ...
 - Rural hamlet subdivision and boundary relocations ensure the following:*
 - Protection of rural land for productive purposes;*
 - Maintenance of the localised rural character and amenity of the surrounding rural environment;*
 - Minimisation of cumulative effects.*
 - Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.*

Decision Reasons:

- Policy 5.3.8(b) duplicates Policy 5.3.8(d)(ii) and (e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that structures and buildings such as greenhouses and pack houses could visually alter rural landscapes. However, these are recognized as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 873.10

Summary of Decision Requested: Amend the activities in Rule 22.4.1.1 Prohibited Subdivision, from Prohibited activities to Non-Complying.

Decision Reasons:

- In PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Not every subdivision on high-class soil would result in a significant adverse effect on the environment. Relocating consented lots within a holding, (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. This definition may not be versatile due to a range of factors identified through case law.
- It is unfair and unreasonable to prohibit the creation of lots when they are of a viable, sustainable and permanent nature and it is appropriate for these to subdivide from other rural activities on the site.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 may unreasonably restrict the subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Records of Title were created (Rule 22B – Franklin Section). Under Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation.
- In the Franklin Section of the District Plan, there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require scrutiny this should merit a Non-Complying Activity status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbor without creating an outcome that may compromise the prior transferable subdivision.
- The Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high-class soils is protected in the Rural Zone from inappropriate subdivision and development, and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 873.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, to change all of the references from "lot" to "Record of Title",

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 874

Submitter: Louise & Tony Cole

Point Number 874.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District encompasses valuable areas of high-class soils that are of primary importance for food production both regionally and nationally. Protecting these soils from adverse effects of inappropriate use and development that may affect their life-supporting capacity is of national importance, this is now recognized with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.

Point Number 874.2

Summary of Decision Requested: Retain Objective 5.2.1 Rural Resources, except for the amendments sought below;

AND

Amend 5.2.1 (a)(i) Rural resources, as follows:

(a) Maintain or enhance the:

(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;*

...

Decision Reasons:

- The submitter supports sub-policy (i), however accessibility to versatile land is also a key consideration in managing this resource.

Point Number 874.3

Summary of Decision Requested: Retain Policy 5.2.2 High Class Soils, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 874.4

Summary of Decision Requested: Amend Objective 5.3.1 Rural character and amenity, as follows:

(a) *Rural character and amenity are maintained while recognising the localised character of different parts of the District.*

Decision Reasons:

- The submitter supports this policy, however, recognition of the variation of what defines rural character and amenity values across a large District is needed
- The District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the District which is used for higher value production activities such as intensive cropping,

greenhouses, etc.

Point Number 874.5
Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(i), (ii) and (iii) General subdivision, as notified.
Decision Reasons:

- The submitters support the inclusion of the General Subdivision rules.

Point Number 874.6
Summary of Decision Requested: Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:
DI

- a. General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD I
- b. General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD I

Decision Reasons:

- There should be flexibility in lot size to ensure that the existing farming regime can continue.
- It will ensure practical boundaries and the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access a relatively small piece of land.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8000m², it is necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment, with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- The creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number 874.7
Summary of Decision Requested: Delete Rule 22.4.1.2 RD I (a)(v) General Subdivision;
AND
Add an additional matter of discretion to Rule 22.4.1.2 RD I(b) General subdivision, as follows:
(v) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- The submitters agree with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high-class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout design or productivity and fragmentation of farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give protection to high-class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high-class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high-class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Land Use Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met. This additional compliance cost does not necessarily result in a better environmental outcome and becomes a box ticking exercise for Council. Council Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 874.8
Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision, which classifies creation of an additional lot between 8000m² and 1.6ha as a restricted discretionary activity.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha as a restricted discretionary activity is supported.

Point Number 874.9
Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below;
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
(a) Protect productive rural areas by directing urban forms of subdivision, use and development to within the boundaries of towns and villages.
~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~
...
(d) Rural hamlet subdivision and boundary relocations ensure the following:
(i) Protection of rural land for productive purposes;
(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;
(iii) Minimisation of cumulative effects.
(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy 5.3.8(b) duplicates Policy 5.3.8(d)(ii) and (e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.

- It should be recognised that structures and buildings such as greenhouses and pack houses could visually alter rural landscapes. However, these are recognized as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 874.10

Summary of Decision Requested: Amend the activities in Rule 22.4.1.1 Prohibited Subdivision, from Prohibited activities to Non-Complying.

Decision Reasons:

- In PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Not every subdivision on high-class soil would result in a significant adverse effect on the environment. Relocating consented lots within a holding, (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. This definition may not be versatile due to a range of factors identified through case law.
- It is unfair and unreasonable to prohibit the creation of lots when they are of a viable, sustainable and permanent nature and it is appropriate for these to subdivide from other rural activities on the site.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 may unreasonably restrict the subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Records of Title were created (Rule 22B – Franklin Section). Under Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1 ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation.
- In the Franklin Section of the District Plan, there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require scrutiny this should merit a Non-Complying Activity status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbor without creating an outcome that may compromise the prior transferable subdivision.
- The Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high-class soils is protected in the Rural Zone from inappropriate subdivision and development, and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 874.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, to change all of the references from "lot" to "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 875

Submitter: DPI 2014 Limited

Point Number 875.1

Summary of Decision Requested: Retain the Country Living Zoning of the property at 37 Moorfield Road, Te Kauwhata, as notified.

Decision Reasons:

- It provides for efficient use of the land resources.
- It enables the subdivision of land to provide for the growth of the district.
- The site contains limited development constraints making it an appropriate site for country living use.
- Country Living zoning is an efficient use of a land resource that is in close proximity to the existing urban area of Te Kauwhata. The land comprises easy terrain that is suitable for rural residential development.
- This creates rural residential growth within an appropriate area and directs rural residential growth away from rural and coastal areas in the District, providing a buffer between urban living and rural living.

Point Number 875.2

Summary of Decision Requested: No specific decision sought, but submission recognises that the importation of fill to enable residential development is appropriate in Rule 23.2.3.1 Earthworks - General, and questions whether this would be a permitted activity (P2) or a non-complying activity (NC1).

Decision Reasons:

- These provisions seem workable but the submitter is interested in the thoughts of other submitters
- Clean-fill may be required in residential zones to enable green-field land to be developed for residential purposes. It is unclear to the submitter whether it is P2 permitted activity or NC1 non-complying activity. NC1 would be too restrictive and needs to be more lenient to enable green-field development within residential zones.

Point Number 875.3

Summary of Decision Requested: Amend Rule 23.4.2 RDI (a)(i) General Subdivision, as follows:

(i) All proposed lots must have a minimum net site area of ~~at least~~ 3000m² and average net site area of 5000m².

Decision Reasons:

- A blanket minimum lot size can present challenges when designing a subdivision where there are different parent lot shapes, sizes and topographical/vegetative/other constraints. Incorporating a minimum net size area and average net size area for subdivision will provide for greater flexibility in the instances where physical constraints exist.
- 5000m² is an awkward size to maintain for some people, being too large to maintain the large curtilage area but too small to have stock grazing. An average net size area of 5000m² would maintain the amenity values of the Country Living Zone, whilst a minimum net site area of 3000m² would provide a variety of housing living styles and greater flexibility in the instances where physical constraints exist.

Submitter Number: 876

Submitter: Turtle Nut Farm Limited

Point Number 876.1

Summary of Decision Requested: Retain the Country Living Zoning at 27 Travers Road, Te Kauwhata as notified.

Decision Reasons:

- It provides for efficient use of the land resources
- It enables the subdivision of land to provide for the growth of the district
- The site contains limited development constraints making it an appropriate site for country living use
- Country Living zoning is an efficient use of a land resource that is in close proximity to the existing urban area of Te Kauwhata. The land comprises easy terrain that is suitable for rural residential development. Rural residential development (Country Living) will represent an efficient use of the land resource.
- This creates rural residential growth within an appropriate area and directs rural residential growth away from rural and coastal areas in the District, providing a buffer between urban living and rural living.

Point Number 876.2

Summary of Decision Requested: Amend Rule 23.4.2 RD1(a)(i) General Subdivision, as follows:
(i) All proposed lots must have a minimum net site area of at least 3000m2 and average net size area of 5000m2.

Decision Reasons:

- A blanket minimum lot size can present challenges when designing a subdivision where there are different parent lot shapes sizes and topographical/vegetative/other constraints. Incorporating a minimum net size area and average net size area for subdivision will provide for greater flexibility in the instances where physical constraints exist.
- 5000m2 is an awkward size to maintain for some people, being too large to maintain the large curtilage area but too small to have stock grazing.
- An average net size area of 5000m2 would maintain the amenity values of the Country Living Zone, whilst a minimum net site area of 3000m2 would provide a variety of housing living styles and greater flexibility in the instances where physical constraints exist.
- The submitters have obtained subdivision consent (SUB0130/18) to create six lots of at least 5000m2 including around their existing dwelling. The submitters only need an area to contain the existing dwelling, new effluent disposal area and orchard. The additional area comprises of pasture and a pond that is surplus to their needs and ability to maintain and has only been included with their dwelling to comply with an arbitrary rule.

Submitter Number: 877 **Submitter:** Leigh Michael Shaw & Bradley John Hall

Point Number 877.1

Summary of Decision Requested: Retain the Rural zoning of the property at 58 Puketutu Road, Bombay as notified.

Decision Reasons:

- The submitter supports the rural zoning of the land.

Point Number 877.2

Summary of Decision Requested: Add to Chapter 13: Definitions a separate definition for "Free Range Poultry Farming" as per the Franklin Section of the Operative District Plan

Decision Reasons:

- There is a separate definition for this in the Franklin Section of the District Plan.

Point Number 877.3

Summary of Decision Requested: Add to Chapter 13: Definitions a separate definition for "Poultry Hatcheries" as per the Franklin Section of the Operative District Plan.

Decision Reasons:

- There needs to be a separate definition for this as it was in the Franklin Section of the Operative District Plan

Point Number 877.4

Summary of Decision Requested: Add to Chapter 13: Definitions a separate definition for "Farming Visit" as per the Franklin Section of the Operative District Plan.

Decision Reasons:

- There needs to be a separate definition for this as it was in the Franklin Section of the Operative District Plan

Point Number 877.5

Summary of Decision Requested: Add to Chapter 13: Definitions a separate definition for "Packhouse" as per the Franklin Section of the Operative District Plan.

Decision Reasons:

- There needs to be a separate definition for this as it was in the Franklin Section of the Operative District Plan

Point Number 877.6

Summary of Decision Requested: Add to Chapter 13: Definitions a separate definition for "Sleepout" as per the Franklin Section of the Operative District Plan.

Decision Reasons:

- There needs to be a separate definition for this as it was in the Franklin Section of the Operative District Plan

Point Number 877.7

Summary of Decision Requested: Add to Chapter 13: Definitions a separate definition for "On Site Primary Produce Manufacturing" as per the Franklin Section of the Operative District Plan.

Decision Reasons:

- There needs to be a separate definition for this as it was in the Franklin Section of the Operative District Plan

Point Number 877.8

Summary of Decision Requested: Amend the definition for "Farming" in Chapter 13: Definitions to include free-range poultry farming.

Decision Reasons:

- Include free-range poultry as part of "farming"

Point Number 877.9

Summary of Decision Requested: Add to Chapter 13: Definitions a definition for "horticultural activities" that includes glasshouses/greenhouses and plant nurseries and orchards.

Decision Reasons:

- There needs to be a definition of horticultural activities.

Point Number 877.10

Summary of Decision Requested: Amend the definition for "Intensive farming" in Chapter 13 Definitions as follows:

(a) intensive pig farming undertaken wholly or principally in sheds or other shelters or buildings;

~~*(b) free-range pig farming;*~~

(c) poultry or game bird farming undertaken wholly or principally within sheds or other shelters or buildings;

~~*(d) free-range poultry or game bird farming*~~

(e) mushroom farming; and

(f) intensive goat farming animal feedlots feeding livestock on food other than pasture grasses.

It excludes the following, provided the building is used for the purpose for which it was built:

...

(c) calf pens or wintering accommodation for less than 30 stock (except where stock are being reared for the replacement of breeding stock to be used on the same property); and

(d) glasshouse production or nurseries;

(e) free-range poultry or game bird farming;

(f) free-range pig farming;

(g) concentrated but temporary wintering of stock as part of normal farming operations, such as using animal feedpads and standoff pads; and

(h) Poultry hatcheries.

Decision Reasons:

- Intensive farming is the growing of fungi, livestock, or poultry within a building or structure, or an animal feed lot with limited or no dependence on natural soil quality on the site.
- Free-range farming is a distinct land based activity that should not come under the definition of intensive farming
- Poultry Hatcheries should also be excluded from the definition

Point Number 877.11

Summary of Decision Requested: Amend the definition for "Produce Stall" in Chapter 13: Definitions to include the sale of farm and garden produce grown or produced on a site owned by the same landowner.

Decision Reasons:

- This definition should include the sale of farm and garden produce grown or produced on a site owned by the same landholder.
- There can be multiple sites side-by-side or throughout the District that may be owned by the same person and therefore it makes sense for this landowner to sell produce from their stall that is grown on other land that they own.

Point Number 877.12

Summary of Decision Requested: Amend Rule 22.1.2 P2 (a) Permitted Activities to increase temporary event occurrences from three to six times per year.

Decision Reasons:

- This would still only allow for an average of one event every two months which is considered to be appropriate given the other standards are complied with (e.g. hours of operation and general noise levels).
- This is consistent with the Operative District Plan: Franklin Section.

Point Number 877.13

Summary of Decision Requested: Amend Rule 22.1.2 P4(b) Permitted Activities to allow for the storage of materials and machinery outside provided that they are fully screened (not visible) from places off site (including roads and highways).

Decision Reasons:

- Condition (b) should allow for the storage of materials and machinery outside provided that they are fully screened from places off site including roads and highways.
- Some rural properties are large enough and have sufficient on site features to ensure that materials and machinery can be adequately screened. This will have the same intent as storing them in a building.

Point Number 877.14

Summary of Decision Requested: **Add** small scale commercial/retail activities that may be ancillary to rural activities occurring on the site to Rule 22.1.3 Restricted Discretionary Activities. The submission refers to the Auckland Unitary Plan which has further definition and provision for similar activities. Examples include the following:

- Rural commercial services that support rural production activities;
- Small scale commercial activities ancillary to a primary rural activity, such as cafes on berry picking farms.
- Tourism activities and ancillary commercial or food and beverage activities,
- Small wedding venues
- Veterinary Clinics
- Boarding Kennels and Catteries
- Care Centres (less than ten people).

Decision Reasons:

- The Plan fails to provide opportunities for small-scale commercial/retail activities that may be ancillary to rural activities occurring on the site. These are examples of activities that should be provided in limited capacity in the Rural Zone.
- There are a range of small-scale activities that may support the rural economy and can be appropriately accommodated in the Rural Zone. For example, the District has some great tourism opportunities which rural landowners may want to draw upon however the Plan makes no provision for:
- Changing the Plan to allow for some more Restricted Discretionary Activities will give more clarity around the types of non-productive activities that may be acceptable in the Rural Zone and a reasonable expected to locate in this area.

Point Number 877.15

Summary of Decision Requested: **Retain** Rule 22.2.3.1 Earthworks - General as notified.

Decision Reasons:

- The submitter is generally supportive of this provision which provides for ancillary rural earthworks.

Point Number 877.16

Summary of Decision Requested: **Amend** Rule 22.3 Land Use - Building to provide clarification around what buildings are permitted and how this relates to the activities in Rule 22.1 Land Use - Activities.

Decision Reasons:

- This rule refers to Permitted dwellings and minor dwellings but does not reference other buildings such as accessory buildings (e.g. garages and sleep outs) to dwellings/minor dwellings.
- It does not reference buildings such as milking sheds or greenhouses that are associated with permitted farming activities
- There is no overriding activity status for any other building not listed in Rule 22.3 like there is under Rule 22.1, so it is assumed that the buildings themselves are all permitted.
- Amendments should be made to avoid any confusion, especially if their understanding of the applicability of Section 9 of the RMA and what Rule 22.3 allows for is incorrect.
- Submitter questions how an industrial or commercial building is permitted but the use of the building requires resource consent.

Point Number 877.17

Summary of Decision Requested: **Amend** Rule 22.3.6 P1 Building coverage to exclude buildings associated with permitted and controlled farming activities (including free range poultry farming and poultry hatcheries).

Decision Reasons:

- Buildings associated with permitted and controlled farming activities should be exempt from this rule.
- The rule could unduly restrict someone wanting to use the land for a productive purpose (like greenhouses) which for example would only allow 500m² on a 25,000m² property inclusive of the area required for a dwelling

Point Number 877.18

Summary of Decision Requested: **Amend** Rule 22.3.6 P1 Building coverage after considering whether a building coverage rule in the Rural Zone is necessary.

OR

Amend Rule 22.3.6 P1(a)(i) Building coverage to increase the 2% site area coverage limit.

Decision Reasons:

- The 2% building coverage is too low.
- The rule would unduly restrict someone wanting to use the land for a productive purpose (like greenhouses).

Point Number 877.19

Summary of Decision Requested: **Amend** the activity status of Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited Subdivision, from Prohibited Activities to Non-Complying.

Decision Reasons:

- In PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Not every subdivision on high-class soil would result in a significant adverse effect on the environment. Relocating consented lots within a holding, (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. This definition may not be versatile due to a range of factors identified through case law.
- It is unfair and unreasonable to prohibit the creation of lots when they are of a viable, sustainable and permanent nature and it is appropriate for these to subdivide from other rural activities on the site.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the

- site.
- The Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high-class soils is protected in the Rural Zone from inappropriate subdivision and development, and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 877.20

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to change all of the references from "lot" to "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Point Number 877.21

Summary of Decision Requested: Retain Rule 22.4.1.4 Boundary relocation, except for the amendments sought below.

AND

Amend Rule 22.4.1.4 RD1 Boundary relocation as follows:

22.4.1.4 Boundary relocation or Adjustment

(a) The boundary relocation or adjustment must:

(i) Relocate a common boundary or boundaries between two or more existing Records of Title ~~that existed prior to 18 July 2018~~;

(ii) no additional potential for permitted activity dwellings and no additional subdivision potential is created beyond that which already existed prior to the subdivision occurring, ~~The Records of Title must form a continuous landholding~~;

(iii) The boundary relocation or adjustment must not result in the creation of additional titles, ~~Not result in any additional lot~~;

(iv) Create one lot of at least 8000m² in area.

Decision Reasons:

- The submitters support the inclusion of boundary relocation provisions and support flexibility to allow rural properties to rationalise large landholdings to provide a logical lot arrangement that better supports the farming activity.
- The rule should also recognise that land is exchanged between two Records of Title to accommodate the existing farming activity (one farmer may be leasing land from another and they wish to formalize this arrangement), or when a farmer owns multiple titles and wants to create a small rural lot for a dwelling and hold the balance of the farm together in one Record of Title
- Boundary relocations or adjustments typically result in positive effects through the enhancement of the productive farming system and allows for the relocation of potential house sites to more favourable locations
- It may be necessary to create multiple lots and hold them in one Record of Title
- The use of the date is inappropriate, as this would allow for closer scrutiny and a higher activity status for no apparent benefit.

Point Number 877.22

Summary of Decision Requested: Retain Rule 22.4.1.6 Conservation lot subdivision, except for the amendments sought below.

AND

Amend Rule 22.4.1.6 Conservation lot subdivision as follows:

(a) The subdivision must comply with all of the following conditions:

(i) The lot must contain;

A. a contiguous area of existing Significant Natural Area either as shown on the planning maps, and/or

B. a contiguous area, to be protected, enhanced and/or restored,

as determined by an experienced and suitably qualified ecologist in accordance with the table below..

(ii) The area of Significant Natural Area, and/or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of indigenous Biodiversity);

(iii) The Significant Natural Area or area to be restored is not already subject to legal protection ~~a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act~~;

(iv) The subdivision proposes to legally protect all areas of Significant Natural Area and/or area to be restored by way of conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth National Trust Act;

(v) An ecological management plan is prepared to address the ongoing management of the ~~covenant-protected~~ area to be protected area to ensure that the area to be protected is self sustaining and that plan:

A. Addresses fencing requirement for the ~~covenant-protected~~ area to be protected area;

B. Addresses ongoing pest plan and animal control;

C. Identifies any enhancement and/or restoration or edge planting required within the ~~covenant~~ area to be protected area.

(vi)....

(b) Council's discretion is restricted to the following matters:

(i) Subdivision layout and proximity of building platforms to ~~Significant Natural Area~~ the area to be protected;

(ii) Matters contained in an ecological management plan for the ~~covenant-protected~~ area to be protected area.

(iii) Effects of the subdivision on localised rural character and amenity values;

(iv) Extent of earthworks for the location of building platform and accessways.

(v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- The submitters support the incentivising of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity, which offers positive benefits for the Region.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot Rules.
- There are significant biodiversity and water quality benefits to gain from ecological enhancement particularly along waterways and wetland areas. Water quality is a key issue identified by the Regional Policy Statement and The Vision and strategy (which requires an improvement of water quality in the Waikato catchment, not simply maintenance). It is also recognised in the corresponding Rural Objectives and Policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways. The Plan should be enabling of improving both biodiversity and water quality within the Waikato Catchment and incentivise enhancement and/or restoration of areas that meet one or more criteria in Appendix 2: Criteria for Determining Significance of Indigenous

Biodiversity. Re-vegetation approximately costs \$45,000 per hectare, excluding fencing of re-vegetated areas from stock. Incentivising through subdivision would assist in offsetting this cost and encourage enhancement and/or restoration planting.

- The submitter seeks that provisions for ecological enhancement and/or restoration of appropriate areas be included in the Conservation Lot Subdivision rules. Appropriate features to be restored should meet one or more criteria in Appendix 2: Criteria for Determining Significance of Indigenous Biodiversity. Minimum areas for enhancement and/or restoration should be in accordance with Rule 22.4.1.6.
- Rule 22.4.1.6 (iii) requires the legal protection of the conservation feature. The submitter suggests that this rule require legal protection only and leave the mechanism of protection to the discretion of Council when assessing the application (e.g.

Point Number 877.23

Summary of Decision Requested: Add a discretionary rule to Rule 22.4.1.6 Conservation lot subdivision as follows:

DI

(a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6 RD1 (vi-vii).

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6 RD1 (vi-vii).

Decision Reasons:

- Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue. This will ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not to meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the Anticipated Environmental Results.
- For lots smaller than 8,000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.

Point Number 877.24

Summary of Decision Requested: Retain Rule 22.4.1.6(a)(vi) and (vii) Conservation lot subdivision which enables the creation of a vacant lot between 8000m² and 1.6ha as a Restricted Discretionary Activity.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha as a restricted discretionary activity is supported.

Point Number 877.25

Summary of Decision Requested: Retain Farming as a permitted activity in Rule 22.1.2 P7 Permitted Activities.

Decision Reasons:

- The submitter supports Farming as a permitted activity, however seek to have the definition of farming amended as per their comment under Chapter 13: Definitions.

Point Number 877.26

Summary of Decision Requested: Add a new permitted activity to Rule 22.1.2 Permitted Activities as follows:

Activity:

Free-Range Poultry Farming

Activity specific conditions:

(g) Coops and associated areas for the treatment and/or disposal of wastes and composting must be setback at least 20m from the nearest site boundary.

Decision Reasons:

- Free-range poultry farming is a distinct land based activity utilising pasture and should be treated the same as any other permitted livestock activity that utilises natural soil quality on the site
- The Rural Zone is the only location that a free-range poultry activity can occur where poultry have access to areas of open grazing land.
- The effects of free-range poultry farming can be mitigated by the compliance with certain standards

Point Number 877.27

Summary of Decision Requested: Add the following activities to Rule 22.1.2 Permitted Activities:

On Site Primary Produce Manufacturing

Farming Visit, Public Garden

Packhouse and coolstore

Farmers' market (meeting certain performance standards)

Decision Reasons:

- There needs to be greater scope in the Permitted Activity table to allow for these activities as per the Franklin Section of the Operative District Plan
- These activities are appropriate for the Rural Zone as they are associated with farming activities and can be readily expected to establish without the need for resource consent.

Point Number 877.28

Summary of Decision Requested: Retain Rule 22.1.2 P9 Permitted Activities to enable Produce Stalls as a Permitted Activity.

Decision Reasons:

- The submitters support Produce Stalls as a permitted activity, however seek to have the definition of Produce Stall amended as per their comment under Chapter 13: Definitions.

Point Number 877.29

Summary of Decision Requested: **Delete** reference to free range poultry farming from Rule 22.1.3 RDI Restricted Discretionary Activities.

AND

Delete Rules 22.1.3 RDI(d)(i) and (ii) pertaining to setbacks for poultry farming.

AND

Add the assessment criteria/guidelines and effects of free range poultry farming as per the Franklin Section of the District Plan, particularly with regards to a more suitable setback as a permitted activity e.g. 20m.

Decision Reasons:

- Free-range poultry farming is a distinct activity that should not come under the definition of intensive farming. Refer to comments made elsewhere in the submission.
- Free-range poultry farming should not be subject to a 100m boundary setback. A 20m setback is adequate for a permitted free-range farming activity excluding grazing which should be allowed to occur in paddocks up to the boundary of a site as per any other permitted livestock activity.
- Free-range poultry farming should be treated the same as any other permitted livestock activity.
- There is no 100m site boundary condition in the Franklin Section of the Operative District Plan, only assessment criteria which provide a buffer area/guideline of 20m from the boundaries of a site. Any site boundary setbacks need to reflect this and the effects of the activity including the lower bird densities found in the free-range poultry industry.
- The submitter was unable to find section 32 justification of the 300m setback.

Submitter Number: 878

Submitter: David Wilson

Point Number 878.1

Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Te Kowhai aerodrome is an important hub for the aviation community of New Zealand.
- It's continued existence contributes to aviation safety in the Waikato region with fuel availability and a good alternate option to Hamilton.
- To enable an airpark would safeguard this unique facility and further enhance the considerable infrastructure that already exists at the aerodrome.
- This should be viewed as a huge opportunity for the Waikato region to take advantage of a unique and limited site where this type of development could be possible.

Point Number 878.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Te Kowhai aerodrome is an important hub for the aviation community of New Zealand.
- It's continued existence contributes to aviation safety in the Waikato region with fuel availability and a good alternate option to Hamilton.
- To enable an airpark would safeguard this unique facility and further enhance the considerable infrastructure that already exists at the aerodrome.
- This should be viewed as a huge opportunity for the Waikato region to take advantage of a unique and limited site where this type of development could be possible.

Submitter Number: 879

Submitter: Don Wilkinson

Organisation: SAA Auckland Chapter

Point Number 879.1

Summary of Decision Requested: **Retain** Te Kowhai Airfield.

AND

No specific decision sought, but submission seeks to 'enhance Te Kowhai Airfield per the Submission for even Airpark status'.

Decision Reasons:

- Te Kowhai is a very useful location for an emergency/refueling point, and in inclement weather. It is a safety "Bolt Hole".
- Airfields are diminishing in numbers generally.
- It provides camaraderie, healthy education and technical advancement with sport aircraft operation and maintenance.
- It is a sociable stop for company and fuel when heading south from Auckland.

Submitter Number: 880

Submitter: Dave Falconer

Point Number 880.1

Summary of Decision Requested: **Add** to Chapter 9 Specific Zones, new zoning policies, rules and methods to create a specific Kimihia Lakes Recreation and Events park zone, for the Lake Kimihia project and for the restoration of the former Solid Energy Huntly East Mine.

Decision Reasons:

- Other Councils have done it for Queenstown Events Centre, Lake Wanaka Centre, Rotorua Aquatic Centre, Taupo Events Centre, Taupo Equestrian Centre, etc.

- Council has responded to their LTDP submission: “WDC is working with the new landowners to support their vision for the Huntly East mine. ... Council and the landowner are in discussions about work programs to effect this rehabilitation. The Council has also been discussing with the New Zealand Transport Agency, the need for south facing expressway ramps to be installed. Activities such as the Huntly East Mine rehabilitation proposal will strengthen the need for such access.” This shows Council support for the Kimihia Lake and area development.
- The significance of the restoration of Lake Kimihia, and wetlands within the former mine area, to their former state embodies the policy I.5.7.2 Landscape and natural character.
- The restored Lake Kimihia would be a complete reflection of the relationship between people and place and it would be a good example of 'de-evolution'.
- The new owners have undone much of the exploitation of the lake by allowing it to refill and finally have its mana restored.
- The natural inclination of the water body is infilling the lake at a rate much faster than anticipated.
- It will be a stunning asset to future generations.
- Any means to allow the lake to infill even faster should be actively supported, as there are options available.
- The mining activity adversely affected the air quality in both odor and dust and was managed by Waikato Regional Council however under Section 31 (b) of the Resource Management Act Council can still control the actual effects of the protection of land.
- The submitters encourage Council to support the restoration of Lake Kimihia as a high priority.
- Once a coal mine is disestablished the adverse effects of the development need to be a high priority of Council to make sure restoration of a significant environmental asset such as a lake are unhindered by 'red tape'.
- Hampton Downs development took over a decade to work through the paperwork, however it was built on existing farm land which was in the flood zone and considered wet land', the defunct mine land is in need of restoration and its water and environmental value is in need of urgent care this can be understood under 1.11 Monitoring.
- The development of the Lake Kimihia Recreation and Events park would offer significant employment and development opportunities.
- It would be a popular events venue that is both accessible by the Auckland and Hamilton urban economies, generating income to Huntly —boosting employment opportunities that was forfeited by the closure of the mine.
- The submitters welcome recreational area to our growing population and significant tourism industry.
- The 'Golden Triangle' of Auckland, Hamilton, and Tauranga contains half of the national population and economy, and the present Labour government has committed to building a rapid rail network connecting these areas that run right past Huntly.
- Recreational use of the environment is important to the district however the scale of the proposed Kimihia Lakes Recreation and Events Park would be on a scale that could reach the major city centers that are within Hamilton and Auckland.
- The huge success of the Placemakers Huntly Speedway attests to the popularity of events drawing the crowds to the area and with the Expressway and envisioned access from/to Huntly this would only make the proposal more popular.
- It's time to be supportive to an outstanding vision to make Huntly a popular destination.
- The park will become a significant contribution to the Waikato District's economy.
- The proposed plan would enhance the Waikato economy and tourism industry.
- It is a picturesque lake and will have many tourism options, which are popular such as walks and sport opportunities, etc.
- Restoring a coalmine is of international interest and supports fully New Zealand's known 'Clean Green' image.
- Solid Energy and Waikato Regional Council assured us the lake would be restored.
- This is relevant to 1.9.3 Section 5 RMA, 1.9.5 Section 7 RMA, 1.12.5, 1.12.6, 1.12.7, 2.12.8, and Chapter 2: Tangata Whenua in the Proposed District Plan.

Point Number

880.2

Summary of Decision Requested:

Add a southbound on/exit ramp near Kimihia Road or McVie Road, Huntly, to divert as much traffic away as possible from Taupiri Mountain Cemetery, in relation to 2.12.1 (Tangata Whenua – Whakapapa (connection to nature) Policy – Whanaungatanga (relationship to nature)) and encourage Huntly's significant current growth.

Decision Reasons:

- The Maori King, in the late 1860's, wept when he was informed of the intended route of the main rail trunk line alongside state highway 1 effectively cutting the access to the sacred burial ground.
- Mount Taupiri is a sacred mountain and burial ground for Waikato Iwi and Kingitanga.
- Taupiri Te Putu Pa has a long history dating back to the 1600s, where past Maori Kings and Queen are buried in the highest part of the Uruapa, on the summit where Te Putu's pa stood.
- Parking and access became difficult because the State Highway and railway lie largely on gentler sloping land at the foot of the slopes of Taupiri Mountain
- Parking is required to be on the other side of the North Island transport system in a small and constrained area beside the Waikato River and Mangawara Stream.
- Many mourners attending Tangi often cause disruption to traffic, out of necessity.
- Mourners attending funerals have to manage 70kph traffic and then when the trains come it is formidable, as it is required to blow its horn amidst all the mourners and ceremony.
- Any reduction in traffic will be a much welcome outcome
- Maori obliged early European travelers to cross to the other side of the Waikato River to avoid the sacred area of Taupiri Mountain.
- It would be a valuable and thoughtful addition to include Taupiri Mountain and its significance to the Maori people as part of the Mayor's proposition to gain acceptance of the need for the southbound on/off ramp.
- Any traffic passage that can give relief to the sacred Taupiri Mountain Uruapa (Cemetery) and mourners must be of national and governmental significance and is reflected in the WDP, Chapter 2, Tangata Whenua
- This should be a major concern of Council and Government
- In 1.4.1.3, Huntly is projected to remain static. However, several new residential housing developments have fully sold including the Allen Mara Subdivision lifestyle development. Huntly is experiencing significant growth, which we have seen having lived in the town for decades, and it is highly likely the Waikato Expressway on/off ramp to Huntly will gain governmental approval to go ahead
- It is fatalistic of WDC to be 'planning' under 1.4.1.3 for the Expressway to bypass Huntly when the Mayor and many others have put in so much effort including by WDC for this to go ahead
- The Sacred Taupiri Mountain burial grounds should ensure the provision off the on/off ramps to Huntly on its own grounds alone.
- If Council has given up on the Huntly (Rahui Pokeka) Expressway on/off ramps then it needs to let the community know so they can take up the cause
- The Council responded to the submitters as follows: “The Council has also been discussing with The New Zealand Transport Agency, the need for south facing expressway ramps to be installed. Activities such as the Huntly East Mine rehabilitation proposal will strengthen the need for such access.” This response is contrary to the Waikato District Plan comments.
- Uruapa was recently discussed with the Mayor regarding the Sacred Burial Grounds of Taupiri Mountain and was considered a major factor in addressing the need for access from Huntly to the Expressway.
- The submitter has included part of their submission to the Long Term District Plan 2018 regarding this. Under 2.12.1, it states 'recognize the relationship of Tangata Whenua with areas of significance, including waahi tapu, urupa, maunga and other landforms...'
- Under the RMA the Treaty of Waitangi needs to be upheld in discussions regarding the urupa and the diversion of traffic away from the sacred burial site (Taupiri Mountain) via a Huntly/Rahui Pokeka off/on ramp

Point Number

880.3

Summary of Decision Requested:

Restore the town name of Huntly to its original name of Rahui Pokeka.

Decision Reasons:

- The Council need to be mindful of cultural value/impact assessments such as honoring urupa rather than factor the Huntly access to the Expressway
- The Council should be acknowledging Section 2.12.1, the significant legal power of Tangata Whenua and areas of significance such as urupa.
- It is a matter of utmost urgency and an obligation under Section 2.12.1 (iii)
- The Council had dismissed the submitters previously “At the stage Council is not looking to rename Huntly”.

Point Number

880.4

Summary of Decision Requested:

Amend zoning of a small portion of the land at Solid Energy's Huntly East Mine from Rural Zone to Residential Zone (not identified in the submission). This is to border historically Residential Zoned land.

Decision Reasons:

- This is in relation to Section 1.4.4 (Issues for Waikato District – The Urban Environment) and 1.5.2 (What does this mean for Waikato district strategic objectives and directions – Planning for urban growth and development)
- To help fund for the project proposed in previous submission points.
- The rezoning of a small portion of the defunct mine to Residential Zoning would meet the Councils requirement to ensure the environment is maintained and enhanced from the derelict state it was left in to creating quality residential sites in a desirable area, which will fund further development of the mine into a sustainable environment.

- The submitters were promised native plantings by both the mine and the Waikato Regional Council eight years ago, and that the smoldering coal fires would be sorted so that the acid fumes would not drift to neighboring residential homes.
- The constraints to avoid encroachment into rural land is not a consideration for the defunct mine, as it is a national responsibility to restore this area into its original state.
- It is no longer a rural area and is a derelict abandoned mining area.
- This is so that no residential fragmentation would occur in this case.
- The area to rezone as residential is sympathetic to the restoration project of Lake Kimihia, which is paramount in the Aliens vision to see the lake restored.
- The valued elements of the original local character are respected and cater for expected growth confirmed by all residential housing developments being sold in the area.
- The Council supports the development of the nationwide cycle network and the Hamilton Airport project, which are just outside of the District. The submitter supports this however the defunct mine is in the center of District jurisdiction and needs the Councils support.
- This will provide recreational opportunities through walkways and cycle routes and already has land set aside for connectivity to the Lake Hakanoa walkway via Kimihia Road.
- This follows the lead of the New Zealand Biodiversity Strategy, the Draft National Policy Statement on Biodiversity, and the Waikato District Conservation Strategy.

Submitter Number: 881 **Submitter:** Hannah Fisi'ihoi

Point Number 881.1

Summary of Decision Requested: Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- Ngati Koata has close historical ties to Whaingaroa.
- These provisions allow Iwi to sustain their lands in a way that enables them to address the cultural and economic wellbeing of their people.
- These provisions allow the development of a fluid concept plan that can evolve with the needs of future generations.
- This will serve to revitalise the historical connection Ngati Koata has on the Whaanga Coast.

Submitter Number: 882 **Submitter:** Kenneth Kauluwehi

Point Number 882.1

Summary of Decision Requested: Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- As Ngati Koata, the submitter appreciates the amendments to the Waikato District Proposed Plan in that they support the social, cultural and economic aspirations of mana whenua on the Whaanga Coast.
- Through the development of sustainable practices on their lands in Whaingaroa, they will be able to reinvigorate their connections with the area, the local iwi and the wider community.

Submitter Number: 883 **Submitter:** Jayde Smiler

Point Number 883.1

Summary of Decision Requested: Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- As Ngati Koata with strong links to Whaingaroa, the submitter sees the removal of barriers to sustainable development of their lands as supporting Iwi aspirations to grow a prosperous, healthy, vibrant, innovative and culturally strong people.

Submitter Number: 884 **Submitter:** Reuben Smiler

Point Number 884.1

Summary of Decision Requested: Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- As Ngati Koata, the submitter appreciates the amendments to the Plan in that it supports the social, cultural and economic aspirations of mana whenua on the Whaanga coast.
- Through the development of sustainable practices on their lands in Whaingaroa, the submitters will be able to reinvigorate their connections with the area, with local iwi and the wider community.

Submitter Number: 885 **Submitter:** David Smiler

Point Number 885.1

Summary of Decision Requested: Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- As Ngati Koata with strong links to Whaingaroa, the submitter sees the removal of barriers to sustainable development of their lands as supporting Iwi aspirations to grow a prosperous, healthy, vibrant, innovating and culturally strong people.

Submitter Number:	886	Submitter:	Jeneah Smiler
Point Number	886.1		
Summary of Decision Requested:	Retain Chapter 2 Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> • As Ngati Koata land block owners in Whaingaroa, the submitter feels that barriers expressed in the current district plan prevent Tangata Whenua from maintaining their relationship with their ancestral lands. • The submitter appreciates that the laws and policies outlined in the Plan supports more effectively the occupation and development of Maori land, allowing mana whenua to utilise, manage and enjoy their traditional resources in accordance with Tikanga Maori. • This will strengthen their connection to the area once again for generations. 		

Submitter Number:	887	Submitter:	Jared Smiler
Point Number	887.1		
Summary of Decision Requested:	Retain Chapter 2 Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> • As Ngati Koata, the submitter appreciates the amendments to the Waikato District Proposed Plan in that they support the social, cultural and economic aspirations of mana whenua on the Whaanga Coast. • Through the development of sustainable practices on their lands in Whaingaroa, they will be able to reinvigorate their connections with the area, the local iwi and the wider community. 		

Submitter Number:	888	Submitter:	Murray Bassett
Point Number	888.1		
Summary of Decision Requested:	Retain Chapter 2 Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter feels that the policies and rules outlined in Chapter 2 help to address the barriers that have prevented owners from engaging and utilising the land for social, cultural and economic well-being. • As Ngati Koata, the submitter is excited about the prospect of being able to develop a master plan for their land blocks in Whaingaroa that supports the kind of sustainable development that will encourage more frequent visits of their iwi to the area. • The Plan may be the start of Whaingaroa once again becoming a turangawaewae stronghold for Ngati Koata. 		

Submitter Number:	889	Submitter:	Pirihira Bassett
Point Number	889.1		
Summary of Decision Requested:	Retain Chapter 2 Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> • The policies and rules outlined in Chapter 2: Tangata Whenua help to address the barriers that have prevented owners from engaging and utilising the land for social and cultural and economic wellbeing. • As Ngati Koata, the submitter is excited about the prospect of being able to develop a master plan for their land blocks in Whaingaroa that supports the kind of sustainable development that will encourage more frequent visits of their iwi to the area. • This could be the start of Whaingaroa becoming a turangawaewae stronghold for Ngati Koata once again.

Will strengthen connection to area again for future generations. 		

Submitter Number: 921 **Submitter:** Mercer Airport
On behalf of: Mercer Airport

Point Number 921.1

Summary of Decision Requested: **Add** a special zone for the Mercer Airport (comprising Lot 1 DP 485184 (CT 689084), Lot 2 DP 485184 (CT 689085) and Lot 1 DP 384812 (CT 338998));
AND
Amend the zoning of Mercer Airport (Lot 1 DP 485184 (CT 689084), Lot 2 DP 485184 (CT 689085) and Lot 1 DP 384812 (CT338998) from Rural Zone to Mercer Airport Zone (see map included in the submission);
AND
Add a new section, 9.5 Mercer Airport Zone, to Chapter 9 Specific Zones, as follows:
Objective 1: Mercer Airport is able to operate safely and efficiently and is developed to meet the current and future needs of the aviation community.
Policy 1a: To enable the continued operation and development of Mercer Airport by providing for a diversity of aviation and other activities which support the aviation sector.
Policy 1b: To protect the operational and safety requirements of Mercer Airport by controlling development surrounding the Airport that may restrict or infringe those requirements.
Policy 1c: To ensure that the bulk and location of buildings and structures at the Airport provide for the unique operational requirements of an airport whilst achieving appropriate levels of amenity at the Airport and surrounding properties.
Policy 1d: To enable a range of aviation opportunities at the Airport and any associated infrastructure and business including, fixed wing aircraft, helicopters, and rockets by recognizing their operational and safety requirements.
Objective 2: The adverse effects of airport activities are managed to ensure acceptable amenity outcomes.
Policy 2a: Mitigate adverse airport effects by managing:
(a) The scale and intensity of on-site activities;
(b) Noise;
(c) Lighting; and
(d) Hazardous substances.
Policy 2b: To ensure that bulk and location standards provide for the unique operational requirements of an airport whilst at the same time achieving appropriate levels of amenity.
AND
Add new Section 7 Mercer Airport Zone to Appendix 1 Acoustic Insulation (refer to submission for specific wording);
AND
Add a new Chapter 29 Mercer Airport Zone to Section C Rules (see submission for specific wording);
AND
Add an Air Noise Boundary (65 dBA Ldn Contour) and Outer Control Noise Boundary (55dBA) for Mercer Airport (see submission for map);
AND
Add a new Appendix 13 Mercer Airport Zone to Chapter 29: Appendices (see submission for specific wording);
AND
Add aerodrome characteristics (runway and runway strip dimensions) as an Appendix to the Mercer Airport Zone (see submission for the technical specification provided by Airbiz Consultants).

Decision Reasons:

Zoning

- Currently, aviation-related activities are constrained by provisions of the Rural Zone.
- By necessity airfields are required to locate in rural areas because of the space needed for runway operations and need to avoid environmental impacts on higher density urban areas.
- The restrictive nature of Rural Zone provisions means aerodromes within Waikato District lack commercial and operational flexibility need to ensure their sustainability and long term growth.
- Any form of aviation-related development typically triggers an RMA consent requirement, which can be costly and litigious.
- Uncertainty associated with the RMA process can also be a barrier to industry investment, to the detriment of the wider aviation community and the wider community at large.
- The proposed rezoning is consistent with the approach adopted elsewhere in the PDP for the Te Kowhai, which faces similar challenges.
- The benefit of rezoning is that it provides more certainty for the aviation community in terms of activities which can be undertaken by right.

Objectives and Policies

- Ensures that the operational needs of the Airport are protected and its benefits recognised while ensuring that the adverse effects of the airport operation are appropriately managed.
- The objectives and policies are needed to support existing and proposed activities within the General Plan Mercer Airport Zone.
- NZS 6805 uses a 55dBA Ldn contour to define the OCB and this deemed to be an appropriate threshold for the protection of amenity values.
- NZS 6805 recommends a noise level of >65 dB Ldn to define the inner ACB.
- Based on the above, people living outside of the OCB are considered to experience no adverse effects from aircraft noise whereas those living between the OCB and the ANB are considered to be affected to some degree, the latter resulting typically in acoustic insulation being required.
- People within the inner ANB are affected by aircraft noise to the extent that residential activity and other noise sensitive activities are not provided for in that location.
- Are currently no noise control boundaries for Mercer Airport in Operative District Plan maps.
- Consent conditions from March 2014 however require Mercer Airport to operate in accordance with 55dBA Ldn contour prescribed by Hegley Acoustic Consultants.
- Results of Hegley Acoustic Consultants modeling demonstrated that, with the exception of two properties immediately west of the runway, resulting noise levels at all residential properties in the vicinity of the airport would be less than 55dBA Ldn, the threshold for 'reasonable' noise in terms of residential amenity under NZ6805.
- Although 2 residential properties are located within the 55dBA Ldn contour, these landowners provided written approval.

New Appendix

- Obstacle limitation surfaces are necessary to enable aircraft to maintain a satisfactory level of safety while maneuvering at low altitude in the vicinity of an airfield.
- It protects airport flight paths from over height development or vegetation.
- It is needed to futureproof the aerodrome to meet the long term needs of the aviation community.
- Without it, physical development in the vicinity of the aerodrome has the potential to limit flight operations, undermining the sustainability of the airport.

Rules

- Zone-specific rules will provide surety for the wider community that aviation activities and aviation-related development can be managed to ensure acceptable levels of amenity.

- This plan illustrates the dimensional requirements of the runway and runway strip to ensure compliance with Civil Aviation Authority Classification.

Point Number 921.2

Summary of Decision Requested: **Amend** the Proposed District Plan to make additional and consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Various as outlined in the submission.

Submitter Number: 922

Submitter: John Rowe

Point Number 922.1

Summary of Decision Requested: **Amend** Chapter 22.4 Subdivision by enabling transferable rural lot right subdivision as a restricted discretionary activity and discretionary activity throughout the Waikato District.

Decision Reasons:

- The transferable Rural Lot process allows for the transfer of existing titles or consented conservation lots to more appropriate areas in the district.
- There is no net increase in the overall number of development rights across the district.
- On the whole the submitter believes that the process has been working well for many years in the Former Franklin area and is an effective mechanism for promoting development in more appropriate areas whilst protecting high quality versatile soils.
- To remove the provision for Transferable Rural Lot subdivisions and making it a prohibited activity is unnecessary and compromises the current and proposed objectives for the rural area.
- The natural outcome of the Transferable Rural Lot process is to transfer existing/consented titles from less intensively developed outlying areas to the more intensively developed central areas.
- It seeks to manage growth in the rural zones and to avoid the wide dispersal of lots and protection of larger rural blocks.
- The Transferable Rural Lot provisions of the former Franklin District Plan were designed to protect and enhance the potential use of high quality versatile soils by encouraging the transfer of surplus titles to more environmentally sustainable locations.
- This is consistent with the draft District Plan objectives and policies and the objectives of the Resource Management Act 1991.
- The fact that the former Franklin District is now administered by Waikato District Council does not remove the underlying objectives of wiser use of resources.
- The same resources remain in the same district. The fact that the administering authority may want a consistent set of subdivision rules across the district is not relevant.
- By prohibiting the transfer of lots within the District, the proposed objectives and policies may not be able to be met.
- In particular the removal of the process:
 - Will prevent the consolidation of existing titles
 - Will not promote the protection of productive land or versatile soils within the District;
 - Will not assist in the reorganisation of the wide dispersal of and reduction in rural titles, and will negate opportunities for the retention of land versatility and larger lot sizes in rural areas and for productive farming units to better manage the use of soils and rural land;
 - Will not promote positive effects on the rural environment, rural character and rural amenity;
 - Will not reduce reverse sensitivity effects when existing title rights are developed in rural production areas of the District; and
 - Will not promote positive effects on the rural environment, rural character and rural amenity;
 - Will not reduce reverse sensitivity effects when existing title rights are developed in rural production areas of the District; and
 - Will not promote outcomes that are consistent with the rural objectives and policies.
- The majority of transferable rural lot subdivision applications in the Waikato District are removing titles for the larger productive land holdings, thus reducing or eliminating adverse effects on unplanned and scattered rural residential development in the more remote rural Waikato, and reducing the burden on infrastructure, particularly in more remote areas.
- If these rights are now restricted to where they currently are within the Waikato District, they will result in the uptake and development of latent capacity in outlying areas of the District, which is inconsistent with and contrary to the objectives and policies.

Point Number 922.2

Summary of Decision Requested: **Amend** Rule 22.4.1.2 RD1 (a) (iv) General subdivision, as follows:

RD1 (a) Subdivision must comply with all of the following conditions:

...

(iv) The additional lot must have a proposed area of between ~~8,000m²~~ 4000m² and 1.6 ha;

Decision Reasons:

- A lot area range of 8000m² - 1.6ha will result in a lifestyle block that is too large and will force developers to turn potentially productive farming paddocks into areas that will not be used for farming and become neglected.
- The best maintenance of open pasture (all classes of soils) is grazing animals.
- The lots created will be too small to be productive or grazed, yet they are too big to be easily managed as lifestyle properties.
- If a landowner is subdividing off an existing farm cottage, the house and curtilage area will be approximately 2000m².
- This will result in at least 6000m² of potentially productive farming land being wasted or not utilised.
- The high class soil rule will restrict this to some degree because an area of land is not classified as 'high class soil', it doesn't mean that it can't be used for productive purposes or add valuable support to a farming operation.

Point Number 922.3

Summary of Decision Requested: **Delete** Rule 22.4.1.4 (a)(i) Boundary relocation,

OR

Amend Rule 22.4.1.4 (a)(i) Boundary relocation to allow application of this rule to more than two existing Records of Title.

Decision Reasons:

- The rule needs to allow for two or more existing titles as many landholdings in the Waikato District are comprised of several titles and the proposed rule will therefore restrict logical layouts.
- Titles created after 18 July 2018 may be the result of a minor boundary adjustment or the balance of a general subdivision application and it is unreasonable to a discretionary activity test to apply in this instance if rural land use is to be supported and better environmental outcomes achieved.
- Boundary relocations are a legitimate way to adjust legal boundaries and the potential adverse effects of moving a boundary or title are generally minimal.
- The assumption is that the intent of Rule (a)(i) is to prevent making new conservation lots or the additional title created from the General subdivision rule, larger in size.
- This intent will now potentially restrict or make boundary adjustments tougher for larger rural blocks that may have a title created after 18 July 2018 for whatever reason.
- These newer titles could have been subject to another minor boundary adjustment or could be the larger balance lot of a General subdivision application.

- The submitter does not think that a further boundary relocation of these larger lots should be a discretionary activity as it then becomes too restrictive on larger land holdings that may be relocating boundaries for legitimate reasons.
- Rule (a)(i) does not recognise the legitimate need to adjust rural lot boundaries to support rural land use and create a better environmental outcome.
- It also doesn't allow for the logical restructure of landholdings with more than two existing larger titles.
- It also doesn't allow for the logical restructure of landholdings with more than two existing larger titles.
- What if the two titles subject to the boundary relocation are less than 8000m² to begin with?

Point Number 922.4

Summary of Decision Requested: Delete the maximum number of titles from Rule 22.4.1.5 Rural Hamlet Subdivision.

Decision Reasons:

- The current Rural Hamlet subdivision rule will not be a wholesale provision for better restructuring existing titles on many rural properties, especially larger landholdings.
- The rural zone varies drastically throughout the district from open flat countryside predominantly used for dairy farming, to more undulating hilly terrain with scattered mature vegetation predominantly used for dry-stock farming.
- Often the most logical subdivision layout on rural properties that preserve the largest area of land for productive purposes and have the least potential for adverse effects on the surrounding environment, are influenced by the site specific characteristics such as topography, vegetation, road frontage and existing building development on that particular property.
- Ideally, all new lots clustered together as a hamlet styled subdivision would be great but (unlike the residential zoned land) planning ideology such as the proposed only works on a small minority of the rural zoned land in the District and provision or more desecration needs to be allowed to cater for these other landholdings.
- In the rural environment, especially in the upper Waikato, these physical restraints greatly restrict such a logical layout. Often it may be a far better result for that particular environment to position the existing titles around existing development on the property or at other ends of the property from each other which could be km's apart and even accessed off different public roads.
- Making a rural subdivision application a Non-Complying activity for creating a better overall result for that particular environment is too restrictive and needs to be at least a Discretionary activity.

Point Number 922.5

Summary of Decision Requested: Amend Rule 22.4.1.6 Conservation lot subdivision, so that this rule provides for riparian planting and clarification on enhancement planting for Significant Natural Areas.

Decision Reasons:

- The Conservation Lot subdivision rules are generally positive, but further allowance can still be made for additional lots through riparian planting of streams and rivers.
- This will provide incentive for farmers to plant the sides of their waterways which will obviously bring significant ecological gain to the district.
- The cost to a property owner of protecting and maintaining in perpetuity, significant stands of vegetation are substantial.
- The cost of appropriate bush covenant fencing alone is currently around \$30 per meter.
- Generally speaking, farmers are becoming more and more acceptable to riparian planting on their properties, but this significant cost will need to be offset to incentivise this ecological enhancement.
- The usual signoff requirements with ecologists certifying that the riparian planting is self-sustaining would obviously still be applicable.

Point Number 922.6

Summary of Decision Requested: Amend Rule 22.3.2 P1(b)(i) Minor dwelling, as follows:

(i) The minor dwelling must be located within ~~20m~~ 150m of the dwelling;

Decision Reasons:

- Submitter supports specifying a separation distance.
- The proposed 20m separation distance is too small as it does not allow for existing site constraints such as curtilage area, effluent disposal fields and other ancillary buildings.
- The requested 150m distance will make a huge difference in terms of functionality of the property while providing some degree of privacy between the main dwelling and minor dwelling.

Point Number 922.7

Summary of Decision Requested: Amend Rule 22.3.7.1 Building Setbacks - All boundaries, by deleting P1 (a)(iii) and amending P1 (a)(iv) as shown below:

P1 (a) A habitable building located on a site less than 1.6ha must be set back a minimum of:

...

~~(iii) 25m from the boundary of an adjoining site that is 6ha or more;~~

(iv) 12m from the boundary of an adjoining site ~~that is less than 6ha.~~

Decision Reasons:

- The operative rule in the Franklin Section which requires a 10m setback has worked well.
- A 25m setback is too restrictive and not justified.
- There is no discernible difference between a 25m setback and 12m setback.
- A 25m setback restricts houses from being built on more appropriate sites.

Point Number 922.8

Summary of Decision Requested: Amend Rule 22.3.7.1 P2 (a)(iii) Building Setbacks - All boundaries, as follows:

P2 (a) A non-habitable building located on a Record of Title less than 1.6ha must be set back a minimum of:

...

(iii) ~~12m~~ 5m from every boundary other than a road boundary.

Decision Reasons:

- The proposed 12m setback is too restrictive for a non-habitable building and many people move to rural blocks so that they have space for a garage or shed.

Point Number 922.9

Summary of Decision Requested: Amend Rule 22.3.7.1 P3 (a)(iii) Building Setbacks - All boundaries, as follows:

P3 (a) A habitable building located on a Record of Title 1.6ha or more must be set back a minimum of:

...

(iii) ~~25m~~ 12m from every boundary other than a road boundary.

Decision Reasons:

- The proposed 25m setback is too restrictive and not justified.
- Small rural blocks are usually created on undulating land with low class soils and a 25m setback will restrict the location of a dwelling.

Point Number 922.10

Summary of Decision Requested: Amend Rule 16.4.1 RD1 (a)(i) Subdivision - General, as follows:

RD1 (a) Subdivision must comply with all of the following conditions:

(i) Proposed lots must have a minimum net site area of ~~450m²~~ 400m², except where the proposed lot is an access allotment or utility allotment or reserve to vest;

Decision Reasons:

- The proposed minimum net site area of 450m² is too large and restrictive.
- Smaller lots are generally more popular for easy maintenance and the request for 400m² will still be large enough to fit a decent sized dwelling.

Point Number 922.11

Summary of Decision Requested: Amend Rule 16.4.1 RD1 (a)(iv) Subdivision - General, to include an area requirement before triggering a "rear lot" rule, e.g. 1 hectare.

Decision Reasons:

- The proposed rule is not fully workable for smaller infill subdivisions and should only apply to larger sites. The submitter suggests that a threshold of over 1 ha is appropriate.

Point Number 922.12

Summary of Decision Requested: Amend Rule 22.4.1.5 Rural Hamlet Subdivision to be a discretionary activity rather than a non-complying activity if there is non-compliance with Rule 22.4.1.5 RD1 (a)(i)-(v).

Decision Reasons:

- The default activity status of non-complying is too restrictive and it is more appropriate for applications that breach this rule to be considered as a discretionary activity when there is logic for the final title layout.

Point Number 922.13

Summary of Decision Requested: Delete Rule 22.4.1.2 (v) General Subdivision regarding high class soils.

Decision Reasons:

- Land Use Capability Assessments are expensive and the 80%/20% requirement is difficult to understand given the objective of retaining high class soil.
- It would be more appropriate for the rule to refer to the actual size of the high class soils. For instance, a larger rural property that only has 10% high class soils may have significantly more of these soils than a smaller property that has 80% high class soils.
- The rule is open to interpretation.
- This rule will be difficult to administer.
- This rule makes compliance harder with no actual gain.

Point Number 922.14

Summary of Decision Requested: Delete Rural Zone - General Subdivision Rule 22.4.1.2(a)(v) regarding high class soils.

Decision Reasons:

- Subdivision rules have to be clear and easy to understand and not open for interpretation.
- The submitter believes that this rule doesn't seem to make any logical or practical sense and will be far too difficult to administer or interpret correctly in the rural environment and the potential gains are negligible.
- The rule will trigger an expensive Landuse Capability Report for a very small amount of soil (8000m² - 1.6ha as proposed).
- The General Subdivision rule allows for a 2 lot subdivision of a 20 hectare sized lot, with one of the lots being 8000m² and 1.6ha.
- Does this rule mean that if you have a 20 hectare sized title that has 1 hectare of high class soil, 80% of that high class soil can be on the smaller lot? And 20% on the larger lot? Or is it the other way round?
- The objectives and policies promote the protection of high class soil which is encouraged but this rule makes compliance harder than it needs to be with no actual gains.
- Due to the size restrictions on the new lot created (8000m² - 1.6ha), the maximum amount of high class soil that could ever be removed from production is 8% of the overall property (based on a 20 hectare sized site) size that would never be bigger enough to be economically productive in the first place.
- Most titles eligible for this subdivision opportunity will be much larger than 20 hectares, so the overall potential loss of high class soil in terms of an overall percentage will be significantly less and negligible in terms of the overall scale of the rural property.
- Too much emphasis is put on the percentage of high class soils on a particular property.
- It would be more appropriate to be in terms of the actual size of the high class soils. For example a larger rural property that has only 10% high class soils may have significantly more high class soil than a smaller property that has say 80% high class soils.
- The percentage rule doesn't practically achieve what it intends to.

Point Number 922.15

Summary of Decision Requested: Amend Rule 22.3.7.1 Building Setbacks - AI boundaries, so that P4 (a)(iii) reads as follows:

P4 (a) A non-habitable building located on a Record of Title 1.6ha or more must be set back a minimum of:

...

(iii) ~~25m~~ 5m from every boundary other than a road boundary.

Decision Reasons:

- The proposed 12m setback is too restrictive for a non-habitable building.
- Many people move to rural properties to have space for a garage or shed.
- Having these 12m from the boundary is going to be too restrictive.

Point Number 922.16

Summary of Decision Requested: **Amend** Rule 22.3.7.2 Building setback - sensitive land use, by adding text to PI (a) (iv) and (v) to confirm that the specified separation distances are measured from the identified Aggregate Extraction Area rather than the title boundaries that contain this extraction area.

OR

Amend the definition of 'Aggregate Extraction Area' in Chapter 13: Definitions so that it refers to the consented extraction area, rather than the title boundary of the subject site.

Decision Reasons:

- The submitter has stated that some resource consent applications involving an Aggregate Extraction Area have been incorrectly assessed by Council staff and expensive legal opinions have had to be sought in order to confirm how the separation distance is to be calculated.

Point Number 922.17

Summary of Decision Requested: **Amend** Rule 22.3.7.2 PI (a)(vii) Building setback - sensitive land use, as follows:

(a) Any building for a sensitive land use must be set back a minimum of:

...

(vii) 300m from the actual boundary of another site containing an intensive farming activity;

Decision Reasons:

- This rule needs to be clarified so that the 300m buffer distance applies to the intensive farming activity rather than the boundary of a title that contains that activity. For example, an intensive farming activity may be located at one end of a very large site. It would then be unfair to require an owner of an opposite property, which may be several hundred metres away, to locate their buildings at least 300m from the site that contains the intensive farming activity.

Point Number 922.18

Summary of Decision Requested: **Amend** Rule 22.4.9 RD1 (a)(iii) Subdivision - Building platform, as follows:

(a) Subdivision, other than an access or utility allotment, must provide a building platform on the proposed lot that:

...

(ii) Has an average gradient not steeper than ~~1:6~~ 1:8;

Decision Reasons:

- The proposed maximum gradient of 1:8 is too restrictive for the Rural Zone, particularly in the upper Waikato District where building sites are more likely to be on undulating topography.
- The objectives and policies promote the location of new lots away from high class soils and the rule will therefore force new lots and building sites to locate on steeper topography.
- A grade of 1:6 is still workable and as long as a geotechnical report supports the location.

Point Number 922.19

Summary of Decision Requested: **Delete** Rule 23.4.2 RD1 (a)(i) General Subdivision

AND

Amend the zoning of properties from Country Living Zone to Village Zone

AND

Amend Rule 24.4.1 RD1 (a) General Subdivision, as follows:

(a) Proposed lots must have a minimum net site area of ~~3,000m²~~ 2000m², except where the proposed lot is an access allotment, utility allotment or reserve to vest.

Decision Reasons:

- The submitter states that all Village zoned lots must have a minimum net site area of 2000m².
- The Country Living Zone which requires a minimum lot size of 5000m² creates lots too small to be productive or grazed and too big to be easily managed for lifestyle purposes.
- A smaller lot of 2000m² is efficient and it still retains an open rural residential character which can be planted, fenced, mowed and easily maintained.
- New houses are generally no larger than 3000m² and with an effluent disposal field of approximately 600m², this would leave more than 1000m² for additional curtilage.
- This outcome would remain consistent with the objectives and policies for the Country Living Zone.

Submitter Number: 923 **Submitter:** Waikato District Health Board

Point Number 923.1

Summary of Decision Requested: **Amend** Chapter 23: Country Living Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.2

Summary of Decision Requested: **Amend** Chapter 24: Village Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number

923.3

Summary of Decision Requested:

Amend Chapter 25: Reserve Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number

923.4

Summary of Decision Requested:

Amend Chapter 26: Hampton Downs Motor Sport and Recreation Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number

923.5

Summary of Decision Requested:

Amend Chapter 27: Te Kowhai Airpark Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number

923.6

Summary of Decision Requested:

Amend Chapter 28: Rangitahi Peninsula Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number

923.7

Summary of Decision Requested:

Retain Issue 1.4.4- The Urban Environment as notified.

Decision Reasons:

- The submitter supports the stated intent to maintain the Waikato District's rural resources and ensuring population growth and urban development results in high-amenity urban areas.
- The 'centers-based' approach of retail development is also supported, as is consolidating growth to achieve compact urban form as this better aligns with the agreed Future Proof settlement pattern. If accompanied by quality pedestrian infrastructure this will enable walkability, increased physical activity, and therefore improved health and wellbeing outcomes.
- A commitment to robust and comprehensive master planning and structure planning that is co-developed with local communities will help enable strong local 'place making' and positive community health and wellbeing outcomes.

Point Number

923.8

Summary of Decision Requested:

Retain 1.5.1- Compact urban development as notified.

Decision Reasons:

- The consolidating of growth to achieve compact urban form as this better aligns with the agreed Future Proof settlement pattern is supported. If accompanied by quality pedestrian infrastructure will enable walkability, increased physical activity, and therefore improved health and wellbeing outcomes.

Point Number 923.9
Summary of Decision Requested: **Retain** 1.5.2- Planning for urban growth and development as notified.
Decision Reasons:

- A commitment to robust and comprehensive master planning and structure planning that is co-developed with local communities will help enable strong local 'place making' and positive community health and wellbeing outcomes.

Point Number 923.10
Summary of Decision Requested: **Retain** 1.5.3- Cross-boundary issues as notified.
Decision Reasons:

- No reasons provided.

Point Number 923.11
Summary of Decision Requested: **Retain** 1.5.4- Urban Growth as notified.
Decision Reasons:

- The consolidating of growth to achieve compact urban form as this better aligns with the agreed Future Proof settlement pattern is supported. If accompanied by quality pedestrian infrastructure will enable walkability, increased physical activity, and therefore improved health and wellbeing outcomes.

Point Number 923.12
Summary of Decision Requested: **Retain** 1.5.5- Services and general infrastructure as notified.
Decision Reasons:

- Compact urban form if accompanied by quality pedestrian infrastructure will improve health and wellbeing outcomes.

Point Number 923.13
Summary of Decision Requested: **Retain** 1.5.6- Transport and logistics as notified.
Decision Reasons:

- Compact urban form if accompanied by quality pedestrian infrastructure will improve health and wellbeing outcomes.

Point Number 923.14
Summary of Decision Requested: **Add** a new clause (f) to Section 1.5.7.3- Water which states, the importance of quality fresh water for public health outcomes use, storm water management to protect public health; and promotion of the use of water tanks for the onsite storage of rainwater for uses other than for human consumption, should be promoted.
Decision Reasons:

- The submitter understands the current pressure on water supplier's across the Waikato District and the link between the three waters and public health risk has been identified in Future Proof Three Waters Strategy (2012).
- The submitter supports the use of water tanks for onsite storage of rainwater, and encourages Council to consider provisions that enable broader water demand management options for some communities, e.g. Another potential use of rainwater is to supplement some current water use within the home (i.e. toilet flushing, washing of laundry etc.), where use of treated water isn't necessary.

Point Number 923.15
Summary of Decision Requested: **Amend** Clause 1.5.6 (c)- Transport and Logistics to correctly reference the Waikato Regional Land Transport Plan.
Decision Reasons:

- Clause 1.5.6 (c) Should reference the Waikato Regional Land Transport Plan, as it includes objectives and policy related to transport and logistics and transport, and land use and land transport integration.
- 1.5.6 (c) References the Regional Land Transport Strategy which has now been replaced under the Land Transport Management Act by the Regional Land Transport Plan.
- Is important in promoting connected communities and positive public health and wellbeing outcomes.

Point Number 923.16
Summary of Decision Requested: **Amend** Integration of District Plan with other plans and documents section 1.10.2.3- Waikato Region Strategies and Plans to correctly reference the Waikato Regional Land Transport Plan.
Decision Reasons:

- Clause 1.5.6 (c) Should reference the Waikato Regional Land Transport Plan, as it includes objectives and policy related to transport and logistics and transport, and land use and land transport integration.
- Is important in promoting connected communities and positive public health and wellbeing outcomes.

Point Number 923.17
Summary of Decision Requested: **Amend** Clause 1.5.6 (c)- Transport and Logistics to correctly reference the Waikato Regional Public Transport Plan.
Decision Reasons:

- The narrative on public transport and urban subdivision would benefit from reference to Regional Public Transport Plan, containing specific objectives, policies, services and service frequencies for public transport in the Waikato District.
- Important in promoting connected communities and positive public health and wellbeing outcomes.

Point Number 923.18

Summary of Decision Requested: **Amend** Section 1.5.7- Natural Environment to correctly reference the Waikato Regional Land Transport Plan and the development of the Hamilton to Auckland passenger rail service.

Decision Reasons:

- The narrative on public transport and urban subdivision would benefit from reference to Regional Public Transport Plan, containing specific objectives, policies, services and service frequencies for public transport in the Waikato District.
- Is important in promoting connected communities and positive public health and wellbeing outcomes.

Point Number 923.19

Summary of Decision Requested: **Amend** Clause 1.10- Integration of District Plan with Other documents to correctly reference the Waikato Regional Land Transport Plan and development of the Hamilton to Auckland passenger rail service.

Decision Reasons:

- The submitter requests that this section correctly references the development of the Hamilton to Auckland Passenger rail service.

Point Number 923.20

Summary of Decision Requested: **Retain** Section 1.6-Ngaai Iwi o Tainui ki te Waikato Takiwaa as notified.

Decision Reasons:

- The submitter supports the provision and has a co-governance relationship with Iwi through Memorandum of Understanding with Iwi Maori Council.
- It is important that Council are strengthening its partnership with Ngaai Iwi o Tainui ki te Waikato Takiwaa and have a commitment to fulfil joint management agreements and legislation requirements.

Point Number 923.21

Summary of Decision Requested: **Retain** Section 1.7- Settlements Act/Co-management/Rivers-Vision and Strategies/ Joint Management Agreements as notified.

Decision Reasons:

- The submitter supports the provision and has a co-governance relationship with Iwi through Memorandum of Understanding with Iwi Maori Council.
- It is important that Council are strengthening its partnership with Ngaai Iwi o Tainui ki te Waikato Takiwaa and have a commitment to fulfil joint management agreements and legislation requirements.

Point Number 923.22

Summary of Decision Requested: **Retain** Section 1.8- Statutory Acknowledgements as notified.

Decision Reasons:

- The submitter supports the provision and has a co-governance relationship with Iwi through Memorandum of Understanding with Iwi Maori Council.
- It is important that Council are strengthening its partnership with Ngaai Iwi o Tainui ki Te Waikato Takiwaa and have a commitment to fulfil joint management agreements and legislation requirements.

Point Number 923.23

Summary of Decision Requested: **Amend** Sections 1.12.1-1.12.8- Strategic directions and objectives for the District by redrafting them as a set of specific objectives and policies.

Decision Reasons:

- The submitter supports Sections 1.12.1-1.12.8 in part, but seeks clarity in whether these provisions are to be considered as strategic objectives or strategic desired outcomes.
- The distinction between objectives and outcomes is significant for evaluation of resource consent applications pursuant to section 104 RMA.

Point Number 923.24

Summary of Decision Requested: **Retain** Strategic Objective 2.11- Tautoko Te Whakatupuranga Tautoko Te Whakatupuranga as notified.

Decision Reasons:

- The objective reflects the importance of Maori Communities being supported to achieve prosperous, healthy, vibrant, innovative and culturally strong outcomes within the District, which is of high importance to achieving strong public health and well-being goals for the Waikato DHB.
- Prominence provided by stating the above issue in Chapter 2 is supported.

Point Number 923.25

Summary of Decision Requested: **Retain** Section 4.1- Strategic Direction.

Decision Reasons:

- The strategic direction will assist with giving effect to the direction contained with the Future Proof Strategy including its identified settlement pattern. These also assist to give effect to the Waikato Regional Policy Statement. Policies may need to be updated to align

Point Number 923.26

Summary of Decision Requested: **Amend** Objective 4.1.1- Strategic to more explicitly refer to planned growth and development that is integrated with infrastructure (core and community infrastructure).

Decision Reasons:

- Objective 4.1.1 is supported in part as it will assist to some extent with giving effect to the direction contained within the Future Proof Strategy including its identified settlement pattern and the Waikato Regional Policy Statement.
- A broad range of infrastructure is need to support community wellbeing, and if well integrated as part of a local community's urban form, can enable physical and mental wellbeing, and community connectedness.

Point Number 923.27

Summary of Decision Requested: **Add** a new policy (or policies) to explicitly 'give effect to' Objective 4.1.1- Strategic.

Decision Reasons:

- There is no corresponding policy that gives effect to Objective 4.1.1, and it is therefore unclear how Council intends to achieve the objective.

Point Number 923.28

Summary of Decision Requested: **Amend** Objective 4.1.2- Urban growth and development to state more clearly that urban growth and development is only to occur within and around towns and villages identified in the Future Proof Strategy settlement pattern and Waikato Regional Policy Statement.

Decision Reasons:

- Objective 4.1.2 is supported in part as it will assist to some extent with giving effect to the direction contained within the Future Proof Strategy including its identified settlement pattern and with giving effect to the Waikato Regional Policy Statement.

Point Number 923.29

Summary of Decision Requested: **Amend** Policy 4.1.3- Location of Development, however amendments sought are unclear.
OR
Add additional policy for urban residential activities to Chapter 4: Urban Environment similar to Policy 4.1.6- Commercial and industrial activities.

Decision Reasons:

- The submitter notes that as a result of the Stage 2 update of the Future Proof Strategy and the Auckland-Hamilton Corridor Plan development, there may be changes to the current settlement pattern and should be reflected in the district plan provisions.
- Employment and essential infrastructure and services are key determinants of health and wellbeing for the Waikato District residents.
- Core and social infrastructure is critical to enabling and supporting quality urban developments, liveability and health and wellbeing for local communities.
- Policy 4.1.3 policy direction is similar to that contained in Policy 4.1.6 in respect to zoning and location of commercial and industrial development.

Point Number 923.30

Summary of Decision Requested: **Retain** Policy 4.1.4- Staging of development as notified.

Decision Reasons:

- The submitter supports the policy's intent to help ensure subdivision, use and development in new urban areas is located, designed and staged to adequately support existing or planned infrastructure, community facilities, open space networks and local services.
- Infrastructure and services can enable positive health and wellbeing outcomes.

Point Number 923.31

Summary of Decision Requested: **Retain** Policy 4.1.5-Density, except for the amendments sought below;
AND
Amend Policy 4.1.5 (b)- Density to indicate that in the Residential Zone closest to a Business Town Centre, it is anticipated that a higher minimum density per hectare is to be achieved.

Decision Reasons:

- The submitter supports the policy's intent to help ensure subdivision, use and development in new urban areas is located, designed and staged to adequately support existing or planned infrastructure, community facilities, open space networks and local services.
- Policy 4.1.5 is supported in part as it is consistent with density provisions identified in the Future Proof Strategy. However, the submitter suggests more ambitious minimum density targets for the Residential Zone be specified as this will enable compact urban form, access to essential services and community connectedness.
- Higher minimum densities than are proposed are more appropriate for established residential areas immediately adjacent to the Business Town Centre zones. Higher residential densities would better support public transport and other infrastructure, the commercial vitality of the town centre and promotes people living, working, learning and playing within their local town centres.

Point Number 923.32

Summary of Decision Requested: Amend the Proposed District Plan to provide for higher density and mixed use developments close to train stations that have been signaled for potential re-opening.

Decision Reasons:

- Enabling higher public transport levels of service improves access to essential services for local residents, which is has a link to the proposed inter-regional passenger rail service and proposed train stops between Hamilton and Auckland.

Point Number 923.33

Summary of Decision Requested: Retain Policy 4.1.6- Commercial and Industrial Activities as notified.

Decision Reasons:

- Policy is supported as this will assist with giving effect to the Waikato Regional Policy Statements' policy direction regarding the location of commercial and industrial activities.

Point Number 923.34

Summary of Decision Requested: Amend Objective 4.1.7-Character of Towns to provide better alignment with the associated policies
OR

Add to Section 4.1- Strategic Direction additional objectives that better support and align with matters covered by the associated policies, including that the existing residential and commercial character of the district's urban environments is to be maintained and enhanced by new growth and development.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Reference to townships that are connected is particularly supported as this serves to contribute to strong health and wellbeing outcomes for communities.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.35

Summary of Decision Requested: Amend Policy 4.1.8- Integration and connectivity to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.36

Summary of Decision Requested: Amend Policy 4.1.9- Maintaining Landscape Characteristics to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.37

Summary of Decision Requested: Amend Policy 4.1.10- Tuakau to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.38

Summary of Decision Requested: Amend Policy 4.1.11- Pokeno to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.

- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.39

Summary of Decision Requested: **Amend** Policy 4.1.12- Te Kauwhata to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.40

Summary of Decision Requested: **Amend** Policy 4.1.13-Huntly to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.41

Summary of Decision Requested: **Amend** Policy 4.1.14- Taupiri to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.42

Summary of Decision Requested: **Amend** Policy 4.1.15- Ngaruawahia to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.43

Summary of Decision Requested: **Amend** Policy 4.1.16- Horotiu to provide more detailed guidance about the future urban outcomes (including residential, business and industrial uses) for the centres, particularly in relation to density, location of growth areas, the time and staging of new development and its integration with existing towns.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.
- Is considered however that links to the WRPS and the Future Proof Strategy and other forms of guidance could be much stronger in order to manage the ongoing development of the district's townships.

Point Number 923.44

Summary of Decision Requested: **Amend** the Proposed District Plan to include additional provisions, including Objectives, Policies, Zone descriptions and references to design guidelines in Appendix 3, character statements for specific towns and villages in Appendix 10 and structure plans included as other appendices to the plan to assist with an understanding of the particular character, development focus and desired strategic outcome(s) for each of the identified towns and villages; and how these outcomes are to be achieved.

Decision Reasons:

- Provisions are supported in part as they assist with giving effect to the Waikato Regional Policy Statement and the Future Proof Strategy in respect of seeking to ensure connectivity and integration between new and existing development, and high amenity values in urban areas.

Point Number 923.45

Summary of Decision Requested: Amend Objective 4.2.3 (a)-Residential built form and amenity as follows:
(a) Maintain neighbourhood residential amenity values, promote urban design protocols (Appendix 3.3), and facilitate safety in the Residential Zone.

Decision Reasons:

- The submitter supports Objective 4.2.3 in principle but requests that it include promotion of the urban design protocols and guidelines as reference in Appendix 3.3- Town Centre Guidelines, to optimize health and wellbeing outcomes for all residents.
- The purpose of the principles is to guide the design of environments, products and communications and describe the concepts of designing all products and the built environment to be aesthetic and usable to the greatest extent possible by everyone, regardless of age, disability or status.

Point Number 923.46

Summary of Decision Requested: Add to Policy 4.5.11 (a)- Residential Upper Floors: Business Town Centre Zone and Business Zone as follows:
(iii.) Provide for mixed use developments which promote urban design protocols.

Decision Reasons:

- The submitter supports Policy 4.5.11 in principle but requests that it include promotion of the urban design protocols and guidelines as referenced in Appendix 3.3- Town Centre Guidelines.
- The purpose of the principles is to guide the design of environments, products and communications and describe the concepts of designing all products and the built environment to be aesthetic and usable to the greatest extent possible by everyone, regardless of age, disability or status.

Point Number 923.47

Summary of Decision Requested: Amend Policy 4.5.13 (i)- Town Centre Built Form as follows:
(i) Provide for a safe, accessible, compact and attractive town centre environment which promotes urban design protocols (Appendix 3.3).

Decision Reasons:

- The submitter supports Policy 4.5.13 in principle but requests that it include promotion of the urban design protocols and guidelines as referenced in Appendix 3.3- Town Centre Guidelines, to optimize health and wellbeing outcomes for everyone.
- The purpose of the principles is to guide the design of environments, products and communications and describe concepts of designing all products and the built environment to be aesthetic and usable to the greatest extent possible by everyone, regardless of age, disability or status.

Point Number 923.48

Summary of Decision Requested: Retain Objective 4.2.16- Housing Options as notified.

Decision Reasons:

- The submitter this objective as it assists with giving effect to the Future Proof Strategy and the Waikato Regional Policy Statements' directions relating to the integration of land use with public transport and walking and cycling.
- Directions in these documents linked to housing typology and multiple unit dwellings should enable increased levels of physical activity if accompanied by parallel improvements in access to accessible public transport services and infrastructure, and safe and accessible walking and cycling infrastructure.

Point Number 923.49

Summary of Decision Requested: Retain Policy 4.2.17- Housing types as notified.

Decision Reasons:

- The submitter supports this objective as it assists with giving effect to the Future Proof Strategy and the Waikato Regional Policy Statements' directions relating to the integration of land use with public transport and walking and cycling.
- Directions in these documents linked to housing typology and multiple unit dwellings should enable increased levels of physical activity if accompanied by parallel improvements in access to accessible public transport services and infrastructure, and safe and accessible walking and cycling infrastructure.

Point Number 923.50

Summary of Decision Requested: Retain Policy 4.2.18- Multi-unit development as notified.

Decision Reasons:

- The submitter supports this objective as it assists with giving effect to the Future Proof Strategy and the Waikato Regional Policy Statements' directions relating to the integration of land use with public transport and walking and cycling.
- Directions in these documents linked to housing typology and multiple unit dwellings should enable increased levels of physical activity if accompanied by parallel improvements in access to accessible public transport services and infrastructure, and safe and accessible walking and cycling infrastructure.

Point Number 923.51

Summary of Decision Requested: Retain Policy 4.2.26- Neighborhood centres in structure plans as notified.

Decision Reasons:

- Neighborhood centres provide a really important function to support local communities to have access to commercial and community facilities.

Point Number 923.52

Summary of Decision Requested: **Amend** Objective 4.3.1- Village Zone character to include a stronger description of the character and purpose of the Village Zone including anticipated intensity of development.

Decision Reasons:

- Should be amended to make a stronger correlation between infrastructure provision and the outcomes sought in terms of the zone, and to provide a stronger description as to what the Village Zone characteristics are that the objective seeks to maintain. This is significant given that absence of any meaningful description as to the purpose of the Village Zone.

Point Number 923.53

Summary of Decision Requested: **Amend** Policy 4.3.2- Character to provide greater clarity about the character of the Village Zone and to make stronger correlation with Infrastructure.

Decision Reasons:

- Should be amended to make a stronger correlation between infrastructure provision and the outcomes sought in terms of the zone and the associated objective.

Point Number 923.54

Summary of Decision Requested: **Amend** Policy 4.3.3- Future Development- Tuakau and Te Kowhai to provide greater clarity about the urban outcomes sought for the Village Zone, including anticipated development density

AND

Remove reference to "semi-rural character"; and make a stronger correlation between infrastructure provision and the outcome sought for the zone.

Decision Reasons:

- In respect of the Future Proof Strategy, clarity is required as to whether the villages are considered urban 'settlements' or part of the rural environment, with the Plan being ambiguous on this point.
- Given the plan's approach of consolidating development around existing towns and villages, it is not considered suitable that villages are described as being semi-rural.

Point Number 923.55

Summary of Decision Requested: **Amend** Policy 4.3.8 (a) (ii)- Residential Amenity and Function as follows:
Provide for the health, safety and well-being of the community.

Decision Reasons:

- Submitter supports Policy 4.3.8 to the extent that recognition is given to the health and wellbeing of communities. However, recommends that the wording better reflects section 5 of the RMA which also refers to the safety of the community.

Point Number 923.56

Summary of Decision Requested: **Retain** Policy 4.3.1 | - Maintain Residential function as notified.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction relating to the Future Proof settlement pattern.

Point Number 923.57

Summary of Decision Requested: **Amend** Objective 4.4.1 (a)- Adverse effects of land use and development as follows:
The health, safety, and wellbeing of people communities and the environment are protected from the adverse effects of land use and development.

Decision Reasons:

- The submitter supports Objective 4.4.1- Adverse effects of land use and development to the extent that recognition is given to the health and wellbeing of communities and communities are protected from the adverse effects of land use and development, however recommends that the wording better reflects section 5 of the RMA which also refers to the safety of the community.

Point Number 923.58

Summary of Decision Requested: **Retain** Objective 4.5.1- Commercial function and purpose as notified.

Decision Reasons:

- Objective is supported as it assists with giving effect to the Waikato Regional Policy Statement's policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area.

Point Number 923.59

Summary of Decision Requested: Retain Policy 4.5.2- Commercial function and purpose as notified.

Decision Reasons:

- Policy is supported as it assists with giving effect to the Waikato Regional Policy Statement's policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area.

Point Number 923.60

Summary of Decision Requested: Retain Policy 4.5.3- Commercial purpose: Business Town Centre as notified.

Decision Reasons:

- Policy is supported as it assists with giving effect to the Waikato Regional Policy Statement's policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area.

Point Number 923.61

Summary of Decision Requested: Retain Policy 4.5.4- Commercial Zone- Business Zone as notified.

Decision Reasons:

- Policy assists with giving effect to the WRPS' policy direction relating to the Future Proof settlement pattern and commercial development in the Future Proof area.

Point Number 923.62

Summary of Decision Requested: Retain Policy 4.5.7- Commercial Purpose: Neighborhood Centres in Structure Plans as notified.

Decision Reasons:

- The submitter supports the Policy in principle given the important role of neighbourhood centres in providing local commercial and community services which can contribute to positive health and wellbeing outcomes.

Point Number 923.63

Summary of Decision Requested: Retain Policy 4.5.13- Town centre built form as notified.

Decision Reasons:

- The submitter supports the policy as providing for a safe, accessible, compact and attractive town centre environment can have positive impacts on community health and wellbeing for local residents.
- Policy gives effect to the Future Proof Growth Strategy and Waikato Regional Policy Statements' directions on encouraging and promoting walking, cycling and multimodal transport and maximizing opportunities for people to live, work, learn and play within their local communities.

Point Number 923.64

Summary of Decision Requested: Retain Objective 4.6.1 Economic growth and industry, as notified.

Decision Reasons:

- Policy 4.6.1 Economic growth and industry will assist with maintaining the Future Proof settlement pattern and retaining industrial activities primarily within identified industrial nodes.

Point Number 923.65

Summary of Decision Requested: Retain Policy 4.6.4- Maintain Industrial land for Industrial purpose as notified.

Decision Reasons:

- The submitter supports the policy as it will assist with maintaining the Future Proof settlement pattern; retaining industrial activities primarily within identified industrial nodes and managing reverse sensitivity issues. This is important for maintaining prosperity for the community, certainty as to the location of industrial land uses, and protecting public health by separating industrial and residential land use.

Point Number 923.66

Summary of Decision Requested: Retain Objective 4.6.6- Manage adverse effects as notified.

Decision Reasons:

- Submitter supports this objective as it assists with giving effect to the Waikato Regional Policy Statement's direction relating to the need to have regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.

Point Number 923.67

Summary of Decision Requested: Retain Policy 4.6.7- Management of adverse effects within industrial zones.

Decision Reasons:

- Submitter supports this Policy as it assists with giving effect to the Waikato Regional Policy Statement's direction relating to the need to have regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.

Point Number 923.68

Summary of Decision Requested: **Retain** Objective 4.7.1- Subdivision and land use integration as notified.

Decision Reasons:

- Will give effect to the Waikato Regional Policy Statement Policies 6.1, 6.3 and Section 6A regarding a planned, coordinated approach to subdivision, use and development and infrastructure provision, and recognises the significance of community safety through environmental design.
-

Point Number 923.69

Summary of Decision Requested: **Retain** Policy 4.7.2- Subdivision location and design as notified.

Decision Reasons:

- Will give effect to the Waikato Regional Policy Statement Policies 6.1, 6.3 and Section 6A regarding a planned, coordinated approach to subdivision, use and development and infrastructure provision and recognises the significance of community safety through environmental design.
-

Point Number 923.70

Summary of Decision Requested: **Retain** Policy 4.7.3- Residential Subdivision as notified.

Decision Reasons:

- Will give effect to the Waikato Regional Policy Statement Policies 6.1, 6.3 and Section 6A regarding a planned, coordinated approach to subdivision, use and development and infrastructure provision and recognises the significance of community safety through environmental design.
-

Point Number 923.71

Summary of Decision Requested: **Amend** Policy 4.7.4- Lot Sizes to support appropriate urban outcomes for the Village Zone.

Decision Reasons:

- Submitter is concerned that in Policy 4.7.4 (b) the minimum lot sizes in the Village Zone (particularly Te Kowhai and Tuakau) appear to promote rural rather than urban outcomes, and will not achieve the sustainable, compact urban form necessary to support efficient, effective transport and infrastructure and walkability.
-

Point Number 923.72

Summary of Decision Requested: **Amend** Policy 4.7.4- Lot Sizes to provide for more intense development in locations immediately adjacent to Business Town Centre Zones.

Decision Reasons:

- While generally supportive of the minimum site area of 450m² for urban residential areas across the district, there are locations where higher densities and a more intensive subdivision pattern is suitable, to promote walkable neighbourhoods and connectivity with commercial and community services. This is relevant in particular locations within the Residential Zone immediately adjacent to the Business Town Centre Zones.
-

Point Number 923.73

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
 - The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.
-

Point Number 923.74

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
 - The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.
-

Point Number 923.75

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
- The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.

Point Number 923.76

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
- The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.

Point Number 923.77

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
- The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.

Point Number 923.78

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
- The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.

Point Number 923.79

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
- The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.

Point Number 923.80

Summary of Decision Requested: **Review** the extent of the live zoning and its ability to be serviced with infrastructure.

OR

Consider including much stronger development staging rules which are linked to the provision of infrastructure and development of structure plans.

Decision Reasons:

- Submitter supports this policy as it will assist with giving effect to the Waikato Regional Policy Statement's policy direction in regard to a planned, coordinated approach to subdivision, use and development and infrastructure provision, achieving compact urban environments, and having regard to reverse sensitivity effects, which can have potential to negatively impact community health and wellbeing.
- The submitter has concerns around the approach of 'live zoning' significant areas of land rather than undertaking a staged approach. Should council continue with live zoning there should be a much stronger approach to staging which is tied to infrastructure provision and structure planning.

Point Number 923.81

Summary of Decision Requested: Retain Objective 5.1.1- The Rural environment as notified.

Decision Reasons:

- Objective 5.1.1 gives effect to the Waikato Regional Policy Statement Implementation Method 14.2.1 regarding high class soils and supporting productive rural activities and provisions Waikato Regional Policy Statement relate to the Built Environment, including 6.1.5 and Section 6A.
- The submitter considers protecting food production and security as important community health and wellbeing considerations for the Waikato District and its residents.
- Concentrating urban development within identified growth locations is important to protect the rural land resource.

Point Number 923.82

Summary of Decision Requested: Retain Objective 5.2.1- Rural resources as notified.

Decision Reasons:

- The submitter supports the objective noting the inclusion of maintaining and enhancing high class soils and freshwater bodies and their catchments which enable environmental and community health and wellbeing outcomes.

Point Number 923.83

Summary of Decision Requested: Retain Policy 5.2.2- High class soils as notified.

Decision Reasons:

- Submitter supports the objective noting the inclusion of maintaining and enhancing high class soils which enable environmental and community health and wellbeing outcomes.

Point Number 923.84

Summary of Decision Requested: Retain Policy 5.2.3- Effects of subdivision and development on soils as notified.

Decision Reasons:

- Submitter supports the objective noting the inclusion of maintaining and enhancing high class soils which enable environmental and community health and wellbeing outcomes.

Point Number 923.85

Summary of Decision Requested: Retain Objective 6.1.1- Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- Submitter supports the objective as it states clearly the importance of infrastructure provision to achieving social, economic, cultural and environmental wellbeing.

Point Number 923.86

Summary of Decision Requested: Retain Policy 6.1.4- Infrastructure benefits as notified.

Decision Reasons:

- Submitter supports Policy 6.1.4 in full as a key implementation measure for Objective 6.1.1 and emphasizes the important elements of timely and effective infrastructure provision for community wellbeing.

Point Number 923.87

Summary of Decision Requested: Retain Objective 6.1.8- Infrastructure in the community and identified areas as notified.

Decision Reasons:

- Submitter supports Objective 6.1.8 as infrastructure should take into account the qualities and characteristics of community wellbeing and have positive public health benefits.
- While not included in the Plan definition for infrastructure, community and social infrastructure, such as community halls and hubs is an important contributor to community health and wellbeing.

Point Number 923.88

Summary of Decision Requested: Retain Policy 6.1.9- Environmental effects, community health, safety and amenity as notified.

Decision Reasons:

- The submitter supports Policy 6.1.9 as it acknowledges that development, operation and maintenance of infrastructure can have positive public health benefits and statutory requirements of Waikato District Council under section 23 of the Health Act.

Point Number 923.89

Summary of Decision Requested: **Amend** Policy 6.1.13- Future growth areas to clearly state how 'where appropriate' will be determined.

AND

Amend Policy 6.1.13- Future growth areas to clearly state to what extent provision of services shall require that infrastructure services be developed to enable the service to be extended to future growth areas.

Decision Reasons:

- Submitter supports Policy 6.1.13 as development of infrastructure and services to an appropriate standard enables the service, e.g. drinking water infrastructure, to be extended to future growth areas which will have positive public health benefits.
- It is less clear how Council will implement this policy, particularly given the substantial 'live' zoning areas identified and the apparent absence of confirmed infrastructure proposals to service these areas.
- Policy is too uncertain to operate effectively as written, with issues with how this is implemented, with risks that servicing will be inadequate to meet the needs of the community in particular localities, and potentially undermine community health and wellbeing.

Point Number 923.90

Summary of Decision Requested: **Retain** Policy 6.1.16- Water conservation as notified.

Decision Reasons:

- Submitter supports Policy 6.1.16 as it has positive environmental benefits.
- The greater use of on-property multi-purpose landscaping/vegetation also offers human "quality of life" opportunities through offering greener neighbourhoods and contributing to a local community's overall 'liveability', value, sense of place and aesthetics.

Point Number 923.91

Summary of Decision Requested: **Amend** Chapter 1 to more clearly state the strategic objectives and policies in each policy chapter, and identify how they relate to each other and the issues.

Decision Reasons:

- Several chapters in the Plan include strategic objectives and policies, and the relationship between these and what might be termed non-strategic objectives and policies and resource management issues identified in Chapter 1 is not clear.
- Within Chapter 1 the relationship between the various strategic provisions within 1.4, 1.5 and 1.12 is unclear, in particular whether there is a hierarchy between these provisions.

Point Number 923.92

Summary of Decision Requested: **Amend** Strategic Objectives and Policies in each Policy Chapter so they relate more strongly to the purpose of the RMA as encapsulated by section 5 in terms of objectives related to the natural and built environment resources and their contributions to community health and wellbeing outcomes.

Decision Reasons:

- Considered to be a general absence of links to health and wellbeing considerations (in accordance with the purpose of section 5 RMA) within these strategic issues and objectives.
- Clarity on how these provisions relate to the objectives with Section B of the Plan.

Point Number 923.93

Summary of Decision Requested: **Amend** Chapter One: Introduction by establishing a stronger objective, policy and rule framework than is proposed for un-serviced urban residential areas where there is uncertainty about the funding, staging and timing for infrastructure provision.

Decision Reasons:

- The amendments are requested to ensure activities of an urban nature, including subdivision, are not provided for prior to structure planning processes being undertaken and without certainty about the funding, timing and staging of infrastructure provision and so subdivision, use and development is not compromised in these areas for future development.
- The submitter is concerned provisions do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for un-serviced land within urban towns and villages.
- No obvious strategy as to how Council intends to manage these areas, how long the transition to urban use will be for particular areas, how Council is achieving its Future Proof land allocation obligations, or any framework evaluating other non-identified 'live zoning' areas.
- Proposed Plan creates a highly uncertain development environment for communities as to where and how future urban growth will be provided for, and how health and wellbeing outcomes will be managed in parallel to managing growth.

Point Number 923.94

Summary of Decision Requested: **Amend** Chapter Four: Urban Environment by establishing a stronger objective, policy and rule framework than is proposed for un-serviced urban residential areas where there is uncertainty about the funding, staging and timing for infrastructure provision.

Decision Reasons:

- The amendments are requested to ensure activities of an urban nature, including subdivision, are not provided for prior to structure planning processes being undertaken and without certainty about the funding, timing and staging of infrastructure provision and so subdivision, use and development is not compromised in these areas future development.
- The submitter is concerned provisions do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for un-serviced land within urban towns and villages.
- No obvious strategy as to how Council intends to manage these areas, how long the transition to urban use will be for particular areas, how Council is achieving its Future Proof land allocations obligations, or any framework evaluating other non-identified 'live zoning' areas.

- Proposed Plan creates a highly uncertain development environment for communities as to where and how future urban growth will be provided for, and how health and wellbeing outcomes will be managed in parallel to managing growth.

Point Number 923.95

Summary of Decision Requested: **Amend** Chapter 16: Residential Zone by establishing a stronger objective, policy and rule framework than is proposed for un-serviced urban residential areas where there is uncertainty about the funding, staging and timing for infrastructure provision.

Decision Reasons:

- The amendments are requested to ensure activities of an urban nature, including subdivision, are not provided for prior to structure planning processes being undertaken and without certainty about the funding, timing and staging of infrastructure provision and so subdivision, use and development is not compromised in these areas for future development.
- The submitter is concerned provisions do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for un-serviced land within urban towns and villages.
- No obvious strategy as to how Council intends to manage these areas, how long the transition to urban use will be for particular areas, how Council is achieving its Future Proof land allocations obligations, or any framework evaluating other non-identified 'live zoning' areas.
- Proposed Plan creates a highly uncertain development environment for communities as to where and how future urban growth will be provided for, and how health and wellbeing outcomes will be managed in parallel to managing growth.

Point Number 923.96

Summary of Decision Requested: **Amend** the Planning Maps by establishing a stronger objective, policy and rule framework than is proposed for un-serviced urban residential areas where there is uncertainty about the funding, staging and timing for infrastructure provision.

Decision Reasons:

- The amendments are requested to ensure activities of an urban nature, including subdivision, are not provided for prior to structure planning processes being undertaken and without certainty about the funding, timing and staging of infrastructure provision and so subdivision, use and development is not compromised in these areas for future development.
- The submitter is concerned provisions do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for un-serviced land within urban towns and villages.
- No obvious strategy as to how Council intends to manage these areas, how long the transition to urban use will be for particular areas, how Council is achieving its Future Proof land allocations obligations, or any framework evaluating other non-identified 'live zoning' areas.
- Proposed Plan creates a highly uncertain development environment for communities as to where and how future urban growth will be provided for, and how health and wellbeing outcomes will be managed in parallel to managing growth.

Point Number 923.97

Summary of Decision Requested: **Amend** the relevant provisions that are proposed for un-serviced urban residential areas where there is uncertainty about the funding, staging and timing for Infrastructure provision by establishing a stronger objective, policy and rule framework than is proposed for un-serviced urban residential areas where there is uncertainty about the funding, staging and timing for infrastructure provision.

Decision Reasons:

- The amendments are requested to ensure activities of an urban nature, including subdivision, are not provided for prior to structure planning processes being undertaken and without certainty about the funding, timing and staging of infrastructure provision and so subdivision, use and development is not compromised in these areas for future development.
- The submitter is concerned provisions do not adequately address how subdivision and development activities will be managed where a 'live' residential zoning is proposed for un-serviced land within urban towns and villages.
- No obvious strategy as to how Council intends to manage these areas, how long the transition to urban use will be for particular areas, how Council is achieving its Future Proof land allocations obligations, or any framework evaluating other non-identified 'live zoning' areas.
- Proposed Plan creates a highly uncertain development environment for communities as to where and how future urban growth will be provided for, and how health and wellbeing outcomes will be managed in parallel to managing growth.

Point Number 923.98

Summary of Decision Requested: **Amend** Plan provisions where and when appropriate to provide for outcomes identified in the Auckland-Hamilton Corridor Plan and Future Proof Strategy (Stage 2) review.

Decision Reasons:

- The submitter and Waikato District Council are involved in collaborative work underway to develop an Auckland-Hamilton Spatial Corridor Plan and also to complete Future Proof growth Strategy update (Stage 2).
- While in progress and not yet operative, these processes will generate an agreed vision for managing urban growth and development in significant parts of the Waikato District that may differ in some respects that are currently proposed in the Plan.

Point Number 923.99

Summary of Decision Requested: **Amend** the Planning maps where and when appropriate to provide for outcomes identified in the Auckland-Hamilton Corridor Plan and Future Proof Strategy (Stage 2) review.

Decision Reasons:

- The submitter and Waikato District Council are involved in collaborative work underway to develop an Auckland-Hamilton Spatial Corridor Plan and also to complete Future Proof growth Strategy update (Stage 2).
- While in progress and not yet operative, these processes will generate an agreed vision for managing urban growth and development in significant parts of the Waikato District that may differ in some respects that currently proposed in the Plan.

Point Number 923.100

Summary of Decision Requested: **Amend** Chapter 1 (and/or s32 Analysis) to show the requirements of the 2017 National Policy Statement for Urban Development Capacity have been considered, which may include the following:

- Identifying which of the District's towns and villages are to be the focus for urban growth and development;
- Indicating the extent to which each of these areas are currently serviced with necessary infrastructure to protect and promote health and wellbeing, e.g. potable water;

- Clarifying whether structure/master planning or other detailed investigations have been done for these areas, and if not, when this is expected to occur;
- Addressing the issue of how areas identified for growth that currently have no supporting infrastructure (including community infrastructure) are to be sustainably managed through the plan provisions to ensure health and wellbeing is not negatively impacted.

Decision Reasons:

- National Policy Statement for Urban Development Capacity impacts multiple chapters and sections of the plan, related to the provision of sufficient feasible zoned and serviced housing and business land is provided for.
- Proposed approach to 'live zone' new urban growth areas, leads to a concern related to zoning new areas of land for urban development where it is unclear what infrastructure is available or proposed to be provided.
- Provision of core and community infrastructure within the built environment impacts on health and wellbeing outcomes.

Point Number 923.101

Summary of Decision Requested: **Amend** the structure of the Plan to provide for cross references between issues, objectives, policies and rules.

Decision Reasons:

- Links and cross-references between related issues, objectives, policies and rules are not clear, leading to a confusing collection of issues, objectives, policies and rules without a strong hierarchy.
- There is an opportunity to make it clear for users of the plan to understand.

Point Number 923.102

Summary of Decision Requested: **Amend** Chapter 16: Residential Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.103

Summary of Decision Requested: **Amend** Chapter 17: Business Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.104

Summary of Decision Requested: **Add** a new rule section setting requirements for mechanical ventilation as follows:

X. Mechanical ventilation

1. Buildings that are required to have acoustic insulation must be designed, constructed and maintained with a mechanical ventilation system so that windows can be kept closed. The mechanical ventilation system must achieve the following requirements:

(i) For habitable rooms for a residential activity;

A. Provide mechanical ventilation to satisfy clause G4 of the New Zealand Building Code;

B. Be adjustable by the occupant to control the ventilation rate in increments up to a high air flow setting that provides at least 6 air changes per hour;

C. Provide relief for equivalent volumes of spill air;

D. Provide cooling and heating that is controllable by the occupant and can maintain the inside temperature between 18 degree Celsius and 25 degree Celsius;

E. Generate less than 35 dB L_{Aeq(30s)} when measured 1m away from any grille or diffuser.

(ii) For other spaces, a specification as determined by a suitably qualified and experienced person.

2. A commissioning report must be submitted to the Council prior to occupation of the building demonstrating compliance with all of the mechanical ventilation system performance requirements in X.1.

Decision Reasons:

- New sensitive land-uses should preferably be located away from areas of high noise exposure. However, in areas where there is not a practicable alternative, requirements to provide sound insulation provides a minimum 'back-stop' for managing adverse health effects.
- In all cases where sound insulation is required under Appendix I it would be undermined if windows have to be opened. Whilst Appendix I does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.105

Summary of Decision Requested: **Delete** Appendix I - Acoustic Insulation 2.1 (2)

AND

Add to Appendix 1- Acoustic Insulation a new 2.1 (2) as follows:

For both options one and option two, a mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix 1 it would be undermined if windows have to be opened. Whilst Appendix 1 does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.106

Summary of Decision Requested: Delete Appendix 1- Acoustic Insulation 2.1 (3) (i) (C) and 2.1 (3) (i) (D)

AND

Add to Appendix 1- Acoustic Insulation a new 2.1 (3) (C) as follows:

A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix 1 it would be undermined if windows have to be opened. Whilst Appendix 1 does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.107

Summary of Decision Requested: Delete Appendix 1- Acoustic Insulation 2.2 (6) and 2.2 (7)

AND

Add to Appendix 1- Acoustic Insulation a new 2.2 (6) as follows:

A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix 1 it would be undermined if windows have to be opened. Whilst Appendix 1 does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.108

Summary of Decision Requested: Delete Appendix 1- Acoustic Insulation 3.1. (3), 3.1.4 and 3.1.5

AND

Add to Appendix 1- Acoustic Insulation a new 3.1 (3) as follows:

A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix 1 it would be undermined if windows have to be opened. Whilst Appendix 1 does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.109

Summary of Decision Requested: Delete Appendix 1- Acoustic Insulation 3.2 (3), 3.2 (4) and 3.2 (5)

AND

Add to Appendix 1- Acoustic Insulation a new 3.2 (3) as follows:

A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix 1 it would be undermined if windows have to be opened. Whilst Appendix 1 does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.110

Summary of Decision Requested: Add a new Permitted Activity Standard 4.1.2 as follows:

2.) A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix 1 it would be undermined if windows have to be opened. Whilst Appendix 1 does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.111

Summary of Decision Requested: Amend Appendix I Acoustic Insulation Table 13 - Internal Sound Levels, as follows:

Area **Internal design sound level**

Waikato Gun Club Noise Control Boundary ~~CNR 75 (Composite Noise Rating) 40 dB LA_{Fmax}~~

Decision Reasons:

- Sound insulation requirements near the Waikato Gun Club are in terms of the "CNR" measure. This is not defined in the Proposed Plan or New Zealand Standards. The CNR cannot be assessed, even by a specialist, without detailed information about the Gun Club that is not in the District Plan or publicly available.

Point Number 923.112

Summary of Decision Requested: Add new Permitted Activity Standard 5.1.3 as follows:

3. A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix I it would be undermined if windows have to be opened. Whilst Appendix I does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.113

Summary of Decision Requested: Add new Permitted Activity Standard 6.1.2 as follows:

2. A mechanical ventilation must be installed in accordance with X.

Decision Reasons:

- In all cases where sound insulation is required under Appendix I it would be undermined if windows have to be opened. Whilst Appendix I does require mechanical ventilation in some instances, the specified performance would not be sufficient to provide thermal comfort. Therefore, occupants would either have to suffer excess noise or excess/insufficient temperature. As occupants would then be forced to open windows, this situation does not address the adverse noise effect.
- A ventilation system should be required that provides thermal comfort with windows closed.

Point Number 923.114

Summary of Decision Requested: Retain Appendix 3.3- Town Centre Guidelines as notified.

Decision Reasons:

- Submitter supports the good urban design outcomes embodied in these guidelines (Appendix 3.3 Town Centre Guidelines). This includes reference to the NZ Urban Design Protocol of which Crime Prevention through Environmental Design, Universal Access Design, Energy Efficiency, and Street trees are part; as it commits the signatories to specific urban design initiatives intended to raise the quality of urban design within the town/city thereby increasing opportunities for optimal health and wellbeing.

Point Number 923.115

Summary of Decision Requested: Amend Chapter 18: Business Town Centre Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.116

Summary of Decision Requested: Amend Chapter 19: Business Zone Tamahere to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.117

Summary of Decision Requested: Amend Chapter 20: Industrial Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.

- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.118

Summary of Decision Requested: **Amend** Chapter 21: Heavy Industrial Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.119

Summary of Decision Requested: **Amend** Chapter 22: Rural Zone to add a statement of purpose and anticipated outcomes of corresponding zone or subzone, and where appropriate make links to health and wellbeing considerations.

Decision Reasons:

- Currently there are no statements of purpose or descriptions for any of the zones or the intended outcomes to be achieved, leading to a reliance on objectives, policies and explanations within Section B of the Plan, which are based under generic heading topics with little zone based commentary.
- There is an opportunity to clarify the purpose of a zone and increase understanding of outcomes, and appropriate types of activities for the different environments.
- The amendments would assist with a clear understanding of the purpose and character of the various zones.

Point Number 923.120

Summary of Decision Requested: **Retain** Objective 6.4.1- Integration of infrastructure with subdivision, land use and development as notified.

Decision Reasons:

- Objective is supported as it helps to give effect to Waikato Regional Policy Statement policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, coordinated approach to subdivision and development and provision of supporting infrastructure.
- Submitter considers that this approach is essential to achieving strong health and wellbeing outcomes for the district's communities.

Point Number 923.121

Summary of Decision Requested: **Retain** Policy 6.4.2- Provide adequate infrastructure as notified.

Decision Reasons:

- Policy is supported as it helps to give effect to Waikato Regional Policy Statement policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, coordinated approach to subdivision and development and provision of supporting infrastructure.
- Submitter considers that this approach is essential to achieving strong health and wellbeing outcomes for the district's communities.

Point Number 923.122

Summary of Decision Requested: **Retain** Policy 6.4.3- Infrastructure Location and Services as notified.

Decision Reasons:

- Policy is supported as it helps to give effect to Waikato Regional Policy Statement policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, coordinated approach to subdivision and development and provision of supporting infrastructure.
- Submitter considers that this approach is essential to achieving strong health and wellbeing outcomes for the district's communities.

Point Number 923.123

Summary of Decision Requested: **Retain** Policy 6.4.4- Road and rail network as notified.

Decision Reasons:

- Policy is supported as it helps to give effect to Waikato Regional Policy Statement policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, coordinated approach to subdivision and development and provision of supporting infrastructure.
- Submitter considers that this approach is essential to achieving strong health and wellbeing outcomes for the district's communities.

Point Number 923.124

Summary of Decision Requested: **Retain** Policy 6.4.5- Roading Infrastructure as notified.

Decision Reasons:

- Policy is supported as it helps to give effect to Waikato Regional Policy Statement policies 6.1, 6.3, 6.15 and Section 6A in terms of placing emphasis on planned, coordinated approach to subdivision and development and provision of supporting infrastructure.
- Submitter considers that this approach is essential to achieving strong health and wellbeing outcomes for the district's communities.

Point Number 923.125

Summary of Decision Requested: **Retain** Policy 6.4.7-Stormwater as notified.

Decision Reasons:

- Submitter supports policy 6.4.7 as it can help improve access to water and enhance water quality which can in turn affect environmental health, the local economy and overall quality of life and community wellbeing.

Point Number 923.126

Summary of Decision Requested: **Amend** Objective 6.5.1 (a) (i)- Land Transport Network as follows:
All transport modes including public transport and walking and cycling are accessible, safe, effective and efficient.

Decision Reasons:

- The objective is supported subject to amendments to align it more strongly to the Waikato Regional Land Transport Plan and to transport modes that can positively impact community health and wellbeing. More explicit recognition of the Waikato Regional Land Transport Plan is required.
- Transport provides access to economic and social opportunities which is key to supporting social engagement and inclusion, whilst also providing access to essential services e.g. education, healthcare and employment.
- Public transport infrastructure and services, and walking and cycling infrastructure play an important role not only in increasing the capacity of the network, but in enabling access for those people whose transport choices are limited.
- Transport system can also enable increased levels of physical activity which can in turn have positive impacts on risk factors associated with chronic conditions.

Point Number 923.127

Summary of Decision Requested: **Amend** Policy 6.5.2 (a)- Construction and operation of the land transport network as follows:
Promote the construction and operation of an efficient, effective, integrated, safe, resilient, accessible and sustainable transport network through:
AND
Amend Policy 6.5.2 (a) (iv)- Construction and operation of the land transport network as follows:
Safe and accessible provision for pedestrians and cyclists to maximise accessibility, that addresses accessibility, including off-road facilities and connections.

Decision Reasons:

- Submitter supports the policy in principle subject to amendments to align it more strongly to the Waikato Regional Land Transport Plan.
- Proposed amendments more strongly contribute to achieving community health and wellbeing outcomes.
- Accessible transport networks can enable increased levels of physical activity and community connectedness for all users.

Point Number 923.128

Summary of Decision Requested: **Retain** Reserves Objective 8.1.1 as notified.

Decision Reasons:

- Policy is supported as the submitter emphasises the importance of public open space, natural reserves, and recreational opportunities, which can make a positive contribution to community health and wellbeing.

Point Number 923.129

Summary of Decision Requested: **Retain** Policy 8.1.2- Provision, use and development of public open space and reserves as notified.

Decision Reasons:

- Policy is supported as current research shows that access to open, and especially green spaces, improves people's health and sense of wellbeing.
- The use of open spaces to promote physical activity is an important part of addressing these conditions in an urban setting.
- Open spaces promote health behaviors by providing an accessible, affordable and enjoyable place to be physically active, which is emphasized within the NZ Urban Design Guide.

Point Number 923.130

Summary of Decision Requested: **Retain** Policy 8.1.3 Esplanade reserves and walkways, as notified.

Decision Reasons:

- Policy is supported as current research shows that access to open, and especially green spaces, improves people's health and sense of wellbeing.
- The use of open spaces to promote physical activity is an important part of addressing these conditions in an urban setting.
- Open spaces promote health behaviors by providing an accessible, affordable and enjoyable place to be physically active, which is emphasized within the NZ Urban Design Guide.

Point Number 923.131

Summary of Decision Requested: **Retain** Objective 10.1.1-Effects of hazardous substances as notified.

Decision Reasons:

- Policy is supported.
- The robust management of hazardous substances within the district is important for maintaining community health, safety and wellbeing.

Point Number	923.132
Summary of Decision Requested:	Retain Policy 10.1.2- Location of new hazardous facilities as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Policy is supported. • The robust management of hazardous substances within the district is important for maintaining community health, safety and wellbeing.
Point Number	923.133
Summary of Decision Requested:	Retain Policy 10.1.3- Residual risks of hazardous substances as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Policy is supported. • The robust management of hazardous substances within the district is important for maintaining community health, safety and wellbeing.
Point Number	923.134
Summary of Decision Requested:	Amend Objective 10.2.1- Contaminated Land as follows: <i>The subdivision, use and development of contaminated land is managed to protect human health <u>and safety</u> and the environment.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Use of 'human health and the environment' is supported as it aligns with the Natural Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health (NESCS) and section 31 (1) (b) of the RMA. • The submitter recommends that the wording better reflect section 5 of the RMA.
Point Number	923.135
Summary of Decision Requested:	Amend Policy 10.2.2 (b)- Managing the use of contaminated land as follows: <i>Disposal of contaminated soil must be carried out in a manner that avoids further adverse effects on human health <u>and safety</u>, or on the environment.</i>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports Policy 10.2.2 (b) to the extent that recognition is given to human health from the adverse effects of contaminated land. • The submitter recommends that the wording better reflect section 5 of the RMA.
Point Number	923.136
Summary of Decision Requested:	Add to Chapter 13: Definitions the following definitions: <u>Access: The means or opportunity to approach or enter a place or facility.</u> AND <u>Accessible: Means able to be easily accessed by all members of the community, including those with sight and mobility impairment.</u> AND <u>Accessibility: Means the ease with which activities (either economic or social) or facilities, can be reached or accessed by people.</u> AND <u>Any consequential amendments</u>
Decision Reasons:	<ul style="list-style-type: none"> • Chapter 13 provides definitions for Rules, however there are no definitions provided for in Section A Plan Overview and Strategic Directions, in particular related to 'access, accessible or accessibility.' These terms are becoming more relevant for district planning given the District's projected growth and changing population profile. • The word "access" is used to define access allotment, but beyond that there is no definition to guide the meaning of access or accessibility. • There are two broad meanings of access. The first dimension is around availability and the second focusing on the use of facilities, services and amenities such as greenspace, which is critical. • If a population is to have access to a facility, then the facility itself should be able to accommodate a variety of personal needs. This requires a built environment that is appropriate to a wide range of people and their needs.
Point Number	923.137
Summary of Decision Requested:	Amend the definition of "emergency generator" in Chapter 13: Definitions as follows: <i>Means either a fixed or trailer-mounted generator that can supply reticulated water and wastewater networks or treatment facilities with emergency power where and when necessary. <u>It does not include any generator when running for testing or maintenance.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> • The definition is used to exclude this sound source from noise limits in most zones. The exclusion is reasonable for emergency operation of generators but not for routine testing or maintenance, particularly outside of core daytime hours.
Point Number	923.138
Summary of Decision Requested:	Amend the definition of "Farming Noise" in Chapter 13: Definitions as follows: <i>Means noise generated by agricultural vehicles, any aircraft used for aerial spraying, agricultural machinery or equipment and farm animals, including farm dogs. It does not include <u>fixed equipment or facilities</u>, bird scaring devices and frost fans.</i>
Decision Reasons:	<ul style="list-style-type: none"> • The definition excludes farming noise sources from noise limits in some zones. Whilst there is justification for making this exclusion for some farming activities, it would be unreasonable with respect to fixed equipment (such as pumps) and facilities (such as dairy sheds). Unless properly designed and attenuated the sound from such sources could cause adverse health effects.

Point Number 923.139

Summary of Decision Requested: **Delete** definition of "noise-sensitive activity" from Chapter 13: Definitions.
AND
Amend the Proposed District Plan to change all uses of the term "noise sensitive activity" to refer instead to "Sensitive Land Use."

Decision Reasons:

- Whilst the concept of the definition is broadly supported, it is used in the proposed plan interchangeably and inconsistently with the definition of "sensitive land use," which is similar but not identical, and only one of these two definitions should be required.

Point Number 923.140

Summary of Decision Requested: **Amend** the definition of "Sensitive Land Use" in Chapter 13: Definitions as follows:
Means an education facility including a childcare facility, Waanaga and Kohanga Reo, a Residential activity, Papakainga building, rest home, retirement village, travelers' accommodation, Student accommodation, home stay, place of assembly, health facility or hospital.

Decision Reasons:

- Definition is used to define where controls are required to protect certain land-use activities from noise, which is appropriate.
- The definition covers most but not all sensitive land uses, and amendments are requested.
- It should also be adapted to avoid the need for a separate definition of 'noise-sensitive activity.'

Point Number 923.141

Summary of Decision Requested: **Retain** the definition of "Health facility" in Chapter 13: Definitions as notified.

Decision Reasons:

- The submitter supports the definition.

Point Number 923.142

Summary of Decision Requested: **Amend** Rule 14.2.1.1 (1. (e)- Permitted Activities: New Infrastructure as follows:
Not exceed the relevant noise limits that are applicable to that zone, ~~when measured at the nearest boundary of the site.~~

Decision Reasons:

- The Rule refers to zone noise limits, which is appropriate. However, the rule then refers to application of noise limits at the "... boundary of the site," which is inconsistent with some zone noise limits that are specified at notional boundaries.
- As drafted the rule contradicts itself. As each zone noise limit explicitly specifies a receiver point it should not be referenced here.
- As noted in other submissions, regardless, all assessment locations should be "at any point within" rather than "at" site or notional boundaries.

Point Number 923.143

Summary of Decision Requested: **Retain** Rule/Table 14.12.5.10- Required bicycle spaces as notified.

Decision Reasons:

- Supports requirement for bicycle spaces for all activities in Rule/Table 14.12.5.10 to facilitate the uptake of cycling.
- Cycling has proven community health benefits and should be promoted and the rule assists in achieving this outcome.

Point Number 923.144

Summary of Decision Requested: **Retain** Rule 16.1.2 P3- A new retirement village or alterations to an existing retirement village as notified.

Decision Reasons:

- Submitter supports the rule's encouragement for location of retirement villages within 400m walking distance of public transport.
- Retirement villages are becoming an increasingly strong element of urban areas and are critical for providing aged care of the community.

Point Number 923.145

Summary of Decision Requested: **Retain** Rule 16.1.3 RD1- A Multi-Unit Development as notified.

Decision Reasons:

- Submitter supports the encouragement as drafter for multi-unit development in the residential zone to be located within 400m walking distance of public transport.
- Compact urban forms that are well connected to community and commercial facilities are to be encouraged, given the public health and well-being benefits that accrue.

Point Number 923.146

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1- Subdivision- General to allow for more intensive subdivision in residential areas directly adjacent to the Business Town Centre zones at Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata and Tuakau.
OR

Amend the Proposed District Plan to apply a new alternative residential or mixed use zone or an overlay to the residential zone, or any other method, that includes objective(s) and policy(ies) that provide for a more intensive residential pattern around the Business Town Centre zones at

Decision Reasons:

- Submitter is concerned that applying the minimum lot size specified in Rule 16.4.1 RD1 to areas directly adjacent to the Business Town Centre Zones for Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata and Tuakau will not enable the achievement of a range of the Plan's objectives and policies for the urban environment, including those related to housing choice; density aligned with the Future Proof Strategy; and promotion of subdivision, land use and development that encourages thriving, sustainable town centres, and integrates with and is supportive of provision of public transport and other infrastructure. This is considered inconsistent with WRPS Policies 6.1, 6.3 and 6.16 and Section 6A.

Point Number

923.147

Summary of Decision Requested:

Amend Rule 16.2.1.1 P2, P3 and D1 as follows:

~~P2~~

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) Noise measured the following noise limits at any point within any other site in the Residential Zone must not exceed:~~

~~(i) 50dB LAeq(15min) dB (LAeq), 7am to 7pm every day;~~

~~(ii) 45dB LAeq(15min) dB (LAeq), 7pm to 10pm, every day; and~~

~~(iii) 40dB LAeq(15min) dB (LAeq) and 65dB (LAmax), 10pm to 7am the following day;~~

~~(iv) 65dB LAfmax, 10pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received.~~

~~P3~~

~~(a) Noise levels shall be measured in accordance with the requirements of NZS 6801: 2008 "Acoustics Measurement of Environmental Sound"; and~~

~~(b) Noise levels shall be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise."~~

~~D1~~

~~(a) Sound that is outside the scope of NZS 6802: 2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 16.2.1.1 P1 or P2 or P3.~~

Decision Reasons:

- It is preferable for noise limits to be district-wide provisions as they should be based on receiver locations/zones rather than based on source locations/zones.
- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - No noise limits are specified for sound received in adjoining zones.

Point Number

923.148

Summary of Decision Requested:

Retain Rule 17.1.3 RD1- Multi Unit Development as notified.

Decision Reasons:

- Submitter supports the provision for multi-unit development in the Business Zone to encourage this type of development to locate within 400m walking distance of public transport.
- Compact urban forms that are well connected to community and commercial facilities are to be encouraged, given the public health and well-being benefits that accrue.

Point Number

923.149

Summary of Decision Requested:

Amend Rule 17.2.1.1 P2, P3, P4 and D1- Noise- General as follows:

~~P2~~

~~Sound measured in accordance with NZS 6801: 2008 and assessed in accordance with NZS 6802: 2008 must not exceed:~~

~~(a) Noise measured the following noise limits at any point within any other site:~~

~~(i) In the Business Zone must not exceed:~~

~~(ii) 65dB LAeq(15min) dB (LAeq), 7am to 11pm every day; and~~

~~(iii) 60dB LAeq(15min) dB (LAeq) and 85dB (LAmax), 11pm to 7am the following day;~~

~~(iv) 85dB LAfmax, 11pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received.~~

~~(c) In the Residential or Village Zone must not exceed:~~

~~A. 55 dB (LAeq), 7am to 7pm;~~

~~B. 50 dB (LAeq), 7pm to 10pm;~~

~~C. 45 dB (LAeq) and 75dB (LAmax), 10pm to 7am the following day.~~

~~P3~~

~~(a) Noise measured within any site in any zone other than the Business Zone, Residential Zone or Village Zone must meet the permitted noise levels for that zone.~~

~~P4~~

~~(a) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound;"~~

~~(b) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics Environmental Noise;"~~

~~D1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 17.2.1.1 P1 or P2, P3 or P4.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - Incomplete noise limits are specified for sound received in adjoining zones. A consistent approach has not been adopted for sound between zones.

Point Number 923.150

Summary of Decision Requested: Retain Rule 18.1.3 RD1 - A Multi-Unit Development as notified.

Decision Reasons:

- Submitter supports the provisions for multi-unit development in the Business Town centre to be located with 400m walking distance of public transport.
- Compact urban forms that are well connected to community and commercial facilities are to be encouraged given the public health and wellbeing benefits that accrue.

Point Number 923.151

Summary of Decision Requested: Amend Rule 18.2.1.1 P2, P3, P4 and D1 Noise - General, as follows:

P2

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) Noise measured the following noise limits at any point within any other site:~~

~~(i) In the Business Town Centre Zone must not exceed:~~

~~(i) ~~65~~ ~~dB~~ ~~L~~_{Aeq}(15min) ~~dB~~ (L_{Aeq}), 7am to 11pm every day; and~~

~~(ii) ~~55~~ ~~dB~~ ~~L~~_{Aeq}(15min) ~~dB~~ (L_{Aeq}) and ~~95~~ ~~dB~~ (L_{Amax}), 11pm to 7am the following day;~~

~~(iii) ~~85~~ ~~dB~~ ~~L~~_AFmax, 11pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received,~~

~~(i) in the Residential and Village Zone must not exceed:~~

~~A. 55dB (L_{Aeq}), 7am to 7pm;~~

~~B. 50dB (L_{Aeq}), 7pm to 10pm;~~

~~45 dB (L_{Aeq}) and 65dB (L_{Amax}), 10pm to 7am the following day;~~

~~P3~~

~~(a) Noise measured within any site in any zone other than the Business Town Centre Zone, Residential Zone or Village Zone must meet the permitted noise levels for that zone.~~

~~P4~~

~~(a) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 Acoustics Measurement of Environmental Sound.~~

~~(b) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 Acoustic Environmental Noise.~~

~~D1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rules 18.2.1.1 P1 or P2, P3 and P4.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - There is an inconsistent approach for sound received in another zone.

Point Number 923.152

Summary of Decision Requested: Amend Rule 19.2.1.1 P2, P3, P4 and D1- Noise- General as follows:

P2

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) Noise measured within the following noise limits at any point within any other site in the Business Zone Tamahere must not exceed:~~

~~(i) 65dB L_{Aeq}(15min) dB (L_{Aeq}), 7am to 11pm every day; and~~

~~(ii) 55dB L_{Aeq}(15min) dB (L_{Aeq}), 11pm Friday to 1am Saturday; and~~

~~(iii) 55dB L_{Aeq}(15min) dB (L_{Aeq}), 11pm Saturday to 1am Sunday; and~~

~~(iv) 45dB L_{Aeq}(15min) dB (L_{Aeq}), Sunday to Thursday 11pm to 1am the following day;~~

~~(v) 45dB L_{Aeq}(15min) dB (L_{Aeq}), 1am to 7am every day; and~~

~~(vi) 75dB L_{Aeq}(15min) dB (L_{Aeq}), 11pm to 7am the following every day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received,~~

~~P3~~

~~(a) Noise measured at the notional boundary within any site in the Country Living Zone must not exceed:~~

~~(i) 50 dB (L_{Aeq}), 7am to 7pm every day;~~

~~(ii) 45 dB (LAeq), 7pm to 10pm every day; and~~

~~(iii) 40 dB (LAeq), and 65 dB (LAmax), 10pm to 7am every day;~~

~~-P4~~

~~(a) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound;" and~~

~~(b) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise;"~~

~~-D1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 19.2.1.1 P1 or P2, P3 or P4.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - There is an inconsistent approach for sound received in another zone.
 - There is a gap in the noise limits for Sundays to Thursday between 11pm and 1am the next day.

Point Number

923.153

Summary of Decision Requested:

Amend Rule 20.2.3.1 P2, P3, P4 and D2- Noise General as follows:

P2

Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:

(a) Noise measured: The following noise limits at any point within any other site:

~~(i) In the Industrial Zone must not exceed:~~

~~(i) A. 75 dB LAeq(15min), dB (LAeq), 7am to 10pm; and~~

~~(ii) B. 55 dB LAeq(15min), dB (LAeq) and 85 dB (LAmax), 10pm to 7am the following day;~~

~~(iii) C. 85 dB LAeq, 10pm to 7am the following day;~~

(b) The permitted activity noise limits for the zone of any other site where sound is received

~~(i) In the Residential or Village Zone must not exceed:~~

A. 55 dB (LAeq), 7am to 7pm;

B. 50 dB (LAeq), 7pm to 10pm;

C. 45 dB (LAeq) and 75 dB (LAmax), 10pm to 7am the following day.

~~-P3~~

~~(a) Noise measured within any site in any zone other than the Industrial Zone and the Heavy Industrial Zone, must meet the permitted noise levels for that zone.~~

~~-P4~~

~~(a) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound;"~~

~~(b) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise;"~~

~~-D2L~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 20.2.3.1 P1 or P2, P3 or P4.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - There is an inconsistent approach for sound received in another zone.
 - It is often appropriate to impose no intra-zonal noise limits on industrial zones, as otherwise noise limits can frustrate the fundamental purpose of the zone. Issues arising could be addressed under RMA s16.

Point Number

923.154

Summary of Decision Requested:

Amend Rule 21.2.3.1 P2, P3, P4 and RD1- Noise- General as follows:

P2

Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:

(a) Noise measured: the following noise limits at any point within any other site in the Heavy Industrial Zone must not exceed:

(i) A. 75 dB LAeq(15min), dB (LAeq) at any time;

(b) The permitted activity noise limits for the zone of any other site where sound is received.

~~(i) In the Industrial Zone must not exceed:~~

A. 75 dB (LAeq), 7am to 10pm;

B. 55 dB (LAeq) and 85 dB (LAmax), 10pm to 7pm the following day.

~~-P3~~

~~Noise measured within any site in the Residential Zone must meet the permitted noise levels for that zone.~~

~~-P4~~

~~(a) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound;"~~

~~Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise;"~~

~~-RD1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 21.2.3.1 P1, or P2, P3 and P4.~~

~~(b)~~ (c). Council's discretion...

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - There is an inconsistent approach for sound received in another zone.
- It is often appropriate to impose no intra-zonal noise limits in industrial zones, particularly heavy industrial zones, as otherwise noise limits can frustrate the fundamental purpose of the zone. Issue arising could be addressed under RMA s16.

Point Number 923.155

Summary of Decision Requested: Amend Rule 21.2.3.2 P2, P3, P4 and RD1 - Noise- Huntly Power Station as follows:

~~P2~~

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) Noise measured at the following noise limits at any point within a notional boundary within in the Rural Zone must not exceed:~~

~~(i) 55dB LAeq(15min) dB (LAeq) 7am to 10pm; and~~

~~(ii) 45dB LAeq(15min) dB (LAeq) and 75dB (LAmax) 10pm to 7am the following day;~~

~~(iii) 75dB LAFmax 10pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received, other than in the Rural Zone,~~

~~P3~~

~~(a) Noise measured within any site in the Residential Zone must meet the permitted noise levels for that zone.~~

~~P4~~

~~(a) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound."~~

~~(b) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise."~~

~~RD1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 21.2.3.2 P1, or P2, P3 and P4.~~

~~(b)~~ (c). Council's discretion...

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, assessment location and time-frames. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - There is an inconsistent approach for sound received in another zone.
- A location has been specified "at" rather than "at any point within" a notional boundary.

Point Number 923.156

Summary of Decision Requested: Amend Rule 22.4.1.5 (v)- Rural Hamlet Subdivision to provide for a minimum 40ha balance lot.

Decision Reasons:

- This is inconsistent with Policy 5.2.3 (a)- Effects of subdivision and development on soils around minimising fragmentation of productive rural land.

Point Number 923.157

Summary of Decision Requested: Amend Rule 22.2.1.1 P2, P3, P4 and D1- Noise General as follows:

~~P2~~

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) Noise measured at The following noise limits at any point within a notional boundary on any other site in the Rural Zone must not exceed:~~

~~(i) 50dB LAeq(15min) dB (LAeq) 7am to 7pm, everyday;~~

~~(ii) 45dB LAeq(15min) dB (LAeq) 7pm to 10pm, every day;~~

~~(iii) 40dB LAeq(15min) dB (LAeq) and 65 dB (LAmax) 10pm to 7am the following day;~~

~~(iv) 65dB LAFmax 10pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received,~~

~~P3~~

~~(a) Noise measured within any site in any zone, other than the Rural Zone, must meet the permitted noise levels for that zone.~~

~~P4~~

~~(a) Noise levels shall be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound."~~

~~(b) Noise levels shall be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise."~~

~~D1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 22.2.1.1 P1, or P2, P3 or P4.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,

- The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard.

Point Number 923.158

Summary of Decision Requested: Amend Rule 22.2.1.2 P1 Noise- Frost Fans, as follows:

P1

~~(a) Sound Noise generated by a frost fans measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed 55 dB LAeq(15min) dB (LAeq) when measured at the at any point within a notional boundary on any other site in any zone in the Rural Zone and within any site in the Country Living Zone, Village Zone or Residential Zone.~~

~~(b) Frost fans must be at least 300m from any notional boundary on any other site.~~

~~(c) Frost fans must only be operated for:~~

~~(i) Protection of crops on the site from bud burst to harvest, when wind speeds are not greater than 8 km/h and the local air temperature measured at the lowest height above ground of the buds being protected is less than 1 degree Celsius;~~

~~(ii) Maintenance and testing during the daytime between 8am and 5pm;~~

~~(iii) Compliance testing by the Council.~~

~~(d) A log must be kept of the usage of each frost fan and made available to the Council on request, including dates, times, durations, wind speeds and temperatures.~~

Decision Reasons:

- The proposed noise limit for frost fans is reasonable, but only if the usage of the frost fans is limited.
- A measurement and assessment stand should be specified.
- Locations should be "at any point within" not "at" a notional boundary.

Point Number 923.159

Summary of Decision Requested: Amend Rule 23.2.1.1 P2, P3, P4, P5 and D1- Noise- General as follows:

P2

Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:

~~(a) Noise measured at the following noise limits at any point within a notional boundary on within any site in the Rural Zone and within any other site in the Country Living Zone must not exceed:~~

~~(i) 50dB LAeq(15min) dB (LAeq), 7am to 7pm, every day;~~

~~(ii) 45dB LAeq(15min) dB (LAeq), 7pm to 10pm every day;~~

~~(iii) 40dB LAeq(15min) dB (LAeq) and 65 dB (LAmax), 10pm to 7am the following day;~~

~~(iv) 65dB LAFmax, 10pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received~~

P3

~~(a) Noise measured within any site in any zone, other than the Country Living Zone and Rural Zone, must meet the permitted noise levels for that zone.~~

P4

~~(a) Noise generated by any activity in Tamahere Commercial Area A and Tamahere Commercial Area B, as identified on the planning maps, must not exceed the following levels:~~

~~(i) In Tamahere Commercial Areas A and B does not exceed:~~

~~(i) 65dB (LAeq), 7am to 10pm;~~

~~(ii) 50dB (LAeq) and 75 dB (LAmax), 10pm to 7am the following day;~~

~~(b) Outside Tamahere Commercial Areas A and B, does not exceed:~~

~~(i) 55dB (LAeq), 7am to 10pm;~~

~~(ii) 40dB (LAeq) and 70dB (LAmax), 10pm to 7am the following day.~~

P5

~~(a) Noise levels shall be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound;"~~

~~(b) Noise levels shall be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise;"~~

D1

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 23.2.1.1 P1 or P2, P3, P4 or P5.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - There is an inconsistent approach for sound received in another zone,
 - Tamahere Commercial Areas A and B have been treated inconsistently with other areas in that a noise limit is based on the source location and not the receiver location. This should be moved onto a separate rule, as for Huntly Power Station in the Rural Zone

Point Number 923.160

Summary of Decision Requested: Add new Rule 23.2.1.X applying to activity in Tamahere Commercial Areas A and B, worded as follows:

P1

Farming noise, and sound generated by emergency generators and emergency sirens.

P2

Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:

(a) The following noise limits at any point within any other site in Tamahere Commercial Areas A and B:

(i) 65dB LAeq(15min), 7am to 10pm;

~~(ii) 50dB LAeq(15min), 10pm to 7am;~~

~~(iii) 75 dB LA Fmax, 10pm to 7am the following day;~~

~~(b) The following noise limits at any point within any site outside the Tamahere Commercial Areas A and B:~~

~~(i) 55dB LAeq(15min), 7am to 10pm;~~

~~(ii) 40dB LAeq(15min), 10pm to 7am;~~

~~(iii) 70dB LA Fmax, 10pm to 7am the following day;~~

~~D1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound that does not comply with Rule 23.2.1.X P1 or P2.~~

Decision Reasons:

- The preceding submission point refers to the Tamahere commercial area and the need to create a separate rule.

Point Number 923.161

Summary of Decision Requested: Amend Rule 24.2.1 P2, P3 and D1 Noise - General, as follows:

~~P2~~

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) Noise measured The following noise limits at any point within any other site in the Village Zone must not exceed:~~

~~(i) 50dB LAeq(15min), dB (LAeq), 7am to 7pm, every day;~~

~~ii) 45dB LAeq(15min), dB (LAeq), 7pm to 10pm, every day; and~~

~~(iii) 40dB LAeq(15min), dB (LAeq) and 65dB (LAmax), 10pm to 7am the following day;~~

~~(iv) 65dB LA Fmax, 10pm to 7am the following day;~~

~~(b) The permitted activity noise limits for the zone of any other site where sound is received.~~

~~P3~~

~~(a) Noise levels shall be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound"; and~~

~~(b) Noise levels shall be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise."~~

~~D1~~

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Noise that does not comply with Rule 24.2.1 P1 or P2 or P3.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - No noise limits are specified for sound received in adjoining zones.

Point Number 923.162

Summary of Decision Requested: Amend Rule 24.4.1- Subdivision- General to allow for more intensive subdivision in Village Zone areas directly adjacent to the commercial zones.

Decision Reasons:

- Submitter is concerned that applying this minimum lot size to areas within the Village Zone that are directly adjacent to commercial areas will not enable the achievement of a range of the Plan's objectives and policies for the villages, such as those relating to housing choice; density aligned with the Future Proof strategy; and promotion of subdivision, land use and development that encourages thriving, sustainable town centres, and integrates with and is supportive of provision of public transport and other infrastructure. This is considered inconsistent with WRPS Policies 6.1, Policy 6.3 and Policy 6.16 and Section 6A.

Point Number 923.163

Summary of Decision Requested: Amend Rule 24.4.2- Subdivision Te Kowhai and Tuakau to allow for more intensive subdivision in Village Zone areas directly adjacent to the commercial zones.

Decision Reasons:

- Submitter is concerned that applying this minimum lot size to areas within the Village Zone that are directly adjacent to commercial areas will not enable the achievement of a range of the Plan's objectives and policies for the villages, such as those relating to housing choice; density aligned with the Future Proof strategy; and promotion of subdivision, land use and development that encourages thriving, sustainable town centres, and integrates with and is supportive of provision of public transport and other infrastructure. This is considered inconsistent with WRPS Policies 6.1, Policy 6.3 and Policy 6.16 and Section 6A.

Point Number 923.164

Summary of Decision Requested: Amend Rule 25.2.1.1 P1, P2, P3, P4, and D1 Noise - General, as follows:

~~P1~~

~~(a) Crowd noise, excluding any amplified sound or music;~~

~~(b) Noise generated by emergency generators and emergency sirens.~~

~~P2~~

~~Sound received outside the Reserve Zone, measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008, must not exceed the permitted activity noise limits for the zone of the site where sound is received.~~

(e) Noise measured within the notional boundary on any site in the Residential Zone, Village Zone, Country Living Zone and Rural Zone must not exceed:

(i) 50dB (L_{Aeq}), 7am to 7pm, every day;

(ii) 45dB (L_{Aeq}), 7pm to 10pm, every day;

(iii) 40dB (L_{Aeq}) and 65dB (L_{Amax}), 10pm to 7am the following day;

-P3

(e) Noise measured within any site in any zone other than the Reserve Zone, Residential Zone, Village Zone, Country Living Zone and Rural Zone must meet the permitted noise levels for that zone:

-P4

(e) Noise levels shall be measured in accordance with the requirements of NZS 6801:2008 "Acoustics - Measurement of Environmental Sound;"

(f) Noise levels shall be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental Noise;"

-D1

(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and

(b) Sound Noise that does not comply with Rule 25.2.1.1 P1, ~~or~~ P2, ~~P3~~ or P4:

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - The measurement and assessment standards are an integral part of the noise limits and cannot be a separate permitted activity standard,
 - An exemption has been made for "crowd noise" but this could potentially permit a wider range of sounds than intended.

Point Number

923.165

Summary of Decision Requested:

Amend Rule 26.2.1 P1, P2 and P3 Noise - Motorsport and Recreation activity, as follows:

P1

(a) The ~~sound noise level~~ from motor sport and recreation activities, measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008, shall not exceed the following limits measured at any point beyond the 'Hampton Downs Noise Control Boundary' shown in Appendix 12 (Motorsport and Recreation):

(i) ~~65 dB L_{Aeq}(15min) dBA L10~~ on no more than 27 days per year (with no more than 10 of the 27 days to be on a Sunday or public holiday) between the hours of 9.00am-6.00pm; and

(ii) ~~55 dB L_{Aeq}(15min) dBA L10~~ on no more than 40 days per year between the hours of 9.00am-6.00pm; and

(iii) ~~50 dB L_{Aeq}(15min) dBA L10~~ between the hours of 7am to 6pm any other days of the year; and

(iv) ~~45 dB L_{Aeq}(15min) dBA L10~~, between the hours of 6pm to 10pm every day of the year, and

(v) ~~40dB L_{Aeq}(15min) dBA L10 and 65 dB L_{Amax} dBA Lmax~~ at all other times

(b) The motor racing activities in Rule 26.2.1 P1 (a) (i) and (ii) are exclusive of each other and the activities are considered to be on separate days.

P2

The use of a public address system shall only occur between the hours of 7.00am and 7.00pm and shall not exceed a ~~noise limit of 50 dBA L10: dB L_{Aeq}(15min)~~, measured at any point beyond the "Hampton Downs Noise Control Boundary" shown in Appendix 12 (Motorsport and Recreation) in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008.

P3

...

C. A programme of noise management and assessment of compliance with the noise standards, including details of the monitoring of noise levels for vehicles competing in events with a noise limit of ~~65 dB L_{Aeq}(15 min) dBA L10~~.

Decision Reasons:

- Sound from motorsport and other activity at Hampton Downs is currently authorized by a resource consent. The proposed permitted activity standards closely follow but do not exactly mirror the resource consent.
- Issues have been identified with the noise controls in both the existing resource consent and proposed rules:
 - Noise limits have been written in terms of the outdated "L10" parameter. This doesn't represent good practice and might not adequately represent sound from short duration events. It also inconsistent with other noise limits in the plan.
 - Incorrect notation has been used.
 - Measurement and assessment standards are not specified in the proposed plan (they are in the resource consent).
- It is submitted these matters should be addressed in the new permitted activity standards. While this does not prevent activity continuing under the existing resource consent, it sets a robust baseline for any further developments or alterations to activity.
- Council could also update the noise conditions in the resource consent to match the new plan provisions under the review condition (97).

Point Number

923.166

Summary of Decision Requested:

Amend Rule 26.2.2 P1 and D1- Noise- Business and Industrial Area Precinct B and Minor Race Track Area- Precinct C as follows:

P1

(e) ~~Sound~~ The noise level from activities within Precinct B and Precinct C, other than motor racing activities within Precinct B and Precinct C, measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must ~~shall~~ not exceed the following noise limits ~~when measured at the at any point within a notional boundary on any other site of any dwelling~~:

(i) ~~50dB L_{Aeq}(15min)~~, 7am to 7pm, Monday to Saturday excluding public holidays;

(ii) ~~40 dB L_{Aeq}(15min)~~, 7am to 7pm, Sunday and Public Holidays;

(iii) ~~40 dB L_{Aeq}(15min)~~, 7pm to 7am the following day;

(iv) ~~75 dB L_{Amax}~~, 10pm to 7am the following day;

~~Monday to Friday 7.00am to 7.00pm 50 dBA L10:~~

~~Saturday 7.00am to 6.00pm 50 dBA L10:~~

~~All other times including public holidays 40 dBA L10~~

~~Monday to Sunday 10.00pm to 7.00am 75 dBA Lmax:~~

~~Noise levels shall be measured and assessed in accordance with the requirements 6801:2008 'Acoustics - Measurement of environmental sound' and NZS 6802:2008 'Acoustics - Environmental noise.'~~

~~(b) The notional boundary means a line 20m from the façade of any dwelling or the legal boundary, whichever is the closer to the dwelling as defined in NZS 6801:2008 'Acoustics - Measurement of environmental sound';~~

~~-D1~~

~~(g) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Any activity that does not comply with Rule 26.2.2 P1.~~

~~-~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802.
 - Noise limits have been written in terms of the outdated "L10" parameter. This doesn't represent good practice and might not adequately represent sound from short duration events. It also inconsistent with other noise limits in the plan.
 - There is a difference of one hour between noise limits on Monday-Friday and Saturdays, which is inconsistent with other zones and is an unnecessary complication.
 - Notional boundary is defined in Chapter 13 and should not be redefined or repeated in this rule.
 - The format of the rule is inconsistent with other zones.

Point Number

923.167

Summary of Decision Requested:

Delete Rule 27.2.7- Noise- Taxiways.

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. Inclusion of rules for specific activity are supported, however, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802,
 - Measurement and assessment standards need to be specified,
 - There is an inconsistent approach for sound received in another zone,
 - The separation of noise limit into Rules 27.2.6 and 27.2.7 adds unnecessary complexity.
 - The format of the rules is inconsistent with other chapters.

Point Number

923.168

Summary of Decision Requested:

Amend Rule 27.2.6 P1, P2, P3 and D1 Noise - Other than Taxiways, as follows:

P1

~~(a) Noise from any activity in PRECINCT B must not exceed the following noise limits when measured at the notional boundary of a site within the Rural Zone:~~

~~(i) 55dB (LAeq), 7am to 10pm every day; and~~

~~(ii) 40dB (LAeq) and 70dB (LAfmax), 10pm to 7am the following day.~~

~~(a) Sound from emergency sirens.~~

~~(b) Sound from aircraft movements on taxiways received at 98A and 98B Limmer Road.~~

P2

~~(a) Noise from any activity in PRECINCTS C OR D must not exceed the following noise limits when measured at the notional boundary of any site in the Rural Zone outside of the Te Kowhai Airpark Zone:~~

~~(i) 50dB (LAeq), 7am to 7pm every day; and~~

~~(ii) 45dB (LAeq), 7pm to 10pm every day; and~~

~~(iii) 40dB (LAeq), and 65dB (LAfmax) all other times.~~

~~Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:~~

~~(a) For sound from activity in Precinct B, excluding aircraft movements on taxiways, the following noise limits at any point within a notional boundary on any site outside the Te Kowhai Airpark Zone:~~

~~(i) 55 dB LAeq(15min), 7am to 10pm;~~

~~(ii) 40 dB LAeq(15min), 10pm to 7am the following day;~~

~~(iii) 70dB LAfmax, 10pm to 7am the following day.~~

~~(b) For sound from activity in Precincts C or D, excluding aircraft movements on taxiways, the permitted activity noise limits for the zone of any site where sound is received outside the Te Kowhai Airpark Zone.~~

~~(c) For sound from aircraft movements on taxiways, the following noise limits at any point within notional boundaries on 202, 212 and 214 Limmer Road:~~

~~(i) 50 dB LAeq(15min), 7am to 10pm;~~

~~(ii) 40 dB LAeq(15min), 10pm to 7am the following day;~~

~~(iii) 65 dB LAfmax, 10pm to 7am the following day;~~

~~(d) For sound from aircraft movements on taxiways, received at any other sites outside the Te Kowhai Airpark Zone, the permitted activity noise limits for the zone of any site where sound is received.~~

P3

~~(a) In ALL PRECINCTS, Rules P1 and P2 do not apply to:~~

~~(i) Noise from aircraft movement on the taxiways; or~~

~~(ii) Construction noise; or~~

~~(iii) Noise from emergency sirens.~~

D1

~~(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and~~

~~(b) Sound Any activity that does not comply with Rule 27.2.6 P1 or P2.~~

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. Inclusion of rules for specific activity are supported, however, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,

- No provision has been made for sound sources outside the scope of NZS 6802,
- Measurement and assessment standards need to be specified,
- There is an inconsistent approach for sound received in another zone,
- The separation of noise limit into Rules 27.2.6 and 27.2.7 adds unnecessary complexity,
- The format of the rules is inconsistent with other chapters.

Point Number 923.169

Summary of Decision Requested: Amend Rule 28.2.1.2 P2 and D1 Noise - General, as follows:

P2

Sound measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 must not exceed:

(a) Noise measured the following limits at any point within any other site in the Rangitahi Peninsula Zone must not exceed:

(i) 50 dB LAeq(15min) ~~dB (LAeq)~~ 7am to 7pm, every day; ~~and~~

(ii) 45 dB LAeq(15min) ~~dB (LAeq)~~ 7pm to 10pm, every day; ~~and~~

(iii) 40 dB LAeq(15min) ~~dB (LAeq)~~ and 65 dB (Amax) 10pm to 7am the following day;

(iv) 65 dB LA_{Fmax} 10pm to 7am the following day;

~~(b) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound;"~~

~~(c) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental noise;"~~

-D1

(a) Sound that is outside the scope of NZS 6802:2008 or a permitted activity standard; and

(b) Sound Noise generated by any activity, that does not comply with Rule 28.2.1.2 P1 ~~or~~ P2.

Decision Reasons:

- The proposed noise limits are generally in accordance with guideline values and use current measurement and assessment standards, acoustical metrics, numerical values, time-frames and assessment location. However, the following issues have been identified:
 - Incorrect terminology has been used in conflict with the standards specified,
 - No provision has been made for sound sources outside the scope of NZS 6802.

Submitter Number: 924 **Submitter:** Alice Barnett
Organisation: Genesis Energy Limited

Point Number 924.1

Summary of Decision Requested: Amend the Proposed District Plan so that Regionally Significant Industries are identified explicitly in the Plan.

Decision Reasons:

- The submitter considers that existing and proposed regionally significant industry and regionally significant infrastructure is an important component of the Waikato District.
- Policy 4.4 in the Waikato Regional Policy Statement (WRPS) requires that the values and long-term benefits of regionally significant industry to economic, social and cultural wellbeing are recognised and that the potential for reverse sensitivity effects are avoided or minimised.
- Implementation method 4.4.1 anticipates that these matters will be addressed in District Plans. The RPS also requires that regionally significant industry be "identified in Regional or District plans."

Point Number 924.2

Summary of Decision Requested: Amend the Proposed District Plan to explicitly identify Huntly Power Station as a Regionally Significant Industry in appropriate places in the Plan.

Decision Reasons:

- The submitter considers that existing and proposed regionally significant industry and regionally significant infrastructure is an important component of the Waikato District.
- Policy 4.4 in the Waikato Regional Policy Statement (WRPS) requires that the values and long-term benefits of regionally significant industry to economic, social and cultural wellbeing are recognised and that the potential for reverse sensitivity effects are avoided or minimised.
- Implementation method 4.4.1 anticipates that these matters will be addressed in District Plans. The RPS also requires that regionally significant industry be "identified in Regional or District plans."

Point Number 924.3

Summary of Decision Requested: Add clause (c) to Section 1.4.4- Urban Environment as follows:

(c) In line with the Regional Policy Statement, the district plan must ensure that urban development recognises, provides for and protects existing and proposed regionally significant industry and regionally significant infrastructure.

Decision Reasons:

- The submitter notes that the Proposed District Plan states that protecting the rural environment for such things as productive rural activities is a key focus for the plan and that a key issue for the urban environment is the maintenance of the productive capacity of rural resource. Whilst the submitter does not disagree with these, it considers that this must be achieved within a context that also protects existing and new regionally significant infrastructure and regionally significant industry.
- This is recognised in 1.4.3.2 (c) but not with respect to the urban environment in section 1.4.4.

Point Number 924.4

Summary of Decision Requested: Amend Section 1.5.5 (d)-Services and general infrastructure as follows or words to like effect:

Decision Reasons:

- The use of "i.e." in the paragraph leads the reader to a specific interpretation limited to the infrastructure listed. The submitter submits that it would be more appropriate to use "e.g." to ensure that the listed infrastructure are identified as examples (and not an exhaustive list) of the regionally and nationally significant infrastructure.

Point Number 924.5

Summary of Decision Requested: **Amend** Section 1.5.5.7- Energy as follows:

The District Plan recognizes the national and regional importance of existing energy resources and infrastructure, which include coalfields, coal mines, Huntly Power Station, gas, electricity transmission, and coal conveyance facilities, as well as renewable energy. These are regionally significant industries located in the Waikato District. The plan addresses the positive and adverse effects on energy infrastructure and development.

Decision Reasons:

- The submitter supports the recognition of the importance of the Huntly Power Station and associated infrastructure both at a national and regional level.
- The submitter considers that the energy resources and infrastructure listed in section 1.5.5.7 should be identified as regionally significant industries.

Point Number 924.6

Summary of Decision Requested: **Delete** the areas identified on the planning maps as Significant Natural Areas on the Huntly Power Station site.

Decision Reasons:

- The submitter supports the Waikato District Council's general approach towards management and identification of the District's Significant Natural Areas (SNA) and acknowledges WDC's response to the feedback provided by the submitter on the Draft Proposed Plan.
- However, the submitter remains concerned with the extent of SNAs identified on the Huntly Power Station site, ancillary land and enhancement sites. Such enhancement sites having been planted and maintained by the submitter as requirements of regional resource consents.
- The Proposed Plan defines an SNA as "an area of significant indigenous biodiversity that is identified on the planning maps." From this definition there doesn't appear to be anything 'natural' about areas defined as SNAs and the term is therefore a misnomer when applied to created areas such as the Genesis River site planting projects.
- The areas currently by managed by the submitter for enhancement planting are subject to ongoing maintenance to enhance the values within the sites for the purpose of improving biodiversity but should not be protected in the same way as an existing natural area.
- The additional restrictions and rules as drafted in the Plan would impact the management of the enhancement plantings and the submitter's ability to meet conditions imposed by resource consents.

Point Number 924.7

Summary of Decision Requested: **Delete** the areas identified on the planning maps as Significant Natural Areas on 'Scott Farm,' Te Ohaki Road, Huntly as identified on the submission map.

Decision Reasons:

- The submitter supports the Waikato District Council's general approach towards management and identification of the District's Significant Natural Areas (SNA) and acknowledges WDC's response to the feedback provided by the submitter on the Draft Proposed Plan.
- However, the submitter remains concerned with the extent of SNAs identified on the Huntly Power Station site, ancillary land and enhancement sites. Such enhancement sites having been planted and maintained by the submitter as requirements of regional resource consents.
- The Proposed Plan defines an SNA as "an area of significant indigenous biodiversity that is identified on the planning maps." From this definition there doesn't appear to be anything 'natural' about areas defined as SNAs and the term is therefore a misnomer when applied to created areas such as the Genesis River site planting projects.
- The areas currently by managed by the submitter for enhancement planting are subject to ongoing maintenance to enhance the values within the sites for the purpose of improving biodiversity but should not be protected in the same way as an existing natural area.
- Drafted additional restrictions and rules as drafted in the Plan would impact the management of the enhancement plantings and Genesis' ability to meet conditions imposed by resource consents.

Point Number 924.8

Summary of Decision Requested: **Amend** Policy 3.2.3 (a) (iv)- Management Hierarchy as follows:

iv.) After remediation or mitigation has been undertaken, offset or compensate any significant residual adverse effects ~~in accordance with Policy 3.2.4.~~

Decision Reasons:

- The submitter supports the general approach to management of Significant Natural Areas (SNA) as detailed in Policy 3.2.3 and 3.2.4.
- The submitter considers that there may be circumstances where it is impractical for "no net loss" to be achieved. In that regard, the submitter considers that environmental compensation be included as a mechanism to manage effects, specifically for regionally significant industry and regionally significant infrastructure. This approach has been used widely around New Zealand in District Plans for managing biodiversity.

Point Number 924.9

Summary of Decision Requested: **Amend** Policy 3.2.4- Biodiversity Offsetting as follows:

(a) Allow for a biodiversity offset or compensatory measure to be offered by a resource consent applicant where an activity will result in significant residual adverse effects on a Significant Natural Area, or on indigenous biodiversity outside such Significant Natural Areas.

(b) Within a Significant Natural Area, a biodiversity offset or compensatory measure will only be considered appropriate where adverse effects have been avoided, remedied or mitigated in accordance with the hierarchy established in Policy 3.2.3; and

(i) The biodiversity offset is consistent with the framework detailed in Appendix 6 Biodiversity Offsetting; and

(ii) The biodiversity offset can achieve no net loss of indigenous biodiversity;

A. Preferably in the affected area of Significant Natural Area;

Or

B. Where that is not practicable, in the ecological district in which the affected area of Significant Natural Area is located.

(iii) Environmental compensation will be considered for effects associated with operation, maintenance and enhancement of regionally significant industry and regionally significant infrastructure.

Decision Reasons:

- The submitter supports the general approach to management of Significant Natural Areas (SNA) as detailed in Policy 3.2.3 and 3.2.4.
- The submitter considers that there may be circumstances where it is impractical for "no net loss" to be achieved. In that regard, the submitter considers that environmental compensation be included as a mechanism to manage effects, specifically for regionally significant industry and regionally significant infrastructure. This approach has been used widely around New Zealand in District Plans for managing biodiversity.

Point Number 924.10

Summary of Decision Requested: **Add** clause (v) to Policy 3.2.6-Providing for Vegetation Clearance by including the following (or wording to similar effect):

(v) The vegetation is impinging on adjacent existing activities.

Decision Reasons:

- The submitter considers that there should be a provision of vegetation clearance within SNAs that includes clearance of vegetation that is impinging on adjacent existing activities.
- It is inappropriate to identify SNAs on land used for the Huntly Power Station and at Scott Farm.

Point Number 924.11

Summary of Decision Requested: **Delete** the Significant Amenity Landscape overlay from the Huntly Power Station on the Planning Maps.

Decision Reasons:

- The submitter supports the general approach to maintain and enhance identified Significant Amenity Landscapes (SAL) as detailed in Section 3.4-Significant Amenity Landscapes.
- The area of the site's intake forebay and cooling water discharge has been identified as a SAL. It is not appropriate for this area be mapped as a SAL as public access is restricted due to significant health and safety risk.
- This area is zoned Heavy Industrial in the Proposed District Plan and there are no amenity landscapes in this area that need to be mapped or protected.

Point Number 924.12

Summary of Decision Requested: **Amend** Planning Maps by removing the Significant Amenity Landscape (SAL) overlay from 'Scott Farm,' Te Ohaki Road, Huntly as identified on the submission map.

Decision Reasons:

- The submitter supports the general approach to maintain and enhance identified Significant Amenity Landscapes (SAL) as detailed in Section 3.4-Significant Amenity Landscapes.
- An area of the 'Scott Farm' land which the submitter owns has been identified as a SAL. This area is a productive dairy farm, in a rural landscape, and it forms part of the overall Huntly Power Station ash management regime, rather than an area with high amenity value that warrants protection.
- The submitter is concerned that the overlay may compromise the existing use of that land as a pastoral farm, the operation of the Huntly Power Station ash disposal system and the site enhancement and/or remediation work that the submitter is undertaking or proposes.
- Identification of this land as part of a SAL is inconsistent with operational uses of the land and health and safety matters arising from those operations.

Point Number 924.13

Summary of Decision Requested: **Retain** Policy 4.1.6 Commercial and industrial activities, except for the amendments sought below

AND

Amend Policy 4.1.6 (a)- Commercial and Industrial activities as follows:

(a) Provide for commercial and industrial development in the following zones:

(i) Business Town Centre;

(ii) Business;

(iii) Industrial; ~~and~~

(iv) Heavy Industrial; and

(v) Electricity generation within the Huntly Power Station Heavy Industrial Zone.

Decision Reasons:

- The submitter supports the direction of Policy 4.1.6 that commercial and industrial activities be provided for in the Heavy Industrial Zone, which is what the Huntly Power Station has been zoned as.
- However, the submitter also considers that electricity generation activities should also be provided within the Huntly Power Station Heavy Industrial Zone.

Point Number 924.14

Summary of Decision Requested: **Add** clause (vi) to Policy 5.3.7 (a)- Reverse Sensitivity Effects as follows:

(vi) Existing and proposed regionally significant industry and regionally significant infrastructure.

Decision Reasons:

- The submitter considers that existing and proposed regionally significant industry and regionally significant infrastructure also forms part of the rural environment and should also be provided for in this policy.

Point Number 924.15

Summary of Decision Requested: **Amend** Policy 5.3.17 (b)- Specific Area- Huntly Power Station- Coal and ash water as follows:

(b) Provide for specific facilities that include the handling, stockpiling and haulage of coal and the ~~disposal~~ management of coal ash and associated water within identified areas in close proximity to Huntly Power Station.

Decision Reasons:

- The submitter supports Policy 5.3.17 as it recognises and provides for facilities that are integral to the operation of the Huntly Power Station.
- It is appropriate that the overlay in the planning maps specifies the area in which these activities occur and facilities are located.
- Policy 5.3.17 (b) Incorrectly lists the facilities as being for disposal of coal ash but those facilities provide for the management of the coal ash. The submitter considers this policy should be amended to correctly reflect the purpose for which the ash management site exists.
- Policy 5.3.17 does not list coal stockpiling in this specific area but this is an activity that is undertaken within the identified area and is integral to the operation of Huntly Power Station.

Point Number 924.16

Summary of Decision Requested: **Add** a new Policy to Section 6.1- General Infrastructure as follows:

6.1.X Policy- Regionally Significant Infrastructure

a. Have particular regard to the benefits that can be gained from the development and use of regionally significant infrastructure (as defined in the Waikato Regional Policy Statement 2016); and

b. Protect the effectiveness and efficiency of existing and planned regionally significant infrastructure.

Decision Reasons:

- The submitter considers that existing and proposed regionally significant infrastructure should be explicitly recognised and provided for in the Infrastructure section of the Plan.
- Policy 6.6 in the Waikato Regional Policy Statement requires that the effectiveness and efficiency of existing and planned regionally significant infrastructure is protected and that particular regard is given to the benefits that can be gained from the development and use of regionally significant infrastructure.

Point Number 924.17

Summary of Decision Requested: **Retain** Objective 6.1.1-Development, operation and maintenance of infrastructure in the same or similar form.

Decision Reasons:

- The submitter supports this objective and recommends it is retained in the same or similar form.

Point Number 924.18

Summary of Decision Requested: **Retain** Policy 6.1.2- Development, operation and maintenance in the same or similar form.

Decision Reasons:

- The submitter supports this policy and recommends it is retained in the same or similar form.

Point Number 924.19

Summary of Decision Requested: **Retain** Policy 6.1.4- Infrastructure benefits in the same or similar form.

Decision Reasons:

- The submitter supports this policy and recommends it is retained in the same or similar form.

Point Number 924.20

Summary of Decision Requested: **Amend** Policy 6.1.5 (a)- Natural Hazards and Climate Change as follows:

(a) Encourage the design and location of new infrastructure to take account of natural hazards and the effects of climate change.

Decision Reasons:

- The submitter supports the intent of this policy, but recommends it is made explicit that this policy relates to new infrastructure.

Point Number 924.21

Summary of Decision Requested: **Retain** Objective 6.1.6- Reverse Sensitivity in the same or similar form.

Decision Reasons:

- The submitter supports this objective and recommends it is retained in the same or similar form.

Point Number 924.22

Summary of Decision Requested: **Retain** Policy 6.1.7- Reverse sensitivity and Infrastructure in the same or similar form.

Decision Reasons:

- The submitter supports this policy and recommends it is retained in the same or similar form.

Point Number 924.23

Summary of Decision Requested: Amend Objective 6.3.6 (a)- Non-renewable energy as follows
(a) Non-renewable energy resources and electricity generation are recognized within the district.

Decision Reasons:

- The submitter supports this objective and the recognition of non-renewable energy resources within the district.
- The submitter recommends that this policy is amended to make it explicit that the district also recognises non-renewable electricity generation.

Point Number 924.24

Summary of Decision Requested: Retain Policy 6.3.7- Recognise non-renewable energy resources in the same or similar form.

Decision Reasons:

- The submitter supports this policy and recommends it is retained in the same or similar form.

Point Number 924.25

Summary of Decision Requested: Retain rules in Section 14.2- Rules applying to all Infrastructure in the same or similar form.

Decision Reasons:

- The submitter is generally supportive of the proposed rule framework in section 14.2 of the Proposed District Plan.

Point Number 924.26

Summary of Decision Requested: Retain rules in Section 14.3- General Infrastructure in the same or similar form.

Decision Reasons:

- The submitter is generally supportive of the proposed rule framework in section 14.3 of the Proposed District Plan.

Point Number 924.27

Summary of Decision Requested: Retain Rule 14.6.1-Permitted Activities except for the amendments outlined below
AND
Add a new permitted activity to Rule 14.6.1- Permitted Activities as follows:
Activity
P5 Electricity generation within the Huntly Power Station Heavy Industrial Zone.
Activity-Specific Conditions
14.6.1.[X]
Electricity generation within the Huntly Power Station Heavy Industrial Zone that complies with the Huntly Power Station Heavy Industrial rules.
AND
Add a new activity to Rule 14.6.2- Restricted Discretionary Activities as follows:
Activity
RD4 Electricity generation within the Huntly Power Station Heavy Industrial Zone that do not comply with one or more conditions of the Rule 14.6.1.[X].
Activity-Specific Conditions
Discretion is restricted to the extent of effects associated with the Huntly Power Station Heavy Industrial Zone rules that the activity does not comply with.

Decision Reasons:

- Electricity generation is the primary activity undertaken within the Huntly Power Station Heavy Industrial Zone.
- The submitter considers it to be unclear whether "electricity generation" is an industrial activity provided for within the zone or whether the electricity generation provisions in section 14.6 apply.

Point Number 924.28

Summary of Decision Requested: Retain Activity specific condition 14.12.1.4 P4 (1)(f)- relating to- Traffic Generation as notified.

Decision Reasons:

- The submitter supports retaining the specific permitted activity conditions for traffic generation from Huntly Power Station.

Point Number 924.29

Summary of Decision Requested: Retain Rule 21.2.3.2 P1- Noise-Permitted Activities- Huntly Power Station as notified.

Decision Reasons:

- The submitter supports the permitted activity for noise generated by emergency generators and emergency sirens.

Point Number 924.30

Summary of Decision Requested:**Amend** Rule 21.2.3.2 P2- Noise-Permitted Activities- Huntly Power Station as follows*(a) Noise measured at the notional boundary of any dwelling house existing as at 25 September 2004 within any site in the Rural Zone does not exceed:**(i) 55 dB (LAeq), 7am to 10pm**(ii) 45 dB (LAeq) and 75 dB (LAmax), 10pm to 7am the following day.***Decision Reasons:**

- The submitter is supportive of including specific noise rules for Huntly Power Station.
- The wording of Permitted Activity Rule 2 and Rule 3 differs from the Operative District Plan in that it refers to noise measured within any site in the Residential Zone or at the notional boundary within any site in the Rural Zone. This means that if sites change within either zone, the noise standard that the Huntly Power Station is expected to meet will change, particularly within the Rural Zone.
- Development outside of the Huntly Power Station site could compromise operation of the Station as it is difficult to alter the current operating noise environment around the Station.
- The submitter therefore recommends that the present rule framework providing for the existing noise emissions remains in place and protects the significant infrastructure from potential noise and reverse sensitivity effects.
- The submitter does not consider the Section 32 Report provides adequate justification as to why these changes to the permitted activity rules have been made.

Point Number

924.31

Summary of Decision Requested:**Amend** Rule 21.2.3.2 P3- Noise-Permitted Activities- Huntly Power Station as follows:*(a) Noise measured within any site in the Residential Zone must meet the permitted noise levels for that zone; at the site boundary of any dwelling house existing as at 25 September 2004 in any other zone does not exceed:**(i) 50dBA (L10), 7am to 7pm, Monday to Saturday, and**(ii) 45dBA (L10), 7pm to 10pm, Monday to Saturday, and**(iii) 40dBA (L10), and 65dBA (Lmax) all other times and public holidays.***Decision Reasons:**

- The submitter is supportive of including specific noise rules for Huntly Power Station.
- The wording of Permitted Activity Rule 2 and Rule 3 differs from the Operative District Plan in that it refers to noise measured within any site in the Residential Zone or at the notional boundary within any site in the Rural Zone. This means that if sites change within either zone, the noise standard that the Huntly Power Station is expected to meet will change, particularly within the Rural Zone.
- Development outside of the Huntly Power Station site could compromise operation of the Station as it is difficult to alter the current operating noise environment around the Station.
- The submitter therefore recommends that the present rule framework providing for the existing noise emissions remains in place and protects the significant infrastructure from potential noise and reverse sensitivity effects.
- The submitter does not consider the Section 32 Report provides adequate justification as to why these changes to the permitted activity rules have been made.

Point Number

924.32

Summary of Decision Requested:**Amend** Rule 21.2.6- Hazardous Substances as follows:*Hazardous substance use, storage or disposal at any site within a Heavy Industrial zone shall be managed in accordance with the Safety at Work (Hazardous Substances) Regulations and that any activity that does not comply with the Safety at Work (Hazardous Substances) Regulation is a discretionary activity.*

OR

Amend Rule 21.2.6 P1- Hazardous substances as follows:*(a) The use, storage or disposal of any hazardous substance where:**(i) The aggregate quantity of hazardous substance of any hazard classification on a site is less than the quantity specified for the Heavy Industrial Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances); or**(ii) The activity is located in the Heavy Industrial Zone at Huntly Power Station and is located at least 20m distance from the zone boundary, except in relation to existing water intake and outfall structures (where no setback applies).***Decision Reasons:**

- A range of hazardous substances are stored and used at Huntly Power Station, in compliance with the relevant Health and Safety at Work (Hazardous Substances) Regulations and the Health and Safety at Work Act (HSAW Act).
- The submitter notes that the proposed hazardous substance rules represent a duplication of the requirements under these regulations and HSAW Act and would prefer that all control of such substances at Huntly Power Station site is exercised under the Regulations and HSAW Act, designed specifically for and is fit for that purpose.
- Alternatively, the submitter seeks site specific provisions relating to the Huntly Power Station site to provide for such matters as operation of the gas reception area and operation of the water intake structures on the banks of the Waikato River.

Point Number

924.33

Summary of Decision Requested:**Retain** Rule 21.2.7.1 P1, P2, P3 and RD1-Signs -General in the same or similar form.**Decision Reasons:**

- The submitter supports the rule framework proposed.

Point Number

924.34

Summary of Decision Requested:**Add** a new clause (a) to Rule 21.2.8 P1- Outdoor storage of goods or materials as follows:*(a) Stackpiles of coal located within existing stackpile areas on the Huntly Power Station site; or*

AND

Amend Rule 21.2.8 P1 (a) Outdoor storage of goods or materials as follows:*(b) ~~(a)~~ Outdoor storage of goods or materials must comply complying with all of the following conditions...***Decision Reasons:**

- Coal stockpiles are maintained at the Huntly Power Station in order to provide an ongoing supply of coal to the generation units, created specifically for the power station's operation and can vary in dimension within the stockpile over time as generation demand varies. With such changes due to coal supplies arriving in bulk, or coal being stockpiled to provide generation resilience during potential power supply shortages
- The stockpiles are managed as a strategic fuel supply source. The submitter seeks the flexibility to operate the coal stockpiles within the site according to demand requirements rather than the specific limits in the Proposed Plan and therefore there should be no bulk limits in relation to these areas.

Point Number 924.35

Summary of Decision Requested: Add a new permitted activity to Rule 21.3.1 PI Height-General as follows:

P2

(a) The construction or alteration of any building or structure at the Huntly Power Station may be up to:

(i) A maximum height of 60m, and

(ii) 35m on 90% of the site.

Decision Reasons:

- The Operative District Plan contains specific rules for the construction or alteration of a building or structure at Huntly Power Station.
- The submitter requests that the Proposed Plan retains the specific provisions for Huntly Power Station from the Operative District Plan to ensure future development is not compromised.

Point Number 924.36

Summary of Decision Requested: Amend Rule 22.2.4 PI Hazardous Substances as follows:

(a) The use, storage or disposal of any hazardous substance where:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Rural Zone in Table 4.5.1 contained within Appendix 4.5 (Hazardous Substances), or

(ii) he activity is located in Specific Area 22.6.1 and is managed in accordance with the Health and Safety at work (Hazardous Substances) Regulations.

Decision Reasons:

- A range of hazardous substances are stored and used at Huntly Power Station, in compliance with the relevant Health and Safety at Work (Hazardous Substances) Regulations and the Health and Safety at Work Act (HSAW Act).
- The submitter notes that the proposed hazardous substance rules represent a duplication of the requirements under these regulations and HSAW Act and would prefer that all control of such substances at Huntly Power Station site is exercised under the Regulations and HSAW Act, designed specifically for and is fit for that purpose.

Point Number 924.37

Summary of Decision Requested: Add a new setback requirement to Rule 22.3.7.2 PI Building Setback- Sensitive Land Use as follows:

(x) 500m from the boundary of the Huntly Power Station.

Decision Reasons:

- Land surrounding Huntly Power Station is zoned Rural.
- Huntly Power Station is not listed in P1 and The submitter considers it appropriate for the power station to also be listed.

Point Number 924.38

Summary of Decision Requested: Amend Section 22.6 Specific Area-Huntly Power Station-Coal and Ash Water to create a stand alone set of rules for the Huntly Power Station as set out in the submission.

Decision Reasons:

- The submitter supports the intent of the Waikato District Council in addressing concerns raised in the previous feedback provided by the submitter in relation to coal and ash management.
- However, the rules proposed in the Rural Zone chapter are unnecessarily complex and involve a significant degree of cross referencing.
- The submitter considers that given the specificity of the ash management practices to the Huntly Power Station (in that few other activities in the district would require rules of this nature) a standalone rule, specific to the Huntly Power Station activities should be created that does not rely on cross referencing.
- The ash ponds are not the final location for disposal of the ash. It is an ash management facility where by the suspended solids (i.e. ash) are separated from the ash water.
- The ash water is returned to the Huntly Power Station and discharged via the cooling water outfall. The solid ash is reclaimed from the ponds, stockpiled (for drying) and then transported to an appropriate offsite disposal facility. The submitter considers that all of these activities should be covered by way of a specific permitted activity rule. Therefore, the specific area should be renamed "Huntly Power Station: Coal and Ash Management Specific Area."

Point Number 924.39

Summary of Decision Requested: Retain Appendix I 6.1 Conditions for Permitted Activities in the same or similar form.

AND

Retain Appendix I Table 14: Internal Sound Level in the same or similar form.

Decision Reasons:

- The submitter supports the specific requirements for buildings containing noise-sensitive activities within 350m of the Huntly Power Station site boundary requiring specific internal sound levels.

Point Number 924.40

Summary of Decision Requested: No specific decision sought, but submission is neutral in terms of Rule 21.2.5.2-Earthworks- Significant Natural Areas as this rule has implications for the requested deletion of the Significant Natural Areas on the Huntly Power Station and Scott Farm.

Decision Reasons:

- Part of the Huntly Power Station that is zoned Heavy Industrial has been identified as a SNA. This identification is inappropriate for such a site.

Point Number 924.41

Summary of Decision Requested: **Retain** the objectives, policies, rules, planning maps/overlays and section 32 to enable the continued operation of the Huntly Power Station and associated ancillary activities, except where otherwise sought in the submission points.

Decision Reasons:

- Given the national importance of the Huntly Power Station, the submitter has significant interest in ensuring that the current and future operation of Huntly Power Station is not compromised.

Point Number 924.42

Summary of Decision Requested: **Amend** the Section 32 Report for Infrastructure regarding the Huntly Power Station's transition to being completely gas fired as set out in the submission

Decision Reasons:

- The information about the Rankine Units is not correct.

Point Number 924.43

Summary of Decision Requested: **Add** clause (iv) to Policy 4.1.13 (a)- Huntly as follows:

(iv) Reverse sensitivity effects on regionally significant industry and infrastructure are avoided or minimised.

Decision Reasons:

- It is important to protect existing and new regionally significant infrastructure and/or industry from reverse sensitivity issues as a direction of the Regional Policy Statement, which the District Plan must give effect to.
- The submitter considers it important to explicitly state in the Plan that Huntly is developed in such a manner that recognizes, provides for and protects the Huntly Power Station and ancillary activities.

Point Number 924.44

Summary of Decision Requested: **Retain** Policy 4.6.2- Provide Industrial Zones with different functions except for the amendments sought below
AND

Add a new clause (iii) to Policy 4.6.2-Provide Industrial Zones with different functions as follows:

(iii) Recognise and provide for the Huntly Power Station as a regionally significant industry.

Decision Reasons:

- The submitter supports the inclusion of Industrial and Heavy Industrial Zones in the Waikato District Plan and their appropriate application to activities such as regionally significant industries.
- The submitter considers that Huntly Power Station should be recognized as a regionally significant industry in this policy context.

Point Number 924.45

Summary of Decision Requested: **Add** clause (viii) to Policy 4.7.2- Subdivision location and design by including the following as follows:

(viii) Avoids reverse sensitivity effects on existing and proposed regionally significant industry and regionally significant infrastructure.

Decision Reasons:

- The submitter considers that subdivision activities in the urban environment must be located and designed to ensure reverse sensitivity effects on regionally significant industry and infrastructure are avoided.

Point Number 924.46

Summary of Decision Requested: **Amend** Policy 4.7.11- Reverse Sensitivity as follows:

(b) Avoid potential reverse sensitivity effects of locating new dwellings sensitive activities in the vicinity of an intensive farming, extraction industry or industrial activity.

AND

Add clause (c) to Policy 4.7.11- Reverse Sensitivity as follows:

(c) Avoid potential reverse sensitivity effects of locating new sensitive activities in the vicinity of Regionally Significant Industry or Regionally Significant Infrastructure.

Decision Reasons:

- The submitter supports Policy 4.7.11 Reverse Sensitivity but considers it be amended to explicitly refer to existing and proposed regionally significant industry and regionally significant infrastructure in the same way it refers to intensive farming, extraction industry and industrial activity and to replace "dwellings" with "sensitive activities."

Point Number 924.47

Summary of Decision Requested: **Add** clause (c) to Policy 5.3.3- Industrial and Commercial Activities as follows:

(c) Provide for the existing coal and ash transport and management facilities associated with the Huntly Power Station.

Decision Reasons:

- The submitter considers that the matters listed should be extended to include the coal transport and ash management activities associated with the Huntly Power Station.

Submitter Number:	925	Submitter:	Karen Hoki Parker
Point Number	925.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> As Ngaati Koata with strong links to Whaingaroa, the submitter sees the removal of barriers to sustainable development of their lands as supporting Iwi aspirations to grow prosperous, healthy, vibrant, innovative and culturally strong people. 		
Submitter Number:	926	Submitter:	Jevan Kaka
Point Number	926.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> As Ngaati Koata with strong links to Whaingaroa, the submitter appreciates the amendments to the Waikato District Proposed Plan in that it supports the social, cultural and economic aspirations of mana whenua on the Whaanga Coast. Through the development of sustainable practices they will be able to reinvigorate their connections to their lands in Whaingaroa, with local Iwi and the wider community. 		
Submitter Number:	927	Submitter:	Alesha Ramari Kaka (Parker)
Point Number	927.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> As Ngaati Koata with strong links to Whaingaroa, the submitter appreciates the amendments to the Waikato Districts Proposal Plan in that they support the social, cultural, and economic aspirations of mana whenua on the Whaanga Coast. Through development of sustainable practices on their lands in Whaingaroa they will be able to reinvigorate their connections with the area, with local Iwi and the wider community 		
Submitter Number:	928	Submitter:	Ben Knapp
Point Number	928.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> As Ngaati Koata land block owners in Whaingaroa, the submitter feels that barriers expressed in the current district plan prevent Tangata whenua from maintaining their relationship with their ancestral lands. They appreciate that the laws and policies in the Proposed District Plan supports more effectively the occupation and development of maori land, allowing mana whenua to utilise, manage and enjoy their traditional resources in accordance with tikanga Maaori. The submitter feels it will strengthen their connections to the area once again for generations to come. 		
Submitter Number:	929	Submitter:	Chantelle White
Point Number	929.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter feels that the policies and rules as outlined in the chapter addresses the barriers that have prevented owners from engaging and utilizing the land for social, cultural and economic well-being. As Ngaati Koata she is excited about the prospect of being able to develop a master plan for our land blocks in Whaingaroa that supports the kind of sustainable development that will encourage more frequent visits of our Iwi to the area. The submitter adds that maybe Council's proposed plan may be the star of Whaingaroa becoming once again a turangawaewae stronghold for Ngaati Koata. 		
Point Number	929.2		
Summary of Decision Requested:	Retain Rules as notified in the proposed plan to support Maaori land development.		
Decision Reasons:	<ul style="list-style-type: none"> Reasons of support based on submitter's comments on previous point. (921.1). 		
Submitter Number:	930	Submitter:	Natasha Osborne

Point Number	930.1
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.
Decision Reasons:	<ul style="list-style-type: none"> As Ngati Koata, the submitter has strong links to Whaingaroa and sees the removal of barriers to sustainable development of their lands as supporting Iwi aspirations to grow a prosperous, healthy, vibrant, innovative and culturally strong people.

Submitter Number:	931	Submitter:	Graham Kendall
Point Number	931.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua as notified.		
Decision Reasons:	<ul style="list-style-type: none"> While the District Council have expressed an obligation to upholding the Rangatiratanga principle inherent in Te Tiriti o Waitangi in respect to Tangata whenua the existing District Council plan created barriers to the actualisation of Iwi controlling their resources as their own. The Proposed District Council plan goes a long way in significantly reducing those barriers, thus allowing Ngaati Koata to develop their land blocks in sustainable ways in accordance with their own values. 		

Submitter Number:	932	Submitter:	Ashton Frew
Point Number	932.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> Ngati Koata has close owner ties to Whaingaroa As owners of land blocks in the area, the current restrictions make it difficult to develop their land in sustainable ways. The proposed changes to the plan will provide Tangata whenua with the ability to utilise communally owned land in accordance with cultural values and to create economic development that will allow whanau to visit their lands more frequently. 		

Submitter Number:	933	Submitter:	Megan Tuoro
Point Number	933.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> As Ngati Koata, the submitter appreciates the amendments made to the Waikato District Proposed Plan in that it supports the social, cultural and economic aspirations of mana whenua on the Whaanga Coast. Through the development of sustainable practices on their lands in Whaingaroa they will be able to reinvigorate their connections with the area, with local Iwi and the wider community. 		

Submitter Number:	935	Submitter:	Baylee Modlik
Point Number	935.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> As Ngati Koata, the submitter appreciates the amendments made to the Waikato District Proposed Plan in that they support the social, cultural, and economic aspirations of mana whenua on the Whaanga Coast. Through the development of sustainable practices of their lands in Whaingaroa, they will be able to reinvigorate their connections with the area, with local Iwi and the wider community. 		

Submitter Number:	936	Submitter:	Kimberley Modlik
Point Number	936.1		
Summary of Decision Requested:	Retain Section B Chapter 2 - Tangata Whenua.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter is a Ngaati Koata owner in land blocks in Whaingaroa who feels the current District Plan provisions presented barriers which prevented them from having a relationship with their ancestral lands. The submitter appreciates the Proposed District Plan which supports more effectively the occupation and development of Maori land. This will allow them to utilise, manage and enjoy their traditional resources in accordance with Tikanga Maaori and strengthen their connection with the area. 		

Submitter Number:	937	Submitter:	Arnesen Paul
--------------------------	-----	-------------------	--------------

On behalf of: Planning Focus Limited

Point Number: 937.1

Summary of Decision Requested: Amend the zoning of the following sites from Residential Zone to Industrial Zone: 472 Great South Road, Huntly, 474 Great South Road, Huntly, 476 Great South Road, Huntly, 478 Great South Road, Huntly, 486 Great South Road, Huntly, 492 Great South Road, Huntly, 2B Jackson Road Huntly, 4 Jackson Road, Huntly and 6 Jackson Road, Huntly (see map attached to submission).

Decision Reasons:

- There is limited space for expansion of industrial activities within Huntly
- The proposed Industrial Zoning would better provide for the social and economic needs of the community, through increasing the supply of land for employment purposes.
- Land to the south and east is similarly zoned Industrial making the sites suitable for an expansion to the existing Industrial Zone.

Submitter Number: 938

Submitter: Neil and Linda Porritt

Point Number: 938.1

Summary of Decision Requested: Amend Rule 22.4.1.7 Subdivision, to create a reserve, as follows:

RD1

(a) Subdivision to create a reserve must comply with all of the following conditions:

(i) The lot being subdivided must contain an area that is identified in a Waikato District Council Parks Strategy as being required for permanent public access or for reserve purposes;

(ii) The area identified in the Parks Strategy as being required for permanent public access or for reserve purposes is to be vested in Council or public access is permanently secured by way of easement;

(iii) No more than one additional lot is created from each lot being subdivided, excluding any land vested in Council.

(iv) The proposed additional lot, excluding the reserve, has a minimum size of 8,000,000m².

(b) Council's discretion is restricted to the following matters:

(i) Size and location of area for which public access or reserve is secured;

(ii) Method of securing public access;

(iii) Management of any land remaining in private ownership over which access rights are granted;

(iv) Location of additional lot.

D1

A reserve lot subdivision that does not comply with Rule 22.4.1.7 RD1, conditions (a)(ii)-(iv).

NC1

A reserve lot subdivision that does not comply with Rule 22.4.1.7 RD1 conditions (a)(i).

Decision Reasons:

- The Reserve Lot Subdivision provisions should apply to all areas that are identified in any Waikato District Council strategy documents as being required for permanent public access or reserve purposes, not just areas identified in the Parks Strategy; ((a)(i)).
- The Reserve Lot Subdivision provisions should apply where land access is to be secured by way of an easement not only where it is to be vested in Council; ((a)(ii)).
- It should be clear that one additional Lot being subdivided ((a)(iii)).
- The minimum lot size for consideration as a RD activity should be 5000m², not 8000m²; ((a)(iv)).
- Reserve Lot Subdivision not complying with conditions (a)(ii)-(iv) should be considered as a discretionary activity, not as a non-complying activity.

Point Number: 938.2

Summary of Decision Requested: Amend Rule 22.4.1.5 Rural Hamlet Subdivision, as follows:

RD1

(a) Subdivision to create a Rural Hamlet must comply with all of the following conditions:

(i) It results in 3 to ~~5~~ proposed lots being clustered together;

(ii) All existing Records of Title form one continuous landholding;

(iii) Each proposed lot has a minimum area of 8,000,000m²;

(iv) Each proposed lot has a maximum area of 1.6ha;

(v) The proposed balance lot has a minimum area of 20ha; and

(vi) It does not create any additional lots beyond the number of existing Records of Title.

(b) Council's discretion is restricted to the following matters:

(i) subdivision layout and design including dimension, shape and orientation of the proposed lots;

(ii) effects on rural character and amenity values;

(iii) effects on landscape values;

(iv) potential for reverse sensitivity effects;

(v) extent of earthworks including earthworks for the location of building platforms and access ways.

D1

Rural Hamlet Subdivision that does not comply with Rule 22.4.1.5 RD1, conditions (a)(ii)-(iv).

NC1

Rural Hamlet Subdivision that does not comply with Rule 22.4.1.5 RD1, condition (a)(i).

Decision Reasons:

- Proposed Rule 22.4.1.5 will serve the relevant objectives and policies of the plan better if the conditions for Restricted Discretionary subdivision are more versatile in terms of the maximum number of clustered lots and the minimum lot size. (conditions (a)(i) and (iii)).
- The Rule will operate more effectively if a subdivision that does not comply with conditions RD1 (a)(ii)-(vi) is considered as a Discretionary activity.

Submitter Number: 939

Submitter: David Totman

On behalf of: Waipa District Council

Point Number: 939.1

Summary of Decision Requested: No specific decision sought, but submission supports the Proposed Waikato District Plan at an overall level.

Decision Reasons:

- The Proposed Waikato District Plan combines the existing separate Franklin and Waikato sections of the Waikato District Plan into a single document with a consistent approach to development and growth across the district.

Point Number 939.2

Summary of Decision Requested: **Retain** the strategic directions and objectives as set out in Section 1.12- Strategic directions and objectives for the district.

Decision Reasons:

- Waipa Council is supportive of the Proposed Waikato District Plan's strategic directions and objectives as a Future Proof partner.

Point Number 939.3

Summary of Decision Requested: **Amend** the planning maps to show the matching noise contour around the Mystery Creek Event Centre that matches that of the Waipa District Plan (See map provided in the submission).

Decision Reasons:

- The Operative Waipa District Planning Maps have a noise contour around Mystery Creek Event Centre. This contour ends abruptly at the Waikato River and is not matched in the Proposed Waikato District Plan Maps on the north side of the Waikato River and adjacent to the Mystery Creek Event Centre.

Point Number 939.4

Summary of Decision Requested: **Add** provisions to Rule 22.2.1.1 Noise - General for the Mystery Creek Event centre, to mirror that contained in the Operative Waipa District Plan Rule 9.4.2.16(c).

Decision Reasons:

- The Noise Rule should mirror the Noise Rule provided in the Waipa Operative District Plan for the Mystery Creek Events Centre on activity days under Rule 9.4.2.16 which states that noise levels "between 12.30am and 7.30am, noise levels must not exceed LAeq 45dB within the notional boundary of any dwelling within the Waipa District territorial boundary, and LAeq 40dB within the notional boundary of any dwelling within the Waikato District territorial boundary".

Point Number 939.5

Summary of Decision Requested: **Add** provisions to Rule 23.2.1.1 Noise - General for the Mystery Creek Event Centre, to mirror that contained in the Operative Waipa District Plan Rule 9.4.2.16 (c).

Decision Reasons:

- The Noise Rule should mirror the Noise Rule provided in the Waipa Operative District Plan for the Mystery Creek Events Centre on activity days under Rule 9.4.2.16 which states that noise levels "between 12.30am and 7.30am, noise levels must not exceed LAeq 45dB within the notional boundary of any dwelling within the Waipa District territorial boundary, and LAeq 40dB within the notional boundary of any dwelling within the Waikato District territorial boundary".

Point Number 939.6

Summary of Decision Requested: **Retain** Chapter 2 Tangata Whenua, as notified.

Decision Reasons:

- Supports the inclusion of the chapter.

Point Number 939.7

Summary of Decision Requested: **Retain** the proposed approach for addressing development on Maaori land through the preparation of a Concept Management Plan;
AND
Provide further information as to how the Concept Management Plans will be implemented as part of a Resource Management Act process.

Decision Reasons:

- In support of Waikato-Tainui, the Waipa District Council would like further information as to the implementation of these plans.

Submitter Number: 940 **Submitter:** Dennis Ngataki

On behalf of: Turangawaewae Board of Trustees

Point Number 940.1

Summary of Decision Requested: No specific decision sought, but submitter would like to provide a cultural value based position on the Proposed Waikato District Plan. The cultural value based principles are included in their submission and include:

- Tangata Whenua values
- Wai - Mauri
- Whenua - Mauri

Full details on each of these values can be found in the submission.

Decision Reasons:

- No reasons provided.

Point Number 940.2

Summary of Decision Requested: No specific decision sought, but the submitter supports parts of the direction that the Waikato District Council has taken regarding the Proposed District Plan, particularly certain aspects of the Proposed Plan and how it will provide for current and future interests.

Decision Reasons:

- No reason provided.

Point Number 940.3

Summary of Decision Requested: No specific decision sought, but the submitter identifies a main interest around Chapter 2 Tangata Whenua which addresses Tangata Whenua concerns, issues and opportunities.

Decision Reasons:

- No reason provided.

Point Number 940.4

Summary of Decision Requested: No specific decision sought, but the submitter notes that Chapter 2 Tangata Whenua discusses a range of statutory requirements specific to the Treaty of Waitangi, the Waikato River Settlement Act 2010 and the Resource Management Act.

Decision Reasons:

- No reason provided.

Submitter Number: 941 **Submitter:** Graham McBride

On behalf of: Te Kowhai Community Group

Point Number 941.1

Summary of Decision Requested: Retain the Walkway, Cycleway and Bridleway on the planning maps, located on the true right of the Te Otamanui Lagoon, Te Kowhai, as notified.

Decision Reasons:

- This route is an essential link in the vision of creating a public walkway from Te Kowhai village, along the Te Otamanui Stream (completed), the Te Otamanui Lagoon (half completed) to the proposed 'Waipa' river-bank trail to Waingarua Road.

Point Number 941.2

Summary of Decision Requested: No specific decision sought, but submitter raises concerns about the extension of the Te Kowhai Airport Obstacle Limitation Surface and the need "to give effect to the principles of the Resource Management Act with the Proposed District Plan (avoid, remedy, mitigate)."

Decision Reasons:

- The Te Kowhai Community Group has a number of concerns with the proposed extension to the Obstacle Limitation Surface:
 - Lack of consultation by Waikato District Council within the wider district prior to notification.
 - Lack of clarity about future activities at the airpark.
 - No proposed limitations concerning noise abatement, hours of flying, night flying, duration and frequency of flights and scope and scale of future activities.
 - Lack of enforcement capability within the Obstacle Limitation Surface rules.
 - Lack of clarity about the safety of residential properties under the flight path footprint.

Submitter Number: 942 **Submitter:** Angeline Greensill

Organisation: Tainui

Point Number 942.1

Summary of Decision Requested: No specific decision sought for Section 1.7.3.3 Consultation, but the submitter expects Tainui to be contacted directly on resource management matters within their tribal rohe.

Decision Reasons:

- The submitter has been involved in environmental management of the Whaingaroa rohe since prior to the enactment of the Resource Management Act and have been listed on the Te Kahui Mangai site under section 35 of the Resource Management Act.
- The Council is commended for initiating the establishment of an Iwi Reference Group, as part of its consultation process.
- While it is useful to discuss matters of relevant to iwi and hapu through the forum, the submitter still expects to be contacted directly on resource management matters within their own tribal rohe.

Point Number 942.2

Summary of Decision Requested: Provide resources, such as a planner or funds to employ one to complete an Iwi engagement plan as outlined in section 1.7.3.4 Iwi Management Plans.

Decision Reasons:

- The submitter intends to complete an Iwi environmental plan prior to publication of Stage 2 of the Proposed District Plan.

Point Number 942.3

Summary of Decision Requested: Add a new chapter that addresses Genetically Modified Organisms.

Decision Reasons:

- The District Plan concentrates mostly on the effects on human health or amenity, therefore there is a need to be vigilant where new technologies are being trialed and have the potential to impact on communities.
- These should stay in containment as the risks and unexpected consequences are too great to control.

Point Number	942.4
Summary of Decision Requested:	<p>Add the following activities as permitted activities on Maori Freehold Land on Riria Kereopa Drive:</p> <ul style="list-style-type: none"> • Facilities for surface water activities; • Recreation; • Kohanga reo; • Education facilities; • Public toilets; • Camp site, grocery or boating store and marae; • Restaurant; • Conference facilities; • Traveller's accommodation. <p>AND</p> <p>Amend Section 1.12.1 Strategic Direction to recognise the Tihei Mauriora Plan.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter has requested provisions to facilitate and bring to fruition the vision contained in the Tihei Mauriora Plan. • This Tihei Mauriora Plan was presented and taken in to account in two previous District Plans. • The submitter seeks an exception from the Maori Freehold Rules to have this plan accepted in its entirety as there are several stages to complete, before long term benefits to whanau and the local community of employment and self-sufficient economic growth can be realised.
Point Number	942.5
Summary of Decision Requested:	No specific decision is sought for Section 2.2 Background, but the submitter seeks recognition of whanau and hapu who have the ultimate responsibility for ensuring the mauri and taonga inherited from tupuna are not negatively affected through resource consents and activities.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the attempt to recognise the encumbrances placed on tangata whenua in terms of land use and development in both Te Ture Whenua Maori Act and the Resource Management Act. • The submitter also understands the need to recognise statutory obligations and take into account iwi management plans. • While Waikato Tainui is currently recognised through a raupatu land settlement as being iwi authority, it is likely during the term of this planning process that the resolution of the West Coast treaty claims will see other iwi given the recognition they deserve.
Point Number	942.6
Summary of Decision Requested:	Amend Section 2.2(a) Background to recognise all whanau, hapu and iwi within the district. eg. Tainui, Nga Uri o Mahanga/Hourua, Ngati Whakamarurangi and Ngati Tamainupo/Nga Tokotoru.
Decision Reasons:	<ul style="list-style-type: none"> • Waikato Tainui are a corporate organisation established in 1995 to receive and manage the raupatu land settlement. • The district is home to a diverse range of people including Whanau, hapu and iwi of many rohe and they are the tangata whenua who have interests in and around the district and Whaingaroa harbour area. • They practice kaitiakitanga and are obliged to make decisions regarding activities that impact upon our people, environment and future.
Point Number	942.7
Summary of Decision Requested:	<p>Amend Section 2.2(b) Background, as follows:</p> <p><i>The Waikato River is the tuupuna (ancestor) of Waikato-Tainui from which Tainui derive their name. Tainui relates to the sea, waka and the people who descend from the original people of an area that includes Waikato. Tainui also refers to a confederation of the 12 hapu of Whaingaroa, The Kingitanga movement ...</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	942.8
Summary of Decision Requested:	Amend Section 2.4 Principles of the Treaty of Waitangi (Te Tiriti o Waitangi) to include principles of partnership, reciprocity, mutual benefit, to make informed decisions and active protection.
Decision Reasons:	<ul style="list-style-type: none"> • Principles supported by case law and Waitangi Tribunal decisions should be included.
Point Number	942.9
Summary of Decision Requested:	Amend Objective 2.15 Waikatotanga (way of life) to clarify.
Decision Reasons:	<ul style="list-style-type: none"> • There are hapu and iwi who do not identify or practice Waikatotanga within the Waikato District.
Point Number	942.10
Summary of Decision Requested:	Retain Policy 2.16.1 Whaanga Coast Special Area.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports this policy.
Point Number	942.11
Summary of Decision Requested:	Retain Policy 2.16.2 Aahuatanga Motuhake (special features).
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the policy.

Point Number	942.12
Summary of Decision Requested:	Amend Policy 3.3.2(a)(i) Recognising values and qualities to recognise and "protect" the attributes of ridgelines.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	942.13
Summary of Decision Requested:	Retain the objectives and policies in Chapter 3 Natural Environment that protect an enhance the natural environment.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the objectives and policies.
Point Number	942.14
Summary of Decision Requested:	Amend Objective 4.1.1(b) Strategic to identify the towns and their predicted housing development to cater for growth based on evidence.
Decision Reasons:	<ul style="list-style-type: none"> 13,330 to 17,500 dwellings will be built over the next 27 years around existing towns and villages where infrastructure and services can be efficiently and economically provided. There is no indication as to where this growth will occur, or in fact whether this is supported by evidence.
Point Number	942.15
Summary of Decision Requested:	Amend Policy 4.1.5 Density to provide for retirement villages on marae and within papakainga on Maori Freehold Land.
Decision Reasons:	<ul style="list-style-type: none"> Kaumatuas have special cultural needs and are sometimes not eligible for assistance or able to actively continue to carry out their roles. The Proposed District Plan encourages retirement villages to be located near commercial centres, community facilities, public transport and open space.
Point Number	942.16
Summary of Decision Requested:	Amend the Proposed District Plan, including Policy 4.1.6 Commercial and Industrial activities to permit the following activities at Te Kopua 3 and 4, Riria Kereopa Memorial Drive: <ul style="list-style-type: none"> Facilities for surface water activities Recreation Kohanga reo Education facilities Public toilets Camp site, grocery or boating store and marea Restaurant Conference facilities Travellers accommodation
Decision Reasons:	<ul style="list-style-type: none"> The submitter has a plan focused on creating an economic base for its iwi. This request has already been accepted on two previous occasions. The submitter requests an exception to the rule to allow planned development to take place.
Point Number	942.17
Summary of Decision Requested:	Add a character statement of Raglan to the Proposed District Plan and ensure that the small seaside town is not compromised by future multi-storey development.
Decision Reasons:	<ul style="list-style-type: none"> The submitter does not want Raglan to lose its unique identity. Since post -2nd world war, towns like Raglan have changed dramatically with the closure of centralised government agencies like the Post Office, Banks, Dance Halls, Picture theatres, hotels and small specialist stores and are being replaced with supermarkets, boutiques, cafes, petrol stations, boutique tourist accommodation, IT and outdoor pursuits, signage and hire companies. In 2018 small towns are beginning to look alike and are losing their unique character which made them attractive to those who came, saw economic opportunities to exploit the natural resources and thus began changing the place.
Point Number	942.18
Summary of Decision Requested:	Provide plans showing potential infill areas and statistics to justify redevelopment or infilling is necessary in the context of Policy 4.1.18(a)(i) Raglan.
Decision Reasons:	<ul style="list-style-type: none"> The submitter opposes infill and redevelopment until such areas are identified on planning maps. Development such as apartment dwellings in wrong locations may impact on wildlife, character of place, cultural and natural environment.
Point Number	942.19
Summary of Decision Requested:	Retain Policy 4.1.18(iv) Raglan
Decision Reasons:	<ul style="list-style-type: none"> The submitter acknowledges that connections are already happening. The three bridges connecting Nihinihi, Papahua and Te Kopua at Raglan West with the township and is a popular walk with locals and visitors.

Point Number 942.20

Summary of Decision Requested: **Add** a new clause to Policy 4.1.18 Raglan as follows:
(v) Roads, parks, pedestrian and cycle networks are developed as part of subdivision development contributions.

Decision Reasons:

- Although Raglan is a town that has the Karioi classic event, a mountain bike park and a high percentage of electric bike users, there is no reference in the Raglan section to cycling or walking.

Point Number 942.21

Summary of Decision Requested: **Amend** Objective 4.2.16 Housing options to ensure the character of Raglan is not compromised.

Decision Reasons:

- While policies 4.2.17 and 4.2.18 enable a variety of housing types, there is a need to ensure that the character of Raglan is not compromised.

Point Number 942.22

Summary of Decision Requested: **Retain** Policy 4.1.9 Maintaining Landscape Characteristics.

Decision Reasons:

- No reason provided.

Point Number 942.23

Summary of Decision Requested: **Retain** Policy 4.5.14 Raglan Town Centre
AND
No specific decision sought, but submission opposes Policy 4.5.14(a)(v)(F) Raglan Town Centre, particularly the change from one storey to two storeys.

Decision Reasons:

- The submitter supports the policy but opposes a changes from one to two storeys which would change the character of Raglan's main street.

Point Number 942.24

Summary of Decision Requested: **Add** a separate chapter to include a separate chapter addressing Genetically Modified Organisms that prohibits the release of Genetically Modified Organisms into the rural environment through field trials, similar to the provisions of neighbouring Councils e.g. Auckland.
AND
Amend the Proposed District Plan to require all applications for Genetically Modified Organism releases to be publicly notified.
AND
Amend the Proposed District Plan to require a bond be imposed to cover clean up should the EPA approve applications for the release of Genetically Modified Organisms in the district.

Decision Reasons:

- The release of genetically modified organisms into the rural landscape has become more imminent.
- No field trials have been permitted in New Zealand, however experiments in containment have been ongoing since the late 1990s.
- With the recent arrival and marketing of CRISPR and other gene editing technologies in the primary sector, it is likely that the next life of the district plan will be required to address genetically modified organisms, potentially putting taonga, primary production and the economy at risk.
- Council is committed to protecting high class soils for primary productive producers.
- There is no option but to ban field trials or release of genetically modified organisms into the environment.
- Tainui and the local community have become informed and more concerned about the risks of genetically modified organisms.

Point Number 942.25

Summary of Decision Requested: **Add** a new clause to Policy 5.6.3 Artificially outdoor lighting as follows:
In remote coastal and rural areas ensure artificial outdoor lighting is directed downward.

Decision Reasons:

- Observation of the stars to predict future trends, or times to undertake particular activities has been practiced for centuries around the world.
- As residential areas grow, night lighting is making it difficult to easily observe the stars.
- Whaingaroa has a number of places where views of the night sky are not compromised and can still be studied, enjoyed and photographed.

Point Number 942.26

Summary of Decision Requested: No specific decision sought, but the submitter supports the objectives and most of the policies within Chapter 6 Infrastructure and Energy.

Decision Reasons:

- No reasons provided.

Point Number 942.27

Summary of Decision Requested: **Amend** Policy 6.1.10(a) Infrastructure in identified areas to clarify what an identified area is.

Decision Reasons:

- The submitter supports the policy but seeks clarification on what an identified area is.

Point Number 942.28

Summary of Decision Requested: **Amend** the planning maps to provide for an overlay map identifying potential sites for transmission corridors, infrastructure, energy and renewable energy activities.

Decision Reasons:

- With over a thousand years of history hidden in layers of the landscape, the submitter has concerns about undergrounding infrastructure in Maori areas of significance.
- To avoid adverse effects on Maori sites of significance.

Point Number 942.29

Summary of Decision Requested: **Add** a rule requiring communities to be notified if cell towers or other transmitters are to be located in their area.

Decision Reasons:

- While infrastructure that generates electromagnetic or radiation frequency fields must comply with the International Commission on Non-ionising Radiation Protection Guidelines, relevant WHO guidelines and the New Zealand Standard Electromagnetic field (EMF), EMF can still pass through the earth, walls and human or animal bodies and therefore can have adverse effects on the health and wellbeing of humans and their environment.

Point Number 942.30

Summary of Decision Requested: **Retain** Policy 6.1.15(a) Raglan navigation beacons.

Decision Reasons:

- The submitter supports the policy.

Point Number 942.31

Summary of Decision Requested: **Retain** Policy 6.1.16 Water conservation.

Decision Reasons:

- The submitter supports this policy.

Point Number 942.32

Summary of Decision Requested: No specific decision sought, but the submitter supports the principles adopted by Waikato District Council concerning proactive planning and management of urban growth and development, cost-effective provision of services and infrastructure, sustainable management of natural character and the principles of Treaty of Waitangi.

Decision Reasons:

- No reasons provided.

Point Number 942.33

Summary of Decision Requested: No specific decision sought, but the submitter supports Council's vision to provide liveable, thriving and connected communities which are sustainable, efficient and co-ordinated and look forward to contributing to that vision and the general thrust of the plan with some amendments to chapters that affect Tainui whanau, hapu and iwi.

Decision Reasons:

- No reasons provided.

Point Number 942.34

Summary of Decision Requested: **Hal**t the Proposed District Plan process and extend the submission date to enable the completion of the Stage 2 chapters in the Proposed District Plan so the proposed District Plan document is complete.

Decision Reasons:

- The Proposed District Plan fails to address current key issues affecting coastal iwi in communities like Raglan, especially Natural Hazards and Climate Change which has a place holder, making it difficult to understand the Proposed District Plan.
- Having to submit on Stage 2 of the Proposed District Plan is a time consuming process for the submitter, however the submitter has no choice but to participate in a process that determines their futures on the submitter's land.
- The Stage 2 matters are important and should have been considered earlier in the planning process.

Point Number 942.35

Summary of Decision Requested: **Add** the following new clauses to Section 1.4.2.3 Challenges:

(x) The retention and development of Maori Freehold land in both urban and rural areas.

(xi) Lack of housing, training and employment opportunities for Maori in west coast communities.

Decision Reasons:

- The submitter agrees that the Waikato district faces huge challenges and has identified some that specifically affect Maori landowners of multiply owned lands which need to be included.

Point Number 942.36

Summary of Decision Requested: **Amend** Section 1.4.3.2(c) Protecting the rural environment to require areas that are likely to be set aside for electricity transmission renewable energy or mining, particularly if located on sites culturally significant to Tangata whenua to be notified.

Decision Reasons:

- No reasons provided.

Point Number 942.37

Summary of Decision Requested: **Amend** section 1.4.4(a) The urban environment, to clarify what the following sentence means:
Commercial activity should be of a size or function that does not compromise the vitality and viability of the primary commercial centres.

Decision Reasons:

- The submitter seeks further clarification.

Point Number 942.38

Summary of Decision Requested: No specific decision sought, but the submitter supports the acknowledgement in Section 1.4.5 Maaori Freehold Land of the burden placed on Maori landowners to satisfy Te Ture Whenua Maori Act and the Resource Management Act 1991 when attempting to utilise their land.

Decision Reasons:

- The submitter supports the plan's acknowledgement of the extra burden placed on Maori landowners to satisfy both Te Ture Whenua Maori Act and the Resource Management Act.

Point Number 942.39

Summary of Decision Requested: **Consider** an alternative transport route in the event that State Highway 23 is inaccessible.

Decision Reasons:

- Dual routes should be considered in case accidents occur on State Highway 23.

Point Number 942.40

Summary of Decision Requested: **Retain** the objectives and policies in Chapter 3 Natural Environment.

Decision Reasons:

- The coastal montane area between Bryant Home and Pauake stream is largely owned by tangata whenua and remained natural until the incursions of the public in the mid 1950s brought a road, subdivisions, walling tracks and development. This destroyed habitats and impacted negatively on the biodiversity within the Karioi Native Reserve.
- The submitter supports the objectives and policies in Chapter 3 drafted to protect and enhance the natural environment outlined.

Point Number 942.41

Summary of Decision Requested: **Provide** Tangata whenua with resourcing to undertake surveys and ensure the survival rate of indigenous biodiversity improves on their lands.

Decision Reasons:

- Indigenous biodiversity is threatened by pest species both plants and animal which have been imported into the area and human activity.
- Submission questions what assistance is available to hapu and iwi to deal with problems they did not create.

Point Number 942.42

Summary of Decision Requested: No specific decision sought, but the submitter comments that the methodology (including section 1.5.7.2 Landscape and Natural Character) used to assess landscape and natural character is eurocentric and ignores cultural context.

Decision Reasons:

- The methodology used to assess landscape and natural character continues to deal with these in a eurocentric manner ignoring the cultural context.

Point Number 942.43

Summary of Decision Requested: No specific decision sought for section 1.5.7.3 Water, but the submitter notes that Raglan's water supply should be locally owned and operated.
AND
No specific decision sought for section 1.5.7.3 Water, but the submitter supports the use of water tanks for all new builds and for winter storage.

Decision Reasons:

- No reasons provided.

Point Number 942.44

Summary of Decision Requested: **Amend** the Proposed District Plan to ban air contaminants from sprays.
OR
Add more stringent rules to ensure spraying is only undertaken when there is no wind and avoids watercourses and children's play areas.

Decision Reasons:

- Air contaminants create health issues for young and old.

Point Number 942.45

Summary of Decision Requested: No specific decision sought, but the submitter opposes the commodification of the coastal space.

AND

Amend the Proposed District Plan to classify economic development of the coast as a discretionary activity and notified.

Decision Reasons:

- The submitter have a MACA claim over the Whaingaroa harbour and rohe moana out to 200km.
- The submitter intends to enjoy the coastal space as a recreational space for whanau and visitors.
- Economic development brings threats which need to be planned for and notified as discretionary activities.

Point Number

942.46

Summary of Decision Requested:

Amend Section 1.6(c) Ngaa Iwi o Tainui ki te Waikato Takiwa to recognise that Tainui Hapu Environmental Management Committee is a mandated organisation under the Resource Management Act for the Tainui Iwi of Whaingaroa.

Decision Reasons:

- Section 35A of the Resource Management Act provides for groups that represent hapu for the purposes of the Resource Management Act to request that the Crown includes the required information for that hapu in the record which can be accessed by relevant local authorities.
- While it is acknowledged that Te Whakakitenga o Waikato Incorporated Society (Waikato Tainui) are recognised for Raupatu matters, the submitter does not agree they should be authoritative representative of their 12 hapu for Resource Management issues.
- All matters regarding decision-making about resource management within the Tainui rohe remain with Tainui.

Point Number

942.47

Summary of Decision Requested:

Amend Section 1.6.2 Te Tiriti o Waitangi by moving it earlier in Chapter 1 to be in Section 1.1.

Decision Reasons:

- This is one of the Nation's founding documents and should be placed in the beginning of the Proposed District Plan.

Point Number

942.48

Summary of Decision Requested:

Add the following values to Section 1.6.4 Values of Importance:

- Whakapapa - binds all past and present;
- Rangaitatanga - sovereignty or power;
- Taimutanga - tribal uniqueness, identity;
- Tauutu - Reciprocity, acts of always giving back or replacing what you take or receive;
- Turangawaewae - a place to stand; and
- Mauri - life essence.

Decision Reasons:

- If Maori values are going to be included than there are some that are specifically relevant to Te Taiao which could be incorporated.

Point Number

942.49

Summary of Decision Requested:

Add the following rivers, which are important to the West Coast, to Section 1.7.2 Rivers - Vision and Strategy:

- Wainui;
- Omahina;
- Oporu;
- Waitetuna;
- Kaawa;
- Tauterei; and
- Whaingaroa.

Decision Reasons:

- There is no vision, strategy or acknowledgement of rivers along the West Coast outside of the Waikato River catchment area covered by the Settlement Act.
- All rivers are important and more need to be acknowledged in the Proposed District Plan.

Point Number

942.50

Summary of Decision Requested:

Retain Objective 6.3.1 Renewable energy.

Decision Reasons:

- The submitter supports this policy.

Point Number

942.51

Summary of Decision Requested:

Retain Policy 6.3.2 Utilising energy efficiency

Decision Reasons:

- The submitter supports this policy.

Point Number

942.52

Summary of Decision Requested:

Retain Policy 6.3.3 Enabling renewable electricity generation

Decision Reasons:

- The submitter supports this policy.

Point Number

942.53

Summary of Decision Requested:

Retain Policy 6.3.4 Future renewable electricity.

Decision Reasons:

- The submitter supports this policy.

Point Number 942.54

Summary of Decision Requested: **Retain** Policy 6.3.5 Existing renewable electricity facilities

Decision Reasons:

- The submitter supports this policy

Point Number 942.55

Summary of Decision Requested: No specific decision sought, but submission expresses concern that there is no climate change chapter, and supports efforts to reduce carbon footprints by encouraging off the grid living and biodiversity offsets when properties are developed.

Decision Reasons:

- No reasons provided.

Point Number 942.56

Summary of Decision Requested: **Add** a new clause to Policy 6.4.5(a) Roading infrastructure as follows:

(y) Where land is still owned by Maori but has been appropriated by Council without compensation for public use, lease arrangements should be entered into.

Decision Reasons:

- The predecessor the the council acquired vast area of inalienable Maori land in Whaingaroa/Raglan for roads and other public purposes.
- Council could be proactive in establishing arrangements with affected landowners.

Point Number 942.57

Summary of Decision Requested: **Retain** Policy 6.4.6 Stormwater and drainage

Decision Reasons:

- The submitter supports this objective.

Point Number 942.58

Summary of Decision Requested: **Add** a new clause to Policy 6.4.7 Stormwater as follows:

(ix) Overland flow should be intercepted, and managed to minimise effects like erosion on coastlines and beaches.

(x) Ensure that storm water from overland flow does not adversely affect neighbouring properties.

Decision Reasons:

- One area not mentioned are the stormwater pipes and other infrastructure directed to local beaches, which result in scouring out of dunes, loss of vegetation and backdunes and encroachment on coastal land.
- In terms of residential areas, all developments needs to have infrastructure signed off as compliant with rules especially where the development occurs above existing homes as gravity and the natural flow paths may end up adversely affecting the health of people living below.

Point Number 942.59

Summary of Decision Requested: **Retain** objective and policies in Chapter 7: Historic Heritage

Decision Reasons:

- Submitter supports this objective and policies.

Point Number 942.60

Summary of Decision Requested: **Add** a new clause to Policy 7.1.2 Identification as follows:

Permission to be sought from Hapū/iwi before releasing locations of significant Maaori sites.

Decision Reasons:

- Many Maaori sites on Maaori land are not identified because whanau and hapu have chose to protect them from public scrutiny and disturbance.
- Those that have been compiled since the 1960s by NZAA have been accessed, investigated, recorded and sometimes taken taonga without informing Tangata whenua.
- Although this record exists in the public domain, a schedule can be kept by Council and provided on a need to know basis when applications to develop are applied for.

Point Number 942.61

Summary of Decision Requested: **Retain** Policy 7.1.6 Notable Trees

Decision Reasons:

- Submitter supports this policy.

Point Number 942.62

Summary of Decision Requested: No specific decision sought, but the submitter supports Policy 7.1.9 Tree maintenance.

Decision Reasons:

- Submitter supports this policy.

Point Number 942.63

Summary of Decision Requested: **Add** notable trees to Schedule 30.2 Notable Trees including the following:

- Pohutakawa tree at Te Whaanga
- 3 Puriri trees,
- Ngaio and
- Kowhai located between Iwitahi and Pauaeke

AND

Undertake a survey by Tangata whenua of notable trees over-bordering Karioi Native reserve.

Decision Reasons:

- Trees are the first children of Tane Mahuta and were placed to clothe the earth, store carbon, oxygenate the planet, and provide for human seeds.
- Unfortunately the 20-21 century growth and development have seen the destruction of trees that have stood for centuries.
- Some of these trees protected by tangata whenua as markers, have been felled without regard for their age or purpose within the forest ecosystem.
- Tangata whenua have protected most of the trees within the Karioi Native Reserve for generations but those that are close to roads or beaches are threatened by human activity.

Point Number 942.64

Summary of Decision Requested: No specific definition sought, but the submitter supports Objective 8.2.1 Natural Values.

Decision Reasons:

- The submitter supports this objective as it provides for public open space, and recreation as well as protection and enhancement of biodiversity and the natural environment.
- Commercial activities should be discouraged on the reserves.
- Occasionally developers will attempt to vest reserves in Council, but are refused as there are underlying issues of the cost management or the presence of Maori cultural sites which need covenanting.

Point Number 942.65

Summary of Decision Requested: **Retain** Policy 8.1.2 Provision, use and development of public open space and reserves.

AND

Add a new clause to Policy 8.1.2 Provision, use and development of public open space and reserves as follows:

(e) Where Council do not wish to manage small scale areas of significance to Maori, vested as a contribution to development, a section 33 vesting to the appropriate iwi should be considered.

Decision Reasons:

- The submitter supports the policy as it provides for public open space and recreation as well as protection and enhancement of biodiversity and the natural environment.
- Commercial activities should be discouraged on the reserves.
- Occasionally developers will attempt to vest reserves in Council but are refused as there are underlying issues of the cost management or the presence of Maori cultural sites which need covenanting.

Point Number 942.66

Summary of Decision Requested: **Amend** Policy 8.1.3 Esplanade reserves to require that a hui be organised for Ngati Tahinga and Tainui landowners to discuss any proposed before decisions are made.

Decision Reasons:

- Tainui has always opposes opening access to West Coast beaches in the north for vehicular access as history has shown that activities are not monitored, rubbish is left, beaches erode, kaimoana is decimated through easy access to traditional food supplies, dotterel nesting sites are disturbed, and sites of significance interfered with.
- The west coast is known for being rugged, wild and unforgiving, something that should be borne in mind if public access is obtained.

Point Number 942.67

Summary of Decision Requested: **Amend** the planning maps to indicate where access is available in the district and where it is not due to private property.

Decision Reasons:

- This information should be appended to the Proposed District Plan and made available at the information centres that service the communities. Tainui lands around Raglan and Karioi are accessed daily by an increasing number of locals.
- Tourists freedom camp and walk uninformed with their dogs through both Whaanga, and Te Kopua properties.
- Despite signage, this behaviour continues.

Point Number 942.68

Summary of Decision Requested: **Retain** the objectives and policies in Chapter 10 Hazardous Substances and Contaminated Land.

AND

Add a requirement for a bond to cover liability to be charged as part of the approval during resource consent process to ensure contaminated land is remediated following use.

Decision Reasons:

- The submitter supports the objectives and policies in Chapter 10 Hazardous Substances and Contaminated Land.

Point Number 942.69

Summary of Decision Requested: No specific decision sought, but submission seeks clarification on whether Chapter 11 Natural Hazards and Climate Change is a placeholder for Stage 2 District Plan review.

Decision Reasons:

- No reasons provided.

Point Number 942.70

Summary of Decision Requested: **Add** a new clause to Activity specific condition 14.12.1.1(1) as follows:

(g) Not be sited on Maori sites of significance

Decision Reasons:

- Over the last 150 years Maori cultural landscapes and sites of significance have been sacrificed for growth and development.
- A few years ago Contact Energy sought a consent which covered numerous Maori areas of significance from south of Port Waikato to north of Raglan.
- With the enactment of the Resource Management Act 1991 attention to the effects of land use on people are more closely scrutinised.
- Today with tourism growing there is an opportunity to enhance Maori sites of significance as well as have infrastructure that meets the needs of communities.

Point Number 942.71

Summary of Decision Requested: **Amend** Section 14.11 Water, wastewater and stormwater to require that no new or replacement infrastructure be installed on Maori cultural sites of significance.

Decision Reasons:

- No reasons provided.

Point Number 942.72

Summary of Decision Requested: **Add** new clauses to Activity specific conditions 14.11.1.1 relating to Rule 14.11.1 P1 as follows

(a) New development or subdivision must have a stormwater system that complies with all of the following conditions:

...

(v) Stormwater management measures, including low impact design measures, must be implemented as appropriate in accordance with the following drainage hierarchy:

...

F. Re-routing of stormwater to avoid coastal discharge into sandy areas.

...

(b) Where the existing management of stormwater does not meet the requirement for New Developments and problems are resulting, upgrading may be required to mitigate adverse effects in accordance with 14.11.1.1 section (a).

(c) Manages stormwater in the following manner: No stormwater discharges into coastal sandy beach areas to minimise the risks of erosion.

Decision Reasons:

- Stormwater outlets have been responsible for numerous land sourced erosion events along the Ngarunui - Te Kopua Beaches.
- Efforts by Beachcare and Coast care volunteers have helped mitigate effects through having outlets stopped and re-routed, affected areas fences, followed by focused planting of dune species.

Point Number 942.73

Summary of Decision Requested: **Retain** Activity Specific condition 14.11.1.3(a)(iii) relating to Rule 14.11.1 P3.

Decision Reasons:

- The submitter has fought for over 50 years for a circular system of wastewater treatment and disposal, and are open to considering options which would better protect the mauri of waterways which are currently used for wastewater disposal.
- Most of the multiply owned land available to whanau and hapu for development are sited in areas which are not serviced by reticulated systems so again other options need to be investigated.

Point Number 942.74

Summary of Decision Requested: Add an exemption to Rule 14.11.4 NC2 (xx) Non-Complying Activities as follows:

(xx) Rangitahi Peninsula Zone;

Land made available for treatment of sewage through wetlands or land based treatment is exempted

AND

Add a new clause to Rule 14.11.4 NC2 Non-Complying Activities as follows:

(xxx) In conjunction with the planning, consideration shall be given to the identification of areas suitable for wastewater polishing and mini treatment plants to mitigate the risk of disposal in the event of failure to the existing networks from significant events or natural disasters.

Decision Reasons:

- No reasons provided.

Point Number 942.75

Summary of Decision Requested: **Amend** Rule 16.1.2 P3(b) Permitted Activities to clarify if a village cannot be built if there is not public transport available.

Decision Reasons:

- Clarification is required.

Point Number 942.76

Summary of Decision Requested: Clarify Rule 16.1.2 P9 Permitted Activities by identifying how many homes are occupied by residents and how many are reserved for homestay accommodation.

AND

No specific decision sought, but the submitter supports priority being given to building homes in Residential Zones for residents with respect to Rule 16.1.2 P9 Permitted Activities.

Decision Reasons:

- Many long term residents have moved to Hamilton as land and homes that are available for renting have become scarce at realistic and affordable prices.

Point Number 942.77

Summary of Decision Requested: Add a new matter of discretion to Rule 16.1.3 RD1 Restricted Discretionary Activities as follows:

(k) Enhancement of the character of the town.

Decision Reasons:

- No reasons provided.

Point Number 942.78

Summary of Decision Requested: Amend Rule 16.2.4.2 Earthworks - Maaori sites and Areas of significance to limit the extent of earthworks and vegetation clearance to minimise the negative impacts to the environment and to ensure the values of the site are protected.

Decision Reasons:

- Lands have been cleared of 100m² per year for several years eventually ending with enough space to build 5 houses in areas that were once coastal montane forest.
- Recently 2500m² of original kanuka and manuka was inadvertently cleared for one house site which was in excess of the earthworks allowed.

Point Number 942.79

Summary of Decision Requested: Amend Rule 16.4.2.3 Earthworks - Significant Natural Areas to limit the extent of earthworks and vegetation clearance to minimise the negative impacts to the environment and to ensure the values of the site are protected.

Decision Reasons:

- Lands have been cleared of 100m² per year for several years eventually ending with enough space to build 5 houses in areas that were once coastal montane forest.
- Recently 2500m² of original kanuka and manuka was inadvertently cleared for one house site which was in excess of the earthworks allowed.
- The submitter supports rules that protect significant areas from unnecessary destruction.

Point Number 942.80

Summary of Decision Requested: Add a new clause to Rule 17.2.6.1 C1(b) Notable tree - removal or destruction as follows:

(iv) Effects on Maori cultural values if the tree has been identified by Tangata whenua as a Notable Tree.

Decision Reasons:

- No reasons provided.

Point Number 942.81

Summary of Decision Requested: Amend the Proposed District Plan to incorporate a policy of environmental offset promoting the establishment of woodlots to replace trees cut and provide for future needs, using the principle of reciprocity to give back to the land.

Decision Reasons:

- Manuka and kanuka are an important part of the forest and wetland ecosystem.
- They provide for numerous purposes including food, homes and traditional uses.
- As most rural land in the district has been cleared for pastoral grazing, supplies have diminished.
- If Council is going to allow 5m³ of these timbers to be cut and burnt every 12 months the supply will eventually disappear, putting more pressure on Maori land which is largely covered in manuka and other native species.

Point Number 942.82

Summary of Decision Requested: Retain the provisions within Rule 22.1.2 P1 Permitted Activities, and the objectives and policies relating to Maori Freehold Land.

Decision Reasons:

- The provisions will enable Maori owners to use their Maori freehold land for a number of uses including marae, kohanga reo and papakainga housing.
- Planning staff made a genuine attempt to understand the aspirations of Whaanga Coast land owners of Maori Freehold Land and have delivered a document that improves options for Maori not only in Whaingaroa/Raglan but throughout the district.
- There are long overdue for whanaa who have been denied the right to build and live on their land.

Point Number 942.83

Summary of Decision Requested: No specific decision sought, but submission opposes the Walkway, Cycleway and Bridleway overlay up the coast where the routes travel over waahi tapu areas on the Raglan Coast - Map 23.

Decision Reasons:

- No reasons provided.

Point Number 942.84

Summary of Decision Requested:	No specific decision sought, but the submission expresses disappointment that the plan does not improve public transport between the west coast communities and Auckland, Hamilton and Kawhia.
Decision Reasons:	<ul style="list-style-type: none"> Given the increased visitor population using Whaingaroa as a tourist destination, it is disappointing to see nothing in the Proposed District Plan.
Point Number	942.85
Summary of Decision Requested:	No specific decision sought to section 1.5.7.5 The Coast, but submission considers stormwater should be directed into culverts and not discharged onto sandy beaches.
Decision Reasons:	<ul style="list-style-type: none"> Discharge of stormwater onto sandy beaches causes scouring and erosion.
Point Number	942.86
Summary of Decision Requested:	No specific decision sought for section 1.5.7.5 The Coast, but submission opposes access over dunes to the beach by vehicles, including horse-drawn carriages.
Decision Reasons:	<ul style="list-style-type: none"> Vehicle use over beaches can adversely affect recovering pipi and kutai beds as well as disturb recreational users.
Point Number	942.87
Summary of Decision Requested:	Retain Policy 2.15.1 Ngaa taonga tuku iho (Maori Sites and Areas of Significance).
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the policy.
Point Number	942.88
Summary of Decision Requested:	Amend Section 14.11 Water, wastewater and stormwater to clarify what is an identified area.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	942.89
Summary of Decision Requested:	No specific decision sought, but submission refers to Rule 17.2.1.1 Earthworks - Maori Sites and Areas of Significance.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	942.90
Summary of Decision Requested:	Add a new clause to Rule 17.2.6.1 Notable tree- removal or destruction as follows: <i>(xx) Effects on Maori cultural values if the tree has been identified by Tangata Whenua as a notable tree;</i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	942.91
Summary of Decision Requested:	No specific decision sought, but submission refers to Rule 17.4.1.1 Esplanade Reserves and Esplanade strips.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	942.92
Summary of Decision Requested:	Add a new clause to Rule 17.2.6.2 RD1 Notable tree- trimming as follows: <i>(xx) Effects on Maori cultural values if the tree has been identified by Tangata Whenua as a notable tree;</i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	942.93
Summary of Decision Requested:	Add a new clause to Rule 17.2.6.3 Notable tree- activities within the dripline as follows: <i>(xx) Effects on Maori cultural values if the tree has been identified by Tangata Whenua as a notable tree;</i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	943	Submitter:	McCracken Surveys Limited
Point Number	943.1		
Summary of Decision Requested:	<p>Amend Rule 16.3.7 P1 (a)(iii) Living Court, as follows:</p> <p>(iii) <i>When located on the ground floor, it has a minimum area of 60 60m² and a minimum dimension of 4m in any direction; and</i></p> <p>AND</p> <p>Add a rule to Rule 16.3.7 Living Court, so that the living court is not facing south, similar to Hamilton City Council residential.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • 60m² allows for larger dwellings or additional bedrooms. • Current plan and proposed plan have no requirements for the living court to not be facing south. 		
Point Number	943.2		
Summary of Decision Requested:	<p>Amend Rule 16.3.9.1 P1 (a)(ii) – Buildings setbacks – All boundaries, as follows;</p> <p>(ii) <i>13m from the edge <u>centreline</u> of an indicative road;</i></p>		
Decision Reasons:	<ul style="list-style-type: none"> • Indicative roads have no legal boundaries resulting in planning location only. • District Plan maps are not of scale that is useful in accurately determining a boundary. • The centre of the indicative road provides a useful degree of variance. 		
Point Number	943.3		
Summary of Decision Requested:	<p>Amend the Proposed Waikato District Plan to clarify what and where the Environmental Protection Areas are as referred to in Rule 16.3.9.4 - Building setback - Environment Protection Area.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Not obvious on map. 		
Point Number	943.4		
Summary of Decision Requested:	<p>Retain Rule 16.3.9.1 (a)(i) Buildings setbacks – All boundaries, as notified.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • No reason provided. 		
Point Number	943.5		
Summary of Decision Requested:	<p>Amend Rule 16.4.1 RD1 (a)(ii) – Subdivision – General, as follows;</p> <p>(iii) <i>Where roads are to be vested in Council, they must <u>should</u> follow a grid layout;</i></p> <p>AND</p> <p>Any consequential amendments as required.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Rule is far too restrictive. • Grid layout may not always be possible given topography that may require curvilinear layout. • The word 'must' will result in a forced performance failure and fall to full discretionary. 		
Point Number	943.6		
Summary of Decision Requested:	<p>Delete Rule 16.4.4 (a)(iv)(Table) – Subdivision – Multi-unit development.</p> <p>AND</p> <p>Add the Table from Rule 16.4.4 (a)(iv) - Subdivision Multi-Unit Development to Rule 16.1.3 RD1 – Multi-Unit development.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Table is not suited for subdivision rule. • Areas are subject to land use provisions and not a result of subdivision. 		
Point Number	943.7		
Summary of Decision Requested:	<p>Amend Rule 16.4.5 C1 (b) Subdivision – Boundary adjustments, to correct the inconsistency in terminology between boundary adjustment and boundary relocation.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Decision is required. 		
Point Number	943.8		
Summary of Decision Requested:	<p>Amend Rule 16.4.6 C1 - Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold, to make the activity a Permitted activity rather than a Controlled Activity.</p> <p>AND</p> <p>Amend Rule 16.4.6 D1 – Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold, to be a Restricted Discretionary activity status rather than a Discretionary Activity.</p>		

Decision Reasons:

- Sites are already developed where conversion causes no additional environmental effects and are simply a cadastral change.
- Discretionary activity status is too onerous.

Point Number

943.9

Summary of Decision Requested:

Delete Rule 16.4.6 C2 (b)(i) Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold.

Decision Reasons:

- The purpose of the boundary adjustment is stated in C2 (a) and as such, C2 (b)(i) is a duplication.

Point Number

943.10

Summary of Decision Requested:

Amend Rule 16.4.12 RD1 (a)(i) Subdivision - Building platform, to be inclusive of yards or be reduced to 15m,
AND

Any consequential amendments to other residential zones throughout the Proposed Waikato District Plan.

Decision Reasons:

- The requirement (as notified) would be difficult to achieve on many sites typically being 20m in length.
- No obvious planning support for 18m.

Point Number

943.11

Summary of Decision Requested:

No specific decision sought, but submission states:

This rule prevents, as a Restricted Discretionary activity, the common need to relocate an approved but not issued small allotment (8000m² to 1.6ha) created by subdivision to another part of a farm and record of title that is continuous. Where for example, a farm is held in three continuous titles two of which are under 20ha and cannot be subdivided. The larger title is subdivided and consent is granted to create the small lot and the balance land. The small lot prior to issuance of a title should simultaneously be able to be relocated to the third and continuous title. The third might contain low quality soils so the parent larger lot retains the benefit of the land area (that may well be High Quality Soils) or is relocation within the land holding being better suited to a small lot such as being remote from the centre of farm operations.

Decision Reasons:

- No reason provided.

Point Number

943.12

Summary of Decision Requested:

Amend Rule 22.4.7 RD1 (b) - Esplanade reserves and esplanade strips, to include RMA s230(3).

Decision Reasons:

- RMA s230(3) provides for the requirement for esplanade reserves to be waived through the resource consent process and hence provides the full gambit of possibilities allowed by the RMA notwithstanding identified high priority areas.
- Too often a presumption in plans is that reserves must be taken in all cases. This presumption is further negatively amplified by Council refusals to help the cost of fencing esplanade reserves (there is no legislation that precludes payments) or reluctance to take responsibility to manage and maintain esplanade reserves.

Point Number

943.13

Summary of Decision Requested:

Amend Rule 22.3.1 (a) Number of dwellings within a lot, to replace the word "lot" with "site".

Decision Reasons:

- Lot is not defined within Chapter 13 Definitions.

Point Number

943.14

Summary of Decision Requested:

Amend Rule 22.3.2 Minor dwelling, to replace the word "lot" with "site".

Decision Reasons:

- Term "Lot" is not defined in Chapter 13 Definitions.

Point Number

943.15

Summary of Decision Requested:

Amend Rule 22.3.2 P1 (a) Minor dwelling, to exclude garages, as follows:

(a) One minor dwelling not exceeding 70m² gross floor area, excluding garage within a lot.

Decision Reasons:

- Garages should be excluded from the area of a minor dwelling.

Point Number

943.16

Summary of Decision Requested:

Amend Rule 22.3.4.1 P2 Height - Building General, as follows:

The height of any ~~dwelling~~ or building must not exceed 7.5m in a Significant Amenity Landscape.

Decision Reasons:

- A dwelling is a building.

Point Number

943.17

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P2 (a) - Building Setbacks – All boundaries, as follows;
(a) A non-habitable building located on a ~~Record of Title site~~ less than 1.6ha must be set back a minimum of:
AND
Amend Rule 22.3.7.1 P3 (a) - Building Setbacks – All boundaries, as follows;
(a) A habitable building located on a ~~Record of Title site~~ 1.6ha or more must be set back a minimum of:
AND
Amend Rule 22.3.7.1 P4 (a) - Building Setbacks – All boundaries, as follows;
(a) A non-habitable building located on a ~~Record of Title site~~ 1.6ha or more must be set back a minimum of:

Decision Reasons:

- The term "site" is more appropriate and is defined in Chapter 13 Definitions.

Point Number 943.18

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P1 (ii) Building Setbacks – All boundaries, as follows;
(ii) 17.5m from the centre line of an indicative road that has not yet been vested;
AND
Amend Rule 22.3.7.1 P2 (ii) Building Setbacks – All boundaries as follows;
(ii) 17.5m from the centre line of an indicative road that has not yet been vested;
AND
Amend Rule 22.3.7.1 P3 (ii) Building Setbacks – All boundaries, as follows;
(ii) 22m from the centre line of an indicative road; that has not yet been vested;
AND
Amend Rule 22.3.7.1 P4 (ii) Building Setbacks – All boundaries, as follows;
(ii) 22m from the centre line of an indicative road; that has not yet been vested;

Decision Reasons:

- Avoids the need for resource consent when a road has been located in a different alignment than shown on the planning maps.

Point Number 943.19

Summary of Decision Requested: **Amend** Rule 22.3.7.5 P1 - Building Setbacks – water bodies, as follows;
(a) Any building must be set back a minimum of:
(i) 32m from the margin of any;
A. Lake with a bed area of 8ha or more or; ~~and~~
B. Wetland with an area greater than 1ha;
(ii) 23m from the bank of any river (other than the Waikato River and Waipa River) whose bed has an average width 3m or more;
...

Decision Reasons:

- There needs to be parameters as to when Rule 22.3.7.5 applies.
- Proposed parameters are from the Operative District Plan.

Point Number 943.20

Summary of Decision Requested: **Amend** the planning maps to identify "Outstanding Natural Character Areas" and "High Natural Character Areas".

Decision Reasons:

- "Outstanding Natural Character Areas" and "High Natural Character Areas" appear throughout the Proposed Waikato District Plan but are not defined on the planning maps.

Point Number 943.21

Summary of Decision Requested: **Add** "Residential activity" as a Permitted activity to Rule 22.1.2 Permitted Activities.

Decision Reasons:

- Relief sought would correct an omission.

Point Number 943.22

Summary of Decision Requested: **Amend** Rule 22.1.5 NCI - Non-Complying Activities, as follows;
NCI Construction of a building located on an indicative road that has not yet been vested;

Decision Reasons:

Avoids the need for resource consent when a road has been located in a different alignment than shown on the planning maps.

Point Number 943.23

Summary of Decision Requested: **Amend** Rule 22.2.3.1 P1 (a) (iv) Earthworks – General, as follows;
(iv) A building platform for a residential activity, including accessory buildings and access;

Decision Reasons:

- To include provision of access within the scope of permitted earthworks.

Point Number	943.24
Summary of Decision Requested:	Delete Rule 22.2.3.1 P2 (a) (iii) Earthworks – General.
Decision Reasons:	<ul style="list-style-type: none"> • Earthworks within 1.5m of a boundary are inevitable and even most minor activities such as digging a posthole would trigger a requirement for resource consent.
Point Number	943.25
Summary of Decision Requested:	Amend Rule 22.2.3.1 P4 (a) (i) Earthworks – General, as follows: <i>(i) not exceed a total volume of 200 1000m³;</i>
Decision Reasons:	<ul style="list-style-type: none"> • No reason provided.
Point Number	943.26
Summary of Decision Requested:	Amend Rule 22.4.1.1 PR1 Prohibited subdivision, as follows: <i>Any subdivision within the Urban Expansion Area involving the creation of any additional lot record of title excluding one containing a dwelling existing as at 18 July 2018.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Subdivision of existing dwellings can assist with the creation of large land holdings suitable for future urban development.
Point Number	943.27
Summary of Decision Requested:	Amend Rule 22.4.1.1 PR3 (c) (i) Prohibited subdivision, as follows: <i>(i) Where the record of Title was created as a result of a boundary relocation or boundary adjustment under the former District Plan, a boundary relocation or adjustment between Records of Title that existed prior to 6 December 1997; (refer to Rule 22.4.1.4); or</i>
Decision Reasons:	<ul style="list-style-type: none"> • No reason provided.
Point Number	943.28
Summary of Decision Requested:	Delete Rule 22.4.1.2 RD1 (a) (v) General subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • The rule is confusing, difficult to administer and complicates the consenting process.
Point Number	943.29
Summary of Decision Requested:	Add clause (v) to Rule 22.4.1.1 PR3 (b) Prohibited subdivision, as follows: <i>(b) Exceptions to PR3(a) are where an additional lot is created by any of the following:</i> <i>(i) Conservation lot subdivision (Rule 22.4.1.6);</i> <i>(ii) Reserve lot subdivision (Rule 22.4.1.7);</i> <i>(iii) Access allotment or utility allotment using Rule 14.12 (Transportation);</i> <i>(iv) Subdivision of Maori Freehold Land (Rule 22.4.1.3);</i> <i>v) Rural Hamlet (Rule 22.4.1.5)</i> AND In the event that the relief sought in relation to Rule 22.4 is not accepted, add clause (vi) to Rule 22.4.1.1 PR3 (b) Prohibited subdivision, as follows: <i>vi) Boundary Relocation (Rule 22.4.1.4).</i>
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	943.30
Summary of Decision Requested:	Amend Rule 22.4.1.4 RD1 (a) (i)- Boundary relocation, as follows: <i>(i) Relocate a common boundary or boundaries between two or more existing Records of Title that existed prior to 18 July 2018;</i>
Decision Reasons:	<ul style="list-style-type: none"> • Boundary relocation between more than two Records of Title will be necessary from time to time. • No reason why boundary relocation cannot occur between Records of Title after 18 July 2018.
Point Number	943.31
Summary of Decision Requested:	Amend Rule 22.4.1.6 RD1 (a) (i) Conservation lot subdivision, as follows: <i>(i) The lot must contain an contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist in accordance with the table below:</i>
Decision Reasons:	

- Legal and physical protection of Significant Natural Areas should be encouraged regardless of being physically contiguous or not.

Point Number 943.32

Summary of Decision Requested: **Delete** Section 20.5 – Nau Mai Business Park and consolidate the Nau Mai Business Park Area rules within Chapter 20 – Industrial Zone.

AND

In the event that the submission point above is successful, the following amendments apply for the business park area only:

Amend Rule 20.5.7 P2 (a) (iv) – Signs General to delete references to Lot 1 DP454300 and to recognise the sign is located within Area BB DP 517948 secured by an existing easement that will endure if the parent Lot 1 DP 517948 is further subdivided.

AND

Add a prohibited rule to Chapter 20 – Industrial Zone to prevent the storage or use of fireworks as per the Operative District Plan.

AND

Amend Chapter 20 – Industrial Zone to consider including the rule 'no incineration of rubbish, waster or recreational fires'.

AND

Retain Rule 20.5.12 Gross Floor Area, except for the amendment outlined below.

And

Add a new clause to Rule 20.5.12 – Gross Floor Area as follows;

the reduction of fire risk.

AND

Add specific rules to Chapter 20 - Industrial Zone, to retain "effective platform areas" and existing landscape areas which are interlinked to ensure development is contained and the local environment is maintained.

AND

Amend Chapter 20 – Industrial Zone, to protect the existing and extensive landscaping and batters by adding a permitted earthworks activity rule to limit earthworks to repair and maintenance of the batters and replacement of planting.

AND

Add a new rule to Chapter 20 – Industrial Zone as follows;

Any onsite liquid trade waste tanks are to be installed, operated and maintained in accordance with manufacturer instructions.

AND

Amend the planning maps to provide hatching for the Nau Mai effective area overlays for clarity.

Decision Reasons:

- If the zone is not deleted as submitted then Council will endure a chapter that is no future relevance and without amendment to the Industrial Zone Chapter will risk slow degradation of the business park current environment unless Council remains vigilant.
- The business park land area is subject to a lawful and land use consent that has not lapsed, has been given effect and has not and will not be surrendered thus being a live consent. The industrial activities authorised by the land use consent are more expansive than the proposed and operative zoning. The land use consent takes precedence over the district plan rules.
- The business park area has extensive planted areas and limited firefighting capacity to allow an increase risk this activity creates for buildings.
- All Operative District Plan fire rules have been drafted in consultation with the NZ Fire Service.
- The 800m² originated as a fire safety cell maximum area in order to minimise the fire and the spread of fire.
- Within the business park area there is a need to protect the existing and extensive landscaping and batters created as part of the original and operative land use consent which serves to provide amenity, prevents erosion and therefore helps to improve stream water quality.
- No protection of the landscaping and batters will result in significant change as the park is developed.
- Appropriate storage is also important to local lwi (Ngati Mahanga).

Point Number 943.33

Summary of Decision Requested: **Amend** the zoning at the properties in Raglan on the north-eastern side of the intersection with Hills Road and State Highway 23 Raglan, from Residential Zone to Business Zone, as shown on the plans attached to the original submission and labelled "Proposed Business Zone and Indicative Road Layout – Submission".

Decision Reasons:

- Seeks extension to Business Zone due to limited Business Zone land in Raglan.
- Extended in the south east (Area B). This is because Council, via a subdivision application, has requested the access be closed and a new access located further west. This land as road would have taken on Business Zone for planning purposes and so it makes sense that it should remain zoned Business to the south of Moonlight Bay Drive.
- Area C is proposed to be rezoned to Business from the current Living Zone. This extension provides additional business land lost to kumara pit protection (Area E) as well as providing a width more appropriate for Business Zone development.
- To the northwest (Area A) is an additional business area north of the indicative road and SH 23. This is area is proposed to be rezoned Business to take logical advantage of the Council lead initiative to locate a new access (roundabout) at or near the intersection of SH 23, Hills Road and Lorenzen Bay Road. Note: Existing segregation strips along SH23 will become Business Zone. Note: Area A contours are in part steep contour.

Point Number 943.34

Summary of Decision Requested: **Retain** A new retirement village as a permitted activity in Rule 16.1.2 P3 Permitted Activities.

Decision Reasons:

- No specific reason provided.

Point Number 943.35

Summary of Decision Requested: **Add** an explicit exception to Rule 16.1.2 P3(a) - A new retirement village or alterations to an existing retirement village, (a), to add an explicit exception to allow smaller development without a minimum area to support development in Raglan.

Decision Reasons:

- The 3 Ha minimum site area is not appropriate for Raglan contour.
- No apparent reason to apply a minimum in the Residential Zone in Raglan.
- Lack of existing near level land may require two storey structures in Raglan.

Point Number 943.36

Summary of Decision Requested: Retain Child care facility, as a permitted activity in Rule 17.1.2 P6.

Decision Reasons:

- No reason provided.

Point Number 943.37

Summary of Decision Requested: Retain the proposed Residential Zone for the property at 75 Te Kauwhata Road, Te Kauwhata (1003295), as notified.

Decision Reasons:

- No reason provided.

Point Number 943.38

Summary of Decision Requested: Delete the indicative roads on the planning maps for the property at 75 Te Kauwhata Road, Te Kauwhata (1003295).

Decision Reasons:

- The rezoning to Residential opens wide the potential for various road layouts.
- The current locations fail to support proposed Rule 16.4.3 Subdivision - Te Kauwhata West Residential Area (a)(iv) where roads are to be vested in Council, they are to follow a grid layout.
- The indicative roads serve no obvious reasonable purpose.

Point Number 943.39

Summary of Decision Requested: Amend the planning maps to reduce the amount of Reserve zoning to only include the dripline of the mature notable trees, from the property at 75 Te Kauwhata Road, Te Kauwhata (1003295),

AND

Amend the planning maps as a consequential amendment to extend the Residential Zone for the property at 75 Te Kauwhata Road, Te Kauwhata (1003295).

Decision Reasons:

- The Reserve land was taken by Council when the Operative District Plan was notified.
- The Reserve contains 13 notable trees.
- The Reserve Zoning extends beyond the identified notable trees.

Point Number 943.40

Summary of Decision Requested: Amend Rule 22.4.1.4 RD1 (a)(i) - Boundary relocation as follows:

(i) Relocate a common boundary or boundaries between two or more existing Records of Title ~~that existed prior to 18 July 2018;~~

...

Decision Reasons:

- Boundary relocation between more than two Records of Title will be necessary.
- No reason why it should not occur between any number of Records of Title that are created after 18 July 2018.

Point Number 943.41

Summary of Decision Requested: Amend Rule 22.4.1.5 (a)(i) and (iii) - Rural Hamlet Subdivision, to clarify to confirm that to meet the proposed rule, six existing continuous Records of Title can be relocated to allow for the maximum 5 small lots between 8000m² and 1.6 Ha and one balance allotment greater than 20 Ha

AND

Amend the heading of Rule 22.4.1.5 - Rural Hamlet Subdivision as follows:

22.4.1.5 Rural Hamlet Boundary Relocation Subdivision

Decision Reasons:

- The rule appears to limit the potential multiple relocation of existing titles to 5 titles.
- Three to five lot clustering is not consistent with the potential number of Records of Title that can be relocated over time and eventually each contains a dwelling.

Point Number 943.42

Summary of Decision Requested: Amend Appendix 3 – Design Guidelines – 3.1: Residential Subdivision Guidelines, to bold the following statement and for it to be implemented in the intent that the words portray as follows:

Every application will be different (and not all the outcomes sought and design guidelines will be relevant to the assessment) of the proposed subdivision application. Each subdivision will be assessed on its merits taking into account its context and specific attributes.

A degree of flexibility in relation to how the proposals respond to the guidelines is reasonable and to be expected. What is important is that the outcomes sought are clearly achieved and that this able to be demonstrated in the proposal.

Decision Reasons:

- The bracketed part of the sentence in the relief sought is potential cause for concern. It states that not all design guidelines will be relevant. Yet the boxes throughout the guideline are ticked or not ticked. Are the ticks in each box to be interpreted as being relevant no matter or can the applicant disagree with Beca and invoke the above statement? Reasonableness must play a part and to ensure that the statements must be given primacy for processing planners.
- Potential conflicts will arise if the above statement is not held in high regard and consistently implemented by processing planners.

Point Number 943.43

Summary of Decision Requested: Amend the rules and provisions applicable to overhead netting for kiwifruit operations as it is unnecessarily captured by multiple rules e.g. building height, site coverage, boundary setbacks.

Decision Reasons:

- The proposed plan continues an inconsistency that allows horticulture as a permitted activity but in the case of kiwifruit operations (farming) resource consent is required for netting. Under both the Operative and Proposed and District Plan rules kiwifruit side netting is determined to be a "fence" where it viticultural is over 2.0m in height (a building) or fails a setback, resource consent is required. Over height fences with top netting (as is required for some kiwifruit varieties is a building and subject to coverage standards. Kiwi fruit orchards that may require overhead netting in this zone or in the Rural Zone will require resource consent which is otherwise a farming and permitted activity.

Point Number 943.44

Summary of Decision Requested: Amend Rule 16.1.3 RD1 (c) - Multi-Unit development, to apply the 'Average Net Site Area' rather than the minimum net site area.

Decision Reasons:

- Apartments are likely to be two storeys and terraced rather than vertical.
- Net site area minimum is problematic for apartment design.
- Average Net Site Area for apartments will provide a greater degree of design flexibility in terms of for example placement, separation and outlook, privacy, daylighting and access.

Point Number 943.45

Summary of Decision Requested: Amend Rule 16.1.4 Discretionary Activities to reflect where a permitted or restricted discretionary performance standard is failed it should remain restricted discretionary to the failed performance standard.

AND

No specific relief sought, but submission considers the approach of the Proposed District Plan cascading to a discretionary activity upon non-compliance with a permitted standard has negative and unnecessary implication for increased application cost.

Decision Reasons:

- The widening to full discretionary is not warranted.

Point Number 943.46

Summary of Decision Requested: Amend Rule 16.2.4.1 P1 (a) (ii) – Earthworks General, as follows:

(iii) Not exceed a volume of ~~250~~ 500m³; AND

Amend Rule 16.2.4.1 P3 (a)(i) – Earthworks General, as follows:

(i) Not exceed a total volume of ~~20~~ 500m³;

Decision Reasons:

- 500m³ allows for variation in topography or ground conditions where 250m³ can easily be exceeded, especially in Raglan.
- Will avoid penalising steeper sites.
- Effects of earthworks are well understood and 500m³ can be managed as 250m² area by way of the performance standards.
- Sites are subject to engineering at building consent.

Point Number 943.47

Summary of Decision Requested: Amend Rule 16.3.2 (a) (i) Minor dwelling, as follows:

(i) The net site area is ~~900~~ 600m² or more;

Decision Reasons:

- Other jurisdictions have 600m² where a maximum of 70m² is imposed.
- 600m² still provides a reasonable degree of living space and functionality.
- Reduction in Net Site Area provides opportunities that has significant benefits for people and communities, young and old living close to families; additional income.

Point Number 943.48

Summary of Decision Requested: Amend Rule 16.3.3.1 P1 - Building general, so that 'Height' is taken at the building edge from the highest foundation height, projected out and over any slope.

Decision Reasons:

- Rule works for near level residential dwelling sites only.
- Experience in Raglan shows that there is nearly always a land use infringement due to topography.
- Will reduce annoying minor infringements on many sloping sites. Noting that daylight omission rules on more steeper sites from dominating structures.

Point Number 943.49

Summary of Decision Requested: Amend Rule 16.3.5 P1 - Daylight admission, to increase daylighting to 45 degrees north and 37 degrees south measured 3.0m above the ground level at all boundaries.

Decision Reasons:

- The rule is unnecessarily restrictive for all sites and lacks consistency with other councils.

Point Number 943.50

Summary of Decision Requested: Amend Rule 22.4.1.6 RD1 (a) Conservation lot subdivision, to clarify if the table allows landowners that have at least 3.5ha of Significant Natural Areas within the 'Hamilton Basin' one lot and an additional one lot for having a Significant Natural Area between 2ha and 5ha.

Decision Reasons:

- No reason provided.

Point Number 943.51

Summary of Decision Requested: Add clause (vi) to Rule 22.4.7 RD1 (b) Esplanade reserves and esplanade strips, as follows:
(vi) costs and benefits of acquiring the land.

Decision Reasons:

- To allow Council to consider the costs and benefits of land purchase.

Point Number 943.52

Summary of Decision Requested: Amend Rule 22.4.9 RD1 (a) Subdivision - Building platform, as follows:
(a) Subdivision, other than an access or utility allotment, must provide a building platform on the proposed lot that:
(i) Has an area of 1,000m² exclusive of boundary setbacks; A shape factor, being either:
A. A circle with a diameter of at least 30m, exclusive of boundary setbacks, or
B. A rectangle of at least 1000m², exclusive of setbacks, and;
C. Containing a building platform being a circle with a diameter of at least 18m;
(ii) Has an average gradient not steeper than 1:8;
(iii) Is certified by a geotechnical engineer as geotechnically stable;
(iv) Has vehicular access in accordance with Rule 14.12.1 P1 (Transportation)
(v) Is not subject to inundation in a 2% AEP storm or flood event;
(vi) A dwelling could be built on as a permitted activity in accordance with Land Use - Building Rules in Rule 22.3.

Decision Reasons:

- Wants to retain existing shape factor and building platform dimensions from the Operative District Plan which have been proven to be effective.
- Certification of a building platform by a geotechnical engineer is not always necessary. Council can apply this on a case by case basis by retaining discretion over this matter under (b)(ii).

Point Number 943.53

Summary of Decision Requested: Amend Section 22.4 Subdivision, to replace the term "Lot" with Record of Title" throughout the section.

Decision Reasons:

- Ensures consistent use of terminology and avoids complicating any boundary relocation by way of amalgamation.

Point Number 943.54

Summary of Decision Requested: Amend the zoning of the property at 669 Horotiu Road, Te Kowhai (Lot 1 DPS 80472), from Rural Zone to Village Zone.

Decision Reasons:

- Located amongst adjacent Village zoned land.
- No logic to this land remaining Rural Zone.

Point Number 943.55

Summary of Decision Requested: Amend Rule 24.3.6.1 P1 (a)(ii) Building setbacks - All boundaries, to have the setback from the centre line of the indicative road.

Decision Reasons:

- No reason provided.

Point Number 943.56

Summary of Decision Requested: Retain on the planning maps, the indicative road connecting Horotiu Road and Te Kowhai Road, Te Kowhai, as notified.

Decision Reasons:

- No reason provided.

Point Number 943.57

Summary of Decision Requested: Retain Rule 24.4.1 RD1 (a) Subdivision – General, as notified.

Decision Reasons:

- No reason provided.

Point Number 943.58

Summary of Decision Requested: No specific decision sought, but the submission opposes Rule 24.3.3.2 P1 - Building, structures or vegetation within an Airport Obstacle Limitation Surface due to a number of effects that the Obstacle Limitation Surface (with respect to the Te Kowhai Airfield) will have on landowners including:

- Requirements for tree topping/removal.
- No clarity where costs lie to removal any infringing obstacle.
- Increase setbacks from existing obstacle limitation surface.
- Two storey dwellings precluded by up to 8m linear.
- Not known if other items will be prohibited/regulated other than structures.
- No clarity on the benefits other than future proofing.
- No reasoning for the 1:5 gradient.

Decision Reasons:

- The submission raises many questions including:
 - What is the demand for IFR capability
 - What are the effects of IFR
 - What are the potential effects of other regulations relating to IFR.
 - How will Te Kowhai purpose meet those commitments.
 - There is no clarity of the benefits, or details of other changes and effects or commitment by the Te Kowhai Airfield other than a desire to future proof the aerodrome.
 - The Obstacle Limitation Surface change is required by CAA rules to implement IFR. However given the information available and reviewed, there is no information that confirms the basis or reason why the 1:5 gradient is necessary.
 - What are the other regulations requiring CAA compliance to allow IFR and what is the potential effect of these regulation on adjoining property owners?
 - What is the degree of commitment of Te Kowhai Airfield to meet those commitments? Will, for example, Te Kowhai Airfield commit to the relocation of their existing structures to the south that infringe the proposed Obstacle Limitation Surface?
 - Questions arise concerning the actual level of demand for IFR capability.
 - What are the probable future effects of IFR.
 - Will IFR result in additional take off and landings and if so what is the change and effect? Will it extend operation hours that will have associated effects on adjoining and nearby landowners?
 - Is there an actual need for aircraft operating in poor weather or low visibility that requires IFR and therefore the OLS?
 - Will IFR lead to flight training and associated effects?
 - Generally the landowners anticipate no known or assured benefits resulting from imposition of the proposed OLS that outweigh the dis-benefits.

Point Number 943.59

Summary of Decision Requested: **Retain** the restricted discretionary 2000m2 minimum net lot area in Rule 24.4.1 RD1 (a) Subdivision – General and discretionary activity status criteria in Rule 24.4.1 RD1(b) as notified.

Decision Reasons:

- No reason provided.

Point Number 943.60

Summary of Decision Requested: **Amend** Rule 24.4.10 RD1 (a) (i) Subdivision - Building platform, to be inclusive of yards.

OR

Amend Rule 24.4.10 RD1 (a) (i) - Subdivision - Building platform, as follows:

(i) A circle with a diameter of at least ~~18~~ 15m exclusive of yards; or

AND

Any consequential amendments to other residential zones.

Decision Reasons:

- The 18m diameter is not achievable where a road frontage is 20m (Rule 24.4.9) and side yards (Rule 24.3.6.1) which equates to a 17m maximum diameter circle exclusive of yards.
- The 18m circle exclusive of yards is too restrictive for many sites. The requirement would be difficult to achieve or many sites typically being 20m in length.
- There is no obvious planning outcome or support for an 18m standard.

Point Number 943.61

Summary of Decision Requested: **Amend** Rule 24.4.4 C1 (a) Subdivision - Amendments to cross lease and flats plans and conversions, to be a Permitted activity subject to Certificate of Compliance.

AND

ADD criteria to Rule 24.4.4 - Subdivision - Amendments to cross lease and flats plans and conversions, as follows:

Amendments shall be for the purpose of showing alterations to existing buildings or additional lawfully established buildings.

The alteration shall be either permitted or otherwise lawfully established.

Decision Reasons:

- Lots are usually fully developed without additional adverse effects.
- Will avoid unnecessary consent applications and streamline the process that has no adverse impacts.
- The Certificate of Compliance could be declined and controlled resource consent required.

Point Number 943.62

Summary of Decision Requested: **Amend** the zoning of the property at 648 Te Kowhai Road, Te Kowhai (Lot 3 DP 361630) from Rural Zone to Village Zone where the land falls within the Regional Policy Statement Urban Limit (2008).

Decision Reasons:

- Falls within the Regional Policy Statement Urban Limit (2008).
- Land lies adjacent to the Village Zone; is within the urban limits; supports the long term need for expansion; has the same attributes as land zoned Village; is adjacent to the village; rezoning would otherwise be a matter of timing subject to demand.

Point Number 943.63

Summary of Decision Requested: **Amend** Table 14.12.5.14 – Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) to change the following for Access leg to an allotment residential, village:

- Minimum Road/ROW Reserve Width to 3m;
- Seal width of 3m up to 6 units or lots;
- Minimum Road/ROW Reserve Width to 5.5m and 6m for more than 6 units or lots; and
- Seal width of 4m for 6 or more units or lots.

AND

Delete the 'Access lot residential, village' from Table 14.12.5.14.

AND

Any consequential amendments required for all zones.

Decision Reasons:

- Widths sought would be consistent with other Council residential widths.
- Tenure of the access lot is no justification for minimum width.
- Width of access should be based on usage, not tenure as tenure is not relevant in determining access formation requirements.

Point Number	943.64
Summary of Decision Requested:	Amend Rule 23.2.3.1 P1 (a)(iii) Earthworks – General, to include access/driveway.
Decision Reasons:	<ul style="list-style-type: none"> • Earthworks for access/driveway is a part of the residential earthworks to establish a dwelling.
Point Number	943.65
Summary of Decision Requested:	Amend Rule 23.3.7.5 P1 (a) – Building setback - Waterbodies, to carry over existing rule from the Operative District Plan.
Decision Reasons:	<ul style="list-style-type: none"> • The setbacks in the Notified version need to be workable and known parameters as to when the rule applies.
Point Number	943.66
Summary of Decision Requested:	Add clause (v) to Rule 23.4.12 RD1 (b) – Subdivision – Esplanade reserves and esplanade strips, as follows; <i>(v) costs and benefits of acquiring the land</i>
Decision Reasons:	<ul style="list-style-type: none"> • To allow Council to consider the costs and benefits of land purchase.
Point Number	943.67
Summary of Decision Requested:	No specific decision sought, but the submission states: The rule is too restrictive and has not prevented the significant development Zone Subdivision of dwellings within the Airport Subdivision Control Boundary or inside the SEL 95 Boundary. The rule has created an anomaly of larger lots over 1.1 ha whereas the majority of surrounding lots are closer to 5000m2. There is no longer a valid reason to retain the average.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	943.68
Summary of Decision Requested:	Amend Rule 22.4.1.5 RD1 (i) and (iii) Rural Hamlet Subdivision to enable up to 8 Records of Title to be relocated to form an 8 Lot cluster and the minimum lot size reduced to 5,000m2 or less.
Decision Reasons:	<ul style="list-style-type: none"> • Up to 8 Records of Title can be relocated to form an 8 lot cluster and that the minimum lot area is reduced to 5000m2 or less (more residential than lifestyle); • Has the combined effect of creating a Hamlet that can reasonable be visually integrated in the rural environment subject to landscaping as well as provide an incentive for multiple title land owners to utilise available poor quality soil to locate the hamlets without a significant degree of inconsistency with rural objectives and policy. • Provides an improved incentive for landowners with multiple titles not to construct a dwelling in each existing title and create scattered dwellings in the zone. • There are ongoing technological advances in farming to lower costs and improve efficiencies to help offset productivity. The fact farmers are willing to subdivide land or relocate existing titles indicates that such cadastral changes do not have adverse effects on their farming operations and by extension the district productive nature of rural farmland.
Point Number	943.69
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to be consistent with terminology, e.g. the definition of a Significant Natural Area does not match the names on the planning maps.
Decision Reasons:	<ul style="list-style-type: none"> • Definitions provide for Significant Natural Areas to be as that identified on the map. Planning maps show no area of that same name. • Cannot expect layperson to extrapolate or assume what a Significant Natural Area is in the District Plan.
Point Number	943.70
Summary of Decision Requested:	Amend Rule 22.4.7 RD1 (b) Esplanade reserves and esplanade strips, to include as a matter of discretion, RMA s230(3).
Decision Reasons:	<ul style="list-style-type: none"> • RMA s230(3) provides for the requirement for esplanade reserves to be waived through the resource consent process and hence provide the full gambit of possibilities allowed by the RMA notwithstanding identified high priority areas. • Too often a presumption in plans is that reserves must be taken in all cases. This presumption is further negatively amplified by Council refusals to help the cost of fencing esplanade reserves (there is no legislation that precludes payments) or reluctance to take responsibility to manage and maintain esplanade reserves.
Point Number	943.71
Summary of Decision Requested:	Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • Various reasons as outlined in the submission.
Point Number	943.72
Summary of Decision Requested:	Amend Rule 23.4.12 RD1 (b) e – Subdivision – Esplanade reserves and esplanade strips, to include as a matter of discretion, RMA s230(3).
Decision Reasons:	

- RMA s230(3) provides for the requirement for esplanade reserves to be waived through the resource consent process and hence provide the full gambit of possibilities allowed by the RMA notwithstanding identified high priority areas.
- Too often a presumption in plans is that reserves must be taken in all cases. This presumption is further negatively amplified by Council refusals to help the cost of fencing esplanade reserves (there is no legislation that precludes payments) or reluctance to take responsibility to manage and maintain esplanade reserves.

Point Number 943.73

Summary of Decision Requested: Retain Village Zone.

Decision Reasons:

- No reason provided.

Submitter Number: 944 **Submitter:** Janet Evans

On behalf of: Brodick Farms Ltd

Point Number 944.1

Summary of Decision Requested: **Amend** the planning maps by deleting the identified areas (Significant Natural Area and Significant Amenity Landscape) from the property at 849 Matahuru Road, Matahuru.

Decision Reasons:

- Because the site has "identified features", tracks and earthworks are limited by Rule 22.2.3.3 Earthworks - Significant Natural Areas.
- The only access to the property to farm it in an economic and safe way is by tracks.
- Under the rules, maintenance would be problematic, becoming a health and safety issue and therefore making the land incapable of reasonable use.
- The submission includes photos of the tracks on the property.
- The submitter does not consider that the property meets either Significant Natural Area or Significant Amenity Landscape status as they were not clearly identified on the map that was sent to the submitter and, as such, the submitter does not have enough information to make an informed decision.
- The property has not been ground-truthed and therefore, there is no accurate details as to why the land qualifies for the Significant Natural Area and Significant Amenity Landscape overlays.

Submitter Number: 945 **Submitter:** First Gas Limited

Point Number 945.1

Summary of Decision Requested: **Retain** activity specific condition 14.3.1.3(3)(a) relating to Permitted Activities.

Decision Reasons:

- The submitter supports the inclusion of Activity P4 which provides for earthworks associated with infrastructure as a permitted activity, noting that the submitter has sought to amend the definition of infrastructure to include above ground incidental equipment.

Point Number 945.2

Summary of Decision Requested: **Retain** the Restricted Discretionary activity status of Rule 14.3.3 Restricted Discretionary Activities.

Decision Reasons:

- The submitter supports the Restricted Discretionary status under the rule.

Point Number 945.3

Summary of Decision Requested: **Retain** Rule 14.7.1 - Permitted Activities and the rule framework for liquid fuels and gas pipelines and storage facilities.

Decision Reasons:

- The submitter supports the rule framework for liquid fuels and gas pipelines and storage facilities, including P1, P2 and P3 and the associated activity specific conditions.

Point Number 945.4

Summary of Decision Requested: **Retain** Rule 14.7.2 Discretionary Activities.

Decision Reasons:

- The submitter supports a Discretionary activity status where the permitted activity conditions in 14.7.1 are not complied with.

Point Number 945.5

Summary of Decision Requested: **Add** new activities to Rule 16.1.3: RD1 Restricted Discretionary Activities as follows:

Establishment of a residential activity or use within 20m of a gas transmission pipeline.

Establishment of a residential activity or use within 60m of the gas network (other than a gas transmission pipeline).

Establishment of a sensitive land use (excluding residential activities) within 60m of the gas network.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- In order to protect the gas network inclusive of delivery points the submitter seeks to include a minimum setback between a delivery point and sensitive land use.
- The submitter seeks minimum setbacks between the gas network (excluding distribution pipelines) and sensitive activities to ensure the safety of the gas transmission network and the people living and working near this network.

Point Number 945.6

Summary of Decision Requested: **Add** a new matter of discretion to Rule 16.1.3 RD1(b) Restricted Discretionary Activities as follows:
(k) The safe, effective and efficient operation, maintenance and upgrade of the gas network.
 AND
 Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential reverse sensitivity effects on the gas network inclusive of delivery points.

Point Number 945.7

Summary of Decision Requested: **Add** a new condition to Rule 16.2.4.1 P1 Earthworks general as follows:
(x) Earthworks to a depth of greater than 200mm must be located a minimum of 12m from the centre line of a gas transmission pipeline.
 AND
 Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of an additional condition under the Earthworks-General Rules within the Residential Zone.
- It is requested to include an additional condition requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200mm is requested within the Residential zone rules.

Point Number 945.8

Summary of Decision Requested: **Add** a new matter of discretion to Rule 16.2.4.1 RD1(b) Earthworks - General as follows:
Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.

Decision Reasons:

- The submitter seeks to include an additional matter over which the Council's discretion shall be limited under RD1 to address potential effects of earthworks on the gas network.

Point Number 945.9

Summary of Decision Requested: **Add** the following subdivision rule to Rule 16.4 Subdivision:
Subdivision - Site containing a gas transmission pipeline:
a) The subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.
b) Council's discretion shall be restricted to the following matters:
(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.
(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.
(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines- Gas and Liquid Petroleum - Parts 1 to 3.
(iv) The outcome of any consultation with First Gas Limited.
 AND
 Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Residential Zone.
- The addition of a new rule would make subdivision of a site containing a gas transmission pipeline a restricted discretionary activity.

Point Number 945.10

Summary of Decision Requested: **Add** a new Restricted Discretionary Activity to Rule 20.1 Land Use Activities as follows:
Establishment of a residential activity or use within 20m of a gas transmission pipeline.
Establishment of a residential activity or use within 60m of the gas network (other than a gas transmission pipeline).
Establishment of a sensitive land use (excluding residential activities) within 60m of the gas network.
 AND
Add a new matter of discretion to Rule 20.1 Land use - Activities as follows:
Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure.
 AND
 Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- In order to protect the gas network inclusive of delivery points the submitter seeks to include a minimum setback between a delivery point and sensitive land use.
- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential reverse sensitivity effects on the gas network inclusive of delivery points.

Point Number 945.11

Summary of Decision Requested: **Add** an additional condition to Rule 20.2.5.1 PI Earthworks-General as follows:
(g) Earthworks to a depth of greater than 200mm must be located a minimum of 12m from the centre line of a gas pipeline.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of an additional condition under the Earthworks-General Rules within the Industrial Zone.
- It is requested to include an additional condition requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200m is requested within the Industrial Zone rules.

Point Number 945.12

Summary of Decision Requested: **Add** a new matter of discretion to Rule 20.2.5.1 RD1 (b) as follows:
(b) (viii) Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential effects of earthworks on gas transmission lines.

Point Number 945.13

Summary of Decision Requested: **Add** a new rule to Chapter 20.4: Subdivision as follows:
Subdivision - Site containing a gas transmission pipeline:
(a) The subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.
(b) Council's discretion shall be restricted to the following matters:
(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.
(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.
(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines-Gas and Liquid Petroleum-Parts 1 to 3.
(iv) The outcome of any consultation with First Gas Limited.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Industrial zone.
- The addition of a new rule would make subdivision of a site containing a gas transmission pipeline a restricted discretionary activity.

Point Number 945.14

Summary of Decision Requested: **Add** a new Restricted Discretionary Activity to Rule 21.1 Land Use - Activities as follows:
Establishment of a residential activity or use within 20m of a gas transmission pipeline.
Establishment of a residential activity or use within 60m of the gas network (other than a gas transmission pipeline).
Establishment of a sensitive land use (excluding residential activities within 60m of the gas network.
AND
Add a new matter of discretion to Rule 21.1 Land Use - Activities as follows:
(g) The extent to which the development will avoid or mitigate conflict with the gas network.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- In order to protect the gas network inclusive of delivery points the submitter seeks to include a minimum setback between a delivery point and sensitive land use.
- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential reverse sensitivity effects on the gas network inclusive of delivery points.

Point Number 945.15

Summary of Decision Requested: **Add** a new condition (x) to Rule 21.2.5.1 PI (a) Earthworks - General as follows:
(x) Earthworks to a depth of greater than 200mm must be located to a minimum of 12m from the centre line of a gas pipeline.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of an additional condition under the Earthworks-General Rules within the Industrial Zone.
- It is requested to include an additional condition requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200m is requested within Industrial Zone rules.

Point Number 945.16

Summary of Decision Requested: **Add** a new matter of discretion to Rule 21.2.5.1 RD1 (b) Earthworks - General as follows:
(p) Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential effects of earthworks on gas pipelines.

Point Number 945.17

Summary of Decision Requested: **Add** a new rule to Rule 21.4: Subdivision as follows:
Subdivision - Site containing a gas transmission pipeline:
(g) The subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.
(b) Council's discretion shall be restricted to the following matters:
(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.
(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.
(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines-Gas and Liquid Petroleum-Parts 1 to 3.
(iv) The outcome of any consultation with First Gas Limited.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Industrial zone.
- The addition of a new rule would make subdivision of a site containing a gas transmission pipeline a restricted discretionary activity.

Point Number 945.18

Summary of Decision Requested: **Add** a new Restricted Discretionary Activity to Rule 22.1.3 Restricted Discretionary Activities as follows:
Establishment of a residential activity or use within 20m of a gas transmission pipeline.
Establishment of a residential activity or use within 60m of the gas network (other than a gas transmission pipeline).
Establishment of a sensitive land use (excluding residential activities within 60m of the gas network.
AND
Add a new matter of discretion to Rule 22.2.3.1 Restricted Discretionary Activities as follows:
(g) The extent to which the development will avoid or mitigate conflict with the gas network.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- In order to protect the gas network inclusive of delivery points the submitter seeks to include a minimum setback between a delivery point and sensitive land use.
- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential reverse sensitivity effects on the gas network inclusive of delivery points.

Point Number 945.19

Summary of Decision Requested: **Add** a new clause (vii) to Rule 22.2.3.1 P2 (a) Earthworks - General as follows:
(vii) Earthworks to a depth of greater than 200mm are to be located a minimum of 12m from the centre line of a gas pipeline.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new earthworks rule requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200m.

Point Number 945.20

Summary of Decision Requested: **Add** a new matter of discretion to Rule 22.2.3.1 RD1 (b) Earthworks - General as follows:
(xii) Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential effects of earthworks on gas transmission lines.

Point Number 945.21

Summary of Decision Requested: **Add** a new rule to Rule 22.4.1 Subdivision as follows:
Subdivision - Site containing a gas transmission pipeline:
(g) The subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.

(b) Council's discretion shall be restricted to the following matters:

(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.

(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.

(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines-Gas and Liquid Petroleum-Parts 1 to 3.

(iv) The outcome of any consultation with First Gas Limited.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Industrial zone.
- The addition of a new rule would make subdivision of a site containing a gas transmission pipeline a restricted discretionary activity.

Point Number

945.22

Summary of Decision Requested:

Add a new Restricted Discretionary Activity to Rule 23.1 Land Use Activities as follows:

Establishment of a residential activity or use within 20m of a gas transmission pipeline.

Establishment of a residential activity or use within 60m of the gas network (other than a gas transmission pipeline).

Establishment of a sensitive land use (excluding residential activities within 60m of the gas network.

AND

Add the following matter of discretion to Rule 23.1 Land Use Activities:

(a) The extent to which the development will avoid or mitigate conflict with the gas network.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- In order to protect the gas network inclusive of delivery points the submitter seeks to include a minimum setback between a delivery point and sensitive land use.
- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential reverse sensitivity effects on the gas network inclusive of delivery points.

Point Number

945.23

Summary of Decision Requested:

Add a new condition to Rule 23.2.3.1.P2(a)(vii) Earthworks-General:

(vii) Earthworks to a depth of greater than 200mm are to be located a minimum of 12m from the centerline of a gas pipeline.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new earthworks rule requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200mm.

Point Number

945.24

Summary of Decision Requested:

Add a matter of discretion to Rule 23.2.3.1 RD1 (b) Earthworks-General as follows:

(vii) Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential effects of earthworks on gas transmission lines.

Point Number

945.25

Summary of Decision Requested:

Add a new rule to Rule 23.4 - Subdivision as follows:

Subdivision-Site containing a gas transmission pipeline:

(a) The subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.

(b) Council's discretion shall be restricted to the following matters:

(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.

(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.

(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines-Gas and Liquid Petroleum-Parts 1 to 3.

(iv) The outcome of any consultation with First Gas Limited.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Rural Zone.
- The addition of a new rule would make subdivision of a site containing a gas transmission pipeline a restricted discretionary activity.

Point Number 945.26

Summary of Decision Requested: **Add** a new condition to Rule 24.2.4.1.P1 (a) Earthworks - General as follows:
(x) Earthworks to a depth of greater than 200mm are to be located a minimum of 12m from the centre line of a gas pipeline.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new earthworks rule requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200mm.

Point Number 945.27

Summary of Decision Requested: **Add** a new matter of discretion to Rule 24.2.4.1 RD1 (b) Earthworks - General RD1 as follows:
(xii) Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential effects of earthworks on gas transmission lines.

Point Number 945.28

Summary of Decision Requested: **Add** a new subdivision rule to Rule 24.4 Subdivision as follows:
Subdivision-Site containing a gas transmission pipeline:
(a) The subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.
(b) Council's discretion shall be restricted to the following matters:
(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.
(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.
(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines-Gas and Liquid Petroleum-Parts 1 to 3.
(iv) The outcome of any consultation with First Gas Limited.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Country Living Zone.
- The addition of a new rule would make subdivision of a site containing the gas network a restricted discretionary activity.

Point Number 945.29

Summary of Decision Requested: **Add** a new condition (viii) to Rule 27.2.10 P1 as follows:
(viii) Earthworks to a depth of greater than 200mm are to be located a minimum of 12m from the centreline of a gas transmission pipeline.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new earthworks rule requiring a 12m setback from gas transmission pipelines where earthworks are proposed to a depth of greater than 200mm.

Point Number 945.30

Summary of Decision Requested: **Add** a matter of discretion to Rule 27.2.10 RD1 (b) - Earthworks as follows:
(xii) Effects on the safe, effective and efficient operation, maintenance and upgrade of infrastructure, including access.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to include an additional matter over which Council's discretion shall be limited under RD1 (b) to address potential effects of earthworks on gas transmission lines.

Point Number 945.31

Summary of Decision Requested: **Add** a new rule to Rule 27.4 Subdivision as follows:
Subdivision – Site containing a gas transmission pipeline
(a) Subdivision of land containing a gas transmission pipeline is a restricted discretionary activity.
(b) Council's discretion shall be restricted to the following matters:
(i) The extent to which the subdivision design avoids or mitigates conflict with the gas infrastructure and activities.
(ii) The ability for maintenance and inspection of pipelines including ensuring access to the pipelines.
(iii) Consent notices on titles to ensure on-going compliance with AS2885 Pipelines-Gas and Liquid Petroleum-Parts 1 to 3.
(iv) The outcome of any consultation with First Gas Limited.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- To address reverse sensitivity effects, the submitter seeks the inclusion of a new rule under the Subdivision rules within the Rural zone.
- The addition of a new rule would make subdivision of a site containing a gas transmission pipeline a restricted discretionary activity.

Point Number 945.32

Summary of Decision Requested: Retain Section 1.5.7.7 Energy as notified.

Decision Reasons:

- Under section 1.5.7.7 the Proposed District Plan recognises the national and regional importance of existing energy resources and infrastructure, which includes (but is not limited to) gas. The submitter considers these provisions to be appropriate.

Point Number 945.33

Summary of Decision Requested: Amend Section 6.2 National Grid of the Proposed District Plan, as sought in the submission.

OR

Add a definition for "Regionally Significant Infrastructure" and corresponding objective and policy framework for "Regionally Significant Infrastructure" in order to give effect to the Waikato Regional Policy Statement.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter generally supports the intent of the chapter but notes that regionally significant infrastructure is neither defined in the District Plan nor is the term used in the objective and policy framework.
- The submitter is of the opinion that its transmission pipeline is nationally significant and seeks that those provisions referencing the National Grid be amended to also include reference to the gas transmission pipeline. First Gas acknowledges that its distribution pipeline differs from its transmission pipeline in this regard.
- Alternatively, the District Plan should include a definition for, and corresponding objective and policy framework for Regionally Significant Infrastructure in order to give effect to the RPS for Waikato.

Point Number 945.34

Summary of Decision Requested: Retain Objective 6.1.1 Development, operation and maintenance of infrastructure.

Decision Reasons:

- The submitter generally supports the inclusion of Objective 6.1.1 which recognises the benefit of infrastructure to the social, economic, cultural and environmental well-being of the district.

Point Number 945.35

Summary of Decision Requested: Add a new clause (vii) to Policy 6.1.2 Development, operation and maintenance as follows:

(vii) the need to access infrastructure.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter supports the inclusion of Policy 6.1.2 and in particular the acknowledgement that linear infrastructure has locational, functional and operational constraints. The submitter seeks the addition of an additional sub policy to address access.

Point Number 945.36

Summary of Decision Requested: Retain Policy 6.1.4 - Infrastructure benefits in the Proposed District Plan.

Decision Reasons:

- The submitter supports the inclusion of Policy 6.1. which recognizes the benefit of infrastructure to the social, economic, cultural and environmental well-being of the district.

Point Number 945.37

Summary of Decision Requested: Retain Policy Objective 6.1.6 - Reverse Sensitivity.

Decision Reasons:

- The submitter generally supports the inclusion of Objective 6.1.6 which seeks to ensure that infrastructure is protected from reverse sensitivity effects and not compromised.

Point Number 945.38

Summary of Decision Requested: Amend Policy 6.1.7 Reverse Sensitivity effects and infrastructure to include reference to the ability to access infrastructure which may be compromised through subdivisions in particular.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter generally supports the inclusion of Policy 6.1.7 which seeks to avoid reverse sensitivity effects on infrastructure from subdivision, use and development. The submitter seeks that the policy also include reference to the ability to access the infrastructure

which may be compromised through subdivisions in particular.

Point Number 945.39

Summary of Decision Requested: **Amend** Objective 6.2.1 - National Grid as follows:

Objective 6.2.1 - National Grid and Gas Network

(a) The national significance of the National Grid and Gas Network is recognised and protected.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter is of the opinion that its transmission pipeline is nationally significant and seeks that those provisions referencing the National Grid be amended to also include reference to the gas transmission pipeline. The submitter acknowledges that its distribution pipeline differs from its transmission pipeline in this regard.
- The submitter seeks minimum setbacks between the gas network and sensitive activities to ensure the safety of the gas network and the people living and working near this network.

Point Number 945.40

Summary of Decision Requested: **Amend** Policy 6.2.2 Recognise the national grid as follows:

Policy 6.2.2 Recognise the national grid and Gas network

(a) Recognise the operational, functional and technical constraints of the National Grid, Gas Network, and the interconnectedness of networks.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter is of the opinion that its transmission pipeline is nationally significant and seeks that those provisions referencing the National Grid be amended to also include reference to the gas transmission pipeline. First Gas acknowledges that its distribution pipeline differs from its transmission pipeline in this regard.
- The submitter seeks minimum setbacks between the gas network and sensitive activities to ensure the safety of the gas network and the people living and working near this network.

Point Number 945.41

Summary of Decision Requested: **Amend** Policy 6.2.3 Operation and development of the National Grid as follows:

Policy 6.2.3 Operation and development of the National Grid and Gas Network

(a) Provide for the operation, upgrading and development of the National Grid and Gas Network.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter is of the opinion that its transmission pipeline is nationally significant and seeks that those provisions referencing the National Grid be amended to also include reference to the gas transmission pipeline. The submitter acknowledges that its distribution pipeline differs from its transmission pipeline in this regard.
- The submitter seeks minimum setbacks between the gas network and sensitive activities to ensure the safety of the gas network and the people living and working near this network.

Point Number 945.42

Summary of Decision Requested: **Amend** Policy 6.2.4 - Maintenance and minor upgrade the National Grid as follows:

Policy 6.2.4 - Maintenance and minor upgrade the National Grid and Gas Network

(a) Enable the repair, maintenance, replacement and minor upgrade of the National Grid and Gas Network.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter is of the opinion that its transmission pipeline is nationally significant and seeks that those provisions referencing the National Grid be amended to also include reference to the gas transmission pipeline. First Gas acknowledges that its distribution pipeline differs from its transmission pipeline in this regard.
- The submitter seeks minimum setbacks between the gas network and sensitive activities to ensure the safety of the gas network and the people living and working near this network.

Point Number 945.43

Summary of Decision Requested: **Add** to Policy 6.2.6 - Reverse Sensitivity and the National Grid as follows:

Policy 6.2.6 - Reverse Sensitivity ~~and~~ in relation to the National Grid and the Gas Network

(a)...

(b) Manage subdivision so that the access, operation, maintenance, upgrading and development of the Gas Network is not compromised by ensuring that:

(i) The Gas Network is identified on the planning maps.

(ii) Sensitive land uses, buildings and structures that may compromise the Gas Network are set back appropriately.

(iii) Subdivision is managed on land containing the gas transmission pipeline to avoid subsequent land use from compromising the access, operation, maintenance and upgrade of the pipeline.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter is of the opinion that its transmission pipeline is nationally significant and seeks that those provisions referencing the National Grid be amended to also include reference to the gas transmission pipeline. The submitter acknowledges that its distribution pipeline differs from its transmission pipeline in this regard.
- The submitter seeks minimum setbacks between the gas network and sensitive activities to ensure the safety of the gas network and the people living and working near this network.

Point Number 945.44

Summary of Decision Requested: **Add** a new definition to Chapter 13: Definitions for "Gas Network" as follows:

Gas Network:

A network for the purpose of conveying high pressure gas and liquid petroleum including pipelines and above ground incidental equipment.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to add a definition of the gas network to ensure that the entire network including gas transmission lines and above ground incidental equipment are provided for within the District Plan.

Point Number 945.45

Summary of Decision Requested: **Amend** the definition of "Infrastructure" in Chapter 13: Definitions as follows:

(a) pipelines that distribute or transmit natural or manufactured gas, petroleum, biofuel or geothermal energy and above ground incidental equipment;

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to amend the definition of infrastructure to ensure this includes not only gas transmission pipelines but also above ground incidental equipment.

Point Number 945.46

Summary of Decision Requested: **Retain** the definition of "Minor Upgrading of Existing Infrastructure" in Chapter 13: Definitions.

Decision Reasons:

- The submitter supports the definition of 'minor upgrading of existing infrastructure' which provides for the realignment, configuration, relocation or replacement of infrastructure as a permitted activity providing this meets the specified conditions.

Point Number 945.47

Summary of Decision Requested: **Retain** section 14.1(1) - Introduction.

Decision Reasons:

- The submitter supports the inclusion of 14.1(1) and the approach that the Infrastructure and Energy chapter shall apply across the district in all zones and overlays in the district plan and that the zone chapters and their associated overlays, objectives, policies and rules do not apply to infrastructure and energy activities unless specifically referred to within this Infrastructure and Energy Chapter.

Point Number 945.48

Summary of Decision Requested: **Retain** Rule 14.3.1 (a) P1 Permitted Activities.

Decision Reasons:

- The submitter supports the inclusion of Activity P1 which provides for the operation, maintenance, repair and removal of existing infrastructure as a permitted activity.

Point Number 945.49

Summary of Decision Requested: **Retain** Rule 14.3.1 (a) P2 Permitted Activities.

Decision Reasons:

- The submitter supports the inclusion of Activity P2 which provides for the minor upgrading of existing infrastructure as a permitted activity.

Point Number 945.50

Summary of Decision Requested: **Retain** Designation R1 being gas transmission pipelines within the District Plan Maps.

Decision Reasons:

- The submitter supports the inclusion of designation R1 on the District Plan Maps.

Point Number 945.51

Summary of Decision Requested: **Retain** gas transmission pipelines within the Proposed District Plan Maps.

Decision Reasons:

- The submitter supports the annotation of the submitter's transmission pipelines on the District Plan Maps as currently proposed.
- The identification of significant infrastructure such as the gas transmission pipelines is important when considering applications for subdivision and/or development. The submitter considers it is an appropriate and effective way to alert third parties of the presence of the pipelines.

Point Number 945.52

Summary of Decision Requested: **Add** the delivery point stations within the District Plan Maps (see plans attached to the submission).
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to ensure the gas network is protected from reverse sensitivity effects. Delivery point stations are critical to the operation of the pipelines for the distribution of gas which the VRPS identifies as regionally significant infrastructure and requires to be recognized and protected.

Point Number 945.53

Summary of Decision Requested: **Add** distribution lines to the Proposed District Plan Maps (see plans attached to submission).
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The submitter seeks to ensure the gas network inclusive of gas distribution lines are protected from reverse sensitivity effects.

Point Number 945.54

Summary of Decision Requested: **Amend** the Proposed District Plan to make consequential amendments as required to achieve the relief sought.

Decision Reasons:

- Various, as outlined in the submission.

Submitter Number: 946 **Submitter:** Dee Bond

Point Number 946.1

Summary of Decision Requested: No specific decision sought, but the submission requests more information regarding the implications of having a Building B ranking for Historic Heritage Item ID 14 - Tuakau Hotel before a final decision is made.

Decision Reasons:

- The submitter took on the building (the Tuakau Hotel) 10 years ago in a run-down state and invested heavily to bring it up to the award-winning state it is in today.

Point Number 946.2

Summary of Decision Requested: No specific decision sought, but the submission requests that information as to why the Alexandra Redoubt, Tuakau, dating from 1863, has been removed from the list of Historic Heritage Items that was proposed.

Decision Reasons:

- No reasons provided.

Point Number 946.3

Summary of Decision Requested: No specific decision sought, but the submission requests that information as to why LaValla, 131 Dominion Road, Tuakau, dating from 1921, was also removed from the proposed list of Historic Heritage Items.

Decision Reasons:

- No reasons provided.
- The original submission includes an excerpt of the history of LaValla (from the LaValla website).

Point Number 946.4

Summary of Decision Requested: **Amend** Schedule 30.2 Notable Trees, as follows;
21 - Kauri - ~~to~~ 10 Liverpool Street, Tuakau.

Decision Reasons:

- The Kauri tree is at 10 Liverpool Street, Tuakau, within the site of the historic Tuakau Post Office, now the Tuakau Museum.
- The submission includes photos of the Kauri tree.

Point Number 946.5

Summary of Decision Requested: **Amend** Rule 16.2.2 Servicing and hours of operation - Bankart Street and Wainui Road Business Overlay Area, to include "Raglan".

Decision Reasons:

- No reasons provided.

Point Number 946.6

Summary of Decision Requested:	Amend Rule 16.3.6 P3 Building Coverage, to include "Raglan".
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	946.7
Summary of Decision Requested:	Amend Rule 16.2.6.3 P1(a)(iii) Notable tree - Activities within the dripline, as follows: (iii) No Discharge of an eco-toxic substance;
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	946.8
Summary of Decision Requested:	No specific decision sought, but submission questions with regards to Rule 16.3.9.1 P3 Boundary setbacks - All boundaries, why a garage should be set back behind the front facade of the dwelling. The submission considers a garage should be on the street frontage, with the home setback to reduce the street noise to the house.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	946.9
Summary of Decision Requested:	Amend Rule 16.1.2 P4(c) Home occupation, to be limited to 2 persons multiplied by the number of bedrooms.
Decision Reasons:	<ul style="list-style-type: none"> Submitter does not think that the maximum number (2 persons) as notified, allows for a small business to be run from home and grow. Two people is an arbitrary number for which there is no logical basis. Submitter runs a business from home and has more than two. As long as there is adequate parking and sufficient toilets, the maximum number should not matter. Two people in total is too few.
Point Number	946.10
Summary of Decision Requested:	No specific decision sought, but submission states that Rule 16.1.2 P5 hours of Temporary Events, precludes multi-day wedding functions, that are normal in some cultures, after 8:30pm at night.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	946.11
Summary of Decision Requested:	No specific decision sought, but submission considers Rule 16.1.2 P9 Homestay limits to 4 temporary residents should be driven by the size of the property for carparking and number of bedrooms.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	947	Submitter:	Stuart Quigley
Point Number	947.1		
Summary of Decision Requested:	Amend the zoning of the property at 233 Wilton Collieries Road, Glen Massey, from Rural Zone to Countryside Living Zone; OR Amend the zoning of the property at 233 Wilton Collieries Road, Glen Massey, from Rural Zone to Glen Massey Village Living Zone; AND Amend the Proposed District Plan as necessary including provisions, consequential additions and cross references.		
Decision Reasons:	<ul style="list-style-type: none"> The property is no longer sustainable in its rural nature given the size of the lot (just under 40 ha) and proximity to Glen Massey village. As a consequence, it would be inconsistent with the Rural Zone. Properties closest to the site are zoned Countryside Living or Residential and the Glen Massey village school (its only amenity and centre of Glen Massey), is less than 1500m walking distance. Subdivision would be an efficient use of the property given the proximity to the Glen Massey Village Zone, the school, college bus route and being 10 minutes from Ngaruawahia. The submitter has a stalled subdivision for 16 lots on the property. Harcourts, LJ Hooker and P Sloon Realty are constantly getting enquiries about the availability of Countryside Living lots which are difficult to come by in the Glen Massey area. Rezoning 233 Wilton Collieries Road would be consistency with the objectives and policies that relate to the management of reverse sensitivity issues. 		
Point Number	947.2		
Summary of Decision Requested:	Retain the extent of land zoned as Countryside Living and Residential in and around Glen Massey village; AND Amend the Proposed District Plan as necessary, including provisions, consequential additions and cross references.		
Decision Reasons:			

- No reasons provided.

Point Number 947.3

Summary of Decision Requested: **Amend** Policy 5.6.2 Country Living Character (specific amendments are not provided);
AND
Amend the Proposed District Plan as necessary including provisions, consequential additions and cross references.

Decision Reasons:

- Submitter considers that the policy would include a 16 lot subdivision to occur on the property at 233 Wilton Collieries Road, Glen Massey.
- Submitter states that "with the definition of 'Country Living Character', then this site should be considered necessary, particularly due to the proposed rezoning of QFT site from Rural to Country Side Living."

Point Number 947.4

Summary of Decision Requested: **Amend** Policy 5.6.3 Subdivision within the Country Living Zone, as follows (or with words to similar effect):
(a) Subdivision, building and development within the Country Living Zone ensures that:
...
(vi) where sites are in close to a village Zone, subdivision can be up wards of 5,000m² unreticulated.
AND

Amend the Proposed District Plan as necessary including provisions, consequential additions and cross references.

Decision Reasons:

- Some activities are appropriate in the rural environment and the effects are to be accepted.
- Including urban activities in the list of features for the rural environment where a site is in close proximity to an urban village is appropriate.
- It is important to ensure a consistent direction with objectives and policies relating to reverse sensitivity and to provide a policy basis so that the reduction and mitigation of reverse sensitivity issues are considered with subdivision applications in the Rural and Countryside Living Zones.
- The property at is bounded by the Country Living Zone and Residential Zone, is within 1500m of the Glen Massey Village Zone and is therefore no longer appropriate to be zoned Rural. 233 Wilton Collieries Road, Glen Massey.

Point Number 947.5

Summary of Decision Requested: **Add** a new activity to Rule 23.1.1 Permitted Activities, as follows (or with words to similar effect):
P5 - child care facility - A child care facility established prior to notification of the District Plan and within 1 km of a Village Zone.
AND

Amend the Proposed District Plan as necessary including provisions, consequential additions and cross references.

Decision Reasons:

- The submitter is concerned that their activities "may not fit within the definition of Rural Activity on the basis that 16 large country living lots have been developed", but states that they are "confident they would fit within the definition of rural activity, under permitted activities".
- A Village Living Zone would be the best for the property at 233 Wilton Collieries Road, Glen Massey.

Point Number 947.6

Summary of Decision Requested: **Amend** Rule 23.1.2 Discretionary Activities, as follows (or with words to similar effect):
(1) The activities listed below are discretionary activities, unless in close proximity 1 km to a Village Zone.
...
D5 An education facility, excluding a child care facility for up to 10 children and P5 above.
AND

Amend the Proposed District Plan as necessary including provisions, consequential additions and cross references.

Decision Reasons:

- Consideration is needed for some of the discretionary activities given proximity to Tamahere Village Green, specifically D3, D4, D5, D7 and D9.

Point Number 947.7

Summary of Decision Requested: No specific decision sought, but the submitter supports in part Rule 24.4.1 Subdivision - General;
AND
Amend the Proposed District Plan as necessary including provisions, consequential additions and cross references.

Decision Reasons:

- If the property at 233 Wilton Collieries Road, Glen Massey is not rezoned due to the proximity of 700-3000 acre commercial farming, then it should be zoned Village Zone given its proximity to Glen Massey School and the small village. This will allow for appropriate subdivision of the site where there is demand while retaining the rural character.

Submitter Number: 948 **Submitter:** Christopher James Nicholson

Point Number 948.1

Summary of Decision Requested: **Amend** the zoning of the property at 233 Wilton Collieries Road, Glen Massey, from Rural Zone to Country Living Zone to join up with the adjacent site which is zoned Country Living in the Operative District Plan.

Decision Reasons:

- To have the opportunity for rural living on farm land that is better off for housing, which is less sustainable for commercial farming.

Summary of Decision Requested:	Amend the zoning of the property at 233 Wilton Collieries Road, Glen Massey from Rural Zone to Rural Living Zone to join up with the Operative District Plan zoning of the neighbouring property.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter is looking at purchasing a section on this land. It is away from the Village and is handy for a Country Living environment. 		

Submitter Number:	959	Submitter:	Adri Grobler
Point Number	959.1		
Summary of Decision Requested:	Amend the zoning of the property at 233 Wilton Collieries Road, Glen Massey from Rural Zone to Rural Living Zone to join up with the Operative District Plan zoning of the neighbouring site.		
Decision Reasons:	<ul style="list-style-type: none"> Too much good farm land is being used for housing. This land is better for housing rather than non-productive farming. 		

Submitter Number:	960	Submitter:	Carlo Gorissen
Point Number	960.1		

Summary of Decision Requested: Amending of the property at 233 Wilton Collieries Road Glen Massey as Rural Living Zone.

Decision Reasons:

- The submitter purchased 265A Wilton Collieries Road, and this change will affect their property value.

Submitter Number: 961 **Submitter:** Yeungjun Yoo

On behalf of: Kyung Koo Han & Sun Kyung Kang

Point Number 961.1

Summary of Decision Requested: Delete the Significant Natural Area from the property at 7C Ridge Road, Tuakau.

Decision Reasons:

- It is just around 5m2 (see photos attached to the submission).

Submitter Number: 962 **Submitter:** Kimai & I-Jay Huirama

On behalf of: Ngati Tamainupo

Point Number 962.1

Summary of Decision Requested: Add protection on some of the significant burrow pits on the properties at 5851 Great South Road and 2831 River Road Ngaruawahia, and any other section the submitter deems to be of high cultural significance (e.g. proximity to Puke I a hua and size).

Decision Reasons:

- The principal rohe for Ngati Tamainupoo is Whaingaroa (Raglan area, near the Waitetuna harbor) and Ngaruawahia.
- The Marae is located on ancestral land at Whaingaroa, and also maintains a mana whenua link to the Ngaruawahia rohe through whakapapa to the ancestor, Ngaere, and sites of cultural and historical significance, namely Puke-i-ahua marae, Hakarimata, Te Huinga o Nga Wai (The Point), Waikato River and Waipa River.
- The submitters are mana whenua who are descendants of Ngaere, the chief of Pukeiahua Pa in the 1700s. Their marae is Mai Uenuku kite Whenua, located in Whaingaroa. Many of the marae members are fourth and fifth generation residents of Ngaruawahia. Their mana whenua link to Ngaruawahia comes from their connection to the land and the sites of significance from the ancestral story of how Ngaruawahia got its name.
- The aim for the Hapu is to protect and preserve Ngati Tamainupo identity and integrity. In order to do this they need to engage meaningfully with other stakeholders in the community to ensure that their stories are shared authentically and respectfully.

Submitter Number: 963 **Submitter:** June Penn

Point Number 963.1

Summary of Decision Requested: Add a resource management framework for the management of Genetically Modified Organisms that is regionally specific, taking into account environmental, economic and social well-being.

Decision Reasons:

- GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of communities and Tangata whenua.
- The release of GMOs can cause:
 - Biological/ecosystem harm
 - Harm to Tangata whenua values
 - Harm to cultural value and lifestyles, concerning the communities wellbeing
 - Harm to existing or potential forms of land use.
- The effects on land uses could include:
 - Loss of organic and GMO-free certification
 - Reputational damage
 - Loss of markets and premiums paid for GMO-free produce
 - Loss of livelihood
- The Waikato is the centre of dairy offices and farms for the three major suppliers of milk and milk products in the area. Many farmers are highly concerned that their livelihoods will be affected if GMOs are released in the Waikato. Tatua, Fonterra and Miraka Milks have a GMO-free requirement for milk products. Concerns over the ability to control the grass genetic pollution is a major concern and it is important to have precautionary approach to any escape and release of GMOs.
- No matter how carefully conditions of consent for GMOs are crafted, there is still a risk of poor management, human error, or natural events that aid in breaching conditions.
- Once GMOs have been released into the environment it will be difficult or impossible to eradicate. For food products, the GE-free status would be permanently lost, along with the market advantages of that status.
- Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location, and management of GMOs where they have the potential to adversely affect the environment and other land use activities.

Point Number 963.2

Summary of Decision Requested: Add strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same or similar to those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of communities and Tangata whenua.
- The release of GMOs can cause:
 - Biological/ecosystem harm
 - Harm to Tangata whenua values
 - Harm to cultural value and lifestyles, concerning the communities wellbeing
 - Harm to existing or potential forms of land use.
- The effects on land uses could include:

- Loss of organic and GMO-free certification
- Reputational damage
- Loss of markets and premiums paid for GMO-free produce
- Loss of livelihood
- The Waikato is the centre of dairy offices and farms for the three major suppliers of milk and milk products in the area. Many farmers are highly concerned that their livelihoods will be affected if GMO's are released in the Waikato. Tātua, Fonterra and Miraka Milks have a GMO-free requirement for milk products. Concerns over the ability to control the grass genetic pollution is a major concern and it is important to have precautionary approach to any escape and release of GMOs.
- No matter how carefully conditions of consent for GMOs are crafted, there is still a risk of poor management, human error, or natural events that aid in breaching conditions.
- Once GMOs have been released into the environment it will be difficult or impossible to eradicate. For food products, the GE-free status would be permanently lost, along with the market advantages of that status.
- Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location, and management of GMOs where they have the potential to adversely affect the environment and other land use activities.

Point Number 963.3

Summary of Decision Requested: Amend the Proposed District Plan so that all consents/activities that would require exemption from plan rules would be publicly notified, regardless of whether they are on genetically modified organisms or not.

Decision Reasons:

- GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of communities and Tangata whenua.
- The release of GMOs can cause:
 - Biological/ecosystem harm
 - Harm to Tangata whenua values
 - Harm to cultural value and lifestyles, concerning the communities wellbeing
 - Harm to existing or potential forms of land use.
- The effects on land uses could include:
 - Loss of organic and GMO-free certification
 - Reputational damage
 - Loss of markets and premiums paid for GMO-free produce
 - Loss of livelihood
- The Waikato is the centre of dairy offices and farms for the three major suppliers of milk and milk products in the area. Many farmers are highly concerned that their livelihoods will be affected if GMO's are released in the Waikato. Tātua, Fonterra and Miraka Milks have a GMO-free requirement for milk products. Concerns over the ability to control the grass genetic pollution is a major concern and it is important to have precautionary approach to any escape and release of GMOs.

- Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location, and management of GMOs where they have the potential to adversely affect the environment and other land use activities.

Submitter Number: 964 **Submitter:** Marcus Ralph
Organisation: Ohinewai Heights Ltd

Point Number 964.1

Summary of Decision Requested: Delete the Significant Natural Area from the property at 260 Ralph Road, Huntly.

Decision Reasons:

- Other parts of Significant Natural Area have been removed from this area previously. There was land closer to the lake which had Significant Natural Area removed so this should be done as well.
- The vegetation is willow, gorse and blackberry.
- Removing the Significant Natural Area will allow the weed species to be cleared up and returned back into paddock.

Submitter Number: 965 **Submitter:** Sandra Ellmers
Organisation: Sandra EllmersFamily Trust

Point Number 965.1

Summary of Decision Requested: Amend Rule 16.4.13 (a) Subdivision creating reserves, by deleting the requirement for newly created reserves to have 50% of boundaries bordered by roads and replace instead with "all reserves to have public access".

Decision Reasons:

- To the submitter's knowledge there are no reserves in the district which have roads on 50% of their boundaries.
- Reserves which are used for the purpose of regular sports activity require parking and adequate road access but New Zealand's most iconic and frequented reserves are located on land identified as being of special significance because of location and/or natural beauty. Creating reserves within Structure Plan areas or newly created subdivisions should also, if possible, be based on the same principles.
- If land has an existing or established area of native bush or a particular feature, e.g. stream or wetland, it does not need to have adjoining roads on its boundaries to provide adequate access. The majority of the users could access by foot or would be prepared to walk a reasonable distance to access the walkway.
- There should not be a requirement for reserves to have road boundaries, only to be accessible to the public.

Point Number 965.2

Summary of Decision Requested: Delete the requirement for walkways to be at least 3m wide and be constructed for shared pedestrian and cycle use in Rule 16.4.15 (a) (i) Subdivision of land containing mapped off-road walkways.

Decision Reasons:

- Much of the Waikato terrain is very undulating so many public walkways are located in bush and traverse very hilly and undulating ground, along streams and rivers or adjacent to wetlands, e.g. Bridle Veil Falls walkway.
- 3m is very wide and natural areas are not usually suitable for dual use by cyclists. Accessing by foot is often difficult due to the clay based soils and very wet climatic conditions in the Waikato.

- The priority for walkways should be that they are accessible and enjoyable for the public.
- The most popular walkway in Raglan goes from the top of Wainui Road down through the bush to Ngaranui Beach and is not suitable for cyclists. There is no public designated public parking and the walkway borders the road for only about 5m. The Bridle Veil walkway is of similar standard with only part of the track developed.
- Proposed rule will result in mundane walkways on flat ground, which is not what the public want.
- Very few areas in Raglan are of suitable terrain for cyclists and constructing a 3m walkway through bush areas and uneven terrain would be impossible, would interfere with the natural environment and would be financially prohibitive.
- Walkways should be developed and assessed on a one by one basis in consultation with the developer and/or public and not be subject to 'blanket' rules.

Point Number 965.3

Summary of Decision Requested: Add a new activity to Rule 17.1.2 Permitted Activities for "multi unit development".

Decision Reasons:

- Raglan has a shortage of quality tourism accommodation.
- Many Waikato and Auckland residents own baches or homes in Raglan that are only used occasionally, mainly on weekends, in the summer months. These properties are under-utilised and as many are on large blocks on land the grounds and properties need on-going maintenance which can be time consuming and expensive. Therefore, there is a need for construction of smaller, higher density, low maintenance units and apartments as an option for "weekenders." This would free up many properties in established residential areas.
- It is appropriate that multi-unit development be incorporated and encouraged within Business Zones, rather than Residential areas.
- When a property has multiple residents, it can create on-going noise problems. If numerous multi-unit apartments are located within Residential areas the level of people movement and noise could ruin the enjoyment of life for the other residents.
- It is often difficult in Residential areas to accommodate adequate visitor parking for multi-unit developments as residential streets can become clogged up with visitor parking.

Point Number 965.4

Summary of Decision Requested: Amend Rule 17.1.3 RDI (a) (vii) Restricted Discretionary Activities, as follows:

Residential Unit	Minimum Area	Minimum Dimension
Studio Unit or 1 bedroom	40 6m ²	2 1.5m
2 or more bedroom	45 8m ²	2 1.5m

Decision Reasons:

- Not all above ground apartments/units or apartment owners require or want balconies or exterior living court areas.
- There should be an option when designing and constructing multi-level apartments to include (or not include) upper level balconies.
- Apartment managers do not encourage and often do not permit socialisation by groups of people on balconies as it can cause noise nuisance for other residents.
- A reasonable sized ground level communal outdoor area may be more practical than numerous individual 'living court' areas.
- The market is the best judge of what is required to upper level living court areas should be an option, not compulsory.

Point Number 965.5

Summary of Decision Requested: Amend Rule 17.2.3 PI (a) (i) Onsite parking areas - Landscaping, as follows:

(i) *The car parking area must be separated from the road by a ~~4~~5m wide planting strip, with the exception of vehicle access points;*

Decision Reasons:

- The wider the planting strip is, the more it is likely to be neglected.
- It is not practical to plant trees as they grow too high and when mature the roots can cause uplift in the paved areas and the tree branches drop and shed over the car park area. It is therefore more practical to plant either a suitable hedging variety or a row of low growing shrubs.
- Maintenance of planted areas requires constant upkeep to keep weed free and looking attractive. It is very apparent that carparks district wide are often left in a very untidy state with weeds growing and rubbish being thrown into the landscape strip.
- A 1m landscape strip is more than adequate to achieve an attractive landscape and provide separation between the road and carparks is easier to maintain and keep tidy in carpark areas.

Point Number 965.6

Summary of Decision Requested: Amend Rule 17.3.4.1 (a) (i) Building setbacks - Zone boundaries, as follows:

(a) (i) ~~7.5~~4m from rear and side boundaries adjoining the:

A. Residential Zone;

B. Village Zone;

C. Country Living Zone; or

D. Reserve Zone; and...

Decision Reasons:

- There are adequate rules in place within the current Building Code and District Plan to protect adjacent residential properties from excessive noise levels and disturbance from Business areas.
- Many Business zoned lots are small and if located adjacent to a Residential Zone the 7.5m setback requirement for side and rear boundaries would render much of the site unusable.
- A 4m separation would allow a wide driveway or storage area between the Business and Residential zones and still enable compliance.
- When purchasing a residential dwelling, the potential buyer has an option of not purchasing a dwelling adjacent to a business area if they are genuinely concerned about any possible impact.

Point Number 965.7

Summary of Decision Requested: Delete Rule 17.3.7 PI (a) (iii) Living Court.

Decision Reasons:

- Not all above ground apartments/units or apartment owners require or want balconies or exterior living court areas.
- Apartment managers do not encourage or permit socialisation by groups of people on balconies as it can cause noise nuisance for other residents.
- There should be an option when designing and constructing multi-level apartments to include (or not include) upper level balconies.
- A reasonable sized ground level communal outdoor area may be more practical than numerous individual living court areas.
- The market is the best judge of what is required so upper level living court areas should be an option, not compulsory.

Point Number 965.8
Summary of Decision Requested: Amend Rule 17.4.1.1- RD1 (a) (iii) Subdivision- Multi-unit development, as follows:

Unit of Apartment	Minimum Unit Area
Studio unit or 1 bedroom unit	6650 m ²
2 bedroom unit	6670 m ²
3 bedroom unit	10080 m ²

Decision Reasons:

- There appears to be very little recognition in the Proposed District Plan that units and dwellings worldwide are downsizing.
- There must be options within a District Plan to provide for smaller homes and units people can afford and there is not. Often units only have one permanent occupant, regardless of the size of the unit.
- 100m² is a very large unit and larger than many standard homes, therefore it seems excessive and outside the standard so it should be reduced to be more in line with what people want and can afford.
- If people require larger units they can purchase them but the option should be there to purchase units of various sizes.

Point Number 965.9

Summary of Decision Requested: Delete Rule 17.5.7 P1 (a)(ii) Gross leasable floor area.

Decision Reasons:

- Submitter currently has a proposal before Council which includes development of approximately 2ha of Business zoned land they own and if they do not decide to subdivide the area into small lots but retain ownership off the total area this rule would prevent them from erecting more than two individual leasable units on the land. Therefore, the majority of the land would be underutilised when there is a dire shortage of Business Zoned land and Business premises in Raglan.
- There is no bare land available within the Business Zone in Raglan to accommodate any sizeable buildings or developments.
- The rule if implemented would substantially limit much needed development on the only Business Zone land available for new development in Raglan.
- There is no valid reason for preventing development of more than two individual units on Business Zoned land and no valid reason for limiting the size of leasable floor area for individual units.

Submitter Number: 966 **Submitter:** Reginald Briggs

Point Number 966.1

Summary of Decision Requested: Amend Rural zoning of the pocket of houses bounded by Park Road and 6000-6012 Great South Road, Horotiu.

Decision Reasons:

- Area zoned rural, however current activities in the area indicate a more urban than rural use.
- Demand for denser development is apparent after council's approval of residential developments in the rezoned Greenfields, just north of the golf course.
- Such developments are funded mainly by developers and council has an obligation to upgrade obsolete developments through instillation of modern day infrastructure.
- Addresses 6010 and 6012 Great South Road are currently carrying out non-complying activities, indicating that a rural zoning is no longer appropriate.

Submitter Number: 967 **Submitter:** Peter Pavich

Point Number 967.1

Summary of Decision Requested: Amend the zoning of the property 41 Ormsby Road, Hamilton to change from Rural Zone to Country Living Zone.

Decision Reasons:

- The submitter wishes to subdivide to provide for their family.
- The majority of the farm will remain for farming purposes.

Submitter Number: 968 **Submitter:** Carol & Gordon Corke

Point Number 968.1

Summary of Decision Requested: Amend the zoning from Rural Zone to Country Living Zone in the Te Kowhai and Horotiu area, including the property at 476 Te Kowhai Road, Horotiu.

Decision Reasons:

- This would enable the submitter to subdivide one section off from their existing block.

Submitter Number: 969 **Submitter:** Debbie McPherson

Point Number 969.1

Summary of Decision Requested: Amend the zoning of the property at 41 Ormsby Road, Hamilton, from Rural Zone to Country Living Zone.

Decision Reasons:

- It will enable the submitter's brother to subdivide the site, allowing the submitter to bring their family up on family land.
- The land will continue to be used for farming purposes.

Submitter Number:	970	Submitter:	Margaret O'Brien
Point Number	970.1		
Summary of Decision Requested:	Amend Rule 22.3 Land Use Building and Rule 22.3.2 Minor dwelling, to allow for a "Dependent Persons dwelling" to be designated as a "Minor dwelling", particularly at 2289B Kakaramea Road, Hamilton.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter's cottage located at 2289B Kakaramea Road, Hamilton was considered as a Restricted Discretionary activity under the Operative District Plan. • This submission removes the restrictions on the submitter's consent, thus will allow the submitter to manage and determine the future use of their home. 		

Submitter Number:	971	Submitter:	Stonehill Trustee Limited
Point Number	971.1		
Summary of Decision Requested:	Retain the proposed Rural zoning at the land located to the south and west of McDonald Road, Pokeno, that is zoned Aggregate Extraction and Processing in the Operative District Plan (this land is identified in the submission at Annexure A).		
	AND		
	Amend the Proposed District Plan to make additional or consequential relief to address the matters raised in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • Synlait is currently constructing a high-tech milk powder processing facility on land adjacent, and is valued at \$250m. • Another company, Winston Nutrition, has obtained all necessary resource consents to build another milk powder processing facility next to the existing milk powder processing facility operated by Yashilli. Both the Yashilli and Winston Nutrition facilities are (or will be) located adjacent to the land currently zoned Aggregate Extraction and Processing. • The submitter understands that Yashilli has plans to expand its operation on 7 hectares of land to the west (rear) of its existing milk powder processing facility, immediately adjacent to the land currently zoned for Aggregate Extraction and Processing. • The submitter notes that, despite resource consent granted by Council in late-1998 for quarry activities within the Aggregate Extraction and Processing zone at Pokeno, the consents were not implemented, and have now lapsed. • It is no longer appropriate that this land continues quarrying and/or mineral extraction activities due to the proximity to the growing township to Pokeno, the new residential areas being developed to the north, and the presence of milk powder processing facilities close by that are sensitive to dust emissions. • There are dispersed rural residential activities to the south and west that would be adversely affected by quarry noise, dust and traffic. • The land is steep and forms part of a prominent ridgeline that rises to the south of Pokeno. Quarrying activities are by their nature visually intrusive and, in this location, would have significant detrimental visual amenity effects for the Pokeno community. A quarry activity in this location would be highly visible from the Bombay Hills and a wider area and likely involve significant landscape modification including removal of the existing volcanic scoria cone and tuff ring, which form a valuable landscape feature. • Given the urbanisation that has occurred at Pokeno over the last 10 years, the future urbanization anticipated for the area, and the changes to the planning framework that have occurred to support growth, the submitter considers that it is no longer appropriate for land adjacent to the urban area to be identified for quarrying activities. • Due to the steep topography of the land and its visual prominence and landscape value, the submitter considers that the land should remain rural in character and appearance to define the southern edge of Pokeno. Application of the Rural Zone to the land, as proposed by Council, is most appropriate in the circumstances and is supported. 		

Submitter Number:	972	Submitter:	Mark Scobie
Point Number	972.1		
Summary of Decision Requested:	Retain Objective 5.1.1 The rural environment, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Protecting these soils from adverse effects of inappropriate use and development that may affect their life-supporting capacity is of national importance, this is now recognised with NPS for Versatile Land and High Class Soils under consideration. • Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas. 		
Point Number	972.2		
Summary of Decision Requested:	Retain Objective 5.2.1 Rural Resources, except for the amendments sought below;		
	AND		
	Amend Objective 5.2.1 (a)(i) Rural resources, as follows:		
	<p>"(a) Maintain or enhance the:</p> <p>(i) Inherent life-supporting capacity, <u>accessibility</u>, and versatility of soils, in particular high class soils;"</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitters support this sub-policy, however accessibility to versatile land is also a key consideration in managing this resource. 		
Point Number	972.3		
Summary of Decision Requested:	Retain Policy 5.2.2 High Class Soils, as notified.		
Decision Reasons:			

- The submitter supports this policy.

Point Number 972.4

Summary of Decision Requested: **Amend** Objective 5.3.1 (a) Rural character and amenity, as follows:
(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- The submitters support this objective, however, recognition of the variation of what defines rural character and amenity values across a large District is needed
- The District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the District, which is used for higher value production activities such as intensive cropping, greenhouses, etc.

Point Number 972.5

Summary of Decision Requested: **Add** a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:
DL
(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1
(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1

Decision Reasons:

- The creation of an additional vacant lot between 8,000m2 and 1.6 ha, and any additional lot between 8,000m2 and 1.6 ha as a restricted discretionary activity is supported.
- There should be flexibility in lot size to ensure that the existing farming regime can continue
- It will ensure practical boundaries and the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access a relatively small piece of land.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8000m2, it is necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment, with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- The creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number 972.6

Summary of Decision Requested: **Delete** Rule 22.4.1.2 RD1 (a)(v) General Subdivision;
 AND
Add a matter of discretion to Rule 22.4.1.2 RD1 (b) General Subdivision, another clause as below:
(b)(vi) Effects on rural productivity and fragmentation of high class soils

Decision Reasons:

- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- The submitters agree with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high-class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout design or productivity and fragmentation of farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high-class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high-class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high-class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Land use Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met. This additional compliance cost does not necessarily result in a better environmental outcome and becomes a box ticking exercise for Council. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 972.7

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, to change all of the references from "lot" to "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Point Number 972.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General Subdivision, as notified.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m2 and 1.6 ha, and any additional lot between 8,000m2 and 1.6 ha as a restricted discretionary activity is supported.

Point Number 972.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below;
 AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- (b) duplicates (d)(ii) and (e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that structures and buildings such as greenhouses and pack houses could visually alter rural landscapes. However, these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number

972.10

Summary of Decision Requested:

Amend the activities in Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited Subdivision from Prohibited activities to Non-Complying activities.

Decision Reasons:

- In PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Not every subdivision on high-class soil would result in a significant adverse effect on the environment. Relocating consented lots within a holding, (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. This definition may not be versatile due to a range of factors identified through case law.
- It is unfair and unreasonable to prohibit the creation of lots when they are of a viable, sustainable and permanent nature and it is appropriate for these to subdivide from other rural activities on the site.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 may unreasonably restrict the subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Records of Title were created (Rule 22B – Franklin Section). Under Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation.
- In the Franklin Section of the District Plan, there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require scrutiny this should merit a Non-Complying Activity status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbor without creating an outcome that may compromise the prior transferable subdivision.
- The Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high-class soils is protected in the Rural Zone from inappropriate subdivision and development, and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number

972.11

Summary of Decision Requested:

Retain Rule 22.4.1.2 (a)(i-iii) General subdivision, as notified.

Decision Reasons:

- The submitters support the inclusion of the General Subdivision rules.

Submitter Number:

974

Submitter:

Tim Lester

On behalf of:

Howard Lovell

Organisation:

Blue Wallace Surveyors Ltd

Point Number

974.1

Summary of Decision Requested:

Amend the zoning for the property at 129 Great South Road, Taupiri (Pt Lot 2 DP24220) from Rural Zone to Residential Zone.

Decision Reasons:

- The Submitter generally agrees with the approach taken by the council; however, it is considered that the Council has not adequately considered the geographical distribution of the District's residential zone (particularly in regard to residential infill development efficiency).

Location and Land Use

- The site is flanked by residential land use to the north, south and west.
- The site is considered inappropriate for rural land use as it is too small fragmented to be of productive use. (i.e., it cannot integrate with rural land to the east given separation brought about by a section of rail infrastructure).
- The sites directly to the south have already been subdivided and contain established residential land use.
- The Residential Zone is appropriate and represents an efficient undertaking within the Proposed Waikato District Plan review process currently underway.
- Easy access for traffic and will not place extra stress on the existing roading network.

Infrastructure

- Council's wastewater and water supply services are located within the Great South Road reserve.
- The Submitter considers that post appropriate subdivision design, each individual residential allotment can be connected to the councils existing storm water, water supply and waste water connections, or if necessary storm water can be managed on site (subject to a more site-specific analysis).
- The rail line is expected to act as a sufficient buffer between residential and rural land. While the conversion of this land to residential and the potential establishment of properties on the site is not expected to create any adverse reverse sensitivity effects considering the zoning and number of properties already established in the surrounding area.

Objective and Policy Assessment

- From a strategic perspective, the sought-after rezoning is not considered to be contrary to the Operative or Proposed District Plan objectives and policies.
- The Site does not contain any policy overlays that would constrain residential land use, nor are there any planning negotiations that significantly impinge upon the Site.
- The Site contains dimensions that can accommodate residential land use development (as testified by the existing residential land use surrounding the Site) and furthermore, will be able to positively contribute to the area's residential amenity within the current environmental setting.
- The zoning change from rural to residential is most relevant and obliges to the Objectives and Policies of Chapter 4: Urban Environment of the Proposed Waikato District Plan.

Submitter Number:	975	Submitter:	Glenvale Stage 2 Limited
Point Number	975.1		
Summary of Decision Requested:	Amend the zoning of Lot 1 DP 519545 (Eccles Avenue, Te Kauwhata) to reflect the extent of Reserve and Residential Zoned land, as sought within the Concept Plan in Attachment B of the submission.		
Decision Reasons:	<ul style="list-style-type: none"> The current Reserve/Residential Zone boundary under the Proposed District Plan restricts the development potential of the site by limiting the area provided on the northern side of the indicative road, which needs to be developed to provide connectivity to the surrounding area. There is little evidence that a site-specific assessment determined the present location of the Reserve/Residential boundary. Reconfiguration of the Reserve/Residential Zone may enable the site to be appropriately developed. New residential sites to the north of the indicative road will have adequate space for outdoor living, landscaping and may enjoy housing with a northern orientation. The presently zoned Residential land in the eastern corner of the site is dominated by wetlands and natural features that would benefit being included in the Reserve Zone. The eastern corner also adjoins the North Island Main Trunk Line; a less desirable location for residential housing. The Reserve Zone will increase in size to incorporate areas of wetland and increase potential connections with walkways/cycleways promoted by the Proposed Waikato District Plan. The reserves areas will vest with the Council as part of the development of the site. Large areas of the Reserve Zoned land will be accessible from the public road. The site is located within close proximity to the Te Kauwhata Business Town Centre Zone. According to the Proposed District Plan objectives, higher density residential development is promoted around Town Centres. 		
Submitter Number:	977	Submitter:	Amy and Andrew De Langen
Point Number	977.1		
Summary of Decision Requested:	Amend the zoning of the property at 436B Tauwhare Road, Matangi from Rural Zone to Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter currently has two houses on the property. Would like to rezone to split the property into two blocks or smaller. If property is rezoned, submitter could subdivide, enabling them to sell the properties to raise required funds to establish their business from a more suitable block of land. Understand the Council are trying to free up more housing. Opportunities for people working in the area Proposed zone change for adjoining property would affect the submitter's equestrian business so they could no longer operate safely from their property. Neighbouring property is also seeking a change in zoning to Country Living Zone. 		
Point Number	977.2		
Summary of Decision Requested:	Amend the zoning of part of the properties comprising Lot 2 DP 72565 and Section 1 SO 465505 (Matangi Dairy Factory) from Industrial Zone to Rural Zone at the submitter's property at 436B Tauwhare Road, Matangi (see map attached to submission) to end the proposed Industrial zoning.		
Decision Reasons:	<ul style="list-style-type: none"> Changes would affect submitter's boundary along the back of Lot 1 DPS 17974. Submitter was unaware these changes were in the pipeline until the owner of the property moved a building into that area without their knowledge. Would lose rural outlook which would be unpleasant to look at. Would affect submitter's property value. The zone change would have a significant impact on the submitter's equestrian business. Increased noise and activity would be dangerous to any horse riding activity. Horses are flight animals and take fright easily and risk of serious injury to stock would be high. Submitter would no longer be able to graze and ride horses on the back half of the property losing almost half of their safe grazing and training paddocks. Would have not only one short side of submitter's property affected by the industrial, but two, which would double the risks of injury to horses and riders. Submitter has invested a lot of money into developing their property so that it is suitable to run a horse business from. Changing the zone as proposed would mean that the submitter is unable to continue running their equestrian business from the property, which has been running for 18 years. 		
Submitter Number:	978	Submitter:	Brian Nabbs and Margaret Forsyth
Point Number	978.1		
Summary of Decision Requested:	No specific decision sought, although submitter expresses concerns in respect to the Maori Site of Significance (S14/117) on the property at 212D Newell Road, Tamahere.		
Decision Reasons:	<ul style="list-style-type: none"> The purposes and sentiments of s.6 of the Resource Management Act are acknowledged. WDC is statutorily obliged to take into account the provisions of section 14 of the Local Government Act. Submitters are tangata whenua. The principles of the Treaty of Waitangi and Waikato District Council's obligations need to taken into account. Submitter's property at 212D Newell Road, Tamahere is taonga. The proposed site falls within the Country Living Zone, which contemplates and permits residential use and development. In reference to s.10 of the Resource Management Act the use was lawfully established before the rule became operative or the proposed plan was notified. Within the buffer for the proposed site (s.14/117), Waikato District Council has to date permitted residential development. The local iwi would have previously been consulted on the implementation of the Country Living Zone. The community and Waikato District Council are each entitled to rely upon this previous consultation. Waikato District Council's proposal appears inconsistent with evaluation reports prepared to date, especially the New Zealand Archaeological Association reports of 1961 (Edson and Morgan) and 2002 (O Wilkes). O Wilkes in the New Zealand Archaeological Association 2002 stated "In my opinion this is probably not a pa, and if it is a pa, then it is a very old one... Edson also marked it as a possible site on his N65 index sheet and Morgan obviously must have walked past it without seeing anything." The proposal appears prime facie in breach of Waikato District Council's obligations under s.32 of the Act. 		

- The previous reports are significant.
- If Waikato District Council wishes to deviate from these findings then WDC must undertake further balanced evaluation. This does not appear to have been undertaken.
- The matters to be considered by Waikato District Council in changing its District Plan are set down in s.74. S.31 sets the boundaries.
- Prohibition of development on an unconfirmed site (i.e. not significant) does not fall within s.31.
- Nor does the matter fall under Part 2 of the Act.
- Submitter suggests that Waikato District Council engages with Ngati Hau.
- S.78 requires Waikato District Council to give consideration to the views and of persons likely to be affected.
- The submitter's views are presented pursuant to s.82 especially, but not limited to s.82(1)(b).
- The two previous reports each concluded that no paa existed on the site or if it did, it was not significant. It is only recently presented whaikorero that is suggesting the existence of a Pa site. Such evidence does not adequately and unequivocally determine the specific location of the site.
- The community is to respect issues significant to Maori equally. However WDC is obliged to respect and maintain the integrity of the Previous Reports. The recent evaluation, based upon whaikorero is not able to predominate.
- Waikato District Council is obliged to question, or at least reserve its position on the location of the site (if any) and thereafter determine whether the site crosses the threshold of sufficient significance.
- For Waikato District Council to adopt any other position would be a breach of inter alia S.28 of the Local Government Act.

Point Number 978.2

Summary of Decision Requested: **Reconsider** the significance of the Maori Site of Significance (S14/117) at the property at 212D Newell Road, Tamahere.

AND

Amend the extent of the buffer if the site is not unequivocally proven as significant.

Decision Reasons:

- The purposes and sentiments of s.6 of the Resource Management Act are acknowledged.
- WDC is statutorily obliged to take into account the provisions of section 14 of the Local Government Act.
- Submitters are tangata whenua.
- The principles of the Treaty of Waitangi and Waikato District Council's obligations need to taken into account.
- Submitter's property at 212D Newell Road, Tamahere is taonga.
- The proposed site falls within the Country Living Zone, which contemplates and permits residential use and development.
- In reference to s.10 of the Resource Management Act the use was lawfully established before the rule became operative or the proposed plan was notified.
- Within the buffer for the proposed site (s.14/117), Waikato District Council has to date permitted residential development.
- The local iwi would have previously been consulted on the implementation of the Country Living Zone.
- The community and Waikato District Council are each entitled to rely upon this previous consultation.
- Waikato District Council's proposal appears inconsistent with evaluation reports prepared to date, especially the New Zealand Archaeological Association reports of 1961 (Edson and Morgan) and 2002 (O Wilkes).
- O Wilkes in the New Zealand Archaeological Association 2002 stated "In my opinion this is probably not a pa, and if it is a pa, then it is a very old one... Edson also marked it as a possible site on his N65 index sheet and Morgan obviously must have walked past it without seeing anything."
- The proposal appears prime facie in breach of Waikato District Council's obligations under s.32 of the Act.
- The previous reports are significant.
- If Waikato District Council wishes to deviate from these findings then WDC must undertake further balanced evaluation. This does not appear to have been undertaken.
- The matters to be considered by Waikato District Council in changing its District Plan are set down in s.74. S.31 sets the boundaries.
- Prohibition of development on an unconfirmed site (i.e. not significant) does not fall within s.31.
- Nor does the matter fall under Part 2 of the Act.
- Submitter suggests that Waikato District Council engages with Ngati Hau.
- S.78 requires Waikato District Council to give consideration to the views and of persons likely to be affected.
- The submitter's views are presented pursuant to s.82 especially, but not limited to s.82(1)(b).
- The two previous reports each concluded that no paa existed on the site or if it did, it was not significant. It is only recently presented whaikorero that is suggesting the existence of a Pa site. Such evidence does not adequately and unequivocally determine the specific location of the site.
- The community is to respect issues significant to Maori equally. However WDC is obliged to respect and maintain the integrity of the Previous Reports. The recent evaluation, based upon whaikorero is not able to predominate.
- Waikato District Council is obliged to question, or at least reserve its position on the location of the site (if any) and thereafter determine whether the site crosses the threshold of sufficient significance.
- For Waikato District Council to adopt any other position would be a breach of inter alia S.28 of the Local Government Act.

Point Number 978.3

Summary of Decision Requested: **Reconsider** the Maori Site of Significance (S14/117) at the property at 212D Newell Road, Tamahere;

AND

If the site is not adequately significant or sufficiently proven, then amend the Proposed District Plan to enable the activities permitted in the Country Living Zone to be permitted activities on this site.

Decision Reasons:

- The purposes and sentiments of s.6 of the Resource Management Act are acknowledged.
- WDC is statutorily obliged to take into account the provisions of section 14 of the Local Government Act.
- Submitters are tangata whenua.
- The principles of the Treaty of Waitangi and Waikato District Council's obligations need to taken into account.
- Submitter's property at 212D Newell Road, Tamahere is taonga.
- The proposed site falls within the Country Living Zone, which contemplates and permits residential use and development.
- In reference to s.10 of the Resource Management Act the use was lawfully established before the rule became operative or the proposed plan was notified.

Submitter: Christine Madsen

Point Number	980.1
Summary of Decision Requested:	Add a Heritage Precinct for Rangiri to Section 7.1 Protection of Historic Heritage and Notable Trees; AND Add to the Proposed District Plan maps a Rangiriri Precinct to include the area opposite Rangiriri Tavern adjacent to the historic cemetery along to Murphy Street and the area on the same side of Rangiriri Road as the tavern towards Te Wheoro's Redoubt (see map attached to the submission).
Decision Reasons:	<ul style="list-style-type: none"> • Council should not abandon the Heritage Precinct based on a report by a heritage consultant. • The existing precinct should not be removed without developing an appropriate character plan in consultation with the business community in order to preserve the early appearance of Rangiriri. • Any development within this precinct should be sympathetic to listed heritage items that include the Rangiriri Tavern, cemetery arch, historic paa and Te Wheoro's Redoubt. Rangiriri is a significant part of Waikato District's heritage and the business community has been trying to create tourism opportunities around Maaori and British heritage from the period 1863 to the 1940s. • There has been no difficulty working with Council to build or relocate buildings that reflect this era.
Point Number	980.2
Summary of Decision Requested:	Retain Objective 7.1.1, in particular the relationship between heritage buildings, sites, structures, places and their settings including the view of the identified heritage item.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	980.3
Summary of Decision Requested:	Retain Policy 7.1.2 Identification, in particular the relationship between heritage buildings, sites, structures, places and their settings including the view of the identified heritage item.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	980.4
Summary of Decision Requested:	Retain Policy 7.1.3 Heritage items, in particular the relationship between heritage buildings, sites, structures, places and their settings including the view of the identified heritage item.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.

Submitter Number:	981	Submitter:	Andrew Wilson
Point Number	981.1		
Summary of Decision Requested:	No specific decision sought, but the submitter is supportive of recognising Maaori cultural and spiritual values, however seeks more clarity regarding Maaori Site of Significance RI4/52 at Ryan Road, Te Akau South.		
Decision Reasons:	<ul style="list-style-type: none"> • The borders of the site of significant were changed after the consultation period. • The submitter attended both meeting with questions about the proposed changes. • Confusion has arise as the answers the submitter took away do not match the information in the plan. 		

Submitter Number:	982	Submitter:	Joanne & Kevin Sands
Point Number	982.1		
Summary of Decision Requested:	Retain Objective 5.1.1 The rural environment, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils. • Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas. • Supports the strength of wording in this objective and agrees that urban development within the rural environment is an outcome contrary to the intent of the Proposed Plan and should be avoided. 		
Point Number	982.2		
Summary of Decision Requested:	Retain Objective 5.2.1 Rural resources, except for the amendments sought below; AND Amend Objective 5.2.1 (a)(i) Rural Resources, as follows: <i>(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Accessibility to versatile land is also a key consideration in managing the soil resource. 		
Point Number	982.3		

Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- This policy seeks to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number 982.4

Summary of Decision Requested: Retain Policy 5.3.1 Rural character and amenity as notified, except for the amendments sought below;
AND

Amend Objective 5.3.1 (a) Rural character and amenity, as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports in part the intent of the objective.
- The variation in rural character and amenity values needs to be recognised.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number 982.5

Summary of Decision Requested: Add a new discretionary activity (D1) to Rule 22.4.1.2 General subdivision, as follows:

D1 (g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue.
- This will avoid redevelopment of farm tracks and fencelines for a relatively small lot.
- There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm that services can be provided.
- A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.

Point Number 982.6

Summary of Decision Requested: Delete Rule 22.4.1.2 (a)(v) General subdivision;

AND

Add a new matter of discretion to Rule 22.4.1.2 (b) General subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- The section 32 analysis does not justify this rule.
- The 80/20 percentage requirement may not result in the best layout, design or farming outcome.
- Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils.
- The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.

Point Number 982.7

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(i-iii) General subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of general subdivision provisions.

Point Number 982.8

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(iv) General subdivision, as notified.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha is supported.
- The creation of any additional lot between 8,000 and 1.6ha as a restricted discretionary activity is supported.

Point Number 982.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below;

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

...

~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity.
- Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- Rural landscapes can be altered by structure and buildings such as greenhouses and packhouses which form part of the rural environment.

Point Number 982.10

Summary of Decision Requested: Amend Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, by changing the activity status from Prohibited to Non-Complying activities.

Decision Reasons:

- There may be circumstances where a subdivision of high-class soils has overall positive effects supported by objectives and policies. Relocating consented soils within a landholding may produce a better outcome from farming and landscape perspectives.
- Sometimes the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high-class soils, which are defined in the Proposed District Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unfair to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. This can result in economic wellbeing and a more efficient and effective operation of those types of activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest in more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of Franklin Section Rule 22B in the Operative District Plan and therefore a non-complying activity status is more appropriate. For example, the land may be able to subdivide using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number 982.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Submitter Number: 983

Submitter: Bill Loutit

Organisation: Hynds Pipes

Point Number 983.1

Summary of Decision Requested: Amend the zoning of the land surrounding the Industrial Zone Heavy in Pokeno from Rural Zone to an appropriate or new zoning which restricts residential activity (see Attachment A of the submission for the extent of the rezoning request).

OR

Amend the Rural Zone provisions to include appropriate activity rules and land use rules for residential development adjacent to land zoned Industrial Zone Heavy (including the property 9 McDonald Road, Pokeno)

AND

Amend the Proposed District Plan so that residential development or subdivision on Rural Zoned land adjacent to the Industrial Zone Heavy be prohibited or restricted.

AND

Any additional relief considered necessary or desirable as a consequence of the issues and concerns raised in the submission.

Decision Reasons:

- The submitter opposes the Rural zoning of the land adjacent to the Industrial Zone Heavy in Pokeno on the following basis that the provisions:
 - Will not promote sustainable management of natural and physical resources and are not the most appropriate way to achieve the purpose of the Resource Management Act.
 - do not represent the most appropriate way of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions, and in particular the assessment of the benefits and costs of the environmental, economic and social effects that are anticipated from the implementation of the provisions; and
 - without the necessary and appropriate controls the Rural Zone will not ensure that the submitter can continue its lawful operations without potential reverse sensitivity effects arising from potential redevelopment of the former aggregate extraction land.
- The rezoning of the adjacent land may enable rural residential development that in turn has the potential to affect the submitter's ability to carry out its day-to-day business activities on its site.
- There will be reverse sensitivity effects on the submitter's business operations due to effects of the submitter's activities (on the Industrial Zone Heavy land) on any new neighbouring rural residential subdivisions that may be developed under the new Rural Zone.

Submitter Number: 984

Submitter: Glenda Raumati

On behalf of: Trustee Turangawaewae Trust Board

Point Number 984.1

Summary of Decision Requested: No specific decision sought but the submission supports the introduction of a specific chapter addressing Tangata whenua concerns, issues and opportunities.

Decision Reasons:

- The Tangata whenua Chapter discusses statutory responsibilities that are required of the Treaty of Waitangi, The Waikato River Settlement Act 2010 and the Resource Management Act amongst others. It is important to Turangawaewae Trust Board that this recognition of responsibilities and commitments that the crown has made are acknowledged throughout the plan and how it is implemented.

Turangawaewae Trust Board seek the best possible opportunities to utilise lands and provide opportunities for its people and the subsequent benefits to the whole community.

Point Number 984.2

Summary of Decision Requested: Amend the Proposed District Plan to ensure that the Objectives, Policies, principles and intent of the Tangata Whenua Chapter is provided for across the plan and how it is implemented.

Decision Reasons:

- It is important that Tangata whenua issues are not simply addressed in the Tangata whenua chapter but throughout the proposed plan to ensure a holistic approach is taken to resource management, consistent with the principles of whakapapa, whanaunatanga, tangata whenuatanga, and kaitiaki.
- These principles are a way to interact and behave with the environment. By including these principles in the Proposed District Plan, Waikato District Council is committing to observe and work consistently with these principles.
- It is important to Turangawaewae Trust Board that this recognition of responsibilities and commitments that the crown has made (in the Treaty of Waitangi, The Waikato River Settlement Act 2010 and the Resource Management Act amongst others) are acknowledged throughout the plan and how it is implemented.

Point Number 984.3

Summary of Decision Requested: Amend the Proposed District Plan to allow for greater use of matauranga Maori.

Decision Reasons:

- Turangawaewae Trust Board expects that Waikato District Council look to matauranga Maori to remedy adverse effects of development.
- Matauranga Maori is increasingly being used as conditions of resource consents and in the identification of restoration projects as an alternative to engineering solutions.
- The Proposed Plan should signal and provide for greater opportunities to utilise matauranga Maori for the benefit of the environment.

Point Number 984.4

Summary of Decision Requested: Amend the Proposed District Plan to ensure that the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao has been included, following engagement with Turangawaewae Trust Board.

Decision Reasons:

- Turangawaewae Trust Board considers greater regard be given to the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao than has occurred in the notified version.
- This statutory document provides significant information to provide council staff and the community in general an understanding of the expectations upon resource users in the rohe.
- In particular, but not limited to, Turangawaewae Trust Board consider that greater weight and consideration should have been given to Chapter 7 of the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao which discusses Environmental Enhancement. At its core this chapter requires resource users not to simply mitigate adverse effects on the environment, but to act in a manner that enhances an environment for the betterment of the natural resource.
- There may be future opportunities for Turangawaewae Trust Board and Council to develop initiatives and programmes of work where marae and Maori owned land is better utilised for the benefit of the land owners.

Point Number 984.5

Summary of Decision Requested: Amend the Proposed District Plan to provide for a new district-wide Maaori land Chapter, which provides a specific objective and policy framework, a wider range of activities relevant to Maaori land, such as Urupaa and koohanga (could be specifically identified rather than just covered under the definition of Marae Complex), and Concept Management Plans which provide for permitted activities. This chapter would apply district wide and ensure the benefits are not limited to certain zones.

Decision Reasons:

- Turangawaewae Trust Board consider a more effective and efficient method of providing for the use and development of Maaori land in accordance with maatauranga and tikanga is by way of a district-wide Maaori land chapter.
- In addition to the practical benefits, this would ensure that the Tangata Whenua Chapter as notified is brought through the entire plan, not simply a heading at the beginning of the proposed plan. This approach has been successful implemented in the Auckland Unitary Plan.

Point Number 984.6

Summary of Decision Requested: Amend the definition of "Marae Complex" in Chapter 13 Definitions to provide greater clarity and include individual definitions where appropriate.

Decision Reasons:

- Turangawaewae Trust Board seek the definitions that apply to Maori land are clarified. Some definitions remain undefined and very broad.

Point Number 984.7

Summary of Decision Requested: Amend the definition of "Maaori Freehold Land" in Chapter 13 Definitions to be consistent with section 129(2)(b) of the Te Ture Whenua Maori Act 1993.

Decision Reasons:

- Turangawaewae Trust Board seek the definitions that apply to Maori land are clarified. Some definitions remain undefined and very broad.

Point Number 984.8

Summary of Decision Requested: Amend the definition of "Maaori Customary Land" in Chapter 13 Definitions to be consistent with section 129(2)(a) of the Te Ture Whenua Maori Act 1993.

Decision Reasons:

- Turangawaewae Trust Board seek the definitions that apply to Maori land are clarified. Some definitions remain undefined and very broad.

Point Number 984.9

Summary of Decision Requested: Place the district plan review process on hold so that the outcomes of the blueprinting exercise can be accommodated in the District Plan, including the development of structure plans.

Decision Reasons:

- Turangawaewae Trust Board are pleased that structure plans were referenced in various parts of the Proposed District Plan, however there appears to be an absence of structure plans when attempting to locate them in the plan.
- Turangawaewae Trust Board understands a 'Blueprinting' exercise is currently underway and will provide the basis for any future structure plans. Whilst this initiative is supported, it is considered that the timing of this process is unfortunate and would have been more effective if the process had been undertaken pre notification of the Proposed District Plan. The concern is, the Blueprinting exercise and potential structure plans will require plan change process to implement as part of the district plan. Locations such as Huntly, Mercer and Pokeno are in need of high-level planning assessment and it is disappointing that resource and time be required to get these guiding plans part of the district plan.

Point Number 984.10

Summary of Decision Requested: No specific decision sought but submission requests the blueprint and structure plan processes recognise tikanga and matauranga Maori and required meaningful consultation with hapu and mare in affected communities.

Decision Reasons:

- Turangawaewae Trust Board are of the opinion that any structure plans or Blueprinting exercises should recognise Waikato-Tainui tikanga and matauranga Maori, to reflect the population (56% of population in Ngaruawahia) and rich Maori heritage.

Point Number 984.11

Summary of Decision Requested: Amend the Proposed District Plan to provide setbacks from the waterways that are consistent with Proposed Plan Change 1 to the Waikato Regional Council and gives effect to the Vision and Strategy for the Waikato River and the Waikato-Tainui Environmental Plan.

Decision Reasons:

- Turangawaewae Trust Board have concerns that the earthworks setbacks do not adequately protect waterways and fail to be consistent with the notified Proposed Plan Change 1 to the Waikato Regional Plan. This plan change process triggered by the need to give effect to the Vision and Strategy for the Waikato River requires a minimum setback of 5m from a waterway (for cropping only) to be considered a permitted activity. The Proposed Waikato District Plan allows for a 1.5 setback in the Residential Zone and appears to have no setbacks at all for earthworks in the Rural Zone.
- The lack of a setback is inappropriate and has failed to have regard to the Vision and Strategy for the Waikato River and the Waikato-Tainui Environmental Plan. As a minimum it would be anticipated that the Proposed District Plan change would be consistent with Proposed Plan Change 1 to the Waikato Regional Plan.

Point Number 984.12

Summary of Decision Requested: Retain earthworks on Maaori Sites of Significance and Maaori Areas of Significance as a restricted discretionary activity.

Decision Reasons:

- Turangawaewae Trust Board support this activity status as early warning when such activities are being undertaken is desirable.

Point Number 984.13

Summary of Decision Requested: Retain the activity status and clearance thresholds for indigenous vegetation clearance for marae, dwellings and papakainga on Maaori Freehold Land or Maaori Customary Land.

Decision Reasons:

- Turangawaewae Trust Board support the ability to clear indigenous vegetation for the purpose of establishing these activities on Maaori Freehold Land or Maaori Customary Land.

Point Number 984.14

Summary of Decision Requested: Amend the Proposed District Plan to provide for earthworks in Significant Natural Areas that are for the establishment of marae, papakainga, dwellings and associated access, parking and manoeuvring as a permitted activity.

Decision Reasons:

- Earthworks within a Significant Natural Area associated with marae, papakainga and dwellings are not afforded the same permitted status as vegetation clearance and would be a restricted discretionary activity. There seems little point in providing for a permitted indigenous clearance for these activities but then requiring resource consent for earthworks.
- As currently proposed, consent for a restricted discretionary activity would potentially need to be obtained to establish building platforms and access.

Point Number 984.15

Summary of Decision Requested: Retain the permitted activity provisions for indigenous vegetation clearance associated with the gathering of plants in accordance with Maaori customs and values.

Decision Reasons:

- This is supported.

Point Number 984.16

Summary of Decision Requested: Withdraw or place on hold the Proposed Waikato District Plan review process to allow for the Hazards Chapter to be developed, integrated and considered as part of a thorough district plan review process.

Decision Reasons:

- Turangawaewae Trust Board are concerned that the Natural Hazards Chapter has been omitted from the notified Proposed District Plan. It is challenging to consider a Proposed District Plan without a natural hazards chapter in the plan.
- Given the vast array of natural hazards in the district, Turangawaewae Trust Board are of the opinion that it is not realistic to progress the plan without this chapter being considered in tandem with the other chapters of the plan.
- This is a major flaw in the process and to ensure consistency and integration across the plan.

Point Number 984.17

Summary of Decision Requested: No specific decision sought but submission supports the identification of areas of high and outstanding natural character and outstanding natural features and landscapes, and the engagement of experts in this field and with mana whenua.

Decision Reasons:

- No reason provided.

Point Number 984.18

Summary of Decision Requested: Amend the Proposed District Plan to include the Waikato River in its entirety as both an Outstanding Natural Feature and an Outstanding Natural Landscape

AND

Amend the Proposed District Plan maps to include the Waikato River in its entirety as both an Outstanding Natural Feature and an Outstanding Natural Landscape.

Decision Reasons:

- Turangawaewae Trust Board do not support the assessment of, and the non-inclusion of the Waikato River as an Outstanding Natural Feature and/or Landscape.
- Turangawaewae Trust Board do not believe that parts of the Waikato River can be cut into sections and not viewed holistically.
- The assessment of the Waikato River as an Outstanding Natural Feature and Landscape is both a historic and contemporary issue. A variety of legislative and policy directions have been developed that support the identification of the Waikato River as an Outstanding Natural Feature and Landscape.
- The Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010 talks of the significance and holistic nature of the Waikato River is viewed. The submission quotes Part 2, Settlement redress through legislation (8).
- This acknowledgement by the Crown that the Waikato River should be considered in its entirety and not divided, as it has been assessed in the Proposed District Plan, provides what the river settlement legislation was seeking.
- The Vision and Strategy for the Waikato River was required to be included without amendment in the Waikato Regional Policy Statement. The Regional Policy Statement review assessed the Waikato River as an Outstanding Natural Feature and Landscape. This was removed in the decision's version on the basis that the Waikato River had been modified too significantly, in particular the part of the river flowing through Hamilton City to be deemed an Outstanding Natural Feature or Landscape and that the necessary assessments and understanding of the cultural significance has not been undertaken to support the rivers inclusion.
- Fast forward to the current situation where Waikato District Council are assessing the river at a more detailed district level, that does not include Hamilton City. In addition Waikato District Council have a greater understanding of the cultural significance of the Waikato River to Waikato-Tainui through the engagement process.
- The Proposed Plan and maps provide for the Waikato River as an Outstanding Natural Feature, only from the river Delta to inside the river mouth. Turangawaewae Trust Board are of the opinion the Waikato River is an Outstanding Natural Feature in its entirety and the reasons for it not attaining regionally significance was based on interpretation and lack of work on behalf of those researching the cultural significance of the river.
- The Waikato River is recognised by statute and is the subject of a previously unique authority that funds the restoration and protection annually. Alone this legislative weight potentially justifies its status as an Outstanding Natural Feature and Landscape at a district level.
- Of more importance is the cultural connection that Waikato-Tainui have with the Waikato River. Whilst the landscape assessment attached to the Proposed Plan does not support the entire river being included, it does as a starting point provide justification as to how the assessment was made (submission refers to the Proposed Plan Appendix 3).
- The cultural and heritage values do not neatly fit into the specific feature or landscape assessment criteria, however engagement with iwi and understanding the districts identity should have seen the Waikato River included as an Outstanding Natural Feature or Landscape or both. The lines that are blurred on the margins of the river by wetlands, tributaries, islands and river use in general only add to the rivers significance. Because the river does not sit neatly as an Outstanding Natural Feature or Outstanding Natural Landscape, that it should be considered both, and afforded the highest protection rather than defaulting to a partial categorisation that undermines its significance.
- The assessment criteria used appears to isolate features or places, rather than taking a more holistic approach. If this had been the case Waikato-Tainui assume that the Waikato River would have been deemed Outstanding; both as a landscape and a feature.

Point Number 984.19

Summary of Decision Requested: Amend the Proposed District Plan after undertaking a natural character assessment for the Waikato River to determine if there are any areas of high or outstanding natural character.

Decision Reasons:

- Turangawaewae Trust Board have concerns that no natural character assessment has been undertaken for the Waikato River.

Point Number 984.20

Summary of Decision Requested: No specific decision sought but the submission supports the introduction of Concept Management Plans

AND

Amend the Proposed District Plan to provide greater clarity as to what information must be provided when developing a Concept Management Plan.

AND

Provide further information as to how Concept Management Plans will be implemented as part of a Resource Management Act process.

AND

Provide greater clarity as to the application of the plan if a Concept Management Plan is not developed.

AND

Provide greater clarity as to who resources the development of Concept Management Plans and what council information and assistance will be provided to marae and/or trusts.

Decision Reasons:

- The ability of marae or trusts to develop Maori Freehold Land has historically proven challenging and any initiative that remedies this is generally supported.
- Turangawaewae Trust Board seek additional information as to the implementation of the plans. Whilst the introduction of Concept Management Plans and the potential for reduce regulation is positive, Turangawaewae Trust Board want to ensure that the development of these plans is not overly onerous. Turangawaewae Trust Board do not want to see individual marae or Maaori freehold land owners required to provide a Concept Management Plan and then still require further resource consents application to satisfy district plan requirements.
- The development and process of Concept Management Plan requires greater explanation in the proposed plan. Whilst Turangawaewae Trust Board support ease of development on marae and Maori freehold land, the potential still remains for a lengthy consenting process.

- Clarification is also sought in the proposed plan as to the application of the plan zoning when a Concept Management Plan is not developed. It is presumed that this means the underlying zone applies and this could create issues for those located in Residential and Rural Zones. It is understood that marae and papakainga housing will default to Discretionary Activity status without an approved Concept Management Plan. This would appear to be a restrictive activity status for what could be small scale development.
- Aside from the RMA issues around Concept Management Plans, Turangawaewae Trust Board understands the key benefits being the development of papakainga housing and the ability to futureproof in some situations future land use. This is supported provided additional resource consents are not required to satisfy district plan requirements.

Point Number 984.21

Summary of Decision Requested: Amend the Proposed District Plan to ensure consistency of wording in the Rural and Residential Zones in relation to the approval process for a Concept Management Plan.

Decision Reasons:

- Turangawaewae Trust Board seek additional information as to the implementation of the plans. Whilst the introduction of Concept Management Plans and the potential for reduce regulation is positive, Turangawaewae Trust Board want to ensure that the development of these plans is not overly onerous. Turangawaewae Trust Board do not want to see individual marae or Maori freehold land owners required to provide a Concept Management Plan and then still require further resource consents application to satisfy district plan requirements.

Submitter Number: 985 **Submitter:** Neil Crispe
Organisation: Koch Farms Limited

Point Number 985.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment as notified.

Decision Reasons:

- The Waikato District encompasses valuable areas of high class soils that are of primary importance for food production both regionally and nationally. Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 985.2

Summary of Decision Requested: Retain Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Amend Objective 5.2.1 Rural resources, as follows:
(a) Maintain or enhance the:
(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils.

Decision Reasons:

- Supports sub-policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 985.3

Summary of Decision Requested: Retain Policy 5.2.2 High class soils as notified.

Decision Reasons:

- Submitter supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 985.4

Summary of Decision Requested: Retain Objective 5.3.1 Rural character and amenity, except for the amendments sought below,
AND
Amend Objective 5.3.1(a) Rural character and amenity as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 985.5

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas
...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects;

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses, however these are recognised as important components of primary production activities, form part of the rural environment, and are generally considered rural in appearance and value.

Point Number

985.6

Summary of Decision Requested:

Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities under Rule 22.4.1.1.
- With regards to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are some circumstances it may be unavoidable to create an additional Record of Title, i.e. where it is limited to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities are viable and sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number

985.7

Summary of Decision Requested:

Amend Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Point Number

985.8

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number

985.9

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(iv) General subdivision, which classifies creation of an additional lot between 8,000m² and 1.6ha as a restricted discretionary activity.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha as a restricted discretionary activity is supported.

Point Number

985.10

Summary of Decision Requested:

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

D1

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2, (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2, (iv) RD1.

Decision Reasons:

- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance

land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.

- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 985.11

Summary of Decision Requested: **Delete Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);**

AND

Add new matters of discretion to Rule 22.4.1.2(b) General subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- The submitter agrees with the intent of this rule which is to design subdivision to avoid fragmentation of the high class soils. However the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with even subdivision application under the general provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Submitter Number: 986

Submitter: Pam Butler

On behalf of: KiwiRail Holdings Limited (KiwiRail)

Point Number 986.1

Summary of Decision Requested: **Retain Section 1.5.4(a) and (b) Urban Growth as notified.**

Decision Reasons:

- The rail network (like other land transport networks) traverses through multiple districts. It is critical to the ongoing operation and effectiveness of the rail network that it is coordinated across different districts (a).
- Uncoordinated or ad hoc urban growth can have significant adverse effects on, and undermine, the efficient provision and use of infrastructure (b), particularly in terms of reverse sensitivity.

Point Number 986.2

Summary of Decision Requested: **Retain Section 1.5.5(a), (b), (c), (d), (e) and (g) Services and Infrastructure as notified.**

Decision Reasons:

- Like other long linear networks, the rail network is unable to easily be relocated. Therefore, KiwiRail submits that mitigation of the effects of new or altered development in the surrounding area and managing reverse sensitivity effects (a) is fundamental to ensuring that the rail network can operate and be maintained efficiently, as well as ensuring that the residents and communities of the region are provided with an appropriate quality of life.
- Land transport networks need to be integrated and coordinated (b) and (e) and protected from the adverse effects of other activities (c). Consistent Plan wide provisions which enable the effective and efficient operation of infrastructure and protect it from incompatible activities being established in close proximity is important for KiwiRail in continuing to provide rail services within the District (d).
- In addition, the rail network is infrastructure that has the potential to adversely impact on the social and economic wellbeing, as well as the health and safety, of the community if not able to operate efficiently, effectively and safely. KiwiRail therefore support Council in working to ensure that the infrastructure is protected and can operate appropriately (g).

Point Number 986.3

Summary of Decision Requested: **Retain Section 1.5.6(a) and (d) Transport and Logistics as notified.**

Decision Reasons:

- KiwiRail supports recognition of the importance of land transport networks to the District (a) and the rail network (d) as significant infrastructure networks and seeks that recognition is provided for the social, economic, environmental, and health and safety benefits to the community that arise from those networks.

Point Number 986.4

Summary of Decision Requested: **Amend Section 1.12.8 Strategic objectives as follows (or similar amendments to achieve the requested relief):**

(a) The matters set out in paragraphs ~~4.1.1 – 4.1.7~~ 1.12.1 – 1.12.7 provide the overarching directions for the development of the objectives, policies and other provisions within the district plan.

(b) In summary, the overarching directions include the following:

(i) Urban development takes place within areas identified for the purpose in a manner which utilises and integrates land and infrastructure most efficiently

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- There is a need to plan for and protect regionally significant infrastructure from the adverse effects of inappropriate urban development. The two elements should be integrated, supportive and beneficial. Urban development should not only be sited so as to utilise existing or planned infrastructure most effectively, it must also be located where it minimizes impacts on infrastructure (such as regional land transport networks) to allow them to operate effectively. The concept of integration of both infrastructure and development is a critical Plan theme which should be referenced here by changing the policy so that it promotes integration.
- Paragraph 1.12.8 refers to "paragraphs 4.1.1-4.17", which appears to be an error and should presumably refer to 1.12.1-1.12.7.

Point Number	986.5
Summary of Decision Requested:	Retain Policy 3.2.3 Management Hierarchy as notified.
Decision Reasons:	<ul style="list-style-type: none"> • KiwiRail supports the management of Significant Natural Areas and the recognition that where development is necessary these effects on Significant Natural Area values can be managed by a suite of options including avoiding, remedying, mitigating and offsetting. The rail network is not able to be easily relocated and given the function it provides for the region and the country, the rail network may cross or run parallel Significant Natural Areas. • Given KiwiRail's operational need to maintain existing corridor, it is important that it is able to utilise the measures identified in the Policy to address any adverse environmental effects.
Point Number	986.6
Summary of Decision Requested:	<p>Retain Policy 3.2.4(b) Biodiversity offsetting except for the amendments sought below</p> <p>AND</p> <p>Amend Policy 3.2.4(b)(ii) Biodiversity offsetting as follows (or similar amendments to achieve the requested relief): <i>the biodiversity offset can achieve an equivalent level of no net loss of indigenous biodiversity;</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> • KiwiRail supports the management of Significant Natural Areas and the recognition that where development is necessary Significant Natural Area values are protected by avoiding, remedying, mitigating and offsetting any effects. • KiwiRail has a narrow, linear corridor which cannot easily be relocated nor can the effects of works to maintain it be completely avoided be times. The ability to off-set is important for linear infrastructure providers, such as KiwiRail, where functional and locational constraints apply. • Offsetting and its application to projects are part of the RMA framework, and the term is not exclusive to biodiversity values e.g. this could include a financial offset. In some cases, it may not be possible to achieve a 100% 'no net loss' and the policy should be broadened to accommodate acceptable proposals. • It is noted that the imperative is inconsistent with Policy 11.1 of the Regional Policy Statement.
Point Number	986.7
Summary of Decision Requested:	<p>Add a new clause (v) to Policy 3.2.6(a) Providing for vegetation clearance as follows (or similar amendments to achieve the requested relief):</p> <p><i>(a) Provide for the clearance of indigenous vegetation in Significant Natural Areas when:</i></p> <p><i>...</i></p> <p><i>(v) operating, maintaining or upgrading existing infrastructure</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Reasonable works required to keep tracks and equipment functioning and clear of vegetation should be permitted in SNAs to ensure existing infrastructure is able to be maintained in an operational condition.
Point Number	986.8
Summary of Decision Requested:	<p>Amend Policy 3.2.8 – Incentivise subdivision as follows (or similar amendments to achieve the requested relief):</p> <p>3.2.8 Policy - Incentivise subdivision that Protects Significant Natural Areas</p> <p><i>(a) Incentivise appropriate subdivision in the Rural zone when there is which provides for the legal and physical protection of Significant Natural Areas, provided the areas are of a suitable size and quality to achieve a functioning ecosystem.</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The policy can be read as though widespread subdivision in the Rural zone is encouraged rather than the object, which is to incentivise the legal protection of Significant Natural Areas where rural subdivision is otherwise appropriate. KiwiRail would be concerned if the policy promoted subdivision which could have adverse effects on land transport infrastructure by being encouraged where it otherwise does not meet the Rural subdivision rules. • As notified, the policy could be read as supporting ad-hoc rural subdivision and not as it is intended to be, which is to incentivise sustainable subdivision in and around Significant Natural Areas.
Point Number	986.9
Summary of Decision Requested:	<p>Add a new clause (vii) to Policy 3.3.2(b) Recognising values and qualities (or similar amendments to achieve the requested relief):</p> <p><i>(b) Recognise the attributes of the Waikato River delta and wetlands, Whangamarino Wetland and Lake Whangape identified as Outstanding Natural Features, including:</i></p> <p><i>...</i></p> <p><i>(vii) existing infrastructure, including land transport networks</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> • As a continuous linear network KiwiRail's railway corridor is located within some Outstanding Natural Landscape areas. The policy should include recognition that the location of significant land infrastructure in these areas is an attribute similar to the farming and recreational activities also noted.
Point Number	986.10
Summary of Decision Requested:	Amend Policy 3.5.4(a)(iv) Protecting the natural character of wetlands, and lakes and rivers and their margins as follows (or similar amendments to achieve the requested relief):

(iv) requiring appropriate setbacks of new activities from wetlands, lakes and rivers.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- This clause is unreasonably restrictive for linear land transport networks like KiwiRail.
- KiwiRail supports Council in requiring activities to be setback from rivers, lakes and the coastal marine area, however this policy as worded gives no recognition to existing encroachments or where activities have a functional and operational need to be located in these areas. The rail network is not able to be easily relocated and frequently crosses watercourses

Point Number

986.11

Summary of Decision Requested:

Retain Objective 4.1.1(a) Strategic as notified.

Decision Reasons:

- KiwiRail supports the objective as it recognises the interconnected nature of land use and transport planning.

Point Number

986.12

Summary of Decision Requested:

Retain Objective 4.1.2 Urban growth and development as notified

Decision Reasons:

- KiwiRail support that there is a focus on consolidating growth near existing settlements.

Point Number

986.13

Summary of Decision Requested:

Amend Policy 4.1.8 (a)(i) – Integration and connectivity as follows (or similar amendments to achieve the requested relief):

(i) Providing good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, rail, public transport, cycle, and pedestrian routes;

AND

Add a new clause (v) to Policy 4.1.8(a) Integration and connectivity as follows (or similar amendments to achieve the requested relief):

(v) Avoiding or managing reverse sensitivity effects on the strategic transport infrastructure networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Policy 4.1.3 (a) and (b) cover integration and connectivity issues. The railway network provides for freight transport which is an essential part of meeting the District's economic and social wellbeing. Rail should therefore be added to the policy.
- Urban development locating near land transport networks need to address reverse sensitivity effects on infrastructure which is largely dealt with in the Objectives and Policies in Chapter 6. However, given urban development needs to address certain restrictions relating to setbacks and acoustic protection across the Plan and not just in specific growth areas, there should be some mention of reverse sensitivity in this part of the Plan and in a 'location' policy topic. This higher tier policy would then apply to all the specific growth nodes which follow.
- Submissions are made to each of the nodes following 4.1.8 Policy – Integration and connectivity, in case this submission is not accepted. The purpose and principles of the Resource Management Act 1991 (the Act) are stated in Part 2. The rail network is a physical resource that needs to be sustainably managed through the Plan. Of specific relevance to the issue of safety (a key concern for KiwiRail), is that the Act seeks to enable people and communities to provide for their well-being and their health and safety. Section 7 of the Act identifies 'other matters' which need to be given particularly regard to in achieving the purpose of the Act. These include the efficient use and development of natural and physical resources.
- Part 2 of the Act also supports the efficient use and development of the rail network while also enabling people and communities to provide for their well-being and their health and safety. An appropriate balance needs to be achieved between ensuring the rail network is efficiently utilised and adjacent development can be facilitated, without compromising safety of people and communities.

Point Number

986.14

Summary of Decision Requested:

Add a new clause (iv) to Policy 4.1.10(a) Policy – Tuakau as follows (or similar amendments to achieve the requested relief):

(iv) Reverse sensitivity effects on strategic transport infrastructure networks are avoided or managed;

OR

Add a new clause (v) to Policy 4.1.8(a) Integration and connectivity as follows (or similar amendments to achieve the requested relief):

(v) Avoiding or managing reverse sensitivity effects on the strategic transport infrastructure networks

so that this applies equally to all towns and growth nodes in Chapter 4

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Tuakau is near the NIMT which bisects the township. Growth can impact the line and any level crossings to a greater or lesser degree depending upon location of new development. The policy should be amended to provide for the avoidance of reverse sensitivity effects on strategic transport infrastructure, as this will enable development proposals to be assessed to achieve sustainable growth.

Point Number

986.15

Summary of Decision Requested:

Amend Policy 4.1.11(a) (iii) Pokeno as follows (or similar amendments to achieve the requested relief):

(iii) Reverse sensitivity effects ~~are~~ from the strategic transport infrastructure networks are avoided or managed;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the specific recognition that reverse sensitivity effects (which includes those on the land transport network) are required to be addressed in Pokeno, but considers the wording needs to be amended to more accurately capture the concept of reverse sensitivity. Reverse sensitivity effects are effects on existing infrastructure (and other lawfully established, effects-generating activities) that arise from the location of incompatible sensitive activities in proximity.

Point Number 986.16

Summary of Decision Requested: **Add a new clause (vii) to Policy 4.1.12(b) Te Kauwhata as follows (or similar amendments to achieve the requested relief):**
(vii) Avoids or manages reverse sensitivity effects on strategic transport infrastructure networks.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks specific recognition that reverse sensitivity effects (which includes those on the land transport network) are required to be addressed in Te Kauwhata. KiwiRail has recently canvassed reverse sensitivity issues with the developer in this area via Plan Change 20.

Point Number 986.17

Summary of Decision Requested: **Amend Policy 4.1.13(a)(ii) Huntly as follows (or similar amendments to achieve the requested relief):**
(ii) Reverse sensitivity effects ~~on~~ from the strategic transport infrastructure networks are avoided or managed.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the specific recognition that reverse sensitivity effects (which includes those on the land transport network) are required to be addressed in Huntly, but considers the wording needs to be amended to more accurately capture the concept of reverse sensitivity.

Point Number 986.18

Summary of Decision Requested: **Add a new clause (v) to Policy 4.1.14 (a) Taupiri as follows (or similar amendments to achieve the requested relief):**
Reverse sensitivity effects on the strategic transport infrastructure networks are avoided or managed.
OR
Add a new clause (v) to Policy 4.1.8(a) Integration and connectivity as follows (or similar amendments to achieve the requested relief):
(v) Avoiding or remedying reverse sensitivity effects on the strategic transport infrastructure networks
so that this applies equally to all towns and growth nodes in Chapter 4
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The North Island Main Trunk Line will continue to pass through Taupiri township. Growth can impact the line and any crossings or a greater of lesser degree depending upon location of new development and this should be added to the policy to enable development proposals to be assessed to achieve sustainable growth.

Point Number 986.19

Summary of Decision Requested: **Add a new clause (vi) to Policy 4.1.15 (a) Ngaruawahia as follows (or similar amendments to achieve the requested relief):**
Reverse sensitivity effects on the strategic transport infrastructure networks are avoided or managed.
OR
Add a new clause (v) to Policy 4.1.8(a) Integration and connectivity as follows (or similar amendments to achieve the requested relief):
(v) Avoiding or remedying reverse sensitivity effects on the strategic transport infrastructure networks
so that this applies equally to all towns and growth nodes in Chapter 4
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- While the SH1 alignment has changed, the NIMT runs through Ngaruawahia township. Growth can impact the line and any crossings to a greater of lesser degree depending upon the location of new development and this should be added to the policy to enable development proposals to be assessed to achieve sustainable growth.

Point Number 986.20

Summary of Decision Requested: **Amend Policy 4.1.16(a)(iii) Huntly as follows (or similar amendments to achieve the requested relief):**
(iii) Reverse sensitivity effects ~~on~~ from the strategic transport infrastructure networks are avoided or managed.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the specific recognition that reverse sensitivity effects (which includes those on the land transport network) are required to be addressed in Horotiu, but considers the wording needs to be amended to more accurately capture the concept of reverse sensitivity.

Point Number 986.21

Summary of Decision Requested: **Amend Policy 4.2.15(b) as follows**
(or similar amendments to achieve the requested relief):
Earthworks are designed and undertaken in a manner that ensures the stability and safety of surrounding land, buildings, infrastructure and structures.
AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Policy 4.2.15(b) seeks to ensure that earthworks do not undermine surrounding land, buildings and structures. KiwiRail seeks to add the word infrastructure to the policy to recognise the need to protect it from adjacent earthworks activity.

Point Number 986.22

Summary of Decision Requested: **Retain** Policy 4.4.2 Noise, particularly clauses (iii)-(v) as amended below

AND

Amend Policy 4.4.2(a) Noise as follows (or similar amendments to achieve the requested relief):

(iii) Maintaining appropriate setback distances between high noise environments and sensitive land uses **noise-sensitive activities**;

(iv) Managing the location of sensitive land uses **and noise-sensitive activities**, particularly in relation to lawfully-established high noise generating activities; and

(v) Requiring acoustic insulation where **noise-sensitive activities** are located within high noise environments.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the policy, particularly clauses (iii)-(v). These clauses support noise sensitive activities managing reverse sensitivity effects on the railway corridor including through both setbacks and acoustic design.
- The terminology used in the policy is 'sensitive land uses'. The policy should be expanded to include 'noise' sensitive activities (as this is also defined in the Plan). A separate KiwiRail submission seeks that the definitions of 'noise sensitive' and 'sensitive' land uses be clarified or combined.

Point Number 986.23

Summary of Decision Requested: **Retain** Policy 4.4.7 Managing the adverse effects of signs except for the amendments sought below

AND

Amend Policy 4.4.7(a) Managing the adverse effects of signs as follows (or similar amendments to achieve the requested relief):

(a) The location, colour, content, and appearance of signs directed at traffic is controlled to ensure signs do not distract, confuse or obstruct motorists, pedestrians and other **road land transport users**;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the policy as it provides for the assessment of the effects of signs on land transport safety. This is reflected in the minor amendment sought.

Point Number 986.24

Summary of Decision Requested: **Retain** Policy 4.7.11 Reverse sensitivity except for the amendments sought below

AND

Amend Policy 4.7.11(a) Reverse sensitivity as follows (or similar amendments to achieve the requested relief):

(a) Development and subdivision design minimises reverse sensitivity effects on adjacent sites, adjacent **lawfully established activities (including infrastructure)**, or the wider environment; and

(b) Avoid the potential for reverse sensitivity effects from the location of new dwellings in

the vicinity of an intensive farming, extraction industry or industrial activity, or infrastructure;

(c) Development of noise-sensitive activities is designed to avoid or mitigate reverse

sensitivity effects on transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the policy which seeks to ensure that any urban development addresses reverse sensitivity effects. While there are policies in the Infrastructure section supporting this, it is important that the effects of subdivision on the safety and efficiency of existing network utilities such as land transport networks are considered at the time of subdivision. Good subdivision design can address many issues for example, stormwater arrangements, noise bunds and lot design.
- The addition of the term 'lawfully established activities' reflects its use in 5.6.3 Policy – Subdivision within the Country Living Zone.
- In addition, there are no targeted policies relating to KiwiRail's standards to manage reverse sensitivity effects. The requested changes relate to the setbacks (i.e. adjacent to the corridor, acoustic controls, access at level crossings) and other mitigation required to achieve sustainable development.

Point Number 986.25

Summary of Decision Requested: **Retain** Policy 5.3.7(c) Reverse sensitivity effects as notified.

Decision Reasons:

- KiwiRail supports this clause of the policy as it addresses the need for appropriate setbacks from lawfully established activities where reverse sensitivity effects may arise.

Point Number 986.26

Summary of Decision Requested: **Retain** Policy 5.3.14 Signs except for the amendments sought below

AND

Amend Policy 5.3.14(b) Signs as follows (or similar amendments to achieve the requested relief):

(b) Ensure signage directed at traffic does not distract, confuse or obstruct motorists, pedestrians and other **land transport road users**.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the policy as it provides for the assessment of the effects of signs on land transport safety. This is reflected in the minor amendment sought.

Point Number 986.27

Summary of Decision Requested: **Retain** Policy 5.3.15 Noise and vibration except for the amendments sought below

AND

Amend Policy 5.3.15(a)(vi) as follows (or similar amendments to achieve the requested relief):

(vi) Requiring acoustic insulation where sensitive land use activities are located within high noise environments, including near the railway corridor, the Airport Noise Outer Control Boundary, Huntly Power Station, the Gun Club Noise Control Boundary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the policy which recognises that reverse sensitivity effects occur and need to be managed through managing the location of sensitive land uses in relation to lawfully-established activities, including by maintaining appropriate buffers between high noise environments and noise sensitive activities.
- The railway corridor operates 24/7 and can produce adverse effects that extend beyond the corridor boundary, such as noise and vibration, emissions, lighting/glare and dust.
- Development near the railway corridor needs to take into account the potential for these effects to be experienced and should be designed to avoid/mitigate them.

Point Number 986.28

Summary of Decision Requested: **Retain** Policy 5.6.3 Subdivision within the Country Living Zone as notified.

Decision Reasons:

- KiwiRail supports the policy's direction that existing infrastructure is not to be compromised by inappropriate subdivision, building and development, and that lawfully established activities are to be protected from reverse sensitivity effects in the zone.

Point Number 986.29

Summary of Decision Requested: **Retain** Policy 5.6.16 Noise, particularly clauses (iii)-(v) as amended below

AND

Amend Policy 5.6.16 Noise as follows (or similar amendments to achieve the requested relief):

(iii) Maintaining appropriate setback distances between high noise environments and sensitive land uses and noise-sensitive activities;

(iv) Managing the location of sensitive land uses and noise-sensitive activities, particularly in relation to lawfully-established high noise-generating activities;

(v) Requiring acoustic insulation where noise sensitive activities are located within high noise environments.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the policy, in particular clauses (iii)-(v). These clauses support noise sensitive activities managing reverse sensitivity effects on the railway corridor, including through both setbacks and acoustic design. The terminology used in the policy is 'sensitive land uses'. The policy should be expanded to include 'noise' sensitive activities (as this is also defined in the Plan). A separate KiwiRail submission seeks that the definitions of 'noise sensitive' and 'sensitive' land uses be clarified or combined.

Point Number 986.30

Summary of Decision Requested: **Amend** Objective 6.1.1 Development, operation and maintenance of infrastructure as follows (or similar amendments to achieve the requested relief):

(a) Infrastructure is developed, operated and maintained to benefit the social, economic, cultural and environmental wellbeing of the district.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the objective seeking that infrastructure is developed, operated and maintained to benefit the social, economic, cultural and environmental well-being of the district but requests that it is amended to have a wider focus, to include national and district benefits of infrastructure but seeks an amendment to recognise the wider benefits of infrastructure within and beyond the district.

Point Number 986.31

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance as notified.

Decision Reasons:

- KiwiRail supports the policy which provides for the ongoing use, maintenance and development of infrastructure throughout the District. KiwiRail supports policy 6.1.2 as it recognises the benefits infrastructure delivers to the District by enabling network utility operators to operate, maintain, repair, replace, upgrade or remove network utilities in a way which enables the efficient on going use and development of assets. Like other linear networks, the rail network is unable to easily be relocated and therefore supports recognition of issues such as functional need and locational constraints as part of this policy.

Point Number 986.32

Summary of Decision Requested: **Retain** Policy 6.1.3 Technological advances as notified.

Decision Reasons:

- This policy allows for the ongoing improvements created by technological advances and their implementation throughout utility networks. Given the fast pace of change it is important the new operational equipment is enabled to be rolled out quickly under the Plan.

Point Number 986.33

Summary of Decision Requested: **Retain Policy 6.1.4 Infrastructure benefits as notified.**

Decision Reasons:

- Infrastructure development and operations yield significant benefits within the District as recorded in (a) (i) – (vii). These benefits can be maximised by providing for its effective operation, upgrading, maintenance and development.

Point Number 986.34

Summary of Decision Requested: **Retain Objective 6.1.6 – Reverse sensitivity as notified.**

Decision Reasons:

- KiwiRail supports the Plan direction to ensure that subdivision, use and development avoids reverse sensitivity effects. The operation, maintenance and development of the land transport network has the potential to adversely impact on the social and economic wellbeing, as well as the health and safety of the community if not able to operate efficiently, effectively and safely.

Point Number 986.35

Summary of Decision Requested: **Amend Policy 6.1.7 Reverse sensitivity and infrastructure as follows (or similar amendments to achieve the requested relief):**

(a) Avoid reverse sensitivity effects on existing and planned infrastructure from subdivision, use and development as far as reasonably practicable, so that the ongoing and efficient operation of infrastructure is not compromised.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the broad intent to ensure that subdivision, use and development avoids reverse sensitivity effects. The operation, maintenance and development of the land transport network has the potential to adversely impact on the social and economic wellbeing, as well as the health and safety of the community if not able to operate efficiently, effectively and safely. KiwiRail seeks to slightly amend the policy wording to reflect planned as well as existing infrastructure.

Point Number 986.36

Summary of Decision Requested: **Retain Objective 6.1.8 Infrastructure in the community and identified areas as notified.**

Decision Reasons:

- KiwiRail acknowledges that the provision of new infrastructure is influenced by the natural and physical environment within which it is located.

Point Number 986.37

Summary of Decision Requested: **Retain Policy 6.1.9 Environmental effects, community health, safety and amenity as notified.**

Decision Reasons:

- KiwiRail acknowledges that the provision and operation of infrastructure be within appropriate health and safety parameters. This has been addressed in KiwiRail's requests for Plan standards which address both the health and safety of road users and residents.

Point Number 986.38

Summary of Decision Requested: **Retain Policy 6.4.4 Road and rail network except for the amendments sought below**

AND

Amend Policy 6.4.4 Road and rail network as follows (or similar amendments to achieve the requested relief):

6.4.4 Policy – Road and rail Land transport network

(a) Discourage Avoid subdivision, use and development that would compromise:

(i) The road function, as specified in the road hierarchy, or the safety and efficiency of

the road network; and

(ii) The safety and efficiency, including the maintenance, upgrading, development and operation of the railway land transport network.

(b) Avoid reverse sensitivity effects on the land transport network through setbacks and design controls for new residential and other noise sensitive activities established in proximity to existing or planned transport corridors.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the intent of the Policy, which seeks to discourage subdivision, use and development which compromises regional land transport infrastructure (including both road and rail).
- However, it seeks the following amendments:
 - o Change the title to reflect that it is specific to land transport networks
 - o Use the Resource Management Act 1991 defined word "avoid" rather than "discourage" subdivision; and
 - o Take into account the full range of functions and activities on the land transport network (including road and rail).
- KiwiRail also seeks that further arm is added to the policy to address the specific measures sought to be added to the Plan to address reverse sensitivity effects. An additional item is sought to address the mitigation needed through setbacks and acoustic insulation.

Point Number 986.39

Summary of Decision Requested:	<p>Retain Objective 6.5.1(a)(ii) Land transport except for the amendments sought below</p> <p>AND</p> <p>Amend Objective 6.5.1(a)(ii) Land transport network as follows (or similar amendments to achieve the requested relief):</p> <p>(a) An integrated land transport network where:</p> <p>...</p> <p>(ii) Adverse effects from the construction, maintenance, upgrading and operation of the transport network are managed.</p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> The objective is supported as it recognises the integral role transport infrastructure plays in the District and that it meets several key community wellbeings. Development which is inappropriately located can result in adverse effects as well as compromised amenity if not appropriately designed and located.
Point Number	986.40
Summary of Decision Requested:	<p>Retain Policy 6.5.2 Construction and operation of the land transport network except for the amendments sought below</p> <p>AND</p> <p>Amend Policy 6.5.2(a)(viii) Construction and operation of the land transport as follows (or similar amendments to achieve the requested relief):</p> <p>(viii) Discouraging the installation of new at grade road and pedestrian rail level crossings:</p> <p>(a) Promote the construction and operation of an efficient, effective, integrated, safe, resilient and sustainable land transport network through:</p> <p>...</p> <p>(viii) Discouraging the installation of new at grade road and pedestrian rail level crossings:</p> <p>(ix) A Controlling the location of buildings and other visual obstructions within the sightline areas of rail level crossings</p> <p>(x) B Railway crossing design in accordance with the requirements of the rail operator.</p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail supports the policy but considers it would be better expressed as separate items for clarity. KiwiRail supports the policy as it discourages new level crossings on the network. Where any new crossing is sought as part of new development, KiwiRail would need to be formally consulted and approve any proposal. Level crossings are a hazard to both rail and road traffic and every effort should be made to manage risks associated with them.
Point Number	986.41
Summary of Decision Requested:	<p>Amend Policy 6.5.5 Road safety as follows (or similar amendments to achieve the requested relief):</p> <p>6.5.5 Policy - Road Land transport safety</p> <p>Ensure that structures, vehicle access, lighting, signage and vegetation are located and designed so as to not compromise the safe and efficient operation of the land transport network, or obscure RAPID numbers.</p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> Widen to apply to land transport networks which include road and rail. Including vehicle accesses provides further policy support for KiwiRail level crossing standard.
Point Number	986.42
Summary of Decision Requested:	Retain Policy 6.5.7 Vehicle access as notified.
Decision Reasons:	<ul style="list-style-type: none"> The policy is supported in that it provides support for Plan rules restricting new access ways near level crossings.
Point Number	986.43
Summary of Decision Requested:	Retain Policy 7.1.3(e) Policy – Heritage items as notified.
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail supports the identification and protection of NZ's archaeological and historic heritage. In selected circumstances, the removal of heritage sites is acceptable and the policy provides for an assessment of the reasons for the removal in these (relatively rare) occurrences.
Point Number	986.44
Summary of Decision Requested:	Retain the definition of "infrastructure" in Chapter 13 Definitions as notified.
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail support that this replicates the definition in s2 of the RMA, and that at (g) this includes rail. This is consistent with the Proposed National Planning Standards.
Point Number	986.45
Summary of Decision Requested:	Retain the definition of "network utility operator" in Chapter 13 Definitions as notified.

Decision Reasons:

- KiwiRail supports that the definition directly references s166 of the Resource Management Act including at (f) it includes rail. This is consistent with the Proposed National Standards.

Point Number

986.46

Summary of Decision Requested:

Add a definition for "reverse sensitivity" to Chapter 13 Definitions based on the Proposed National Planning Standards as follows (or similar amendments to achieve the requested relief):

means the potential for the operation of an existing lawfully established activity to be compromised, constrained, or curtailed by the more recent establishment or alteration of another activity which may be sensitive to the actual, potential or perceived adverse environmental effects generated by an existing activity.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The definition for reverse sensitivity is sought to be added to support KiwiRail's requested measures to avoid and manage reverse sensitivity effects.

Point Number

986.47

Summary of Decision Requested:

Amend the definition of "Road network activities" in Chapter 13 Definitions as follows (or similar amendments to achieve the requested relief):

~~Road-Land transport network activities~~

Means road or rail infrastructure and transport services provided within a land transport network corridor, ~~the road~~, including:

....

(p) railway tracks, bridges, tunnels, signaling, access tracks and facilities

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The 'road network activities' definition contains specific road and rail activities and others which could equally apply to all land based linear transport networks including rail. The definition should be amended to clarify that it provides coverage for all listed infrastructure activities within the railway corridor by changing the definition to 'road and rail network activities'.

Point Number

986.48

Summary of Decision Requested:

Amend the definition of "noise-sensitive activity" in Chapter 13 Definitions as follows (or similar amendments to achieve the requested relief):

Means the following:

buildings used for residential activities, including boarding establishments, rest homes, retirement villages, papakainga housing development, in-house aged care facilities, travellers' accommodation, and other buildings used for residential accommodation but excluding

(a) camping grounds;

(b) marae and marae complex;

(c) hospitals;

(d) educational facilities including teaching areas and sleeping rooms in an education facility and student accommodation;

(e) places of assembly.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The definitions of noise sensitive activity and sensitive land use are used interchangeably in the Proposed Plan. KiwiRail seeks changes to the definition of 'noise sensitive activity' to better align it with its proposed noise and vibration standards to address reverse sensitivity in the Plan.
- The definition of noise sensitive activity proposed is wider than the proposed definition for 'sensitive activity'. KiwiRail would support the definitions being consolidated; as it could be confusing when using the Plan when there are two very similar terms.

Point Number

986.49

Summary of Decision Requested:

Retain the definition of "sensitive land use" in Chapter 13 Definitions except for the amendments sought below:

AND

Amend the definition of "sensitive land use" in Chapter 13 Definitions except for the amendments sought below (or similar amendments to achieve the requested relief):

Means

(a) an education facility including a childcare facility, waananga and koohanga reo;

(b) a residential activity, including papakainga building, rest home, retirement village, travellers' accommodation, home stay; or

(c) health facility or hospital.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports the definition of sensitive land use, but considers it should be amended to provide clarity as to the activities that fall within the definition. As notified, the definition could be read as saying that all sensitive land uses are education facilities.

Point Number

986.50

Summary of Decision Requested:

Amend the definition of "forestry" in Chapter 13 Definitions as follows (or similar amendments to achieve the requested relief):

Means the planting and growing of trees (including shelterbelts and woodlots) and is an integrated land use including land preparation, roading, tree planting and maintenance (i.e. thinning, pruning, noxious weeds and animal control) and harvesting of trees and includes the use of accessory buildings, but not the

establishment and/or use of permanent sawmills or other methods of timber processing.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The National Environmental Standards for Plantation Forestry defines afforestation as 'planting and growing plantation forestry trees on land where there is no plantation forestry and where plantation forestry harvesting has not occurred within the last 5 years'.
- Other Plan definitions do not cover small woodlots, nor shelter belts. The planting of shelter belts and woodlots poses a similar risk and danger to the operation of the railway network as commercial forestry.
- When planted near to the rail corridor, woodlot or commercial forestry species can intrude into sight lines which raises particular safety issues at level crossings and around curves. Such plantings often also drop branches or leaves onto the rail corridor, increasing the risk of derailment.
- Trains cannot stop in a hurry, nor are they able to drive over such impediments. Roots from trees can also result in undermining of the rail corridor through the creation of mud spots.
- Mud spots occur where ballast under the rails is removed. When a train goes over a mud spot, the track bounces, creating a risk that either the track breaks or the train derails.
- Further, replanting trees often get closer and closer to the boundary and can end up encroaching into rail land.
- Modifying the Plan's definition of 'forestry' as sought supports a new rule seeking a 10m setback from the operational railway corridor.

Point Number

986.51

Summary of Decision Requested:

Add to Chapter 14 Infrastructure a new rule section called "Rules applying to development adjacent to railway corridors" applying to new, or alterations to buildings for any Noise Sensitive Activity at any point within 100 metres from the legal boundary of any railway network (see submission for details of provisions sought to be added, or similar amendments to achieve the requested relief). This includes a new Schedule and additions to Appendix I.

OR

Add a new rule for new or alterations to buildings for any noise sensitive activity at any point within 100 metres from the legal boundary of any railway network to the following chapters (see submission for details of provisions sought to be added, or similar amendments to achieve the requested relief):

- Chapter 16: Residential zone
- Chapter 17: Business zone
- Chapter 18: Business town Centre zone
- Chapter 20: Industrial zone
- Chapter 21: Industrial zone heavy
- Chapter 22: Rural zone
- Chapter 23: Country Living
- Chapter 24: Village zone
- Chapter 25: Reserve zone

This includes a new Schedule and additions to Appendix I.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that provisions be inserted requiring all new, or alterations to, buildings for noise sensitive activities be appropriately mitigated in relation to rail noise and vibration.
- The proposed Plan acknowledges reverse sensitivity with some supportive policies and objectives, which are supported by KiwiRail but does not contain a definition of reverse sensitivity – which is sought by KiwiRail.
- The Plan protects some activities sensitive to noise but not the effects from operational railway and road noise and vibration within in the District.
- The KiwiRail submission seeks to introduce new rule, which has been developed collaboratively with NZTA, providing for the Plan and developers to ensure potential adverse effects (including conflicts between incompatible activities and associated reverse sensitivity effects) are mitigated (where they cannot be avoided). Two options are proposed:
 - o The first, which is KiwiRail's preferred option, is to locate the Rule where it will apply to all plan zones; or
 - o Alternatively, add the Rule to each of the zones where state highways or rail networks are located.
- The rail network operates 24 hours a day, 7 days a week operation, and the frequency, length and weight of trains can change without community consultation. Noise and vibration effects can interrupt people's amenity and enjoyment of their dwelling, as well as people's ability to sleep. Appropriate mitigation, installed to ensure that the health and wellbeing of those living near to the rail network is not adversely affected, is pivotal to ensure that undue restrictions are not placed on the operation of the rail network.
- Part 2 of the Act supports the efficient use and development of the rail network while also enabling people and communities to provide for their well-being and their health and safety. An appropriate balance needs to be achieved between ensuring the rail network is efficiently utilised and adjacent development can be facilitated, without compromising safety of people and communities.
- The new Rule provides for new or altered buildings within 100m of the railway boundary, which can achieve the required internal noise standard, to be permitted activities. Where windows need to be closed to achieve the desired internal noise levels then ventilation performance is prescribed.
- Where a new or altered building is 50m away from the railway corridor boundary and there is a line of sight i.e. a cut or a physical barrier removing line of sight to 3.8m high, this can also be assessed as a permitted activity.
- Enhancements to building are best achieved at the time of construction. The further removed from the rail corridor a building is, the less additional mitigation may be required. The noise level proposed is in accordance with World Health Organisation standards.
- The mitigation for reverse sensitivity effects proposed through these provisions reflects that in some circumstances, e.g. smaller residential sites near the rail corridor, requiring a greater setback from the rail boundary as a means of addressing noise and vibration effects may not always be practicable. The rules seek to ensure that building development options can still maximise the use of a site, while at the same time having standards for mitigating noise and vibration effects arising from the rail corridor.
- Plan-wide rules are already included in the proposed Plan in respect of other types of infrastructure, including for example the National Grid.

Point Number

986.52

Summary of Decision Requested:

Add a new Restricted Discretionary Activity applying to development adjacent to railway corridors in Chapter 14 Infrastructure which does not comply with the new performance standard sought in the preceding KiwiRail submission point (see submission for details of provisions sought to be added, or similar amendments to achieve the requested relief).

OR

Add a new Restricted Discretionary Activity or, where there are no current listed restricted

discretionary activities in the zone, introduce a new restricted discretionary activity, to each of the zones listed below (see submission for details of provisions sought to be added, or similar amendments to achieve the requested relief):

- Chapter 16: Residential 16.1.3
- Chapter 17: Business 17.1.3
- Chapter 18: Business Town Centre 18.1.3
- Chapter 20: Industrial 20.1
- Chapter 21: Industrial Heavy 21.1
- Chapter 22: Rural 22.1.3
- Chapter 23: Country Living 23.1
- Chapter 24: Village 24.1
- Chapter 25: Reserve 25.1

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- In view of the KiwiRail request to add a Permitted Activity Rule in submission 51, new Restricted Discretionary activity criteria are required. It is noted that some zones have a Restricted Discretionary Activity category and others do not.
- KiwiRail's policy is to seek Restricted Discretionary Activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.

Point Number 986.53

Summary of Decision Requested: **Amend Rule 16.3.9.2 Building setback – Sensitive land use as follows (or similar amendments to achieve the requested relief):**

Building setback – Sensitive land use

P1 Sensitive land use

(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:

(i) 5m from the designated boundary of the railway corridor

...

P2 Railway corridor

any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary

OR

Retain Rule 16.3.9.2 P1 (a)(i) Building setback -sensitive land use if the primary relief above is not accepted

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses). Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety.
- Setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback is not an acoustic setback. It allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained.
- A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
 - (i) location, design and use of the proposed building or structure as it relates to the rail network
 - (ii) impacts on the safe operation, maintenance and development of the rail network
 - (iii) construction and maintenance management.
- The relief provides for the rejection of the primary relief. This setback applies only to sensitive land use buildings which does not achieve the safety and amenity benefits sought throughout the district.

Point Number 986.54

Summary of Decision Requested: **Amend Rule 22.3.7.2 Building setback sensitive land use as follows (or similar amendments to achieve the requested relief):**

Building setback sensitive land use

P1 Sensitive land use

(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:

(i) 5m from the designated boundary of the railway corridor

...

P2 Railway corridor

any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary

OR

Retain Rule 22.3.7.2 P1 (a)(i) Building setback sensitive land use if the primary relief above is not accepted

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses). Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety.
- Setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback is not an acoustic setback. It allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained.
- A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
 - (i) location, design and use of the proposed building or structure as it relates to the rail network
 - (ii) impacts on the safe operation, maintenance and development of the rail network
 - (iii) construction and maintenance management.
- The relief provides for the rejection of the primary relief. This setback applies only to sensitive land use buildings which does not achieve the safety and amenity benefits sought throughout the district.

Point Number 986.55

Summary of Decision Requested: **Amend Rule 23.3.7.2 Building setback sensitive land use as follows (or similar amendments to achieve the requested relief):**

Building setback sensitive land use

P1 Sensitive land use

(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:

(i) 5m from the designated boundary of the railway corridor

...

P2 Railway corridor

any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary

OR

Retain Rule 23.3.7.2 P1 (a)(i) Building setback sensitive land use if the primary relief above is not accepted

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses). Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety.
- Setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback is not an acoustic setback. It allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained.
- A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
(i) location, design and use of the proposed building or structure as it relates to the rail network
(ii) impacts on the safe operation, maintenance and development of the rail network
(iii) construction and maintenance management.
- The relief provides for the rejection of the primary relief. This setback applies only to sensitive land use buildings which does not achieve the safety and amenity benefits sought throughout the district.

Point Number

986.56

Summary of Decision Requested:

Amend Rule 24.3.6.2 Building setback - sensitive land use as follows (or similar amendments to achieve the requested relief):

Building setback — Sensitive land use

P1 Sensitive land use

(a) Any new building or alteration to an existing building for a sensitive land use must be set back a minimum of:

(i) 5m from the designated boundary of the railway corridor

...

P2 Railway corridor

any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary.

OR

Retain Rule 24.3.6.2 P1(a)(i) Building setback -sensitive land use if the primary relief above is not accepted

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses). Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety.
- Setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback is not an acoustic setback. It allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained.
- A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
(i) location, design and use of the proposed building or structure as it relates to the rail network
(ii) impacts on the safe operation, maintenance and development of the rail network
(iii) construction and maintenance management.
- The relief provides for the rejection of the primary relief. This setback applies only to sensitive land use buildings which does not achieve the safety and amenity.

Point Number

986.57

Summary of Decision Requested:

Add a new rule to Rule 17.3.4 Building setbacks as follows (or similar amendments to achieve the requested relief):

Building setback - railway corridor

(a) any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5 metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses).
- Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety. For these safety reasons setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained. A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
(i) location, design and use of the proposed building or structure as it relates to the rail network
(ii) impacts on the safe operation, maintenance and development of the rail network
(iii) construction and maintenance management.

Point Number

986.58

Summary of Decision Requested:

Add a new rule to Rule 18.3 Land use - Building as follows (or similar amendments to achieve the requested relief):

Building setback - railway corridor

(a) any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5 metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses).
- Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner

or occupier needing to gain access to the rail corridor- potentially compromising their own safety. For these safety reasons setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.

- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained. A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
 - (i) location, design and use of the proposed building or structure as it relates to the rail network
 - (ii) impacts on the safe operation, maintenance and development of the rail network
 - (iii) construction and maintenance management.

Point Number 986.59

Summary of Decision Requested: **Add a new rule to Rule 20.3.4 Building setbacks as follows (or similar amendments to achieve the requested relief):**

Building setback - railway corridor

(a) any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5 metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses).
- Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety. For these safety reasons setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained. A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
 - (i) location, design and use of the proposed building or structure as it relates to the rail network
 - (ii) impacts on the safe operation, maintenance and development of the rail network
 - (iii) construction and maintenance management.

Point Number 986.60

Summary of Decision Requested: **Add a new rule to Rule 21.3.4 Building setbacks as follows (or similar amendments to achieve the requested relief):**

Building setback - railway corridor

(a) any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5 metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses).
- Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety. For these safety reasons setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained. A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
 - (i) location, design and use of the proposed building or structure as it relates to the rail network
 - (ii) impacts on the safe operation, maintenance and development of the rail network
 - (iii) construction and maintenance management.

Point Number 986.61

Summary of Decision Requested: **Add a new rule to Rule 25.3.5 Building setbacks as follows (or similar amendments to achieve the requested relief):**

Building setback - railway corridor

(a) any new buildings or alterations to an existing building must be setback 5 metres from any designated railway corridor boundary

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks that a 5 metre setback apply to all new building development adjacent to operational railway corridor boundaries (i.e. not just sensitive land uses).
- Ensuring all new structures in all zones are set back from the rail corridor allows access and maintenance to occur without the landowner or occupier needing to gain access to the rail corridor- potentially compromising their own safety. For these safety reasons setting back buildings from the rail corridor boundary is a means of ensuring people's health and wellbeing through good design.
- Construction of buildings in close proximity to the rail corridor has significant safety risk if it is not managed appropriately in accordance with relevant standards.
- A 5m setback allows for vehicular access to the backs of buildings (e.g. a cherry picker) and would also allow scaffolding to be erected safely. This in turn fosters visual amenity as lineside properties can then be regularly maintained. A setback is the most efficient method of ensuring intensification does not result in additional safety issues for activities adjacent to the rail corridor, whilst not restricting the ongoing operation and growth of activity within the rail corridor.
- The proposed provisions would require any development within the setback to obtain consent with matters of discretion relating to:
 - (i) location, design and use of the proposed building or structure as it relates to the rail network
 - (ii) impacts on the safe operation, maintenance and development of the rail network
 - (iii) construction and maintenance management.

Point Number 986.62

Summary of Decision Requested: **Add new matters of discretion relating to non-compliance with the 5m Building setback**

- railway corridor (sought elsewhere in other submission points) in Rule 16.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):

1. The size, nature and location of the buildings on the site.

2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.

3. The outcome of any consultation with KiwiRail.

4. Any characteristics of the proposed use that will make compliance unnecessary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number

986.63

Summary of Decision Requested:

Add new matters of discretion relating to non-compliance with the 5m Building setback

- railway corridor (sought elsewhere in other submission points) in Rule 17.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):

1. The size, nature and location of the buildings on the site.

2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.

3. The outcome of any consultation with KiwiRail.

4. Any characteristics of the proposed use that will make compliance unnecessary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number

986.64

Summary of Decision Requested:

Add new matters of discretion relating to non-compliance with the 5m Building setback

- railway corridor (sought elsewhere in other submission points) in Rule 18.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):

1. The size, nature and location of the buildings on the site.

2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.

3. The outcome of any consultation with KiwiRail.

4. Any characteristics of the proposed use that will make compliance unnecessary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number

986.65

Summary of Decision Requested:

Add new matters of discretion relating to non-compliance with the 5m Building setback

- railway corridor (sought elsewhere in other submission points) in Rule 20.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):

1. The size, nature and location of the buildings on the site.

2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.

3. The outcome of any consultation with KiwiRail.

4. Any characteristics of the proposed use that will make compliance unnecessary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number 986.66

Summary of Decision Requested: **Add new matters of discretion relating to non-compliance with the 5m Building setback**
- railway corridor (sought elsewhere in other submission points) in Rule 21.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):
1. The size, nature and location of the buildings on the site.
2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.
3. The outcome of any consultation with KiwiRail.
4. Any characteristics of the proposed use that will make compliance unnecessary.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number 986.67

Summary of Decision Requested: **Add new matters of discretion relating to non-compliance with the 5m Building setback**
- railway corridor (sought elsewhere in other submission points) in Rule 22.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):
1. The size, nature and location of the buildings on the site.
2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.
3. The outcome of any consultation with KiwiRail.
4. Any characteristics of the proposed use that will make compliance unnecessary.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number 986.68

Summary of Decision Requested: **Add new matters of discretion relating to non-compliance with the 5m Building setback**
- railway corridor (sought elsewhere in other submission points) in Rule 23.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):
1. The size, nature and location of the buildings on the site.
2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.
3. The outcome of any consultation with KiwiRail.
4. Any characteristics of the proposed use that will make compliance unnecessary.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number 986.69

Summary of Decision Requested: **Add new matters of discretion relating to non-compliance with the 5m Building setback**
- railway corridor (sought elsewhere in other submission points) in Rule 24.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):
1. The size, nature and location of the buildings on the site.
2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.
3. The outcome of any consultation with KiwiRail.
4. Any characteristics of the proposed use that will make compliance unnecessary.
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.

- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number 986.70

Summary of Decision Requested: **Add new matters of discretion relating to non-compliance with the 5m Building setback**
 - railway corridor (sought elsewhere in other submission points) in Rule 25.1 Land Use Activities as follows (or similar amendments to achieve the requested relief):
 1. The size, nature and location of the buildings on the site.
 2. The extent to which the safety and efficiency of rail and road operations will be adversely affected.
 3. The outcome of any consultation with KiwiRail.
 4. Any characteristics of the proposed use that will make compliance unnecessary.
AND
 Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail accepts that there will be at times situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
- It is noted that some zones have restricted discretionary activity categories and some don't. It's been KiwiRail's policy to seek restricted discretionary activity status for non-compliance with its noise and vibration performance standards. The criteria allow for a bespoke consideration of site specific effects.
- Application for resource consent under this rule can be decided without public notification. KiwiRail are likely to be the only affected person determined in accordance with section 95B of the Resource Management Act 1991.

Point Number 986.71

Summary of Decision Requested: **Amend Policy 4.2.5 – Setback: Side boundaries as follows (or similar amendments to achieve the requested relief):**
 4.2.5 Policy – ~~Side~~ **Boundaries**
 (a) Require development to have sufficient side boundary setbacks to provide for:
 ...
 (c) Manage Reverse sensitivity by providing sufficient setbacks buildings to provide for residents' safety and amenity.
AND
 Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The policies applying to each zone requiring setbacks from the railway corridor should include reference to the purpose of the setback.
- Existing and sought changes to the Plans objectives lend sufficient support the need for setbacks for amenity and safety, and the efficient integration of development and infrastructure.
- Adding an additional item to these plan sections will also facilitate assessment of situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.

Point Number 986.72

Summary of Decision Requested: **Add a new clause (b) to Policy 4.3.5 Building setbacks as follows (or similar amendments to achieve the requested relief):**
 (a) Maintain existing and promote new vistas and views between buildings in the Village Zone when viewed from a road.
 (b) Manage Reverse sensitivity by providing sufficient setbacks buildings to provide for residents' safety and amenity.
AND
 Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The policies applying to each zone requiring setbacks from the railway corridor should include reference to the purpose of the setback.
- Existing and sought changes to the Plans objectives lend sufficient support the need for setbacks for amenity and safety, and the efficient integration of development and infrastructure.
- Adding an additional item to these plan sections will also facilitate assessment of situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.

Point Number 986.73

Summary of Decision Requested: **Add a new clause (b) to Policy 4.6.7 Management of adverse effects within industrial zones as follows (or similar amendments to achieve the requested relief):**
 (a) Manage adverse effects including visual impact from buildings, parking, loading spaces and outdoor storage, lighting, noise, odour and traffic by managing the location of industrial uses, bulk and form of buildings, landscaping and screening at the interface with roads and environmentally sensitive areas.
 (b) Manage Reverse sensitivity by providing sufficient setbacks buildings to provide for residents' safety and amenity.
AND
 Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The policies applying to each zone requiring setbacks from the railway corridor should include reference to the purpose of the setback.
- Existing and sought changes to the Plans objectives lend sufficient support the need for setbacks for amenity and safety, and the efficient integration of development and infrastructure.
- Adding an additional item to these plan sections will also facilitate assessment of situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.

Point Number	986.74
Summary of Decision Requested:	<p>Add a new clause (b) to Policy 5.6.4 Building setbacks as follows (or similar amendments to achieve the requested relief):</p> <p><i>(a) Maintain the existing spaciousness between buildings with adjoining sites.</i></p> <p><i>(b) Manage Reverse sensitivity by providing sufficient setbacks buildings to provide for residents' safety and amenity.</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> The policies applying to each zone requiring setbacks from the railway corridor should include reference to the purpose of the setback. Existing and sought changes to the Plans objectives lend sufficient support the need for setbacks for amenity and safety, and the efficient integration of development and infrastructure. Adding an additional item to these plan sections will also facilitate assessment of situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
Point Number	986.75
Summary of Decision Requested:	<p>Add a new clause (e) to Policy 8.1.2 Provision, use and development of public open space and reserves as follows (or similar amendments to achieve the requested relief):</p> <p><i>(e) Manage Reverse sensitivity by providing sufficient setbacks buildings to provide for residents' safety and amenity.</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> The policies applying to each zone requiring setbacks from the railway corridor should include reference to the purpose of the setback. Adding an additional item to these plan sections will also facilitate assessment of situations where the proposed 5 metre Building setback - railway corridor rule cannot be met, or it is inappropriate to require compliance.
Point Number	986.77
Summary of Decision Requested:	<p>Retain Rule 14.2.1 P1 Permitted activities as notified.</p> <p>AND</p> <p>Retain Rule 14.2.1 P2 Permitted activities as notified.</p>
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail supports P1 as this provides for the maintenance of the railway network. KiwiRail supports P2 as it enables the maintenance upgrading and operation of land transport networks across a range of routine activities within reasonable parameters.
Point Number	986.78
Summary of Decision Requested:	Retain Rule 14.3.1 P1 Permitted activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail supports the provision which permits the operation, maintenance, repair and removal of existing infrastructure as this enables the District to meet its requirements for effective and efficient land transport network systems.
Point Number	986.79
Summary of Decision Requested:	Retain Rule 14.3.1 P2 Permitted activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail supports the provision for minor upgrades to existing infrastructure.
Point Number	986.80
Summary of Decision Requested:	Retain Rule 14.3.1 P3 Permitted activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> KiwiRail supports provision for Temporary infrastructure activities in the Plan subject to criteria.

Point Number 986.81

Summary of Decision Requested: **Amend** Activity specific conditions 14.3.1.3(1)(a) and (b) relating to P4 Permitted activities as follows (or similar amendments to achieve the requested relief);

(1) Any earthworks associated with infrastructure must comply with all of the following conditions:

(a) Do not exceed a volume of more than 2,500m³ for any single activity (with the exception of works associated with Regionally Significant Infrastructure);

(b) Do not exceed an area of more than 2,500m² for any single activity (with the exception of works associated with Regionally Significant Infrastructure);

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Parts of the railway corridor lie either within Landscape and Natural Character Areas, Significant Amenity Landscape (SAL), High or Outstanding Natural Character areas of the coastal environment or Outstanding Natural Feature (ONF) or Outstanding Natural Landscapes (ONLs).
- As the operator of a linear transport network KiwiRail carries out linear project works within the railway corridor. These projects are usually carried out either during operations, or during blocks of line - when as much work is done as possible.
- The small limits applying to any works undertaken for the operation, maintenance or upgrading of the railway corridor would create significant difficulties where for instance work sites may need to set-up, only a small amount of the works completed, then the site(s) had to be broken down await another 'activity' period. Linear projects on the railway corridor tend to be relatively narrow.

Point Number 986.82

Summary of Decision Requested: **Amend** Activity specific condition 14.3.1.3(3) relating to P4 Permitted activities as follows (or similar amendments to achieve the requested relief);

(3) Earthworks associated with infrastructure in Landscape and Natural Character Areas must not:

(a) Exceed 1.5m in height in relation to the cut or fill batter face; and

(b) Use imported soil, other than the placement of aggregate/metal on any access track or in association with laying underground infrastructure and clean fill associated with Regionally Significant Infrastructure; and

(c) Disturb or move more than 50m³ or exceed an area of 250m² in a Significant Amenity Landscape sand dune over any consecutive 12 month time period; and

(d) Disturb or move more than 50m³ or exceed an area of 250m² in a High or Outstanding Natural Character Area of the coastal environment over any consecutive 12 month time period; and

(e) Disturb or move more than 50m³ or exceed an area of 250m² in an Outstanding Natural Feature or Outstanding Natural Landscapes over any consecutive 12 month time period (except for Regionally Significant Infrastructure works);

AND

Any consequential amendments to link and

Decision Reasons:

- Parts of the railway corridor lie either within Landscape and Natural Character Areas, Significant Amenity Landscape (SAL), High or Outstanding Natural Character areas of the coastal environment or Outstanding Natural Feature (ONF) or Outstanding Natural Landscapes (ONLs).
- Works associated with Regionally Significant Infrastructure often require the use of clean fill. As these works cannot be carried out elsewhere, KiwiRail seeks that the Plan appropriately provides for the use of clean fill in limited circumstances, where necessary to carry out required works on the rail corridor.

Point Number 986.83

Summary of Decision Requested: **Delete** Activity specific condition 14.3.1.3(1)(c) relating to P4 Permitted activities (or similar amendments to achieve the requested relief)

OR

Amend Activity specific condition 14.3.1.3(1)(c) relating to P4 Permitted activities as follows (or similar amendments to achieve the requested relief);

(1) Any earthworks associated with infrastructure must comply with all of the following conditions:

...

(c) Within 10m of a watercourse or 20m of mean high water springs do not exceed a volume of more than 5m³ and an area of more than 5m² for any single activity (excluding existing rail infrastructure);

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- This clause is unreasonably restrictive for linear land transport networks like KiwiRail.
- KiwiRail supports Council in requiring activities to be setback from rivers, lakes and the coastal marine area, however this policy as worded gives no recognition to existing encroachments or existing activities already located in these areas.
- The rail network is not able to be easily relocated and given the function it provides for the district, the region and the country, the rail network often crosses over watercourses. It is therefore likely that works exceeding the limit in (c) would not be capable of being setback in most cases more than 20m from the rivers, lakes or the coastal marine area.
- Further, there is limited scope to relocate the rail network away from watercourses so that no river crossings were ever required. Parts of the railway corridor lie either within Landscape and Natural Character Areas, Significant Amenity Landscape (SAL), High or Outstanding Natural Character areas of the coastal environment or Outstanding Natural Feature (ONF) or Outstanding Natural Landscapes (ONLs).
- The thresholds in (c) are unreasonably low when considering long linear land transport operations like railways; where parts of the corridor are on embankments, in cuttings or in remote and topographically challenging areas.
- KiwiRail seek that the rule be deleted as the effects of any works are adequately address in the remaining rule criteria e.g. control of sedimentation and overall works limits.

Point Number 986.84

Summary of Decision Requested: **Amend** Rule 14.12.1 P5 Permitted Activities as follows (or similar amendments to achieve the requested relief):

Operation, maintenance and minor upgrading of existing public roads, State Highways, rail corridors, and associated transport network activities

AND

Amend the Activity specific conditions 14.12.1.5 relating to P5 Permitted activities as follows (or similar amendments to achieve the requested relief);

(1) Operation, maintenance and minor upgrading of existing public roads, State Highways, railways, and associated road network activities must comply with the following conditions:

(a) The works occur within the road or unformed road or railway corridor;

(b) Works within the road or railway corridor must be:

(i) Incidental to, and serve a supportive function for, the existing public road or railway corridor; or

...

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- There are many elements in the 14.12.1 Permitted Activities in the Transport section of Chapter 14 which could equally apply to railway corridor activities, and should be amended so to make this clear.

Point Number 986.85

Summary of Decision Requested: Retain Activity specific condition 14.12.1.1(g) relating to PI Permitted activities as notified.

Decision Reasons:

- The Rule is consistent with Part 9 of the NZTA Traffic Control Devices Manual, Section 7.8. This rule will ensure that the potential conflicts between new vehicle access ways and level crossings are avoided.
- Level crossing accidents, whilst rare, are severe and as such require strict safety design criteria. The 30 metre distance enables sufficient stacking distance between the level crossing and the adjacent access way and minimises the risk of traffic being stopped across the railway line.

Point Number 986.86

Summary of Decision Requested: Add a new matter of discretion to Rule 14.12.2 RD1 Restricted Discretionary Activities as follows (or similar amendments to achieve the requested relief):

(a) The extent to which the safety and efficiency of rail and road operations will be adversely affected, including:

(b) The outcome of any consultation with KiwiRail.

(c) Any characteristics of the proposed use that will make compliance unnecessary.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Rule 14.12.1.1(g) provides "No new vehicle access shall be created within 30 metres of a railway level crossing".
- KiwiRail seeks the addition of new matters of discretion for new vehicle accesses within 30 metres of a railway level crossing, as the general matters identified in RD1 do not address specific effects on the rail network.

Point Number 986.87

Summary of Decision Requested: Add a new Activity specific condition to Rule 14.12.1.1 relating to PI Permitted activities as follows (or similar amendments to achieve the requested relief):

(1) All activities must comply with the following vehicle access conditions:

...

(h) All existing and new accesses and roads that cross an operational rail network via a level crossing must be maintained in accordance with the sight line triangles provided in 14.12.5 Railway Level Crossing Sight Triangles and Explanations

AND

Add new Railway Level Crossing Sight Triangles and Explanations to Rule 14.12.5 Transportation tables and figures. See submission for details of the provisions sought and diagrams (or similar amendments to achieve the requested relief)

AND

Add a new activity RD10 to Rule 14.12.2 Restricted Discretionary activities as follows (or similar amendments to achieve the requested relief):

RD10 Buildings and structures within a road/rail level crossing sight triangle

Discretion is restricted to:

1. The extent to which the safety and efficiency of rail and road operations will be adversely affected

2. The outcome of any consultation with KiwiRail

3. Any characteristics of the proposed use that will make compliance unnecessary

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail seeks the inclusion of the level crossing sightline controls. KiwiRail has developed a sight triangles standard which requires areas are kept free of physical obstructions (erected or placed) from the standards developed by NZTA, contained in the Traffic Control Devices Manual 2008, Part 9 Level Crossings, which prescribes the formula for sight lines.
- Including these diagrams in the District Plan addresses the need to avoid the poor location of land uses which can obstruct the required safety sight lines for uncontrolled (i.e. no barriers) railway level crossings.
- One of the key factors in maintaining safety is to ensure road vehicle drivers are presented with sufficient visibility along the rail tracks and obstructions do not block the visibility of level crossing signs or alarms to approaching drivers.
- 6.5.2 Policy – Construction and operation of the land transport network supports the inclusion of level crossing sightline diagrams in the Plan.

Point Number 986.88

Summary of Decision Requested: Add a new matter of discretion to Rule 16.4.1 RD1 General Subdivision as follows (or similar amendments to achieve the requested relief):

Reverse sensitivity effects, including on land transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process.

• KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.

Point Number 986.89

Summary of Decision Requested: **Add a new matter of discretion to Rule 24.4.1 RD1 Subdivision – General as follows (or similar amendments to achieve the requested relief):**
Reverse sensitivity effects, including on land transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

• The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process.

• KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.

Point Number 986.90

Summary of Decision Requested: **Add a new matter of discretion to Rule 23.4.2 General subdivision (or similar amendments to achieve the requested relief):**

Reverse sensitivity effects, including on land transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

• The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process.

• KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.

Point Number 986.91

Summary of Decision Requested: **Amend the matter of discretion in Rule 22.4.1.2 RD1(b)(iv) General Subdivision as follows (or similar amendments to achieve the requested relief):**

(iv) potential for reverse sensitivity effects including on land transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

• The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process.

• KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.

Point Number 986.92

Summary of Decision Requested: **Add a new matter of discretion to Rule 17.4.1 General Subdivision as follows (or similar amendments to achieve the requested relief):**

Reverse sensitivity effects, including on land transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

• The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process.

• KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.

Point Number 986.93

Summary of Decision Requested: **Add a new matter of discretion to Rule 18.4.1 Subdivision-general as follows (or similar amendments to achieve the requested relief):**

Reverse sensitivity effects, including on land transport networks

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

• The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process.

• KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.

Point Number	986.94
Summary of Decision Requested:	<p>Add a new matter of discretion to Rule 20.4.1 Subdivision - general as follows (or similar amendments to achieve the requested relief): <u>Reverse sensitivity effects, including on land transport networks</u></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. New buildings, including those containing sensitive or noise sensitive activities, their location and the design and location of access ways may all have an influence on the ultimate impact development has on existing and planned infrastructure. The potential for reverse sensitivity effects is therefore a relevant consideration at this point in the development process. KiwiRail seeks the addition of matters of discretion relating to reverse sensitivity effects on land transport networks to the subdivision consent criteria in the listed zones.
Point Number	986.95
Summary of Decision Requested:	<p>Add a new matter of discretion to Rule 21.4.1 Subdivision – general as follows (or similar amendments to achieve the requested relief): <u>Reverse sensitivity effects, including on land transport networks</u></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> The design, location and service arrangements for new development carried out in the subdivision process cannot be separated from the future use of the subdivided sites. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.100

Summary of Decision Requested: **Amend Rule 17.2.5.1 P1(a) Earthworks General as follows (or similar amendments to achieve the requested relief):**
(i) Be located more than 1.5m from infrastructure, including a public sewer, open drain, overland flow path or other service pipe
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports that earthworks are required to be setback from services and network systems. The rail track itself is most susceptible from adverse effects if adjacent earthworks are not adequately set back. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.101

Summary of Decision Requested: **Amend Rule 18.2.4.1 P1(a) Earthworks General as follows (or similar amendments to achieve the requested relief):**
(i) Be located more than 1.5m from infrastructure, including a public sewer, open drain, overland flow path or other service pipe
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports that earthworks are required to be setback from services and network systems. The rail track itself is most susceptible from adverse effects if adjacent earthworks are not adequately set back. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.102

Summary of Decision Requested: **Amend Rule 19.2.4 P1(a) Earthworks General as follows (or similar amendments to achieve the requested relief):**
(i) Be located more than 1.5m from infrastructure, including a public sewer, open drain, overland flow path or other service pipe
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports that earthworks are required to be setback from services and network systems. The rail track itself is most susceptible from adverse effects if adjacent earthworks are not adequately set back. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.103

Summary of Decision Requested: **Amend Rule 25.2.4.1 P1(a) Earthworks General as follows (or similar amendments to achieve the requested relief):**
(i) Be located more than 1.5m from infrastructure, including a public sewer, open drain, overland flow path or other service pipe
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports that earthworks are required to be setback from services and network systems. The rail track itself is most susceptible from adverse effects if adjacent earthworks are not adequately set back. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.104

Summary of Decision Requested: **Add a new clause (vii) to Rule 22.2.3.1 P2(a) Earthworks – General as follows (or similar amendments to achieve the requested relief):**
(vii) Be located more than 1.5 m horizontally, from any infrastructure, including a waterway, open drain or overland flow path;
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports that earthworks are required to be setback from services and network systems. The rail track itself is most susceptible from adverse effects if adjacent earthworks are not adequately set back. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.105

Summary of Decision Requested: **Add a new clause (vii) to Rule 23.2.3.1 P2(a) Earthworks – General as follows (or similar amendments to achieve the requested relief):**
(vii) Be located more than 1.5 m horizontally, from any infrastructure, including a waterway, open drain or overland flow path;
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail supports that earthworks are required to be setback from services and network systems. The rail track itself is most susceptible from adverse effects if adjacent earthworks are not adequately set back. KiwiRail seeks that rule relating to setbacks in certain zones should be amended to reflect that there should be an earthworks setback of 1.5m from infrastructure, to ensure that the efficient and effective operation of the existing network is maintained.

Point Number 986.106

Summary of Decision Requested: **Amend Rule 16.2.4.1 P1 (vii) Earthworks general as follows (or similar amendments to achieve the requested relief):**
~~(vii) Areas exposed by the earthworks are stabilized to avoid runoff within 1 month of the cessation-re-vegetated to achieve 90% ground cover 6 months of the commencement of the earthworks~~
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail also seeks that the rule relating to revegetation in certain zones be amended to include other available methods to stabilise the ground to prevent runoff, including building or hard cover development. As notified, these rules are ambiguous.

Point Number 986.107

Summary of Decision Requested: **Amend Rule 17.2.5.1 P1 (a)(iv) Earthworks general as follows (or similar amendments to achieve the requested relief):**
~~(iv) Areas exposed by the earthworks are stabilized to avoid runoff within 1 month of the cessation-re-vegetated to achieve 90% ground cover 6 months of the commencement of the earthworks~~
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail also seeks that the rule relating to revegetation in certain zones be amended to include other available methods to stabilise the ground to prevent runoff, including building or hard cover development. As notified, these rules are ambiguous.

Point Number 986.108

Summary of Decision Requested: **Amend Rule 18.2.4.1 P1 (a)(iv) Earthworks general as follows (or similar amendments to achieve the requested relief):**
~~(iv) Areas exposed by the earthworks are stabilized to avoid runoff within 1 month of the cessation-re-vegetated to achieve 90% ground cover 6 months of the commencement of the earthworks~~
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail also seeks that the rule relating to revegetation in certain zones be amended to include other available methods to stabilise the ground to prevent runoff, including building or hard cover development. As notified, these rules are ambiguous.

Point Number 986.109

Summary of Decision Requested: **Amend Rule 19.2.4 P1 (a)(iv) Earthworks general as follows (or similar amendments to achieve the requested relief):**
~~(iv) Areas exposed by the earthworks are stabilized to avoid runoff within 1 month of the cessation-re-vegetated to achieve 90% ground cover 6 months of the commencement of the earthworks~~
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail also seeks that the rule relating to revegetation in certain zones be amended to include other available methods to stabilise the ground to prevent runoff, including building or hard cover development. As notified, these rules are ambiguous.

Point Number 986.110

Summary of Decision Requested: **Amend Rule 20.2.5.1 P1 (a)(vii) Earthworks general as follows (or similar amendments to achieve the requested relief):**
~~(vii) Areas exposed by the earthworks are stabilized to avoid runoff within 1 month of the cessation-re-vegetated to achieve 90% ground cover 6 months of the commencement of the earthworks~~
AND
Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail also seeks that the rule relating to revegetation in certain zones be amended to include other available methods to stabilise the ground to prevent runoff, including building or hard cover development. As notified, these rules are ambiguous.

Point Number 986.111

Summary of Decision Requested: **Amend Rule 21.2.5.1 P1 (a)(vii) Earthworks general as follows (or similar amendments to achieve the requested relief):**
~~(vii) Areas exposed by the earthworks are stabilized to avoid runoff within 1 month of the cessation-re-vegetated to achieve 90% ground cover 6 months of the commencement of the earthworks~~

Point Number	986.116
Summary of Decision Requested:	<p>Amend Rule 16.2.7.2 P1 Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):</p> <p><i>(a)Any sign directed at road land transport users must:</i></p> <p>...</p> <p><i>(iii)Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimizing driver distraction is important to ensure the efficient running of the land transport network. Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67. It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.
Point Number	986.117
Summary of Decision Requested:	<p>Amend Rule 17.2.7.2 P1 Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):</p> <p><i>(a)Any sign directed at road land transport users must:</i></p> <p>...</p> <p><i>(iii)Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;</i></p> <p>AND</p> <p>Any consequential amendments to link and/or accommodate the requested changes.</p>
Decision Reasons:	<ul style="list-style-type: none"> Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimizing driver

distraction is important to ensure the efficient running of the land transport network.
• Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67.
• It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.

Point Number 986.118

Summary of Decision Requested: **Amend Rule 18.2.7.2 PI Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):**

(a)Any sign directed at road land transport users must:

...

(iii)Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimizing driver distraction is important to ensure the efficient running of the land transport network.
- Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67.
- It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.

Point Number 986.119

Summary of Decision Requested: **Amend Rule 20.2.7.2 PI Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):**

(a)Any sign directed at road land transport users must:

...

(iii)Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimizing driver distraction is important to ensure the efficient running of the land transport network.
- Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67.
- It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.

Point Number 986.120

Summary of Decision Requested: **Amend Rule 23.2.6.2 PI Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):**

(a)Any sign directed at road land transport users must:

...

(iii)Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimizing driver distraction is important to ensure the efficient running of the land transport network.
- Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67.
- It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.

Point Number 986.121

Summary of Decision Requested: **Amend Rule 24.2.7.2 PI Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):**

(a)Any sign directed at road land transport users must:

...

(iii)Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimising driver distraction is important to ensure the efficient running of the land transport network.
- Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67.
- It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.

Point Number 986.122

Summary of Decision Requested: **Amend Rule 25.2.7.2 PI Signs – Effects on traffic as follows (or similar amendments to achieve the requested relief):**

(a)Any sign directed at road land transport users must:

...

(iii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections or at a level crossing;

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Signs erected in the City should not have an adverse effect on the safe and efficient functioning of the land transport network, including railways, and the health and safety of road users. Traffic on the railway network will grow, and with more trains the issue of minimizing driver distraction is important to ensure the efficient running of the land transport network.
- Further, signs should be restricted where they breach the level crossing sightline areas developed from the NZTA Traffic Control Devices Manual 2008, Part 9 Level Crossings as sought in KiwiRail submission 67.
- It is appropriate to restrict and prevent the placement of signs within required sight lines for vehicles access and intersections, and within the sight lines required for rail crossings.

Point Number 986.123

Summary of Decision Requested: Retain matter of discretion (a)(iv) Rule 16.5.3 Restricted Discretionary activities as notified.

Decision Reasons:

- KiwiRail recently engaged for the proponents of Plan Change 20 Lakeside Precinct and developed a comprehensive set of controls relating to upgrades to the level crossing through Te Kauwhata and seek the retention of RDA criteria assessing any non-compliance with the traffic related standards imposed.

Point Number 986.124

Summary of Decision Requested: Retain Rule 16.5.7.1 Noise and vibration – North Island Main Trunk Line (NIMT) as notified.

Decision Reasons:

- KiwiRail recently engaged the proponents of Plan Change 20 Lakeside Precinct and developed a comprehensive set of controls relating to noise and vibration and activity controls to the North Island Main Trunk Line (NIMT). These have been included in the Proposed Plan and are supported.

Point Number 986.125

Summary of Decision Requested: Amend Rule 22.1.2.P6 Permitted activities as follows (or similar amendments to achieve the requested relief):

P6 Afforestation not in an Outstanding Landscape Area

Activity specific conditions: Nil Forestry replanting is setback a minimum of 10m from the rail corridor boundary if it occurs within 5 years after harvesting.

AND

Amend Rule 22.1.2.P8 Permitted activities as follows (or similar amendments to achieve the requested relief):

P8 Forestry

Activity specific conditions: Nil All planting is set back a minimum of 10m from any railway corridor

AND

Add a new restricted discretionary activity to Rule 22.1.3 Restricted Discretionary activities as follows (or similar amendments to achieve the requested relief):

Afforestation or forestry not meeting permitted activity criteria

Council's discretion is restricted to:

Effects on the health, safety and efficiency of the railway corridor

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Both 'Afforestation not in an Outstanding Landscape Area' and 'Forestry' are defined in the Plan and permitted activities in the Rural Zone.
- The National Environmental Standard for Plantation Forestry controls the planting and location of plantation forestry. Under regulation 14 of the Resource Management (National Environmental Standards for Plantation Forestry) (NES) Regulations 2017 an afforestation setback of at least 10m is required from an adjoining property (which includes the railway corridor). Afforestation means planting and growing plantation forestry trees on land where there is no plantation forestry, and where plantation forestry harvesting has not occurred within the last 5 years. This leaves a temporal gap under the NES where the replanting of trees within 5 years of harvest, closer than 10m to the adjoining property (e.g. railway corridor) appears to be permitted. This means that if replanting of a harvested forest occurs within 5 years, trees may be located closer than 10m to a property boundary. There is currently no rule in the Plan controlling this time period.
- There are also other forms of forestry which are not covered by the NES – such as woodlots and shelter belts less than 30m wide – which may have a safety impact on transport networks and sightlines. KiwiRail seeks a change to the forestry definition to cover these.
- KiwiRail has experienced safety issues with forestry and forest lots being too close to the rail corridor and therefore wish to ensure that a standard setback (consistent with the distance provided the NES) is imposed to reduce potential safety risks.

Point Number 986.126

Summary of Decision Requested: Retain all KiwiRail designations in Section E Designations "L KiwiRail Holdings Limited" as notified

AND

Retain all KiwiRail designations shown on the

Planning maps as notified.

Decision Reasons:

- KiwiRail holds designations over its operational railway lines, yards and depots within the District and supports them being shown correctly on the Planning Maps (and as they appeared in the Operative Plan) and in Section E.

Point Number 986.127

Summary of Decision Requested: Amend all Planning Maps where KiwiRail's designations apply to change the underlying zoning from "Rural" to "unzoned" (or similar amendments to achieve the requested relief)

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- KiwiRail submits that its railway designations in the District should not be subject to underlying zoning, but should rather be marked as "un-

zoned" as roads or State Highways are. Both corridors are strategic transport infrastructure.

- The rail corridor is currently zoned Rural throughout the entire District, despite it not being used for any rural activities and in fact traversing a range of rural and urban environments. As detailed further below in submission point 76, this blanket approach to zoning the rail corridor may lead to perverse outcomes for KiwiRail's tenants, who operate under the zone rules rather than KiwiRail's designations.
- KiwiRail submits that amending the underlying zoning of the rail corridor to be "un-zoned" is the most effective way to achieve the objectives of the Plan directed towards the development, operation and maintenance of infrastructure, in particular Objective 6.1.1. As the rail corridor provides for linear infrastructure that traverses across multiple zones throughout the District, KiwiRail's activities within the corridor are most appropriately managed through its designations and the provisions of Chapter 14 – Infrastructure and Energy, rather than by reference to particular zones.
- Amending the underlying zoning of the rail corridor would also have no impact on the ability of the Plan to appropriately manage KiwiRail's railway operations, as these activities are covered under Chapter 14 – Infrastructure and Energy, which specifically provides that the provisions of the underlying zone do not apply to infrastructure activities.

Point Number 986.128

Summary of Decision Requested: **Amend the second paragraph of the Introduction in Section E Designations as follows (or similar amendments to achieve the requested relief):**
The zone rules regulate activities that are not covered by the designation. Where designated land is un-zoned, activities not covered by the designation will be subject to the rules of the adjacent zone. If there are two different zones, the adjacent zone extends to the centre line of the designated land.

AND

Any consequential amendments to link and/or accommodate the requested changes.

Decision Reasons:

- Although KiwiRail uses most of its landholdings for railway purposes, parts of KiwiRail's designated land are tenanted by third parties. The activities of KiwiRail's lessees, typically being unrelated to rail operations, are not authorised under KiwiRail's designations and so are subject to the relevant underlying zone provisions.
- Under the notified Plan, the activities of KiwiRail's tenants would be subject to provisions of the Rural Zone (as the rail corridor currently has this underlying zoning throughout the District), regardless of the activity or where it is located. The blanket approach of zoning the entire rail corridor "Rural" may lead to perverse outcomes for KiwiRail's tenants, who operate under the reasonable expectation that they will be able to carry out activities or development that are in accordance with the development pattern of the surrounding zone(s). KiwiRail's lessees should be subject to the same planning controls as the owners / occupiers of the surrounding land. To do otherwise would result in an inequitable situation where KiwiRail's tenants could be subject to stricter planning controls than their immediate neighbours, even though their activities are equally as appropriate in that location (or vice versa).
- KiwiRail submits that the most effective way to achieve the objectives and policies of the Plan, in particular Objective 6.1.1 and Policy 6.1.2, is to have the land subject to KiwiRail's designations un-zoned but include a rule in Section E providing that where activities are occurring on designated land that is un-zoned, the applicable zoning is determined by the adjacent zone. This will allow for the efficient and effective development, operation and maintenance of infrastructure while at the same time ensuring that KiwiRail's tenants enjoy the appropriate zoning for their activities.

Submitter Number: 987

Submitter: Graham and Di McBride

On behalf of: Self and M & P Stock, H & B Stratford, D & R Potter, J & P Stock, KG McBride.

Point Number 987.1

Summary of Decision Requested: **Delete the Airport Obstacle Limitation Surface at Te Kowhai from the Proposed Waikato District Plan.**

Decision Reasons:

- Lack of public engagement by Waikato District Council before it was notified.
- Lack of technical data to support/justify the inclusion of the Obstacle Limitation Surface.
- Design of the Obstacle Limitation Surface in terms of effects on the submitter's properties (213 and 220 Collie Road).
- Potential adverse effects of the Obstacle Limitation Surface - noise, duration, intensity and safety.
- Noise abatement from aircraft vis-à-vis mitigation in existing houses.
- No limitations on incremental growth of airfield/traffic/ancillary services.

Submitter Number: 988

Submitter: Graham McBride

Point Number 988.1

Summary of Decision Requested: **Amend Rule 22.1.2 P4 Permitted Activities - A home occupation, by adding a rigid maximum coverage limitation for home occupation structures.**

Decision Reasons:

- There has been an incremental creep of industrial buildings/activity in the Rural Zone.
- Within Te Kowhai, the cumulative effect from industrial buildings/activity has become noticeable and the rural character is diminished.
- Currently the maximum building coverage is limited but consent is being granted to go above the maximum, being deemed as having minor effect.
- The number of oversized structures and associated activity is becoming significant.

Point Number	989.1
---------------------	-------

Summary of Decision Requested: Amend the property at 233 Wilton Collieries, Glen Massey back to Rural/Country Living

Decision Reasons:

- The purchase of this property was made to have the opportunity for subdividing into large lots.
- Of 18 lots, only two have been titled off and the other 16 are in the s223 subdivision stage.
- When the initial two lots were titled, the council re-titled lot 20 which comprised of stages 1-4 (16 lots) over 90 acres.
- This subdivision has been halted by Council, however we are still having inquiries for the purchase of future lots.
