Summary of Decision Requested:

Amend Rule 14.10.4 D3 Discretionary Activities, as follows:

Antennas attached to a building and/or structure located within an Identified Area, except within the Rural Zone, where antennas attached to a building and/or structure located within an Identified Area are a permitted activity.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.10.4 and submits that aerial telecommunication lines and associated support structures complying with regulations 41-21 of the NESTF should be a permitted activity within Identified Areas in the Rural Zone, for the same reasons as given in relation to the relief sought in respect of Rule 14.10.1

Point Number

680.150

Summary of Decision Requested:

Amend Rule 14.10.4 D8 Discretionary Activities, as follows:

Aerial telecommunication lines and associated support structures located within an Identified Area, except within the Rural Zone, where these are a permitted activity.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.10.4 and submits that aerial telecommunication lines and associated support structures complying with regulations 41-21 of the NESTF should be a permitted activity within Identified Areas in the Rural Zone, for the same reasons as given in relation to our relief sought in respect of Rule 14.10.1.

Point Number

680.151

Summary of Decision Requested:

Amend Activity specific condition 14.11.1.1 (a) relating to P1 Stormwater systems for new development or subdivision, as follows:

(a) Except within the Rural Zone, New development or subdivision must have a stormwater system that complies with all of the following conditions:

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number

680.152

Summary of Decision Requested:

Amend Activity specific condition 14.11.1.2 (a) relating to P2 The establishment of impervious surfaces associated with new development or subdivision, as follows:

(a) Except within the Rural Zone, The establishment of impervious surfaces associated with new development or subdivision that complies with the following condition:...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number

680.153

Summary of Decision Requested:

Amend Activity specific conditions 14.11.1.3 (a) relating to P3 Wastewater servicing for new development or subdivision, as follows:

(a) Except within the Rural Zone, New development or subdivision must have a wastewater system that complies with the following conditions:...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.

- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number 680.154

Summary of Decision Requested: **Amend** Activity specific condition 14.11.1.4 (a) relating to P4 Below ground pipelines for the conveyance of water, wastewater and stormwater, as follows:

Activity-specific conditions

14.11.1.4

(a) Except within the Rural Zone, below ground pipelines systems for the conveyance of water, wastewater and stormwater that comply with all of the following...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number 680.155

Summary of Decision Requested: **Amend** Rule 14.11.1 P5 Below ground pipelines for the conveyance of water, wastewater and stormwater located within an Identified Area, as follows:

Except within the Rural Zone, below ground pipelines for the conveyance of water, wastewater and stormwater located within an Identified Area

and

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number 680.156

Summary of Decision Requested: **Amend** Rule 14.11.1 P6 Pump stations for the conveyance of water, wastewater and stormwater, as follows:

Except within the Rural Zone, pump stations for the conveyance of water, wastewater and stormwater...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number 680.157

Summary of Decision Requested: **Amend** Activity specific condition 14.11.1.7 P7 (a) relating to Stormwater treatment, detention and retention facilities or devices as follows:

(a) Except within the Rural Zone, stormwater treatment, detention and retention facilities or devices that comply with the following...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number 680.158

Summary of Decision Requested: **Amend** Activity specific condition 14.11.1.8 (a) relating to P8 Stormwater ponds or wetlands as follows:

(a) Except within the Rural Zone, stormwater ponds or wetlands that comply with the following...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.1.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number

680.159

Summary of Decision Requested:

Amend Activity specific condition 14.1.1.8 relating to P9 Ventilation facilities, drop shafts and manholes, as follows:

14.1.1.8~~2~~

(a) Except within the Rural Zone, ~~v~~ventilation facilities, drop shafts and manholes that comply with the following...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.1.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number

680.160

Summary of Decision Requested:

Amend Activity specific condition 14.1.1.9 relating to P10 Below ground reservoirs, as follows:

14.1.1.9~~10~~

(a) Except within the Rural Zone, ~~b~~below ground reservoirs that comply with all of the following...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.1.1 to the extent that it seeks to impose inappropriate regulation on water, wastewater and stormwater management in rural areas.
- The issues around these services in rural area are quite different to the issues confronted within urban areas for a range of reasons, including different spatial and geographical scale and differences in the natural resource characteristics and opportunities to manage these.
- Farmers should not have to be unnecessarily burdened with delay and cost in managing their farms on a day-to-day basis from having to be confronted with inappropriate resource consent requirements which will have little or no environmental benefit.
- For farms in rural areas, the Waikato Regional Plan manages water take and water discharge issues, and there is no need to duplicate that regime with a range of inappropriate regulations aimed at urban-scale 3-water management issues.

Point Number

680.161

Summary of Decision Requested:

Amend Rule 14.1.2 RD1 Restricted Discretionary Activities as follows:

Except within the Rural Zone, ~~s~~stormwater systems for new development or subdivision that does not comply with one or more of the conditions of Rule 14.1.1.1

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.1.2 for the same reasons that they oppose Rule 14.1.1, and the relief sought reflects that accordingly.

Point Number

680.162

Summary of Decision Requested:

Amend Rule 14.1.2 RD2 Restricted Discretionary Activities as follows:

Except within the Rural Zone, ~~t~~the establishment of impervious surfaces associated with new development or subdivision that do not comply with one or more of the conditions of Rule 14.1.1.2

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.1.2 for the same reasons that they oppose Rule 14.1.1, and the relief sought reflects that accordingly.

Point Number

680.163

Summary of Decision Requested:

Amend Rule 14.1.2 RD3 Restricted Discretionary Activities as follows:

Except within the Rural Zone, ~~w~~wastewater servicing for new development or subdivision that do not comply with one or more of the conditions of Rule 14.1.1.3

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.2 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.164

Summary of Decision Requested: **Amend** Rule 14.11.2 RD4 Restricted Discretionary Activities as follows:
Except within the Rural Zone, below ground pipelines that do not comply with one or more of the conditions of Rules 14.11.1.4 and 14.11.1.5
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.2 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.165

Summary of Decision Requested: **Amend** Rule 14.11.2 RD5 Restricted Discretionary Activities as follows:
Except within the Rural Zone, pump stations for the conveyance of water, wastewater and stormwater located within an Identified Area
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.2 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.166

Summary of Decision Requested: **Amend** Rule 14.11.2 RD6 Restricted Discretionary Activities as follows:
Except within the Rural Zone, stormwater ponds or wetlands, that serve more than one site, located within: ...
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.2 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.167

Summary of Decision Requested: **Amend** Rule 14.11.2 RD7 Restricted Discretionary Activities as follows:
Except within the Rural Zone, outfall structures located within an Identified Area
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.2 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.168

Summary of Decision Requested: **Amend** Rule 14.11.2 RD9 Restricted Discretionary Activities as follows:
Except within the Rural Zone, below ground reservoirs located within an Identified Area or road or unformed road
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.2 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.169

Summary of Decision Requested: **Amend** Rule 14.11.3 D1 Discretionary Activities as follows:
Except within the Rural Zone, wastewater treatment plants not located within road and unformed road or an Identified Area
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.3 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.170

Summary of Decision Requested: **Amend** Rule 14.11.3 D2 Discretionary Activities, as follows:
Except within the Rural Zone, wastewater treatment plants located within the following...
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.3 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.171

Summary of Decision Requested: **Amend** Rule 14.11.3 D3 Discretionary Activities, as follows:
Except within the Rural Zone, above ground reservoirs not located within an Identified Area
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.3 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.172

Summary of Decision Requested: **Amend** Rule 14.11.4 NC1 Non-Complying Activities, as follows:
Except within the Rural Zone, water treatment plants located within the following...
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.4 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.173

Summary of Decision Requested: **Amend** Rule 14.11.4 NC3 Non-Complying Activities, as follows:
Except within the Rural Zone, above ground reservoirs located within an Identified Area.
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.11.4 for the same reasons that they oppose Rule 14.11.1, and the relief sought reflects that accordingly.

Point Number 680.174

Summary of Decision Requested: **Delete** Activity specific conditions 14.12.1.9 (1)(b) relating to P9 Stock underpasses located within:
(a) Road and unformed road
(b) Rural Zone
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.12.1, and submits that restrictions on stock underpasses in the Rural Zone, that are aimed at managing visual amenity, should be appropriate to reflect the wide-open space scale and rural amenity character of rural areas. It is not appropriate to superimpose the same visual amenity values on structures in rural areas as in urban areas. In rural areas, farmers typically have need of stock underpasses to augment the efficient and safe operation of farms. Imposing a requirement to trigger resource consent for stock underpasses in Identified Areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional stock underpasses, for the sake of unnecessary visual amenity criteria.

Point Number 680.175

Summary of Decision Requested: No specific decision sought, but submission opposes Rule 14.12.3 Discretionary Activities as a consequence of relief sought in the submission to Rule 14.12.1 P9.

Decision Reasons:

- The submitter opposes Rule 14.12.3 in accordance with the relief sought in relation to Rule 14.12.1 regarding removal of any requirement that triggers a need for a resource consent for stock underpasses within an Identified Area in the Rural Zone, and submit that stock underpasses should not need resource consent due to being situated within an Identified Area, and there will be little or no environmental benefit to be obtained, and farmers will be unnecessarily subjected to costs and delays in order to get stock underpasses installed in roads.

Point Number 680.176

Summary of Decision Requested: **Add** to Chapter 22 Rural Zone a new advisory note at the beginning of the Chapter, as follows:
(b) Any activity which is subject to National Environmental Standards are required to comply with the gazetted regulations. Where compliance with permitted activity provisions of those regulations cannot be achieved, resource consent is required to be obtained.
Council is responsible for observing and enforcing the provisions of any gazetted national environmental standard.
Where any activity is not provided for in the following section, the relevant National Environmental Standard needs to be referred to in order to determine whether resource consent is required.
In carrying out its responsibilities under the Act the Council does not wish to impose any control which would duplicate the controls imposed by the Ministry of Forestry or the Regional Council. The Council will therefore approve a resource consent application for any sustainable harvesting of indigenous vegetation which complies with the provisions of the Forests Act 1949 where any:
(a) habitats of threatened or at risk species are protected; and/or
(b) cultural sites, or areas with cultural values are protected; and/or
(c) significant indigenous vegetation is identified and protected.
AND
Any consequential changes needed to give effect to this relief.
AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The informative nature of this section is understood, however it is considered important to include a provision which addresses the interface between national and regional planning instruments such as National Environmental Standards, for example.

Point Number 680.177

Summary of Decision Requested: **Retain** Rule 22.1.2 P4 A home occupation, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is given for the permitted, with conditions, nature of this activity. It provides for small scale diverse business opportunities within the rural zone which can help to sustain a vibrant rural community. Potential noise, vehicle and visual adverse effects should be adequately addressed by the conditions.

Point Number 680.178

Summary of Decision Requested: **Amend** the activity specific conditions for Rule 22.1.2 P6 Afforestation not in an Outstanding Landscape Area, as follows:

Activity specific conditions: ~~Nil~~

(g) In accordance with Resource Management (National Environmental Standards for Plantation Forestry) Regulations 2017

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Afforestation in this context means planting and growing plantation forestry trees on land where there is no plantation forestry and where plantation forestry harvesting has not occurred within the last 5 years.
- Whilst the submitter understands an enabling approach, plantation forestry can cause significant adverse effects on neighbouring properties such as shading and leaf litter and consequential risk of livestock poisoning or disease from some types of trees. Falling trees and branches can also endanger neighbouring properties including damage to fences and other structures.
- The National Environmental Standard for Plantation Forestry Regulations 2017 includes permitted activities conditions which are designed to avoid remedy or mitigate some of these adverse effects.
- P6 should include specific conditions in conjunction with Afforestation activities having permitted activity status.

Point Number 680.179

Summary of Decision Requested: **Retain** Rule 22.1.2 P7 Farming, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The effects arising from legitimate primary production activities need to be recognised in the District Plan as being appropriate and acceptable, ensuring that primary production is protected from reverse sensitivity. There is no other zone where primary production can occur, so it is vital that it is not marginalised from the Rural Zone.

Point Number 680.180

Summary of Decision Requested: **Amend** the activity specific conditions for Rule 22.1.2 P8 Forestry, as follows:

Activity specific conditions: ~~Nil~~

(g) In accordance with Resource Management (National Environmental Standards for Plantation Forestry) Regulations 2017

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Whilst the submitter understands an enabling approach, plantation forestry can cause significant adverse effects on neighbouring properties such as shading and leaf litter and consequential risk of livestock poisoning or disease from some types of trees. Falling trees and branches can also endanger neighbouring properties including damage to fences and other structures.
- The National Environmental Standard for Plantation Forestry Regulations 2017 includes permitted activities conditions which are designed to avoid remedy or mitigate some of these adverse effects.
- P8 should include specific conditions in conjunction with Afforestation activities having permitted activity status.

Point Number 680.181

Summary of Decision Requested: **Retain** Rule 22.1.2 P9 Produce stall, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is given for the permitted nature of this activity with no specific conditions – it is important the district plan does not place unnecessary compliance burdens on these minor and beneficial activities.

- Produce stalls are an opportunity for consumers to purchase produce that was picked that morning; was grown locally; to meet the grower or farmer; and for a price that does not include packaging, storage or transport. Produce stalls contribute to rural amenity and allow consumers to experience the primary production purpose of the rural zone.

Point Number 680.182

Summary of Decision Requested: **Retain** Rule 22.1.2 P10 Home stay, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is given for the permitted nature of this activity. It provides for small scale diverse business opportunities within the rural zone which can help to sustain a vibrant rural community and district.

Point Number 680.183

Summary of Decision Requested: **Retain** Rule 22.1.2 P11 Equestrian centre, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is given for the permitted nature of this activity. It provides for diverse opportunities for businesses reliant on land within the rural zone, which can help to sustain a vibrant rural community and district.

Point Number 680.184

Summary of Decision Requested: **Retain** Rule 22.1.2 P12 Horse training centre, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is given for the permitted nature of this activity. It provides for diverse opportunities for businesses reliant on land within the rural zone, which can help to sustain a vibrant rural community and district.

Point Number 680.185

Summary of Decision Requested: **Add** to Rule 22.1.2 a new permitted activity rule for farm quarries, as follows:

PXX Farm quarrying including aggregate excavation and ancillary earthworks

Activity specific conditions: Nil

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The new rule is considered consequential relief to address issues raised in previous submission points.

Point Number 680.186

Summary of Decision Requested: **Add** to Rule 22.1.2 a new permitted activity rule for rural contractors' depot, as follows:

PXX Rural contractors' depot

Activity specific conditions: Nil

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Rural contractors' depots present a low risk to the management of rural environments and these should be enabled as a permitted activity in the Rural Zone. Rural contractors' depots are relatively benign, from the perspective of effects on amenity values and quality of the rural environment. They generally present little environmental risk that cannot be managed within an appropriate permitted activity framework.
- Rural contractors need to co-locate in rural areas where their services are in demand by rural communities. Such facilities augment the social, cultural and economic wellbeing of rural communities. Rural communities tend to be more isolated from access to services than urban communities, and as such should not be subject to additional hardships otherwise caused by intensified isolation if rural contractors depots are discouraged from being able to co-locate in rural areas where their services are in demand.

Point Number 680.187

Summary of Decision Requested: **Add** to Rule 22.1.2 a new permitted activity rule for Intensive farming, as follows:

PXX Intensive farming with activity specific conditions:

(g) Not within 300 metres of an existing dwelling that is under separate ownership.

(b) Not within 50 metres of any boundary

(c) Meets all of the following conditions:

(i) Land Use – Effects in Rule 22.2

(ii) Land Use – Building in Rule 22.3

(iii) Building coverage does not exceed 3% of the site:

A. Rule 22.3.6 (Building Coverage) does not apply;

(iv) Building height does not exceed 15m;

A. Rule 22.3.4 (Building Height) does not apply;

AND

Delete Rule 22.1.3 RD1 (a) to (e) Restricted Discretionary Activities

AND

Add to Rule 22.1.3 RD1 Restricted Discretionary Activities the following:

RD1(g) Intensive farming activity that does not comply with Rule 22.1.1 PXX

AND

Retain the matters of discretion in Rule 22.1.3 RD1 Restricted Discretionary Activities Matters of Discretion

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The proposed setback distances from site boundaries for buildings, pens or areas used for intensive farming are excessive, and will create unnecessary restrictions for land use. The proposed rule is overly complicated and requires a restricted discretionary resource consent as a minimum requirement in every instance. Intensive farming activities are an expected and anticipated activity in the rural zone.
- Setback distances are a blunt planning tool, an enabling approach which is effects based can better meet the dynamic and evolving needs of resource users and planners in the long term.
- The opportunity to avoid, remedy or mitigate potential adverse effects should be afforded to new intensive farming operations who could utilise any number of ways to internalise effects. A restricted discretionary activity status is appropriate if permitted activity conditions are unable to be met in the first instance. This is a consistent and widely accepted approach which provides some certainty for plan users whilst retaining control when necessary to assess the potential off site effects of an intensive farming operation.

Point Number

680.188

Summary of Decision Requested:

Amend Rule 22.1.3 RD2 Restricted Discretionary Activities, as follows:

RD2 Rural Industry Depot

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Rural industry is an integral part of the rural sector, the activities of which are entirely appropriate and consistent with the underlying rural zone. The rule needs to be explicit in the intent which is to manage potential adverse effects of discrete sites or business locations on the surrounding area.

Point Number

680.189

Summary of Decision Requested:

Amend Rule 22.1.5 D5 Discretionary Activities as follows:

22.1.4.5 D5 Hazardous waste storage, processing or disposal excluding chemicals, fuel and other hazardous substances used for farming.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Storage of agrichemicals used for farming should not be subject to this rule. To do so would subject farmers to undue cost and delay in having to seek resource consent for little or no environmental benefit. Farmers regularly use chemicals in pesticides, fungicides and herbicides for pest and weed control, and other chemicals for animal husbandry. They also need to maintain on-site fuel storage for farm machinery and fertiliser storage. The hazardous nature of handling and storage of such chemicals and substances is managed under other legislation and there is no need for the Council to regulate this in the Proposed District Plan.
- The submission corrects the numbering error 22.1.5, which is duplicated for discretionary and non-complying activities.

Point Number

680.190

Summary of Decision Requested:

Amend Rule 22.1.5 D15 Discretionary Activities as follows:

22.1.4.5 D15 Afforestation of any part of an Outstanding or Natural Character Area ~~or High Natural Character Area.~~

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The notified rule is unnecessarily restrictive for an activity which could provide positive economic and biodiversity outcomes. The rule prioritises amenity over and above these other important values and as such does not strike the right balance. Further the planning

- maps do not differentiate between high natural character and natural character areas, this creates uncertainty for plan users and has the potential to capture more areas than intended to be controlled in this manner.

- The submission corrects the numbering error 22.1.5, which is duplicated for discretionary and non-complying activities.

Point Number 680.191

Summary of Decision Requested: **Retain** Rule 22.1.5 D16 Discretionary Activities if the definition is amended as per other submissions.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Conditional support will be extended to this rule if the definition is amended to incorporate submitter's relief sought. The exemptions to the definition are strongly supported but it is hard to understand what activities are hoped to be captured and controlled by this rule and for what purpose.
- The submission corrects the numbering error 22.1.5, which is duplicated for discretionary and non-complying activities.

Point Number 680.192

Summary of Decision Requested: **Delete** Rule 22.1.5 NC2 Non-Complying Activities.

AND

ADD to Rule 22.1.5 Discretionary Activity a new rule as follows:

Dxx

(a) A new extractive industry excluding farm quarries which are permitted under 22.1.2 PXX, located within all or part of any of the following:

(i) Outstanding Natural Feature;

(ii) Outstanding Natural Landscape;

(iii) High Natural Character Area

(iv) Outstanding Natural Character Area

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The proposed amendment is required to provide better consistency with the planning approach prescribed in Objective 5.4.1 and Policy 5.4.2. Further the rule contains drafting flaws which render it unworkable. There are no areas identified in the planning map legend as High Natural Character Areas or Outstanding Natural Character Areas.
- The submitter wants to be clear that Farm Quarries are not to be subject to triggering resource consent under such provisions.

Point Number 680.193

Summary of Decision Requested: **Delete** Rule 22.1.5 NC4 (a)(i) and (iv) Non-Complying Activities

AND

Add a new Discretionary Activities rule as follows:

Dxx

(a) Within the Urban Expansion Area, the following activities:

(i) Intensive farming

(ii) Extractive industry.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The proposed amendment is required to provide better consistency with the policy approach prescribed in Proposed District Plan. Whilst the submitter supports a forward looking plan, priority must be given to activities which can be expected and anticipated within the rural zone and are unable to be located elsewhere. Urban growth pressures must be addressed without an over reliance on ring-fencing and controlling legitimate activities within the rural zone. The submitter urges Council to contain the sprawling footprint of urban expansion using more innovative and modern planning techniques.

Point Number 680.194

Summary of Decision Requested: **Delete** Rule 22.1.5 NC5 Non Complying Activities.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter opposes this type of 'catch all' rule which they believe is poor planning practice and inconsistent with a number of RMA provisions.
- Under RMA section 9 the use of land is presumed to be permitted unless it is restricted by a rule in a plan. The submitter appreciates that not every eventuality can be covered with the use of activity lists, however Section 17(1) establishes that every person has a duty to avoid, remedy or mitigate any adverse effect on the environment arising from an activity carried on by or on behalf of that person, whether or not the activity is in accordance with a rule in a plan.
- This duty to avoid, remedy or mitigate adverse effects along with the enforcement options under Section 17(3) and option to notify a plan change or variation provide council with the appropriate opportunities to deal with unforeseen circumstances which may arise.

Point Number 680.195

Summary of Decision Requested: **Retain** Rule 22.2.1.1 P1 Noise-General as notified.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Strong support is extended to 22.2.1.1 (P1), the approach is consistent with the intent of Objectives 5.1.1 and 5.3.1 and related Policies, reverse sensitivity 5.3.7 in particular.

Point Number 680.196

Summary of Decision Requested: **Retain** Rule 22.2.1.1 P2 Noise - General, as notified.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Strong support is extended to 22.2.1.1 (P2), the approach is consistent with the intent of Objectives 5.1.1 and 5.3.1 and related Policies, reverse sensitivity 5.3.7 in particular.

Point Number 680.197

Summary of Decision Requested: **Delete** Rule 22.2.1.1 P4 Noise - General.
AND
Add a new advisory note (4) under Rule 22.2.1, Noise-General as follows:
(4) (a) Noise levels must be measured in accordance with the requirements of New Zealand Standard NZS 6801:2008 "Acoustics - Measurement of Environmental Sound".
(b) Noise levels must be assessed in accordance with the requirements of New Zealand Standard NZS 6802:2008 "Acoustic Environmental noise".
AND
Any consequential changes needed to give effect to this relief.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is extended to the inclusion of the standards as these help to provide certainty for plan users however submitter considers the information under P4 would be better placed under the 22.2.1 advisory section, not as a rule in and of itself.

Point Number 680.198

Summary of Decision Requested: **Retain** Rule 22.2.2 P1 (b) Glare and Artificial Light Spill
AND
Delete Rule 22.2.2 P1 (c) Glare and Artificial Light Spill.
AND
Any consequential changes needed to give effect to this relief.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter supports the intent of Rule P1(b) which is consistent with the stated policy approach and gives effect to reverse sensitivity principles. However, P1(c) is inconsistent with this approach and fails to appreciate the temporary nature of any adverse effects created from vehicles working at night and the necessity of the operation.
- The submitter accepts that where possible unacceptable nuisance effects such as light spill should be contained within the property boundary. However, farming requirements and weather conditions mean that even with the best intention it is not always possible to avoid a level of nuisance effect. In such instances (which are generally intermittent and temporary) it is imperative that the Plan clearly allows for this to ensure the farm business is not unduly impacted upon.
- An example is harvesting contractors and farmers working through the night to harvest crops due to short weather windows. Such effects are not unreasonable to expect in a rural area, and therefore this renders Rule 22.2.2P1(c) inappropriate. Submitter considers that it could result in creating unreasonable expectations of the amenity of the Rural Zone, and perpetuate reverse sensitivity issues with people, who are unaccustomed to a rural environment, complaining about normal farming activities and expecting those effects to be avoided or mitigated in every instance.
- Farming in a rural area should be a permitted activity.

Point Number 680.199

Summary of Decision Requested: **Retain** Rule 22.2.3.1 P1 Earthworks- General, except for the amendment sought below
AND
Amend Rule 22.2.3.1 P1 Earthworks - General, as follows:
(a) Earthworks for:
(i) Ancillary rural earthworks
(ii) Farm quarry where the volume of aggregate does not exceed 1000m3 per single consecutive 12 month period;
(iii) Construction and/or maintenance of tracks and stock underpasses, fences or drains;
(iv) A building platform for a residential activity, including accessory buildings
(v) A building platform for farm buildings and sheds

(vi) Land cultivation and pasture maintenance, including horticultural root ripping and shelterbelt maintenance

(vii) Water supply lines, troughs, water tanks, off-stream dams

(viii) Constructed wetlands, effluent ponds, stormwater detention ponds, and stormwater bunds

(ix) Rural firebreaks

(x) Airstrips, helipads, fertiliser storage areas

(xi) Silage pits, and fodder storage hard-stand areas

(xii) Offal pits, burying dead stock and plant waste

(xiii) For the purpose of pest and weed control or stock exclusion. This includes maintaining or constructing perimeter fencing and tracks for safe and efficient trap setting and earthworks for culvert crossings and stock bridges

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Strong support is extended to P1, the approach is consistent with the intent of Objectives 5.1.1 and 5.3.1 and related Policies.
- Earthworks for farming should be included as a permitted activity as there is little risk to the environment from undertaking such earthworks within the wide open spaces of rural areas. If these aren't provided for explicitly. The submitter is concerned that these sorts of earthworks could get caught by rules that trigger resource consent for certain types of other earthworks, which would put farmers through undue delay and cost hardship, for little or no environmental benefit.
- Earthworks associated with creating a building platform for non-residential purposes such as a farm implement shed within the rural zone should be permitted under this rule.

Point Number

680.200

Summary of Decision Requested:

Amend Rule 22.2.3.1 P2 (a) Earthworks - General, as follows:

(a) Earthworks within a site, excluding ancillary rural earthworks which are permitted under 22.2.3.1 P1, must meet all of the following conditions...

AND

Delete Rule 22.2.3.1 P2 (a) (vi) Earthworks-General.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter supports the permitted activity status and accept that conditions may be required to manage potential adverse effects which may arise from certain earthwork activities. However, the conditions need to make sense within the context of the rural zone and fall within the jurisdiction of the district council.
- The relief sought for the earthworks definition will in part address the concerns, but for the sake of completeness that some of the conditions listed have been set at an inappropriately low threshold and will capture farming activities unnecessarily.

Point Number

680.201

Summary of Decision Requested:

Delete Rule 22.2.3.1 P4 (a) (vii) Earthworks - General.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intention and purpose of this rule however, the conditions need to fall within the jurisdiction of the district council.

Point Number

680.202

Summary of Decision Requested:

Retain Rule 22.2.3.1 RDI Restricted Discretionary Activities Earthworks - General, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Submitter understands the purpose of Rule RDI and considers the matters of discretion appropriate.

Point Number

680.203

Summary of Decision Requested:

Add new matter of discretion (iii) to Rule 22.2.3.2 RDI (b) Earthworks - Maaori Sites and Maaori Areas of Significance, as follows:

(iii) the applicant's functional and operational need to undertake the activity in the area.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the purpose of the rule, however considers that when a site is located within privately-owned land which has been legitimately farmed, some consideration needs to be given to the functional need for some farming activities to continue.

Point Number 680.204

Summary of Decision Requested: **Add** new matter of discretion (iii) to Rule 22.2.3.2 RD2 (b) Earthworks - Maori Sites and Maori Areas of Significance, as follows:

~~(iii) the applicant's functional and operational need to undertake the activity in the area~~

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the purpose of the rule, however considers that when a site is located within privately owned land which has been legitimately farmed, some consideration needs to be given to the functional need for some farming activities to continue.

Point Number 680.205

Summary of Decision Requested: **Amend** Rule 22.2.3.3 P1 Earthworks-Significant Natural Areas, as follows:

~~(a) Earthworks for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area must meet all of the following conditions:~~

~~(g) Earthworks for farming within an identified Significant Natural Area.~~

Activity-specific conditions:

Nil

~~(b) Earthworks, other than for farming, within an identified Significant Natural Area must meet all of the following conditions:~~

~~(i) The earthworks must not exceed a volume of 50m³ in a single consecutive 12 month period; and~~

~~(ii) The earthworks must not exceed an area of 250m² in a single consecutive 12 month period;~~

~~(iii) The total depth of any excavation or filling does not exceed 1.5m above or below ground level with a maximum slope of 1:2 (1 vertical to 2 horizontal);~~

~~(iv) Earthworks are setback 1.5m from all boundaries;~~

~~(v) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;~~

~~(vi) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;~~

~~(vii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.~~

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands that areas which meet Significant Natural Area identification criteria can be subject to land use controls for the purposes of managing adverse effects on the biodiversity values of the site.
- The District Plan should provide for or enable activities that can support in maintaining or enhancing these areas.
- This includes maintenance of everyday farming activities like farm tracks, which are necessary for the safe and efficient movement of stock and farm vehicles. If there were a disruption to the functioning of any track, then farmers need the ability to form alternative safe access to parts of their farm that needs access, including for the purpose of moving stock. A farmer cannot afford to wait four or more weeks to have to obtain resource consent to move stock that are trapped in a part of the farm where existing access has become disrupted or blocked. The welfare of the stock and the economic well-being of the farmers are at stake.

Point Number 680.206

Summary of Decision Requested: **Amend** Rule 22.2.3.3 RD1 (b) (ii) Earthworks - Significant Natural Areas, as follows:

~~(b) Councils discretion is restricted to the following matters:~~

~~(i) The location of earthworks taking into account waterways, significant indigenous vegetation or habitat~~

~~(ii) The effects on the values and integrity of the Significant Natural Area.~~

AND

Add a new clause to Rule 22.2.3.3 RD1 (b) Earthworks - Significant Natural Areas

(iii) The purpose and functional need of the earthworks

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter considers there to be unnecessary duplication between (i) and (ii). It is the effects of earthworks on the values and integrity of the Significant Natural Area and purpose of the activity which should be Council's key priorities.

Point Number 680.207

Summary of Decision Requested: **Amend** Rule 22.2.3.4 P1 Earthworks – within Landscape and Natural Character Areas, as follows:

~~(g) Ancillary rural earthworks for are for the maintenance of existing tracks, fences or drains within an identified Landscape or Natural Character Area and must meet all of the following conditions:~~

~~(iii) The height of the resulting cut or batter face in stable ground does not exceed 1.5m;~~

~~(iv) The maximum slope of the resulting cut or batter face in stable ground does not exceed 1:2 (1m vertical to 2m horizontal);~~

~~(v) Areas exposed by the earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;~~

(vi) Sediment is retained on the site through implementation and maintenance of erosion and sediment controls;

~~(vii) The earthworks do not divert or change natural water flows, water bodies or established drainage paths.~~

(b) Earthworks for other purposes must meet all of the following conditions:..

(i) The earthworks are undertaken within a single consecutive 12 month time period;

(ii) The earthworks must not exceed the following areas and volumes within a single consecutive 12 month period:..

Landscape or natural character area	Area (m2)	Volume (m3)
Hill Country Significant Amenity Landscape	1,000	500
Significant Amenity Landscape Waikato River Margins and Lakes	500	500
Significant Amenity Landscape (SAL) sand dune		
High or Outstanding Natural Character area of the coastal environment))
Outstanding Natural Feature sand dune) 50) 250
Outstanding Natural Feature (ONF)))
Outstanding Natural Landscapes (ONLs)))

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone

Decision Reasons:

- The submitter understands that outstanding landscapes and features which meet certain criteria can be subject to land use controls for the purposes of managing adverse effects on the landscape values.
- The District Plan must focus on the values of the features and landscapes to recognise that landscapes across rural areas are changing all the time and that the working nature of the farming activities occurring in that space are part of that values system.
- To place arbitrary earthworks thresholds as the trigger for consent is a relatively blunt planning technique. The submitter is concerned that the size of earthworks allowed per site in any 12-month period is far too restrictive to have meaning for farming activities. Earthworks can be required for a number of reasons some of which are outside a farmers control for example to repair slip or flood damage. It is unduly onerous to require resource consent to mitigate damage from a natural event. Earthworks can be required to maintain and construct tracks and fencing which are a vital network through farms.
- The submitter appreciates why Council seeks to protect Outstanding Landscapes and understand these standards are being used to implement Chapter 3 Objectives. However, the goals can be achieved with reasonable permitted activity standards for activities which have, in part, contributed to the landscape values.
- The conditions need to fall within the jurisdiction of the district council.
- The submitter seeks that Significant Amenity Landscapes (SAL) references be deleted from these rules consistent with other relief sought in relation to SALs in this regard.

Point Number

680.208

Summary of Decision Requested:

Amend Rule 22.2.3.4 D1 Earthworks – within Landscape and Natural Character Areas, as follows:

~~RD1~~

(a) Earthworks within an identified Landscape or Natural Character Area that do not comply with Rule 22.2.3.4 P1.

AND

Add new clause (b) to Rule 22.2.3.4 D1 Earthworks – within Landscape and Natural Character Areas, as follows:

(b) Council's discretion is restricted to the following matters:

(i) Visibility from public place; and

(ii) Scale of earthworks and effects on the landscape values;

(iii) The purpose and functional need of the earthworks

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The leap from permitted activity status with standards to Discretionary is inappropriate for a consenting pathway in this context. A restricted discretionary activity status is more consistent with the Proposed District Plan rules framework and the matters which Council should focus on are easily defined.

Point Number

680.209

Summary of Decision Requested:

Amend Rule 22.2.4 P1 Hazardous Substances, as follows:

(a) The use, storage or disposal of any hazardous substances where:

(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Rural Zone in Table 56.1 contained within Appendix 56 (Hazardous Substances), with the exception of: ...

(ii) Activities that involve the storage, use, disposal and transportation of agrichemicals, hazardous substances and fuels on land used for primary production that complies with:

(a) NZS8409:2004 Management of Agrichemicals;

(b) The Hazardous Substances and New Organisms Act 1996 (HSNO) and Regulations

(c) The storage and use of Class 3 fuels within the Rural Zone in accordance with the Environmental Protection Agency's Approved Practice Guide for Above Ground Fuel Storage on Farms, September 2010;

(d) The storage and use of fertiliser within the Rural Zone in accordance with the:

- Fertiliser (Corrosive) Group Standard HSR002569, and
- Fertiliser (Oxidising) Group Standard HSR002570, and
- Fertiliser (Subsidiary Hazard) Group Standard HSR002571, and
- Fertiliser (Toxic) Group Standard HSR002572, and
- Fert Research's Code of Practice for Nutrient Management 2007

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone

Decision Reasons:

- Whilst the submitter understands the enabling intention of the Activity Table, they believe that tables of permitted quantities using HSNO classifications can be very difficult for resource users and council staff to interpret and determine where farm hazardous substances fit in. Agrichemicals and fertilisers can be made up of many substances and the permitted activity status is based on all the substances on the whole property.
- Where legislative controls or codes of practice exist, that there is no need for a District Council to require resource consent for the same activity.
- Hazardous substances are already controlled by the Hazardous Substances and New Organisms Act 1996 (HSNO Act) and agrichemicals are managed through NZS8409 and fertilisers in particular under Fertilisers (Subsidiary Hazard) Group Standards.
- Federated Farmers and Fert Research were involved in the development of Group Standards for fertilisers and agrichemicals. Group Standards for fertilisers are based on their hazardous substance classification: Corrosive HSR002569; Oxidising HSR002570; Subsidiary Hazard HSR002571; and Toxic 6.1 HSR002572. This demonstrates that fertilisers are already being appropriately managed, and this should be a consideration when any district plan provisions are developed.
- The submitter is concerned that the proposed rule may trigger a discretionary resource consent for fertiliser use, storage or disposal. Under Table 5.1 Rule 1 - Use, storage and disposal of hazardous substance sub-classes 1.4, 1.5, 1.6, 6.1D, 6.1E, 6.3, 6.4, 6.5, 9.1D, 9.2D, and 9.3 are exempt from this table. We ask then how is the use, storage or disposal of those exempt hazardous substances enabled when there is no ability to meet the permitted conditions of 22.2.4 P1 (a)(i).
- The most appropriate way to achieve a clear and concise planning system is to include exemptions to the rule.
- Please also note the incorrect Appendix is referenced within proposed Rule P1.

Point Number 680.210

Summary of Decision Requested: **Add** new clause (b) to Rule 22.2.6.1 P1 Signs-General, as follows:

(b) Signs required for legislative purposes

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone

Decision Reasons:

- Signs required by other legislation such as under the HSNO Act 1996, the Health and Safety in Employment Acts, The Biosecurity Act 1993, both on private property and on public land are also permitted.

Point Number 680.211

Summary of Decision Requested: **Amend** Rule 22.2.7 P1 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

(a) Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) for the following purposes:

(i) Removing vegetation that endangers human life or existing buildings or structures or to manage fire risk;

(ii) Construction of conservation fencing to exclude stock and tracks for pest management;

(iii) Maintaining existing farm drains;

(iv) Maintaining existing tracks and fences; or

(v) Gathering plants in accordance with Maaori customs and values.

(vi) The removal of broken branches, deadwood or diseased vegetation;

(vii) To give effect to a Sustainable Forest Management Plan or Permit as approved under the Forests Act 1949 prior to 16 September 2010;

(viii) Activities are carried out subject to and in accordance with any specific covenants or other legal agreements entered into with the District Council, or Waikato Regional Council, or Department of Conservation, or QEII Trust;

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Additional uses must be provided for as permitted activities. The submitter considers that the proposed additions are practical, provide more certainty and ensure Council continues to meet RMA obligations.

Point Number 680.212

Summary of Decision Requested: **Amend** Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

Removal of up to 205m³ of manuka and/or kanuka outside of the Coastal Environment per single consecutive 12-month period per property for domestic firewood purposes and arts or crafts, provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of the rule, however the 5m³ threshold is far too restrictive and the requirement for the removal to not directly result in the death, destruction or irreparable damage of any other tree, bush or plant is a nonsense. The literal interpretation of this provision extends this protection to both indigenous and exotic vegetation, including pest plants.

Point Number 680.213

Summary of Decision Requested: **Amend** Rule 22.2.7 P3 (a) (ii) Indigenous vegetation clearance inside a Significant Natural Area, as follows:

(ii) The total indigenous vegetation clearance does not exceed 250m²-500m² per building, including areas associated with access, parking and manoeuvring

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is extended to the enabling intent of this rule however, the submitter is unsure why land title is a factor in determining the permitted clearance thresholds for building and associated access purposes. This issue is about adverse effects and if Council accepts that 500m² can be cleared per dwelling on Maori Freehold Land or Maori Customary land then that level of effects should also be accepted on fee simple land.

Point Number 680.214

Summary of Decision Requested: **Amend** Rule 22.2.7 P6 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

Removal of up to 50m³ of manuka and/or kanuka outside of the Coastal Environment per single consecutive 12-month period per property for domestic firewood purposes and arts or crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of the rule, however the 5m³ threshold is far too restrictive and is unsure why a distinction is made between vegetation which may be inside or outside the Coastal Environment (P2 v P6) when the clearance threshold is the same. Further the requirement for the removal to not directly result in the death, destruction or irreparable damage of any other tree, bush or plant is a nonsense. The literal interpretation of this provision extends this protection to both indigenous and exotic vegetation, including pest plants.

Point Number 680.215

Summary of Decision Requested: **Amend** Rule 22.2.7 D1 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

~~RD1~~

(a) Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 5 (Urban Allotment Significant Natural Areas) that does not comply with one or more conditions in Rule 22.2.7 P1, P2, P3, P4, P5 or P6.

(b) Council's discretion is restricted to the following matters:

(i) The measures to avoid, remedy or mitigate any adverse effects to the significant indigenous vegetation and significant habitats of indigenous fauna, including species relocation, offset and restorative planting;

(ii) Any cumulative effects arising from the proposed activity;

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter considers the leap from permitted activity status with standards to discretionary is inappropriate for a consenting pathway in this context. A restricted discretionary activity status is more consistent with the Proposed District Plan rules framework and the matters which Council should focus on are easily defined.

Point Number 680.216

Summary of Decision Requested: **Amend** Rule 22.2.8 (P1) Indigenous vegetation clearance outside a Significant Natural Area, as follows:

(a) Indigenous vegetation clearance outside a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) must be for the following purposes:

(i) Removing vegetation that endangers human life or existing buildings or structures;

(ii) Maintaining or reinstating productive pasture through the removal of up to 1000m² per single consecutive 12 month period of manuka and/or kanuka that is more than 10m from a waterbody, and less than 4m in height;

(iii) Constructing and maintaining existing tracks and fences;

(iv) Constructing and maintaining existing farm drains;

(v) Conservation Activities to fencing to exclude manage stock or pests such as installing a bait station network or undertaking plant pest management activities;

(vi) Gathering of plants in accordance with Maaori custom and values; or

(vii) A building platform and associated access, parking and manoeuvring up to a total of 1,000m² 500m² clearance of indigenous vegetation.

(viii) To create and maintain firebreaks

(ix) The clearance or modification of indigenous vegetation that has been planted and managed specifically for commercial production forestry, horticulture or agriculture purposes.

(x) To give effect to a Sustainable Forest Management Plan or Permit as approved under the Forests Act 1949 prior to 16 September 2010;

(xi) Activities are carried out subject to and in accordance with any specific covenants or other legal agreements entered into with the District Council, or Waikato Regional Council, or Department of Conservation, or QFII Trust;

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Additional uses must be provided for as permitted activities. The proposed amendments are practical, provide more certainty, avoid duplication and ensure the Council continues to meet RMA obligations.
- The thresholds will have a limiting effect on farming practice. It will potentially prevent further development of useful rural resources and trigger the need for resource consent for anticipated and expected activities within the rural zone which is contradictory to a number of objectives and policies within the Plan.
- The restriction on all indigenous vegetation clearance within 10 metres of a waterbody is problematic and potentially unduly onerous given the term 'waterbody' is not defined within the plan. This also makes it difficult to understand how the rule will be accurately monitored.

- Clearance for activities such as formation of fences, firebreaks, crossings, tracks and pest management should be expected to occur on farms and rural areas, and the submitter would like to see provision for those activities within the permitted activity framework.

Point Number 680.217

Summary of Decision Requested: **Amend** Rule 22.2.8 RD1 (b) (iv) Indigenous vegetation clearance outside a Significant Natural Area, as follows:

(iv) the extent to which the clearance on Maaori Freehold Land or Maaori Customary Land affects Tangata Whenua relationships with indigenous biodiversity on the site;

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of this rule is to give effect to the Waikato Regional Policy Statement. The matters of discretion are broadly accepted with the exception of RD1(b)(iv) which they do not consider is appropriate to apply to land which is in private ownership.

Point Number 680.218

Summary of Decision Requested: **Amend** Rule 22.3.1 Number of dwellings within a lot, as follows:

(a) One dwelling within a lot containing less than ~~40~~ 20ha,

(b) No more than two dwellings within a lot containing between 20 ha to 40ha or more;

AND

Add new clause (c) to Rule 22.3.1 Number of dwellings within a lot, as follows:

(c) No more than three dwellings within a lot containing over 40 ha or more;

~~(d)~~ Any dwelling(s) under Rule 22.3.1 P1 (a), (b) and (c), must not be located within any:

(i) Outstanding Natural Feature;

(ii) Outstanding Natural Landscape;

~~(iii) Outstanding Natural Character Area;~~

~~(iv) High Natural Character Area;~~

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of this provision with regards to P1(c)(i) and (ii), however the rule should not apply to areas which do not meet RMA Section 6(b) status.
- The submitter supports the graduated approach to the number of dwellings on a site, however considers that the proposed numbers are currently overly restrictive for rural purposes. Many farms have extra dwellings as accommodation for farm managers, employees, or retired parents. Allowing for more than two dwellings per site on larger properties will enable the social well-being of rural communities.

Point Number 680.219

Summary of Decision Requested: **Amend** Rule 22.3.2 P1 (b) (i) Minor dwelling, as follows:

(b) Where there is an existing dwelling located within a lot:

(i) The minor dwelling must be located within ~~20~~ 20m of the dwelling;

(ii) The minor dwelling must share a single driveway access with the existing dwelling.

(iii) The number of existing dwellings does not already exceed that permitted under Rule 22.3.1(P1).

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter supports the intent of this provision but considers the setback of 20m is unnecessarily restrictive. The addition of the new provision is appropriate as a consequential change resulting of the relief sought under 22.3.1 (P1).

Point Number 680.220

Summary of Decision Requested: **Amend** Rule 22.2.3 Buildings and structures in Landscape and Natural Character Areas so that only natural features and natural landscapes that have demonstrable outstanding natural qualities and are identified and mapped as Outstanding Landscapes or Features are subject to this rule.

AND

Amend Rule 22.3.3 D1 Buildings and structures in Landscape and Natural Character Areas as follows:

~~RD1~~

(a) Building or structure located within any:

(i) Outstanding Natural Feature;

(ii) Outstanding Natural Landscape;

(iii) Outstanding Natural Character Area;

~~(iv) High Natural Character Area;~~

AND

Add a new restricted discretionary activity rule (b) to Rule 22.3.3 D1 Buildings and structures in Landscape and Natural Character Areas, as follows:

(b) Council's discretion is restricted to the following matters:

(i) The extent to which the building or structure adversely affects the stated landscape or feature values, and in particular whether the activity is prominent when viewed from the road or other public land.

(ii) The functional or operational need of the building or structure to locate within the identified area.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter has serious concerns with the proposed planning approach. It is overly restrictive and will inappropriately capture farming relating buildings and structures such as stock yards. A permitted activity response with associated restricted discretionary activity rule is more consistent with the Proposed District Plan rules framework and the matters which Council should focus on are easily defined.
- The submitter understands the purpose of the rule is to manage the adverse effects of buildings and structures on Outstanding Natural Feature's (ONFs) and Outstanding Natural Landscape's (ONLs), however the proposed rule makes no distinction between development which is appropriate and that which may have inappropriate effects on the values of the ONFs and ONLs.
- The district's landscapes are inhabited by people and subject to human activity and change; they have never been static. The rural landscape in particular has been shaped by the activity of people and more recently farming activities over several generations, and will continue to be in future. Submitter supports the development of workable solutions for the management of ONFs and ONLs across the district. But there is no reason for normal rural activities such as construction of farm buildings and structures or placement of large tanks to be subject to the expense and time delays associated with discretionary resource consents.
- The submitter has concerns with both the use of the term 'Outstanding Natural Character' Area and 'High Natural Character Area' and the lack of consultation through which they have been incorporated into the proposed plan.
- The submitter requests that only natural features and natural landscapes that have demonstrable outstanding natural qualities are identified and mapped as Outstanding Landscapes or Features are therefore subject to this Rule.

Point Number

680.221

Summary of Decision Requested:

Add a new permitted activity rule P1 to Rule 22.3.3 Buildings and structures in Landscape and Natural Character Areas, as follows:

P1

(a) Maintenance and replacement of existing buildings, or structures within an identified outstanding natural feature or landscape.

(b) New buildings and structures ancillary to agricultural production activities within pastoral landscapes that form part of an Outstanding Natural Feature and Landscape that:

(i) When visible from a road or other public place does not extend above any ridgeline and does not have a backdrop of a lake or sky;

(ii) That the maximum floor area is 600m² and

(iii) That the maximum height is 10 metres.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- This relief is required to give effect to submission points raised in relation to Rule 22.3.3 D1.

Point Number

680.222

Summary of Decision Requested:

Retain Rule 22.3.4.1 P1 Height - Building General, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter supports this rule.

Point Number

680.223

Summary of Decision Requested:

Delete Rule 22.3.4.1 (P2) Height - Building General.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- This relief is required to give effect to submission points raised in relation to Policy 3.4.3.

Point Number

680.224

Summary of Decision Requested:

Amend the title of Rule 22.3.6 Building coverage as follows:

22.3.6 Building coverage (excluding buildings ancillary to farming purposes)

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of this rule but considers the amendment is necessary for clarity sake and to increase certainty.
- The submitter is concerned if covered yards, woolsheds, implement sheds or milking platforms were interpreted as being subject to this rule.

Point Number 680.225

Summary of Decision Requested: **Retain** Rule 22.3.7.1 P1 Building Setbacks – All boundaries, as notified.
AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of these rules and is supportive of the planning approach taken.

Point Number 680.226

Summary of Decision Requested: **Retain** Rule 22.3.7.1 P2 Building Setbacks – All boundaries, as notified.
AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of these rules and is supportive of the planning approach taken.

Point Number 680.227

Summary of Decision Requested: **Retain** Rule 22.3.7.1 P3 Building Setbacks – All boundaries, as notified.
AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of these rules and is supportive of the planning approach taken.

Point Number 680.228

Summary of Decision Requested: **Retain** Rule 22.3.7.1 P4 Building Setbacks – All boundaries, as notified.
AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of these rules and is supportive of the planning approach taken.

Point Number 680.229

Summary of Decision Requested: **Retain** Rule 22.3.7.1 RD1 Building Setbacks – All boundaries, as notified.
AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of these rules and is supportive of the planning approach taken.

Point Number 680.230

Summary of Decision Requested: **Retain** Rule 22.3.7.2 Building setback sensitive land use, as notified, if the changes sought to the definition of "Sensitive land use" are accepted.
OR

Delete Rule 22.3.7.2 P1 (a)(vii) Building setback sensitive land use from the rule.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of these rules and extends conditional support if the definition of sensitive land use is amended as per their relief sought in an earlier submission. The current definition captures homestay activities which they consider is unduly onerous and unnecessary given the nature of that activity.

Point Number 680.231

Summary of Decision Requested: **Amend** Rule 22.3.7.5 P1 (a) Building setback – water bodies, as follows:

(a) Any building (unless there is a functional or operational need to be closer), must be set back a minimum of..

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the intent of the rule however the all-encompassing nature of the building definition could capture buildings with an operational or function need to be closer, such as pump sheds for example.

Point Number

680.232

Summary of Decision Requested:

Delete Rule 22.3.7.6 PI Building setback – Environmental Protection Area.

AND

Delete Environmental Protection Areas from the planning maps, as a consequential amendment.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter is unsure what *Environmental Protection Areas* are and what the purpose of identifying them is. There is no mention of these areas within the policy framework and no definition provided in Chapter 13. Without knowing how they have been identified and what the purpose is they are unable to assess the merits or otherwise of this proposed rule.

Point Number

680.233

Summary of Decision Requested:

Delete Rule 22.3.7.6 (D1) Building setback – Environmental Protection Area.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- This is a consequential amendment, as it is related to the concerns raised under Rule 22.3.7.6 (PI).

Point Number

680.234

Summary of Decision Requested:

Amend Rule 22.4.1.1 Prohibited subdivision to be a Discretionary activity instead of Prohibited Activity status.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter is opposed to the use of prohibited activity status in this regard. The absolute nature of this approach is unnecessary and unduly restrictive.

Point Number

680.235

Summary of Decision Requested:

Add a new Controlled Activity rule to Section 22.4 Subdivision as follows:

Subdivision to adjust a common boundary – Controlled activity.

Despite rule 22.4.1.2, subdivision is a controlled activity if:

(1) the result of the subdivision is to adjust a common boundary between two viable certificates of title, and
(2) no additional certificates of title are created, and
(3) the subdivision creates certificates of title having substantially the same area, shape, location and access as before the subdivision, and
(4) no additional potential for permitted activity dwellings and no additional subdivision potential is created beyond that which already existed prior to the subdivision occurring.

Control is reserved over

- area and shape of certificates of title
- easements

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter considers that subdivision to create a boundary adjustment should be a controlled activity as there is little or no risk of adverse effect that cannot be appropriately managed by matters of control.

Point Number

680.236

Summary of Decision Requested: **Amend** Rule 22.4.1.2 RD1 General subdivision, to make subdivision of lots with a minimum area of 20ha a Controlled Activity in the Rural Zone, with appropriate matters of control.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Lots which are a minimum of 20ha in area should be a *controlled activity* in the Rural Zone, with a controlled activity standard that requires all lots to be a minimum size of 20 ha (in addition to other appropriate matters of control).
- There is little or no risk of adverse effects to the environment from such subdivision that cannot be managed by appropriate matters of control, or where subdivision raises other issues, such as natural hazard risk, traffic safety risk, or management of environmentally sensitive areas, etc through more careful consideration of effects through an alternative activity pathway whereby discretion is reserved to some restricted extent.
- Subdivision of lots which are a minimum of 20ha in area should otherwise be provided for as a controlled activity in the Rural Zone. Lots which are 20ha minimum are a practical size for land management for various sorts of farming activity including grazing for dry stock and dairy stand-off. If these can be acquired by farmers with relative certainty, this would enable farming communities to more efficiently provide for their social and economic wellbeing.
- Where subdivision cannot achieve a standard of minimum 20ha lot area, the subdivision could trigger to a *restricted discretionary activity* status provided that any lot is at least 8,000m² in area, and the Council's suggested criteria for high class soil can also apply.

Point Number 680.237

Summary of Decision Requested: **Amend** Rule 22.4.1.2 NCI General subdivision, from Non-complying activity status to Discretionary activity status.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter is opposed to the use of non-complying activity status in this regard. The approach is unnecessary and unduly restrictive.

Point Number 680.238

Summary of Decision Requested: **Amend** Rule 22.4.1.4 RD1 Boundary relocation from Restricted Discretionary Activity status to a Controlled Activity status in the Rural Zone.

AND

Amend Rule 22.4.1.4 RD1 (b) Boundary relocation, as follows:

(b) Council's discretion is restricted reserves control over to the following matters:

(i) Amalgamation of land subdivision layout and design including dimension, shape and orientation of the proposed lots;

(ii) Any change in vehicle access from a road as a result of the proposed new lot boundaries effects on rural character and amenity values;

(iii) Easements effects on landscape values; and

(iv) Potential for reverse sensitivity effects.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- There is a continuing need to provide for subdivision such as boundary adjustments and amalgamations, in order to provide for efficient property management.
- The risk to the environment from subdivision for boundary relocation is low because no new lots are being created and there is no overall intensification of land use. Therefore, there is no need to manage boundary relocation as a restricted discretionary activity, and that boundary relocation can, and should be, dealt with via controlled activity status and appropriate matters of control.

Point Number 680.239

Summary of Decision Requested: **Retain** Rule 22.4.1.5 Rural Hamlet Subdivision, as notified.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is extended to the planning approach being taken.

Point Number 680.240

Summary of Decision Requested: **Amend** Rule 22.4.1.6 RD1 (a)(iii) Conservation lot subdivision, as follows:

(iii) The Significant Natural Area is not already subject to a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977, unless the landowner who set up the covenant (or their successors in title) had not previously subdivided an equivalent qualifying conservation lot in exchange for such protection covenant(s);

...

(vii) This rule of its equivalent in a previous district plan has not previously been used to gain an additional subdivision entitlement;

(b) Where subdivision to create a conservation lot may be inappropriate due to the sensitive nature of the location, or unsuitability due to natural hazard risk or traffic safety hazard risk or inability to service the lot with on-site, potable water and fire-fighting water supply or on-site domestic sewage treatment and disposal, landowners may apply to transfer an entitlement for a qualifying conservation lot to more appropriate location.

(c) ~~(b)~~ Council's discretion is restricted to the following matters...

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter supports the intention, with the exception of (iii), and ask why penalise those who have been proactive? The conservation lot subdivision can be retrospective as provision (viii) makes sure there is no double dipping which is understandable.
- In some cases, farmers may have previously set up conservation covenants such as QE2 etc on worthy natural features within their farmland, but have not had the advantage of being able to subdivide a conservation lot in exchange for that past undertaking. In the submitter's view, where a farmer has previously sought to protect a natural feature through such conservation covenant, the ability to subdivide one or more qualifying conservation lots should be recognised.
- The protection of suitable natural features can be encouraged through incentives such as additional subdivision rights that can be transferred to another location, if the locality where the natural feature in question is situated, is too sensitive to allow conservation lots in that location. It should be feasible to enable some form of Transferable Development Right to create one or more qualifying conservation lots elsewhere in exchange for the protection of a natural feature, by way of a restricted discretionary activity.

Point Number

680.241

Summary of Decision Requested:

Amend Rule 22.4.2 RD1 Title boundaries – natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas, as follows:

(a) Subdivision of land containing any natural hazard area, contaminated land, ~~Significant Amenity Landscape~~, notable trees, intensive farming activities...

(iii) The boundaries of every proposed lot must not divide and of the following:

A. A natural hazard area;

B. Contaminated land;

~~C. Significant Amenity Landscape;~~

D. Notable trees

(b) Council's discretion is restricted to the following matters:

~~(i) landscape values~~

~~(ii) amenity values and character~~

...

(ix) effects on any Aggregate Extraction Area (*not including Farm Quarries*).

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Amendment is required to give effect to relief sought with regard to Policy 3.4.3.

Point Number

680.242

Summary of Decision Requested:

Retain Rule 22.4.3 RD1 Title boundaries – Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance, as notified (once the issues relating to the identification process have been addressed).

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Conditional support is extended to this planning approach once the issues relating to the identification process has been addressed.

Point Number

680.243

Summary of Decision Requested:

Amend Rule 22.4.3 Title boundaries – Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance from Non-complying Activity status to Discretionary Activity status, as follows:

~~NC-D1~~ Subdivision that does not comply with Rule 22.4.3 RD1

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Submitter considers discretionary activity status to be more appropriate than non-complying.

Point Number

680.244

Summary of Decision Requested:

Delete Rules 22.4.5 D1 (a) (i) - (v) Subdivision within identified areas.

AND

Any consequential changes needed to give effect to this relief.

AND

Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter understands the principle but seeks deletion of the application to areas (i)-(v) until there is some confidence in the areas which have been identified.

Point Number 680.245

Summary of Decision Requested: Delete Rule 22.4.6 RD1 Subdivision of land containing all or part of an Environmental Protection Area.
AND
Delete Rule 22.4.6 D1 Subdivision of land containing all or part of an Environmental Protection Area.
AND
Any consequential changes needed to give effect to this relief.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Submitter is unsure what Environmental Protection Areas are and what the purpose of identifying them is. There is no mention of these areas within the policy framework and no definition provided in Chapter 13. Without knowing how they have been identified and what the purpose is they are unable to assess the merits or otherwise of this proposed rule.

Point Number 680.246

Summary of Decision Requested: Amend Rule 22.4.7 (RD1)(a) Esplanade reserves and esplanade strips, as follows:
(a) An esplanade reserve or esplanade strip 20m wide (or such other width stated in Appendix 4 (Esplanade Priority Areas)) is required to be created and vested in Council from every subdivision where the land being subdivided is within 20m of any water body identified in Appendix 4 (Esplanade Priority Areas);
AND
Any consequential changes needed to give effect to this relief.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The amendment is required to address the concerns raised under Policy 8.1.3.

Point Number 680.247

Summary of Decision Requested: Amend Rule 22.4.9 RD1 Subdivision - Building platform, as follows:
a) Subdivision, other than an access, ~~or~~ utility allotment or boundary adjustment or boundary relocation, must provide a building platform on the proposed lot that: ...
AND
Any consequential changes needed to give effect to this relief.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- The submitter is concerned that the building platform requirement may be triggered in every instance where boundary adjustment or relocation is being undertaken. Amendment is required for clarity sake, to avoid any confusion and provides increased certainty.

Point Number 680.248

Summary of Decision Requested: Retain Section 22.5 Specific Area – Agriculture Research Centres, as notified.
AND
Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.

Decision Reasons:

- Support is extended to the planning approach taken.

Point Number 680.249

Summary of Decision Requested: Delete all notified overlays on the Proposed District Plan planning maps which are identified over private land. The relief sought specifically relates to the overlays listed on the Waikato Proposed Plan Legend as:

- Natural character
- Environmental Protection Area
- Significant Amenity Landscapes
- Significant Natural Area
- Outstanding Natural Landscapes
- Outstanding Natural Feature
- Walkway Cycleway Bridleway
- Maaori Site of Significance
- Maaori Area of Significance

AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This relief sought is required as a consequential amendment to address the serious concerns which have been raised throughout this submission. The process used to identify and map these overlays onto private land has not been sufficiently robust to have any confidence in the accuracy of the data which has been mapped. This is particularly important to get right given the degree of regulation proposed to be applied over these respective areas.
- Submitter supports the principle of a planning approach that seeks to identify areas of national importance and consider that a targeted planning response is more appropriate than general catch all rules. The submitter considers that this plan has been notified prematurely before essential quality control work has been undertaken.
- Further frustrations relate to the consultation process. It is the submitters understanding that many affected parties are either not aware nor understand the implications of these overlays being mapped onto their properties. The submitter considers that Council has not been particularly proactive during the consultation process and it can be argued that affected parties will be disheartened that the pre-notification consultation ended up being ineffective.

Point Number	680.250
Summary of Decision Requested:	Retain Appendix 6: Biodiversity Offsetting, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter understands the purpose and intent of Appendix 6.
Point Number	680.251
Summary of Decision Requested:	Amend Rule 22.1.5 Discretionary Activities to be Rule 22.1.4. AND Any consequential changes needed to give effect to this relief. AND Any consequential amendments to Chapter 23: Country Living Zone to address areas of existing farmland zoned as Country Living Zone.
Decision Reasons:	<ul style="list-style-type: none"> To correct a numbering error.
Point Number	680.252
Summary of Decision Requested:	Amend the definition of 'Indigenous vegetation' in Chapter 13 Definitions as follows: <i>Means vegetation that occurs naturally in New Zealand or arrived in New Zealand without human assistance. For the purposes of this plan, domestic or ornamental / landscaping planting, or planted shelter belts comprising indigenous species are not included, or forestry undergrowth, or planted indigenous forestry are excluded from the definition of 'indigenous vegetation'.</i> AND Any consequential amendments needed to give effect to this relief.
Decision Reasons:	<ul style="list-style-type: none"> The definition of indigenous vegetation needs to include more exemptions. This will ensure it is reasonable and practical in the context of the proposed rules framework.
Point Number	680.253
Summary of Decision Requested:	Delete the definition of "Intensive farming" in Chapter 13 Definitions AND Replace with the following definition of "Intensive Farming" in Chapter 13: Definitions: <i>Means the commercial raising and keeping of plants or animals permanently contained in buildings or outdoor enclosures that occurs independent of the soil fertility on the site, is dependent on a high input of food or fertiliser from beyond the site, and may, (but not necessarily) involve artificially controlled growing conditions and includes boarding kennels or catteries, but does not include the sheltered rearing and weaning of calves, lambs or goats undertaken indoors as part of a farming activity nor the use of wintering barns, stabling of horses, feed pads and stand-off pads where stock are not held on a permanent basis.</i> AND Any consequential amendments needed to give effect to this relief.
Decision Reasons:	<ul style="list-style-type: none"> The proposed definition is overly complicated and has potential to extend the meaning of 'intensive' farming beyond usual definitions and capture normal farming activity (such as calf or lamb rearing and weaning in shelters, or feeding stock on standoff pads or in temporary feedlots, or break-feeding) within an onerous resource consent process for little or no environmental benefit.
Point Number	680.254
Summary of Decision Requested:	Delete the definition of "Landscape Restoration Area" in Chapter 13 Definitions. AND Any consequential amendments needed to give effect to this relief.
Decision Reasons:	<ul style="list-style-type: none"> This definition is unnecessary and inappropriate. The active management approach outlined in this definition is more appropriately addressed, if required, as resource consent conditions when a land use activity within the Rangitahi Peninsula triggers the need for one.
Point Number	680.255
Summary of Decision Requested:	Retain the definition of "Maori Areas of Significance" in Chapter 13 Definitions, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Support is extended to the scheduling approach taken.
Point Number	680.256
Summary of Decision Requested:	Retain the definition of "Maori Sites of Significance" in Chapter 13 Definitions, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Support is extended to the scheduling approach taken.
Point Number	680.257
Summary of Decision Requested:	Retain the definition of "Minor upgrading of existing infrastructure" in Chapter 13 Definitions, as notified.
Decision Reasons:	

- Support to the extent that this definition is consistent with the National Policy Statement on Electricity Transmission and National Environmental Standard for Electricity Transmission.

Point Number 680.258

Summary of Decision Requested: **Retain** the definition of "National grid yard" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support to the extent that this definition is consistent with the National Policy Statement on Electricity Transmission and National Environmental Standard for Electricity Transmission.

Point Number 680.259

Summary of Decision Requested: **Retain** the definition of "National grid corridor" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support to the extent that this definition is consistent with the National Policy Statement on Electricity Transmission and National Environmental Standard for Electricity Transmission.

Point Number 680.260

Summary of Decision Requested: **Amend** the definition of "Outstanding Natural Feature" in Chapter 13 Definitions, as follows:

Means a feature identified as an Outstanding Natural Feature on the planning maps, listed in Appendix XX and described in the individual assessment sheet.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Conditional support is extended to this definition. Submitter supports the principle of identifying these areas, listing them on a schedule, which summaries the associated values, and including the overlay on planning maps.

Point Number 680.261

Summary of Decision Requested: **Delete** the definition of "Outstanding Natural Character Area" in Chapter 13 Definitions.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- This definition provides no purpose as there is no Outstanding Natural Character Area layer identified on the planning maps.

Point Number 680.262

Summary of Decision Requested: **Amend** the definition of "Outstanding Natural Landscape" in Chapter 13 Definitions as follows:

Means a landscape identified as an Outstanding Natural Landscape on the planning maps, listed in Appendix XX and described in the individual assessment sheet.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Conditional support is extended to this definition. Submitter supports the principle of identifying these areas, listing them on a schedule, which summaries the associated values, and including the overlay on planning maps.

Point Number 680.263

Summary of Decision Requested: **Retain** the definition of "Rural ancillary earthworks" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The submitter supports the definition.

Point Number 680.264

Summary of Decision Requested: **Add** to Chapter 13 Definitions a new definition of "Rural contractor's depots" as follows:

Means offices, storage buildings, plant and machinery used for the purposes of agricultural contracting, including ancillary activities and transport depots relating to the transportation of agricultural and horticultural produce, including livestock. Agricultural contractors' depots include the repair, servicing and maintenance of rural-based vehicles or machinery.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- A definition for this activity is required and subsequent new rule. The activity is different from both rural industry and farming. It is an important activity which must be enabled within the rural zone.

Point Number 680.265

Summary of Decision Requested: **Retain** the definition of "Rural industry" in Chapter 13 Definitions as notified.

Decision Reasons:

- Rural contractors' depots need to be defined separately. It is clear from this definition of *rural industry* that Waikato District Council is making a distinction between the activities and this is supported.

Point Number 680.266

Summary of Decision Requested: **Amend** the definition of "Sensitive land use" in Chapter 13 Definitions, as follows:

Means an education facility including a childcare facility, waananga and koohanga reo, ~~a residential activity~~, papakainga building, rest home, retirement village, travellers' accommodation, ~~homestay~~, health facility or hospital.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose and intent of this definition however considers that homestays and residential activity, as defined in the plan do not need to be elevated to this status and subject to the associated planning response.

Point Number 680.267

Summary of Decision Requested: **Delete** the definition of "Significant Amenity Landscape" in Chapter 13 Definitions.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose of the definition and subsequent policy framework is to give effect to the Waikato Regional Policy Statement (WRPS). However, the submitter considers the Proposed District Plan has not implemented the WRPS direction appropriately and identified rural productive areas as Significant Amenity Landscapes (SAL) unnecessarily.
- The primary concern is with the use of the SAL overlays affecting everyday farming operations in the Rural Zone by triggering an onerous and unnecessary requirement for farmers to have to seek and obtain resource consent for any practical development of farms for farming, for what amounts to little or no environmental benefit.
- Farming is part of the landscape character of rural areas, and farming should not be subject to onerous requirements for resource consent to develop their farms for farming purposes.

Point Number 680.268

Summary of Decision Requested: **Amend** the definition of " Significant Natural Area" in Chapter 13 Definitions, as follows:

Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area on the planning maps and listed in Appendix XX and described in the individual assessment sheet

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Conditional support is extended to this definition. The submitter supports the principle of identifying these areas, listing them on a schedule, which summaries the associated values, and including the overlay on planning maps.

Point Number 680.269

Summary of Decision Requested: **Retain** the definition of "Significant feature of interest" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Conditional support is extended to this definition. The submitter supports the principle of identifying these areas, listing them on a schedule, which summaries the associated values, and including the overlay on planning maps.

Point Number 680.270

Summary of Decision Requested: **Amend** the definition of "Travellers' accommodation" in Chapter 13 Definitions, as follows:

... excludes the accommodation used by the permanent resident. Provided that Travellers accommodation does not include activities defined in this Plan as Homestay activities.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This is a consequential amendment required to give effect to the relief sought under Homestay submission point.

Point Number 680.271

Summary of Decision Requested: **Amend** the definition of "Vegetation clearance" in Chapter 13 Definitions, as follows:

Includes the modification, burning, cutting, crushing, spraying and removal by physical, mechanical, chemical or other means, of all forms of vegetation, including indigenous, and may include exotic plants.

It does not include vegetation clearance ~~relating to routine cultivation or grazing~~, which is ancillary to Farming, such as:

(a) clearance for the purpose of maintaining rural fire breaks,

(b) pasture maintenance

(c) clearance of airstrips, helipads, vehicle entranceways, accessways and driveways, farm tracks and stock crossings of waterways,

(d) clearance around farm buildings and farm infrastructure, water supply dams, pipelines and troughs,

(e) pest plant/weed management, including clearance of pest plants including: thistles, ring ferns, carpet ferns, rushes, ink weed, briar rose, barberry, introduced pampas grass (other than toetoe), mingimingi, wilding, pinus species, etc

(f) cultivation,

(g) forestry harvesting, pruning and thinning,

(h) clearance or disturbance by animals including grazing,

(i) activities undertaken for the purpose of establishing a fence line,

(j) maintaining shelterbelts (including cutting of shelterbelt roots,

(k) activities associated with fruit tree or fruit vine plantations,

(l) clearance of vegetation that is fallen or dead,

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This definition should be amended to specifically exclude vegetation clearance undertaken in association with day-to-day farming.
- The submitter has concerns that the definition will still catch many instances of ordinary pastoral farming practice in which vegetation clearance may have to be undertaken on a day-to-day basis, and trigger the requirement for resource consent unnecessarily.
- Farmers should not have to incur unnecessary delay and cost for routine vegetation clearance which will result in no more than minor adverse environmental effects.

Point Number

680.272

Summary of Decision Requested:

Amend the definition of "Waste management" in Chapter 13 Definitions, as follows:

Means industrial or commercial activities relating to the minimisation or reduction of waste material and reuse, recycling, recovery, treatment, storage and disposal processes.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The amendment is required to add clarification and certainty to the proposed definition.

Point Number

680.273

Summary of Decision Requested:

Retain the definition for "Wetland" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support is extended to keeping the same meaning of wetland as is defined in the RMA.

Point Number

680.274

Summary of Decision Requested:

Add to Section 14.1 Introduction a new paragraph as follows:

Rural land uses, such as farming, do not present the same threats to the efficient functioning of infrastructure networks that urban patterns of development present. Rural land use is characterised by low density development and low population density, with wide open spaces and relative sparsity of built form. Many aspects of farming activity, such as pasture maintenance, animal grazing, land cultivation, pest and weed control, maintenance of farm access and farm infrastructure such as fences, stock bridges and culverts, water pipelines, troughs and stock drinking water storage tanks are not sensitive to network utility and energy infrastructure operation. Where such land use is not incompatible with infrastructure networks, then it presents an efficient use of resources to enable their coexistence in order to maximise benefits and minimise costs. Such activity should be provided for in order to ensure efficient allocation of resources in a way that ensures farmers and rural communities can provide for their social, cultural and economic well-being, without adversely impacting on the functioning of infrastructure networks.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this introductory statement, provided it is amended to take rural land use into consideration when analysing resource management issues for infrastructure services and networks. The compatibility of many aspects of rural land use, particularly as these relate to farming, should be recognised in the introductory statement.

Point Number

680.275

Summary of Decision Requested:

Amend Rule 14.2.1.1 PI New infrastructure (relating to Rule 14.2.1 PI New Infrastructure) as follows:

(1) Any new infrastructure activity and associated structures listed as a permitted activity within Chapter 14 must meet all of the following conditions except within the Rural Zone:

(a) ...

(2) The conditions in Rule 14.2.1.1(1) do not apply to:

(a) ...

(e) Any infrastructure within the Rural Zone

And

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.2.1, provided that it is amended to reflect their relief sought in respect of the introductory statement in 14.1
- It is not appropriate to limit infrastructure activity and structures within the Rural Zone with the same scale of restriction that applies to urban areas. Rural areas encompass wide open spaces with relatively low development and population density and sparse built form, which can easily absorb visual and amenity impacts of above ground infrastructure and associated structures which have larger bulk and height characteristics than in urban areas.
- The cost of undergrounding infrastructure in rural areas makes the imposition of underground facilities hugely prohibitive and is an inefficient allocation of resources.
- To apply the same restrictions in rural areas would trigger unnecessary cost and delay burdens to obtain resource consent, for little or no environmental benefit. This would place an onerous burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure used on farms.
- Provision should be made for appropriate infrastructure requirements within the Rural Zone that reflect these opportunities and constraints, and that infrastructure within the Rural Zone be exempt from compliance with stricter requirements that apply to urban areas, because such restrictions are inappropriate within rural areas.

Point Number

680.276

Summary of Decision Requested:

Amend Rule 14.2.2 (RD1) Restricted Discretionary Activities as follows:

Discretion is restricted to:

(a) The functional and operational needs of, and benefits derived from, the infrastructure

(b) Visual, landscape, streetscape and amenity effects except within the Rural Zone:

(c) Noise levels

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.2.2, provided that whatever permitted activity conditions may be imposed on infrastructure in rural areas do not inappropriately trigger resource consent for *Discretionary Activity* or *Non-Complying Activity*, as there would be little or no environmental benefit in doing so.
- Visual, landscape, streetscape and amenity effects that may be of concern in relation to infrastructure within urban areas, are not appropriate as a basis for consideration within rural areas, and that infrastructure within the Rural Zone should be exempt from any such assessment requirement where *Restricted Discretionary Activity* status is triggered.

Point Number

680.277

Summary of Decision Requested:

Amend Rule 14.2.3 D1 Discretionary Activities, as follows:

D1 Any infrastructure not specifically listed within Chapter 14, including associated earthworks, not located within an Identified Area except within the Rural Zone.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- Identified Areas within the Infrastructure and Energy chapter covers the following areas and items identified within the proposed plan:

Urban Expansion Area
Significant Natural Area
Landscape and Natural Character Areas
Outstanding Natural Feature
Outstanding Natural Landscape
Significant Amenity Landscape
Outstanding Natural Character
High Natural Character
Heritage Item
Heritage Precinct
Maaori Site of Significance
Maaori Area of Significance
Notable Tree

Such Identified Areas affect many farms and result in a cost and delay burden for unnecessary resource consent applications for little or no environmental benefit where infrastructure has to be supplied to develop use or subdivision land in the Rural Zone.

- It is not appropriate to require infrastructure within any *Identified Area* that is within the Rural Zone to have to seek resource consent for a *Discretionary Activity* where district plan activity-specific conditions for permitted activities are not complied with.
- This is hugely inefficient and presents a highly onerous and inappropriate burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure, including associated earthworks, where these are within an *Identified Area*, in order to develop, use or subdivide farms.
- Farm activity should be a *Permitted Activity* with appropriate activity-specific conditions, and subdivision in the Rural Zone should be a controlled activity with appropriate activity-specific conditions and matters of control, with a *Restricted Discretionary Activity* pathway for situations where permitted activity or controlled activity conditions are not met.

Point Number

680.278

Summary of Decision Requested:

Amend Rule 14.2.3 NC3 Non Complying Activities, as follows:

NC3 Any infrastructure not specifically listed within Chapter 14, including associated earthworks, located within an Identified Area, except within the Rural Zone.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- It is not appropriate to require infrastructure within the Rural Zone, or within any *Identified Area* that is within the Rural Zone, to have to seek resource consent for a *Non-Complying Activity* where district plan activity-specific conditions for permitted activities are not complied with. A restricted discretionary activity status would be more appropriate in such situations.
- The Rural Zone should be exempt from the requirement to seek resource consent for a *Non-Complying Activity* for any infrastructure not specifically listed within Chapter 14, including associated earthworks, located within an *Identified Area* within the Rural Zone. To do otherwise would trigger unnecessary cost and delay burden to obtain resource consent, for little or no environmental benefit. This would place an onerous burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure used on farms, including undertaking any associated earthworks, that is not listed in Chapter 14.

Point Number

680.279

Summary of Decision Requested:

Amend Rule 14.2.3 Non Complying Activities by renumbering to Rule 14.2.4.

Decision Reasons:

- To avoid confusion with Rule 14.2.3 Discretionary Activities.

Point Number

680.280

Summary of Decision Requested:

Amend Activity specific condition 14.3.1.1 P2 (1) (e) Minor upgrading of existing infrastructure as follows:

(e) Do not increase the area of any existing aboveground structure by more than 15%; and.

(f) Shall be contained within an appropriate infrastructure easement or, if, part of the National Grid, within the National Grid Yard

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support Rule 14.3.1 provided that appropriate provision is made to reflect infrastructure requirements within the Rural Zone, and/or exemption from urban scale standards within this rule.
- Any 'minor upgrading' to network utilities should either be contained within an appropriate easement, or if related to the National Grid, within the existing National Grid Yard. Farmers often experience disruption to farming activities from activities associated with maintenance, upgrading or replacement of network utilities. The submitter wishes to ensure that certain parameters are provided around ability to undertake such upgrading, in order to limit disruptions associated with incremental creeping of intrusion on landowners' ability to manage their farms arising from network utilities seeking allowances for upgrades. Among other things, farmers

- are concerned about occupational health and safety implications of incremental infrastructure upgrading activity intruding in private farmland and farming operations such as droving, lambing, calving, fodder cropping, irrigator/effluent disperser operation, and land cultivation.
- Rural land uses, such as farming, do not present the same issues vis-à-vis infrastructure provision, that urban patterns of development present. Rural land use is characterised by low density development and population density, with wide open spaces and relative sparsity of built form. Infrastructure in these areas should be enabled by appropriate standards that reflect rural amenity character, intensity and scale, whilst being limited in order to avoid disruption to farming landowners.

Point Number 680.281

Summary of Decision Requested: **Amend** Rule P12 Service connections for subdivision and activity specific conditions 14.3.1.8 as follows:

P12 Service connections for subdivision except within the Rural Zone

Activity-specific conditions

14.3.1.8

(1) All new lots created as part of...

(a) Wastewater, except within the Rural Zone;

(b) Except within the Rural Zone, a ~~water~~ water supply connection;

(c) Except within the Rural Zone, a ~~stormwater~~ stormwater (a management system that complies with Rule 14.11.1.1),

(d) Except where unavailable adjacent to the lot boundary within the Rural Zone, an ~~electricity~~ electricity supply connection;

(e) Except where unavailable adjacent to the lot boundary within the Rural, a ~~telecommunications~~ telecommunications connection that is hardwired or wireless; and

(f) Vehicle access that complies with Rule 14.12.1.1

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Rural subdivision should not have to have connections to a public water supply, wastewater collection system, electricity connection, telecommunications connection, if no such services are available adjacent to the lot boundary. Rural landowners may get their water supply from a dam, bore or other form of water collection, such as roof-water collection, and have to have fire-fighting water tank capacity with connected building sprinkler systems, and have on-site wastewater treatment and disposal. They may also have to generate their own electricity, and may be unfortunate enough not to have broadband telecommunications connections in the vicinity. There is typically sufficient land within the wide open space of rural areas not to have any concern about managing stormwater runoff. So requirements for these services are unnecessary and there is little or no environmental benefit to be derived.

Point Number 680.282

Summary of Decision Requested: **Add** to activity-specific standards Rule 14.4.1.2 relating to P2 (1) Buildings, structures and sensitive land use within the National Grid Yard in all other zones as of 18 July 2018, a new clause (f), as follows:

(inter alia)

(f) Minor structures associated with farming activity that are not situated within 6m of the outer visible foundation of any National Grid tower, including; fences, gates, stock exclusion structures, cattle-stops, stock underpasses, stock bridges and culvert crossings, and drinking water supply, pipelines, troughs, and water storage tanks.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support this rule, provided that the list of exempted farming activities is expanded to reflect a more comprehensive list of activities that are not sensitive to the operation of the national grid.
- Where such land use is not incompatible with infrastructure networks, then it presents an efficient use of resources to enable their coexistence in order to maximise benefits and minimise costs.
- Where activity-specific conditions are not able to be complied with, appropriate consideration could be given via a consent pathway which triggers Restricted Discretionary Activity status, with appropriate discretion around the benefits to be had from the National Grid, and the benefits to be had from enabling minor farming activity, and the effects of non-compliance with the relevant specified permitted activity standard.
- Please also refer to relief sought in respect of Rule 14.4.4.

Point Number 680.283

Summary of Decision Requested: **Amend** the activity-specific standards Rule 14.4.1.3 (3)(b) relating to P3 Earthworks activities within the National Grid Yard, as follows:

(inter alia)

(3) The following earthworks activities are exempt from Rules 14.4.1.3(1) and (2):

...

(b) Earthworks undertaken as part of agricultural or domestic cultivation, or repair, sealing, or resealing of a road, footpath, driveway or farm track, maintaining non-habitable farm buildings, drinking water pipelines, tanks or troughs, fences, gates or other stock exclusion structures;

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support this rule, provided that the list of exempted farming activities is expanded to reflect a more comprehensive list of activities that are not sensitive to the operation of the national grid.
- Where such land use is not incompatible with infrastructure networks, then it presents an efficient use of resources to enable their coexistence in order to maximise benefits and minimise costs.
- Where activity-specific conditions are not able to be complied with, appropriate consideration could be given via a consent pathway which triggers Restricted Discretionary Activity status, with appropriate discretion around the benefits to be had from the National Grid, and the benefits to be had from enabling minor farming activity, and the effects of non-compliance with the relevant specified permitted activity standard.
- Please also refer to relief sought in respect of Rule 14.4.4.

Point Number 680.284

Summary of Decision Requested: **Add** new controlled subdivision Rule '14.4.X.X' as follows:

CX Subdivision that is otherwise a controlled subdivision in the Rural Zone that is within a lot containing the National Grid

Activity-specific conditions

14.4.XX

(1) Any new lot boundary shall be situated outside the National Grid Corridor; and

(2) Shall comply with controlled subdivision standards and terms of the Rural Zone.

Matters of control

Control is reserved over:

(a) The adequacy of the allotment for its intended use;

(b) maintenance of existing, physical and legal vehicular access to the National Grid Corridor.

AND

Any consequential changes elsewhere in the plan to give effect to this relief.

Decision Reasons:

- The submitter is opposed to Rule 14.4.2 RD4 and submit that a more pragmatic approach would be to provide for controlled activity subdivision of land containing the National Grid (at least in the Rural Zone).
- In particular, farmers may have need for boundary adjustments and boundary relocations, where no additional lots are being created, and where there is no overall increase in land use intensity, in order to enable more efficient management and utilisation of the productive rural land resource.
- Controlled subdivision standards (or activity-specific conditions) could apply, and matters of control could be set forth that require new lot boundaries to be outside the National Grid Corridor, and control of ensuring existing legal and physical vehicular access to the National Grid Corridor.
- There is no need to manage this via a restricted discretionary activity rule. Please refer also to our submission on Rule 14.4.2.

Point Number

680.285

Summary of Decision Requested:

Amend Rule 14.4.2.1 RD4 Restricted Discretionary Activities in accordance with the submitter's relief sought for a new controlled activity subdivision rule ("14.X.X"), as follows:

(inter alia) ...

RD4 14.4.2.1

Except for subdivision in the Rural Zone provided for as a Controlled Activity under Rule 14.4.x.x, the subdivision of land in any zone within the National Grid Corridor that complies with all of the following conditions: ...

Discretion is restricted to:

(a) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;

(b) The ability to provide a complying building platform outside of the National Grid Yard;

(c) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;

(d) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.

RDX Subdivision in the Rural Zone which does not comply with activity specific standards for Controlled Activity subdivision in Rule CX 14.4.X.X;

Discretion is restricted to:

(g) The functional and operational needs of, and benefits derived from, the infrastructure

(b) The functional and operational needs of, and benefits derived from, the subdivision

(c) Maintenance of legal and physical vehicular access to the infrastructure

AND

Any consequential changes elsewhere in the plan to give effect to this relief.

Decision Reasons:

- The submitter is opposed to Rule 14.4.2 RD4 and submit that a more pragmatic approach would be to provide for controlled subdivision of land containing the National Grid, with a back-up default to restricted discretionary activity status for subdivision that does not meet the suggested controlled activity rule conditions, whereby discretion could be reserved over ensuring existing legal and physical vehicular access to the National Grid Corridor.
- There is no need to manage all subdivision via a restricted discretionary activity status.

Point Number

680.286

Summary of Decision Requested:

Amend Rule 14.4.4 NC3 Non-Complying Activities, as follows:

NC3 Except within the Rural Zone, any activity within the National Grid Yard that does not comply with one or more of the conditions of Rule 14.4.1.1

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is opposed to the requirement in Rule 14.4.4 for activity-specific conditions that are not met in Rule 14.4.1 or 14.4.2 to default to a non-complying activity status within the Rural Zone.
- It is not necessary to trigger a default to non-complying activity status, in this situation. Enabling farming activity should be afforded a higher priority in the Rural Zone, in order to provide for efficient utilisation of the productive rural land resource. In this regard, a restricted discretionary activity status would be appropriate to ensure sufficient consideration of the relative priorities to be afforded to farming, versus management of the National Grid. There is little or no environmental benefit in triggering non-complying activity status, yet the pathway to granting consent is much more burdensome for the applicant. Farmers should not be presented with potentially insurmountable consent hurdles in seeking to manage their farms.
- Where activity-specific conditions are not able to be complied with, appropriate consideration could be given via a consent pathway which triggers Restricted Discretionary Activity status, with appropriate discretion restricted to the benefits to be had from the National Grid, and the benefits to be had from enabling minor farming activity, and the effects of non-compliance with the relevant specified permitted activity or controlled activity standard(s)
- Please refer to our relief sought in respect of Rules 14.4.1 and 14.4.2.

Point Number

680.287

Summary of Decision Requested:

Amend Rule 14.4.4 NC4 Non-Complying Activities, as follows:

NC4 Except within the Rural Zone, any activity within the National Grid Yard that does not comply with one or more of the conditions of Rule 14.4.1.2

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is opposed to the requirement in Rule 14.4.4 for activity-specific conditions that are not met in Rule 14.4.1 or 14.4.2 to default to a non-complying activity status within the Rural Zone.
- It is not necessary to trigger a default to non-complying activity status, in this situation. Enabling farming activity should be afforded a higher priority in the Rural Zone, in order to provide for efficient utilisation of the productive rural land resource. In this regard, a restricted discretionary activity status would be appropriate to ensure sufficient consideration of the relative priorities to be afforded to

farming, versus management of the National Grid. There is little or no environmental benefit in triggering non-complying activity status, yet the pathway to granting consent is much more burdensome for the applicant. Farmers should not be presented with potentially insurmountable consent hurdles in seeking to manage their farms.

- Where activity-specific conditions are not able to be complied with, appropriate consideration could be given via a consent pathway which triggers *Restricted Discretionary Activity* status, with appropriate discretion restricted to the benefits to be had from the National Grid, and the benefits to be had from enabling minor farming activity, and the effects of non-compliance with the relevant specified permitted activity or controlled activity standard(s).
- Please refer to our relief sought in respect of Rules 14.4.1 and 14.4.2.

Point Number 680.288

Summary of Decision Requested: **Amend** Rule 14.4.4 NC10 Non-Complying Activities, as follows:

NC10 Except within the Rural Zone, any subdivision of land in any zone within the National Grid Corridor that does not comply with one or more of the conditions of Rule 14.4.2.1.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is opposed to the requirement in Rule 14.4.4 for activity-specific conditions that are not met in Rule 14.4.1 or 14.4.2 to default to a non-complying activity status within the Rural Zone.
- It is not necessary to trigger a default to non-complying activity status, in this situation. Enabling farming activity should be afforded a higher priority in the Rural Zone, in order to provide for efficient utilisation of the productive rural land resource. In this regard, a restricted discretionary activity status would be appropriate to ensure sufficient consideration of the relative priorities to be afforded to farming, versus management of the National Grid. There is little or no environmental benefit in triggering non-complying activity status, yet the pathway to granting consent is much more burdensome for the applicant. Farmers should not be presented with potentially insurmountable consent hurdles in seeking to manage their farms.
- Where activity-specific conditions are not able to be complied with, appropriate consideration could be given via a consent pathway which triggers *Restricted Discretionary Activity* status, with appropriate discretion restricted to the benefits to be had from the National Grid, and the benefits to be had from enabling minor farming activity, and the effects of non-compliance with the relevant specified permitted activity or controlled activity standard(s).
- Please refer to our relief sought in respect of Rules 14.4.1 and 14.4.2.

Point Number 680.289

Summary of Decision Requested: **Amend** Activity Specific conditions 14.5.1.1 relating to P2 Overhead distribution lines and support structures within the Rural Zone and P3 overhead distribution lines and support structures within road or unformed road located adjacent to the Rural Zone, as follows:

(a) Overhead distribution lines and support structures that comply with the following:

~~(i) Do not exceed a voltage up to and including 110kV; and~~

~~(ii) Do not exceed a maximum height of 25m; or~~

~~(iii) Do not exceed a maximum height of 30m for co-location of at least two operators; and~~

~~(iv) Are not located within an Identified Area.~~

AND

Any necessary consequential amendments needed to give effect to this relief.

Decision Reasons:

- The submitter opposes parts of Rule 14.5.1 and conditionally support other parts of it. In the Rural Zone, there should be few restrictions on overhead electricity distribution lines. In rural areas, it is inefficient to require undergrounding of electricity and other lines services, because of the greater distances involved compared to urban areas. If the Council is minded to permit co-located overhead lines at a permitted height of 30 metres, there is practically no visual difference between co-located lines and non-co-located lines mounted on poles up to 30 metres height, and therefore the maximum permitted height should be simplified to 30 metres.
- Identified Areas within the Infrastructure and Energy chapter covers the following areas and items identified within the proposed plan:

Urban Expansion Area
Significant Natural Area
Landscape and Natural Character Areas
Outstanding Natural Feature
Outstanding Natural Landscape
Significant Amenity Landscape
Outstanding Natural Character
High Natural Character
Heritage Item
Heritage Precinct
Maaori Site of Significance
Maaori Area of Significance
Notable Tree

Identified Areas overlay many farms and the submitter questions the wisdom of restricting farming activity in these areas by imposing extra requirements on infrastructure development. The submitter doubts that there will be any commensurate environmental benefit from requiring farming activity, and ancillary activity such as construction of electricity distribution lines required to service farms, to trigger resource consent where lines are above-ground. Electricity lines for farms are virtually always characterised by overhead power lines. Agriculture and pastoralism form part of the landscape character of rural areas. The wide open spaces and low intensity of built form means these areas are able to absorb development and land use more easily than urban areas. Submitter questions the validity of extra layers of amenity analysis to these areas, for what arguably amounts to little or no environmental benefit.

- It is not appropriate to require infrastructure within any *Identified Area* that is within the Rural Zone to have to seek resource consent for overhead electricity distribution lines. Getting services into rural areas is difficult and costly - even for overhead lines. Requiring underground lines in the wide open spaces of rural areas, even though these might exhibit qualities identified within these 'Identified Areas', is nonsensical. Farmers shouldn't be burdened by unnecessary resource consent requirements aimed at managing visual amenity, landscape, natural character and natural features, such as the *Identified Area* provisions are aimed at.
- The trigger for resource consent for such activity is hugely inefficient and presents a highly onerous and inappropriate burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure, including associated earthworks, albeit that these may be within an *Identified Area*, in order to develop, use or subdivide farms.
- Separation distances for sensitive activities (including 'residential activity') in relation to overhead electricity distribution lines, will result in arguably unnecessary cost and delay burden for farm dwellings in seeking resource consent for building additions to existing dwellings that may be within close proximity to existing power lines, for little or no environmental benefit.

Point Number 680.290

Summary of Decision Requested: **Amend** Activity specific condition 14.5.1.3 P5 relating to Construction or alteration of a building for a sensitive land use, as follows:

~~(a) Except within the Rural Zone, the construction or alteration of a building for a sensitive land use that complies with all of the following conditions...~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes parts of Rule 14.5.1 and conditionally support other parts of it. In the Rural Zone, there should be few restrictions on overhead electricity distribution lines. In rural areas, it is inefficient to require undergrounding of electricity and other lines services, because of the greater distances involved compared to urban areas. If the Council is minded to permit co-located

- overhead lines at a permitted height of 30 metres, there is practically no visual difference between co-located lines and non-co-located lines mounted on poles up to 30 metres height, and therefore the maximum permitted height should be simplified to 30 metres.
- Identified Areas within the Infrastructure and Energy chapter covers the following areas and items identified within the proposed plan:

Urban Expansion Area
 Significant Natural Area
 Landscape and Natural Character Areas
 Outstanding Natural Feature
 Outstanding Natural Landscape
 Significant Amenity Landscape
 Outstanding Natural Character
 High Natural Character
 Heritage Item
 Heritage Precinct
 Maaori Site of Significance
 Maaori Area of Significance
 Notable Tree

Identified Areas overlay many farms and the submitter questions the wisdom of restricting farming activity in these areas by imposing extra requirements on infrastructure development. The submitter doubts that there will be any commensurate environmental benefit from requiring farming activity, and ancillary activity such as construction of electricity distribution lines required to service farms, to trigger resource consent where lines are above-ground. Electricity lines for farms are virtually always characterised by overhead power lines. Agriculture and pastoralism form part of the landscape character of rural areas. The wide open spaces and low intensity of built form means these areas are able to absorb development and land use more easily than urban areas. Submitter questions the validity of extra layers of amenity analysis to these areas, for what arguably amounts to little or no environmental benefit.

- It is not appropriate to require infrastructure within any *Identified Area* that is within the Rural Zone to have to seek resource consent for overhead electricity distribution lines. Getting services into rural areas is difficult and costly - even for overhead lines. Requiring underground lines in the wide open spaces of rural areas, even though these might exhibit qualities identified within these 'Identified Areas', is nonsensical. Farmers shouldn't be burdened by unnecessary resource consent requirements aimed at managing visual amenity, landscape, natural character and natural features, such as the *Identified Area* provisions are aimed at.
- The trigger for resource consent for such activity is hugely inefficient and presents a highly onerous and inappropriate burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure, including associated earthworks, albeit that these may be within an *Identified Area*, in order to develop, use or subdivide farms.
- Separation distances for sensitive activities (including 'residential activity') in relation to overhead electricity distribution lines, will result in arguably unnecessary cost and delay burden for farm dwellings in seeking resource consent for building additions to existing dwellings that may be within close proximity to existing power lines, for little or no environmental benefit.

Point Number 680.291

Summary of Decision Requested: **Amend** Rule 14.5.2 RD1 (a) Restricted Discretionary Activities, as follows:
 (a) Except within the Rural Zone, overhead distribution lines and support...
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This is consequential relief in relation to relief sought in respect of Rule 14.5.1.

Point Number 680.292

Summary of Decision Requested: **Amend** Rule 14.5.2 RD2 Construction or alteration of a building for a sensitive land use that does not comply with Rule 14.5.1.3, as follows:
 RD2 Except within the Rural Zone, construction or alteration of a building for a sensitive land use ...
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This is consequential relief sought in relation to relief sought in respect of Rule 14.5.1

Point Number 680.293

Summary of Decision Requested: **Add** a new Rule RD3 to Rule 14.5.2 Restricted Discretionary Activities, as follows:
RD3 Construction of electricity distribution lines in the Rural Zone that do not comply with Rule 14.5.1.1
 (a) Discretion is restricted to:
 (i) Effects on the amenity values from non-compliance with the permitted activity standard;
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This is consequential relief sought in relation to relief sought in respect of Rule 14.5.1.

Point Number 680.294

Summary of Decision Requested: **Amend** Rule 14.5.3 Discretionary Activities, as follows:
 (a) Except within the Rural Zone, the activities listed below are discretionary activities...
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.5.3. In the Rural Zone, it is unnecessary to require overhead electricity distribution lines to have to obtain resource consent for a Discretionary Activity. In rural areas, it is inefficient to require undergrounding of electricity and other lines services, because of the greater distances involved compared to urban areas. Please refer to relief sought in relation to Rules 14.5.1 and 14.5.2.

Point Number 680.295

Summary of Decision Requested: **Amend** Activity specific standard 14.6.1.1 (a)(a) relating to P1 Small-scale electricity generation and P2 community scale electricity generation, as follows:
 (a) Small scale electricity generation and community scale electricity generation that comply with each of the following conditions where applicable:

(a) Is not located within an Identified Area, except within the Rural Zone, where small scale electricity generation and community scale electricity generation are permitted in any Identified Area;

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support Rule 14.6.1 including the definitions of 'small-scale' and 'community-scale' electricity generation, provided that the activity-specific restrictions on Identified Areas is removed.
- Identified Areas overlay many farms and the submitter questions the wisdom of constraining ability of farms to utilise small-scale and appropriately sized community-scale electricity generation in such areas, especially where this could augment the resilience of farming activity in remoter rural areas. The submitter doubts that there will be any commensurate environmental benefit from requiring small-scale and appropriately sized community-scale electricity generation, to trigger resource consent where these are proposed to be located within an Identified Area that is within a Rural Zone.
- In rural areas, it is inappropriate to require resource consent for small-scale and community-scale electricity generation where these are within an Identified Area in the Rural Zone. The benefits of small-scale, and appropriately sized community-scale, renewable electricity generation far outweigh any adverse effects on visual amenity and natural character in rural areas.
- The relative isolation of rural areas in relation to electricity supply and distribution networks, means that farmers will be penalised on amenity and natural character grounds, if they want to install small-scale or community-scale renewable electricity generation facilities to augment electricity supply and increase rural resilience.
- The definitions of these types of electricity generation, which restrict maximum sizes of wind turbines and solar cells, will ensure that any adverse effects on amenity and natural character values of rural areas will be minor, without needing to resort to triggering resource consent applications where these facilities are proposed to be situated within an Identified Area.
- The relatively low population density of rural areas (compared to urban areas) will ensure that wind turbine noise from small-scale and appropriately sized community-scale wind turbines, will at most, present only minor adverse effects. Any noise effects can be appropriately managed through triggers on permitted noise levels in rural areas.
- In comparison to urban areas, rural areas have much wider open-space, bigger visual scale and amenity of rural areas, which can absorb development more easily than in urban areas.

Point Number

680.296

Summary of Decision Requested:

Amend Activity specific condition 14.6.1.2 (a)(v) relating to P3 Research and exploratory-scale investigations for renewable electricity generation activities, as follows:

(a) Research and exploratory-scale investigations for renewable electricity generation activities that comply with all of the following:

...

(v) Is not located within an identified area, except within the Rural Zone, where research and exploratory investigation for renewable electricity generation is permitted in any Identified Area;

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support Rule 14.6.1 including the definitions of 'small-scale' and 'community-scale' electricity generation, provided that the activity-specific restrictions on Identified Areas is removed.
- Identified Areas overlay many farms and the submitter questions the wisdom of constraining ability of farms to utilise small-scale and appropriately sized community-scale electricity generation in such areas, especially where this could augment the resilience of farming activity in remoter rural areas. The submitter doubts that there will be any commensurate environmental benefit from requiring small-scale and appropriately sized community-scale electricity generation, to trigger resource consent where these are proposed to be located within an Identified Area that is within a Rural Zone.
- In rural areas, it is inappropriate to require resource consent for small-scale and community-scale electricity generation where these are within an Identified Area in the Rural Zone. The benefits of small-scale, and appropriately sized community-scale, renewable electricity generation far outweigh any adverse effects on visual amenity and natural character in rural areas.
- The relative isolation of rural areas in relation to electricity supply and distribution networks, means that farmers will be penalised on amenity and natural character grounds, if they want to install small-scale or community-scale renewable electricity generation facilities to augment electricity supply and increase rural resilience.
- The definitions of these types of electricity generation, which restrict maximum sizes of wind turbines and solar cells, will ensure that any adverse effects on amenity and natural character values of rural areas will be minor, without needing to resort to triggering resource consent applications where these facilities are proposed to be situated within an Identified Area.
- The relatively low population density of rural areas (compared to urban areas) will ensure that wind turbine noise from small-scale and appropriately sized community-scale wind turbines, will at most, present only minor adverse effects. Any noise effects can be appropriately managed through triggers on permitted noise levels in rural areas.
- In comparison to urban areas, rural areas have much wider open-space, bigger visual scale and amenity of rural areas, which can absorb development more easily than in urban areas.

Point Number

680.297

Summary of Decision Requested:

Amend Activity specific condition 14.7.1.2 (a)(i) relating to P2 Below ground pipelines located within an Identified Area as follows:

(a) Below ground pipelines for the conveyance of liquid fuels and gas located within an Identified Area that comply with the following:

(i) Except within the Rural Zone, there shall be no aboveground sections of pipeline within the Identified Area; and

...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.7.1, provided that the activity-specific restrictions on Identified Areas is removed.
- Identified Areas overlay many farms and the submitter questions the wisdom of constraining ability of farms to maintain above-ground fuel storage and gas tanks in such areas. The submitter doubts that there will be any commensurate environmental benefit from requiring above ground fuel storage and gas tanks, to trigger resource consent where these are proposed to be located within an Identified Area that is within a Rural Zone.
- The relative isolation of rural areas, means that farmers will be penalised on amenity and natural character grounds, if they want to install above ground tanks.
- Fuel storage supplies are commonplace on many farms. Agriculture and pastoralism form part of the landscape character of rural areas. The wide open spaces and low intensity of built form means these areas are able to absorb development and land use more easily than urban areas. Submitter questions the validity of extra layers of amenity analysis in the form of Identified Areas in rural areas, for what arguably amounts to little or no environmental benefit.
- It is not appropriate to require above-ground fuel storage and gas tanks within any *Identified Area* that is within the Rural Zone to have to seek resource consent. Farmers shouldn't be burdened by unnecessary resource consent requirements aimed at managing visual amenity, landscape, natural character and natural features, such as the Identified Area provisions are aimed at.
- The trigger for resource consent for such activity is hugely inefficient and presents a highly onerous and inappropriate burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure, including associated earthworks, albeit that these may be within an *Identified Area*, in order to develop, use or subdivide farms.

Point Number

680.298

Summary of Decision Requested:

Amend Activity specific condition 14.7.1.3 (a)(i) relating to P3 Storage facilities and pump stations for liquid fuels and gas, as follows:

(a) Storage facilities and pump stations for liquid fuels and gas that comply with all of the following:

(i) Is not located within an Identified Area, except within the Rural Zone, where above-ground storage facilities and pump stations for liquid fuels and gas are a permitted activity within an Identified Area; and

...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support Rule 14.7.1, provided that the activity-specific restrictions on Identified Areas is removed.
- Identified Areas overlay many farms and the submitter questions the wisdom of constraining ability of farms to maintain above-ground fuel storage and gas tanks in such areas. The submitter doubts that there will be any commensurate environmental benefit from requiring above ground fuel storage and gas tanks, to trigger resource consent where these are proposed to be located within an Identified Area that is within a Rural Zone.
- The relative isolation of rural areas, means that farmers will be penalised on amenity and natural character grounds, if they want to install above ground tanks.
- Fuel storage supplies are commonplace on many farms. Agriculture and pastoralism form part of the landscape character of rural areas. The wide open spaces and low intensity of built form means these areas are able to absorb development and land use more easily than urban areas. Submitter questions the validity of extra layers of amenity analysis in the form of Identified Areas in rural areas, for what arguably amounts to little or no environmental benefit.
- It is not appropriate to require above-ground fuel storage and gas tanks within any *Identified Area* that is within the Rural Zone to have to seek resource consent. Farmers shouldn't be burdened by unnecessary resource consent requirements aimed at managing visual amenity, landscape, natural character and natural features, such as the Identified Area provisions are aimed at.
- The trigger for resource consent for such activity is hugely inefficient and presents a highly onerous and inappropriate burden on farmers who need to install, maintain, repair, replace or upgrade infrastructure, including associated earthworks, albeit that these may be within an *Identified Area*, in order to develop, use or subdivide farms.

Point Number 680.299

Summary of Decision Requested: No specific decision sought, but Rule 14.7.2 is supported, provided the relief sought in relation to Rule 14.7.1 is granted.

Decision Reasons:

- The submitter supports Rule 14.7.2, provided that the relief sought in relation to Rule 14.7.1 is granted.

Point Number 680.300

Summary of Decision Requested: **Amend** Activity specific condition 14.10.1.3 (a)(ii) relating to P4 Antennas and lines attached to retaining walls, tunnels, bridges and other structures located within the road, as follows:

(a) Antennas that comply with all of the following conditions:

(i) Do not connect to an area, façade or item specifically listed in Schedule 30.1.

(ii) Panel antenna do not exceed 0.7m in width, except within the Rural Zone, where there is no maximum size restriction for panel antenna;

...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.10.1, provided that restrictions on telecommunication and radio communication equipment in the Rural Zone, that are aimed at managing visual amenity, are appropriate to reflect the wide-open space scale and rural amenity character of rural areas.
- It is not appropriate to impose the same degree of restriction on masts and aerials and the like in rural areas. In remote rural areas where internet connection is unavailable, farmers typically have need of farm telecommunication and radio communication equipment in order to augment the efficient and safe operation of farms.
- Imposing the same degree of constraint on masts and aerials in rural areas to that of urban areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional aerials and masts, which are arbitrarily constrained by way of inappropriately-scaled visual amenity criteria.
- If the Council is minded to permit co-located poles antennas and headframes at a permitted height of 30 metres in the Rural Zone, there is practically no visual difference between co-located devices and non-co-located devices mounted on poles up to 30 metres height in rural areas, and therefore the maximum permitted height should be simplified to 30 metres.

Point Number 680.301

Summary of Decision Requested: **Amend** Activity specific condition 14.10.1.5 (a)(iii) relating to P7 Antennas not attached to a building and/or structure, as follows:

(a) Antennas that comply with all of the following conditions:

...

(iii) Are not located within an Identified Area, except within the Rural Zone, where Antennas not attached to any building or structure are a permitted activity, within any Identified Area...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.10.1, provided that restrictions on telecommunication and radio communication equipment in the Rural Zone, that are aimed at managing visual amenity, are appropriate to reflect the wide-open space scale and rural amenity character of rural areas.
- It is not appropriate to impose the same degree of restriction on masts and aerials and the like in rural areas. In remote rural areas where internet connection is unavailable, farmers typically have need of farm telecommunication and radio communication equipment in order to augment the efficient and safe operation of farms.
- Imposing the same degree of constraint on masts and aerials in rural areas to that of urban areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional aerials and masts, which are arbitrarily constrained by way of inappropriately-scaled visual amenity criteria.
- If the Council is minded to permit co-located poles antennas and headframes at a permitted height of 30 metres in the Rural Zone, there is practically no visual difference between co-located devices and non-co-located devices mounted on poles up to 30 metres height in rural areas, and therefore the maximum permitted height should be simplified to 30 metres.

Point Number 680.302

Summary of Decision Requested: **Amend** Policy 6.4.2 (a) Provide adequate infrastructure, as follows:

(a) Ensure adequate provision of infrastructure, including land transport networks, where proposed subdivision results in an increase in the number of lots adjacent to an existing road, infrastructure corridor or existing infrastructure easement, or its use intensified where resource consent is required, for restricted

discretionary, discretionary or non-complying land use.

(b) To manage minor effects of subdivision on infrastructure in rural areas, through enabling subdivision as a controlled activity, with appropriate matters of control around separation distance from infrastructure to proposed new lot boundaries.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy provided that its focus is confined to considering subdivision which increases the number of lots next to an infrastructure corridor or existing infrastructure easement. Effects of rural subdivision on infrastructure are very minor, and can be managed through controlled subdivision status with appropriate matters of control around minimum lot boundary separation distances. Agreements as to access across private farmland are a matter between utility operators and landowners, and the Council is not involved.
- The focus of the policy should be amended to refer to substantial changes in land use where resource consent is required, such as for example from farming activity to some non-farming use of land. Use of farmland for farming, even if paddock stocking rates are increased, should not be within the remit of this policy to control.

Point Number 680.303

Summary of Decision Requested: Retain Policy 6.4.3 (a) Infrastructure Location and Services, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.304

Summary of Decision Requested: Retain Policy 6.4.4 (a) Road and rail network, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.305

Summary of Decision Requested: Retain Policy 6.4.5 Roading infrastructure, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.306

Summary of Decision Requested: Delete Objective 6.4.6 (a) Stormwater and drainage.

OR

Amend Objective 6.4.6 (a) Stormwater and drainage as follows:

(a) The hydrological characteristics of the natural drainage processes are retained, where new subdivision, development or land use is proposed.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- If the focus is management of hydrology to maintain water quantity for the purpose of managing water allocation, the district council does not have the jurisdiction for this under the RM Act.
- If the purpose of this objective is to manage flood control and stormwater ponding and overland flow associated with subdivision, development or land use which intensifies use of land, then this objective should be amended confine its focus to such matters.

Submitter Number: 681

Submitter:

Lavalla Farms Limited

Point Number 681.1

Summary of Decision Requested: Amend the proposed Residential zoning for part of the property at 131 Dominion Road, Tuakau so that a "Neighbourhood Centre Zone" applies to the area containing the existing function centre, accommodation buildings and school. (Refer to the indicative concept plan in the submission which indicates the extent of this requested new zone.)

Decision Reasons:

- A 'Neighbourhood Centre Zone' would protect the existing education and commercial activities and allow the creation of a community hub to support residential development within the site and surrounding area.

Point Number 681.2

Summary of Decision Requested: Retain Rule 16.4.1 RD1(a)(i) Subdivision - General, and the 450m2 minimum net site area for greenfield subdivision.

Decision Reasons:

- Supports the minimum lot size of 450m2 for greenfield subdivision.

Point Number 681.3

Summary of Decision Requested: Retain Rule 16.4.1 RD1(b)(ii) Subdivision - General, relating to variation in lot sizes.

Decision Reasons:

- The intended residential development for the submitter's property indicates a range of lot sizes with medium densities around the existing community facilities and larger lots to the north adjoining the proposed Village and Rural Zones.

- This assessment criterion will therefore provide for a variety of built forms and housing choice that aligns with the strategic direction set out in Policy 4.1.10(i).
- Ensures that subdivision can be designed to provide variety and choice in housing types.

Point Number 681.4

Summary of Decision Requested: Delete Rule 16.4.1 RDI(a)(iii) Subdivision - General and make it a matter of discretion.

Decision Reasons:

- The establishment of grid patterns may not be appropriate for all sites due to topographical or other physical constraints.
- For example, the submitter's property at 131 Dominion Road contains a number of buildings, streams and steep areas.
- There is no section 32 analysis to justify the requirement for a grid layout. The appropriateness of a grid layout should therefore be listed as a matter of discretion rather than a rule.

Point Number 681.5

Summary of Decision Requested: Delete Rule 16.4.13 (a) Subdivision creating reserves, and make it a matter of discretion.

Decision Reasons:

- Roading infrastructure is expensive and this rule will therefore result in unjustified costs to developers and purchasers.
- The rule is arbitrary and may not be appropriate for all types of reserves and developments.
- Safety and surveillance of reserves may be achieved with less road frontage as indicated with the subdivision concept plan provided with the submission.
- There is no section 32 analysis to justify the 50% threshold. The extent of road frontage for a proposed reserve should therefore be a matter of discretion rather than a rule.

Point Number 681.6

Summary of Decision Requested: Retain the Residential Zone as notified for the property at 131 Dominion Road, Tuakau (Lot 3 DP 478192, Lot 2 DP 478192 and Lot 3 DP 392649) with the exception of an indicative neighbourhood centre, which is addressed elsewhere in the submission.

Decision Reasons:

- A 'Neighbourhood Centre Zone' would protect the existing education and commercial activities and allow the creation of a community hub to support residential development within the site and surrounding area.
- The proposed Residential zoning for the area outside this "Neighbourhood Centre Zone" would:
- be consistent with previous planning documents, the Tuakau Structure Plan and the National Planning Statement - Urban Development Capacity;
- support the landowner's financial investment in designing the residential development of this property; and
- be appropriate given the property's convenient access to Tuakau's town centre.

Point Number 681.7

Summary of Decision Requested: Retain Rule 16.4.1 Subdivision - General, with the exception of RDI(a)(iii), which is addressed elsewhere in the submission.

Decision Reasons:

- Provides for the efficient use of land resources.
- Enables the subdivision of land to provide for the growth of the district.

Submitter Number: 682 **Submitter:** The Buckland Country Living Zone Landowners Group

Point Number 682.1

Summary of Decision Requested: Amend the zoning of approximately 400 ha located north of Tuakau, between Logan/Golding Roads and Harrisville Road from Rural Zone to Country Living Zone (refer to the map attached to the submission which specifically identifies all properties subject of this rezoning request).

Decision Reasons:

- The area contains limited development constraints making it appropriate for rural residential use.
- The proposed Rural zoning is an inefficient use of land that is in close proximity to the urban areas of Buckland and Pukekohe. Rezoning to a Country Living Zone will enable an efficient use of the land resource.
- A Country Living Zone in this location will provide an essential buffer for the Future Urban Zone that is in Auckland Council's jurisdiction where more housing and a less open rural environment is anticipated. A logical progression in zoning for urban development will therefore be enabled and reverse sensitivity will be reduced.
- There is no section 32 analysis to justify the proposed Rural zoning for the identified location.
- Some rural areas in Buckland and Tuakau contain elite/prime soils which contribute significantly to regional and national food supplies. Intensification of land for rural residential should be encouraged away from these soils and where there is adjoining urban development. The majority of the identified properties do not contain elite/prime soils and their development for rural residential purposes will provide an essential buffer between higher density development to the north and west and rural land to the east and south.

Submitter Number: 683 **Submitter:** Carolyn Watson

Point Number 683.1

Summary of Decision Requested: Retain Rule 22.4.1.4 Boundary relocation and the flexibility to allow rural properties to rationalise large landholdings to provide a logical lot arrangement that better supports the farming activity, except for the amendments sought below;

AND

Amend Rule 22.4.1.4 RDI(a)(i) Boundary relocation, as follows:

(a) The boundary relocation must:

(i) Relocate a common boundary or boundaries between two or more existing Records of Title or consented lots that existed prior to 18 July 2018;

Decision Reasons:

- Many farms in the district are held in multiple Records of Titles which have the ability to be relocated.
- The boundary relocation rule should reflect the operative Franklin Section rule which enables an existing title or consented lot to be relocated within a property or, alternatively, within properties where boundaries are shared and are in common ownership. These types of boundary relocations typically result in positive effects by enhancing the productive farming system and allowing for the relocation of potential house sites to more favourable locations.
- Rural boundary relocations are typically undertaken where land is exchanged between two Records of Title to accommodate the existing farming activity, or when a farmer owns multiple titles and wants to create a small rural lot for a dwelling and hold the balance of the farm in one Record of Title.

Point Number

683.2

Summary of Decision Requested:

Add a new matter of discretion to Rule 22.4.1.4 RD1(b) Boundary relocation, as follows:

(b) Council's discretion is restricted to the following matters:

...

(y) effects on high class soils, farm management and productivity.

Decision Reasons:

- The relocation of a lot created under the transferable development right rules in the operative Franklin Section from an area that does not contain high class soils to an area that does contain high class soils would create an adverse outcome. The requested matters of discretion would work with the proposed objectives and policies in Chapter 5 (Rural Environment) to provide a robust framework to ensure that adverse effects on high class soils are avoided.

Point Number

683.3

Summary of Decision Requested:

Amend Rule 22.3.2 P1(b)(i) Minor dwelling, as follows:

(i) The minor dwelling must be located within ~~20m~~ 50m of the dwelling;

Decision Reasons:

- The section 32 analysis does not justify the proposed 20m separation distance.
- There is no longer a requirement for the minor dwelling to be occupied by a dependent and therefore a larger separation distance would provide more privacy for the residents of both the main dwelling and the minor dwelling.
- The requested 50m distance is not contrary to the objectives and policies specified in Chapter 5.

Point Number

683.4

Summary of Decision Requested:

Amend Rule 22.3.7.1 Building Setbacks - All boundaries, by allowing a reduced boundary setback if the written consent has been obtained from the affected neighbour.

Decision Reasons:

- Infringement of this rule should be allowed where the written consents of the owners and occupiers of the abutting site(s) have been obtained.

Submitter Number:

684

Submitter:

Janet Elaine McRobbie

Point Number

684.1

Summary of Decision Requested:

Retain the notified Residential zoning of properties located at 34 Pokeno Road, Pokeno (comprising legal descriptions Lot 3 DP 478192, Lot 2 DP 478192 and Lot 3 DP 392649) as illustrated by Figure 2 in the submission.

Decision Reasons:

- The proposed residential zoning is consistent with previous planning documents.
- Supports the landowner's financial investment in preliminary residential designs.
- Is consistent with the National Policy Statement - Urban Housing Capacity.
- The sites have convenient access to Pokeno's town centre, Whangarata Business Park and State Highway 1.

Point Number

684.2

Summary of Decision Requested:

Amend the zoning for Lot 1 DP 476779 in Pokeno (as illustrated in Figure 3 of the submission) from Village Zone to Business Zone.

Decision Reasons:

- This land is effectively an island as it is located between the on-ramp and State Highway 1. It is therefore located near transportation infrastructure with a high number of passing vehicles.
- A Business zone would be more efficient and appropriate to draw on these locational advantages.
- A Business zone would also mean avoidance of reverse sensitivity effects from noise, glare and emissions associated with traffic along State Highway 1 and the provision of a buffer for the Residential Zone located on the other side of Great South Road.

Point Number

684.3

Summary of Decision Requested:

Retain the notified Business Zone of the property at 2 Helenslee Road, Pokeno (Lot 2 DP 62619);

AND

Amend the extent of the Business zone for the property at 2 Helenslee Road, Pokeno so that it aligns with the zone boundary at 2 Hillpark Drive, Pokeno (see Figure 4 of the submission).

Decision Reasons:

- The proposed Business zoning for the site at 2 Helenslee Road is appropriate in that it recognises the McRobbie Bros civil construction and haulage company's depot and office.
- However, an extension of this zoning to the north and west to align with the property that contains early childcare centre at 2 and 4 Hillpark Drive would result in a more efficient and appropriate use of the land resource by providing for business activities, avoiding reverse sensitivity effects and drawing on locational advantages at this road intersection.

Point Number	684.4									
Summary of Decision Requested:	No specific decision sought, but submission recognises that the importation of fill to enable residential development is appropriate in Rule 16.2.4.1 Earthworks- General and questions whether this would be a permitted activity (P2) or a non-complying activity (NC1).									
Decision Reasons:	<ul style="list-style-type: none"> The submitter states that the provision seem to be workable but are interested in the thoughts of other submitters. Cleanfill may be required to enable greenfield land to be developed for residential purposes but it is unclear whether this is permitted P2 or whether resource consent to a non-complying activity NC1 is required. NC1 would be too restrictive and needs to be more lenient to enable greenfield development. 									
Point Number	684.5									
Summary of Decision Requested:	Amend Rule 16.4.11 Subdivision - Road frontage, by replacing the proposed requirements with the equivalent provisions in the Operative District Plan: Franklin Section (Rule 26.6.4 Frontage to Road (Vehicular Access Requirement)).									
Decision Reasons:	<ul style="list-style-type: none"> There is no analysis in the section 32 analysis to justify the requirement for a lot to have a 15m road frontage (other than an access allotment, utility allotment or a lot containing a right of way or access leg). Opposes Council prescribing a minimum frontage. 									
Point Number	684.6									
Summary of Decision Requested:	Amend Rule 16.4.12 - Building platform, by replacing the proposed requirements with the equivalent provision in the Operative District Plan: Franklin Section (Rule 26.6.1 Shape Factor).									
Decision Reasons:	<ul style="list-style-type: none"> There is no section 32 analysis to justify the proposed requirements for a building platform. Opposes the size of the shape factors. 									
Point Number	684.7									
Summary of Decision Requested:	Delete Rule 16.4.13 RD1 (a) Subdivision creating reserves, and make it a matter of discretion.									
Decision Reasons:	<ul style="list-style-type: none"> Roading infrastructure is expensive and the proposed rule will result in additional costs for developers and purchasers. The rule sets out an arbitrary standard which may not be relevant for all reserve types or developments. Safety and surveillance of reserves may be achieved with less road frontage. The submitter has provided a subdivision concept plan that appropriately responds to the characteristics of their sites. The section 32 analysis does not justify the 50% threshold and this matter should be considered as a matter of discretion. 									
Point Number	684.8									
Summary of Decision Requested:	Amend Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips, by replacing the proposed provisions with the equivalent rule in the Operative District Plan: Franklin Section (Rule 11.5 Esplanade Reserves and Strips).									
Decision Reasons:	<ul style="list-style-type: none"> While esplanade reserves and strips enable public access and recreation, their provision needs to be assessed on a case by case basis and Council should allow a waiver or width reduction in certain circumstances. 									
Point Number	684.9									
Summary of Decision Requested:	Amend Table 14.12.5.14 - Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones), by replacing the proposed standards with NZ Standards- Table 3.2 Roading Design Standards; OR Amend Table 14.12.5.14 Access and road conditions, with the following Operative District Plan Franklin Section for minimum legal and seal widths:									
	<table border="1"> <thead> <tr> <th><i>Users</i></th> <th><i>Legal width</i></th> <th><i>Minimum total seal width</i></th> </tr> </thead> <tbody> <tr> <td>2-4</td> <td>3.5m</td> <td>2.7m</td> </tr> <tr> <td>5-8</td> <td>8m</td> <td>5m</td> </tr> </tbody> </table>	<i>Users</i>	<i>Legal width</i>	<i>Minimum total seal width</i>	2-4	3.5m	2.7m	5-8	8m	5m
<i>Users</i>	<i>Legal width</i>	<i>Minimum total seal width</i>								
2-4	3.5m	2.7m								
5-8	8m	5m								
Decision Reasons:	<ul style="list-style-type: none"> The proposed access standards are excessive and will result in additional costs, inefficient use of the urban land resource and prevent in-fill development. The extra seal width increases impervious surfaces and stormwater runoff without any apparent benefit relating to traffic effects. NZS 4404:2010 - Land Development and Subdivision Infrastructure is a national document that addresses access and road conditions and this matter should not form part of the District Plan. The provisions in the operative Franklin Section are more appropriate. 									
Point Number	684.10									
Summary of Decision Requested:	Retain Rule 16.4.1 Subdivision - General, except for the points raised and amendments sought elsewhere in the submission.									
Decision Reasons:	<ul style="list-style-type: none"> Provides for the efficient use of the land resources. Enables the subdivision of land to provide for the growth of the district. 									
Point Number	684.11									
Summary of Decision Requested:	Delete Rule 16.4.1 RD1 (a)(iii) Subdivision - General, and make it a matter of discretion.									
Decision Reasons:										

- The establishment of formal and informal grid patterns may not be appropriate for all sites, such as those that have natural or physical constraints. The submitter's properties are examples.
- A grid pattern does not reflect the existing character of Pokeno where there is a "loose looping grid formation with cul-de-sacs."
- A similar road formation should be carried over to the submitter's properties to maintain this character. There is no analysis in the section 32 report to justify this rule and grid patterns should be a principle rather than enforced as a rule.

Point Number 684.12

Summary of Decision Requested: Delete Rule 16.4.1 RDI (a)(iv) Subdivision - General and make it a matter of discretion;

OR

Amend Rule 16.4.1 RDI (a)(iv) Subdivision - General, as follows:

(iv) Where 4 or more proposed lots are proposed to be created, the number of rear lots do not exceed ~~45%~~ 25% of the total number of lots being created;

Decision Reasons:

- It is not possible for a subdivision of the submitter's properties to comply with this rule due to their configuration and topographical constraints.
- The adjoining land contains a higher number of rear lots for this reasons.
- The pattern of subdivision needs to be considered in terms of the existing neighbourhood character.
- The rule is arbitrary and the section 32 analysis does not justify the proposed 15% threshold.

Submitter Number: 685

Submitter:

Greig Holdings Limited

Point Number 685.1

Summary of Decision Requested: Amend the zoning of the properties on the southern side of Johnson Street, Tuakau from Village Zone to Residential Zone (see map attached to submission for specific properties).

Decision Reasons:

- Village zoning is an inefficient use of the urban land resource that is in close proximity to the town centre of Tuakau, within walking distance of approximately 400 metres.
- The site is serviced by Council's water and wastewater infrastructure.
- Consideration should be given to residential subdivision in suitably located areas that are able to utilise urban services.
- The site's development will create residential growth within an appropriate area and directs residential growth away from rural and coastal areas in the District.
- The rural areas of Tuakau contain versatile soils used for rural production activities. These soils contribute significantly to regional and national food supply. Intensification of urban land at higher densities should be encouraged within close proximity of the Tuakau town centre to ensure that land supply requirements meet expected growth while preserving the soil resources.
- The maximisation of the lands residential development potential will futureproof the capacity of land supply to avoid further encroachment into the rural area.
- The proposed Village zoning under-utilises the land resource, where Residential zoning in this location is more appropriate given its proximity to the town centre of Tuakau.
- Fails to give effect to the Future Proof Strategy identified in Section 1.5.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton.
- This involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- "Village" Zone does not feature in the Draft National Planning Standards. While the standards are still in draft form, it should be encouraged that the Proposed Waikato District Plan follows the format set out in the standards.
- There is no assessment in the s32 analysis as to why this land has been zoned Village Zone.

Point Number 685.2

Summary of Decision Requested: Amend the zoning of the properties around Ryders Road and Oak Street, Tuakau from Industrial Zone to Business Zone (see map attached to submission for specific properties).

Decision Reasons:

- The proposed Industrial zoned land is considered to provide ad-hoc development.
- This will introduce smell and noise sensitivity of some of the industries and business activities in the town to occur in the future.
- There is considerable stock of existing undeveloped industrial land on Bollard Road.
- A key principle of a District Plan is to provide buffers between residential and industrial activities to reduce reverse sensitivity effects.
- No additional areas for industry are required.
- There is a large area of industrial land to the east of the town. The industrial area is separated from residential areas by the gully through which the Kairoa stream flows.
- New opportunities for industrial activities should not be encouraged adjoining the town centre and residential areas.
- The Plan needs to enable industrial development in the Whangarata industrial area.
- Any existing businesses located in the subject area are protected by land use consents or existing use rights.
- The Tuakau Structure Plan shows this area as part of the Business Zone.
- The town centre is a focal point to provide a mixture of business and community services.
- There is no assessment in the s32 analysis as to why this land has been zoned industrial.

Point Number 685.3

Summary of Decision Requested: Retain the rezoning of land for residential and business use within Tuakau.

Decision Reasons:

- Zoning of residential land gives effect to the NPS on Urban Land Capacity which identifies the Waikato District as high growth urban area.

Submitter Number: 686

Submitter:

Reid Crawford Farms Limited

Point Number 686.1

Summary of Decision Requested: Retain Policy 3.2.8 Incentivise subdivision, except for the amendments sought below;

AND

Add a new clause (b) to Policy 3.2.8 Incentivise Subdivision, to include the following, as follows:

(b) Incentivise subdivision in the Rural Zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous Biodiversity.

Decision Reasons:

- Support incentivising the protection of existing biodiversity with the ability to subdivide subject to meeting certain criteria.
- Seek that Policy 3.2.8 be expanded to include provision for enhancement and/or restoration of areas, when once restored, would be of suitable size and quality to achieve a functioning ecosystem.
- Appendix 2 of the Proposed Plan could provide a basis for assessing eligibility of these areas.
- Incentivising restoration is in line with The Vision and Strategy for the Waikato River.
- Eligible areas would likely be wetlands and waterways which are degraded due to farming activities such as stock and farming.

Point Number 686.2

Summary of Decision Requested: **Retain** Objective 5.1.1 The Rural environment, as notified.

Decision Reasons:

- The Waikato District encompasses valuable areas of high class soils that are of primary importance for food production both regionally and nationally.
- Supports the strength of the wording of the objective.
- Protecting these soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.

Point Number 686.3

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below;

AND

Amend Objective 5.2.1 (a) (i) Rural resources as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils;*

Decision Reasons:

- Accessibility to versatile land is also a key consideration in managing this resource.
- Suggests 'accessibility' be included in this policy.
- Supports the enhancement and/or restoration of natural ecosystems, surfaces and groundwater and the natural characteristics of fresh water bodies and coastal waters.

Point Number 686.4

Summary of Decision Requested: **Retain** Policy 5.2.2-High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 686.5

Summary of Decision Requested: **Retain** Policy 5.2.3 Effects of subdivision and development on soils, except for the amendments sought below;

AND

Amend Policy 5.2.3 (b) Effects of subdivision and development on soils, as follows:

(b) *Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).*

Decision Reasons:

- Support provisions that incentivise protection, enhancement and/or restoration of biodiversity values within the Waikato District through subdivision.
- This Policy only provides for subdivision where existing indigenous biodiversity is being protected.
- There are a number of waterways and wetlands in the Rural Zone of the Waikato District that would benefit from stock exclusion (through fencing) and enhancement and/or restoration.
- The cost of full restoration is approximately \$45,000 + GST per ha (excluding fencing of revegetated areas from stock).
- Subdivision offers an incentive for landowners to undertake restoration works which they would be unlikely to do without a financial offset.
- To allow for the protection and/or restoration, particularly of water ways, would achieve the outcome sought in Policy 5.2.1(a)(iii), being the enhancement of water quality.
- It would support Policy 3.1.2 which seeks enhancement of indigenous biodiversity values through planting, pest control and other biosecurity measures.
- The Vision and Strategy for the Waikato River seeks restoration of the health and wellbeing of the Waikato River Catchment - improvements over time.
- Incentivising the fencing and restoration of waterways in the Waikato District would contribute positively to the improvement of water quality and achieving the objectives of the Vision and Strategy.

Point Number 686.6

Summary of Decision Requested: **Amend** Objective 5.3.1 (a) Rural character and amenity, as follows:

(a) *Rural character and amenity are maintained while recognising the localised character of different parts of the District.*

Decision Reasons:

- Supports in part the intent of the objective.
- Recognition of the variation of what defines rural character and amenity values across a large District is needed.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 686.7

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below;

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas;~~

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

...

Decision Reasons:

- Policy 5.3.8 (b) duplicates 5.3.8.(d)(ii) and 5.3.8.(e), which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures. There are areas of active and dynamic primary production and associated activities rather than benign landscapes.
- Rural landscapes can be visually altered by structures and buildings such as greenhouses and pack houses and are recognised as important components of primary production activities which form part of the rural environment.

Point Number 686.8

Summary of Decision Requested: **Amend** the definition for "Significant Natural Area" in Chapter 13 Definitions, as follows:

Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area of the planning maps or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity (Appendix 2) by a suitably qualified Ecologist

Decision Reasons:

- Support the inclusion of Significant Natural Area's definition, but would like to see definition expanded to also include areas that have been assessed by a suitably qualified Ecologist as meeting one or more of the criteria in Appendix 2 of the Proposed Plan - *Criteria for Determining Significance of Indigenous Biodiversity*.
- Aligns with the wording of the Conservation Lot Subdivision provisions which allow for subdivision where an identified Significant Natural Area is being protected or an area meeting the Criteria for Determining Significance of Indigenous Biodiversity.

Point Number 686.9

Summary of Decision Requested: **Amend** the activity status for Rule 22.4.1.1 Prohibited subdivision PR1, PR2, PR3 and PR4, from Prohibited to Non Complying activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies.
- It is fanciful to think that every subdivision on high class soil would result in a significant adverse effect on the environment.
- Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unfair and unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site.
- Established rural activities include greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries or commercial orchard activities.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- A number of commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 states any subdivision of a lot previously amalgamated for the purpose of a transferable lot subdivision is prohibited. This rule may unreasonably restrict the subdivision potential over and above what is necessary to avoid undermining the intent of the rule under which these Records of Title were created.
- Under Rule 22B of the Franklin Section, the donor certificates of title had to meet a minimum area of 1ha each. However there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. We also note that under the Franklin Section of the District Plan there were no corresponding rules that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22B of the Franklin Section require closer scrutiny this should merit a Non-Complying status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbour without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected in the Rural Zone from inappropriate subdivision and development and that subdivision in the Urban Expansion Area does not undermine the integrated and efficient development of this zone.

Point Number 686.10

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision, as follows:

(i) *The lot must contain:*

~~(A) a contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist which meets; or~~

(B) a contiguous area, to be enhanced and/or restored;

In accordance with the table below:

(ii) *The area of Significant Natural area, or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);*

(iii) *The Significant Natural Area or area to be restored is not already subject to legal protection ~~a conservation covenant pursuant to the Reserves Act 1977~~*

~~or the Queen Elizabeth II National Trust Act.~~

~~(iv) The subdivision proposes to legally protect all areas of Significant Natural Area or area to be restored by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth National Trust Act.~~

~~(v) An ecological management plan is prepared to address the ongoing management of the conservation protected area to ensure that Significant Natural Area area to be protected is self-sustaining and that plan:~~

~~A. Addresses fencing requirement for the conservation protected area;~~

~~B. Addresses ongoing pest plan and animal control;~~

~~C. Identifies any enhancement and/or restoration or edge-planting required within the conservation area to be protected.~~

~~(vi) All proposed lots... (vii) Subdivision entitlement.~~

~~(b) Council's discretion is restricted to the following matters.~~

~~(i) Subdivision layout and proximity of building platforms to Significant Natural Area the area to be protected;~~

~~(ii) Matters contained in an ecological management plan for the conservation protected area.~~

~~(iii) Effects of the subdivision on localised rural character and amenity values;~~

~~(iv) Extent of earthworks including earthworks for the location of building platform and access ways.~~

~~(v) Mechanism of legal protection for the area to be protected.~~

Decision Reasons:

- Support the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity which offers positive benefits for the Region.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot rules. There are significant biodiversity and water quality benefits to be gained from ecological enhancement particularly along waterways and wetland areas.
- Water quality is a key issue identified in the RPS and the Vision and Strategy. Recognised in the rural objectives and policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways.
- The plan should be enabling of improving biodiversity and water quality within the Waikato Catchment and incentivise enhancement and/or restoration of areas that meet criteria in Appendix 2.
- Re-vegetation costs approximately \$45,000 per hectare.
- Incentivisation through subdivision would assist in offsetting this cost and encourage enhancement and/or restoration.
- Seek that provisions for ecological enhancement and/or restoration of appropriate areas be included.
- Minimum areas for enhancement and/or restoration should be in accordance with Rule 22.4.1.6.
- Rule 22.4.1.6 ii requires the legal protection of the conservation feature. Other forms of legal protection, such as the vesting of the conservation area in Council ownership (esplanade reserve) or by S221 consent notice may be appropriate. Submitter suggests that this rule require legal protection only and leave the mechanism of protection to discretion of Council.
- Rule 22.4.1.6 (vi) requires a minimum area of 8,000m² but flexibility for lot area should be provided where dwellings or established rural activities exist. This avoids unnecessary fragmentation of productive land. This could be addressed as a matter of discretion.

Point Number 686.11

Summary of Decision Requested: Retain Appendix 2 Criteria for Determining Significance of Indigenous Biodiversity.

Decision Reasons:

- Supports inclusion of Appendix 2 Criteria for Determining Significance of Indigenous Biodiversity.

Point Number 686.12

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace all references to "lot" with "Record of Title."

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur where a stream or a public road bisects land held together in one Record of Title.

Point Number 686.13

Summary of Decision Requested: Add new discretionary activity to Rule 22.4.1.6 Conservation lot subdivision, as follows:

DI

(a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6 (vi-viii) RDI.

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6 (vi-vii) RDI.

Decision Reasons:

- Supports the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity which offers positive benefits for the Region.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot rules.
- Water quality is a key issue identified in the RPS and the Vision and Strategy.
- This is recognised in the rural objectives and policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways.
- The plan should be enabling of improving biodiversity and water quality within the Waikato Catchment and incentivise enhancement and/or restoration of areas that meet criteria in Appendix 2.
- Re-vegetation costs approximately \$45,000 per hectare.
- Incentivisation through subdivision would assist in offsetting this cost and encourage enhancement and/or restoration.
- Submitter seeks that provisions for ecological enhancement and/or restoration of appropriate areas be included.
- Rule 22.4.1.6 ii requires the legal protection of the conservation feature, but there are additional means such as vesting in Council or s221 consent notice.
- Rule 22.4.1.6 (vi) requires a minimum of 8000m². Flexibility of lot size should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activities.

Point Number 686.14

Summary of Decision Requested: Retain Rule 22.4.1.2 (a) (iv) as a restricted discretionary activity for lots between 8,000m² and 1.6ha.

Decision Reasons:

- Supports the creation of an additional vacant lot between 8,000m² and 1.6ha.
- Supports the additional lot between 8,000m² and 1.6ha as a restricted discretionary activity.

Point Number 686.15

Summary of Decision Requested: Add a new discretionary activity to Rule 22.4.1.2 General Subdivision, as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RDI.

Decision Reasons:

- General subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- This will ensure the boundaries proposed are practical to ensure the most efficient ongoing management of the land and not to meet an arbitrary rule.
- A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8,000m² it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land.
- If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land.
- If the land comprises productive potential, then a Farm Management Report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- The creation of lots that accommodate existing and well-established rural activities should be provided for where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other activities on the site.

Point Number

686.16

Summary of Decision Requested:

Delete Rule 22.4.1.2 RD1 (a)(v) General Subdivision (the 80/20 rule);

AND

Add a new matter of discretion to Rule 22.4.1.2 RD1 (b) General Subdivision, as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 report regarding the relevance or practicality of this rule.
- The submitter agrees with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high class soils.
- The strict and arbitrary 80/20 requirement of this rule may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions.
- The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Consent planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number

686.17

Summary of Decision Requested:

Retain Rule 22.4.1.2 (a)(i), (ii) and (iii) General Subdivision.

Decision Reasons:

- Supports inclusion of the General Subdivision provisions.

Point Number

686.18

Summary of Decision Requested:

Retain Rule 22.4.1.4 Boundary relocation as notified, except for amendments sought below;

AND

Amend Rule 22.4.1.4 Boundary Relocation, as follows:

(a) The boundary relocation must:

(i) Relocate a common boundary or boundaries between two or more existing Records of Title or consented lots that existed prior to 18th July 2018.

(b) Council's discretion is restricted to the following matters:

....

(v) Effects on high class soils, farm management and productivity.

Decision Reasons:

- Support inclusion of boundary relocations and flexibility to allow rural properties to rationalise large landholdings to provide logical lot arrangement that better support the farming activity.
- Rural boundary relocations typically result in positive effects through enhancement of the productive farming system and allowing relocation of potential house sites to more favorable locations.
- Many farms in the district held in multiple Records of Title and have ability to relocate boundaries and create General and Conservation Lots under proposed provisions.
- Submitter would like to see provision made for relocation of the boundaries of adjacent consented lots and Records of Title in the Franklin Section of the District Plan (22.B.15.1).
- Consider retention of the date 18 July 2018 as appropriate, as this would allow for closer scrutiny and a higher activity status for those Records of Title and consented lots created under the Transferable and Environmental lot rule of the previous section of the District Plan which had restrictions on size.
- Relocation of a lot created under the previous Transferable Lot Rules from an area containing no high class soils to a high class soil area would create an adverse outcome.
- Inclusion of high class soils a matter of discretion together with proposed objectives and policies in Chapter 5 (Rural Environment) would give council a robust framework to avoid adverse effects on high class soils.

Point Number

686.19

Summary of Decision Requested:

Amend Rule 22.4.1.5 Rural Hamlet Subdivision, to allow for relocation of consented lots and reduce lot size requirements as follows:

(a) Subdivision to create a Rural Hamlet must comply with all of the following conditions:

- (i) It results in 3-5 proposed lots being clustered together;
 - (ii) All existing Records of Title and/or consented lots form one continuous landholding;
 - (iii) Each proposed lot has a minimum of **85,000m²**;
 - (iv) Each proposed lot has a maximum of **1.60ha**;
 - (v) The proposed balance lot has a minimum area of 20ha;
 - (vi) It does not create any additional lots beyond the number of existing Records of Title.
- (b) Council's discretion is restricted to the following matters:
- (i) Subdivision layout and design including dimension, shape and orientation of the proposed lots and specified building areas;
 - (ii) Subdivision layout and design including dimension, shape and orientation of the proposed lots;
 - (iii) Effects on rural character and amenity values;
 - (iv) Effects on landscape values;
 - (v) Potential for reverse sensitivity effects;
 - (vi) Extent of earthworks including earthworks for the location of the building platforms and access ways;
 - (viii) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Support provisions for Hamlet Subdivision in the Rural Zone.
- When designed well, the positive benefits of Rural Hamlets include shared infrastructure, improved and enhancement of the productive farming system, and provide housing and lifestyle choices within the district.
- Inclusion of consented lots, both general and conservation, would have positive outcomes via provision of shared infrastructure and enhancement of production systems and limit wide dispersal of lots.
- Enable subdivision layout to account for effects from intensive farming/mineral extraction activities.
- May be more appropriate to have smaller lot sizes to ensure benefits of Hamlet design are achieved.
- Rural Hamlets provide compact design within rural setting.
- The proposed subdivision rules mean lots at 1.6 ha would take up 8ha of land and visually result in dispersed rural housing, not a Hamlet.
- Hamlet provisions should ensure a response to landscape context is more important than meeting performance standards around lot size.
- Rural character and amenity will be maintained by 20 ha+ balance surrounding the Hamlet.

Submitter Number:

687

Submitter:

Campbell Tyson

Point Number

687.1

Summary of Decision Requested:

Retain the proposed Residential zoning of the land at 4 Wayside Road, Te Kauwhata (with the exception of a portion of land at the intersection of Wayside Road and Te Kauwhata Road, as shown in Figure 4 of the submission).

Decision Reasons:

- Consistency with previous planning documents.
- Supports the financial investment from the landowner who has begun preliminary design and investigation to develop the land.
- Zoning of residential land is consistent with the NPS on Urban Land Capacity, which identifies the Waikato District as high growth urban area.
- The site contains minimal development constraints making it an appropriate site for residential use.
- The site is well located for development with access to SH1 and the Te Kauwhata Town Centre.
- Supports and is supported by the existing community facilities, amenity and infrastructure in Te Kauwhata Town Centre.

Point Number

687.2

Summary of Decision Requested:

Retain the proposed Residential West Te Kauwhata Overlay at 4 Wayside Road, Te Kauwhata, (with the exception of a portion of land at the intersection of Wayside Road and Te Kauwhata Road as shown in Figure 4 of the submission).

Decision Reasons:

- Consistency with previous planning documents.
- Supports the financial investment from the landowner who has begun preliminary design and investigation to develop the land.
- The site contains minimal development constraints making it an appropriate site for residential use.
- The site is well located for development with access to SH1 and the Te Kauwhata Town Centre.
- Supports and is supported by the existing community facilities, amenity and infrastructure in Te Kauwhata Town Centre.

Point Number

687.3

Summary of Decision Requested:

Delete the indicative Walkway, Cycleway, Bridleway from 4 Wayside Road, Te Kauwhata.

Decision Reasons:

- The indicative walkway, cycle way, bridleway does not align with the approved subdivision consent for the property to the north at 24 Wayside Road. However, the adjoining landowner advises it matches their revised proposal.

Point Number

687.4

Summary of Decision Requested:

Delete the indicative roads at 4 Wayside Road, Te Kauwhata, as indicated in Figure 3 in submission, specifically the slip land running parallel to Te Kauwhata Road and the road proposed to run parallel to the northern boundary.

Decision Reasons:

- The slip lane is irrelevant and serves no purpose. The plan indicates the segregation strip off Te Kauwhata Road and a subdivision layout can be created using these entrances without the need for the slip land alongside Te Kauwhata Road.
- The requirement for the slip lane creates inconsistencies within the Plan Rule 14.12.1.1(1)(d) which states that no access, access leg, or right-of-way shall run parallel to any road within 30m. The requirement for the slip lane should be removed as this creates a non-compliance with the transportation section of the Plan.

- The slip lane may result in effects from headlights on cars on the slip lane to cars on Te Kauwhata Road.
- Te Kauwhata Road is an Arterial Road whose primary function is to link the Town Centre to SH1. It is not desirable for the on-site amenity of residents to have dwellings facing an arterial road.
- An alternative option would be to bund along Te Kauwhata Road and have dwellings fronting an internal road. Bunding, landscaping and fencing the length of the Te Kauwhata road frontage would reduce the effects of arterial traffic on the future residents and reinforce the strategic need to prioritize the through traffic function over and above the property access function.
- The internal indicative road to the north does not align with the contour of the land. An improved response would be to work with the contour of the land rather than imposing a grid layout over it.
- The internal indicative road should follow the contour of the existing gully, therefore maintaining the natural storm water runoff patterns and ensuring houses are elevated above the road to have 'eyes on the street.'

Point Number 687.5

Summary of Decision Requested: Delete Rule 16.4.13 RD1(a) Subdivision creating reserves, and make it a matter of discretion.

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective. The enforcement of the rule may increase the cost of development which could be passed onto purchasers.
- This is an arbitrary standard which may not be relevant for all reserve types or developments.
- Safety and surveillance of reserves may be achieved with less road frontage. We have analysed the site and its surroundings to identify the constraints and opportunities and the attached Subdivision Concept Plan has been designed to respond with these findings.
- There is no analysis in the s32 stating why the 50% rule has been applied. While this may be a principle to follow it should not be enforced through a rule.

Point Number 687.6

Summary of Decision Requested: Amend Table 14.12.5.14 Access and road conditions to apply the NZS standards Table 3.2 Roading Design Standards;
OR

Amend Table 14.12.5.14 Access and road conditions, to use former Franklin Section standards, as follows:

2-4 Users - 3.5m Legal width - 2.7m Minimum total seal width

5-8 Users - 8m Legal width - 5m Minimum total seal width

Decision Reasons:

- The proposed access standards are excessive, will result in inefficient use of the urban land resource and will prevent infill development in existing urban areas. The extra seal width also increase impervious surfaces and storm water run-off without any apparent need or benefit relating to traffic effects. Excessive width also adds additional costs to developments.
- NZS 4404:2010 - Land Development and Subdivision Infrastructure is a national document that covers access and road conditions so this matter should not form part of the Plan.
- The current standards in the Franklin Section of the Plan are more appropriate than the proposed provisions.

Point Number 687.7

Summary of Decision Requested: Amend the zoning at 4 (partial-split zone), 8, 10, 16 and 24 Wayside Road, Te Kauwhata, from Residential Zone to Business Zone (see Figure 4 in the submission for land identified.)

Decision Reasons:

- These sites contain existing commercial activities and businesses. Zoning should protect the existing businesses.
- The sites are well located near SH1 and would enjoy a high number of passing vehicle movements, both from Te Kauwhata residents and users of SH1. A business use would be a more efficient and appropriate use of this land to provide for activities that draw on the locational advantages of the site.
- The business zone would enable some diversity in the land use.
- Noise, glare and emissions generated from traffic and associated infrastructure along SH1. These effects can cause conflict with residential uses which require a higher level of onsite amenity. Rezoning to a business use will avoid reverse sensitivity effects on the State Highway and provides a buffer between the onramp and the residential zone.

Point Number 687.8

Summary of Decision Requested: Retain the general residential subdivision provisions in Rule 16.4.3 Subdivision – Te Kauwhata West Residential Area, as proposed in the District Plan, with the exception of Rule 16.4.3(a)(ii) (which is addressed elsewhere in the submission).

Decision Reasons:

- It enables the subdivision of land to provide for growth within the district.

Point Number 687.9

Summary of Decision Requested: Amend Rule 16.4.3(a)(ii) Subdivision – Te Kauwhata West Residential Area, to reduce the minimum average to 700m2.

Decision Reasons:

- To support efficient and compact growth
- Inefficient use of land that fails to take into account the anticipated growth for the area
- Fails to give effect to the Future Proof Strategy identified in Section 1.5.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton (67%) and the larger settlements of the district (21%). This involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements. Average residential lot size of 875m2 is considered to be an inefficient use of the residential land resource.
- Does not achieve the minimum density required by strategic Policy 4.1.5. This is an inconsistency between the rules and the Plan's objectives. The rule should give effect to the Plan, therefore, this should be rectified.

Point Number 687.10

Summary of Decision Requested: Delete Rule 16.4.3 RD1(a)(iv) Subdivision - Te Kauwhata, and make it a matter of discretion.

Decision Reasons:

- Submitter accepts that grid layouts result in increased permeability, legibility and walkability of residential areas. However, the establishment of formal and informal grid patterns may not be appropriate to all sites. Sites with topographical natural or physical constraints may be unable to practically implement a grid layout. There may also be sites where the lay of the land is best suited to an alternative roading design.
- There is no analysis in the s32 regarding this relevance or practicality of this rule. While grid layouts are an accepted urban design principle for good subdivision design, they are not an absolute response. Therefore, they should be used as a principle and not enforced through a rule.

Submitter Number: 688 **Submitter:** Gerardus & Yvonne Gemma Aarts

Point Number 688.1

Summary of Decision Requested: Retain the proposed Residential Zoning of the land at 111 Harrisville Road, Tuakau.

Decision Reasons:

- Consistency with PC16 where extensive resources were invested by Council and landowners which determined the site was suitable for residential development.
- Supports financial and resource commitments from landowners involved in previous plan-making processes and Resource Consenting processes to develop land in the Tuakau area.
- Zoning of residential land gives effect to the NPS on Urban Land Capacity which identifies the Waikato District as high growth urban area.
- The site contains limited development constraints making it an appropriate site for residential use. The site and its surroundings attached to the submission have been analysed to identify the constraints and opportunities and the Subdivision Concept Plan has been designed to respond with these findings.

Point Number 688.2

Summary of Decision Requested: Retain Rule 16.4.1 Subdivision - General, with the exception of Rule 16.4.1 (a)(iii) (which is addressed elsewhere in the submission).

Decision Reasons:

- Provides for the efficient use of the land resources
- Enables the subdivision of land to provide for the growth of the district

Point Number 688.3

Summary of Decision Requested: Delete Rule 16.4.1 RD1 (a)(iii) Subdivision - General, and make this a matter of discretion.

Decision Reasons:

- While grid layouts result in increased permeability, legibility and walkability of residential areas., the establishment of formal and informal grid patterns may not be appropriate to all sites. Sites with topographical natural or physical constraints may be unable to practically implement a grid layout. There may also be sites where the lay of the land is best suited to an alternative roading design.
- There is no analysis in the s32 regarding the relevance or practicality of this rule. While grid layouts are an accepted urban design principle for good subdivision design they are not an absolute response. Therefore, they should be used as a principle and not enforced through a rule.

Point Number 688.4

Summary of Decision Requested: Amend Rule 16.4.11 Subdivision – Road Frontage, to match the Waikato District Plan – Franklin Section Rule 26.6.4 Frontage to Road (Vehicular Access Requirement) provisions.

Decision Reasons:

- The submitter opposes Council prescribing a minimum frontage.
- There is no analysis in the s32 regarding therelevance or practicality of this rule.

Point Number 688.5

Summary of Decision Requested: Amend Rule 16.4.12 Subdivision – Building Platform, to match the Waikato District Plan – Franklin Section Rule 26.6.1 Shape Factor.

Decision Reasons:

- The submitter opposes the size of the shape factors.
- There is no analysis in the s32 regarding the relevance or practicality of this rule.

Point Number 688.6

Summary of Decision Requested: Delete Rule 16.4.13 RD1 (a) Subdivision creating reserves, and make this a matter of discretion.

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective. The enforcement of the rule may increase the cost of development which could be passed onto purchasers.
- This is an arbitrary standard which may not be relevant for all reserve types or developments.
- Safety and surveillance of reserves may be achieved with less road frontage. The site and its surroundings have been analysed to identify the constraints and opportunities and the attached Subdivision Concept Plan has been designed to respond with these findings.
- There is no analysis in the s32 stating why the 50% rule has been applied. While this may be a principle to follow it should not be enforced through a rule.

Point Number 688.7

Summary of Decision Requested: **Amend** Table 14.12.5.14 Access and road conditions, to apply the NZS standards Table 3.2 Road Design Standards;
OR
Amend Table 14.12.5.14 Access and road conditions, to match the former Franklin Section Standards, as follows:
2 - 4 Users - 3.5m Legal width - 2.7m Minimum total seal width
5 - 8 Users - 8m Legal width - 5m Minimum total seal width

Decision Reasons:

- The proposed access standards are excessive, will result in inefficient use of the urban land resource and will prevent infill development in existing urban areas. The extra seal width also increase impervious surfaces and storm water run-off without any apparent need or benefit relating to traffic effects. Excessive width also adds additional costs to developments.
- NZS 4404:2010 - Land Development and Subdivision Infrastructure is a national document that covers access and road conditions so this matter should not form part of the Plan.
- The current standards in the Franklin Section of the Plan are more appropriate.

Submitter Number: 689 **Submitter:** Greig Developments No 2 Limited

Point Number 689.1

Summary of Decision Requested: **Retain** the general residential subdivision provisions in Chapter 16 Residential Zone, with the exception of submission points below.

Decision Reasons:

- Provides for the efficient use of the land resources
- Enables the subdivision of land to provide for the growth of the district

Point Number 689.2

Summary of Decision Requested: **Delete** 16.1.2 P3 (a) and (b) Permitted Activities, relating to a new retirement village or alterations to an existing one.

Decision Reasons:

- There are many examples of retirement villages/facilities located on sites of less than 3 hectares.
- Retirement villages can range in their design including individual detached units, townhouses and apartment-style units in a multi-story building. A minimum site size of 3 hectares will add to urban sprawl rather than provide housing intensification close to existing town centers.
- Finding an area of land over 3 hectares in size in the Residential zone will be challenging, particularly within 400 meters of public transport (which does not exist in Waikato).

Point Number 689.3

Summary of Decision Requested: **Add** a new activity to Rule 16.1.2 Permitted Activities as follows:
P13 Multi-unit development of up to three dwellings is a Permitted Activity
AND
Add similar standards to Rule 16.1.3 RD1 (including proposed amendments) as permitted activity standards to new Rule 16.1.2 P13
AND
Delete Rule 16.1.3(1)(RD1)(c) Restricted Discretionary, which requires the minimum net site area per residential unit to be 300m2.

Decision Reasons:

- Multi-unit development of up to three dwellings should be a Permitted Activity. This will allow for infill development and avoid unnecessary Resource Consent costs and time delays where the effects could be managed through permitted standards.
- The construction of up to three dwellings on a residential site is unlikely to result in adverse effects provided the relevant controls can be met.
- The proposed addition to the permitted activity table will allow existing land to be developed more efficiently without the need to subdivide the land.
- The rules does not promote higher densities or compact development and will add to urban sprawl rather than housing intensification.
- Density should be appropriate to the physical attributes of the proposal.
- There is no analysis in Section 32 regarding this relevance or practicality of this rule.

Point Number 689.4

Summary of Decision Requested: No specific decision sought, but submission recognises the importation of fill to enable residential development is appropriate in Rule 16.2.4.1 Earthworks - General and questions whether this would be a permitted activity (P2) or a non-complying activity (NC1).

Decision Reasons:

- These provisions seem to be workable but the submitters are interested in the thoughts of other submitters.
- Clean-fill may be required in residential zoned sites to enable green-field land to develop for residential purposes. It is unclear whether this is a P2 permitted activity or a NC1 non-complying activity. NC1 would be too restrictive and needs to be more lenient to enable green-field development within residential zones.

Point Number 689.5

Summary of Decision Requested: **Add** a new provision P2 to Rule 16.3.1 Dwelling that permits a multi-unit development of up to three dwellings, with similar standards to Rule 16.1.3 RD1 (including proposed amendments) applied as permitted activity standards

AND

Amend Rule 16.3.1 Dwelling to ensure that this rule does not apply to multi-unit developments.

Decision Reasons:

- The current rule is too restrictive
- Multi-unit development of up to three dwellings will allow for infill development and avoid unnecessary Resource Consent costs and time delays where the effects could be managed through permitted activity standards
- There are a number of larger (more than 1000m²) sections within the older existing residential areas in Tuakau, Te Kauwhata, Ngaruawahia and Pokeno. These areas are often close to the Town Centre. Intensification of these sites should be encouraged given their proximity to existing services.
- This will allow existing land to be developed more efficiently without the need to subdivide the land allowing landowners to build additional dwellings on existing lots.
- Permitted standards can control amenity effects to ensure that neighboring sites are not affected.
- This approach is consistent with the Operative District Plan – Franklin Section where up to three dwellings can be constructed on properties without Resource Consent provided permitted standards would be achieved.

Point Number

689.6

Summary of Decision Requested:

Amend Rule 16.3.5 PI Daylight admission as follows:

Buildings must not protrude through a height control plane rising at an angle of ~~37.45~~ degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary

Decision Reasons:

- It is inconsistent with previous Planning documents which are less restrictive
- It is too restrictive for urban areas
- Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane
- The 37-degree angle is difficult to calculate

Point Number

689.7

Summary of Decision Requested:

Amend Rule 16.3.6 PI Building coverage as follows

The total building coverage must not exceed ~~50%~~40%

Decision Reasons:

- Opposes the 40% site coverage as the height limit does not enable the efficient use of urban land and fails to increase the development capacity of existing urban areas.
- To allow the greater utilization of residential zoned land to support the strategic direction outlines in Section A and Chapter B 4.1 of the Plan supports increase densities and housing choice throughout the district. This approach is consistent with the Operative District Plan – Franklin Section

Point Number

689.8

Summary of Decision Requested:

Amend Rule 16.3.7 P1 (a) Living court, as follows:

(a) A living court must be provided for each dwelling that meets all of the following conditions:

...

(iii) When located on the ground floor, it has a minimum area of ~~80~~40m² and a minimum dimension of ~~3~~1.4m in any direction; and

(iv) When located on a balcony of an above ground apartment, it must have a minimum area of ~~10~~4.5m² and a minimum dimension of 2m in any direction.

AND

Amend Rule 16.3.7 P2 (a) Living court as follows:

A living court must be provided for each minor dwelling that meets all of the following conditions

...

P2 (a)

...

(iii) When located on the ground floor it has a minimum area of ~~10~~4.6m² and a minimum dimension of ~~2~~1.4m in any direction;

(iv) When located on a balcony of an above ground apartment, it must have a minimum area of ~~8~~4.5m² and a minimum dimension of ~~1.6~~2m in any direction.

Decision Reasons:

- Excessive sized outdoor living areas will restrict the ability to develop the urban land. The size standards exceed the existing Waikato District Plan – Franklin Section standard which requires up to 60m² of the outdoor living area
- The perception of urban living is changing and people no longer need large outdoor areas
- Smaller outdoor living courts have been adopted by Auckland Council to promote a more compact living approach and should be adopted by Waikato District Council to achieve the strategic objectives
- Reducing the minimum outdoor living court allows for variety in lifestyle and lower maintenance
- Rule 16.3.8 (Service court) requires an additional service court, which ensures adequate outdoor space for living and other domestic requirements.

Point Number

689.9

Summary of Decision Requested:

Amend Rule 16.3.8 P1(a) Service court as follows:

(a) A service court must be provided for each dwelling and minor dwelling each with all of the following dimensions:

(i) minimum area of ~~5~~4.5m²; and

(ii) contains a circle of at least ~~2~~3m diameter.

Decision Reasons:

- The Plan requires excessive service court for modern urban living. Excessive service courts will restrict the ability to develop urban land efficiently
- There is no assessment in the Section 32 analysis to support the size of the service court

Point Number 689.10

Summary of Decision Requested: **Amend** Rule 16.3.9.1 P1 (a) Building setbacks – All boundaries as follows:

(a) A building must be set back a minimum of:

...

(iii) ~~1.24-5m~~ from every boundary other than a road boundary; and

(iv) ~~1.24-5m~~ from every vehicle access to another site.

Decision Reasons:

- The Plan requires excessive building setbacks for residential Lots that will restrict the ability to develop the urban land. The setbacks exceed the existing Waikato District Plan – Franklin Section standards for minimum side and rear yards of one meter
- Reducing the side yard allows for variety in lifestyle and lower maintenance

Point Number 689.11

Summary of Decision Requested: **Amend** Rule 16.3.9.3 P1 (a)(ii) Building setback - Waterbodies to match Rule 24.3.6.3 Building setback - waterbodies

AND

Amend Rule 16.3.9.3 P1 Building setbacks - Waterbodies as follows:

(ii) 23m from the bank of any named river (other than the Waikato and Waipa Rivers);

AND

Add a new permitted rule P3 to Rule 16.3.9.3 Building setback - Waterbodies as follows:

P3 A building must be set back a minimum of 10m from the bank of a perennial or intermittent named or unnamed stream.

Decision Reasons:

- These are not consistent with other zones or the existing Operative District Plan – Franklin Section provisions

Point Number 689.12

Summary of Decision Requested: **Delete** Rule 16.4.1 RD1 (a)(iii) Subdivision - General

Decision Reasons:

- The submitter accepts that grid layouts result in increased permeability, legibility and walkability of residential areas. However, the establishment of formal and informal grid patterns may not be appropriate to all sites. Sites with topographical natural or physical constraints may be unable to implement a grid layout.
- There may also be sites where the lay of the land is best suited to an alternative roading design.
- There is no analysis in Section 32 regarding this relevance or practicality of this rule
- While grid layouts are an accepted urban design principle for good subdivision design they are not an absolute response

Point Number 689.13

Summary of Decision Requested: **Delete** Rule 16.4.2 RD1 (a)(iv) Te Kauwhata Ecological Residential Area

Decision Reasons:

- The submitter accepts that grid layouts result in increased permeability, legibility and walkability of residential areas. However, the establishment of formal and informal grid patterns may not be appropriate to all sites. Sites with topographical natural or physical constraints may be unable to implement a grid layout.
- There may also be sites where the lay of the land is best suited to an alternative roading design.
- There is no analysis in Section 32 regarding this relevance or practicality of this rule
- While grid layouts are an accepted urban design principle for good subdivision design they are not an absolute response

Point Number 689.14

Summary of Decision Requested: **Delete** Rule 16.4.13 (a) Subdivision creating reserves and make this a matter of discretion.

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers, which may not be justifiable from an economic perspective. The enforcement of the rule may increase the cost of development, which could pass onto purchasers.
- This is an arbitrary standard which may not be relevant for all reserve types or developments
- Safety and surveillance of reserves may be achieved with less road frontage
- There is no analysis in Section 32 stating why the 50% rule has been applied.

Point Number 689.15

Summary of Decision Requested: **Amend** Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips to adopt the provisions in the Operative District Plan – Franklin Section Rule 11.5 – Esplanade Reserves and Strips

Decision Reasons:

- This needs to be assessed on a case-by-case basis and Council should allow a waiver or reduction in width in certain circumstances.
- Accepts that esplanade reserves and strips enable public access and recreation.

Point Number	689.16
Summary of Decision Requested:	Retain Chapter 24 Village Zone, except for those addressed in the submission points.
Decision Reasons:	<ul style="list-style-type: none"> • It provides for the efficient use of the land resources • Enables the subdivision of land to provide for the growth of the district.
Point Number	689.17
Summary of Decision Requested:	Add a new permitted activity to Rule 24.1.1 Permitted Activities as follows: <i>A new retirement village or alterations to an existing retirement village</i>
Decision Reasons:	<ul style="list-style-type: none"> • Retirement villages do not feature as a land use activity in the Village Zone. Given the demand for such facilities, provision should be made for retirement villages in all urban areas, including the Village Zone.
Point Number	689.18
Summary of Decision Requested:	No specific decision sought, but submission recognises the importation of fill to enable residential development is appropriate in Rule 24.2.4.1 Earthworks - General and questions whether this should be a permitted activity (P2) or a non-complying activity (NC1).
Decision Reasons:	<ul style="list-style-type: none"> • These provisions seem workable but the submitter is interested in the thoughts of other submitters • Clean-fill may be required in residential zones to enable green-field land to be developed for residential purposes. It is unclear to the submitter whether it is a P2 permitted activity or a NC1 non-complying activity. NC1 would be too restrictive and needs to be more lenient to enable green-field development within residential zones.
Point Number	689.19
Summary of Decision Requested:	Retain Rule 24.3.2 P1 Minor dwelling as proposed in terms of a maximum gross floor area of 70m2 and requiring a net site area of 1000m2 or more.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	689.20
Summary of Decision Requested:	Amend Rule 24.3.4 Daylight admission as follows: <i>A building must not protrude through a height control plane rising at an angle of 45 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary</i> .
Decision Reasons:	<ul style="list-style-type: none"> • Inconsistency with previous Planning documents which are less restrictive • Too restrictive for urban areas • Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane • The 37-degree angle is difficult to calculate
Point Number	689.21
Summary of Decision Requested:	Retain Rule 24.3.5 Building coverage
Decision Reasons:	<ul style="list-style-type: none"> • These building coverages recognise the different attribute of lot connected to public wastewater • It corresponds with rule 24.4.2 Subdivision - Te Kowhai and Tuakau
Point Number	689.22
Summary of Decision Requested:	Retain Rule 24.3.6.3 Building setback - Waterbodies, except for the amendments sought below AND Amend Rule 24.3.6.3 P1 (a)(i)C Building set back - Waterbodies as follows: <i>Named River bank, other than the Waikato River and Waipa River.</i> AND Amend Rule 24.3.6.3 P3 Building setback - Waterbodies as follows: <i>A building must be setback a minimum of 10m from the bank of a perennial or intermittent <u>named or unnamed</u> stream.</i>
Decision Reasons:	<ul style="list-style-type: none"> • It is important to define a stream to avoid confusion with the definition of a river. The RMA defines river as "a continually or intermittently flowing body of freshwater; and includes a stream and modified watercourse" if a watercourse is named "Stream" then it should be subject to the appropriate setback by the Plan
Point Number	689.23
Summary of Decision Requested:	Retain Rule 24.4.2 RD2 (a)(i) Subdivision – Te Kowhai and Tuakau
Decision Reasons:	

- No reasons provided.

Point Number 689.24

Summary of Decision Requested: **Amend** Rule 24.4.9 RDI(a) Road frontage to adopt the provisions in the Operative District Plan – Franklin Section 26.6.4 Frontage to Road (Vehicular Access Requirement)

Decision Reasons:

- Every proposed lot as part of the subdivision with a road boundary, other than a proposed lot containing an access allotment, utility allotment, right of way or access leg must have a width along the road boundary of at least 20m
- The layout of a development is dependent on the size and shape of the site as well as its topography (amongst other constraints). While a 20m minimum width along a road boundary can generally work in many developments that have the ability to follow a grid design, the reality is that not every site is flat with no topographical or size/shape constraints
- Sites with topographical natural or physical constraints may be unable to practically implement a layout that achieves 20m road frontage for all lots with the road. There may also be sites where the lay of the land is best suited to an alternative roading design
- There is no analysis in Section 32 regarding this relevance or practicality of this rule.

Point Number 689.25

Summary of Decision Requested: **Delete** Rule 24.4.11(a) Subdivision Creating Reserves and make it a matter of discretion.

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers, which may not be justifiable from an economic perspective. The enforcement of the rule may increase the costs of development, which could be passed onto purchasers
- This is an arbitrary standard which may not be relevant for all reserve types or developments
- Safety and surveillance of reserves may be achieved with less road frontage
- There is no analysis in Section 32 stating why the 50% rule was applied.

Point Number 689.26

Summary of Decision Requested: **Amend** Rule 24.4.12 Subdivision of Esplanade Reserves and Esplanade Strips to adopt the provisions in the Operative District Plan – Franklin Section Rule 11.5 – Esplanade Reserves and Strips

Decision Reasons:

- Accept that esplanade reserves and strips enable public access and recreation.
- This needs to be assessed on a case-by-case basis and Council should allow a waiver or reduction in width in certain circumstances

Point Number 689.27

Summary of Decision Requested: **Amend** Table 14.12.5.1 Separation distances to adopt the provisions in the Operative District Plan – Franklin Section 9.5 – Location of Vehicle Crossings for arterial and collector roads.

Decision Reasons:

- There is no analysis in Section 32 regarding this relevance or practicality of this table
- Roads are classified in terms of the relative importance of their movement and access functions. At the 'top' of the hierarchy are those roads, which have as their principal purpose the unrestricted movement of vehicles. Accordingly, the access available to properties along the route of such roads is either totally restricted or strictly managed through design. At the other extreme (local roads) the objective is to maximize the ease and safety of access to properties

Point Number 689.28

Summary of Decision Requested: **Delete** the entirety of Table 14.12.5.3 Minimum sight distances and refer to RTS6 – Guidelines for visibility at driveways

Decision Reasons:

- There is no analysis in Section 32 regarding this relevance or practicality of this table. There are national documents that cover separation distances so this should not form part of the plan.

Point Number 689.29

Summary of Decision Requested: **Amend** Table 14.12.5.14 Access and road conditions – Residential, Village, Business, Business Town Centre and Industrial Zone to apply the NZS standards Table 3.2 Roading Design Standards.

OR

Amend Table 14.12.5.14 Access and road conditions - Residential, Village, Business, Business Town Centre and Industrial Zone to use former Franklin Section standards as follows:

2-4 Users - 3.5m Legal width - 2.7m Minimum total seal width

5-8 Users - 8m Legal width - 5m Minimum total seal width

Decision Reasons:

- The proposed access standards are excessive, will result in inefficient use of the urban land resource and will prevent infill development in existing urban areas. The extra seal width also increase impervious surfaces and storm water run-off without any apparent need or benefit relating to traffic effects. Excessive width also adds additional costs to developments.
- NZS 4404:2010 - Land Development and Subdivision Infrastructure is a national document that covers access and road conditions so this matter should not form part of the Plan.
- The current standards in the Franklin Section of the Plan are more appropriate than the proposed provisions.

Point Number	689.30
Summary of Decision Requested:	Add a definition for "Special Housing Development" into Chapter 13 Definitions from the Operative District Plan – Franklin Section.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	689.31
Summary of Decision Requested:	Amend the definition for "Height Control Plane" in Chapter 13 Definitions to rise at an angle of 45 degrees rather than 37 degrees.
Decision Reasons:	<ul style="list-style-type: none"> Consequential amendment of relief sought elsewhere in the submission.
Point Number	689.32
Summary of Decision Requested:	Amend the definition for "Living Court" in Chapter 13 Definitions as follows: <i>Means an area of outdoor space directly related to the living area of a household unit, and for the household's exclusive use. It does not include parking, manoeuvring areas and buildings, but does include swimming pools, pergolas and similar open-framed structures <u>including a covered deck.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	689.33
Summary of Decision Requested:	Amend the definition for "Multi-Unit Development" in Chapter 13 Definitions as follows: <i>Means multiple residential units, <u>being attached or detached</u> which are integrated in a comprehensive manner It includes:</i> <i>(a) an apartment building; and</i> <i>(b) a duplex</i> <i>(c) <u>Terraced housing</u></i> ...
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	689.34
Summary of Decision Requested:	Delete Rule 16.4.1 RD1(a)(iv) Subdivision – General
Decision Reasons:	<ul style="list-style-type: none"> This is not able to be achieved on some sites due to the configuration of the site and topographical constraints which mean creation of roads will be difficult The standard is arbitrary and there is no assessment in the Section 32 analysis to support the 15% standard
Point Number	689.35
Summary of Decision Requested:	Delete Rule 16.4.3 RD1(a)(v) Te Kauwhata West Residential Area
Decision Reasons:	<ul style="list-style-type: none"> This is not able to be achieved on some sites due to the configuration of the site and topographical constraints which mean creation of roads will be difficult The standard is arbitrary and there is no assessment in the Section 32 analysis to support the 15% standard
Point Number	689.36
Summary of Decision Requested:	Delete Rule 16.4.4 RD1(a)(iii) Multi-unit development AND Add the following to Rule 16.4.4 RD1 (a) Multi-unit development: <i>Prior to subdivision occurring around existing buildings and development, all development must meet one of the following:</i> <i>(a) have existing use rights;</i> <i>(b) comply with the relevant zone rules; or</i> <i>(c) Be in accordance with an approved land use resource consent.</i>
Decision Reasons:	<ul style="list-style-type: none"> It is too restrictive. Multi-unit development of up to three dwellings as an activity will allow for infill development and avoid unnecessary Resource Consent costs and time delays where the effects could be managed through permitted activity standards. Lots for multi-unit development should be sized in relation to the proposed unit sizes. There is no assessment in the Section 32 analysis to support the 300m2 net site area. prior to subdivision occurring, all development must meet one of the following: <ul style="list-style-type: none"> (a) have existing use rights; (b) comply with the relevant zone rules; or (c) be in accordance with an approved land use resource consent.

Point Number 689.37

Summary of Decision Requested: **Amend** Rule 16.4.1.1 Subdivision – Road frontage to adopt the provisions in the Operative District Plan – Franklin Section 26.6.4 Frontage to Road (Vehicular Access Requirement)

Decision Reasons:

- There is no analysis in Section 32 regarding this relevance or practicality of this rule
- Opposes council prescribing a minimum frontage.

Point Number 689.38

Summary of Decision Requested: **Amend** Rule 16.4.1.2 Subdivision – Building platform to adopt the Shape Factor in the Operative District Plan – Franklin Section 26.6.1.

Decision Reasons:

- There is no analysis in Section 32 regarding this relevance or practicality of this rule
- Opposes the size of the shape factors

Submitter Number: 690 **Submitter:** Paramjit & Taranpal Singh

Point Number 690.1

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited Subdivision, so all references to "lot" are in the be changed to "Record of Title."

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Point Number 690.2

Summary of Decision Requested: **Retain** 22.4.1.2 (a) (i-ii) General Subdivision rules, as notified.

Decision Reasons:

- Submitter supports the inclusion of the General Subdivision rules.

Point Number 690.3

Summary of Decision Requested: **Add** a new discretionary activity to Rule 22.4.1.2 General Subdivision, as follows:

DI

(g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2, (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2, (iv) RDI.

Decision Reasons:

- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- This will ensure the boundaries proposed are practical to ensure the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots that accommodate existing and well-established rural activities should be provided for where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site

Point Number 690.4

Summary of Decision Requested: **Delete** 22.4.1.2 (a) (v) General Subdivision (80/20 Rule) provisions;

AND

Add a new matter of discretion to Rule 22.4.1.2 (b) General Subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 regarding the relevance or practicality of this rule.
- The strict and arbitrary 80/20 requirement of this rule may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 690.5

Summary of Decision Requested: **Amend** Table 14.12.5.15 Access and road conditions (Rural and Country Living Zones), to apply NZ Standard NZS4404 Table 3.2 Roadway Design Standards;

OR

Amend Table 14.12.5.15 Access and road conditions (Rural and Country Living Zones), to replace with Section 22B.7.2 of the Franklin Section of the Operative District Plan;

AND

Delete the requirement for sealed access and right of ways in the Rural and Country Living Zones from Table 14.12.5.15 Access and road conditions (Rural and Country Living Zones).

Decision Reasons:

- Access and right of way widths are too wide.
- Opposes the legal widths and seal widths.
- Opposes the requirement to seal access and right of ways in the Rural and Country Living Zones as metal access ways are appropriate within Rural Zones and more consistent with the character of Rural areas.

Point Number 690.6

Summary of Decision Requested: **Amend** Table 14.12.5.1 Separation Distances, to adopt Table 9.5 Location of Vehicle Crossings for arterial and collector roads from the Franklin Section of the Operative District Plan.

Decision Reasons:

- No analysis in s32 report regarding the relevance or practicality of this table.
- Roads are classified in regards to the relative importance of their movement and access functions.
- Top of hierarchy are roads with the primary purpose of unrestricted movement of vehicles. Access to properties along route of such roads is either totally restricted or strictly managed through design.
- The objective of Local roads is to maximise ease and safety of access to properties.

Point Number 690.7

Summary of Decision Requested: **Delete** Table 14.12.5.3 Minimum Sight Distances, and refer to RTS6 Guidelines for visibility at driveways.

Decision Reasons:

- No analysis in s32 report around the relevance or practicality of this table.
- There are national documents covering sight distances so this matter should not be part of the Plan, so any amendment is made to legislation, the Plan does not need to be changed.

Point Number 690.8

Summary of Decision Requested: **Amend** Rule 22.3.1 Number of dwellings within a lot, to allow for three dwellings on lots over 100ha as a permitted activity.

Decision Reasons:

- Should be permitted as per the Franklin Section of the Operative District Plan.
- Lots over 100ha are able to absorb and mitigate effects of a third house by virtue of their size.

Point Number 690.9

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited Subdivision PR1, PR2, PR3, PR4, to change the activity status from Prohibited to Non-Complying Activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- In some instances it may be unavoidable to create an additional Record of Title.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities which are viable and sustainable such as greenhouses, pack house, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. Under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 690.10

Summary of Decision Requested: **Retain** the table in Rule 22.4.1.6 (a) (i) Conservation lot subdivision.

Decision Reasons:

- Support the table identified in Rule 22.4.1.6 (a)(i).

Point Number 690.11

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision, as follows:

(i) The lot must contain:

(A) a contiguous area of existing Significant Natural Area either as shown on the planning maps and/or;
 (B) a contiguous area, to be enhanced and/or restored;

As determined by an experience and suitably qualified ecologist in accordance with the table below:

(ii) The area of Significant Natural area, and/or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);

(iii) The Significant Natural Area or area to be restored is not already subject to legal protection a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act.

(iv) The subdivision proposes to legally protect all areas of Significant Natural Area and/or area to be restored by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth National Trust Act.

(v) An ecological management plan is prepared to address the ongoing management of the covenant protected area to ensure that Significant Natural Area area to be protected is self-sustaining and that plan:

A. Addresses fencing requirement for the covenant protected area;

B. Addresses ongoing pest plan and animal control;

C. Identifies any enhancement and/or restoration or edge-planting required within the covenant area to be protected.

(vi) All proposed lots... (vii) Subdivision entitlement.

(b) Council's discretion is restricted to the following matters.

(i) Subdivision layout and proximity of building platforms to Significant Natural Area the area to be protected;

(ii) Matters contained in an ecological management plan for the covenant protected area.

(iii) Effects of the subdivision on localised rural character and amenity values;

(iv) Extent of earthworks including earthworks for the location of building platform and access ways.

(v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- Supports the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity which offers positive benefits for the Region.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot rules.
- Water quality is a key issue identified in the RPS and the Vision and Strategy.
- This is recognised in the rural objectives and policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways.
- The plan should be enabling of improving biodiversity and water quality within the Waikato Catchment and incentivise enhancement and/or restoration of areas that meet criteria in Appendix 2.
- Re-vegetation costs approximately \$45,000 per hectare.
- Incentivisation through subdivision would assist in offsetting this cost and encourage enhancement and/or restoration.
- Seek that provisions for ecological enhancement and/or restoration of appropriate areas be included.
- Rule 22.4.1.6 ii requires the legal protection of the conservation feature, but there are additional means such as vesting in Council or s221 consent notice.

Point Number 690.12

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(iv) as notified.

Decision Reasons:

- The creation of an additional vacant lot between 8000m2 and 1.6ha is supported.

Point Number 690.13

Summary of Decision Requested: **Add** a new discretionary activity to Rule 22.4.1.6 as follows:

DL
 (a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6 (vi-vii) RD1.
 (b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6 (vi-vii) RD1.

Decision Reasons:

- Flexibility for a lot area should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activities. This avoids unnecessary fragmentation of productive farming land. This could be addressed as a matter of discretion.

Submitter Number: 691 **Submitter:** McPherson Resources Limited

Point Number 691.1

Summary of Decision Requested: **Delete** the definitions for "Aggregate Extraction Activities", "Extractive Industry", "Mineral Extraction and Processing" from Chapter 13 Definitions.

AND

Add a replacement definition for "Mineral and Aggregate Extraction Activities" to Chapter 13 Definitions as follows (or words to similar effect):

Mineral and Aggregate Extraction Activities
Means those activities associated with mineral and aggregate extraction, including:

a. Excavation, blasting, processing (crushing, screening, washing and blending);

b. The storage, distribution and sale of minerals and aggregates by wholesale to industry or by retail;

c. Ancillary earthworks;

d. The removal and deposition of overburden;

e. Treatment of stormwater and wastewater;

f. Landscaping and rehabilitation work, including cleanfilling;

g. Ancillary buildings and structures; and

h. Residential accommodation necessary for security purposes

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- There are three different definitions in the PDP covering a range of extractive industries: aggregate extraction activities, mineral extraction and processing, and the extractive industry. This adds unnecessary confusion that can be avoided by removing the superfluous definitions and retaining only one for 'mineral and aggregate extraction activities' as proposed.

Point Number

691.2

Summary of Decision Requested:

Retain Objective 5.4.1 Mineral and extractive industries, except for the amendments sought below

AND

Amend Objective 5.4.1 Mineral and extractive industries as follows (or words to similar effect):

Mineral resource use and mineral and aggregate extraction activities provide economic, social and environmental benefits to the district and are protected.

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- Submitter supports this objective as it provides a level of protection for the industry, which includes quarry operations
- Protection is strengthened which is key, given that this industry is vital to this district in that it contributes an important share of its GDP.
- This is supported by the Regional Policy Statement, particularly Objective 3.10 and Policies 4.4 and 6.8, which specifically protect regionally significant industries and recognize the importance of mineral extraction to sustain anticipated regional growth.

Point Number

691.3

Summary of Decision Requested:

Amend Policy 3.2.2 (b) Identify and Recognise, as follows (or words to similar effect):

(b) Recognise and protect Significant Natural Areas by ensuring the characteristics that contribute to their significance are not adversely affected by activities other than mineral and aggregate extraction.

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- To ensure that mineral extraction industry (particularly the McPherson Quarry) is not unreasonably hindered by the existence of indigenous forestry in near proximity to the quarry itself
- This is in line with the Regional Policy Statement, which makes specific reference to the importance of mineral extraction and the benefits to be derived for the region from allowing further extraction of the same.

Point Number

691.4

Summary of Decision Requested:

Amend Policy 3.2.3 (a)(i) Management hierarchy, as follows (or words to similar effect):

(a) Recognise and protect indigenous biodiversity within Significant Natural Areas by:

(i) avoiding the significant adverse effects of vegetation clearance and the disturbance of habitats unless specific activities need to be enabled, such as for mineral and aggregate extraction activities;

AND

Any consequential amendments or alternative relief to give effect to the matters raised in the submission.

Decision Reasons:

- To ensure that mineral extraction industry (particularly the McPherson Quarry) is not unreasonably hindered by the existence of indigenous forestry in near proximity to existing quarries
- This is in line with Regional Policy Statement which makes specific reference to the importance of mineral extraction and the benefits to be derived for the region from allowing further extraction of the same.
- In the event that the SNA overlay is not removed from the McPherson's property Policy 3.2.4 needs to be amended to ensure the McPherson's quarry can offer up such biodiversity offsets, even if it impacts on an area with the SNA overlay.
- McPherson Supports the use of biodiversity offsetting as they accept that operations involving mineral and aggregate extraction can sometimes result in residual adverse effects.
- It is appropriate to provide policy guidance that can be used in circumstances where applications received are non-complying but would be acceptable based on the use of a biodiversity offset.

Point Number

691.5

Summary of Decision Requested:

Amend Policy 3.2.4 (b) Biodiversity offsetting, in the event that the Significant Natural Area overlay is not removed from the McPherson's property (as addressed elsewhere in the submission), as follows (or words to similar effect):

(b) Within a Significant Natural Area not otherwise subject to mineral or aggregate extraction activities, a biodiversity offset will only be considered appropriate where adverse effects have been avoided, remedied or mitigated in accordance with the hierarchy established in Policy 3.2.3.

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- This is in line with Regional Policy Statement which makes specific reference to the importance of mineral extraction and the benefits to be derived for the region from allowing further extraction of the same.
- In the event that the SNA overlay is not removed from the McPherson's property Policy 3.2.4 needs to be amended to ensure the McPherson's quarry can offer up such biodiversity offsets, even if it impacts on an area with the SNA overlay.
- McPherson Supports the use of biodiversity offsetting as they accept that operations involving mineral and aggregate extraction can sometimes result in residual adverse effects.
- It is appropriate to provide policy guidance that can be used in circumstances where applications received are non-complying but would be acceptable based on the use of a biodiversity offset.

Point Number

691.6

Summary of Decision Requested: **Amend** 3.2.7 Policy (a)(v) Managing Significant Natural Areas, as follows (or words to similar effect):
(v) Avoiding ~~physical and~~ legal fragmentation where practicable.
OR
Amend Policy 3.2.7 (a)(v) Managing Significant Natural Areas, as follows if the Council does not want to remove the words "physical" (or words to similar effect):
(v) Avoiding physical and legal fragmentation where practicable.
AND
Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- To cater for the existing situation at the McPherson Quarry, where the Significant Natural Area has long been physically separated by the quarry activities.
- The aim of the proposed change is to retain the ability to have extractive industries within the district in a way that acknowledges that in some instances, physical separation is already existing and a necessity to allow for the continued extraction of minerals.
- The use of the word 'physical' unreasonably limits the ability to continue extracting aggregate at the McPherson Quarry, in that it would hinder the ability to grow the footprint of the quarry.
- Quarry activities naturally require the expansion of the quarry footprint over time, as and when a certain area is exhausted of the particular resource being extracted. For the McPherson Quarry, which has been in operation for over 60 years in the same location, the footprint will continue to expand slowly and over a long period of time (between 50-100 years) meaning that the effects of the growth can be managed to ensure that the environmental effects are reasonable.

Point Number

691.7

Summary of Decision Requested:

Retain the intent of Policy 5.4.2 Access to minerals and extractive industries, except for the amendments sought below.

AND

Amend 5.4.2 – Access to minerals and extractive industries as follows (or words to similar effect):

(a) Enable extractive industries provided that adverse effects are avoided, remedied or mitigated insofar as it is reasonable and practicable while still ensuring that the industry remains viable.

(b) Protect access to, and extraction of, mineral resources by:

(i) Identifying lawfully established extractive industries in or outside of Aggregate Extraction Areas and Coal Mining Areas on planning maps;

(ii) Identifying the site of a potential extractive industry within or outside of an Aggregate Resource Area on planning maps;

(c)...

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- Supports the intention of this policy as it aims at safeguarding the operation of mineral and extractive industries in the Rural Zone.
- Based on the reference to "Aggregate Extraction Areas" and "Aggregate Resource Areas", the protection only extends to those quarries which are currently operating.
- It provides no protection to new extractive industries across the district, as such properties would have to apply for a Plan change in order to have the same level of protection
- Aggregate is a significant and economically vital natural resource for the Waikato District, which attributes to the economic and social wellbeing of the local area. It does so not only by supplying employment opportunities but also by ensuring that brown and blue rock can be sourced locally and used both within the district as well as within the wider region. This helps ensure that the construction cost of regional and district projects is kept at a minimum, as the distance which the aggregate has to travel is reduced

Point Number

691.8

Summary of Decision Requested:

Amend Rule 22.2.3.1 PI (a)(i) Earthworks - General, as follows (or words to similar effect):

Ancillary rural and mineral/aggregate extraction earthworks;

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- Earthworks are a natural part of extracting minerals and aggregate. Without stripping the overburden/topsoil, you cannot extract the underlying aggregate.
- It is important that the industry is able to carry out ancillary earthworks as a Permitted Activity to avoid the need to continuously having to apply for resource consent. With the imposition of appropriate conditions, Waikato District Council will still be able to ensure that the effects of permitted earthworks are appropriately managed.

Point Number

691.9

Summary of Decision Requested:

Add to the Planning Maps an 'Aggregate Extraction Areas' overlay to be applied across the entirety of the McPherson quarry site including the following legal titles (see the maps attached to the submission):

- CT NA2D/412 (comprising Allot 22 PSH of Mangatawhiri, Allot 139 and 140 PSH of Mangatawhiri and Allot 161 and 163 PSH of Mangatawhiri).
- CT NA2D/497 (comprising Allot 162 PSH of Mangatawhiri).
- CT NA2D/961 (comprising Allot 164 PSH of Mangatawhiri)

AND

Add to the Planning Maps an 'Aggregate Extraction Areas' overlay to be applied across the immediate neighbouring property of the McPherson quarry site, which have been earmarked for future expansions (as per resource consent application LUC023/19) being (see the maps attached to the submission):

- CT NA577/25 (comprising Allotment 23 Settlement of Pokeno, Allotment 24 Settlement of Pokeno, Allotment 130 Settlement of Pokeno, Allotment 132 Settlement of Pokeno, Allotment 133 Settlement of Pokeno).
- CT NA423/102 (comprising of Allotment 159 Parish of Mangatawhiri, Allotment 160 Parish of Mangatawhiri).

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The proposed amendment is for the Proposed District Plan to include the 'Aggregate Extraction Areas' overlay across the entirety of the McPherson Quarry titles, as well as parts of the immediate neighborhood property to the south and west (which has already been earmarked for future expansion of the quarry), refer to Appendix B for details.
- Applying these overlays consistently across the district (particularly for all existing quarries, such as the McPherson Quarry, which forms part of the existing environment and has been operating in this location for over half a century) is appropriate and reasonable, based on the historical use of this site as a mine, the proposed expansion over the next 45 years (per LUCO23/19) and the long term availability to mine aggregate in this particular location, which will benefit the whole district.
- The McPherson Quarry forms an important part of the mineral extraction industry, which is vital to the economic well-being of the district. By ensuring that appropriate planning provisions and overlays are applied across all legally existing quarries, Waikato District Council will ensure that this industry is safeguarded while still making sure that the effects of the same are managed and appropriately mitigated, remedied or offset.

Point Number

691.10

Summary of Decision Requested:

Retain Policy 5.3.3 Industrial and commercial activities, except for the amendments sought below;

AND

Add clause (c) to Policy 5.3.3 Industrial and commercial activities, as follows (or words to similar effect):

(c) Allowing for mineral and aggregate extraction activities insofar as they are existing in the Rural Zone.

This relief is sought in the event that any part of the submission from point 691.1 to 691.15 is not accepted by WDC;

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The change requested by the addition of (c) is to ensure that aggregate and mineral extraction activities are still specifically catered for in the Rural Zone, being the most appropriate zone for activities of this kind based on location of the resource and the types of effects created by such activities. This industry is of both regional and district-wide importance and protection of the same is consistent with the Regional Policy Statement (which safeguards mineral extraction to ensure that the region can continue to grow).
- The submitter supports the restriction of Industrial and Commercial activities in the Rural Zone.

Point Number

691.11

Summary of Decision Requested:

Retain Policy 5.3.7(a)(iii) Reverse sensitivity effects, as notified.

This relief is sought in the event that any part of the submission from point 691.1 to 691.15 is not accepted by WDC.

Decision Reasons:

- McPherson supports the specific protection of existing mineral extraction and processing in the Rural Zone, because insofar as these types of activities are located outside of a specific 'Aggregate Extraction Area', they are best performed in the rural environment.

Point Number

691.12

Summary of Decision Requested:

Retain Policy 5.3.9 – Non-rural activities, as notified.

This relief is sought in the event that any part of the submission from point 691.1 to 691.15 is not accepted by WDC.

Decision Reasons:

- McPherson supports the management of non-rural activities were to occur. As McPherson operates a quarry in a rural area, non-rural activities may cause reverse sensitivity effects, which could compromise their quarry operations.
- Persons carrying out other activities may complain due to the environmental effects created by typical quarry activities

Point Number

691.13

Summary of Decision Requested:

Amend Policy 5.3.13 (a) Waste management activities, as follows (or words to similar effect):

(a) Provide for the rehabilitation of existing quarry sites upon decommission, including land and clean fill activities, where there is an environmental gain.

This relief is sought in the event that any part of the submission from point 691.1 to 691.16 is not accepted by WDC.

AND

Any consequential amendments or additional relief to address the matters raised in the submission.

Decision Reasons:

- McPherson supports the provision for rehabilitation of existing quarry sites, insofar as any rehabilitation carries out upon decommission of such quarries. The McPhersons want to ensure that once extractive processes of the quarry are no longer viable and/or equitable, that the landscape is restored as much as possible.
- As it is, based on the make-up of the McPherson Quarry (being one coherent site), the site does not lend itself well to staged rehabilitation as the entirety of the site is likely to be used for the duration of the quarry being in operation. As such, it is proposed that the words 'upon decommission' is added for certainty as to when rehabilitation is required.

Point Number

691.14

Summary of Decision Requested:

Retain the intent of Policy 5.3.15 Noise and Vibration, except for the amendments sought below;

AND

Amend Policy 5.3.15 (a)(iii) Noise and vibration, as follows (or words to similar effect):

(a) Adverse effects of noise and vibration are minimised by:

...

(iii) Maintaining appropriate buffers between high noise environments and noise sensitive activities insofar as that is practicable;

This relief is sought in the event that any part of the submission from point 691.1 to 691.15 is not adopted by WDC.

AND

Any consequential amendments or additional relief to address the matters raised in the submission.

Decision Reasons:

- McPherson supports the principle and intent of this policy in relation to noise and vibration
- With quarrying and aggregate extraction, a large amount of noise and vibration is occasionally generated as the aggregate is extracted from the ground. As such, compliance with the policy as currently worded may prove challenging.
- To ensure that existing quarry sites such as the McPherson Quarry can continue its operations without additional requirements insofar as noise and vibration buffers are concerned.

Point Number

691.15

Summary of Decision Requested:

Amend Rule 22.1.3 RD1 (a) Restricted Discretionary Activities, as follows (or words to similar effect):

(a) Intensive farming and mineral or aggregate extractive industries that meet all of the following conditions:

(i) Land Use - Effects in Rule 22.2; [subject to proposed amendments]

(ii) Land Use - Building in Rule 22.3; [subject to proposed amendments]

(iii) ...

AND

Delete Rule 22.1.5 D8 Discretionary Activities.

This relief is sought in the event that any part of the submission from point 691.1 to 691.15 is not accepted by WDC.

AND

Any consequential amendments or additional relief to address the matters raised in the submission.

Decision Reasons:

- The Operative District Plan (Franklin Section) includes a chapter for aggregate extraction, which classifies aggregate extraction as either of Permitted, Controlled, Restricted Discretionary, and Discretionary, depending on the location of the activity (and the surrounding environment).
- The Proposed District Plan has dealt with this matter by applying overlays, one for 'Aggregate Extraction Areas' and one for 'Aggregate Resource Areas'. The application of these overlays will provide a certain level of protection for these types of activities (particularly if the changes proposed in these submissions regarding specific regulations for these areas are applied) however, the PDP has excluded the McPherson Quarry from both of these overlays. As a result, the Rural zoning of the McPherson Quarry leaves it without specific protection of its existing (or future) aggregate extraction activities.
- Rule 22.1.5 would unreasonably limit the ability of the McPhersons to expand their quarry footprint (which is a necessity when the available mineral/aggregate in a certain area has been exhausted) in that any expansion would require a resource consent as a Discretionary Activity. This means that Council has the ability to decline the application. This is unreasonable.
- The McPherson Quarry has operated from this site for over 60 years and the quarry is very much part of the existing environment.
- It is inherent in any quarry activity that in order to continue extracting the particular resource/mineral available (in this case aggregate), the footprint needs to expand over time.
- The extraction of minerals is a regionally significant activity that is protected by the RPS. In that sense, it is imperative that existing operations such as the McPherson Quarry are able to continue operating (and therefore, expand their footprint) as a quarry and that this ability is sufficiently protected by appropriate planning provisions in the Proposed District Plan.
- Based on the above, the McPhersons submit the proposed changes made to Rules 22.1.3 and 22.1.5 to ensure that extractive industries are identified as a Restricted Discretionary Activity in the Rural Zone.

Point Number

691.16

Summary of Decision Requested:

Delete the Significant Natural Areas from the Planning Maps for the following titles:

- CT NA2D/412 (comprising Allot 22 PSH of Mangatawhiri, Allot 139 and 140 PSH of Mangatawhiri, Allot 161 and 163 PSH of Mangatawhiri)
- CT NA2D/497 (comprising Allot 162 PSH)
- CT NA2D/961 (Allot 164 PSH)

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The submitter requests that the Significant Natural Area overlay be removed in its entirety insofar as it affects any land owned by the McPherson family.
- The land has been owned by the McPherson family for 140 years and have made good use of the available resource.
- The Significant Natural Area overlay placed over large parts of McPherson's property would severely limit the ability to expand the quarry footprint over time.
- This will have significant adverse effects on not only the McPhersons (as the owner and operator of the quarry) but also the mineral and aggregate industry, which relies on the ability of existing operators to continue extracting aggregate to support the anticipated district and regional growth.
- The Significant Natural Area overlay is inappropriate and unreasonable based on the fact that it directly impacts on the viability of their existing business.
- It goes against the sustainable management purpose of the Resource Management Act to impose an overlay which will prevent people from providing for their social and economic wellbeing which is what the proposed Significant Natural Overlay will do.

Point Number

691.17

Summary of Decision Requested:

Retain the Proposed District Plan subject to the decision sought in the submission

Decision Reasons:

- Submitter supports the overall direction of the Proposed District Plan
- The submitter has some concerns about some sections, particularly how these would impact on the ability to continue operating the McPherson Quarry in a way that is both sustainable and commercially viable

Point Number

691.18

Summary of Decision Requested:

Amend the Planning Maps to apply the overlay relating to "Aggregate Extraction Areas" to all existing quarry operations in the District to ensure consistency, including the McPherson Quarry.

Decision Reasons:

- Mineral and aggregate extraction activities are significant to the economy of the Waikato District and to the region.
- They need to be recognized and provided for; they need to be carefully managed regarding environmental effects; and as site-specific resource-extraction activities, they need to be buffered from those more sensitive land uses which could, if sited in their immediate

environs, unreasonably constrain ongoing extraction operations, even to the point of threatening their viability.

Point Number 691.19

Summary of Decision Requested: **Add** provisions dedicated to "mineral and aggregate extraction activities" to the Proposed District Plan, which include specific rules in respect of the minerals and aggregate extraction industry in the Waikato District so as to ensure that this industry is appropriately safeguarded and the Regional Policy Statement is adhered to.

OR

Amend the provisions of the Rural Zone so as to provide sufficient protection for mineral and aggregate extraction activities.

Decision Reasons:

- Mineral and aggregate extraction activities are significant to the economy of the Waikato District and to the region.
- They need to be recognized and provided for; they need to be carefully managed regarding environmental effects; and as site-specific resource-extraction activities, they need to be buffered from those more sensitive land uses which could, if sited in their immediate environs, unreasonably constrain ongoing extraction operations, even to the point of threatening their viability.

Point Number 691.20

Summary of Decision Requested: **Amend** Rule 22.3.7.2 P1 (a) Building setback sensitive land use as follows (or words to similar effect):

(a) Any building for a sensitive land use must be set back a minimum of:

..

(iv) 200m from an Aggregate Extraction Area, mineral or aggregate extraction activities containing a sand resource;

(v) 500m from an Aggregate Extraction Area, mineral or aggregate extraction activities containing a rock resource;

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- Mineral and aggregate extraction can result in effects which give rise to reverse sensitivities. This has the potential to threaten the commercial viability of existing and/or future extractive industries, which is of detriment to not only quarry operators but also to the whole district, which relies heavily on this industry for its GDP.
- By ensuring the appropriate setback rules apply not only to those quarries which are subject to the proposed overlays but also to others (including future quarries which would need to apply for a Plan change to have the same level of protection), it will provide sufficient safeguarding for the industry going forward.

Point Number 691.21

Summary of Decision Requested: **Add** a new rule Rule 22.2.1.4 Noise - Mineral and Aggregate Extraction as follows (or words to similar effect):

22.2.1.4 NOISE – MINERAL AND AGGREGATE EXTRACTION

Any noise created by mineral or aggregate extraction activities is permitted provided that if measured at the national boundary of any dwelling, which existed at [insert date of plan becoming operative], does not exceed:

a) 55dBA (L10) 7am to 7pm Monday to Friday;

b) 55dBA (L10) 7am to 6pm Saturday;

c) 50dBA (L10) 7pm to 10pm Monday to Friday;

d) 50dBA (L10) 7am to 6pm Sundays and Public Holidays

e) 45dBA (L10) and 70dBA (Lmax) at all other times including Public Holidays.

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The McPhersons oppose the removal of the provisions specifically related to aggregate extraction activities in the Operative District Plan, particularly when dealing with effects generally created by the aggregate industry.
- It is proposed that rules specific to mineral and aggregate extraction activities are added which specifically defines what effects are anticipated from these sorts of activities.
- The proposed rules intend to safeguard both the industry as well as the surrounding properties (insofar as reasonable and practicable). This is particularly important in relation to effects relating to noise, dust and vibration, as these are key elements of an activity of this kind.

Point Number 691.22

Summary of Decision Requested: **Add** a vibration and blasting rule associated with mineral and aggregate extraction activities, as follows (or words to similar effect):

VIBRATION AND BLASTING - MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

a) The measurement of blast noise (air blast) and ground vibration from blasting shall be carried out in accordance with best practice standards.

b) The noise created by the use of explosives measured at a notional boundary of 20 metres from occupied dwellings shall not exceed a peak overall sound pressure of 128 dB

c) Blasting shall be confined to two occasions per day except where necessary for safety reasons.

d) Where blasting is irregular and the occupiers of neighbouring sites could be alarmed, they shall be advised of pending blasts, at least one hour before any such blast.

e) When blasting, the limit of particle velocity (peak particle velocity) measured on any foundation of an adjacent occupied building not connected with the site, or suitable location adjacent to the building, shall not exceed 25mm/second for commercial buildings or 10mm/second for dwellings and buildings of similar design.

f) Every blast shall be recorded with particular attention to details of charge weight and delay practice. Monitoring using reliable and appropriate methods representative of all blasts, at varying distances and various sites of different sensitivity shall be carried out to ensure that clauses ii and vi above are complied with. Blast records and monitoring results shall be made available to the Council on request.

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The McPhersons oppose the removal of the provisions specifically related to aggregate extraction activities in the Operative District Plan, particularly when dealing with effects generally created by the aggregate industry.
- It is proposed that rules specific to mineral and aggregate extraction activities are added which specifically defines what effects are anticipated from these sorts of activities.
- The proposed rules intend to safeguard both the industry as well as the surrounding properties (insofar as reasonable and practicable). This is particularly important in relation to effects relating to noise, dust and vibration, as these are key elements of an activity of this kind.

Point Number 691.23

Summary of Decision Requested: **Add** an air emission rule for mineral and aggregate extraction activities as follows (or words to similar effect):

AIR EMISSIONS - MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

Subject to any resource consent which may have been obtained, dust or any other airborne contaminant shall not be discharged at a level that is likely to cause a nuisance or affect the amenity values of any property in the area.

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The McPhersons oppose the removal of the provisions specifically related to aggregate extraction activities in the Operative District Plan, particularly when dealing with effects generally created by the aggregate industry.
- It is proposed that rules specific to mineral and aggregate extraction activities are added which specifically defines what effects are anticipated from these sorts of activities.
- The proposed rules intend to safeguard both the industry as well as the surrounding properties (insofar as reasonable and practicable). This is particularly important in relation to effects relating to noise, dust and vibration, as these are key elements of an activity of this kind.

Point Number 691.24

Summary of Decision Requested: **Add** an allotment boundary rule for mineral and aggregate extraction activities as follows (or words to similar effect):

ALLOTMENT BOUNDARY - MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

Subdivision is a restricted discretionary activity if the boundary of every allotment is drawn so that it is within:

(a) 200m of the boundary of a lawfully established mineral and aggregate extraction activity used for sand extraction; and

(b) 500m of the boundary of a lawfully established mineral and aggregate extraction activity used for rock extraction

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- McPherson owns and operates the McPherson Quarry outside of Pokeno. In order to safeguard this operation, it is imperative that appropriate provisions relating to subdivisions in the rural zone are implemented into the Proposed District Plan.
- The proposed rule will limit the risk of creating reverse sensitivity effects by ensuring that the McPhersons are considered an affected party in situations where properties adjacent to their existing quarries are subject to a subdivision application

Submitter Number: 692 **Submitter:** WEL Networks Limited

Point Number 692.1

Summary of Decision Requested: **Retain** the definition of "Temporary Infrastructure" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it includes the installation of poles and other equipment and generators, necessary for maintenance and emergency works.

Point Number 692.2

Summary of Decision Requested: **Retain** the definition of "Utility Allotment" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it includes an allotment used exclusively for the purposes of accommodating infrastructure.

Point Number 692.3

Summary of Decision Requested: **Retain** Rule 14.2.1 PI Permitted Activities relating to new infrastructure.

Decision Reasons:

- PI would ensure that network utility equipment such as pillar boxes, service pillars and ring main units (which are small but essential and a common part of WEL's electricity) network are permitted.

Point Number 692.4

Summary of Decision Requested: **Add** a new activity to Rule 14.2.1 Permitted Activities, that applies to the design and location of infrastructure services, as follows (or other amendments to give effect to the concerns raised):

P5 Design and location of infrastructure services

14.2.1.5 Within all Zones new subdivision and development shall provide utilities corridors in the road reserve free of tree plantings and in accordance with Tables 14.12.5.14 and 14.12.5.15.

AND

Add a new activity to Rule 14.2.3 Discretionary Activities, that applies where the activity cannot comply with the new P5 as follows (or other amendments to give effect to the concerns raised):

Decision Reasons:

- Allowing adequate berm space is necessary to ensure sufficient space is available for WEL to install its network utility equipment. Ensuring adequate berm space will ensure greater urban planning and provide sufficient areas for footpaths and landscaping along the road exclusive of each other, which will enhance the amenity of any subdivision or development.

Point Number 692.5

Summary of Decision Requested: Retain Rule 14.3.1 P1 Permitted Activities relating to the operation, maintenance, repair and removal of existing infrastructure.

Decision Reasons:

- Support this rule as it would ensure existing use rights on any existing lawfully established activity

Point Number 692.6

Summary of Decision Requested: Amend Rule 14.3.1.1 P2 Permitted Activities, relating to P2 Minor upgrading of existing infrastructure as follows (or other amendments to give effect to the concerns raised):

14.3.1.1

(1) The realignment, configuration, relocation or replacement of infrastructure and associated structures that meet all of the following conditions:

- (a) Are within ~~5~~10m of the existing alignment or location;
- (b) Do not increase the height of any existing pole or support structure by more than ~~15~~25%;
- (c) Do not increase the diameter (width) of any existing pole or support structure by more than 15%;
- ~~(d) Do not increase the diameter of any existing above-ground pipe by more than 15%; and~~
- (e) Do not increase the area of any existing above-ground structure by ~~by more than 15%~~ up to 10m².

...

Decision Reasons:

- To enable continuation of small scale day to day activities
- A significant amount of relocations will be more than 5m outside the existing alignment or location particularly in residential locations where space is limited
- A 25% increase in pole height will enable WEL to install poles with increased heights to address clearance issues where a mid span pole is not appropriate such as over roads
- 1d should be deleted – WEL and other utilities may occasionally run cables up poles where underground infrastructure meets overhead. Any increase in capacity triggered by development may require increased cables sizes where the difference is 25mm versus 100mm respectively, which is greater than a 15% increase.
- 1e should be amended to refer to the permitted new infrastructure activity volume rule.

Point Number 692.7

Summary of Decision Requested: Retain Rule 14.3.1 P3 Permitted Activities relating to Temporary Infrastructure.

Decision Reasons:

- Support this rule as it would provide for temporary activities provided they do not exceed 12 months

Point Number 692.8

Summary of Decision Requested: Retain Rule 14.3.1 P4 Permitted Activities, relating to earthworks associated with infrastructure.

Decision Reasons:

- Support the rule as it would provide for earthworks ancillary to WEL's day to day activities as a permitted activity

Point Number 692.9

Summary of Decision Requested: Add a new clause (1) to Rule 14.3.1.4 Permitted Activities, relating to P5 Trimming, maintenance or removal of vegetation or trees associated with Infrastructure as follows (or other amendments to give effect to the concerns raised):

14.3.1.4

(1) Trimming and pruning of trees and vegetation necessary to protect all overhead electric lines or telecommunication lines; or

~~(2) Any trimming, maintenance...~~

Decision Reasons:

- To ensure that it is clear that WEL has the ability to trim and prune trees where they pose a risk or are currently affecting the electricity network.
- Trees if not maintained near electricity lines may strike the lines causing faults or more seriously snap the line posing a risk to the general public.

Point Number 692.10

Summary of Decision Requested: Retain Rule 14.3.1 P6 Permitted Activities, relating to pipe and cable bridges.

Decision Reasons:

- Supports this rule as it would provide for the installation of electricity cables to bridge structures as a permitted activity

Point Number 692.11

Summary of Decision Requested: **Amend Rule 14.3.1.6** Permitted Activities relating to P7 Electric vehicle chargers as follows (or other amendments to give effect to the concerns raised):

14.3.1.6

(1) Electric vehicle chargers that meet all of the following conditions:

(a) Do not exceed maximum height of ~~4.8~~ 4m each;

(b) Do not exceed a maximum area of 1.5m² each;

~~(c) Have a socket connection, or a fitted cable management accessory;~~

~~(d) Have at least one formed car park (in accordance with the relevant requirements of Table 14.12.5.1.1) per connection or charging cable if the site is located outside the road;~~

(e) Are not located in an Identified Area.

Decision Reasons:

- This height of 4m would be consistent with the new infrastructure rules and will enable the installation of high powered chargers which are slightly larger than electric vehicle chargers and bus chargers which are almost double the height of vehicle chargers
- It should be noted that the height of a standard electric vehicle charger is 2.5m
- WEL are unsure why Council would want to apply point (c) – this rule would limit technologies such as inductive charging
- Remove (d) – as a carpark is not always appropriate, particularly if the charger is located on private property.

Point Number 692.12

Summary of Decision Requested: **Retain Rule 14.3.1 P8** Permitted Activities, relating to service connections.

Decision Reasons:

- Supports this rules as it would ensure service connections are a permitted activity.

Point Number 692.13

Summary of Decision Requested: **Retain Rule 14.3.1 P9** Permitted Activities, relating to minor infrastructure services.

Decision Reasons:

- Supports this rule as it would ensure that network utility equipment such as pillar boxes, service pillars and ring main units (which are small but essential and a common part of WEL's electricity network) are permitted

Point Number 692.14

Summary of Decision Requested: **Retain Rule 14.3.1 P11** Permitted Activities, relating to signage.

Decision Reasons:

- Support this rule as it would ensure that signage associated with infrastructure required for health and safety or asset identification purposes and/or required by legislation would be a permitted activity

Point Number 692.15

Summary of Decision Requested: **Retain Rule 14.3.1 P12** Permitted Activities, relating to service connections for subdivision.

Decision Reasons:

- Support this rule as it would ensure that service connections for subdivision would be a permitted activity.

Point Number 692.16

Summary of Decision Requested: **Retain Rule 14.3.2 C1** Controlled Activities, relating to subdivision to create a utility allotment for accommodating infrastructure.

Decision Reasons:

- Support this rule as it would provide for subdivision to create a utility allotment for accommodating infrastructure would be a controlled activity.

Point Number 692.17

Summary of Decision Requested: **Retain Rule 14.5.1 P1** Permitted Activities, relating to below ground distribution lines.

Decision Reasons:

- Support P1 as it would ensure that below ground distribution lines would be a permitted activity.

Point Number 692.18

Summary of Decision Requested: **Delete** Activity specific condition 14.6.1.1 (a)(b) – Permitted Activities relating to P1 Small scale electricity generation (or other amendments to give effect to the concerns raised).

~~(b) is not located on a road, or unformed road.~~

Decision Reasons:

- WEL is unsure why Council is proposing to restrict Community-scale electricity generation within road reserve and unformed roads. The CAR process would ensure that any safety effects of the proposal are considered.

Point Number 692.19

Summary of Decision Requested: Delete Rule 14.6.1.1 (a)(b) and (a)(c) Permitted Activities, relating to P2 Community scale electricity generation (or other amendments to give effect to the concerns raised) as follows:

14.6.1.1

...

(a) is not located within an Identified Area;

~~(b) is not located on a road, or unformed road;~~

~~(c) Less than 20kW of electricity is generated;~~

Decision Reasons:

- The conditions require energy generation to not exceed 20kW which is acceptable for small-scale generation but impractical and unreasonable and would likely discourage this type of generation.
- 5 to 10 kW would likely supply a normal-sized dwelling, therefore 20 kW would likely supply two dwellings.
- The other conditions imposed would restrict the size of any structures installed.
- WEL is unsure why community scale electricity generation within a road reserve or unformed road would be restricted. The CAR process would ensure any safety effects of the proposal are considered.

Point Number 692.20

Summary of Decision Requested: Amend Activity specific condition 14.6.1.2 P3 relating to Research and exploratory-scale investigation for renewable electricity generation activities (or other amendments that give effect to the concerns raised) as follows:

(a) Research and exploratory-scale investigations for renewable electricity generation activities that comply with all of the following:

(i) The noise limits that are applicable to the zone, except within the Rural Zone where the height of any equipment must not exceed of 20m;

(ii) The height of any equipment must not exceed the building height limit of the zone in which they are located by more than 3m;

(iii) The size and location of any equipment must not exceed height in relation to boundary relevant to the zone in which it is located; and

(iv) Setbacks relevant to the zone in which it is located;

(v) Is not located within an identified area

~~(vi) Is not located on a road, or unformed road.~~

Decision Reasons:

- WEL is unsure why Council is proposing to restrict research and exploratory-scale investigations for renewable electricity generation activities within road reserve and unformed roads. The CAR process would ensure that any safety effects of the proposal are considered, so (vi) should be deleted.
- All structures not exceeding 20m within the Rural Zone would be in line with the permitted height of poles and masts in that zone.

Point Number 692.21

Summary of Decision Requested: Retain Rule 14.6.1 P4– Permitted Activities relating to temporary diesel-fuelled electricity generation activities.

Decision Reasons:

- Supports this rule as it would provide for temporary diesel-fuelled electricity generation activities as a permitted activity.

Point Number 692.22

Summary of Decision Requested: Retain Rule 14.10.1 P1 Permitted Activities, relating to ancillary equipment.

Decision Reasons:

- P1 would provide for equipment ancillary to telecommunication facilities as a permitted activity.

Point Number 692.23

Summary of Decision Requested: Retain Objective 6.1.1 Development, operation and maintenance of infrastructure.

Decision Reasons:

- Objective 6.1.1 acknowledges the importance of infrastructure.

Point Number 692.24

Summary of Decision Requested: Retain Policy 6.1.2 Development, operation and maintenance.

Decision Reasons:

- Policy 6.1.2 acknowledges the importance of infrastructure.

Point Number 692.25

Summary of Decision Requested: Retain Policy 6.1.3 Technological advances.

Decision Reasons:

- Supports Policy 6.1.3 as it promotes energy-efficient and sustainable design technologies which is in line with WEL's policies.
- Policy 6.1.3 is consistent with 7(ba), 7(i) and 7(j) of the RMA.

Point Number 692.26

Summary of Decision Requested: Retain Policy 6.1.4 Infrastructure benefits.

Decision Reasons:

- Policy 6.1.4 acknowledges the importance of infrastructure.

Point Number 692.27

Summary of Decision Requested: Retain Policy 6.1.5 Natural hazards and climate change.

Decision Reasons:

- Policy 6.1.5 acknowledges the importance of infrastructure.

Point Number 692.28

Summary of Decision Requested: Retain Objective 6.1.6 Reverse sensitivity.

Decision Reasons:

- Objective 6.1.6 ensures that development is managed around infrastructure to avoid potential reverse sensitivity effects.

Point Number 692.29

Summary of Decision Requested: Retain Policy 6.1.7 Reverse sensitivity and infrastructure.

Decision Reasons:

- Policy 6.1.7 ensures that development is managed around infrastructure to avoid potential reverse sensitivity effects.

Point Number 692.30

Summary of Decision Requested: Retain Objective 6.1.8 Infrastructure in community and identified areas.

Decision Reasons:

- Objective 6.1.8 enables development and maintenance of infrastructure provided development considers any potential effects on the surrounding environment.

Point Number 692.31

Summary of Decision Requested: Retain Policy 6.1.9 Environmental effects, community health, safety and amenity.

Decision Reasons:

- Policy 6.1.9 enables development and maintenance of infrastructure provided development considers any potential effects on the surrounding environment.

Point Number 692.32

Summary of Decision Requested: Amend Section 1.5.7.7 (a) Energy, as follows (or other amendments to give effect to the concerns raised):

(a) The district plan recognises the national and regional importance of existing energy resources and infrastructure, which include coalfields, coal mines, Huntly Power Station, gas, electricity transmission and distribution, and coal conveyance facilities, as well as renewable energy. The plan addresses the positive and adverse effects of energy infrastructure and development.

Decision Reasons:

- Electricity distribution infrastructure is included as regionally significant in the WRPS, therefore this amendment would be consistent with the WRPS.

Point Number 692.33

Summary of Decision Requested: Amend Policy 6.1.11 Undergrounding new infrastructure, as follows (or other amendments that give effect to the concerns raised):

*(a) Encourage new infrastructure to be placed underground unless:
 (i) The adverse effects on the environment are greater than placing the infrastructure above ground;
 (ii) A natural or physical feature or structure renders underground placement impractical or undesirable; or
 (iii) There are significant operational, functional, technical, cultural or economic reasons that require the infrastructure be above ground;
 (iv) within the Rural Zone.*

Decision Reasons:

- 6.1.11 encourages new infrastructure to be placed underground. It is noted that overhead infrastructure within the Rural Zone is a permitted activity therefore encouraging infrastructure to be placed underground in this zone is unreasonable and contrary to the relevant rural rule.

Point Number 692.34

Summary of Decision Requested: Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development.

Decision Reasons:

- This ensures that provision for infrastructure such as electricity and telecommunications is provided for as part of the subdivision process

Point Number 692.35

Summary of Decision Requested: Retain Policy 6.4.2 Provide adequate infrastructure.

Decision Reasons:

- This ensures that provision for infrastructure such as electricity and telecommunications is provided for as part of the subdivision process

Point Number 692.36

Summary of Decision Requested: **Retain** Policy 6.4.3 Infrastructure Location and Services.

Decision Reasons:

- This ensures that provision for infrastructure such as electricity and telecommunications is provided for as part of the subdivision process

Point Number 692.37

Summary of Decision Requested: **Retain** Policy 6.5.2 Construction and operation of the land transport network.

Decision Reasons:

- It provides for network utilities to be accommodated within transport corridors.

Point Number 692.38

Summary of Decision Requested: **Amend** Policy 6.5.6 Network utility location, as follows (or other amendments to give effect to the concerns raised):

Encourage the location of network utility infrastructure within transport corridors ~~where provided any adverse effect on the function, safety and efficiency of the transport network will not be compromised~~ is avoided, remedied, or mitigated.

Decision Reasons:

- The policy as worded is open to interpretation, which may result in excessive restrictions on infrastructure providers.

Point Number 692.39

Summary of Decision Requested: **Retain** Objective 10.1.1 Effects of Hazardous substances.

Decision Reasons:

- The provision sets a clear direction for hazardous facilities.

Point Number 692.40

Summary of Decision Requested: **Retain** Objective 10.2.1 Contaminated Land.

Decision Reasons:

- The provision sets a clear direction for contaminated land in accordance with the NES.

Point Number 692.41

Summary of Decision Requested: **Retain** the definition of "Building" in Chapter 13 Definitions.

Decision Reasons:

- Supports the definition as it refers to the definition under the Building Act.

Point Number 692.42

Summary of Decision Requested: **Retain** the definition of "Infrastructure" in Chapter 13 Definitions.

Decision Reasons:

- Supports the definition as it would include network utility activities.

Point Number 692.43

Summary of Decision Requested: **Retain** the definition of "Minor Infrastructure Structure" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it would include activities that WEL would undertake regularly (i.e. on a daily basis)

Point Number 692.44

Summary of Decision Requested: **Retain** the definition of "Minor upgrading of existing infrastructure" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it would include activities that WEL would undertake regularly (i.e. on a daily basis)

Point Number 692.45

Summary of Decision Requested: **Retain** the definition of "Network Utility Operator" in Chapter 13 Definitions.

Decision Reasons:

- Supports the definition as it has the same meaning as the RMA, which would include WEL.

Point Number 692.46

Summary of Decision Requested: **Retain** the definition of "Renewable Electricity Generation Activities" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it includes small and community-scale distributed renewable generation activities and the system of electricity conveyance required to convey electricity to the distribution network

Point Number 692.47

Summary of Decision Requested: **Retain** the definition of "Self Contained Power Unit" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it includes battery units which are essential in the storage of electricity

Point Number 692.48

Summary of Decision Requested: **Retain** the definition of "Service Connection" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it includes the service line that would connect WEL to the customer

Point Number 692.49

Summary of Decision Requested: **Retain** the definition of "Small-Scale Electricity Generation" in Chapter 13: Definitions.

Decision Reasons:

- Supports the definition as it includes small renewable generation activities and connecting to the network

Point Number 692.50

Summary of Decision Requested: **Retain** Policy 6.1.10 Infrastructure in identified areas.

Decision Reasons:

- Policy 6.1.10 enables development and maintenance of infrastructure provided development considers any potential effects on the surrounding environment.

Point Number 692.51

Summary of Decision Requested: **Retain** Policy 6.1.12 Co-location of compatible facilities.

Decision Reasons:

- Policy 6.1.12 supports the co-location of infrastructure which would limit the footprint in which infrastructure occupies.

Point Number 692.52

Summary of Decision Requested: **Retain** Policy 6.1.13 Future growth areas.

Decision Reasons:

- Policy 6.1.13 enables development and maintenance of infrastructure provided development considers any potential effects on the surrounding environment.

Point Number 692.53

Summary of Decision Requested: **Retain** Policy 6.1.14 Electromagnetic and radio frequency fields.

Decision Reasons:

- Policy 6.1.14 enables development and maintenance of infrastructure provided development considers any potential effects on the surrounding environment.

Point Number 692.54

Summary of Decision Requested: **Retain** Objective 6.3.1 Renewable energy.

Decision Reasons:

- Recognises and encourages the use of renewable energy resources. Renewable energy generation is encouraged by the National Energy Strategy.
- This benefits the community as a whole through increasing security of supply as well as the subsequent economic benefits to the community and environment.
- The objective would encourage the community to invest in renewable energy development and is therefore consistent with section 7(b), 7(i) and 7(j) of the RMA and promotes sustainable management purpose in section 5 of the RMA.

Point Number 692.55

Summary of Decision Requested: **Retain** Policy 6.3.2 Utilising energy efficiency.

Decision Reasons:	<ul style="list-style-type: none"> Recognises and encourages the use of renewable energy resources. Renewable energy generation is encouraged by the National Energy Strategy. This benefits the community as a whole through increasing security of supply as well as the subsequent economic benefits to the community and environment. The policy would encourage the community to invest in renewable energy development and is therefore consistent with section 7(b), 7(i) and 7(j) of the RMA and promotes sustainable management purpose in section 5 of the RMA.
Point Number	692.56
Summary of Decision Requested:	Retain Policy 6.3.3 Enabling renewable electricity generation.
Decision Reasons:	<ul style="list-style-type: none"> Recognises and encourages the use of renewable energy resources. Renewable energy generation is encouraged by the National Energy Strategy. This benefits the community as a whole through increasing security of supply as well as the subsequent economic benefits to the community and environment. This policy would encourage the community to invest in renewable energy development and is therefore consistent with section 7(b), 7(i) and 7(j) of the RMA and promotes sustainable management purpose in section 5 of the RMA.
Point Number	692.57
Summary of Decision Requested:	Retain Policy 6.3.4 Future renewable electricity.
Decision Reasons:	<ul style="list-style-type: none"> Recognises and encourages the use of renewable energy resources. Renewable energy generation is encouraged by the National Energy Strategy. This benefits the community as a whole through increasing security of supply as well as the subsequent economic benefits to the community and environment. This policy would encourage the community to invest in renewable energy development and is therefore consistent with section 7(b), 7(i) and 7(j) of the RMA and promotes sustainable management purpose in section 5 of the RMA.
Point Number	692.58
Summary of Decision Requested:	Retain Policy 6.3.5 Existing renewable electricity facilities.
Decision Reasons:	<ul style="list-style-type: none"> Recognises and encourages the use of renewable energy resources. Renewable energy generation is encouraged by the National Energy Strategy. This benefits the community as a whole through increasing security of supply as well as the subsequent economic benefits to the community and environment. This policy would encourage the community to invest in renewable energy development and is therefore consistent with section 7(b), 7(i) and 7(j) of the RMA and promotes sustainable management purpose in section 5 of the RMA.
Point Number	692.59
Summary of Decision Requested:	Retain Policy 10.1.2 Location of new hazardous facilities.
Decision Reasons:	<ul style="list-style-type: none"> Sets a clear direction for hazardous facilities.
Point Number	692.60
Summary of Decision Requested:	Retain Policy 10.1.3 Residual risks of hazardous substances.
Decision Reasons:	<ul style="list-style-type: none"> Sets a clear direction for hazardous facilities.
Point Number	692.61
Summary of Decision Requested:	Retain Policy 10.1.4 Reverse sensitivity effects.
Decision Reasons:	<ul style="list-style-type: none"> Sets a clear direction for hazardous facilities.
Point Number	692.62
Summary of Decision Requested:	Retain Policy 10.2.2 Managing the use of contaminated land.
Decision Reasons:	<ul style="list-style-type: none"> Sets a clear direction for contaminated land in accordance with the NES.
Point Number	692.63
Summary of Decision Requested:	Retain Rule 14.2.1 P2 Permitted Activities, relating to construction noise.
Decision Reasons:	<ul style="list-style-type: none"> P2 would ensure that works comply with NZS 6803:1999 Acoustics – Construction noise, which WVEL acknowledges is a recognised standard for construction noise.
Point Number	692.64
Summary of Decision Requested:	Retain Rule 14.2.1 P3 Permitted Activities, relating to any activity emitting electric and magnetic fields.
Decision Reasons:	

- P3 would ensure that any activity emitting electric magnetic fields would comply with International Commission on Non-ionising Radiation Protection Guidelines which VVEL acknowledges is a recognised standard for electric and magnetic fields.

Point Number 692.65

Summary of Decision Requested: **Retain** Rule 14.2.1 P4 Permitted Activities, relating to any activity emitting radio frequency fields.

Decision Reasons:

- P4 would ensure that any activity emitting radio frequency fields would comply with New Zealand Standard for Radiofrequency Fields Part 1: Maximum Exposure Levels 3 kHz to 300GHz (NZS 2772.1:1999) which WEL acknowledges is a recognised standard for radio frequency fields.

Point Number 692.66

Summary of Decision Requested: **Retain** Rule 14.5.1 P2 Permitted Activities, relating to overhead distribution lines in the Rural Zone.

Decision Reasons:

- Supports P2 as it would ensure that overhead distribution lines and support structures within the Rural Zone would be a permitted activity.

Point Number 692.67

Summary of Decision Requested: **Retain** 14.5.1 P3 Permitted Activities, relating to overhead distribution lines within road or unformed road in the Rural Zone.

Decision Reasons:

- Supports P3 as it would ensure that overhead distribution lines and support structures within road or unformed road located adjacent to the Rural Zone would be a permitted activity.

Point Number 692.68

Summary of Decision Requested: **Retain** Rule 14.5.1 P4 Permitted Activities, relating to substations and associated transformers and switching stations.

Decision Reasons:

- Supports P4 as it would ensure that substations, associated transformers, and switching stations within the Business Zone, Business Town Centre Zone, Tamahere Business Zone, Te Kowhai Airpark Zone, Industrial Zone, Heavy Industrial Zone and Motor Sport and Recreation would be a permitted activity.

Point Number 692.69

Summary of Decision Requested: **Retain** Rule 14.5.1 P5 Permitted Activities, relating to construction or alteration of a building for a sensitive land use.

Decision Reasons:

- Supports P5 as it would ensure that construction or alteration of a building for a sensitive land use to have a setback minimum of 10m from the center of line of any electrical distribution or transmission lines.

Point Number 692.70

Summary of Decision Requested: **Retain** Rule 14.10.1 P2 Permitted Activities, relating to below ground telecommunications and radio communications facilities lines, cables and ducts.

Decision Reasons:

- Supports P2 as it would provide for below ground telecommunications and radio-communications facilities, lines, cables and ducts as a permitted activity.

Point Number 692.71

Summary of Decision Requested: **Retain** Rule 14.10.1 P3 Permitted Activities relating to cabinets.

Decision Reasons:

- Supports P3 as it would provide for cabinets as a permitted activity.

Point Number 692.72

Summary of Decision Requested: **Retain** Rule 14.10.1 P4 Permitted Activities relating to antennas and lines attached to retaining walls, tunnels, bridges and other structures located within the road.

Decision Reasons:

- Supports P4 as it would provide for antennas and lines attached to retaining walls, tunnels, bridges and other structures located within the road as a permitted activity.

Point Number 692.73

Summary of Decision Requested: **Retain** Rule 14.10.1 P5 Permitted Activities relating to antennas.

Decision Reasons:

- Supports P5 as it would provide for antennas attached to a building and/or structure as a permitted activity.

Point Number	692.74
Summary of Decision Requested:	Retain Rule 14.10.1 P6 Permitted Activities relating to antennas.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P6 as it would provide for antennas inside new or existing buildings as a permitted activity.
Point Number	692.75
Summary of Decision Requested:	Retain Rule 14.10.1 P8 Permitted Activities relating to small cell units.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P8 as it would provide for small cell units exceeding the permitted volumetric dimension of 0.1 m² regulated in the NESTF as permitted activity.
Point Number	692.76
Summary of Decision Requested:	Retain Rule 14.10.1 P9 Permitted Activities relating to poles, antennas and head frames.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P9 as it would provide for Poles, antennas and head-frames as a permitted activity.
Point Number	692.77
Summary of Decision Requested:	Retain Rule 14.10.1 P10 Permitted Activities relating to externally mounted satellite dishes and ancillary components.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P10 as it would provide for externally-mounted telecommunication satellite dishes and ancillary components as a permitted activity.
Point Number	692.78
Summary of Decision Requested:	Retain Rule 14.10.1 P13 Permitted Activities relating to self-contained power units.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P13 as it would provide for self-contained power units as a permitted activity.
Point Number	692.79
Summary of Decision Requested:	Retain Rule 14.10.1 P14- Permitted Activities relating to aerial telecommunication lines and associated structures.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P14 as it would provide for aerial telecommunication lines and associated support structures, including those not complying with regulations 41-42 of the NESTF as a permitted activity.
Point Number	692.80
Summary of Decision Requested:	Retain Rule 14.10.1 P15 Permitted Activities relating to lightning rods.
Decision Reasons:	<ul style="list-style-type: none"> • Supports P15 as it would provide for lightning rods as a permitted activity.

Submitter Number:	693	Submitter:	Alstra (2012) Limited
Point Number	693.1		
Summary of Decision Requested:	Retain Objective 4.1.1 - Strategic as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the Waikato District Council's vision for liveable communities within the Waikato district that are sustainable coordinated and efficient while protecting existing intensive farming operations from growth that could negatively impact these operations. 		
Point Number	693.2		
Summary of Decision Requested:	Retain Objective 5.1.1 The Rural Environment as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Supports the vision to ensure that subdivision, use and development within the rural environment are contained or restricted especially where (ii) and (iii) are concerned • While it is the intention of the Council to seek the zoning of the two Alstra properties on Great South and River Roads as Residential, from Rural, they are still rural activities that can be impacted by urban style by urban style subdivision • These activities are specifically located within the rural environment to counteract the perceived effect on the urban dweller, provided appropriate rules are put in place to provide reverse sensitivity protection for these ongoing operations. 		

Point Number	693.3
Summary of Decision Requested:	Retain Policy 4.1.15 Ngaruawahia as notified, particularly Policy 4.1.15(a)(ii).
Decision Reasons:	<ul style="list-style-type: none"> Alstra appreciates the Council's efforts to single them out for protection within this policy and believe that this provides a clear direction to potential developers of the new residential areas that these existing operations will be protected. Alstra appreciates that they are faced with a double-edged sword with this proposed approach to zoning in Ngaruawahia. Should this zoning be confirmed, Alstra will be able to realise the residential value of the property but are also faced with a potential increase in neighbours on small blocks creating reverse sensitivity effects. Alstra accepts this situation as inevitable given a growing Ngaruawahia and reiterate that with strong policy direction and implementation methods they can be adequately protection by this development, until such time as the intensive farms cease to exist.
Point Number	693.4
Summary of Decision Requested:	Retain Policy 5.3.6 – Intensive farming activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> While this policy is stated within the Rural Character and Amenity section of the PDP, it applies to Alstra and is supported. The support of well operated intensive farming activities as indicated in Policy 5.3.6, will ensure the economic growth of the district. Alstra alone provides employment for 45 people across their farms with the bulk of these being local Ngaruawahia community members
Point Number	693.5
Summary of Decision Requested:	Retain Policy 5.3.7 – Reverse sensitivity effects as notified.
Decision Reasons:	<ul style="list-style-type: none"> Alstra supports the WDC in terms of effects of reverse sensitivity. This is especially true in the sense that in a typical rural environment of the Waikato District, including around the periphery of urban areas where Alstra currently operates. Alstra considers it key that reverse sensitivity can be managed through implementation methods of Council and appropriate design of development taking into consideration these existing activities
Point Number	693.6
Summary of Decision Requested:	Retain Policy 5.3.15 – Noise and vibration as notified.
Decision Reasons:	<ul style="list-style-type: none"> With the understanding that noise is a common occurrence when it comes to intensive farming, Alstra supports the noise and vibration policy, particularly on the basis that existing activities should be protected from noise sensitive activities.
Point Number	693.7
Summary of Decision Requested:	<p>Retain Rule 16.3.9.2 Building setback - sensitive land use, except for the amendments sought below;</p> <p>AND</p> <p>Add to Rule 16.3.9.2 Building setback - sensitive land use a new clause (vi) as follows (or words to similar effect):</p> <p><i>(vi) 300m from the closest point of a building on another site associated with an intensive farming activity.</i></p> <p>AND</p> <p>Any consequential amendments or additional relief to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The addition provides an additional implementation method to protect the existing recognised intensive farming operations within Ngaruawahia. It would be expected that that should the proposal default to a discretionary activity, due to being within that 300m buffer, Alstra would be considered an affected party by council. As a lifelong Ngaruawahia resident, the submitter is encouraged by the residential growth of their town and does not seek to stifle this growth. There are legal methods Alstra can implement to both allow the continued operation of the intensive farms and allow appropriate development around these operations.
Point Number	693.8
Summary of Decision Requested:	<p>Retain Rule 16.2.1.1 Noise- General, except for the amendments sought below;</p> <p>AND</p> <p>Amend Rule 16.2.1.1 PI Noise – General as follows (or words to similar effect):</p> <p><i>Farming noise (including intensive farming), and noise generated by emergency generators and emergency sirens.</i></p> <p>AND</p> <p>Any consequential amendments or alternative relief to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> Supports the rule as it provides for current farming activities to occur, now including intensive farming. As intensive poultry farming practices general emit low amounts of noise, apart for in the summer months when the fans are needed more regularly to ensure adequate temperature for the birds, the operations that Alstra run are within the noise regulations that are required for a permitted activity.
Point Number	693.9
Summary of Decision Requested:	Retain Rule 16.4.7 RD1 (a) (iii) (A) Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas, except for the amendments sought below;

AND

Amend Rule 16.4.7 RD1 (a) Title boundaries - contaminated land, notable trees, intensive farming and aggregate extraction areas as follows (or words to similar effect):

Subdivision of land containing adjoining or adjacent to contaminated land, notable trees, intensive farming and Aggregate Extraction Area must comply with all of the following conditions...

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- Support is given in relation to the requirement for a 300m setback from any intensive farm within the Waikato District, however the wording of the proposed rule seems to indicate that the land being subdivided must contain the intensive farm.
- To provide for the subdivision of adjoining or adjacent land as well, providing reverse sensitivity protection for the existing Alstra sites.

Point Number

693.10

Summary of Decision Requested:

Add reverse sensitivity provisions protecting the existing intensive farming activities on the property at 38B River Road, Ngaruawahia (Property 1009876) from sensitive activities (which includes residential development);

AND

Retain the proposed Residential Zone as notified for the property at 38B River Road, Ngaruawahia (Property 1009876) if there are reverse sensitivity provisions protecting the existing intensive farming activities (including residential development);

OR

Amend the zoning of the property at 38B River Road, Ngaruawahia (Property 1009876) to Rural Zone if the amendments sought in the submission regarding reverse sensitivity are not accepted.

AND

Any consequential or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The intensive farming activities that are referred to in Policy 4.1.15 are owned and operated by Alstra Poultry
- This zoning has the potential to restrict these operations without the proposed amendments.

Point Number

693.11

Summary of Decision Requested:

Add reverse sensitivity provisions protecting the existing intensive farming activities on the property at 5463B Great South Road, Ngaruawahia (Property 1005128) from sensitive activities (which includes residential development);

AND

Retain the proposed Residential Zone for the property at 5463B Great South Road, Ngaruawahia (Property 1005128) if there are reverse sensitivity provisions protecting the existing intensive farming activities from sensitive activities (including residential development);

OR

Amend the zoning of the property at 5463B Great South Road, Ngaruawahia (Property 1005128) to Rural Zone if the amendments sought in the submission regarding reverse sensitivity are not accepted;

AND

Any consequential amendments or alternative relief to address the matters raised in the submission.

Decision Reasons:

- The intensive farming activities that are referred to in Policy 4.1.15 are owned and operated by Alstra Poultry
- This zoning has the potential to restrict these operations without the proposed amendments.

Point Number

693.12

Summary of Decision Requested:

Amend the zoning for the property at 138A Starr Road, Ngaruawahia (Property 1005065) from Rural Zone to Residential Zone;

OR

Amend the zoning for the property at 138A Starr Road, Ngaruawahia (Property 1005065) from Rural Zone to Country Living Zone.

Decision Reasons:

- Alstra is the owner of a 15ha block of land at the end of Starr Road that was originally purchased for a new intensive farming site. However with the growth of Ngaruawahia and its surrounds this location was no longer deemed to be a suitable location. Since that decision approximately 4 years ago, there has been a significant increase in residential development right up to Starr Road from Duke Street, confirming that this was the right decision.
- As a rural property, it has become relatively unproductive and is used as a maize block. Alstra believes this would be better suited as a Residential or Country Living Zone given the significant number of smaller titles around it and the potential for reverse sensitivity effects as development in the area increases.

Point Number

693.13

Summary of Decision Requested:

Retain the Proposed District Plan subject to the decisions sought in the submission.

Decision Reasons:

- Supports the overall content of the Proposed District Plan.

Point Number

693.14

Summary of Decision Requested:

Amend the Proposed District Plan to protect the two intensive farming properties within the Ngaruawahia Residential Zone from residential development until Alstra decides to cease operations.

Decision Reasons:

- The hatching, breeding and rearing of chickens on these sites are proposed to continue for the foreseeable future under contract with Inghams.

Submitter Number:	694	Submitter:	Brendhan Greaney
On behalf of:	Multi-Party Submission - See notes for full details		
Point Number	694.1		
Summary of Decision Requested:	Delete the indicative road of Redwood Grove, Tamahere, from the Proposed District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> The intention of the Redwood Grove indicative road was to provide access to the block of land on 264 Newell Road. This property has subsequently subdivided with access provided to each of its lots off Newell Road, making the original purpose of the Redwood Grove indicative road redundant. In the Proposed District Plan, the Redwood Grove indicative road had been extended to access the three 4ha lots (Newell Road 286A, 28613, 286C) currently legally accessed off Elmwood Lane, but now this is being achieved by another means. In the subsequent Notified Draft District Plan, the Redwood Grove indicative road was shortened to access only the block of land, Newell Road 286A. This still represents an extension of the Redwood Grove indicative road, from how it is included in the existing Operative Plan. The extension into the undeveloped lot has the effect of joining the lot, through the extended indicative road, to Redwood Grove, when it already and logically has access from Elmwood Lane. It seems that the indicative road extension into this property is financially motivated, to recover the Redwood Grove development deficit. The properties bordering the Redwood Grove indicative road were purchased with the knowledge of the indicative road as it is drawn on the current Operative Plan. The properties were purchased and further developed on the basis that the indicative road would be removed from the District Plan at the next review (commencing 2017) for at least the following reasons: <ul style="list-style-type: none"> Its purpose to provide access to 264 Newell Road has been achieved by another means, making it redundant. This is consistent with the notation of the Redwood Grove indicative road as "Intention Important, Location Unimportant" in the Operative District Plan. The undeveloped lot of 286A Newell Road, that the indicative road has been extended into, in the Notified Draft plan, is legally accessed off Elmwood Lane and so doesn't require access from Redwood Grove. There was never an intention for the Redwood Grove indicative road to be extended to access the undeveloped lot (or lots) legally accessed off Elmwood Lane. The proposed extension of the indicative road is therefore an extension of purpose after the original purpose has been achieved. As there are already 9 properties accessed off Elmwood Lane, it is already above the threshold in District Plan Rule 21 in Appendix A which requires that access to 8 or more properties is to be by public road. This is consistent with the notation of Elmwood Lane in the District Plan as "Indicative Road, Location Important", providing the property owners with the clear intent of Elmwood Lane as the logical continued access to Elmwood Lane properties The existing Elmwood Lane (location important designation) would continue to be used to access the 4ha lot(s) in preference to establishing a new road to access the same properties. Utilizing existing Elmwood Lane to access the three undeveloped 4ha lots in the event they are developed would have minimal impact on the existing residential properties accessed from Elmwood Lane. The Redwood Grove indicative road, as included in the current Operative Plan and extended in the Notified Draft District Plan, does not provide any additional access utility, or additional utility generally, to the connected lot (286A Newell Road) or the other two undeveloped lots if the indicative road is subsequently extended, beyond the existing or alternative access options from Elmwood Lane. Between release of the Proposed Draft Indicative Plan and the Notified Draft District Plan, there has been further exploration of the options for optimally accessing Newell Road lots 286A, 286B, 286C, currently accessed from Elmwood Lane, in the event they are developed. The most logical option remains as per the earlier submission on Proposed Plan Change 3 attached as Appendix One in Submission. Essentially, a widening of the beginning of Elmwood Lane, separating off the Elmwood Lane indicative road into lot 286A, and further extending through to lot 286C. Removing established trees along the Redwood Grove indicative road (200 plus 10 meter trees and 30 plus 30 meter trees, including Blackwood and Totara) would add substantial incremental cost over utilizing or further developing the already legally established access from Elmwood Lane. It would be recognized that removing the established trees to enable the Redwood Grove indicative road would be detrimental to environmental sustainability and visual impact. Establishment of the Redwood Grove indicative road would have a direct detrimental impact on the value of at least nine existing properties estimated to be well in excess of \$1,000,000. Developing the Redwood Grove indicative road would unnecessarily increase impervious land cover, creating a detrimental environmental outcome. Establishment of the Redwood Grove indicative road would create an inferior traffic outcome creating an additional intersection onto Redwood Grove itself, with very poor line of sight for turning traffic. The owners of the undeveloped lots currently accessed by Elmwood Lane support the use of Elmwood Lane for current and future developed access as the most logical and lowest cost option. Most importantly, that a logical and pragmatic decision to utilize an existing road would prevail. A subdivision concept plan for the development of the undeveloped lots accessed from Elmwood Lane has been prepared and supplied to Council that has relatively high utility, is visually logical, and also enables the Redwood Grove indicative road to be removed from the District Plan. Refer to Appendix One attached to Submission. The logic is that the developers of the undeveloped lots will not be financially disadvantaged versus Redwood Grove indicative road access, and the broader issues highlighted relating to the indicative road will be avoided. 		

Submitter Number:	695	Submitter:	Sharp Planning Solutions Ltd
Point Number	695.1		
Summary of Decision Requested:	Requests council to promote discussion with Kiwirail, the NZ Government, and the Regional Council and transport providers about future development of rail infrastructure and appropriately designated corridors in its region.		
Decision Reasons:	<ul style="list-style-type: none"> Rail compared to road is at a 23% time and distance disadvantage for the haulage of anything but low time important commodities. The disadvantage depletes the benefit of rail haulage. The outcome: greater longevity or roading assets and infrastructure, less rebuild costs and improved road safety and travel times, improved bulk freight transport efficiency/costs and export gains, as well as a more balanced level of transport provider investments. 		
Point Number	695.2		
Summary of Decision Requested:	Add Iwi areas of interest on Planning Maps, and list site-specific properties known known for existing mana whenua interests as occurs within the Auckland Unitary Plan, and the reasons for this (except where such information is not appropriate to publicly disclose).		
Decision Reasons:	<ul style="list-style-type: none"> This provides certainty for applicants and avoids requests for cultural reports. Cultural reports costs thousands of dollars and are frequently based on a high level of uncertainty. Not all reports provide substantive advice. This approach would assist to make matters certain - to respect mana whenua interests and to ensure applicants can be pre-informed those matters are directly relevant. This channel of pre-report information access is currently missing. If applicants were independently pre-informed why a cultural report may be needed, this would build goodwill. This approach would comply with the language of parts 5, 6 and 8 of the RMA. 		

Point Number 695.3

Summary of Decision Requested: Add those sites to which Sections 1.7.2.1(a), 1.7.3.1 and 1.7.3.5 are relevant as a planning overlay on the Planning Maps.

Decision Reasons:

- This would assist applicants for when a resource consent application is required to supply a statement of relevance to this document where it may potentially affect the rohe.
- Not all sites listed in the Waikato River Catchment would be relevant, as some are many kilometres from the river or key tributaries.

Point Number 695.4

Summary of Decision Requested: Add an online calculator for development contributions linked to the Planning Maps that provides a site-specific assessment.

Decision Reasons:

- These could be much more simplified and made easier to understand how much is applicable.

Point Number 695.5

Summary of Decision Requested: Requests applied development plans for each village and town to set out how localities should be developed which sets out how localities should be developed with visual plans.

Decision Reasons:

- In major development, it is expected that applicants will develop master plans.

Point Number 695.6

Summary of Decision Requested: Council to consider the needs of all likely road users when re-sealing road surfaces.

Decision Reasons:

- There are several examples where no consideration was given to all likely road users such as cyclists.
- It actively discourages cycling on local roads and incentivises proneness to sprains and injury, as well as being less safe for grip in all weather conditions. This detracts from active exercise opportunities.
- This practice undermines health outcomes.
- It is up to 33% harder to ride for the same amount of energy as a relatively smooth surface.
- Car and vehicle efficiency is decreased up to 15% due to a greater power to weight ratio. Vehicles are able to maintain momentum thus the energy loss is not as profound.
- The avoidance of flushing can be achieved by using a considerably smoother sealing surface.
- Very rough chip surfaces hold more water, drain less well and are less safe to use as the amount of grip per area of tire is lessened, leading to aqua-planned at speeds of 90km/h or more.
- The surface is more prone to pot-holing due to irregular pressures placed by vehicles and typically does not act as long.
- The only purpose achieved by the current rough chip seal is to save sealing costs, but at the immediate expense of all else.
- A safe environment for all road users that is created through thoughtful design enhances the presence of all users - this assists to slow traffic and on local roads and results in safer outcomes.

Point Number 695.7

Summary of Decision Requested: Add a hierarchy of non-motor vehicle routes for cycling, walking and horse riding.

Decision Reasons:

- An adequate width shoulder could be retained for cycling on identified key routes without compromising the road carriageway.
- There are several examples of roads that are key cycling link 'arterial' routes (see submission, Appendix 2).
- Providing links to other local roads and avoiding main routes are favoured by cyclists for safety reasons.
- Cycling is a very popular activity.
- There are more cyclists than rugby players nowadays.
- Runners, rowers, gymnasts, rugby, soccer and hockey players and swimmers use cycling to build fitness, as well as triathletes and racing cyclists.

Point Number 695.8

Summary of Decision Requested: Amend Development Contributions policies to be much more simplified and made easier to understand how much is applicable.

Decision Reasons:

- No reasons provided.

Point Number 695.9

Summary of Decision Requested: Amend Section 2.12.1(a)(vii) Whanaungatanga (relationship to nature) so that "other land" is objectively defined and care is exercised as to which land this policy applies to, without limiting the natural and legal right of Maori to express and recognise their relationship with the land.

Decision Reasons:

- This aspect is fully supported upon land owned or managed by Maori or in areas of high cultural importance such as the Waikato River margins.
- Some cultural symbols in public places can sometimes have underlying/implicit religion/belief values overtones.
- Caution needs to be exercised in terms of sensitivity to others with respect to this in the type of symbol being displayed.

Point Number 695.10

Summary of Decision Requested: Delete Policy 3.5.3(a)(iii) Protecting the natural character qualities of the coastal environment.

Decision Reasons:

- It is too open ended.
- It has no threshold required by s95 and 104 of the Resource Management Act to define a potential or actual effect or assisting to write certain resource conditions.
- It is unclear if the overlay only applies to part of a site or part of an area proposed to be developed.
- Policy 3.5.3(ii) is considered to cover this aspect and places the onus on the applicant to demonstrate evidence.

Point Number 695.11

Summary of Decision Requested: Delete Policy 3.5.4(a)(iii) Protecting the natural character of wetlands, and lakes and rivers and their margins.

Decision Reasons:

- Policy 3.5.4(a)(iii) is meaningless
- It is too open ended
- It has no threshold required by s95 and 104 of the Act to define a potential or actual effect or assisting to write certain resource conditions
- Development cannot consolidate with existing development unless it adjoins such land and connections have been provided for in that previous development.
- It is very unclear as to what extent does the "natural character and landscape values have already been compromised" mean to the user of the Plan.
- All development takes up land - "sprawling" is not defined as to what it means in terms of an identifiable threshold or ration of area and a reference to an objective definition or source may assist.

Point Number 695.12

Summary of Decision Requested: Amend Policy 3.5.4(a)(iv) Protecting the natural character of wetlands, and lakes and rivers and their margins to include a reference to a specific rule, or requirement of the Resource Management Act, is placed here to assist the reader.

Decision Reasons:

- Open ended subjective statements will only frustrate applicants as it provides no certainty what is actually to be complied with.

Point Number 695.13

Summary of Decision Requested: Add a new clause (iv) to Policy 4.2.5(a) Setback: Side boundaries as follows:
(iv) For property and building maintenance.

Decision Reasons:

- No reasons provided.

Point Number 695.14

Summary of Decision Requested: Delete Policy 4.2.5(b)(i) and (ii) Setback - Side boundaries.

Decision Reasons:

- It is too restrictive.
- There are other reasons for reduced side yard setback, such as the presence of infrastructure.

Point Number 695.15

Summary of Decision Requested: Amend Policy 4.2.7(b) Site Coverage and Permeable Surfaces to remove the words "lawns and gardens."

Decision Reasons:

- It is solely the right of a land owner to decide if they want lawns and gardens or not on their property and not be directed by Council Planners that they must have this.
- Council will not maintain the lawn and garden for owners.
- The key requirement of the permeable surface is that it is required to comply.

Point Number 695.16

Summary of Decision Requested: Amend Policy 4.2.10(a) Daylight and outlook as follows:
Maintain adequate daylight, and enable opportunities for passive solar gain ~~by providing for the progressive reduction in the heights of buildings.~~
AND
Consider adding a link to a rule or a source for context for Policy 4.2.10(a) Daylight and outlook.

Decision Reasons:

- The phrase has no context and is meaningless.
- The reduction of the height of buildings on a flat site could lead to less exposure to sunlight.
- There are other means of providing solar access.

Point Number 695.17

Summary of Decision Requested: Amend Policy 4.2.10(b) Daylight and outlook as follows:
Require the height, bulk and location of development to maintain sunlight access and privacy, and to minimise non-compliant visual dominance effects on adjoining sites where they are demonstrated to the satisfaction of council that they cannot be reasonably avoided due to constraints such as steep topography in relation to effects of works and costs.

Decision Reasons:

- Visual dominance can only occur through a non-compliance or an effect greater than a permitted activity equivalent comparison.

Point Number 695.18

Summary of Decision Requested: Amend Policy 4.2.10(c) Daylight and outlook as follows:
Maintain and enhance attractive open space character of residential areas by ensuring that development is compatible in scale to surrounding activities and structures and has ~~generous~~ compliant on-site landscaping, screening and street planting, as set out in design guide xyz as stated as being applicable to the proposal in that design guide.

Decision Reasons:

- The term "generous" is too open ended and has no context or reference.
- Council would have to develop a design guide to source will assist applicants with a specific requirements they are to achieve.

- Open-ended uncertainty frustrates applicants and leads to delays and costs from arguments with Council Planners as to what represents a satisfactory outcome.

Point Number 695.19

Summary of Decision Requested: **Add** references/links throughout the Proposed District Plan, as it is in Policy 4.2.12(a) Outdoor living court - Multi-unit development.

Decision Reasons:

- This referencing within Policy 4.2.12(a) is exactly the type of reference/link to objective information that is requested to occur elsewhere in the Proposed District Plan.

Point Number 695.20

Summary of Decision Requested: **Delete** Policy 4.2.15(a)(iv) Earthworks.

OR

Amend Policy 4.2.15(a)(iv) Earthworks to refer to "unauthorised clean-fill" instead of "clean-fill".

Decision Reasons:

- It is ultra-vires.
- It lacks any comprehension of building and development requirements.
- If it meant to refer to unauthorised clean-fill, it should state so.
- The statement is objected to it (in its present form).
- The stated prohibition on importation of all clean-fill would make almost all development impossible.
- Building sand, crushed stone, shells or bark for gardens can all be regarded as clean-fill if received from an authorised source.
- Some sites need earth brought in to address drainage or where building of the soil level is required for stability and building platform integrity.

Point Number 695.21

Summary of Decision Requested: **Delete** Policy 4.2.15(d) Earthworks.

OR

Amend Policy 4.2.15(d) Earthworks to refer to minimising earthworks to maintain the fundamental shape, contour and landscape characteristics where otherwise possible.

Decision Reasons:

- It is ultra-vires
- It lacks any comprehension of building and development requirements.
- Altering fundamental shape, contour and landscape cannot be avoided in some scenarios to achieve a suitable and safe building development outcome.
- If the intended outcome is to minimise earthworks then this is what the clause should state.

Point Number 695.22

Summary of Decision Requested: **Amend** Policy 4.2.15(e) Earthworks to identify which sites this applies to as a planning overlay on the Proposed District Plan maps.

OR

Amend Policy 4.2.15(e) Earthworks to provide a reference document source for applicants to refer to determine to what extent they need to comply.

Decision Reasons:

- This clause has no context as to how it is intended to be applied.
- Subjective open-ended statements frustrate applicants.

Point Number 695.23

Summary of Decision Requested: **Amend** Policy 4.2.18(a)(i) Multi-unit development to include reference to the document (Appendix 3.4 of the Proposed District Plan) at the start of this policy, rather than part way through or at the end of this section.

Decision Reasons:

- The reader will read the various open-ended requirements of (a) and wonder how that might be achieved.
- It is only later in clause (b) the reference document is stated.
- Dispersing key requirements of the District Plan in a prominent and consistent manner would better assist applicants.

Point Number 695.24

Summary of Decision Requested: **Retain** Policy 4.2.23(a)(i) Non-residential activities.

AND

Delete Policy 4.2.23(a)(iv) Non-residential activities.

OR

Add to Policy 4.2.23(a)(iv) Non-residential activities a list of the types of non-residential activities that can occur in residential areas, with restrictions on dominance.

Decision Reasons:

- The intent to avoid dominance in residential areas is fully supported.
- Policy 4.2.23(a)(iv) is not well considered.
- Non-residential activities on front sites would be more prominent on front sites if the intent is to restrict a dominant presence in the residential zone.
- The location of restriction on cul-de-sacs, and to strategic roads, is equally bizarre.
- This would see a disproportionate amount of these activities occur on residential through streets.

Point Number 695.25

Summary of Decision Requested: **Amend** Policy 4.2.26(a)(ii) Neighbourhood centres in structure plan areas to replace "provide" with "plan" and define the walkable catchment in

relationship to the catchment.

Decision Reasons:

- The statement is not well considered.
- It needs to be revised.
- The walkable catchment requirement would potentially restrict the size of neighbourhood centres and could create an inefficient dispersal of resources and infrastructure where more than one would be needed when on that is larger could do the task efficiently provided that it does not overly tax the roading system.
- The work "provide" implies that such centres must wait for development to occur around them and be retrofitted.

Point Number

695.26

Summary of Decision Requested:

Amend Policy 4.3.3(a) Future development - Tuakau and Te Kowhai by replacing with the following wording:

Enable infrastructure and service availability so that future subdivision and development in Tuakau and Te Kowhai provides for suitable building and access locations to be identified.

Decision Reasons:

- This statement is back to front and does not make sense.
- Buildings and access cannot be located to enable future development as development would be current when that occurs.

Point Number

695.27

Summary of Decision Requested:

Amend Policy 4.3.5(a) Building setbacks as follows:

Maintain existing and promote new vistas and views between new buildings in the Village Zone when viewed from a road.

Decision Reasons:

- The word "new" needs to be placed elsewhere in the phrase as the vista would already be existing (it cannot be new) whether it be from a building, a road, or any other place - before or after the building is built.

Point Number

695.28

Summary of Decision Requested:

Amend Policy 4.3.6(a) Front setback character to consider new/anticipated development.

Decision Reasons:

- Consider Pokeno Design Guide for the Pokeno Village.
- The statement is supported in principle.

Point Number

695.29

Summary of Decision Requested:

Amend Rule 4.3.7(a) Excessive building scale as follows:

Enable development shall only to exceed height, bulk and form only where it is in keeping with and does not detract from the amenity values of the street which are existing and (where a design guide is available) any development proposal balances the anticipated amenity values with those which are existing.

Decision Reasons:

- The relief sought provides for appropriate step-change of development.
- Incorrect tense used.
- It encourages non-compliance.

Point Number

695.30

Summary of Decision Requested:

Amend Policy 4.3.15(d) Earthworks as follows:

Subdivision and development occurs in a manner that maintains fundamental shape, contour and landscape characteristics. That earthworks shall be to the extent necessary to enable the development, and where practical shall try to maintain the shape, contour and landscape characteristic.

Decision Reasons:

- The objective is unachievable, as earthworks will often change the fundamental shape, contour and landscape, especially if large scale.
- It is ultra-vires.
- It lacks any comprehension of building and development requirements.
- Altering fundamental shape, contour and landscape cannot be avoided in some scenarios to achieve a suitable and safe building development outcome.
- If the intended outcome is to minimise earthworks then this is what the clause should state.

Point Number

695.31

Summary of Decision Requested:

No specific decision sought for Policy 4.3.15(e), however submission considers common clauses for all development should be under one section in the District Plan to avoid unnecessary repetition.

Decision Reasons:

- It is ultra-vires.
- It lacks any comprehension of building and development requirements.
- Altering fundamental shape, contour and landscape cannot be avoided in some scenarios to achieve a suitable and safe building development outcome.
- If the intended outcome is to minimise earthworks then this is what the clause should state.

Point Number

695.32

Summary of Decision Requested:

Amend Policy 4.4.6 Signage to include restrictions on the number of signs on a premises.

Decision Reasons:

- Many signs are superfluous to advise traffic of safety, speed or directions.
- This avoids signage clutter.

Point Number	695.33
Summary of Decision Requested:	Amend Policy 4.4.7 Managing the adverse effects of signs to include restrictions on the number of signs on a premises.
Decision Reasons:	<ul style="list-style-type: none"> • Many signs are superfluous to advise traffic of safety, speed or directions. • This avoids signage clutter.
Point Number	695.34
Summary of Decision Requested:	Amend Policy 4.5.2(a)(iii) Commercial function and purpose to provide for small convenience retail and community activities in all business zones.
Decision Reasons:	<ul style="list-style-type: none"> • It restricts small-scale convenience retail and community activity outside of Business Zone Tamahere and neighbourhood centres.
Point Number	695.35
Summary of Decision Requested:	Delete Policy 4.5.9(a) Employment opportunities: Business Town Centre Zone and Business Zone
Decision Reasons:	<ul style="list-style-type: none"> • The statement is superfluous as it states the obvious and does not require the applicant to undertake any specific action. • It clutters the Proposed District Plan with unnecessary statements.
Point Number	695.36
Summary of Decision Requested:	<p>Amend Policy 4.5.11 Residential upper floors: Business Town Centre Zone and Business Zone as follows:</p> <p>(a) <i>Maintain the commercial viability of the Business Town Centre Zone and Business Zone while:</i></p> <p>(i) <i>Providing for mixed use developments, ensuring residential activities are located above ground floor; and <u>as applicable</u></i></p> <p>(ii) <i>Removal of any existing Amend residential activity located at ground level, or <u>relocating the existing residential activity currently located at ground level to above ground level where a business or other type of land use is to be located at the ground level.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> • The policy does not account for existing residential activity.
Point Number	695.37
Summary of Decision Requested:	Delete Policy 4.5.14(a)(ii) Raglan Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> • This statement is not well considered and should be deleted. • In commercial areas with shops with footprints, it is impossible to not access a site by vehicle across a footpath where an access exists. • Clause (a)(i) addresses the sought requirement, by stating 'prioritising and providing for pedestrian movement and safety.' This is all that needs to be stated.
Point Number	695.38
Summary of Decision Requested:	Amend Policy 4.5.15(a)(iv)B Huntly Town Centre to include an exemption statement for a building that is of a historical character where a veranda was not part of the original design.
Decision Reasons:	<ul style="list-style-type: none"> • Supports policy in principle with amendments.
Point Number	695.39
Summary of Decision Requested:	Delete Policy 4.5.17(a)(iv)D Te Kauwhata Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> • The locality (and the Waikato in general) is known for a consistently damp climate. • Roofs with a reasonable pitch assist the watertight integrity of buildings.
Point Number	695.40
Summary of Decision Requested:	Delete Policy 4.5.33 Reverse sensitivity.
Decision Reasons:	<ul style="list-style-type: none"> • This clause repeats itself in intent with slightly different working as in Policy 4.5.31
Point Number	695.41
Summary of Decision Requested:	Amend the Proposed District Plan to delete unnecessary duplication of the term "reverse sensitivity".
Decision Reasons:	<ul style="list-style-type: none"> • The number of times the words "reverse sensitivity" appears when preparing resource consent applications and is repeatedly requested to be addressed in the Operative District Plan is annoying.
Point Number	695.42

Summary of Decision Requested:	Amend Policy 4.5.37 Managing the adverse effects of signs to list common requirements that apply across all zones in one section of the Proposed District Plan.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	695.43
Summary of Decision Requested:	Delete Policy 4.7.2(a)(vii) Subdivision location and design.
Decision Reasons:	<ul style="list-style-type: none"> It does not achieve good quality subdivision design. It directly promotes static predictable roads that promote inappropriately fast and unsafe driving in residential areas. A consistent grid layout is an obsolete form of subdivision design. A slight variation of short block lengths (not in excess of 200m) curved streets and where appropriate narrowed design of roading can assist safety through wider berms and visibility of public space. Fencing to front building lines instead of the front boundary assists this. Roads in a residential area are a place to exercise, for kids to play and to provide surveillance and interaction opportunity between neighbours. Roads are not just a place for cars.
Point Number	695.44
Summary of Decision Requested:	Amend Section 4.7 Urban Subdivision and development to be a separate section of the Proposed District Plan.
Decision Reasons:	<ul style="list-style-type: none"> Key information is placed in an ad-hoc manner.
Point Number	695.45
Summary of Decision Requested:	Amend Policy 4.7.3(a) Residential subdivision to be placed before Policy 4.7.2(a) Subdivision location and design.
Decision Reasons:	<ul style="list-style-type: none"> It will save the reader from frustration of seeing open-ended requirements then later finding out where to access the required information to do so. Doing so assists applicants to read the plan and access information in a logical efficient and consistent manner.
Point Number	695.46
Summary of Decision Requested:	Amend Policy 4.7.4 lot size to include shape, required setbacks, and slope, especially for Raglan and Pokeno.
Decision Reasons:	<ul style="list-style-type: none"> Minimum lot sizes are only one factor of good quality subdivision design. Account needs to be taken for shape, required setbacks and slope to provide a viable building platform. From the submitter's experience of subdivision, especially in and around Pokeno and Raglan, these factors need to be taken account of with rules designed to accommodate these considerations.
Point Number	695.47
Summary of Decision Requested:	Retain Policy 4.7.9(a) Connected neighbourhoods.
Decision Reasons:	<ul style="list-style-type: none"> The content is fully supported.
Point Number	695.48
Summary of Decision Requested:	Amend Policy 4.7.11(b) Reverse sensitivity as follows: <i>Avoid potential reverse sensitivity effects of locating new dwellings in the <u>buffer setback</u> vicinity of an <u>existing</u> (or <u>approved</u>), intensive farming, extraction industry or industrial activity <u>unless the written approval of the activity operator has been obtained</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> The clause needs to be re-phrased to be able to be practically applied. The above indicates that such activities should be shown on the Planning Maps as an overlay.
Point Number	695.49
Summary of Decision Requested:	Delete Policy 4.7.12(a) Boundary adjustments and relocations.
Decision Reasons:	<ul style="list-style-type: none"> This is a superfluous statement as it states the obvious and does not require the applicant to undertake any specific action. It clutters the Proposed District Plan with unnecessary statements.
Point Number	695.50
Summary of Decision Requested:	No specific decision sought with regards to Objective 5.1.1(a)(i) The rural environment, but the submission states that the matter of high class soils fragmentation could be fully solved/avoided by:
	<ul style="list-style-type: none"> Ensuring any Rural Zoned lots over 20ha can undertake a transferable rural lot subdivision; and On lesser sized Rural Zones land where high class soils exist, enabling a rural lot transfer option.
	AND
	Council should reconsider the exclusion of transferable rural lot rights.

Decision Reasons:

- This option is not currently provided for.
- This would eliminate any concern over fragmenting high-class soils and reduction of viable production land in the area.
- The certificate of title would record the parent land has had such a subdivision and cannot be further subdivided under that provision via a Section 221 consent notice.
- Created lots would have to occur within a defined zoned location, not on the subdivided site (except to prove viability).
- It will eliminate the need to fragment high class soil on lesser sized rural zoned land, where high class soils exist.
- The relief sought is consistent with the Proposed District Plan objective to protect rural land soil resources.

Point Number 695.51

Summary of Decision Requested: No specific decision sought with regards to Policy 5.3.8(d) Effects on rural character and amenity from rural subdivision, but submission states rural hamlet subdivision should not occur in an adhoc manner, which will cumulatively result in undermining the rural character. Such subdivision should have entitlements transferred to land around existing towns and villages.

Decision Reasons:

- Rural hamlet subdivision should not occur in an adhoc manner.
- It cumulatively results in undermining the rural character through dispersed development of non-rural activity.
- It contradicts to the Rural Zone objectives and policies in (ii) Maintenance of the rural character and amenity of the surrounding rural environment; and (iii) Minimisation of cumulative effects.

Point Number 695.52

Summary of Decision Requested: Delete Policy 5.3.9(a) Non-rural activities.

Decision Reasons:

- These are rural activities naturally associated with the rural sector.

Point Number 695.53

Summary of Decision Requested: Amend Policy 5.3.15 Noise and vibration to include earthworks within residential setbacks of adjoining property.

Decision Reasons:

- This can have potential to vibrate adjoining building structures where close by.

Point Number 695.54

Summary of Decision Requested: No specific decision sought with respect to Policy 5.6.3(a)(i) Subdivision within the Country Living Zone, but submission considers greater intensification of Country Living Zoned land is to be encouraged not discouraged.

Decision Reasons:

- It currently presents a significant cumulative waste of rural land resources.
- Council should focus on developing land in and around villages and towns and not adhoc sprawling Country Living Zones.
- Smaller lot sizes should be encouraged where infrastructure can be supplied.

Point Number 695.55

Summary of Decision Requested: Add a list of all known sites where Hazardous Activities and Industries List activities are understood to have occurred on the Planning Maps.

Decision Reasons:

- Waipa District Council does this.

Point Number 695.56

Summary of Decision Requested: Retain the definition for "Agricultural and horticultural research activities" in Chapter 13 Definitions which no longer contains references to "Genetic Engineering".

Decision Reasons:

- Genetic engineering has been dropped, which is supported.

Point Number 695.57

Summary of Decision Requested: Amend the definition of "Airfield" in Chapter 13 Definitions to include areas for aircraft to be stored and maintained, and airport administration buildings.

Decision Reasons:

- No reasons provided.

Point Number 695.58

Summary of Decision Requested: Amend the definition for "Blasting" in Chapter 13 Definitions to include an irregular array of blast holes.

Decision Reasons:

- The potential and actual effect of both irregular and regular blast holes is likely to be similar.

Point Number 695.59

Summary of Decision Requested: Amend the definition for "Boundary" in Chapter 13 Definitions to be more comprehensive for cross-leases, covering internal boundaries associated with registered exclusive use areas and external boundaries covering the whole of the cross lease site.

Decision Reasons:

- The submitter is concerned that this definition is not full enough.
- Cross leases can also have internal boundaries associated with registered exclusive use area, and external boundaries covering the whole of the cross-lease site.
- Refer to the definition of "site" and the language used to defined a cross lease.

Point Number 695.60

Summary of Decision Requested: Amend the definition of "Community Activity" in Chapter 13 Definitions to include "sporting activity".

Decision Reasons:

- No reasons provided.

Point Number 695.61

Summary of Decision Requested: Add a definition for "Construction Noise" in Chapter 13 Definitions.

Decision Reasons:

- There should be a definition for this.

Point Number 695.62

Summary of Decision Requested: Amend the definition for "Cumulative risk" in Chapter 13 Definitions to objectively state if it means other facilities on or off the site.

Decision Reasons:

- Use of the term "other facilities" is meaningless.

Point Number 695.63

Summary of Decision Requested: No specific decision sought but submission supports the absence of "Growth Areas" as a defined term.

Decision Reasons:

- This is supported in principle, to provide Council flexibility in forward planning.

Point Number 695.64

Summary of Decision Requested: Add a definition for "Disposal" to Chapter 13 Definitions

Decision Reasons:

- There should be a definition of "Disposal"

Point Number 695.65

Summary of Decision Requested: Amend the definition of "Dripline" in Chapter 13 Definitions to include, when a tree is deciduous, the ground underneath the furthest extent of the branch system of the tree.

Decision Reasons:

- No reasons provided.

Point Number 695.66

Summary of Decision Requested: Add a definition for "Horticultural Activity" to Chapter 13 Definitions.

Decision Reasons:

- There should be a definition of "Horticultural Activity".

Point Number 695.67

Summary of Decision Requested: Amend the scope of the definition for "Health Facility" in Chapter 13 Definitions.

Decision Reasons:

- A business, such as the Caci Clinic in Hamilton, which provides for a range of health as well as beauty and skincare services, would not fit easily into this definition.

Point Number 695.68

Summary of Decision Requested: Amend the definition of "Height Control Plane" in Chapter 13 Definitions to consider slopes, and the use of 45 degree rather than 37 degree and to be subservient to building height from the ground and setbacks.

Decision Reasons:

- The definition is incomplete and inconsistent with other Councils.
- The definition only considers flat sizes. Most sites are not flat, but have a slope. The slope directs the overall height of the building.
- Sites with steep slopes are unfairly disadvantaged by the standard application of the height in relation to boundary rules.
- No other council uses the 37 degree place angle as a general application except for the southern quarter - the sunlight angle in Waikato does not differ from Auckland, Hamilton or Waipa districts.
- The height control plane also needs to be subservient to building height from the ground and setbacks.

Point Number 695.69

Summary of Decision Requested:	Add Planning Map references to the definition of "High Class Soils" in Chapter 13 Definitions. AND Add maps of High Class Soils to the Proposed District Plan.
Decision Reasons:	<ul style="list-style-type: none"> No references currently exist for the public to access, but these are needed to indicate if further investigation is required.
Point Number	695.70
Summary of Decision Requested:	No specific decision sought in relation to the definition of "Homestay" in Chapter 13 Definitions, however submission notes that there is no maximum duration of stay listed.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	695.71
Summary of Decision Requested:	Amend the definition of "Indicative Road" in Chapter 13 Definitions to include phrasing that where an indicative road is constructed and is open to the public the classification is redundant.
Decision Reasons:	<ul style="list-style-type: none"> Previous application of rules when the indicative road has not been removed from the Planning Maps but the maps has been constructed. Must include phrasing where an indicative road has otherwise been constructed and is open to the public and therefore the indicative road classification is redundant. Difficulties have been encountered with inflexible Council Planner's interpretations in Raglan and Tamahere that insisted on proposals being a prohibited activity in one instance, and in the other, on considering the effects of future development on an indicative road where the road had been constructed just 50m away and was open to the public.
Point Number	695.72
Summary of Decision Requested:	Add a definition of "Landfill" to Chapter 13 Definitions.
Decision Reasons:	<ul style="list-style-type: none"> A definition of "landfill" should be added.
Point Number	695.73
Summary of Decision Requested:	Amend the definition of "Living Court" in Chapter 13 Definitions to state the proximity on a site to the downstairs or upstairs of a dwelling, including covered area such as porticos, decks, conservatories, and indoor-outdoor flow areas; and a swimming pool on its own is insufficient.
Decision Reasons:	<ul style="list-style-type: none"> Some persons value indoor space more than outdoors. A swimming pool on its own is not sufficient for living court purposes for all residents year-round.
Point Number	695.74
Summary of Decision Requested:	Amend the definition of "Minor Dwelling" in Chapter 13 Definitions to provide an exclusion for decks and garaging from the dwelling area.
Decision Reasons:	<ul style="list-style-type: none"> It is considered decks and garaging should be included.
Point Number	695.75
Summary of Decision Requested:	Amend the definition of "National Grid Corridor" in Chapter 13 Definitions to be consistent with the NZECP34:2001 requirements, and recognise that in some cases, high voltage line pylons and/or their conductor wires also set out a 22.5m setback.
Decision Reasons:	<ul style="list-style-type: none"> High voltage line pylons and/or their conductor wires also set out a 22.5m setback.
Point Number	695.76
Summary of Decision Requested:	Amend the definition of "Notional Boundary" in Chapter 13 Definitions consistent with Section 218 of the Resource Management Act and other Councils.
Decision Reasons:	<ul style="list-style-type: none"> Notional boundaries are not provided for in the Resource Management Act as quasi-considerations of future subdivision. Council practice is only to apply it to primary dwellings where two are sought to be placed on a certificate of title and not minor dwellings, which is also inconsistent with the terms of the District Plan definition that is used. This term and its application is unnecessary (likely ultra-vires) and inappropriate virtual encumbrance stifling potential intensification of land use in residential areas and effective utilization of existing infrastructure. The term does not appear in the Resource Management Act. It places a future requirement on a proposal that is not part of that proposal or yet known, as the potential for subdivision would be considered under subdivision rules. It is not relevant effects-based consideration of s95 or s104 of the Resource Management Act as no effect can be properly ascertained, implied, or derived in terms of the actual use that is being proposed. Section 87BA would provide for a notional boundary to be a permitted activity under implicit written approval, and this Resource Management Act definition legally overrides the District Plan definition. Other Councils do not use this definition so it is inconsistent practice. Other Councils provide for lesser subdivision lot sizes than minimums around approved dwellings as part of combined land use consent applications immediately followed by subdivision - given compliance with other minimum provisions. This practice occurs within Auckland, Tauranga and Hamilton City Council. This would create regional consistency.

Point Number 695.77

Summary of Decision Requested: Amend the definition of "Rear Record of Title" in Chapter 13 Definitions to describe the situation where an allotment although approved, has not yet had a Record of Title issued.

Decision Reasons:

- This is an incomplete definition.
- Does not describe the situation where an allotment although approved, has not yet had a Record of Title issued.

Point Number 695.78

Summary of Decision Requested: Add a definition of "Reverse Sensitivity" to Chapter 13 Definitions.

Decision Reasons:

- A definition of "Reverse Sensitivity" should be added.

Point Number 695.79

Summary of Decision Requested: Add a definition of "Rural Hamlet Subdivision" in Chapter 13 Definitions.

Decision Reasons:

- A definition of "Rural Hamlet Subdivision" should be added.

Point Number 695.80

Summary of Decision Requested: Delete the definition of "Viable Record of Title" in Chapter 13 Definitions

Decision Reasons:

- Likely to be ultra-vires.
- The Resource Management Act does not provide for active discrimination in defining which record of title is viable or not, only in specific zones.
- The same rules have to apply all lots in all zones if they are to be applied.

Point Number 695.81

Summary of Decision Requested: Amend the definition of "Village Green" in Chapter 13 Definitions to not be restricted only to Tamahere, so as to be later used as a general development term when Villages are more widely developed.

Decision Reasons:

- The term should not be inappropriately restricted only to Tamahere.

Point Number 695.82

Summary of Decision Requested: Amend the definition of "Visually permeable" in Chapter 13 Definitions as follows:
Means materials on a fence or wall that have ~~continuous vertical or horizontal gaps of at least 50mm width that result in~~ at least 50% visual permeability that include continuous vertical or horizontal gaps of at least 50mm width.

Decision Reasons:

- The definition cannot be applied as it reads.
- It suggests only the gaps have the visual permeability.

Point Number 695.83

Summary of Decision Requested: Amend Rule 16.1.3 RDI(h) Restricted Discretionary Activities so that an additional 10m² per bedroom be required for outdoor living space for 3 bedrooms or more, and that the 4m dimension be reduced to 3m.

Decision Reasons:

- The Council should be aiming for regional consistency .
- There is no obvious need for such wide variations to occur.
- The minimum dimensions in the Proposed District Plan are difficult to achieve, particularly on many narrow sites that occur in the District. This requirement is 60% greater than that for Hamilton City (included in the submission), with no logical explanation for such a great difference.
- The area requirement is supported in principle, there seem to be more practical consideration that Hamilton has applied, however again there appears to be no reason for either Council, to vary as much as 300% in one example.

Point Number 695.84

Summary of Decision Requested: Amend Rule 16.2.4.1 PI Earthworks - General so that earthworks are applied as a ratio to site area, i.e. a 1:1 ratio on a 450m² site would provide 450m³ earthworks.

Decision Reasons:

- The Proposed District Plan penalises bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together.

Point Number 695.85

Summary of Decision Requested: Retain a maximum area of earthworks in Rule 16.2.4.1 PI Earthworks - General.

Decision Reasons:

- No reasons provided.

Point Number 695.86

Summary of Decision Requested: Amend Rule 16.2.4.1 P3 Earthworks - General so that the volume is applied as a ratio to site, i.e. a 1:5 ratio, so a 450m2 site would therefore provide a 90m3 fill.

Decision Reasons:

- The Proposed District Plan penalises bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.

Point Number 695.87

Summary of Decision Requested: Amend Rule 16.2.4.4 Earthworks - Landscape and Natural Character Areas so that the 50m2 area figure is volume and the 250m3 volume figure is area.

Decision Reasons:

- The volume compared to area is 5:1 ratio, so every 1m2 of works can allow 5m3 volume to occur, which is very intensive and likely to cause environmental damage.
- The figures seem to be inconsistent with Rule 22.2.3.3 and is considered an error.

Point Number 695.88

Summary of Decision Requested: Amend Rule 16.2.4.4 Earthworks - Landscape and Natural Character so that the earthworks applied within the affected area by the overlay (as distinct from the whole of the site) as a 1:5 ratio to site area. i.e. if 500m2 occurs in the overlay, only 100m2 area and 100m3 volume will be allowed.

Decision Reasons:

- This better reflects the qualities of the overlay intent of the natural character.
- 250m3 of works as a static approach regardless of site size is not practical.

Point Number 695.89

Summary of Decision Requested: Amend Rule 16.3.2 P1(a)(i) Minor dwelling to apply a 600m2 threshold instead of the current 900m2 requirement.

Decision Reasons:

- Hamilton City Council allows 600m2 in the Residential Zone on reticulated and serviced sites (but precludes later subdivision).
- The Proposed District Plan approach is a 150% difference to HCC for no logical planning reason.
- The Council should be moving toward regional consistency.
- It would better enable the region to meet its share of provision of affordable housing options in a more cost effective manner by reducing building costs.

Point Number 695.90

Summary of Decision Requested: Amend Rule 16.3.3.1 P1 Height - Building general so the rule applies to that part of the building structure opposite the immediate ground level only.

AND

Amend Rule 16.3.5 Daylight admission as a consequential amendment.

Decision Reasons:

- The rule is suitably for flat sites.
- A development on a steeply sloped site is severely penalised.
- This would avoid giving neighbours perverse objection rights.
- Height in relation to boundary would need to account for the same.
- Subdivision design would need to ensure larger lots on steeper sites than the minimums to avoid solar access issues when development occurs.

Point Number 695.91

Summary of Decision Requested: Amend Rule 22.3.7.1 P3(a)(ii) Building setbacks – All boundaries, to be 12m rather than 25m.

Decision Reasons:

- A 12m setback would be adequate.

Point Number 695.92

Summary of Decision Requested: No specific decision sought with respect to Rule 22.4.1.1 PR2 and PR3 Prohibited subdivision, however the submission considers the rules are unnecessarily complex and a transferable right if supplied would completely eliminate the need for concern over high class soils if the created entitlement is required to be transferred to another zone with capacity for the intended purpose.

Decision Reasons:

- The rules are unnecessarily complex.
- If a transferable right subdivision process is supplied it would 100% eliminate the need for concern over high class soils if the created entitlement is required to be transferred to another Zone with capacity for the intended purpose.

Point Number 695.93

Summary of Decision Requested: Delete Rule 22.4.1.1 PR4(a) Prohibited Subdivision;

OR

Amend Rule 22.4.1.1 PR4(a) Prohibited Subdivision, to be an exemption (if this is the intent).

Decision Reasons:

- The rule is likely to be ultra-vires.
- It is unclear how Council can lawfully limit amalgamation or re-survey of land as part of subdivision.

- S241 of the Resource Management Act allows for amalgamation and re-survey of land (s218), regardless of how the record of title was first created.
- The District Plan cannot override the legal rights set out in the Act, nor add them where the Act is silent on such matters.
- The rule is an error and was probably intended to be an exemption.

Point Number 695.94

Summary of Decision Requested: No specific decision sought, however the submission considers that Rule 22.4.1.2 RDI (v) A and B General subdivision adds unnecessary and inappropriate complexity and that no variation margin is set out for realistic variations which do occur (the Operative District Plan Franklin Section allowed plus or minor 10% range).

Decision Reasons:

- This rule adds unnecessary and inappropriate complexity to consideration of development applications.
- No variation margin is set out to allow for realistic variations, which do occur.

Point Number 695.95

Summary of Decision Requested: Delete the date component of Rule 22.4.1.4 RDI (a) Subdivision – Boundary relocation.

Decision Reasons:

- It is likely to be ultra-vires.
- It is unclear how the Council can lawfully place a record of title date restriction on boundary relocations and adjustments.
- The Resource Management Act allows for boundary relocation and adjustments regardless of the date the record of title was created.
- The District Plan cannot override the legal rights set out in the Act, nor add to them where the Act is silent on such matters.

Point Number 695.96

Summary of Decision Requested: Amend Rule 22.4.1.5 Rural Hamlet Subdivision, to include a transferable rural lot right subdivision.

Decision Reasons:

- It is preferred that Council instead create appropriate planning and rezoning around existing towns and villages than ad-hoc dispersed subdivision.
- A transferable rural lot right subdivision combined with an appropriate level of vision and growth planning around existing towns and village will enable and promote development, and address latent development potential, within an improved framework and development outcomes.

Point Number 695.97

Summary of Decision Requested: Amend Rule 22.4.1.6 RDI (a)(iii) Conservation lot subdivision to apply a discretionary activity status to a conservation lot subdivision utilising land already subject to the listed covenant(s) where such land has not been previously subdivided.

Decision Reasons:

- This would respect owners of land who of their own initiative have previously bush at their own expense without seeking reward.
- Such subdivision would be subject to all the other same requirements listed in the provisions, in the same way an unprotected bush area would be assessed and considered.

Point Number 695.98

Summary of Decision Requested: Add to Rule 22.4.6 RDI (a)(i) Subdivision of land containing all or part of an Environmental Protection Area a reasonable setback (trigger threshold applied) e.g. where an overlay occurs in or within 100m of lots being proposed to be developed, with the exception of the balance lot;
AND
Amend Rule 22.4.6 RDI (a)(i) Subdivision of land containing all or part of an Environmental Protection Area, as follows:
A planting and management plan is submitted to Council for the Environmental Protection Area prepared by a suitably-qualified person, containing The plan is to contain details of exclusively indigenous species suitable to the area and conditions, for the purpose of planting enhancement and management where this is considered necessary after qualified ecological assessment of the Environmental Protection Area Planning Overlay on the site.

Decision Reasons:

- This blanket imposition is concerning.

Point Number 695.99

Summary of Decision Requested: Amend Rule 22.4.9 RDI (a)(i) Subdivision – Building platform, to reduce the area of a building platform on the proposed lot from 1000m2 to 800m2.

Decision Reasons:

- A building platform of 800m2 would suffice for most rural dwellings, access and servicing curtilage.

Point Number 695.100

Summary of Decision Requested: Retain a maximum area of earthworks in Rule 22.7.1.3 P1(a)(i) Earthworks within a Development Area.

Decision Reasons:

- No reasons provided.

Point Number 695.101

Summary of Decision Requested: Amend Rule 22.7.1.3 P(a)(i) to be applied on a ratio based on the site area i.e. a 1:1 ratio so that a 450m2 site would provide 450m3 of earthworks.

Decision Reasons:

- The Proposed District Plan penalises bigger sites for no apparent planning outcome, especially when a bigger site is likely to be able to absorb and diffuse effects.
- Earthworks totals should be counted as not cancelling each other out i.e. cut and fill are added together.

Point Number	695.102
Summary of Decision Requested:	Amend Rule 22.7.1.4 P1 (a)(ii) Building height within a Development Area, to have a 45 degree plane angle rather than 37 degrees to be subservient to building height from the ground and setbacks and to be consistent with other adjoining Councils.
Decision Reasons:	<ul style="list-style-type: none"> No other Council uses the 37 degree plane angle as a general application except for the southern quarter. The sunlight angles does not differ from Auckland, Hamilton or Waipa districts.
Point Number	695.103
Summary of Decision Requested:	Amend Rule 22.8.3 RDI(c)(ii) A and B Restricted Discretionary Activities, to have a 1200m setback apply to the said zones and if an existing pig farm already occurs at that setback, then the effects of that have to be taken into account as well; AND Amend Rule 22.8.3 RDI(c)(ii) A and B Restricted Discretionary Activities, to require any development occurring within that setback to have an enforced Council non complaints covenant applied.
Decision Reasons:	<ul style="list-style-type: none"> The concern with inequitable distribution rules such as this is that they do not relate to real world operations and realistic assessment of effects. If a consented activity with 500 pigs approved later wishes to expand to 550 pigs in the same location and is 1,320m setback, the setback per pig is just the same as 500 pigs at 1,200m. If the same operator starts a second pig farm at 1,200m setback it would have the same effect as a 1,000 pig operation at 1,200m setback.
Point Number	695.104
Summary of Decision Requested:	Amend Rule 22.8.3 RDI(c)(ii) A and B Restricted Discretionary Activities, to include a setback requirement of equivalent distance (1200m) from the Paa Zone.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	695.105
Summary of Decision Requested:	Retain the maximum area of earthworks in Rule 23.2.3.1 P2 Earthworks – General.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	695.106
Summary of Decision Requested:	Amend Rule 23.2.3.1 P2 Earthworks – General, so that earthworks limits be applied as a ratio of the site area i.e. 1:1 so that a 450m2 site would provide 450m3 of earthworks.
Decision Reasons:	<ul style="list-style-type: none"> The Proposed District Plan penalises bigger sites for no apparent planning outcome, especially when a bigger site is likely to be able to absorb and diffuse effects. Earthworks totals should be counted as not cancelling each other out i.e. cut and fill are added together.
Point Number	695.107
Summary of Decision Requested:	Amend Rule 23.2.3.1 P4(i) Earthworks – General, to increase the infill volume from 20m3 to 50m3.
Decision Reasons:	<ul style="list-style-type: none"> The imported infill volume is too low and should be 50m3 to be realistic for works outside of a building form.
Point Number	695.108
Summary of Decision Requested:	Amend Rule 23.2.3.1 P4(ii) Earthworks – General, to increase the maximum depth from 1m to 1.5m.
Decision Reasons:	<ul style="list-style-type: none"> A depth of 1.5m is not realistic.
Point Number	695.109
Summary of Decision Requested:	Amend Rule 23.2.3.3 P1 (a)(i) Earthworks – Significant Natural Areas, to change the suffix from 50m2 to 50m3.
Decision Reasons:	<ul style="list-style-type: none"> This is to denote volume and not area.
Point Number	695.110
Summary of Decision Requested:	Amend Rule 23.2.3.4 P1 (a)(ii) Earthworks – within Landscape and Natural Character Areas so that the 50m2 area figure is volume and the 250m3 volume is area.
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers the reference to m2 and m3 is an error.

Point Number 695.111

Summary of Decision Requested: Amend the planning maps to reduce the number of planning overlays that undertake similar functions and group them, particularly landscape, features and character overlays.

Decision Reasons:

- Simplicity is best.

Point Number 695.112

Summary of Decision Requested: Amend Rule 23.2.6.1 P2(a)(iii) Signs – General, to increase the maximum sign size to 3m2 (total per site).

Decision Reasons:

- The sign size is too small as Country Living Lots tend to be fairly large.
- It is considered that relief sought will be in keeping with the balance of rural and residential qualities.
- The relief sought is more appropriate.

Point Number 695.113

Summary of Decision Requested: No specific relief sought for Rule 23.2.6.1 P2(a)(vii), however the submission notes that Council has no jurisdiction over State Highways and the Waikato Expressway when these are under NZTA jurisdiction.

Decision Reasons:

- While NZTA regulations have not been considered due to time constraints, it is noted that Council has no jurisdiction over State Highways and the Waikato Expressway when these are under NZTA jurisdiction.

Point Number 695.114

Summary of Decision Requested: Amend Rule 23.2.6.2 P1(a)(ii) Signs – Effects on traffic, to delete the words “and any other sign”;
OR
Amend Rule 23.2.6.2 P1(a)(ii) Signs – Effects on Traffic, as follows:
Be located at least 60m from controlled intersections, pedestrian crossings and any other sign on the same site.
OR
Amend Rule 23.2.6.2 P1(a)(ii) Signs – Effects on Traffic, as follows:
Be located at least 60m from controlled intersections, pedestrian crossings and ~~any other sign~~ railway crossings (or roads under Council jurisdiction).

Decision Reasons:

- This is unrealistic.
- The cost of the consent would usually be more than the cost of the sign.

Point Number 695.115

Summary of Decision Requested: Amend Rule 23.3.4.1 P1 Height, so the rule should apply to that part of the building structure opposite the immediate ground level only;
AND
Amend Rule 23.3.5 Daylight admission as a consequential amendment.

Decision Reasons:

- This would avoid giving neighbours perverse objection rights.
- Height in relation to boundary would need to account for the same.
- Subdivision design would need to ensure larger lots on steeper sites than the minimums to avoid solar access issues when development occurs.

Point Number 695.116

Summary of Decision Requested: Amend Rule 23.3.5 P1 Daylight admission, as follows:
Buildings must not protrude through a height control plane rising at an angle of ~~37.45~~ degrees commencing at an elevation of ~~2.52~~m above ground level at every point of the site boundary.

Decision Reasons:

- There is no logical planning reason for this differentiation.
- All daylight control planed should be consistent with each other and that are used by adjoining Councils.

Point Number 695.117

Summary of Decision Requested: Amend Rule 23.3.6 P1 Building coverage, as follows:
The total building coverage must not exceed 10% of the site area or 300m2, whichever is the larger.

Decision Reasons:

- The submitter considers re-phrasing is required.

Point Number 695.118

Summary of Decision Requested: Amend Rule 23.3.7.1 P2(a)(ii) Building setbacks – All boundaries, to include an exemption where an indicative road has been constructed and is open to the public but the indicative road has not been removed from the Planning Maps.

Decision Reasons:

- Difficulties have been encountered with inflexible Council Planner's interpretations in Raglan and Tamahere that insisted on proposals being a prohibited activity in one instance, and in the other, on considering the effects of future development on an indicative road where the road had been constructed just 50m away and was open to the public.

Point Number 695.119

Summary of Decision Requested: Amend Rule 23.3.7.1 P2(a)(iii) Building setbacks – All boundaries to reduce the minimum setback to 6m for all sites.

Decision Reasons:

- This rule to be changes to a reduced setback to be realistic.
- The minimum setback at 23.3.7.1 P2(a)(ii) is just 1.5m, yet for the an allotment over 1,000m² is 12m.
- The 24m distance requirement from a dwelling on an adjoining lot is completely impractical. If a dwelling is placed 1.5m from the existing boundary, adjoining site of 1,000m² application site loses 22.5m x 31.623m equals a loss of 711m², which cannot be used for the building platform.
- It is impractical.

Point Number 695.120

Summary of Decision Requested: Amend Rule 23.3.7.5 Building setbacks – Waterbodies and Rule 22.3.7.5 Building setbacks, to be made the same.

Decision Reasons:

- There does not appear to be a regulatory or logical reason for a difference with the Rural Zone.

Point Number 695.121

Summary of Decision Requested: Amend Rule 23.4.2 RD1(a)(i) General subdivision, to allow provision for 1000m² sized serviced (reticulated service) lots on the outskirts of towns and villages.

Decision Reasons:

- This is a waste of soil resources which typically occurs on high class rural land.

Point Number 695.122

Summary of Decision Requested: Amend Rule 23.4.8 RD1(a)(i) Subdivision – Building platform, to decrease the area from 1000m² to 600m² (exclusive of boundary setbacks).

Decision Reasons:

- A building platform area of 600m² would suffice for most Country Living Zone dwellings, access and servicing curtilage.

Point Number 695.123

Summary of Decision Requested: No specific relief sought for Rule 23.4.8 RD1(a)(v) Subdivision – Building platform, but submission notes that a 1% AEP requirement normally applies although the submitter is not opposed to a lesser requirement provided this is consistent with regulatory practice elsewhere.

Decision Reasons:

- The submitter is not opposed to a lesser requirement provided this is consistent with regulatory practice elsewhere.

Point Number 695.124

Summary of Decision Requested: Retain a maximum area of earthworks in Rule 24.2.4.1 P1 Earthworks – General.

Decision Reasons:

- No reasons provided.

Point Number 695.125

Summary of Decision Requested: Amend Rule 24.2.4.1 P1 Earthworks – General, so that earthworks limits be applied as a ratio of the site area i.e. 1:1 so a 450m² site would provide 450m³ of earthworks.

Decision Reasons:

- The Proposed District Plan penalises bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together.

Point Number 695.126

Summary of Decision Requested: Amend Rule 24.2.4.1 P3(a)(i) Earthworks – General, to increase the infill volume from 20m³ to 50m³.

Decision Reasons:

- The infill volume is too low and should be realistic for works outside of a building platform.

Point Number 695.127

Summary of Decision Requested: Amend Rule 24.2.4.1 P3(a)(ii) Earthworks – General, to increase the depth from 1m to 1.5m.

Decision Reasons:

- The relief sought is realistic.

Point Number	695.128
Summary of Decision Requested:	Amend Rule 24.2.4.2 P1(a) Earthworks – for Maaori Sites and Maaori Areas of Significance, to provide clarity as to whether the 100m setback of a Maaori Area of Significance applies to adjoin sites.
Decision Reasons:	<ul style="list-style-type: none"> • It is unclear to the reader if this is the case or not. • Applicants require independent pre-certainty and clarity on these matters.
Point Number	695.129
Summary of Decision Requested:	Amend Rule 24.2.4.2 P1(a) Earthworks – for Maaori Sites and Maaori Areas of Significance, to provide a zone specific trigger; and sites that exceed the suggested area/ratio of 1:1 earthworks could be another trigger.
Decision Reasons:	<ul style="list-style-type: none"> • No earthworks threshold is set out which triggers the requirement. • If there are appropriate sediment management controls, earthworks outside of setback distances and within permitted activity levels are unlikely to cause any actual or potential effect to adjoining property. • Acknowledging it is important to respect and protect cultural sites. • Council uses a standard consent condition cover matters in development and subdivision proposals. • Cultural Reports can cost \$3000 to \$15000 at a time, which is hugely significant for small to medium scale proposals. • This rule will likely lead to frustration among applicants if a report is required but does not produce reasons why, or in the finished report fails to provide development advice. • The result could be a diminishing of and disrespect for the important role of mana whenua.
Point Number	695.130
Summary of Decision Requested:	Amend Rule 24.2.4.4 P1(a)(ii) Earthworks – within Landscape and Natural Character Areas, so that the 50m2 area figure is volume and the 250m3 volume is area.
Decision Reasons:	<ul style="list-style-type: none"> • This is considered an error.
Point Number	695.131
Summary of Decision Requested:	Amend Rule 24.2.7.1 P2(a)(iii) Signs – General, to enlarge the maximum area of a sign from 0.25m2 to 1 m2 (total per site).
Decision Reasons:	<ul style="list-style-type: none"> • The sign size is too small as Village Zone lots tend to be fairly large. • It will keep with the balance of rural and residential qualities. • It is more appropriate.
Point Number	695.132
Summary of Decision Requested:	<p>Amend Rule 24.2.7.2 P1(a)(ii) Signs - Effects on Traffic, to delete the words “and any other sign”;</p> <p>OR</p> <p>Amend Rule 24.2.7.2 P1(a)(ii) Signs – Effects on Traffic, as follows:</p> <p><i>To be located at least 60m from controlled intersections, pedestrian crossings and any other sign <u>on the same site</u></i></p> <p>OR</p> <p>Amend Rule 24.2.7.2 P1(a)(ii) Signs – Effects on Traffic, as follows:</p> <p><i>To be located at least 60m from controlled intersections, pedestrian crossings and any other sign <u>railway crossings (or roads under Council jurisdiction)</u>.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • This is unrealistic. • The cost of the consent would usually be more than the cost of the sign.
Point Number	695.133
Summary of Decision Requested:	<p>Amend Rule 24.3.3.1 P1 Height – Building general, so the rule only applies to that part of the building structure opposite the immediate ground level;</p> <p>AND</p> <p>Amend Rule 24.3.4 P1 Daylight admission as a consequential amendments.</p>
Decision Reasons:	<ul style="list-style-type: none"> • This would avoid giving neighbours perverse objection rights. • Height in relation to boundary would need to account for the same. • Subdivision design would need to ensure larger lots on steeper sites than the minimums to avoid solar access issues when development occurs.
Point Number	695.134
Summary of Decision Requested:	<p>Amend Rule 24.3.4 P1 Daylight admission, as follows:</p> <p><i>A building must not protrude through a height control plane rising at an angle of 37 45 degrees commencing at an elevation of 2.5 3m above ground level at every point of the site boundary.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • There is no logical planning reason for this differentiation. • All daylight control plan should be consistent with each other and that are used by adjoining Councils.
Point Number	695.135
Summary of Decision Requested:	Amend Rule 24.3.5 P1 and P2 to retain the operative district plan building coverage of 10% or 300m2, whichever is the larger.

Decision Reasons:

- Whether or not a site is reticulated or does not have bearing on building coverage.
- It is the area and ground conditions (for non-reticulated sites) of the lot that prescribes suitability.
- It does not achieve any outcome under the Act that cannot be achieved via other regulations already in place.

Point Number 695.136

Summary of Decision Requested: Amend Rule 24.3.6.1 P1(a)(ii) Building setbacks – All boundaries, to include phrasing that if an indicative road is constructed and is open to the public the classification is redundant.

Decision Reasons:

- Previous application of rules when the indicative road has not been removed from the Planning Maps but the maps has been constructed.

Point Number 695.137

Summary of Decision Requested: Amend Rule 24.3.6.3 Building setbacks – Waterbodies and Rule 22.3.7.5 Building setbacks – Waterbodies, to be the same.

Decision Reasons:

- There does not appear to be a regulatory or logical reason for a difference with the Rural Zone.

Point Number 695.138

Summary of Decision Requested: Amend Rule 24.4.2 RD1(a)(i) Subdivision – Te Kowhai and Tuakau to allow provision for 1000m² sized serviced lots on the outskirts of towns and villages;

AND

Add a rule to Rule 24.4.2 RD1 Subdivision – Te Kowhai and Tuakau, that enables 2,500m² lots for non-reticulated serviced lots, consistent with the Regional Council net lot area requirement.

Decision Reasons:

- 3000m² is a waste of soil resource.

Point Number 695.139

Summary of Decision Requested: Retain the 20m frontage as proposed in Rule 24.4.9 RD1(a) Road frontage .

Decision Reasons:

- This is only 15m in the Country Living Zone at 23.4.7 RD1(a) but has larger proposed lots.

Point Number 695.140

Summary of Decision Requested: Amend Rule 23.4.7 RD1(a) Subdivision – Road frontage, to change the minimum width along the road boundary in the Country Living Zone from 15m to 20m.

Decision Reasons:

- It is 20m in Rule 24.4.9 RD1(a).

Point Number 695.141

Summary of Decision Requested: Undertake further detailed growth investigations in the following localities, in order of priority.

- Matangi – Add 1,000m² serviced lots capacity and enlarge commercial area.
- Tuakau – Residential and Village Zone additions, enlargement of commercial area, regenerate rail precinct and station.
- Mercer – Residential and Village Zone additions, enlargement of commercial area, regenerate rail precinct and station.
- Gordonton – Residential and Village Zone additions, enlargement of commercial area, promote it as a rural service hub.
- Huntly – Once Huntly East Mine subsidence resolved, Residential and Village Zone additions, enlargement of commercial area, regenerate rail precinct and station into freight hub.
- Karakariki Valley/Karakariki Road (near Whatawhata) – Development of the secluded valley could occur as it is already near a country living estate which occurs on the otherside of the hill. The hill top retained as a scenic reserve with walking tracks and gardens on it slower reaches, extending to the Waipa River. A small commercial area developed on the western side of the hill which itself would be flanked by residential, village and country living allotments as one reaches further out.
- Te Uku – Creation into a large village. Village Zone type allotments that are serviced or 2,500m² non-reticulated lots developed here.
- Taupiri – Residential and Village Zone additions, enlargement of commercial area, regenerate rail precinct and station. Provide designations for rail line to Morrinsville in conjunction with Matamata-Piako District Council. Designation of rail corridor near expressway and to bypass Ngaruawahia (the latter retained for freight and future commuter passenger and light rail services to Hamilton).
- Ngaruawahia – Residential and village zone additions. Allow for minor commercial servicing.
- Orini – Limited village development planned here.

Decision Reasons:

- Various, as set out in the submission.

Point Number 695.142

Summary of Decision Requested: Add potential sand extraction to the District Planning Maps and that this is discussed in conjunction with sand pit operators and quarry owners, as well as the construction industry.

Decision Reasons:

- Sand extraction availability is essential to the very ability of the construction and development sector to operate.
- Many of the areas of available that are suitable for use are being built over in the Waikato District, and in surrounding districts. This is occurring without appropriate restraints. This could lead to making accessing this vital resource impossible in the future and place an inappropriate reliance on imported material.
- Such areas should have development buffers placed around them with mandatory no-complaints covenants placed on development within a 200m buffer of the boundary of an active or consented extraction site, or a potential sand extraction site.
- It is frequently possible to rehabilitate such sites after use to safe and stable building platforms for other uses, including residential.

Point Number 695.143

Summary of Decision Requested: Delete Policy 4.3.15(d) Earthworks.

OR

Amend Policy 4.3.15(d) Earthworks to refer to minimising earthworks to maintain the fundamental shape, contour and landscape characteristics where otherwise possible.

Decision Reasons:

- It is ultra-vires.
- It lacks any comprehension of building and development requirements.
- Altering fundamental shape, contour and landscape cannot be avoided in some scenarios to achieve a suitable and safe building development outcome.
- If the intended outcome is to minimise earthworks then this is what the clause should state.

Point Number 695.144

Summary of Decision Requested: No specific decision sought, but submission recommends that council follow the design principles of Professor Newman *et al* and Engwicht, in subdivision design.

Decision Reasons:

- No reasons provided.

Point Number 695.145

Summary of Decision Requested: **Amend** Section 14.12 Transportation, to change the driveway gradient from 12.5% maximum for a concrete drive to 20%.

Decision Reasons:

- To achieve sub-regional consistency, as there is no reason for variation to occur.

Point Number 695.146

Summary of Decision Requested: **Investigate** incentives for road transport operators to form co-operatives using computerised freight sourcing and tracking systems, and for road truck operators to invest in rail rolling stock or leasing.

Decision Reasons:

- This would retain revenue within truck companies.
- This would mean that road freight operators would decide, rather than have imposed regulation to change.
- Provides flexibility of use.

Point Number 695.147

Summary of Decision Requested: **Add** to Rule 22.3.7.1 Building Setbacks - All boundaries a statement to say that where an indicative road is no longer relevant, or constructed and in use, the rule is no longer applicable.

Decision Reasons:

No specific reasons provided.

Point Number 695.148

Summary of Decision Requested: Requests to be notified and given a reasonable opportunity to prepare a response of this chapter when the contents become available.

Decision Reasons:

- This section has not provisions listed, so respondents are unable to submit on this.

Point Number 695.149

Summary of Decision Requested: **Ensure** that Council website online links and pathways are easy to find and links are to the current plan/s and maps.

Decision Reasons:

- No reason provided but submission states that current practice is good and information is easy to find

Point Number 695.150

Summary of Decision Requested: **Clarify** the Section 88 and Schedule 4 application requirements to Council planners and provide this detail online to the public with examples.

Decision Reasons:

- This will assist applicants

Point Number 695.151

Summary of Decision Requested: **Develop** a consistent methodology for assessment during the District Plan review process where more than one District Plan is assessed and that there are no wide variations of personal interpretations with Planners.

Decision Reasons:

- This will provide certainty for applicants and goodwill during a period of increased complexity and costs for both applicants and Council.

Point Number	695.152
Summary of Decision Requested:	Provide objective online information to applicants regarding how Council will assess an application where two District Plans require to be assessed, for each phase of the plan change process.
Decision Reasons:	<ul style="list-style-type: none"> Some information is currently available, however this could be expanded.
Point Number	695.153
Summary of Decision Requested:	Delete the use of the suffix (a) after single item statements in the Proposed District Plan.
Decision Reasons:	<ul style="list-style-type: none"> This is not necessary. Headings have their own reference number. If another clause is added later, this could then be renumbered with the suffix. This saves applicants time when preparing consents. Several clauses have long references that takes time when preparing consents. Some review and simplification for users would be appreciated. Template consents would show any unnecessary repetition.
Point Number	695.154
Summary of Decision Requested:	Amend Section 1.4.1(a) Demographic trends to use five to ten year forecasts instead of 45 to 50 year forecasts.
Decision Reasons:	<ul style="list-style-type: none"> The projection of 147,000 in the district is likely to be too low. A five to ten year forecast is more meaningful to correlate.
Point Number	695.155
Summary of Decision Requested:	Develop and add applied plans to Section 1.4.1.3(a) Uneven population growth across the district, to grow every town and village in this District, developed in conjunction with owners and development professionals.
Decision Reasons:	<ul style="list-style-type: none"> Council needs to be more proactive in terms of Town and Village growth that can readily occupy growth. Matangi, Huntly, Taupiri, Te Uku, Whatawhata/Karakariki, Ngaruawahia, Tauwhare, Tuakau and Mercer can all be worked towards as key recipients of growth, but little is acknowledged outside of Pokeno, Te Kauwhata and Te Kowhai.
Point Number	695.156
Summary of Decision Requested:	Add to 1.4.2.3 (a) Challenges clear Council applied mechanism that achieves and facilitates the desired outcomes listed in the objectives in a focused way that addresses all likely localities for demand in the District.
Decision Reasons:	<ul style="list-style-type: none"> Council needs to concentrated on growth patterns and it is requested to approach MPS and Central Government to facilitate. The need is more urgent that it may appear. A greater applied focus on growth of other towns and villages is needed by Council. The growth of rural villages, such as Matangi, can help offset the stated depopulation in clause 1.4.1.3 of rural areas that is anticipated, by placing persons with rural interests in rural locations. Smaller towns close to industrial areas are also robust for the likely workforce to decide to establish. The approach above would assist to trigger needed renewal and investment in our region. This would also assist to address Objective 1.4.2.3 (a) (iii) being skills shortages.
Point Number	695.157
Summary of Decision Requested:	No specific decision sought, but submission states that the current sprawl of the Country Living Zone at Tamahere with 5000m2 lots which directly contradicts the intent of Section 1.4.2.3(a)(vi) Challenges.
Decision Reasons:	<ul style="list-style-type: none"> Serviced lots of 1,000m2 around Matangi could house five times as many parties and reduce land resources by 80% per allotment.
Point Number	695.158
Summary of Decision Requested:	Add provisions for transferable rural lot right with entitlements placed in country living zones or in villages and towns as a tool to facilitate objectively focused planning and development outcomes.
Decision Reasons:	<ul style="list-style-type: none"> There is no applied framework to accommodate growth demand in rural areas. Ad-hoc approaches lead to unintended consequences.
Point Number	695.159
Summary of Decision Requested:	Delete Section 1.4.3.1(c) Rural activities.
Decision Reasons:	<ul style="list-style-type: none"> This clause is legally inappropriate as it can be used in an open-ended subjective negative manner by a Council Planner as justification to curtail a rural subdivision application based on unfounded assumptions. No reference is given to the economic analysis document the comments are based on.
Point Number	695.160
Summary of Decision Requested:	Amend the Proposed District Plan (including Section 1.4.3.2(a) Protecting the rural environment) with consideration to the Matangi Committee

Decision Reasons:

- Section 1.4.3.2(a) directly contradicts the approach taken by Council to have a large Country Living Zone in Tamahere but a refusal to develop around Villages and the like, such as Matangi which could have accommodated such growth more intensively with less impact on high quality rural production areas.

Point Number 695.161

Summary of Decision Requested: Amend the Proposed District Plan to include a more structured approach to growth in periphery areas beyond the Country Living Zone of 5,000m² lots.

Decision Reasons:

- Council needs to be more proactive in terms of Town and Village growth that can readily occupy growth.
- Matangi, Huntly, Taupiri, Te Uku, Whatawhata/Karakariki, Ngaruawahia, Tauwhare, Tuakau and Mercer can all be worked towards as key recipients of growth, but little is acknowledged outside of Pokeno, Te Kauwhata and Te Kowhai.

Point Number 695.162

Summary of Decision Requested: Add a transferable lot right subdivision approach similar to that of Waipa District Council and Auckland Council where areas of entitlement generation and placement are identified.

Decision Reasons:

- The approaches used by those Councils control the desired outcome of lot placement in appropriate locations and have little of the complexity of the former Franklin Council system.
- Council needs to be more proactive in terms of Town and Village growth that can readily occupy growth.
- Matangi, Huntly, Taupiri, Te Uku, Whatawhata/Karakariki, Ngaruawahia, Tauwhare, Tuakau and Mercer can all be worked towards as key recipients of growth, but little is acknowledged outside of Pokeno, Te Kauwhata and Te Kowhai.

Point Number 695.163

Summary of Decision Requested: Add an applied mechanism to address various issues including sections 1.4.4(a) and 1.4.4(b) The urban environment and 1.5.1(b) and 1.5.1(c) Compact urban development on a district wide basis for every town and village.

Decision Reasons:

- This statement directly contradicts the approach taken by the Council to have a large Country Living Zone at Tamahere.
- There appears to be no applied mechanisms to facilitate an efficient outcome on a district wide basis for every town and village, such that the District Plan appears to directly encourage a wide dispersed ad-hoc development in the rural zone.

Point Number 695.164

Summary of Decision Requested: No specific decision sought, however the submission requests Council to demonstrate how Objective 1.5.1 (b) Compact urban development is going to be achieved by rezoning of land around towns and key villages. The submission states that Country Living Zone lots could be smaller and serviced near key villages and towns to avoid the minimum 2,500m² regional plan requirement for non-reticulated sites.

Decision Reasons:

- This is not readily apparent how the likely demand is without taking up large tracts or rural production land for the Country Living Zone.
- Council's 'one site fits all' approach could be more flexible and tailored to locality specific approaches to lot sizes.

Point Number 695.165

Summary of Decision Requested: No specific decision sought, however submission considers that it is unclear from the objectives and policies how the Regional Policy Statement Policy 6.17.1 will be realistically achieved without a strong applied focus and mechanism on developing towns and villages (in regards to Section 1.5.4(c) Urban Growth).

Decision Reasons:

- Policy 6.17.1 of the WRPS 2016 states that the WDC shall include provisions in the District Plan to give effect to Policy 6.17.
- It remains unclear from reading the objectives and policies how this is going to be realistically achieved.
- Leaving it all to prevail in a one-size-fits-all Country Living Zone ad-hoc approach to manage rural demand is likely to undermine achieving the urban form objectives.
- Latent rural demand - which has been a strong growth driver in recent years - does not yet appear to be managed through a robust planning approach.

Point Number 695.166

Summary of Decision Requested: No specific decision sought, however the submission considers Section 1.5.6(d) Transport and Logistics is uninformed, open ended and inaccurate.

Decision Reasons:

- The rail systems investment is small compared to the road corridor has not been realigned and upgraded like the road.
- The last significant investment between Hamilton and Auckland was the doubling of part of the rail route in the 1930s.
- Most of the route is prone to tail buckling due to poor engineering standards.
- The 40km/hr maximum in 22 degrees Celsius between Hamilton and Auckland does not compare to the 115km/hr maximum in 40 degrees in Australian rails.
- Queensland tilt trains (passenger, diesel, electric) travel over similar terrain as in between Auckland and Hamilton, at 160km/hr.
- Rail is best suited to bulk volumes of freight and passengers between key centres due to its greater fuel efficiency from steel wheel on steel rail for the same tonne moved.
- Rail does not have the significant subsidisation that road funding has from various sources.
- Rail use improves safety, reduces fuel energy use per tonne moved when ideal capacities are available, and allows road investment and capacity to last longer.

Point Number 695.167

Summary of Decision Requested: Amend Rule 16.3.3.2 P1 Building and vegetation in a battlefield view shaft area to have greater setbacks, rather than the 5m maximum height.

Decision Reasons:

- The rule is suitable for flat sites and is too low to be practical.
- A development on steeply sloped sites is severely penalised.

- The key issue is not the height of a dwelling, but the view shaft around it.

Point Number 695.168

Summary of Decision Requested: **Amend** Rule 16.3.4 Fences or walls - Road boundaries and Reserve Zone boundaries so that no fences or walls occur ahead of the front building line or within the 3m front yard setback to a road.

Decision Reasons:

- In the interest of good urban design and road safety.

Point Number 695.169

Summary of Decision Requested: **Amend** Rule 16.3.4 Fences or walls - Road boundaries and Reserve Zone boundaries for fences to be at least 50% permeable for that part of the fence over 1.2m height facing a reserve, with permeability to be spaced evenly along the fence.

Decision Reasons:

- Active road corridors slow drivers subconsciously as they see more activity in a residential street.
- This assists security through observation.
- Privacy can still be achieved with solid 1.8m side and rear fences.

Point Number 695.170

Summary of Decision Requested: **Amend** Rule 16.3.5 PI Daylight admission as follows:
Buildings must not protrude through a height control plane rising at an angle of 37.15 degrees commencing at an elevation of 2.52 m above ground level at every point of the site boundary.

Decision Reasons:

- It should be consistent with other Councils, unless scientific evidence demonstrates that the sun angle differ in the Waikato district compared to other districts.

Point Number 695.171

Summary of Decision Requested: **Amend** Rule 16.3.7 Living Court so that an additional 10m² per bedroom be required for outdoor living space for 3 bedrooms or more, and that the 4m dimension be reduced to 3m.

Decision Reasons:

- The council should be aiming for regional consistency.
- There is no obvious need for such wide variations to occur.
- The minimum dimensions in the Proposed district Plan are difficult to achieve, particularly on narrow sites that occur in the District.
- This requirement is 60% greater than that for Hamilton City with no logical explanation for such a great difference.

Point Number 695.172

Summary of Decision Requested: **Amend** Rule 16.4.1 RDI(a)(i) Subdivision - General so that flat sites have a minimum of 400m², instead of 450m².

Decision Reasons:

- This would be consistent with Hamilton City Council Residential Zone requirements.
- Concurrent land use consent and subdivision consent can approve smaller lots around approved building.
- Care needs to be taken on steeper sites in terms of lot sizes when Council approves these to evidence later building viability as slope affects the viable building platform and height to boundary relationships.

Point Number 695.173

Summary of Decision Requested: **Amend** Rule 16.4.1 RDI(a)(iv) Subdivision - General to state that rear lots are to be avoided except where there is no realistic alternative.

Decision Reasons:

- The rule does not appear to consider topographical and existing existing infrastructure constraints.
- There appears to be no reason for a lesser constraint in the number of lots to which the rule applies.
- This will lead to inconsistent decision-making.

Point Number 695.174

Summary of Decision Requested: **Amend** Rule 16.4.2 RDI(a)(v) Subdivision - Te Kauwhata West Residential Area to state that rear lots are to be avoided except where there is no realistic alternative.

Decision Reasons:

- The rule does not appear to consider topographical and existing infrastructure constraints.
- There appears to be no reason for a lesser constraint in the number of lots to which the rule applies.
- This will lead to inconsistent decision-making.

Point Number 695.175

Summary of Decision Requested: **Amend** Rule 16.4.3 RDI to state that rear lots are to be avoided except where there is no realistic alternative.

Decision Reasons:

- The rules does not appear to consider topographical and existing infrastructure constraints.
- There appears to be no reason for a lesser constraint in the number of lots to which the rule applies.
- This will lead to inconsistent decision-making.

Point Number 695.176

Summary of Decision Requested:	Amend Rule 16.4.5 C1(b) Subdivision - Boundary adjustments to change the term "boundary relocation" to "boundary adjustment".
Decision Reasons:	<ul style="list-style-type: none"> The term "boundary relocation" is used in this clause whereas the heading refers to a boundary adjustment, and relocation refers to the whole boundary and adjustment is part of the boundary.
Point Number	695.177
Summary of Decision Requested:	Amend Rule 16.4.12 RD1(a)(i) Subdivision - Building platform as follows: <i>(i) a circle with a diameter of at least 4 5m exclusive of yards; or...</i>
Decision Reasons:	<ul style="list-style-type: none"> Sub-regional consistency of subdivision design should be a key focus for Council. The proposed rule is inconsistent. The Proposed District Plan requirement would be difficult to achieve on many sites as they are typically 20m across. There is no logical planning explanation, why urban residential sites require a 20% greater sized shape factor than an equivalent Residential Zone lot in Hamilton City. There is no planning outcome to be achieved by requiring excess size shape factors.
Point Number	695.178
Summary of Decision Requested:	Amend Rule 16.5.7.2(a)(i) Earthworks - General to apply a ratio based on the site area i.e. a 1:1 ratio so a 450m² site would provide for 450m³ of earthworks.
Decision Reasons:	<ul style="list-style-type: none"> The Proposed District Plan penalises bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects. Earthworks totals should not cancel each other out, i.e. cut and fill add together.
Point Number	695.179
Summary of Decision Requested:	Retain a maximum area of earthworks in Rule 16.5.7.2(a)(i) Earthworks - general
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	695.180
Summary of Decision Requested:	Amend Rule 16.5.8.2 P1 Height as follows: <i>The maximum height of any building must not exceed 8.0m 7.5m.</i>
Decision Reasons:	<ul style="list-style-type: none"> To be consistent with other residential height provisions in the Proposed District Plan. There is no logical planning reason why one area should have an easier requirement than other areas in the absence of specific considerations.
Point Number	695.181
Summary of Decision Requested:	Amend Rule 16.5.8.4 P1 Daylight admission as follows: <i>Any building within the Medium Density Precinct identified on the Te Kauwhata Lakeside Precinct Plan 16.5.1(3)(a) shall not protrude through a height control plane rising at an angle of 45 degrees commencing at an elevation of 2.5 2m above ground level at every point of the site boundary, except that this standard does not apply to party walls located along site boundaries.</i>
Decision Reasons:	<ul style="list-style-type: none"> There is no logical planning reasons for this differentiation. All daylight control planes should be made to be consistent with each other and that used by other adjoining Councils.
Point Number	695.182
Summary of Decision Requested:	Amend Rule 16.5.8.4 P2 Daylight admission as follows: <i>Any building within the High Density Precinct identified on the Te Kauwhata Lakeside Precinct Plan 16.5.1(3)(a) shall not protrude through a height control plane rising at an angle of 45 degrees commencing at an elevation of 3.5 3m above ground level at every point of the site boundary within 20m of a street frontage, and 2.5 2m above ground level at every point on the site boundary greater than 20m from the street frontage; except that this standard does not apply to party walls located along site boundaries.</i>
Decision Reasons:	<ul style="list-style-type: none"> There is no logical planning reason for this differentiation. All daylight control planes should be made to be consistent with each other and are used by adjoining Councils.
Point Number	695.183
Summary of Decision Requested:	Amend Rule 16.5.8.6 Living Court to be consistent with other Living Court requirements through the Proposed District Plan.
Decision Reasons:	<ul style="list-style-type: none"> The requirements set out differ widely from dwelling requirements in other parts of the plan. There is no reason why one dwelling of the same capacity should have a different living court requirement of another. There is no specific circumstance why it should be different.
Point Number	695.184
Summary of Decision Requested:	Amend Rule 16.5.8.8 Fences so that all dwelling fencing provisions through the Proposed District Plan are the same.
Decision Reasons:	

- The requirement differs from Rule 16.3.4 with no logical planning reasons for this.
- Unnecessary complexity creates confusion and must be avoided.

Point Number 695.185

Summary of Decision Requested: **Amend** Rule 16.9.1 C1 (a)(v)C Subdivision Lakeside - general to be consistent with Rule 16.4.12 RD1 (a)(i) where the minimum lot sizes are the same at 450m².

Decision Reasons:

- The 12m shape factor differs from the 18m in Rule 16.4.12 RD1 (a)(i) but they should be consistent, where the minimum lot sizes are the same at 450m².

Point Number 695.186

Summary of Decision Requested: **Retain** a maximum area of earthworks in Rule 17.2.5.1 P1(a)(ii) Earthworks General.
AND
Amend Rule 17.2.5.1 P1(a)(ii) Earthworks General to apply a ration based on a site area, i.e. 1:1 so that a 450m² site would provide 450m³ earthworks.

Decision Reasons:

- The submitter supports the retention of a maximum are of earthworks.
- The Proposed District Plan penalises bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.

Point Number 695.187

Summary of Decision Requested: **Amend** Rule 17.2.5.1 P2 Earthworks - General to be consistent with the rest of the Proposed District Plan.

Decision Reasons:

- It is ultra-vires.
- It lacks any comprehension of building and development requirements.
- If it is meant to refer to unauthorised clean-fill, it should state so.
- The statement is objected to it (in its present form).
- The stated prohibition on importation of all clean-fill would make almost all development impossible.
- Building sand, crushed stone, shells or bark for gardens can all be regarded as clean-fill if received from an authorised source.
- Some sites need earth brought in to address drainage or where building of the soil level is required for stability and building platform integrity.

Point Number 695.188

Summary of Decision Requested: **Amend** Rule 17.3.2 P1(a) Daylight admission as follows:
P1(a) Any building must not protrude through a height control plane rising at angle of ~~37.45~~ degrees commencing at an elevation of ~~2.52~~m above ground level at the site boundary.

Decision Reasons:

- There is no logical planning reasons for this differentiation.
- All daylight control planes should be made to be consistent with each other and that used by adjoining Councils.

Point Number 695.189

Summary of Decision Requested: **Amend** Rule 17.3.7(a)(iii) Living Court so to revise and make consistent with outdoor living provisions elsewhere in the Proposed District Plan.

Decision Reasons:

- This is excessive for a balcony.

Point Number 695.190

Summary of Decision Requested: **Amend** Rule 17.5.5 P1 Daylight admission as follows:
Any building shall not protrude through a height control plane rising at an angle of 45 degrees commencing at an elevation of 3.5m above ground level at every point of the site boundary where it adjoins a residential zone.

Decision Reasons:

- There is no logical planning reason for this differentiation.
- All daylight control planes should be made to be consistent with each other and that used by adjoining Councils.

Point Number 695.191

Summary of Decision Requested: No specific decision sought, however submission states Rule 17.5.6 Gross floor area is *ultra-vires*.

Decision Reasons:

- It is an ultra-vires rule.
- An applicant has no control over the size of buildings on other properties in the zone.

Point Number 695.192

Summary of Decision Requested: **Amend** Rule 18.1.3 RD1(f) Restricted Discretionary Activities so that an additional 10m² bedroom be required for outdoor living space for 3 bedrooms or more, and the 4m dimension reduced to 3m.

Decision Reasons:

- The Council should be aiming for regional consistency.
- There is no obvious need for such wide variances to occur.
- The minimum dimensions in the Proposed District Plan are difficult to achieve, particularly on many narrow sites that occur in the District. This requirement is 60% greater than that for Hamilton City with no logical explanation for such a great difference.

Point Number 695.193

Summary of Decision Requested: **Amend** Rule 18.2.4.1 P1(a)(ii) Earthworks – General so that earthworks are applied as a ratio to site area i.e. a 1:1 ratio based on a site area e.g. a 450m² area would provide 450m³ earthworks.

Decision Reasons:

- The Proposed District Plan penalizes bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together

Point Number 695.194

Summary of Decision Requested: **Amend** Rule 18.2.4.1 P2(a)(i) Earthworks – General to enable importation of fill to occur.

Decision Reasons:

- This is allowed in this zone but is avoided in the residential zone.
- Importation in all zones enables development to occur.

Point Number 695.195

Summary of Decision Requested: **Amend** Rule 18.3.2 P1 Daylight admission as follows:

(a) Any building must not protrude through a height control plane rising at an angle of ~~27~~ 45 degrees commencing at an elevation of ~~2.5~~ 3m above ground level at the site boundary where it adjoins the:

...

Decision Reasons:

- There is no logical planning reason for this differentiation.
- All daylight control planed should be consistent with each other and that are used by adjoining Councils.

Point Number 695.196

Summary of Decision Requested: **Amend** Rule 18.3.9(a)(iii) Living court, to be revised and made consistent with outdoor living provisions elsewhere in the Proposed District Plan.

Decision Reasons:

- It is excessive for a balcony.

Point Number 695.197

Summary of Decision Requested: **Retain** a maximum area of earthworks in Rule 18.2.4.1 P1(a)(ii) Earthworks - General.

Decision Reasons:

- No reasons provided.

Point Number 695.198

Summary of Decision Requested: **Amend** Rule 19.2.4 P1(a)(ii) Earthworks to be applied on a ratio based on site area. i.e. a 1:1 ratio so that a 450m² site would provide 450m³ earthworks.

Decision Reasons:

- The Proposed District Plan penalizes bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together.

Point Number 695.199

Summary of Decision Requested: **Amend** Rule 19.3.3 P1 Daylight admission as follows:

Any building must not protrude through a height control plane rising at an angle of ~~27~~ 45 degrees commencing at an elevation of ~~2.5~~ 3m above ground level at every point of the boundary of a site within the Business Zone Tamahere.

Decision Reasons:

- There is no logical planning reason for this differentiation.
- All daylight control planed should be consistent with each other and that are used by adjoining Councils.

Point Number 695.200

Summary of Decision Requested: **Retain** the maximum area of earthworks in Rule 19.2.4 P1(a)(ii) Earthworks.

Decision Reasons:

- No reasons provided.

Point Number 695.201

Summary of Decision Requested: **Amend** Rule 22.1.3 RD1(c)(ii) B Restricted Discretionary Activities to have a minimum 1200m setback apply to the said zones and if an existing

pig farm already occurs at the setback, then the effects of that have to be taken into account as well;

AND

Amend Rule 22.1.3 RDI(c)(ii) B Restricted Discretionary Activities to require any development occurring within that setback to have an enforced Council no complaints covenant applied.

Decision Reasons:

- The concern with inequitable distribution rules such as this is that they do not relate to real world operations and realistic assessment of effects.
- What happens if a consented activity with 500 pigs approved later wishes to expand to 550 pigs in the same location and is 1,320m setback, the setback per pig is just the same as 500 pigs at 1,200m.
- If the same operator starts a second pig farm at 1,200m setback it would have the same effect as a 1,000 pig operation at 1,200m setback.

Point Number

695.202

Summary of Decision Requested:

Amend Rule 22.1.3 RDI (c)(ii)B Restricted Discretionary Activities to include a requirement to be setback or equivalent distance (1200m) from a Paa Zone.

Decision Reasons:

- No reasons provided.

Point Number

695.203

Summary of Decision Requested:

Amend Rule 22.1.5 NCI Non-Complying Activities to include an exemption clause in the situation where an indicative road remains on a planning map but has been constructed and is open to the public, either in the same location or very near.

Decision Reasons:

- The issue has occurred twice when preparing resource consent applications.
- There is no effect under the Act to address in that circumstance.
- It is ultra-vires.

Point Number

695.204

Summary of Decision Requested:

Amend Rule 22.2.3.1 P1, P2 and P4 Earthworks general so that earthworks are based on the site area i.e. a 1:1 ratio so a 45m2 site would provide 450m3 of earthworks.

Decision Reasons:

- The Proposed District Plan penalizes bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together.

Point Number

695.205

Summary of Decision Requested:

Retain the maximum area of earthworks in Rule 22.2.3.1 P1, P2 and P3 Earthworks – General.

Decision Reasons:

- No reasons provided.

Point Number

695.206

Summary of Decision Requested:

Amend Rule 22.2.3.3 P1 and P2 Earthworks – Significant Natural Areas so that earthworks are based on the site area i.e. a 1:1 ratio so a 450m2 site would provide 450m3 of earthworks.

Decision Reasons:

- The Proposed District Plan penalizes bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together

Point Number

695.207

Summary of Decision Requested:

Retain a maximum area of earthworks in Rule 22.2.3.3 P1 Earthworks – Significant Natural Areas.

Decision Reasons:

- No reasons provided.

Point Number

695.208

Summary of Decision Requested:

Amend Rule 22.2.3.4 Earthworks within Landscape and Natural Character Areas so that earthworks are based on the site area. i.e a 1:1 ratio so that a 450m2 site would provide 450m3 of earthworks.

Decision Reasons:

- The Proposed District Plan penalizes bigger sites for no apparent outcome, especially when a bigger site is likely to be better able to absorb and diffuse effects.
- Earthworks totals should not cancel each other out, i.e. cut and fill add together.

Point Number

695.209

Summary of Decision Requested:

Retain a maximum area of earthworks in Rule 22.2.3.4 Earthworks within Landscape and Natural Character Areas.

Decision Reasons:

- No reasons provided.

Point Number 695.210

Summary of Decision Requested: **Amend** Rule 22.2.6.2 P1 (a)(ii) Signs - Effects on Traffic, to delete the words "and any other sign";

OR

Amend Rule 22.2.6.2 P1 (a)(ii) Signs – Effects on Traffic, as follows:

Be located at least 60m from controlled intersections, pedestrian crossings and any other sign on the same site.

OR

Amend Rule 22.2.6.2 P1 (a)(ii) Signs – Effects on Traffic, as follows:

Be located at least 60m from controlled intersections, pedestrian crossings and ~~any other sign~~ railway crossings (or roads under Council jurisdiction).

Decision Reasons:

- This is unrealistic
- The cost of the consent would usually be more than the cost of the sign.

Point Number 695.211

Summary of Decision Requested: No specific decision sought for Rule 22.3.1 P1 (b) Number of dwellings within a lot, however the submitter has concerns that where land has been previously subdivided only the dwelling entitlement that was taken should count, and only on that parcel that was amalgamated. Any remaining entitlements that occur on the land should provide for entitlement to subdivide, and should not restrict subdivision of amalgamated titles where one of the parcels was not previously utilised.

Decision Reasons:

- The concern relates to subdivision entitlement, that where land has been previously subdivided only the dwelling entitlement that was taken should count.

Point Number 695.212

Summary of Decision Requested: **Amend** Rule 22.3.2 P1 (i) Minor dwelling by rephrasing to read:

The minor dwelling must be located within 20m of the existing dwelling.

Decision Reasons:

- No reasons provided.

Point Number 695.213

Summary of Decision Requested: **Amend** Rule 22.3.4.4 Buildings, structures and vegetation in a battlefield view shaft to have greater setbacks rather than the 5m maximum height.

Decision Reasons:

- A development on a steeply sloped site is severely penalised.
- The key issue is not the height of a dwelling, but the view shaft around.
- The 5m maximum is too low to be practical.

Point Number 695.214

Summary of Decision Requested: **Amend** Rule 22.3.5 P1 Daylight admission as follows:

A building must not protrude through a height control plane rising at an angle of ~~37~~ 45 degrees commencing at an elevation of ~~2.5~~ 2m above ground level at every point of the site boundary.

Decision Reasons:

- There is no logical planning reason for this differentiation.
- All daylight control planed should be consistent with each other and that are used by adjoining Councils.

Point Number 695.215

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P1 (a)(ii), P2(a)(ii), P3(a)(ii) and P4(a)(ii) Building setbacks – All boundaries, to include an exemption clause in the situation where an indicative road remains on the Planning Map but has been constructed and is open to the public, either in the same location or very near.

Decision Reasons:

- There is no effect under the Act to address in that circumstance.
- The issue has occurred twice when preparing resource consent applications.
- It is ultra-vires.

Point Number 695.216

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P1 (a)(iii) to change the setback requirement from 25m to 12m and remove the adjoining property size as follows:

12m from the boundary of an adjoining site ~~that is less than 6ha~~.

Decision Reasons:

- Auckland Council has one setback that applies regardless of the size of the adjoining property.
- If a property is 1ha in size, a 25m setback along three boundaries with a 7.5m setback to a road uses up to 65.75% of that property.
- In larger properties, the 25m setback can have dramatic impacts on production and activity potential.

Submitter Number: 696 **Submitter:** Brenda and Gavin Butcher

Organisation: Parkmere Farms

Point Number 696.1

Summary of Decision Requested: Amend the zoning of the properties in the area east of Pokeno, bounded by State Highway 2 to the north, Baird Road to the east, Avon Road to the south and State Highway 1 to the west from Rural Zone to Country Living Zone (Refer to map included in submission).

Decision Reasons:

- This area is contiguous with the existing Country Living Zone on the eastern side of State Highway 1.
- Due to the proximity of the Residential Zone the use of this land for rural uses is significantly constrained by reverse sensitivity complaints from the Residential Zone including odour and noise. This area is being use for primary rural industry including calf rearing, breeding horses, kiwifruit and drystock. These rural uses create amenity effects and the operation of these farms is being constrained by reverse sensitivity complaints arising from the Residential Zone.
- Rezoning will allow improved environmental outcomes with retirement and restoration of streams.
- Rezoning will result in improved water quality in the stream from retirement from farming.
- Rezoning meets the criteria in the Waikato Regional Policy Statement for rural-residential development.
- Enables existing accesses to State Highway 2 to be removed, as Avon, Fraser, Baird and Gulland Roads provide access opportunities.
- This area has constraints such as proximity to the State Highway, Transpower electricity transmission lines and a stream which are managed by the Proposed District Plan through setbacks and yard requirements.
- Provides additional housing choice to the stock offered in the Residential Zone in Pokeno.
- The use of this area for Country Living Zone is a more efficient use of the land.
- This area is serviced for reticulated water supply.
- This is a discrete area of land with defensible road boundaries.
- The area is separated from the Rural Zone by roads to prevent any consequential reverse sensitivity effects.
- It provides an effective transition from the Rural Zone by roads to prevent any consequential reverse sensitivity effects.
- State Highway 2 is a logical and defensible boundary between the Rural Zone and the Country Living and Residential Zone.
- State Highway 1 is a logical and defensible boundary between the Country Living and Residential Zone.
- A resource consent has already been granted for 96 Avon Road for a number of residential chalets. This development is of a density more akin to a residential development. This development will compromise any rural character and serves to illustrate that the character of the area is more consistent with the adjoining Country Living Zone than the Rural Zone.
- Will not undermine the form and function of Pokeno as an urban town.

Point Number 696.2

Summary of Decision Requested: Amend Rule 23.1.1 Permitted Activities, to include a small-scale childcare as a permitted activity.

Decision Reasons:

- Small-scale childcare offers a vital social service to the community.
- Small-scale childcare has no effects greater than a large family.
- The activity is appropriate in the Country Living Zone.
- Inclusion of small-scale childcare as a separate activity will clarify the distinction between home occupations (which are permitted) and education facility (which currently requires consent as a Discretionary activity).

Point Number 696.3

Summary of Decision Requested: Amend Rule 22.1.2 Permitted Activities, to include small scale childcare as a permitted activity.

Decision Reasons:

- Small-scale childcare offers a vital social service to the community.
- Small-scale childcare has no effects greater than a large family.
- This activity is appropriate in the Rural Zone and will not undermine the rural character.
- Inclusion of childcare as a separate activity will clarify the distinction between home occupations (which are permitted) and education facility (which currently requires a consent as a discretionary activity).

Point Number 696.4

Summary of Decision Requested: Retain Rule 22.1.2 P1 Permitted Activities (Equestrian Centre).

Decision Reasons:

- Equestrian centres are appropriate in the Rural Zone
- They generate less effects than farming activities.

Point Number 696.5

Summary of Decision Requested: Amend Rule 23.3.6 P1 Building coverage, as follows:
The total building coverage must not exceed 10% or ~~300m²~~ 400m², whichever is the larger.

Decision Reasons:

- This is a consequential amendment to enabling a smaller minimum site size.
- It will still enable a useable gross floor area of principal dwelling, minor dwelling and accessory buildings.
- It will still ensure an open and spacious character is in accordance with the large lot residential form of the Country Living Zone.

Point Number 696.6

Summary of Decision Requested: Retain Rule 23.3.2 Minor dwelling, including the following aspects:

(a) A single minor dwelling is a permitted activity;

(b) 70m² as the maximum gross floor area

(c) The absence of limitations on the type of person occupying the minor dwelling (e.g. dependent family member);

(d) Absence of provisions requiring the minor dwelling to be temporary.

Decision Reasons:

- Minor dwellings provide housing choice, particularly when families are changing in their makeup
- Minor dwellings provide an affordable option for housing.
- The limit on the size ensures they will be secondary to the primary dwelling.
- For the elderly, minor dwellings enable independent living, while still being close enough to family to have supported living.
- In terms of effects, particularly with the size limit, they are no different to a sleepout.
- The effects and their occupancy rate are no different to a large primary dwelling.

Point Number	696.7
Summary of Decision Requested:	Retain Rule 22.3.2 Minor dwelling (a) A single minor dwelling is a permitted activity; (b) 70m ² as the maximum gross floor area (c) The absence of limitations on the type of person occupying the minor dwelling (e.g. dependent family member); (d) Absence of provisions requiring the minor dwelling to be temporary.
Decision Reasons:	<ul style="list-style-type: none"> Minor dwellings provide housing choice, particularly when families are changing in their makeup Minor dwellings provide an affordable option for housing. The limit on the size ensures they will be secondary to the primary dwelling. For the elderly, minor dwellings enable independent living, while still being close enough to family to have supported living. In terms of effects, particularly with the size limit, they are no different to a sleepout. The effects and their occupancy rate are no different to a large primary dwelling.

Point Number	696.8
Summary of Decision Requested:	Delete Rule 22.3.2(b)(i) Minor dwelling, which requires the minor dwelling to be within 20m of the primary dwelling.
Decision Reasons:	<ul style="list-style-type: none"> The condition is arbitrary. On a Rural zoned property, sheds can be located anywhere on the property so long as they comply with the yard requirements and daylight admission rules. Minor dwellings should have a similar approach. There are no effects with a minor dwelling being located greater than 20m from the principal dwelling. Will allow more effective use of the land and more optimal layout. No need for the principal and minor dwelling to be located in close proximity.

Point Number	696.9
Summary of Decision Requested:	Retain Rule 23.3.7.2 P1 (a)(ii) Building setback - sensitive land use.
Decision Reasons:	<ul style="list-style-type: none"> 15m setback from a national route or regional arterial boundary is an appropriate minimum setback to mitigate against noise and vibration effects generated from the State Highway.

Point Number	696.10
Summary of Decision Requested:	Amend Rule 22.3.6 P1 Building coverage, by increasing the permitted building coverage limits.
Decision Reasons:	<ul style="list-style-type: none"> For genuine rural enterprises, accessory buildings such as hay sheds, stables, garages, tractor sheds are necessary. The proposed limit of 2% or 500m² (whichever is the larger) is too constraining to enable the level of buildings required to support rural production activities.

Point Number	696.11
Summary of Decision Requested:	Retain Rule 22.1.2 P12 Permitted Activities (Horse Training Centre)
Decision Reasons:	<ul style="list-style-type: none"> Horse training centres are appropriate in the Rural Zone. They generate lesser effects than farming activities.

Point Number	696.12
Summary of Decision Requested:	Amend Rule 23.4.2 RDI (a)(i) General Subdivision, as follows: All proposed lots must have a net site area of at least 5000 <u>3000m²</u> .
Decision Reasons:	<ul style="list-style-type: none"> There is no need or justification for a 5000m² minimum lot size. The residents living in these areas have urban expectations and struggle to maintain 5000m². The Country Living Zone is actually a large lot residential and is not a rural zone. A smaller site size is more in accordance with this housing and living choice. Reducing the minimum lot size will enable more efficient use of the land. Aligns more clearly with the 2500m² minimum site size required for on-site wastewater management. Still enables an open and spacious character, in accordance with the large lot residential form of the Country Living Zone.

Submitter Number:	697	Submitter:	Waikato District Council
--------------------------	-----	-------------------	--------------------------

Point Number	697.1
Summary of Decision Requested:	Amend Rule 14.3.3 RDI Restricted Discretionary Activities by deleting clauses (v) and (vii).
Decision Reasons:	<ul style="list-style-type: none"> Matters of discretion relate to earthworks but this is more appropriately covered in RD2.

Point Number	697.2
Summary of Decision Requested:	Delete Rule 14.3.4 DI Discretionary Activities AND

Amend Rule 14.3.4 as a consequential amendment by renumbering (D2) to (D4) and (D1) to (D3).

Decision Reasons:

- This captures structures such as powerpoles which are more appropriately addressed through the relevant sections of Chapter 14 eg Rules 14.5 and 14.10. As the road controlling authority, Council or NZTA respectively can determine which structures are appropriate in the road.

Point Number

697.3

Summary of Decision Requested:

Amend Rule 14.4.1 (P1) Permitted Activities Buildings, structures and sensitive land uses within the National Grid Yard in existing Residential or Village Zones as of 18 July 2018 by relocating its activity specific conditions in Rule 14.4.1.1 into Chapters 16 and 24

AND

Retain those parts of Rule 14.4.1 (P1) and 14.4.1.1 which relate to rules regarding network utilities as follows:

~~(P1) Infrastructure buildings, and structures and sensitive land uses within the National Grid Yard in existing Residential or Village Zones as of 18 July 2018~~

14.4.1.1

(1) Within the National Grid Yard in the Residential or Village Zone:

~~(a) Building alterations and additions to an existing building or structure for a sensitive land use that does not involve an increase in the building height or footprint;~~

~~(b) New buildings and structures that are not for a sensitive land use;~~

~~(c) (g) Infrastructure (other than for the reticulation and storage of water for irrigation purposes) undertaken by a network utility operator as defined in the Resource Management Act 1991.~~

...

Decision Reasons:

- Relocate into Chapter 16 and 24 so it is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number

697.4

Summary of Decision Requested:

Amend Rule 14.4.1 P2 Permitted Activity Buildings, structures and sensitive land use within the National Grid Yard in all other zones as of 18 July 2018 (and its associated standards) by relocating into Chapters 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28 where these zones are relevant to the location of the National Grid.

Rule 14.4.1.2(1)(c) Buildings, structures and sensitive land use within the National Grid Yard in all other zones as of 18 July 2018 will apply solely to the Rural Zone and Country Living Zone (Chapter 22 and 23 respectively).

AND

Undertake consequential renumbering in the zone chapters.

AND

Delete 14.4.1 (P2) and its activity specific conditions in 14.4.1.1 from Chapter 14.

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number

697.5

Summary of Decision Requested:

Amend Rule 14.4.1.2(4)(b) Buildings, structures and sensitive land use within the National Grid Yard in all other zones as of 18 July 2018 In its relocated positions, as follows:

(4) Artificial crop protection and support structures between 8m and 12m from a single pole support structure and any associated guy wire (but not tower) must:

...

(b) Be ~~maximum~~ no higher than 2.5m high.

Decision Reasons:

- Amend for clarity that artificial crop protection needs to be less than 2.5m.
- This will apply to the rule that is inserted into the zone chapters.

Point Number

697.6

Summary of Decision Requested:

Amend Zone Chapters by replicating Rule 14.4.1 Earthworks activities within the National Grid Yard P3 and its activity-specific conditions in Rule 14.4.1.3 into Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 where these zones are relevant to the location of the National Grid.

AND

Consequential renumbering will be required in the zone chapters.

Decision Reasons:

- Replicate this rule into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number

697.7

Summary of Decision Requested:

Amend Rule 14.4.1(P3) Permitted Activity Earthworks activities within the National Grid Yard as follows:

Earthworks activities ~~associated with infrastructure~~ within the National Grid Yard.

AND

Amend Rule 14.4.1.3 Earthworks activities within the National Grid Yard as follows:

(1) Earthworks ~~must for National Grid support poles and any stay wires~~ that comply with the following conditions:

(a) ...

(2) Earthworks ~~for National Grid must comply with all of the following conditions near support towers (including any tubular steel tower that replaces a steel lattice tower) that comply with all of the following conditions:~~

(a) ...

(3) ...

(b) Earthworks undertaken as part of agricultural or domestic cultivation, or repair, sealing or resealing of a road, footpath, driveway or farm track;

(c) ...

~~are a post hole for a farm fence or horticulture structure more than 6m from the visible outer edge of a tower support structure foundation;~~

(d) ...

Decision Reasons:

- Amend the rule so that it is clear that it is referring to earthworks in close proximity to National Grid structures.

Point Number

697.8

Summary of Decision Requested:

Amend Rule 14.4.1.3(2)(b) Earthworks activities within the National Grid Yard as follows:

(b) Do not exceed 3m depth between 6m and 12m of the outer edge of the visible foundation of the tower;

Decision Reasons:

- Provide additional clarity that the measurement is referring to depth.

Point Number

697.9

Summary of Decision Requested:

Amend Zone Chapters by Replicating Rule 14.4.2 (RD3 and its associated matters of discretion) into Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 where these zones are relevant to the location of the National Grid. Consequential renumbering will be required in the zone chapters.

AND

Retain Rule 14.4.2(RD3) in Chapter 14.

Decision Reasons:

- Replicate this rule into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number

697.10

Summary of Decision Requested:

Amend Zone Chapters by Replicating Rule 14.4.2 (RD4 and its associated matters of discretion) into Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 where these zones are relevant to the location of the National Grid.

AND

Consequential renumbering will be required in the zone chapters.

Decision Reasons:

- Replicate the rule into the zone chapters so the rule is more easily able to be found. The rule is focused on subdivision rather than infrastructure.

Point Number

697.11

Summary of Decision Requested:

Amend Rule 14.4.2.1 RD4 Restricted Discretionary Activities as follows:

The subdivision of land in any zone within the National Grid Corridor for the purposes of infrastructure that complies with all of the following conditions...

Decision Reasons:

- Focus the rule in Chapter 14 on subdivision for infrastructure to avoid duplication when the rule is moved into other chapters.

Point Number

697.12

Summary of Decision Requested:

Amend Rule 14.4.4 NC2 Non-Complying Activities as follows:

Transformers, substations and switching stations associated with the National Grid located within identified areas ~~identified areas~~

Decision Reasons:

- Minor amendment to remove duplication.

Point Number

697.13

Summary of Decision Requested:

Amend Chapters 16 and 24 by Replicating Rule 14.4.4 NC3 into Chapters 16 and 24, with consequential renumbering in the zone chapters.

Decision Reasons:

- Replicate rule into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure. Retain rule in Chapter 14 to address infrastructure within the National Grid Yard.

Point Number

697.14

Summary of Decision Requested:

Amend Zone Chapters by Relocating Rule 14.4.4 NC4 into Chapters 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28 where these zones are relevant to the location of the National Grid.

AND

Undertake consequential renumbering in the zone chapters.

Decision Reasons:

- Replicate rule into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number

697.15

Summary of Decision Requested:

Amend Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 by relocating Rule 14.4.4 NCS into where these zones are relevant to the location of the National Grid.

AND

Undertake consequential renumbering in the zone chapters.

And
Delete 14.4.4 NC5 from Chapter 14.

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.16

Summary of Decision Requested: **Amend** Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 by relocating Rule 14.4.4 NC6 into where these zones are relevant to the location of the National Grid.

AND
Undertake consequential renumbering in the zone chapters.
AND
Delete 14.4.4 NC6 from Chapter 14.

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.17

Summary of Decision Requested: **Amend** Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 by relocating Rule 14.4.4 NC7 into where these zones are relevant to the location of the National Grid.

AND
Undertake consequential renumbering in the zone chapters.
And
Delete 14.4.4 NC7 from Chapter 14.

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.18

Summary of Decision Requested: **Amend** Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 by replicating Rule 14.4.4 NC8 into where these zones are relevant to the location of the National Grid.

AND
Undertake consequential new numbering in the zone chapters.
AND
Retain 14.4.4 NC8 in Chapter 14.

Decision Reasons:

- Replicate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.19

Summary of Decision Requested: **Amend** Chapters 22, 23, 24, by relocating Rule 14.4.4 NC9 into where these zones are relevant to the location of the National Grid and these activities occurring.

AND
Undertake consequential renumbering in the zone chapters.
AND
Delete 14.4.4 NC9 from chapter 14

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.20

Summary of Decision Requested: **Amend** Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28 by replicating Rule 14.4.4 NC10 into where these zones are relevant to the location of the National Grid.

AND
Undertake consequential renumbering in the zone chapters.
AND
Retain 14.4.4 NC10 in Chapter 14.

Decision Reasons:

- Replicate into the zone chapters so the rule is more easily able to be found.
- The rule is focused on subdivision rather than infrastructure.

Point Number 697.21

Summary of Decision Requested: **Amend** Rule 14.5.1(b) Permitted Activities as follows:
(b) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific area, height, location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number 697.22

Summary of Decision Requested: **Add** to Rule 14.5.1.2 Permitted Activities a new clause (v) as follows:
(v) Maximum height 10m

Decision Reasons:

- Identify a maximum height as a consequential amendment of changes to 14.2.1(P1)(1).

Point Number 697.23

Summary of Decision Requested: **Amend** Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28. by relocating Rule 14.5.1 (P5) into these chapters
AND
Undertake consequential renumbering in the zone chapters.
AND
Delete Rule 14.5.1(P5) from Chapter 14.

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.24

Summary of Decision Requested: **Amend** Chapters 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28. by relocating Rule 14.5.2 RD2 Construction or alteration of a building for a sensitive land use into these chapters
AND
Undertake consequential renumbering in the zone chapters.
AND
Delete Rule 14.5.2 RD2 from Chapter 14.

Decision Reasons:

- Relocate into the zone chapters so the rule is more easily able to be found. The rule is focused on landuse rather than infrastructure.

Point Number 697.25

Summary of Decision Requested: **Amend** Rule 14.6.1(b) Permitted Activities as follows:
(b) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific ~~area, height,~~ location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number 697.26

Summary of Decision Requested: **Add** to Rule 14.6.1.1(a) Permitted Activity a new clause (l) as follows:
(l) All other structures not listed above must not be higher than the maximum building height limit of the zone in which they are located.

Decision Reasons:

- Identify a maximum area as a consequential amendment of changes to 14.2.1(P1)(1).

Point Number 697.27

Summary of Decision Requested: **Amend** Rule 14.6.3 D1 Discretionary Activities as follows:
Large-scale wind farms located within the Rural Zone, not within an identified area.

Decision Reasons:

- More complete rule cascade.

Point Number 697.28

Summary of Decision Requested: **Amend** Rule 14.6.4 NCI Non-Complying Activities as follows:
NCI Large-scale wind farms ~~not located within a zone other than the Rural Zone, including within an Identified Area~~
AND
Add new 14.6.4 NC2 as follows:
NC2 Large-scale wind farm located within the Rural Zone and within an Identified Area

Decision Reasons:

- No reasons provided.

Point Number 697.29

Summary of Decision Requested: **Amend** Rule 14.7.1(b) Permitted Activity as follows:

(b) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific ~~area, height,~~ location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number 697.30

Summary of Decision Requested: **Amend** Rule 14.7.1 P1 Permitted Activities as follows:
P1 Below ground pipelines for the conveyance of liquid fuels and gas, not within an Identified Area
AND
Delete Rule 14.7.1.1 (iii) Permitted Activities.

Decision Reasons:

- Provides additional clarity for the rule.

Point Number 697.31

Summary of Decision Requested: **Amend** Rule 14.7.2 P2 Permitted Activities Below ground pipelines located within an Identified Area as follows:
P1 Below ground pipelines for the conveyance of liquid fuels and gas, located within an Identified Area.

Decision Reasons:

- This would provide additional clarity.

Point Number 697.32

Summary of Decision Requested: **Amend** Rule 14.8.1(b) Permitted Activities as follows:
(b) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific ~~area, height,~~ location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number 697.33

Summary of Decision Requested: **Add** a new clause (v) to Rule 14.8.1.2 Permitted Activities as follows:
(v) Maximum area is 10m².

Decision Reasons:

- Identify a maximum area as a consequential amendment of changes to 14.2.1(P1)(1).

Point Number 697.34

Summary of Decision Requested: **Amend** Rule 14.8.1.2 (a)(ii) Permitted Activities as follows:
(ii) There shall be no more than one structure, instrument or device per site;

Decision Reasons:

- The intention is to restrict structures not panels or instruments. Amendments to focus on the number of structures.

Point Number 697.35

Summary of Decision Requested: **Delete** Rule 14.8.2 (a)(vi) Restricted Discretionary Activities.

Decision Reasons:

- The rules do not apply to Identified Areas.

Point Number 697.36

Summary of Decision Requested: **Add** to Rule 14.8.3 Discretionary Activities as follows:
D3 Meteorological enclosures and buildings, including automatic weather stations that do not comply with one or more conditions in Rule 14.8.3(P1).
D4 Meteorological and air quality monitoring structures and devices that do not comply with one or more conditions in Rule 14.8.3(P2).

Decision Reasons:

- There is currently no activity cascade for meteorological structure or activities that do not comply with one of more conditions in Rule 14.8.1(P1) or (P2). Include a discretionary rule to cover this scenario.

Point Number 697.37

Summary of Decision Requested: **Amend** Rule 14.9.1(b) Permitted Activities as follows:
(b) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific ~~area, height,~~ location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number 697.38

Summary of Decision Requested: Amend Rule 14.9.2 RDI Restricted Discretionary Activities as follows:
Amateur radio configurations that are not located on a road, unformed road or Identified Area, and do not comply with one or more of the conditions of Rules 14.9.1.1, 14.9.1.2 and 14.9.1.3

Decision Reasons:

- Additional clarity to the rule and reducing duplication where one activity could be covered by multiple rules.

Point Number 697.39

Summary of Decision Requested: Amend Rule 14.10.1(b) Permitted Activities as follows:

(b) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific ~~area, height,~~ location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number 697.40

Summary of Decision Requested: Amend Rule 14.10.1.1 P1 (a) Permitted Activities by adding new clauses (ii) and (iii) to as follows:

(ii) Not exceed 10m² in area above-ground;
(iii) Not exceed 2.5m in height.

Decision Reasons:

- Include maximum height and area as a consequential amendment to Rule 14.2.1(P1)(1).

Point Number 697.41

Summary of Decision Requested: Amend Rule 14.10.1.2 P3 (a) Permitted activities by adding new clauses (ii) and (iii) as follows:

(ii) Not exceed 10m² in area above-ground;
(iii) Not exceed 2.5m in height.

Decision Reasons:

- Include maximum height and area as a consequential amendment to Rule 14.2.1(P1)(1).

Point Number 697.42

Summary of Decision Requested: Amend Rule 14.10.1.4 P5 (b) Permitted Activities as follows:

(b) Rule 14.10.1.4 does not apply to private television antennas and satellite dishes ~~+2~~.

Decision Reasons:

- Amend notation for accuracy.

Point Number 697.43

Summary of Decision Requested: Amend Rules 14.10.1.6 P8 (a)(i) Permitted activities as follows:

(i) Do not exceed a maximum ~~volumetric dimension~~ volume of 0.25m²;

AND

Amend Rule 14.10.2 C7 Controlled Activities as follows:

Small cell units located within an Identified Area exceeding the maximum ~~volumetric dimension~~ volume of 0.11m² regulated in the NESTF, up to a maximum volume of 0.25m².

Decision Reasons:

- Simplify wording to refer to "volume".

Point Number 697.44

Summary of Decision Requested: Amend Rule 14.10.1.9 P11 Permitted Activities by adding new clauses (iv) and (v) as follows:

(iv) Not exceed 10m² in area above-ground;
(v) Not exceed 2.5m in height.

Decision Reasons:

- Include maximum height and area as a consequential amendment to Rule 14.2.1(P1)(1).

Point Number 697.45

Summary of Decision Requested: Amend Rule 14.10.1.11 P13 Permitted Activities by adding new clauses (iii) and (iv) as follows:

(iii) Not exceed 10m² in area above-ground;
(iv) Not exceed 2.5m in height.

Decision Reasons:

- Include maximum height and area as a consequential amendment to Rule 14.2.1(P1)(1).

Point Number 697.46

Summary of Decision Requested: Amend Rule 14.10.2 Controlled Activities by renumbering C5 (a) Dish antennas... as C6

AND

Consequently **renumber** the remaining controlled activities.

Decision Reasons:

- There are two C5 activities. Renumber for improved clarity.

Point Number

697.47

Summary of Decision Requested:

Amend Rule 14.11.1(2) Permitted Activities as follows:

(2) Rule 14.2.1.1 will apply to the activities set out in this table unless there is a specific ~~area, height,~~ location and noise condition listed below.

Decision Reasons:

- Consequential amendment of changes to Rule 14.2.1(P1)(1).

Point Number

697.48

Summary of Decision Requested:

Add a new rule to Rule 14.11.1 Permitted Activities as follows:

Water servicing for new development or subdivision

AND

Add new activity specific conditions (14.11.1.10) as follows:

(a) Development or subdivision within the Residential, Village, Business, Business Town Centre, Industrial, Industrial Zone Heavy, Reserve, Te Kowhai Airport and Rangitahi Peninsula Zone must have a water supply that complies with the following conditions:

(i) Is connected to public, reticulated water network if a reticulated system is within 20m of the site;

(ii) Water supply must be provided on site if a public, reticulated water supply is not available.

(b) Development in the Rural, Country Living and Motorsport and Recreation Zone must have a water supply on-site

Decision Reasons:

- Include a rule with standards regarding water supply. There are currently rules requiring stormwater and wastewater to be managed, but there is no equivalent rules requiring an adequate water supply to be provided. Further investigation is needed as to the most appropriate condition because the rule needs to apply where a reticulated supply is in close proximity to the newly created site, but may not be adjacent (i.e. it may be across the other side of the road).

Point Number

697.49

Summary of Decision Requested:

Add a new activity RD10 to Rule 14.11.2 Restricted Discretionary Activities as follows:

RD10 Water supply that does not comply with Rule 14.11.1(P1)

Discretion is restricted to:

(a) Health and safety of the occupants; and

(b) Sufficiency of supply for fire fighting.

Decision Reasons:

- Include a restricted discretionary activity for development or subdivision that does not comply with the water supply rule.

Point Number

697.50

Summary of Decision Requested:

Amend Rule 14.11.1 (i) Permitted Activities Notes to replace the reference of the "Regional Infrastructure Technical Specifications" to the correctly reference and renumber the notes.

AND

Amend Rule 14.11.1 Permitted Activities to correct numbering.

Decision Reasons:

- Update the reference to Regional Infrastructure Technical Specifications. Numbering of the notes needs correcting.

Point Number

697.51

Summary of Decision Requested:

Delete Rule 14.11.1 P2 Permitted Activities The establishment of impervious surfaces associated with new development or subdivision and 14.11.1.2 from Chapter 14;

AND

Amend Chapters 16, 28, 24, 23 by relocating Rule 14.11.1 P2 and activity specific conditions in 14.11.1.2 into these chapters.

Decision Reasons:

- Relocate this rule into chapters 16, 28, 24, 23 as this is more logically located in the zone chapters.

Point Number

697.52

Summary of Decision Requested:

Amend Rule 14.11.1(P4) Permitted Activities as follows:

~~Below ground~~ Pipelines for the conveyance of water, wastewater and stormwater

Decision Reasons:

- Correct the activity so that it more accurately reflects the conditions.

Point Number

697.53

Summary of Decision Requested:

Add new clauses (ii) and (iii) to Rule 14.11.1.6 P6 (a) Permitted Activities as follows:

(ii) Not exceed 10m² in area above-ground;

(iii) Not exceed 2.5m in height.

Decision Reasons:

- Include maximum height and area as a consequential amendment to Rule 14.2.1(P1)(1).

Point Number 697.54

Summary of Decision Requested: **Amend** Rule 14.11.1 P7 Permitted Activities as follows:
 (a) Stormwater treatment, detention and retention facilities or devices, excluding stormwater wetlands or ponds that comply with the following:
~~(i) is not a stormwater wetland or pond.~~

Decision Reasons:

- Amend so that the activity description is more accurate.

Point Number 697.55

Summary of Decision Requested: **Amend** Rule 14.11.8 P8 Permitted Activities Stormwater ponds or wetlands to correct numbering
 AND
 As a consequential amendment renumber P9 and P10.

Decision Reasons:

- The numbering of the conditions needs correcting to avoid duplication.

Point Number 697.56

Summary of Decision Requested: **Delete** Rule 14.11.2(RD2) Restricted Activities and associated matters of discretion from Chapter 14
 AND
Amend Chapters 16, 28, 24, 23 by relocating Rule 14.11.2 (RD2) and matters of discretion into these chapters.

Decision Reasons:

- Relocate this rule into chapters 16, 28, 24, 23 as this is more logically located in the zone chapters

Point Number 697.57

Summary of Decision Requested: **Amend** Rule 14.11.2 RD6 Restricted Discretionary Activities as follows:
 Stormwater ponds or wetlands, that serve more than one site, located within:
 (i) Residential Zone
 (ii) Rangitahi Peninsula Zone
 (iii) Village Zone
 (iv) Country Living Zone
 (v) Road and unformed road
 (vi) Identified Area

Decision Reasons:

- This is to correct the numbering.
- The amendments as they are currently are hard to read.

Point Number 697.58

Summary of Decision Requested: **Amend** Rule 14.11.3 D1 Discretionary Activities as follows:
 Water treatment plants not located within road ~~and~~ or unformed road or an Identified Area.

Decision Reasons:

- This will increase the clarity of this rule.

Point Number 697.59

Summary of Decision Requested: **Amend** Rule 14.11.3 D2 Discretionary Activities as follows:
 Wastewater treatment plants located within the following:
 (i) Industrial Zone
 (ii) Heavy Industrial Zone
 (iii) Motor Sport and Recreation Zone
 (iv) Rural Zone
 (v) Country Living Zone
 (vi) Reserve Zone

Decision Reasons:

- This is to correct the numbering.
- The amendments as they are currently are hard to read.

Point Number 697.60

Summary of Decision Requested: **Amend** Rule 14.11.4 NCI Non-Complying Activities as follows:
 Water treatment plants located within the following:
 (i) Road ~~and~~ or unformed road; or
 (ii) Identified Area

Decision Reasons:

- This will correct the numbering and improve clarity of the rule.
- The amendments as they are currently are hard to read.

Point Number	697.61
Summary of Decision Requested:	<p>Amend Rule 14.11.4 NC2 Non-Complying Activities as follows:</p> <p>Wastewater treatment plants located within the following:</p> <p>(iii) Residential Zone (iii) Rangitahi Peninsula Zone (iii) Village Zone (iii) Business Zone (iii) Business Town Centre Zone (iii) Tamahere Business Zone (iii) Te Kowhai Airpark Zone (iii) Road and unformed road (iii) Identified Area</p>
Decision Reasons:	<ul style="list-style-type: none"> This is to correct the numbering. The amendments as they are currently are hard to read.
Point Number	697.62
Summary of Decision Requested:	<p>Amend Rule 14.12.1.2(1)(a)(iv) Permitted Activities as follows:</p> <p>iv. The requirements of Table 14.12.5.7 do not apply to residential and rural activities;</p>
Decision Reasons:	<ul style="list-style-type: none"> Remove reference to residential activities because the tables relate to residential activities, and contain standards for residential activities.
Point Number	697.63
Summary of Decision Requested:	<p>Amend Rule 14.12.1.2 P2 (1)(c) Permitted Activities as follows:</p> <p>(c) Any on-site car parking spaces for non-residential activities within the Residential Zones must be set back at least 3m from the road boundary of the site and screened by planting or fencing from being viewed from the road;</p>
Decision Reasons:	<ul style="list-style-type: none"> This will improve the clarity of measurability of this rule.
Point Number	697.64
Summary of Decision Requested:	<p>Amend Rule 14.12.1.2(1)(e) Permitted Activities On-site parking and loading as follows:</p> <p>(e) On-site car parking spaces and loading bays are formed to be sealed if five or more parking spaces are required</p>
Decision Reasons:	<ul style="list-style-type: none"> Improved clarity and measurability of the rule.
Point Number	697.65
Summary of Decision Requested:	<p>Amend Rule 14.12.1.2 P2 (1)(g) Permitted Activities as follows:</p> <p>(g) On-site car parking spaces and loading bays are not to be located on any shared access or residential living court;</p>
Decision Reasons:	<ul style="list-style-type: none"> The terminology needs to be consistent.
Point Number	697.66
Summary of Decision Requested:	<p>Amend Rule 14.12.1.3 P3 (1)(a) Permitted Activities as follows:</p> <p>(a) On-site manoeuvring space shall be provided to ensure that no vehicle is required to reverse onto from or to a road except..</p>
Decision Reasons:	<ul style="list-style-type: none"> This will increase the clarity of this rule.
Point Number	697.67
Summary of Decision Requested:	<p>Amend Rule 14.12.1.4(1) Permitted activities as follows:</p> <p>(f) ... i. All traffic vehicle movements generated from all activities on the site combined (including those movements which were lawfully established prior to 5 December 2012), there is a maximum 750 vehicle movements per day; and ii. ... (g) ... i. All traffic vehicle movements generated from all activities on the site combined (excluding those movements which were lawfully established prior to 5 December 2012), there is maximum 350 vehicle movements per day;</p>
Decision Reasons:	<ul style="list-style-type: none"> This will provide consistency between the terms used.
Point Number	697.68
Summary of Decision Requested:	<p>Amend Rule 14.12.1.4 Permitted Activities Traffic generation as follows:</p> <p>(1) Any activity <u>Each site</u> must comply with the following traffic generation conditions:</p>
Decision Reasons:	

- Clarity that the traffic generation applies per site as it is not clear from the rules.

Point Number 697.69

Summary of Decision Requested: **Amend** Rule 14.12.1.6(1)(d)(ii) Permitted Activities New public roads, including where the road has been identified on the planning maps as an Indicative road, and associated road network activities as follows:

ii. Have swale drains on both sides of the carriageway capable of collecting all road runoff and overland flow towards the road or right of way from a 20% Annual Exceedance ~~Period~~ Probability event; and

Decision Reasons:

- Consistency with defined terms.

Point Number 697.70

Summary of Decision Requested: **Amend** Rule 14.12.1.6(1)(a) Permitted Activities New public roads, including where the road has been identified on the planning maps as an Indicative road, and associated road network activities as follows:

(a) The public road is located within road or unformed road as shown on the planning maps;

Decision Reasons:

- Improved clarity of the rule.

Point Number 697.71

Summary of Decision Requested: **Amend** Rule 14.12.1 P8 Permitted Activities Off-road pedestrian and cycle facilities as follows:
Off-road pedestrian and cycleways facilities

AND

Amend Rule 14.12.1.8(a) as follows:
(a) Off-road pedestrian and cycleways cycling facilities that comply with all of the following conditions:

Decision Reasons:

- Improved clarity of the rule and consistency of terminology.

Point Number 697.72

Summary of Decision Requested: **Amend** Rule 14.12.2 RD2 Restricted Discretionary On-site parking and loading that does not comply with one or more of the conditions of Rule 14.12.1.2 by adding a new matter of discretion as follows:

Discretion is restricted to:

(a) The number, area, type, location and marking of parking spaces;
(b) The area, design, gradient, stormwater management, construction and materials of parking and loading spaces,
(c) Accessibility of parking areas from on-site activities;
(d) Safety for vehicles and pedestrians;
(e) Mitigation to address amenity and connectivity.
(f) Need for parking spaces.

Decision Reasons:

- Inclusion of a new matter of discretion to address parking demand and requirements.

Point Number 697.73

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays to add two new activities as follows:

Activity:
Dwellings located within the Lakeside Te Kauwhata Precinct.

Minimum Required Parking Spaces:
1 car space per dwelling on a site less than 300m² in area; or
2 car spaces per dwelling on a site greater than 300m² in area.

Minimum Required Loading Bays: Nil

Activity:
Retirement villoges located within the Lakeside Te Kauwhata Precinct.

Minimum Required Parking Spaces:
0.5 car spaces per independent dwelling or unit and 1 visitor car space per 10 residents.

Minimum Required Loading Bays: Nil

Decision Reasons:

- The car parking provisions for Lakeside (as per the decisions version of Plan Change 20) have been inadvertently missed from the table.

Point Number 697.74

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays in the activity for "Health facility, veterinary and personal services", the minimum required parking spaces (second column) to read:

3 car spaces per ~~professional-full time staff equivalent~~

Decision Reasons:

- In the activity "health facility, veterinary and personal services", the requirements for 3 spaces per professional should be amended to be "full time staff equivalent" to be consistent with the requirements for other activities.

Point Number 697.75

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays in the activity for "Indoor sports facility", the minimum required parking spaces (second column) as follows:

4 car spaces per sports court or 1 car space per 4 persons provided for in the design, whichever is the greater number of carparks

Decision Reasons:

- Additional clarity for the rule regarding indoor sports facilities

Point Number 697.76

Summary of Decision Requested: Amend Table 14.12.5.7 Required parking spaces and loading bays by replacing throughout the table, "HGV" with "heavy goods vehicle"

Decision Reasons:

- Additional clarity by reducing the number of acronyms.

Point Number 697.77

Summary of Decision Requested: Amend Table 14.12.5.10 Required bicycle spaces to include a diagram or standard for the size of a bicycle space .

Decision Reasons:

- Additional clarity for the rule.

Point Number 697.78

Summary of Decision Requested: Amend Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) and its heading to include the Te Kowhai Airpark, Rangitahi Peninsula and Motorsport and Recreation zones where appropriate.

Decision Reasons:

- Te Kowhai Airpark Zone, Rangitahi Peninsula Zone and Motorsport and Recreation Zone are missing from the heading.

Point Number 697.79

Summary of Decision Requested: Amend Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) by updating the footnote references to the Regional Integrated Technical Specifications to reflect the correct title and version.

Decision Reasons:

- Update the references to the external document "Regional Integrated Technical Specifications".

Point Number 697.80

Summary of Decision Requested: Add to Rule 14.12.1 Permitted Activities a new rule as follows:

P10

Esplanade reserves and strips where a road is stopped.

14.12.1.10

(a) Where land comprising a stopped road or any part of a stopped road adjoins:

(i) the mark of mean high water springs of the sea; or

(ii) the bank of any river with an average width of 3 metres or more; or

(iii) the margin of any lake with an area of 8 hectares or more.

Section 345(3) of the Local Government Act 1974 and section 118 of the Public Works Act 1981 will apply only where the land comprising the stopped road or part of the stopped road is identified.

(iv) in Appendix 5 (Esplanade Priority Areas); or

(v) on the planning maps as requiring an esplanade reserve, esplanade strip or access strip to be set aside.

AND

Add a new rule in Discretionary Rule 14.12.3 as follows:

D3

Esplanade reserves where a road is stopped that does not comply with Rule 14.12.1.10

Decision Reasons:

- Include a rule to clarify the situation for road stopping and esplanade reserves and strips. Even though this rule is regarding esplanade reserves, it needs to apply district-wide.

Point Number 697.81

Summary of Decision Requested: Amend Table 14.12.5.1 Separation distances by replacing the term "Speed Environment" with "Design Speed."

Decision Reasons:

- More accurate terminology.

Point Number 697.82

Summary of Decision Requested: Amend Table 14.12.5.3 Minimum sight distances by replacing the term "Speed Environment" to "Design Speed."

Decision Reasons:

- More accurate terminology.

Point Number 697.83

Summary of Decision Requested: Add to Table 14.12.5.3 Minimum sight distances: by including the following after the:

<u>Road Centreline Radius</u>	<u>Approx. Design Speed</u>
<u>0 - 45m</u>	<u>50 kmh</u>
<u>45 - 60m</u>	<u>60 kmh</u>
<u>60 - 80m</u>	<u>65 kmh</u>
<u>80 - 100m</u>	<u>70 kmh</u>
<u>100 - 120m</u>	<u>75 kmh</u>
<u>120 - 150m</u>	<u>80 kmh</u>
<u>150 - 200m</u>	<u>85 kmh</u>
<u>200 - 300m</u>	<u>95 kmh</u>
<u>300 - 400m</u>	<u>100 kmh</u>
<u>>400m</u>	<u>110kmh</u>

Curve radius can be determined using the following formula:
Refer to original submission for diagram.

Include rules referencing 14.12.5.3's new diagrams where appropriate.

Decision Reasons:

- This speed environment table is required to go along with Table 14.12.5.3.

Point Number 697.84

Summary of Decision Requested: Amend Chapter 16: Residential Zone heading as follows:

Chapter 16: Residential Zone – Rules

Decision Reasons:

- To assist in clarifying that all of the provisions within the chapter are rules.

Point Number 697.85

Summary of Decision Requested: Amend Chapter 16: Residential Zone Rule 16(2) as follows:

The rules that apply to subdivision in the Residential Zone are contained in Rule 16.4 and the relevant rules in: 14 Infrastructure and Energy; and 15 Natural Hazards and Climate Change (Placeholder).

Decision Reasons:

- To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities

Point Number 697.86

Summary of Decision Requested: Amend Chapter 16: Residential Zone Rule 16(5) as follows:

The Residential Zone contains a Specific Area that is Lakeside Te Kauwhata Precinct ...to the rest of the Residential Zone.

Decision Reasons:

- Grammar.

Point Number 697.87

Summary of Decision Requested: Amend Rule 16.1.2 (1) Permitted Activities as follows:

~~(a) Activity-specific conditions;~~
~~(b) Land Use – Effects rules in Rule 16.2 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply);~~
~~(c) Land Use – Building rules in Rule 16.3 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply);~~
~~(d) Activity-specific conditions."~~

Decision Reasons:

- The list of rules (a) – (c) should follow the order that they appear.

Point Number 697.88

Summary of Decision Requested: Delete Rule 16.1.2 Permitted Activities Activity P2 Activity Specific: Condition (a) A Marae Complex or Papakainga Housing Development on Maaori Freehold Land or on Maaori Customary Land specific.

Decision Reasons:

- There was no intention to restrict building coverage for these activities.

Point Number 697.89

Summary of Decision Requested: Amend Rule 16.1.2 P2 Permitted Activities A Marae Complex or Papakainga Housing Development on Maaori Freehold Land or on Maaori Customary Land as follows:

(b) (i) A Concept Management Plan ~~approved~~ endorsed by the Maori Land Court AND

(c) (i) A Concept Management Plan ~~approved~~ endorsed by the Maori Land Court;

Decision Reasons:

- The correct term is "endorsed" rather than "approved".

Point Number 697.90

Summary of Decision Requested: **Amend** Rule 16.1.2 P3 (e)(i) Permitted Activities A new retirement village or alterations to an existing retirement village as follows:

Minimum service court is either:

(i) Apartment – Communal outdoor space (ie no individual service courts required of at least 5m2 with a minimum dimension of 1.5 metres for each apartment.

Decision Reasons:

- There is no minimum size for the communal service court which is required for a permitted activity standard. A 5m2 area for each apartment would be suitable for outdoor storage and washing lines.

Point Number 697.91

Summary of Decision Requested: **Amend** Rule 16.1.2 P3 (e)(ii) Permitted Activity A new retirement village or alterations to an existing retirement village as follows:

(iii) All other units – 10m2 with a minimum dimension of 1.5 metres for each unit.

Decision Reasons:

- There is no minimum dimension for the service court.

Point Number 697.92

Summary of Decision Requested: **Amend** Rule 16.1.2 P4 (f) Permitted Activities Home occupation to read as follows:

(f) For up to 4 people.

Decision Reasons:

- A maximum number of people is required for clarity.

Point Number 697.93

Summary of Decision Requested: **Delete** Rule 16.1.2 P9 Activity Specific Condition (b) Permitted Activity Home stay activity specific condition (b).

Decision Reasons:

- The condition is not relevant to the activity.

Point Number 697.94

Summary of Decision Requested: **Add** to Rule 16.1.2 Permitted Activity a new rule as follows:

P1.3 Childcare Facility

For up to 4 children that are not permanent residents at the home.

Decision Reasons:

- Childcare facilities for up to 4 children should be provided for in the residential zone.

Point Number 697.95

Summary of Decision Requested: **Amend** Rule 16.1.3 Restricted Discretionary Activities table heading into read as follows:

~~The Council's discretion shall be limited to the following matters: Matters of Discretion~~

Decision Reasons:

- Alignment with other zone chapters.

Point Number 697.96

Summary of Decision Requested: **Add** a new condition to Rule 16.1.3 RD1 Restricted Discretionary as follows:

A detailed site plan depicting the proposed record of title boundaries for each residential unit and any common areas (including access and services must be provided, ensuring that a freehold (fee simple or unit title subdivision complied with rule 16.4.4 (Subdivision – Multi-unit development);

AND

Add a new rule to Rule 16.1.3 as follows:

(d) where units or apartments are being proposed, the following minimum unit areas apply:

<i>Unit of Multi-Unit</i>	<i>Minimum Unit Area</i>
<i>Studio unit or 1 bedroom unit</i>	<i>60m²</i>
<i>2 bedroom unit</i>	<i>80m²</i>
<i>3 or more bedroom unit</i>	<i>100m²</i>

Decision Reasons:

- To set a density standard that would determine the number of units that could be built on a site and to ensure that each residential unit is contained within an area that would enable subdivision.

Point Number	697.97
Summary of Decision Requested:	Amend Rule 16.1.4 D1 Discretionary Activities to read as follows: <i>Any permitted activity that does not comply with <u>one or more of the</u> the 'Activity-Specific Conditions' in Rule 16.1.2.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Consistency with other chapters and additional clarity of the rule.
Point Number	697.98
Summary of Decision Requested:	Delete Rule 16.1.4 D2 Discretionary Activities.
Decision Reasons:	<ul style="list-style-type: none"> • This rule is not needed as it refers to Land Use Effects and Land Use Building rules which are in subsequent parts of the chapters.
Point Number	697.99
Summary of Decision Requested:	Delete Rule 16.2.1 (1) Noise.
Decision Reasons:	<ul style="list-style-type: none"> • Reduces duplication – this noise rule is adequately covered by points (2) and (3).
Point Number	697.100
Summary of Decision Requested:	Delete Rule 16.2.1.1 P3 Permitted Activities Noise-General AND Amend Rule 16.2.1.1 P2 Permitted Activities Noise-General to read as follows: <i>(a) Noise measured within any other site in the Residential Zone must not exceed: (i) 50dB (LAeq), 7am to 7pm, every day; (ii) 45dB (LAeq), 7pm to 10pm, every day; and (iii) 40dB (LAeq) and 65dB (LAmax), 10pm to 7am the following day. (b) Noise levels shall be measured in accordance with the requirements of NZS 6801:2008 "Acoustics - Measurement of Environmental Sound"; and (c) Noise levels shall be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental noise". Amend Rule 16.2.1.1 P3 D1 to read as follows: Rule 16.2.1.1 P1 or P2 or P3.</i>
Decision Reasons:	<ul style="list-style-type: none"> • P3 needs to be conditions of P2 as they are the standards which need to be met.
Point Number	697.101
Summary of Decision Requested:	Amend Rule 16.2.1.2 P1(a) Permitted Activities Noise-Construction to read as follows: <i>Construction noise must meet <u>not exceed</u> the limits in NZS 6803:1999 (Acoustics – Construction Noise); and</i>
Decision Reasons:	<ul style="list-style-type: none"> • Additional clarity that the rule construction noise should not exceed the limits, rather than meet the limits in the NZS.
Point Number	697.102
Summary of Decision Requested:	Amend Rule 16.2.3 P1 Permitted Activities Glare and artificial light spill to read as follows: <i><u>Illumination from</u> Glare and artificial light spill must not exceed 10 lux measured horizontally and vertically within any other site.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Consistency of wording with other zone chapters.
Point Number	697.103
Summary of Decision Requested:	Amend Rule 16.2.4 Earthworks as follows: <i>(1) Rule 16.2.4.1 – General, provides the permitted rules for earthworks activities for the Residential Zone. <u>This rule does not apply in those areas specified in Rule 16.2.4.2, 16.2.4.3 and 16.2.4.4.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> • The wording of the rule does not make it clear that the rules in 16.2.4(2) apply instead of the general earthworks rule.
Point Number	697.104
Summary of Decision Requested:	Amend Rule 16.2.4(2) Earthworks as follows: <i>There are specific standards for earthworks within rules: (a) Rule 16.2.4.1A – Earthworks within the National Grid Yard (a b) Rule 16.2.4.2 – Maaori Sites and Maaori Areas of Significance; (b c) Rule 16.2.4.3 – Significant Natural Areas; (c d) Rule 16.2.4.4 – Landscape and Natural Character Areas. And Add new rule after Rule 16.2.4.1 Earthworks-General as follows: <u>16.2.4.1A Earthworks within the National Grid Yard</u> P1 (a) <u>The following earthworks within the National Grid Yard:</u> (i) <u>Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;</u> (ii) <u>Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;</u> (iii) <u>Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.</u> P2.</i>

(g) Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:
 (i) Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and
 (ii) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.
 P3
 (g) Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:
 (i) Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;
 (ii) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;
 (iii) Do not compromise the stability of a National Grid support structure;
 (iv) Do not result in the loss of access to any National Grid support structure; and
 (v) Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
 RD1
 (g) Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 16.2.4.1A P1, P2 or P3.
 (b) Discretion is restricted to:
 (i) Impacts on the operation, maintenance, upgrading and development of the National Grid;
 (ii) The risk to the structural integrity of the affected National Grid support structure(s);
 (iii) Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;
 (iv) The risk of electrical hazards affecting public or individual safety, and the risk of property damage.

Decision Reasons:

- Replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 16 for increased clarity and usability of the Plan.

Point Number 697.105

Summary of Decision Requested: Amend Rule 16.2.4.1 P1 (a) Permitted Activities to read as follows:

(a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:
 (i) Be located more than 1.5 m horizontally from any waterway, open drain or overland flow path;
 (ii) Not exceed a volume of 250m³ and an area of more than 1000m² over any consecutive 12 month period;
~~(iii) Not exceed an area of 1000m² over any consecutive 12 month period;~~
 (iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level;
 (v) The slope of the resulting cut, filled areas or fill batter face in stable ground, does not exceed a maximum of 1:2 (1 vertical to 2 horizontal);
 (vi) Earthworks are set back at least 1.5m from all boundaries;
 (vii) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
 (viii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
 (ix) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- The rule needs to apply over a single consecutive 12 month period for both volume and area thresholds. The words "at least" provide clarity to the rule. This is also consistent with other zone chapters.

Point Number 697.106

Summary of Decision Requested: Amend Rule 16.2.4.1 P3(a)(iv) Permitted Activities to read as follows:

(iv) Fill material is setback at least 1.5m from all boundaries;

Decision Reasons:

- The wording "at least" provide clarity to the rule.

Point Number 697.107

Summary of Decision Requested: Amend Rule 16.2.4.2 RD1 Earthworks-Maori Sites and Maori Areas of significance to read as follows:

(a) Earthworks within a Maori Site of Significance as identified in Schedule 30.3 (Maori Site of Significance) ~~and as~~ shown on the planning maps.

Decision Reasons:

- Wording provides clarity.

Point Number 697.108

Summary of Decision Requested: Amend 16.2.4.2 RD2 Earthworks-Maori Sites and Maori Areas of Significance as follows:

(b) The Council's discretion is ~~limited~~ restricted to the following matters:
 (i) ~~Location of earthworks in relation to the site~~
 (ii) ~~Effects on heritage and cultural values.~~

Decision Reasons:

- The matter of discretion is not relevant because the whole property boundary is included as a scheduled site.

Point Number 697.109

Summary of Decision Requested: Amend Rule 16.2.4.3 P1 (a) Earthworks-Significant Natural Areas to read as follows:

(a) Earthworks ~~are~~ for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area and must meet all of the following conditions:
 (i) ~~Maximum~~ Do not exceed a volume of 50m³ in a single consecutive 12 month period;
 (ii) ~~Maximum~~ Do not exceed an area of 250m² in a single consecutive 12 month period; and
 (iii) ~~Do not~~ include the importation of any fill material.
 (iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level with a maximum slope of 1:2 (1 vertical to 2 horizontal);
 (v) Earthworks are setback at least 1.5m from all boundaries;
 (vi) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
 (vii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
 (viii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- Wording provides clarity to the rule and consistency with other zone chapters.

Point Number 697.110

Summary of Decision Requested: Amend Rule 16.2.4.3 RD1 Earthworks-Significant Natural Areas to read as follows:

(a) Earthworks that do not comply with Rule 16.2.4.3 P1.
 (b) Council's discretion shall be restricted to the following matters:

(i) The location of earthworks ~~in relation taking into account to~~ waterways, significant indigenous vegetation or habitat;
(ii) The ~~protection of~~ adverse effects on the Significant Natural Area ~~values~~.

Decision Reasons:

- Wording provides clarity to the rule and consistency with other zone chapters.

Point Number 697.111

Summary of Decision Requested: Delete Rule 16.2.4.3 D1 Earthworks- Significant Natural Areas.

Decision Reasons:

- Not required as activity falls to Restricted Discretionary Activity.

Point Number 697.112

Summary of Decision Requested: Delete from Rule 16.2.4.4 P1(a)(ii) Earthworks-Landscape and Natural Character Areas the table titled Landscape or Natural Character Area.
AND

Amend the heading of Permitted Activities Rule 16.2.4.4 Earthworks-Landscape and Natural Character Areas as follows:

Earthworks – Landscapes, Natural Features and Natural Character Areas

AND

Amend Rule 16.2.4.4 P1(a)(i) and (ii) Earthworks-Landscape and Natural Character Areas as follows

Earthworks for the maintenance of existing tracks, fences or drains within the following landscapes, natural features and natural character areas:

(i) Significant Amenity Landscape (SAL);

(ii) High or Outstanding Natural Character area of the coastal environment;

(iii) ~~Outstanding Natural Feature (ONF) and dune~~

(iv) Outstanding Natural Feature (ONF); and

(v) Outstanding Natural Landscape (ONL)

~~an identified Landscape or Natural Character Area and must meet all of the following conditions;~~

A. The earthworks are undertaken within a single consecutive 12 month period;

B. The earthworks must not exceed ~~the following areas and volumes~~ an area of 50m² and a volume of 250m³ within a single consecutive 12 month period;

AND

Amend Rule 16.2.4.4 P1(a) by renumbering (iii)-(vii) as C.-G.

Decision Reasons:

- The heading and structure of the rule do not make it clear that all of matters under Permitted Activity P1(a) apply to the landscapes, character and features listed in the table in (a)(ii).

Point Number 697.113

Summary of Decision Requested: Amend Rule 16.2.5 P1(a)(i) Hazardous substances to read as follows:

(a) The use, storage or disposal of any hazardous substance must meet the following conditions where:

(i) the aggregate quantity of any hazardous substance of any hazard classification on a site is less than the quantity specified in the Residential zone in Table 5.1 ~~contained within~~ Appendix 5 (Hazardous Substances).

Decision Reasons:

- Provides clarity to the rule and alignment with other zone chapters. Deletion of words "contained within" provide clarification to this rule.

Point Number 697.114

Summary of Decision Requested: Add Rule 16.2.5 NC1 Hazardous substances as follows:

NCL

The use, storage of fuel for retail sale within a service station in the Residential zone.

Decision Reasons:

- Rule required to ensure no service station activities establish in sensitive zones including the residential zone.

Point Number 697.115

Summary of Decision Requested: Add Rule 16.2.5 NC2 Hazardous substances as follows:

NC2 Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 into Chapter 16 for increased clarity and usability of the Plan.

Point Number 697.116

Summary of Decision Requested: Amend Rule 16.2.6.2 RD1(b)(i) Notable tree-Trimming to read as follows:

(i) Timing and manner in which the activity is carried out; and

Decision Reasons:

- Word "and" provides clarification to this rule.

Point Number 697.117

Summary of Decision Requested:	Amend Rule 16.2.6.3 P1 (a) Notable tree-Activities within the drip line as follows: (a) Any activity within the dripline of a notable tree identified in Schedule 30.2 (Notable Trees) must <u>not comply with all of the following conditions:</u> (i) No <u>involve</u> excavation, compaction, sealing or soil disturbance and <u>or</u> placement of fill material <u>or cleanfill</u> , except for the sealing of an existing road or footpath; (ii) No <u>involve</u> parking or storage of materials, vehicles or machinery; (iii) Discharge of an eco-toxic substance; and (iv) No <u>involve</u> construction of structures.
Decision Reasons:	<ul style="list-style-type: none"> Provides clarity to the rule and alignment with other zone chapters.
Point Number	697.118
Summary of Decision Requested:	Amend Rule 16.2.6.3 P1 (a)(i) Notable tree-Activities within the drip line as follows: (i) No excavation, compaction, sealing or soil disturbance and placement of fill material <u>or cleanfill</u> , except for the sealing of an existing road or footpath;
Decision Reasons:	<ul style="list-style-type: none"> Inclusion of "cleanfill" provides clarification that it is included in the rule.
Point Number	697.119
Summary of Decision Requested:	Amend Rule 16.2.6.3 RD1 (a) Notable tree-Activities within the dripline to read as follows: (a) Any activity <u>within the dripline of the notable tree</u> that does not comply with Rule 16.2.6.3 P1.
Decision Reasons:	<ul style="list-style-type: none"> Wording "within the dripline of the notable tree" provides clarity for the rule.
Point Number	697.120
Summary of Decision Requested:	Delete Rule 16.2.7.1 P2 (a) (viii) Signs-general.
Decision Reasons:	<ul style="list-style-type: none"> This is not a condition as the Residential Zone provisions do not apply to the road reserve.
Point Number	697.121
Summary of Decision Requested:	Delete Rule 16.2.7.1 P3(a)(iv).
Decision Reasons:	<ul style="list-style-type: none"> This is not an appropriate condition as the Residential Zone provisions do not apply to the road reserve.
Point Number	697.122
Summary of Decision Requested:	Delete Rule 16.2.7.2 P1(a)(iv) Signs-Effects.
Decision Reasons:	<ul style="list-style-type: none"> The condition is unnecessary and in many instances will not be able to be complied with.
Point Number	697.123
Summary of Decision Requested:	Amend Rule 16.2.8 Indigenous vegetation clearance inside a Significant Natural Area heading to read as follows: <i>Indigenous vegetation clearance <u>inside-within</u> a Significant Natural Area</i>
Decision Reasons:	<ul style="list-style-type: none"> Wording provides clarity.
Point Number	697.124
Summary of Decision Requested:	Add Rule 16.2.8 P1 (a) (vi) Indigenous vegetation clearance inside a Significant Natural Area as follows: <u>Removing vegetation for conservation activities.</u>
Decision Reasons:	<ul style="list-style-type: none"> This new rule ensures indigenous vegetation can be cleared for conservation activities.
Point Number	697.125
Summary of Decision Requested:	Amend Rule 16.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area as follows: <i>Removal of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per year per <u>property site</u> for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity that the rule is intended to apply "per site" rather than "per property" which is not a defined term.
Point Number	697.126
Summary of Decision Requested:	Delete Rule 16.2.8 P5 Indigenous vegetation clearance inside a Significant Natural Area

AND

Make consequential change to D1 as follows:
"~~...or P4, P5 or P6.~~"

Decision Reasons:

- Rule P5 duplicates P1 with the only difference being that P5 captures Maaori Freehold land or Maaori Customary land, which is already captured by P1.

Point Number 697.127

Summary of Decision Requested: **Delete** Rule 16.2.8 P6 Indigenous vegetation clearance inside a Significant Natural Area
AND
Make consequential change to D1 as follows: "~~... or P4, P5 or P6.~~"

Decision Reasons:

- The activity is a repeat of P2.

Point Number 697.128

Summary of Decision Requested: **Amend** 16.3.1 P1 Dwelling to read as follows:
One dwelling within ~~site a record of title.~~

Decision Reasons:

- Words' "a record of title" has been included for correction.

Point Number 697.129

Summary of Decision Requested: **Amend** Rule 16.3.2 P1 Minor dwelling to read as follows:
(a) One minor dwelling contained within a ~~site a record of title~~ must comply with all of the following conditions:

Decision Reasons:

- Words' "a record of title" been included for correction.

Point Number 697.130

Summary of Decision Requested: **Amend** 16.3.3(2) Height as follows:
Rule 16.3.3.1 Height – Building general provides permitted height limits across the entire Residential Zone. This rule does not apply in those areas specified in Rules 16.3.3.2 or 16.3.3.3

Decision Reasons:

- The wording of the rule does not make it clear that the rules in 16.3.3.2 or 16.3.3.3 apply instead of the Building general rule.

Point Number 697.131

Summary of Decision Requested: **Amend** Rule 16.3.3.3 P1 Height - Buildings, structures and vegetation within an airport obstacle limitation surface as follows:
Any building, structure or vegetation must not protrude through ~~any~~ the airport obstacle limitation surface as identified on the planning maps and in Appendix 9 - Te Kowhai Airfieldpark and defined in Section E, Designation N – Waikato Regional Airport as shown on the planning maps.

Decision Reasons:

- This rule applies to both the Te Kowhai Airfield and the Waikato Regional Airport so needs to be specified. Additional wording provides clarity to the rule.

Point Number 697.132

Summary of Decision Requested: **Amend** Rule 16.3.3.3 D1 Height - Buildings, structures and vegetation within an airport obstacle limitation surface to read as follows:
Any building, structure or vegetation that does not comply with Rule 16.3.3.3 P1.

Decision Reasons:

- Additional wording provides clarity to the rule.

Point Number 697.133

Summary of Decision Requested: **Amend** Rule 16.3.5 RDI(b) Daylight admission to read as follows:
*(a) Council's discretion shall be restricted to the following matters:
(i) Height of the building;
(ii) Design and location of the building;
(iii) ~~Extent of shading on adjacent sites. Level of shading on any other sites.~~
(iv) Privacy on ~~another any other sites;~~ and
(v) ~~Effects on amenity values and residential character of the locality.~~*

Decision Reasons:

- Additional words in this rule provide clarity and consistency with other zones.

Point Number 697.134

Summary of Decision Requested: **Amend** Rule 16.3.6 D1 Building coverage as follows:
~~Total~~ Building coverage that does not comply with Rule 16.3.6 P1, P2 or P3.

Decision Reasons:

- Consistency of wording across the zone chapters.

Point Number 697.135

Summary of Decision Requested: **Add** in after Rule 16.3.6 as follows:

Rule 16.3.6A Impervious surfaces

P1 - The impervious surface of a site must not exceed 70%.

RD1

(a) Impervious surface that does not comply with Rule 16.3.6A P1

(b) Council's discretion is restricted to the following matters:

(i) Site design, layout and amenity;

(ii) The risk of flooding, nuisance or damage to the site or other buildings and sites.

Decision Reasons:

- To include the impervious surfaces rule from Rule 14.11.1(P2) and 14.11.2(RD2) to make it easier to find.

Point Number 697.136

Summary of Decision Requested: **Add** to Rule 16.3.9 Building setbacks new clause (6) as follows:

(6) Rule 16.3.9.5 Building setback – National Grid Yard

AND

Add to 16.3 Land Use- Building new rule 16.3.9.5 after Rule 16.3.9.4 as follows:

16.3.9.5 Buildings and structures within the National Grid Yard

P1

(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:

(i) Not involve an increase in the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.

P2

(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.

P3

(a) Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

NCL

Any building alterations or additions within the National Grid Yard that does not comply with Rule 16.3.9.5 P1, P2 or P3.

Decision Reasons:

- Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 16 for increased clarity and usability of the Plan.

Point Number 697.137

Summary of Decision Requested: **Amend** Rule 16.3.9.1 P1 (a)(ii) Building setbacks – All boundaries as follows:

(ii) 13m from ~~the edge of~~ an indicative road.

Decision Reasons:

- As the indicative road is just a line, there is no 'edge' to be set back from.

Point Number 697.138

Summary of Decision Requested: **Add** to Rule 16.3.9.2 Building setback – Sensitive land use as follows:

P2

(a) Any building for a sensitive land use must be set back a minimum of:

(i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;

(ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.

P3

(a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land Yard must comply with all the following conditions:

(i) Not increase the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

D1

Any building for a sensitive land use that does not comply with Rule 16.3.9.2 P1 or P2.

NCL

Any activity within the National Grid Yard that does not comply with Rule 16.3.9.2 P3.

NC2

Any new building for a sensitive land use within the National Grid Yard

NC3

Any change of use of an existing building to a sensitive land use within the National Grid Yard

NC4

The establishment of any new sensitive land use within the National Grid Yard

Decision Reasons:

- Replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 16 for increased clarity and usability of the Plan.

Point Number	697.139
Summary of Decision Requested:	Amend Rule 16.3.9.3 P2(a) Building setback – Water bodies as follows: <i>(a) A public amenity of up to 25m2, or a pump shed (<u>public or private</u>), within any building setback identified in Rule 16.3.9.3 P1.</i>
Decision Reasons:	<ul style="list-style-type: none"> Clarify that the pump shed is both private and public.
Point Number	697.140
Summary of Decision Requested:	Add new rule after Rule 16.3.10 Building - Horotiu Acoustic Area as follows: <u>16.3.10A Building – Te Kowhai Noise Buffer</u> <u>PI</u> <u>Construction of, or addition, or alteration to, a dwelling within the Te Kowhai Noise Buffer that is designed and constructed to achieve the internal design sound levels specified in Section 3.2 of Appendix L (Acoustic Insulation).</u> <u>RD1</u> <u>(a) Construction of, or addition, or alteration to, a dwelling that does not comply with Rule 16.3.10A PI</u> <u>(b) Council's discretion shall be restricted to the following matters:</u> <u>(i) on-site amenity values;</u> <u>(ii) noise levels received at the notional boundary of the dwelling;</u> <u>(iii) timing and duration of noise received at the notional boundary of the dwelling;</u> <u>(iv) potential for reverse sensitivity effects.</u>
Decision Reasons:	<ul style="list-style-type: none"> There is Residential Zoned land in close proximity to the Te Kowhai Airfield and therefore there needs to be a rule managing internal noise limits in dwellings in the Residential Zone.
Point Number	697.141
Summary of Decision Requested:	Amend Rule 16.3.11 Historic Heritage heading to read as follows: Historic Heritage <u>Items</u>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of wording across the zone chapters.
Point Number	697.142
Summary of Decision Requested:	Amend Historic Heritage Rule 16.3.11(2) as follows: <i>The rules in 16.3.11.6 – Matangi and Huntly address development within the two precincts.</i>
Decision Reasons:	<ul style="list-style-type: none"> Spelling mistake.
Point Number	697.143
Summary of Decision Requested:	Amend Rule 16.3.11.3 P1(a)(i) All heritage items – Alterations or addition to read as follows: <i>No significant feature of interest is removed, destroyed or damaged; <u>and</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other chapters and additional clarity of the rule.
Point Number	697.144
Summary of Decision Requested:	Amend Rule 16.3.11.3 RD1 All heritage items – Alterations or addition to read as follows: Any activity <u>Alteration or addition to a heritage item</u> that does not comply with Rule 16.3.11.3 P1.
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other chapters and additional clarity of the rule.
Point Number	697.145
Summary of Decision Requested:	Amend Rule 16.3.11.5 All heritage items – Site development heading to read as follows: <i>All heritage items – <u>all</u> Site development</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other chapters.
Point Number	697.146
Summary of Decision Requested:	Delete Rule 16.4 Subdivision (1)-(5) AND Add to replace as follows: <i>(1) Rule 16.4.1 Subdivision – General provides for subdivision density and apply across within the Residential Zone subject to compliance with the following;</i> <i>(a) Rule 16.4.7 Subdivision – Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas;</i> <i>(b) Rule 16.4.8 Title boundaries – Significant Natural Areas;</i> <i>(c) Rule 16.4.9 Title boundaries – Maaori sites and Maaori areas of Significance;</i> <i>(d) Rule 16.4.10 Subdivision of land containing heritage items;</i> <i>(e) Rule 16.4.11 Subdivision – Road Frontage;</i>

- (f) Rule 16.4.12 Subdivision – Building Platform;
 (g) Rule 16.4.13 Subdivision creating reserves;
 (h) Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips;
 (i) Rule 16.4.15 Subdivision of land containing mapped off-road walkways; and
 (j) Rule 16.4.16 Subdivision of land containing an Environmental Protection Area.
- (2) Rule 16.4.1 Subdivision - General does not apply where the following specific areas and/or activities rules apply:
 (a) Rule 16.4.2 Subdivision – Te Kauwhata Ecological Residential Area;
 (b) Rule 16.4.3 Subdivision – Te Kauwhata West Residential Area;
 (c) Rule 16.4.4 Subdivision – Multi-unit development;
 (d) Rule 16.4.5 Subdivision – Boundary adjustments; and
 (e) Rule 16.4.6 Subdivision – Amendments and updates to cross lease flats plans and conversion to freehold.
 (3) The following rules apply to specific areas and/or activities:
 (a) Rule 16.4.2 - Subdivision - Te Kauwhata Ecological Residential Area (refer to Rule (4));
 (b) Rule 16.4.3 - Subdivision - Te Kauwhata West Residential Area (refer to Rule (4)); ~~and~~
 (c) Rule 16.4.4 - (Subdivision – Multi-Unit development);
 (d) Rule 16.4.5 – subdivision boundary adjustments;
 (e) Rule 16.4.6 – subdivision amendments and updates to cross lease flats plan and conversion to freehold;
 (f) Rule 16.4.7 – subdivision title boundaries natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming and aggregate extraction areas;
 (g) Rule 16.4.8 – subdivision title boundaries Significant Natural Areas, heritage items, archaeological sites, sites of significance to Māori;
 (h) Rule 16.4.9 – Title boundaries – Māori site and Māori areas of significance.
 (i) Rule 16.4.10 - subdivision of land containing heritage items;
 (j) Rule 16.4.13 – subdivision reserves; ~~and~~
 (k) Rule 16.4.14 - subdivision esplanade reserves and esplanade strips;
 (l) Rule 16.4.15 – subdivision of land containing mapped off-road walkways; and
 (m) Rule 16.4.16 – subdivision of land containing Environmental Protection Area.
 (4) Rule 16.4.4 Subdivision – Multi-unit development does not apply in the following areas:
 (a) Rule 16.4.2 - Subdivision – Te Kauwhata Ecological Residential Area; and
 (b) Rule 16.4.3 - Subdivision - Te Kauwhata West Residential Area.

Decision Reasons:

- The rule contains an unclear mixture of subdivision conditions that apply to the general subdivision, as well as subdivisions that apply only in specific areas or circumstances.

Point Number 697.147

Summary of Decision Requested: Add to 16.4 Subdivision Rule 16.4 as follows:

(6) Rule 16.4.10A – subdivision of land within the National Grid Corridor.

AND

Consequential renumbering

16.4.10A Subdivision of land within the National Grid Corridor RDI.

(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions:

(i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and

(ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.

(b) Council's discretion is restricted to the following matters:

(i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;

(ii) The ability to provide a complying building platform outside of the National Grid Yard;

(iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;

(iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.

NCI.

Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 16.4.10A RDI.

Decision Reasons:

- Replicate the rules regarding subdivision in the National Grid Corridor from Chapter 14 to Chapter 16 to increase the ease of use of the District Plan.

Point Number 697.148

Summary of Decision Requested: Amend Rule 16.4.1(a)(iv) Subdivision - General, as follows:

(iv) Where 4 or more proposed lots are proposed to be created, the number of rear records of title ~~lots~~ do not exceed...

Decision Reasons:

- The rule should link to the definition of "Rear Record of Title".

Point Number 697.149

Summary of Decision Requested: Amend Rule 16.4.2 RDI (a) Subdivision - Te Kauwhata Ecological Residential Area, as follows:

Proposed lots, except where the proposed lot is an access allotment, utility allotment or reserve to vest in the Te Kauwhata Ecological Residential Area...

Decision Reasons:

- The rule needs to clarify that it does not apply to access lots (as these are part of the subdivision), utilities (which are exempt from subdivision standards) or to reserves (which have their own subdivision rule).

Point Number 697.150

Summary of Decision Requested: Amend Rule 16.4.3 RDI (a) Subdivision - Te Kauwhata West Residential Area, as follows:

Proposed lots, except where the proposed lot is an access allotment, utility allotment or reserve to vest within the Te Kauwhata West Residential Area...

Decision Reasons:

- The rule needs to clarify that it does not apply to access lots (as these are part of the subdivision), utilities (which are exempt from subdivision standards) or to reserves (which have their own subdivision rule).

Point Number 697.151

Summary of Decision Requested: Amend Rule 16.4.4. RDI (a)(iii) Subdivision - Multi-unit development, as follows:

The minimum existing exclusive area for each residential unit lot size where a new freehold (fee simple) lot is being created must be 300m2 net site area.

Decision Reasons:

- The intent of the condition was to set a density (number of units) that could be subdivided that matched the land use condition in Rule 16.1.3 RD1(c). The current wording does not achieve this intent.

Point Number 697.152

Summary of Decision Requested: Amend Rule 16.4.5 C1 Subdivision – Boundary adjustments, as follows:

(b) Proposed lots must not generate any additional building infringements to those which legally existing prior to the boundary ~~relocation~~ adjustment.

Decision Reasons:

- Incorrect reference to 'relocation' rather than 'adjustment'.

Point Number 697.153

Summary of Decision Requested: Delete from Rule 16.4.6 C2 Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold C2(b)(i) the line.

Decision Reasons:

- Matter of control (i) is not relevant to this rule.

Point Number 697.154

Summary of Decision Requested: Delete Rule 16.4.6 D1 Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold.

Decision Reasons:

- There are no conditions for the controlled activities, hence no need for D1.

Point Number 697.155

Summary of Decision Requested: Amend Rule 16.4.7 Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas heading, as follows:

Title boundaries – ~~Existing Buildings, contaminated land, notable trees, intensive farming and aggregate extraction areas~~

Decision Reasons:

- This rule heading needs amending to reflect the changes being made to RD1.

Point Number 697.156

Summary of Decision Requested: Amend Rule 16.4.7 RD1 Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas (the same as set out in the Village Zone in Rule 24.4.5 RD1) retaining only the rules relating to existing buildings and make consequential changes, as follows:

~~(a) Subdivision of land containing contaminated land, notable trees, intensive farming and Aggregate Extraction Areas must comply with all of the following conditions:~~

~~(i) The boundaries of every proposed lot containing existing buildings must demonstrate compliance with the following building rules (other than where any non-compliance existed lawfully prior to the subdivision) relating to:~~

~~A. daylight admission (Rule 16.3.5);~~

~~B. building coverage (Rule 16.3.6);~~

~~C. building setbacks (Rule 16.3.9).~~

~~(ii) The boundaries of every proposed lot must not divide the following:~~

~~A. a natural hazard area;~~

~~B. contaminated land;~~

~~C. Significant Amenity Landscape; or~~

~~D. notable tree;~~

~~(iii) The boundaries of every proposed lot must provide the following setbacks:~~

~~A. 300m from any intensive farming activity;~~

~~B. 500m from the boundary of an Aggregate Extraction Area for rock extraction; and~~

~~C. 200m from the boundary of an Aggregate Extraction Area for sand excavation.~~

~~(b) Council's discretion shall be restricted to the following matters:~~

~~(i) Landscape values;~~

~~(ii) Amenity values and character;~~

~~(iii) Reverse sensitivity effects;~~

~~(iv) Effects on existing buildings;~~

~~(v) Effects on natural hazard areas;~~

~~(vi) Effects on contaminated land;~~

~~(vii) Effects on any notable trees; and~~

~~Effects on an intensive farming activity.~~

Decision Reasons:

- The rule can be read to mean that all the features need to be on a lot, which is incorrect and is consistent with Village Zone.

Point Number 697.157

Summary of Decision Requested: Amend Rule 16.4.7 NCI Title boundaries – contaminated land, notable trees, intensive farming and aggregate extraction areas, to be a discretionary activity rather than a non-complying activity as follows:

~~NCI D1~~

Decision Reasons:

- The activity status should be Discretionary as not complying with a distance should not require that level of assessment.

Point Number 697.158

Summary of Decision Requested: Amend Rule 16.4.12 RD1 (a) Subdivision - Building platform, as follows:

Every proposed lot, other than one designed specifically for access, or is a utility allotment...

Decision Reasons:

- Grammar.

Point Number 697.159

Summary of Decision Requested: **Amend** Rule 16.4.14 RD1 (a) (ii) Subdivision of esplanade reserves and esplanade strips, as follows:

(ii) The proposed lot is more than 4ha, or more than 20m ~~from~~ of mean high water springs, or is a water body identified in Appendix 4 (Esplanade Priority Areas).

Decision Reasons:

- Clarity of wording.

Point Number 697.160

Summary of Decision Requested: **Amend** Rule 16.4.15 Subdivision of land containing mapped off-road walkways, as follows:

Subdivision of land containing mapped off-road walkways, cycleways or bridleways.
(a) Subdivision where walkways, cycleways or bridleways.
(i) The walkway, cycleway or bridleway, is... shared pedestrian, ~~and~~ cycle or riding use as per Rule 14.12.1 P8 (Transportation);
(ii) The walkway, cycleway or bridleway, is generally in accordance with the walkway, cycleway or bridleway, route shown on the planning maps;
(iii) The walkway, cycleway or bridleway, is...
(b) Council's discretion shall be restricted to the following matters:
(i) Alignment of the walkway, cycleway or bridleway;
(ii) Drainage in relation to the walkway, cycleway or bridleway;
(iii) Standard of design and construction of the walkway, cycleway or bridleway;

Decision Reasons:

- The rule is meant to apply to walkways, cycleways and bridleways.

Point Number 697.161

Summary of Decision Requested: **Amend** Chapter 17 Business Zone heading to read as follows:

Business Zone Rules

Decision Reasons:

- For increased clarity and consistency with other chapters.

Point Number 697.162

Summary of Decision Requested: **Amend** Rule 17(2) Chapter 17: Business Zone, as follows:

The rules that apply to subdivision in the Business Zone are contained in Rule 17.4 and the relevant rules in 14 Infrastructure and Energy; and 15 Natural Hazards and Climate Change, (Placeholder).

Decision Reasons:

- To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.163

Summary of Decision Requested: **Amend** Rule 17.1.2(1) Permitted Activities, as follows:

The activities listed below are permitted activities if they ~~comply with~~ meet all of the following:

(a) Activity-specific conditions; and
(b) Land Use – Effects rules in Rule 17.2 (unless the activity-specific rule and/or conditions identifies a condition(s) that does not apply); and
(c) Land Use – Building rules in Rule 17.3 (unless the activity-specific rule and/or conditions identifies a condition(s) that does not apply); and
~~(d) Activity-specific conditions.~~

Decision Reasons:

- Additional clarity to make it clear how the activity-specific conditions are to be applied.

Point Number 697.164

Summary of Decision Requested: **Delete** Rule 17.1.2 (P2) Commercial services.

Decision Reasons:

- There is duplication between the terms "commercial activities" and "commercial services" and this is more appropriately represented by a single term.

Point Number 697.165

Summary of Decision Requested: **Delete** Rule 17.1.2 P11 Hauora.

Decision Reasons:

- The term is included in "Marae complex" and "papakaiinga housing development" so there is no need for a separate activity.

Point Number 697.166

Summary of Decision Requested: **Amend** Rule 17.1.2 P16 (a)(i) A Marae Complex or Papakainga Housing Development on Maori Freehold Land or on Maori Customary Land, as follows:

(i) A Concept Management Plan ~~approved~~ endorsed by the Maori Land Court
AND
Amend Rule 17.1.2(P16)(b)(i), as follows:

(i) A Concept Management Plan ~~approved~~ endorsed by the Maori Land Court;

Decision Reasons:

- The correct term is "endorsed" rather than "approved".

Point Number 697.167

Summary of Decision Requested: **Amend** Rule 17.1.3 RD1 (a) (i) and (ii) Restricted Discretionary Activities, as follows:

(i) ~~Land Use – Effects rules in...~~

AND

(ii) ~~Land Use – Building rules in...~~

Decision Reasons:

- Alignment with other zone chapters.

Point Number 697.168

Summary of Decision Requested: **Amend** Rule 17.1.3 RD1 (a)(iv) Restricted Discretionary, as follows:

(iv) ~~A detailed site plan depicting the proposed lot-record-of-title boundaries for each residential unit and any common areas (including access and services) must be provided, ensuring that a freehold (fee simple) or unit title subdivision complies with Rule 18.4.2 (Subdivision of multi-unit developments);~~

Decision Reasons:

Point Number 697.169

Summary of Decision Requested: **Add** to Rule 17.1.3 Restricted Discretionary Activities RD1 a new condition (viii) as follows:

(viii) ~~Each residential unit must meet the following minimum unit size:~~

Unit of Apartment Minimum Unit Area

Studio unit or 1 bedroom unit 60m²

2 bedroom unit 80m²

3 bedroom unit 100m²

Decision Reasons:

- Include residential unit size table for consistency with the subdivision rule.

Point Number 697.170

Summary of Decision Requested: **Add** to Rule 17.1.3 Restricted Discretionary Activities a new activity rule, as follows:
RD2

~~A new retirement village or alterations to an existing retirement village;~~

(a) ~~All residential units must not be located at ground level;~~

(b) ~~The site is connected to public water and wastewater infrastructure;~~

(c) ~~Minimum living court or balcony area and dimensions;~~

(i) ~~Apartment – 10m² area with minimum dimension horizontal and vertical of 2.5m;~~

(ii) ~~Studio unit or 1 bedroom unit – 12.5m² area with minimum dimension horizontal and vertical of 2.5m; or~~

(iii) ~~2 or more bedroomed unit – 15m² area with minimum dimension horizontal and vertical of 2.5m;~~

(d) ~~Minimum service court is either:~~

(i) ~~Apartment – Communal outdoor space (ie no individual service courts required) of at least 5m² with a minimum dimension of 1.5 metres for each apartment; or~~

(ii) ~~All other units – 10m² with a minimum dimension of 1.5 metres for each unit;~~

(e) ~~The following Land Use – Effects rule in Rule 17.2 does not apply;~~

(i) ~~Rule 17.2.7 (Signs);~~

(f) ~~The following Infrastructure and Energy rule in Chapter 14 does not apply:~~

A. ~~Rule 14.12.1 Pd(1)(g) (Traffic generation);~~

~~Matters of Discretion~~

(a) ~~Effects on amenity values;~~

(b) ~~Integration with the existing business environment;~~

(c) ~~Connectivity to public reticulated public water supply and wastewater;~~

(d) ~~Bulk and scale of the retirement village development;~~

(e) ~~Potential reverse sensitivity effects;~~

(f) ~~Effects on the roading network.~~

Decision Reasons:

- Retirement villages in the Business Zone should be provided for within towns and villages provided they can be serviced by infrastructure. Retirement villages provide opportunities for residential development (aged care) that is not only confined to the residential zone.

Point Number 697.171

Summary of Decision Requested: **Delete** Rule 17.1.4 D1 Discretionary Activities;

AND

Consequential renumbering of D2 and D3.

Decision Reasons:

- This rule is not needed as it refers to Land Use – Effects and Land Use – Building rules which are in subsequent parts of the chapter.

Point Number 697.172

Summary of Decision Requested: **Amend** Rule 17.1.4 D2 Discretionary Activities as follows:

Any ~~permitted~~ activity that does not comply with one or more of the activity-specific conditions for a permitted activity under in Rule 17.1.2.

Decision Reasons:

- Consistency with other chapters and additional clarity of the rule.

Point Number	697.173
Summary of Decision Requested:	Delete Rule 17.2.1(1) Noise; AND Undertake consequential renumbering.
Decision Reasons:	<ul style="list-style-type: none"> Reduce duplication – this noise rule is adequately covered by points (2) and (3).
Point Number	697.174
Summary of Decision Requested:	Delete Rule 17.2.1.1 P3 and P4 Noise - General; AND Add to Rule 17.2.1.1 P2 Noise - General, as follows: (a) Noise measured within any site: (i) In the Business Zone must not exceed: A. 65dB (LAeq), 7am to 11pm every day; and B. 55dB (LAeq) and 85dB (LAmax), 11pm to 7am the following day; (ii) In the Residential or Village Zone must not exceed: A. 55dB (LAeq), 7am to 7pm; B. 50dB (LAeq), 7pm to 10pm; C. 45dB (LAeq) and 75dB (LAmax), 10pm to 7am the following day. (b) Noise measured within any site in any zone other than the Business Zone, Residential Zone or Village Zone must meet the permitted noise levels for that zone. (c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics - Measurement of Environmental Sound". (d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics - Environmental noise". AND Amend Rule 17.2.1.1 D1 Noise-General, as follows: Noise that does not comply with Rule 17.2.1.1 P2, P3 or P4 .
Decision Reasons:	<ul style="list-style-type: none"> To clarify that the conditions are associated with noise and are not an activity in their own right.
Point Number	697.175
Summary of Decision Requested:	Amend Rule 17.2.1.2 P1 Noise – Construction, as follows: (a) Construction noise must <u>not exceed</u> meet the limits in NZS 6803:1999 (Acoustics – Construction Noise); and
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity of the rule – construction noise should not exceed the limits, rather than meet the limits in the NZ Standard.
Point Number	697.176
Summary of Decision Requested:	Amend Rule 17.2.1.2 RD1 Noise – Construction, as follows: (a) Construction noise that does not comply with Rule 17.2.1.2 P1.
Decision Reasons:	<ul style="list-style-type: none"> Correct the rule reference.
Point Number	697.177
Summary of Decision Requested:	Amend Rule 17.2.2 P1 Servicing and hours of operation, as follows: <i>The loading and unloading of vehicles and the receiving of customers and deliveries associated with a commercial activity on a site adjoining the Residential and Village Zones may must only occur between 6:30am and 7:30-8:00pm.</i>
Decision Reasons:	<ul style="list-style-type: none"> Increase the hours of operation to allow more reasonable use of the site.
Point Number	697.178
Summary of Decision Requested:	Amend Rule 17.2.4 P1 Glare and artificial light spill, as follows: <u>Illumination from</u> Glare and artificial light spill <u>must</u> shall not exceed 10 lux measured horizontally and vertically at any point within any other site zoned Residential, Village or Country Living Zone.
Decision Reasons:	<ul style="list-style-type: none"> Consistency of wording with other chapters. The focus of the rule in the Business Zone should be to control light spill outside the Business Zone into the residential zones.
Point Number	697.179
Summary of Decision Requested:	Amend Rule 17.2.5(1) Earthworks, as follows: (1) Rules 17.2.5.1 – Earthworks - General provides the permitted rules for earthworks activities for the Business Zone. <u>This rule does not apply in those areas specified in Rules 17.2.5.1A, 17.2.5.2 and 17.2.5.3.</u>
Decision Reasons:	<ul style="list-style-type: none"> Clarify that the earthworks general rule does not apply in those areas where there is a specific rule.
Point Number	697.180

Summary of Decision Requested:

Amend Permitted Activities Rule 17.2.4 P1, as follows:

Illumination from glare and artificial light spill must shall not exceed 10 lux measured horizontally and vertically at any point within any other site zoned Residential, Village or Country Living Zone.

Decision Reasons:

- Consistency of wording with other chapters. The focus of the rule in the Business Zone should be to control light spill outside the Business Zone into the residential zones.

Point Number

697.181

Summary of Decision Requested:

Amend Rule 17.2.5.1 Earthworks – General, as follows:

~~P1~~

~~(a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:~~

- ~~(i) Be located more than 1.5m from a public sewer, open drain, overland flow path or other service pipe;~~
- ~~(ii) Not exceed a volume of more than 250m³ and an area of more than 1,000m² over any single consecutive 12 month period within a site;~~
- ~~(iii) The height of the resulting cut, filled areas or fill batter face in stable ground, not including any surcharge, does not exceed 1.5m, with a maximum slope of 1:2 (1 vertical to 2 horizontal);~~
- ~~(iv) Earthworks are set back at least 1.5m from all boundaries;~~
- ~~(v) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;~~
- ~~(vi) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;~~
- ~~(vii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.~~

~~AND~~

~~Add a new P2 as follows:~~

~~P2~~

~~(a) Earthworks for the purpose of creating a building platform within a site using imported fill material.~~

~~AND~~

~~Amend P2 as follows:~~

~~P2.3~~

~~(a) Earthworks for purposes other than creating a building platform within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions. The importation of fill material to a site must meet all of the following conditions in addition to Rule 17.2.45.1 P1-~~

- ~~(i) Must Does not exceed a total volume of 500m³ per site and a depth of 1m;~~
- ~~(ii) Is fit for compaction;~~
- ~~(iii) The slope height of the resulting batter face filled area in stable ground must not exceed 4.5m with a maximum slope of 1:2 (1m vertical to 2m horizontal);~~
- ~~(iv) Fill material is setback at least 1.5m from all boundaries;~~
- ~~(v) Does not restrict the ability for land to drain;~~
- ~~(vi) Is not located within 1.5m of public sewers, utility services or manholes;~~
- ~~(vii) The sediment from fill material is retained on the site;~~
- ~~(viii) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;~~
- ~~(ix) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;~~
- ~~(x) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.~~

~~RD 1~~

- ~~(a) Earthworks that do not comply with Rule 17.2.45.1 P1 or P2.3~~
- ~~(b) Council's discretion is limited restricted to the following matters:~~
 - ~~(i) Amenity values and landscape effects;~~
 - ~~(ii) Volume, extent and depth of earthworks;~~
 - ~~(iii) Nature of fill material;~~
 - ~~(iv) Contamination of fill material;~~
 - ~~(v) Location of the earthworks to waterways, significant indigenous vegetation and habitat;~~
 - ~~(vi) Compaction of the fill material;~~
 - ~~(vii) Volume and depth of fill material;~~
 - ~~(viii) Protection of the Hauraki Gulf Catchment Area;~~
 - ~~(ix) Geotechnical stability;~~
 - ~~(x) Flood risk, including natural water flows and established drainage paths~~
 - ~~(xi) Land instability, erosion and sedimentation; and~~
 - ~~(xii) Proximity to underground services and service connections.~~

Decision Reasons:

- Consistency with the equivalent rule in other chapters. Also enabling the importation of fill for a building platform as a permitted activity.

Point Number

697.182

Summary of Decision Requested:

Amend Rule 17.2.5.2 Earthworks - Maaori Sites and Maaori Areas of Significance, as follows:

- ~~(a) Earthworks within a Maaori site of significance as identified in Schedule 30.3 (Maaori site of Significance) as shown on the planning maps.~~
- ~~(b) Earthworks within a Maaori area of significance as identified in Schedule 30.4 (Maaori area of Significance) as shown on the planning maps.~~
- ~~(c) Council's discretion is restricted limited to the following matters:~~
 - ~~(i) Location of earthworks in relation to the site;~~
 - ~~(ii) Effects on heritage and cultural values.~~

~~AND~~

~~Add new P2 as follows:~~

~~P2~~

- ~~(a) Earthworks within a Maaori area of significance as identified in Schedule 30.4 (Maaori area of Significance) as shown on the planning maps.~~
- ~~(b) Council's discretion is restricted to the following matters:~~
 - ~~(i) Effects on heritage and cultural values.~~

Decision Reasons:

- For consistency with other chapters. The rules for earthworks in Maaori Sites of Significance and Maaori Area of Significance are separated into different rules.

Point Number

697.183

Summary of Decision Requested:

Amend Rule 17.2.5.3 P1 Earthworks – within Significant Natural Areas, as follows:

~~P1~~

~~(a) Earthworks are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area and must meet all of the following conditions....~~

~~AND~~

~~Delete Rule 17.2.5.3 D1 Earthworks – within Significant Natural Area.~~

Decision Reasons:

- Minor amendments to improve clarity. Deletion of a rule that is duplicating another rule.

Point Number 697.184

Summary of Decision Requested: **Delete** Rule 17.2.5.4 P1 (a)(ii);

AND

Add new Permitted Activities Rule 17.2.5.4(P2), as follows:

P2
(g) The storage or use of radioactive materials is in approved equipment for medical and diagnostic purposes, or specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.

AND

Amend Rule 17.2.5.4(D1) Hazardous substances as follows:
The use, storage or disposal of any hazardous substances that does not comply with Rule 17.2.5.4 P1 or P2.

Decision Reasons:

- For consistency with other chapters and also to recognise that the storage or use of radioactive substance is a separate activity.

Point Number 697.185

Summary of Decision Requested: **Add** new Non-Complying Rule 17.2.5.4 NCI, as follows:

NCI
Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 (where it is relevant to the Business Zone) into Chapter 17 for increased clarity and usability of the Plan.

Point Number 697.186

Summary of Decision Requested: **Amend** Rule 17.2.5.4 D1 Hazardous substances, as follows:

D+2 service station that does not comply with Rule 17.2.4.5.4 CI.

Decision Reasons:

- Correct numbering error.

Point Number 697.187

Summary of Decision Requested: **Amend** Rule 17.2.6.1 P1 Notable tree – removal or destruction, as follows:

Removal or destruction of a notable tree identified in Schedule 30.2 (Notable Trees) where certification is provided to Council by a works arborist that states that the tree is dead, dying, diseased or is unsafe in accordance with Appendix 11 Tree Removal Certificate.

Decision Reasons:

- Consistency with the other chapters which require the certification to be of a specified form.

Point Number 697.188

Summary of Decision Requested: **Amend** Rule 17.2.6.1 C1 Notable tree – removal or destruction, as follows:

RD1
(a) Removal or destruction of a tree identified in Schedule 30.2 (Notable Trees) that does not comply with Rule 17.2.6.1 P1.
(b) Council's control discretion is restricted limited to the following matters:
(i) Timing and manner in which the activity is carried out;
(ii) Effects on amenity values; and
(iii) Effects on heritage values.

Decision Reasons:

- The controlled activity status should be restricted discretionary to reflect the protected nature of the notable tree.

Point Number 697.189

Summary of Decision Requested: **Amend** Rule 17.2.6.3 P1 Notable trees-activities within the dripline, as follows:

(a) Any activity within the dripline of a notable tree identified in Schedule 30.2 (Notable Trees) must not:
(i) Involve excavation, compaction, sealing or soil disturbance ~~and~~ or placement of fill material or cleanfill, except for the sealing of an existing road or footpath;

Decision Reasons:

- Amend to be consistent with the equivalent rules in other chapters.

Point Number 697.190

Summary of Decision Requested: **Delete** Rule 17.2.7.2 P1 (a)(vi) Signs - Effects on traffic.

Decision Reasons:

- Delete the rule as it is unreasonable given the small size of the towns and villages.

Point Number 697.191

Summary of Decision Requested: **Amend** Rule 17.2.7.1 P2 (a)(viii) Signs – General, as follows:

(i) The sign is ~~not attached to a~~ for the purpose of identification and interpretation of a Maaori Site of Significance listed in Schedule 30.3 (Maaori Sites of Significance) ~~except for the purpose of identification and interpretation.~~

Decision Reasons:

- Improve clarity of the rule.

Point Number 697.192

Summary of Decision Requested: Amend Rule 17.2.7.1 P3 (i) and (ii) Signs – General, as follows:

- (a) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must comply with all of the following conditions:
~~(i) It relates to the sale of the site on which it is located.~~
 (ii) There is no more than +2 signs per agency site.

Decision Reasons:

- Amend rule for increased clarity.

Point Number 697.193

Summary of Decision Requested: Amend Rule 17.2.7.2 P1 (a) Signs - Effects on traffic, as follows:

- (a) Any sign directed at road users must meet the following conditions:

Decision Reasons:

- Amend for additional clarity.

Point Number 697.194

Summary of Decision Requested: Amend Rule 17.2.8 P1(a) Outdoor storage, as follows:

- (a) Outdoor storage of goods or materials must comply with all the following conditions:

Decision Reasons:

- Amend for additional clarity.

Point Number 697.195

Summary of Decision Requested: Amend Permitted Activities Rule 17.2.8 P1 Outdoor storage, to include a maximum height conditions for the outdoor storage of goods or materials.

Decision Reasons:

- Include maximum height of goods and materials stored outdoors to more effectively manage amenity and access to sunlight on adjoining Residential and Village zoned properties.

Point Number 697.196

Summary of Decision Requested: Amend Rule 17.2.9 Indigenous vegetation clearance inside a Significant Natural Area heading, as follows:

- 17.2.9 Indigenous vegetation clearance ~~inside~~ within a Significant Natural Area

Decision Reasons:

- Amend the title for additional clarity.

Point Number 697.197

Summary of Decision Requested: Amend Rule 17.2.9 P1(a) Indigenous vegetation clearance inside a Significant Natural Area, to add new rule (vi) to read as follows:

- (vi) Removing vegetation for conservation activities.

Decision Reasons:

- This new rule ensures indigenous vegetation can be cleared for conservation activities.

Point Number 697.198

Summary of Decision Requested: Amend Rule 17.2.9 P2 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

- Removal of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per year per ~~property site~~ for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

Decision Reasons:

- Additional clarity that the rule is intended to apply "per site" rather than "per property" which is not a defined term.

Point Number 697.199

Summary of Decision Requested: Delete Rule 17.2.9 P5 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- Remove duplication. P5 duplicates P1 with the only difference being that P5 captures Maaori Freehold Land or Maaori Customary Land, which is captured by P1 anyway.

Point Number 697.200

Summary of Decision Requested: Delete Rule 17.2.9 P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- Delete Rule P6 as it duplicates P2.

Point Number 697.201

Summary of Decision Requested: **Amend** Rule 17.3.1.2 P1 Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:
Any building, structure or vegetation must not protrude through the airport obstacle limitation surfaces ~~as shown~~ identified on the planning maps and in Appendix 9 – Te Kowhai Airfield, and defined in Section E Designation N Waikato Regional Airport

Decision Reasons:

- Amend rule for additional clarity.

Point Number 697.202

Summary of Decision Requested: **Amend** Rule 17.3.2 RD1 Daylight admission, as follows:
*(b) Council's discretion is ~~limited~~ restricted to the following matters:
(i) Height of the building;
(ii) Design and location of the building;
(iii) Level of shading on ~~an~~ adjoining any other sites;
(iv) Privacy on other sites;
(v) Amenity values of the locality.*

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.203

Summary of Decision Requested: **Amend** Rule 17.3.4.1 P1 Building setbacks - Zone boundaries, as follows:
(a) Any building must be set back a minimum of, at least...

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.204

Summary of Decision Requested: **Amend** Rule 17.3.4.2 P2 Building setbacks - Water bodies, as follows:
A public amenity of up to 25m², or a pump shed (public or private), within any building setback identified in Rule 17.3.4.2 P1

Decision Reasons:

- Correct errors and improve clarity of the rule.

Point Number 697.205

Summary of Decision Requested: **Amend** Rule 17.3.4.2 P1 Building setbacks - Water bodies, as follows:
*(a) Any building must be setback a minimum of:
(i) ~~27.5m~~ from the margin of any:
A. Lake;
B. Wetland;
(ii) ~~27.5m~~ from the bank of any river (other than the Waikato River and Waipa River); and
(iii) ~~28~~ 32.5m from the margin of either the Waikato River and the Waipa River;
(iv) ~~27.5m~~ from mean high water springs.*

Decision Reasons:

- Amend the rule so that the setback represent 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.206

Summary of Decision Requested: **Add** the following Permitted Activities Rule into Chapter 17, after Rule 17.3.4.2:
17.3.4.2A Buildings and structures within the National Grid Yard
P1
*(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:
(i) Not involve an increase in the building height or footprint;
(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.*
P2
(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.
P3
*Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:
(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and
(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:
A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.*
AND
Add the following Non complying Activities Rule as follows:
NC1
Any building alterations or additions within the National Grid Yard that does not comply with Rule 17.3.4.2A P1.
NC2
Any new buildings or structures within the National Grid Yard that does not comply with Rule 17.3.4.2A P2 or P3.

Decision Reasons:

- Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 17 for increased clarity and usability of the Plan.

Point Number 697.207

Summary of Decision Requested: **Add** the following Permitted Activities Rule into Chapter 17, after new Rule 17.3.4.2A:

17.3.4.2B Sensitive land uses

P1

(a) Any building for a sensitive land use must be set back a minimum of:

(i) 1.0m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;

(ii) 1.2m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.

P2

(a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:

(i) Not increase the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(iii) Locate a minimum 1.2m from the outer visible foundation of any National Grid tower and locate a minimum 1.2m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

AND

Add the following Discretionary Activities Rule as follows:

D1

Any building for a sensitive land use that does not comply with Rule 17.3.4.2B P1.

AND

Add the following Non Complying Rule as follows:

NC1

Any activity within the National Grid Yard that does not comply with Rule 17.3.4.2B P2.

NC2

Any new building for a sensitive land use within the National Grid Yard.

NC3

Any change of use of an existing building to a sensitive land use within the National Grid Yard.

NC4

The establishment of any new sensitive land use within the National Grid Yard

Decision Reasons:

- Replicate the rule regarding sensitive land uses from Chapter 14 into Chapter 17 for increased clarity and usability of the Plan.

Point Number 697.208

Summary of Decision Requested: **Amend** Rule 17.3.5 P1 Horotiu Acoustic Area, to include the correct table reference from Table 8 to Table 11.

Decision Reasons:

- Correcting a table reference.

Point Number 697.209

Summary of Decision Requested: **Amend** Rule 17.3.5 D1 from Discretionary Activity D1 to Restricted Discretionary Activity RD1.

Decision Reasons:

- Rule needs to refer to the correct activity status, Restricted Discretionary Activity, not Discretionary.

Point Number 697.210

Summary of Decision Requested: **Add** new Permitted Activities Rule after 17.3.5, as follows:

17.3.5A Building – Te Kowhai Noise Buffer

P1

Construction of, or addition, or alteration to, a dwelling within the Te Kowhai Noise Buffer that is designed and constructed to achieve the internal design sound levels specified in Section 3.2 of Appendix 1 (Acoustic Insulation),

AND

Add Restricted Discretionary Rule, as follows:

RD1

(a) Construction of, or addition, or alteration to, a dwelling that does not comply with Rule 17.3.5A P1

(b) Council's discretion shall be restricted to the following matters:

(i) on-site amenity values;

(ii) noise levels received at the national boundary of the dwelling;

(iii) timing and duration of noise received at the national boundary of the dwelling;

(iv) potential for reverse sensitivity effects

Decision Reasons:

- The Business Zone does not currently have a rule relating to the Te Kowhai noise buffer, but there is Business Zoned land within close proximity to Te Kowhai Airpark. There is a possibility that residential units could be proposed on this site so there needs to be a noise insulation rule.

Point Number 697.211

Summary of Decision Requested: **Amend** Rule 17.3.6 P1 Dwelling, to include the correct table reference from Table 8 to Table 14.

Decision Reasons:

- Correcting a table reference.

Point Number 697.212

Summary of Decision Requested: **Amend** Rule 17.3.6 Dwelling, as follows:

PI

(a) One dwelling on ~~the~~ CFR a record of title.

(i) The dwelling must not be located at ground level;

(ii) The dwelling is designed and constructed to achieve the internal design sound levels specified in Appendix I (Acoustic Insulation) – Table ~~8~~ 14.

....

D1

A ~~residential activity dwelling~~ that does not comply with ~~conditions of~~ Rule 17.3.6 P1.

Decision Reasons:

- Correct and consistent use of terminology. Correct reference to diagrams within appendices.

Point Number 697.213

Summary of Decision Requested: **Delete** Rule 17.3.6 NCI Dwelling.

Decision Reasons:

- Deleting duplicated rule. Rule D1 and NCI are addressing the same activity.

Point Number 697.214

Summary of Decision Requested: **Amend** Rule 17.3.7 P1 (a) Living court, to read as follows:

A living court ~~shall~~ must be provided...

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.215

Summary of Decision Requested: **Amend** Rule 17.3.7 P1(a)(i) Living court, to read as follows:

It is readily accessible from a living area of the dwelling; ~~and~~

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.216

Summary of Decision Requested: **Amend** Rule 17.3.8 Heritage heading, to read as follows:

Heritage Items

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.217

Summary of Decision Requested: **Amend** Rule 17.3.8.3 All heritage items – Alteration or addition, as follows:

PI

(a) Alteration ~~or~~ addition to a heritage item listed in Schedule 30.1 (Heritage Items) must comply with the following conditions....

RD1

(a) Alterations ~~or~~ additions to a heritage item that does not comply with Rule 17.3.8.3 P1

Decision Reasons:

- Improving the clarity of the rule.

Point Number 697.218

Summary of Decision Requested: **Amend** Rule 17.3.7.4-All heritage items- Maintenance or repair, as follows:

~~17.3.7.4~~ 4 All heritage items – Maintenance or repair

Decision Reasons:

- Correct numbering.

Point Number 697.219

Summary of Decision Requested: **Amend** Rule 17.3.7.5- All heritage items- All site development, as follows:

~~17.3.7.5~~ 5 All heritage items – All site development

Decision Reasons:

- Correct numbering.

Point Number 697.220

Summary of Decision Requested:	Amend 17.4 Subdivision heading, to read as follows: <u>Subdivision Rules</u>
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.
Point Number	697.221
Summary of Decision Requested:	Amend 17.4.1 General subdivision heading, to read as follows: General <u>Subdivision – General</u>
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.
Point Number	697.222
Summary of Decision Requested:	Amend Rule 17.4.1 General subdivision, as follows: <i>(1) Rule 17.4.1 provides for subdivision density <u>within the Business Zone.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity on the relationship between rules.
Point Number	697.223
Summary of Decision Requested:	Amend Rule 17.4 (4) Subdivision, as follows: <i>(4) Rules 17.4.1 are also subject to compliance with the following rules subdivision controls-</i> <i>(i) Rule 17.4.1.3 – subdivision boundary adjustments</i> <i>(ii) Rule 17.4.1.4 – subdivision amendments and updates to cross lease flats plans</i> <i>(iii) Rule 17.4.1.5 – subdivision title boundaries Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori</i> <i>(iv) Rule 17.4.1.6 - subdivision of land containing heritage items</i> <i>(v) <u>Rule 17.4.1.6A – subdivision of land within the National Grid Corridor.</u></i> <i>(vi) Rule 17.4.1.7 – subdivision road frontage</i> <i>(vii) Rule 17.4.1.8 - subdivision esplanade reserves and esplanade strips.</i>
	AND
	Add new rule after Rule 17.4.1.5 as follows: <u>17.4.1.5A Subdivision of land within the National Grid Corridor.</u>
	<u>RDI</u> <i>(a) <u>The subdivision of land within the National Grid Corridor must comply with all of the following conditions:</u></i> <i>(i) <u>All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and</u></i> <i>(ii) <u>The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.</u></i> <i>(b) <u>Council's discretion is restricted to the following matters:</u></i> <i>(i) <u>The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;</u></i> <i>(ii) <u>The ability to provide a complying building platform outside of the National Grid Yard;</u></i> <i>(iii) <u>The risk of electrical hazards affecting public or individual safety, and the risk of property damage;</u></i> <i>(iv) <u>The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.</u></i>
	AND
	Add new non complying rule, as follows: <u>NCL</u> <u>Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 17.4.1.5A RDI.</u>
Decision Reasons:	<ul style="list-style-type: none"> Replicate the subdivision rule within the National Grid Corridor from Chapter 14 (where this is relevant to the Business Zone) into Chapter 17 for increased clarity and usability of the Plan.
Point Number	697.224
Summary of Decision Requested:	Amend Rule 17.4.1 RDI (a) General subdivision as follows: <i>(a) Subdivision of land must comply with all of the following conditions:</i> <i>(i) Proposed lots <u>The record of title to be subdivided</u> must have a minimum size of 225m² net site area with the exception of access or utility allotments or reserves to vest;</i> <i>(ii) All <u>Proposed</u> lots must be connected to public-reticulated water supply and wastewater.</i>
Decision Reasons:	<ul style="list-style-type: none"> Increased clarity and consistent use of terms.
Point Number	697.225
Summary of Decision Requested:	Amend Rule 17.4.1.1 RDI (a) (i) Subdivision - Multi-unit development, to read as follows: <i>An application for land use consent under Rule 17.1.4 (Multi-unit housing development) must...</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with the defined term.
Point Number	697.226
Summary of Decision Requested:	Amend Rule 17.4.1.2 CI(a)(i) Subdivision – Boundary adjustments, to read as follows: <i>The conditions specified in <u>either</u>:</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.

Point Number	697.227
Summary of Decision Requested:	Amend Rule 17.4.1.2 C1 (b) Subdivision – Boundary adjustments, as follows: (b) The Council's control shall be limited to <u>reserved over</u> the following matters: (i) Subdivision layout; (ii) Shape of title and variation in title <u>lot</u> size.
Decision Reasons:	<ul style="list-style-type: none"> Increased clarity and consistent use of terms.
Point Number	697.228
Summary of Decision Requested:	Amend Rule 17.4.1.3 C1 Subdivision - Amendments and updates to cross lease flats plans, as follows: (a) An amendment or update to a cross lease or flats plan where: (i) An amendment. The purpose is to convert a cross lease or flats plan to a fee simple title; or (ii) An amendment or update to include for additions or alterations to buildings, accessory buildings and areas for exclusive use by an owner or owners. (b) The Council's control shall be limited to <u>is reserved over</u> the following matters: (i) Purpose of the amendment or update to cross lease or flats plan <u>boundary adjustment</u> ; (ii) Effects on existing buildings; (iii) Site layout and design of cross lease or flats plan; (iv) Compliance with permitted building rules where the amendment is to convert a cross lease title to fee simple.
Decision Reasons:	<ul style="list-style-type: none"> Provide clarity of rule and consistency with other zones.
Point Number	697.229
Summary of Decision Requested:	Amend Rule 17.4.1.4 NC1 Subdivision - Title boundaries – Significant Natural Areas, Maaori Sites and Areas of Significance to Maaori to be a Discretionary activity rather than non-complying as follows: NC1 Subdivision that does not comply with Rule 17.4.1.4 RD1
Decision Reasons:	<ul style="list-style-type: none"> Discretionary is a more appropriate activity cascade for subdivisions that can not meet the conditions.
Point Number	697.230
Summary of Decision Requested:	Amend Rule 17.4.1.5 NC1 Subdivision - land containing heritage items, to be a Discretionary Activity rather than Non Complying as follows: NC1 Subdivision that does not comply with Rule 17.4.1.4 RD1
Decision Reasons:	<ul style="list-style-type: none"> Discretionary is a more appropriate activity cascade for subdivisions that can not meet the conditions.
Point Number	697.231
Summary of Decision Requested:	Amend Rule 17.4.1.6 RD1 Subdivision - Road frontage, as follows: RD1 (a) Subdivision of land. Every proposed lot with a road frontage boundary, other than any access or utility allotment, right of way or access leg, must provide have: (i) A width along the road boundary of at least 15m; and (ii) Rule 17.4.1.6 (a)(i) (a) does not apply to a proposed access allotment or utility allotment. (b) The Council's discretion shall be limited/restricted to the following matters: (i) Road efficiency and safety and efficiency of vehicle access and road network; (ii) Amenity and streetscape.
Decision Reasons:	<ul style="list-style-type: none"> Improving the clarity of the rule.
Point Number	697.232
Summary of Decision Requested:	Amend Rule 17.4.1.7 Esplanade reserves and esplanade strips heading, to read as follows: <u>Subdivision – Esplanade reserves and esplanade strips</u>
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.
Point Number	697.233
Summary of Decision Requested:	Amend Rule 17.4.1.7 RD1 (a) Esplanade reserves and esplanade strips, as follows: (a) Subdivision must create an esplanade reserve or esplanade strip 20m wide (or other width stated in Appendix 4 (Esplanade Priority Areas) is required to be created and vested in Council from every subdivision where the land is being subdivided is proposed lot- (i) less than 4ha and within 20m of any; A. A. mean high water springs; B. the bank of any river whose bed has an average width of 3m or more; or C. a lake whose bed has an area of 8ha or more; and (ii) 4ha or more <u>and located</u> within 20m of <u>any;</u> <u>A</u> mean high water springs or <u>B</u> a water body identified in Appendix 4 (Esplanade Priority Areas).
Decision Reasons:	<ul style="list-style-type: none"> Improving the clarity of the rule.

Point Number 697.234
Summary of Decision Requested: Delete Rule 17.4.1.7 (RD1) matter of discretion (b)(vi) Esplanade reserves and esplanade strips.
Decision Reasons:

- Deletion of a matter of discretion that is inappropriate as it is not an effect that should be considered in a resource consent application.

Point Number 697.235
Summary of Decision Requested: Amend Rule 17.5.1 (2) Application of rules, as follows:
(2) The rules that apply to a permitted activity in Rule 17.5.1.2 P1-P1.7.8 within the Lakeside Te Kauwhata Precinct as identified on the planning maps are as follows:
Decision Reasons:

- Improving accuracy of the rule.

Point Number 697.236
Summary of Decision Requested: Amend 17.5 Specific Area - Lakeside Te Kauwhata Precinct, by replacing all references to the matters identified in the assessment criteria as X, with the correct reference.
Decision Reasons:

- Improves clarity of the rules and addresses a placeholder error.

Point Number 697.237
Summary of Decision Requested: Amend 17.5 Specific Area - Lakeside Te Kauwhata by replacing all references to CLDC with the correct term "comprehensive land development consent".
Decision Reasons:

- Improves clarity of the rules.

Point Number 697.238
Summary of Decision Requested: Amend 17.5 Specific Area - Lakeside Te Kauwhata by replacing all references to CSC with the correct term "Comprehensive Subdivision Consent".
Decision Reasons:

- Improves clarity of the rules.

Point Number 697.239
Summary of Decision Requested: Amend 17.5 Specific Area - Lakeside Te Kauwhata Precinct so all rule references are prefaced by the word "Rule".
Decision Reasons:

- Improves accuracy of the rule references.

Point Number 697.240
Summary of Decision Requested: Delete Rule 17.5.3 DI (b) Discretionary Activities, as follows:
~~*(b) The matters over which Council reserves discretion shall be used for assessing discretionary activity applications under this rule.*~~
Decision Reasons:

- It is not in accordance with the RMA for a discretionary activity to have matters of discretion restricted.

Point Number 697.241
Summary of Decision Requested: Amend Rule 17.5.5 P1 Daylight admission, as follows:
Any building shall not protrude through a height control plane rising at an angle of 45 degrees commencing at an elevation of 3.5m above ground level at every point of the site boundary where it adjoins a residential zone.
Decision Reasons:

- Correcting an error.

Point Number 697.242
Summary of Decision Requested: Amend Rule 17.5.5 RD1 (b) Daylight admission, as follows:
(b) Council's Discretion is restricted to:
Decision Reasons:

- Consistency with other restricted discretionary rules.

Point Number 697.243
Summary of Decision Requested: Amend Rule 17.5.9 RD1 (a)(i) Subdivision, as follows:

(i) is in accordance with Te Kawhata Lakeside Precinct Plan 16.5.1(3)(a); the roading network, walkways and cycleways shown on Precinct Plan 16.5.1(3)(b); and the open space shown on Precinct Plan 15.5.2-1(3)(c), as set out in the precinct parameters below; and

Decision Reasons:

- Correcting a referencing error.

Point Number 697.244

Summary of Decision Requested: Amend Rule 17.5.9 NC2 Subdivision, as follows:

A ~~Comprehensive Subdivision Consent~~ that does not meet ~~any of the parameters-conditions~~ for a discretionary activity outlined in 17.5.9 D1.

Decision Reasons:

- Ensuring consistent use of terminology.

Point Number 697.245

Summary of Decision Requested: Amend the heading for Chapter 18 to read as follows:

Business Town Centre Zone Rules

Decision Reasons:

- For increased clarity.

Point Number 697.246

Summary of Decision Requested: Amend Chapter 18 (2) Business Town Centre Zone, as follows:

The rules that apply to subdivision in the Business Town Centre Zone are contained in Rule 18.4 and the relevant rules in 14 Infrastructure and Energy and 15 Natural Hazards and Climate Change /Placeholder.

Decision Reasons:

- To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15 Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.247

Summary of Decision Requested: Amend Rule 18.1.2 Permitted activity Rule (a), as follows:

~~(a) The following activities listed below are permitted activities if they meet all the following:~~
~~(i) Activity-specific conditions; and~~
~~(ii) Land Use – Effects rules in Rule 18.2 (unless the activity-specific rule and/or conditions identifies a condition(s) that does not apply); and~~
~~(iii) Land Use – Building rules in Rule 18.3 (unless the activity-specific rule and/or conditions identifies a condition(s) that does not apply); and~~
~~(iii) Activity-specific conditions.~~

Decision Reasons:

- Additional clarity to make it clear how the activity-specific conditions are to be applied.

Point Number 697.248

Summary of Decision Requested: Delete Rule 18.1.2 P3 Commercial services.

Decision Reasons:

- There is duplication between the terms "commercial activities" and "commercial services" and this is more appropriately represented by a single term.

Point Number 697.249

Summary of Decision Requested: Amend Rule 18.1.2 P10 (e) A temporary event, as follows:

~~(e) The site is returned to its original previous condition no more than 3 days after the end of the event:~~

Decision Reasons:

- Consistency with other chapters.

Point Number 697.250

Summary of Decision Requested: Amend Rule 18.1.3 Restricted Discretionary Rule RD1 (c), as follows:

~~(c) A detailed site plan depicting the proposed record of title boundaries for each residential unit and any common areas (including access and services) must be provided, ensuring that a freehold (fee simple) or unit title subdivision complies with Rule 18.4.2 (Subdivision of multi-unit developments);~~

Decision Reasons:

- Consistency across the chapters.

Point Number 697.251

Summary of Decision Requested: Add Rule 18.1.3 RD1 (g) Restricted Discretionary Activity, as follows:

~~(g) Each residential unit must meet the following minimum unit size:~~

<u>Unit of Apartment</u>	<u>Minimum Unit Area</u>
<u>Studio Unit or 1 bedroom unit</u>	<u>60m²</u>
<u>2 bedroom unit</u>	<u>80m²</u>

Decision Reasons:

- Include residential unit size table for consistency with the subdivision rule.

Point Number

697.252

Summary of Decision Requested:

Amend Rule 18.1.3 Restricted Discretionary Activities table heading, as follows:

~~The Council's discretion shall be limited to the following matters: Matters of Discretion~~

Decision Reasons:

- Alignment with other zone chapters.

Point Number

697.253

Summary of Decision Requested:

Amend Rule 18.1.3 Restricted Discretionary Activities RD1(a), to read as follows:

- (a) A multi-unit development that meets all of the following conditions:
(i) ~~The Land Use – Effects in Rule 18.2;~~
(ii) ~~The Land Use – Building in Rule 18.3, except the following rules do not apply.~~
A. Rule 18.3.9 (Dwellings) ~~does not apply~~;
B. Rule 18.3.10 (Living court) ~~does not apply~~;

Decision Reasons:

- Alignment with other zone chapters.

Point Number

697.254

Summary of Decision Requested:

Amend Rule 18.1.3 RD1 (i) Restricted Discretionary Activities, as follows:

- (vi) A communal service court is provided comprising:
A, a minimum of 20m²; and
B, minimum dimension of 3m;

Decision Reasons:

- The communal service court needed a minimum size dimension.

Point Number

697.255

Summary of Decision Requested:

Amend Rule 18.1.4 Discretionary Activities (D1), as follows:

Any permitted activity that does not comply with one or more of the activity-specific conditions for a permitted activity ~~(in Rule 18.1.2) unless a lesser activity status under Land Use – Effects Rule 18.2 or Land Use – Building Rule 18.3 applies.~~

Decision Reasons:

- Provide additional clarity in the rule.

Point Number

697.256

Summary of Decision Requested:

Delete Rule 18.2.1 Noise (1);

AND

Amend Rule 18.2.1 Noise - for consequential renumbering of (2) and (3).

Decision Reasons:

- Reduce duplication - this noise rule is adequately covered by points (2) and (3).

Point Number

697.257

Summary of Decision Requested:

Delete 18.2.1.1 Rules P3 and P4 Noise - General;

AND

Add to Rule 18.2.1.1 P2 Noise - General, as follows:

- (a) Noise measured within any site:
(i) In the Business Town Centre Zone must not exceed:
A. 65dB (LAeq), 7am to 11pm every day; and
B. 55dB (LAeq) and 85dB (LAmax), 11pm to 7am the following day; or
(ii) In the Residential Zone and Village Zone must not exceed:
A. 55dB (LAeq), 7am to 7pm; and
B. 50dB (LAeq), 7pm to 10pm; and
C. 40dB (LAeq) and 65dB (LAmax), 10pm to 7am the following day.
(b) Noise measured within any site in any zone other than the Business Town Centre Zone, Residential Zone or Village Zone must meet the permitted noise levels for that zone.
(c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics - Measurement of Environmental Sound".
(d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics - Environmental noise".

AND

Amend Rule 18.2.1.1 D1 Noise - General, as follows:

Noise that does not comply with Rules 18.2.1.1 P2, ~~P3 or P4.~~

Decision Reasons:

- To clarify that the conditions are associated with noise and are not an activity in their own right.

Point Number

697.258

Summary of Decision Requested:

Amend Rule 18.2.1.2 P1 Noise – Construction, as follows:

(a) Construction noise must ~~not exceed~~ ~~meet~~ the limits in NZS 6803:1999 (Acoustics – Construction Noise); and

Decision Reasons:

- Additional clarity of the rule – construction noise should not exceed the limits, rather than meet the limits in the NZ Standard.

Point Number 697.259

Summary of Decision Requested: Amend Rule 18.2.2 P1 Servicing and hours of operation, as follows:

The loading and unloading of vehicles ~~and/or~~ the receiving of customers ~~and/or~~ deliveries associated with a commercial activity on a site adjoining the Residential and Village Zones may occur between 6.30am and ~~7.30-8.00pm~~.

Decision Reasons:

- Increase the hours of operation to allow more reasonable use of the site.

Point Number 697.260

Summary of Decision Requested: Amend Rule 18.2.3 P1 Glare and artificial light spill, as follows:

Illumination from glare and artificial light spill must not exceed 10 lux measured horizontally and vertically at any ~~other-site~~ zoned Residential, Village or Country Living Zone.

Decision Reasons:

- Consistency of wording with other chapters. The focus of the rule in the Business Town Centre Zone should be to control light spill outside the Business Town Centre Zone into the residential zones.

Point Number 697.261

Summary of Decision Requested: Amend Rule 18.2.4 (1) Earthworks, as follows:

(1) Rules 18.2.4.1 – Earthworks - General provides the permitted rules for earthworks activities for the Business Town Centre Zone. This rule does not apply in those areas specified in Rules 18.2.4.1A and 18.2.4.2.

Decision Reasons:

- Clarify that the earthworks general rule does not apply in those areas where there is a specific rule.

Point Number 697.262

Summary of Decision Requested: Amend Rule 18.2.4 Earthworks (2), as follows:

(2) ~~There is a specific standards for earthworks are within rules:~~

- (a) ~~Rule 18.2.4.1A - Earthworks within the National Grid Yard~~*
(a) ~~Rule 18.2.4.2 – Maaori Sites and Maaori Areas of Significance.~~

AND

Add new rule, after Rule 18.2.4.1 to read:

18.2.4.1A Earthworks within the National Grid Yard

P1

The following earthworks within the National Grid Yard:

- (a) ~~Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;~~*
(b) ~~Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;~~
(c) ~~Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.~~

P2

Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:

- (a) ~~Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and~~*
(b) ~~Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.~~

P3

Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:

- (a) ~~Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;~~*
(b) ~~The risk to the structural integrity of the affected National Grid support structure(s);~~
(c) ~~Do not compromise the stability of a National Grid support structure;~~
(d) ~~Do not result in the loss of access to any National Grid support structure; and~~
(e) ~~Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.~~

RDL

Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 18.2.4.1A P1, P2 or P3.

Discretion is restricted to:

- (a) ~~Impacts on the operation, maintenance, upgrading and development of the National Grid;~~*
(b) ~~The risk to the structural integrity of the affected National Grid support structure(s);~~
(c) ~~Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;~~
(d) ~~The risk of electrical hazards affecting public or individual safety, and the risk of property damage.~~

Decision Reasons:

- Replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 18 (where they are relevant to the Business Town Centre Zone) for increased clarity and usability of the Plan.

Point Number 697.263

Summary of Decision Requested: Amend Rule 18.2.4.1 P1 Earthworks – General, as follows:

P1

Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:

- (i) ~~Earthworks must be~~ located more than 1.5m from a public sewer, open drain, overland flow path or other service pipe;*
(ii) ~~Earthworks must not~~ exceed a volume of more than 250m³ and an area of more than 1,000m² over any single consecutive 12 month period within a site;
(iii) The height of the resulting cut, filled areas or fill batter face in stable ground, ~~not including any surcharge~~, does not exceed 1.5m, with a maximum slope of 1:2 (1 vertical to 2 horizontal);
(iv) ~~Earthworks are set back at least 1.5m from all boundaries;~~
(v) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
(vi) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
(vii) ~~Earthworks must not~~ Do not divert or change the nature of natural water flows, waterbodies or established drainage paths;
(viii) ~~Earthworks must not result in the site being unable to be serviced by gravity sewers.~~

P2

(a) Earthworks for the purpose of creating a building platform within a site using imported fill material.

~~P23~~

~~(a) Earthworks for purposes other than creating a building platform within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions. The importation of fill material to a site must meet the following conditions, in addition to the conditions in Rule 18.2.4.1.1 P1:~~

~~(i) Must not exceed a total volume of 500m³ per site and a depth of 1m;~~

~~(ii) Is fit for compaction;~~

~~(iii) The slope height of the resulting filled area batter face in stable ground must not exceed 4.5m with a maximum slope of 1:2 (1m vertical to 2m horizontal);~~

~~(iv) Fill material is setback at least 1.5m from all boundaries;~~

~~(v) Does not restrict the ability for land to drain;~~

~~(vi) Is not located within 1.5m of public sewers, utility services or manholes;~~

~~(vii) The sediment from fill material is retained on the site;~~

~~(viii) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;~~

~~(ix) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;~~

~~(x) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.~~

RD1

(a) Earthworks that do not comply with Rules 18.2.4.1 P1 or P23.

(b) The Council's discretion shall be ~~limited~~ restricted to the following matters:

(i) Amenity values and landscape effects;

(ii) Volume, extent and depth of earthworks;

(iii) Nature of fill material;

(iv) Contamination of fill material;

(v) Location of the earthworks in relation to waterways, significant indigenous vegetation and habitat;

(vi) Compaction of the fill material;

(vii) Volume and depth of fill material;

(viii) Protection of the Hauraki Gulf Catchment Area;

(ix) Geotechnical stability;

(x) Flood risk, including natural water flows and established drainage paths

(xi) Land instability, erosion and sedimentation;

(xii) Proximity to underground services and service connections.

Decision Reasons:

- Consistency with the equivalent rule in other chapters. Also enabling the importation of fill for a building platform as a permitted activity.

Point Number

697.264

Summary of Decision Requested:

Amend Rule 18.2.4.2 RD2 Earthworks - Maori Sites and Maori Areas of Significance, as follows:

~~(b) The Council's discretion is limited~~ restricted to the following matters:

~~(i) Location of earthworks in relation to the site;~~

~~(ii) Effects on heritage and cultural values.~~

Decision Reasons:

- The matter of discretion is not relevant because the whole property boundary is included as a scheduled site.

Point Number

697.265

Summary of Decision Requested:

Amend Rule 18.2.5 Hazardous substances, as follows:

~~(a) The use, storage or disposal of any hazardous substances where~~ must meet the following conditions:

~~(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Business Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances)~~

Decision Reasons:

- Amend the hazardous substances rule to align with other chapters.

Point Number

697.266

Summary of Decision Requested:

Add to Rule 18.2.5 Hazardous substances, as follows:

D2 A service station that does not comply with Rule 18.2.5 C1.

AND

Amend Rule 18.2.5 Discretionary Activities Rule D1, as follows:

~~The use, storage or disposal of hazardous substances that do not comply with Rules 18.2.5 P1 or P2 or C1.~~

Decision Reasons:

- Insert rule for service stations that do not comply with the permitted activity conditions for consistency with other chapters.

Point Number

697.267

Summary of Decision Requested:

Add new Rule 18.2.5 NCI Hazardous substances, as follows:

NC1 Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 into Chapter 18 (where relevant to the Business Town Centre Zone) for increased clarity and usability of the Plan.

Point Number

697.268

Summary of Decision Requested:

Delete Rule 18.2.6.2 Restricted Discretionary Activities Rule RD1 (b)(ii) Effects on public safety.

Decision Reasons:

- Amend to be consistent with the equivalent rules in other chapters.

Point Number	697.269
Summary of Decision Requested:	<p>Amend Rule 18.2.6.3 P1 Notable tree - activities within the dripline, as follows:</p> <p>(a) Any activity within the dripline of a notable tree identified in Schedule 30.2 (Notable Trees) complies with the following conditions must not:</p> <p>(i) No involve excavation, compaction, sealing or soil disturbance and/or placement of fill material, or cleanfill except for the sealing of an existing road or footpath; and</p> <p>(ii) No involve parking or storage of materials, vehicles or machinery; and</p> <p>(iii) No discharge of an eco-toxic substance; and</p> <p>(iv) No involve construction of structures.</p> <p>RD1</p> <p>(a) Any activity <u>within the dripline of a notable tree</u> that does not comply with Rule 18.2.6.3 P1.</p>
Decision Reasons:	<ul style="list-style-type: none"> Improved clarity of the rule and consistency with the other chapters.
Point Number	697.270
Summary of Decision Requested:	<p>Amend Rule 18.2.7.1 P2 (a)(ix) Signs – General, as follows:</p> <p>(ix) The sign is not attached to a for the purpose of identification and interpretation of a Maori Site of Significance listed in Schedule 30.3 (Maori Sites of Significance) except for the purpose of identification and interpretation.</p>
Decision Reasons:	<ul style="list-style-type: none"> Improve clarity of the rule.
Point Number	697.271
Summary of Decision Requested:	<p>Amend Rule 18.2.7.1 P3 (a)(i) and (ii) Signs – General, as follows:</p> <p>(b) A real estate 'for sale' or 'for rent' sign <u>relating to the site on which it is located</u> must comply with all of the following conditions:</p> <p>(i) It relates to the sale of the site on which it is located.</p> <p>(ii) There is no more than 4 <u>2</u> signs per agency site.</p>
Decision Reasons:	<ul style="list-style-type: none"> Amend rule for increased clarity.
Point Number	697.272
Summary of Decision Requested:	<p>Amend Rule 18.2.7.2 P1 Signs - Effects on traffic, as follows:</p> <p>(b) Any sign directed at road users must <u>meet the following conditions:</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Amend for additional clarity.
Point Number	697.273
Summary of Decision Requested:	Delete Rule 18.2.7.2 P1 (a)(iv) Signs - Effects on traffic.
Decision Reasons:	<ul style="list-style-type: none"> It is not realistic or reasonable to require signs to be 130m from the entrance in a Business Town Centre Zone. This would result in clutter and confusion for motorists within the town centre.
Point Number	697.274
Summary of Decision Requested:	<p>Amend Rule 18.2.8 P1 (a)(i) Outdoor storage, as follows:</p> <p>(a) Outdoor storage of goods or materials must comply with the following conditions:</p> <p>(i) Be associated with the <u>activity operating from the site</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Amend for additional clarity.
Point Number	697.275
Summary of Decision Requested:	Amend Rule 18.2.8 P1 Outdoor storage, to include a maximum height condition for the outdoor storage of goods or materials where this is appropriate to manage amenity effects such as next to Residential, Village or Country Living Zones.
Decision Reasons:	<ul style="list-style-type: none"> Include maximum height of goods and materials stored outdoors to more effectively manage amenity and access to sunlight on adjoining Residential and Village zoned properties.
Point Number	697.276
Summary of Decision Requested:	Amend Rule 18.2.8 P1 Outdoor storage, to include effective screening mechanisms for the outdoor storage of goods, where this is appropriate to manage amenity effects such as next to Residential, Village or Country Living Zones.
Decision Reasons:	<ul style="list-style-type: none"> Consider whether a close boarded fence or screening planting is the most effective means of ensuring amenity values are retained.
Point Number	697.277
Summary of Decision Requested:	Amend Rule 18.3.2 RD1 Daylight admission, as follows:

(b) Council's discretion is ~~limited~~ restricted to the following matters:

- (i) Height of the building;
- (ii) Design and location of the building;
- (iii) Level of shading on ~~an~~ adjoining any other sites;
- (iv) Privacy ~~of an~~ other sites;
- (v) ~~effects on~~ Amenity values and town centre character.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.278

Summary of Decision Requested: **Amend** Rule 18.3.3 P1 Gross leasable floor area, as follows:

(a) ~~Any~~ Every individual tenancy....

Decision Reasons:

- Improved clarity of the rule.

Point Number 697.279

Summary of Decision Requested: **Amend** Rule 18.3.5 P1(a) Verandahs, as follows:

(a) Any new building, or alteration that increases the height or footprint of an existing building, on land with a verandah line identified on the planning maps, must be provided with a verandah that complies with the following conditions:

Decision Reasons:

- Amend to only require verandahs to be provided where alterations increase the height or footprint of the building. It is not reasonable to require verandahs for internal alterations and modifications.

Point Number 697.280

Summary of Decision Requested: **Amend** Rule 18.3.7 P1 Building setbacks – Water-bodies, as follows:

P1

(a) Any building must be setback a minimum of:

(i) ~~22.5m~~ 27.5m from the margin of any:

A. lake;

B. wetland;

(ii) ~~22.5m~~ 27.5m from the bank of any river (other than the Waikato and Waipa Rivers);

(iii) ~~22.5m~~ 32.5m from the bank of either the Waikato River and the Waipa River; and

(iv) ~~22.5m~~ 27.5m from mean high water springs.

Decision Reasons:

- Amend the rule so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.281

Summary of Decision Requested: **Add** the following rule into Chapter 18, after Rule 18.3.7:

18.3.7A Buildings and structures within the National Grid Yard

P1

(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:

(i) Not involve an increase in the building height or footprint;

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.

P2

(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.

P3

Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663; or

NCL

Any building alterations or additions within the National Grid Yard that does not comply with Rule 18.3.7A P1.

NC2

Any new buildings or structures within the National Grid Yard that does not comply with Rule 18.3.7A P2 or P3.

Decision Reasons:

- Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 18 (where this is relevant to the Business Town Centre Zone) for increased clarity and usability of the Plan.

Point Number 697.282

Summary of Decision Requested: **Add** the following rule into Chapter 18 Business Town Centre Zone, after new rule 18.3.7A:

18.3.7B Sensitive land uses

P1

(a) Any building for a sensitive land use must be set back a minimum of:

(i) 1.0m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;

(ii) 1.2m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.

P2

(a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:

(i) Not increase the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission

line operating conditions; and
(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

D1
Any building for a sensitive land use that does not comply with Rule 18.3.7B P1.

NC1
Any activity within the National Grid Yard that does not comply with Rule 18.3.7B P2.

NC2
Any new building for a sensitive land use within the National Grid Yard.

NC3
Any change of use of an existing building to a sensitive land use within the National Grid Yard.

NC4
The establishment of any new sensitive land use within the National Grid Yard.

Decision Reasons:

- Replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 18 (where this is relevant to the Business Town Centre Zone) for increased clarity and usability of the Plan.

Point Number 697.283

Summary of Decision Requested: Amend Rule 18.3.8 P1(a) and (b) Dwelling, as follows:
~~(a) One dwelling on a record of title within a lot must comply with all of the following conditions:~~
~~(b) The dwelling must comply with all of the following conditions~~

Decision Reasons:

- Correct and consistent use of terminology.

Point Number 697.284

Summary of Decision Requested: Amend Rule 18.3.10 Historic Heritage heading, as follows:

~~Historic Heritage Items~~

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.285

Summary of Decision Requested: Amend Rule 18.3.10 (1) Historic Heritage to read, as follows:
~~The following rules manage heritage items (buildings and monuments) within the Business Town Centre Zone~~

Decision Reasons:

- Alignment with other zone chapters.

Point Number 697.286

Summary of Decision Requested: Amend Rule 18.3.10.2 D2 Group B heritage item demolition, removal or relocation, as follows:
~~Demolition, removal and relocation of Group B heritage item 104 Ngaruawahia Plunket Rooms that does not meet Rule 18.3.10.2 P1.~~

Decision Reasons:

- Correct incorrect rule reference.

Point Number 697.287

Summary of Decision Requested: Amend Rule 18.3.10.3 P1(a) All heritage items – alteration or addition, as follows:
~~Alteration or addition of a heritage item listed in Schedule 30.1 (Heritage Items) where must comply with the following conditions:~~

Decision Reasons:

- Alignment with other zone chapters.

Point Number 697.288

Summary of Decision Requested: Amend Rule 18.3.10.4 P1(a) All heritage items – maintenance or repair, as follows:
~~Maintenance or repair of a heritage item listed in Schedule 30.1 (Heritage Items) where must comply with the following conditions:~~

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.289

Summary of Decision Requested: Amend 18.3.10.5 Rule RD1(b) (iv) All heritage items – all site development, to read as follows:
~~The relationship of the heritage items with the setting including the area between the heritage item and the road.~~

Decision Reasons:

- Alignment with other zone chapters.

Point Number	697.290
Summary of Decision Requested:	Amend 18.4 Subdivision heading, to read as follows: <u>Subdivision Rules</u>
Decision Reasons:	<ul style="list-style-type: none"> Alignment with other zone chapters.
Point Number	697.291
Summary of Decision Requested:	Amend Rule 18.4 Subdivision (1), to read as follows: <i>Rules 18.4.1 and 18.4.2 provide for subdivision density and apply across within the Business Town Centre Zone.</i>
Decision Reasons:	<ul style="list-style-type: none"> Alignment with other zone chapters.
Point Number	697.292
Summary of Decision Requested:	Amend Rule 18.4 (1)(a)(iii) Subdivision, as follows: <i>(iii) Rule 18.4.5 – subdivision title boundaries, Maori sites of significance and <u>Maori</u> areas of significance to Maori.</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of terms.
Point Number	697.293
Summary of Decision Requested:	Amend Rule 18.4.1 RD1 (a) Subdivision - general, as follows: <i>(a) Subdivision shall must comply with all of the following conditions: (i) Proposed lots The record of title to be subdivided must shall have a minimum size of 225m² net site area, with the exception of access or utility allotments or reserves to vest; (ii) All Proposed lots shall be connected to public-reticulated water supply and wastewater.</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of terms with other chapters.
Point Number	697.294
Summary of Decision Requested:	Amend Rule 18.4.2 RD1 (a) Subdivision - Multi-unit subdivision, as follows: <i>Subdivision for multi-unit development shall must..."</i>
Decision Reasons:	<ul style="list-style-type: none"> Alignment with other zone chapters.
Point Number	697.295
Summary of Decision Requested:	Amend Rule 18.4.2 RD1 (a)(ii) Subdivision - Multi-unit subdivision, as follows: <i>Be connected to public wastewater and water reticulation; <u>and</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Alignment with other zone chapters.
Point Number	697.296
Summary of Decision Requested:	Amend Rule 18.4.3 C1 Subdivision – Boundary adjustments, as follows: <i>(a) A boundary adjustments must comply with the following: (i) The conditions specified in either: A. Rule 18.4.1 (Subdivision - General); or B. Rule 18.4.2 (Subdivision- multi-unit development); and (b) Proposed lots must not generate any additional building infringements to those which legally existed prior to the boundary adjustment. (c) The Council's control shall be limited reserved over to the following matters: (i) Purpose of the boundary adjustment; (ii) Effects on existing buildings.; (iii) <u>Shape of title and variation in lot size.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of terms with other chapters.
Point Number	697.297
Summary of Decision Requested:	Amend Rule 18.4.4 C1 (a) Subdivision - Amendments and updates to cross lease or flats plans, as follows: <i>(a) An amendment or update to a cross lease or flats plan where: (i) The purpose is to convert a cross lease or flats plan to a fee simple title; and or (ii) The An amendment or update must identify for additions or alterations to buildings, accessory buildings and areas for exclusive use by an owner or owners</i>
Decision Reasons:	<ul style="list-style-type: none"> Increased clarity of the rule.

Point Number	697.298
Summary of Decision Requested:	Amend Rule 18.4.5 Subdivision-Title boundaries-Maori Sites and Areas of significance to Maori heading, as follows: <i>18.4.5 Subdivision - Title boundaries – Maori Sites and Maori Areas of significance to Maori</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of terminology.
Point Number	697.299
Summary of Decision Requested:	Amend Rule 18.4.5 Subdivision - Title boundaries – Maori Sites and Areas of significance to Maori, as follows: <i>(a) Subdivision of any lots containing any Significant Natural Areas; Maori sites of significance.....</i>
Decision Reasons:	<ul style="list-style-type: none"> Delete references to significant natural areas in the rule as this is not relevant to the Business Town Centre Zone.
Point Number	697.300
Summary of Decision Requested:	Amend Rule 18.4.5 NCI Subdivision - Title boundaries – Maori Sites and Areas of significance to Maori, to change from Non Complying to Discretionary as follows: NCD
Decision Reasons:	<ul style="list-style-type: none"> Amend the activity status upon non compliance with a standard to be discretionary rather than non-complying. It may be possible to manage the effects of dividing a significant area or item across title boundaries, with no adverse effects on the item.
Point Number	697.301
Summary of Decision Requested:	Amend Rule 18.4 Subdivision (2)(a), as follows: <i>(y) Rule 18.4.6A – subdivision of land within the National Grid Corridor</i> <i>(vi) Rule 18.4.7 – subdivision esplanade reserves and esplanade strips.</i> AND Add new rule, after Rule 18.4.6, as follows: <i>18.4.6A Subdivision of land within the National Grid Corridor</i> <i>RDL</i> <i>(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions:</i> <i>(i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and</i> <i>(ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.</i> <i>(b) Council's discretion is restricted to the following matters:</i> <i>(i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;</i> <i>(ii) The ability to provide a complying building platform outside of the National Grid Yard;</i> <i>(iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;</i> <i>(iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.</i> <i>NCL</i> <i>Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 18.4.6A RDL.</i>
Decision Reasons:	<ul style="list-style-type: none"> Replicate the subdivision rule within the National Grid Corridor from Chapter 14 into Chapter 18 (where this is relevant to the Business Town Centre Zone) for increased clarity and usability of the Plan.
Point Number	697.302
Summary of Decision Requested:	Amend the numbering structure across the chapters by simplifying to ensure a more user friendly district plan and to ensure a consistent approach is used across all chapters. For example, Rule numbering is very long for some rules (e.g. Rule 22.2.6.1 P2(a)(xi)(A)).
Decision Reasons:	To ensure the District Plan is a more customer friendly document and does not provide a complex numbering system.
Point Number	697.303
Summary of Decision Requested:	Amend rules to ensure the sentence structure of the relevant rule is consistent across all zone chapters, for example: (a) Earthworks ... must meet the following conditions: (b) Council restricts its discretion to... (there are many rules which say "limits" discretion) (c) That does not comply with Rule 25.2.6.2 PI.
Decision Reasons:	To provide consistency with the sentence structures of the rules.
Point Number	697.304
Summary of Decision Requested:	Amend and correct references to zone names.
Decision Reasons:	It is important to ensure all references are correct to avoid confusion to the plan reader.
Point Number	697.305
Summary of Decision Requested:	Amend Rule 17.3.1.2 Buildings, structures and vegetation within an airport obstacle limitation surface, to include a calculation to determine the permitted height with the airport obstacle limitation surface.
Decision Reasons:	

- This rule needs to be able to be clearly interpreted by customers in relation to the Waikato Regional Airport.

Point Number 697.306

Summary of Decision Requested: Amend the numbering across all zone chapters.

Decision Reasons:

- Numbering needs to be corrected across the District Plan.
- This will impact on all rule numbers.
- Some changes have been recorded as clause 16 minor changes.

Point Number 697.307

Summary of Decision Requested: Amend the historic heritage item descriptions in Schedule 30.1 Historic Heritage Items.

Decision Reasons:

- Correct item descriptions are required to be provided to ensure appropriate assessments are undertaken on Historic Heritage items as there are several errors and omissions in this document and it does not presently align with the information that was provided by Council's technical expert.

Point Number 697.308

Summary of Decision Requested: Amend the restricted discretionary activity explanation as follows:
Council's power to decline a consent, or to grant a consent and to impose conditions on the consent, is restricted to the matters of discretion as set out in the following table.
~~Discretion to grant or decline consent and impose conditions is restricted to the matters of discretion set out in the following table.~~

Decision Reasons:

Amend the wording of the overarching restricted discretionary activity explanation.

Point Number 697.309

Summary of Decision Requested: Add a rule that will allow for the trimming of Significant Natural Areas across all of the zone chapters.

Decision Reasons:

- A rule for trimming Significant Natural Areas with appropriate conditions will enable tree trimming as permitted activities.
- Currently there is only a rule for removal.

Point Number 697.310

Summary of Decision Requested: Amend the location of the following rules currently in Chapter 14 into the zone chapters:

- (a) Rules regarding buildings and structures within the National Grid Yard (rule 14.4.1 P1, P2 and 14.4.4 NC3, NC4 and NC9)
- (b) Rules regarding subdivision within the national Grid Corridor (rule 14.4.2 RD4 and 14.4.4 NC10)
- (c) Rules regarding sensitive landuses within the National Grid Yard (rule 14.4.1 P1 and P2, 14.4.4 NC3, NC4, NC5, NC6 and NC7)
- (d) Earthworks within the National Grid yard (rule 14.4.1 P3 and 14.4.2 RD3)
- (e) New hazardous facilities within the National Grid yard (rule 14.4.4 NC8)
- (f) Rules regarding sensitive landuses within close proximity to electricity distribution lines (rule 14.5.1 P5 and 14.5.2 RD2)
- (g) Rules regarding maximum impervious surface (rule 14.1.1.1 P2 and 14.1.1.2 RD2)

Decision Reasons:

Certain rules currently in chapter 14 (Infrastructure) should be located into the zone chapter so they are more easily able to be found. The rules in question are focused on land use rather than infrastructure.

Point Number 697.311

Summary of Decision Requested: Amend all restricted discretionary activities as follows:
 (b) Council's discretion is ~~limited~~ restricted to the following matters:

Decision Reasons:

Correct the reference for restricted discretionary activities to reflect the correct wording of the Resource Management Act.

Point Number 697.312

Summary of Decision Requested: Amend to use defined terms where appropriate throughout all of the zone chapters.

Decision Reasons:

To ensure rules are clear in respect to their interpretation, defined terms should be used.

Point Number 697.313

Summary of Decision Requested: Amend wording throughout the Proposed District Plan to match the defined term.

Decision Reasons:

To ensure rules are clear in respect to where definitions apply. In some cases, highlighting is missing from terms that are in fact defined.

Point Number 697.314

Summary of Decision Requested: Amend to locate the strategic objectives into a standalone chapter.

Decision Reasons:

- Strategic Objectives should have primacy in the plan.
- These are currently contained within individual chapters (i.e. Urban and Rural Environment) and a new chapter specific to those objectives would be beneficial to the user.

Point Number	697.315
Summary of Decision Requested:	Amend rules where applicable to refer to the correct name of the Appendix.
Decision Reasons:	To ensure consistency and to avoid confusion to the plan reader.
Point Number	697.316
Summary of Decision Requested:	Amend the names of appendices in the Plan to correctly reflect the contents of the appendices in Section D Appendices and Schedules.
Decision Reasons:	To ensure consistency and to avoid confusion to the plan reader.
Point Number	697.317
Summary of Decision Requested:	Amend Appendix 1 (Acoustic Insulation) as follows: Appendix 1 - Acoustic Insulation - Section 3 (Te Kowhai Airpark). Te Kowhai Airpark acoustic standards for outer control noise boundary and the noise buffer apply to any building containing a noise sensitive activity.
Decision Reasons:	<ul style="list-style-type: none"> To ensure consistency and to avoid confusion to the plan reader. These provisions need to be broader to ensure all activities are captured.
Point Number	697.318
Summary of Decision Requested:	Amend Appendix 4 (Esplanade Priority Areas) to ensure legal descriptions are correct and accurately reflect the properties they relate to.
Decision Reasons:	To ensure correct references are detailed.
Point Number	697.319
Summary of Decision Requested:	Amend Appendix 5 Ecotoxic Class 9 - High Biological Oxygen Demand (>10,000mg/l) as follows: Line one - <u>High Biological Oxygen Demand (BODs)(≥10,000 mg/l), <30m of a watercourse</u> Line two - <u>High Biological Oxygen Demand (BODs)(≥10,000 mg/l), >30m of a watercourse</u>
Decision Reasons:	To avoid confusion to the plan reader.
Point Number	697.320
Summary of Decision Requested:	Amend Appendix 5 Hazardous substances to include Assessment Criteria for Discretionary Activities as follows: <u>Assessment Criteria</u> <u>When assessing discretionary applications, the assessment shall include (but is not limited to):</u> <u>a. How the hazardous facility is located on the site, taking into account separation from boundaries and other more sensitive land uses;</u> <u>b. How the design and proposed management contributes to the minimisation of adverse effects on the environment;</u> <u>c. The individual risks of the hazardous facility and cumulative risks with other hazardous facilities in the vicinity, as relevant;</u> <u>d. The actual and potential adverse effects associated with the transport of a hazardous substance on road infrastructure or on sensitive land uses along transport routes, if this is a significant aspect of the facility;</u> <u>e. Consideration of the risks posed by the occurrence of identified natural hazard events in the area to the hazardous facility;</u> <u>f. The degree of social, cultural or economic benefits the facility and its associated storage, use or disposal of hazardous substances will have locally;</u> <u>g. Whether an assessment of the risks has been provided which contains a level of detail which corresponds to the scale and nature of the facility, proposed and the hazardous substances involved. An assessment may need to include the following considerations:</u> <u>i. the sensitivity of the receiving environment to any risks;</u> <u>ii. risk identification (inherent risk) and assessment, and risk management response (residual risk);</u> <u>iii. practicable alternative method of management that would present less risk;</u> <u>iv. how the proposal minimises or mitigates cumulative adverse effects with respect to other hazardous facilities in the area;</u> <u>v. proposed emergency management equipment and plans and the adequacy of overall emergency response capability.</u> <u>Note: a risk assessment should correspond to the scale and significance of the activity and its risks. A quantitative risk assessment may be required for major hazardous facilities where the risk contributors may be significant or complex. A risk assessment should be undertaken by a suitably qualified and experienced professional.</u>
Decision Reasons:	Assessment Criteria provide further information for plan users when preparing applications for Discretionary Activity resource consents.
Point Number	697.321
Summary of Decision Requested:	Amend Restricted Discretionary Activity headings throughout the Proposed District Plan as follows: <i>Matters of Discretion</i> AND Delete additional wording at beginning of each rule referring to Restricted Discretionary Activities.
Decision Reasons:	To ensure alignment across the zone chapters, wording needs to be amended.
Point Number	697.322
Summary of Decision Requested:	Amend all controlled activities in Chapter 18 as follows: <i>The Council reserves control is limited to over the following matters:</i>
Decision Reasons:	Correct the reference for controlled activities to reflect the correct wording of the Resource Management Act.

Point Number 697.323

Summary of Decision Requested: **Amend** Appendix numbers referred to in the rules to refer to the correct number of the Appendix.

Decision Reasons:

To ensure consistency and to avoid confusion to the plan reader, all rules that refer to an appendix need to reference the correct appendices. For example Appendix 7 for the Raglan Navigation Beacon is incorrectly referred to as Appendix 8 in the rules.

Point Number 697.324

Summary of Decision Requested: **Amend** the Proposed District Plan to clarify that a building associated with an activity is permitted if it complies with all the relevant land use building conditions for that zone.

Decision Reasons:

Additional clarity of the rules is necessary to ensure that a building with an activity is permitted if it meets the necessary land use building conditions.

Point Number 697.325

Summary of Decision Requested: **Amend** Rule 16.3.9.3 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

Consistency with the equivalent rule in other chapters.

Point Number 697.326

Summary of Decision Requested: **Amend** Rule 16.2.6.2 P1(a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most appropriate measure, and replace with the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure.
- The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves).
- The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number 697.327

Summary of Decision Requested: **Add** new provisions to Chapter 17 Business Zone to include new provisions for new retirement villages to establish;
AND
Add provisions for alterations and additions to existing retirement villages as a Restricted Discretionary Activity;
AND
Add new policies similar to Policies 4.2.13 and 4.2.19 (Residential Zone) to Chapter 4 Urban Environment, to support the proposed provisions.

Decision Reasons:

- Retirement Villages have been provided for in the Residential Zone only.
- Council are seeking to include Retirement Villages into the Business Zone.
- Retirement Villages provide a range of housing options for older persons.

Point Number 697.328

Summary of Decision Requested: **Amend** Rule 16.1.3 Restricted Discretionary Activities, to clarify the number of units that can be built based on the 300m² net site area per residential unit.

Decision Reasons:

To provide additional clarification to the multi-unit development rules where it applies to duplexes, Unit Titles developments and town house developments (standard 1 dwelling per site).

Point Number 697.329

Summary of Decision Requested: **Amend** for consistency of reading, the following rule:
Rule 16.4.6 Subdivision - Amendments and updates to cross lease flats plans and conversion to freehold.

Decision Reasons:

Rules 16.4.6, 17.4.1.3 and 18.4.4 are worded differently from each other and should be worded the same for consistency given that it relates to the same subdivision process.

Point Number 697.330

Summary of Decision Requested: **Amend** Subdivision Rule - Title boundaries relating to Significant Natural Areas, Maaori sites and Maaori areas of Significance, heritage items and notable trees to split it out into separate rules, as already shown in some zone chapters for the subdivision rules.

Decision Reasons:

This provides clarity to the rules and consistency across the zone chapters.

Point Number 697.331

Summary of Decision Requested: **Amend** the Proposed District Plan to include advisory notes for the following:

- Archaeological sites (administered by Heritage New Zealand Pouhere Taonga) and,
- The National Environmental Standards for Plantation Forestry and,
- Assessing and Managing Contaminants in Soil to Protect Human Health.

Decision Reasons:

Inclusion of advisory notes where appropriate would be helpful for the reader.

Point Number

697.332

Summary of Decision Requested:

Amend Business Town Centre zoning for the Pokeno Town Centre after undertaking further work to determine the correct zone based on the types of activities that operate in the area.

Decision Reasons:

- Business Town Centre zone may not be appropriate for all land parcels in Pokeno. Further work is required to address this.
- Some properties in these areas may be more suited to Business Zone than Business Town Centre as for one of the existing activities this zoning is restrictive and not suited to the types of activities.

Point Number

697.333

Summary of Decision Requested:

Amend the District Plan references to ensure the designations listed in Section E (Designation M) are correctly referenced and that correct descriptions and legal property details are provided.

Decision Reasons:

Ensure Waikato District Council designations are correctly referenced in the District Plan.

Point Number

697.334

Summary of Decision Requested:

Amend any walkway, cycleway and bridleway locations on the District Plan Maps to align with Council's strategies.

Decision Reasons:

- Ensuring all Walkways, cycleways and bridleways are in their correct locations and align with Council's strategies.

Point Number

697.335

Summary of Decision Requested:

Amend indicative roads so they are clearly defined on the planning maps to ensure measurements can be relatively accurate when reviewing building conditions.

Decision Reasons:

Ensure indicative roads are clearly able to be identified and that measurements from them are relatively accurate in order to determine setbacks, location etc. This will assist the plan user to determine setbacks, location easily.

Point Number

697.336

Summary of Decision Requested:

Amend notable tree notations on the planning maps to identify correct location on property and make corrections to the corresponding Schedule 30.2;

AND

Update any properties where notable trees are to be removed from the district planning maps.

Decision Reasons:

- Ensure the planning maps accurately reflect the locations of notable trees.

Point Number

697.337

Summary of Decision Requested:

Amend historic heritage item notations on planning maps to identify correct property and location and make corrections to the corresponding Schedule 30.1 Historic Heritage Items.

Decision Reasons:

- Ensure Historic Heritage items are accurately reflected on the correct properties.
- Also see submission point in respect to updating the details of the descriptions of the heritage items in Schedule 30.1.

Point Number

697.338

Summary of Decision Requested:

Amend alignment of Maaori sites and areas of significance on the planning maps.

AND

Where appropriate group and number the sites together to avoid overlapping.

These sites are in relation to Tainui Sites identified through the River Settlement Act. In particular the sites around the lakes.

Decision Reasons:

- Ensure the planning maps accurately reflect the locations of Archaeological Sites of Significance.
- This will help avoid confusion for the plan user.

Point Number

697.339

Summary of Decision Requested:

Amend map legend on all maps to ensure layers are able to be interpreted easily.

Decision Reasons:

Ensure the map legend is easily interpreted and clear for plan users so as to not generate confusion.

Point Number	697.340
Summary of Decision Requested:	Amend labels on planning maps to avoid repetition. For example on some maps, stream names are repeated several times.
Decision Reasons:	Ensure the planning maps do not repeat labels where not necessary.
Point Number	697.341
Summary of Decision Requested:	Amend Planning Maps to create additional spatial extents on planning maps to correspond to certain activities (i.e. landscape rules, specific noise areas etc).
Decision Reasons:	<ul style="list-style-type: none"> • Ensure rules that have specific purposes are spatially mapped making the areas easier to identify on the planning maps. • This would enable Council to group certain activities together and have one spatial extent to be more specifically targeted. • It will also enable better plan usability for the customer.
Point Number	697.342
Summary of Decision Requested:	Amend rules where the rule does not relate to a particular zone or area. For example some landscape areas do not apply across all zones and may need to be removed from the zone chapter. Another example is the battlefield view shaft rule.
Decision Reasons:	To ensure rules do apply in particular zones and those applicable rules are amended where they are not relevant.
Point Number	697.343
Summary of Decision Requested:	Amend zoning of the property at 86 Saubrey Road, Ngaruawahia to reflect the proposed zoning as set out in the Ngaruawahia Structure Plan. Refer to attached map in submission.
Decision Reasons:	This property has been incorrectly re-zoned residential over the whole parcel and needs to be corrected to reflect the proposed zoning identified in the Ngaruawahia Structure Plan in 2014.
Point Number	697.344
Summary of Decision Requested:	Amend zoning of the property at 78 Strawberry Fields Land, Tamahere to change from Road Zone to Rural Zone. Refer to attached map in submission.
Decision Reasons:	This zoning is an error.
Point Number	697.345
Summary of Decision Requested:	Amend zoning of property at 6 Bates Road, Tamahere from Rural Zone to Country Living Zone. Refer to attached map in submission.
Decision Reasons:	This zoning is an error.
Point Number	697.346
Summary of Decision Requested:	Delete I.9.7 – Schedule I Clause 4A Resource Management Act.
Decision Reasons:	This is only relevant to a proposed District Plan prior to notification and is not necessary in a plan.
Point Number	697.347
Summary of Decision Requested:	Amend the purpose and status of the objectives in Chapter I Introduction. AND Add a stand-alone chapter containing all of the strategic objectives.
Decision Reasons:	<ul style="list-style-type: none"> • The Introduction chapter is unclear in its purpose and is unclear in its legal effect. • The Introduction chapter contains strategic objectives but it is not clear whether these are part of the Plan or have more of an advisory role and status. • The Introduction contains strategic objectives but if they are to be Objectives, they would benefit from more visibility in the plan through creation of a new strategic objectives chapter.
Point Number	697.348
Summary of Decision Requested:	Delete unnecessary text from Chapter I Introduction. AND Amend Chapter I Introduction so that it is more focused on performing an introductory role to the District Plan.
Decision Reasons:	<ul style="list-style-type: none"> • There is a lot of detail in Chapter I Introduction which may not be necessary. • There is a risk that references to Council strategies become out of date when Council reviews those strategies.
Point Number	697.349
Summary of Decision Requested:	Amend Rule I.5.2(b) Planning for urban growth and development as follows:

(b) ~~As per the Waikato Regional Policy Statement, the district plan ensures that before land is rezoned for urban development, urban development planning mechanisms such as master plans or structure plans are produced, that will facilitate proactive decisions about the future location of urban development.~~

Decision Reasons:

More accurately reflects the approach in the district plan to new urban areas.

Point Number

697.350

Summary of Decision Requested:

Amend Rule 1.5.6(e) Transport and logistics to remove the reference to international as follows:
... Hamilton Airport, located just outside the district, provides national ~~and international~~ passenger and freight services....

Decision Reasons:

The Hamilton Airport no longer accommodates international flights.

Point Number

697.351

Summary of Decision Requested:

Amend Section 1.7 Settlements Acts / Co-management/ Rivers – Vision and Strategies / Joint Management Agreement by reordering as follows:
1.7.1.2 The River Settlement Act paragraph needs to be first, followed by paragraphs 1.7.1.1 Waikato-Tainui Raupatu Claims Settlement Act 2010,
1.7.1.3 Nga Wai o Maniapoto (Waipa River) Act 2012
1.7.1.4 Ngati Tuwharetoa, Raukawa and Te Arawa River Iwi Waikato River Act 2010.

AND

Amend Paragraph 1.7.1.5 Co-management by including in 1.7.3 Joint Management Agreement (JMA)2012

OR

Delete Paragraph 1.7.1.5 Co-management.

AND

Amend Section 1.7 Settlements Acts/ Co-management/ Rivers- Vision and Strategies/ Joint Management Agreement by moving 1.7.1.8 to after 1.7.1.6 and before 1.7.1.7, Place the paragraphs regarding Memorandums of Understanding together, followed by the Memorandum of Agreement.

Decision Reasons:

Section 1.7 would benefit from reordering so that it flows more logically.

Point Number

697.352

Summary of Decision Requested:

Amend Clause 1.7.1.5 Co-Management as follows:

~~The purpose of these agreements~~ Joint Management Agreements is to provide for an enhanced relationship between parties on areas of common interest.

Decision Reasons:

It is not clear what agreements are referred to and this will provide clarity.

Point Number

697.353

Summary of Decision Requested:

Delete from 1.7.3.3(b) Consultation the words "and the Order" as follows:
... plan change under the RMA (Schedule 1) ~~and the Order~~

Decision Reasons:

Amend an error in drafting.

Point Number

697.354

Summary of Decision Requested:

Amend Rule 1.8 Statutory Acknowledgements to delete (ii) and (vii) as follows:

(i) Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010

~~(ii) Manurewa A and B Blocks Claims Settlement Act 2012~~

(iii) Ngati Koroki Kahukura Claims Settlement Act 2014

(iv) Ngati Hauaa Claims Settlement Act 2014

(v) Raukawa Claims Settlement Act 2014

(vi) Waikato-Maniapoto Maori Claims Settlement Act 1946.

~~(vii) Ngati Tamaoho Claim Settlement Act 2018.~~

Decision Reasons:

There are errors in the acts listed and relevant to Waikato District and these need to be amended.

Point Number

697.355

Summary of Decision Requested:

Amend Clause 1.10.3 The Relationship between district plans and other resource management planning documents as follows:

~~The Relationship between district plans and other resource management planning documents~~

AND

Delete Clause 1.10.3.1 Resource Management Act 1991.

AND

Delete Clause 1.10.3.2 Local Government Act 2002.

Decision Reasons:

- Refocus this section to be address national policy statements and national environmental standards.
- There is no need to repeat the Resource Management Act.

Point Number

697.356

Summary of Decision Requested:

Amend 2.8 (b) Concept Management Plan to read as follows:

(b) *Although the concept plan must be approved by the owners through the Maori Land Court process, it is not set in concrete.*

Decision Reasons:	To ensure clarity.
Point Number	697.357
Summary of Decision Requested:	Amend Policy 2.2(a) Background as follows: There are 41 marae within the Waikato District Council area .
Decision Reasons:	Provides clarity to this policy that it relates to the Waikato District.
Point Number	697.358
Summary of Decision Requested:	Amend Policy 2.2(c) Background as follows: ...have also developed relationships with the <u>Waikato</u> District Council.
Decision Reasons:	Provides clarity to this policy that this relates to the Waikato District Council.
Point Number	697.359
Summary of Decision Requested:	Amend 2.8 Concept Management Plan to replace references to the "concept plan" and "the plan" with the words "Concept Management Plan"
Decision Reasons:	<ul style="list-style-type: none"> • Consistency of terminology. • Concept Management Plan is a defined term.
Point Number	697.360
Summary of Decision Requested:	Delete the word "firewood" from Policy 3.2.6 (b)(vi) Providing for vegetation clearance.
Decision Reasons:	Removing duplication.
Point Number	697.361
Summary of Decision Requested:	Amend in Chapter 4 Urban Environment lists of matters to the following format: 1. Semi colon at the end of each matter; and 2. Inclusion of the word 'and' at the end of the penultimate matter
Decision Reasons:	There is inconsistency in the way lists of matters have been set out.
Point Number	697.362
Summary of Decision Requested:	Delete from Chapter 13 Definitions the definition for "Alterations".
Decision Reasons:	<ul style="list-style-type: none"> • There is duplication with the term "alteration and addition".
Point Number	697.363
Summary of Decision Requested:	Amend the definition of "Ancillary equipment" as follows: ... necessary to install <u>withi</u> n a facility to enable...
Decision Reasons:	<ul style="list-style-type: none"> • Minor amendment to improve clarity.
Point Number	697.364
Summary of Decision Requested:	Amend the definition of "Ancillary rural earthworks" as follows: <i>Means any earthworks or disturbance of soil associated with:</i> (a) <i>cultivation, land preparation (including establishment of sediment and erosion control measures), for planting and growing operations;</i> (b) <i>harvesting of agricultural and horticultural crops (farming) and forests (forestry); and</i> (c) <i>maintenance and construction of facilities typically associated with farming and forestry activities, including, but not limited to, farm forestry tracks, roads and landings, stock races, silage pits, farm drains, farm effluent ponds, feeding pads, fencing and erosion and sediment control measures.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Amendments to improve readability and remove references to forestry as this is covered by the National Environmental Standards for plantation Forestry.
Point Number	697.365
Summary of Decision Requested:	Delete from Chapter 13: Definitions the definition for "Animal feed lot".
Decision Reasons:	<ul style="list-style-type: none"> • This term is only used in the Specific Area - Agriculture Research Centre and a definition is not needed.

Point Number 697.366

Summary of Decision Requested: **Amend** the definition for "Apartment" as follows:
Means three or more attached residential units, ~~The residential units can be directly attached to each other, or~~ connected by one...

Decision Reasons:

- Improve clarity of the definition to recognise that residential units can be directly attached to each other.

Point Number 697.367

Summary of Decision Requested: **Amend** the definition of "Boarding, breeding or animal training establishment" as follows:
*Animal boarding, daycare, breeding or animal training establishment
Means an activity carried out on land or within buildings where board, daycare and lodging, breeding ~~and~~ or training is provided or intended to be provided for more than five domestic animals (excluding...*

Decision Reasons:

- Additional clarity and the inclusion of daycare facilities for animals.

Point Number 697.368

Summary of Decision Requested: **Amend** the definition of "Boundary" as follows:
*Means in relation to:
(a) a Record of Title - the site boundary;
(b) cross-lease titles - the boundary of any restrictive covenant exclusive use area; and
(c) unit titles - the boundary of the accessory unit associated with the principal unit.*

Decision Reasons:

- Increased clarity of the term.

Point Number 697.369

Summary of Decision Requested: **Amend** the definition of "Building" (d) as follows:
(d) a tank with a total capacity of not more than 35,000 litres, provided that ~~no part of~~ the tank protrudes no more than +2 metre above natural ground level; or

Decision Reasons:

- Amended to allow an increased height for tanks to reflect the common dimensions of water tanks.

Point Number 697.370

Summary of Decision Requested: **Amend** the definition of "Building coverage" as follows:
...
*(c) ~~uncovered~~ decks less than 1 m above ground level; and
(d) ~~uncovered~~ swimming pools that do not protrude more than 1 metre above ground level.*

Decision Reasons:

- Increased clarity of the definition with respect to covered swimming pools. Provided addition clarity on the status of swimming pools to match the parameters for decks.

Point Number 697.371

Summary of Decision Requested: **Delete** from Chapter 13: Definitions the definition for "Campus".

Decision Reasons:

- This term is only used in the context of the Specific Area - Agriculture Research Centre and a definition is not needed.

Point Number 697.372

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Caretaker accommodation" as follows:
*Caretaker accommodation
Means within the Industrial or Industrial Zone Heavy, one residential unit per site for the purposes of providing on-site security and monitoring.*

Decision Reasons:

- This activity is sought to be included in the industrial Zones, and as a consequential amendment a definition would be helpful to provide clarity as to what the activity is.

Point Number 697.373

Summary of Decision Requested: **Amend** the definition of "Child care facility" as follows:
*Means any land or buildings used for the care or training of predominantly pre-school children and includes a playcentre, kindergarten or daycare.
It excludes...*

Decision Reasons:

- Inclusion of a child daycare activity in the defined term to cover those activities.

Point Number 697.374

Summary of Decision Requested: **Delete** from Chapter 13: Definitions the definition for "Commercial services"

AND

Delete all instances where "commercial services" appears as an activity in the Plan and replace with "commercial activities".

Decision Reasons:

- The term "commercial services" overlaps with the term "commercial activity" and creates confusion. Activities of a commercial nature only need to be covered by a single term.

Point Number

697.375

Summary of Decision Requested:

Amend to rationalise the three terms:
- Community activity,
- Community activity (Te Kauwhata Lakeside Precinct) and
- Community facilities
into a single defined term.

Decision Reasons:

- There is no need for three separate terms when the terms are similar. A more efficient approach would be to rationalise into a single defined term.

Point Number

697.376

Summary of Decision Requested:

Amend the definition of "Community facilities" as follows:
Means ~~in the Business Zone Tamahere,~~ land or building used for community activities...

Decision Reasons:

- Delete the reference to a specific zone so that this term may be used (as appropriate) in other zones.

Point Number

697.377

Summary of Decision Requested:

Amend the definition of "Contiguous" as follows:
Means abutting or touching at ~~some~~ any point, e.g....

Decision Reasons:

- Improve clarity of the term.

Point Number

697.378

Summary of Decision Requested:

Amend the definition of "Continuous landholding" as follows:
Means ~~a series of multiple,~~ adjoining Records of Title in the same ownership, including titles that ~~may are~~ only be separated by a road.

Decision Reasons:

- Improve clarity of the definition.

Point Number

697.379

Summary of Decision Requested:

Add to Chapter 13: Definitions a new definition for "Design Speed" as follows:
Design Speed
Means a speed fixed for the design of those geometric features of a carriageway that influence vehicle operation. Design speed is the 85th percentile speed of traffic through that geometric feature. These can either be measured or estimated (Austroad design guides or similar).

Decision Reasons:

- Include new definition to clarify the rules in Chapter 14.12 Transportation.

Point Number

697.380

Summary of Decision Requested:

Amend the definition of "Duplex" as follows:
*Means two attached residential units, ~~including~~ includes two units connected by an accessory building, such as a garage or a carport.
This does not apply to minor dwellings.*

Decision Reasons:

- Improves clarity of the definition, and clarifies that this definition does not apply to minor dwellings.

Point Number

697.381

Summary of Decision Requested:

Amend the definition of "Dwelling" as follows:
Means the same as a self-contained residential unit for living accommodation.

Decision Reasons:

- Provides additional clarity that the terms "dwelling" and "residential unit" can be used interchangeably in the Plan.

Point Number

697.382

Summary of Decision Requested:

Amend the definition of "Earthworks" as follows:
*... or by cutting or filling operations.
This does not apply to ancillary rural earthworks.*

Decision Reasons:

- Additional clarity that ancillary rural earthworks are a different activity from earthworks for the purposes of this Plan.

Point Number	697.383
Summary of Decision Requested:	<p>Amend the definition of "Education facility" as follows:</p> <p><i>Means premises where groups of people are given tuition and training on a formal basis and includes childcare facilities, schools, tertiary education institutions and specialised training facilities, and their ancillary administrative, cultural and health facilities.</i> <u>This does not include childcare facilities.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Recognition that childcare facilities are a separate activity from an education facility for the purposes of this Plan.
Point Number	697.384
Summary of Decision Requested:	<p>Amend the definition of "Extractive industries" as follows:</p> <p><i>Means taking, winning or extracting by whatever means, the naturally-occurring minerals (including but not limited to coal, rock, sand, and gravel) and peat from under or on the land surface. <u>This may include one or more of the following:</u></i> <i>(a) <u>blasting, processing (crushing, screening, washing, chemical separation and blending);</u></i> <i>(b) <u>the storage, distribution and sale of aggregates by wholesale to industry or by retail;</u></i> <i>(c) <u>the removal, stockpiling and deposition of overburden;</u></i> <i>(d) <u>treatment of stormwater and wastewater;</u></i> <i>(e) <u>landscaping and rehabilitation works including cleanfilling;</u></i> <i>(f) <u>ancillary buildings and structures;</u></i> <i>(g) <u>a single residential unit for security purposes; and</u></i> <i>(h) <u>internal roads and access tracks.</u></i> The term includes the processing by such means as screening, crushing, or chemical separation of minerals at or near the site, where the minerals have been taken, won or excavated. The term also includes the removal, stockpiling and filling of overburden sourced from the same site. <i>It includes all activities and structures associated with underground coal gasification, including pilot and commercial plants and the distribution of gas. It excludes prospecting and exploration activities.</i> <u>It does not include a farm quarry or ancillary rural earthworks.</u></p> <p>AND</p> <p>Replace "aggregate extraction activities" and "mineral extraction and processing" with the term "Extractive industries" throughout the rules of the Proposed District Plan.</p>
Decision Reasons:	<ul style="list-style-type: none"> This term is covered by three definitions (aggregate extraction activities, extractive industry and mineral extraction and processing) which would be more efficiently rationalised into one.
Point Number	697.385
Summary of Decision Requested:	<p>Amend the definition of "Farming" as follows:</p> <p><i>Means an agricultural, horticultural or apicultural activity having as its primary purpose the production of any livestock or crop using the in-situ soil, water and <u>or</u> air as the medium for production.</i> <i>It includes:</i> (a) <u>Ancillary produce stalls;</u> <i>(b) <u>Processing of farm produce grown on the land, such as cutting, cleaning, grading, chilling, freezing, packaging and storage.</u></i> <i>(c) <u>loading areas for helicopters and airstrips for top dressing and spraying.</u></i> <u>It excludes intensive farming.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> There is significant overlap between the definition of "farming" and "rural industry", with a single activity potentially being covered by both terms with different activity statuses. The processing of produce is retained in the definition of "farming" and recognises that produce may not be grown on the land. The definition is expanded to include loading areas for helicopters and airstrips for top dressing and spraying. For clarity the definition needs to recognise that intensive farming is a separate activity.
Point Number	697.386
Summary of Decision Requested:	<p>Amend the definition of "Farming noise" as follows:</p> <p><i>Means noise generated by agricultural vehicles, any aircraft used for aerial spraying, agricultural machinery or equipment and farm animals, including farm dogs. It does not <u>This includes</u> bird scaring devices and frost fans.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Recognises that bird scaring devices and frost fans are legitimate parts of farming.
Point Number	697.387
Summary of Decision Requested:	<p>Amend the definition of "Farm quarry" as follows:</p> <p><i>Means the extraction of minerals <u>or aggregate taken for use ancillary to farming and horticulture, and only used within the property of extraction.</u> No extracted material (including any aggregate) shall be exported or removed from the property of origin and there shall be no retail or other sales of such material. For example, farm quarries include the extraction of <u>Common uses of aggregate include material for farm and forestry tracks, access ways and hardstand areas on the property of origin.</u></i> <u>This does not include extractive industry.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity of the definition.
Point Number	697.388
Summary of Decision Requested:	<p>Amend the definition "Functional need" as follows:</p> <p><i>Means for Chapter 14 Infrastructure and Energy, the need for a proposal..</i></p>
Decision Reasons:	<ul style="list-style-type: none"> While this term is most relevant to Chapter 14 Infrastructure and Energy, it is also used in Chapter 5 of the Plan.
Point Number	697.389

Summary of Decision Requested:	Delete from Chapter 13: Definitions the definition for "GFA" , AND Amend the definition of "Gross floor area" as follows: <i>Gross floor area <u>or GFA</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Delete the term GFA as a defined term and include it in the definition of gross floor area.
Point Number	697.390
Summary of Decision Requested:	Amend the definition to "Gross floor area" as follows: <i>Means the sum of the gross area of all floors of a building, measured either from the exterior faces of the exterior walls, or from the centre line of walls separating two tenancies, as circumstances may require.</i> <i>Means the sum of the total area of all floors of all buildings on the site, (including any void area in those floors, such as service shafts or lift or stairwells), measured from the exterior faces of exterior walls or from the centre lines of walls separating 2 buildings and, in the absence of a wall on any side, it shall be measured to the exterior edge of the floor.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity as to how to measure gross floor area.
Point Number	697.391
Summary of Decision Requested:	Amend the definition of "Gross leasable floor area" as follows: <i>Means the total sum of any floor areas (within the external walls for buildings or, <u>in the absence of a wall on any side, it shall be measured to the exterior edge of the floor boundary for outdoor areas</u>) designed...</i>
Decision Reasons:	<ul style="list-style-type: none"> Amend the definition to provide more clarity.
Point Number	697.392
Summary of Decision Requested:	Amend the definition of "Height control plane" as follows: <i>...drawing height control lines from all points on the boundaries of an <u>allotment site</u>, or in the case of a cross lease it is boundary of the exclusive area and site area. Such lines commence at a specified vertical distance above the natural ground level at the boundary, point into the site at right angles to the boundary, and rise at an angle of 37 degrees <u>the specified angle</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> Amendments for increased clarity. There are various angles for the height control planes within the rules so it is not appropriate for the definition to contain a specified angle.
Point Number	697.393
Summary of Decision Requested:	Amend the definition of "Horse training centre" as follows: <i>Means facilities for the housing and training of thoroughbred and Standardbred horses, and usually involves some form of <u>includes</u> training tracks <u>and arenas</u> (both indoor and outdoor), but does not...</i>
Decision Reasons:	<ul style="list-style-type: none"> The definition should not be specific to any particular breed and include arenas (both indoor and outdoor).
Point Number	697.394
Summary of Decision Requested:	Amend the definition of "Indicative road" as follows: <i>Means a connective roading route that is identified on the planning maps. <u>It shall not include any area identified on the planning maps as an indicative road where a resource consent has authorised an alternative roading layout, such that the need for the indicative road has become redundant.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> There may be instances where an indicative road has been formed, and there is no value in applying rules to the indicative road when it has been replaced by a formed road.
Point Number	697.395
Summary of Decision Requested:	Amend the definition of "Intensive farming" as follows: <i>Means farming which is not dependent on the fertility of the soils on which it is located and which may be under cover or within an outdoor enclosure, and be <u>is</u> dependent on supplies of food produced on and/or off the land where the operation is located....</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity for the definition.
Point Number	697.396
Summary of Decision Requested:	Amend the definition of "Living court" as follows: <i>Means an area of outdoor space directly related to the living area of a household residential unit, and for the household's residential unit's exclusive use. It does not include parking, manoeuvring areas and buildings, but does include swimming pools, pergolas and similar open-framed structures.</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistent use of terminology.
Point Number	697.397

Summary of Decision Requested:	Amend the definition of "Lot" as follows: <i>Means the same as allotment a parcel of land held, or proposed to be held, under a Record of Title.</i>
Decision Reasons:	<ul style="list-style-type: none"> For clarity, it is more efficient to have "lot" meaning the same as "allotment" so that the terms can be used interchangeably.
Point Number	697.398
Summary of Decision Requested:	Delete from Chapter 13: Definitions the definition for "Lux".
Decision Reasons:	<ul style="list-style-type: none"> Delete the definition of lux as it is a standard unit of measure.
Point Number	697.399
Summary of Decision Requested:	Amend the definition of "Marae complex" as follows: <i>... a papakainga/papakainga building and utility services. <u>These facilities provide for cultural events that take place on a marae.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> More complete definition of marae complex.
Point Number	697.400
Summary of Decision Requested:	Delete from Chapter 13: Definitions the definition for "Mineral extraction and processing" AND Replace the term "Mineral extraction and processing" in all chapters with "Extractive industry" where appropriate.
Decision Reasons:	<ul style="list-style-type: none"> This term is covered by three definitions (aggregate extraction activities, extractive industry and mineral extraction and processing) which would be more efficiently rationalised into one.
Point Number	697.401
Summary of Decision Requested:	Amend the definition of "Minor dwelling" as follows: <i>Means a second dwelling independent of the principal dwelling(s) on the same site. <u>Means a self-contained residential unit that is ancillary to the principal residential unit and is held in common ownership with the principal residential unit on the same site. A minor dwelling can be attached to the principal residential unit, or a detached stand-alone building.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity that a minor dwelling is in the same ownership as the principal residential unit, and that it can be detached from or attached to the principal dwelling.
Point Number	697.402
Summary of Decision Requested:	Amend Rule 25.2.8 Indigenous vegetation clearance in a Significant Natural Area heading, as follows: <i>Indigenous vegetation clearance in <u>within</u> a Significant Natural Area.</i>
Decision Reasons:	<ul style="list-style-type: none"> Amend the title for additional clarity.
Point Number	697.403
Summary of Decision Requested:	Amend Rule 25.2.8 Indigenous vegetation clearance in a Significant Natural Area, as follows: <i>(a) Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) for the following purposes: (i) Removing vegetation that endangers human life or existing buildings or structures; (ii) Conservation fencing to exclude stock or pests; (iii) Maintaining existing farm drains; (iv) Maintaining existing tracks and fences; (v) Gathering plants in accordance with Maaori customs and values. (vi) <u>Removing vegetation for conservation activities</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Amend rule for consistency with the equivalent rule in other chapters.
Point Number	697.404
Summary of Decision Requested:	Amend Rule 25.2.8 D1 Indigenous vegetation clearance in a Significant Natural Area, as follows: <i>Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) that does not comply with one or more conditions <u>Rule 25.2.8 P1 or P2</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Amending an omission in the rule.
Point Number	697.405
Summary of Decision Requested:	Amend Rule 25.3.5 Land Use - Building, as follows:

(3) Rule 25.3.5.3 Buildings and structures within the National Grid Yard.

AND

Add the following in Rule 25.3.5 Building setbacks:

(3) Rule 25.3.5.3 Buildings and structures within the National Grid Yard.

AND

Add a new rule after Rule 25.3.5.2 as follows:

25.3.5.3 Buildings and structures within the National Grid Yard.

P1.

(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:

(i) Not involve an increase in the building height or footprint;

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.

P2.

(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.

P3.

Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

NCL

Any building alterations or additions within the National Grid Yard that does not comply with Rule 25.3.5.3 P1.

NC2.

Any new buildings or structures within the National Grid Yard that does not comply with Rule 25.3.5.3 P2 or P3.

Decision Reasons:

Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 25 (where this is relevant to the Reserve Zone) for increased clarity and usability of the Plan.

Point Number

697.406

Summary of Decision Requested:

Add to Rule 25.3.5 Building Setbacks, as follows:

(4) Rule 25.3.5.4 Building setback – Sensitive landuses.

AND

Add after new Rule 25.3.5.3:

25.3.5.4 Sensitive land uses.

P1.

(a) Any building for a sensitive land use must be set back a minimum of:

(i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;

(ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.

P2.

(a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:

(i) Not increase the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

D.L.

Any building for a sensitive land use that does not comply with Rule 25.3.5.4 P1.

NCL

Any activity within the National Grid Yard that does not comply with Rule 25.3.5.4 P2.

NC2.

Any new building for a sensitive land use within the National Grid Yard.

NC3.

Any change of use of an existing building to a sensitive land use within the National Grid Yard.

NC4.

The establishment of any new sensitive land use within the National Grid Yard

Decision Reasons:

- Replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 25 (where this is relevant to the Reserve Zone) for increased clarity and usability of the Plan.

Point Number

697.407

Summary of Decision Requested:

Amend Rule 25.3.1.1 P1 (b) Height - Building general, as follows:

(b) Any building must not exceed a maximum height of 5m in any of the following landscape and natural character areas:

Decision Reasons:

- The additional wording provides clarity to the rule.

Point Number

697.408

Summary of Decision Requested:

Amend Rule 25.3.1.1 P2 (b) Height - Building general, as follows:

(b) Any floodlight must not exceed a maximum height of 5m in any of the following landscape and natural character areas:

Decision Reasons:

- The additional wording provides clarity to the rule.

Point Number

697.409

Summary of Decision Requested:

Amend Rule 25.3.1.2 Height - Building, structures, vegetation, and objects within an airport obstacle limitation surface, as follows:

P1

Any building, structure or vegetation must not protrude through ~~any~~ the airport obstacle limitation surface identified on the planning maps and in Appendix 9 – Te Kowhai Airfield, and defined in Section E Designation N Waikato Regional Airport.

NC D1

Any building, structure or vegetation that does not comply with Rule 25.3.1.2 P1.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.410

Summary of Decision Requested: Amend Rule 25.3.2 Daylight admission, as follows:

PI
~~Any building must not protrude through a height control plane rising at an angle of 37 degrees commencing at an elevation of 2.5m above ground level at every point of the boundary.~~
RD I
 (a) Any building that does not comply with Rule 25.3.2 *PI*.
 (b) Council's discretion is restricted to the following matters:
 (i) Height of the building;
 (ii) Design and location of the building;
 (iii) ~~Admission of daylight and sunlight to the site and other sites~~
 (iv) ~~Extent Level of shading on adjacent any other sites~~;
 (v) ~~Privacy of on other sites~~;
 (v) Amenity values of the locality.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.411

Summary of Decision Requested: Amend Rule 25.3.3 Building coverage, as follows:

PI
~~Total building coverage must not exceed 5% of the site~~
DI
 A building coverage that does not comply with Rule 25.3.3 *PI*

Decision Reasons:

- Increased clarity of the rule.

Point Number 697.412

Summary of Decision Requested: Amend Rule 25.3.5.2 Building setbacks - Waterbodies, as follows:

(a) Any building must be set back a minimum of ~~32-26m~~ from:
 (i) The margin of any lake with a bed area of 8ha or more;
 (ii) The bank of any river where the river bed has an average width of 3m or more;
 (iii) Any wetland with an area greater than 1ha.
 (b) Any building must be set back a minimum of ~~37-31m~~ from the banks of the Waikato River and the Waipa River.
 (c) Any building must be set back a minimum of:
 (i) ~~32-26m~~ from mean high water springs

Decision Reasons:

- Amend the rule so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.413

Summary of Decision Requested: Amend Rule 25.3.6(1) Heritage Items, as follows:

The following rules manage heritage items (buildings and monuments) ~~within the Reserve Zones~~:

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.414

Summary of Decision Requested: Amend Rule 25.3.6.3 *PI* (a) All heritage items - Alterations or addition, as follows:

(a) Alteration or addition to a heritage item listed in Schedule 30.1 (Historic Heritage Items) ~~where must comply with the following conditions:~~
 (i) No significant feature of interest is removed, destroyed or damaged; and
 (ii) Alterations or additions are not visible from a public place.

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number 697.415

Summary of Decision Requested: Amend Rule 25.3.6.3 *RD I* (b) All heritage items - alteration or addition, as follows:

Council's discretion shall be restricted to the following matters:...

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.416

Summary of Decision Requested: Amend Rule 25.3.6.4 All heritage items - maintenance or repair heading, as follows:

All heritage items – maintenance ~~and or~~ repair

Decision Reasons:

- Consistency across zone chapters.

Point Number	697.417
Summary of Decision Requested:	Amend Rule 25.3.6.4 P1 (a) All heritage items - maintenance and repair, as follows: <i>(a) Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items) where must comply with the following conditions:</i> <i>(i) No significant feature of interest is destroyed or damaged; <u>and</u></i> <i>(ii) Replacement materials are the same as, or similar to, the original in terms of form, style and appearance.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.418
Summary of Decision Requested:	Amend Rule 25.3.6.4 RD1 (a) All heritage items - maintenance and repair, as follows: Any activity Maintenance or repair that does not comply with a condition of Rule 25.3.6.4 P1.
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.
Point Number	697.419
Summary of Decision Requested:	Amend Rule 25.3.6.5 P1 (a) All heritage items - all site development, as follows: <i>(a) Development on a site containing a heritage item listed in Schedule 30.1 (Heritage Items) must <u>comply with the following conditions:</u></i> <i>(i) Be set back at least 10m from the heritage item; <u>and</u></i> <i>(ii) Not locate a building between the front of the heritage item and the road.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.420
Summary of Decision Requested:	Amend Rule 25.3.6.5 RD1 (b)(iv) All heritage items - all site development, as follows: <i>(iv) The relationship of the heritage item with the setting <u>including the area between the front of the heritage item and the road.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.421
Summary of Decision Requested:	Amend Rule 25.4 Subdivision heading, as follows: 25.4 Subdivision <u>Rules</u>
Decision Reasons:	<ul style="list-style-type: none"> Additional words "rules" provide clarity.
Point Number	697.422
Summary of Decision Requested:	Amend Rule 25.5.3.2 P1 Building - Tamahere Village Green, as follows: <i>(a) Any building in the Tamahere Village Green must comply with the following conditions:</i> <i>(i) Total building coverage must not exceed 170m²;</i> <i>(ii) Height must not exceed 6m.</i> <i>(b) Rule 25.2.1.1 (Height Building General) does not apply.</i>
Decision Reasons:	<ul style="list-style-type: none"> Reduce duplication.
Point Number	697.423
Summary of Decision Requested:	Amend Rule 28(4) as follows: <i>The rules that apply to subdivision in the Rangitahi Peninsula Zone are contained in Rule 28.4 <u>and the relevant rules in 14. Infrastructure and Energy; and 15. Natural Hazards and Climate Change (Placeholder).</u></i>
Decision Reasons:	<ul style="list-style-type: none"> To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.
Point Number	697.424
Summary of Decision Requested:	Amend Rule 28.2.8 Indigenous vegetation clearance inside a Significant Natural Area, as follows: <i>Removal of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per year per property site for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity that the rule is intended to apply "per site" rather than "per property" which is not a defined term.
Point Number	697.425
Summary of Decision Requested:	Add the following rule after Rule 28.3.5 Land Use - Building:

Rule 28.3.5A Impervious surfaces

PL

The impervious surface of a site must not exceed 70%.

BDL

(a) Impervious surfaces that does not comply with Rule 28.3.5A PL

(b) Council's discretion is restricted to the following matters:

(i) Site design, layout and amenity;

(ii) The risk of flooding, nuisance or damage to the site or other buildings and sites.

Decision Reasons:

- To include the impervious surfaces rule from Rule 14.11.1(P2) and 14.11.2(RD2) to make it easier to find.

Point Number

697.426

Summary of Decision Requested:

Amend Appendix 7 to reflect the increased height of the Raglan navigation beacon, and therefore the elevated height restriction plane which will apply.

Decision Reasons:

- The Raglan navigation beacon will be raised in height shortly which means that the height restriction plane diagram and survey data contained in Appendix 7 will no longer be correct.

Point Number

697.427

Summary of Decision Requested:

Amend Schedule 30.2 Notable Trees, as follows:

Move ID 7 symbol to 19 Helenslee Road, Pokeno

AND

Amend ID 7 to read 19 Helenslee Road, Pokeno.

Decision Reasons:

- The kahikatea are on the boundary between both 19 Helenslee Road and 62 Pokeno Road.

Point Number

697.428

Summary of Decision Requested:

Delete ID 9 Notable tree from the planning maps;

AND

Delete ID9 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Located in paper road, it would be an impediment to forming the road in the future in an area a residential growth area.

Point Number

697.429

Summary of Decision Requested:

Delete ID 13 Notable tree from the planning maps;

AND

Delete ID 13 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree has been removed.

Point Number

697.430

Summary of Decision Requested:

Delete ID 28 Notable tree from the planning maps;

AND

Delete ID 28 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree duplicated in ID 26, 27 and 28. There are two trees.

Point Number

697.431

Summary of Decision Requested:

Delete ID 41 Notable tree from the planning maps;

AND

Delete ID 41 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- This property has been subdivided and the trees listed on the individual new properties.

Point Number

697.432

Summary of Decision Requested:

Delete ID 46 Notable tree from the planning maps;

AND

Delete ID 46 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree is duplicated with ID 45.

Point Number 697.433

Summary of Decision Requested: Delete ID 47 Notable tree from the planning maps;
AND
Delete ID 47 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.434

Summary of Decision Requested: Delete ID 60 Notable tree from the planning maps;
AND
Delete ID 60 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.435

Summary of Decision Requested: Delete ID 61 Notable tree from the planning maps.
AND
Delete ID 61 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Did not meet the criteria to be scheduled.

Point Number 697.436

Summary of Decision Requested: Delete ID 66 Notable tree from the planning maps;
AND
Delete ID 66 Notable tree from Schedule 30.2 Notable Trees and consequential renumbering.

Decision Reasons:

- Tree is not located on the site.

Point Number 697.437

Summary of Decision Requested: Delete ID 80 Notable tree from the planning maps;
AND
Delete ID 80 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.438

Summary of Decision Requested: Delete ID 87 Notable tree from the planning maps;
AND
Delete ID 87 Notable tree from Schedule 30.2 Notable Tree and undertake consequential renumbering.

Decision Reasons:

- Tree does not exist.

Point Number 697.439

Summary of Decision Requested: Delete ID 95 Notable tree from the planning maps;
AND
Delete ID 95 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree has been removed.

Point Number 697.440

Summary of Decision Requested: Delete ID 110 Notable tree from the planning maps;
AND
Delete ID 110 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree has died.

Point Number 697.441

Summary of Decision Requested: Delete ID 127 Notable tree from the planning maps;
AND
Delete ID 127 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree has been removed.

Point Number 697.442

Summary of Decision Requested: Delete ID 138 Notable tree from the planning maps;
AND
Delete ID 138 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.443

Summary of Decision Requested: Delete ID 139 Notable tree from the planning maps;
AND
Delete ID 139 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.444

Summary of Decision Requested: Delete ID 143 Notable tree from the planning maps;
AND
Delete ID 143 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- This tree has been listed twice as ID 143 and 144.

Point Number 697.445

Summary of Decision Requested: Delete ID 149 Notable tree from the planning maps;
AND
Delete ID 149 Notable tree from Schedule 30.2 Notable Tree and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.446

Summary of Decision Requested: Delete ID 150 Notable tree from the planning maps;
AND
Delete ID 150 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.447

Summary of Decision Requested: Delete ID 154 Notable tree from the planning maps;
AND
Delete ID 154 Notable tree from Schedule 30.2 Notable Trees and undertake consequential renumbering.

Decision Reasons:

- Tree did not meet the criteria to be scheduled.

Point Number 697.448

Summary of Decision Requested: Add the following new tree to Schedule 30.2 Notable Trees:
Rhododendron 'Sir Robert Peel', 32 Main Road, Te Kauwhata
AND
Amend the planning maps to include the new tree.

Decision Reasons:

- New tree to be added to Schedule 30.2 Notable Trees.

Point Number 697.449

Summary of Decision Requested: **Add** the following new tree to Schedule 30.2 Notable Trees:

Blue atlas cedar, 202 Matangi Road, Matangi.

AND

Amend the planning maps to include the new tree.

Decision Reasons:

- New tree to be added to Schedule 30.2 Notable Trees.

Point Number 697.450

Summary of Decision Requested: **Add** the following new tree to Schedule 30.2 Notable Trees:

Oak, S Riverglade Drive, Tamahere.

AND

Amend the planning maps to include the new tree.

Decision Reasons:

- New tree to be added to Schedule 30.2 Notable Trees.

Point Number 697.451

Summary of Decision Requested: **Amend** Rule 19.3.2 Buildings, structures and vegetation within an airport obstacle limitation surface, to include a calculation to determine the permitted height with the airport obstacle limitation surface.

Decision Reasons:

- This rule needs to be able to be clearly interpreted by customers in relation to the Waikato Regional Airport.

Point Number 697.452

Summary of Decision Requested: **Amend** Rule 20.3.3 Buildings, structures and vegetation within an airport obstacle limitation surface, to include a calculation to determine the permitted height with the airport obstacle limitation surface

Decision Reasons:

- This rule needs to be able to be clearly interpreted by customers in relation to the Waikato Regional Airport.

Point Number 697.453

Summary of Decision Requested: **Amend** Rule 22.3.4.2 Buildings, structures and vegetation within an airport obstacle limitation surface, to include a calculation to determine the permitted height with the airport obstacle limitation surface.

Decision Reasons:

- This rule needs to be able to be clearly interpreted by customers in relation to the Waikato Regional Airport.

Point Number 697.454

Summary of Decision Requested: **Amend** Rule 23.3.4.2 Buildings, structures and vegetation within an airport obstacle limitation surface, to include a calculation to determine the permitted height with the airport obstacle limitation surface.

Decision Reasons:

- This rule needs to be able to be clearly interpreted by customers in relation to the Waikato Regional Airport.

Point Number 697.455

Summary of Decision Requested: **Amend** Rule 24.3.3.2 Buildings, structures and vegetation within an airport obstacle limitation surface, to include a calculation to determine the permitted height with the airport obstacle limitation surface.

Decision Reasons:

- This rule needs to be able to be clearly interpreted by customers in relation to the Waikato Regional Airport.

Point Number 697.456

Summary of Decision Requested: **Add** new provisions to Chapter 22 (Rural Zone) new provisions for new retirement villages to establish;

AND

Add provisions for alterations and additions to existing retirement villages as a Restricted Discretionary Activity;

AND

Add new policies to Chapter 5 Rural Environment to support the proposed provisions.

Decision Reasons:

- Retirement Villages have been provided for in the Residential Zone only. Council are seeking to include Retirement Villages into the Rural Zone and to enable additions or alterations to existing retirement villages.
- Retirement Villages provide a range of housing options for older persons. New policies are required to support these proposed provisions.

Point Number 697.457

Summary of Decision Requested: **Add** new provisions to Chapter 23 Country Living Zone for alterations and additions to existing retirement villages as a Restrictive Discretionary Activity;

AND

Add new policies in Chapter 5 (Rural Environment) for the Country Living Zone.

Decision Reasons:

- This will enable additions or alterations to existing retirement villages within the Country Living Zones and provide a range of housing options for older persons.

Point Number 697.458

Summary of Decision Requested: **Add** new provisions to Chapter 24 Village Zone allowing for new retirement villages to be established as a permitted activity;

AND

Add provisions for alterations and additions to existing retirement villages as a Permitted Activity;

AND

Add new policies similar to Policies 4.2.19 and 4.2.13 (Residential Zone) to Chapter 4 Urban Environment to support the proposed provisions.

Decision Reasons:

- Retirement Villages have been provided for in the Residential Zone only. Council are seeking to include Retirement Villages into the Village Zone. Retirement Villages provide a range of housing options for older persons.
- New policies are required to support these proposed provisions.

Point Number 697.459

Summary of Decision Requested: **Amend** Rule 18.1.3 Restricted Discretionary Activities, to clarify the number of units that can be built based on the 300m2 net site area per residential unit.

Decision Reasons:

- Council seeks to amend these rules further to clarify the number of units that can be built based on the 300m2 net site area per residential unit.

Point Number 697.460

Summary of Decision Requested: **Amend** Business Town Centre zoning for certain properties for the Ngaruawahia Town Centre, based on the types of activities that operate in these areas.

Decision Reasons:

- Business Town Centre zone may not be appropriate for all land parcels in Ngaruawahia. Further work is required to address this. At this point, Waikato District Council wish to submit that some properties in these areas may be more suited to Business Zone than a Business Town Centre. For some of the existing activities this zoning is restrictive and not suited to the types of activities.

Point Number 697.461

Summary of Decision Requested: **Amend** zoning of property at 46 Jackson Street, Ngaruawahia to reflect the proposed zoning as set out in the Ngaruawahia Structure Plan.

Decision Reasons:

- This property has been incorrectly re-zoned residential over the whole parcel and needs to be corrected to reflect the proposed zone identified in the Ngaruawahia Structure Plan in 2014

Point Number 697.462

Summary of Decision Requested: **Add** to 12.2 Categories of Activities, the following new rule:

12.2.2 Deeming rules for roads.
(a)The following rules apply with respect to roads:
(i)Any land vested in the Council or the Crown, as road pursuant to any enactment or provision, then from the date of vesting, the land shall retain its current zoning, but the provisions of that zoning do not apply to the land;
(ii)Where a road has been lawfully stopped under any enactment, and any relevant designation removed, the land shall be subject to the provisions of the adjoining zoned land (as shown on the planning maps), from the date of the stopping or removal of any relevant designation;
(iii)Where a road is stopped or a designation has been removed and the zoning of the land on one side of the road is different to the zoning on the other side of that road, then the road shall be subject to the provisions of the adjoining zoned land (as shown on the planning maps) up to the centre line of the road.

Decision Reasons:

- Roads are created mainly through subdivision and designations. However, in the case of subdivision, there is no immediate change to the planning maps to remove the zoning. That rezoning can only be carried out by means of a plan change. A 'deeming' rule can be used to cover the situation of new roads being created and roads being stopped. A new rule is proposed to address this matter.

Point Number 697.463

Summary of Decision Requested: **Amend** Rule 17.3.4.2 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.464

Summary of Decision Requested: **Amend** Rule 18.3.7 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.465

Summary of Decision Requested: Amend Rule 20.3.4.2 Building setback Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.466

Summary of Decision Requested: Amend Rule 21.3.4.2 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.467

Summary of Decision Requested: Amend Rule 22.3.7.5 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.468

Summary of Decision Requested: Amend Rule 23.3.7.5 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.469

Summary of Decision Requested: Amend Rule 24.3.6.3 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.470

Summary of Decision Requested: Amend Rule 25.3.5.2 Building setback - Waterbodies, to be consistent in terms of the terminology of structures across all zone chapters.

Decision Reasons:

- Consistency with the equivalent rule in other chapters.

Point Number 697.471

Summary of Decision Requested: Amend Rule 17.2.6.2 Pl (a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most appropriate measure, and the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure. The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves). The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number 697.472

Summary of Decision Requested: Amend Rule 18.2.6.2 Pl (a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most appropriate measure, and the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure. The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves). The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number 697.473

Summary of Decision Requested: Amend Rule 22.2.5.2 Pl (a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most appropriate measure, and the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure. The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves). The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number 697.474

Summary of Decision Requested: Amend Rule 23.2.5.2 Pl (a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most

appropriate measure, and the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure. The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves). The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number

697.475

Summary of Decision Requested:

Amend Rule 24.2.6.2 P1 (a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most appropriate measure, and the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure. The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves). The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number

697.476

Summary of Decision Requested:

Amend Rule 25.2.6.2 P1 (a)(ii) Notable tree - trimming, to consider whether 10% removal of foliage as a permitted activity condition is the most appropriate measure, and the most appropriate percentage.

Decision Reasons:

- Consider whether 10% removal of foliage as a permitted activity is the most appropriate measure. The rule stipulates 10%, but this is relatively restrictive and somewhat subjective in terms of how this is measured (i.e. is it a count of all branches and leaves). The Operative District Plan: Waikato Section rules allowed for 15%.

Point Number

697.477

Summary of Decision Requested:

Amend for consistency of reading, the following rule:
Rule 17.4.1.3 Subdivision - Amendments and updates to cross lease flats plans.

Decision Reasons:

Rules 16.4.6, 17.4.1.3 and 18.4.4 are worded differently from each other and should be worded the same for consistency given that it relates to the same subdivision process.

Point Number

697.478

Summary of Decision Requested:

Amend for consistency of reading, the following rule:
Rule 18.4.4 Subdivision - Amendments and updates to cross lease or flats plans.

Decision Reasons:

Rules 16.4.6, 17.4.1.3 and 18.4.4 are worded differently from each other and should be worded the same for consistency given that it relates to the same subdivision process.

Point Number

697.479

Summary of Decision Requested:

Amend Rule 12.1(e) Introduction to the rules as follows:
Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change (Stage 2 of the district plan review Placeholder) apply to land use and subdivision across the whole district.

Decision Reasons:

- It needs to be clarified throughout the Proposed District Plan that the provisions in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision. Also, the term "Placeholder" should be used for consistency throughout the plan.

Point Number

697.480

Summary of Decision Requested:

Amend 12.4 Rule Tables as follows:
Land Use – Activities, Land Use – Effects, Land Use – Building and Subdivision rules are in separate tables with a similar format. Rules that set out where the rules within the tables apply are found at the beginning of the tables.

Decision Reasons:

- It needs to be clarified that the introduction to the content of the activity, effects, building and subdivision tables is preceded by a set of rules that set out what rules apply. In some instances the heading does not make it clear that they are rules and changes to the zone headings are also recommended.

Point Number

697.481

Summary of Decision Requested:

Amend Chapter 13: Definitions by adding the following text underneath the heading "Definitions":
For the purposes of the defined terms, the singular term means the same as the plural term.

Decision Reasons:

- It would be helpful if the singular and plural terms could be used interchangeably depending on the context

Point Number

697.482

Summary of Decision Requested:

Add to Chapter 13: Definitions new definitions for "boundaries" as follows:
Front boundary.
Means a site boundary adjoining a public road.
AND

Side boundary.
Means a site boundary that intersects with a front boundary.

AND

Rear boundary.
Means a site boundary that does not intersect with a front boundary or a road.

Decision Reasons:

- It would be helpful to include definitions for boundaries.

Point Number 697.483

Summary of Decision Requested: Amend the definition of "Accessory building" as follows:

~~Means a building, the use of which is incidental to the use of the principal land use or building on that site. A garage that is integrated into and forms part of a dwelling is not an accessory building.~~
Means a building detached from the principal building on the site, the use of which is incidental to the principal building or the land use. Where no principal building has been established, an accessory building means a building that is incidental to a permitted use on the site.

Decision Reasons:

- Additional clarity of the term.

Point Number 697.484

Summary of Decision Requested: Amend the definition of "AEP" as follows:

Annual exceedance probability or AEP

Decision Reasons:

- For clarity, include the abbreviation with the full term.

Point Number 697.485

Summary of Decision Requested: Delete from Chapter 13: Definitions the definition for "Aggregate extraction activities".

Decision Reasons:

- This term is covered by three definitions (aggregate extraction activities, extractive industry and mineral extraction and processing) which would be more efficiently rationalised into one.

Point Number 697.486

Summary of Decision Requested: Amend the definition of "Airfield" as follows:

Means an area of land set aside from other uses for the purposes of enabling aircraft to land and take off.
Does not include airstrips or landing sites used for farming.

Decision Reasons:

- Amended to exclude airstrips or landing sites for farming. Fixed wing aircraft and helicopters are essential for farming including top-dressing, animal recovery and aerial spraying. These are intermittently used whereas the term "airfield" is intended to relate to permanent, formed commercial facilities.

Point Number 697.487

Summary of Decision Requested: Amend the definition of "Alteration or addition" as follows:

~~Means for heritage items listed in Appendix 20.1, an extension to a structure or building which increases its size, height and volume, including the construction of new floors, walls, ceilings and roofs.~~
Means any changes to the fabric or characteristics of a building including:
• external extensions that increase the size, height and volume of the building; or
• removal and replacement of windows, ceilings, floors, roofs or external walls; or
• the attachment of external structures such as canopies, verandahs, pergolas and balustrades.
Does not include maintenance or repairs.

Decision Reasons:

- The term "alteration or addition" does not just relate to Heritage items. The definition would benefit from additional clarity.

Point Number 697.488

Summary of Decision Requested: Add to Chapter 13: Definitions a new definition for "Motorised sport and recreation" as follows:

Motorised sport and recreation

Means any facilities or events associated with motorised vehicles where a fee is charged.
Vehicles may include dirt bikes, motorcycles, off-road 4 wheel drive vehicles, quad bikes, jet sprints, stockcars and race cars.
This includes competitive racing or rallying of motorised vehicles, and includes training connected with that racing or rallying for people who do not reside at the property.
The facilities may include:
(a) race tracks, race pads and associated pit garages and support facilities;
(b) race control, safety, emergency and media facilities;
(c) food and beverage and merchandising retail areas;
(d) administration buildings and facilities;
(e) general ticketing, toilet and ablution facilities;
(f) overnight accommodation;
(g) parking;
(h) driver training school inclusive of a skid pad;
(i) spectator facilities including pedestrian access ways, tunnels, overbridges, spectator viewing platforms and seating areas;
(j) a jet sprint course;
(k) dirt track;
(l) go-kart track and drifting pads;
(m) accessory buildings, facilities and structures such as maintenance and storage sheds, decks, shade cloths and storage containers for all items listed above.

Decision Reasons:

- There are currently no activities other than the Motorsport and Recreation Zone which addresses motorised sport and recreation activities such as motocross tracks or rally events. A definition for this term is an efficient approach and gives clarity as to what activities will be encompassed by this term.

Point Number 697.489
Summary of Decision Requested: Amend the definition of "Multi-unit development" as follows:

...
 It excludes:
 (a) retirement villages;
 (b) papakainga housing development; ~~and~~
 (c) papakainga building; and
 (d) a minor dwelling

Decision Reasons:

- Needs to exclude a minor dwelling for clarity.

Point Number 697.490
Summary of Decision Requested: Amend the definition of "Neighbourhood centre" as follows:

...local community. Neighbourhood centres are identified in structure plans ~~or on the planning maps.~~

Decision Reasons:

- These are not shown on the planning maps so the amendment is needed to correct the error.

Point Number 697.491
Summary of Decision Requested: Amend the definition of "Noise-sensitive activity" as follows:

Means the following:
 (a) buildings used for residential activities, including boarding establishments, ~~rest homes,~~ retirement villages, papakainga housing development, ~~in-house aged care facilities,~~ travellers' accommodation, and other buildings used for residential accommodation but excluding camping grounds;
 (b) ...
 AND
 Any consequential amendments.

Decision Reasons:

- The definition of retirement village and rest home is sought to be rationalised into one term.
- Consequential amendments are needed for definitions that use the terms.

Point Number 697.492
Summary of Decision Requested: Amend the definition of "Notional boundary" as follows:

... site boundary where this is less than 20 metres from ~~closer to~~ the residential unit or sensitive land use.

Decision Reasons:

- Increased clarity of the definition.

Point Number 697.493
Summary of Decision Requested: Amend the definition of "Papakainga housing development" as follows:

Means a comprehensive residential development for a recognised Tangata Whenua group or organisation ~~residing in the Waikato district~~ to support...

Decision Reasons:

- There is no need for the definition to require residing in the Waikato District.

Point Number 697.494
Summary of Decision Requested: Amend the definitions for "Place of assembly and Community activity" to ensure that there is no overlap between the activities that each of the terms encompass.

Decision Reasons:

- The definitions of "place of assembly" and "community activity" encompass common activities which could create confusion as to which term, and therefore activity status applies. Using a single defined term would result in clearer rules.

Point Number 697.495
Summary of Decision Requested: Add to Chapter 13: Definitions a new definition for "Record of title" as follows:

Record of title
 Means a record of title issued pursuant to section 12 of the Land Transfer Act 2017. Where more than one record of title is issued under that section for multiple concurrent interests in the same parcel of land (including for example a lease, or for an undivided share in the land), Record of Title includes, for the purposes of this plan, all records of title issued in respect of the same parcel of land, as if only one record of title had issued.

Where the context requires, Record of Title includes the land comprised in that record of title.

Decision Reasons:

- Including a new definition for record of title will assist in clarity of the Plan.

Point Number 697.496

Summary of Decision Requested:	Delete from Chapter 13: Definitions the definition for "Rear record of title"
Decision Reasons:	<ul style="list-style-type: none"> This term is not used in the Plan and therefore a definition is not required.
Point Number	697.497
Summary of Decision Requested:	Amend the definition of "Residential activity" as follows: <i>...For the purpose of this definition, it includes emergency and refuge accommodation...</i>
Decision Reasons:	<ul style="list-style-type: none"> Minor amendment to improve readability.
Point Number	697.498
Summary of Decision Requested:	Amend the definition of "Residential unit" as follows: <i>Means a building or group of buildings or part of a building or group of buildings that is:</i> <i>(a) used, or intended to be used, only or mainly for residential activities; and</i> <i>(b) occupied, or intended to be occupied, exclusively as the home or residence of not more than one household; and</i> <i>(c) is self-contained for living accommodation.</i>
Decision Reasons:	<ul style="list-style-type: none"> Provides additional clarity that a residential unit is self contained, as different from a sleepout which would be an accessory building.
Point Number	697.499
Summary of Decision Requested:	Delete from Chapter 13: Definitions the definition for "Rest home" AND Delete all references in the Plan to "rest home" and replace with "Retirement village".
Decision Reasons:	<ul style="list-style-type: none"> There is considerable crossover and duplication between the terms "rest home" and "retirement village". It would be more efficient to rationalise these into a single comprehensive defined term which recognised all the different living options and levels of care available in a retirement village.
Point Number	697.500
Summary of Decision Requested:	Delete (c) from the definition for "Retirement village" in Chapter Definitions AND Add (d)(iv) to the definition for "Retirement village" in Chapter 13 Definitions as follows: <i>(iv) independent residential units.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity to recognise that retirement villages may have independent residential units. The definition needs to recognise that some retirement villages may have higher levels of care and no residential units.
Point Number	697.501
Summary of Decision Requested:	Add to Chapter 13: Definitions a new definition for "Identified area" as follows: <i>In terms of Chapter 14 Infrastructure and Energy, includes the following areas and items identified within this plan:</i> <i>a. Urban Expansion Area</i> <i>b. Significant Natural Area</i> <i>c. Outstanding Natural Feature</i> <i>d. Outstanding Natural Landscape</i> <i>e. Significant Amenity Landscape</i> <i>f. Outstanding Natural Character</i> <i>g. High Natural Character</i> <i>h. Heritage Precinct</i> <i>i. Heritage Items</i> <i>j. Maori Sites of Significance</i> <i>k. Maori Areas of Significance</i> <i>l. Notable Trees</i>
Decision Reasons:	<ul style="list-style-type: none"> Provides additional clarity and usability as this term will bring up a comment box in the web version.
Point Number	697.502
Summary of Decision Requested:	Add to Chapter 13: Definitions a new definition for "Public floor area" as follows: <i>Public floor area</i> <i>Means the undercover floor area usually accessible by the public</i>
Decision Reasons:	<ul style="list-style-type: none"> This term would benefit from being defined for additional clarity.
Point Number	697.503
Summary of Decision Requested:	Add to the definition for "Road network activities" as follows: <i>(p) wastewater and water supply management structures</i>
Decision Reasons:	

- There are manholes and other structures associated with the reticulation of wastewater and water supply and these are often within the road reserve.

Point Number 697.504

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Stormwater management plan" as follows:
Stormwater management plan.

Means a tool for managing stormwater quality and quantity to protect ecological, social, cultural and economic values. A stormwater management plan is used as a tool to ensure that decisions in relation to new and existing developments are made with an understanding of the implications of stormwater impacts and to ensure appropriate, cost-effective and integrated mitigation can be effectively implemented.

Decision Reasons:

- The District Plan would benefit from a definition for stormwater management plans.

Point Number 697.505

Summary of Decision Requested: **Delete** from Chapter 13: Definitions the definition for "Rural ancillary earthworks"
AND

Replace all references in the Plan to "Rural ancillary earthworks" to "Ancillary rural earthworks".

Decision Reasons:

- This term is defined twice as "rural ancillary earthworks" and "ancillary rural earthworks" – rationalise into a single defined term.

Point Number 697.506

Summary of Decision Requested: **Amend** the definition for "Rural industry" as follows:

Means an industry that involves the direct handling or processing to the first stage of manufacture of any raw produce harvested from farming, rural contractors' depots, or any other land-related agricultural activity, but excludes waste disposal, extractive industries and electricity generation. Within the Rural Zone, activities that directly support farming through supplying a product or service to farms, such as rural contractors. It excludes transport depots and retail services.

Decision Reasons:

- There is significant overlap between the definition of "farming" and "rural industry", with a single activity potentially being covered by both terms with different activity statuses. The processing of produce is retained in the definition of "farming" and recognises that produce may not be grown on the land. The definition of "rural industry" needs to be re-focused to recognise the rural services and products that service the farming sector. It needs to exclude activities that are more appropriate in a business or industrial zone.

Point Number 697.507

Summary of Decision Requested: **Amend** the definition for "Significant Natural Area" as follows:
Significant Natural Area or SNA

Decision Reasons:

- Amend definition so that Significant Natural Area and significant amenity area are interchangeable.

Point Number 697.508

Summary of Decision Requested: **Amend** the definition for "Significant Amenity Landscape" as follows:
Significant amenity landscape or SAL

Decision Reasons:

- Amend to be consistent with other abbreviated terms.

Point Number 697.509

Summary of Decision Requested: **Amend** the definition for "Site" as follows:

....
(b) in the case of land developed under the Unit Titles Act 2010, the area comprised in a principal unit ~~or~~ and associated accessory unit excluding any common property;
in the case of cross-leases, the flat, and any the area reserved for the exclusive use of the lease of that flat, comprised within the cross-lease, but excluding any common areas property.

Decision Reasons:

- Amendments to improve clarity and accuracy of terms used.

Point Number 697.510

Summary of Decision Requested: **Add** to Chapter 13: Definitions a new definition for "Structure" as follows:
Structure.
Means a man-made object.

Decision Reasons:

- The term structure is used throughout the Plan but it would be helpful to include a definition for it to improve clarity.

Point Number 697.511

Summary of Decision Requested: **Amend** the definition for "Temporary event" as follows:

Means a social, cultural or recreation event ~~that has a duration of less than 72 hours~~, including entertainment...

Decision Reasons:

- The standards associated with duration of a temporary event are already in each of the rules. Therefore duration is not necessary in the definition.

Point Number 697.512

Summary of Decision Requested: **Amend** the definition for "Viable record of title" as follows:

Means in the Rural Zone, a Record of Title that contains at least 5000m2, is not a road severance or stopped road, and can...

Decision Reasons:

- Needs to address the scenario of a stopped road.

Point Number 697.513

Summary of Decision Requested: **Amend** the definition of 'marae' in Chapter 13: Definitions as follows:
See ~~Definitions of marae complex~~

Decision Reasons:

- Correcting an error.

Point Number 697.514

Summary of Decision Requested: **Amend** Chapter 14 Infrastructure and Energy by replacing acronyms with the full terms eg RTS, ROW.

Decision Reasons:

- Increased ease of reading the chapter.

Point Number 697.515

Summary of Decision Requested: **Amend** Chapter 14: Infrastructure and Energy to ensure numbering is logical and clear.

Decision Reasons:

- Inconsistent approach to numbering makes referencing rules difficult.

Point Number 697.516

Summary of Decision Requested: **Amend** Chapter 14: Infrastructure and Energy by amending the numbering so it is sequential.

Decision Reasons:

- Numerical order of numbers.

Point Number 697.517

Summary of Decision Requested: **Amend** Chapter 14: Infrastructure and Energy so the structure of the chapter is consistent with other chapters.

Decision Reasons:

- Inconsistent structure and layout with other chapters.

Point Number 697.518

Summary of Decision Requested: **Amend** in Chapter 14: Infrastructure and Energy, the term "Heavy Industrial Zone" to be "Industrial Zone Heavy".

Decision Reasons:

- Consistency of zone names.

Point Number 697.519

Summary of Decision Requested: **Amend** Chapter 14: Infrastructure and Energy the term "Te Kowhai Airpark" to be "Te Kowhai Airpark Zone" in the following rules:

Permitted Activity Rules

- Rule 14.4.1.2
- Rule 14.10.1.7
- Rule 14.12.1.7

Restricted Discretionary Activity Rule

- Rule 14.12.2 RD7

Decision Reasons:

- Consistency of zone names.

Point Number 697.520

Summary of Decision Requested:	Amend Rule 14.1(3) Introduction as follows: <i>(3) The Identified areas within the activity tables below this chapter covers the following areas and items identified within this plan: ...</i>
Decision Reasons:	<ul style="list-style-type: none"> Refers to activity tables but there are no longer activity tables.
Point Number	697.521
Summary of Decision Requested:	Amend Rule 14.1(4) Introduction as follows: <i>(4) In the activity tables-rules within this chapter, the letters below mean the following: ...</i>
Decision Reasons:	<ul style="list-style-type: none"> Refers to activity tables but there are no longer activity tables.
Point Number	697.522
Summary of Decision Requested:	Amend from 14.1 Introduction by relocating Rules 14.1.5, 14.1.6, 14.1.7 under the heading 14.2 Rules applying to all infrastructure as follows: <i>14.2 Rules applying to all Infrastructure (1) Where relevant, the requirements of the National Code of Practice for Utility Operators' Access to Transport Corridors will apply to the placement, maintenance, improvement and removal of utility structures in roads (or unformed roads). (2) The requirements of the Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 ("NESETA") apply directly to the operation, maintenance, upgrading, relocation or removal of transmission line(s) that were operating or able to be operated on or before 14 January 2010 and remain part of the National Grid. In the case of conflict with any other provision of this plan, including any provision in the activity rules in this section, the NESETA provisions shall prevail. (3) The Resource Management (National Environmental Standards for Telecommunication Facilities) Regulations 2016 ("NESTF") provides national consistency in the rules surrounding the deployment of telecommunications infrastructure across New Zealand. This means that many telecommunications facilities may potentially be deployed as a permitted activity. However, telecommunications facilities which do not comply with the conditions within the NESTF, or are not covered by the regulations of the NESTF, will have the activity status specified in this plan. In the case of conflict with any other provision of this plan, the NESTF provisions shall prevail.</i>
Decision Reasons:	<ul style="list-style-type: none"> These are rules, but have no legal effect when they are included in the Introductory section. In order to have legal effect as rules, they need to be moved under the heading 14.2 Rules Applying to all Infrastructure
Point Number	697.523
Summary of Decision Requested:	Amend Rule 14.1(6) Introduction as follows: <i>In the case of conflict with any other provision of this plan, including any provision in the activity table-rules in this section, the NESETA provisions shall prevail.</i>
Decision Reasons:	<ul style="list-style-type: none"> Refers to activity tables but there are no longer activity tables.
Point Number	697.524
Summary of Decision Requested:	Add to Rule 14.1(7) Introduction as follows: <i><u>In the case of conflict with any other provision of this plan, the NESTF provisions shall prevail.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Clarification that the Proposed District Plan does not override the National Environmental Standards for Telecommunications Facilities.
Point Number	697.525
Summary of Decision Requested:	Add to Rule 14.2 Rules applying to infrastructure as follows: <i>(4) Where compliance with Rule 14.2 or 14.3 would contravene a rule in Rule 14.4, 14.5, 14.6, 14.7, 14.8, 14.9, 14.10, 14.11, or 14.12, then the requirements of Rule 14.4, 14.5, 14.6, 14.7, 14.8, 14.9, 14.10, 14.11, or 14.12 shall prevail.</i>
Decision Reasons:	<ul style="list-style-type: none"> Would benefit from a rule which provides clarity over which rule prevails where there is a general rule and a specific rule which could cover the same structure or activity.
Point Number	697.526
Summary of Decision Requested:	Reconsider the numbering structure in Chapter 14 Infrastructure and Energy.
Decision Reasons:	<ul style="list-style-type: none"> It is difficult to quote a rule given the numbering structure.
Point Number	697.527
Summary of Decision Requested:	Delete Rule 14.2.1(1)(a) New infrastructure AND Delete Rule 14.2.1(1)(b) New infrastructure AND Amend Rule 14.2.1(2)(a) New infrastructure as follows: <i>(a) Activities with specific conditions relating to area, height, location and noise listed elsewhere within Rules 14.3–14.12;</i>
Decision Reasons:	

- A more efficient approach is to insert maximum height and area for those structures that require it rather than a blanket height and area which applies to all structures unless otherwise stated. There are many structures specifically listed in Chapter 14 have their own permitted dimensions.

Point Number 697.528

Summary of Decision Requested: Amend Rule 14.2.3 Non-Complying Activity as follows:
~~14.2.3~~ 14.2.4 Non-Complying Activities

Decision Reasons:

- Rule 14.2.3 is duplicated in the numbering.

Point Number 697.529

Summary of Decision Requested: Add to Rule 14.3.1 P2 Permitted Activity Minor upgrading of existing infrastructure as follows:

(7) The conditions in Rule 14.3.1.1(1) do not apply to road network activities or other linear transport networks.

Decision Reasons:

- The standards are too constraining for roads given the length and width of roads (particularly new roads). They are not the most efficient approach to managing structures and activities associated with the road and transport network.

Point Number 697.530

Summary of Decision Requested: Add to Rule 14.3.1.3 P4 Earthworks activities associated with infrastructure as follows:

(i) Earthworks are not located within any Maaori Sites of Significance or Maaori Areas of Significance identified within Appendix 30.3 or 30.4.

(j) Earthworks are not located within the dripline of a notable tree listed in Appendix 30.2.

Decision Reasons:

- For completeness, insert references to Maaori Sites of Significance, Maaori Areas of Significance, and within the dripline of a notable tree.

Point Number 697.531

Summary of Decision Requested: Amend Rule 14.3.1.3(1)(h) Permitted Activities Earthworks activities associated with infrastructure to hyperlink the references to Appendix 30.1.

Decision Reasons:

- Appendix 30.1 requires highlighting and a hyperlink for clarity and consistency.

Point Number 697.532

Summary of Decision Requested: Add to Rule 14.3.1.8 Permitted Activities Service connections for subdivision a new clause (4) as follows:

(4) Rule 14.3.1.8(1)(b) and (c) do not apply to any Rural or Country Living Zone site.

Decision Reasons:

- Recognition for Rural and Country Living Zoned sites that water supply will be provided on site, and stormwater will be managed on site.

Point Number 697.533

Summary of Decision Requested: Amend Rule 14.3.1.8(3) Permitted Activity Service connections for subdivision to include more specific standards for what constitutes adequate supply for fire fighting purposes.

Decision Reasons:

- More clarity is required as to what standards are required for firefighting water supply.

Point Number 697.534

Summary of Decision Requested: Amend Rule 14.3.1(P12)(1)(e) Permitted Activity Service connections for subdivision to reconsider the District Plan's telecommunications requirements for subdivision are further investigated, with amendments to this rule and policies to address the issue.

Decision Reasons:

- A subdivision consent was issued on the basis of advice from a telecommunications provider that there was capacity for a connection.
- The property was subsequently subdivided and sold but the telecommunications provider can no longer supply an adequate connection due to latent capacity being taken up in the meantime.
- One option is to require a hard wire connection in the Plan, however technology is changing so quickly that this will quickly become obsolete. Another option is that the Plan does not require a telecommunications connection.

Point Number 697.535

Summary of Decision Requested: Amend Rule 14.3.1(P12)(1)(d) Permitted Activity Service connections for subdivision to reconsider the District Plan's electricity requirements for subdivision and are further investigated, with amendments to this rule and policies to address the issue.

Decision Reasons:

- This rule currently requires an electricity supply, but with technology changing so quickly connecting to an electricity distribution network may not be needed.
- Subdivision consent applications require a third party electricity provider to verify that a connection is possible.
- One option is to require a physical electricity connection in the Plan as currently required by Rule 14.3.1(P12)(1)(d), however technology is changing so quickly that this may become obsolete. Another option is that the Plan does not require an electricity connection up to the boundary.

Point Number 697.536

Summary of Decision Requested: **Amend** Rule 14.3.2.1 CI Controlled Activities Subdivision to create a utility allotment for accommodating infrastructure by deleting clauses (2) and (3).

Decision Reasons:

- Remove unnecessary standards as it is irrelevant whether the infrastructure is permitted or consents granted.
- The description of the activity is sufficient.

Point Number 697.537

Summary of Decision Requested: **Amend** Rule 14.3.3 RDI Restricted Discretionary Activities by deleting clause (viii).

Decision Reasons:

- Remove duplication – Clause (ii) duplicates (viii).

Point Number 697.538

Summary of Decision Requested: **Amend** Objective 4.1.7 Character of Towns as follows:
Development in the Residential, Village, Industrial, Industrial Heavy, Business Town Centre and Business zones is attractive...

Decision Reasons:

Provides additional clarification to the policy to ensure all relevant zones are considered.

Point Number 697.539

Summary of Decision Requested: **Amend** Policy 4.1.12(b) Te Kauwhata as follows:
Development of the Lakeside Precincts provides for growth, achieves a compact urban form and creates a high level of amenity and sense of place by...

Decision Reasons:

Provides additional clarification to the policy.

Point Number 697.540

Summary of Decision Requested: **Amend** Policy 4.1.12 (i) – (iii) and (v) & (vi) Te Kauwhata as follows:
~~(i) Provides Providing for...~~
~~(ii) Manages Managing the...~~
~~(iii) Implement Implementing a high...~~
~~(v) Integrates Integrating with...~~
~~(vi) Mitigates Mitigating the potential...~~

Decision Reasons:

Through adding the linking word 'by' requires grammatical changes.

Point Number 697.541

Summary of Decision Requested: **Amend** Policy 4.1.18 Raglan as follows:
There are walkable connections between the town centre, the Papahua Reserve and Raglan Wharf.

Decision Reasons:

- The policy is not clear as to what form the connections sought are.

Point Number 697.542

Summary of Decision Requested: **Amend** Policy 4.2.23 (b) Non-residential activities as follows:
~~Enabling Enable existing...~~

Decision Reasons:

- The grammar is incorrect.

Point Number 697.543

Summary of Decision Requested: **Amend** Policy 4.3.6(a) Front setback character as follows:
Maintain the existing open and unbuilt character of streets through the use of setbacks.

Decision Reasons:

- Provides additional clarification to the policy.

Point Number 697.544

Summary of Decision Requested: **Amend** Policy 4.3.11(a) Maintain residential function as follows:
... a strategic or operational need to locate within the Village Zone, and not compromise the effects of such activities on the character and amenity of the Village Zones are insignificant.

Decision Reasons:

- Re-wording provides additional clarification to the policy.

Point Number 697.545

Summary of Decision Requested: Add to Chapter 4.3 Village Zone Objectives and Policies to add two new policies numbered 4.3.16 and 4.3.17 as follows:

4.3.16 Policy – Outdoor living court – Retirement villages
 (a) Require outdoor living courts or communal outdoor living courts to be usable and accessible.
4.3.17 Policy – Retirement villages
 (a) Provide for the establishment of new retirement villages and care facilities that:
 (i) Offer a diverse range of housing types, including care facilities, for the particular needs and characteristics of older people;
 (ii) Promote visual integration with the street scene, neighbourhoods and adjoining sites;
 (iii) Are comprehensively designed and managed and offer a variety of accommodation and accessory services that meet the needs of residents, including those requiring care or assisted living;
 (iv) Housing and care facilities for older people can require higher densities;
 (v) Provide high quality on-site amenity; and
 (vi) Integrate with local services and facilities, including public transport.
 (b) Enable alterations and additions to existing retirement villages that:
 (i) Promote visual integration with the street scene, neighbourhoods and adjoining sites;
 (ii) Recognise that housing and care facilities for older people can require higher densities;
 (iii) Provide high quality on-site amenity; and
 (iv) Integrate with local services and facilities, including public transport and alternative transport modes.

Decision Reasons:

- To provide consistency with Residential Zone for proposed retirement village provisions in the Village Zone, there is a need to include additional policies.

Point Number 697.546

Summary of Decision Requested: Amend 4.5 Business and Business Town Centre Zones heading as follows:
 Business and Business Town Centre Zones and Neighbourhood Centres

Decision Reasons:

- The heading needs to indicate that the objectives and policies apply to Neighbourhood Centres.

Point Number 697.547

Summary of Decision Requested: Amend Objective 4.5.1 Commercial function and purpose as follows:
 Commercial activity is focused within ~~a differentiation of commercial zones and development~~ (comprising the Business Town Centre Zone, the Business Zone, and the Business Zone Tamahere and neighbourhood centres).

Decision Reasons:

- Re-wording provides additional clarification to the objective.

Point Number 697.548

Summary of Decision Requested: Amend Policy 4.5.6 Commercial purpose: Neighbourhood Centres as follows:
 Policy – Commercial purpose: Neighbourhood ~~Centres~~ Centres

Decision Reasons:

- This grammar is incorrect.

Point Number 697.549

Summary of Decision Requested: Delete Policy 4.5.29 New buildings: Business Zone.

Decision Reasons:

- This policy is not required, as the Urban Design Guidelines apply only to the Business Town.

Point Number 697.550

Summary of Decision Requested: Amend Policy 4.5.41 (a) Earthworks as follows:
~~Ensure that the adverse effects of Manage earthworks in the Business Town Centre Zone and Business Zone on adjoining properties and water bodies, are managed~~ to minimise the adverse effects and sediment of dust and stormwater runoff.

Decision Reasons:

- Provides additional clarification to the policy.

Point Number 697.551

Summary of Decision Requested: Amend Policy 4.6.3 (a) Maintain a sufficient supply of industrial land as follows:
 ... requirements of different industries ~~to avoid the need for industrial activities to locate in non-industrial zones.~~

Decision Reasons:

- Provides additional clarification to the policy.

Point Number 697.552

Summary of Decision Requested: Amend Policy 4.6.8 (a) Specific activities within Nau Mai Business Park as follows:
 Nau Mai Business Park is developed with specific types of activities...

Decision Reasons:

- The grammar is incorrect - there is a missing word.

Point Number 697.553

Summary of Decision Requested:	Amend Policy 4.6.9 (a) Management of adverse effects within Nau Mai Business Park as follows: ... generated by them are managed within <u>the Nau Mai Business Park</u> and ...
Decision Reasons:	<ul style="list-style-type: none"> Provides additional clarification to the policy.
Point Number	697.554
Summary of Decision Requested:	Delete the heading "Layout and Design" that is between Objective 4.7.1 Subdivision and Land Use Integration and Policy 4.7.2 Subdivision location and design.
Decision Reasons:	<ul style="list-style-type: none"> Provides consistency of layout and is superfluous.
Point Number	697.555
Summary of Decision Requested:	Amend Chapter 5 Rural Environment navigation box as follows: <i>The following objectives and policies apply to the Rural Zone. Specific policies apply to Hamilton's Urban Expansion Area (Objective 5.5.1 and Policies 5.5.1 and 5.5.2) and the following Specific Areas:</i> <ul style="list-style-type: none"> Agricultural Research Centres (Policy 5.3.16) Huntly Power Station Coal and Ash Water (Policy 5.3.17) Whaanga Coast Development Areas (Policy 5.3.18); and Hamilton's Urban Expansion Area (Objective 5.5.1 and Policies 5.5.1 and 5.5.2).
Decision Reasons:	<ul style="list-style-type: none"> Would provide clarity to the reader by rearranging the content.
Point Number	697.556
Summary of Decision Requested:	Add to Policy 5.3.4 Density of dwellings and building with the rural environment two new policies as follows: <ul style="list-style-type: none"> <i>(c) <u>Additional dwellings and buildings do not compromise the rural character and amenity of the surrounding locality.</u></i> <i>(d) <u>Provide for a minor dwelling, where it:</u></i> <ul style="list-style-type: none"> <i>(i) <u>is located within proximity to the principal dwelling on a site; and</u></i> <i>(ii) <u>maintains rural character and amenity.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Additional policy (c) is required in order to make it clear that additional dwellings (i.e. second dwellings) and buildings are supported in the rural environment, provided they do not compromise rural character and amenity. Additional policy (d) is required to provide clear direction on minor dwellings to ensure rule 22.3.2 (minor dwelling) where the rule cannot be met given that it is a Discretionary activity.
Point Number	697.557
Summary of Decision Requested:	Amend Policy 5.3.9 Non-rural activities heading as follows: <i>Policy – Non-rural activities <u>Managing activities in the rural zone</u></i>
Decision Reasons:	<ul style="list-style-type: none"> The policy needs to reflect activities.
Point Number	697.558
Summary of Decision Requested:	Amend Policy 5.3.9(a) Non-rural activities as follows: <i>Manage any non-rural non-farming activities, including: <u>equestrian centres, horse training centres, forestry animal boarding, daycare, breeding and training establishments, and rural industries...</u></i> AND Add to Policy 5.3.9 Non-rural activities a new policy (c) as follows: <i>(c) <u>Provide for and manage facilities associated with recreational and sporting activities, including equestrian centres, and horse training centres.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> This revised policy has been focused to provide specifically for non-farming activities and to provide for recreational and sporting activities.
Point Number	697.559
Summary of Decision Requested:	Add after Policy 5.3.9 Non-rural activities a new policy for retirement villages as follows: <i><u>5.3.9A Policy – Retirement villages.</u></i> <i>(a) <u>Provide restricted opportunities for retirement villages within 800m distance of towns and villages within the rural environment.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> This policy is to support the proposed restricted discretionary activity rule for retirement villages in the rural zone.
Point Number	697.560
Summary of Decision Requested:	Delete from Policy 5.6.3(a)(i) Subdivision within the Country Living Zone as follows: <i>(i) <u>The creation of undersized lots is avoided where character and amenity are compromised.</u></i> AND Add to Policy 5.6.3(a) Subdivision within the Country Living Zone a new policy (vi) as follows: <i>(vi) <u>Character and amenity is not compromised.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> The wording "where character and amenity are compromised" weakens this policy, which supports a non-complying activity where proposed lots are undersized. It is proposed to make 'character and amenity' a separate criteria.

Point Number 697.561

Summary of Decision Requested: Add a new policy 5.6.19 for amendments to existing retirement villages as follows:
5.6.19 Policy – Amendments to existing retirement villages within the Country Living Zone
(a) Enable alterations and additions to existing retirement villages within the Country Living Zone.

Decision Reasons:

- This policy is to support the proposed restricted discretionary activity rule for retirement villages in the rural zone.

Point Number 697.562

Summary of Decision Requested: Amend Policy 6.4.3(a)(i) Infrastructure Location and Services as follows:
(i) Three waters (water, wastewater and stormwater ~~supply~~ management);

Decision Reasons:

- Management is a better term than supply as wastewater and stormwater are not supplied to a site.

Point Number 697.563

Summary of Decision Requested: Amend Policy 6.4.5 Rooding infrastructure by renumbering as 6.5.8 and inserting it after Policy 6.5.7.

Decision Reasons:

- Policy 6.4.5 is under the wrong objective - move under Objective 6.5.1 as it sits there more logically.

Point Number 697.564

Summary of Decision Requested: Delete Policy 6.4.5(a)(iv) Rooding infrastructure
OR
Amend Policy 6.4.5(a)(iv) Rooding infrastructure as follows:
(iv) Contaminants generated during construction are appropriately mitigated

Decision Reasons:

- This is more appropriately covered by the regional plan. The use of the rooding infrastructure and contaminants generated through that such as heavy metals is not a matter that can be effectively controlled through the district plan. Alternatively, refocus the policy on the construction phase.

Point Number 697.565

Summary of Decision Requested: Amend Policy 6.4.7 (a) Stormwater a new matter (viii) as follows:
(viii) Be subported by a stormwater management plan

Decision Reasons:

Inclusion of an additional note to better explain stormwater management plan requirements.

Point Number 697.566

Summary of Decision Requested: Amend Policy 6.5.2(a)(viii) Construction and operation of the land transport network as follows:
*(viii) Discouraging the installation of new at grade road and pedestrian rail level crossings:
~~A-(ix) Controlling the location of buildings and other visual obstructions within the sightline areas of rail level crossings; and~~
~~B-(z) Where a Railway crossing is required, it must be designed in accordance with the requirements of the rail operator.~~*

Decision Reasons:

- Parts A and B do not relate to Clause (viii) and would be clearer as three separate clauses.

Point Number 697.567

Summary of Decision Requested: Amend Policy 7.1.3(f) Heritage items as follows:
Ensure alterations to ~~identified~~ scheduled heritage items and curtilage are...

Decision Reasons:

- Provides clarity to this policy that it applies to scheduled heritage items.

Point Number 697.568

Summary of Decision Requested: Amend Policy 9.2.2.1 (b) Airpark standards as follows:
(b) ~~To~~ Ensure that bulk and location...

Decision Reasons:

- This would provide clarity around the wording of this policy.

Point Number 697.569

Summary of Decision Requested: Add a new introduction in Chapter 10: Hazardous Substances and Contaminated Land as follows:

The provisions of this chapter are designed to prevent or minimise adverse effects of activities at sites that use, store, transport or dispose of hazardous substances. These activities can include industrial operations (for example chemical warehousing, manufacturing plants or bulk storage facilities), workshops, agricultural and horticultural activities, and some occupations that are carried out from home. The sites where such activities take place are defined as hazardous facilities.
Land use activities involving hazardous substances have the potential to result in an increased risk of adverse environmental effects and present a risk to those who use them or may be exposed to them, and the surrounding environment. Risks are influenced by the nature of the hazardous substances, the quantity of the substances, the effects the substance may have, the likelihood of an event occurring and which parts of the environment may be affected. An event may be an accidental release, spill, unintended chemical reaction, fire or explosion.
Risks are influenced by the location of an activity and the surrounding environment. For example, hazardous facilities located in areas subject to natural hazards may be exposed to greater risks of damage or failure resulting in an event involving a hazardous substance. Facilities located in proximity to land uses that are sensitive to the potential effects of a hazardous substance may also result in a greater risk.
These provisions are a land use planning tool under the Resource Management Act and are designed to apply in addition to requirements of other legislation. Such requirements assist in the management of hazardous substances and they are recognised in the design of the provisions in this chapter.

Decision Reasons:

- An introduction to the topic of hazardous substances will assist the reader to understand the intentions and reasons that accompany the rules relating to hazardous substances in the District Plan.

Point Number 697.570

Summary of Decision Requested: Amend Objective 10.1.1(a) Effects of hazardous substances to read as follows:

(a) ~~Residual~~ Risks associated with the storage, use, transport or disposal of hazardous substances ~~is managed~~ are minimised to ensure that the effects on people, property and the environment are acceptable, while recognising the benefits of facilities using hazardous substances.

Decision Reasons:

- Following technical advice on this change, 'Residual' risks are those risks left after risk management is in place. Managing residual risks is not an accurate or useful statement in the context. Transport being omitted from this objective is an error. The term 'minimised' provides clarity to the objective.

Point Number 697.571

Summary of Decision Requested: Amend Policy 10.1.2 Location of new hazardous facilities heading as follows:

Policy - ~~Location of new H1~~ Hazardous facilities

Decision Reasons:

- Provides clarity that this policy applies to all hazardous facilities, not just 'new' facilities.

Point Number 697.572

Summary of Decision Requested: Amend Policy Location of new hazardous facilities 10.1.2(a) as follows:

(a) ~~New H1~~ Hazardous facilities must minimise the risk to the environment (including people and property) to acceptable levels by:

- (i) Siting new hazardous facilities in appropriate locations that are separated from incompatible activities, including infrastructure, and sensitive environments;
- ~~(ii) Avoid locating near to sensitive land use activities and infrastructure~~
- (iii) Designing, constructing and operating hazardous facilities in a manner that ensures the adverse effects of the operation or an accidental event involving hazardous substances can be contained within the site; and
- (iv) Disposing hazardous wastes to authorised disposal or treatment facilities that have appropriate management systems in place and avoiding the storage, processing or disposal of hazardous wastes in sensitive environments.

Decision Reasons:

- Ensures policy applies to all hazardous facilities, not just 'new' facilities. Re-wording provides clarity to the policy.

Point Number 697.573

Summary of Decision Requested: Amend Policy 10.1.3 Residual risks of hazardous substances heading as follows:

Policy - ~~Residual Assessment of risks of hazardous substances~~

Decision Reasons:

- Headings should be precise and this change provides for identification and assessment of risks.

Point Number 697.574

Summary of Decision Requested: Amend Policy 10.1.4 Reverse sensitivity effects as follows:

- (a) Separate as far as practicable sensitive land use activities from lawfully-established hazardous facilities;
- ~~(b) Separate new hazardous facilities from existing sensitive land use activities; and~~
- ~~(c) Avoid the storage, processing or disposal of hazardous waste in sensitive environments.~~

Decision Reasons:

- This would provide clarity to this policy and support the changes requested under other submission points.

Point Number 697.575

Summary of Decision Requested: Amend Chapter 12 How to use and interpret the rules as follows;

- Add a new heading 12.1 Explanation
- AND
- Amend by renumbering existing 12.1 Introduction to rules to 12.1.1
- AND
- Amend 12.2 Categories of Activities to 12.1.2
- AND
- Amend 12.4 Rule Table to 12.1.3
- AND
- Amend 12.5 How to find out if a resource consent is needed to 12.1.4

AND

Add a new heading 12.2 Rules

AND

Amend 12.3 Additional matters... to 12.2.1

AND

Add a new Rule 12.2.2 Deeming rules for roads.

Decision Reasons:

- This chapter contains a mixture of explanations and actual rules and they need to be organised under two separate sections of the chapter to make it clear which is explanation and which are the rules.

Point Number 697.576

Summary of Decision Requested: **Amend** Rule 18.4.7 Esplanade reserves and esplanade strips heading, as follows:

Subdivision – Esplanade reserves and esplanade strips

Decision Reasons:

- Alignment with other zone chapters.

Point Number 697.577

Summary of Decision Requested: **Amend** Rule 18.4.7 RD1 Esplanade reserves and esplanade strips, as follows:

~~(a) Subdivision must create an esplanade reserve or esplanade strip 20m wide (or other width stated in Appendix 4 (Esplanade Priority Areas) is required to be created and vested in Council from every subdivision where the land is being subdivided is proposed for:~~

~~(i) less than 4ha and within 20m of:~~

~~A. mean high water springs;~~

~~B. the bank of any river whose bed has an average width of 3m or more; or~~

~~C. a lake whose bed has an area of 8ha or more; and~~

~~(ii) 4ha or more and located within 20m of any:~~

~~A. mean high water springs or~~

~~B. a water body identified in Appendix 4 (Esplanade Priority Areas).~~

~~(b) The Council's discretion shall be limited/restricted to the following matters:.....~~

Decision Reasons:

- Improving the clarity of the rule.

Point Number 697.578

Summary of Decision Requested: **Delete** from Rule 18.4.7 Esplanade reserves and esplanade strips, as follows:

~~(iv) Costs and benefits of acquiring the land.~~

Decision Reasons:

- Deletion of a matter of discretion that is inappropriate as it is not an effect that should be considered in a resource consent application.

Point Number 697.579

Summary of Decision Requested: **Amend** the heading for Chapter 19 Business Zone Tamahere, as follows:

Business Zone Tamahere Rules

Decision Reasons:

- For increased clarity.

Point Number 697.580

Summary of Decision Requested: **Amend** Chapter 19 Business Zone Tamahere Rule 19(2), as follows:

The rules that apply to subdivision in the Business Zone Tamahere are contained in Rule 19.4 and the relevant rules in 14 Infrastructure and Energy; and 15 Natural Hazards and Climate Change (Placeholder).

Decision Reasons:

- To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.581

Summary of Decision Requested: **Amend** Rule 19.1.1 Permitted Activities, as follows:

~~(1) The following activities are permitted activities if they meet all the following:~~

~~(a) Activity-specific conditions; and~~

~~(b) Land Use – Effects rules in Rule 19.2 (unless the activity specific rule and/or activity-specific conditions identify a condition(s) that does not apply); and~~

~~(c) Land Use – Building rules in Rule 19.3 (unless the activity specific rule and/or activity-specific conditions identifies a condition(s) that does not apply);~~

~~and~~

~~(e) Activity-specific conditions.~~

Decision Reasons:

- Additional clarity to make it clear how the activity-specific conditions are to be applied.

Point Number 697.582

Summary of Decision Requested: **Amend** Rule 19.1.3 D1 Discretionary Activities, as follows:

Any permitted activity that does not comply with one or more of the activity-specific conditions in Rule 19.1.1

Decision Reasons:

- Consistency with other chapters and additional clarity of the rule.

Point Number 697.583

Summary of Decision Requested: **Amend** Rule 19.1.3 D2 Discretionary Activities Rule, as follows:
Any restricted discretionary activity that does not comply with Rule 19.1.2 RD1.

Decision Reasons:

- Correcting an incorrect term.

Point Number 697.584

Summary of Decision Requested: **Delete** Rule 19.2.1 Noise (1) and consequentially renumber (2) and (3).

Decision Reasons:

- Reduce duplication – this noise rule is adequately covered by points (2) and (3).

Point Number 697.585

Summary of Decision Requested: **Delete** 19.2.1.1 P3 and P4 Noise – General;
AND
Add to Rule 19.2.1.1 (P2) Noise – General; as follows:
P2
(b) Noise measured at the national boundary within any site in the Country Living Zone, must not exceed:
(i) 50dB (LAeq), 7am to 7pm every day;
(ii) 45dB (LAeq), 7pm to 10pm every day; and
(iii) 40dB (LAeq) and 65dB (LAmax), 10pm to 7am every day.
(c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 'Acoustics - Measurement of Environmental Sound' and
(d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 'Acoustic Environmental noise'.
AND
Amend Rule 19.2.1.1 (D1) Noise – General; as follows:
Noise that does not comply with Rule 19.2.1.1 P2, ~~P3 or P4.~~

Decision Reasons:

- To clarify that the conditions are associated with noise and are not an activity in their own right.

Point Number 697.586

Summary of Decision Requested: **Amend** Rule 19.2.1.2 P1 Construction noise, as follows:
(a) Construction noise must ~~not exceed~~ meet the limits in NZS 6803:1999 (Acoustics – Construction Noise); and...

Decision Reasons:

- Additional clarity of the rule – construction noise should not exceed the limits, rather than meet the limits in the NZ Standard.

Point Number 697.587

Summary of Decision Requested: **Amend** Rule 19.2.4 Earthworks, as follows:
P1
(a) Earthworks within a site must meet all of the following conditions:
(i) Earthworks must be located more than 1.5m from a public sewer, open drain, overland flow path or other service pipe;
(ii) Earthworks must not exceed a volume of more than 5000m3 and an area of more than 1,000m2 within a site;
(iii) The height of the resulting cut, filled areas or fill batter face in stable ground, ~~not including any surcharge,~~ does not exceed 1.5m, with a maximum slope of 1:2 (1 vertical to 2 horizontal);
(iv) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
(v) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls.
P2
(a) Earthworks for the purpose of creating a building platform within a site using imported fill material.
P3
(a) Earthworks for purposes other than creating a building platform within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions:
(i) Must not exceed a total volume of 500m3 per site and a depth of 1m;
(ii) The slope of the resulting filled area in stable ground must not exceed maximum slope of 1:2 (1m vertical to 2m horizontal);
(iii) Fill material is setback at least 1.5m from all boundaries;
(iv) Areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
(v) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
(vi) Does not divert or change the nature of natural water flows, water bodies or established drainage paths.
RD1
(a) Earthworks that do not comply with Rule 19.2.4.1 P1 or P3.
(b) Council's discretion is restricted to the following matters:
(i) Amenities values and landscape effects;
(ii) Volume, extent and depth of earthworks;
(iii) Nature of fill material;
(iv) Contamination of fill material;
(v) Location of the earthworks to waterways, significant indigenous vegetation and habitat;
(vi) Compaction of the fill material;
(vii) Volume and depth of fill material;
(viii) Protection of the Hauraki Gulf Catchment Area;
(ix) Geotechnical stability;
(x) Flood risk, including natural water flows and established drainage paths.
(xi) Land instability, erosion and sedimentation; and
(xii) Proximity to underground services and service connections.
~~P4~~
~~Earthworks that do not comply with Rule 19.2.4 P4.~~

Decision Reasons:

- Consistency with the equivalent rule in other chapters. Also enabling the importation of fill for a building platform as a permitted activity.

Point Number 697.588

Summary of Decision Requested: **Amend** Rule 19.2.5 (P1) Earthworks, as follows:

~~(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Business Zone in Table 45.1 contained within Appendix 45 (Hazardous Substances)~~
~~(b) The storage or use of radioactive materials is:~~
~~(i) in approved equipment for medical and diagnostic purposes; or~~
~~(ii) specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.~~

AND

Add Rule 19.2.5 (P2), as follows:

P2.
(a) The storage or use of radioactive materials is:
(i) in approved equipment for medical and diagnostic purposes; or
(ii) specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.

AND

Amend Rule 19.2.5 D1 Earthworks, as follows:
 Any activity that does not comply with Rule 19.2.5 P1 or P2

Decision Reasons:

- Alignment with the rules in other chapters.

Point Number 697.589

Summary of Decision Requested: **Add** a new non-complying activity in Rule 19.2.5 Hazardous Substances, as follows:

NCL
The storage of fuel for retail sale within a service station.

Decision Reasons:

- Include a rule regarding service stations as a non-complying activity.

Point Number 697.590

Summary of Decision Requested: **Amend** Rule 19.2.6.1 P3 (a)(i) and (ii) Signs – General, as follows:

~~(a) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must comply with all of the following conditions:~~
~~(i) It relates to the sale of the site on which it is located;~~
~~(ii) There is no more than +2 signs per agency site;~~

...

Decision Reasons:

- Amend rule for increased clarity.

Point Number 697.591

Summary of Decision Requested: **Delete** Rule 19.2.6.1 P3 (a)(iv) Signs – General.

Decision Reasons:

- Real estate signs often are located within berms.

Point Number 697.592

Summary of Decision Requested: **Amend** Rule 19.2.6.2 P1 Signs - Effects on traffic, as follows:

~~(a) Any sign directed at road users must meet the following conditions:~~

Decision Reasons:

- Amend for additional clarity.

Point Number 697.593

Summary of Decision Requested: **Delete** Rule 19.2.6.2 P1 (a)(vi) Signs - Effects on traffic.

Decision Reasons:

- It is not realistic to require signs to be 130m from the entrance in a Business Town Centre Zone. This would result in clutter and confusion for motorists within the town centre.

Point Number 697.594

Summary of Decision Requested: **Amend** Rule 19.2.7 P1 (a) Outdoor storage, as follows:

~~(a) Outdoor storage of goods or materials must comply with all the following conditions:~~

Decision Reasons:

- Amend for additional clarity.

Point Number 697.595

Summary of Decision Requested:	Amend Rule 18.2.7 P1 Outdoor storage, to include effective screening mechanisms for the outdoor storage of goods, particularly where boundaries are adjoined by Residential, Village or Country Living Zones.
Decision Reasons:	<ul style="list-style-type: none"> Consider whether a close boarded fence or screening planting is the most effective means of ensuring amenity values are retained.
Point Number	697.596
Summary of Decision Requested:	Amend Rule 19.3.1 Height-Building heading, as follows: <i>Height – building <u>general</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with the equivalent rule in other chapters.
Point Number	697.597
Summary of Decision Requested:	Amend the heading to Rule 19.3.2 Buildings, structures, vegetation and objects within an airport obstacle limitation surface, as follows: <i>Buildings, structures, <u>and</u> vegetation and objects within an airport obstacle limitation surface</i>
Decision Reasons:	<ul style="list-style-type: none"> Amend the title to match the rule.
Point Number	697.598
Summary of Decision Requested:	Amend Rule 19.3.2 P1 Buildings, structures, vegetation and objects within an airport obstacle limitation surface, as follows: <i>Any building, structure or vegetation must not protrude through any airport obstacle limitation surface as shown <u>identified on the planning maps and defined in Section F Designation N Waikato Regional Airport</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Amend rule for additional clarity.
Point Number	697.599
Summary of Decision Requested:	Amend Rule 19.3.3 P1 Daylight admission, as follows: <i>Any building must not protrude through a height control plane rising at an angle of 37 degrees commencing at an elevation of 2.5m above ground level at every point of the boundary of a site within the Business Zone Tamahere</i>
Decision Reasons:	<ul style="list-style-type: none"> Amend to delete unnecessary wording.
Point Number	697.600
Summary of Decision Requested:	Amend Rule 19.3.3 RD1 Daylight admission, as follows: <i>(a) Any building that does not comply with Rule 19.3.3 P1. (b) Council's discretion is limited to the following matters: (i) Height of the building; (ii) Design and location of the building; (iii) Extent Level of shading on <u>any other adjacent sites</u>; (iv) Effects on privacy of an other sites; (v) Effects on amenity values of other sites <u>the locality</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> Amend for consistency with other chapters.
Point Number	697.601
Summary of Decision Requested:	Amend Rule 19.3.5 P1 Gross Leasable Floor Area, as follows: <i>(a) Any <u>Every</u> individual tenancy...</i>
Decision Reasons:	<ul style="list-style-type: none"> Improved clarity of the rule.
Point Number	697.602
Summary of Decision Requested:	Amend Rule 19.3.6 P1 Building setbacks, as follows: <i>(a) The <u>Any</u> building must be set back <u>a minimum of at least</u>...</i>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with the equivalent rule in other chapters.
Point Number	697.603
Summary of Decision Requested:	Amend Rule 19.3.6 D1 Building setbacks, as follows: <i>Any building that does not comply with Rule 19.3.6.1 <u>PL</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Correct a rule reference.

Point Number	697.604
Summary of Decision Requested:	Amend Rule 19.4.1 RD1 (b)(ii) Subdivision – Restricted Discretionary Activities, as follows: <i>(ii) Matters referred to in Appendix 3.2.3 Tamahere Business Zone—Development Plan Guidelines;</i>
Decision Reasons:	<ul style="list-style-type: none"> • Correct reference to the appendix.
Point Number	697.605
Summary of Decision Requested:	Amend Chapter 20: Industrial Zone heading, as follows: <i>Chapter 20: Industrial Zone – <u>Rules</u></i>
Decision Reasons:	<ul style="list-style-type: none"> • To assist in clarifying that all of the provisions within the chapter are rules.
Point Number	697.606
Summary of Decision Requested:	Amend Rule Chapter 20 (2), as follows: <i>The rules that apply to subdivision in the Industrial Zone are contained in Rule 20.4 and the relevant rules in 14 Infrastructure and Energy and 15 Natural Hazards and Climate Change. (Placeholder).</i>
Decision Reasons:	<ul style="list-style-type: none"> • To clarify that the rules in Chapter 14 Infrastructure and Energy and Chapter 15 Natural Hazards and Climate Change apply to subdivision as well as to land use activities.
Point Number	697.607
Summary of Decision Requested:	Amend Rule 20.1.1 (1) Permitted Activities, as follows: <i>(g) <u>Activity-specific conditions:</u></i> (b) Land Use – Effects rules in Rule 22.2 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply); (c) Land Use – Building rules in Rule 22.3 (unless the activity <u>specific rule</u> and/or <u>activity-specific</u> conditions identify a condition(s) that does not apply); (c) <u>Activity-specific conditions:</u>
Decision Reasons:	<ul style="list-style-type: none"> • The list of rules (a) – (c) should follow the order that they appear.
Point Number	697.608
Summary of Decision Requested:	Delete the word "Nil" from Rule 20.1.1 P1 Industrial activity the activity specific conditions wording; AND Add to Rule 20.1.1 P1 Industrial activity activity specific conditions, as follows: <i>(a) where the industrial activity adjoins a Residential, Village, Reserve or Country Living Zone on the side or rear boundary of the site, a 3m wide landscaped strip must be provided running parallel with the side and/or rear boundary.</i> <i>(b) where the industrial site contains, or is adjacent to a river or a permanent or intermittent stream, an 8m wide landscaped strip must be provided, measured from the top edge of the closest bank and extending across the entire length of the watercourse.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Currently rule 20.2.2 aims to ensure landscape planting is provided as a controlled activity where an industrial site adjoins a residential, village, country living, reserve or business zone or a river or stream. Having the criteria as a permitted activity is more likely to ensure planting is provided with the development.
Point Number	697.609
Summary of Decision Requested:	Amend Rule 20.1.1 P4(a) Office ancillary to an industrial activity, as follows: <i>(a) Less than 100m² <u>gross floor area</u> etc; or</i>
Decision Reasons:	<ul style="list-style-type: none"> • Including the words "gross floor area" provide clarity.
Point Number	697.610
Summary of Decision Requested:	Amend Rule 20.1.1 P5(a) Food outlet, as follows: <i>(a) Less than 200m² <u>gross floor area</u> etc</i>
Decision Reasons:	<ul style="list-style-type: none"> • Including the words "gross floor area" provide clarity.
Point Number	697.611
Summary of Decision Requested:	Amend Rule 20.1.1 P6(a) Ancillary retail, as follows: <i>(a) Does not exceed 10% <u>gross floor area</u> of all buildings on the site.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Including the words "gross floor area" provide clarity.

Point Number 697.612

Summary of Decision Requested: **Add** a new rule numbered 20.1.2A for "caretaker accommodation" as a restricted discretionary activity, as follows:

20.1.2A Restricted Discretionary Activities

RD1 Caretaker accommodation

(a) Council's discretion is restricted to the following matters:

(i) Purpose of the caretaker accommodation;

(ii) Health and safety of the occupants;

(iii) Noise;

(iv) Amenity.

AND

Consequential amendment to Rule 20.1.3 NCI, as follows:

NCI Any activity that is not listed as a permitted, restricted discretionary, or discretionary activity.

Decision Reasons:

- Caretaker accommodation needs to be provided for as a Restricted Discretionary activity to enable activities that require a caretaker to live on site.

Point Number 697.613

Summary of Decision Requested: **Amend** Rule 20.1.2 D1 Discretionary Activities, to read as follows:

Any permitted activity that does not comply with one or more of the ~~an~~ activity specific conditions in Rule 20.1.1.

Decision Reasons:

- Consistency with other chapters and additional clarity of the rule.

Point Number 697.614

Summary of Decision Requested: **Delete** Rule 20.1.2 D2 Discretionary Activities.

Decision Reasons:

- This rule is not needed as it refers to Land Use Effects and Land Use Building rules which are in subsequent parts of the chapter.

Point Number 697.615

Summary of Decision Requested: **Amend** Rule 20.2.1 P1 Servicing and hours of operation, to read as follows:

Servicing and operation of an industrial activity adjoining any Residential, Village or Country Living Zone ~~may~~ **must** load or unload vehicles or receive customers or deliveries between ~~7:30am-6:00am and 6:30pm-8:00pm~~

Decision Reasons:

- The word "must" is more definite than "may". Hours of operation need to reflect more realistic business hours, particularly where sites are close to Auckland.

Point Number 697.616

Summary of Decision Requested: **Delete** Rule 20.2.2 Landscape planting.

Decision Reasons:

- Planting adjoining sensitive zones should be a condition for a permitted activity to occur. Where this is not complied with, a Discretionary Activity consent would be required.

Point Number 697.617

Summary of Decision Requested: **Amend** Rule 20.2.3.1 P2 Noise – General, as follows:

(a) Noise measured within any other site:

(i) In an Industrial Zone must not exceed:

A. 75dB (LAeq) 7am to 10pm; and

B. 55dB (LAeq) and 85dB (LAmax) 10pm to 7am the following day.

(b) Noise measured within any site in any other zone, other than the Industrial Zone and the Heavy Industrial Zone, must meet the permitted noise levels for that zone.

(c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound".

(d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics Environmental noise".

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.618

Summary of Decision Requested: **Delete** Rule 20.2.3.1 P3 Noise – General;

AND

Make consequential amendments to Rule 20.2.3.1 D1 Noise – General to delete reference to P3 and P4, as follows:

D1~~2~~

Noise that does not comply with Rule 20.2.3.1 P2-~~P3 or P4~~.

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.619

Summary of Decision Requested:	Amend Rule 20.2.3.2 P1(a) Noise – Construction , as follows: (a) Construction noise must not exceed <u>meet</u> the limits in NZS 6803:1999 (Acoustics – Construction Noise);
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity of the rule. Construction noise should not exceed the limits, rather than meet the limits in the NZS.
Point Number	697.620
Summary of Decision Requested:	Amend Rule 20.2.4 P1 Glare and Artificial Light Spill , to read as follows: <u>Illumination from glare and artificial light spill must not exceed 10 lux measured horizontally and vertically within any other-site zoned Residential, Village or Country Living.</u>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of wording with other zone chapters. It is more important to control light spill in the Residential, Village or Country Living zones than other zones.
Point Number	697.621
Summary of Decision Requested:	Amend Rule 20.2.5 Earthworks (1) , as follows: (1) Rule 20.2.5 – Earthworks General, provides the permitted rules for earthworks activities for the Industrial Zone. <u>This rule does not apply in those areas specified in Rule 20.2.5.1A, 20.2.5.2 and 20.2.5.3</u>
Decision Reasons:	<ul style="list-style-type: none"> The wording of the rule does not make it clear that the rules specified in 20.2.5(2) apply instead of the general earthworks rule.
Point Number	697.622
Summary of Decision Requested:	Amend Rule 20.2.5.1 P1(a) Earthworks – General , as follows: (a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions: (i) be located more than 1.5 m horizontally from any waterway, open drain or overland flow path; (ii) not exceed a volume of more than 250500m3 <u>and an area of more than 10,000m2 over any single consecutive 12 month period;</u> (iii) not exceed an area of more than 1000 + 10,000m2 over any single consecutive 12 month period; (iv) the total depth of any excavation or filling does not exceed 1.5m above or below ground level; (v) the slope of the resulting cut, filled areas or fill batter face in stable ground, does not exceed a maximum of 1:2 (1 vertical to 2 horizontal); (vi) earthworks are set back <u>at least</u> 1.5m from all boundaries; (vii) areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks; (viii) sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls; and (ix) do not divert or change the nature of natural water flows, water bodies or established drainage paths.
Decision Reasons:	<ul style="list-style-type: none"> The volume threshold in (ii) and area threshold in (iii) have been entered in error. They need to be corrected to enable significantly larger volumes of earthworks as permitted activities within the Industrial Zone. The rule needs to apply over a single consecutive 12 month period for both volume and area thresholds. This is also consistent with other zone chapters. The words “single” and “at least” provide clarity to the rule.
Point Number	697.623
Summary of Decision Requested:	Amend Rule 20.2.5.1 P2 Earthworks – General , as follows: (a) Earthworks for the purpose of creating a building platform for residential purposes within a site, using imported fill material. must meet the following conditions: (i) be carried out in accordance with NZS 4431:1989 Code of Practice for Earth Fill for Residential Development
Decision Reasons:	<ul style="list-style-type: none"> The NZS 4431:1989 Code of Practice for Earth Fill for Residential Development does not apply to industrial sites.
Point Number	697.624
Summary of Decision Requested:	Amend Rule 20.2.5.1 P3 Earthworks – General , as follows: (a) Earthworks for purposes other than creating a building platform for residential purposes within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions: (i) not exceed a total volume of 500m3; (ii) not exceed a depth of 1m; (iii) the slope of the resulting filled area in stable ground must not exceed a maximum slope of 1:2 (1 vertical to 2 horizontal); (iv) fill material is setback <u>at least</u> 1.5m from all boundaries; (v) areas exposed by filling are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks; (vi) sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls; and (iii) do not divert or change the nature of natural water flows, water bodies or established drainage paths.
Decision Reasons:	<ul style="list-style-type: none"> In respect to (a), building platforms in the industrial zone are not for residential purposes. In respect to (a)(iv), the words “at least” provide clarity to the rule.
Point Number	697.625
Summary of Decision Requested:	Amend Rule 20.2.5 Earthworks (2) , as follows: There are specific standards for earthworks within rules: (a) <u>Rule 20.2.5.1A – Earthworks within the National Grid Yard</u> (e) <u>Rule 20.2.5.2 Earthworks – Within Significant Natural Areas;</u> (b) <u>Rule 20.2.5.3 Earthworks – Within Landscape and Natural Character Areas.</u> AND Add new rule after Rule 20.2.5.1 Earthworks-General as follows: <u>20.2.5.1A Earthworks within the National Grid Yard</u> <u>P1</u> (a) <u>The following earthworks within the National Grid Yard:</u> (i) <u>Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway.</u>

(ii) Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;
(iii) Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P2

(a) Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:
(i) Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and
(ii) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.

P3

(a) Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:
(i) Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;
(ii) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;
(iii) Do not compromise the stability of a National Grid support structure;
(iv) Do not result in the loss of access to any National Grid support structure; and
(v) Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

RDI

(a) Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 20.2.5.1A P1, P2 or P3.
(b) Discretion is restricted to:
(i) Impacts on the operation, maintenance, upgrading and development of the National Grid;
(ii) The risk to the structural integrity of the affected National Grid support structure(s);
(iii) Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;
(iv) The risk of electrical hazards affecting public or individual safety, and the risk of property damage.

Decision Reasons:

- Replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 20 (where these are relevant to the Industrial Zone) for increased clarity and usability of the Plan.

Point Number

697.626

Summary of Decision Requested:

Amend Rule 20.2.5.2 P1 Earthworks – within Significant Natural Areas, as follows:

- (i) Earthworks are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area and must meet all of the following conditions:
(ii) Maximum volume of 50m³ in a single consecutive 12 month period;
(iii) Maximum area of 250m² in a single consecutive 12 month period; and
(iv) Not include importing any fill material.
(v) The total depth of any excavation or filling does not exceed 1.5m above or below ground level with a maximum slope of 1:2 (1 vertical to 2 horizontal);
(vi) Earthworks are setback at least 1.5m from all boundaries;
(vii) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
(viii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
(ix) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- Wording provides clarity and consistency with other chapters.

Point Number

697.627

Summary of Decision Requested:

Delete the table in Rule 20.2.5.3 P1 (ii) Earthworks - Landscape and Natural Character Areas;
AND

Amend Rule 20.2.5.3 P1 (a) Earthworks - Landscape and Natural Character Areas, as follows:

- (a) Earthworks are for the maintenance of existing tracks, fences or drains within the following landscapes, natural features and natural character areas:
(i) Significant Amenity Landscape (SAL) – sand dune
(ii) High Natural Character area
(iii) Outstanding Natural Character area of the coastal environment
(iv) Outstanding Natural feature – sand dune
(v) Outstanding Natural feature
(vi) Outstanding Natural landscapes
~~an identified Landscape or Natural Character Area and must meet all of the following conditions;~~
(vii) The earthworks are undertaken within a single consecutive 12 month period;
(viii) The earthworks must not exceed the following areas and volumes: an area of 50m³ and a volume of 250m² within a single consecutive 12 month period.

Decision Reasons:

- The additional wording provides clarification as to which areas are being encompassed by this rule and sets out the volume and area thresholds more clearly.

Point Number

697.628

Summary of Decision Requested:

Amend Rule 20.2.6 C1 (b) Hazardous Substances B, as follows:

B. interaction with natural hazards (flooding, instability), as applicable and proposed emergency management planning (spills, fire and other relevant hazards);

Decision Reasons:

- Wording provides clarity to the rule.

Point Number

697.629

Summary of Decision Requested:

Add a new Rule 20.2.6 NCI Hazardous Substances:

NCI Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 (where it is relevant to the Industrial Zone) into Chapter 20 for increased clarity and usability of the Plan.

Point Number

697.630

Summary of Decision Requested:

Amend Rule 20.2.7.1 P2 Signs – General, as follows:

- (a) A sign must comply with all of the following conditions:
(i) The sign height does not exceed 10m;
(ii) The sign is wholly contained on the site;

(iii) An illuminated sign must:
 A. not have a light source that flashes or moves; and
 B. not contain moving parts or reflective materials; and
 C. be set back at least 1.5m from a state highway or the Waikato Expressway;
 (b) Where the sign is attached to a building, it must:
 (i) not extend more than 300mm from the building wall; and
 (ii) not exceed the height of the building;
 (c) Where the sign is a freestanding sign, it must:
 (i) not exceed an area of 3m² for one sign per site, and 1 m² for any other freestanding sign on the site; and
 (ii) be set back at least 5m from the boundary of any site within a Residential, Village or Country Living Zone;
 (d) The sign is not attached to a heritage item listed in Schedule 30.1 (Heritage Items), except for the purpose of identification and interpretation;
 (e) The sign is ~~for the purpose of identification and interpretation not attached to~~ of a Maori site of significance listed in Schedule 30.3 (Maori Sites of Significance), ~~except for the purpose of identification and interpretation~~;
 (f) The sign relates to:
 (i) goods or services available on the site; or
 (ii) a property name sign.

Decision Reasons:

- The additional wording provides clarification.

Point Number 697.631

Summary of Decision Requested: Amend Rule 20.2.7.1 P3 Signs – General, as follows:

(a) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must comply with all of the following conditions:
 (i) ~~The sign relates to the site on which it is located;~~
 (ii) There is no more than +2 signs per site/agency;
 (iii) The sign is not illuminated;
 (iv) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;
 (v) ~~The sign does not project into or over road reserve.~~

Decision Reasons:

- The additional wording provides clarification. In respect to condition (v), this is not a condition as the Residential Zone provisions do not apply to the road reserve.

Point Number 697.632

Summary of Decision Requested: Amend Rule 20.2.7.2 P1 (a) Permitted Activities, as follows:

(a) Any sign directed at road users must meet the following conditions:

Decision Reasons:

- The additional wording provides clarification.

Point Number 697.633

Summary of Decision Requested: Amend Rule 20.2.8 P1 (a)(vi) Outdoor storage of goods or materials, as follows:

(vi) be screened from any public road, public reserve and adjoining site in another zone, other than the Heavy Industrial Zone, by either of the following:
 A. a landscaped strip consisting of plant species that achieve a minimum height of 1.8m at maturity; or
 B. a close-boarded or solid fence or wall to a height of 1.8m.

AND

Add new condition as P1 (a)(vii) Outdoor storage of goods or materials as follows:
 (vii) complies with rule 20.3.3 (daylight admission).

Decision Reasons:

- The additional wording in (vi) provides clarification. New (vii) provides cross referencing to the daylight admission rule which is also relevant.

Point Number 697.634

Summary of Decision Requested: Amend Rules 20.2.8(a)(vi) Outdoor storage of goods or materials A and B, to ensure the condition is enforceable and satisfies a section 32 evaluation.

Decision Reasons:

- Council has concerns that these rules do not achieve good planning outcomes.
- They are problematic rules that have issues in their practical application on industrial sites.
- These rules need further investigation and refinement to ensure the condition is enforceable and satisfies a section 32 evaluation.

Point Number 697.635

Summary of Decision Requested: Amend Rule 20.2.9 Indigenous vegetation clearance inside a Significant Natural Area heading, as follows:

Indigenous vegetation clearance ~~inside~~ within a Significant Natural Area

Decision Reasons:

- Wording provides clarity.

Point Number 697.636

Summary of Decision Requested: Add to Rule 20.2.9 P1 (a) Indigenous vegetation clearance inside a Significant Natural Area, as follows:

(vi) Removing vegetation for conservation activities.

Decision Reasons:

- This new rule ensures indigenous vegetation can be cleared for conservation activities.

Point Number 697.637

Summary of Decision Requested: **Amend** Rule 20.2.9 (P2) Indigenous vegetation clearance inside a Significant Natural Area, as follows:
Removal of up to 5m3 of manuka and/or kanuka outside of the Coastal Environment per year per ~~property site~~ for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

Decision Reasons:

- Additional clarity that the rule is intended to apply "per site" rather than "per property" which is not a defined term.

Point Number 697.638

Summary of Decision Requested: **Delete** Rule 20.2.9 Rule P5 Indigenous vegetation clearance inside a Significant Natural Area;
AND
Make consequential change to Rule 20.2.9 Discretionary Activities Rule D1 as follows:
... P4, ~~P5~~ or P6.

Decision Reasons:

- Rule P5 duplicates P1 with the only difference being that P5 captures Maaori Freehold land or Maaori Customary land, which is captured by P1 anyway.

Point Number 697.639

Summary of Decision Requested: **Delete** Rule 20.2.9 Rule P6 Indigenous vegetation clearance inside a Significant Natural Area;
AND
Make consequential change to Rule 20.2.9 Discretionary Activities Rule D1 as follows:
"...P4 ~~or P5 or~~ P6."

Decision Reasons:

- The activity is a repeat of P2.

Point Number 697.640

Summary of Decision Requested: **Amend** Rule 20.3.1 Building height heading, as follows:
Height – Building General height

Decision Reasons:

- Consistency with other zone chapters.

Point Number 697.641

Summary of Decision Requested: **Amend** Rule 20.3.1 P1(a) Building height, as follows:
(i) ~~+5~~20m; or

Decision Reasons:

- Council would like consistency in building height between the heavy industrial and the industrial zones.

Point Number 697.642

Summary of Decision Requested: **Amend** Rule 20.3.3 P1 Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:
Any building, structure or vegetation must not protrude through ~~on~~ the airport obstacle limitation surface as ~~shown~~ identified on the planning maps and defined in Section E Designation N - Waikato Regional Airport.

Decision Reasons:

- This rule relates only to the Waikato Regional Airport and needs to specifically identify this. Additional wording provides clarity to the rule.

Point Number 697.643

Summary of Decision Requested: **Amend** Rule 20.3.3 NCI Daylight Admission, to be changed to D1 as follows:
~~NCI-D1~~
Any building, structure or vegetation that does not comply with Rule 20.3.3. P1

Decision Reasons:

- Additional wording provides clarity to the rule. Activity status to be more consistent with other zone chapters.

Point Number 697.644

Summary of Decision Requested: **Amend** Rule 20.3.3 Daylight admission to be Rule 20.3.4;
AND
Undertake consequential renumbering of subsequent rules within the Industrial Zone Chapter.

Decision Reasons:

- Needs to be renumbered to avoid confusion with duplicated numbering.

Point Number 697.645

Summary of Decision Requested: **Amend** Rule 20.3.3 P1(a)(i) Daylight Admission, as follows:

(i) 45 degrees commencing at an elevation of 2.5m above ground level at any boundary of the Industrial Zone with any ~~other Residential, Village, Reserve, Business or Country Living Zone~~;

Decision Reasons:

- Provides clarity that we are referring to these specific zones.

Point Number 697.646

Summary of Decision Requested: Amend Rule 20.3.3 P1(a)(ii) Daylight Admission, as follows:

(ii) 37 degrees commencing at an elevation of 2.5m above ground level at any boundary of the Industrial Zone with any other zone between south-east or south-west of the building or stockpile of goods or materials.

Decision Reasons:

- Provides clarity that this rule includes stockpiles of goods and materials.

Point Number 697.647

Summary of Decision Requested: Add to Rule 20.3.4 Building setbacks by new clause (3), as follows:

(3) Rule 20.3.4.3 Buildings and structures within the National Grid Yard

AND

Add the following rule into Chapter 20, after Rule 20.3.4.2:
20.3.4.3 Buildings and structures within the National Grid Yard

P1

(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:

(i) Not involve an increase in the building height or footprint;

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions;

P2

(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.

P3

Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

NC1

Any building alterations or additions within the National Grid Yard that does not comply with Rule 20.3.4.3 P1.

NC2

Any new buildings or structures within the National Grid Yard that does not comply with Rule 20.3.4.3 P2 or P3.

Decision Reasons:

- Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 20 (where this is relevant to the Industrial Zone) for increased clarity and usability of the Plan.

Point Number 697.648

Summary of Decision Requested: Add to Rule 20.3.4 Building setbacks a new clause (4), as follows:

(4) Rule 20.3.4.4 Building setback – Sensitive land uses

AND

Add the following rule into Chapter 20 after new Rule 20.3.4.4:

20.3.4.4 Building setback - Sensitive land uses

P1

(a) Any building for a sensitive land use must be set back a minimum of:

(i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;

(ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.

P2

(a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:

(i) Not increase the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

D1

Any building for a sensitive land use that does not comply with Rule 20.3.4.4 P1.

NC1

Any activity within the National Grid Yard that does not comply with Rule 20.3.4.4 P2.

NC2

Any new building for a sensitive land use within the National Grid Yard.

NC3

Any change of use of an existing building to a sensitive land use within the National Grid Yard.

NC4

The establishment of any new sensitive land use within the National Grid Yard.

Decision Reasons:

- Replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 20 (where this is relevant to the Industrial Zone) for increased clarity and usability of the Plan.

Point Number 697.649

Summary of Decision Requested: Amend Rule 20.3.4.1 Building setbacks heading, as follows:

(i) Building setbacks – All boundaries

Decision Reasons:

- Consistency with the heavy industrial zone and other zones.

Point Number 697.650

Summary of Decision Requested: Delete Rule 20.3.4.2 P3 Building setback – water bodies.

Decision Reasons:

- This rule is not required. Consistency equivalent rules in other chapters.

Point Number 697.651

Summary of Decision Requested: Amend Rule 20.3.4.2 P4 Building setback – water bodies, to read as follows:

A public amenity of up to 25m², or a pump shed (public or private), within any building setback identified in Rule 20.3.4.2 P1, P2 or P3.

Decision Reasons:

- The words “public or private” clarify that the pump shed is both private and public.

Point Number 697.652

Summary of Decision Requested: Amend Rule 20.3.4.2 Building setback – water bodies, as follows:

P1

(a) A building must be set back a minimum of ~~20-27.5m~~ from:

(i) the margin of any:

A. lake;

B. wetland; and

C. river bank, other than the Waikato River and Waipa River.

P2

A building must be set back at least ~~50-22.5m~~ from a bank of the Waikato River and Waipa River.

Decision Reasons:

- Amend the rule so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.653

Summary of Decision Requested: Amend Rule 20.3.5.3 RD1 (b) All heritage items – alteration or addition, as follows:

(a) Council's discretion ~~is~~ shall be restricted to the following matters:

Decision Reasons:

- Consistency equivalent rules in other chapters.

Point Number 697.654

Summary of Decision Requested: Amend Rule 20.3.5.3 P1 All heritage items – alteration or addition, as follows:

(a) Alteration ~~or~~ addition to a heritage item listed in Schedule 30.1 (Heritage Items) must comply with the following conditions:

Decision Reasons:

- Deletion of a word in this rule to provide clarity and consistency with the defined term.

Point Number 697.655

Summary of Decision Requested: Amend Rule 20.3.5.4 RD1 (a) All heritage items – maintenance or repair, as follows:

(a) ~~Any activity.~~ Maintenance or repair of a heritage item that does not comply with Rule 20.3.5.4 P1.

Decision Reasons:

- Consistency equivalent rules in other chapters.

Point Number 697.656

Summary of Decision Requested: Amend Rule 20.3.5.4 RD1 (b) All heritage items – maintenance or repair, as follows:

(b) Council's discretion ~~is~~ shall be restricted to the following matters:

Decision Reasons:

- Consistency of the rules.

Point Number 697.657

Summary of Decision Requested: Amend Rule 20.4 Subdivision heading, as follows:

20.4 Subdivision Rules

Decision Reasons:

- To provide clarity to the heading.

Point Number 697.658

Summary of Decision Requested: Amend Rule 20.4 Subdivision (1) and (2) as follows:

(1) Rule 20.4.1 – General provides for subdivision density within the Industrial Zone.

(2) Other subdivision provisions are contained in Rule 20.4.1 is also subject to compliance with the following rules:

(a)
...
(e)...

Decision Reasons:

- To provide clarity that the general subdivision rule must also comply with rules 20.4.2 – 20.4.6.

Point Number 697.659

Summary of Decision Requested: **Add** to Rule 20.4 Subdivision (2) clause (f), as follows:

~~(f) Rule 20.4.6 – Subdivision of land containing a Significant Natural Area-Subdivision of land within the National Grid Corridor~~
And consequential renumbering

AND

Add new rule after Rule 20.4.6:
20.4.6 Subdivision - within the National Grid Corridor

RD1

(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions:
(i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and
(ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.
(b) Council's discretion is restricted to the following matters:
(i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;
(ii) The ability to provide a complying building platform outside of the National Grid Yard;
(iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;
(iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.
NCL
Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 20.4.6 RD1.

Decision Reasons:

- Replicate the subdivision rule within the National Grid Corridor from Chapter 14 into Chapter 20 (where this is relevant to the Industrial Zone) for increased clarity and usability of the Plan.

Point Number 697.660

Summary of Decision Requested: **Amend** Rule 20.4.1 (RD1) Subdivision - General, as follows:

(a) Subdivision must comply with all of the following conditions:
(i) ~~proposed lots-~~The record of title to be subdivided must have a minimum net site area of 1000m²;
(ii) all proposed lots must have an average net site area of at least 2000m²; and
(iii) the number of rear lots created by the subdivision does not exceed ~~no more than 20% rear lots are created.~~
(b) Council's discretion is restricted to the following matters:
(i) the extent to which a range of future industrial activities can be accommodated; and
(ii) amenity values.

Decision Reasons:

- Consistency with equivalent rules in other chapters and additional clarity of the rule.

Point Number 697.661

Summary of Decision Requested: **Add** new Discretionary Activities Rule D1 to 20.4.1 Subdivision - General, as follows:

D1
Subdivision that does not comply with Rule 20.4.1 RD1.

Decision Reasons:

- Lacking a rule cascade upon non compliance with the RD1 rule.

Point Number 697.662

Summary of Decision Requested: **Amend** Rule 20.4.2 Subdivision - Boundaries for Record of Title heading, as follows:

20.4.2 Subdivision – Existing buildings Boundaries for Records of Title

Decision Reasons:

- Boundaries for Records of Title is not the correct term to use for this rule heading. The change makes it clear that the rule is about existing buildings.

Point Number 697.663

Summary of Decision Requested: **Amend** Rule 20.4.2 RD1(a) Subdivision – Boundaries for Records of Title, as follows:

(a) Any boundary of a proposed lot must be located so that:
(i) existing buildings comply with the permitted activity rules relating to setbacks (rule 20.3.4.1) and daylight admission (rule 20.3.3), except to the extent of any non-compliance that existed lawfully prior to the subdivision; and
~~(ii) no contaminated land, heritage item, archaeological site, or wetland is divided between any proposed lot-~~
(b) Council's discretion is restricted to:
(i) Amenity values;
~~(ii) effects on contaminated land;~~
~~(iii) effects on any heritage item;~~
~~(iv) effects on any wetland;~~
~~(v) effects on any archaeological site; and~~
~~(vi) (i) the extent to which a range of future industrial activities can be accommodated.~~

Decision Reasons:

- The rule must relate to existing buildings, not contaminated land which is covered already under the NES. Heritage items, archaeological sites and wetlands are covered under separate rules.

Point Number 697.664

Summary of Decision Requested: **Add** to Rule 20.4.2 Subdivision - Boundaries for Records of Title, as follows:

DI

Subdivision that does not comply with Rule 20.4.2 RDI.

Decision Reasons:

- DI is an omission and needs to be reinstated to enable a complete rule cascade.

Point Number

697.665

Summary of Decision Requested:

Add to Rule 20.4.3 Subdivision - Road Frontage, as follows:

DI

Subdivision that does not comply with Rule 20.4.3 RDI.

Decision Reasons:

- The rule is incomplete without a rule cascade upon non-compliance with a condition of the restricted discretionary rule.

Point Number

697.666

Summary of Decision Requested:

Amend Rule 20.4.3 RDI (a) Subdivision - Road Frontage, as follows:

(a) ~~Any~~ Every proposed lot ~~with a road boundary, other than any access or utility allotment, right of way or access leg, must have a width along the road frontage boundary of at least 15m.~~

(b) ~~Rule 20.4.3 (a) does not apply to any proposed rear lot or to a proposed access allotment. Council's discretion is restricted to the following matters:~~

- (i) ~~traffic effects, safety and efficiency of vehicle access and road network; and~~
- (ii) ~~amenity and streetscape.~~

Decision Reasons:

- Proposed change provides clarity to the rule.

Point Number

697.667

Summary of Decision Requested:

Amend Rule 20.4.4 RDI Subdivision - Esplanade Reserves and Esplanade Strips, as follows:

(a) ~~Subdivision must create an~~ esplanade reserve or ~~esplanade strip~~ 20m wide (or other width stated in Appendix 4 (Esplanade Priority Areas) is required to be created and vested in Council from every subdivision where the land being subdivided is proposed to:

(i) less than 4ha and within 20m of any:

- A. mean high water springs;
- B. bank of any river whose bed has an average width of 3m or more; or
- C. a lake whose bed has an area of 8ha or more; or

(ii) 4ha or more and ~~located~~ within 20m of any:

- A. mean high water springs; or
- B. a water body identified in Appendix 4 (Esplanade Priority Areas).

(b) Council's discretion ~~shall be restricted to the following matters:~~

Decision Reasons:

- Consistency with equivalent rules in other chapters.

Point Number

697.668

Summary of Decision Requested:

Delete Rule 20.4.4(b) (vi) Subdivision - Esplanade Reserves and Esplanade Strips;

AND

Consequential amendment to Rule 20.4.4 RDI (b)(v) Subdivision - Esplanade Reserves and Esplanade Strips as follows:

(v) ~~Works required prior to vesting any reserve in the Council, including pest plant control, boundary fencing and the removal of structures and debris; and~~

Decision Reasons:

- This matter of discretion is not appropriate.

Point Number

697.669

Summary of Decision Requested:

Amend Rule 20.4.5 RDI Subdivision of land containing a heritage item, as follows:

(a) ~~the boundaries of every proposed lot must not divide any of the following;~~

(i) ~~Subdivision of land containing a heritage item listed in Schedule 30.1 (Heritage Items) where the heritage item is wholly contained within one lot;~~

(ii) ~~Maori sites of significance as identified in Schedule 30.3 (Maori sites of significance).~~

(iii) ~~Maori areas of significance as identified in Schedule 30.4 (Maori areas of significance).~~

(b) Council's discretion is restricted to the following matters:

- (i) effects on heritage values;
- (ii) context and setting of the heritage item; and
- (iii) the extent to which the relationship of the heritage item with its setting is maintained.

Decision Reasons:

- Additional wording provides clarity to rule and insert the matters removed from Rule 20.4.2.

Point Number

697.670

Summary of Decision Requested:

Delete Rule 20.4.6 Subdivision - Significant Natural Areas.

Decision Reasons:

- This rule is not required in the Industrial Zone.

Point Number

697.671

Summary of Decision Requested:

Amend Rule 20.5.2 P5 Permitted Activities, as follows:

~~A retail activity that is ancillary to any permitted activity.~~

Decision Reasons:

- The conditions for a retail activity are specified in (a) and (b) of the activity-specific conditions and are therefore not required.

Point Number 697.672

Summary of Decision Requested: **Amend** Rule 20.5.2 P6 One dwelling per lot for a caretaker or security personnel, as follows:
~~Caretaker accommodation One dwelling per lot for a caretaker or security personnel~~

Decision Reasons:

- Definition amended to include one residential unit.

Point Number 697.673

Summary of Decision Requested: **Amend** Rule 20.5.2 Permitted Activities Rule P8, as follows:
Nil
~~(a) contained in a building or outdoor enclosure~~

Decision Reasons:

- This condition is a duplication of the activity and not necessary.

Point Number 697.674

Summary of Decision Requested: **Delete** Rule 20.5.3 D2 Discretionary Activities.

Decision Reasons:

- Non-compliance with an effects or building rule will be managed by those respective rules and there is no need for this rule.

Point Number 697.675

Summary of Decision Requested: **Amend** Rule 20.5.6 P2(a)(i) Noise – General, as follows:
~~(i) 65dB (LA+0.5g)~~ at all times within any other site in the Industrial Zone; and

Decision Reasons:

- The LA10 standard for measuring noise is incorrect and should refer to LAeq.

Point Number 697.676

Summary of Decision Requested: **Delete** Rule 20.5.7 P1 (a) (vii) Signs – General.

Decision Reasons:

- The District Plan cannot control signs within the road reserve.

Point Number 697.677

Summary of Decision Requested: **Delete** from Rule 20.5.7 P1 (a) Signs - General conditions (ii) and (vii).

Decision Reasons:

- Council cannot support conditions (ii) and (vii) due to the impracticality of these rules.

Point Number 697.678

Summary of Decision Requested: **Amend** Chapter 21 Industrial Zone Heavy heading, as follows:
~~Chapter 21: Industrial Zone Heavy – Rules~~

Decision Reasons:

- To assist in clarifying that all of the provisions within the chapter are rules.

Point Number 697.679

Summary of Decision Requested: **Amend** Rule 21 (2) Industrial Zone Heavy, as follows:
~~The rules that apply to subdivision in the Industrial Zone Heavy are contained in Rule 21.4 and the relevant rules in 14 Infrastructure and Energy; and 15 Natural Hazards and Climate Change. (Placeholder).~~

Decision Reasons:

- To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.680

Summary of Decision Requested: **Amend** Rule 21.1.1 (1) Permitted Activities, as follows:
~~(a) Activity specific conditions;
(b) Land Use – Effects rules in Rule 21.2 (unless the activity specific rule and/or activity specific conditions identify a condition(s) that does not apply); and
(c) Land Use – Building rules in Rule 21.3 (unless the activity rule and/or activity specific conditions identify a condition(s) that does not apply).~~

Decision Reasons:

- Insert Activity specific conditions into the list, as this was omitted. The list of rules (a) – (c) should follow the order that they appear.

Point Number 697.681

Summary of Decision Requested: **Delete** the words "Nil" from Rule 21.1.1 P1 Industrial Activity;
AND
Amend Rule 21.1.1 P1 Industrial Activity, as follows:
(a) where the industrial activity adjoins a Residential, Village, Reserve or Country Living Zone on the side or rear boundary of the site, a 3m wide landscaped strip must be provided running parallel with the side and/or rear boundary.
(b) where the industrial site contains, or is adjacent to a river or a permanent or intermittent stream, an 8m wide landscaped strip must be provided, measured from the top edge of the closest bank and extending across the entire length of the watercourse.

Decision Reasons:

- Currently rule 21.2.2 aims to ensure landscape planting is provided as a controlled activity where an industrial site adjoins a Residential, Village, Country Living, Reserve Zone or a river or stream. Having the criteria as a permitted activity is more likely to ensure planting is provided with the development.

Point Number 697.682

Summary of Decision Requested: **Amend** Rule 21.1.1 P4 (a) and (b) Office ancillary to an industrial activity, as follows:
(a) Less than 100m2 gross floor area efer, or
(b) Does not exceed 30% of all buildings on the site.

Decision Reasons:

- Including the words "gross floor area" provides clarity.

Point Number 697.683

Summary of Decision Requested: **Amend** Rule 21.1.1 P5 (a) Food outlet, as follows:
(b) Less than 200m2 gross floor area efer-

Decision Reasons:

- Including the words "gross floor area" provide clarity.

Point Number 697.684

Summary of Decision Requested: **Add** a new Restricted Activities Rule after Rule 21.1.1 "Caretaker accommodation", as follows:
21.1.1A Restricted Discretionary Activities
RD1 Caretaker accommodation
(b) Council's discretion is restricted to the following the matters:
(i) Purpose of the caretaker accommodation;
(ii) Health and safety of the occupants;
(iii) Noise;
(iv) Amenity.
AND
Make consequential amendment to Rule 21.1.3 NCI as follows:
Any activity that is not listed as a permitted, restricted discretionary, or discretionary activity.

Decision Reasons:

- Caretaker accommodation needs to be provided for as a Restricted Discretionary activity to enable activities that require a caretaker to live on site.

Point Number 697.685

Summary of Decision Requested: **Delete** the existing wording in Rule 21.1.2 Discretionary Activities D1 and replace with the following wording:
Any permitted activity that does not comply with one or more of the activity specific conditions in Rule 21.1.2

Decision Reasons:

- This rule is not needed as it refers to Land Use Effects and Land Use Building rules which are in subsequent parts of the chapter. Replacement wording provides Consistency with other chapters and additional clarity of the rule.

Point Number 697.686

Summary of Decision Requested: **Amend** Rule 21.2.1 P1 Servicing and hours of operation, as follows:
Servicing and operation of an industrial activity adjoining any Residential, Village or Country Living Zone may must load or unload vehicles and/or receive customers or deliveries between ~~7:30am-6:00am~~ and ~~6:30pm-8:00pm~~.

Decision Reasons:

- The word "must" is more definite than "may". Hours of operation need to reflect more realistic business hours, particularly where sites are close to Auckland.

Point Number 697.687

Summary of Decision Requested: **Delete** Rule 21.2.2 Landscape planting.

Decision Reasons:

- Planting adjoining sensitive zones should be a condition for a permitted activity to occur. Where this is not complied with a Discretionary Activity consent would be required.

Point Number 697.688

Summary of Decision Requested: **Amend** Rule 21.2.3.1 P2 Noise - General, as follows:

(a) Noise measured within any other site...
(viii) In an Industrial Zone must not exceed:
A. 75dB (LAeq) 7am to 10pm; and
B. 55dB (LAeq) and 85dB (LAmax) 10pm to 7am the following day...
(b) Noise measured within any site in any other zone, other than the Industrial Zone and the Heavy Industrial Zone, must meet the permitted noise levels for that zone.
(c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound".
(d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics Environmental noise".

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.689

Summary of Decision Requested: **Delete** Rule 21.2.3.1 P3 Noise - General.

AND

Make consequential amendments to RD1(a) as follows:

Noise that does not comply with Rule 21.2.3.1 P2, ~~P3~~ or P4

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.690

Summary of Decision Requested: **Delete** Rule 21.2.3.1 P4 Noise - General;

AND

Make consequential amendments to RD1(a), as follows:

Noise that does not comply with Rule 21.2.3.1 P2, P3 ~~or P4~~

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.691

Summary of Decision Requested: **Delete** Rule 21.2.3.2 P3 and P4 Noise Huntly Power Station;

AND

Amend Rule 21.2.3.2 P2 Noise – Huntly Power Station, as follows:

(a) Noise measured at the national boundary within any site in the Rural Zone must not exceed:
(i) 55dB (LAeq) 7am to 10pm; and
(ii) 45dB (LAeq) and 75dB (LAmax) 10pm to 7am the following day.
(b) Noise measured within any other site in the Residential Zone must meet the permitted noise levels for that zone.
(c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound".
(d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics Environmental Noise".

AND

Make consequential amendments as follows:

RD1(a) Noise that does not comply with Rule 21.2.3.1 P1 or P2,

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.692

Summary of Decision Requested: **Amend** Rule 21.2.3.3 P1(a) Noise - Construction, as follows:

(a) Construction noise must not exceed, meet the limits in NZS 6803:1999 (Acoustics – Construction Noise).

Decision Reasons:

- Additional clarity that the rule. Construction noise should not exceed the limits, rather than meet the limits in the NZS.

Point Number 697.693

Summary of Decision Requested: **Amend** Rule 21.2.4 P1 Glare and Artificial Light Spill, as follows:

Illumination from glare and artificial light spill must not exceed 10 lux measured horizontally and vertically within any other-site zoned Residential, Village or Country Living Zone.

Decision Reasons:

- Consistency of wording with other zone chapters. It is more important to control light spill in the Residential, Village or Country Living zones than other zones.

Point Number 697.694

Summary of Decision Requested: **Amend** Rule 21.2.5(1) Earthworks, as follows:

(1) Rule 21.2.3.1 – Earthworks General, provides the permitted rules for earthworks activities for the Industrial Zone. This rule does not apply in those areas specified in Rule 25.2.5.1A, 21.2.5.2 and 21.2.5.3.

Decision Reasons:

- The wording of the rule does not make it clear that the rules in 21.2.5(2) apply instead of the general earthworks rule.

Point Number 697.695

Summary of Decision Requested: Amend Rule 21.2.5(2) Earthworks, as follows:

There are specific standards for earthworks within rules:

- (a) Rule 21.2.5.1A Earthworks - within the National Grid Yard
- (~~e~~ b) Rule 21.2.5.2 Earthworks – Significant Natural Areas;
- (~~b~~ ~~g~~) Rule 21.2.5.3 – Landscape and Natural Character Areas.

AND

Add new rule after Rule 21.2.5.1 as follows:

21.2.5.1A Earthworks - within the National Grid Yard

P1

(a) The following earthworks within the National Grid Yard:

(i) Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;

(ii) Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;

(iii) Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P2

(a) Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:

(i) Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and

(ii) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.

P3

(a) Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:

(i) Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;

(ii) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;

(iii) Do not compromise the stability of a National Grid support structure;

(iv) Do not result in the loss of access to any National Grid support structure; and

(v) Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

RD1

(a) Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 21.2.5.1A P1, P2 or P3.

(b) Discretion is restricted to:

(i) Impacts on the operation, maintenance, upgrading and development of the National Grid;

(ii) The risk to the structural integrity of the affected National Grid support structure(s);

(iii) Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;

(iv) The risk of electrical hazards affecting public or individual safety, and the risk of property damage.

Decision Reasons:

- Replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 21 (where this is relevant to Industrial Zone Heavy) for increased clarity and usability of the Plan.

Point Number 697.696

Summary of Decision Requested: Amend Rule 21.2.5.1 P1 Earthworks General, as follows:

(a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:

(i) be located more than 1.5 m horizontally from any waterway, open drain or overland flow path;

(ii) not exceed a volume of more than ~~250~~500m³ and an area of more than ~~10,000~~10,000m² over any single consecutive 12 month period;

(iii) not exceed an area of more than ~~1000~~1000 m² over any single consecutive 12 month period;

(iv) the total depth of any excavation or filling does not exceed 1.5m above or below ground level;

(v) the slope of the resulting cut, filled areas or fill batter face in stable ground, does not exceed a maximum of 1:2 (1 vertical to 2 horizontal);

(vi) earthworks are set back at least 1.5m from all boundaries;

(vii) areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;

(viii) sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls; and

(ix) do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- The volume threshold in (ii) and area threshold in (iii) have been entered in error. They need to be corrected to enable significantly larger volumes of earthworks as permitted activities within the heavy Industrial Zone. The rule needs to apply over a single consecutive 12 month period for both volume and area thresholds. This is also consistent with other zone chapters. The words "at least" provide clarity to the rule.

Point Number 697.697

Summary of Decision Requested: Amend Rule 21.5.1 P2 Earthworks General, as follows:

(a) Earthworks for the purpose of creating a building platform ~~for residential purposes~~ within a site, using imported fill material, ~~must meet the following condition:~~

(i) be carried out in accordance with NZS 4431:1989 Code of Practice for Earth Fill for Residential Development.

Decision Reasons:

- Rule 21.2.5.1 P2 needs to be amended as The NZS 4431:1989 Code of Practice for Earth Fill for Residential Development does not apply to heavy industrial sites.

Point Number 697.698

Summary of Decision Requested: Amend Rule 21.2.5.1 P3 Earthworks General, as follows:

(a) Earthworks for purposes other than creating a building platform ~~for residential purposes~~ within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions:

(i) ~~Must~~ not exceed a total volume of 500m³;

(ii) ~~Must~~ not exceed a depth of 1m;

(iii) the slope of the resulting filled area in stable ground ~~to~~ ~~must not~~ exceed a maximum slope of 1:2 (1 vertical to 2 horizontal);

(iv) fill material is set back at least 1.5m from all boundaries;

(v) areas exposed by filling are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;

(vi) sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls; and

(vii) ~~do~~ ~~not~~ divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- In respect to (a), building platforms in the industrial zone are not for residential purposes. In respect to (a)(i), (ii) and (iv), the words "must" and "at least" provide clarity to the rule.

Point Number 697.699

Summary of Decision Requested: Amend Rule 21.2.5.2 Earthworks - Significant Natural areas heading, as follows;

Earthworks – within Significant Natural Areas

Decision Reasons:

- Amendment to align with intent of rule.

Point Number 697.700

Summary of Decision Requested: Amend Rule 21.2.5.2 P1 (a) Earthworks - Significant Natural Areas, as follows:

(a) Earthworks are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area and must meet all of the following conditions:
(i) Maximum volume of 50m³ in a single consecutive 12 month period;
(ii) Maximum area of 250m² in a single consecutive 12 month period; and
(iii) Not include importing any fill material.
(iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level with a maximum slope of 1:2 (1 vertical to 2 horizontal);
(v) Earthworks are setback at least 1.5m from all boundaries;
(vi) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
(vii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
(viii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- Wording provides clarity and consistency with other chapters.

Point Number 697.701

Summary of Decision Requested: Delete Rule 21.2.5.2 D1 Earthworks - Significant Natural Areas.

Decision Reasons:

- The activity falls to be a Restricted Discretionary Activity if P1 is not met.

Point Number 697.702

Summary of Decision Requested: Delete the table in Rule 21.2.5.3 P1 (a) Earthworks - Landscape and Natural Character Areas.

AND

Amend Rule 21.2.5.3 P1 (a) Earthworks - Landscape and Natural Character Areas, as follows:

(b) Earthworks are for the maintenance of existing tracks, fences or drains within the following landscape, natural features and natural character areas:
(i) Significant Amenity Landscape (SAL) – sand dune
(ii) High Natural Character area
(iii) Outstanding Natural Character area of the coastal environment
(iv) Outstanding Natural feature – sand dune
(v) Outstanding Natural feature
(vi) Outstanding Natural landscapes

~~an identified Landscape or Natural Character Area~~ and must meet all of the following conditions;

(c) The earthworks are undertaken within a single consecutive 12 month period;
(d) The earthworks must not exceed ~~the following areas and volumes~~ an area of 50m² and a volume of 250m³ within a single consecutive 12 month period.

Decision Reasons:

- The additional wording provides clarification as to which areas are being encompassed by this rule and sets out the volume and area thresholds more clearly.

Point Number 697.703

Summary of Decision Requested: Add new Rule 21.2.6 (NC1) Hazardous substances, as follows:

NC1

Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 (where it is relevant to the Industrial Zone Heavy Zone) into Chapter 21 for increased clarity and usability of the Plan.

Point Number 697.704

Summary of Decision Requested: Amend Rule 21.2.7.1 P2 Signs - General, as follows:

(a) A sign must comply with all of the following conditions:
(i) The sign height does not exceed 1.5m;
(ii) An illuminated sign must:
A. not have a light source that flashes or moves; and
B. not contain moving parts or reflective materials; and
C. be set back at least 15m from a state highway or the Waikato Expressway;
(iii) Where the sign is attached to a building, it must:
A. not extend more than 300mm from the building wall; and
B. not exceed the height of the building;
(iv) Where the sign is a freestanding sign, it must:
A. not exceed an area of 3m² for one sign per site, and 1m² for any other freestanding sign on the site; and
B. be set back at least 5m from the boundary of any site ~~within any~~ Residential, Village, Country Living Zone or Reserve Zone;
(v) The sign is attached to a heritage item listed in Schedule 30.1 (Heritage Items) except for the purpose of identification and interpretation;
(vi) The sign is for the purpose of identification and interpretation ~~not attached to~~ of a Maaori site of significance listed in Schedule 30.3 (Maaori Sites of Significance) ~~except for the purpose of identification and interpretation~~;
(vii) The sign relates to:
A. goods or services available on the site; or
B. A property name sign.

Decision Reasons:

- The additional wording provides clarification.

Point Number	697.705
Summary of Decision Requested:	<p>Amend Rule 21.2.7.1 P3 Signs - General, as follows:</p> <p><i>(a) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must comply with all of the following conditions:</i></p> <p>(i) the sign relates to the sale of the site on which it is located;</p> <p>(ii) there is no more than +2 signs per site agency;</p> <p>(iii) the sign is not illuminated;</p> <p>(iv) the sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials,</p>
Decision Reasons:	<ul style="list-style-type: none"> The additional wording provides clarification.
Point Number	697.706
Summary of Decision Requested:	<p>Amend Rule 21.2.7.2 P1 (a) Signs - Effects on traffic, as follows:</p> <p><i>(a) Any sign directed at road users must <u>meet the following conditions:</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> The additional wording provides clarification.
Point Number	697.707
Summary of Decision Requested:	Delete Rule 21.2.7.2 P1(a)(vi) Signs - effects on traffic.
Decision Reasons:	<ul style="list-style-type: none"> This rule is unnecessary and provides consistency across the zone chapters.
Point Number	697.708
Summary of Decision Requested:	<p>Amend Rule 21.2.6 P1(a)(i) Hazardous substances, as follows:</p> <p><i>(i) the aggregate quantity of hazardous substance of any hazard classification on a site is less than the quantity specified for the Industrial Zone Heavy in Table 5.1 contained within Appendix 5 (Hazardous Substances).</i></p>
Decision Reasons:	<ul style="list-style-type: none"> The removal of the words "contained within" are not necessary.
Point Number	697.709
Summary of Decision Requested:	<p>Amend Rule 21.2.8 P1(a)(vi) Outdoor storage of goods or materials, as follows:</p> <p><i>(vi) be screened from any public road, public reserve and adjoining site in another zone, other than the Industrial Zone, by <u>either of the following:</u></i></p> <p><i>C. a landscaped strip consisting of plant species that achieve a minimum height of 1.8m at maturity; or</i></p> <p><i>D. a close-boarded or solid fence or wall to a height of 1.8m.</i></p> <p>AND</p> <p>Add new condition as P1(a)(vii) Outdoor storage of goods or materials, as follows:</p> <p><i><u>(vii) complies with rule 21.3.3 (daylight admission).</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> The additional wording in (a)(vi) provides clarification. New (vii) provides cross referencing to the daylight admission rule which is also relevant.
Point Number	697.710
Summary of Decision Requested:	Amend Rules 21.2.8(a)(vi) A and B Outdoor storage of goods or materials, to ensure the practical application at an industrial site.
Decision Reasons:	<ul style="list-style-type: none"> Council has concerns that these rules do not achieve good planning outcomes and further investigation is required in regards to their application and enforceability.
Point Number	697.711
Summary of Decision Requested:	<p>Amend Rule 21.2.9 Indigenous vegetation clearance inside a Significant Natural Area heading, as follows:</p> <p><i>Indigenous vegetation clearance inside within a Significant Natural Area</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Wording provides additional clarity.
Point Number	697.712
Summary of Decision Requested:	<p>Add to Rule 21.2.9 P1 (a) Indigenous vegetation clearance in a Significant Natural Area, as follows:</p> <p><i><u>(vi) Removing vegetation for conservation activities.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> This new rule ensures indigenous vegetation can be cleared for conservation activities.
Point Number	697.713
Summary of Decision Requested:	Amend Rule 21.2.9 (P2) Indigenous vegetation clearance inside a Significant Natural Area, as follows:

Removal of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per year per ~~property site~~ for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

Decision Reasons:

- Additional clarity that the rule is intended to apply "per site" rather than "per property" which is not a defined term.

Point Number 697.714

Summary of Decision Requested: **Delete** Rule 21.2.9 P5 Indigenous vegetation clearance inside a Significant Natural Area;

AND

Make consequential changes to Rule 21.2.9 D1 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

...P4, ~~P5~~ or P6.

Decision Reasons:

- Rule P5 duplicates P1 with the only difference being that P5 captures Maori Freehold land or Maori Customary land, which is captured by P1 anyway.

Point Number 697.715

Summary of Decision Requested: **Delete** Rule 21.2.9 P6 Indigenous vegetation clearance inside a Significant Natural Area;

AND

Make consequential changes to Rule 21.2.9 D1 Indigenous vegetation clearance inside a Significant Natural Area as follows:

...P4; ~~or P5 or~~ P6.

Decision Reasons:

- The activity is a repeat of P2.

Point Number 697.716

Summary of Decision Requested: **Add** new clause (3) into Rule 21.3.4 Land Use - Building, as follows:

(3) Rule 21.3.4.3 provides the permitted setbacks for buildings and structures within the National Grid Yard

AND

Add the following rule into Chapter 21, after Rule 21.3.4.2 Building setback-waterbodies, as follows:

21.3.4.3 Buildings and structures within the National Grid Yard

P1

(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:

(i) Not involve an increase in the building height or footprint;

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions;

P2

(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.

P3

Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 1.2m from the outer visible foundation of any National Grid tower and locate a minimum 1.2m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

NCL

Any building alterations or additions within the National Grid Yard that does not comply with Rule 21.3.4.3 P1.

NC2

Any new buildings or structures within the National Grid Yard that does not comply with Rule 21.3.4.3 P2 or P3.

Decision Reasons:

- Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 21 (where this is relevant to the Industrial Zone Heavy) for increased clarity and usability of the Plan.

Point Number 697.717

Summary of Decision Requested: **Amend** Rule 21.3.1 Height General heading, as follows:

21.3.1 Height – Building General

Decision Reasons:

- Alignment with other zone chapters.

Point Number 697.718

Summary of Decision Requested: **Amend** Rule 21.3.1 P1(a) Building height - general, as follows:

(a) The maximum height of any building may be up to **must not exceed**:

Decision Reasons:

- Words "and must not exceed" provide clarity to the rule.

Point Number 697.719

Summary of Decision Requested: **Amend** Rule 21.3.3 P1(a)(i) Daylight Admission, as follows:

(i) 45 degrees commencing at an elevation of 2.5m above ground level at any boundary of the Industrial Zone with any ~~other Residential, Village, Reserve, or Country Living Zone;~~

Decision Reasons:

- Provides clarity that we are referring to these specific zones.

Point Number 697.720

Summary of Decision Requested: **Amend** Rule 21.3.3 P1(a)(ii) Daylight Admission, as follows:

(ii) 37 degrees commencing at an elevation of 2.5m above ground level at any boundary of the Industrial Zone with any other zone between south-east or south-west of the building or stockpile of goods or materials.

Decision Reasons:

- Provides clarity that this rule includes stockpiles of goods and materials.

Point Number 697.721

Summary of Decision Requested: **Add** new clause (4) into Rule 21.3.4 Land use - Building, as follows:

(4) Rule 21.3.4.4 provides the permitted setbacks for sensitive land uses.

AND

Add the following rule into Chapter 21 after new Rule 21.3.4.4:

21.3.4.4 Sensitive land uses

P1

(g) Any building for a sensitive land use must be set back a minimum of:

(i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;

(ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.

P2

(g) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:

(i) Not increase the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

D1

Any building for a sensitive land use that does not comply with Rule 21.3.4.4 P1.

NC1

Any activity within the National Grid Yard that does not comply with Rule 21.3.4.4 P2.

NC2

Any new building for a sensitive land use within the National Grid Yard.

NC3

Any change of use of an existing building to a sensitive land use within the National Grid Yard.

NC4

The establishment of any new sensitive land use within the National Grid Yard.

Decision Reasons:

- Replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 21 (where this is relevant to the Industrial Zone Heavy) for increased clarity and usability of the Plan.

Point Number 697.722

Summary of Decision Requested: **Amend** Rule 21.3.4.2 P4 Building setback - water bodies, as follows:

A public amenity of up to 25m², or a pump shed (public or private), within any building setback identified in Rule 21.3.4.2 P1, P2 or P3.

Decision Reasons:

- The words "public or private" clarify that the pump shed is both private and public.

Point Number 697.723

Summary of Decision Requested: **Delete** Rule 21.3.4.2 P3 Building setback - water bodies.

Decision Reasons:

- Rule P3 is not needed, as the setbacks from waterbodies is adequately covered by the other rules.

Point Number 697.724

Summary of Decision Requested: **Amend** Rule 21.3.4.2 P3 Building setback-water bodies, as follows:

P1

(a) Any building must be set back a minimum of ~~30~~ 27.5 m from:

(i) the margin of any:

A. lake;

B. wetland; and

C. river bank, other than the Waikato River and Waipa River.

P2

Any building must be set back at least ~~50-32.5m~~ from the bank of the Waikato River and Waipa River.

Decision Reasons:

- Amend the rule so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.725

Summary of Decision Requested: **Delete** Rule 21.3.4.2 P3 Building setback - water bodies.

Decision Reasons:

- This rule is not required. Consistency with equivalent rules in other chapters.

Point Number	697.726
Summary of Decision Requested:	Amend the position of Rule 21.3.5 Building, structure or vegetation within battlefield viewshafts in the zone chapter so that it follows the height Rule 21.3.1 Height - General.
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other zone chapters.
Point Number	697.727
Summary of Decision Requested:	Amend heading for Rule 21.4 Subdivision, as follows: <u>21.4 Subdivision Rules</u>
Decision Reasons:	<ul style="list-style-type: none"> To provide clarity to the heading.
Point Number	697.728
Summary of Decision Requested:	Amend Rule 21.4(1) and (2) Subdivision, as follows: <i>(1) Rule 21.4.1 – General provides for subdivision density within the Heavy Industrial zone.</i> <i>(2) Other subdivision provisions are contained in Rule 21.4.1 is also subject to compliance with the following rules:</i>
Decision Reasons:	<ul style="list-style-type: none"> To provide clarity that the general subdivision rule must also comply with rules 21.4.2 – 21.4.6.
Point Number	697.729
Summary of Decision Requested:	Amend Rule 21.4(2) Subdivision, as follows: <i>(f) Rule 21.4.6 Subdivision - within the National Grid Corridor</i> AND Add new rule after Rule 21.4.5 Subdivision- Significant Natural Areas: <u>21.4.6 Subdivision of land within the National Grid Corridor RDI</u> <i>(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions:</i> <i>(i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and</i> <i>(ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.</i> <i>(b) Council's discretion is restricted to the following matters:</i> <i>(i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;</i> <i>(ii) The ability to provide a complying building platform outside of the National Grid Yard;</i> <i>(iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;</i> <i>(iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.</i> <u>NCL</u> <u>Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 21.4.6 RDI.</u>
Decision Reasons:	<ul style="list-style-type: none"> Replicate the subdivision rule within the National Grid Corridor from Chapter 14 into Chapter 20 (where this is relevant to the Industrial Zone Heavy) for increased clarity and usability of the Plan.
Point Number	697.730
Summary of Decision Requested:	Delete Rule 21.4.1 RD2 Subdivision - General. AND Amend Rule 21.4.1 RDI (a) Subdivision - General, as follows: <i>(a) Subdivision must comply with all of the following conditions:</i> <i>(i) proposed lots The record of title to be subdivided must have a minimum net site area of 1000m2;</i> <i>(ii) all proposed lots must have an average net site area of at least 2000m2; and</i> <i>(iii) the number of rear lots created by the subdivision does not exceed no more than 20% rear lots are created.</i> AND Add to Rule 21.4.1 RDI new clause (b) to read as follows: <i>(b) Council's discretion is restricted to the following matters:</i> <i>(i) the extent to which a range of future activities can be accommodated; and</i> <i>(ii) amenity values.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional wording provides clarity as to the intention of the subdivision rule.
Point Number	697.731
Summary of Decision Requested:	Add to Rule 21.4.1 Subdivision - General, as follows: <u>DI</u> <u>Any subdivision that does not comply with Rule 21.4.1 RDI.</u>
Decision Reasons:	<ul style="list-style-type: none"> DI is an omission and needs to be reinstated to form a complete rule cascade.
Point Number	697.732
Summary of Decision Requested:	Amend heading for Rule 21.4.2 Subdivision - Boundaries for Record of Title, as follows:

Decision Reasons:

- Boundaries for Records of Title is not the correct term to use for this rule heading. Change to focus the rule on existing buildings.

Point Number 697.733

Summary of Decision Requested: Amend Rule 21.4.2 RD1 Subdivision - Boundaries for Record of Title, as follows:

- (a) Any boundary of a proposed lot must be located so that:
 (i) Any existing building complies with the permitted activity rules relating to setbacks (rule 21.3.4.1) and daylight admission (21.3.3), except to the extent of any non-compliance that existed lawfully prior to the subdivision; and
~~(ii) no contaminated land, archaeological site, or wetland is divided between any proposed lots.~~
 (b) Council's discretion is restricted to the following matters:
 (i) Amenity values;
~~(ii) effects on contaminated land;~~
~~(iii) effects on any wetland;~~
~~(iv) effects on any archaeological site; and~~
 (v) the extent to which a range of future activities can be accommodated.

Decision Reasons:

- The rule must relate to existing buildings, not contaminated land which is covered already under the NES. archaeological sites has been incorrectly referenced in this rule and should relate to Maaori sites or areas of Significance. Additionally wetlands are covered under separate rules (rule 21.4.5), which is not necessary in the industrial zone.

Point Number 697.734

Summary of Decision Requested: Add to Rule 21.4.2 Subdivision - Boundaries for Records of Title to insert new Discretionary Activities rule, as follows:

DI
Subdivision that does not comply with Rule 21.4.2 RD1.

Decision Reasons:

- DI is an omission and needs to be reinstated to form a complete rule cascade.

Point Number 697.735

Summary of Decision Requested: Amend Rule 21.4.3 RD1 Subdivision - Road Frontage, as follows:

- (a) ~~Any~~ Every proposed lot with a road boundary, other than any access or utility allotment, right of way or access leg, must have a width along the road frontage boundary of at least 1.5m.
~~(b) Rule RD1(a) does not apply to a proposed rear lot or to a proposed access allotment.~~
 (c) Council's discretion is restricted to the following matters:
 (i) ~~traffic effects~~ safety and efficiency of vehicle access and road network; and
 (ii) amenity and streetscape.

Decision Reasons:

- Proposed change provides clarity to the rule.

Point Number 697.736

Summary of Decision Requested: Add to Rule 21.4.3 Subdivision - Road Frontage, as follows:

DI
Subdivision that does not comply with Rule 21.4.3 RD1.

Decision Reasons:

- DI is an omission and needs to be reinstated to complete the rule cascade.

Point Number 697.737

Summary of Decision Requested: Amend Rule 21.4.4 RD1 Subdivision - Esplanade Reserves and Esplanade Strips, as follows:

- (a) ~~Subdivision must create~~ An esplanade reserve or esplanade strip 20m wide (or other width stated in Appendix 4 (Esplanade Priority Areas)) is required to be created and vested in Council from every subdivision where the land being subdivided is proposed to
 (i) less than 4ha and within 20m of any:
 A. mean high water springs;
 B. bank of any river whose bed has an average width of 3m or more; or
 C. a lake whose bed has an area of 8ha or more; or
 (ii) 4ha or more and located within 20m of any:
 A. mean high water springs; or
 B. a water body identified in Appendix 4 (Esplanade Priority Areas).
 (b) Council's discretion ~~is~~ shall be restricted to the following matters:
 (i) the type of esplanade provided reserve or strip;
 (ii) width of the esplanade reserve or strip;
 (iii) provision of legal access to the esplanade reserve or strip;
 (iv) matters provided for in an instrument creating an esplanade strip or access strip;
 (v) works required prior to vesting any reserve in the Council, including pest plant control, boundary fencing and the removal of structures and debris; ~~and~~
 (vi) ~~costs and benefits of acquiring the land.~~

Decision Reasons:

- Additional wording provides clarity to rule. Deletion of (vi) is because this matter is not related to an environmental effect.

Point Number 697.738

Summary of Decision Requested: Delete Rule 21.4.5 Subdivision-Significant Natural Areas;
 AND
 Make consequential amendment to Rule 21.4 Subdivision by deleting (2)(d).

Decision Reasons:

- This rule is not appropriate in the Industrial Zone Heavy.

Point Number 697.739

Summary of Decision Requested: **Add** new Rule 21.4(2)(e) Subdivision, as follows:

~~(e) 21.4.5A Subdivision of land containing Maaori sites of significance and Maaori areas of significance~~

AND

Add new rule 21.4.5A (after deleted rule 21.4.5) "Subdivision of land containing Maaori sites of significance and Maaori areas of significance", as follows:

RD1

~~(a) The boundaries of every proposed lot must not divide any of the following:~~

~~(i) Maaori sites of significance as identified in Schedule 30.3 (Maaori sites of significance);~~

~~(ii) Maaori areas of significance as identified in Schedule 30.4 (Maaori areas of significance);~~

~~(b) Council's discretion is restricted to the following matters:~~

~~(iv) effects on heritage values;~~

~~(v) context and setting of the heritage item; and~~

~~(vi) the extent to which the relationship of the heritage item with its setting is maintained.~~

D1

Subdivision that does not comply with Rule 21.4.5A RD1.

Decision Reasons:

- This rule is required to accommodate the changes made to rule 21.4.2 which referenced "archaeological sites". To be consistent with other zone chapters, this rule needs to refer to Maaori sites of significance and Maaori areas of significance.

Point Number 697.740

Summary of Decision Requested: **Amend** the heading for Chapter 22, as follows:

Chapter 22: Rural Zone – Rules

Decision Reasons:

- To assist in clarifying that all of the provisions within the chapter are rules.

Point Number 697.741

Summary of Decision Requested: **Amend** Rule 22(2) Rural Zone, as follows:

The rules that apply to subdivision in the Rural Zone are contained in Rule 22.4 and the relevant rules in 14 Infrastructure and Energy and 15 Natural Hazards and Climate Change (Placeholder).

Decision Reasons:

- To clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.742

Summary of Decision Requested: **Amend** Rule 22.1.2 Permitted Activities, as follows:

~~(g) Activity-specific conditions;~~

~~(b) Land Use – Effects rules in Rule 22.2 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply);~~

~~(c) Land Use – Building rules in Rule 22.3 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply);~~

~~(e) Activity-specific conditions;~~

Decision Reasons:

- The list of rules (a) – (c) should follow the order that they appear.

Point Number 697.743

Summary of Decision Requested: **Amend** Rule 22.1.2 P4 A home occupation, as follows:

...~~(d) Unloading and loading of vehicles and/or the receiving of customers or deliveries only occur after 7:30am and before 7:00pm on any day;~~

~~(e) Machinery may only be operated after 7:30am and up to 9pm on any day.~~

Decision Reasons:

- To align the hours for the activity with the noise rule (22.2.1) for this zone.

Point Number 697.744

Summary of Decision Requested: **Amend** Rule 22.1.2 P6 Afforestation not in an Outstanding Landscape, as follows:

Afforestation not in an Outstanding ~~Landscape Area~~ Natural Landscape

AND

Amend table as follows:

~~##(g) For areas less than 1ha.~~

Decision Reasons:

- Reference to Outstanding Landscape Area is incorrect and should refer to "Outstanding Natural Landscape". In addition the NES for plantation forestry covers Afforestation for areas more than 1ha in area. The amendment to include: "for areas less than 1ha" makes the rule clear that it only captures any areas below 1ha.

Point Number 697.745

Summary of Decision Requested: **Amend** Rule 22.1.2 P8 Forestry, as follows:

~~##(g) For areas less than 1ha.~~

Decision Reasons:

- The NES for plantation forestry covers forestry for areas more than 1ha in area. The amendment to include: "for areas less than 1ha" makes the rule clear that it only captures any areas below 1ha.

Point Number 697.746

Summary of Decision Requested: Amend Rule 22.1.2 P10 Homestay, as follows:

(a) Home stay for up to 4 people

Decision Reasons:

- A homestay activity has been provided for as a Discretionary Activity for more than 5 people. This amendment makes it clear that the activity is permitted for up to 4 people.

Point Number 697.747

Summary of Decision Requested: Add to Rule 22.1.2 P13 Travellers Accommodation as follows:

Travellers Accommodation for up to 5 people
"Nil" Conditions

Decision Reasons:

- Travellers' Accommodation has been provided for as a Discretionary Activity for more than 5 people. This amendment makes it clear that the activity is permitted for up to 4 people.

Point Number 697.748

Summary of Decision Requested: Add to Rule 22.1.2 Permitted Activities P14, as follows:

Residential Activity
Nil (Conditions)

Decision Reasons:

- Residential Activity in the Rural Zone needs to be provided for as a permitted activity.

Point Number 697.749

Summary of Decision Requested: Amend Rule 22.1.3 RD1 Intensive farming, as follows:

(a) Intensive Farming that meets all of the following conditions:
 (i) Land Use – Effects in Rule 22.2
 (ii) Land Use – Building in Rule 22.3
 (iii) Building coverage does not exceed 3% of the site:
 A. Rule 22.3.6 (Building Coverage) does not apply;
 (iv) Building height does not exceed 15m;
 A. Rule 22.3.4 (Building Height) does not apply;
 (b) Intensive farming is not located in:
 (i) An Outstanding Natural Feature;
 (ii) An Outstanding Natural Landscape;
 (iii) A Significant Amenity Landscape;
 (iv) An Outstanding Natural Character Area; or
 (v) A High Natural Character Area
 (c) For pig farming (excluding free-range pig farming), buildings and adjacent yard areas outdoor enclosures are set back at least:
 (i) 300 metres from any site boundary;
 (ii) From any boundary of a Residential, Village or Country Living Zone:
 A. 1200 metres (500 or less fewer pigs); or
 B. 2000 metres (more than 500 pigs);
 (d) For freerange poultry farming, buildings and outdoor enclosures are set back at least:
 (i) 100 metres from any site boundary; and
 (ii) 500 metres from any boundary of a Residential, Village and Country Living Zone;
 (e) For housed poultry and all other intensive farming, buildings and adjacent yard areas outdoor enclosures are set back at least:
 (i) 300 metres from any site boundary; and
 (ii) 500 metres from any boundary of a Residential, Village and Country Living Zone.

Decision Reasons:

- This rule requires amendment to provide further clarification, particularly with respect to the term "adjacent yard areas", which is proposed to be amended to "outdoor enclosures".

Point Number 697.750

Summary of Decision Requested: Amend Rule 22.1.3 RD2 Rural Industry, as follows:

Rural Industry not in an Urban Expansion Area

Decision Reasons:

- It is a Non-complying activity to undertake certain activities within the Urban Expansion Area. Rural Industry is to be included in the list of non-complying activities, hence the need to provide clarity in this rule.

Point Number 697.751

Summary of Decision Requested: Add new Rule 22.1.3 RD3 as follows:

RD3
A new retirement village or alterations to an existing retirement village that meets all of the following conditions:
 (a) The site or combination of sites where the retirement village is proposed to be located has a minimum net site area of 3ha;
 (b) The site is either serviced by or within 400m walking distance of public transport;
 (c) The site is either:
 (i) connected to public water and wastewater infrastructure; or
 (ii) serviced with on-site water and wastewater infrastructure;
 (d) Minimum living court or balcony area and dimensions:
 (i) Apartment – 10m² area with minimum dimension horizontal and vertical of 2.5m;
 (ii) Studio unit or 1 bedroom unit – 12.5m² area with minimum dimension horizontal and vertical of 2.5m; or
 (iii) 2 or more bedrooomed unit – 15m² area with minimum dimension horizontal and vertical of 2.5m;
 (e) Minimum service court is either:
 (i) Apartment – Communal outdoor space (ie no individual service courts required) of at least 5m² with a minimum dimension of 1.5 metres for each apartment; or
 (ii) All other units – 10m² with a minimum dimension of 1.5 metres for each unit;

- (f) Building height does not exceed 8m, except for 15% of the total building coverage, where buildings may be up to 10m high;
 (g) The following Land Use – Effects rule in Rule 22.2 does not apply;
 (i) Rule 22.2.7 (Signs);
 (h) The following Land Use – Building rules in Rule 22.3 do not apply;
 (i) Rule 22.3.1 (Dwelling);
 (ii) Rule 22.3.3 (Building Height);
 (j) The following Infrastructure and Energy rule in Chapter 14 does not apply;
 (i) Rule 14.12.1 Pd(1)(g) (Traffic generation);
- (g) Council's discretion is restricted to:
 (i) Integration of the retirement village into the rural landscape;
 (ii) Adverse effects on rural character and amenity;
 (iii) Connectivity to existing towns and villages, including connections to existing walkways, roading infrastructure and public transportation;
 (iv) Connectivity to public reticulated public water supply and wastewater, or provision of services on site;
 (v) Bulk and scale of the retirement village development;
 (vi) Reverse sensitivity effects;
 (vii) Effects on the roading network.

Decision Reasons:

- Retirement villages in the Rural Zone should be provided for on the boundaries of towns and villages provided they can be serviced by infrastructure in the future. Retirement villages provide opportunities for residential development (aged care) that is not only confined to the residential zone.

Point Number 697.752

Summary of Decision Requested: **Amend** Rule 22.1.5 D1 Discretionary Activities, as follows:
 Any permitted activity that does not comply with one or more of the ~~an~~-activity specific conditions in Rule 22.1.2

Decision Reasons:

- Consistency with other chapters and additional clarity of the rule.

Point Number 697.753

Summary of Decision Requested: **Delete** Rule 22.1.5 D2 Discretionary Activities;
 AND
Amend consequential renumbering of subsequent activities.

Decision Reasons:

- This rule is not needed as it refers to Land Use Effects and Land Use Building rules which are in subsequent parts of the chapter.

Point Number 697.754

Summary of Decision Requested: **Amend** Rule 22.15 D12 Discretionary Activities, as follows:
 Motorised sport and recreation activity

Decision Reasons:

- A new definition has been added for the term "motorised sport and recreation".

Point Number 697.755

Summary of Decision Requested: **Amend** Rule 22.1.5 D16 Discretionary Activities, as follows:
 Animal boarding, daycare, breeding or ~~animal~~-training establishment.

Decision Reasons:

- Animal daycare activities have not been provided for in the Rural Zone, except as by default as a Non-Complying Activity. Including "daycare" into D16 makes it clear that this type of activity is included as a Discretionary Activity.

Point Number 697.756

Summary of Decision Requested: **Add** to Rule 22.1.5 new D17 Discretionary Activities, as follows:
Homestay for 4 or more people.

Decision Reasons:

- A homestay activity has been provided for as a permitted activity, which has also been proposed to be amended to include provision for up to 4 people. However for clarity, homestay for 5 or more people needs to be provided as a Discretionary activity.

Point Number 697.757

Summary of Decision Requested: **Amend** Rule 22.1.5 Non-complying activities, by renumbering as Rule 22.1.6.

Decision Reasons:

- To correct a numbering error.

Point Number 697.758

Summary of Decision Requested: **Amend** Rule 22.1.5 NC2 Non-Complying Activities, as follows:
 (a) An extractive industry located within all or part of any of the following landscape and natural character areas:
 (i) Outstanding Natural Feature;
 (ii) Outstanding Natural Landscape;
 (iii) High natural character area;
 (iv) Outstanding Natural Character area.

Decision Reasons:

- Including the wording “landscape and natural character areas” provides clarity to the rule.

Point Number 697.759

Summary of Decision Requested: Amend Rule 22.1.5 NC3 Non-Complying Activities, as follows:

- (a) A waste management facility located within all or part of any of the following landscape and natural character areas:
- (i) Outstanding Natural Feature;
 - (ii) Outstanding Natural Landscape;
 - (iii) High Natural Character area; or
 - (iv) Outstanding Natural Character Area.

Decision Reasons:

- Including the wording “landscape and natural character areas” provides clarity to the rule.

Point Number 697.760

Summary of Decision Requested: Amend Rule 22.1.5 NC4 Non-Complying Activities, as follows:

- (ii) ~~The following activities located within the Urban Expansion Area, the following activities:~~
- (i) intensive farming;
 - (ii) storage, processing or disposal of hazardous waste;
 - (iii) correctional facility;
 - (iv) extractive industry;
 - (v) industrial activity;
 - (vi) motorised recreation activity;
 - (vii) transport depot;
 - (viii) rural industry.

Decision Reasons:

- The introductory wording to the rule provides clarity to the rule and listing rural industry ensures activities are controlled within the Urban Expansion Area.

Point Number 697.761

Summary of Decision Requested: Delete Rule 22.2.1(1) Noise.

Decision Reasons:

- Reduces duplication – this noise rule is adequately covered by points (2) and (3).

Point Number 697.762

Summary of Decision Requested: Delete Rule 22.2.1.1 P3 and P4 Noise - General.

AND

Make consequential amendments as follows:

RD1 (a) Noise that does not comply with Rule 22.2.1.1 ~~P1 or P2, P3 or P4.~~

AND

Amend Rule 22.2.1.1 P2 Noise - General, as follows:

- (a) Noise measured at the notional boundary on any other site in the Rural Zone must not exceed:
- (i) 50dB (LAeq), 7am to 7pm every day;
 - (ii) 45dB (LAeq), 7pm to 10pm every day;
 - (iii) 40dB (LAeq) and 65dB (LAmax), 10pm to 7am the following day.
- (b) Noise measured within any site in any other zone, other than the Rural Zone, must meet the permitted noise levels for that other zone.
- (c) Noise levels must be measured in accordance with the requirements of New Zealand Standard NZS 6801:2008 Acoustics - Measurement of Environmental Sound.
- (d) Noise levels must be assessed in accordance with the requirements of New Zealand Standard NZS 6802:2008 Acoustic Environmental noise.

Decision Reasons:

- P3 and P4 need to be conditions of P2 as they are the standards which need to be met.

Point Number 697.763

Summary of Decision Requested: Amend Rule 22.2.1.3 P1 (a) Noise - Construction, as follows:

- (a) Construction noise generated from a construction site must ~~meet not exceed~~ the limits in New Zealand Standard NZS 6803:1999 (Acoustics – Construction Noise).

Decision Reasons:

- Additional clarity that the rule. Construction noise should not exceed the limits, rather than meet the limits in the NZS.

Point Number 697.764

Summary of Decision Requested: Amend Rule 22.2.3(1) Earthworks, as follows:

- (1) Rule 22.2.3.1 – Earthworks General, provides the permitted rules for earthworks activities for the Rural Zone. This rule does not apply in those areas specified in Rules 22.2.3.1A, 22.2.3.2, 22.2.3.3 and 22.2.3.4.

Decision Reasons:

- The wording of the rule does not make it clear that the rules specified in 22.2.3(2) apply instead of the general earthworks rule.

Point Number 697.765

Summary of Decision Requested: Amend Rule 22.2.3(2) Earthworks, as follows:

- There are specific standards for earthworks within rules:
- (g) Rule 22.2.3.1A – Earthworks - within the National Grid Yard.

- (e b) Rule 22.2.3.2 – Maaori Sites and Maaori Areas of Significance;
- (b c) Rule 22.2.3.3 – Significant Natural Areas;
- (e d) Rule 22.2.3.4 – Landscape and Natural Character Areas.

AND

Add new rule after Rule 22.2.3.1 Earthworks - General, as follows:
22.2.3.1A Earthworks within the National Grid Yard.

P1.

(a) The following earthworks within the National Grid Yard:

(i) Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;

(ii) Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;

(iii) Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P2.

(a) Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:

(i) Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and

(ii) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.

P3.

(a) Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:

(i) Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;

(ii) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;

(iii) Do not compromise the stability of a National Grid support structure;

(iv) Do not result in the loss of access to any National Grid support structure; and

(v) Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

RD1

(a) Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 22.2.3.1A P1, P2 or P3.

(b) Discretion is restricted to:

(i) Impacts on the operation, maintenance, upgrading and development of the National Grid;

(ii) The risk to the structural integrity of the affected National Grid support structure(s);

(iii) Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;

(iv) The risk of electrical hazards affecting public or individual safety, and the risk of property damage.

Decision Reasons:

- It must replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 22 for increased clarity and usability of the Plan.

Point Number 697.766

Summary of Decision Requested: Delete Rule 22.2.3.1 P1(a)(iii) Earthworks - General.

Decision Reasons:

- The content of this rule is already contained within the meaning of ancillary rural earthworks.

Point Number 697.767

Summary of Decision Requested: Amend Rule 22.2.3.1 P1(a)(iv) Earthworks - General, as follows:

(i) A building platform for a residential activity, including accessory buildings: carried out in accordance with NZS 4431:1989 Code of Practice for Earth Fill for Residential Development.

Decision Reasons:

- For clarity of the rule, it makes sense that the NZS 4431:1989 Code of Practice for Earth Fill for Residential Development is applied within this rule instead of P3.

Point Number 697.768

Summary of Decision Requested: Amend Rule 22.2.3.1 P2(a)(iii) Earthworks - General, as follows:

(iii) Earthworks are setback at least 1.5m from all boundaries;

Decision Reasons:

- The words "at least" provide clarity to this rule.

Point Number 697.769

Summary of Decision Requested: Delete Rule 22.2.3.1 P3 Earthworks - General;

AND

Amend Rule 22.2.3.1 RD1(a) Earthworks - General, as follows:

(a) Earthworks that do not comply with Rule 22.2.3.1 P1, P2, ~~P3~~ or P4.

Decision Reasons:

- P3 has been included in rule 22.2.3.1 P1(a)(iv).
- As a consequential amendment.

Point Number 697.770

Summary of Decision Requested: Amend Rule 22.2.3.1 P4(a)(iv) Earthworks - General, as follows:

(iv) Fill material is setback at least 1.5m from all boundaries;

Decision Reasons:

- The words "at least" provide clarity to this rule.

Point Number 697.771

Summary of Decision Requested: Amend Rule 22.2.3.2 P1(a) Earthworks - Maaori Sites and Maaori Areas of Significance, as follows:

(a) Earthworks within a Maaori site of significance as identified in Schedule 30.3 (Maaori sites of Significance) and as shown on the planning maps.

AND

Amend Rule 22.2.3.2 P1 (b) Earthworks - Maaori Sites and Maaori Areas of Significance as follows:

(b) Council's discretion is restricted to the following matters:
~~(i) location of activity in relation to the site, effects on heritage and cultural values;~~

Decision Reasons:

- Wording provides additional clarity to the rule.

Point Number 697.772

Summary of Decision Requested: **Delete** matter of discretion from Rule 22.2.3.2 RD2 (b) Earthworks-Maaori Sites and Maaori Areas of Significance, as follows:

~~(i) location of activity in relation to the site, effects on heritage and cultural values;~~

Decision Reasons:

- The entire site is identified as a Maaori area of significance, therefore the matter of discretion is unnecessary.

Point Number 697.773

Summary of Decision Requested: **Amend** Rule 22.2.3.3 P1 (a) Earthworks - Significant Natural Areas, as follows:

(a) Earthworks are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area must meet all of the following conditions:

- (i) ~~The earthworks must not~~ exceed a volume of 50m³ in a single consecutive 12 month period; and
(ii) ~~The earthworks must not~~ exceed an area of 250m² in a single consecutive 12 month period;

Decision Reasons:

- The word "are" provides clarity to the rule.

Point Number 697.774

Summary of Decision Requested: **Amend** Rule 22.2.3.3 P1 (a)(iv) Earthworks - Significant Natural Areas, as follows:

(iv) Earthworks are setback at least 1.5m from all boundaries;

Decision Reasons:

- The words "at least" provide clarity to the rule.

Point Number 697.775

Summary of Decision Requested: **Amend** Rule 22.2.3.3 P2 Earthworks - Significant Natural Areas, as follows:

Filling within a significant natural area using imported fill must not exceed a volume of 20m³ and a depth of 1.5m.

Decision Reasons:

- The words "within a significant natural area" provide clarity to the rule.

Point Number 697.776

Summary of Decision Requested: **Amend** Rule 22.2.3.4 P1 (a) Earthworks - within Landscape and Natural Character Areas, as follows:

(a) Earthworks are for the maintenance of existing tracks, fences or drains within the following landscapes, natural features and natural character areas:

- (i) Hill Country Significant Amenity Landscape;
(ii) Significant Amenity Landscape (SAL) – Waikato river and margins and lakes;
(iii) Significant Amenity Landscape (SAL) – sand dune;
(iv) High or Outstanding Natural Character area of the coastal environment;
(v) Outstanding Natural Feature sand dune;
(vi) Outstanding Natural Feature (ONF);
(vii) Outstanding Natural Landscapes (ONLs);
~~an identified Landscape or Natural Character Area and must meet all of the following conditions:~~

Decision Reasons:

- The additional wording provides clarification as to which areas are being encompassed by this rule.

Point Number 697.777

Summary of Decision Requested: **Amend** Rule 22.2.4 P1 (a)(i) Hazardous substances, as follows:

(a) The use, storage or disposal of any hazardous substances must meet the following conditions where:
(i) ~~The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Rural Zone in Table 45.1 contained within Appendix 6.1 (Hazardous Substances).~~

Decision Reasons:

- The removal of the words "contained within" are not necessary.
- Reference to appendix 6 is incorrect as is a minor error.

Point Number 697.778

Summary of Decision Requested: **Add** a new non-complying activity (NC1) to Rule 22.2.4 Hazardous substances ,as follows:

NC1
Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line.

Decision Reasons:

- This is to replicate the hazardous facilities rule within the National Grid from Chapter 14 into Chapter 22 for increased clarity and usability of the Plan.

Point Number	697.779
Summary of Decision Requested:	Amend Rule 22.2.5.2 RD1 (b)(i) Notable tree - trimming, as follows: <i>(i) timing and manner in which the activity is carried out and by whom and.</i>
Decision Reasons:	<ul style="list-style-type: none"> This matter of discretion does not make sense. Rule clearly points out that a works arborist is required to assess the tree.
Point Number	697.780
Summary of Decision Requested:	Delete Rule 22.2.5.2 RD1 (b)(ii) Notable tree - trimming.
Decision Reasons:	<ul style="list-style-type: none"> This matter of discretion does not make sense. Rule clearly points out that a works arborist is required to assess the tree.
Point Number	697.781
Summary of Decision Requested:	Amend Rule 22.2.5.3 P1 (i) Notable tree - activities within the dripline, as follows: <i>(i) Involve excavation, compaction, sealing or soil disturbance and placement of fill material, <u>or cleanfill</u>, except for sealing of an existing road or footpath; and</i>
Decision Reasons:	<ul style="list-style-type: none"> This rule also needs to include "cleanfill" in addition to "fill material".
Point Number	697.782
Summary of Decision Requested:	Amend Rule 22.2.5.3 RD1 (a) Notable tree - activities within the dripline, as follows: <i>(a) Any activity <u>within the dripline of the notable tree</u> that does not comply with Rule 22.2.5.3 P1</i>
Decision Reasons:	<ul style="list-style-type: none"> The words "within the dripline of the notable tree" provide clarity to the rule.
Point Number	697.783
Summary of Decision Requested:	Amend Rule 22.2.6.1 P2(a)(x) Signs - General, as follows: <i>(x) The sign is <u>for the purpose of identification and interpretation</u> not attached to of a Maaori site of significance listed in Schedule 30.3 (Maaori Sites of Significance) except for the purpose of identification and interpretation;</i>
Decision Reasons:	<ul style="list-style-type: none"> The re-wording of this rule provides clarity.
Point Number	697.784
Summary of Decision Requested:	Amend Rule 22.2.6.1 P3 Signs - General, as follows: <i>(a) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must <u>comply with all of the following conditions</u> not- (i) Not have. There is no more than + 3 signs per site agency; (ii) Be. The sign is not illuminated; (iii) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials; (iv) Project into or over road reserve.</i>
Decision Reasons:	<ul style="list-style-type: none"> This rule excluded signs for rental properties and requires additional words to ensure consistency with rule 22.2.6.1. P3(a)(iv) is not required as the rural zone provisions do not apply within the road reserve.
Point Number	697.785
Summary of Decision Requested:	Amend Rule 22.2.6.2 P1 (a) Signs - effects on traffic, as follows: <i>(a) Any sign directed at road users must <u>meet the following conditions</u>: (i) Not imitate the content, colour or appearance of any traffic control sign; (ii) Be located at least 60m from controlled intersections, pedestrian crossings and any other sign; (iii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections; (iv) Contain no more than 40 characters and no more than 6 symbols; (v) Have lettering that is at least 200mm high; and (vi) Where the sign directs traffic to a site entrance, the sign must be at least: A. 1.75m from the entrance on roads with a speed limit of 80 km/hr or less; or B. 250m from the entrance on roads with a speed limit of more than 80km/hr.</i>
Decision Reasons:	<ul style="list-style-type: none"> The amended wording provides clarity for the rule and consistency with other rules.
Point Number	697.786
Summary of Decision Requested:	Amend Rule 22.2.7 Indigenous vegetation heading, as follows: <i>Indigenous vegetation clearance <u>inside</u> within a Significant Natural Area</i>
Decision Reasons:	<ul style="list-style-type: none"> This wording provides additional clarity.

Point Number	697.787
Summary of Decision Requested:	<p>Amend Rule 22.2.7 Indigenous vegetation inside an Significant Natural Area, as follows:</p> <p>P1 (a) Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) for the following purposes...</p> <p>P3 (a) Indigenous vegetation clearance for building, access, parking and manoeuvring areas in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) must comply with all of the following conditions....</p> <p>P4 (a) On Maaori Freehold Land or Maaori Customary Land, indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) where...</p> <p>P5 (a) On Maaori Freehold Land or Maaori Customary Land, indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) for the following purposes:</p> <p>D1 Indigenous vegetation clearance in a Significant Natural Area identified on the planning maps or in Schedule 5 (Urban Allotment Significant Natural Areas) that does not comply with one or more conditions in Rule 22.2.7 P1, P2, P3, P4, P5 or P6.</p>
Decision Reasons:	<ul style="list-style-type: none"> The definition of "urban allotment" is not likely to apply to any sites zoned as Rural Zone.
Point Number	697.788
Summary of Decision Requested:	<p>Add a new condition (vii) to Rule 22.2.7(a) Indigenous vegetation clearance inside a Significant Natural Area, as follows:</p> <p>(vii) <u>Removing vegetation for conservation activities.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> This new rule enables the clearance of indigenous vegetation within significant natural areas for conservation activities.
Point Number	697.789
Summary of Decision Requested:	<p>Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, as follows:</p> <p>Removal of up to 5m3 of manuka and/or kanuka outside of the Coastal Environment per year per property <u>site</u> for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.</p>
Decision Reasons:	<ul style="list-style-type: none"> This is to provide additional clarity that the rule is intended to apply "per site" rather than "per property", which is not a defined term.
Point Number	697.790
Summary of Decision Requested:	<p>Delete Rule 22.2.7 P5 Indigenous vegetation clearance inside a Significant Natural Area.</p> <p>AND</p> <p>Amend Rule 22.2.7 D1 Indigenous vegetation clearance inside a Significant Natural Area, as follows:</p> <p>...P4, P5 or P6.</p>
Decision Reasons:	<ul style="list-style-type: none"> Rule P5 duplicates P1 with the only difference being that P5 captures Maaori Freehold land or Maaori Customary land, which is captured by P1 anyway. As a consequential amendment to the text.
Point Number	697.791
Summary of Decision Requested:	<p>Delete Rule 22.2.7 P6 Indigenous vegetation clearance inside a Significant Natural Area;</p> <p>AND</p> <p>Amend Rule 22.2.7 D1 Indigenous vegetation clearance inside a Significant Natural Area as follows:</p> <p>...P4, or P5 or P6</p>
Decision Reasons:	<ul style="list-style-type: none"> The activity is a repeat of P2. As a consequential amendment.
Point Number	697.792
Summary of Decision Requested:	<p>Amend Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area heading, as follows:</p> <p>Indigenous vegetation clearance outside a Significant Natural Area-General</p>
Decision Reasons:	<ul style="list-style-type: none"> The heading "outside a Significant Natural Area" is confusing, as the provision relates to all areas of the rural zone that is not covered by a Significant Natural Area.
Point Number	697.793
Summary of Decision Requested:	<p>Amend Rule 22.2.8 P1 (a)(ii) Indigenous vegetation clearance outside a Significant Natural Area, as follows:</p> <p>(ii) Maintaining productive pasture through the removal of up to 1000m² per single consecutive 12 month period of manuka and/or kanuka that is <u>at least</u> more than 10m from a waterbody, and <u>is less</u> than 4m in height;</p>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.794

Summary of Decision Requested: Amend Rule 22.2.8 P1(a)(vii) Indigenous vegetation clearance outside a Significant Natural Area, as follows:
(vii) A building platform and associated access, parking and manoeuvring up to a total of 500m² clearance of indigenous vegetation except on Maori Freehold or Maori Customary Land.

Decision Reasons:

- Including an exemption for Maori Freehold or Maori Customary land into this rule means that P2 can be deleted, as P2 essentially repeats P1.

Point Number 697.795

Summary of Decision Requested: Delete Rule 22.2.8 P2 Indigenous vegetation clearance outside a Significant Natural Area.

Decision Reasons:

- P2 is not required, given the change made to rule 22.2.8 P1 (a)(vii).

Point Number 697.796

Summary of Decision Requested: Amend Rule 22.2.8 RD1 Indigenous vegetation clearance outside a Significant Natural Area, as follows:

- (a) Indigenous Vegetation clearance outside a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) that does not comply with one or more conditions of Rule 22.2.8 P1, ~~or P2 or P3.~~*
(b) Council's discretion is restricted to the following matters:
(i) the extent to which the clearance will result in the fragmentation and isolation of indigenous ecosystems and habitats, ~~including the loss of corridors or connections that link indigenous ecosystems and habitat and the loss of buffering of indigenous ecosystems;~~
(ii) the extent to which the clearance will result in loss, damage or disruption to ecological processes, functions and ecological integrity, including ecosystem services;
(iii) ~~the extent to which cumulative effects of the vegetation clearance have been considered and addressed;~~
(iv) the extent to which the clearance affects Tangata Whenua relationships with indigenous biodiversity on the site;
(v) the extent to which the indigenous biodiversity contributes to natural character and landscape values, including: ~~A,~~
A, areas of outstanding natural character,
B, outstanding natural features,
C, outstanding natural landscapes; and
D, significant amenity landscapes.

Decision Reasons:

- Amendments required to wording to ensure intent of the rule is correct and formatting changed in (v) to be clear.

Point Number 697.797

Summary of Decision Requested: Amend Rule 22.3.1 P1 Number of dwellings within a lot, as follows:

- (a) One dwelling within a ~~lot record of title containing an area less than 40ha;~~*
(b) No more than two dwellings within a ~~lot record of title containing an area 40ha or more;~~
(c) Any dwelling(s) under Rule 22.3.1 P1 (a) and (b) must not be located within any of the following landscape and natural character areas:
(i) Outstanding Natural Feature;
(ii) Outstanding Natural Landscape;
(iii) Outstanding Natural Character Area;
(iv) High Natural Character Area.

Decision Reasons:

- The definition "record of title" has been included for correction and other words for clarity of the rule.

Point Number 697.798

Summary of Decision Requested: Amend Rule 22.3.2 P1 Minor dwelling, as follows:

- (a) One minor dwelling ~~not exceeding 70m² gross floor area~~ within a lot record of title must comply with the following conditions:*
(i) ~~Where there is an existing dwelling located within a lot not exceed 70m² gross floor area;~~
(ii) ~~The minor dwelling must be located within 20m of the principal residential unit dwelling;~~
(iii) ~~The minor dwelling must share a single driveway access with the principal residential unit existing dwelling.~~

Decision Reasons:

- Amendments provide clarity of rule and aligns the terminology with the definition for minor dwelling.

Point Number 697.799

Summary of Decision Requested: Amend Rule 22.3.3 D1 (a) Buildings and structures in Landscape and Natural Character Areas, as follows:

- (a) Building or structure located within any of the following landscape and natural character areas:*

...

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number 697.800

Summary of Decision Requested: Amend Rule 22.3.4(1) Height, as follows:

- (1) Rule 22.3.4.1 – Height - Building general provides permitted height levels across the entire Rural Zone for buildings, structures or vegetation. This rule does not apply in those areas specified in Rules 22.3.4.2 – 22.3.4.4.*
(i) ...

Decision Reasons:

- The wording of the rule does not make it clear that the rules in 22.3.4.2 – 22.3.4.4 apply to the areas or activities specified in those rules instead of the height building general rule.

Point Number 697.801

Summary of Decision Requested:	Amend Rule 22.3.4.2 P1 (b) Height Frost Fans, as follows: <i>(b) The fan blades must not rotate higher than 13.5m <u>above ground level</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> Inserting the words "above ground level" clarify where the measurement for the frost fan blades must be taken from.
Point Number	697.802
Summary of Decision Requested:	Amend Rule 22.3.4.3 P1 Height - Buildings structures and vegetation within an airport obstacle limitation surface, as follows: <i>Any building, structure or vegetation must not protrude through any the Airport Obstacle Limitation Surface as shown <u>identified on the planning maps and defined in Section E Designation N – Waikato Regional Airport</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> This rule relates only to the Waikato Regional Airport and needs to specifically identify this. Additional wording provides clarity to the rule.
Point Number	697.803
Summary of Decision Requested:	Amend Rule 22.3.4.3 NC1 Height-Buildings structures and vegetation within an airport obstacle limitation surface to be a Discretionary Activity as follows: NC-D1 <i>Any building, structure or vegetation that does not comply with Rule 22.3.4.3 P1</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional wording provides clarity to the rule. Activity status to be more consistent with other zone chapters.
Point Number	697.804
Summary of Decision Requested:	Amend Rule 22.3.5 RD1 (b) Daylight admission, as follows: <i>(b) Council's discretion is restricted to the following matters: (i) Height of <u>the building</u>; (ii) Design and location of the building; (iii) Admission of daylight and sunlight to the site and other site; (iv) Privacy on <u>any</u> other site; (v) Amenity values of the locality.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.805
Summary of Decision Requested:	Amend Rule 22.3.6 P1 (a) Building coverage, as follows: <i>(a) The total building coverage must not exceed the larger of: (i) ...</i>
Decision Reasons:	<ul style="list-style-type: none"> Word 'total' not necessary. Also need consistency of wording across zone chapters.
Point Number	697.806
Summary of Decision Requested:	Amend Rule 22.3.6 D1 Building coverage, as follows: <i>A building <u>coverage</u> that does not comply with Rule 22.3.6 P1</i>
Decision Reasons:	<ul style="list-style-type: none"> This is to keep consistency of wording across zone chapters.
Point Number	697.807
Summary of Decision Requested:	Add a new clause (f) into Rule 22.3.7 Land use - Building, as follows: <i>(f) <u>Rule 22.3.7.7 Building setback – National Grid Yard</u></i> AND Add a new rule into Chapter 22, after Rule 22.3.7.7, as follows: <i><u>22.3.7.7 Buildings and structures within the National Grid Yard</u></i> <i><u>P1</u></i> <i><u>(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:</u></i> <i><u>(i) Not involve an increase in the building height or footprint; and</u></i> <i><u>(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.</u></i> <i><u>P2</u></i> <i><u>(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.</u></i> <i><u>P3</u></i> <i><u>Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:</u></i> <i><u>(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and</u></i> <i><u>(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:</u></i> <i><u>A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.</u></i> <i><u>P4</u></i> <i><u>Within the National Grid yard, non-habitable buildings or structures for farming activities must comply with the following conditions:</u></i> <i><u>(i) Not include buildings for intensive farming buildings, commercial greenhouses or milking / dairy sheds;</u></i> <i><u>(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission</u></i>

line operating conditions; and
 (i) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:
 A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
 P5
Within the National Grid yard, yards for milking / dairy sheds must comply with the following conditions:
 (i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and
 (ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:
 A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
 P6
Within the National Grid yard, artificial crop protection and support structures must comply with the following conditions:
 (i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and
 (ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:
 A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
 (iii) Artificial crop protection and support structures between 8m and 12m from a single pole support structure and any associated guy wire (but not tower) must also:
 A. Be maximum 2.5m high;
 B. Be removable or temporary, to allow a clear working space of at least 12 metres from the pole when necessary for maintenance and emergency repair purposes;
 C. Allow all-weather access to the pole and a sufficient area for maintenance equipment, including a crane.
 NCL
Any building alterations or additions within the National Grid Yard that does not comply with Rule 22.3.7.7 P1.
 NC2
Any new buildings or structures within the National Grid Yard that does not comply with Rule 22.3.7.7 P2, P3, P4, P5, or P6.
 NC3
Intensive farming buildings within the National Grid Yard.
 NC4
Commercial greenhouses within the National Grid Yard.
 NC5
Milking and dairy sheds within the National Grid Yard.

Decision Reasons:

- This is to replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 22 for increased clarity and usability of the Plan.

Point Number 697.808

Summary of Decision Requested: Amend Rule 22.3.7 Building setbacks to include Rules 22.3.7.3 and 22.3.7.4, as follows:

- (a) Rules 22.3.7.1 to 22.3.7.4 provide the permitted building setback distances for buildings from site boundaries, specific land use activities and environmental features.
 (b) Rule 22.3.7.1 Building setbacks – all boundaries provides permitted building setback distances from all boundaries on any site within the Rural Zone. Different setback distances are applied based on the type of building and the site area.
 (c) Rule 22.3.7.2 Building setback – sensitive land use provides permitted setback distances for any building containing a sensitive land use from specified land use activities.
 (d) Rule 22.3.7.3 – Building Te Kowhai Noise Buffer provides for permitted setbacks within the Te Kowhai Noise Buffer.
 (e) Rule 22.3.7.4 – Building – Noise Sensitive Activities provides setbacks for Noise Sensitive Activities
~~(f) Rule 22.3.7.3 Building setback – water bodies provides permitted setback distances from lakes, wetlands, rivers and the coast.~~
~~(g) Rule 22.3.7.4 Building setback – Environmental Protection Area provide specific setback distances from specified environmental features.~~

Decision Reasons:

- Rules 22.3.7.3 and 22.3.7.4 are missing from the list of building setbacks and need to be included.

Point Number 697.809

Summary of Decision Requested: Amend Rule 22.3.7.1 P1 (a) Building Setbacks - all boundaries, as follows:

- (a) A habitable building located on a ~~site~~ Record of Title less than 1.6ha must be set back a minimum of:...

Decision Reasons:

- The definition "record of title" has been included for correction.

Point Number 697.810

Summary of Decision Requested: Add a new clause (iii) to Rule 22.3.7.1 RD1 (b) Building Setbacks - all boundaries, as follows:

- (iii) reverse sensitivity.

Decision Reasons:

- This additional matter of discretion is required to be included in the planner's assessment of effects of this activity.

Point Number 697.811

Summary of Decision Requested: Add new rules to Rule 22.3.7.2 Building setback - sensitive land use, as follows:

- 22.3.7.2 Building setback – Sensitive land use.
 P2
 (a) Any building for a sensitive land use must be set back a minimum of:
 (i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;
 (ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.
 P3
 (a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:
 (i) Not increase the building height or footprint; and
 (ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and
 (iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
 D1
 Any building for a sensitive land use that does not comply with Rule 22.3.7.2 P1 or P2.
 NCL
 Any activity within the National Grid Yard that does not comply with Rule 22.3.7.2 P3.
 NC2

Any new building for a sensitive land use within the National Grid Yard
NC3
Any change of use of an existing building to a sensitive land use within the National Grid Yard
NC4
The establishment of any new sensitive land use within the National Grid Yard

Decision Reasons:

- This is to replicate the rule regarding sensitive land uses from Chapter 14 into Chapter 22 for increased clarity and usability of the Plan.

Point Number 697.812

Summary of Decision Requested: **Amend** Rule 22.3.7.5 P2 Building setback - waterbodies, as follows:

A public amenity of up to 25m², ~~and~~ or a pump shed (public or private), within any building setback identified in Rule 22.3.7.5 P1.

Decision Reasons:

- Additional word "or" in this rule provides clarity.
- The words "public or private" to clarify that the pump shed is both private and public.

Point Number 697.813

Summary of Decision Requested: **Amend** Rule 22.3.7.5 Building setback - waterbodies, as follows:

PI
(a) Any building must be set back a minimum of:
(i) 32m from the margin of any;
A. Lake; and
B. Wetland;
(ii) ~~22-32~~m from the bank of any river (other than the Waikato River and Waipa River);
(iii) ~~28-32~~m from the banks of the Waikato River and Waipa River; and
(iv) ~~22-32~~m from mean high water springs.

Decision Reasons:

- Amend the rule so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.814

Summary of Decision Requested: **Amend** Rule 22.3.8.3 P1 (a) All heritage items - alterations or additions, as follows:

(a) Alteration or addition to a heritage item listed in Schedule 30.1 (Historic Heritage Items) ~~where must comply with the following conditions:~~
(i) No significant feature of interest is removed, destroyed or damaged; and
(ii) Alterations or additions are not visible from a public place.

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number 697.815

Summary of Decision Requested: **Amend** Rule 22.3.8.4 P1 (a) All heritage items - maintenance or repair, as follows:

(a) Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items) ~~where must comply with the following conditions:~~
(i) No significant feature of interest is destroyed or damaged; and
(ii) Replacement materials are the same as, or similar to, the original in terms of form, style and appearance.

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number 697.816

Summary of Decision Requested: **Amend** Rule 22.3.8.4 RD1 (a) All heritage items - maintenance or repair, as follows:

(a) ~~Any activity~~ Maintenance or repair of a heritage item that does not comply with Rule 22.3.8.4 P1

Decision Reasons:

- This will provide consistency of wording across zone chapters.

Point Number 697.817

Summary of Decision Requested: **Amend** Rule 22.3.8.5 P1 (a) All heritage items - all site development, as follows:

Development on a site containing a heritage item listed in Schedule 30.1 (Historic Heritage Items) must comply with the following conditions:

Decision Reasons:

- This will provide consistency of wording across zone chapters.

Point Number 697.818

Summary of Decision Requested: **Amend** Rule 22.3.8.5 RD1 (b) All heritage items - all site development, as follows:

Council's discretion ~~is~~ shall be restricted to the following matters:

Decision Reasons:

- This will provide consistency across zone chapters.

Point Number 697.819

Summary of Decision Requested: **Amend** Rule 22.3.8.5 RD1 (b)(iv) All heritage items - all site development, as follows:

(iv) The relationship of the heritage item with the setting, including the area between the front of the heritage item and the road.

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number 697.820

Summary of Decision Requested: Amend Rule 22.4 Subdivision, as follows:
22.4 Subdivision - Rules

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number 697.821

Summary of Decision Requested: Add a new clause (h) to Rule 22.4.1(3) Subdivision, as follows:

(b) Rule 22.4.8A – subdivision within the National Grid Corridor.

AND

Amend consequential renumbering

AND

Add a new rule after Rule 22.4.8 as follows:

22.4.8A Subdivision within the National Grid Corridor.

RDL

(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions:

(i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and

(ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.

(b) Council's discretion is restricted to the following matters:

(i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;

(ii) The ability to provide a complying building platform outside of the National Grid Yard;

(iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;

(iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.

NCL

Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 22.4.8A RDL.

Decision Reasons:

- This is to replicate the subdivision rule within the National Grid Corridor from Chapter 14 into Chapter 22 for increased clarity and usability of the Plan.

Point Number 697.822

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, as follows:

Any subdivision within the Urban Expansion Area involving the creation of any additional ~~lot~~ record of title.

Decision Reasons:

- The definition "record of title" has been included for correction.

Point Number 697.823

Summary of Decision Requested: Amend Rule 22.4.1.1 PR2 Prohibited subdivision, as follows:

(a) Subdivision of a Record of Title issued prior to 6 December 1997, which results in more than one additional ~~lot~~ record of title being located on any high class soil.

(b) Exceptions to PR2(a) are where an additional ~~lot~~ record of title is created by any of the following rules:

(i) ...

Decision Reasons:

- The definition "record of title" has been included for correction.

Point Number 697.824

Summary of Decision Requested: Amend Rule 22.4.1.1 PR3 Prohibited subdivision, as follows:

(a) Subdivision of a Record of Title issued on or after 6 December 1997, which results in any additional ~~lot~~ record of title being located on any high class soil.

(b) Exceptions to PR3(a) are where an additional ~~lot~~ record of title is created by any of the following:

(i) Conservation lot subdivision (Rule 22.4.1.6);

(ii) Reserve lot subdivision (Rule 22.4.1.7);

(iii) Access allotment or utility allotment using Rule 14.12 (Transportation);

(iv) Subdivision of Maori Freehold land (Rule 22.4.1.3);

(v) A boundary relocation (Rule 22.4.1.4).

(c) Rule PR3(a) does not apply to any records of title that were created by the following:

(i) a boundary relocation or adjustment between Records of Title that existed prior to 6 December 1997; (refer to Rule 22.4.1.4); or

(ii) a process other than subdivision under the Resource Management Act 1991.

Decision Reasons:

- The definition "record of title" has been included for correction.
- Rule PR3(b)(v) expressly exempts boundary relocations from this rule.

Point Number 697.825

Summary of Decision Requested: Amend Rule 22.4.1.1 PR4 Prohibited subdivision, as follows:

(a) Notwithstanding rule PR3(c)(ii), any proposed subdivision where of any record of title that has been used as a donor lot has been created for the purpose of a transferable rural lot right subdivision under the provisions of the previous Operative Waikato District Plan – Franklin Section, irrespective of how the donor record of title was created, by either:

(i) Amalgamation; or

(ii) Re-survey

Decision Reasons:

- Rule clarifies donor properties used for transferable rural subdivision.

Point Number 697.826

Summary of Decision Requested: Amend Rule 22.4.1.2 General subdivision as follows:

- (a) Subdivision must comply with all of the following conditions:
(i) The Record of Title to be subdivided must have issued prior to 6 December 1997;
(ii) The Record of Title to be subdivided must be at least 20 hectares in area;
(iii) The proposed subdivision must create no more than one additional lot, excluding an access allotment or utility allotment.
(iv) The additional lot must have a proposed area of between 8,000m² and 1.6 ha;
(v) Where there is land containing high class soil (as determined by a Land Use Capability Assessment prepared by a suitably qualified person) must be contained within the boundaries of only two lots as follows:
~~A - one the larger lot must contain a minimum of 80% of the high class soil; and~~
~~B - the other lot may contain up to 20% of high class soil.~~
(b) ...

Decision Reasons:

- Words included to provide clarity to the rule.

Point Number 697.827

Summary of Decision Requested: Amend Rule 22.4.1.4 Boundary relocation, as follows:

- (a) The boundary relocation must:
(i) Relocate a common boundary or boundaries between two existing viable Records of Title. ~~that existed prior to 18 July 2019.~~
(ii) The Records of Title must form a continuous landholding;
(iii) Not result in any additional lot;
(iv) ~~Create one lot of~~ All lots created by the subdivision must be at least 8,000m² in area.
(b) Council's discretion is restricted to the following matters:
(i) subdivision layout and design including dimension, shape and orientation of the proposed lots;
(ii) effects on rural character and amenity values;
(iii) effects on landscape values; ~~and~~
(iv) potential for reverse sensitivity effects; and
(v) Fragmentation and usability of land for rural purposes.

Decision Reasons:

- Rule 22.4.1.4 requires qualifying records of title to be "viable". A definition has been proposed for this. In respect to condition (a)(iv) it requires re-worded to ensure that all lots created by the subdivision are at least 8,000m².
- Matter of discretion (v) has been added to ensure that applications assess the fragmentation and usability of land for rural purposes as part of their applications.

Point Number 697.828

Summary of Decision Requested: Amend Rule 22.4.1.5 RD1 (a) Rural Hamlet Subdivision, as follows:

- (a) Subdivision to create a Rural Hamlet must comply with all of the following conditions:
(i) It results in a single cluster of 3 to 5 proposed lots being clustered together;
(ii) All existing Records of Title form one continuous landholding;
(iii) Each proposed lot has a minimum area of 8,000m².
(iv) Each proposed lot has a maximum area of 1.6ha;
(v) The proposed balance lot has a minimum area of 20ha; and
(vi) It does not create any additional lots beyond the number of existing viable Records of Title.

Decision Reasons:

- Providing the wording "a single cluster of" makes it clear to the applicant that proposed lots must be clustered together.

Point Number 697.829

Summary of Decision Requested: Amend Rule 22.4.1.7 Subdivision to create a reserve heading, as follows:

Subdivision to create a reserve and incentive lot

Decision Reasons:

- This is to provide clarity to this rule.

Point Number 697.830

Summary of Decision Requested: Amend Rule 22.4.1.7 RD1 (a)(iii) Subdivision to create a reserve, as follows:

(iii) No more than one additional lot in addition to the balance lot is created, excluding any land vested in Council.

Decision Reasons:

- This is to provide clarity to this rule.

Point Number 697.831

Summary of Decision Requested: Amend Rule 22.4.2 Title boundaries-natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas heading, as follows:

~~Title boundaries - Existing Buildings, natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas~~

Decision Reasons:

- This rule heading needs amending to reflect the changes being made to RD1.

Point Number 697.832

Summary of Decision Requested: Amend Rule 22.4.2 Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas, as follows:

~~(a) Subdivision of land containing any natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities or Aggregate Extraction Areas must comply with all of the following conditions:~~
~~(i) The boundaries of every proposed lot containing existing buildings must demonstrate that existing buildings comply with the Land Use-Building rules in Rule 22.3 relating to:~~
~~A-(i) Rule 22.3.1 (Number of Dwellings within a Record of Title);~~
~~B-(ii) Rule 22.3.5 (Daylight admission);~~
~~C-(iii) Rule 22.3.6 (Building coverage);~~
~~D-(iv) Rule 22.3.7 (Building setbacks);~~
~~E-(v) Rule 22.3.7.2 (Building setback sensitive land use).~~
~~(ii) Rule 22.4.2 RD1 (a)(i) does not apply to any noncompliance with the Land Use-Building rules in Rule 22.3 that existed lawfully prior to the subdivision.~~
~~(iii) The boundaries of every proposed lot must not divide any of the following:~~
~~A- A natural hazard area;~~
~~B- Contaminated land;~~
~~C- Significant Amenity Landscape;~~
~~D- Notable trees.~~
 (b) Council's discretion is restricted to the following matters:
 (i) landscape values;
 (ii) amenity values and character;
 (iii) reverse sensitivity effects;
 (iv) effects on existing buildings;
~~(v) effects on natural hazard areas;~~
~~(vi) effects on contaminated land;~~
~~(vii) effects on any notable trees;~~
~~(viii) effects on an intensive farming activity;~~
~~(ix) effects on any Aggregate Extraction Area.~~

Decision Reasons:

- Rule needs amending to provide clarity that its purpose relates to existing buildings, not land and other features.
- Consequential changes to be made in other rules.
- Reference to Rule 22.3.7.2 has been inserted to ensure compliance with this rule is also required for subdivision where sensitive land use activities exist.

Point Number

697.833

Summary of Decision Requested:

Amend Rule 22.4.3 Title boundaries - Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance heading, as follows:

Title boundaries – Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance, notable trees

Decision Reasons:

- In response to the changes made to Rule 22.4.2 and in respect to notable trees, it is logical to add it to this rule.

Point Number

697.834

Summary of Decision Requested:

Add a new rule to Rule 22.4.3 RD1(a) Title boundaries - Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance as follows:

(v) Notable trees.

Decision Reasons:

- This is as a consequential amendment of the removal of notable tree from Rule 22.4.2 RD1.

Point Number

697.835

Summary of Decision Requested:

Add a new matter of discretion to Rule 22.4.3 RD1(b) Title boundaries - Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance, as follows:

(v) Effects on notable trees.

Decision Reasons:

- This is as a consequential amendment to the removal of notable tree from Rule 22.4.2 RD1.

Point Number

697.836

Summary of Decision Requested:

Add a new rule to Rule 22.4.5 D1(a) Subdivision within identified areas, as follows:

(ix) A natural hazard area

Decision Reasons:

- This is as a consequential amendment of the removal of natural hazard area from Rule 22.4.2 RD1.

Point Number

697.837

Summary of Decision Requested:

Add a new matter of discretion to Rule 22.4.6 D1(b) Subdivision of land containing all or part of an Environmental Protection Area, as follows:

(vi) Legal protection if appropriate.

Decision Reasons:

- An additional matter of discretion is required to enable the assessment as to whether legal protection is required.

Point Number

697.838

Summary of Decision Requested:

Amend Rule 22.4.8 Subdivision of land containing heritage items heading, as follows:

Subdivision of land containing a heritage items

Decision Reasons:

- This is to provide clarity to this rule.

Point Number

697.839

Summary of Decision Requested: Amend Rule 22.4.9 RDI(a) Building platform, as follows:
*(a) Subdivision, other than an access or utility allotment, must provide a building platform on ~~the every proposed lot that~~ meets all of the following conditions:
(i) Has an area of 1,000m² exclusive of boundary setbacks;
(ii) Has an average gradient not steeper than 1:8;
(iii) Is certified by a geotechnical engineer as geotechnically stable and suitable for a building platform;
(iv) Has vehicular access in accordance with Rule 14.12.1 P1 (Transportation)
(v) Is not subject to inundation in a 2% AEP storm or flood event;
(vi) a dwelling could be built ~~as~~ as a permitted activity in accordance with Land Use - Building Rules in Rule 22.3.*

Decision Reasons:

- This is to provide clarity to this rule.

Point Number 697.840

Summary of Decision Requested: Amend Rule 22.4.9(b)(iii) Building platform, as follows:
(iii) Likely location of future buildings ~~and their potential effects on the environment~~

Decision Reasons:

- This is to revise the matter of discretion so that it is meaningful.

Point Number 697.841

Summary of Decision Requested: Amend Rule 22.4.1.6 Conservation lot subdivision, to provide further clarity in the table between areas inside and outside of the Hamilton Basin Ecological Management Area.
Refer to Page 510 of the submission for details.

Decision Reasons:

- The amendments to this rule provides further clarity in the table between areas inside the Hamilton Basin Ecological Management Area and outside makes it easier for the plan users to interpret the rule.

Point Number 697.842

Summary of Decision Requested: Amend Rule 22.5.2 Specific Area - Agricultural Research Centre heading, as follows:
Permitted activities ~~Agricultural and horticultural research activities~~

Decision Reasons:

- This is to provide consistency with across the zones.

Point Number 697.843

Summary of Decision Requested: Amend the heading of Rule 22.7 Specific Area - Whaanga Coast Development Areas, as follows:
Whaanga Coast
AND
Amend to make consequential changes where relevant.

Decision Reasons:

- This is to provide consistency with the name for the Whaanga Coast Specific Area.

Point Number 697.844

Summary of Decision Requested: Amend Chapter 23 Country Living Zone heading, as follows:
Chapter 23: Country Living Zone ~~Rules~~

Decision Reasons:

- This is to assist in clarifying that all of the provisions within the chapter are rules.

Point Number 697.845

Summary of Decision Requested: Amend Rule 23(2) Country Living Zone, as follows:
The rules that apply to subdivision in the Country Living Zone are contained in Rule 23.4 and the relevant rules in 14 Infrastructure and Energy; and 15 Natural Hazards and Climate Change (Placeholder).

Decision Reasons:

- This is to clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.846

Summary of Decision Requested: Amend Rule 23.1.1 P1 Permitted Activities, as follows:
*(a) ~~Activity-specific conditions~~;
(b) Land Use – Effects rules in Rule 22.2 (unless the activity rule and/or ~~activity-specific~~ conditions identify a condition(s) that does not apply);
(c) Land Use – Building rules in Rule 22.3 (unless the activity rule and/or ~~activity-specific~~ conditions identify a condition(s) that does not apply);
(d) ~~Activity-specific conditions~~.*

Decision Reasons:

- The list of rules (a) – (c) should follow the order that they appear.

Point Number	697.847
Summary of Decision Requested:	Amend Rule 23.1.1 P2 Permitted Activities, as follows: <i>Home stay <u>for up to 4 people</u></i>
Decision Reasons:	<ul style="list-style-type: none"> This amendment makes it clear that the activity is permitted for up to 4 people.
Point Number	697.848
Summary of Decision Requested:	Amend Rule 23.1.1 P4(d) and (e) Permitted Activities, as follows: <i>(d) Unloading and loading of vehicles and/or the receiving of customers at and deliveries <u>can only occur after 7:30am and before 7:00pm on any day;</u> (e) Machinery may only be operated after 7:30am and up to 4pm on any day.</i>
Decision Reasons:	<ul style="list-style-type: none"> To align the hours for the activity with the noise rule (23.2.1) for this zone.
Point Number	697.849
Summary of Decision Requested:	Add a new permitted activity (P5) to Rule 23.1.1 P5 Permitted Activities, as follows: <u>P5</u> <u>Travellers' Accommodation</u> <i>(a) <u>For up to 5 people.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> Travellers' accommodation has been provided for as a Discretionary Activity, but not a permitted activity. This needs to be consistent with other zone chapters.
Point Number	697.850
Summary of Decision Requested:	Add a new permitted activity (P6) to Rule 23.1.1 Permitted Activities, as follows: <u>Amendment or alteration to an existing retirement village</u> <u>Specific activity conditions:</u> <i>(a) <u>The site is already serviced with water, wastewater and stormwater infrastructure;</u> (b) <u>Total building coverage of the site or combination of sites does not exceed 65% including all impervious surfaces areas; and</u> (c) <u>Building height does not exceed 8m, except for 10m on 30% of the total site coverage.</u></i>
Decision Reasons:	<ul style="list-style-type: none"> A new rule is required to accommodate Tamahere Eventide.
Point Number	697.851
Summary of Decision Requested:	Amend Rule 23.1.2 D1 Discretionary Activities, as follows: <i>Any permitted activity that does not comply with <u>one or more of the the 'Activity Specific Conditions'</u> in Rule 23.1.1</i>
Decision Reasons:	<ul style="list-style-type: none"> This is to provide consistency with other chapters and additional clarity of the rule.
Point Number	697.852
Summary of Decision Requested:	Delete Rule 23.1.2 D2 Discretionary Activities.
Decision Reasons:	<ul style="list-style-type: none"> This rule is not needed as it refers to Land Use Effects and Land Use Building rules, which are in subsequent parts of the chapter.
Point Number	697.853
Summary of Decision Requested:	Amend Rule 23.1.2 D9 Discretionary Activities, as follows: <i>Travellers' accommodation <u>for more than 5 people</u></i>
Decision Reasons:	<ul style="list-style-type: none"> This amendment makes it clear that the activity is for more than 5 people, which is consistent with other zone chapters.
Point Number	697.854
Summary of Decision Requested:	Add a new discretionary activity (D12) to Rule 23.1.2 Discretionary Activities, as follows: <u>A home stay for more than 4 people.</u>
Decision Reasons:	<ul style="list-style-type: none"> A homestay activity has been provided for as a permitted activity (Rule 23.1.1 P2), which has also been proposed to be amended to include provision for up to 4 people. However for clarity; homestay for more than 4 people needs to be provided as a Discretionary activity.
Point Number	697.855
Summary of Decision Requested:	Add a new non-complying activity (NC13) to Rule 23.1.3 Non-Complying Activities, as follows:

(g) The following activities located within the Urban Expansion Area:

- (i) intensive farming;
- (ii) storage, processing or disposal of hazardous waste;
- (iii) correctional facility;
- (iv) extractive industry;
- (v) industrial activity;
- (vi) motorised recreation activity;
- (vii) transport depot;
- (viii) rural industry;

Decision Reasons:

- A new rule is required to provide consistency with the rural zone for activities situated within the Urban Expansion Area.

Point Number 697.856

Summary of Decision Requested: Delete Rule 23.2.1.1 P3 Noise - General;

AND

Amend Rule 23.2.1.1 P2 Noise - General, as follows:

(a) Noise measured at the notional boundary within any site in the Rural Zone and within any other site in the Country Living Zone must not exceed:

- (i) 50dB (LAeq), 7am to 7pm every day;
- (ii) 45dB (LAeq), 7pm to 10pm every day;
- (iii) 40dB (LAeq) and 65dB (LAmax), 10pm to 7am the following day.

(b) Noise measured within any site in any other zone, other than the Rural Zone, must meet the permitted noise levels for that other zone.

(i) Noise levels must be measured in accordance with the requirements of New Zealand Standard NZS 6801:2008 "Acoustics Measurement of Environmental Sound".

(ii) Noise levels must be assessed in accordance with the requirements of New Zealand Standard NZS 6802:2008 "Acoustic Environmental noise".

AND

Amend Rule 23.2.1.1 DI, as follows:

Noise that does not comply with Rule 23.2.1.1 P1, P2, ~~P3~~, P4 or P5.

Decision Reasons:

- Including the standards referred to in P5 ensure that they are complied with in conjunction with the rule.

Point Number 697.857

Summary of Decision Requested: Delete Rule 23.2.1.1 P5 Noise - General;

AND

Add to Rule 23.2.1.1 P4(a) Noise - General, as follows:

(c) Noise levels shall be measured in accordance with the requirements of Standard NZS 6801:2008 "Acoustics Measurement of Environmental Sound".

(d) Noise levels shall be assessed in accordance with the requirements of Standard NZS 6802:2008 "Acoustic Environmental noise".

AND

Amend Rule 23.2.1.1 DI, as follows:

Noise that does not comply with Rule 23.2.1.1 P1, P2, P3, or P4 ~~or P5~~

Decision Reasons:

- The word "noise" provides clarity to this rule.
- Including the standards referred to in P5 ensure that they are complied with in conjunction with the rule.
- As a consequential amendments.

Point Number 697.858

Summary of Decision Requested: **Amend** Rule 23.2.1.2 P1(a) Noise - Construction, as follows:

Noise generated from the construction site must ~~not exceed~~ meet the limits in NZS 6803:1999 (Acoustics – Construction Noise);

Decision Reasons:

- Additional clarity to the rule. Construction noise should not exceed the limits, rather than meet the limits in the New Zealand Standards.

Point Number 697.859

Summary of Decision Requested: **Amend** Rule 23.2.3(2) Earthworks, as follows:

There are specific standards for earthworks within rules:

- (a) Rule 23.2.3.1A – Earthworks within the National Grid Yard
- ~~(a-b)~~ Rule 23.2.3.2 – Maaori Sites and Maaori Areas of Significance;
- ~~(b-c)~~ Rule 23.2.3.3 – Significant Natural Areas;
- ~~(c-d)~~ Rule 23.2.3.4 – Landscape and Natural Character Areas.

AND

Add a new rule to Rule 23.2.3 Earthworks as follows:

23.2.3.1A Earthworks within the National Grid Yard

P1

(a) The following earthworks within the National Grid Yard:

(i) Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;

(ii) Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;

(iii) Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663;

P2

(a) Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:

(i) Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and

(ii) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.

P3

(a) Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:

(i) Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;

(ii) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;

(iii) Do not compromise the stability of a National Grid support structure;

(iv) Do not result in the loss of access to any National Grid support structure; and

(v) Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

RD1
(a) Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 23.2.3.1A P1, P2 or P3.
(b) Discretion is restricted to:
(i) Impacts on the operation, maintenance, upgrading and development of the National Grid;
(ii) The risk to the structural integrity of the affected National Grid support structure(s);
(iii) Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;
(iv) The risk of electrical hazards affecting public or individual safety, and the risk of property damage.

Decision Reasons:

- This is to replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 23 for increased clarity and usability of the Plan.

Point Number 697.860

Summary of Decision Requested: Amend Rule 23.2.3(1) Earthworks, as follows:

(1) Rule 23.2.3.1 – Earthworks General, provides the permitted rules for earthworks activities for the Rural Zone. This rule does not apply in those areas specified in Rule 23.2.3.1A, 23.2.3.2, 23.2.3.3 and 23.2.3.4.

Decision Reasons:

- The wording of the rule does not make it clear that the rules in 23.2.3(2) apply to the areas specified in that rule instead of the general earthworks rule.

Point Number 697.861

Summary of Decision Requested: Delete Rule 23.2.3.1 P1(a)(ii) Earthworks - General.

Decision Reasons:

- The content of this rule is already contained within the definition of ancillary rural earthworks.

Point Number 697.862

Summary of Decision Requested: Amend Rule 22.2.3.1 P1(a)(iii) Earthworks - General, as follows:

(iii) A building platform for a residential activity, including an accessory building, carried out in accordance with NZS 4431:1989 Code of Practice for Earth Fill for Residential Development.

Decision Reasons:

- For clarity of the rule, it makes sense that the NZS 4431:1989 Code of Practice for Earth Fill for Residential Development is applied to this rule instead of P3.

Point Number 697.863

Summary of Decision Requested: Amend Rule 23.2.3.1 P2(a) Earthworks - General, as follows:

(i) Do not exceed a volume of more than 250m³ and an area of more than 1000m² within a site over any single consecutive 12 month period;

...

(iii) Earthworks are setback at least 1.5m from any boundary;

Decision Reasons:

- The words "consecutive" and "at least" provide clarity to this rule.

Point Number 697.864

Summary of Decision Requested: Delete Rule 23.2.3.1 P3 Earthworks - General;

AND

Amend Rule 23.2.3.1 RD1(a), as follows:

(a) Earthworks that do not comply with Rule 23.2.3.1 P1, P2, ~~P3~~ or P4.

Decision Reasons:

- P3 has been included in Rule 23.2.3.1 P1(a)(iii) for efficiency and clarity.
- As a consequential amendment.

Point Number 697.865

Summary of Decision Requested: Amend Rule 23.2.3.1 P4(a)(iv) Earthworks - General, as follows:

(iv) Fill material is setback at least 1.5m from all boundaries;

Decision Reasons:

- The words "at least" provide clarity to this rule.

Point Number 697.866

Summary of Decision Requested: Delete Rule 23.2.3.2 RD2(b)(i) Earthworks - Maori Sites and Maori Areas of Significance.

Decision Reasons:

- This matter of discretion does not assist the planner or applicant in any way as Maori areas of significance relate to the whole site.

Point Number 697.867

Summary of Decision Requested: Amend Rule 22.2.3.3 P1(a) Earthworks - Significant Natural Areas, as follows:

- (a) Earthworks are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area that meet all of the following conditions:
- (i) Maximum volume of 50m³ in any single consecutive 12 month period;
 - (ii) Maximum area of 250m² in any single consecutive 12 month period; ~~and~~
 - (iii) Not include imparting any fill material; and
 - (iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level with a maximum slope of 1:2 (1 vertical to 2 horizontal);
 - (v) Earthworks are setback at least 1.5m from all boundaries;
 - (vi) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;
 - (vii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;
 - (viii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.

Decision Reasons:

- Wording provides clarity and consistency with other chapters.

Point Number 697.868

Summary of Decision Requested: Delete Rule 23.2.3.3 D1 Earthworks - Significant Natural Areas.

Decision Reasons:

- D1 is not necessary as activity becomes restricted discretionary upon non-compliance of a permitted activity condition.

Point Number 697.869

Summary of Decision Requested: Amend Rule 23.2.3.4 P1 (a) Earthworks - within Landscape and Natural Character Areas, as follows:

- (a) Earthworks are for the maintenance of existing tracks, fences or drains within the following landscapes, natural features and natural character areas:
- (i) Hill Country Significant Amenity Landscape;
 - (ii) Significant Amenity Landscape (SAL) – Waikato river and margins and lakes;
 - (iii) Significant Amenity Landscape (SAL) – sand dune
 - (iv) High or Outstanding Natural Character area of the coastal environment
 - (v) Outstanding Natural Feature sand dune
 - (vi) Outstanding Natural Feature (ONF)
 - (vii) Outstanding Natural Landscapes (ONLs)
- ~~an identified Landscape or Natural Character Area~~ and must meet all of the following conditions:
- (i) The earthworks are undertaken within any single consecutive 12 month period;
 - (ii) The earthworks must not exceed the following areas and volumes within any single consecutive 12 month period:

Decision Reasons:

- The additional wording provides clarification as to which areas are being encompassed by this rule.
- The words "any single consecutive" provides clarity to the rule.

Point Number 697.870

Summary of Decision Requested: Amend Rule 23.2.4 P1(a)(i) Hazardous substances, as follows:

- (i) The aggregate quantity of any hazardous substance of any hazard classification on a site is less than the quantity specified for the Country Living Zone in Table 6.1 contained within Appendix 5 (Hazardous Substances); and

Decision Reasons:

- The words "contained within" are not required.

Point Number 697.871

Summary of Decision Requested: Delete Rule 23.2.4 C1 Hazardous substances.

AND
Amend Rule 23.3.4 D1 Hazardous substances, as follows:
 Rule 23.2.4 P1, ~~or P2 or C1.~~

Decision Reasons:

- C1 is not appropriate within the Country Living Zone and is to be replaced with a Non-Complying Activity.

Point Number 697.872

Summary of Decision Requested: Amend Rule 23.2.4 to insert NCI Hazardous substances, as follows:

NCI
The storage of fuel for retail sale within service station in the Country Living Zone.

Decision Reasons:

- This new rule provides a more restrictive approach than current C1, as this is a sensitive environment.

Point Number 697.873

Summary of Decision Requested: Add a new non-complying activity (NC2) to Rule 23.2.4 Hazardous substances, as follows:

NC2
Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- This is to replicate the hazardous facilities rule within the National Grid from Chapter 14 into Chapter 23 for increased clarity and usability of the Plan.

Point Number 697.874

Summary of Decision Requested: Amend Rule 23.2.5.1 RD1(b)(i) Notable tree - removal or destruction, as follows:

- (i) timing and manner in which the activity is carried out; and

Decision Reasons:

- The word "and" provides clarity to the rule.

Point Number 697.875

Summary of Decision Requested: **Amend** Rule 23.2.5.2 RD1(b)(i) Notable tree - trimming, as follows:
(i) Timing and manner in which the activity is carried out; and

Decision Reasons:

- The word "and" provides clarity to the rule.

Point Number 697.876

Summary of Decision Requested: **Amend** Rule 23.2.5.3 P1 (a) Notable tree - activities within the dripline, as follows:
(a) Any activity within the dripline of a notable tree identified in Schedule 30.2 (Notable Trees) must not involve:
(i) Involves excavation, compaction, sealing or soil disturbance ~~and~~ or placement of fill material, or cleanfill, except for sealing of an existing road or footpath;
(ii) Involves parking or storage of materials, vehicles or machinery;
(iii) discharge of an eco-toxic substance; and
(iv) Involves construction of any structure.

Decision Reasons:

- This is to provide clarity to the rule and consistency across all zone chapters.

Point Number 697.877

Summary of Decision Requested: **Amend** Rule 23.2.5.3 RD1(a) Notable tree - activities within the dripline, as follows:
(b) Any activity within the dripline of the notable tree that does not comply with Rule 23.2.5.3 P1

Decision Reasons:

- The words "within the dripline of the notable tree" provide clarity to the rule.

Point Number 697.878

Summary of Decision Requested: **Delete** Rule 23.2.6.1 P2(a)(viii) Signs - General;
AND
Amend Rule 23.2.6.1 P2(a)(xi) Signs - General, as follows:
(xi) The sign is for the purpose of identification and interpretation not attached to a Maaori site of significance listed in Schedule 30.3 (Maaori Sites of Significance) ~~except for the purpose of identification and interpretation.~~

Decision Reasons:

- Re-wording this rule provides clarity.
- P2(a)(viii) is not required because the Country Living Zone provisions do not apply within the road reserve.

Point Number 697.879

Summary of Decision Requested: **Amend** Rule 23.2.6.1 P3 Signs – General as follows:
(a) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must comply with all of the following conditions:
(i) There is no more than ~~3~~ signs per site agency;
(ii) The sign is not illuminated;
(iii) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;
(iv) ~~The sign does not project into or over road reserve.~~

Decision Reasons:

- This rule excluded signs for rental properties and provided for only 1 sign per agency, as opposed to the site.
- This proposed wording provides clarification.
- P3(a)(iv) is not required as the Country Living zone provisions do not apply within the road reserve.

Point Number 697.880

Summary of Decision Requested: **Amend** Rule 23.2.6.2 P1 (a) Signs - effects on Traffic, as follows:
(a) Any sign directed at road users must meet the following conditions:
(i) Not imitate the content, colour or appearance of any traffic control sign; and
(ii) Be located at least 60m from controlled intersections, pedestrian crossings and any other sign; and
(iii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections; and
~~Be able to be viewed by drivers for at least 250m; and~~
(v) Contain no more than 40 characters and no more than 6 symbols; and
(vi) Have lettering that is at least 200mm high; and
(vii) Comply with the following Where the sign directs traffic to a site entrance the sign must be at least:
A. 1.75m from the site entrance on any road with a speed limit of 80 km/hr or less; or
B. 250m from the site entrance on any road with a speed limit of more than 80km/hr.

Decision Reasons:

- The amended wording provides clarity for the rule and consistency with other rules.
- This rule is unachievable and not appropriate for the purpose of the Country Living Zone.

Point Number 697.881

Summary of Decision Requested: **Delete** Rule 23.2.7 Outdoor Storage.

Decision Reasons:

- This rule needs to be deleted, as this is difficult to enforce in the Country Living Zone.
- There are no rules included in the plan for Residential, Village or Rural zones.

Point Number 697.882

Summary of Decision Requested: **Amend** Rule 23.2.8 Indigenous vegetation clearance inside a Significant Natural Area heading, as follows:
Indigenous vegetation clearance ~~inside~~ within a Significant Natural Area

Decision Reasons:

- This wording provides clarity.

Point Number 697.883

Summary of Decision Requested: **Add** a new clause (vi) to Rule 23.2.8 P1 (a) Indigenous vegetation clearance inside a Significant Natural Area, as follows:
(vi) Removing vegetation for conservation activities.

Decision Reasons:

- This new rule ensures indigenous vegetation can be cleared for conservation activities.

Point Number 697.884

Summary of Decision Requested: **Amend** Rule 23.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area, as follows:
Removal of up to 5m3 of manuka and/or kanuka outside of the Coastal Environment per year per ~~property site~~ for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

Decision Reasons:

- This will provide additional clarity that the rule is intended to apply “per site” rather than “per property” which is not a defined term.

Point Number 697.885

Summary of Decision Requested: **Delete** Rule 23.2.8 P5 Indigenous vegetation clearance inside a Significant Natural Area;
AND
Amend Rule 23.2.8 D1 Indigenous vegetation clearance inside a Significant Natural Area, as follows:
...P4, ~~P5~~ or P6.

Decision Reasons:

- Rule P5 duplicates P1 with the only difference being that P5 captures Maaori Freehold land or Maaori Customary land, which is already captured by P1.
- As a consequential amendment.

Point Number 697.886

Summary of Decision Requested: **Delete** Rule 23.2.8 P6 Indigenous vegetation - outside a Significant Natural Area;
AND
Amend Rule 23.2.8 D1 Indigenous vegetation clearance - outside a Significant Natural Area, as follows:
...P4, or P5 ~~or P6~~.

Decision Reasons:

- The activity in P6 is a repeat of P2.
- As a consequential amendment.

Point Number 697.887

Summary of Decision Requested: **Amend** Rule 23.2.9 Indigenous vegetation clearance - outside a Significant Natural Area heading, as follows:
Indigenous vegetation clearance – ~~outside a Significant Natural Area-general~~

Decision Reasons:

- The heading “outside a Significant Natural Area” is confusing, as the provision relates to all areas of the Country Living Zone that is not covered by a Significant Natural Area.

Point Number 697.888

Summary of Decision Requested: **Amend** Rule 23.2.9 P1 (a)(ii) Indigenous vegetation clearance - outside a Significant Natural Area, as follows:
(ii) maintaining productive pasture through the removal of up to 1000m² per single consecutive 12 month period year of manuka and/or kanuka that is at least more than 10m from a waterbody, and less than 4m in height; or

Decision Reasons:

- The additional wording in this rule provides clarity.

Point Number 697.889

Summary of Decision Requested: **Amend** Rule 23.2.9 RD1 (b) (iii) Indigenous vegetation clearance - outside a Significant Natural Area, as follows:
(iii) The ~~extent to which~~ cumulative effects of the vegetation clearance have been considered and addressed.

Decision Reasons:

- Amendments required to wording to ensure that the intent of the rule is correct and formatting changed in (b)(iii) to be clear.

Point Number 697.890

Summary of Decision Requested: Amend Rule 23.3.1 P1 Dwelling, as follows:

~~(a) One dwelling within a site record of title;~~
~~(b) The dwelling must not be located within any of the following landscape and natural character areas;~~
~~(i) ...~~

Decision Reasons:

- The reference to "record of title" has been included for correction and other words for clarity of the rule.

Point Number 697.891

Summary of Decision Requested: Amend Rule 23.3.2 P1 Minor dwelling as follows:

~~(a) One minor dwelling within a site record of title must comply with all of the following conditions: not exceed 70m² gfa;~~
~~(i) Where there is an existing dwelling located within a site not exceed 70m² gross floor area;~~
~~(ii) The minor dwelling must be located within 20m of the principal residential unit dwelling;~~
~~(iii) The minor dwelling must share a single driveway access with the existing principal residential unit dwelling;~~

Decision Reasons:

- These amendments provide clarity of rule and alignment with the definition for minor dwelling.

Point Number 697.892

Summary of Decision Requested: Amend Rule 23.3.3 D1 (a) Buildings and structures in Landscape and Natural Character Areas, as follows:

~~(a) Any building or structure that is located within any of the following landscape and natural character areas;~~
~~(i) ...~~

Decision Reasons:

- The additional words in this rule provide clarity.

Point Number 697.893

Summary of Decision Requested: Amend Rule 23.3.4(2) Height, as follows:

~~(2) Rule 23.3.4.1 – Height - Building general provides permitted height levels across the entire Rural Zone for buildings, structures or vegetation. This rule does not apply in those areas specified in Rule 23.3.4.2.~~

Decision Reasons:

- The wording of the rule does not make it clear that Rule 23.3.4.2 applies to the areas specified in that rule instead of the height building general rule.

Point Number 697.894

Summary of Decision Requested: Amend Rule 23.3.4.2 P1 Height - Buildings, structures and vegetation within an airport obstacle limitation surface, as follows:

~~Any building, structure or vegetation that does not protrude through ~~any~~ the airport obstacle limitation surface as ~~shown~~ identified on the planning maps in Appendix 9 – Te Kowhai Airfield, and defined in Section E, Designation N – Waikato Regional Airport.~~

Decision Reasons:

- This rule applies to both the Te Kowhai Airfield and the Waikato Regional Airport so needs to be specified.
- The additional wording provides clarity to the rule.

Point Number 697.895

Summary of Decision Requested: Amend Rule 23.3.4.2 NCI Height - Buildings, structures and vegetation within an airport obstacle limitation surface to be a Discretionary activity rather than a non complying activity as follows:

~~NCI-D1~~
~~Any building, structure or vegetation that does not comply with Rule 23.3.4.2 P1.~~

Decision Reasons:

- This additional wording provides clarity to the rule.
- Non-compliance with the permitted activity standards is more appropriate as a discretionary activity.

Point Number 697.896

Summary of Decision Requested: Add a new rule to Rule 23.3 Land Use - Building after Rule 23.3.6 Building coverage, as follows:

~~Rule 23.3.6A Impervious surfaces~~
~~PI~~
~~The impervious surface of a site must not exceed 70%.~~
~~RDI~~
~~(a) Impervious surfaces that does not comply with Rule 23.3.4A P1~~
~~(b) Council's discretion is restricted to the following matters:~~
~~(i) Site design, layout and amenity;~~
~~(ii) The risk of flooding, nuisance or damage to the site or other buildings and sites.~~

Decision Reasons:

- This is to include the impervious surfaces rule from Rule 14.1.1.(P2) and 14.1.2.(RD2) into Chapter 23 to make it easier to find.

Point Number 697.897

Summary of Decision Requested:

Amend Rule 23.3.5 RD1 (b) Daylight admission, as follows:

- (b) Council's discretion is restricted to the following matters:
- (i) Height of ~~the building~~;
 - (ii) Design and location of the building;
 - (iii) Admission of daylight and sunlight to the site and other site;
 - (iv) Privacy on ~~any other~~ site;
 - (v) ~~Effects on amenity values of the locality.~~

Decision Reasons:

- This additional wording provides clarity to the rule in respect to shading and other sites.
- This provides consistency with other zone chapters.

Point Number

697.898

Summary of Decision Requested:

Amend Rule 23.3.6 P1 Building coverage, as follows:

~~The total~~ building coverage must not exceed 10% or 300m², whichever is the larger.

Decision Reasons:

- The word "total" is not required.
- This is to provide consistency across zone chapters.

Point Number

697.899

Summary of Decision Requested:

Amend Rule 23.3.6 D1 Building coverage, as follows:

~~Total~~ building coverage that does not comply with Rule 23.3.6 P1.

Decision Reasons:

- This is to provide consistency across zone chapters.

Point Number

697.900

Summary of Decision Requested:

Add a new clause (B) to Rule 23.3.7 Building setbacks, as follows:

(B) Rule 23.3.7.7 Building setback – National Grid Yard

AND

Add a new rule to Chapter 23 Country Living Zone, after Rule 23.3.7.6, as follows:

23.3.7.7 Buildings and structures within the National Grid Yard.

P1.

(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:

(i) Not involve an increase in the building height or footprint; and

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.

P2.

(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.

P3.

Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P4.

Within the National Grid yard, non-habitable buildings or structures for farming activities must following conditions:

(i) Not include buildings for intensive farming buildings, commercial greenhouses or milking / dairy sheds;

(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P5.

Within the National Grid yard, yards for milking / dairy sheds must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P6.

Within the National Grid yard, artificial crop protection and support structures must comply with the following conditions:

(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and

(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:

A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663;

(iii) Artificial crop protection and support structures between 8m and 12m from a single pole support structure and any associated guy wire (but not tower) must also:

A. Be maximum 2.5m high;

B. Be removable or temporary, to allow a clear working space of at least 12 metres from the pole when necessary for maintenance and emergency repair purposes;

C. Allow all-weather access to the pole and a sufficient area for maintenance equipment, including a crane.

NCL

Any building alterations or additions within the National Grid Yard that does not comply with Rule 23.3.7.7 P1.

NC2

Any new buildings or structures within the National Grid Yard that does not comply with Rule 23.3.7.7 P2, P3, P4, P5, or P6.

NC3

Intensive farming buildings within the National Grid Yard.

NC4

Commercial greenhouses within the National Grid Yard.

NC5

Milking and dairy sheds within the National Grid Yard.

Decision Reasons:

- This is to replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 23 for increased clarity and usability of the Plan.

Point Number	697.901
Summary of Decision Requested:	Amend Rule 23.3.7.1 P1 (a) Building Setbacks - All boundaries, as follows: <i>(b) A building located on a site-Record of Title containing more than 1000m2 must be set back a minimum of:</i>
Decision Reasons:	<ul style="list-style-type: none"> The reference to "record of title" has been included for correction.
Point Number	697.902
Summary of Decision Requested:	Add a new clause (v) to Rule 23.3.7.1 RD1 (b) Building setbacks - All boundaries, as follows: <i>(v) <u>reverse sensitivity</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> This additional matter of discretion is required to be included in the planner's assessment of effects of this activity.
Point Number	697.903
Summary of Decision Requested:	Add new clauses to Rule 23.3.7.2 Building Setback - sensitive land use, as follows: <u>P2</u> <i>(g) Any building for a sensitive land use must be set back a minimum of:</i> <i>(i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;</i> <i>(ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.</i> <u>P3</u> <i>(g) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land Yard must comply with all the following conditions:</i> <i>(i) Not increase the building height or footprint; and</i> <i>(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and</i> <i>(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.</i> <u>D1</u> <i>Any building for a sensitive land use that does not comply with Rule 23.3.7.2 P1 or P2.</i> <u>NC1</u> <i>Any activity within the National Grid Yard that does not comply with Rule 23.3.7.2 P3.</i> <u>NC2</u> <i>Any new building for a sensitive land use within the National Grid Yard</i> <u>NC3</u> <i>Any change of use of an existing building to a sensitive land use within the National Grid Yard</i> <u>NC4</u> <i>The establishment of any new sensitive land use within the National Grid Yard</i>
Decision Reasons:	<ul style="list-style-type: none"> This is to replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 23 for increased clarity and usability of the Plan.
Point Number	697.904
Summary of Decision Requested:	Amend location of Rule 23.3.7.4 Building - Airport Noise Outer Control Boundary to follow rule 23.3.8 Building – Horotiu Noise Acoustic Area.
Decision Reasons:	<ul style="list-style-type: none"> This rule is a noise rule, not a setback requirement and needs to be relocated.
Point Number	697.905
Summary of Decision Requested:	Delete Rule 23.3.7.5 P1 (b) Building setback - waterbodies; AND Add a new permitted activity P2 to Rule 23.3.7 Building setbacks as follows: <u>P2</u> <i>A public amenity of up to 25m², or a pump shed (public or private) within any building setback identified in rule 23.3.7.5 P1.</i> AND Amend Rule 23.3.7.5 D1 Building setbacks, as follows: <i>Any building that does not comply with Rule 23.3.7.5 P1 or P2</i>
Decision Reasons:	<ul style="list-style-type: none"> This is to provide consistency with other zone chapters. As a consequential amendment.
Point Number	697.906
Summary of Decision Requested:	Amend Rule 23.3.7.5 Building setback - waterbodies, as follows: <u>P1</u> <i>(a) Any building must be set back a minimum of:</i> <i>(i) 23-32m from the margin of any;</i> <i>A. lake; and</i> <i>B. wetland;</i> <i>(ii) 23-32m from the bank of any river (other than the Waikato River and Waipa River);</i> <i>(iii) 37m from the banks of the Waikato River and the Waipa River; and</i> <i>(iv) 27-5-32m from mean high water springs.</i>
Decision Reasons:	<ul style="list-style-type: none"> This is so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.

Point Number 697.907

Summary of Decision Requested: **Add** a new rule to Chapter 23 Country Living Zone after Rule 23.3.8 Horotiu Noise Acoustic Area, as follows:

23.3.8B Building – Te Kowhai Noise Buffer
PI Construction of, or addition, or alteration to, a dwelling within the Te Kowhai Noise Buffer that is designed and constructed to achieve the internal design sound levels specified in Section 3.2 of Appendix L (Acoustic Insulation).

RD1 (g) Construction of, or addition, or alteration to, a dwelling that does not comply with Rule 23.3.8B PI
(b) Council's discretion shall be restricted to the following matters:
(i) on-site amenity values;
(ii) noise levels received at the notional boundary of the dwelling;
(iii) timing and duration of noise received at the notional boundary of the dwelling;
(iv) potential for reverse sensitivity effects.

Decision Reasons:

- An area of Country Living Zone lies in close proximity to the Te Kowhai Airpark. In order to manage internal noise levels, the rule regarding noise buffers needs to be inserted in Chapter 23.

Point Number 697.908

Summary of Decision Requested: **Amend** Rule 23.3.9 Historic Heritage heading, as follows:

Historic Heritage Items

Decision Reasons:

- This is to provide consistency with other zone chapters.

Point Number 697.909

Summary of Decision Requested: **Amend** Rule 23.3.9.3 PI (a) All heritage items - alteration or addition, as follows:

(a) Alteration ~~or~~ addition to, a heritage item listed in Schedule 30.1 (Heritage Items) must comply with the following conditions:
(i) No significant feature of interest is removed, destroyed or damaged; and
(ii) Alterations or additions are not visible from a public place.

Decision Reasons:

- These additional words in this rule provide clarity.

Point Number 697.910

Summary of Decision Requested: **Amend** Rule 23.3.9.3 RD1 (b) All heritage items - alteration or addition, as follows:

Council's discretion ~~shall be~~ restricted to the following matters:

Decision Reasons:

- This is to provide consistency with other zone chapters.

Point Number 697.911

Summary of Decision Requested: **Amend** Rule 23.3.9.4 PI (a) All heritage items - maintenance or repair:

(a) Maintenance or repair of a heritage item listed in Schedule 30.1 (Heritage Items) must comply with the following conditions:

Decision Reasons:

- These additional words in this rule provide clarity.

Point Number 697.912

Summary of Decision Requested: **Amend** Rule 23.3.9.4 RD1 All heritage items - maintenance or repair, as follows:

~~Any activity~~ Maintenance or repair of a heritage that does not comply with Rule 23.3.9.4 PI.

Decision Reasons:

- This is to provide consistency with other zone chapters.

Point Number 697.913

Summary of Decision Requested: **Amend** Rule 23.3.9.4 RD1 (b) All heritage items - maintenance or repair, as follows:

Council's discretion ~~is~~ shall be restricted to the following matters:

Decision Reasons:

- This is to provide consistency with other zone chapters.

Point Number 697.914

Summary of Decision Requested: **Amend** Rule 23.3.9.5 RD1 (b) All heritage items - site development, as follows:

Council's discretion ~~is~~ shall be restricted to the following matters:

Decision Reasons:

- This is to provide consistency with other zone chapters.

Point Number 697.915

Summary of Decision Requested: Amend Rule 23.3.9.5 All heritage items - site development heading, as follows:

All heritage items – all site development

Decision Reasons:

- These additional words in this rule provide clarity.

Point Number 697.916

Summary of Decision Requested: Amend Rule 23.3.9.5 RD1(b)(iv) All heritage items - site development:

(iv) The relationship of the heritage item with the setting, including the area between the front of the heritage item and the road.

Decision Reasons:

- These additional words in this rule provide clarity.

Point Number 697.917

Summary of Decision Requested: Amend Rule 23.4 Subdivision heading, as follows:

23.4 Subdivision Rules

Decision Reasons:

- These additional words in this rule provide clarity.

Point Number 697.918

Summary of Decision Requested: Add a new clause (xi) to Rule 23.4(2) Subdivision, as follows:

(xi) Rule 23.4.6B – subdivision of land within the National Grid Corridor.

AND

Amend consequential renumbering;

AND

Add a new rule to Rule 23.4 Subdivision after Rule 23.4.6, as follows:
23.4.6B Subdivision of land within the National Grid Corridor.

RD1

(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions:

(i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and

(ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area.

(b) Council's discretion is restricted to the following matters:

(i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid;

(ii) The ability to provide a complying building platform outside of the National Grid Yard;

(iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage;

(iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines.

NCL

Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 23.4.6B RD1.

Decision Reasons:

- This is to replicate the subdivision rule within the National Grid Corridor from Chapter 14 into Chapter 23 for increased clarity and usability of the Plan.

Point Number 697.919

Summary of Decision Requested: Amend Rule 23.4.1 PRI Prohibited Activities, as follows:

Any subdivision within Hamilton's Urban Expansion Area as identified on the planning maps involving the creation of any additional ~~lot~~ record of title.

Decision Reasons:

- This provides additional clarity.

Point Number 697.920

Summary of Decision Requested: Amend Rule 23.4.2 RD1 General Subdivision, as follows:

(a) Subdivision must comply with ~~all~~ of the following conditions, where applicable:

(i) All proposed lots must have a net site area of at least 5000m².

(ii) Where the land being subdivided is wholly inside the Airport Subdivision Control Boundary or wholly or partly inside the SEL 95 Boundary identified on the planning maps, the average net site area of all proposed lots must be at least 1.1ha;

(iii) Where the land being subdivided straddles the Airport Subdivision Control Boundary, the maximum number of proposed titles must be the smallest nearest whole number calculated by the following formula:

Proposed ~~Record of Titles~~ lots = $\frac{\text{area (ha) outside}^}{0.5} + \frac{\text{area (ha) inside}^*}{1.1}$*

** outside and inside Airport Subdivision Control Boundary*

(b) Council's discretion is restricted to the following matters:

(i) Adverse effects on amenity values;

(v) Effects on the ~~operation of the airport~~ Airport Subdivision Control Boundary or the SEL 95 Boundary;

Decision Reasons:

- This provides additional clarity.

Point Number 697.921

Summary of Decision Requested: Add a new rule (ix) to Rule 23.4.3 D1 Subdivision within identified areas, as follows:

(ix) A natural hazard area.

Decision Reasons:

- This is to accommodate the consequential changes as a result of changes to 23.4.4 Title boundaries rule.

Point Number

697.922

Summary of Decision Requested:

Amend Rule 23.4.4 Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas heading, as follows:

~~Title boundaries – Existing Buildings, natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas~~

Decision Reasons:

- This rule heading needs amending to reflect the changes being made to RD1.

Point Number

697.923

Summary of Decision Requested:

Amend Rule 23.4.4 RD1 Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas, as follows:

~~(a) Subdivision of land containing any natural hazard area, contaminated land, Significant Amenity Landscape, notable tree, intensive farming activity or Aggregate Extraction Area must comply with all of the following conditions:~~

~~(i) (a) The boundaries of every proposed lot containing an existing building must demonstrate compliance with the Land Use - Building rules in Rule 23.3 relating to:~~

~~(i) Rule 23.3.5 (Daylight admission);~~

~~(ii) Rule 23.3.6 (Building coverage);~~

~~(iii) Rule 23.3.7 (Building Setbacks);~~

~~(iii) (b) Rule 23.4.4 RD1 (a)(i) does not apply to any noncompliance with the Land Use – Building rules in Rule 23.3 that existed lawfully prior to the subdivision.~~

~~(iii) (c) Any boundary of a proposed lot must not divide the following:~~

~~A. a natural hazard area;~~

~~B. contaminated land;~~

~~C. Significant Amenity Landscape;~~

~~D. Notable tree;~~

~~(iv) Any boundary of a proposed lot must provide the following setbacks:~~

~~A. 300m from any intensive farming activity;~~

~~B. 200m from an Aggregate Extraction Area for sand extraction;~~

~~C. 500m from an Aggregate Extraction Area for rock extraction;~~

~~(c) Council's discretion is restricted to the following matters:~~

~~(i) Landscape values;~~

~~(ii) Amenity values and character;~~

~~(iii) Reverse sensitivity effects;~~

~~(iv) Effects on any existing building;~~

~~(v) Effects on a natural hazard area;~~

~~(vi) Effects on contaminated land;~~

~~(vii) Effects on a notable tree;~~

~~(viii) Effects on an intensive farming activity;~~

~~E. Effects on an Aggregate Extraction Area.~~

Decision Reasons:

- Rule needs amending to provide clarity as to its purpose.
- Consequential changes to be made in other rules.

Point Number

697.924

Summary of Decision Requested:

Amend Rule 23.4.4 NCI Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas to change to DI a discretionary activity rather than a non complying activity, as follows:

~~NCI, DI Discretionary activities~~ Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas

Decision Reasons:

- This activity status is too onerous for this rule.

Point Number

697.925

Summary of Decision Requested:

Amend Rule 23.4.5 Site boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori heading, as follows:

Site boundaries – Significant Natural Areas, ~~heritage items, archaeological sites, sites of significance to Maaori~~, notable trees

Decision Reasons:

- This rule needs to apply only to significant natural areas and notable trees, as Rule 23.4.6 (heritage items) and new Rule 23.4.6A for archaeological sites and sites and areas of significance to Maaori will accommodate these rules.

Point Number

697.926

Summary of Decision Requested:

Amend Rule 23.4.5 RD1 (a) Site boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori, as follows:

~~(a) Any boundary of a proposed lot must not divide any of the following:~~

~~(i) A Significant Natural Area;~~

~~(ii) A heritage item as identified in Schedule 20.1 (Heritage Items);~~

~~(iii) A Maaori site of significance as identified in Schedule 20.3 (Maaori Sites of Significance); or~~

~~(iv) A Maaori area of significance as identified in Schedule 20.4 (Maaori Areas of Significance);~~

~~(iii) notable tree~~

Decision Reasons:

- The removal of clause (ii) is because it is already covered in Rule 23.4.6.
- The removal of clauses (iii) and (iv) are to set these rules apart and create a new rule entirely (proposed Rule 23.4.6A).

Point Number

697.927

Summary of Decision Requested:

Add new matter of discretion (vi) to Rule 22.4.5 RD1 (b) Site boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori, as follows:

(vi) effects on notable trees.

Decision Reasons:

- This is as a consequential amendment arising from the removal of notable trees from Rule 23.4.5 RD1.

Point Number

697.928

Summary of Decision Requested:

Add new rule to Rule 23.4 Subdivision after Rule 23.4.5 Site boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maori, as follows:

23.4.6A Subdivision of land containing archaeological sites, Maori sites of significance and Maori areas of significance

RD1

- (a) The boundaries of every proposed lot must not divide any of the following:
- (i) Maori sites of significance as identified in Schedule 30.3 (Maori sites of significance);
 - (ii) Maori areas of significance as identified in Schedule 30.4 (Maori areas of significance);
- (b) Council's discretion is restricted to the following matters:
- (i) effects on heritage values;
 - (ii) context and setting of the heritage item; and
 - (iii) the extent to which the relationship of the heritage item with its setting is maintained.

D1

Subdivision that does not comply with Rule 23.4.6A RD1

Decision Reasons:

- Amendment arising from splitting out archaeological sites and Maori sites and areas of significance in Rule 23.4.5.

Point Number

697.929

Summary of Decision Requested:

Amend Rule 23.4.7 RD1 (a) Subdivision - Road frontage, as follows:

(a) Every proposed lot as part of the subdivision having with a road boundary, other than one designed as any access allotment or utility allotment or lot accessed via an access leg containing a road access leg, must have a width along the road boundary of at least 1.5m.

Decision Reasons:

- This is to provide clarity to this rule.

Point Number

697.930

Summary of Decision Requested:

Amend Rule 23.4.8 RD1 (a) Subdivision - Building platform, as follows:

(a) Subdivision, other than an access allotment or utility allotment, must provide a building platform on every the proposed lot. The building platform must meet all of the following conditions:

- (i) has an area of 1000m² exclusive of boundary setbacks;
- (ii) has an average gradient no steeper than 1:8;
- (iii) has vehicular access in accordance with Rule 14.12.1 P1;
- (iv) is certified by a geotechnical engineer as geotechnically stable and suitable for a building platform;
- (v) is not subject to inundation in a 2% AEP storm or flood event;
- (vi) a dwelling could be built on as a permitted activity in accordance with Rule 23.3.

Decision Reasons:

- Wording to provide clarity to this rule.

Point Number

697.931

Summary of Decision Requested:

Amend Rule 23.4.10 Subdivision of land containing mapped off-road walkways heading, as follows:

Subdivision of land containing mapped off-road walkways, cycleways, bridleways

Decision Reasons:

- Heading to include cycleways and bridleways.

Point Number

697.932

Summary of Decision Requested:

Amend Rule 23.4.10 RD1 Subdivision on land containing mapped off-road walkways, as follows:

(a) Subdivision of land where containing walkways shown on the planning maps must provide those walkways, cycleways and bridleways and are to be provided as part of the subdivision must comply with all of the following conditions:

- (i) The walkway, cycleway or bridleway is at least 3 metres wide and
- (ii) the walkway, cycleway or bridleway is designed and constructed for shared pedestrian and cycle use, as per Rule 14.12.1 P8 (Access and road performance standards);
- (iii) the walkway, cycleway or bridleway is generally in accordance with the walkway route shown on the planning maps;
- (iv) the walkway, cycleway or bridleway is shown on the plan of subdivision and vested in the Council.

(b) Council's discretion is restricted to the following matters:

- (i) alignment of the walkway, cycleway or bridleway;
- (ii) drainage in relation to the walkway, cycleway or bridleway;
- (iii) standard of design and construction of the walkway, cycleway or bridleway;
- (iv) land stability;
- (v) amenity matters including batter slopes;
- (vi) connection to reserves.

Decision Reasons:

- Wording to provide clarity to this rule.

Point Number

697.933

Summary of Decision Requested:

Add to Rule 23.4.11 C1(b) Subdivision of land containing all or part of an Environmental Protection Area, a new clause (iii) as follows:

(iii) Legal protection if appropriate.

Decision Reasons:

- Adding legal protection as a matter of discretion enables Council to protect areas of planting in perpetuity.

Point Number 697.934

Summary of Decision Requested: **Amend** Rule 23.4.12 RD1(a) Esplanade reserves and esplanade strips, as follows:

(a) Subdivision of an esplanade reserve or strip 20m wide (or other width stated in Appendix 5.4 Esplanade Priority Areas) is required to be created from every proposed lot and shall vest in Council where the following situations apply:

Decision Reasons:

- This is to correct a referencing error.

Point Number 697.935

Summary of Decision Requested: **Amend** Chapter 24 Village Zone heading, as follows:

Chapter 24: Village Zone – Rules

Decision Reasons:

- This is to assist in clarifying that all of the provisions within the chapter are rules.

Point Number 697.936

Summary of Decision Requested: **Amend** Rule 24(2) Village Zone, as follows:

The rules that apply to subdivision in the Village Zone are contained in Rule 24.4 and the relevant rules in 1.4 Infrastructure and Energy, and 1.5 Natural Hazards and Climate Change (Placeholder).

Decision Reasons:

- This is to clarify that the rules in Chapter 14: Infrastructure and Energy and Chapter 15: Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.937

Summary of Decision Requested: **Amend** Rule 24.1.1 Permitted Activities, as follows:

(1) The following activities are permitted activities if they meet all the following:

~~(a) Activity-specific conditions;~~
~~(b) Land Use – Effects rules in Rule 24.2 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply);~~
~~(c) Land Use – Building rules in Rule 24.3 (unless the activity rule and/or activity-specific conditions identify a condition(s) that does not apply);~~
~~(c) Activity-specific conditions.~~

Decision Reasons:

- The list of rules (a) – (c) should follow the order that they appear.

Point Number 697.938

Summary of Decision Requested: **Delete** Rule 24.1.1 P2(a) Activity Specific Conditions (A Marae Complex or Papakainga Housing Development on Maaori Freehold Land or on Maaori Customary Land)

Decision Reasons:

- Condition (a) was not intended to be included.
- The rule needs to enable development of the site without building coverage.

Point Number 697.939

Summary of Decision Requested: **Amend** Rule 24.1.1(P2)(b)(i) Permitted Activities (A Marae Complex or Papakainga Housing Development on Maaori Freehold Land or on Maaori Customary Land), as follows:

(i) A Concept Management Plan ~~approved~~ endorsed by the Maori Land Court

AND

Amend Rule 24.1.1(P1)(c)(i) as follows:

(i) A Concept Management Plan ~~approved~~ endorsed by the Maori Land Court;

Decision Reasons:

- The correct term is “endorsed” rather than “approved”.

Point Number 697.940

Summary of Decision Requested: **Amend** Activity Rule 24.1.1 P3(d) and (e) Permitted Activities (Home occupation), as follows:

(d) Unloading and loading of vehicles and/or the receiving of customers or deliveries only occur after 7:30am and before 7:00pm on any day;
(e) Machinery ~~may~~ can only be operated after 7:30am and up to 9pm on any day.

Decision Reasons:

- To align the hours for the activity with the noise rule (24.2.1) for this zone.

Point Number 697.941

Summary of Decision Requested: **Delete** Rule 24.1.1 P7(b) Homestay.

Decision Reasons:

- Condition (b) is unnecessary for a home occupation activity.

Point Number	697.942
Summary of Decision Requested:	<p>Add a new activity to Rule 24.1.1 after P8 for retirement villages, as follows:</p> <p><u>A new retirement village or alterations to an existing retirement village:</u></p> <p>Activity Specific Conditions:</p> <p>(a) <u>The site or combination of sites where the retirement village is proposed to be located has a minimum net site area of 3ha;</u> (b) <u>The site is either serviced by or within 400m walking distance of public transport;</u> (c) <u>The site is connected to public water and wastewater infrastructure;</u> (d) <u>Minimum living court or balcony area and dimensions:</u> (i) <u>Apartment – 10m² area with minimum dimension horizontal and vertical of 2.5m;</u> (ii) <u>Studio unit or 1 bedroom unit – 12.5m² area with minimum dimension horizontal and vertical of 2.5m; or</u> (iii) <u>2 or more bedrooms unit – 15m² area with minimum dimension horizontal and vertical of 2.5m;</u> (e) <u>Minimum service court is either:</u> (i) <u>Apartment – Communal outdoor space (ie no individual service courts required) of at least 5m² with a minimum dimension of 1.5 metres for each apartment; or</u> (ii) <u>All other units – 10m² with a minimum dimension of 1.5 metres for each unit;</u> (f) <u>Building height does not exceed 8m, except for 15% of the total building coverage, where buildings may be up to 10m high;</u> (g) <u>The following Land Use – Effects rule in Rule 24.2 does not apply:</u> (i) <u>Rule 24.2.7 (Signs);</u> (h) <u>The following Land Use – Building rules in Rule 24.3 do not apply:</u> (i) <u>Rule 24.3.1 (Dwelling);</u> (ii) <u>Rule 24.3.3 (Building Height);</u> (i) <u>The following Infrastructure and Energy rule in Chapter 14 does not apply;</u> (ii) <u>Rule 14.12.1 P4(1)(g) (Traffic generation).</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Retirement villages in the Village Zone should be provided for on the boundaries of towns and villages provided they can be serviced by infrastructure. Retirement villages provide opportunities for residential development (aged care) that is not only confined to the residential zone.
Point Number	697.943
Summary of Decision Requested:	<p>Amend Rule 24.1.2 D1 Discretionary Activities as follows:</p> <p>Any permitted activity that does not comply with <u>one or more of the an Activity-Specific Conditions</u> in Rule 24.1.1.</p>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other chapters and additional clarity of the rule.
Point Number	697.944
Summary of Decision Requested:	Delete Rule 24.1.2 D2 Discretionary Activities.
Decision Reasons:	<ul style="list-style-type: none"> This rule is not needed as it refers to Land Use Effects and Land Use Building rules which are in subsequent parts of the chapter.
Point Number	697.945
Summary of Decision Requested:	<p>Add new heading for Rule 24.2 noise rules, as follows:</p> <p><u>24.2.1 Noise</u></p> <p>AND</p> <p>Make consequential changes to numbering.</p>
Decision Reasons:	<ul style="list-style-type: none"> New heading required for noise rules to be consistent with other zone chapters.
Point Number	697.946
Summary of Decision Requested:	Delete Rule 24.2(1) Land Use -Effects.
Decision Reasons:	<ul style="list-style-type: none"> Reduces duplication – this noise rule is adequately covered by points (2) and (3).
Point Number	697.947
Summary of Decision Requested:	<p>Delete Rule 24.2.1 P3 and P4 Noise - General;</p> <p>AND</p> <p>Amend Rule 24.2.1 P2 Noise-General, as follows:</p> <p>(a) <u>Noise measured within any other site in the Village Zone must not exceed:</u> (i) <u>50dB (LAeq), 7am to 7pm every day;</u> (ii) <u>45dB (LAeq), 7pm to 10pm every day; and</u> (iii) <u>40dB (LAeq) and 65dB (LAm_{ax}), 10pm to 7am the following day.</u> (b) <u>Noise levels must be measured in accordance with the requirements of New Zealand Standard NZS 6801:2008 "Acoustics Measurement of Environmental Sound", and</u> (c) <u>Noise levels must be assessed in accordance with the requirements of New Zealand Standard NZS 6802:2008 "Acoustic Environmental noise."</u></p> <p>AND</p> <p>Make consequential amendments to Rule 24.2.1 D1 as follows:</p> <p>Noise that does not comply with Rule 24.2.1 P4, P2 or P3.</p>
Decision Reasons:	<ul style="list-style-type: none"> P3 need to be conditions of P2 as they are the standards which need to be met.
Point Number	697.948

Summary of Decision Requested:	Amend Rule 24.2.2 P1 (a) Noise - construction, as follows: (a) Construction noise must not exceed meet the limits in NZS 6803:1999 (Acoustics – Construction Noise); and
Decision Reasons:	<ul style="list-style-type: none"> Amend the rule for additional clarity.
Point Number	697.949
Summary of Decision Requested:	Delete Rule 24.2.3 P1 (b) Glare and artificial light spill.
Decision Reasons:	<ul style="list-style-type: none"> This rule is not required as the matters are not typical of the Village Zone. Consistency with the Residential Zone.
Point Number	697.950
Summary of Decision Requested:	Amend Rule 24.2.4(1) Earthworks, as follows: (1) Rule 24.2.4.1 – Earthworks General, provides the permitted rules for earthworks activities for the Rural Zone. <u>This rule does not apply in those areas specified in rules 24.2.4.1A, 24.2.4.2, 24.2.4.3 and 24.2.4.4.</u>
Decision Reasons:	<ul style="list-style-type: none"> The wording of the rule does not make it clear that the rules specified in 24.2.4(2) apply instead of the general earthworks rule.
Point Number	697.951
Summary of Decision Requested:	Amend Rule 24.2.4(2) Earthworks, as follows: There are specific standards for earthworks within rules: (a) <u>Rule 24.2.4.1A – Earthworks within the National Grid Yard</u> (a b) Rule 24.2.4.2 – Maaori Sites and Maaori Areas of Significance; (b c) Rule 24.2.4.3 – Significant Natural Areas; (c d) Rule 24.2.4.4 – Landscape and Natural Character Areas. AND Add new rule after Rule 24.2.4.1 Earthworks General, as follows: <u>24.2.4.1A Earthworks within the National Grid Yard</u> P1 (a) <u>The following earthworks within the National Grid Yard:</u> (i) <u>Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;</u> (ii) <u>Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;</u> and (iii) <u>Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.</u> P2 (a) <u>Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:</u> (i) <u>Do not exceed a depth of 300mm within 2.2m of the pole or stay wire;</u> and (ii) <u>Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.</u> P3 (a) <u>Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:</u> (i) <u>Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;</u> (ii) <u>Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;</u> (iii) <u>Do not compromise the stability of a National Grid support structure;</u> (iv) <u>Do not result in the loss of access to any National Grid support structure; and</u> (v) <u>Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.</u> RD 1 (a) <u>Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 24.2.4.1A P1, P2 or P3.</u> (b) <u>Discretion is restricted to:</u> (i) <u>Impacts on the operation, maintenance, upgrading and development of the National Grid;</u> (ii) <u>The risk to the structural integrity of the affected National Grid support structure(s);</u> (iii) <u>Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;</u> (iv) <u>The risk of electrical hazards affecting public or individual safety and the risk of property damage.</u>
Decision Reasons:	<ul style="list-style-type: none"> Replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 24 (where this is relevant to the Village Zone) for increased clarity and usability of the Plan.
Point Number	697.952
Summary of Decision Requested:	Amend Rule 24.2.4.1 P1(a) Earthworks - General, as follows: (a) Earthworks (excluding the impartation of fill material) within a site must meet all of the following conditions: (i) Be located more than 1.5 m horizontally from any waterway, open drain or overland flow path; (ii) Not exceed a volume of more than 250m ³ and an area of more than 1,000m ² over any single consecutive 12 month period; (iii) Not exceed an area of more than 1,000m² over any single consecutive 12 month period; (iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level; (v) The slope of the resulting cut, filled areas or fill batter face in stable ground, does not exceed a maximum of 1:2 (1 vertical to 2 horizontal); (vi) Earthworks are set back <u>at least</u> 1.5m from all boundaries; (vii) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks; (viii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls; (ix) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.
Decision Reasons:	<ul style="list-style-type: none"> The rule needs to apply over a single consecutive 12 month period for both volume and area thresholds. This is also consistent with other zone chapters.
Point Number	697.953
Summary of Decision Requested:	Amend Rule 24.2.4.1 P3(a)(iv) Earthworks - General, as follows: (iv) Fill material is setback <u>at least</u> 1.5m from all boundaries;
Decision Reasons:	<ul style="list-style-type: none"> The words “at least” provide clarity to this rule.

Point Number 697.954

Summary of Decision Requested: Amend Rule 24.2.4.2 PI Earthworks-Maori Sites and Maori Areas of Significance, as follows:

~~RD1 #1~~

~~(a) Earthworks within 100m of a Maori site of significance as identified in Schedule 30.23 (Maori sites of Significance) must submit to Council as shown on the planning maps;~~

~~(b) A cultural assessment from the appropriate mana whenua representatives that demonstrates that there will be no adverse effects on cultural values;~~

~~(c) Earthworks within a Maori area of significance as identified in Schedule 30.4 (Maori area of Significance) must submit to Council;~~

~~(iii) A cultural assessment from the appropriate mana whenua representatives that demonstrates that there will be no adverse effects on cultural values;~~

~~(b) Council's discretion is restricted to the following matters:~~

~~(i) location of activity in relation to the site;~~

~~(ii) effects on heritage and cultural values.~~

Decision Reasons:

- Wording provides clarity to the rule. Also consistent approach across all zone chapters.

Point Number 697.955

Summary of Decision Requested: Amend Rule 24.2.4.2 RD1 Earthworks-Maori Sites and Maori Areas of Significance, as follows:

~~RD+2~~

~~(a) Earthworks that do not comply with a condition of Rule 24.2.4.2 PI Earthworks within a Maori area of significance as identified in Schedule 30.4 (Maori Areas of Significance) and shown on the planning maps;~~

~~(b) Council's discretion is restricted to the following matters:~~

~~(i) Location of activity in relation to the site;~~

~~(ii) Effects on heritage and cultural values.~~

Decision Reasons:

- Wording provides clarity to the rule. Also consistent approach across all zone chapters.

Point Number 697.956

Summary of Decision Requested: Amend Rule 24.2.4.3 PI Earthworks-within Significant Natural Areas, as follows:

~~(a) Earthworks are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area must not:~~

~~(i) Exceed a volume of 50m³ in a single calendar year consecutive 12 month period;~~

~~(ii) Exceed an area of 250m² in a single calendar year consecutive 12 month period; and~~

~~(iii) Import any fill material.~~

~~(iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level with a maximum slope of 1:2 (1 vertical to 2 horizontal);~~

~~(v) Earthworks are setback at least 1.5m from all boundaries;~~

~~(vi) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;~~

~~(vii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;~~

~~(viii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.~~

Decision Reasons:

- Additional clarity of the rule and consistency with the equivalent rule in other chapters

Point Number 697.957

Summary of Decision Requested: Amend Rule 24.2.4.3 DI Earthworks-within Significant Natural Areas to be Restricted Discretionary rather than Discretionary.

Decision Reasons:

- The activity status becomes a restricted discretionary activity, not a Discretionary activity.

Point Number 697.958

Summary of Decision Requested: Amend Rule 24.2.4.4 PI (a) Earthworks - landscape and natural character areas, as follows:

~~(e) Earthworks are for the maintenance of existing tracks, fences or drains within the following landscapes, natural features and natural character areas:~~

~~(i) Significant Amenity Landscape (SAL) – sand dune;~~

~~(ii) Natural Character area;~~

~~(iii) Outstanding Natural Character area of the coastal environment;~~

~~an identified Landscape or Natural Character Area and must meet all of the following conditions;~~

Decision Reasons:

- The additional wording provides clarification as to which areas are being encompassed by this rule.

Point Number 697.959

Summary of Decision Requested: Delete the table under Rule 24.2.4.4 PI (a)(iii) Earthworks - Landscape and Natural Character Areas;

AND

Amend Rule 24.2.4.4 PI (c) Earthworks - Landscape and Natural Character Areas:

~~(c) The earthworks must not exceed the following areas and volumes an area of 50m² and a volume of 250m³ within a single consecutive 12 month period.~~

Decision Reasons:

- This change removes the table and makes the volumes and thresholds clearer.

Point Number 697.960

Summary of Decision Requested: Amend Rule 24.2.5 PI(a) Hazardous Substances, as follows:

~~(b) The use, storage or disposal of any hazardous substances must meet the following conditions where:~~

~~(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Residential-Village zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).~~

Decision Reasons:

- Correction required. Residential Zone referred to in error.

Point Number 697.961

Summary of Decision Requested: **Add** Rule 24.2.5 Hazardous substances, as follows:
NC1 The storage of fuel for retail sale within service station in the Village Zone.

Decision Reasons:

- This new rule provides a more restrictive approach than D1, as this is a sensitive environment.
-

Point Number 697.962

Summary of Decision Requested: **Add** new Rule 24.2.5 NC2 Hazardous substances, as follows:
NC2 Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line

Decision Reasons:

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 (where it is relevant to the Village Zone) into Chapter 24 for increased clarity and usability of the Plan.
-

Point Number 697.963

Summary of Decision Requested: **Amend** Rule 24.2.6.1 C1 Notable tree-removal or destruction, as follows:
~~← RDI~~
(a) Removal or destruction of a tree identified in Schedule 30.2 (Notable Trees) that does not comply with Rule 24.2.6.1 P1.
(b) Council shall ~~reserve its control over~~ restrict its discretion to the following matters:
(i) Timing and manner in which the activity is carried out;
(ii) Effects on amenity values; and
(iii) Effects on heritage values.

Decision Reasons:

- Restricted discretionary activity is more appropriate to reflect the importance of notable trees.
-

Point Number 697.964

Summary of Decision Requested: **Amend** Rule 24.2.6.2 RD1 (b)(i) Notable tree - trimming, as follows:
(i) timing and manner in which the activity is carried out; and

Decision Reasons:

- All matters of discretions need to be included.
-

Point Number 697.965

Summary of Decision Requested: **Amend** Rule 24.2.6.3 P1 (a)(i) Notable tree - activities within the dripline, to read as follows:
(i) Involve excavation, compaction, sealing or soil disturbance ~~and~~ or placement of fill material, or cleanfill except for sealing of an existing road or footpath;

Decision Reasons:

- Provides clarity to the rule and alignment with other zone chapters.
-

Point Number 697.966

Summary of Decision Requested: **Amend** Rule 24.2.6.3 RD1 (a) Notable tree-activities within the dripline, as follows:
(a) Any activity within the dripline of the notable tree that does not comply with Rule 24.2.6.3 P1

Decision Reasons:

- The words "within the dripline of the notable tree" provide clarity to the rule.
-

Point Number 697.967

Summary of Decision Requested: **Delete** Rule 24.2.7.1 P2(a) (viii) Signs - general.

Decision Reasons:

- 24.2.7.1 P2 (a) (viii) is not required as the village zone provisions do not apply within the road reserve.
-

Point Number 697.968

Summary of Decision Requested: **Amend** Rule 24.2.7.1 P2(a)(xi) Signs - general, as follows:
(xi) The sign is for the purpose of identification and interpretation not attached to a Maaori site of significance listed in Schedule 30.3 (Maaori Sites of Significance) ~~except for the purpose of identification and interpretation.~~

Decision Reasons:

- Re-wording this rule provides clarity.
-

Point Number 697.969

Summary of Decision Requested: **Amend** Rule 24.2.7.1 P3 Signs - general, as follows:

(b) A real estate 'for sale' or 'for rent' sign relating to the site on which it is located must comply with all of the following conditions:

(i) There is no more than ~~4~~ 3 signs per site agency;

(ii) The sign is not illuminated;

(iii) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;

~~(iv) Project into or over road reserve.~~

Decision Reasons:

- This rule excluded signs for rental properties and requires additional words to ensure consistency with rule 24.2.7.1. Additionally, P3(a) (i) is not required as the village zone provisions do not apply within the road reserve.

Point Number 697.970

Summary of Decision Requested: **Amend** Rule 24.2.7.2 P1 (a) Signs - effects on traffic, as follows:

(a) Any sign directed at road users must meet the following conditions:

(i) Not imitate the content, colour or appearance of any traffic control sign;

(ii) Be located at least 60m from controlled intersections, pedestrian crossings and any other sign;

(iii) Not obstruct sight lines of drivers turning into or out of a site entrance and intersections;

~~(iv) Be able to be viewed by drivers for at least 130m;~~

(v) Contain a no more than 40 characters and no more than 6 symbols;

(vi) Have lettering that is at least 150mm high;

(vii) Be located at least 130m from a site entrance, where the sign directs traffic to the entrance.

Decision Reasons:

- The amended wording provides clarity for the rule and consistency with other rules.

Point Number 697.971

Summary of Decision Requested: **Amend** Rule 24.2.8 Indigenous vegetation clearance inside a Significant Natural Area heading, as follows:

Indigenous vegetation clearance ~~inside~~ within a Significant Natural Area

Decision Reasons:

- Wording provides clarity.

Point Number 697.972

Summary of Decision Requested: **Add** to Rule 24.2.8 P1 (a) Indigenous vegetation clearance inside a Significant Natural Area a new clause (vi), as follows:

(vi) Removing vegetation for conservation activities.

Decision Reasons:

- This new rule ensures indigenous vegetation can be cleared for conservation activities.

Point Number 697.973

Summary of Decision Requested: **Amend** Rule 24.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

Removal of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per year per ~~property site~~ for domestic firewood purposes or arts and crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

Decision Reasons:

- Additional clarity that the rule is intended to apply "per site" rather than "per property" which is not a defined term.

Point Number 697.974

Summary of Decision Requested: **Delete** Rule 24.2.8 P5 Indigenous vegetation clearance inside a Significant Natural Area;

AND

Make consequential change to Rule 24.2.8 D1, as follows:

...P4, ~~P5~~ or P6.

Decision Reasons:

- Rule P5 duplicates P1 with the only difference being that P5 captures Maaori Freehold land or Maaori Customary land, which is captured by P1 anyway.

Point Number 697.975

Summary of Decision Requested: **Delete** Rule 24.2.8 P6 Indigenous vegetation clearance inside a Significant Natural Area;

AND

Make consequential change to Rule 24.2.8 D1 as follows:

...P4; ~~or P5 or P6.~~

Decision Reasons:

- The activity is a repeat of P2.

Point Number 697.976

Summary of Decision Requested: **Amend** Rule 24.3.1 P1 to read as follows:

One dwelling within a ~~site~~ record of title.

Decision Reasons:

- The definition "record of title" has been included for correction.

Point Number	697.977
Summary of Decision Requested:	Amend Rule 24.3.2 P1 Minor dwelling, to read as follows: <i>(a) One minor dwelling up to 70m² gross floor area contained within the site a record of title must comply with all of the following conditions;</i> <i>(i) The net site area is 1000m² or more;</i> <i>(ii) The gross floor area shall not exceed 70m².</i>
Decision Reasons:	<ul style="list-style-type: none"> • Rewording of this rule required to align with the residential zone rule to make the 70m² requirement a condition of the rule.
Point Number	697.978
Summary of Decision Requested:	Amend Rule 24.3.3 (2) Height, as follows: <i>(2) Rule 24.3.3.1 Height – Building general provides permitted height limits across the entire Village Zone. <u>This rule does not apply in those areas specified in Rule 24.3.3(3).</u></i>
Decision Reasons:	<ul style="list-style-type: none"> • The wording of the rule does not make it clear that rule 24.3.3(2) does not apply in those areas specified in rule 24.3.3(3)
Point Number	697.979
Summary of Decision Requested:	Amend Rule 24.3.3.2 P1 Height-Buildings structures or vegetation within an airport obstacle limitation surface, as follows: <i>Any building, structure or vegetation must not protrude through the airport obstacle limitation surface as identified on the planning maps and defined in Appendix 9 - Te Kowhai Airpark and as shown on the planning maps.</i>
Decision Reasons:	<ul style="list-style-type: none"> • This rule relates only to the Te Kowhai Airpark and needs to specifically identify this. Additional wording provides clarity to the rule.
Point Number	697.980
Summary of Decision Requested:	Amend Rule 24.3.3.2 D1 Height - Buildings structures or vegetation within an airport obstacle limitation surface, as follows: <i>Any building, structure or vegetation that does not comply with Rule 24.3.3.2 P1.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Additional wording provides clarity to the rule.
Point Number	697.981
Summary of Decision Requested:	Add the following rule after Rule 24.3.5 Building coverage: <u>Rule 24.3.5A Impervious surfaces</u> <u>PL</u> <u>The impervious surface of a site must not exceed 70%.</u> <u>RDL</u> <u>(a) Impervious surfaces that does not comply with Rule 24.3.5A P1</u> <u>(b) Council's discretion is restricted to the following matters:</u> <u>(i) Site design, layout and amenity;</u> <u>(ii) The risk of flooding, nuisance or damage to the site or other buildings and sites.</u>
Decision Reasons:	<ul style="list-style-type: none"> • Include the impervious surfaces rule from Rule 14.11.1 P2 and 14.11.2 (RD2) to make it easier to find.
Point Number	697.982
Summary of Decision Requested:	Amend Rule 24.3.4 RD1 (b) Daylight admission, as follows: <i>(b) Council's discretion is restricted to the following matters:</i> <i>(i) Height of the building;</i> <i>(ii) Design and location of the building;</i> <i>(iii) Extent of shading on adjacent sites; Level of shading on any other sites;</i> <i>(iv) Privacy on other sites; and</i> <i>(v) Effects on a amenity values and residential character of the locality.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Additional wording provides clarity to the rule in respect to shading and other sites. Also provides consistency with other zone chapter.
Point Number	697.983
Summary of Decision Requested:	Amend Rule 24.3.5 P1 Building coverage, as follows: <i>On a lot connected to public wastewater and a water supply, the total building coverage must not exceed 40%.</i>
Decision Reasons:	<ul style="list-style-type: none"> • Word "total" is not required. Consistency across zone chapters.
Point Number	697.984
Summary of Decision Requested:	Amend Rule 24.3.5 P2 Building coverage, as follows: <i>On a lot not connected to public wastewater and a water supply, the total building coverage must not exceed 20%.</i>
Decision Reasons:	

- Word "total" is not required. Consistency across zone chapters.

Point Number 697.985

Summary of Decision Requested: **Amend** Rule 24.3.5 D1 Building coverage, as follows:
~~A building coverage that does not comply with Rules 24.3.5 P1 or P2.~~

Decision Reasons:

- Consistency across zone chapters.

Point Number 697.986

Summary of Decision Requested: **Add** new clause (5) into Rule 24.3.6 Building setbacks, as follows:
(5) Rule 24.3.6.4 Buildings and structures within the National Grid Yard.
 AND
Add the following rule into Chapter 24, after Rule 24.3.6.4:
24.3.6.4 Buildings and structures within the National Grid Yard.
P1.
(a) Within the National Grid yard, building alterations and additions to an existing building or structure must comply with the following conditions:
(i) Not involve an increase in the building height or footprint; and
(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions.
P2.
(a) Within the National Grid yard, the maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.
P3.
Within the National Grid yard, new buildings and structures that are not for a sensitive land use must comply with the following conditions:
(i) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and
(ii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless it is:
A. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
NCL
Any building alterations or additions within the National Grid Yard that does not comply with Rule 24.3.6.4 P1, P2 or P3.

Decision Reasons:

- Replicate the rule regarding buildings and structure within the National Grid from Chapter 14 into Chapter 24 (as relevant to the Village Zone) for increased clarity and usability of the Plan.

Point Number 697.987

Summary of Decision Requested: **Add** to Rule 24.3.6.2 P1 Building setbacks - sensitive land new clause (vi), as follows:
(vi) 300m from the boundary of another site containing an intensive farming activity.

Decision Reasons:

Include new condition to protect against reverse sensitivity in this zone.

Point Number 697.988

Summary of Decision Requested: **Add** to Rule 24.3.6.2 Building setbacks - sensitive land use, as follows:
P2.
(a) Any building for a sensitive land use must be set back a minimum of:
(i) 10m from the centre line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of up to 110kV;.
(ii) 12m from the centre of line of any electrical distribution or transmission lines, not associated with the National Grid, that operate at a voltage of 110kV or more.
P3.
(a) Within the National Grid yard, alterations or additions to a building used for an existing sensitive land use must comply with all the following conditions:
(i) Not increase the building height or footprint; and
(ii) Comply with the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663 under all National Grid transmission line operating conditions; and
(iii) Locate a minimum 12m from the outer visible foundation of any National Grid tower and locate a minimum 12m from any pole and associated stay wire, unless Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.
D1
Any building for a sensitive land use that does not comply with ~~in Rule conditions in~~ Rule 24.3.6.2 P1 or P2.
NCL
Any activity within the National Grid Yard that does not comply with Rule 24.3.6.2 P3.
NC2.
Any new building for a sensitive land use within the National Grid Yard.
NC3.
Any change of use of an existing building to a sensitive land use within the National Grid Yard.
NC4.
The establishment of any new sensitive land use within the National Grid Yard

Decision Reasons:

- Replicate the rule regarding sensitive landuses from Chapter 14 into Chapter 24 (as relevant to the Village Zone) for increased clarity and usability of the Plan.

Point Number 697.989

Summary of Decision Requested: **Amend** Rule 24.3.6.2 Building setbacks-sensitive land use to add "1" to D1;
 AND
Amend Rule D1 to read as follows:
~~Any building for a sensitive land use that does not comply with ~~in Rule conditions in~~ Rule 24.3.6.2 P1.~~

Decision Reasons:

- Additional words in this rule provide clarity.

Point Number	697.990
Summary of Decision Requested:	Amend 24.3.6.3 P4 Building setbacks-waterbodies, as follows: A public amenity of up to 25m ² , or a pump shed (<u>public or private</u>) within any building setback identified in Rule 24.3.6.3 P1, P2 or P3.
Decision Reasons:	<ul style="list-style-type: none"> Insert the words "public or private" to clarify that the pump shed is both private and public.
Point Number	697.991
Summary of Decision Requested:	Delete Rule 24.3.6.3 P3 Building setbacks - waterbodies; AND Consequential amendment to Rule 24.3.6.3 D1 as follows: A building that does not comply with Rules 24.3.6.3 P1, P2, P3 or P4.
Decision Reasons:	<ul style="list-style-type: none"> There is no need for this rule as it is adequately covered by the other setback requirements from water bodies.
Point Number	697.992
Summary of Decision Requested:	Amend Rule 24.3.6.3 Building setbacks - waterbodies, as follows: <i>P1</i> (a) A building must be set back a minimum of 30-23m from: (i) the margin of any: A. Lake; B. Wetland; and C. River bank, other than the Waikato River and Waipa River. <i>P2</i> A building must be set back at least 50-28m from a bank of the Waikato River and Waipa River.
Decision Reasons:	<ul style="list-style-type: none"> Amend the rule so that the setback represents 25m esplanade reserve plus the yard setback for the Waikato and Waipa Rivers, and 20m esplanade plus the yard setback for all other waterbodies.
Point Number	697.993
Summary of Decision Requested:	Amend Rule 24.3.8 Historic Heritage heading to read as follows: Historic Heritage Items
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.
Point Number	697.994
Summary of Decision Requested:	Amend Rule 24.3.8.3 P1 (a) All heritage items - Alteration or addition, as follows: (a) Alteration or addition to a heritage item listed in Schedule 30.1 (<u>Historic Heritage Items</u>) where must comply with the following conditions: (i) No significant feature of interest is removed, destroyed or damaged; <u>and</u> (ii) Alterations or additions are not visible from a public place.
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.995
Summary of Decision Requested:	Amend Rule 24.3.8.4 P1 (a) All heritage items - maintenance or repair, as follows: (a) Maintenance or repair of a heritage item listed in Schedule 30.1 (<u>Heritage Items</u>) where must comply with the following conditions: (i) No significant feature of interest is destroyed or damaged; <u>and</u> (ii) Replacement materials are the same as, or similar to, the original in terms of form, style and appearance.
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.996
Summary of Decision Requested:	Amend Rule 24.3.8.4 RD1 (a) All heritage items - maintenance or repair, as follows: (a) Any activity Maintenance or repair of a heritage item that does not comply with Rule 24.3.8.4 P1.
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.
Point Number	697.997
Summary of Decision Requested:	Amend Rule 24.3.8.5 P1 (a) All heritage items - all site development, as follows: (a) Development on a heritage item listed in Schedule 30.1 (<u>Heritage Items</u>) must <u>comply with the following conditions:</u>
Decision Reasons:	<ul style="list-style-type: none"> Consistency across zone chapters.

Point Number	697.998
Summary of Decision Requested:	Amend Rule 24.3.8.5 RD1(b)(iv) All heritage items - all site development, as follows: <i>(iv) The relationship of the heritage item with the setting, including the area between the front of the heritage item and the road.</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.999
Summary of Decision Requested:	Amend Rule 24.4 Subdivision, as follows: 24.4 Subdivision <u>Rules</u>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity.
Point Number	697.1000
Summary of Decision Requested:	Amend Rule 24.4 Subdivision, as follows: <i>(1) Rule 24.4.1 provides for subdivision density and applies across in the Village Zone outside of the Te Kowhai and Tuakau area. (2) The following rules apply to specific areas and/or activities: (a) Rule 24.4.2 – Subdivision in Te Kowhai and Tuakau, applies to the Village Zone in these two areas. (b) Rules 24.4.1 and 24.4.2 are also subject to compliance with the following subdivision controls...</i>
Decision Reasons:	<ul style="list-style-type: none"> Additional words in this rule provide clarity as to where these rules apply.
Point Number	697.1001
Summary of Decision Requested:	Add to Rule 24.4(2) Subdivision a new clause, as follows: <i>(vii) Rule 24.4.8A – subdivision within the National Grid Corridor</i> AND Undertake consequential renumbering; AND Add new rule after Rule 24.4.8A: <u>24.4.8A Subdivision of land within the National Grid Corridor RD1</u> <i>(a) The subdivision of land within the National Grid Corridor must comply with all of the following conditions: (i) All allotments intended to contain a sensitive land use must provide a building platform for the likely principal building(s) and any building(s) for a sensitive land use located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; and (ii) The layout of allotments and any enabling earthworks must ensure that physical access is maintained to any National Grid support structures located on the allotments, including any balance area. (b) Council's discretion is restricted to the following matters: (i) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of the National Grid; (ii) The ability to provide a complying building platform outside of the National Grid Yard; (iii) The risk of electrical hazards affecting public or individual safety, and the risk of property damage; (iv) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines. NCL Any subdivision of land within the National Grid Corridor that does not comply with one or more of the conditions of Rule 24.4.8A RD1.</i>
Decision Reasons:	Replicate the subdivision rule within the National Grid Corridor from Chapter 14 into Chapter 24 (where this is relevant to the Village Zone) for increased clarity and usability of the Plan.
Point Number	697.1002
Summary of Decision Requested:	Amend title of 24.4.1 Subdivision – General, as follows: 24.4.1 Subdivision – General <u>(outside Te Kowhai and Tuakau)</u> AND Amend Rule 24.4.1 RD1(a) Subdivision - General as follows: <i>(a) Proposed lots outside of Te Kowhai and Tuakau must have a minimum net site area of 3000m², except where the proposed lot is an access allotment, utility allotment or reserve to vest.</i>
Decision Reasons:	<ul style="list-style-type: none"> Words included to provide clarity to the rule.
Point Number	697.1003
Summary of Decision Requested:	Amend rule 24.4.4 CI(b) Subdivision - Amendments to cross lease and flats plans and conversions, as follows: <i>(b) Council's control is reserved to over the following matters: (i) Effect on existing buildings; (ii) Site layout and design; (iii) Compliance with building rules.</i>
Decision Reasons:	<ul style="list-style-type: none"> Words included to provide clarity to the rule.
Point Number	697.1004
Summary of Decision Requested:	Amend Rule 24.4.4 C2(b) Subdivision - Amendments to cross lease and flats plans and conversions, as follows:

- (b) The Council's control shall be ~~reserved over~~ ~~limited to~~ the following matters:
- (i) Purpose of the boundary adjustment;
 - (ii) Effect on existing buildings;
 - (iii) Site layout and design of a cross lease or flats plan;
 - (iv) Compliance with permitted building rules.

Decision Reasons:

- Words included to provide clarity to the rule.

Point Number 697.1005

Summary of Decision Requested: Delete Rule 24.4.4 D1 Subdivision - Amendments to cross lease and flats plans and conversions.

Decision Reasons:

- These should all be controlled activities, and there is no instance where a boundary adjustment would cascade beyond a controlled activity,

Point Number 697.1006

Summary of Decision Requested: Amend Rule 24.4.5 Titles boundaries - Natural hazard area, contaminated land, Significant Amenity Landscape - Dune, notable trees, and intensive farming activities heading, as follows:

~~Title boundaries – Existing Buildings, natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas~~

Decision Reasons:

- This rule heading needs amending to reflect the changes being made to RDI.

Point Number 697.1007

Summary of Decision Requested: Amend Rule 24.4.5 RDI Natural hazard area, contaminated land, Significant Amenity Landscape - Dune, notable trees, and intensive farming activities, as follows:

~~(a) Subdivision of land containing contaminated land, notable trees and intensive farming activities and aggregate extraction areas must comply with all of the following conditions:~~

~~(i) The boundaries of every proposed lot with existing buildings must demonstrate compliance with the following building rules (other than where any non-compliance existed lawfully prior to the subdivision) relating to:~~

~~A-(i) Daylight admission (Rule 24.3.4);~~

~~B-(ii) Building coverage (Rule 24.3.5);~~

~~C-(iii) Building setbacks (Rule 24.3.6);~~

~~(ii) The boundaries of every proposed lot must not divide the following:~~

~~A- A natural hazard area;~~

~~B- Contaminated land;~~

~~C- Significant Amenity Landscape; or~~

~~D- Notable tree;~~

~~(iii) The boundaries of every proposed lot must be setback by 300m from any area operating an intensive farming activity;~~

(b) Council's discretion is restricted to the following matters:

(i) Landscape values;

(ii) Amenity values and character;

(iii) Reverse sensitivity;

(iv) Effects on existing buildings;

~~(v) Effects on natural hazard areas;~~

~~(vi) Effects on contaminated land;~~

~~(vii) Effects on any notable tree;~~

~~(viii) Effects on an intensive farming activity.~~

Decision Reasons:

- Rule needs amending to provide clarity as to its purpose. Consequential changes to be made in other rules as set out in this table below.

Point Number 697.1008

Summary of Decision Requested: Amend the heading of 24.4.6 Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori, as follows:

Title boundaries – Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori, notable trees

Decision Reasons:

- Amend the title of rule 24.4.6 to protect notable trees.

Point Number 697.1009

Summary of Decision Requested: Amend Rule 24.4.6 RDI (b) Title boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori, as follows:

(b) Council's discretion is restricted to the following matters:

(i) Effects on Significant Natural Areas ~~and~~

(iii) Effects on any Maaori Sites of Significance; and

(iv) Effects on notable trees.

Decision Reasons:

- Amend to protect notable trees. Matter of discretion required to work with rule.

Point Number 697.1010

Summary of Decision Requested: Amend Rule 24.4.6 NC1 Title boundaries - Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori, to be a Discretionary Activity rather than a non-complying activity.

Decision Reasons:

- Non-complying activity status too restrictive for the effects of this rule.

Point Number 697.1011

Summary of Decision Requested: Amend Rule 24.4.7 NCI Title boundaries - Maaori sites and Maaori areas of significance to Maaori to be a Discretionary Activity rather than a Non Complying activity.

Decision Reasons:

- Non-complying activity status is too restrictive for the effects of this rule.

Point Number 697.1012

Summary of Decision Requested: Amend Rule 24.4.9 Road frontage, as follows:

- (a) Every proposed lot ~~as part of the subdivision with a road boundary, other than a proposed lot containing~~ other than any access allotment, utility allotment, right of way or access leg, must have a width along the road boundary of at least 20m.
- (b) Council's discretion is restricted to the following matters:
- (i) Safety and efficiency of vehicle access and road network; and
 - (ii) Amenity values ~~and rural character~~.

Decision Reasons:

- Rule needs amending to provide clarity. In respect to (b)(ii) rural character is not relevant in the village zone.

Point Number 697.1013

Summary of Decision Requested: Amend Rule 24.4.13 Subdivision of land containing mapped off-road walkways, as follows:

24.4.13 Subdivision of land containing mapped off-road walkways, cycleways, bridleways.

AND

Amend Rule 24.4.13 D1 Subdivision of land containing mapped off-road walkways as follows:

- (a) Subdivision where walkways shown on the planning maps are to be provided as part of the subdivision must comply with all of the following conditions:
- (i) The walkway, cycleway or bridleway is at least 3 metres wide and is designed and constructed for shared pedestrian, ~~or~~ cycle use or riding, as per Rule 14.12.1 P8 (Transportation);
 - (ii) The walkway, cycleway or bridleway is generally in accordance with the walkway, cycleway or bridleway route shown on the planning maps;
 - (iii) The walkway, cycleway or bridleway is shown on the plan of subdivision and vested in Council.
- (b) Council's discretion is restricted to the following matters:
- (i) Alignment of the walkway, cycleway or bridleway;
 - (ii) Drainage in relation to the walkway, cycleway or bridleway;
 - (iii) Standard of design and construction of the walkway, cycleway or bridleway;
 - (iv) Land stability;
 - (v) Amenity matters including batter slopes;
 - (vi) Connection to reserves.

Decision Reasons:

- Rule needs amending to provide clarity.

Point Number 697.1014

Summary of Decision Requested: Add new title as follows:

24.4.14 Subdivision within identified areas

AND

Add new rule as follows:

24.4.14 D1

- (a) Subdivision of any land containing any of the following areas:
- (i) Significant Amenity Landscapes;
 - (ii) A natural hazard area

Decision Reasons:

- Introduce a new rule to address subdivision within identified areas and provide consistency between zones.

Point Number 697.1015

Summary of Decision Requested: Amend Chapter 25 Reserve Zone heading, as follows:

Chapter 25: Reserve Zone -Rules

Decision Reasons:

- To assist in clarifying that all of the provisions within the chapter are rules.

Point Number 697.1016

Summary of Decision Requested: Amend Rule 25(2) Reserve Zone, as follows:

The rules that apply to subdivision in the Reserve Zone are contained in Rule 25.4 and the relevant rules in 14 Infrastructure and Energy; and 15 Natural Hazards and Climate Change (Placeholder).

Decision Reasons:

- To clarify that the rules in Chapter 14 Infrastructure and Energy and Chapter 15 Natural Hazards and Climate Change apply to subdivision as well as to land use activities.

Point Number 697.1017

Summary of Decision Requested: Amend Rule 25.1.1 PR1 Prohibited activities, as follows:

Any building, structure, objects or vegetation that obscures the sight lines of the Raglan navigation beacons for vessels entering Whaingaroa (Raglan Harbour) (refer to as identified in Appendix 7) (Raglan Navigation Beacon) for vessels entering Raglan Harbour (Whaingaroa).

Decision Reasons:

- Additional clarity with the rule.

Point Number	697.1018
Summary of Decision Requested:	<p>Amend Rule 25.1.2(1) Permitted Activities, as follows:</p> <p><i>(1) The activities listed below are permitted activities if they meet all the following:</i></p> <p>(a) Activity-specific conditions; (b) Land Use – Effects rules in Rule 25.2 (unless the activity-specific rule and/or conditions identify a condition(s) that does not apply); (c) Land Use – Building rules in Rule 25.3 (unless the activity-specific rule and/or conditions identify a condition(s) that does not apply); (d) Activity-specific conditions.</p>
Decision Reasons:	<ul style="list-style-type: none"> The list of rules (a) – (c) should follow the order that they appear.
Point Number	697.1019
Summary of Decision Requested:	<p>Amend Rule 25.1.2 P4 Temporary event, as follows:</p> <p><i>(a) The event occurs no more than 15 times per calendar year <u>consecutive 12 month period</u>;</i></p> <p><i>(d) The site is returned to its original <u>previous</u> condition no more than 3 days after the end of the event...</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other chapters.
Point Number	697.1020
Summary of Decision Requested:	<p>Amend Rule 25.1.3 Discretionary activities, as follows:</p> <p><i>Any permitted activity that does not comply with <u>one or more</u> any activity-specific conditions in Rule 25.1.2</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Consistency with other chapters and additional clarity of the rule.
Point Number	697.1021
Summary of Decision Requested:	Delete Rule 25.1.3(D2), Discretionary Activities.
Decision Reasons:	<ul style="list-style-type: none"> Creates confusion as it mixes activity rules with Land Use – Effects and Land Use – Building rules.
Point Number	697.1022
Summary of Decision Requested:	<p>Delete Rule 25.2.1.1 P3 and P4 Noise - General;</p> <p>AND</p> <p>Amend Rule 25.2.1.1 P2, to read as follows:</p> <p><i>(a) Noise measured within the notional boundary on any site in the Residential Zone, Village Zone, Country Living Zone and Rural Zone must not exceed:</i></p> <p><i>(i) 55dB (LAeq), 7am to 7pm every day;</i></p> <p><i>(ii) 45dB (LAeq), 7pm to 10pm every day; and</i></p> <p><i>(iii) 40dB (LAeq) and 65dB (LMax), 10pm to 7am the following day.</i></p> <p><i>(b) Noise measured within any site in any zone other than the Reserve Zone, Residential Zone, Village Zone, Country Living Zone and Rural Zone must meet the noise levels permitted for that zone.</i></p> <p><i>(c) Noise levels must be measured in accordance with the requirements of NZS 6801:2008 "Acoustics Measurement of Environmental Sound".</i></p> <p><i>(d) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustic Environmental noise".</i></p> <p>AND</p> <p>Make consequential amendment to Rule 25.2.1.1 D1, as follows:</p> <p><i>Noise that does not comply with Rule 25.2.1.1 P1, P2, P3 or P4.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> P3 and P4 need to be conditions of P2 as they are the standards which need to be met.
Point Number	697.1023
Summary of Decision Requested:	<p>Amend Rule 25.2.1.2 P1 Noise - Construction, as follows:</p> <p><i>(a) Construction noise must <u>not exceed</u> meet the limits in NZS 6803:1999 (Acoustics – Construction Noise); and...</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Additional clarity of the rule – construction noise should not exceed the limits, rather than meet the limits in the NZ Standard.
Point Number	697.1024
Summary of Decision Requested:	<p>Amend Rule 25.2.3 P1 Glare and artificial light spill, as follows:</p> <p><i>(a) Illumination from glare and artificial light spill must not exceed 10 lux measured horizontally and vertically at any other site zoned Residential, Village or Country Living Zone.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Consistency of wording with other chapters. The focus of the rule in the Reserve Zone should be to control light spill outside the Reserve Zone into the residential zones.
Point Number	697.1025
Summary of Decision Requested:	Amend Rule 25.2.4(1) Earthworks, as follows:

(1) Rule 25.2.4.1 – Earthworks General provides the permitted rules for earthwork activities in the Reserves Zone. This rule does not apply in those areas specified in rules 25.2.4.1A, 25.2.4.2, 25.2.4.3 and 25.2.4.4.

Decision Reasons:

- The wording of the rule does not make it clear that the rules in 25.2.4(2) apply instead of the general earthworks rule.

Point Number 697.1026

Summary of Decision Requested: **Add** to Rule 25.2.4(2) Earthworks, as follows:

There are specific standards for earthworks within rules:
(g) Rule 25.2.4.1A – Earthworks within the National Grid Yard
(a) Rule 25.2.4.2 – Maori Sites and Maori Areas of Significance;
(b) Rule 25.2.4.3 – Significant Natural Areas;
(c) Rule 25.2.4.4 – Landscape and Natural Character Areas.

AND

Add new rule after Rule 25.2.4.1, as follows:

25.2.4.1A Earthworks - within the National Grid Yard.

P1

(g) The following earthworks within the National Grid Yard:

(i) Earthworks undertaken as part of domestic cultivation; or repair, sealing or resealing of a road, footpath or driveway;

(ii) Vertical holes not exceeding 500mm in diameter that are more than 1.5m from the outer edge of the pole support structure or stay wire;

(iii) Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

P2

(g) Earthworks activities within the National Grid Yard near National Grid support poles or any stay wires must comply with the following conditions:

(i) Do not exceed a depth of 300mm within 2.2m of the pole or stay wire; and

(ii) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.

P3

(g) Earthworks within the National Grid Yard near National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) must comply with all of the following conditions:

(i) Do not exceed 300mm depth within 6m of the outer edge of the visible foundation of the tower;

(ii) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;

(iii) Do not compromise the stability of a National Grid support structure;

(iv) Do not result in the loss of access to any National Grid support structure; and

(v) Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.

RD1

(g) Earthworks within the National Grid Yard that do not comply with one or more of the conditions of Rules 25.2.4.1A P1, P2 or P3.

(b) Discretion is restricted to:

(i) Impacts on the operation, maintenance, upgrading and development of the National Grid;

(ii) The risk to the structural integrity of the affected National Grid support structure(s);

(iii) Any impact on the ability of the National Grid owner (Transpower) to access the National Grid;

(iv) The risk of electrical hazards affecting public or individual safety, and the risk of property damage.

Decision Reasons:

- Replicate the earthworks rule within the National Grid from Chapter 14 into Chapter 25 for increased clarity and usability of the Plan.

Point Number 697.1027

Summary of Decision Requested: **Amend** Rule 25.2.4.1 Earthworks - general, as follows:

(a) Earthworks (excluding the importation of fill material), within a site must meet all of the following conditions:

(i) Be located more than 1.5m from a public sewer, open drain, overland flow path or other service pipe;

(ii) Not exceed a volume of more than 250m³ ~~and~~

(iii) Not exceed an area of more than 1,000m² ~~over any single consecutive 12 month period within a site;~~

(iv) The height of the resulting cut, filled areas or fill batter face in stable ground, ~~not including any surcharge,~~ does not exceed 1.5m, with a maximum slope of 1:2 (1 vertical to 2 horizontal);

(v) ~~Earthworks are set back at least 1.5m from all boundaries;~~

(vi) Areas exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;

(vii) Sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;

(viii) ~~Does not divert or change the nature of natural water flows, water bodies or established drainage paths; and~~

(ix) ~~Do not result in the site being unable to be serviced by gravity sewers;~~

P2

Earthworks for the purpose of creating a building platform within a site using imported fill material.

P2.3

(a) Earthworks for purposes other than creating a building platform within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions. ~~The importation of fill material to a site must meet all of the following conditions; in addition to the conditions in P1.~~

(i) Must ~~Does not~~ exceed a total volume of 500m³ per site and a depth of 1m;

~~is fit for compaction;~~

(ii) The ~~slope height~~ height of the resulting ~~batter face~~ filled area in stable ground ~~does not~~ ~~must not~~ exceed 4.5m with a maximum slope of 1:2 (1m vertical to 2m horizontal);

(iv) ~~Fill material is setback at least 1.5m from all boundaries;~~

~~(v) Does not restrict the ability for land to drain;~~

~~(vi) Is not located within 3m of a property boundary, with the exception of the following:~~

~~A. Landscaping bunds;~~

~~(b) Where a retaining wall exists, the fill is placed to the same level as the retaining wall.~~

(v) Areas exposed by filling are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;

(vi) Sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls;

(vii) ~~Do not divert or change the nature of natural water flows, water bodies or established drainage paths.~~

RD1

(a) Earthworks that do not comply with Rule 25.2.4.1 P1 or P2.3.

(b) Council's discretion is restricted to the following matters:

(i) Amenity values and landscape effects;

(ii) Volume, extent and depth of earthworks;

(iii) Nature of fill material;

(iv) Contamination of fill material;

(v) Location of the earthworks to waterways, significant indigenous vegetation and habitat;

(vi) Compaction of the fill material;

(vii) Volume and depth of fill material;

(viii) Protection of the Hauraki Gulf Catchment Area;

(ix) Geotechnical stability;

(x) Flood risk, including natural water flows and established drainage paths

(xi) Land instability, erosion and sedimentation;

(xii) Proximity to underground services and service connections.

NCL

Importation of cleanfill to a site

Decision Reasons:

- This rule appears to be different from other zone chapter rules. The additional words are required to provide clarity and consistency with the other zones, reflecting activities that occur in the reserves zone. Also enabling the importation of fill for a building platform as a permitted activity.

Point Number	697.1028
Summary of Decision Requested:	<p>Amend Rule 25.2.4.2 RD2 Earthworks - Maori Sites and Maori Areas of Significance, as follows:</p> <p>(b) The Council's discretion shall be limited restricted to the following matters:</p> <p>(i) Location of earthworks in relation to the site;</p> <p>(ii) Effects on heritage and cultural values.</p>
Decision Reasons:	<ul style="list-style-type: none"> The matter of discretion is not relevant because the whole property boundary is included as a scheduled area.
Point Number	697.1029
Summary of Decision Requested:	<p>Amend Rule 25.2.4.3 Earthworks - within Significant Natural Areas, as follows:</p> <p>P1</p> <p>(a) Earthworks <u>are for the maintenance of existing tracks, fences or drains within an identified Significant Natural Area and must not meet all of the following conditions:</u></p> <p>(i) Do not exceed a volume of 50m3 in a single consecutive 12 month period;</p> <p>(ii) Do not exceed an area of 250m2 in a single consecutive 12 month period;</p> <p>(iii) Do not include the importation of any fill material;</p> <p>(iv) The total depth of any excavation or filling does not exceed 1.5m above or below ground level, with a maximum slope of 1:2 (1 vertical to 2 horizontal);</p> <p>(v) Earthworks are set back at least 1.5m from all boundaries;</p> <p>(vi) Area exposed by earthworks are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;</p> <p>(vii) Sediment resulting from the earthworks is retained onsite through implementation and maintenance of erosion and sediment controls</p> <p>(viii) Do not divert or change the nature of natural water flows, water bodies or established drainage paths.</p>
Decision Reasons:	<ul style="list-style-type: none"> Align with other chapters for consistency and additional controls on earthworks within significant natural areas.
Point Number	697.1030
Summary of Decision Requested:	<p>Amend Rule 25.2.4.4 P1 Earthworks - within Landscapes and Natural Character Areas, as follows:</p> <p>(a) Earthworks <u>are for the maintenance of existing tracks, fences or drains within the following landscapes, natural character areas:</u></p> <p>(i) Significant Amenity Landscape</p> <p>(ii) High Natural Character area</p> <p>(i) Outstanding Natural Character area of the coastal environment</p> <p>(ii) Outstanding Natural Landscapes</p> <p>(iii) Outstanding Natural Features</p> <p><u>and must comply with all of the following conditions:</u></p> <p>##A The earthworks are undertaken within a single consecutive 12 month period;</p> <p>##B The earthworks do not exceed the following areas and volumes;</p>
Decision Reasons:	<ul style="list-style-type: none"> Amend for consistency with the equivalent rule in other chapters.
Point Number	697.1031
Summary of Decision Requested:	<p>Amend Rule 25.2.5 Hazardous substances, as follows:</p> <p>P1</p> <p>(a) The use, storage or disposal of any hazardous substance where must meet the following condition:</p> <p>(i) The aggregate quantity of hazardous substances of any hazard classification on a site is less than the quantity specified for the Business Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances)</p> <p>(b) The storage or use of radioactive materials is:</p> <p>(i) in approved equipment for medical and diagnostic purposes; or</p> <p>(ii) specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.</p> <p>P2</p> <p>(a) The storage or use of radioactive materials is:</p> <p>(i) in approved equipment for medical and diagnostic purposes; or</p> <p>(ii) specified as an exempt activity or article in the Radiation Safety Act and Regulations 2017.</p> <p>D1</p> <p>Any activity that does not comply with Rule 25.2.5 P1 <u>or P2</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Alignment with the hazardous substances rules in other zones.
Point Number	697.1032
Summary of Decision Requested:	<p>Add new Rule 25.2.5 NC1 Hazardous substances, as follows:</p> <p><u>NC1</u></p> <p><u>The storage of fuel for retail sale within a service station.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Include a non-complying rule for service stations to align with other chapters.
Point Number	697.1033
Summary of Decision Requested:	<p>Add new Rule 25.2.5 NC2 Hazardous substances, as follows:</p> <p><u>NC2 Any new hazardous facility that involves the storage and handling of hazardous substances with explosive or flammable intrinsic properties within 12m of the centre line of a National Grid Transmission Line</u></p>
Decision Reasons:	

- Replicate the hazardous facilities rule within the National Grid from Chapter 14 (where it is relevant to the Reserve Zone) into Chapter 25 for increased clarity and usability of the Plan.

Point Number 697.1034

Summary of Decision Requested: Amend Rule 25.2.6.1 Notable Trees, as follows:

PI
 Removal or destruction of a notable tree identified in Schedule 30.2 (Notable Trees) where certification is provided to Council by a works arborist that states that the tree is dead, dying, diseased or is unsafe in accordance with Appendix J I Tree Removal Certificate.
~~PI-RD I~~
 (a) Removal or destruction of a notable tree identified in Schedule 30.2 (Notable Trees) that does not comply with Rule 25.2.6.1 PI.
 (b) The Council's discretion is restricted to the following matters:
 (i) Timing and manner in which the activity is carried out;
 (ii) Effects on amenity values;
 (iii) Effects on heritage values.

Decision Reasons:

- Amend to be consistent with the equivalent rule in other chapters.

Point Number 697.1035

Summary of Decision Requested: Amend Rule 25.2.6.2 RD1 Notable Tree - trimming, as follows:

(a) The trimming of a notable tree that does not comply with ~~a condition in~~ Rule 25.2.6.2 PI.
 (b) The Council's discretion is limited to the following matters:
 (i) Timing and manner in which the activity is carried out ~~and by whom;~~

Decision Reasons:

- Amend to be consistent with the equivalent rules in other chapters.

Point Number 697.1036

Summary of Decision Requested: Amend Rule 25.2.6.3 PI Notable tree-activities within the dripline as follows:

(a) Any activity within the dripline of a notable tree identified in Schedule 30.2 (Notable Trees) must not:
 (i) Involve excavation, compaction, sealing or soil disturbance ~~and/or~~ placement of fill material or cleanfill, except for the sealing of an existing road or footpath;
 RD I
 (a) Any activity within the dripline of a notable tree that does not comply with ~~one or more conditions in~~ Rule 25.2.6.3 PI.

Decision Reasons:

Amend to be consistent with the equivalent rules in other chapters.

Point Number 697.1037

Summary of Decision Requested: Amend Rule 25.2.7.1 P2(a)(viii) Signs - general, as follows:

(viii) The sign is ~~for the purpose of identification and interpretation not attached to~~ a Maaori site of significance listed in Schedule 30.3 (Maaori Sites of Significance) ~~except for the purpose of identification and interpretation;~~

Decision Reasons:

- Re-wording this rule provides clarity.

Submitter Number: 698 **Submitter:** Simon Dromgool

On behalf of: Christine Dromgool John and Caroline Vincent Mark Dromgool

Point Number 698.1

Summary of Decision Requested: Amend Rule 14.1.1.4(a) NC2 Non-Complying Activities, to be a controlled activity so that any acceptable wastewater system should be a requirement.

Decision Reasons:

- This negates the ability to have a septic tank servicing a dwelling on an existing 1/4 acre section even though this practice has been acceptable since the township was formed.
- Technologies in wastewater treatment systems have progressed significantly in recent decades with more efficiency gained and less land area required.
- These legal titles, rated separately, should have the right to a building consent without restriction.

Point Number 698.2

Summary of Decision Requested: Delete Rule 16.3.2 PI (a)(iii) Minor Dwelling, to remove the 70m2 limitation.

Decision Reasons:

- The floor area maximum of 70m2 for a minor dwelling is too restrictive, and if a section size of 900m2 plus is required then the only restriction should be a maximum total footprint size as a percentage of the total site area.
- The objective of any modern residential development should be to maximise the usage of available land.

Point Number 698.3

Summary of Decision Requested: Amend Rule 16.3.5 PI Daylight Admission, to 45 degrees at 2.7 metre boundary height.

Decision Reasons:

- The proposed plan specifying a 37 degree angle off a 2.5 metre boundary height is too restrictive and not in line with the more common 45 degree angle off a 2.7 boundary height.
- When a low angle is specified by some Councils it is usually only on the southern boundary and is in conjunction with a higher 55 degree angle on the northern boundary.

- A 37 degree angle negates the ability to effectively build a 2 storey dwelling and the submitter struggles to see Council's reasoning for this.
- The ability to build 2 storey dwelling is more effective use of any given land area.

Point Number 698.4

Summary of Decision Requested: Delete Rule 16.4.1 RD1 (a)(iv) Subdivision General, requiring the number of rear lots being no more than 15%.

Decision Reasons:

- The 15% requirement has no place in the existing layout of the Tuakau township with existing roads in a grid pattern of 5 chain (or 100 mtrs) spacing meaning that rear lots are inevitable to utilise the land area effectively.
- As long as rear sites are over 450m² and accessible by an appropriate ROW they should be allowable.
- The 15% requirement is illogical and unworkable.

Submitter Number: 699

Submitter: Eastside Heights Ltd

Point Number 699.1

Summary of Decision Requested: Retain the proposed zoning of the properties on Riverview Road, Huntly (Lot 2 DP 25266 and Part Lot 1 DP 25266 (CFR SA52A/554)) as Residential Zone.

Decision Reasons:

- The rezoning of this land and the provision of infrastructure will assist in accommodating additional population growth within Huntly.
- Due to the proximity to current Huntly Living Zone, the current use of the sites is an inefficient use of urban land resource.
- The site is adjacent to existing residential use properties and provides an obvious growth area.
- It will remove the split zoning.
- It achieves the purpose of section 7 of the RMA as it is a efficient use of resources, maintains and enhances amenity values, and mains and enhances the quality of the environment.
- There is wastewater, water supply and stormwater in close proximity to the site for servicing.
- The Residential Zoning is logical and appropriate given the location and size of the site.
- It will assist in accommodating the growing community.

Point Number 699.2

Summary of Decision Requested: Amend Rule 16.4.1 RD1 (a)(iii) Subdivision - General, to replace the word "must" with "should" which requires roads to be a grid layout;
AND
Any consequential changes.

Decision Reasons:

- This is restrictive.
- It may not always be possible given topography that may require curvilinear layout - a grid is described in the Proposed District Plan as predominantly rectilinear.
- The subject site does not have a flat topography.
- Use of the word "must" will result in a forced performance failure and that subdivision will fall to a full Discretionary Activity.

Point Number 699.3

Summary of Decision Requested: Retain the rules in Chapter 16 Residential Zone, in particular Rule 16.4 Subdivision and any subsequential amendments.

Decision Reasons:

- No reasons provided.

Submitter Number: 700

Submitter: Girish Kale

Organisation: Waikato Aviation

Point Number 700.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The continued use of this airfield will keep people's interest in aviation, as well as promoting aviation for the next generation.

Point Number 700.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The continued use of this airfield will keep people's interest in aviation , as well as promoting aviation for the next generation.

Submitter Number: 701

Submitter: Steven & Theresa Stark

Point Number 701.1

Summary of Decision Requested: Delete all Significant Natural Areas from 747 Rutherford Road, Ohinewai.

Decision Reasons:

- This policy encourages the public to regard working productive landscapes on private property as desirable for the community but at the landowner's cost.
- The submitter states they may wish to use this land in a different manner in the future.
- Unnecessarily restricting farming activities, especially without giving something in return, does not incentivise one to protect their own property for someone else's enjoyment. This is unreasonable. If permanent protection of a part of private property is deemed of value to the public, the landowner must be compensated either under the Public Works Act or incentivised in some other manner.
- Many of the areas included in the Significant Natural Area have already been cleared under resource consent.
- The submitter wishes to retain the right to choose which areas are best to leave in a natural stated based on animal welfare, ease of stock flow and personal preference.

Point Number 701.2

Summary of Decision Requested: Delete all Outstanding Natural Features from 747 Rutherford Road, Ohinewai.

Decision Reasons:

- There were no rural representatives who had input into the production of the "Waikato District Landscape Study" report, or were engaged with, yet over 18000 property owners were affected.
- This policy encourages the public to regard working productive landscapes on private property as desirable for the community but at the landowner's cost.
- Local authorities need to realise that "scenic" parts of private land are not conservatories and that public land through the Department of Conservation (DOC) who manages about one-third of New Zealand's land area.
- It is inappropriate to try and freeze-frame rural farmland. These are working environments and depending on finances, cyclic nature of farming, market signals, etc.
- The submitter states they may wish to use this land in a different manner in the future.
- Unnecessarily restricting farming activities especially without giving something in return, does not incentivise one to protect their own property for someone else's enjoyment. This is unreasonable. If permanent protection of a part of private property is deemed of value to the public, the landowner must be compensated either under the Public Works Act or incentivised in some other manner.
- Boffa Miskell (Waikato District Landscape Study report producer) are trying to use the term 'significant landscape' to assess other second tier landscapes or features. This is not a valid criteria against which to assess outstanding natural features and landscapes under s6(b) of the RMA. Using farmland for farming purposes is an appropriate use of land under the RMA.
- The policy is similar to the now defunct Ridgeline Policy that WDC had placed on many properties for approximately 20 years without valid criteria to underpin it. The 2 ONF areas on the submitter's property are merely vegetation, well represented in the district and not outstanding at all.

Point Number 701.3

Summary of Decision Requested: Amend Rule 22.2.3.1 P1 Earthworks - General, as follows:

P1 (a) Earthworks for:

(iii) (A) Farm quarry where the volume of aggregate does not exceed 1000m³ per single consecutive 12 month period on a property <40ha'

(B) Farm quarry where the volume of aggregate does not exceed 3000m³ per single consecutive 12 month period on a property ≥40ha.

AND

Amend Rule 22.2.3.1 P2 Earthworks - General, as follows:

P2 (a) Earthworks within a site must meet all of the following conditions:

(i) (A) Do not exceed a volume of more than 1000m³ and an area of more than 2000m² over any single consecutive 12 month period on a property < 40 ha.

(B) Do not exceed a volume of more than 3000m³ and an area of more than 6000m² over any single consecutive 12 month period on a property ≥40ha.

Decision Reasons:

- These rules are overly restrictive, especially for larger properties as regards the constraints on volume and area in a 12-month period.
- Due to finances, weather, maintenance requiring earthworks for maintaining/upgrading tracks, stock races, fencing etc. may be delayed for several years. When circumstances then allow, a larger than average volume and/or area may need be shifted in a year to bring infrastructure up to an acceptable standard. Other years no earthworks at all may get done. The proposed restrictions are too onerous, especially for larger farming properties.
- Many tracks were put in decades ago when tractors were smaller. With larger and wider modern tractors, many races and tracks may need to be upgraded for health and safety reasons.

Point Number 701.4

Summary of Decision Requested: Amend Rule 22.2.3.3 Earthworks – Significant Natural Areas, as follows:

P1 (a) Earthworks for the maintenance or upgrade of existing tracks, fences or drains within an

identified Significant Natural Area ~~must meet all of the following conditions~~ are permitted.

AND

Delete Rule 22.2.3.3 P1 (a) (i)-(vii) Earthworks - Significant Natural Areas:

AND

Delete Rule 22.2.3.3 P2 Earthworks - Significant Natural Areas, and replace with the following:

P2 (a) Earthworks within a site must meet all of the following conditions:

(i) Do not exceed a volume of more than 1000m³ and an area of more than 2000m² over any single consecutive 12-month period on a property < 40ha

(ii) Do not exceed a volume of more than 3000m³ and an area of more than 6000m² over any single consecutive 12-month period on a property ≥40ha.

AND

Delete Rule 22.2.3.3 RD1 Earthworks- Significant Natural Areas.

Decision Reasons:

- These rules are overly restrictive, especially for larger properties as regards the constraints on volume and area in a 12-month period.
- Due to finances, weather, maintenance requiring earthworks for maintaining/upgrading tracks, stock races, fencing etc. may be delayed for several years. When circumstances then allow, a larger than average volume and/or area may need be shifted in a year to bring infrastructure up to an acceptable standard. Other years no earthworks at all may get done. The proposed restrictions are too onerous, especially for larger farming properties.
- Many tracks were put in decades ago when tractors were smaller. With larger and wider modern tractors, many races and tracks may need to be upgraded for health and safety reasons.

Point Number 701.5

Summary of Decision Requested: Delete Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area and replace with the following:

PI Indigenous Vegetation and Habitats- Permitted activity

(g) Any activity involving disturbance, removal, damage or destruction (modification) of kanuka and/or manuka and/or totara.

(b) The removal of up to 50m³ of timber per 1-year period per Certificate of Title for personal use

(c) The harvesting of indigenous timber undertaken in accordance with an approval under Part IIIA of the Forests Act 1949

(d) The disturbance, removal, damage or destruction of naturally occurring indigenous vegetation that has grown under the canopy of a plantation forest

(e) The clearance or modification of indigenous vegetation that has been planted and managed specifically for commercial production forestry horticulture or agriculture purposes.

(f) The disturbance or damage, but not destruction of naturally occurring indigenous vegetation as a consequence of harvesting of plantation forest, including where the harvesting involves:

(i) The lifting and/or dragging of logs.

(ii) The construction and maintenance of forestry roads and stream crossings.

(g) The disturbance, removal, damage or destruction ("modification") of naturally occurring indigenous vegetation by any network utility operator to ensure the safety and integrity of any network utility or to maintain access to the network utility.

b) The disturbance, removal, damage or destruction ("modification") of naturally occurring indigenous vegetation associated with the maintenance of existing access tracks, fence-lines and firebreaks and the construction of new fence-lines and firebreaks.

(i) Any activity involving disturbance, removal, damage or destruction ("modification") of indigenous vegetation and habitats necessary for the avoidance of imminent danger to human life or property.

(j) Activities are carried out subject to and in accordance with any specific covenants or other legal agreements entered into with the District Council, or Waikato Regional Council, or Department of Conservation, or QEII Trust.

Decision Reasons:

- The proposed rule is overly restrictive.
- It is mainly sheep and beef farms that would most likely wish to clear scrub as many years of lower financial returns have impeded their ability to keep their pastures clear. Much scrub they wish to clear is regenerated vegetation. They become captured by the height and age restrictions in clearing kanuka and manuka.

Point Number 701.6

Summary of Decision Requested: Delete all objectives, policies, methods and rules relating to Natural Character.

Decision Reasons:

- No Significant Natural Area, Outstanding Natural Area, Outstanding Natural Feature or Outstanding Natural Landscape can be accurately placed upon a property without ground-truthing and the consent of the affected landowner.
- Natural character designations have no standing or requirement to be protected under section 6 (b) of the RMA.

Point Number 701.7

Summary of Decision Requested: Amend Rule 22.2.3.4 Earthworks – Within Landscape and Natural Character Areas, as follows:

22.2.3.4 Earthworks- Within landscape ~~and Natural Character Areas~~

PI (a) Earthworks are for the maintenance or upgrade of existing tracks, fences or drains within an identified ~~outstanding Natural Landscape Landscape or Natural Character Area and must meet all of the following conditions are permitted.~~

AND

Delete Rule 22.2.3.4 PI (a)(i)-(vii) Earthworks within a Landscape and Natural Character Area;

AND

Add a new P2 to Rule 22.2.3.4 Earthworks within a Landscape and Natural Character Area, as follows:

P2 (a) Earthworks within a site must meet all of the following conditions:

(i) Does not exceed a volume of more than 1000m³ and an area of more than 2000m² over any single consecutive 12-month period on a property < 40ha

(ii) Does not exceed a volume of more than 3000m³ and an area of more than 6000m² over any single consecutive 12-month period on a property ≥40ha

AND

Delete Rule 22.2.3.4 D1 Earthworks - within Landscape and Natural Character Areas.

Decision Reasons:

- The rules are overly restrictive for larger properties.
- Due to finances or weather, maintenance requiring earthworks may be delayed.
- Larger quantities may need to be moved.

Point Number 701.8

Summary of Decision Requested: Delete all objectives, policies, methods and rules relating to Significant Amenity Landscape.

Decision Reasons:

- No Significant Natural Area, Outstanding Natural Feature or Outstanding Natural Landscape designation should be placed on a property without it being ground truthed and without the consent of the affected landowner.
- Significant Amenity Landscapes are subjective designations that have no standing or requirement to be protected under section 6 (b) of the RMA.

Point Number 701.9

Summary of Decision Requested: Add provisions for transferable development rights for landowners who've unwelcome designations placed on their properties which placed restrictions on them, 'on a measure by measure basis.' For example, if a property has a Significant Natural Area or Outstanding Natural Landscape etc. over 10ha of their land, they could be granted transferable development rights enabling them to develop lots equal to a total of 10ha, be it in one lot of 10ha, 10 lots of 1 ha, etc.

Decision Reasons:

- The decision requested would be partial compensation for the loss of property rights and restrictions on the land.

Point Number 701.10

Summary of Decision Requested:**Amend** Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

P2 Removal of up to ~~5m²~~ 1ha of manuka and/or kanuka and/or totara outside of the Coastal Environment per single consecutive 12 month period per property for domestic firewood purposes and arts or crafts provided the removal will not directly result in the death, destruction or irreparable damage of any other tree, bush or plant.

AND

Amend Rule 22.2.7 P3 Indigenous vegetation clearance inside a Significant Natural Area, as follows:

P3 (a) Indigenous vegetation clearance for building, access, parking and manoeuvring areas in a Significant Natural Area identified on the planning maps or in Schedule 30.5 (Urban Allotment Significant Natural Areas) must comply with all of the following conditions:

- (i) There is no alternative development area on the site outside the Significant Natural Area; and*
- (ii) The total indigenous vegetation clearance does not exceed ~~250m²~~ 1500m².*

Decision Reasons:

- This rule is overly prescriptive, especially given most sites have not been ground-truthed.

Submitter Number:	702	Submitter:	Anton Meier
Organisation:	Aerosport Aviation Ltd		
Point Number	702.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Te Kowhai Airpark is a great asset to the aviation community, it creates a community feel. • It is a positive place where people who are interested in aviation can continually learn, update their flying skills and enjoy flying in the surrounding environment. • It is a social, positive environment run by a group of caring, astute, like-minded individuals. 		
Point Number	702.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Te Kowhai Airpark is a great asset to the aviation community. • It creates a community feel. • It is a positive place where people who are interested in aviation can continually learn, update their flying skills and enjoy flying in the surrounding environment. • It is a social, positive environment run by a group of caring, astute, like-minded individuals. 		

Submitter Number:	703	Submitter:	Sara Brown
On behalf of:	S & J Brown		
Point Number	703.1		
Summary of Decision Requested:	Amend the extent of the Significant Natural Area on the property at 538 Te Papatapu Road, Te Mata, to remove area 4364 and add area 4279 (see maps included in the submission for more details).		
Decision Reasons:	<ul style="list-style-type: none"> • The following points apply to area 4364: <ul style="list-style-type: none"> - Contains exotic vegetation (mainly Barbury) and weeds. - Not considered to contain significant Indigenous vegetation. - Not considered a SNA in submitters ecological assessment. • The following points apply to area 4279: <ul style="list-style-type: none"> - Submitter's ecological assessment, conducted by Kessels Ecology Ltd, conclude Area 4279 is a good, diverse and contains mostly healthy examples of under-represented. See assessment report attached to the submission for details. - Is fenced off from stock and also contains an internal fence line. - Understorey and groundcover are healthy in majority of the stands and their regeneration is profuse. - Considered ecologically significant natural features in terms of Section 6 (c) of the Resource Management Act in accordance with WRC RPS Criteria. - Formal protection of the forest and wetland remnants at this site would be a significant positive addition to the Protected Natural Area Network in the Kawhia Ecological District. 		

Submitter Number:	704	Submitter:	Margaret Millard
Organisation:	The C. Alma Baker Trust		
Point Number	704.1		
Summary of Decision Requested:	Delete the 'Walkway/Cycleway/Bridleway' overlay from the Limestone Downs property located at 1340 Port Waikato-Waikaretu Road, Port Waikato.		
Decision Reasons:	<ul style="list-style-type: none"> • The details of access, timing and cost need to be discussed first with landowners before imposing this map annotation. 		

Point Number 704.2

Summary of Decision Requested: Retain Policy 3.5.3 (a) (viii) Protecting the natural character qualities of the natural environment, recognising historic farming operations that continue today.

Decision Reasons:

- Limestone Downs has a history of being farmed for over 100 years and does so in an environmentally sustainable manner but does have challenging environmental issues being on the coast and having a dairy farm in a flood plain.

Point Number 704.3

Summary of Decision Requested: No specific decision sought, but the submission opposes the volume limit and time limit in Rule 22.2.3.3 Earthworks - Significant Natural Areas.

Decision Reasons:

- This limit is not practical on a working farm which has a considerable percentage of land identified as Coastal Environment, Natural Character, Significant Amenity Landscapes and/or Significant Natural Area. During extreme weather events or when normal repair and maintenance tasks occur, the cost of obtaining resource consents would be onerous. The requirements of this rule need to be achievable and able to be monitored.

Point Number 704.4

Summary of Decision Requested: No specific decision sought, but the submission opposes the volume limits and time period in Rule 22.2.3.4 Earthworks - within Landscape and Natural Character Areas.

Decision Reasons:

- These limits are not practical on a working farm which has a considerable percentage of land identified as Coastal Environment, Natural Character, Significant Amenity Landscapes and/or Significant Natural Area. During extreme weather events or when normal repair and maintenance tasks occur, the cost of obtaining resource consents would be onerous. The requirements of this rule need to be achievable and monitored.

Point Number 704.5

Summary of Decision Requested: No specific decision sought, but the submission opposes the volume limit of 5m³ of manuka and/or kanuka per property within a 12 month period for use as domestic firewood in Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area

Decision Reasons:

- The Limestone Downs property contains 10 homesteads and the extent of land identified as Coastal Environment, Natural Character, Significant Amenity Landscape and/or Significant Natural Area would make it impossible to provide for the health and wellbeing of its staff and add costs if all houses were to be heated solely by electricity.
- This rule is contrary to Part 2 of the Resource Management Act regarding social and economic wellbeing of the working farm employees. The rule will burden landowners with unreasonable costs and will be difficult to monitor.

Point Number 704.6

Summary of Decision Requested: Amend Rule 22.3.3 Buildings and structures in Landscape and Natural Character Areas, by changing the activity status from discretionary to either restricted discretionary or controlled activity.

Decision Reasons:

- It is impractical to run a large farm of approximately 3000ha with a considerable percentage of land identified as Coastal Environment, Natural Character, Significant Amenity Landscape and/or Significant Natural Area.

Submitter Number: 705 **Submitter:** Jean Hamilton

Point Number 705.1

Summary of Decision Requested: Delete the definition of "intensive farming" from Chapter 13 Definitions.

Decision Reasons:

- The definition is contradictory. The definition states that intensive farming is not dependent on the fertility of soil, but also states feed can be produced on the land.
- Soil fertility is an important part of producing food for any farming and if the farming type is reliant on it, it can not be deemed to be intensive. Intensive farming is usually reliant on food being brought in to the site and not the productive capacity of the soil of the site. Therefore, farming dependent on the soil capacity should not be termed 'intensive'.
- The housing of animals are buildings are normal for farms.

Submitter Number: 706 **Submitter:** Francis and Susan Turton

Point Number 706.1

Summary of Decision Requested: No specific decision sought, but the submission opposes Significant Natural Areas and Significant Amenity Landscapes being identified on private land.

Decision Reasons:

- No consultation and data on the identified areas.
- This has the potential to have far reaching implications on private property rights, farm profitability and farm values.
- Unclear and inaccurate provisions mean that it is impossible to make informed decisions.

Point Number 706.2

Summary of Decision Requested:	No specific decision sought, but the submission questions the definition of "intensive farming" in Chapter 13 Definitions.
Decision Reasons:	<ul style="list-style-type: none"> It is unclear whether the term "intensive farming" relates to soil fertility, cropping and/or feed being brought in.
Point Number	706.3
Summary of Decision Requested:	No specific decision sought, but the submission opposes Rule 22.2.3.3 P1(a) Earthworks - Significant Natural Areas, in respect to the proposed limits, including 50m3 volume and the 1.5m boundary setback and limits on imported fill.
Decision Reasons:	<ul style="list-style-type: none"> The limits will not maintain of existing farm infrastructure and will create potential health and safety issues if repairs are not completed properly. Limiting earthworks will create health and safety issues for the future running of the farm. They hinder safe farming practices when establishing boundary fences. Infill limits reduce options to safely repair fences and tracks.
Point Number	706.4
Summary of Decision Requested:	No specific decision sought, but the submission opposes Rule 22.2.3.4 P1(a) Earthworks - within Landscape and Natural Character Areas, with respect to the volume, area and cut limits.
Decision Reasons:	<ul style="list-style-type: none"> These limits will hinder maintenance of existing and new farm infrastructure such as drainage, fencing and tracks.
Point Number	706.5
Summary of Decision Requested:	No specific decision sought, but the submission opposes Rule 22.4.3 RDI(a) Title boundaries - Significant Natural Areas, heritage items, Maori sites of significance and Maori areas of significance.
Decision Reasons:	<ul style="list-style-type: none"> The restrictions are opposed because some Significant Natural Areas are already divided by existing title boundaries.
Point Number	706.6
Summary of Decision Requested:	No specific decision sought, but the submission opposes Rule 22.1.3 RDI(a) and (b) Restricted Discretionary Activities and questions the use of the term "intensive farming" and whether this provision is concerned with soil fertility, cropping and or feed.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	706.7
Summary of Decision Requested:	No specific decision is sought, but submission opposes Rule 22.2.7 P3(a) Indigenous vegetation clearance inside a Significant Natural Area, particularly the 250m2 limit.
Decision Reasons:	<ul style="list-style-type: none"> The limit of 250m2 cleared area will not provide a suitable area in some locations because of slope and access requirements. Building areas are dependent on location, position and access.
Point Number	706.8
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.2.8 P1(a) Indigenous vegetation clearance - outside a Significant Natural Area and questions what is the definition of "outside a Significant Natural Area."
Decision Reasons:	<ul style="list-style-type: none"> It is unclear what area this rule applies to and what the definition of "outside a Significant Natural Area" means. Indigenous vegetation often needs to be cleared for maintenance of farming infrastructure and maintaining productive pasture.
Point Number	706.9
Summary of Decision Requested:	No specific decision sought, but submission opposes Rule 22.4.1.6 RDI(a) Conservation lot subdivision.
Decision Reasons:	<ul style="list-style-type: none"> Significant Natural Areas have a value and belong to the property owner Financial compensation needs to be offered on all Significant Natural Area sites and sizes. Terms and conditions should be negotiated by the property owner.
Point Number	706.10
Summary of Decision Requested:	No specific decision sought, but submitter opposes Rule 22.4.2 RDI(a) Title boundaries - natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas.
Decision Reasons:	<ul style="list-style-type: none"> The restrictions are opposed because some Significant Amenity Landscapes are already divided by existing title boundaries.

Submitter Number:	707	Submitter:	Soil & Health Association of New Zealand (S&H)
--------------------------	-----	-------------------	--

Point Number

707.1

Summary of Decision Requested:

Add a new provision, 1.5.7.X Genetically modified organisms (GMO), as follows:

1.5.1.7.X Genetically Modified Organisms (GMO)

(g) The Hazardous Substances and New Organism Act 1996 (HSNO) requires that before any GMO can be imported into the country, developed in containment, tested in the field or released into the environment, approval must be obtained from the Environmental Protection Authority (EPA).

(b) The RMA provides the scope for District Plans to place additional controls on the use of GMOs, if that control can be justified under section 32 of the RMA. It is considered that the prohibited status for the release of all GMO land use activities and strict controls on the field trialling of GMO land use activities is necessary to reflect social and cultural expectations that Waikato will be protected from accidental contamination of the environment by GMOs. Providing for the wellbeing of the community by giving certainty through the use of a prohibited activity status and strict discretionary controls, including the use of bonds, is therefore appropriate.

(c) Prohibited status for the release of GMOs and for field trial activities that cannot meet discretionary activity standards means that the Waikato District is taking a precautionary approach to managing the potentially significant long term and irreversible effects of GMOs. In addition to the environmental risks associated with the release of GMOs, there are economic risks caused by the sensitivity of export markets for high value produce to potential GMO contamination.

(d) Discretionary activity status has been applied to specific viable GMO activities, namely the use of viable GMOs in veterinary vaccines where permitted standards cannot be met, and in field trials, provided discretionary standards can be met. By applying standards to the outdoor use of GMOs in only a select number of circumstances, the risks associated with their use, storage, cultivation, harvesting, processing or transportation can be reduced.

(e) As the Council has adopted a prohibited status for the release of all GMOs and the field testing of all GMOs (unless specifically provided for), while approval could be sought and obtained from the EPA their use would be unable to be carried out within the Waikato District.

(f) The necessity and relevance of the prohibited activity status for field trialling of GMOs that fail to meet discretionary standards, and the release of GMOs will be reconsidered at the next plan review. If in the meantime GMO use is proven to be safe and advantageous and the community then accepts that a precautionary approach is no longer warranted, then their prohibited activity status may be overturned by a plan change. This could either be in relation to GMOs in general, or to a specific GMO for which there is a demand for in the community and which poses a low risk with regard to adverse effects and to the economic viability of the production and marketing of GE free produce.

AND

Any consequential amendments or additional relief as necessary to address the concerns raised in the submission.

Decision Reasons:

- Inclusion of new provisions are required to provide an explanation in regards to why the prohibited activity status has been attributed to the release of and specified trials of GMOs.
- Provides further commentary on the importance of the GMO issue to Waikato District.
- This is the most appropriate place to provide an overarching explanation of the rationale in terms of GMOs and context for such objectives, policies and rules.

Point Number

707.2

Summary of Decision Requested:

Amend Chapter 10 Heading as follows:

Chapter 10: Hazardous Substances and Contaminated Land and Genetically Modified Organisms

AND

Add section 10.3 Genetically Modified Organisms, as follows:

10.3 Genetically Modified Organisms

10.3.1 Objective- Adverse effects of Genetically Modified Organisms

(g) To protect the community and their social, economic and cultural wellbeing and environment from the adverse effects associated with the outdoor release or field trials of Genetically Modified Organisms through the adoption of a precautionary approach.

10.3.2 Policy- Precautionary approach to managing Genetically Modified Organisms

(g) To adopt a precautionary approach to the management of Genetically Modified Organisms by prohibiting the release of a Genetically Modified Organism and the field trials of a Genetically Modified Organism, except as specifically provided for as a permitted activity or discretionary activity.

10.3.3 Policy-District specific approach to managing Genetically Modified Organisms

(g) To adopt a resource management framework for the management of Genetically Modified Organisms (GMOs) that is District specific taking into account environmental, economic, cultural and social well-being considerations.

10.3.4 Policy-Consent applications for selected outdoor use of Genetically Modified Organisms (GMOs)

(g) To allow consent applications to be made for the use of a viable Genetically Modified Veterinary Vaccine that does not meet permitted standards as a discretionary activity.

(b) To allow consent applications to be made for a field trial of a Genetically Modified Organism as a discretionary activity, provided specific standards are met.

(c) To require the holder of a resource consent granted for the field trialling of a Genetically Modified Organism to be financially accountable (to the extent possible) for any adverse effects associated with the activity, including clean-up costs, remediation and monitoring.

(d) Require that the field trialling of a Genetically Modified Organism does not result in migration of Genetically Modified Organisms beyond the area designated by the consent.

10.3.5 Policy- Future review of Genetically Modified Organism provisions

(g) To review the Plan provisions relating to Genetically Modified Organisms, particularly if there is new information on benefits and/or adverse effects of a Genetically Modified Organism Activity and/or there is a general community acceptance of the use of Genetically Modified Organisms that have proven to be safe and economically beneficial without adversely affecting the environment and the general social and economic wellbeing of the community.

AND

Any consequential amendments or additional relief as necessary to address the concerns raised in the submission.

Decision Reasons:

- Inclusion of objectives and policies relating to GMOs reflect the precautionary approach of prohibiting release of GMOs and field trials of GMOs until such time as they have been proven to be safe and economically beneficial without adverse effects on the environment and general social, cultural and economic wellbeing of the community.
- Specific objectives and policies will give guidance to planners in regards to consent applications and processing for discretionary GMO activities.
- Objectives and policies will address the cultural impact of GMOs on mana whenua and the environment (appropriate wording to be determined by iwi and council).

Point Number

707.3

Summary of Decision Requested:

Add five new definitions to Chapter 13- Definitions, in relation to Genetically Modified Organisms, as follows:

- **FIELD TRIALS-** Means, in relation to a Genetically Modified Organism, the carrying on of outdoor trials on the effects of the organism under conditions similar to those of the environment into which the organism is likely to be release but from which the organism, or any heritable material arising from it, could be retrieved or destroyed at the end of trials.
- **GENETICALLY MODIFIED ORGANISM-** Means any organism in which any of the genes or other genetic material: a.) have been modified by in vitro techniques; or b.) are inherited or otherwise derived, through any number of replications, from any genes or other genetic material which has been modified by in vitro techniques. For the absence of doubt, this does not apply to Genetically Modified (GM) products that are not viable (and are thus no longer GM organisms), or products that are dominantly non-GM but contain non-viable GM ingredients (such as processed foods).

- **GENETICALLY MODIFIED VETERINARY VACCINE-** Means a veterinary vaccine that is a genetically modified organism as defined in this Plan.
- **GENETICALLY MODIFIED MEDICAL APPLICATIONS-** Means the manufacture, trialling or use of viable and/or non-viable genetically modified organisms for medical purposes recognised as medicines under the Medicines Act 1981 and approved as safe to use by the Ministry of Health, including EPA approved releases, except for the outdoor cultivation of pharmaceutical producing organisms.
- **RELEASE-** Means, in relation to a Genetically Modified Organism, to allow the organism to move within New Zealand free of any restrictions other than those imposed in accordance with the Biosecurity Act 1993 or the Conservation Act 1987. For the avoidance of doubt this definition covers releases that are subject to conditions set out in Section 38A of the Hazardous Substances and New Organisms Act 1996 as well as any release not subject to conditions.

Decision Reasons:

- Definitions are requested in support of other requested provisions relating to GMOs.

Point Number

707.4

Summary of Decision Requested:

Amend the definition of Agricultural and Horticulture Research Facilities, in Chapter 13-Definitions, to include the following:

...Commercial application of such activities

For the avoidance of doubt, this definition does not include veterinary vaccines that use Genetically Modified Organisms, or any activities that involve Field Trials, or Release of Genetically Modified Organisms.

Decision Reasons:

- Definitions are requested in support of other requested provisions relating to GMOs.

Point Number

707.5

Summary of Decision Requested:

Add the following provisions to Chapter 22: Rural Zone to address Genetically Modified Organisms as follows:

22.1.1 Prohibited Activities

(1) The following activities is are a prohibited activities

...

PR2	<u>The Release of a Genetically Modified Organism</u>
PR3	<u>The Field Trialing of a Genetically Modified Organism that does not meet the discretionary standards in Rule 22.2.9.D1</u>

Rule 22.1.2 Permitted Activities

Activity

Activity Specific Conditions

...

...

...

P13

Activities involving Genetically Modified Organisms that are not classified as Veterinary Vaccines, Field Trials or Releases. This includes (but is not limited to) research within contained Laboratories, Medical Applications and Food containing non-viable Genetically Modified Products.

Nil.

P14

The use of a viable Genetically Modified Veterinary Vaccine.

(A) A specific dose of vaccine must be supervised by a veterinarian

Rule 22.1.5 Discretionary Activities

...

...

D17

The use of a viable Genetically Modified Veterinary Vaccine that does not comply with the permitted activity standard in Rule 22.1.2 P14 but meets the discretionary activity standards in Rule 22.2.9 D1.

D18

D1

(1) All discretionary Genetically Modified Organism activities must:

(a) Have the relevant approval from the Environmental Protection Authority;

(b) Be undertaken in accordance with Environmental Protection Authority approval conditions for the activity; and

(c) Provide evidence of the Environmental Protection Authority approval to Council.

(2) The consent holder must provide a bond to guarantee the performance of one or more consent conditions if required by the Council. This bond will be available to pay or reimburse any costs incurred by, or on behalf of, the Council to avoid, remedy or mitigate any adverse environmental effects and any other adverse effects to, or on, third parties (including economic effects), that become apparent during the exercise or after the expiry of consent.

(3) The consent holder must provide all of the following information when submitting a consent application:

(a) Details of the proposed containment measures for the commencement, duration and completion of the proposed activity;

(b) Details of the species, its characteristics, and lifecycle, to which the Genetically Modified Organism activities will relate;

(c) Research on adverse effects to the environment and economy associated with the activity should, genetically modified organisms escape from the activity area, and measures that will be taken to avoid, remedy or mitigate such effects.

(d) Evidence of research undertaken that characterises and tests the Genetically Modified Organisms, and the certainty associated with the accuracy of that information;

(e) A management plan outlining on-going research and how monitoring will be undertaken during, and potentially beyond, the duration of consent.

(f) Details of areas in which the activity is to be confined; and

(g) A description of contingency and risk management plans and measures.

AND

Add similar provisions to every zone chapter.

OR

Add a new district wide chapter addressing Genetically Modified Organisms.

AND

Any consequential amendments or additional relief as necessary to address the concerns raised in the submission.

Decision Reasons:

- Chapter 22 Rural Zone is shown as an example of the framework for application of GMO provisions.
- Prohibition of release of GMO is the cornerstone of the precautionary approach rule regime.
- The approach is justified until such time as GMOs can be proven to be used safely and contained in an outdoor context.
- Chapter 22 Rural Zone chosen as an example framework for application of GMO provisions.
- Uses of viable veterinary vaccines are provided for as a permitted activity so long they are administered under the supervision of a veterinarian at a specific dosage.
- Established through drafting of Auckland Unitary Plan provisions-conditions not complied with then such use is discretionary.
- Chapter 22 Rural Zone chosen as an example framework for application of GMO provisions.
- Field Trials meeting discretionary activity standards, with relevant EPA approvals allows full scope of effects to be understood and an opportunity to include appropriate conditions.
- Requirement for management plans and clear containment and risk management protocols.
- If viable veterinary vaccines are not applied according to the appropriate conditions then such use goes from permitted (under Rule 22.1.2 Permitted Activities P13) to discretionary.
- Viable genetically modified veterinary vaccines can have higher risks if not administered correctly. An example of such risk is a GM veterinary vaccine distributed by way of edible food/plants, which cannot be supervised by a veterinarian, and may present high risks to the environment and health and safety of people. In this circumstance, council holds discretion by requiring controls or declining an application.

Point Number

707.6

Summary of Decision Requested:

Add objectives and policies to address the cultural impact of Genetically Modified Organisms on mana Whenua and the environment.

Decision Reasons:

- It may be appropriate to require a cultural values assessment from applicants applying for resource consents.
- Council may need to engage with relevant iwi to determine the most fit-for-purpose wording.

Submitter Number:

708

Submitter:

Neil McHugh

Point Number

708.1

Summary of Decision Requested:

Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- No reasons provided.

Point Number

708.2

Summary of Decision Requested:

Retain Chapter 27 Te Kowhai Airpark, as notified.

Decision Reasons:

- No reasons provided.

Submitter Number:

709

Submitter:

Vicki Lee Wihongi

Point Number

709.1

Summary of Decision Requested:

Retain Chapter 2: Tangata whenua.

Decision Reasons:

- The provisions will support more effectively the occupation and development of Maori land, allowing mana whenua to use, manage and enjoy traditional resources in accordance with tikanga Maori.
- This will strengthen connections to the area for generations to come.
- The barriers in the Operative District Plan prevent tangata whenua from maintaining relationships with ancestral land.

Submitter Number:

710

Submitter:

Strantz Ian Wihongi

Point Number

710.1

Summary of Decision Requested:

Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- While the District Council have expressed an obligation to upholding the Rangatiratanga Principle inherent in Te Tiriti o Waitangi in respect to Tangata Whenua, the existing District Plan created barriers to the actualisation of iwi controlling their resources as their own.
- The Proposed District Plan will significantly reduce the barriers and will allow Ngati Koata to sustainably develop its land blocks in sustainable ways in accordance with their values.

Submitter Number:

711

Submitter:

Romana Graham

Point Number

711.1

Summary of Decision Requested:

Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- The content in the Proposed District Plan supports the social, cultural and economic aspirations of mana whenua on the Whaanga coast.
- Through the development of sustainable practices on Ngati Koata lands in Whaingaroa they will be able to reinvigorate their connections with the area, local iwi and the wider community.

Submitter Number:

712

Submitter:

Bettley-Stamef Partnership

Point Number

712.1

Summary of Decision Requested:

Amend the zoning of 125, 131 145, 158, 165A, 165B, 165C, 167A, 168, 171 (aka 167), 174 Matangi Road and 21A, 21B, 26, 29, 51, 54, 58, 59, 60, 61A, 61B, 61C, 62A and 62B Yumelody Lane from Rural Zone to Country Living Zone (see submission for map of properties).

Decision Reasons:

- Land in the immediate surrounding area (to the west and south) is zoned Country Living Zone.
- Country Living Zone is more appropriate as land is no longer suitable for feasible farming operations due to existing subdivisions.
- Country Living Zone would be more compatible with the zoning of the immediate surrounding area.
- Extension of Country Living Zone is more appropriate given existing residential development and urban form.
- The Waikato Expressway immediately to the east would provide a strong visual demarcation between the Country Living Zone and Rural Zoned land beyond.
- Extension of Country Living Zone to the east aligns with the Waikato Expressway designation boundary, which is a practical and logical expansion of the existing Country Living Zone boundary.
- Waikato Expressway forms a suitable zone boundary between the Country Living and Rural Zones.

Point Number

712.2

Summary of Decision Requested:

Add a walkway/cycle way/bridleway notation along the western side of the Waikato Expressway all 25 lots comprising the subject site on Matangi Road and Yumelody Lane from Matangi Road through to the walkway/cycle way/ bridleway in the Gully of the Mangaonua Stream.

Decision Reasons:

- This is an opportunity to extend 'walkway/cycle way/bridleway' along the western side of the expressway and/or over a portion of the subject land.

Point Number

712.3

Summary of Decision Requested:

Delete all references to Designation (NI) from the 25 sites on Matangi Road and Yumelody Lane (25, 131 145, 158, 165A, 165B, 165C, 167A, 168, 171 (aka 167), 174 Matangi Road and 21A, 21B, 26, 29, 51, 54, 58, 59, 60, 61A, 61B, 61C, 62A and 62B Yumelody Lane).

Decision Reasons:

- The submission opposes the identification of an airport related Designation (NI) on the subject site.
- The designation is not relevant to the subject properties and their activities.
- Properties are utilised as private residential dwellings and lifestyle blocks and do not form part of the main runway for Hamilton Airport.
- Properties have not been designated for any other purpose.

Submitter Number:

713

Submitter:

Matangi Farms Land Ltd

Point Number

713.1

Summary of Decision Requested:

Amend the zoning of Lot 24 DP 500745 (CFR 745666) , Lot 2 DPS 17858 (CFR SA16A/1340) and Lot 3 DPS 14674 (CFR SA12D/955) on Taplin and Tauwhare Roads, Matangi from Rural Zone to Country Living Zone, or Residential Zone or Village zone in the alternative.

Decision Reasons:

- The land is predominantly used for growing of lawn turf, i.e. not used for productive rural activities.
- The proximity of the site to the central village area is considered that the current use of the land represents an inefficient use of an urban land resource and seeks rezoning to realize its potential.
- The subject site is located near the center of Matangi village and is adjacent to lifestyle allotments along its boundaries, defining the overall village style character and sets the desired amenity for the area.
- Frontage to Tauwhare (230m) and Taplin Road (500m) provides good connection and integration with existing transportation network.
- Good pedestrian connection to village centre.
- The Long term plan and Matangi Community Plan identify future growth of village is anticipated and expected to be one of the highest rates of growth in villages and communities (39% by 2045).
- Wastewater Activity Management Plan (WAMP) states the existing Matangi scheme is at capacity and is inefficient, therefore Country Living Zone is sought which manages wastewater on site.
- Site has been included within the Waikato District Council Urban Limits with Proposed District Plan Zoning.
- Majority of site within urban limits and consistent with Future Proof's direction for urban development.
- Consistent with objectives and policies of Country Living Zone.
- Allowing the amended zoning will not compromise the purpose of the RMA.
- No change in zoning does not allow the township to grow.
- Not contrary to section 6, 7 and 8 of the RMA.
- Lifestyle sized allotments would be a suitable use.

Submitter Number:

714

Submitter:

Samuel Frew

Point Number

714.1

Summary of Decision Requested:

Retain Chapter 2 Tangata Whenua.

Decision Reasons:

- The content in Chapter 2: Tangata Whenua helps to address the barriers that have prevented owners from engaging and using the land for social, cultural and economic wellbeing.
- A masterplan for the development of Ngati Koata land blocks in Whaingaroa will encourage more frequent visits by this iwi.
- The provisions may enable Whaingaroa to become a turangawaewae stronghold again for Ngati Koata.

Submitter Number:	715	Submitter:	Khushwin Limited
Point Number	715.1		
Summary of Decision Requested:	Amend the zoning of the property at 135 Hull Road, Waiuku from Rural Zone to Living Zone or Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Rules within the Living Zone could apply to this site. • Site could be subdivided for residential development, all of which will have to comply with the relevant rules/standards. • Allowed sections to be larger so all services can be contained on site. Is in accordance with Rule 21.63 Living Zone- Allotment size. • Site adjoins Residential Zoned land, with smaller allotments not connected to reticulated waste water and fall under Auckland Council jurisdiction. • Zoning the 135 Hull Road to the Living Zone contains sections with waste water and storm water provided for, therefore not impacting on the reticulated infrastructure of Waiuku. • Proposal will allow more residential development, with minimal effects on public reticulation or other public services. • Provide housing to fulfil gap in housing industry. • Develop in area already with school amenities in place. • The land is reasonably flat with some main overload flowpaths dissecting the site. 		

Submitter Number:	716	Submitter:	Sarah Whyte
Point Number	716.1		
Summary of Decision Requested:	No specific decision sought, but the submission opposes the proposed Industrial zoning for those properties on River Road, Tuakau which are zoned Business in the Franklin Section of the Operative Waikato District Plan (see map attached to the submission).		
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan already proposes a large industrial area which is where all industry should eventually relocate to the spattering zoning for industry will detrimentally affect Tuakau's future. • River Road is the only way that the public can gain access to the Waikato River and therefore industry (particularly odorous industry) should not compromise Tuakau's major attraction. • Industry should be discouraged to enable development of safe walkways and/or cycleways to the river. • Waikato Regional Council has proven to be ineffective in controlling the effects of some existing industries meaning a possible repeat of this situation with future industries locating in these River Road locations. • The area outside the boundaries is important for local amenity. • Industry omitting odour is a long term problem along River Road. 		

Submitter Number:	717	Submitter:	Kim Willetts
Point Number	717.1		
Summary of Decision Requested:	Retain Rule 20.2.3.1 P3 Noise - General.		
Decision Reasons:	<ul style="list-style-type: none"> • Provides existing residences with a safeguard against excessive noise from nearby industrial zones. • Existing houses at Horotiu near the industrial zone do not have noise insulation and therefore need to have their amenity protected. 		

Submitter Number:	718	Submitter:	Helen Gray
On behalf of:	Selwyn Leonard Taylor & Helen Stewart Gray		
Point Number	718.1		
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 69 Morrison Road, Pukekawa (Property No. 305956) .		
Decision Reasons:	<ul style="list-style-type: none"> • The area nominated as a significant natural area there is a summer drain. This is dry in the summer and flows when excessive rain flows in winter. • There is no native vegetation, only overgrown blackberry, row of bamboo on southern boundary and some gorse. • The kiwifruit orchard on one side and cropping land on the other makes spraying weeds difficult. • On the eastern side, the gardeners (Balle Bros) on the adjoining property have many silt traps and needed on several occasions to enter the submitter's side of the boundary and clear the drain. If silt is not removed it will flood the property. • Western side of drain is good for grazing submitter's horses and therefore does not warrant Significant Natural Area classification. • Submitter met with the WDC at a meeting on 28th October 2015 about potential Significant Natural Areas and was agreed that the property was <u>not</u> a significant area. Submission has an attached copy of 2015 decision to not designate as Significant Natural Area . 		

Submitter Number:	719	Submitter:	Rob Waddell
On behalf of:	Riverdale Group Ltd		
Point Number	719.1		
Summary of Decision Requested:	Amend the extent of Maaori Site of Significance S15/25 shown on the Planning Map, to be consistent with the registered covenant as shown on the Scheme Plan of subdivision at Lot 1 DP 324809 (102 Hooker Road) and Lot 2 DP 324809 (124 Hooker Road) Tamahere (see maps attached to submission);		

AND

Amend Schedule 30.3 Maaori Sites of Significance so that S15/25 is located on 102 Hooker Road, Tamahere rather than 124 Hooker Road, Tamahere.

Decision Reasons:

- Extent of archaeological site S15/25 is inaccurately shown on the Planning map and must be corrected.
- Incorrectly displays archaeological site S15/25 extending into Lot 2 DP 324809/124 Hooker Road, whereas its only located on Lot 1 DP 324809/102 Hooker Road.
- Site is covered by covenant, located as Area B on submitters subdivision plan.
- Schedule 30.3 incorrectly states the location of site S15/25.

Point Number

719.2

Summary of Decision Requested:

Delete the Maaori Area of Significance SS65 from 124 Hooker Road, Tamahere;

OR

Amend Rule 22.2.3.2 Earthworks - Maaori Sites and Maaori Areas of Significance, to allow earthworks associated with the construction of permitted activities within the Rural Zone (e.g. dwellings, sheds etc.).

Decision Reasons:

- The Planning Map identifies 124 Hooker Road as a 'Maori Area of Significance,' notated as SS65.
- The extent of a property containing an archaeological site is already protected under the Heritage New Zealand Pouhere Taonga Act 2014 and does not need protection under the District Plan.
- Rule 22.2.3.2 requires a resource consent application for any earthworks regardless of scale and whether there is a recorded archaeological site on the property.
- Earthworks for otherwise permitted activities within the rural zone will require a consent for no apparent or justifiable reason.
- Digging a hole for a tree would even require a resource consent.

Point Number

719.3

Summary of Decision Requested:

Amend the extent of the Significant Natural Area on the property at 102 Hooker Road, Tamahere, to match the esplanade strip shown on the Scheme Plan of subdivision (see map attached to the submission).

Decision Reasons:

- The Proposed District Plan identifies a strip of the submitter's property along the margin on the Waikato River as a Significant Natural Area and Significant Amenity Landscape.
- Classification of the property is contrary to a conclusion reached by Waikato District Council in relation to a subdivision consent where it was determined the area was not a Significant Natural Area.
- Extent of classification should be amended to not include areas of exotic vegetation and not arbitrarily extend to the top of the bank.

Submitter Number:

720

Submitter:

Spencer and Isabelle Wheeler

Point Number

720.1

Summary of Decision Requested:

Amend Rule 16.1.1 PR1 to change the Prohibited activity status for any building, structure, objects or vegetation to Non-complying activity status.

Decision Reasons:

- Supported by Raglan Coastguard, Raglan Fishing Club and the Waikato Regional Harbormaster (support letters attached to submission) that the Navigational beacon be lifted.
- Lifting of beacon would allow current height restriction which runs right through submitters 1920s bach at 12 Long Street, Raglan to be lifted and prohibited activity status for anything over 1.5m must reflect such change.
- Non-complying status will still give WDC planners scope to ensure any new building on the site does not interfere with the beacon's raised height.
- Submitter referred to previous submission made in 2005 relating to the same issue.
- In 2005 submission submitter opposed imposition of height restriction on two grounds- a.) Unduly restricted their ability to build on their property, b.) Height restriction plan wouldn't solve visibility issues surrounding navigation beacon. Previous submission also stated there were problems with the visibility of the navigational beacons.
- Submitter does not want to be placed in the same impossible position they were back in 2005 regarding height restrictions and needing to replace the existing old building.

Point Number

720.2

Summary of Decision Requested:

Amend Appendix J Raglan Navigation Beacon Height Restriction, to lift the navigation light in accordance with the design plans provided to Council on 13th July 2018.

Decision Reasons:

- Opposes to the imposition of a height restriction plane as this unduly restricts the ability to build on the property at 12 Long Street, Raglan and does not solve the visibility issues of the navigation beacons.

Submitter Number:

721

Submitter:

Jennifer Berczely

Point Number

721.1

Summary of Decision Requested:

Add strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms that are the same or similar to those in the Far North District Plan, Whangarei District Plan and Auckland Unitary Plan.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Concerns about the potential risks posed by the release of GMOs into the environment and the potential to adversely affect ecological, economic and resource management values, social, cultural wellbeing and tangata whenua.
- Release of GMOs has a potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing

- 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand.
 - 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events and sabotage of projects.
 - Once GMOs have been released they would be very difficult, if not impossible to eradicate.
 - Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
 - It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number 721.2

Summary of Decision Requested: **Add** a resource management framework for the management of genetically modified organisms to the Proposed District Plan that is region specific, taking into account environmental, economic and social well-being considerations.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Concerns about the potential risks posed by the release of GMOs into the environment and the potential to adversely affect ecological, economic and resource management values, social, cultural wellbeing and tangata Whenua.
- Release of GMOs has a potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events and sabotage of projects.
- Once GMOs have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Submitter Number: 722

Submitter: Will Phelps

Point Number 722.1

Summary of Decision Requested: **Amend** the zoning of the properties located at 5,9,11,15 and 17 Mangatea Road, Te Hoe so that they retain the Operative District Plan zoning (i.e. Living Zone) rather than the proposed Village Zone.

Decision Reasons:

- Existing population and land uses do not reflect a 'village.'
- No reticulation or comprehensive community services.
- Rezoning is expected to result in a rates increase.
- Does not meet the description of a Village Zone.

Point Number 722.2

Summary of Decision Requested: No specific decision sought, but submission opposes any rates increases based on climate change.

Decision Reasons:

- Council needs to justify any rates increase based on climate change rather than deferring to government policy.

Submitter Number: 723

Submitter: Tyler Sharratt

On behalf of: Winstone Aggregates

Point Number 723.1

Summary of Decision Requested: **Amend** Aggregate Resource Area on the Meremere Quarry to extend to the full property boundary (see Appendix 2 of the submission);
AND
Amend the Aggregate Resource Area on the Pukekawa Quarry to extend to the full property boundary (See Appendix 1 of the submission).

Decision Reasons:

- The full extent of the land owned by Fletcher Concrete and Infrastructure Ltd is not shown by the Aggregate Resource Area overlay.
- The intention of the overlay is to protect existing quarries from reverse sensitivity effects and safeguard areas where the quarries are likely to expand. Therefore the overlay needs to be applied to the entire site.

Point Number 723.2

Summary of Decision Requested: **Delete** the two Significant Natural Areas from the Meremere Quarry (see Appendix 2 of the submission for their locations).

Decision Reasons:

- Meremere Quarry has two areas of Significant Natural Area partially overlain on the identified Aggregate Extraction Area, and also an area consented to accept clean fill.

- The two Significant Natural Areas need to be removed from map overlays.

Point Number 723.3

Summary of Decision Requested: Retain Policy 5.3.5: Earthworks Activities, as notified.

Decision Reasons:

- Reasons not provided.

Point Number 723.4

Summary of Decision Requested: Retain Policy 5.3.7 Reverse Sensitivity Effects.

Decision Reasons:

- Reasons not provided.

Point Number 723.5

Summary of Decision Requested: Amend Objective 5.4.1: Minerals and Extractive Industries, as follows:
(a) Mineral resource use and extractive industries provides economic, social and environmental benefits to the district.

Decision Reasons:

- Proposed objective doesn't read properly.
- It states "Mineral use provides," whereas it makes sense to say "Minerals and Extractive Industries provide..."

Point Number 723.6

Summary of Decision Requested: Amend Policy 5.4.2 (d) Access to minerals and extractive industries, as follows:
(d) Avoid the location of any sensitive land use within the specified buffer areas which otherwise risks the effective operation of a lawfully established extractive industry or a site identified as an Aggregate Resource Area.

Decision Reasons:

- Wording of (d) does not protect any identified Aggregate Resource Area.
- Clause (d) needs to include both the established extractive industry and Aggregate Resource Area to prevent the identified resource from being sterilised or subject to development constraints due to reverse sensitivity issues.
- There is no point having an overlay if there is no policy that adequately protects them.

Point Number 723.7

Summary of Decision Requested: Amend the definition of "Extractive Industry" in Chapter 13 Definitions, as follows:
Means taking, winning or extracting by whatever means, the naturally-occurring minerals (including but not limited to coal, rock, sand, and gravel) and peat from under or on the land surface. The term includes the processing by such means as minerals at or near the site, where the minerals have been taken, won or excavated. The term also includes the removal, stockpiling and filling of overburden sourced from the same site and the following activities:

- Blasting;
- Storing, distributing and selling mineral products;
- Accessory earthworks;
- Treating stormwater and waste water;
- Landscaping and rehabilitation of quarries;
- Clean fills and managed fills;
- Recycling or reusing aggregate from demolition waste such as concrete, masonry, or asphalt;
- Accessory activities and accessory buildings and structures such as weighbridges, laboratories and site offices.

It includes all activities and structures associated with underground coal gasification, including pilot and commercial plants and distribution of gas. It excludes prospecting and exploration activities.

AND

Amend the definition of "Aggregate Extraction Activities" and "Mineral Extraction and Processing" in Chapter 13 Definitions to mean the same as "Extractive Industry."

Decision Reasons:

- Activities associated with extractive industry are defined separately three times, all with different wording (Aggregate extraction, Extractive Industry and Mineral Extraction and Processing).
- Term "extractive industry" needs defining, and then the terms "Aggregate extraction activities" and "Mineral Extraction and processing" means the same.

Point Number 723.8

Summary of Decision Requested: Retain the definition of "Clean fill" in Chapter 13 Definitions.

Decision Reasons:

- No reasons provided.

Point Number 723.9

Summary of Decision Requested: Amend Rule 14.12.1.4 (1) (d) Permitted Activities relating to P4 Traffic Generation, as follows:
(d) Within the Rural Zone:

- (i) There is maximum 200 vehicle movements per day and no more than 15% of these vehicle movements are heavy vehicle movements; or*
- (ii) Within the Agricultural Research Centres identified on the planning maps as a Specific Area there is maximum 3000 vehicle movements per day; or*
- (iii) All traffic movements generated from sites identified on the planning maps as Aggregate Extraction Areas, there is a maximum of 400 vehicle movements per day; or*

Decision Reasons:

- There is no provision in the permitted traffic generation rule for lawfully established extractive industry and their associated truck movements.
- Most extractive industry sites are located appropriately in the Rural Zone. Rule P4 has a maximum of 200 vehicle movements, of which 15% can be heavy vehicles.
- An estimated 90% of vehicle movements from quarries are heavy vehicle movements.
- It is unlikely that it is Council's intention to make all quarries in the district non-compliant with regard to this rule or is it expected quarries all seek consent for a lawfully established activity.

Point Number 723.10

Summary of Decision Requested: Amend Chapter 22: Rural Zone for the Extractive Industry by adopting the Operative Waikato District Plan: Franklin Section rules for Aggregate Extraction.

Decision Reasons:

- There are no rules in the Rural Zone that enable extractive industries.
- This approach is contrary to Objective 5.4.1 and Policy 5.4.2 and does not give effect to Waikato Regional Policy Statement Policy 6.8- Access to Minerals.
- The Section 32 report (Rural) stated adopting the Franklin section rules is not appropriate because it results in duplication and inefficiencies from administering multiple zones. This is not an acceptable explanation.
- No reason to contravene the above objective, policy and intention of the Waikato Regional Policy Statement.
- Having all extractive industry activities as discretionary or non-complying activities, even within identified Aggregate Extraction Areas, is not acceptable.
- Franklin Section rules have been widely accepted by the industry.
- Council should rethink its stance on the proposed Rural Zone provisions and look to neighbouring councils, such as the Auckland Unitary Plan or Waipa District Plan.

Point Number 723.11

Summary of Decision Requested: Retain Policy 5.3.13 Waste Management Activities.

Decision Reasons:

- Reasons not provided.

Point Number 723.12

Summary of Decision Requested: Retain Policy 5.3.15 Noise and Vibration.

Decision Reasons:

- Reasons not provided.

Submitter Number: 724 **Submitter:** Sue Robertson
Organisation: Tamahere Community Committee

Point Number 724.1

Summary of Decision Requested: Retain the rules permitting a Minor Dwelling, particularly the following aspects:

- Permitted activity status
- Absence of standards restricting the accommodation to a dependent relative
- Absence of the limitation on the number of kitchens on a property (and the definition of a kitchen)
- Enabling a minor dwelling to be either attached or detached as the primary dwelling.

Decision Reasons:

- Supports the occupation of a minor dwelling by any person and therefore "levels the playing field" by not limiting it to a dependent relative.
- Allows the dwelling to be used by anyone when dependent relatives die or move, or if the property is sold.
- The removal of the limitations on kitchens and the ability to have an attached or detached minor dwelling removes confusion.

Point Number 724.2

Summary of Decision Requested: Delete Rule 23.3.2 (b)(i) Minor Dwelling which requires this building to be located within 20 metres of the primary dwelling.

Decision Reasons:

- The condition to locate the minor dwelling within 20 metres of the primary dwelling is not necessary if it will not be occupied by a dependent relative.
- The site setback requirements and sharing a single driveway access with the existing dwelling are sufficient.

Point Number 724.3

Summary of Decision Requested: Amend Rule 23.1.1 P4 Permitted Activities - home occupations, by replacing the notified conditions with the conditions for home occupations in this zone as set out in the Waikato Section of the Operative Waikato District Plan.

Decision Reasons:

- The notified conditions will result in the amenity of the Countryside Living Zone being degraded. This is because these conditions:
 - defer to the infrastructure requirements in Chapter 14 Infrastructure;
 - allow home occupations to operate up to 9pm;
 - set no limit on daily vehicle movements or heavy vehicle movements; and
 - do not manage interference with neighbours' televisions, radios, telephones or electronic equipment.
- The aspects of Rule 23.1.1 P4 that are supported:
 - The removal of the 40m2 gross floor area limit.
 - The requirement for the activity to be wholly contained in the dwelling or ancillary building.

Point Number 724.4

Summary of Decision Requested:	Retain Rule 23.3.6 Building coverage, which permits up to 10% building coverage or 300m2, whichever is the larger.
Decision Reasons:	<ul style="list-style-type: none"> The alternative limit of 300m2 provides flexibility for development on smaller land holdings (eg: 2500m2), rather than the previous 10%. Recognises that building coverage is subject also to the impervious surface rules and building setback rules.
Point Number	724.5
Summary of Decision Requested:	No specific decision sought, but submission opposes the activity specific conditions for stormwater management in Rule 14.1.1.1 Permitted Activities unless clarification is provided on the workings of this rule and confirmation is given that there will be no requirement to obtain resource consent.
Decision Reasons:	<ul style="list-style-type: none"> In terms of the operative rule, resource consent is required if building coverage exceeds 700m2 on a site in the Countryside Living Zone. The new rule 14.1.1.1 is not supported if that also involves resource consents which can be time consuming and costly. The provisions in Chapter 14 seem to be much more relevant to urban development.
Point Number	724.6
Summary of Decision Requested:	Retain Rule 23.4.2 RD1 (a)(i) General Subdivision, which specifies a minimum net site area of 5000m2.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	724.7
Summary of Decision Requested:	Delete Rule 23.4.2 (a)(ii) General Subdivision, which is the requirement for an average site area of 1.1ha where the land to be subdivided is located within the Airport Subdivision Control Boundary.
Decision Reasons:	<ul style="list-style-type: none"> This requirement seems redundant given the amount of intensification that has occurred in the Countryside Living Zone. It only affects a very small area within this zone, there has been no opposition from the many landowners who already reside on existing 5000m2 sites within the Airport Subdivision Control Boundary, a lot size of 1.1ha is difficult to maintain and consistency is required with the 5000m2 lot size required outside of this restricted area.
Point Number	724.8
Summary of Decision Requested:	Amend Table 14.12.5.15 Access and road conditions (Rural and Country Living Zones) in Chapter 14, by reducing the minimum road reserve width from 20m to 12m for the Country Living Zone where pavement and drainage and services can be accommodated.
Decision Reasons:	<ul style="list-style-type: none"> There are a few properties in the Country Living Zone that are isolated by 12-15m wide rights-of-way which may not be able to be subdivided. A 12m road reserve width could be favourably considered where a pavement, drainage and services can still be accommodated.
Point Number	724.9
Summary of Decision Requested:	Retain the mapping of Significant Natural Areas provided that there is further investigative work to ensure consistency across the district (involving landowner consultation and site visits by an ecologist) and confirmation that the mapping of these areas will not be recorded on affected titles.
Decision Reasons:	<ul style="list-style-type: none"> The process of identifying Significant Natural Areas and communicating that to landowners has not been ideal. There seems to be inconsistencies in the consideration of these features between some neighbouring properties.
Point Number	724.10
Summary of Decision Requested:	Amend the building setbacks from Tamahere Commercial Areas A and B, by reinstating the requirements of the Operative District Plan rule that enables an accessory building or non-habitable building to be built within the 100m setbacks from these areas.
Decision Reasons:	<ul style="list-style-type: none"> A non-habitable building should be able to be built within this setback area.
Point Number	724.11
Summary of Decision Requested:	Retain Rule 22.4.1.6 Conservation lot subdivision as notified, particularly the requirement to put conservation covenants in place on the gully or bush area.
Decision Reasons:	<ul style="list-style-type: none"> The requirement to covenant gullies or bush areas encourages the preservation, on-going care and restoration of these areas and the proposed lot size reduces the area that the landowner is responsible for.
Point Number	724.12
Summary of Decision Requested:	Add provisions into the District Plan to address cost responsibilities when the harvesting of forests results in damage to the local roading network.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	724.13

Summary of Decision Requested: Amend the Proposed District Plan to enable targeted rates to be charged when benefits are only accrued to a specific area (user pays).

Decision Reasons:

- Where infrastructure costs are specific to a ward, that ward should pay if it is not something other wards will use.

Point Number 724.14

Summary of Decision Requested: Retain Chapter 5: Rural Environment provisions which address the protection of quality soils so they remain for production of food.

Decision Reasons:

- Quality soils need to remain available for food production.

Point Number 724.15

Summary of Decision Requested: Amend the various rules for subdivision in the Rural Zone to reduce the specified minimum lot size from 8000m2 to 5000.

Decision Reasons:

- A lot area of 8000m2 is too large for most people who wish to live rurally and it is not large enough to support grazed animals.
- 8000m2 is a very big lawn to mow.

Point Number 724.16

Summary of Decision Requested: No specific decision sought, but submission wants to confirm that that Proposed District Plan protects the significant stands of Kahikatea in the District

AND

Further investigative work regarding the stands of kahikatea on the Montgomerie property at 70 Duncan Road and the Hatrill property on Pencarrow Road.

Decision Reasons:

- No reasons provided.

Point Number 724.17

Summary of Decision Requested: Amend the Proposed District Plan so that when resource consent applications are lodged for forestry and its future harvesting, Council considers the effects on district roads, traffic, amenity and landscape and payments, such as bonds.

Decision Reasons:

- No reasons provided.

Point Number 724.18

Summary of Decision Requested: Retain the rules regarding Indigenous vegetation clearance inside a Significant Natural Area, which applies to gullies identified as Significant Natural Areas.

Decision Reasons:

- No reasons provided.

Point Number 724.19

Summary of Decision Requested: Retain the walkways and trails identified on the planning maps.

Decision Reasons:

- No reasons provided.

Point Number 724.20

Summary of Decision Requested: Retain subdivision rules requiring identified off-road walkways be vested and that land is proactively sought while required.

Decision Reasons:

- No reasons provided.

Point Number 724.21

Summary of Decision Requested: Retain the removal of indicative roads that are no longer required in the Country Living Zone.

Decision Reasons:

- No reasons provided.

Point Number 724.22

Summary of Decision Requested: Retain the provisions in Chapter 19 containing the provisions for the Business Zone at Tamahere which are altered to be consistent with the approved resource consent for the new development.

Decision Reasons:

- No reasons provided.

Submitter Number:	725	Submitter:	Laurence Harris
Point Number	725.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> We need to keep as many airfields as possible. 		
Point Number	725.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> We need to keep as many airfields as possible. 		
Submitter Number:	726	Submitter:	Waikato Aggregates Ltd
Point Number	726.1		
Summary of Decision Requested:	<p>Amend the extent of the Aggregate Extraction Area shown on Planning Map 27.3 for the site Lot 2 DP 391449 (34A Tauwhare Road) to show the full extent of the Aggregate Extraction Area for the site;</p> <p>AND</p> <p>Any further amendments or relief necessary to support the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> Resource consent was granted to the owner of the property (Titoki Sand Ltd) to establish and operate a sand extraction, sales and clean-filling operation (sand quarry) which enabled extraction across the majority of the site, subject to a number of conditions as set out in the consent decision LUC0214/10. Waikato Aggregates Ltd has been set up as the entity to operate the sand quarry. Extraction activities commenced in April 2013 after completion of the entrance improvements. Extraction activities are occurring within Stage 6 at the southern end of the site, with rehabilitation activities occurring in previous stages (Stages 4 and 5). The site has an extensive processing and stockpiling area that is located on the northern end of the site and within Stage 1. Currently the site is not subject to any overlays relating to extractive industries. Planning Map 27.3 proposes to impose an Aggregate Extraction Area overlay over the northern part of the site and does not fully reflect the extent of the site. This should be amended to reflect the extent of extraction that is enabled by the land use consent. This would be consistent with Policy 5.4.2, which seeks to ensure the protection of mineral resources by identifying lawfully established extractive industries in Aggregate Extraction Area on the planning maps. It is estimated that there is a further 5-10 years of resource available within the site depending on market demand. 		
Submitter Number:	727	Submitter:	James Schmidt
Point Number	727.1		
Summary of Decision Requested:	Retain Chapter 9.2 for the Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> To help protect an important aviation asset for the community. 		
Submitter Number:	728	Submitter:	Seumas MacDonald
Point Number	728.1		
Summary of Decision Requested:	Delete the walkway/cycleway/bridleway from the property located at 658 Te Akau South Road, Te Akau.		
Decision Reasons:	<ul style="list-style-type: none"> Concerned about loss of privacy and health and safety risks on the property. Concerned about people wanting to camp on the land and the ongoing nuisance and other issues arising from general public accessing the area. Value of the land may be affected. 		
Point Number	728.2		
Summary of Decision Requested:	Amend the Significant Natural Area located on the property at 658 Te Akau South Road, Te Akau by removing the south-east portion of the Significant Natural Area. (Refer to map provided in submission).		
Decision Reasons:	<ul style="list-style-type: none"> Area to be removed from the Significant Natural Area map comprises only re-growth gorse, woolly nightshade with no native vegetation present. It is unnecessary to map this as Significant Natural Area. Significant Natural Area would unreasonably limit the future development options. 		

Submitter Number:	729	Submitter:	Naomi and Glen Syred
Organisation:	Maioro Property Limited		
Point Number	729.1		
Summary of Decision Requested:	Amend the proposed zoning for the property at 77 Maioro Road, Otatau from the Business Zone to the Village Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • A Business Zone is not appropriate as it reflects the historic occupation of this property by the Otatau Tavern which ceased to operate 10-15 years ago and no business use has since been established. • The Property Economics report provided in support of the resource consent issued in May 2018 (that enables nine lots to be developed with ground level dwellings) concluded that the effects from the loss of business land in Otatau would be inconsequential to the market for business land in the Franklin/Waikato area. • Given this resource consent, a Village Zone would provide surety of use and development to future owners and residents in this subdivision. • The Village zoning also applies to adjacent residential properties in Otatau village. 		

Submitter Number:	730	Submitter:	Fraser Graafhuis
Organisation:	Mercury NZ Limited ("Mercury")		
Point Number	730.1		
Summary of Decision Requested:	<p>Withdraw all Stage 1 of the Proposed Waikato District Plan and re-notify Stage 1 together with Stage 2 once a thorough flood analysis has been undertaken and consulted on.</p> <p>OR</p> <p>Review all of the Stage 1 provisions for urban growth and land use intensification (objectives, policies, methods and rules) in order to manage flood hazard risk at Stage 2 and hear submissions for both stages together.</p>		
Decision Reasons:	<p>Until a thorough flood hazard assessment has been undertaken and included within the First Schedule process, Mercury opposes the entire Proposed District Plan Stage 1. Mercury reserves its right to comment on any part of the RMA framework, including section 32 analysis, and issues, objectives, policies and methods within any part of the Proposed District Plan during further or later stages.</p> <p>Mercury considers that it is necessary to analyse the results of a flood assessment, which shows areas affected by a 1:100 event prior to designing a policy framework, which includes management controls that avoid, remedy and mitigate significant flood risk in an appropriate manner to ensure there is a tolerable level of risk exposure for all land use and development.</p> <p>Mercury also requires time to peer review any flood assessment information including the assessment of assumptions which relate to the operation of the Waikato Hydro Scheme.</p> <ul style="list-style-type: none"> • Land use and development located downstream of the Waikato hydro scheme could be exposed to intolerable levels of risk. Effects of a significant flood event needs to be well understood prior to designing a policy framework and providing for urban growth. • The submitter is extremely concerned that the staging of the Proposed District Plan currently underway will adversely impact on the ability to achieve sustainable management of flood hazard matters. • Adequate flood hazard mapping has not been undertaken for Stage 1 and relevant spatial layers and a policy framework for Natural Hazards will not be proposed until Stage 2. • As a result the submitter will need to re-visit the provisions in Stage 1 as part of consequential amendments to its Stage 2 submission. • This difficulty could have been avoided by not staging the Proposed District Plan process in the manner now underway. • The submitter is interested in all areas of the Waikato River main stem catchment, including the Rural Zone, urban settlements of Taupiri, Ngaruawahia, Huntly, Ohinewai, Te Kauwhata, Mercer, Meremere, Pokeno, Tuakau and Port Waikato. • The submitter will support urban growth (including the provision of sensitive activities) within locations where there is a tolerable level of risk exposure for all land use and development. • This principle is fundamental to sound planning, as land owners can then make informed decisions about resilience and how to further mitigate effects. • Until all the information is collected and rationalised in the correct order, no judgement can be made on the following matters: <ul style="list-style-type: none"> ◦ What are the effects of a significant flood event (1 in 100 year) on specific areas of land? This is needed to determine whether avoidance is required or how risk can be mitigated to a tolerable for land use and development. ◦ When considering where new urban growth is to be located, the submitter considers avoidance is the first tool in the tool kit. ◦ Significant flood risk which cannot be mitigated to a level which is tolerable for all land use and development provided for, will be exposed to unacceptably high levels of risk, which is unacceptable. ◦ Technical parameters such as levels of inundation and flow are relevant. A risk matrix approach would be supported by the submitter. ◦ Where effects and mitigation have not been contemplated adequately, a policy framework providing for urban growth and sensitive activities cannot be cognisant of risk exposure and potential consequences on people and property. ◦ The submitter encourages robust discussion around probability thresholds (larger storm events) to ensure critical life line infrastructure is resilient and can operate/function during a significant natural hazard event. • There is potential for conflict between Stages 1 and 2 and Council is operating outside of its legislative mandate in terms of its obligations to carry out its functions as required in sections 5, 6 and 31 of the Resource Management Act. • The staging of the Proposed District Plan will adversely impact on the ability to achieve sustainable management of flood hazard matters. 		

Point Number	730.2		
Summary of Decision Requested:	<p>Withdraw all Stage 1 provisions of the Proposed Waikato District Plan and re-notify Stage 1 together with Stage 2 once a thorough flood analysis has been undertaken and consulted on.</p> <p>OR</p> <p>Review all Spatial maps of the Proposed Waikato District Plan, including zonings which provide for sensitive activities at Stage 2 in order to manage flood hazard risk and hear submissions for both stages together.</p>		
Decision Reasons:	<p>Until a thorough flood hazard assessment has been undertaken and included within the First Schedule process, Mercury opposes the entire Proposed Waikato District Plan Stage 1. Mercury reserves its right to comment on any part of the RMA framework, including section 32 analysis, and issues, objectives, policies and methods within any part of the Proposed Waikato District Plan during further or later stages.</p> <p>Mercury considers that it is necessary to analyse the results of a flood assessment, which shows areas affected by a 1:100 event prior to designing a policy framework, which includes management controls that avoid, remedy and mitigate significant flood risk in an appropriate manner to ensure there is a tolerable level of risk exposure for all land use and development.</p> <p>Mercury also requires time to peer review any flood assessment information including the assessment of assumptions which relate to the operation of the Waikato Hydro Scheme.</p> <ul style="list-style-type: none"> • Land use and development located downstream of the Waikato hydro scheme could be exposed to intolerable levels of risk. Effects of a significant flood event needs to be well understood prior to designing a policy framework and providing for urban growth. • The submitter is extremely concerned that the staging of the Proposed District Plan currently underway will adversely impact on the ability to achieve sustainable management of flood hazard matters. 		

- Adequate flood hazard mapping has not been undertaken for Stage 1 and relevant spatial layers and a policy framework for Natural Hazards will not be proposed until Stage 2.
- As a result the submitter will need to re-visit the provisions in Stage 1 as part of consequential amendments to its Stage 2 submission.
- This difficulty could have been avoided by not staging the Proposed District Plan process in the manner now underway.
- The submitter is interested in all areas of the Waikato River main stem catchment, including the Rural Zone, urban settlements of Taupiri, Ngaruawahia, Huntly, Ohinewai, Te Kauwhata, Mercer, Meremere, Pokeno, Tuakau and Port Waikato.
- The submitter will support urban growth (including the provision of sensitive activities) within locations where there is a tolerable level of risk exposure for all land use and development.
- This principle is fundamental to sound planning, as land owners can then make informed decisions about resilience and how to further mitigate effects.
- Until all the information is collected and rationalised in the correct order, no judgement can be made on the following matters:
 - What are the effects of a significant flood event (1 in 100 year) on specific areas of land? This is needed to determine whether avoidance is required or how risk can be mitigated to a tolerable for land use and development.
 - When considering where new urban growth is to be located, the submitter considers avoidance is the first tool in the tool kit.
 - Significant flood risk which cannot be mitigated to a level which is tolerable for all land use and development provided for, will be exposed to unacceptability high levels of risk, which is unacceptable.
 - Technical parameters such as levels of inundation and flow are relevant. A risk matrix approach would be supported by the submitter.
 - Where effects and mitigation have not been contemplated adequately, a policy framework providing for urban growth and sensitive activities cannot be cognisant of risk exposure and potential consequences on people and property.
 - The submitter encourages robust discussion around probability thresholds (larger storm events) to ensure critical life line infrastructure is resilient and can operate/function during a significant natural hazard event.
- There is potential for conflict between Stages 1 and 2 and Council is operating outside of its legislative mandate in terms of its obligations to carry out its functions as required in sections 5, 6 and 31 of the Resource Management Act.
- The staging of the Proposed District Plan will adversely impact on the ability to achieve sustainable management of flood hazard matters.

Point Number 730.3

Summary of Decision Requested: In the events the Waikato District Council does not stop its current process, the submitter seeks that:

- Prior to notification of the Stage 2 Hazard assessment, the submitter is consulted about the assumptions used in the catchment wide flood hazard model, which may need to be rationalised, including the assumptions that relate to the operation of the Waikato Hydro Scheme.
 - Needs to be adequate time for assessment, feedback and adjustments to be made where necessary. Changes to assumptions, even subtle ones could have a significant bearing on how a flood event is represented spatially across the catchment. The submitter is interested in how the flood overlay output might conflict with land use zones, which provide for sensitive activities, land use intensification and any urban growth areas.
 - Until a thorough flood hazard assessment has been undertaken and included within the First Schedule process, Mercury opposes the entire Proposed District Plan Stage 1. Mercury reserves its right to comment on any part of the RMA framework, including section 32 analysis, and issues, objectives, policies and methods within any part of the Proposed District Plan during further or later stages.
- Mercury considers that it is necessary to analyse the results of a flood assessment, which shows areas affected by a 1:100 event prior to designing a policy framework, which includes management controls that avoid, remedy and mitigate significant flood risk in an appropriate manner to ensure there is a tolerable level of risk exposure for all land use and development.

Decision Reasons:

- Land use and development located downstream of the Waikato hydro scheme could be exposed to intolerable levels of risk. Effects of a significant flood event needs to be well understood prior to designing a policy framework and providing for urban growth.
 - The submitter is extremely concerned that the staging of the Proposed District Plan currently underway will adversely impact on the ability to achieve sustainable management of flood hazard matters.
 - Adequate flood hazard mapping has not been undertaken for Stage 1 and relevant spatial layers and a policy framework for Natural Hazards will not be proposed until Stage 2.
 - As a result the submitter will need to re-visit the provisions in Stage 1 as part of consequential amendments to its Stage 2 submission.
 - This difficulty could have been avoided by not staging the Proposed District Plan process in the manner now underway.
 - The submitter is interested in all areas of the Waikato River main stem catchment, including the Rural Zone, urban settlements of Taupiri, Ngaruawahia, Huntly, Ohinewai, Te Kauwhata, Mercer, Meremere, Pokeno, Tuakau and Port Waikato.
 - The submitter will support urban growth (including the provision of sensitive activities) within locations where there is a tolerable level of risk exposure for all land use and development.
 - This principle is fundamental to sound planning, as land owners can then make informed decisions about resilience and how to further mitigate effects.
 - Until all the information is collected and rationalised in the correct order, no judgement can be made on the following matters:
 - What are the effects of a significant flood event (1 in 100 year) on specific areas of land? This is needed to determine whether avoidance is required or how risk can be mitigated to a tolerable for land use and development.
 - When considering where new urban growth is to be located, the submitter considers avoidance is the first tool in the tool kit.
 - Significant flood risk which cannot be mitigated to a level which is tolerable for all land use and development provided for, will be exposed to unacceptability high levels of risk, which is unacceptable.
 - Technical parameters such as levels of inundation and flow are relevant. A risk matrix approach would be supported by the submitter.
 - Where effects and mitigation have not been contemplated adequately, a policy framework providing for urban growth and sensitive activities cannot be cognisant of risk exposure and potential consequences on people and property.
 - The submitter encourages robust discussion around probability thresholds (larger storm events) to ensure critical life line infrastructure is resilient and can operate/function during a significant natural hazard event.
 - There is potential for conflict between Stages 1 and 2 and Council is operating outside of its legislative mandate in terms of its obligations to carry out its functions as required in sections 5, 6 and 31 of the Resource Management Act.
- The staging of the Proposed District Plan will adversely impact on the ability to achieve sustainable management of flood hazard matters.

Submitter Number: 731 **Submitter:** Jean Tregidga

Point Number 731.1

Summary of Decision Requested: Amend Policy 3.1.2 Indigenous Vegetation and Habitats, to permit the active management of indigenous vegetation.

Decision Reasons:

- Active management of indigenous vegetation should be permitted as it provides opportunities to maintain and enhance indigenous biodiversity, will attain Objective 3.1.1 and implement policy.

Point Number 731.2

Summary of Decision Requested: Amend Rule 22.2.3.4 Earthworks - within Landscape and Natural Character Areas, by permitting the earthworks for the construction of new tracks within Outstanding Natural Features and Outstanding Natural Landscapes.

Decision Reasons:

- There is no provision for earthworks required for new track construction.
- This is unreasonable as the properties owned by this submitter on Lyons Road, Mangatawhiri have no practical access which renders the land useless for practical purposes.
- This rule does not enable sustainable management as required by the Resource Management Act.

Point Number 731.3

Summary of Decision Requested: Amend Rule 22.2.3.3 Earthworks - Significant Natural Area, by permitting earthworks for new tracks within Significant Natural Areas.

Decision Reasons:

- There is no provision for earthworks required to construct new tracks.
- This is unreasonable as the properties owned by this submitter at Lyons Road, Mangatawhiri have no practical access which renders the land useless for all practical purposes.
- This rule does not enable the sustainable management of land as required by the Resource Management Act.

Point Number 731.4

Summary of Decision Requested: Amend Rule 22.2.7 P3(a)(ii) Indigenous vegetation clearance inside a Significant Natural Area, by increasing the allowable limit of indigenous vegetation clearance to 8000m² to provide for building, access, parking and manoeuvring as follows:

(ii) *The total indigenous vegetation clearance does not exceed ~~250m²~~ 8000m².*

Decision Reasons:

- A nursery for propagation and potting of existing small native plants is an appropriate use of land within a Significant Natural Area, Outstanding Natural Feature and Outstanding Natural Landscape as it will attain Objective 3.1.1 to maintain and enhance indigenous biodiversity values.
- The 250m² restriction is unnecessary and unreasonable for any practical building work.
- At least 8000m² is needed.

Point Number 731.5

Summary of Decision Requested: Delete Objective 3.1.1 Biodiversity and ecosystems.

Decision Reasons:

- This objective is unreasonable and unnecessary as the majority of landowners take a responsible approach to managing indigenous vegetation on their properties.

Point Number 731.6

Summary of Decision Requested: Delete Policy 3.1.2 Indigenous Vegetation and Habitats.

Decision Reasons:

- These policies are unreasonable and unnecessary as the majority of landowners take a responsible approach to managing indigenous vegetation on their properties.

Point Number 731.7

Summary of Decision Requested: Delete all rules in Section C relating to indigenous vegetation and habitats.

Decision Reasons:

- These rules are unreasonable and unnecessary as the majority of landowners take a responsible approach to managing indigenous vegetation on their properties.

Point Number 731.8

Summary of Decision Requested: Add to Rule 22.2.7 P1 (a) Indigenous vegetation clearance inside a Significant Natural Area, a new sub-clause (vi) as follows:

(vi) gathering and re-potting plants for indigenous nursery.

Decision Reasons:

- A nursery for indigenous trees, shrubs and ferns, etc, is an appropriate use of land containing a Significant Natural Area, Natural Feature, Outstanding Natural Landscape as it will contribute to attaining Objective 3.1.1 which is to maintain and enhance indigenous biodiversity values and it will supply local communities with plants from the local area.
- The submitter's proposed nursery and buildings would be located on Lot 3 DP 6284 (rather than Lot 5 DP 62084).

Point Number 731.9

Summary of Decision Requested: Amend Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, to permit active management of indigenous vegetation including thinning and pruning in order to maintain and enhance indigenous biodiversity.

Decision Reasons:

- Active management of indigenous vegetation provides opportunities to maintain and enhance indigenous biodiversity and will attain Objective 3.1.1 and implement policy.

Point Number 731.10

Summary of Decision Requested: Amend the extent of Significant Natural Area, Outstanding Natural Feature and Outstanding Natural Landscape on Lot 3 DP 62084 located at Lyons Road, Mangatawhiri, as shown on the Planning Maps, to areas of high quality indigenous vegetation.

Decision Reasons:

- The mapped area of Significant Natural Area etc, on this lot is excessive as it contains exotic plantings and wilding pines.
- The planning maps need to be amended to clearly indicate access to a legal road.
- More acreage is needed to provide for a plant nursery, private orchard, buildings and sustainable off the grid living.

Point Number 731.11

Summary of Decision Requested: Amend Policy 3.4.3 (a) Maintaining and enhancing Significant Amenity Landscapes, by inserting an additional sub-clause (vi) as follows:

(vi) recognising historic farming and forestry operations that continue today.

Decision Reasons:

- In the event that the policy is not deleted, the requested sub-clause (a)(vi) adopts words from Policy 3.5.3 (Protecting the natural character qualities of the coastal environment) about historic land use which are equally appropriate to Significant Natural Areas, Outstanding Natural Features and Outstanding Natural Landscapes which are mapped on this submitter's properties at Lyons Road, Mangatawhiri.

Point Number 731.12

Summary of Decision Requested: **Amend** Rule 22.3.3 Buildings and structures in Landscape and Natural Character Areas, by permitting dwellings and accessory buildings within natural features and outstanding natural landscapes.

Decision Reasons:

- Requiring resource consent to construct any building within these area is unreasonable and will add significant cost to developing land for private use.

Point Number 731.13

Summary of Decision Requested: **Delete** the map annotations of Significant Natural Area, Outstanding Natural Landscape and Outstanding Natural Feature affecting the submitter's properties at Lyons Road, Mangatawhiri, being Lots 3,4, and 5 DP 62084.

Decision Reasons:

- The submitter's three properties at Lyons Road, Mangatawhiri are unique.
- They were set up in the 1920s as a sustainable source of native timber and no felling has occurred since the 1960s.
- No monetary return has been recognised from these properties for over 50 years despite costs relating to rates, insurance, pest control and maintenance.
- Other milling statements can be issued to mill indigenous timber such as windblown trees, naturally dead trees and trees removed for the construction or maintenance of an accessway where they are not subject to a registered plan or permit.
- Refer to these documents attached to original submission for further detail:

 - Obituary - Mr R Hohneck

Submitter Number: 732 **Submitter:** Lucy Smith

Organisation: Terra Firma Mining Ltd

Point Number 732.1

Summary of Decision Requested: **Amend** the proposed zoning of the property legally described as Allotment 9C Pepepe Parish SO 34206 and Lot 1 DPS 61669 (referred to by the submitter as "63 Weavers Crossing Road") from Rural Zone to either Village Zone or Residential Zone as detailed in Figures 6-8 in the submission.

Decision Reasons:

- This property is suitable for medium to high density residential growth to meet Huntly's increasing housing demand given a combination of the following factors:
 - Huntly is become increasingly popular as an affordable commuter town due to its proximity to Hamilton and Auckland.
 - The Waikato Expressway/SH 1 bypass will significantly reduce traffic flow through Huntly meaning that other visions for town development need to be considered - such as a train station providing commuter services.
 - Council previously considered the rezoning of this property when it was owned by Solid Energy NZ Limited. At that time, a desk-top assessment noted the uncertain nature of this overburden material. However, the submitter will now provide a detailed geotechnical assessment that identifies solutions for developing this area for housing.
 - The location lends itself to residential development because it is a gently sloping discrete area with a north-facing aspect overlooking Lake Puketirini with views to rural land, infrastructure can be easily provided, it is surrounded by Pukeketirini Reserve and is at least 130m from the existing industrial zone on Rotowaro Road.

Point Number 732.2

Summary of Decision Requested: **Amend** the proposed zoning of the 'Puketirini Block' (comprising Part Lot 2 DPS 61669 (except for the 154m2 triangular parcel east of Weavers Crossing Road) and Part Sec 1 SO 58281 to either Village Zone or Residential Zone, or a combination of these two zones as illustrated in Figures 6 to 8 of the submission.

AND

Amend the zoning of the Puketirini Block to include two smaller Business Zones as set out in Figures 6 to 8 of the submission.

Decision Reasons:

- This property is suitable for medium to high density residential growth to meet Huntly's increasing housing demand given a combination of the following factors:
 - Huntly is become increasingly popular as an affordable commuter town due to its proximity to Hamilton and Auckland.
 - The Waikato Expressway/SH 1 bypass will significantly reduce traffic flow through Huntly meaning that other visions for town development need to be considered - such as a train station providing commuter services.
 - Council previously considered the rezoning of this property when it was owned by Solid Energy NZ Limited. At that time, a desk-top assessment noted the uncertain nature of this overburden material. However, the submitter will now provide a detailed geotechnical assessment that identifies solutions for developing this area for housing.
 - The location lends itself to residential development because it is a gently sloping discrete area with a north-facing aspect overlooking Lake Puketirini with views to rural land, infrastructure can be easily provided, it is surrounded by Pukeketirini Reserve and is at least 130m from the existing industrial zone on Rotowaro Road.

Point Number 732.3

Summary of Decision Requested: **Amend** Rule 24.4.2 Subdivision - Te Kowhai and Tuakau, so that it also applies to the requested Village zoned land at Puketirini, as follows:

24.4.2 Subdivision - Te Kowhai, ~~and~~ Tuakau and Puketirini

RD1 (a) Subdivision in Te Kowhai, ~~and~~ Tuakau and Puketirini must comply with all of the following conditions:

...

RD2 (a) Subdivision in Te Kowhai, ~~and~~ Tuakau and Puketirini must comply with the following conditions:

...

Decision Reasons:

- Rule 24.4.1 for the Village Zone allows subdivision to a minimum net site area of 3000m2.
- Rule 24.4.2 provides for subdivision in Te Kowhai and Tuakau with a minimum net site area of 3000m2 for unserviced lots and 1000m2 for serviced lots.
- Such lot sizes allow flexibility and will enable more intensive residential development on the submitter's land.

Point Number

732.4

Summary of Decision Requested:

Add a new activity to Rule 16.1.2 Permitted Activities, for a community activity at Puketirini, to the list of permitted activities in the Residential Zone as follows:

Activity:

...

P* Community activity (Puketirini)

Activity-specific conditions:

...

(g) Must be within development at Puketirini

Decision Reasons:

- The submitter prefer that a broader definition of community activities applies to development at Puketirini to give more flexibility as to possible land uses.

Point Number

732.5

Summary of Decision Requested:

Amend Rule 16.1.2 P10 Agricultural, Horticultural and Viticultural Activities, to allow these activities to occur on the land requested to be rezoned to Residential prior to commencing housing development, by adding text as follows:

Activity:

...

P10 Agricultural, horticultural and viticultural activities

Activity-specific conditions:

...

(a) Must be within the Residential West Te Kawhata Area Residential Puketirini Area prior commencement of development or within the commencement of development

Decision Reasons:

- Current grazing activities should be able to continue for as long as possible but are to cease once residential development commences on the Puketirini block.

Point Number

732.6

Summary of Decision Requested:

Add a new activity to Rule 16.1.2 Permitted Activities for a commercial activity to the list of permitted activities as follows, provided that it is within the area at Puketirini which is requested to be rezoned Business or, alternatively, where a business overlay could apply:

Activity:

...

P* Commercial activity

Activity-specific conditions:

...

(g) Must be within the Puketirini Business Overlay

Decision Reasons:

- A business overlay, as an alternative to a Business Zone, will allow commercial activities to establish within the requested Puketirini residential development.

Point Number

732.7

Summary of Decision Requested:

Amend Rule 16.2.2 Servicing and Hours of Operation - Bankart Street and Wainui Road Business Overlay Area, by adding text as follows to ensure that the stated hours of operation apply to the Puketirini Business Overlay Area:

Rule 16.2.2 Servicing and Hours of Operation - Bankart Street and Wainui Road Business Overlay Area

P1 The loading and unloading of vehicles and the receiving of customers and deliveries associated with a commercial activity within the Bankart Street and Wainui Road Business Overlay Area and the Puketirini Business Overlay Area may occur between 7.30am and 6.30pm.

Decision Reasons:

- The stated hours of operation are appropriate for business activities within the requested Puketirini residential development.

Point Number

732.8

Summary of Decision Requested:

Amend the definition of "Commercial activity (Te Kawhata Lakeside Precinct)", by adding text as follows:

Commercial activity (Te Kawhata Lakeside Precinct and Residential Puketirini Area)

Means a community activity that relates to the Te Kawhata Lakeside Precinct Plan area or the Residential Puketirini Area and involves the use of land and buildings that provide for individual or community health, welfare, care, safety, recreation, cultural, ceremonial, spiritual, and art and cultural purposes. It includes any preschool or education facility, place of worship, community hall or centre or recreation facility.

Decision Reasons:

- The broader range of community activities permitted in the Puketirini Area is appropriate to provide flexibility as to what might establish there.

Point Number 732.9

Summary of Decision Requested: **Amend** Policy 4.1.13 (a)(iii) Huntly, as follows:

4.1.13 Policy - Huntly

(a) Huntly is developed to ensure:

...

(iii) Development is avoided on areas where the geotechnical risk, ecological risk and the risk from any other hazards cannot be appropriately managed or mitigated, with hazard, geotechnical and ecological constraints.

- Decision Reasons:**
- Notified sub-clause (a)(iii) does not recognise the distinction between hazard and risk or attempt to quantify what is an acceptable level of risk.
 - It could therefore be interpreted to mean that any land in Huntly with a geotechnical issue, no matter how small, should not be developed.
 - The policy should recognise that it is the geotechnical (or other) risk that must be managed or mitigated.
 - The wording confuses hazard with risk.

Submitter Number: 733 **Submitter:** Dave Currie

Point Number 733.1

Summary of Decision Requested: **Add** strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms that are the same (or similar) as those in the Far North District Plan, Whangarei District Plan and the Auckland Unitary Plan.

- Decision Reasons:**
- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
 - Concerns about the potential risks posed by the release of GMOs into the environment.
 - GMOs have the potential to adversely affect ecological, economic and resource management values and the social and cultural wellbeing of people, communities and tangata whenua.
 - Release of GMOs has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
 6. Waikato is the centre of dairying having head offices and farms for the three major suppliers of milk and milk products in the area. There are many farmers who are highly concerned that their livelihoods will be affected if GMOs are released.
 - Conditions of consent may be breached by poor management, human error, natural events and the sabotage of projects
 - Once GMOs have been released they would be very difficult, if not impossible, to eradicate.
 - Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
 - It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number 733.2

Summary of Decision Requested: **Add** a resource management framework for the management of genetically modified organisms that is region specific, taking into account environmental, economic and social well-being considerations.

- Decision Reasons:**
- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
 - Concerns about the potential risks posed by the release of GMOs into the environment.
 - GMOs have the potential to adversely affect ecological, economic and resource management values and the social and cultural wellbeing of people, communities and tangata whenua.
 - Release of GMOs has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
 6. Waikato is the centre of dairying having head offices and farms for the three major suppliers of milk and milk products in the area. There are many farmers who are highly concerned that their livelihoods will be affected if GMOs are released.
 - Conditions of consent may be breached by poor management, human error, natural events and the sabotage of projects
 - Once GMOs have been released they would be very difficult, if not impossible, to eradicate.
 - Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
 - It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number 733.3

Summary of Decision Requested: **Amend** the Proposed District Plan to require all consents to be publically notified, whether the rules are on genetically modified organisms or not.

Decision Reasons:

Submitter Number:	734	Submitter:	Richard Neave and Sue Campbell
Point Number	734.1		
Summary of Decision Requested:	Retain the whole of Chapter 9.2 (Objectives and Policies for Te Kowhai Airpark Zone), as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The airfield represents a scarce resource for the aviation community. • The proposed use is a way of ensuring longevity. • The airfield operators are community minded, sharing this resource in a way which includes local residents as well as aviation enthusiasts. • There is a need to keep as many airfields as possible. 		
Point Number	734.2		
Summary of Decision Requested:	Retain the whole of Chapter 27 Te Kowhai Airpark, Zone as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The airfield represents a scarce resource for the aviation community. • The proposed use is a way of ensuring longevity. • The airfield operators are community minded, sharing this resource in a way which includes local residents as well as aviation enthusiasts. • There is a need to keep as many airfields as possible. 		

Submitter Number:	735	Submitter:	Cindy and Tony Young
Point Number	735.1		
Summary of Decision Requested:	Amend the zoning of the properties in the area east of Pokeno, bounded by State Highway 2 to the north, Baird Road to the east, Avon Road to the south and State Highway 1 to the west from Rural Zone to Country Living Zone (refer to map provided in submission).		
Decision Reasons:	<ul style="list-style-type: none"> • This area is contiguous with the existing Country Living Zone on the eastern side of State Highway 1. • Due to the proximity of the Residential Zone, the use of this land for rural uses is significantly constrained by reverse sensitivity complaints from the Residential Zone including odour and noise. This area is being use for primary rural industry including calf rearing, breeding horses, kiwifruit and drystock. These rural uses do create amenity effects and the operation of these farms is being constrained by reverse sensitivity complaints arising from the Residential Zone. • Rezoning will allow improved environmental outcomes with retirement and restoration of streams. • Rezoning will result in improved water quality in the stream from retirement from farming. • Rezoning meets the criteria in the Waikato Regional Policy Statement for rural-residential development. • Enables existing accesses to State Highway 2 to be removed, as Avon, Fraser, Baird and Gulland Roads provide access opportunities. • This area has constraints such as proximity to the State Highway, Transpower electricity transmission lines and a stream which the Proposed District Plan manages effectively through setbacks and yard requirements. • Provides additional housing choice to the housing stock offered in the Residential Zone in Pokeno. • The use of this area for Country Living is a more efficient use of the land. • This area is serviced for reticulated water supply. • This is a discrete area of land with defensible road boundaries. • The area is separated from the Rural Zone by roads to prevent any consequential reverse sensitivity effects. • It provides an effective transition from the Rural Zone by roads to prevent any consequential reverse sensitivity effects. • State Highway 2 is a logical and defensible boundary between the Rural Zone and the Country Living and Residential Zone. • State Highway 1 is a logical and defensible boundary between the Country Living and Residential Zone. • A resource consent has already been granted for 96 Avon Road for a number of residential chalets. This development is of a density more akin to a residential development. This development will compromise any rural character and serves to illustrate that the character of the area is more consistent with the adjoining Country Living Zone than the Rural Zone. • Will not undermine the form and function of Pokeno as an urban town. 		
Point Number	735.2		
Summary of Decision Requested:	Amend Rule 23.4.2 RDI (a)(i) General Subdivision, to read as follows: <i>All proposed lots must have a net site area of at least 5000 <u>3000m²</u>.</i>		
Decision Reasons:	<ul style="list-style-type: none"> • There is no need or justification for a 5000m² minimum lot size. • The residents living in these areas have urban expectations and struggle maintaining 5000m². • The Country Living Zone is actually a large lot residential and is not a rural zone, and a smaller site size is more in accordance with this housing and living choice. • Reducing the minimum lot size will enable more efficient use of the land. • Aligns more clearly with the 2500m² minimum site size required for on-site wastewater management. • Still enables an open and spacious character, in accordance with the large lot residential form of the Country Living Zone. 		
Point Number	735.3		
Summary of Decision Requested:	Amend Rule 23.3.6 P1 Building coverage, to read as follows: <i>The total building coverage must not exceed 10% or 300m² <u>500m²</u>, whichever is the larger.</i>		
Decision Reasons:	<ul style="list-style-type: none"> • This is a consequential amendment to enabling a smaller minimum site size. • It will still enable a useable gross floor area of principal dwelling, minor dwelling and accessory buildings. • It will still ensure an open and spacious character in accordance with the large lot residential form of the Country Living Zone. 		
Point Number	735.4		
Summary of Decision Requested:	Retain Rule 23.3.2 Minor dwelling.		
Decision Reasons:	<ul style="list-style-type: none"> • Support the rule, particularly the retention of a new single minor dwelling as a permitted activity on each site. 70m² as the maximum size gross floor area, that there is no limitation on the type of person occupying the dwelling, and enabling minor dwellings to be permanent. 		

- Minor dwellings provide housing choice, particularly when families are changing in their makeup.
- Minor dwellings provide an affordable option for housing.
- The limit on the size ensures they will be secondary to the primary dwelling.
- For the elderly, minor dwellings enable independent living, while still being close enough to family to have supported living.
- In terms of effects, particularly with the size limit, they are no different to a sleepout.
- The effects and their occupancy rate are no different to a large primary dwelling.

Point Number 735.5

Summary of Decision Requested: Retain Rule 22.3.2 Minor dwelling.

Decision Reasons:

- Supports new single minor dwelling as a permitted activity on each site.
- Supports the following aspects of the rule: 70m² as the maximum size gross floor area, that there is no limitation on the type of person occupying the dwelling, and enabling minor dwellings to be permanent.
- Minor dwellings provide housing choice, particularly when families are changing in their makeup.
- Minor dwellings provide an affordable option for housing.
- The limit on the size ensures they will be secondary to the primary dwelling.
- For the elderly, minor dwellings enable independent living, while still being close enough to family to have supported living.
- In terms of effects, particularly with the size limit, they are no different to a sleepout.
- The effects and their occupancy rate are no different to a large primary dwelling.

Point Number 735.6

Summary of Decision Requested: Delete Rule 22.3.2(b)(i) Minor dwelling, which requires the minor dwelling to be within 20m of the primary dwelling.

Decision Reasons:

- The condition is arbitrary.
- On a Rural zoned property, sheds can be located anywhere on the property so long as they comply with the yard requirements and daylight admission rules and minor dwellings should have a similar approach.
- There are no effects with a minor dwelling being located greater than 20m from the principal dwelling.
- Will allow more effective use of the land and more optimal layout.
- No need for the principal and minor dwelling to be located in close proximity.

Point Number 735.7

Summary of Decision Requested: Amend Rule 23.3.6 P1 Building Coverage, to increase the permitted building coverage limits.

Decision Reasons:

- For genuine rural enterprises, accessory buildings such as hay sheds, stables, garages, tractor sheds are necessary.
- The proposed limit of 2% or 500m² (whichever is the larger) is too constraining to enable the level of buildings required to support rural production activities.

Submitter Number: 736 **Submitter:** Ian Chapman

Point Number 736.1

Summary of Decision Requested: Retain the whole of Chapter 9.2 (Objectives and policies for Te Kowhai Airpark zone), as notified.

Decision Reasons:

Te Kowhai airfield is a fantastic facility that deserves to be secure for the future.

Point Number 736.2

Summary of Decision Requested: Retain the whole of Chapter 27 (Te Kowhai Airpark Zone), as notified.

Decision Reasons:

Te Kowhai airfield is a fantastic facility that deserves to be secure for the future.

Submitter Number: 737 **Submitter:** Ronald Rumbal

On behalf of: Ronald Rumbal and Catherine Evison

Point Number 737.1

Summary of Decision Requested: Amend the boundaries of the proposed Significant Natural Area on property number 2010658 (1807 Whaanga Road, Ruapuke), to the area currently protected by WDC covenant (see map attached to submission for more detail).

Decision Reasons:

- The amount of the property already protected as covenanted bush is enough, and the submitters do not wish to give up further rights on their property.
- The proposed Significant Natural Area indicated when combined with the covenanted bush would cover approximately 75% of the property.
- The proposed Significant Natural Area includes pine trees and orchard.
- Remaining bush is regenerating and older and the submitter wishes to have freedom to use it.
- Moved to the property for it's bush and have no intentions of diminishing it, but want to be able to build tracks, buildings (cabin), fences etc.
- The proposed Significant Natural Area will decrease the value of the property as it will severely restrict any development a future owner may want to do.
- Council needs to trust the landowners do the right thing with it regarding conservation.
- While the submitters do not want to clear it for farming, they want control of it.
- One of the reasons given for Significant Natural Area is to allow wildlife to travel from the mountain to the coast. The birds are able to fly from bush block to bush block and the only animals that will benefit from such bush are possums, stoats, rats, feral cats and wild pigs.
- The property and surrounding covenanted bush is blocked from ever making a connection with the coast by existing paddocks and farmland.

Point Number 737.2

Summary of Decision Requested: Amend Rule 22.2.3.3 Earthworks - Significant Natural Areas, to retain the amount of earthworks contained in the Operative District Plan.

Decision Reasons:

- No specific reasons stated.

Point Number 737.3

Summary of Decision Requested: Amend Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, to allow additional volume of Manuka and/or Kanuka for domestic firewood purposes.

Decision Reasons:

- Limiting the cutting of firewood to 5m³ is overly restrictive.
- The submitter relies solely on a log burner for heating and hot water.
- Burnt through 7m³ of firewood this winter (even though not cold).
- Kanuka is an invasive tree species and regenerates very quickly.

Point Number 737.4

Summary of Decision Requested: Amend Rule 22.2.8 Indigenous Vegetation - outside a Significant Natural Area, to allow additional volume of Manuka and/or Kanuka for removal for domestic firewood purposes.

Decision Reasons:

- Limiting the cutting of firewood to 5m³ is overly restrictive.
- The submitter relies solely on a log burner for heating and hot water.
- Burnt through 7m³ of firewood this winter (even though not cold).
- Kanuka is an invasive tree species and regenerates very quickly.

Submitter Number: 738 **Submitter:** Shand Properties Limited

Point Number 738.1

Summary of Decision Requested: Amend the zoning of approximately 61ha of land adjacent to Ohinewai North Road, as depicted in Appendix A of the submission, from Rural Zone to Country Living Zone.

Decision Reasons:

- The site is located in close proximity to the existing Ohinewai Village and is suitable to provide for rural residential capacity in the area.
- While Ohinewai is not currently explicitly recognised in existing Waikato Regional growth strategy documents as a growth node, there is considerable potential for it to accommodate some of the growth that is forecast to occur along the Auckland to Hamilton corridor.
- Ohinewai has good transport connections, being located in close proximity to an interchange onto State Highway 1, providing direct access to the north and south, including Huntly, which is located approximately 10 km away.
- The North Island Main Trunk rail line with the mooted passenger rail stop in Huntly runs immediately to the east of Ohinewai.
- Providing for rural-residential capacity in Ohinewai could support and be supported by development in Huntly, which has growth constraints produced by topography and ground conditions.
- With a minimum net site area of 5000 m² in the Country Living Zone (Rule 23.4.2) the site could provide approximately 100 rural-residential lots (based on a site area of approximately 61 ha and allowing for 10% of the area being required for infrastructure such as subdivisional roads).
- The proposed Country Living Zone rules contain provisions to avoid, remedy and mitigate potential adverse effects of subdivision, use and development, including reverse sensitivity effects.
- These would ensure that subdivision and development occurs on the site in an appropriate manner.
- The potential for Ohinewai to transition to a node more capable of accommodating residential development of a greater density is constrained at the present time by the lack of reticulated services available to the township. This constrains the nature of the zoning request that can be made as part of this submission.
- The zoning of the site as Country Living Zone would be generally consistent with the relevant objectives and policies of the Waikato Regional Policy Statement and the Proposed District Plan.
- The increase in traffic volumes would be modest and the level of service is not expected to deteriorate noticeably on the surrounding roads. The increase in risk is likely to be insignificant.
- The site is reliant on protection afforded by the existing stopbank network to be protected from flood events. In that regard some risk exists. However there are opportunities to mitigate flood risk and reduce the extents of the existing floodplain through drainage infrastructure improvements.
- The risks associated with the flood hazard can be managed on the property.
- The site has a history of farming use and activities have occurred on the site that are identified on the Hazardous Activities and Industries List (HAiL). Further detailed investigations would be required at later development stages but it is expected that any contamination encountered could be dealt with through implementation of standard methodologies.
- Based on available geotechnical information, the site is likely to be geotechnically suitable for residential development, with specific investigation and assessment required to determine geotechnical requirements for building on each lot.

Point Number 738.2

Summary of Decision Requested: Retain Section 5.6 Country Living Zone Objectives and Policies.

Decision Reasons:

- The proposed objectives and policies generally provide an appropriate framework for implementing rules for assessing and managing effects of activities.

Point Number 738.3

Summary of Decision Requested: Amend Chapter 5 to clarify the scope of the application of the objectives and policies in the "Rural Environment" and which zone(s) the objectives and policies apply to.

Decision Reasons:

- It is not clear which of the "Rural Environment" objectives and policies apply just in the Rural Zone and which apply to other zones in the "Rural Environment" chapter, including the Country living Zone. For example under the Chapter 5 heading it states "The following objectives and policies apply to the Rural Zone", but the chapter structure and the wording in some of the objectives and policies suggest they may be intended to have wider application.

Point Number	738.4
Summary of Decision Requested:	Retain Chapter 23 Country Living Zone Rules, except Rule 23.4 Subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The proposed rules generally provide an appropriate framework for assessing and managing effects of activities in the Country Living Zone.
Point Number	738.5
Summary of Decision Requested:	Amend Rule 23.4 Subdivision, 23.4.4 Title boundaries and 23.3 Land use - Building, to address issues related to natural hazards and contaminated land in a more targeted and specific way.
	This could include through: <ul style="list-style-type: none"> The replacement of standards 23.4.4(1)(iii)A and B; The rewording of matters for discretion 23.4.4(b)(v) and (vi); Addition of standards e.g. floor levels, in 23.3.
Decision Reasons:	<ul style="list-style-type: none"> The rules should allow for addressing the issues related to natural hazards and contaminated land rather than have a blanket requirement for a non-complying activity resource consent where a boundary divides such an area.
Point Number	738.6
Summary of Decision Requested:	Amend Rule 23.4.4 Title boundaries, so that the activity status for a subdivision not complying with the standards is discretionary rather than non-complying.
Decision Reasons:	<ul style="list-style-type: none"> It is not clear why subdivision not meeting the standards is a non-complying activity but equivalent rules in the Rural Zone are discretionary. This should be changed for consistency.
Point Number	738.7
Summary of Decision Requested:	Add a definition for "natural hazard area" to Chapter 13: Definitions with reference to standards and/or mapped location .
Decision Reasons:	<ul style="list-style-type: none"> There is no definition provided for "natural hazard area", a term that is used throughout the Proposed Waikato District Plan in relation to subdivision rules. The absence of a definition makes the application of the rules unworkable in practice.
Point Number	738.8
Summary of Decision Requested:	Amend definition of "contaminated land" in Chapter 13: Definitions to refer to standards and or mapped locations.
Decision Reasons:	<ul style="list-style-type: none"> The "contaminated land" definition refers to the Resource Management Act definition. This does not include any objective standards but requires a judgement to be made on effects. Given that this definition determines which rules apply to subdivision it could create uncertainty and difficulties in implementation.

Submitter Number:	739	Submitter:	Karen Smith
Point Number	739.1		
Summary of Decision Requested:	No specific decision sought.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter objects to the disregard for the plans in place for Raglan and the granting of consents for apartments. The submitter is concerned that the current building council departments can be bought at a price and be dammed to the actual environment or current infrastructure that Raglan currently has. The extra run off that this development will bring will further impact the environment that Raglan is so invested in keeping healthy. That corner is busy at the best of times and it will be worse now with 11 more units and additional cars. Concerned about pressure on carparks. Prominent sites like this should be protected from development which is too high and too close to the road. Considers all Submissions which break District Plan rules should be publicly notified. Supports Raglan adapting and growing, but we need more houses for locals - not more Airbnb and holiday lets. Raglan needs to become a conservation area where changes can't be made which make the area less attractive. 		

Submitter Number:	740	Submitter:	Colin Dixon
On behalf of:	Dixon Family Trust		
Point Number	740.1		
Summary of Decision Requested:	Amend the zoning of part of 139 Onion Road, Horotiu, from Rural Zone to Industrial Zone as shown on map attached to the submission.		
Decision Reasons:	<ul style="list-style-type: none"> The land is adjacent to an existing industrial zone and can therefore be developed in a manner that allows for efficient transport, infrastructure and services. 		

- Rezoning would provide additional industrial land within the industrial strategic growth node of Horotiu, thereby assisting to meet Council's policy of maintaining a sufficient supply of industrial land within strategic industrial growth zones in order to meet foreseeable future demands.

Submitter Number:	741	Submitter:	Waikato Regional Airport Ltd
Point Number	741.1		
Summary of Decision Requested:	<p>Amend provisions 1(a)(i)A, 2, 2.1 and 2.1(1)(a)(ii) of Appendix 1 Acoustic Insulation which refer to 'Waikato Regional Airport', and replace with "Hamilton Airport".</p> <p>AND</p> <p>Any further relief and/or amendments to the Proposed Plan as may be necessary.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The correct descriptive term for the airport is Hamilton Airport. • The term Waikato Regional Airport (Ltd) is the name of the company that operates the airport. • It is correct to use the term Waikato Regional Airport Ltd in the schedule of designations at designation N, as Waikato Regional Airport Ltd is the requiring authority responsible for the designation. • However elsewhere in the Proposed Plan where the airport is being referred to it should be called Hamilton Airport. 		
Point Number	741.2		
Summary of Decision Requested:	<p>Delete Rule 23.4.2 General subdivision RD1 (a)(ii), (a)(iii), (b) and NCI;</p> <p>AND</p> <p>Add a new prohibited subdivision rule in Rule 23.4.1 Prohibited subdivision as follows:</p> <p><i>PR2 (g) Any subdivision inside the Airport Subdivision Control Boundary or inside the SEL95 Boundary identified on the planning maps where the average net site area is less than 1.1ha.</i></p> <p><i>(b) Where the land is being subdivided straddles the Airport Subdivision Control Boundary any subdivision that creates more lots than the number calculated by the following formula.</i></p> <p><i>Number of new lots = (area(ha) outside the Airport Subdivision Control Boundary / 0.5) + (area (ha) inside the Airport Subdivision Control Boundary / 1.1).</i></p> <p>AND</p> <p>Any further relief and/or amendments to the Proposed Plan as may be necessary.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • This prohibited subdivision rule for subdivision inside the Airport Subdivision Control Boundary or inside the SEL95 Boundary is in the Operative District Plan. • There is no change to resource management issues to suggest that the Proposed Plan should be any different. • The issue is the potential reverse sensitivity effects of aircraft noise on residential development. • The prohibited subdivision rules have been in the Waikato District Plan since about 2001 when they were developed by Waikato Regional Airport Ltd in consultation with Waikato District Council and a group of Tamahere landowners. • The rules are designed to maintain the density of development within the Airport Subdivision Control Boundary generally at its current level. • To relax this subdivision rule and allow a higher density could lead to additional houses being built in an area where they are subject to adverse noise effects from aircraft and could exacerbate reverse sensitivity conflicts. • The prohibited activity subdivision rule was the subject of scrutiny and decision making in 2001 and again in 2011 as part of Variation 14 to the Waikato District Plan. • The inclusion of the prohibited subdivision rule will: <ul style="list-style-type: none"> i) be consistent with the purpose and principles of the RMA ii) promote the sustainable management of natural and physical resources iii) enable people to provide for their social and economic well-being iv) meet the reasonably foreseeable needs of future generations v) be consistent with sound resource management practices. 		

Submitter Number:	742	Submitter:	Kim Harris-Cottle
Organisation:	New Zealand Transport Agency		
Point Number	742.1		
Summary of Decision Requested:	<p>Add appropriate provisions (e.g. objectives; policies, methods, rules) which describe and give effect to the desired urban form, function and hierarchy of urban settlements in the District.</p> <p>AND</p> <p>Request any consequential changes necessary to give effect to the relief sought in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter requests that the settlement pattern for the district is clarified in terms of the desired urban form, function and hierarchy of settlements. This will help to understand the role of transport in supporting existing development and future planned growth to be safe, accessible and resilient. 		
Point Number	742.2		
Summary of Decision Requested:	<p>Retain Section 1.12.1 Strategic direction, except for the amendments sought below</p> <p>AND</p> <p>Amend Section 1.12.1 Strategic direction to include a new clause (g) as follows :</p> <p><i>Work is currently being undertaken on the Hamilton-Auckland Corridor Plan. This work will generate a vision for managing urban growth and development in significant parts of the Waikato District. It is anticipated that plan changes will be required to reflect the contents of the Corridor Plan once finalised.</i></p> <p>AND</p> <p>Request any consequential changes necessary to give effect to the relief sought in the submission.</p>		

Decision Reasons:

- There is work underway to develop the Hamilton - Auckland Corridor Plan. This work will generate a vision for managing urban growth and development in significant parts of the Waikato District that may differ in some respects from that in the PWDP as currently drafted.
- Changes will be required to the Proposed Waikato District Plan to reflect the Hamilton to Auckland Corridor Plan in the future by way of plan change or variation. In the meantime the submitter requests that the PWDP is amended to recognise that work is being undertaken at the current time in this area.

Point Number

742.3

Summary of Decision Requested:

Amend Section 1.12 Strategic directions and objectives for the district to include clarification in 1.12 as to the purpose of the strategic directions and objectives and how they function within the wider framework of the Plan.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the direction of the provisions in 1.12 however, the purpose and status of these provisions is unclear.
- Clarification is required as to how they work within the wider framework of the Proposed District Plan.

Point Number

742.4

Summary of Decision Requested:

Retain Section 1.12.8 Strategic objectives, except for the amendments sought

AND

Amend 1.12.8 Strategic objectives to delete reference to "paragraphs 4.1.1- 4.1.7" and replace with "paragraphs 1.12.1- 1.12.7".

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- This reference appears to be an error.

Point Number

742.5

Summary of Decision Requested:

Retain Policy 3.2.3 Management hierarchy as notified.

Decision Reasons:

- It is appropriate to enable some activities within Significant Natural Areas (SNAs) despite adverse effects occurring.

Point Number

742.6

Summary of Decision Requested:

Amend Policy 3.2.4 Biodiversity Offsetting as follows:

(a) Allow for a biodiversity offset to be offered ~~by a resource consent applicant~~ where an activity ...

(b)(ii) the biodiversity is enhanced or maintained working towards achieving biodiversity, offset ~~can~~ strives to achieve no net loss of indigenous biodiversity at a regional scale ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the identification of Significant Natural Areas, with the ability to offset effects. However, the policy of achieving no net loss of indigenous biodiversity is not consistent with the RPS.
- Policy 1.1.1 of the Regional Policy Statement states "maintain or enhance indigenous biodiversity" and has a particular focus on working towards achieving no net loss of indigenous biodiversity at a regional scale. The proposed "absolute" approach needs to be clarified as to how both positive and negative effects will be weighed up across ecological and other matters, such as (but not limited to) what is required to identify and test the achievement of no net loss and what is the relevant time allocation.

Point Number

742.7

Summary of Decision Requested:

Retain Policy 3.2.5(a) Biodiversity, except for the amendments sought below

AND

Amend Policy 3.2.5(a) Biodiversity in the coastal environment as follows:

Avoid the adverse effects of subdivision use and development within Significant Natural Areas of the coastal environment (except where there is a need for regionally significant infrastructure to be located in the coastal environment) or: ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter recognises the need to protect Significant Natural Areas in the coastal environment.
- However this policy needs to recognise the need for some infrastructure to be located, operated and maintained within this environment. It is important that existing infrastructure located in areas of high value is able to be maintained and upgraded to ensure its continuing safe and efficient operation.

Point Number 742.8

Summary of Decision Requested: **Retain** Policy 3.2.6(a) Providing for vegetation clearance, except for the amendments sought below

AND

Add new sub-clauses to Policy 3.2.6(a) Providing for vegetation clearance as follows:

(v) operating maintaining or upgrading existing infrastructure

(vi) the construction and operation of new regionally significant infrastructure where there is a need for that infrastructure to be located within the Significant Natural Area

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Some clearance of indigenous vegetation within Significant Natural Areas is appropriate.
- However, the submitter seeks that this policy recognises the need to operate and maintain regionally significant infrastructure. It is important that existing infrastructure located in areas of high value is able to be maintained and upgraded to ensure its continuing safe and efficient operation.
- This approach is consistent with Method 11.1.4 of the Regional Policy Statement.

Point Number 742.9

Summary of Decision Requested: **Retain** Policy 4.1.3 Location of development, as notified.

Decision Reasons:

- Supports the intent of this policy as it seeks the integration of land use, infrastructure and funding and is consistent with the Regional Policy Statement.

Point Number 742.10

Summary of Decision Requested: **Retain** Policy 4.1.4 Staging of Development, except for the amendments sought below

AND

Amend Policy 4.1.4 Staging of Development as follows:

(a) ensure that subdivision, use and development ~~new urban areas~~ is:

(i) located, designed, and staged to ~~adequately support~~ ensure that it is adequately serviced by existing or planned infrastructure, community facilities, open space networks and local services; ~~and~~

~~(ii) efficiently and effectively integrated and staged to support infrastructure, stormwater management networks, parks, and openspace networks;~~

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Supports the intent of this policy as it seeks the integration of land use, infrastructure and funding and is consistent with the Regional Policy Statement.
- However, the proposed wording of policy 4.1.4 does not provide adequate certainty; in particular "new urban areas" are not described/defined; and it is not clear what "support" means.

Point Number 742.11

Summary of Decision Requested: **Retain** Policy 4.1.5(a) Density, except for the amendments sought below

AND

Amend Policy 4.1.5(a) Density as follows:

~~Encourage~~ **Ensure** higher density housing and retirement villages ~~to be are~~ located where they have safe efficient and effective access to near-to-and support commercial centres, community facilities, public transport and open space without being reliant on private vehicle use.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Policy 4.1.5(a) needs an amendment to provide a stronger directive that higher density development will occur in the locations specified.
- This amendment will also ensure that there is consistency with Objective 4.2.16(b).
- The focus of the Policy also needs to be amended to make it clear that development should be sited where it has safe and efficient access to facilities and infrastructure, thus creating liveable communities.

Point Number 742.12

Summary of Decision Requested: **Retain** Policy 4.1.6 Commercial and industrial activities, except for the amendments sought below

AND

Amend Policy 4.1.6 Commercial and industrial activities as follows:

(a) Provide for commercial ~~and industrial development activities~~ in the following zones:

(i) Business Town Centre; and

(ii) Business

~~(iii) Industrial~~

~~(iv) Heavy Industrial~~

(b) ~~Industry is only to be located in identified Industrial Zones and the industrial strategic growth nodes of~~

~~(i) Tuakau~~

~~(iii) Pokeno~~

~~(iii) Huntly, and~~

~~(iv) Horotiu~~

Provide for industrial activities only in the following zones:

(i) Industrial

(ii) Heavy Industrial

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 4.1.6 to provide certainty regarding the intended location of commercial and industrial activities. Commercial activities should not be provided for in the Industrial Zone, and vice versa for industrial activities in the Commercial Zone. However, the lack of definitions for the terms used could lead to confusion as to the application.
- Chapter 13 includes definitions for "commercial activity", "commercial services", "retail activity", "industrial activity" and "rural industry". Policy 4.1.6 refers to "commercial and industrial development" within certain zones, including the Heavy Industrial Zone; this implies heavy industrial activities are included in the meaning of the term "industrial development". Clause (b) of the policy is in conflict with clause (a). It is unclear whether rural and heavy industrial activities are a subset of industrial activities.

Point Number 742.13

Summary of Decision Requested: **Retain** Policy 4.1.8 Integration and connectivity as notified.

Decision Reasons:

- The Transport Agency supports Policy 4.1.8, including particularly clause (a)(i) as it supports transport choice and accessibility.
- The Transport Agency's focus is on providing a connected land transport system that enables safe access to resilient, liveable communities.

Point Number 742.14

Summary of Decision Requested: **Defer or withdraw** the live zoning of new residential, industrial and commercial land in Tuakau from the planning maps until an appropriate structure plan is developed with coordinated sequencing and staging of infrastructure.

AND

Add a new clause to Policy 4.1.10(a) Policy - Tuakau as follows:

(iv) that subdivision use and development in this area is supported by sufficient existing or planned infrastructure.

AND

Add to Policy 4.1.10 (iii) Policy - Tuakau to include relevant sections of the Tuakau Structure Plan.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable and resilient communities, and therefore supports the intent of this policy.
- However, given the scale of residential live zoned land proposed to be added to Tuakau (which is not proposed to be sequenced with infrastructure), the Transport Agency is concerned that this policy does not support the development of a liveable community and/or address the need for the integration of infrastructure with subdivision, land use and development in Tuakau.
- The submitter considers that an updated Tuakau Structure Plan should be included within the Proposed District Plan (by way of variation) once the Hamilton to Auckland Corridor Plan is finalised. The structure plan should include appropriate staging and be updated to reflect growth projections.
- In particular, the Policy does not recognise that development in Tuakau needs to be supported by existing or planned land transport infrastructure. An amendment is sought to Policy 4.1.10 to address this issue.
- The structure plan does not appear to be incorporated into the Proposed District Plan for reference.
- If Council intends on utilising the relevant sections of the structure plan document to guide the type of infrastructure provided in 4.1.10 (iii) this should be appropriately incorporated and referenced.

Point Number 742.15

Summary of Decision Requested: **Defer or withdraw** the live zoning of new residential industrial or commercial land in Pokeno from the planning maps until an appropriate structure plan is developed with coordinated sequencing and staging of infrastructure.

AND

Amend Policy 4.1.11(a) Pokeno as follows:

(i) Subdivision, land use and development of new growth areas does not compromise the potential future growth and development of the town and is supported by existing or planned infrastructure.

(ii) Safe walking and cycling networks are integrated with the existing urban area; and

(iii) Reverse sensitivity effects from ~~on~~ the strategic transport infrastructure networks National Routes and Regional Arterials in accordance with Table 14.12.5.6 are avoided or minimised.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of this policy and the development of accessible, safe and liveable communities.
- However, given the scale of residential live zoned land proposed to be added to Pokeno (which is not proposed to be sequenced with infrastructure), this policy does not support the development of a liveable community and/or address the need for the integration of infrastructure with subdivision, land use and development in Pokeno.
- The submitter is concerned that the proposed "live" zoning of areas for development without integrated planning, staging or sequencing of infrastructure has the potential to compromise good community outcomes.
- It is also noted that other external processes such as the Hamilton-Auckland Corridor Plan is likely to influence the direction of development in this area.

- A Pokeno Structure Plan should be included within the Proposed District Plan (by way of variation) once the Hamilton to Auckland Corridor Plan is finalised.
- The structure plan should include appropriate staging and be updated to reflect growth projections.
- The Policy does not recognise that development in Pokeno needs to be supported by existing or planned land transport infrastructure. An amendment is sought to Policy 4.1.11 to address this issue.
- The submitter supports the intent of clause (iii), however reverse sensitivity refers to effects of a new land use "on" an already established land use such as a transport corridor as well as any human health effects, not effects "from" the existing infrastructure.
- It is important to note that Pokeno is adjacent to State Highway 1 which is a National Route under Table 14.12.5.6.

Point Number 742.16

Summary of Decision Requested: **Retain** Policy 4.1.13 Huntly, except for the amendments sought below

AND

Amend Policy 4.1.13(ii) Huntly as follows:

Reverse sensitivity effects from strategic transport infrastructure networks the on National Routes and Regional Arterials in accordance with Table 14.12.5.6 are avoided or minimised.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable and resilient communities, and therefore supports the intent of Policy 4.1.13.
- The submitter supports the intent of clause (ii), however reverse sensitivity refers to effects of a new sensitive land use on an already established land use such as a transport corridor as well as any human health effects.
- We also note that other external processes such as the Hamilton to Auckland Corridor Plan will influence the direction of development in this area.

Point Number 742.17

Summary of Decision Requested: **Retain** Policy 4.1.16 Horotiu, except for the amendments sought below

AND

Amend Policy 4.1.16 Horotiu as follows:

(a)(ii) ~~Future Residential development does not impact on the safety and efficiency of the existing local road network;~~

(a)(iii) *Reverse sensitivity effects from the strategic transport infrastructure networks on National Routes and Regional Arterials in accordance with Table 14.12.5.5 are avoided or minimised;*

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable and resilient communities.
- Policy 4.1.16 refers to 'future residential areas' and 'future residential development'. However, the planning maps do not appear to identify any future residential growth areas in, or near, Horotiu. It needs to be clarified where these future residential areas are and how they will be identified and developed.
- Any future residential growth areas in Horotiu should go through a structure plan process (and associated plan change).
- The submitter supports the intent of clause (a)(iii), however reverse sensitivity refers to effects of a new sensitive land use on an already established land use such as a transport corridor as well as any human health effects.

Point Number 742.18

Summary of Decision Requested: **Defer or withdraw** the live zoning from the planning maps or defer until an integrated land use and infrastructure plan is completed that provides for coordinated sequencing and staging of infrastructure for the 'live' rezoned area outside of the Ngaaruwaahia, Hopuhopu, Taupiri, Horotiu, Te Kowhai and Glen Massey Structure Plans.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable and resilient communities.
- The "live" zoning of areas for development is not consistent with the Ngaaruwaahia, Hopuhopu, Taupiri, Horotiu, Te Kowhai and Glen Massey Structure Plan.
- Without integrated planning, staging or sequencing of infrastructure the proposed live zoning approach has the potential to compromise the development of accessible, liveable and resilient communities.

Point Number 742.19

Summary of Decision Requested: **Retain** Policy 4.2.15 Earthworks, except for the amendments sought below

AND

Amend Policy 4.2.15(b) Earthworks as follows:

Earthworks are designed and undertaken in a manner that ensures the stability and safety of surrounding land, buildings, infrastructure and structures.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Policy 4.2.15(b) seeks to ensure that earthworks do not undermine surrounding land, buildings and structures. For the avoidance of doubt, add infrastructure to this list.

Point Number 742.20

Summary of Decision Requested: **Retain** Objective 4.2.16(b) Housing options as notified, except for the amendments sought below.

AND

Add a High Density Residential Zone to the Proposed District Plan with supporting objectives, policies and rules.

AND

Amend planning maps to show the location of a High Density Residential Zone.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable and resilient communities.
- The submitter supports the intent of Objective 4.1.16(b) as it supports a mode shift for trips in urban areas from private vehicles to a focus on a more accessible transport system with a variety of modes such as walking, cycling and public transport.
- The use of a higher density residential zone would provide a clearer and more robust (regulatory) signal to applicants of Council's expectations for the density of development in locations close to the Business Town Centre Zone and transport networks.
- This approach would also provide stronger support for Policy 4.2.18(a)(iv).

Point Number 742.21

Summary of Decision Requested: **Retain** Policy 4.2.18 Multi-unit development, except for the amendments sought below

AND

Amend Policy 4.2.18 Multi-unit development as follows:

(a) *Ensure multi-unit residential subdivision and development is designed and located in a way that:*

.....

(ii) ~~Address and~~ *Integrates with adjacent residential development, town centres and public open space;*

.....

(iv) ~~Supports an integrated~~ *Integrates with the transport network, including access to walking and cycling connections to and the public open space network;*
and

.....

(b)(iii) *Promoting the safe movement of pedestrians and vehicles on site, and between the site and the wider transport network;*

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of policy 4.2.18(a)(iv) but suggests it is unclear exactly what is sought. For example, it is unclear how subdivision and development would 'support' an integrated transport network.
- Policy 4.2.18(b)(iii) refers to safe movement of pedestrians and vehicles on site but is silent about movement between the site and wider network.

Point Number 742.22

Summary of Decision Requested: **Retain** Policy 4.2.23 Non-residential activities, except for the amendments sought below

AND

Amend Policy 4.2.23 (a) (iv) Non-residential activities by replacing 'strategic roads' with the appropriate terminology consistent with the road categories described in Table 14.12.5.5.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 4.2.23 and in particular the recognition that different roads perform different functions (4.2.23(a)(iv)); and that adverse effects on the surrounding transport network should be minimised (4.2.23(a)(v)B).
- The submitter notes that the term 'strategic road' is not defined in the Proposed District Plan.

Point Number 742.23

Summary of Decision Requested: **Retain** Policy 4.4.2 Noise as notified.

Decision Reasons:

- The submitter supports the intent of this policy, in particular clauses (iii)-(v).
- These clauses are consistent with the Transport Agency's approach to managing the reverse sensitivity effects from activities sensitive to noise on the state highway network.

Point Number 742.24

Summary of Decision Requested: **Retain** Policy 4.4.3 Artificial outdoor lighting as notified.

Decision Reasons:

- The submitter supports Policy 4.4.3(c).

Point Number 742.25

Summary of Decision Requested: **Retain** Policy 4.4.7 Managing the adverse effects of signs, except for the amendments sought below
AND

Amend Policy 4.4.7 Managing the adverse effects of signs as follows:

(a) ~~The location, colour, content, and appearance of signs directed at or visible to road users traffic are~~ is controlled to ensure ~~signs they~~ do not ~~distract, confuse or obstruct motorists, pedestrians and other road users adversely affect safety of road users..~~

(b) ~~Discourage~~ Signs that generate adverse effects from illumination, light spill, flashing, moving, or reflection are avoided.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the recognition in Policy 4.5.37 of the potential adverse effects of signs on people using the land transport system but seeks minor amendments.

Point Number 742.26

Summary of Decision Requested: **Amend** Policy 4.5.37(a) as follows:

"(i) ~~The location, colour, content, and appearance of signs directed at or visible to road users traffic are~~ is controlled to ensure ~~they~~ do not ~~distract, confuse or obstruct motorists, pedestrians and other road users adversely affect safety of road users..~~

(ii) Signs that generate adverse effects from illumination, light spill, flashing, moving, or reflection are avoided; and

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the recognition in Policy 4.5.37 of the potential adverse effects of signs on people using the land transport system but seeks minor amendments.

Point Number 742.27

Summary of Decision Requested: **Retain** Policy 4.5.38 Artificial outdoor lighting as notified.

Decision Reasons:

- The submitter supports Policy 4.5.38 (a)(iii).

Point Number 742.28

Summary of Decision Requested: **Retain** Policy 4.6.2 Provide Industrial Zones with different functions as notified.

Decision Reasons:

- The submitter supports Policy 4.6.2 and the recognition of the different types of industrial activities and their relative potential to generate adverse effects.

Point Number 742.29

Summary of Decision Requested: **Retain** Policy 4.6.3 Maintain a sufficient supply of industrial land, except for the amendments sought below

AND

Amend Policy 4.6.3 Maintain a sufficient supply of industrial land as follows:

~~Maintain a sufficient supply of industrial land within strategic industrial nodes to meet the foreseeable future demands, having regard to the requirements of different industries to and avoiding the need for industrial activities to locate in non-industrial zones.~~

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable and resilient communities, A key part of this is providing employment opportunities.
- The Transport Agency also notes that the amount and location of industrial land will need to be reviewed over time based on the changing demands in the Waikato District and as a result of the Hamilton to Auckland Corridor Plan.

Point Number 742.30

Summary of Decision Requested: **Retain** Policy 4.6.8 Specific activities within Nau Mai Business Park, except for the amendments sought below

AND

Amend Policy 4.6.8 Specific activities within Nau Mai Business Park to specify what types of activities are anticipated within the Nau Mai Business Park.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter was involved with previous planning processes in relation to the Nau Mal Business Park and supports the continued development of this area consistent with the outcomes of these processes.
- There appears to be a typographical error ('specific types activities') in Policy 4.6.8.
- It is vague as to what outcomes are sought.

Point Number 742.31

Summary of Decision Requested: **Amend** Policy 4.7.2 (a)(v) Subdivision location and design as follows:

(a)(v) Promote safe and connected communities through quality urban design;

AND

Add a new clause (b) to Policy 4.7.2 Subdivision location and design as follows:

(b) Ensure that the adverse effects on land transport networks from proposed subdivision are appropriately managed.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Subdivision, location and design needs to use an integrated land use and transport planning process to consider urban design and the transport system.

Point Number 742.32

Summary of Decision Requested: **Retain** Policy 4.7.6 Co-ordination between servicing and development and subdivision, except for the amendments sought below

AND

Amend Policy 4.7.6(a)(i) Co-ordination between servicing and development as follows:

Is located in areas where ~~infrastructure~~ infrastructure capacity appropriate to the proposal is available, or is otherwise ~~has been~~ planned and funded.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Policy 4.7.6 which seeks a co-ordinated approach to servicing and development and requires all subdivision and development to be within areas subject to an approved structure plan.
- The submitter considers amendments are required to clause (a)(i) to avoid development taking up capacity intended for other purposes.

Point Number 742.33

Summary of Decision Requested: **Retain** Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services, except for the amendments sought below

AND

Amend Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services, to address the inconsistency with Policy 4.7.6 Co-ordination between servicing and development and subdivision.

AND

Define the terms "maximum potential yield" and "minimum potential yield."

AND

Amend Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services, to recognise that other constraints may also affect yield beyond geotechnical constraints including the need to achieve good urban design outcomes and provide for land transport infrastructure.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 4.7.7, however notes it is inconsistent with Policy 4.7.6 which requires all development and subdivision to be located in an area subject to an approved structure plan.
- The submitter supports structure planning as a tool, particularly for new areas of development.
- The submitter requests clarification where and when it is appropriate to develop without a structure plan and the inconsistencies between the policies is addressed. There is insufficient clarity regarding the terms "maximum potential yield" and "minimum potential yield". The Transport Agency considers the policy needs to ensure that good urban design is not compromised to achieve "maximum potential yield".
- Requiring a development to maximise the potential yield purely on the number of lots (which is presumably the measure intended) may lead to compromises in other areas, such as provision of infrastructure (as they will be restricted to the absolute minimum rather than what is optimal) and lead to loss of amenity, etc.
- In addition, there may be other constraints on yield apart from geotechnical constraints.

Point Number 742.34

Summary of Decision Requested: **Retain** Policy 4.7.9 Connected neighbourhoods as notified.

Decision Reasons:

- The submitter supports this policy as it enables connected and accessible communities.

Point Number 742.35

Summary of Decision Requested: **Retain** Policy 4.7.11 Reverse sensitivity, except for the amendments sought below

AND

Amend Policy 4.7.11 Reverse sensitivity as follows:

(a) Development and subdivision design minimises potential for reverse sensitivity...; and

(b) Avoid potential for reverse sensitivity effects of locating new dwellings in the vicinity of an intensive farming, extraction industry or industrial activity, or infrastructure.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 4.7.11 but requests minor amendments to recognise infrastructure as an existing land use.

Point Number

742.36

Summary of Decision Requested:

Retain Policy 5.3.5 Earthworks activities, except for the amendment sought below

AND

Amend Policy 5.3.5(b)(iv) Earthworks activities as follows:

Adjoining properties, and public services and infrastructure are protected

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Policy 5.3.5 but seeks infrastructure is included along with public services.

Point Number

742.37

Summary of Decision Requested:

Retain Policy 5.3.7 Reverse sensitivity effects, except for the amendments sought below

AND

Amend Policy 5.3.7(f)(i) Reverse sensitivity effects as follows:

Compromise the safe operation of the ~~road~~ land transport network ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Policy 5.3.7(f)(i) as it seeks to avoid adverse effects on the safe operation of the transport network, but requests that this is amended to align with a consistent definition of the land transport network.

Point Number

742.38

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

(c) Ensure subdivision, use and development ~~minimise~~ avoids the adverse effects of ribbon development

...

(f) Subdivision, use and development ensures the adverse effects on public infrastructure are avoided or mitigated ~~minimised~~

AND

Clarify what is meant by "urban forms of subdivision, use, and development" and "the boundaries of towns and villages" in Policy 5.3.8.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of accessible, liveable communities and therefore seeks Policy 5.3.8 is amended to align with the purpose and principles of the Resource Management Act to avoid the adverse effects of activities on the environment, including of ribbon development.
- Both clauses (c) and (f) refer to minimising effects, however the Resource Management Act definition of "effects" includes both positive and adverse effects.
- The policy uses the term "urban forms" in reference to subdivision, use and development, and also refers to "the boundaries" of towns and villages. Neither of these is defined. The latter may be better described as being land with specific zoning at the time the plan is made operative.

Point Number

742.39

Summary of Decision Requested:

Retain Policy 5.3.14 Signs, except for the amendments sought below

AND

Amend Policy 5.3.14 Signs as follows:

(b) ~~Ensure signage~~ The location, colour, content, and appearance of signs directed at or visible to road users ~~traffic~~ is controlled to ensure they do not distract, confuse or obstruct motorists, pedestrians and other road users ~~adversely affect safety of road users~~.....

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the recognition in Policy 5.3.14 of the potential adverse effects of signs on people using the land transport system but seeks minor amendments.

Point Number 742.40

Summary of Decision Requested: **Retain** Policy 5.3.15 Noise and vibrations, except for the amendment sought below

AND

Amend Policy 5.3.15(a)(vi) Noise and vibrations as follows:

Requiring acoustic insulation where sensitive land use activities are located within high noise environments including near existing and designated State Highways, the Airport Noise ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 5.3.15 to manage the adverse effects of noise and vibration.
- Vehicles on state highways can produce adverse effects that extend beyond the state highway boundary, such as: noise and vibration, emissions, lighting/glare, and dust.
- Development that establishes near state highways needs to take into account the potential for these effects to be experienced and should be designed to avoid/mitigate them. In particular, noise sensitive activities such as dwellings can be affected by road-traffic noise and vibration, which can lead to annoyance and sleep disturbance potentially resulting in adverse health effects.
- The submitter therefore seeks recognition of state highways within this policy.

Point Number 742.41

Summary of Decision Requested: **Retain** Policy 5.6.3 Subdivision within the Country Living Zone, except for the amendments sought below

AND

Amend Policy 5.6.3(a)(iv) Subdivision within the Country Living Zone, as follows:

existing and planned infrastructure is not ~~compromised~~ adversely affected:

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 5.6.3 but requests an amendment to include existing and planned infrastructure and align with the Regional Policy Statement and RMA effects principles.

Point Number 742.42

Summary of Decision Requested: **Retain** Policy 5.6.14 Managing the adverse effects of signs, except for the amendments sought below

AND

Amend Policy 5.6.14 Managing the adverse effects of signs, as follows:

(a) The location, colour, content, and appearance of signs directed at or visible to road users ~~traffic~~ is controlled to ensure signs they do not distract, confuse or obstruct motorists, pedestrians and other road users adversely affect safety of road users ..."

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 5.6.14 and requests that it is amended to clarify that it relates to all signage visible or directed at traffic.
- The submitter also seeks the wording of Policy 5.6.14 to be aligned with Policy 5.3.14(b) (and the submitter's proposed amendments to Policy 5.3.14(b)).

Point Number 742.43

Summary of Decision Requested: **Retain** Policy 5.6.15 Artificial outdoor lighting as notified.

Decision Reasons:

- Submitter supports Policy 5.6.15(c).

Point Number 742.44

Summary of Decision Requested: **Retain** Policy 5.6.16 Noise, except for the amendments sought below

AND

Amend Policy 5.6.16(a)(v) Noise, as follows:

Requiring acoustic insulation where sensitive land use activities are located within high noise environments, including near existing and designated State Highways.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 5.6.16.
- Vehicles state highways can produce adverse effects that extend beyond the state highway boundary, such as: noise and vibration, emissions, lighting/glare, and dust.
- Development that establishes near highways needs to take into account the potential for these effects to be experienced and should be designed to avoid/mitigate them. In particular, noise sensitive activities such as dwellings can be affected by road-traffic noise and vibration, which can lead to annoyance and sleep disturbance potentially resulting in adverse health effects.
- The submitter therefore seeks recognition of state highways as high noise environments within this policy.

Point Number 742.45

Summary of Decision Requested: **Retain** Objective 6.1.1 Development, operation and maintenance of infrastructure, except for the amendments sought below
AND
Amend Objective 6.1.1 Development, operation and maintenance of infrastructure, as follows:
Infrastructure is developed, operated and maintained to ~~benefit the~~ enhance social, economic, cultural and environmental well-being of the district.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Objective 6.1.1 but requests that it is amended to recognise the wider benefits of infrastructure within and beyond the district.

Point Number 742.46

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance as notified.

Decision Reasons:

- The submitter supports Policy 6.1.2 as it provides for the ongoing use, maintenance and development of infrastructure throughout the district.

Point Number 742.47

Summary of Decision Requested: **Retain** Policy 6.1.4 Infrastructure benefits as notified.

Decision Reasons:

- The submitter supports Policy 6.1.4 Infrastructure benefits, as this provides for the on-going use, maintenance and development of infrastructure throughout the District, and recognises the benefits of infrastructure.

Point Number 742.48

Summary of Decision Requested: **Retain** Policy 6.1.3 Technological advances, except for the amendments sought below
AND
Amend Policy 6.1.3(a)(ii) Technological advances as follows:
Allow for the re-use of redundant infrastructure and structures and the upgrading of existing infrastructure where appropriate; and ...
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter requests an amendment to Policy 6.1.3 to recognise that technological advances may also result in/require the upgrading of existing infrastructure.

Point Number 742.49

Summary of Decision Requested: **Retain** Objective 6.1.6 Reverse Sensitivity, except for the amendments sought below
AND
Amend Objective 6.1.6 Reverse Sensitivity as follows:
Existing and planned infrastructure (including the National Grid) is protected from reverse sensitivity effects, and infrastructure (including the National Grid) its construction, operation, maintenance, repair, replacement and upgrading is not compromised.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Objective 6.1.6 as it recognises that sensitive or incompatible activities being established near infrastructure can affect the safe, effective and efficient operation of infrastructure.
- Amendment is sought to ensure both existing and planned infrastructure is covered and recognises the importance of the construction, operation, maintenance, and upgrading of infrastructure.

Point Number 742.50

Summary of Decision Requested: **Amend** Policy 6.1.7 Reverse sensitivity and infrastructure as follows:
Avoid reverse sensitivity effects on existing and planned infrastructure from subdivision, use and development as far as reasonably practicable, so that the its construction, operation, maintenance, repair, replacement and upgrading, the ongoing and efficient operation of infrastructure is not compromised.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.1.7 to avoid reverse sensitivity effects on infrastructure.
- The submitter requests a minor change to recognise the important functions of construction, operation and maintenance of infrastructure.

Point Number 742.51

Summary of Decision Requested: **Retain** Policy 6.1.13 Future growth areas, except for the amendments sought below
AND

Amend Policy 6.1.13 Future growth areas as follows:

Require infrastructure services to be planned, developed and co-ordinated with development to ensure it a standard that enables the service can to be extended to future growth areas where and when appropriate.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Policy 6.1.13, but considers that for successful planning and development of urban areas to occur, there needs to be an integrated approach to the planning of infrastructure and land use.

Point Number 742.52

Summary of Decision Requested: **Retain** Policy 6.4.2 Provide adequate infrastructure, except for the amendments sought below
AND

Amend Policy 6.4.2 Provide adequate infrastructure as follows:

Ensure adequate provision of infrastructure, including land transport networks, where land is subdivided or its use is changed and/or intensified.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Policy 6.4.2, but considers the focus on intensification does not necessarily capture land use change. Different land uses may not necessarily be considered more intensive but may have very different impacts on and requirements for infrastructure.

Point Number 742.53

Summary of Decision Requested: **Retain** Policy 6.4.4 Road and rail network, except for the amendments sought below
AND

Amend Policy 6.4.4 Road and rail network as follows:

6.4.4 Policy - ~~Road and rail~~ Land transport network

(a) Discourage Avoid subdivision use and development that would compromise:

(i) The road function, as specified in the road hierarchy in 14.12.5.5, or the safety and efficiency of the road network.

(ii) The safety and efficiency; including the maintenance, upgrading, development and operation of the railway network land transport network.

AND

Add a new clause as follows:

(b) Avoid reverse sensitivity effects on the land transport network through setbacks and design controls for new residential and other sensitive land use activities established in proximity to existing or planned transport corridors.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.4.4 which seeks to discourage subdivision, use and development which compromises regional land transport infrastructure (including both road and rail).
- Change the title to use consistent terminology (i.e. land transport networks which the submitter has sought a definition for).
- Use the stronger word "avoid" (that relates to the RMA purpose and principles) rather than "discourage".
- Take into account the full range of functions and activities on the land transport network.
- A further clause should be added to Policy 6.4.4 to address the specific measures sought to be added to the Plan to address reverse sensitivity effects.

Point Number 742.54

Summary of Decision Requested: **Retain** Policy 6.4.7 Stormwater, except for the amendments sought below
AND

Amend Policy 6.4.7(a)(v) Stormwater, as follows:

Does not increase the flow of stormwater runoff onto adjoining properties, adjacent land, or flood plains ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.4.7 and seeks a minor change to clause (v) to refer to "land" rather than "properties" so it is clear that this also applies to transport corridors which may not be considered properties per se;
- The submitter seeks the replacement of "adjoining" with "adjacent", as the former implies the parcels must be contiguous.

Point Number 742.55

Summary of Decision Requested: **Retain** Policy 6.4.5 Roding Infrastructure, except for the amendments sought below

AND

Amend Policy 6.4.5 Roding infrastructure as follows:

Policy - ~~Land transport network~~ ~~Roding~~ infrastructure

(a) Ensure that ~~roding~~ land transport network infrastructure is developed so that:

(i) The design, location, alignment and dimensions of new ~~roads~~ land transport networks ...

(ii) The ~~roding pattern~~ land transport network provides good connectivity to the site and integrates with adjacent ~~land~~ developments and identified ~~as~~ future growth areas including ~~walking and cycling networks and facilities and~~ public transport ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.4.5, but requests that it is amended to change the focus from "roads" to the "land transport network".
- It is important new communities are developed with access to a range of transport options, including off road walkways and cycle facilities, and provide connectivity to existing and future development.

Point Number 742.56

Summary of Decision Requested: **Retain** Objective 6.5.1 Land Transport Network, except for the amendments sought below

AND

Amend Objective 6.5.1(a)(ii) Land Transport Network as follows:

Adverse effects from the construction, maintenance, upgrading and operation of the transport network are managed.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Objective 6.5.1 as it aligns with the land Transport Management Act 2003.
- The submitter requests minor change to recognise that upgrading is also a necessary part of infrastructure management.

Point Number 742.57

Summary of Decision Requested: **Retain** Policy 6.5.2 Construction and operation of the land transport network, except for the amendments sought below

AND

Amend Policy 6.5.2 Construction and operation of the land transport network as follows:

Policy - Construction, maintenance, upgrading and operation of the land transport network

(a) Promote the construction, maintenance, upgrading and operation of an efficient ...

(ii) The appropriate design and location of sites accesses;

(iii) Traffic signage, road marking, lighting, rest areas, service facilities and parking as appropriate;

(v) Corridor and carriageway design which is ~~sufficient to enable~~ enables provision of public transport ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.5.2 and requests that minor changes are made to recognise that construction, operation, and maintenance are all important parts of providing a safe and efficient land transport network.

Point Number 742.58

Summary of Decision Requested: **Retain** Policy 6.5.3 Road hierarchy and function, except for the amendments sought below

AND

Amend Policy 6.5.3 Road hierarchy and function, as follows:

~~Provide a hierarchy of roads for different functions and modes of land transport while recognising the nature of the surrounding land use within the district.~~

(a) Establish a road hierarchy and categorise roads in the district in accordance with their function.

AND

Add a new clause (b) to Policy 6.5.3 Road hierarchy and function as follows:

(b) Protect the function of roads as identified in the road hierarchy from the adverse effects of subdivision use and development.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.5.3.
- There should be a framework within the plan that recognises and establishes the road hierarchy (consistent with the Regional Policy Statement), and manages the effects of activities with respect to the relative function of the road within the hierarchy.
- As written, Policy 6.5.3 relates only to the provision of different types of roads. It is important to recognise that roads perform different functions and that these functions should influence how they are approached and in particular, how adjacent land uses are managed. This

Point Number 742.59

Summary of Decision Requested: **Retain** Policy 6.5.5 Road safety as notified.

Decision Reasons:

- Road safety is a key priority for the submitter.

Point Number 742.60

Summary of Decision Requested: **Amend** Policy 6.5.7 Vehicle access as follows:

Control the location of new vehicle accesses to sites adjacent relative to other accesses, intersections and rail level crossings to maintain and improve the safety and efficiency of the land transport network.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Policy 6.5.7, however seeks that it is broadened to recognise all accesses and intersections.

Point Number 742.61

Summary of Decision Requested: **Amend** Policy 9.1.1.3 Management of adverse effects as follows:

(a) ~~Mitigate~~ Ensure the adverse effects from the operation and development of the Hampton Downs Motorsport Park are avoided or mitigated, by managing:

(i) The scale, intensity, timing and duration of activities so that to avoid:

A Adverse noise effects on the surrounding Rural Zone are minimised;
B. Adverse effects on the safety and efficiency of the transport network; and
~~(ii) The adverse traffic safety effects to ensure the safe and efficient operation and functioning of the adjacent transport network and efficient access to surrounding facilities is maintained at all times; and~~
~~(iii)(i)~~ Signs that are visible from, or located in close proximity to, a public road to ensure adverse effects on safety are avoided; and
~~(iii)(ii)~~ The size, scale and intensity of development to ensure the amenity of the surrounding area is maintained.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the recognition in Policy 9.1.1.3 that there is potential for adverse effects from the operation of Hampton Downs Motorsport Park but considers that the word "mitigating" needs to be widened to allow effects to be avoided or mitigated.

Point Number 742.62

Summary of Decision Requested: **Retain** Policy 9.2.1.1 Development, except for the amendments sought below

AND

Amend Policy 9.2.1.1(b) Development as follows:

Develop Te Kowhai Airpark in accordance with the Te Kowhai Airpark Framework Plan in Appendix 9.

AND

Clarify whether it is the Framework Plan or the entirety of Appendix 9 which should be referred to in Policy 9.2.1.1(b).

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the development of Te Kowhai Airpark.
- Policy 9.2.1.1 refers to the Te Kowhai Airpark Framework Plan - later provisions cross-reference Appendix 9. It would be useful to make the same cross-reference in this part of the Plan.
- The submitter further questions whether it is just the Framework Plan or the entirety of Appendix 9 which should be referred to.

Point Number 742.63

Summary of Decision Requested: **Amend** 12.1(d) Introduction as follows:

Chapter 13 contains all the definitions that are used in the plan rules within Section C. The definitions form part of the rules ...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter considers that definitions are integral to district plan interpretation, however, clause 12.1(d) states that the definitions in Chapter 13 apply to the rules within Section C (and by omission not to the entire plan, including objectives and policies in Section B).
- It is unclear why a term defined for the purpose of a rule would not carry the same meaning for the purpose of the whole plan.

Point Number 742.64

Summary of Decision Requested: **Move** Chapter 13 Definitions elsewhere in the Proposed District Plan.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- No reasons provided.

Point Number 742.65

Summary of Decision Requested: **Retain** Section 12.1(h) Introduction to rules, except for the amendments sought below

AND

Amend Section 12.1(h) Introduction to rules as follows:

Roads appear white on the planning maps and are not zoned, nor do policy areas or sites/features apply to roads. Rules relating to activities occurring in the road corridor are set out in Chapter 14: Infrastructure and Energy.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the clarification in clause 12.1(h) that roads are not zoned.
- However, the submitter considers that clarification is needed regarding whether policy areas and sites/features apply to roads.

Point Number 742.66

Summary of Decision Requested: **Delete** clause 12.3.1 Additional matters.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter does not consider clause 12.3.1 Additional Matters lists matters which Council needs to reserve its discretion to.
- The matters are otherwise dealt with under the RMA.
- It is inappropriate to attempt to reserve Council's discretion in relation to certain matters for non-complying and discretionary activities. If Council considers it necessary to alert plan users to these matters, this section should be turned into an advice note.

Point Number 742.67

Summary of Decision Requested: **Amend** Proposed District Plan to ensure all terms are defined as appropriate.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The Proposed District Plan uses a large number of terms which are not defined and are critical to the interpretation of plan provisions. For example 'rural activities', 'rural areas', 'urban areas'.

Point Number 742.68

Summary of Decision Requested: **Amend** the diagram associated with the definition of "contiguous" in Chapter 13: Definitions to display two sites touching.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The diagram associated with the definition "contiguous" does not correctly display two sites touching.

Point Number 742.69

Summary of Decision Requested: **Retain** the definition for "Functional need" in Chapter 13: Definitions, except for the amendments sought below

AND

Amend the definition for "Functional need" in Chapter 13: Definitions as follows:

Means for Chapter 14 Infrastructure and Energy the need for a proposal or activity to traverse, locate or operate in a particular environment because it can only occur in that environment.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the recognition that infrastructure can often have locational constraints. However, this definition should apply across the plan and should not be restricted to Chapter 14.

Point Number 742.70

Summary of Decision Requested: Retain the definition for "Heavy vehicle" in Chapter 13: Definitions as notified.

Decision Reasons:

- It is consistent with the definition within the Land Transport Agency's Planning Policy Manual.
-

Point Number 742.71

Summary of Decision Requested: Retain the definition for "Infrastructure" in Chapter 13: Definitions as notified.

Decision Reasons:

- The submitter supports this definition.
-

Point Number 742.72

Summary of Decision Requested: Add a definition for "Integrated transport assessment" to Chapter 13: Definitions as follows:

Means a comprehensive review of all the potential transport impacts of a development proposal.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter seeks the addition of a definition of "integrated transport assessment" which is consistent with the Regional Policy Statement.
-

Point Number 742.73

Summary of Decision Requested: Add a definition for "land transport network" to Chapter 13: Definitions as follows:

The network used for the land-based transportation of people and/or goods including by road, rail, cycling, walking and public transport.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter considers it is important to recognise the whole transport system and the parts that road, rail, cycling and walking facilities have within the network.
-

Point Number 742.74

Summary of Decision Requested: Amend the definition of "limited access road" to Chapter 13: Definitions as follows:

Means the following roads in the district to which sections 88 to 98 of the Government Roadding Powers Act 1989 apply:

(a) State Highway 1, except those parts within Huntly town boundaries and in Taupiri between Mangawera bridge and Kaimui Road;

(b) State Highways 2 and 26; and

(c) State Highway 23 from the Hamilton City boundary to the Okete Stream bridge south abutment.

Any road declared a limited access road under Section 88 of the Government Roadding Powers Act 1989, Section 346A of the local Government Act 1974 or the corresponding provisions of any former enactment.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The definition of "limited access road" refers to specific sections of roads which does not account for the situation of new roads being classified as Limited Access Roads.
 - Given the process of declaring Limited Access Roads is covered by legislation and cannot be overridden by a district plan, it could be misleading and/or unnecessarily trigger a plan change if new sections of Limited Access Road are declared.
 - The definition also excludes the situation of Limited Access Roads declared or existing under the Local Government Act 1974.
-

Point Number 742.75

Summary of Decision Requested: Delete the definition of "noise-sensitive activity" in Chapter 13: Definitions.

AND

Amend the definition of "sensitive land use" in Chapter 13: Definitions to cover all of the matters in "noise-sensitive activity" and to include "student accommodation" and "places of assembly".

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The Proposed District Plan defines both "noise-sensitive activity" and "sensitive land use". The two definitions appear to be used interchangeably and inconsistently throughout the Plan.
- The definitions are similar but not identical.
- The submitter considers "noise-sensitive activity" could be removed from the Proposed District Plan and "sensitive land use" definition extended to cover everything in "noise-sensitive activity" including "student accommodation" and "places of assembly", both of which are

activities which can be sensitive to noise.

Point Number 742.76

Summary of Decision Requested: **Retain** the definition of "Operational need" in Chapter 13: Definitions as notified.

Decision Reasons:

- The submitter supports this definition.

Point Number 742.77

Summary of Decision Requested: **Add** a definition of "reverse sensitivity" Chapter 13: Definitions as follows:

Means the vulnerability of a lawfully established activity to a new activity or land use. It arises when a lawfully established activity causes potential, actual or perceived adverse environmental effects on the new activity, to a point where the new activity may seek to restrict the operation or require mitigation of the effects of the established activity.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter seeks a definition of "reverse sensitivity" as per the Regional Policy Statement definition.

Point Number 742.78

Summary of Decision Requested: **Add** a definition of "regionally significant infrastructure" to Chapter 13: Definitions as follows:

Means:

(a) Pipelines for the distribution or transmission of natural or manufactured gas or petroleum;
(b) Infrastructure required to permit telecommunication as defined in the Telecommunications Act 2001;
(c) Radio apparatus as defined in section 2(1) of the Radio Communications Act 1989;
(d) The national electricity grid as defined by the Electricity Industry Act 2010;
(e) A network as defined in the Electricity Industry Act 2010;
(f) Infrastructure for the generation and/or conveyance of electricity that is fed into the national grid or a network (as defined in the Electricity Industry Act 2010);
(g) Significant transport corridors as defined in Maps 6.1 and 6.1A of the Waikato Regional Policy Statement (2016);
(h) Lifeline utilities, as defined in the Civil Defence and Emergency Management Act 2002 and their associated essential infrastructure and services;
(i) Municipal wastewater treatment plants, water supply treatment plants and bulk water supply wastewater conveyance and storage systems municipal supply dams, (including Mangatangi and Mangatawhiri water supply dams) and ancillary infrastructure; and
(j) Flood and drainage infrastructure managed by Waikato Regional Council.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The Waikato Regional Policy Statement defines "regionally significant infrastructure" (including "significant transport corridors") and recognises the local, regional and national benefits that these provide.

Point Number 742.79

Summary of Decision Requested: **Retain** definition of "road network utilities" in Chapter 13: Definitions as notified.

Decision Reasons:

- The submitter supports the definition of "road network activities"

Point Number 742.80

Summary of Decision Requested: **Add** a definition for "rural activities" to Chapter 13: Definitions.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The term rural activities is used in Rule 14.12.1.2(1)(a)(iv) but is not defined.
- A definition is needed to clarify what the term "rural activities" covers.

Point Number 742.81

Summary of Decision Requested: **Retain** the definition for "signs" in Chapter 13: Definitions, except for the amendments sought below

AND

Amend the diagram in the definition for "sign" demonstrating "two signs" to include the situation where signs are at 90 degrees.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The illustrations of two-faced signs do not cover the situation where the signs are at 90 degrees to one another.

Point Number	742.82
Summary of Decision Requested:	Retain definition for "temporary infrastructure" in Chapter 13: Definitions as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this definition.
Point Number	742.83
Summary of Decision Requested:	Retain the definition for "vehicle movement" in Chapter 13: Definitions as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this definition.
Point Number	742.84
Summary of Decision Requested:	Add a definition for "watercourse" to Chapter 13: Definitions that excludes artificial waterways such as stormwater swales. AND Request any consequential changes necessary to give effect to the relief sought in the submission.
Decision Reasons:	<ul style="list-style-type: none"> There is no definition of the term "watercourse". Refer to submitter's submission on Rule 14.3.1.3(1)(c).
Point Number	742.85
Summary of Decision Requested:	Retain Rule 14.2.1.1(2)(b) New infrastructure as notified. AND Retain Rule 14.2.1.1(2)(c) New infrastructure as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports conditions 14.2.1.1(2)(b)-(c) which state that the conditions in 14.2.1.1(1) do not apply to roads or other lineal transport networks, or road network activities.
Point Number	742.86
Summary of Decision Requested:	Retain Rule 14.2.3 DI Rules applying to all infrastructure, except for the amendments sought below AND Amend Rule 14.2.3 DI Discretionary activities applying to all infrastructure as follows: <i>Any infrastructure not specifically listed provided for as a permitted restricted discretionary or non-complying activity, within Chapter 14 ...</i> AND Delete Rule 14.2.3 NC3 Rules applying to all infrastructure. AND Request any consequential changes necessary to give effect to the relief sought in the submission.
Decision Reasons:	<ul style="list-style-type: none"> These rules refers to "any infrastructure not specifically listed within Chapter 14", but it is unclear what this covers. For example, 14.2.1.1 mentions "roads" - does this mean they are excluded from this rule? What does "specifically listed" mean in this rule?
Point Number	742.87
Summary of Decision Requested:	Retain Rule 14.3.1 P1 The operation, maintenance, repair and removal of existing infrastructure, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this rule which provides for operation, maintenance, repair and removal of infrastructure.
Point Number	742.88
Summary of Decision Requested:	Retain Rule 14.3.1.P2 Minor upgrading of existing infrastructure as notified, subject to relief sought on Rule 14.3.1.3 and Schedule 30.2.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports this rule which provides for minor upgrading of infrastructure.
Point Number	742.89
Summary of Decision Requested:	Amend Rule 14.3.1.3((1)(c) Earthworks activities associated with infrastructure as follows: <i>Within 10m of a watercourse (excluding artificial watercourses), ...</i> OR Add a definition of "watercourse" to Chapter 13: Definitions that excludes artificial watercourses, including roadside swales and other stormwater devices; AND Amend the maximum volume of earthworks in Rule 14.3.1.3 (1)(c), dependent on the definition of "watercourse".

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the rule in principle but subject to an appropriate definition of "watercourse". If the definition of "watercourse" includes features such as roadside swales, the submitter is opposed to the maximum volume of earthworks outlined in 14.3.1.3(l)(c).

Point Number

742.90

Summary of Decision Requested:

Retain Rule 14.3.1 P7 Electric vehicle chargers, as notified.

Decision Reasons:

- The submitter supports the provision of facilities for electric vehicles.

Point Number

742.91

Summary of Decision Requested:

Retain Rule 14.3.3 RD1 Minor upgrading of existing infrastructure, except for the amendments sought below

AND

Amend Rule 14.3.3 RD1 (iii) Minor upgrading of existing infrastructure as follows:

~~Transport~~ network safety and efficiency;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.3.3 RD1 generally, but seeks an amendment to matter (iii) to allow Council's discretion to be restricted to the "transport network" which is broader than the term "road".

Point Number

742.92

Summary of Decision Requested:

Retain Rule 14.3.3 RD2 Earthworks associated with infrastructure, as notified.

Decision Reasons:

- The submitter supports the matters of discretion listed in Rule 14.3.3 RD2.

Point Number

742.93

Summary of Decision Requested:

Retain Rule 14.3.3 Restricted Discretionary Activities, except for the amendments sought below

AND

Add a new matter of discretion to Rule 14.3.3 RD3 Trimming, maintenance or removal of vegetation or trees, as follows:

(d) land transport network safety and efficiency.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.3.3 RD3 generally, but seeks an additional restricted discretionary criterion that considers the safety and efficiency of the transport network.

Point Number

742.94

Summary of Decision Requested:

Retain Rule 14.3.3 RD5 Electric vehicle charging stations, except for the amendments sought below

AND

Amend Rule 14.3.3 RD5(c) Electric vehicle charging stations, as follows:

~~(c) Road~~ Land transport network safety and efficiency;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.3.3 RD5 but seeks an amendment to matter (c) to allow Council's discretion to be restricted to the "transport network" which is broader than the term "road".

Point Number

742.95

Summary of Decision Requested:

Retain Rule 14.12.1.1 P1 Vehicle access for all activities, except for the amendments sought below

AND

Amend Rule 14.12.1.1 P1 (a) Vehicle access for all activities as follows:

The site has a vehicle legal physical access to a formed road that is maintained by a road controlling authority;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter generally supports the conditions in 14.12.1.1.
- Clarification is required for (l)(a) so that access should be both legal and physical.
- The Transport Agency particularly supports the requirement that vehicle access should be to a road with the lowest available classification in the road hierarchy.

Point Number 742.96

Summary of Decision Requested: **Retain** Rule 14.12.1.1 Advice Note, except for the amendment sought below
AND

Amend Rule 14.12.1.1 Advice Note as follows:

Any new vehicle access (or additional land use utilising an existing vehicle entrance) on a ~~limited access road or~~ state highway will require the approval of the NZ Transport Agency, as the road controlling authority.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the Advice Note for Rule 14.12.1.1(P1), but seeks minor amendments.
- Not all limited access roads are administered by the submitter.
- No works can be undertaken within a state highway without the prior approval of the submitter pursuant to section 51 of the Government Roadway Powers Act 1989.

Point Number 742.97

Summary of Decision Requested: **Retain** Rule 14.12.1.2 (1)(a)(ii) P2 Onsite parking and loading, except for the amendments sought below
AND

Amend Rule 14.12.1.2(1)(a)(ii) P2 Onsite parking and loading as follows:

If the calculation results in a fraction, then that figure shall be rounded up to the nearest whole number;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.12.1.2.(1)(a)(ii), but considers an amendment is required for certainty.

Point Number 742.98

Summary of Decision Requested: **Delete** Rule 14.12.1.2(1)(a)(iv) P2 On-site parking and loading.
AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Rule 14.12.1.2(1)(a)(iv) refers to "rural activities" which is not defined in the Plan. This could be interpreted as any activity occurring in a Rural Zone or any activity of a rural nature. The rule also states that the parking and loading requirements in Table 14.12.5.7 do not apply to "residential activities" (which is defined in the Plan), however Table 14.12.5.7 includes figures for dwellings.
- It is unclear why residential and rural activities would be exempt from the parking and loading space requirements, or why activities are included in Table 14.12.5.7 if they are exempt from Rule 14.12.1.2.

Point Number 742.99

Summary of Decision Requested: **Retain** Rule 14.12.1.3(1)(a)(i) P3 On-site manoeuvring and queuing, except for the amendments sought below
AND

Amend Rule 14.12.1.3(1)(a)(i) P3 On-site manoeuvring and queuing, as follows:

Rule 14.12.1.3(1)(a) does not apply to Local Roads within the Residential and Village Zones with a posted speed limit of less than 60 ~~kph~~ km/h.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.12.1.3(1)(a)(i) but seeks an amendment to ensure the correct abbreviation is used.

Point Number 742.100

Summary of Decision Requested: **Retain** Rule 14.12.1.3(1)(b)P3 On-site manoeuvring and queuing, except for the amendments sought below
AND

Amend Rule 14.12.1.3(1)(b)P3 On-site manoeuvring and queuing as follows:

A 90th percentile car, as defined in Figure 14.12.5.8, can enter and exit all parking spaces without making more than one reverse movement, excluding spaces required for a dwelling;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.12.1.3(1)(b) but seeks an amendment to ensure the correct abbreviation.

Point Number 742.101

Summary of Decision Requested: **Amend** Rule 14.12.1.3(1)(c) P3 onsite manoeuvring and queuing, as follows:

On-site manoeuvring space for any heavy vehicle shall comply with the tracking curve (relevant for the type of activities to be carried out on the site and the largest combination standard configuration heavy vehicle permitted on the road(s) to which the site has frontage trucks to be used), as set out in the guideline ~~RTS 18 - New Zealand on-road tracking curves for heavy motor vehicles (2007)~~;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Rule 14.12.1.3(1)(c) refers to 'RTS 18 - New Zealand on-road tracking curves for heavy motor vehicles' (2007). RTS 18 is a 2007 document and was produced before High Productivity Motor Vehicles (HPMV) were permitted on some roads.
- The Proposed District Plan should refer to tracking curves for the largest combination standard configuration heavy vehicle permitted on the roads to which the site has frontage.

Point Number 742.102

Summary of Decision Requested: **Retain** Rule 14.12.1.4 P4 Traffic generation except for the amendments sought below.

AND

Amend all references to "per day" in Rule 14.12.1.4(1)P4 Traffic generation to "per site per day."

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 14.12.1.4(1) which refers to a given number of vehicle movements per day in various zones.
- The rule requires further clarity that the threshold relates to vehicle movements per site rather than per zone.

Point Number 742.103

Summary of Decision Requested: **Amend** Rule 14.12.1.5(1) P5 Operation, maintenance and minor upgrading of existing public roads, as follows (subject to relief sought on Rule 14.3.1.3):

Operation, maintenance and minor upgrading of existing public roads, State Highways and associated road network activities must comply with the following conditions:

(a) The works occur within ~~the road reserve or unformed road~~;

(b) Works within the road must ~~be for the purpose of~~;

(i) ~~maintaining or improving effectiveness or efficiency consistent with the incidental to, and serve a supportive function of for~~, the existing public road; or

(ii) ~~Maintaining or improving safety for road users or adjacent properties Required for the safety of road users; or~~

iii. ~~Required for the safety of adjacent landowners or occupiers;~~

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter opposes Rule 14.12.1.5(1)(b)(i) P5 as the term "supportive function" is not defined in the Plan so the rule is vague.
- Each road's function is defined by its categorisation in the road hierarchy which is considered a clearer reference point.
- Notes this rule also requires compliance with Rule 14.3.1.3 which the Transport Agency has sought changes to elsewhere in this submission.

Point Number 742.104

Summary of Decision Requested: **Retain** Rule 14.12.2 RD3 On-site manoeuvring and queuing, except for the amendments sought below

AND

Amend Rule 14.12.2 RD3 On-site manoeuvring and queuing matter of discretion (c) as follows:

~~Safety design for vehicles and pedestrians~~ The design of features intended to ensure safety for all users of the access site, and/or intersecting road including but not limited to vehicle occupants, vehicle riders and pedestrians;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of matter of discretion (c) but seeks amendment to clarify the intention of the term "safety design".

Point Number 742.105

Summary of Decision Requested: **Retain** Rule 14.12.2 RD4 Traffic generation, except for the amendments sought below

AND

Amend the title of Rule 14.12.2 RD4 Traffic generation as follows:

Traffic generation that does not comply with one or more of the conditions of Rule 14.12.1.4 and that is subject of an Integrated Transport Assessment

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter is concerned at the absence of provisions requiring an Integrated Transport Assessment as these are necessary to understand the potential adverse transport effects associated with an activity.

Point Number 742.106

Summary of Decision Requested: **Retain** Rule 14.12.2 RD4 Traffic Generation, except for the amendments sought below

AND

Amend Rule 14.12.2 RD4 matter of discretion (a) Traffic generation as follows:

~~The trip characteristics of associated with the proposed activity on the site;~~

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The matter of discretion (a) refers to trips "on the site" which could be confused with meaning the trips on the site, as opposed to the trips associated with the activity on the site.

Point Number 742.107

Summary of Decision Requested: **Retain** Rule 14.12.2 RD4 Traffic generation, except for the amendments sought below

AND

Amend Rule 14.12.2 RD4 matter of discretion (b) Traffic generation as follows:

~~Safety design for vehicles and pedestrians~~ The design of features intended to ensure safety for all users of the access site and/or intersecting road including but not limited to vehicle occupants, vehicle riders and pedestrians;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of matter of discretion (b) but seeks amendment to provide clarification of the intention of the term "safety design".

Point Number 742.108

Summary of Decision Requested: **Retain** Rule 14.12.2 RD4 Traffic generation, except for the amendments sought below

AND

Amend Rule 14.12.2 RD4 matter of discretion (e) Traffic generation as follows:

~~Road and transport network safety and efficiency, particularly at peak traffic times (of both the activity and road network);~~

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of matter of discretion (c) but seeks amendments to ensure that the term "peak traffic times" relates to the peak times for the activity and for the road to which vehicle movements associated with the activity connect.

Point Number 742.109

Summary of Decision Requested: **Retain** Rule 14.12.2 RD7 Access and New Roads- Te Kowhai Airpark, except for the amendments sought below

AND

Add to Rule 14.12.2 RD7 Access and New Roads - Te Kowhai Airpark the following matter of discretion:

(j) adverse effects on the safety and efficiency of the land transport network.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

-

Decision Reasons:

- The submitter seeks a new matter of discretion to ensure that potential adverse effects on the safety and efficiency of the transport network are considered.

Point Number 742.110

Summary of Decision Requested: **Retain** Table 14.12.5.1 Separation distances, except for the amendments sought below

AND

Amend Table 14.12.5.1 Separation distances, as per Attachment 1 to the submission. Refer to submission for full details.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The values in Table 14.12.5.1 are commensurate with the Transit NZ Policy Planning Manual Table App5B/3, however there are no values for 60 km/h and no reference to National Routes.

Point Number 742.111

Summary of Decision Requested: **Retain** Figure 14.12.5.2 Separation distances as notified.

Decision Reasons:

- The submitter considers Figure 14.12.5.2 is critical to the interpretation of Table 14.12.5.1.

Point Number 742.112

Summary of Decision Requested: **Retain** Table 14.12.5.3 minimum sight distances, except for the amendments sought below

AND

Amend Table 14.12.5.3 minimum sight distances as shown in Attachment 2 to the submission.

AND

Add definitions for "Rural Areas" and "Urban Areas" as referenced in Table 14.12.5.3.

Refer to submission for full details.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- There is no clear correlation between the distances in Table 14.12.5.3 and other sight distance sources. For example, the sight distances are not aligned with those in Appendix 5B of the Transit NZ Policy Planning Manual.
- Table 14.12.5.3 stipulates different minimum sight distances depending on whether the activity is in a 'rural area' or 'urban area', however, these terms are not defined. It is important to provide certainty, perhaps by reference to the posted speed limit (e.g. urban areas being defined as anywhere with a posted speed limit of 70 km/h or below).

Point Number 742.113

Summary of Decision Requested: **Retain** Figure 14.12.5.4 Minimum sight distances, except for the amendments sought below

AND

Delete Figure 14.12.5.4 Minimum sight distances

AND

Add Perspective A diagram from Appendix 5b of Transit NZ Planning Policy Manual (2007).

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter considers Figure 14.12.5.4 is critical to interpretation of Table 14.12.5.3 but requires amendment to ensure it is consistent with the Transit NZ Planning Policy Manual and Austroads Guide to Road Design Part 4A: Unsignalised and Signalised Intersections (2017 Edition).

Point Number 742.114

Summary of Decision Requested: **Retain** Table 14.12.5.5 Functions of roads within the Road Hierarchy as notified.

Decision Reasons:

- The description of the functions of the various categories of road is important when focus is on protecting those functions. Council should ensure that terms and abbreviations are consistent throughout the Plan.

Point Number 742.115

Summary of Decision Requested: **Retain** Table 14.12.5.6 Road hierarchy list as notified.

Decision Reasons:

- The submitter supports listing the road hierarchy in the Plan.

Point Number 742.116

Summary of Decision Requested: **Retain** Figure 14.12.5.8 90th percentile car tracking curve minimum radius, except for the amendments sought below

AND

Delete Figure 14.12.5.8 - 90th percentile car tracking curve minimum radius

AND

Add vehicle dimensions from Figure B2 and the tracking curve from Figure B5 of AS/NZ2890.1:2004.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the inclusion of Figure 14.12.5.8 in the Plan. However, AS/NZS2890.1:2004 describes the 85th percentile car as longer than the 90th percentile car used in Figure 14.12.5.8.

Point Number 742.117

Summary of Decision Requested: Retain Table 14.12.5.12 Queuing space as notified.

Decision Reasons:

- Table 14.12.5.12 recognises that queuing is likely to be affected by the nature of traffic movements on the intersecting road, therefore the queuing length required could be greater than the minimums.

Point Number 742.118

Summary of Decision Requested: Retain Table 14.12.5.13 Traffic generation rates, except for the amendments sought below

AND

Delete Table 14.12.5.13 Traffic generation rates

AND

Add Table 7.4 from Trips and parking related to land use (2011) (NZ Transport Agency research report 453).

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- In comparison with Table 7.4 of the quoted source research report (Trips and parking related to land use (2011)), many of the trip generation rates appear to be too low.
- It seems unlikely that the trip generation rate for car sales yards will be the same as the trip generation rate for bulk retail.
- The amalgamation of land uses (dairies, takeaway food, bottle stores) will result in unreasonable analysis. For example, fast food outlets have a rate of 362 in the original report compared with the rate of 100 quoted in Table 14.12.5.13. The rate for a medical centre is 79.4 trips per day per professional staff member in the original report and the rate in the Table is significantly understated. The rate for "housing for the elderly/residential care" appears less than the original rates of 2.4 per bed for retirement homes and 2.6 per unit for retirement units. "Retail" is too broad a category for "shopping" the original research report describes rates ranging from 56 to 141.
- The Plan's traffic generation rates are unlikely to be representative and the submitter requested that more relevant information be used.

Point Number 742.119

Summary of Decision Requested: Retain Table 14.12.5.15 Access Roads and conditions (Rural and Country Living Zones) as notified.

Decision Reasons:

- Based on the nature of the land use associated with the Rural and Country Living Zones, the submitter considers that the design vehicles are appropriate.

Point Number 742.120

Summary of Decision Requested: Delete conditions (g) and (i) in Rule 16.1.2 P3 A new retirement village or alterations to an existing retirement village.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Signage and traffic generation matters should not be excluded from the conditions that apply to this activity.

Point Number 742.121

Summary of Decision Requested: Retain Rule 16.1.2 P4 Home occupation, except for the amendments sought below

AND

Add to Rule 16.1.2 P4 Home occupation a new condition as follows:

(f) There are no heavy vehicle movements associated with the activity.

AND

Add a new Restricted Discretionary rule for home occupations not complying with 16.1.2 P4(f), with discretion restricted to the effects of heavy vehicle traffic on the safety and efficiency of the transport network.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Within the Residential Zone, home occupations should not involve heavy vehicles.

Point Number 742.122

Summary of Decision Requested: Retain Rule 16.1.2 P5 Temporary event as notified.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
- Temporary events are subject to Rule 14.12.1.4 which would ensure that for events exceeding a certain size any effects on the transport network could be addressed.

Point Number 742.123

Summary of Decision Requested: **Add** to Rule 16.1.3 RD1 A multi-unit development that meets all of the following conditions new matters of discretion as follows.

(k) On-site parking and manoeuvring;
(l) Safety and efficiency of the land transport network;
(m) Provision for multi-modal transport.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The potential adverse effects on the transport network from multi-unit developments should be considered.

Point Number 742.124

Summary of Decision Requested: **Retain** Rule 16.1.4 DI Discretionary Activities, as notified.

Decision Reasons:

- The submitter supports Council having full discretion over activities that do not comply with permitted activity standards.

Point Number 742.125

Summary of Decision Requested: **Retain** Rule 16.2.3 PI Glare and artificial lighting as notified.

AND

Retain Rule 16.2.3 RD1 Glare and artificial lighting as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.126

Summary of Decision Requested: **Retain** P1 in Rule 16.2.7.1 as notified;

AND

Retain P2 in Rule 16.2.7.1 as notified;

AND

Retain P3 in Rule 16.2.7.1 as notified;

AND

Retain RD1 in Rule 16.2.7.1 as notified.

Decision Reasons:

- The submitter supports the rules in this section.

Point Number 742.127

Summary of Decision Requested: **Retain** Rule 16.2.7.2 PI Effects on traffic, except for the amendments sought below

AND

Amend Rule 16.2.7.2 PI(v) Effects on traffic as follows:

Contain no more than 40 characters and no more than 6 words, symbols or graphics.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 16.2.7.2 PI but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.128

Summary of Decision Requested: **Retain** Rule 16.2.7.2 DI Effects on traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.129

Summary of Decision Requested: **Amend** Rule 16.3.9.1 PI(a) Building setback - all boundaries, as follows:

A building must be set back a minimum of:
(i) 3 m from the road boundary (excluding state highways);
(ii) 7.5 m from the boundary of a state highway;

AND

Add to Rule 16.3.9.1 P2(a) Building setback - all boundaries a new clause as follows:
(iii) it is not a state highway road boundary.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Rules 16.3.9.1 P1 and P2 do not differentiate between different road types as described in the road hierarchy.

Point Number 742.130

Summary of Decision Requested: **Retain** Rule 16.3.9.1 Building setback- All boundaries, except for the amendments sought below
AND
Amend Rule 16.3.9.1 RD1 matter of discretion (b)(i) Building setbacks- All boundaries as follows:
~~Road Transport~~ network safety and efficiency;
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the matters of discretion under Rule 16.3.9.1 RD 1, particularly (b)(i) and (ii) with minor amendment.

Point Number 742.131

Summary of Decision Requested: **Retain** Rule 16.3.9.2 P1 Building setback- Sensitive land use, except for the amendments sought below
AND
Amend Rule 16.3.9.2 P1(a)(iii) Building setback - Sensitive land use as follows
(iii) ~~25m~~ 35m from the designated boundary of the Waikato Expressway;
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 16.3.9.2 but considers that the proposed setback of 25m from the Waikato Expressway has the potential to result in adverse effects on health and wellbeing and reverse sensitivity effects.
- A setback of 35m (as per the Operative District Plan) will better avoid reverse sensitivity matters consistent with the policy direction in the Proposed District Plan.
- The proposed setbacks will not be sufficient to avoid adverse effects on occupiers on their own and buildings will also require acoustic treatment. Relief sought in this respect assumes submission points regarding acoustic treatment are accepted.

Point Number 742.132

Summary of Decision Requested: **Retain** Rule 16.3.9.2 D1 Building setback sensitive land use as notified.

Decision Reasons:

- The submitter supports Council having full discretion over sensitive land use activities that do not comply with permitted activity standards.

Point Number 742.133

Summary of Decision Requested: **Retain** Rule 16.4.11 RD1 Subdivision Road Frontage as notified.

Decision Reasons:

- The submitter supports a minimum 15m width for lots with road frontages as it will assist in avoiding adverse effects on network safety and efficiency.

Point Number 742.134

Summary of Decision Requested: **Retain** Rule 17.1.2 P17 Permitted Activities - Temporary event as notified.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
- Temporary events are subject to Rule 14.12.1.4 which would ensure that for events exceeding a certain size any effects on the transport network could be addressed.

Point Number 742.135

Summary of Decision Requested: **Retain** Rule 17.1.3 RD1 Restricted Discretionary Activities, except for the amendments sought below
AND

Add to Rule 17.1.3 RD1 Restricted Discretionary Activities new matters of discretion as follows

(x) On-site parking and manoeuvring

(xi) Safety and efficiency of the land transport network.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The potential adverse effects on the transport network from a multi-unit development should be considered.

Point Number 742.136

Summary of Decision Requested: **Retain** Rule 17.2.4 P1 Glare and artificial light spill, as notified;
AND
Retain Rule 17.2.4 RD1 Glare and artificial light spill, as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.137

Summary of Decision Requested: **Retain** Rule 17.2.7.1 P1 Signs general as notified
AND
Retain Rule 17.2.7.1 RD1 Signs general as notified.

Decision Reasons:

- Rule 17.2.7.1 P1 allows the submitter to erect signage as a permitted activity.
- The submitter supports the matters of discretion under RD1, particularly (b)(ii), (b)(iii) and (b)(iv).

Point Number 742.138

Summary of Decision Requested: **Retain** Rule 17.2.7.1 P2 Signs- General, except for the amendments sought below
AND
Amend Rule 17.2.7.1 P2(a)(v) Signs - General as follows:
Where the sign is a freestanding sign, it must:
A. Not exceed an area of 3m² for one sign per site, and 1m² for ~~any other~~ one additional freestanding sign on the site; ~~and~~
B. Be set back at least 5m from the boundary of the Residential Zone; and
C. Be set back at least 1.5m from the boundary of a state highway.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 17.2.7.1 P2, but considers amendments are required to ensure that adverse effects on the transport network are avoided.

Point Number 742.139

Summary of Decision Requested: **Retain** Rule 17.2.7.2 P1 Signs- effects on traffic, except for the amendments sought below
AND
Amend Rule 17.2.7.2 P1 (iv) Signs - effects on traffic, as follows:
Contain no more than 40 characters and no more than 6 words, symbols or graphics
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 17.2.7.2 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.140

Summary of Decision Requested: **Retain** Rule 17.2.7.2 D1 Signs - Effects on traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.141

Summary of Decision Requested: **Add** to Rule 17.3.4 Building setbacks a new rule as follows:
17.3.4.3 Building setbacks - State highways
PI (g) Any building must be setback a minimum of:
(i) 15m from a national route or regional arterial.
(ii) 25m from the designated boundary of the Waikato Expressway.
DI Any building that does not comply with Rule 17.3.4.3 PI.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- There is no rule specifying building setbacks from state highways in the Business Zone.
- The Operative District Plan provided 15m from national/regional arterials and 25m from the Waikato Expressway.

Point Number 742.142
Summary of Decision Requested: **Retain** Rule 17.3.6 PI DI and NCI Dwelling as notified, subject to the amendments sought to Appendix I being accepted (addressed elsewhere in the submission).

Decision Reasons:

- The submitter supports acoustic conditions for dwellings in the Business Zone. However, Appendix I needs to be amended to include sound insulation standards, vibration standards and ventilation requirements for buildings near road/rail to ensure health and wellbeing is protected.

Point Number 742.143
Summary of Decision Requested: **Retain** Rule 17.4.1.6 RDI Subdivision - Road frontage as notified.

Decision Reasons:

- The submitter supports a minimum 15 m width for lots with road frontages as it will assist in avoiding adverse effects on network safety and efficiency.

Point Number 742.144
Summary of Decision Requested: **Amend** Rule 23.4.7 RDI(a) Subdivision - Road frontage as follows:
(a) Every proposed lot as part of the subdivision having a road boundary, other than one designed as an access allotment or utility allotment containing a road access leg, must have a width along the road boundary of at least ~~15m~~ 50m.

Decision Reasons:

- The submitter considers there is no justification as to why the road frontage rule within the Country Living Zone has been changed from 50m (under the Operative Plan) to 15m.
- 50m is appropriate to ensure the safe and efficient operation of the transport network.

Point Number 742.145
Summary of Decision Requested: **Retain** Rule 24.1.1 P3 Home occupation, except for the amendments sought below
AND
Add a new condition to Rule 24.1.1 P3 Permitted activity - Home occupation as follows:
(f) There are no heavy vehicle movements associated with the activity.
AND
Add a new Restricted Discretionary Activity rule for home occupations not complying with 24.1.1 P3(f), with discretion restricted to the effects of heavy vehicle traffic on the safety and efficiency of the transport network.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Within the Village Zone, home occupations should not involve heavy vehicles without assessment of effects.

Point Number 742.146
Summary of Decision Requested: **Retain** Rule 24.1.1 P4 Permitted Activities - Temporary event as notified.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
- Temporary events are subject to Rule 14.12.1.4 which would ensure that for events exceeding a certain size, any effects on the transport network could be addressed.

Point Number 742.147
Summary of Decision Requested: **Retain** Rule 24.2.3 PI Glare and artificial light spill, as notified.
AND

Retain Rule 24.2.3 RD1 Glare and artificial light spill, as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.148

Summary of Decision Requested: **Retain** Rule 24.2.7.1 P1 Signs - General as notified.
AND
Retain Rule 24.2.7.1 P2 Signs - General as notified.
And
Retain Rule 24.2.7.1 RD1 Signs - General as notified.

Decision Reasons:

- The submitter supports Rules 24.2.7.1 P1 and P2 and the matters of discretion under RD1, particularly (b)(iii), (b)(iv) and (b)(v).

Point Number 742.149

Summary of Decision Requested: **Retain** Rule 24.2.7.2 Signs- Effects on Traffic, except for the amendments sought below
AND
Amend Rule 24.2.7.2 P1(v) Signs - Effects on Traffic as follows:
Contain no more than 40 characters and no more than 6 words, symbols or graphics.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 24.2.7.2 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.150

Summary of Decision Requested: **Retain** Rule 24.2.7.2 D1 Signs - Effects on Traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.151

Summary of Decision Requested: **Retain** Rule 24.3.6.1 Building setbacks- All boundaries, except for the amendments sought below
AND
Amend Rules 24.3.6.1 P1 and P2 Building setbacks - All boundaries to require 15m setbacks from all state highways.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Rules 24.3.6.,1 P1 and P2 do not differentiate between different road types as described in the road hierarchy.

Point Number 742.152

Summary of Decision Requested: **Retain** Rule 24.3.6.1 RD1 Building setbacks- All boundaries, except for the amendments sought below
AND
Amend matter of discretion (b)(i) in Rule 24.3.6.1 RD1 Building setbacks - All boundaries as follows:
~~Road~~transport network safety and efficiency;
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the matters of discretion under Rule 24.3.6.1 RD1, particularly (b)(i) and (b) (ii) with minor amendment, although no reasons have been provided.

Point Number 742.153

Summary of Decision Requested: **Retain** Rule 24.3.6.2 P1 Building setbacks - All boundaries as notified (subject to relief sought in other submissions on acoustic treatment).

Decision Reasons:

- The submitter notes the proposed setbacks will not be sufficient to avoid adverse effects on occupiers on their own and buildings will also require acoustic treatment. Relief sought in this respect assumes submission points regarding acoustic treatment are accepted.

Point Number 742.154

Summary of Decision Requested: **Retain** Rule 24.3.6.2 D1 Building setbacks - Sensitive land use as notified.

Decision Reasons:

- The submitter supports Council having full discretion over sensitive land use activities that do not comply with permitted activity standards.
-

Point Number 742.155

Summary of Decision Requested: **Retain** Rule 24.4.9 RD1 Road frontage, except for the amendments sought below

AND

Amend Rule 24.4.9 RD1 Road frontage matter of discretion (b)(i), as follows:

Safety and efficiency of vehicle access and ~~road~~ transport network;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports a 20m minimum width for lots with a road boundary as this will enable safe separation distance between vehicle entrances.
 - Retaining discretion over safety and efficiency of the road network is also supported with minor amendment.
-

Point Number 742.156

Summary of Decision Requested: **Retain** Rule 25.1.2 P4 Temporary events, except for the amendments sought below

AND

Add a new condition to Rule 25.1.2 P4 Permitted Activity - Temporary Event, as follows:

(g) There is a maximum of 100 vehicle movements per day, and no more than 15% of these are heavy vehicle movements.

AND

Add a new Restricted Discretionary Activity rule for temporary activities not complying with 25.1.2 P4(g), with discretion restricted to the effects on the safety and efficiency of the transport network;

OR

Amend Rule 14.12.1.4 Transportation - Permitted Activities, by adding a threshold for traffic generation within the Reserve Zone.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
 - Temporary events in the Reserve Zone are not subject to Rule 14.12.1.4 which would ensure that, for events exceeding a certain size, any effects on the transport network could be addressed. The submitter therefore seeks that either Rule 25.1.2 is amended to provide maximum traffic generation figures or Rule 14.12.1.4 is amended to provide a threshold for traffic generation in the Reserve Zone.
-

Point Number 742.157

Summary of Decision Requested: **Retain** Rule 25.2.3 P1 Glare and artificial light spill, as notified.

AND

Retain Rule 25.2.3 RD1 Glare and artificial light spill, as notified.

Decision Reasons:

- The submitter supports all rules in this section.
-

Point Number 742.158

Summary of Decision Requested: **Retain** Rule 25.2.7.1 P1 Signs - General, as notified.

AND

Retain Rule 25.2.7.1 RD1 Signs - General, as notified.

Decision Reasons:

- The submitter supports Rule 25.2.7.1 P1 as it allows the Transport Agency to erect signage as a permitted activity.
 - The submitter supports the matters of discretion under RD1, particularly (b)(iii), (b)(iv) and (b)(v), although no reasons have been provided.
-

Point Number 742.159

Summary of Decision Requested: **Retain** Rule 25.2.7.1 P2 Signs - General, as notified.

Decision Reasons:

- No reasons provided.

Point Number 742.160

Summary of Decision Requested: **Retain** Rule 25.2.7.2 P1 Signs- Effects on Traffic, except for the amendments sought below
AND
Amend Rule 25.2.7.2 P1 (iv) Signs - Effects on Traffic as follows:
Contain no more than 40 characters and no more than 6 words, symbols or graphics.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 25.2.7.2 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.161

Summary of Decision Requested: **Retain** Rule 25.2.7.2 D1 Signs - Effects on Traffic, as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.162

Summary of Decision Requested: **Retain** Rule 25.3.5.1 P1 Building setbacks - General as notified.

Decision Reasons:

- The submitter considers the proposed building setbacks in Rule 25.3.5.1 P1 are appropriate.

Point Number 742.163

Summary of Decision Requested: **Retain** Rule 25.5.2.1 P1 Signs- Tamahere Village Green, except for the amendments sought below
AND
Add a new clause to Rule 25.5.2.1 P1 (a) Signs - Tamahere Village Green as follows:
(vi) one sign per site.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 25.5.2.1 P1 (a) but seeks further permitted activity standards to ensure that only one sign is permitted on-site so adverse effects on traffic safety are not compromised.

Point Number 742.164

Summary of Decision Requested: **Retain** Rule 25.5.2.1 RD1 Signs as notified.

Decision Reasons:

- The submitter supports Council retaining discretion over matters (b)(ii), (b)(iii), (b)(iv) and (b)(v).

Point Number 742.165

Summary of Decision Requested: **Retain** Rule 26.1.2.1 C1 Controlled Activities – Operational Motor Sport Area – Precinct A as notified.

Decision Reasons:

- The submitter supports Council retaining control over these activities.

Point Number 742.166

Summary of Decision Requested: **Retain** Rule 26.2.4 P1 Landscaping and Screening, as notified;
AND
Retain 26.2.4 P2 Landscaping and Screening, as notified.

Decision Reasons:

- The submitter supports the need for landscaping and planting to ensure that the events are screened from the state highway.

Point Number 742.167

Summary of Decision Requested: **Retain** Rule 26.2.6 P1 Motorsport and Recreation Events – Precincts A and C as notified

AND

Retain Rule 26.2.6 P2 Motorsport and Recreation Events – Precincts A and C as notified

AND

Retain Rule 26.2.6 P3 Motorsport and Recreation Events – Precincts A and C, as notified

AND

Retain Rule 26.2.6 D1 Motorsport and Recreation Events – Precincts A and C as notified.

Decision Reasons:

- The thresholds should ensure there are no adverse effects on the safety and efficiency of the transport network that can not be mitigated.

Point Number

742.168

Summary of Decision Requested:

Retain Rule 26.2.7 C1 Motorsport and Event Traffic Management – All Precincts, as notified;

AND

Retain Rule 26.2.7 C2 Motorsport and Event Traffic Management – All Precincts; as notified;

AND

Retain Rule 26.2.7 C3 Motorsport and Event Traffic Management – All Precincts, as notified.

Decision Reasons:

- The submitter supports:
 - the requirements in regards to a Traffic Management Plan being undertaken and what is to be included in that Plan;
 - the minimum deceleration lengths at off ramps from the state highway and the travel speed percentages; and
 - having a representative from the NZ Transport Agency for the Implementation Monitoring Committee to address traffic safety matters.

Point Number

742.169

Summary of Decision Requested:

Retain Rule 26.2.10 P1 Glare and Artificial Light Spill, as notified.

AND

Retain Rule 26.2.10 RD1 Glare and Artificial Light Spill, as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number

742.170

Summary of Decision Requested:

Retain Rule 26.2.11 P1 Signs general - All precincts, as notified.

AND

Retain Rule 26.2.11 RD1 Signs general - All precincts, as notified.

Decision Reasons:

- The submitter supports Rule 26.2.11 P1 and supports the matters of discretion under RD1, particularly (b)(ii), (b)(iii), (b)(iv) and (b)(v).

Point Number

742.171

Summary of Decision Requested:

Retain Rule 26.2.12 P1 Signs- effects on traffic- All Precincts, except for the amendments sought below

AND

Amend Rule 26.2.12 P1 (v) Signs - effects on traffic - All Precincts as follows:

Contain no more than 40 characters and no more than 6 words, symbols or graphics:

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 26.2.12 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number

742.172

Summary of Decision Requested:

Retain Rule 26.2.12 D1 Signs - effects on traffic - All Precinct as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number

742.173

Summary of Decision Requested: Retain Rule 26.3.5 PI Building setbacks – All precincts as notified;
AND
Retain Rule 26.3.5 DI Building setbacks – All precincts as notified.

Decision Reasons:

- The submitter supports a 25m setback from the Waikato Expressway.

Point Number 742.174

Summary of Decision Requested: Retain Rule 27.2.9 PI Glare and Lighting as notified.
AND
Retain Rule 27.2.9 RDI Glare and Lighting as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.175

Summary of Decision Requested: Retain Rule 27.2.12 P1 Signs as notified.
AND
Retain Rule 27.2.12 P2 Signs as notified
AND
Retain Rule 27.2.12 P4 Signs as notified.
AND
Retain Rule 27.2.12 RDI Signs as notified.

Decision Reasons:

- The submitter supports the proposed sign rules as the conditions ensure there will be no adverse effects on the transport network.

Point Number 742.176

Summary of Decision Requested: Retain Rule 27.2.13 P1 Signs- effects on traffic, except for the amendments sought below
AND
Amend Rule 27.2.13 P1(a)(iv) Signs - effects on traffic as follows:
Contain ~~maximum~~ no more than 40 characters and ~~a maximum~~ no more than 6 words, symbols or graphics;
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 27.2.13 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.177

Summary of Decision Requested: Retain Rule 27.2.13 RDI Signs- effects on traffic, except for the amendments sought below
AND
Amend Rule 27.2.13 RDI(b)(ii) Signs - effects on traffic as follows:
Effects on the safe and efficient operation of the ~~road~~land transport network;
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Council retaining discretion over effects on safety and efficiency with minor amendment.

Point Number 742.178

Summary of Decision Requested: Retain Rule 27.2.14 P1 Temporary Events as notified.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
- Temporary events are subject to Rule 14.12.1.4 which would ensure that for events exceeding a certain size, any effects on the transport network could be addressed.

Point Number 742.179

Summary of Decision Requested: **Retain** Rule 27.2.14 RD1 Temporary Events, except for the amendments sought below
AND
Amend Rule 27.2.14 RD1(b)(iv) Temporary Events as follows:
~~Traffic and road safety effects~~ Effects on the safe and efficient operation of the land transport network.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Council retaining discretion on traffic and road safety effects but seeks minor amendment for consistency.

Point Number 742.180

Summary of Decision Requested: **Retain** Rule 27.3.7 P1 Building setback from a state highway as notified.

Decision Reasons:

- The submitter supports a 15m setback as it will avoid adverse effects on the state highway.

Point Number 742.181

Summary of Decision Requested: **Retain** Rule 27.4.5 RD1 Road access as notified.

AND

Retain Rule 27.4.5 D1 Road access as notified.

Decision Reasons:

- The submitter supports Rules 27.4.5 RD1 and D1 and the requirement to be in general accordance with Appendix 9 (Te Kowhai Airfield precinct zoning).

Point Number 742.182

Summary of Decision Requested: **Retain** Appendix 1 Acoustic Insulation, except for the amendments sought below

AND

Amend Appendix 1 Acoustic Insulation as follows:

1. Application

(a) This appendix is referred to in the rules related to:

...

(ii) buildings for sensitive land use within 100 m of a state highway or rail corridor.

AND

Add to Appendix 1 Acoustic Insulation, to include standards a new Section 7 for sensitive land use near state highways and rail corridors.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Appendix 1 needs to be amended to include sound insulation standards, vibration standards and ventilation requirements for buildings near road/rail to ensure that health and wellbeing are protected.

Point Number 742.183

Summary of Decision Requested: **Retain** Section E Designations J New Zealand Transport Agency, in respect to the designations and purpose of designation.

AND

Amend the order and numbering of the listed Section E designations for the New Zealand Transport Agency so that they generally coincide with locations that run north to south. Refer to Attachment 4 to the submission for further detail.

Decision Reasons:

- The purposes of the Transport Agency designations are supported in full.
- There is no apparent logic behind the ordering and numbering of the Transport Agency's designations. This increases the difficulty in finding relevant designations within the designations schedule. Reordering and renumbering the designations will simplify finding designations from an administrative and user point of view.

Point Number 742.184

Summary of Decision Requested: **Amend** the mapped location of Notable Tree #146 currently shown on State Highway 23 and map this tree in its correct location.

OR

Add to Rule 22.2.5.1 RD 1 (b) a new matter of discretion as follows:

(iv) safety and efficiency of the transport network.

AND

Add to Rule 22.2.5.2 RD 1 (B) Notable Tree - removal or destruction a new matter of discretion as follows:

(iv) safety and efficiency of the transport network.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Notable Tree #146 is shown to be located on State Highway 23 in the planning maps, and the submitter considers this may be incorrect.
- If this tree is located within the New Zealand Transport Agency's designation the submitter requests amendments to Rules 22.2.5.1 and 22.5.2.

Point Number 742.185

Summary of Decision Requested: **Retain** the Significant Natural Area overlay, except for the amendments sought below

AND

Amend the Significant Natural Area (SNA) overlay by reviewing and removing any such areas from existing New Zealand Transport Agency designations.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The objective of Significant Natural Areas (SNAs) is to protect and enhance indigenous biodiversity.
- Land transport designation corridors are generally highly modified areas and do not meet the identity and management hierarchy requirements (Policy 3.2.2 and Policy 3.2.3).
- Placing an SNA overlay over existing land transport corridors does not reflect the designated use and purpose of the corridor or recognise the highly modified nature of these environments.

Point Number 742.186

Summary of Decision Requested: **Retain** the Outstanding Natural Feature overlay, except for the amendments sought below

AND

Amend the Outstanding Natural Features overlay by reviewing and removing any such areas from existing New Zealand Transport Agency designations.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The objective of identifying Outstanding Natural Features and landscapes is to ensure that these landscapes and their attributes are recognised and protected from inappropriate subdivision, use and development. The submitter supports this objective however, this also needs to recognise the functional need for infrastructure to be located within these areas and land transport designated corridors are generally highly modified areas.

Point Number 742.187

Summary of Decision Requested: **Retain** the Outstanding Natural Landscapes overlay, except for the amendments sought below

AND

Amend the Outstanding Natural Landscapes overlay by reviewing and removing any such areas from existing New Zealand Transport Agency designations.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The objective of identifying Outstanding Natural Features and landscapes is to ensure that these landscapes and their attributes are recognised and protected from inappropriate subdivision, use and development. The submitter supports this objective however, this also needs to recognise the functional need for infrastructure to be located within these areas and land transport designated corridors are generally highly modified areas.

Point Number 742.188

Summary of Decision Requested: **Retain** the Outstanding Natural Character overlay, except for the amendments sought below

AND

Amend the Outstanding Natural Character overlay by reviewing and removing any such areas from existing New Zealand Transport Agency designations.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The objective of identifying Outstanding Natural Character is to protect the natural character of the coastal environment and waterways from inappropriate subdivision, use and development.
- The submitter supports this objective however, this also needs to recognise the functional need for infrastructure to be located within these areas and land transport designated corridors are generally highly modified areas.

Point Number	742.189
Summary of Decision Requested:	<p>Retain Hamilton Basin Ecological Management Area, except for the amendments sought below</p> <p>AND</p> <p>Clarify the purpose of the Hamilton Basin Ecological Management Area in District Plan provisions</p> <p>AND</p> <p>Delete the Hamilton Basin Ecological Management Area overlay from existing New Zealand Transport Agency designations.</p> <p>AND</p> <p>Request any consequential changes necessary to give effect to the relief sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • There are no objectives, policies or rules that specifically relate to the Hamilton Basin Ecological Management Area. The submitter understands this overlay relates to Policy 3.2.8 Incentivise subdivision and Rule 22.4.1.6 Conservation lot subdivision. • It is not relevant or appropriate to show this overlay on land designated for land transport purposes.
Point Number	742.190
Summary of Decision Requested:	<p>Amend the planning maps to show the correct boundaries of all New Zealand Transport Agency designations.</p> <p>AND</p> <p>Amend the planning maps to re-label the New Zealand Transport Agency's designations as per the details in Attachment 4 of the submission.</p> <p>AND</p> <p>Request any consequential changes necessary to give effect to the relief sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The Resource Management Act provides for requiring authorities to modify its existing designations for Council to include in its Proposed District Plan (Schedule 1 clause 4). • The submitter and Council agreed on a number of minor amendments to correct the footprint of state highway designations. While most of these designations are shown correctly on the maps, there are a number of errors that require amendment. Refer to submission for full details.
Point Number	742.191
Summary of Decision Requested:	Retain Rule 16.3.9.2 D1 Building setback- Sensitive land use as notified.
Decision Reasons:	
Point Number	742.192
Summary of Decision Requested:	Retain Rule 18.1.2 P10 Permitted Activity - temporary event as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports no direct access from a national route or regional arterial road. • Temporary events are subject to Rule 14.12.1.4 which would ensure that, for events exceeding a certain size, any effects on the transport network could be addressed.
Point Number	742.193
Summary of Decision Requested:	<p>Retain Rule 18.1.3 RD1 Restricted Discretionary Activities, except for the amendments sought below</p> <p>AND</p> <p>Add to Rule 18.1.3 Restricted Discretionary Activities new matters of discretion, as follows:</p> <p><i>(k) On-site parking and manoeuvring;</i></p> <p><i>(l) Safety and efficiency of the land transport network.</i></p> <p>AND</p> <p>Request any consequential changes necessary to give effect to the relief sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The potential adverse effects on the transport network from a multi-unit development should be considered.
Point Number	742.194
Summary of Decision Requested:	<p>Retain Rule 18.2.3 P1 Glare and artificial light spill, as notified;</p> <p>AND</p> <p>Retain Rule 18.2.3 RD1 Glare and artificial light spill, as notified.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports all rules in this section.

Point Number 742.195

Summary of Decision Requested: **Retain** Rule 18.2.7.1 P1 Signs - General as notified
AND
Retain Rule 18.2.7.1 RD1 Signs - General, as notified.

Decision Reasons:

- Rule 18.2.7.1 P1 allows the Transport Agency to erect signage as a permitted activity.
- The submitter supports the matters of discretion under RD1, particularly (b)(iv), (v) and (vi).

Point Number 742.196

Summary of Decision Requested: **Retain** Rule 18.2.7.1 P2 Signs- General, except for the amendments sought below
AND
Amend Rule 18.2.7.1 P2(a)(v) Signs - General as follows:
Where the sign is a freestanding sign, it must:
*A. Not exceed an area of 3m² for one sign per site, and 1m² for ~~any other~~ one additional freestanding sign on the site; ~~and~~
B. Be set back at least 5m from the boundary of the Residential Zone; and
*C. Be set back at least 1.5m from the boundary of a state highway;**

AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 18.2.7.1 P2(a) but seeks an additional permitted activity standard to ensure that adverse effects on the transport network are avoided.

Point Number 742.197

Summary of Decision Requested: **Retain** Rule 18.2.7.2 P1 Signs- Effects on traffic, except for the amendments sought below
AND
Amend Rule 18.2.7.2 P1 (a) Signs- Effects on traffic as follows:
(a) Any sign directed at road users must:
...
(iii) Not obstruct sight lines of drivers turning in or out of a site entrance and intersections
(iv) Contain no more than 40 characters and no more than 6 words, symbols or graphics;
AND
Consequently **renumber** the two clauses that follow.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 18.2.7.2 P1 but seeks an additional permitted activity standard to ensure that adverse effects on the transport network are avoided.

Point Number 742.198

Summary of Decision Requested: **Retain** Rule 18.2.7.2 D1 Signs - Effects on traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.199

Summary of Decision Requested: **Add** a new building setback rule as follows:
18.3.7A Building setbacks - State highways
P1 (g) Any building must be setback a minimum of:
(i) 1.5m from a national route or regional arterial;
(ii) 2.5m from the designated boundary of the Waikato Expressway.
D1 Any building that does not comply with Rule 18.3.7A P1
AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- There is no rule specifying building setbacks from state highways in the Business Town Centre Zone.
- The Operative District Plan provides 1.5m from national/regional arterials and 2.5m from the Waikato Expressway.

Point Number 742.200

Summary of Decision Requested: Retain Rule 18.3.8 P1, D1 and NCI Dwelling, as notified subject to the amendments sought to Appendix 1 being accepted (addressed elsewhere in the submission).

Decision Reasons:

- The submitter supports acoustic conditions for dwellings in the Business Town Centre Zone.
- However, Appendix 1 needs to be amended to include sound insulation standards, vibration standards and ventilation requirements for buildings near road/rail to ensure health and wellbeing are protected.

Point Number 742.201

Summary of Decision Requested: Retain Rule 20.2.4 P1 as notified.
AND
Retain Rule 20.4.2 RD1 as notified.

Decision Reasons:

- No reasons provided.

Point Number 742.202

Summary of Decision Requested: Retain Rule 20.2.7.1 P1 Signs - General as notified.
AND
Retain Rule 20.2.7.1 RD1 Signs - General as notified.

Decision Reasons:

- The submitter supports Rule 20.2.7.1 P1 as it allows the Transport Agency to erect signage as a permitted activity;
- The submitter supports the matters of discretion under Rule 20.2.7.1 RD1, particularly (b)(iii), b(iv) and b(v).

Point Number 742.203

Summary of Decision Requested: Retain Rule 20.2.7.1 Signs- General, except for the amendments sought below
AND
Amend Rule 20.2.7.1 P2(c) Signs - General, as follows:
Where the sign is a freestanding sign, it must:
(i) Not exceed an area of 3m² for one sign per site, and 1m² for ~~any other one additional~~ freestanding sign on the site; and
.....
(iii) Be set back at least 1.5m from the boundary of a state highway.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 20.2.7.1 P2, but seeks further permitted activity standards to ensure that adverse effects on the transport network are avoided.

Point Number 742.204

Summary of Decision Requested: Retain Rule 20.2.7.2 P1 Signs- Effects on traffic, except for the amendments sought below
AND
Amend Rule 20.2.7.2 P1 (iv) Signs - Effects on traffic as follows:
Contain no more than 40 characters and no more than 6 words, symbols or graphics;
AND
Consequently **amend** other provisions as necessary to satisfy the relief sought.
AND
Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 20.2.7.2 P1 but seeks an amendment to limit the maximum number of words permitted.
- This will ensure the signage erected does not cause unnecessary visual clutter, and that signs do not affect the efficient, safe and effective functioning of the transport network.

Point Number 742.205

Summary of Decision Requested: Retain Rule 20.2.7.2 D1 Signs - Effects on traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number	742.206
Summary of Decision Requested:	Retain Rule 20.3.4.1 Building setbacks as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports Rule 20.3.4.1 P1.
Point Number	742.207
Summary of Decision Requested:	<p>Retain Rule 20.3.4.1 RD1 Building setbacks, except for the amendments sought below</p> <p>AND</p> <p>Amend Rule 20.3.4.1 RD1(b)(ii) Building setbacks as follows: Traffic and road safety <i>transport network safety and efficiency.</i></p> <p>AND</p> <p>Amend Rule 20.3.4.1 RD1(b) Building setback, to correct numbering errors.</p> <p>AND</p> <p>Request any consequential changes necessary to give effect to the relief sought in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the Council retaining discretion under Rule 20.3.4.1 RD1 over road safety with minor amendment. It is further noted that there are numbering errors in the Rule which should be corrected.
Point Number	742.208
Summary of Decision Requested:	Retain Rule 20.4.3 RD1 Subdivision - Road frontage as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports a minimum 15m width for lots with road frontages as it will avoid adverse effects on network safety and efficiency.
Point Number	742.209
Summary of Decision Requested:	<p>Retain Rule 20.5.7 P2 Signs - General as, notified.</p> <p>AND</p> <p>Retain Rule 20.5.7 RD1 Signs - General, as notified.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the permitted signage activity standards in Rule 20.5.7 P2 as they will ensure there are no adverse effects on State Highway 23. The submitter supports RD1 as Council will retain discretion regarding traffic safety.
Point Number	742.210
Summary of Decision Requested:	<p>Retain Rule 20.5.8 P1 Outdoor storage of goods or materials, as notified.</p> <p>AND</p> <p>Retain Rule 20.5.8 RD1 Outdoor storage of goods or materials, as notified.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports screening of outdoor storage of goods or materials from State Highway 23 to ensure that there are no adverse effects on the safety and efficiency of State Highway 23. The submitter supports RD1 as Council will retain discretion regarding traffic safety.
Point Number	742.211
Summary of Decision Requested:	<p>Retain Rule 20.5.5 P1 Landscape planting as notified</p> <p>AND</p> <p>Retain Rule 20.5.5 RD1 Landscape planting as notified.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports Rule 20.5.5 P1 as it will provide adequate screening from State Highway 23. The submitter supports RD1 as Council will retain discretion regarding traffic safety.
Point Number	742.212
Summary of Decision Requested:	<p>Retain Rule 20.5.13 P1 Building setbacks, as notified;</p> <p>AND</p> <p>Retain Rule 20.5.13 RD1 Building setbacks as notified.</p>
Decision Reasons:	

- The submitter supports all rules in this section.

Point Number 742.213

Summary of Decision Requested: Retain Rule 20.5.14 P1 as notified.

Decision Reasons:

- The submitter supports the proposed acoustic conditions in Rule 20.5.14 P1 as it is considered that this will protect health and wellbeing and avoid reverse sensitivity effects.

Point Number 742.214

Summary of Decision Requested: Retain Rule 21.2.4 P1 Glare and Artificial Light Spill, as notified;
AND
Retain Rule 21.2.4 RD1 Glare and Artificial Light Spill, as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.215

Summary of Decision Requested: Retain Rule 21.2.7.1 P1 Signs - General as notified
AND
Retain Rule RD1 Signs - General as notified.

Decision Reasons:

- The submitter supports Rule 21.2.7.1 P1 as it allows the Transport Agency to erect signage as a permitted activity.
- The submitter supports the matters of discretion under RD1, particularly (b)(iii), (iv) and (v).

Point Number 742.216

Summary of Decision Requested: Retain Rule 21.2.7.1 P2 Signs- General, except for the amendments sought below
AND

Amend Rule 21.2.7.1 P2(a)(iv) Signs - General, as follows:

Where the sign is a free standing sign, it must:

A. Not exceed an area of 3m² for one sign per site, and 1m² for ~~any other~~ one additional free standing sign on the site; ~~and~~

B. Be set back at least 5m from the boundary of the Residential Zone; and

C. Be set back at least 15m from the boundary of a state highway.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 21.2.7.1 P2 but considers amendments are required to ensure that adverse effects on the transport network are avoided.

Point Number 742.217

Summary of Decision Requested: Retain Rule 21.2.7.2 P2 Signs- effects on traffic, except for the amendments sought below
AND

Amend Rule 21.2.7.2 P1 (a) (iv) Signs - effects on traffic as follows:

Contain no more than 40 characters and no more than 6 words, symbols or graphics.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 21.2.7.2 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.218

Summary of Decision Requested: Retain Rule 21.2.7.2 D1 Signs - effects on traffic, as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.219

Summary of Decision Requested: Retain Rule 21.3.4.1 P1 Building setbacks- all boundaries, except for the amendments sought below

AND

Amend Rule 21.3.4.1 P1 (a) Building setbacks - all boundaries as follows:

(i) *5m from a road boundary, excluding a state highway;*

(ii) *20m from a state highway, and ...*

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The proposed setbacks are significantly less than what is permitted under the Operative District Plan.
- Given the maximum height of buildings allowed in this zone, the submitter seeks a significantly bigger setback from state highways.

Point Number 742.220

Summary of Decision Requested: **Retain** Rule 21.3.4.1 RD1 (b)(iii) Building setbacks all boundaries as notified.

Decision Reasons:

- The submitter supports Council retaining discretion regarding traffic and road safety.

Point Number 742.221

Summary of Decision Requested: **Retain** Rule 21.4.3 RD1 Subdivision - Road frontage as notified.

Decision Reasons:

- The submitter supports a minimum 15m width for lots with road frontages as it will avoid adverse effects on network safety and efficiency.

Point Number 742.222

Summary of Decision Requested: **Retain** Rule 22.1.2 P2 Permitted Activities as notified.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
- Temporary events are subject to Rule 14.12.1.4 which would ensure that, for events exceeding a certain size any, effects on the transport network could be addressed.

Point Number 742.223

Summary of Decision Requested: **Retain** Rule 22.2.2 P1 Glare and Artificial Light Spill as notified.

AND

Retain Rule 22.2.2 RD1 Glare and Artificial Light Spill as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.224

Summary of Decision Requested: **Retain** Rule 22.2.6.1 P1 Signs - General as notified.

AND

Retain Rule 22.2.6.1 P2 Signs - General as notified.

AND

Retain Rule 22.2.6.1 RD1 Signs - General as notified.

Decision Reasons:

- The submitter supports Rules 22.2.6.1 P1 and P2 and the matters of discretion under RD1, particularly (b)(iii), (iv) and (v).

Point Number 742.225

Summary of Decision Requested: **Retain** Rule 22.2.6.2 Signs- effects on traffic, except for the amendments sought below

AND

Amend Rule 22.2.6.2 P1 (iv) Signs - effects on traffic as follows:

Contain no more than 40 characters and no more than 6 words, symbols or graphics;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 22.2.6.2 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.226

Summary of Decision Requested: Retain Rule 22.2.6.2 D1 Signs - effects on traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.227

Summary of Decision Requested: Amend Rule 22.3.7.1 PI-P4 Building setbacks - All boundaries to require 35m setbacks from the Waikato expressway designation boundary and 15m setbacks from all other state highways.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Rules 22.3.7.1 PI- P4 Building setbacks - All boundaries do not differentiate between different road types as described in the road hierarchy.

Point Number 742.228

Summary of Decision Requested: Retain Rule 22.3.7.1 RD1 Building Setbacks- All boundaries, except for the amendments sought below

AND

Amend Rule 22.3.7.1 RD1 matter of discretion (b)(ii) Building Setbacks - All boundaries as follows:

~~effects on traffic~~ transport network safety and efficiency;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports matter of discretion (b)(ii) under Rule 22.3.7.1 RD1.

Point Number 742.229

Summary of Decision Requested: Retain Rule 22.3.7.2 PI Building setback sensitive land use, except for the amendments sought below

AND

Amend Rule 22.3.7.2 PI (a)(ii) Building setbacks sensitive land use as follows:

~~+5m~~ 25m from a national route or regional arterial road;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 22.3.7.2 but considers that the proposed setback of 25m from the Waikato Expressway has the potential to result in adverse effects on health and wellbeing and reverse sensitivity effects.
- A setback of 35m from the Waikato Expressway (as per the Operative District Plan) will better avoid reverse sensitivity matters consistent with the policy direction in the Proposed District Plan.
- The submitter notes the proposed setbacks will not be sufficient to avoid adverse effects on occupiers on their own and buildings will also require acoustic treatment. Relief sought in this respect assumes submission points regarding acoustic treatment are accepted.

Point Number 742.230

Summary of Decision Requested: Retain Rule 22.3.7.4 Building- Noise Sensitive Activities, except for the amendments sought below

AND

Add to Rule 22.3.7.4 PI (a) Building - Noise sensitive activities a new clause as follows:

(iv) 100m of a state highway.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports Rule 22.3.7.4, but seeks an additional standard to include a 100m set back from a state highway.
- The submitter notes the proposed setbacks will not be sufficient to avoid adverse effects on occupiers, and buildings will also require acoustic treatment. Relief sought in this respect assumes submission points regarding acoustic treatment are accepted.

Point Number 742.231

Summary of Decision Requested: Retain Rule 22.4.4 RD1 Subdivision - Road frontage, except for the amendments sought below

AND

Amend matter of discretion (b)(i) in Rule 22.4.4 RD1 Subdivision - Road frontage as follows:

Safety and efficiency of vehicle access and ~~road~~ land transport network;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports a 60m width minimum for lots with a road boundary as this will enable safe separation distance between vehicle entrances.
- Retaining discretion over safety and efficiency of the road network is also supported with minor amendment.

Point Number 742.232

Summary of Decision Requested: **Retain** Rule 23.1.1 P3 Permitted Activity - Temporary event as notified.

Decision Reasons:

- The submitter supports no direct access from a national route or regional arterial road.
- Temporary events are subject to Rule 14.12.1.4 which would ensure that for events exceeding a certain size, any effects on the transport network could be addressed.

Point Number 742.233

Summary of Decision Requested: **Retain** Rule 23.1.1 P4 Home occupation, except for the amendments sought below

AND

Add a new condition to Rule 23.1.1 P4 Permitted Activity - Home occupation as follows:

f) There are no heavy vehicle movements associated with the activity.

AND

Add a new Restricted Discretionary rule for home occupations not complying with 23.1.1 P4(f), with discretion restricted to the effects of heavy vehicle traffic on the safety and efficiency of the transport network.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Within the Country Living Zone, home occupations should not involve heavy vehicles without an assessment of effects.

Point Number 742.234

Summary of Decision Requested: **Retain** Rule 23.2.2 P1 Glare and Artificial Light Spill as notified.

AND

Retain Rule 23.2.2 RD1 Glare and Artificial Light Spill as notified.

Decision Reasons:

- The submitter supports all rules in this section.

Point Number 742.235

Summary of Decision Requested: **Retain** Rule 23.2.6.1 P1 Signs - General as notified.

AND

Retain Rule 23.2.6.1 P2 Signs - General as notified.

AND

Retain Rule 23.2.6.1 RD1 Signs - General as notified.

Decision Reasons:

- The submitter supports Rules 23.2.6.1 P1 and P2 and the matters of discretion under RD1, particularly (b)(iii), (b) (iv) and (b)(v).

Point Number 742.236

Summary of Decision Requested: **Retain** Rule 23.2.6.2 P1 Signs- effects on traffic, except for the amendments sought below

AND

Amend Rule 23.2.6.2 P1(v) Signs - effects on traffic as follows

Contain no more than 40 characters and no more than 6 words, symbols or graphics.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of Rule 23.2.6.2 P1 but seeks amendment to provide clarification on the maximum amount of words permitted. This will ensure that signage erected does not cause unnecessary visual clutter or affect the efficient, safe and effective functioning of the transport network.

Point Number 742.237

Summary of Decision Requested: Retain Rule 23.2.6.2 D1 Signs - effects on traffic as notified.

Decision Reasons:

- The submitter supports Council having full discretion over signs that do not comply with permitted activity standards.

Point Number 742.238

Summary of Decision Requested: Amend Rules 23.3.7.1 P1 and P2 Building Setbacks - All boundaries to require 35m setbacks from the Waikato Expressway designation boundary, and 15m setbacks from all other state highways.

Decision Reasons:

- Rules 23.3.7.1 P1 and P2 do not differentiate between different road types as described in the road hierarchy.

Point Number 742.239

Summary of Decision Requested: Retain Rule 22.3.7.1 Building Setbacks- All boundaries, except for the amendments sought below
AND

Amend matter of discretion (b)(ii) in Rule 22.3.7.1 RD1 Building Setbacks - All boundaries, as follows:

~~Effects on traffic~~ Transport network safety and efficiency;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports matter of discretion (b)(ii) under Rule 23.3.7.1 RD1.

Point Number 742.240

Summary of Decision Requested: Retain Rule 23.3.7.2 P1 Building setback - sensitive land use as notified (subject to relief sought in other submissions on acoustic treatment).

Decision Reasons:

- The proposed setbacks will not be sufficient to avoid adverse effects on occupiers on their own and buildings will also require acoustic treatment.
- Relief sought in this respect assumes submission points regarding acoustic treatment are accepted.

Point Number 742.241

Summary of Decision Requested: Retain Rule 23.3.7.2 D1 Building setback - sensitive land use, as notified.

Decision Reasons:

- The submitter supports Council having full discretion over sensitive land use activities that do not comply with permitted activity standards.

Point Number 742.242

Summary of Decision Requested: Retain Rule 14.12.1.6(1) P6 New public roads, except for the amendments sought below

AND

Amend Rule 14.12.1.6(1) P6 New public roads as follows (subject to relief sought on Rule 14.3.1.3):

(c)(i) Any national routes or regional arterial roads ~~will~~ shall be subject to Rule 14.12.2 (RD6) ...

(d)(i) Comply with the ~~The~~ minimum widths specified in Figure 14.12.5.17;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- Minor grammatical corrections are required.
- This rule also requires compliance with Rule 14.3.1.3 which the submitter has sought changes to elsewhere in this submission.

Point Number 742.243

Summary of Decision Requested: Retain Rule 14.12.1.8(a) P8 Off road pedestrian and cycle facilities, except for the amendments sought below

AND

Amend Rule 14.12.1.8(a) P8 Off road pedestrian and cycle facilities, as follows (subject to relief sought on Rule 14.3.1.3):

Off-road pedestrian and ~~and~~ cycling facilities that comply with all of the following conditions:...

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter supports the intent of this rule but suggest it should provide flexibility regarding pedestrian, cycle and shared facilities.
- Note this rule also requires compliance with Rule 14.3.1.3 which the submitter has sought amendments to.

Point Number 742.244

Summary of Decision Requested: **Add** new rules to Rule 14.12.1 Permitted Activities concerning sensitive activities, as per Attachment 3 to the submission.

AND

Add new rules to 14.12.2 Restricted Discretionary Activities concerning sensitive activities, as per Attachment 3 to the submission.

OR

Add new rules to each zone adjacent to a state highway or rail corridor.

Refer to submission for full details.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter seeks provisions be inserted requiring all new buildings, or alterations to existing buildings containing a noise sensitive activity to be appropriately mitigated in relation to road and rail noise and vibration. The Proposed District Plan defines 'reverse sensitivity' and acknowledges it with some supportive policies and objectives which are supported by the submitter. The Plan protects some activities sensitive to noise but not the effects from operational railway and road noise and vibration within in the District.
- The submitter seeks to introduce new rules, which has been developed collaboratively with Kiwirail, in various chapters of the Plan. This will ensure potential adverse effects (including conflicts between activities and reverse sensitivity effects) are mitigated. Rules could either be inserted as district-wide rules (applying to all zones) or alternatively within each of the zones where state highways and/or rail networks are located.
- The rail network is a 24 hours a day, 7 days a week operation, and the frequency, length and weight of trains can change without community consultation. The road network is similarly operating 24 hours a day, 7 days a week with variability in traffic. Noise and vibration effects can interrupt amenity and enjoyment, as well as ability to sleep which can have significant impacts on people's health and wellbeing. Appropriate mitigation is critical to ensure that undue restrictions are not placed on the operation of these transport networks and the health and wellbeing of those residing or otherwise occupying nearby sites is protected.
- Part 2 of the Act supports the efficient use and development of the road and rail network while also enabling people and communities to provide for their well-being and their health and safety. An appropriate balance needs to be achieved between ensuring the transport network is efficiently utilised and adjacent development can be facilitated, without compromising safety of people and communities.
- The proposed new rules provide for new or altered buildings within 100 m of the railway boundary, which can achieve the required internal noise standard, to be permitted activities. Where windows need to be closed to achieve the desired internal noise levels then ventilation performance is prescribed. Where a new or altered building is 50m away from the railway corridor boundary and there is a line of sight i.e. a cut or a physical barrier removing line of sight to 3.8m high, this can also be assessed as a permitted activity.
- Enhancements to buildings are best achieved at the time of construction. The further removed from the road or rail corridor a building is, the less additional mitigation may be required. The noise level proposed is in accordance with World Health Organisation standards.
- The mitigation for adverse effects on human health proposed through these provisions reflects that in some circumstances, e.g. smaller residential sites near the transport corridor, requiring a greater setback from the transport corridor boundary as a means of addressing noise and vibration effects may not always be practicable. The rules seek to ensure that building development options can still maximise the use of a site, while at the same time having standards for mitigating noise and vibration effects arising from the transport corridor.

Point Number 742.245

Summary of Decision Requested: **Retain** Rule 14.12.2 RD1 Vehicle Access, except for the amendments sought below

AND

Amend Rule 14.12.2 RD1 Vehicle Access matters of discretion as follows:

(c) Safety for ~~vehicles and pedestrians~~ all users of the access and/or intersecting road including but not limited to vehicle occupants or riders and pedestrians;

...

(e) Mitigation to address safety and/or efficiency.

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- The submitter considers some minor changes are required to the matters of discretion.
- For example, it is not the safety of the vehicles that is of concern from a road safety perspective, but the safety of the vehicle occupants or riders.

Point Number 742.246

Summary of Decision Requested: **Retain** Rule 14.12.2 RD2 Onsite parking and loading matter of discretion, except for the amendments sought below

AND

Amend Rule 14.12.2 RD2 Onsite parking and loading matter of discretion (d) as follows:

Safety for ~~vehicles and pedestrians~~ all users of the access and/or intersecting road including but not limited to vehicle occupants vehicle riders and pedestrians;

AND

Request any consequential changes necessary to give effect to the relief sought in the submission.

Decision Reasons:

- It is not the safety of the vehicles that is of concern from a road safety perspective, but the safety of the vehicle occupants or riders.

Submitter Number: 743 **Submitter:** The Village Church Trust

Point Number 743.1

Summary of Decision Requested: **Amend** the Urban Expansion Policy Area overlay to include the properties on the southern side of Martin Lane, bounded by the Waikato Expressway to the south and Resolution Drive / Horsham Downs Link Road to the east (Lots 1 and 2 DP 504278, Lot 1 DPS76724, Allotment 479 Kirikiriroa Parish, Lots 1 and 2 DPS 3136, Part Allotment 23 Kirikiriroa Parish, Allotment 248 Komakorau Parish, Section 4 and Section 5 SO 500297) (see map attached to submission);

AND

Amend the Proposed District Plan as may be necessary to address the matters raised in the submission.

Decision Reasons:

- The Village Church in Horsham Downs is located approximately 1.9km north of the Hamilton City boundary. The Church Trust own two contiguous titles with frontage to Martin lane with the combined site having an area of approximately 8,770m². The church site is zoned 'Rural' in both the Operative and the Proposed Waikato District Plans.
- The existing Village Church is a single storey structure dating from 1953 with a footprint of approximately 460m². It is bounded to the west by the Community Hall (owned by Waikato District Council) and Horsham Downs School, and to the east by Resolution Drive (Horsham Downs link Road). The southern boundary of the church abuts an approximate 8 hectare parcel of rural land that has become topographically isolated due to construction of the Waikato Expressway and Resolution Drive.
- The Village Church reached capacity approximately 20 years ago and has had to resort to leasing the adjacent Community Hall on an as-needs basis. The congregation has continued to grow to the point where facilities are once again at capacity. Church elders have determined that a replacement church complex is necessary to meet their growing needs.
- The Horsham Downs community hub has effectively become an 'island' constrained by roading on four sides. The island contains approximately 8 hectares of residual pasture which is now topographically isolated from the farmland it once joined. Despite its underlying Rural zoning, the size of the residual farmland is too small to be an economic farming unit, and surrounding roads prevent the land from being practically amalgamated with nearby farmland.
- The UEA on Hamilton City's northernmost boundary should be extended northwards to include the Horsham Downs community hub. The hub already contains three high-use community assets which are more commonly associated with urbanised areas. The community hub lends itself to inclusion within the UEA because it has suitable physical constraints (Waikato Expressway, Resolution Drive and Osborne Road / Martin Lane) to prevent longer term urban sprawl. Those physical constraints are an appropriate demarcation between future urban and rural areas.
- Extension of the UAE to include the Horsham Down community hub would enable landowners who have been constrained and affected by the roading projects to better provide for their longer term social, economic and cultural wellbeing and to meet the reasonably foreseeable needs of future generations.
- The transfer of the HTI expansion area to Hamilton City is unlikely to take place in the immediate horizon. Once the boundary is extended, it will facilitate the long-term essential servicing of Horsham Downs in a more efficient and cost-effective manner than can be done at present.

Point Number

743.2

Summary of Decision Requested:

Amend the zoning of the properties on the southern side of Martin Lane, bounded by the Waikato Expressway to the south and Resolution Drive / Horsham Downs Link Road to the east (Lots 1 and 2 DP 504278, Lot 1 DPS76724, Allotment 479 Kirikiriroa Parish, Lots 1 and 2 DPS 3136, Part Allotment 23 Kirikiriroa Parish, Allotment 248 Komakorau Parish, Section 4 and Section 5 SO 500297) from Rural Zone to Village zone (or suitable equivalent zone) (see map attached to submission);

OR

Amend Rule 22.1.2 Permitted activities to enable 'community activity' as a permitted activity on Lots 1 and 2 DP 504278, Lot 1 DPS76724, Allotment 479 Kirikiriroa Parish, Lots 1 and 2 DPS 3136, Part Allotment 23 Kirikiriroa Parish, Allotment 248 Komakorau Parish, Section 4 and Section 5 SO 500297.

AND

Amend the Proposed District Plan as may be necessary to address the matters raised in the submission.

Decision Reasons:

- Horsham Downs School, the Community Hall and the Village Church are contiguous community facilities which collectively form a village 'hub'. The southern boundary of the hub abuts an approximate 8 hectare parcel of land that has become topographically isolated due to construction of the Waikato Expressway and Resolution Drive / Horsham Downs Link Road.
- The Village Church Trust opposes the Rural zoning of this land because it does not accurately reflect the extent of environmental change which has already taken place in that locality.
- The Rural Zone does not reflect the limitations of the block in terms of its rural productive value. The physical constraints on all sides of the block render it unsuitable for amalgamation with nearby adjoining farms and the site is not sufficiently large to become an economic farming unit in its own right. Those physical constraints mean that the block cannot realistically deliver the outcomes that are expected of the Rural Zone.
- The Rural Zone provisions do not allow for the growth of existing on-site facilities. A more permissive regime is sought by the Village Church Trust in order that Horsham Downs can better provide for the ongoing social and cultural wellbeing of its community.
- Existing on-site activity provides a good fit with 'community activity' which is defined within the Proposed District Plan.
- Rezoning to Village Zone (or suitable equivalent) allows for a generational approach to managing growth within a uniquely constrained and orphaned land block. For the Village Church, it also lessens the uncertainty associated with a resource consent process, the risks of which are more pronounced by the currently mismatched zoning.

Submitter Number:

744

Submitter:

Peter McCallum

Point Number

744.1

Summary of Decision Requested:

Add a resource management framework for the management of GMOs that is regional specific taking into account environmental, economic and social well-being considerations.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Release of GMOs has a potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once GMOs have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number

744.2

Summary of Decision Requested:

Add strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms that are the same (or similar) to those in the Far North District Plan, Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.

- Release of GMOs has a potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once GMOs have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number 744.3

Summary of Decision Requested: **Amend** the Proposed District Plan to require all consent applications to be automatically publically notified, regardless of whether the application is regarding genetically modified organisms or not.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Release of GMOs has a potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from GMO contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once GMOs have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Submitter Number: 745 **Submitter:** Brian Butt and Sheryl Kruger
On behalf of: Year 91 Family Trust **Organisation:** Kiana Lace Limited

Point Number 745.1

Summary of Decision Requested: **Amend** the zoning of 399 Bedford Road, Te Kowhai from Rural Zone to Country Living Zone.

Decision Reasons:

- The land is suitable for Country Living Zone because it is flat and would provide suitable building platforms in accordance with Rule 23.4.8.
- The land is well drained to the road (west) and to the east.
- The land adjoins the existing Country Living Zone to the east and is close to the Country Living Zone to the south.
- The dairy farm on our northern boundary offers a natural divide between Rural zone and Country Living Zone.
- The land use of 399 Bedford Road is 'lifestyle' with no current (or potential) rural commercial activity occurring on the property.
- We would propose to subdivide off two country living sites in the southern portion of the property leaving the northern most paddocks with our home intact;
- We would provide post and rail fencing across the road frontage of each of the subdivided sites and plantings as necessary;
- Vehicle access from the roadway to the proposed subdivided sites would be more than 60 metres from the 35km/hour corner directly outside our current driveway access providing good visibility from vehicle crossings in both directions;
- The walkway/cycleway/bridle way proposed in the plan is proposed to be extended through an easement in the northern and eastern boundary of our property connecting our property via a bridge across the stream to the Country Living zone to the east and to Te Kowhai Village. This proposed extension of the walkway/cycleway/bridleway through the eastern and northern boundary of 399 Bedford Road also offers a natural divide between Rural zone and Country Living zone.

Point Number 745.2

Summary of Decision Requested: **Delete** the Significant Natural Area from 399 Bedford Road, Te Kowhai.

Decision Reasons:

- The vegetation in the proposed Significant Natural Area of 399 Bedford Road is of low quality including willows, gorse, bracken, privet and other pest species.
- There are no native trees, shrubs or plants in the proposed Significant Natural Area of 399 Bedford Road.
- The only native trees are a small number of pongas and one nikau, all of which sit outside the eastern boundary of 399 Bedford Road.

Submitter Number: 746 **Submitter:** The Surveying Company

Point Number 746.1

Summary of Decision Requested: **Retain** Policy 5.2.3- Effects of subdivision and development on soils, except for the amendments sought below

AND

Amend Policy 5.2.3 (b)- Effects of subdivision and development on soils as follows:

Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).

Decision Reasons:

- The submitter supports policies that incentivise protection, enhancement and/or restoration of biodiversity values within the Waikato District through subdivision. However, this Policy only provides for a subdivision where existing indigenous biodiversity is being protected. There are a number of waterways and wetlands in the Rural Zone of the Waikato District that would benefit from stock exclusion (through fencing) and enhancement and/or restoration.

- The cost of full restoration is approximately \$45,000 + GST per ha (excluding fencing of re-vegetated areas from stock). Subdivision offers an incentive for landowners to undertake restoration works which they would be unlikely to do without a financial offset.
- To allow for the protection and/or restoration, particularly of water ways, would achieve the outcome sought in Policy 5.2.1(a)(iii), being the enhancement of water quality. It would also support Policy 3.1.2 which seeks enhancement of indigenous biodiversity values through planting, pest control and other biosecurity measures.
- The Vision and Strategy for the Waikato River seek restoration of the health and wellbeing of the Waikato River Catchment - improvements over time. Incentivising the fencing and restoration of waterways in the Waikato District would contribute positively to the improvement of water quality and achieving the objectives of the Vision and Strategy.

Point Number 746.2

Summary of Decision Requested: **Amend** Objective 5.3.1(a)- Rural Character and amenity as follows:
(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- The submitter supports in part the intent of this objective, however, recognition of the variation of what defines rural character and amenity values across a large District is needed.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the District which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 746.3

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
 AND

- Amend** Policy 5.3.8- Effects on rural character and amenity from rural subdivision as follows:
- (a) Protect productive rural areas by directing urban forms of subdivision, use, and development to within the boundaries of towns and villages.*
- ~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~
- (c) Ensure subdivision, use and development minimise the effects of ribbon development.*
- (d) Rural hamlet subdivision and boundary relocations ensure the following:*
- (i) Protection of rural land for productive purposes;*
- (ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;*
- (iii) Minimisation of cumulative effects.*
- (e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.*
-

Decision Reasons:

- Suggest removing Policy 5.3.8(b) duplicates 5.3.8(d)(ii) and 5.3.8(e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- It is recognised that the district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 746.4

Summary of Decision Requested: **Amend** Policy 5.3.13 (a)- Waste management activities as follows:
(a) Provide for the ~~rehabilitation of existing quarry sites, including~~ landfill and cleanfill activities, where siting is appropriate, environmental effects are managed and there is environmental gain.

AND

Amend Policy 5.3.13- Waste management activities to provide for landfills - Classes 1-5 in the Rural Zone, subject to appropriate siting.

Decision Reasons:

- The submitter supports, in part, the inclusion of Policy 4.6.2. Due to the extensive growth in the Auckland and Waikato Regions, there is a surplus of fill material and it is becoming increasingly difficult to find locations to dispose of this material.
- The Proposed Plan in no way recognises disposal of surplus material as an essential part of the construction process or the need to provide for it within the Rural Zone. The Franklin Section of the Waikato District Plan recognises landfills (including cleanfill) as an Essential Service under Section 15. In particular Objective 15.1.1.1 of the Franklin Section recognises the importance to the economic and social well-being of the district and the essential nature of network and other utilities and other essential services and to provide for their development, operation and maintenance.
- While the Industrial Zone provides for effects associated with waste management activities (dust, traffic), this land is in relatively short supply (compared with Rural Zone) and as such cleanfills often seek to locate in the Rural Zone.
- To recognise the necessity of these facilities to the economic, health and wellbeing of the District.

Point Number 746.5

Summary of Decision Requested: **Amend** the definition of "dwelling" in Chapter 13: Definitions to consider the Building Act and Resource Management Act definition
 AND

- Amend** the definition of "dwelling" in Chapter 13 Definitions to exclude the following:
- Mobile home
 - Campervan
 - Tent
 - Caravan
 - Cabin
 - Motel
 - Boarding-house
 - Hotel
 - Travellers' accommodation
 - Hostel
 - Special housing developments.

Decision Reasons:

- This definition is vague.
- Where a term has a defined meaning in the RMA, the term should not be redefined in Plans. Cross reference the Act so that, if any amendment is made to the legislation, the plan does not need to be changed.
- It is noted that the Building Act 2004 provides a definition of 'household unit' that, from an initial assessment, looks like it could be usefully applied in a planning sense.

Point Number

746.6

Summary of Decision Requested:

Amend the definition of "clean fill" in Chapter 13: Definitions to be consistent with the WasteMINZ definition as follows:

Virgin excavated natural materials (VENM) such as clay, soil and rock that are free of:

- *combustible, putrescible, degradable or leachable components;*
- *hazardous substances or materials (such as municipal solid waste) likely to create leachate by means of biological breakdown;*
- *products or materials derived from hazardous waste treatment, stabilisation or disposal practices;*
- *materials such as medical and veterinary waste, asbestos, or radioactive substances that may present a risk to human health if excavated;*
- *contaminated soil and other contaminated materials; and liquid waste. When discharged to the environment, clean fill material will not have a detectable effect relative to the background.*

Decision Reasons:

- Cleanfill is distinct from other waste given the low risk for contamination of land, water and air. Unlike other 'waste', cleanfill can be used to re-contouring for roads and building platforms. It is therefore important to define what material can be used for these activities to minimise the risk of contamination of land and water from the use of inappropriate material.
- The definition of cleanfill in the Proposed Plan is inconsistent with the leading national technical document for waste management in New Zealand - WasteMINZ Technical Guidelines for Disposal to Land. Different cleanfill standards can lead to inconsistencies between the Regional and District Council acceptance criteria and require different levels of monitoring/testing. The definition in the Proposed Plan is more akin to 'Controlled Cleanfill' in the WasteMINZ guidelines.

Point Number

746.7

Summary of Decision Requested:

Amend the definition of "farming" in Chapter 13: Definitions to include free-range poultry farming.

Decision Reasons:

- No reasons provided.

Point Number

746.8

Summary of Decision Requested:

Add a new definition of "horticultural activities" to Chapter 13: Definitions and include glasshouses, greenhouses, plant nurseries and orchards therein.

Decision Reasons:

- There needs to be a definition for "horticultural activities".

Point Number

746.9

Summary of Decision Requested:

Amend the definition of "height control plane" in Chapter 13: Definitions to refer to an angle of 45 degrees.

AND

Amend the illustration within the definition for "Height Control Plane" in Chapter 13: Definitions to show an angle of 45 degrees.

Decision Reasons:

- 45 degrees is clear and easy to measure.
- 45 degrees is consistent with many other district plans across New Zealand.

Point Number

746.10

Summary of Decision Requested:

Amend the definition of "Waste Management Facility" in Chapter 13: Definitions as follows:

Waste management facilities include: disposal of waste to land (excluding cleanfill), commercial composting operations, recovery operations, transfer stations, recycling centres and resource recovery centres.

Decision Reasons:

- The submitter supports this definition being revised to include all types of waste disposal to land classes excluding cleanfill (solid waste landfill, construction and demolition waste fill, managed fill, controlled fill), in accordance with the leading technical document for waste management in New Zealand - WasteMINZ Technical Guidelines for Disposal to Land.
- The definition recognises ancillary activities associated with waste disposal including recycling centres.

Point Number

746.11

Summary of Decision Requested:

Add a new definition for "Cleanfill Facility" to Chapter 13: Definitions as follows:

A facility where clean fill material is accepted for disposal.

Excludes:

- *storage and use of cleanfill material within an earthworks site for the purpose of engineering contours for specific activities;*
- *placement of cleanfill material associated with road construction and road maintenance activities; and*
- *onsite storage and use of overburden or aggregate by-product that is cleanfill material associated with mineral extraction activities.*

Decision Reasons:

- The submitter seeks a definition for an operation that accepts cleanfill for disposal, distinct from where cleanfill is imported for rural production purposes, or to form buildings sites, roads etc.
- Cleanfills pose less risk to the environment than other types of waste management facilities and are a necessary consequence of urban growth. Therefore, Cleanfill facilities should be provided for in appropriate zones (Rural and Industrial Zones) where the effects can be managed.

Point Number 746.12

Summary of Decision Requested: **Add** a new definition for "Free Range Poultry Farming" to Chapter 13: Definitions as per the operative Franklin Section of the Operative District Plan.

Decision Reasons:

- No reasons provided.

Point Number 746.13

Summary of Decision Requested: **Add** a new definition for "Poultry Hatcheries" to Chapter 13: Definitions as per the Franklin section of the Operative District Plan.

Decision Reasons:

- No reasons provided.

Point Number 746.14

Summary of Decision Requested: **Add** a new definition for "On Site Primary Produce Manufacturing" to Chapter 13:Definitions as per the Operative Franklin Section of the Operative District Plan.

Decision Reasons:

- No reasons provided.

Point Number 746.15

Summary of Decision Requested: **Add** a new definition for "Farming Visit" to Chapter 13: Definitions as per the Operative Franklin Section of the Operative District Plan.

Decision Reasons:

- No reasons given.

Point Number 746.16

Summary of Decision Requested: **Add** a new definition for "Packhouse" in Chapter 13: Definitions as per the Operative Franklin Section of the Operative District Plan.

Decision Reasons:

- No reasons provided.

Point Number 746.17

Summary of Decision Requested: **Add** a new definition for "Sleepout" in Chapter 13: Definitions as per the Operative Franklin Section of the Operative District Plan.

Decision Reasons:

- No reasons provided.

Point Number 746.18

Summary of Decision Requested: **Amend** the definition of "intensive farming" in Chapter 13: Definitions as follows:*Intensive pig farming undertaken wholly or principally in sheds or other shelters or buildings;*

(a) Intensive pig farming undertaken wholly or principally in sheds or other shelters or buildings;

~~*(b) Free-range pig farming;*~~

(c) Poultry or game bird farming undertaken wholly or principally within sheds or other shelters or buildings;

~~*(d) Free-range poultry or game bird farming;*~~

(e) Mushroom farming; and

~~*(f) Intensive goat farming animal feedlots, feeding livestock on food other than pasture grasses.*~~

It excludes the following, provided the building is used for the purpose for which it was built:

...; and

~~*(d) Glass house production or nurseries;*~~

~~*(e) Free-range poultry or game bird farming;*~~

~~*(f) Free-range pig farming; and*~~

~~*(g) Concentrated but temporary wintering of stock as part of normal farming operations, such as using animal feedpads and standoff pads.*~~

~~*(h) Poultry Hatcheries*~~

Decision Reasons:

- Intensive farming is the growing of fungi, livestock, or poultry within a building or structure, or an animal feed lot with limited or no dependence on natural soil quality on the site.
- Free-range farming is a distinct land based activity that should not come under the definition of intensive farming.
- Poultry Hatcheries should also be excluded from this definition.

Point Number	746.19									
Summary of Decision Requested:	Amend the definition of "Living Court" in Chapter 13" Definitions as follows: <i>Means an area of outdoor space directly related to the living area of a household unit, and for the household's exclusive use. It does not include parking, manoeuvring areas and buildings, but does include swimming pools, pergolas and similar open-framed structures <u>including a covered deck</u>.</i>									
Decision Reasons:	<ul style="list-style-type: none"> Covered decks form part of an outdoor living court and should be included in the definition. 									
Point Number	746.20									
Summary of Decision Requested:	Amend the definition of "multi-unit development" in Chapter 13: Definitions as follows: <i>Means multiple residential units <u>being attached or detached</u> which are integrated in a comprehensive manner. It includes: a) an apartment building; b) a duplex; c) <u>terraced housing</u>.</i>									
Decision Reasons:	<ul style="list-style-type: none"> This definition needs to be expanded to include multiple detached dwellings for clarity. 									
Point Number	746.21									
Summary of Decision Requested:	Amend the definition of "Produce stall" in Chapter 13: Definitions to include the sale of farm and garden produce grown or produced on a site owned by the same landholder.									
Decision Reasons:	<ul style="list-style-type: none"> There can be multiple sites either side by side or throughout the District that may be owned by the same person and therefore it makes sense for this landowner to sell produce from their stall that is grown on other land that they own. 									
Point Number	746.22									
Summary of Decision Requested:	Amend the definition of "Significant Natural Area" in Chapter 13: Definitions as follows: <i>Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area on the planning maps <u>or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity, (Appendix 2) by a suitably qualified Ecologist</u>.</i>									
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the inclusion of Significant Natural Area's definition. The submitter would like to see it expanded to also include areas that have been assessed by a suitably qualified ecologist as meeting one more of the criteria in Appendix 2 of the Proposed Plan - Criteria for Determining Significance of Indigenous Biodiversity. This would align with the wording of the Conservation Lot Subdivision provisions which allow for subdivision where an identified Significant Natural Area is being protected or an area meeting the Criteria for Determining Significance of Indigenous Biodiversity. 									
Point Number	746.23									
Summary of Decision Requested:	Amend the definition of "Variable Record of Title" in Chapter 13: Definitions as follows: <i>Means in the Rural Zone, a Record of Title that <u>contains at least 5000m², is not a road severance, and can accommodate a suitable building platform as a permitted activity under Rule 22.4.9 (subdivision rule for building platform): which satisfies one of the following criteria:</u> <u>- contains at least 5000m², or</u> <u>- is a lot approved or granted consent by a territorial local authority, or</u> <u>- was separately recorded on the valuation roll of the former Franklin County Council as at 22 September 1977, or</u> <u>- had the right to erect one dwelling as a Permitted activity as at 30 May 1994 in terms of the Transitional District Plan of the Franklin District Council.</u></i>									
Decision Reasons:	<ul style="list-style-type: none"> This definition is a simplistic interpretation that will change the status of existing lawfully established titles that are less than 5,000m². It also refers to rule 22.4.9 which includes a new standard for an area of 1,000m² exclusive of boundary setbacks and is suitable for building. Previously created titles were not assessed against (and future titles may be granted consent as a discretionary activity) this ridiculous rule. There are existing lawfully established allotments that are less than 5,000m². There are also titles larger than 5,000m² that have restricted building areas that would not comply with rule 22.4.9. These are also considered to be viable certificates of title and any change in definition to take away existing rights would open Council up to legal proceedings. 									
Point Number	746.24									
Summary of Decision Requested:	Amend Table 14.12.5.14- Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) as it applies to the Residential Zone and Village Zone to apply NZS 4404 standards -Table 3.2 Road Design Standards. OR Amend Table 14.12.5.14 Access and road conditions as it applies to the Residential Zone and Village Zone to use the standards in the Operative District Plan: Franklin Section as follows: <table border="1"> <thead> <tr> <th>Users</th> <th>Legal Width</th> <th>Minimum total seal width</th> </tr> </thead> <tbody> <tr> <td>2-4</td> <td>3.5m</td> <td>2.7m</td> </tr> <tr> <td>5-8</td> <td>8m</td> <td>5m</td> </tr> </tbody> </table>	Users	Legal Width	Minimum total seal width	2-4	3.5m	2.7m	5-8	8m	5m
Users	Legal Width	Minimum total seal width								
2-4	3.5m	2.7m								
5-8	8m	5m								
Decision Reasons:	<ul style="list-style-type: none"> Access Leg and ROW widths are too wide. The proposed access standards are excessive and will result in the inefficient use of land and will prevent infill development in existing urban areas. The current standards in the Franklin Section of the Plan are appropriate for the residential zone. The extra seal width also increases impervious surfaces and stormwater run-off without any apparent need or benefit relating to traffic effects. Excessive width also adds additional costs to developments. 									

Point Number	746.25
Summary of Decision Requested:	<p>Amend Table 14.12.5.15- Access and road conditions (Rural and Country Living Zones) to apply NZS 4404 Standards - Table 3.2 Roading Design Standards.</p> <p>OR</p> <p>Amend Table 14.12.5.15- Access and road conditions (Rural and Country Living Zones) to apply the Operative District Plan: Franklin Section Standards as specified in 22B.7.2</p>
Decision Reasons:	<ul style="list-style-type: none"> The access Leg and R-O-W widths in the Rural and Country Living Zone are too wide. The submitter opposes the requirement to seal access and ROW's in the Rural and Country Living zones. Metal access ways are appropriate in rural zones and are more consistent with the character of rural areas.
Point Number	746.26
Summary of Decision Requested:	Amend Table 14.2.5.1 - Separation distances to apply the Operative Waikato District Plan Franklin Section 9.5 Location of Vehicle Crossings for arterial and collector roads.
Decision Reasons:	<ul style="list-style-type: none"> There is no analysis in the s32 regarding this relevance or practicality of this table. Roads are classified in terms of the relative importance of their movement and access functions. At the 'top' of the hierarchy are those roads which have as their principal purpose the unrestricted movement of vehicles. Accordingly, the access available to properties along the route of such roads is either totally restricted or strictly managed through design. At the other extreme (local roads) the objective is to maximise the ease and safety of access to properties.
Point Number	746.27
Summary of Decision Requested:	<p>Delete Table 14.12.5.3- Minimum sight distances</p> <p>AND</p> <p>Add reference to RTS6 Guidelines for Visibility at Driveways to Table 14.12.5.3- Minimum sight distances.</p>
Decision Reasons:	<ul style="list-style-type: none"> There is no analysis in the s32 regarding this relevance or practicality of this table. There are national documents (New Zealand Transport Agencies Road Traffic Standards 06) that cover sight distances so this matter should not form part of the Plan so that, if any amendment is made to the legislation, the plan does not need to be changed.
Point Number	746.28
Summary of Decision Requested:	<p>Add a new activity to Rule 16.1.2- Permitted Activities to include multi-unit development of up to three dwellings as follows:</p> <p><i>Pl 3 Multi-unit development of up to three dwellings is a Permitted Activity</i></p> <p>AND</p> <p>Add similar activity specific standards to the new rule as Rule 16.1.3 RD1 (including the amendments sought)</p>
Decision Reasons:	<ul style="list-style-type: none"> Multi-unit development of up to three dwellings should be a Permitted Activity. This will allow for infill development and avoid unnecessary Resource Consent costs and time delays and effects could be managed through permitted standards. The construction of up to three dwellings on a residential site is unlikely to result in adverse effects provided the relevant controls can be met. The proposed addition to the permitted activity table will allow existing land to be developed more efficiently without the need to subdivide the land.
Point Number	746.29
Summary of Decision Requested:	<p>Amend Rule 16.1.3 RD1 (c) Restricted Discretionary Activities for Multi-unit development as follows:</p> <p><i>The minimum net site area per residential unit is 300m² 250m²:</i></p> <p>AND</p> <p>Amend Rule 16.1.3 RD1 condition (e) Restricted Discretionary Activities (Multi-unit development) as follows:</p> <p><i>Total Building coverage of the site does not exceed 50% 60%</i></p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the provision for multi-unit housing as it gives effect to the strategic direction outlined in Section A and Chapter B 4.1. The provision supports variety in the future housing stock to help achieve policies 4.1.2, 4.1.5, 4.2.16 and 4.2.17. Multi-unit development of up to three dwellings should be a Permitted Activity. This will allow for infill development and avoid unnecessary Resource Consent costs and time delays where and effects can be managed through permitted standards. While the policy directive support variety in housing types the provisions of the Plan encourage typical suburban form rather than enabling medium density development.
Point Number	746.30
Summary of Decision Requested:	<p>Amend Rule 16.1.3 RD1 Restricted Discretionary Activities to provide for low rise apartments close to town centres as follows</p> <p><i>Where multi-unit apartments are proposed apply conditions in 17.1.3 RD1</i></p>
Decision Reasons:	<ul style="list-style-type: none"> This will enable the directive in Policy 4.2.17(a) Housing types. There are a number of larger (1000m²) sections within the older existing residential areas in both Tuakau, Te Kauwhata, Ngaruawahia and Poke no. These areas are often close to the Town Centre. Intensification of these sites should be encouraged given their proximity to existing services. These sites could accommodate low-rise apartments and multi-unit development to achieve the policy directives of the Proposed Plan. While the policy directive support variety in housing types the provisions of the Proposed Plan encourage a typical suburban form rather than enabling medium density development.

Point Number 746.31

Summary of Decision Requested: **Amend** Rule 16.2.4.1- Earthworks- General P1 (a)(ii) as follows:
(ii) Not exceed a volume of ~~250m²~~ 500m²

Decision Reasons:

- Where subdivision has been approved by Council and lots have been created there should be no requirements for land owners to apply for additional resource consents for earthworks to undertake permitted activities on the land.
- The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents.
- Permitted land use standards should be able to control the adverse effects of any works.

Point Number 746.32

Summary of Decision Requested: **Retain** Rule 16.2.4.1 P2 Earthworks-General as notified.

Decision Reasons:

- The submitter supports this provision to enable the creation of stable building platforms.

Point Number 746.33

Summary of Decision Requested: **Amend** Rule 16.2.4.1 P3(a)(i) Earthworks- General as follows:
Not exceed a total volume of ~~20m²~~ 100m²
AND
Amend Rule 16.2.4.1 P3(a)(ii) Earthworks- General as follows:
Not exceed a depth of ~~4m~~ 1.5m.

Decision Reasons:

- Cleanfill may be required in residential zoned sites to enable greenfield land to be developed for residential purposes. The requirement to avoid filling in all circumstances may restrict the ability to development residential land where balanced cut to fill earthworks are inappropriate or cannot be achieved.
- The importation volume is too low to enable residential development.

Point Number 746.34

Summary of Decision Requested: **Delete** Rule 16.2.4.1 NCI Earthworks General
AND
Add a new restricted discretionary activity (RD2) to Rule 16.2.4.1 as follows:
RD2 Earthworks including the importation of cleanfill to a site.

Decision Reasons:

- The importation volume is too low to enable residential development
- Cleanfill may be required in residential zoned sites to enable greenfield land to be developed for residential purposes. The requirement to avoid filling in all circumstances may restrict the ability to development residential land where balanced cut to fill earthworks are inappropriate or cannot be achieved.
- The Non-Complying status is too restrictive and needs to be more lenient to enable greenfield development within residential zones.

Point Number 746.35

Summary of Decision Requested: **Add** a new permitted activity (P2) to Rule 16.3.1- Dwelling for a multi-unit development of up to three dwellings as follows:
P2 Multi-unit development of up to three dwellings added as a Permitted Activity.
AND
Add permitted activity conditions to the new Rule 16.3.1 P2 similar to Rule 16.1.3 RD1 (including proposed amendments)
AND
Amend Rule 16.3.1- Dwelling to state that Rule 16.3.1 does not apply to multi-unit development.

Decision Reasons:

- The submitter opposes the condition as it is too restrictive. Up to three dwellings permitted on a site where the multi-unit dwelling standards can be met.
- Multi-unit development of up to three dwellings should be a Permitted Activity. This will allow for infill development and avoid unnecessary Resource Consent costs and time delays where and effects could be managed through permitted standards.
- There are a number of larger (1000m²) sections within the older existing residential areas in both Tuakau, Te Kauwhata, Ngaruawahia and Poke no. These areas are often close to the Town Centre. Intensification of these sites should be encouraged given their proximity to existing services. These sites could accommodate low-rise apartments and multi-unit development to achieve the policy directives of the Plan. Provision should be made within the rules for this.
- This will allow existing land to be developed more efficiently without the need to subdivide the land allowing land owners to build additional dwellings on existing lots.
- Permitted standards can control amenity effects to ensure that neighbouring sites are not affected. This approach has been taken by Auckland Council where additional dwelling can be constructed on properties without Resource Consent provided permitted standards can be achieved.

Point Number 746.36

Summary of Decision Requested: **Amend** Rule 16.3.2 P1(a)(i)- Minor dwelling as follows:
The net site area is ~~900m²~~ 600m² or more.

Decision Reasons:

- The submitter supports the provision as it will enable more diversity in the housing stock to achieve policies 4.1.2, 4.1.5, 4.2.16 and 4.2.17, the Reduce the net site area to 600m².
- The Plan should encourage intensification and housing options in the residential zones, especially in growth areas such as Tuakau and Pokeno.
- The permitted standards will control effects if the site is an appropriate size to accommodate a minor dwelling.

Point Number 746.37

Summary of Decision Requested: Amend Rule 16.3.3.1 P1-Building Height -General as follows:

The maximum height of any building must not exceed ~~7.5m~~ 11m.

AND

Amend Rule 16.3.5- Daylight admission as a consequential amendment.

Decision Reasons:

- The height limit does not enable the efficient use of urban land and fails to increase the development capacity of existing urban areas.
- The strategic direction outlined in Section A and Chapter B 4.1 of the Plan supports increase densities and housing choice throughout the district. The provision supports variety in the future housing stock to help achieve policies 4.1.2, 4.1.5, 4.2.16 and 4.2.17. This includes the provision of low rise apartments and multi-unit development.
- The 7.5m height limit restricts the potential to build medium density housing. While the Plan seeks some intensification and increased density to accommodate future growth the land use provisions in the Plan create a suburban form which is at odds with the strategic direction and objectives and policies for the urban environment.

Point Number 746.38

Summary of Decision Requested: Amend Rule 16.3.5 P1- Daylight admission as follows:

Buildings must not protrude through a height control plane rising at an angle of ~~37~~ 45 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

Decision Reasons:

- This is inconsistent with previous Planning documents, which are less restrictive.
- This is too restrictive for urban areas.
- Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane.
- The 37 degree angle is difficult to calculate.

Point Number 746.39

Summary of Decision Requested: Amend Rule 16.3.6 P1- Building Coverage as follows:

The total building coverage must not exceed ~~40%~~ 50%.

Decision Reasons:

- The submitter opposes the 40% building coverage as it does not enable the efficient use of urban land and fails to increase the development capacity of existing urban areas.
- Increasing building coverage will allow greater utilisation of residential zoned land and support the strategic direction outlined in Section A and Chapter B 4.1 of the Plan, which supports increase densities and housing choice throughout the district.

Point Number 746.40

Summary of Decision Requested: Amend Rule 16.3.7 P1 Living Court, as follows:

(a) A living court must be provided for each dwelling that meets all of the following conditions:

(i) It is for the exclusive use of the occupants of the dwelling;

(ii) It is readily accessible from a living area of the dwelling;

(iii) When located on the ground floor it has a minimum area of ~~60m²~~ 40m² and a minimum dimension of ~~4m~~ 3m in any direction.

(iv) When located on a balcony of an above ground apartment, it must have a minimum area of ~~15m²~~ 10m² and a minimum dimension of ~~4m~~ 2m in any direction.

AND

Amend Rule 16.3.7 P2 Living Court, as follows:

(a) A living court must be provided for each minor dwelling that meets all of the following conditions:

(i) It is for the exclusive use of the occupants of the minor dwelling;

(ii) It is readily accessible from a living area of the minor dwelling;

(iii) When located on the ground floor it has a minimum area of ~~40m²~~ 10m² and a minimum dimension of ~~4m~~ 2m in any direction.

(iv) When located on a balcony of an above ground apartment, it must have a minimum area of ~~15m²~~ 8m² and a minimum dimension of ~~2m~~ 1.6m in any direction.

Decision Reasons:

- The Plan requires excessive outdoor living areas relative to 450m² lot size provision for residential Lots.
- While the Plan seeks some intensification and increased density to accommodate future growth the land use provisions in the Plan create a suburban form which is at odds with the strategic direction and objectives and policies for the urban environment.
- Excessive sized outdoor living areas will restrict the ability to develop the urban land. The size standards exceed the existing Franklin District Plan standard which requires 60m² of outdoor living area.
- The Perception of urban living is changing and people no longer need large outdoor areas. Smaller outdoor living courts have been adopted by Auckland Council to promote a more compact living approach and should be adopted by the Waikato District Council to achieve the strategic objectives.
- Reducing the minimum outdoor living court allows for variety in lifestyle and lower maintenance.
- In addition, 16.3.8 requires an additional service court which ensures adequate outdoor space for living and other domestic requirements.

Point Number 746.41

Summary of Decision Requested: Amend Rule 16.3.8 P1 Service Court as follows:

(a) A service court must be provided for each dwelling and minor dwelling, each with all the following dimensions:

- (i) minimum area of ~~45m²~~ 5m²; and
- (ii) contains a circle of at least ~~3m~~ 2m diameter.

Decision Reasons:

- The Proposed Plan requires excessive service court for modern urban living.
- Excessive service courts will restrict the ability to develop urban land efficiently.
- There is no assessment in the s32 analysis to support the size of the service court.

Point Number 746.42

Summary of Decision Requested: **Amend** Rule 16.3.9.1 P1 (a)- Building setbacks- All boundaries as follows:

(a) A building must be set back a minimum of:

...

(iii) ~~4.5m~~ 1.2m from every boundary other than a road boundary

(iv) ~~4.5m~~ 1.2m from every vehicle access to another site

Decision Reasons:

- The Plan requires excessive building setbacks for residential Lots that will restrict the ability to develop the urban land. The setbacks exceed the existing Waikato District Plan - Franklin Section standards for minimum side and rear yards of one metre.
- Reducing the side yard allows for variety in lifestyle and lower maintenance.

Point Number 746.43

Summary of Decision Requested: **Amend** Rule 16.3.9.3 P1 (a) (ii)-Building setback - Water bodies to match Rule 24.3.6.3- Building setback- Waterbodies, including the following:
(ii) ...from the bank of any named river...

AND

Add a new permitted activity (P3) to Rule 16.3.9.3 Building setback- Water bodies as follows

P3. A building must be set back a minimum of 10m from the bank of a perennial or intermittent named or unnamed stream.

Decision Reasons:

- These setbacks are not consistent with other zones in the Proposed District Plan or the existing Operative District Plan-Franklin Section provisions.

Point Number 746.44

Summary of Decision Requested: **Retain** Rule 16.4.1- Subdivision-General as notified, except for amendments sought elsewhere in the submission.

Decision Reasons:

- Provides for the efficient use of the urban land resource.
- Enables the subdivision of land to provide for the growth of the district.

Point Number 746.45

Summary of Decision Requested: **Retain** the minimum net site area of 450m² in Rule 16.4.1 RD1 (a)(i) Subdivision - General, for greenfield subdivision.

AND

Add a new clause to Rule 16.4.1 RD1(a) Subdivision - General requiring a minimum net site area of 350m² for infill development in accordance with the Operative District Plan: Franklin Section.

Decision Reasons:

- The submitter supports the minimum lot size of 450m² for greenfield development areas.
- There are many larger sites within the existing urban areas of Tuakau and Pokeno which are suitable for infill subdivision. Subdivision of larger sites within the existing urban area should be encouraged to ensure that intensification of the existing urban areas can be achieved in accordance with the Future Proof Strategy. This will ensure efficient use of the existing urban land resources allowing additional residential development close to services and amenities.
- The submitter proposed the subdivision of existing sites to 350m² in accordance with the Franklin District Plan. Lot sizes below this should be provided where an integrated land use and subdivision consent can show compliance with the land use standards.

Point Number 746.46

Summary of Decision Requested: **Delete** Rule 16.4.1 RD1 (a)(iii)- Subdivision- General.

Decision Reasons:

- The submitter accepts that grid layouts result in increase permeability, legibility and walkability of residential areas. However, the establishment of formal and informal grid patterns may not be appropriate to all sites. Sites with topographical natural or physical constraints may be unable to practically implement a grid layout. There may also be sites where the lay of the land is best suited to an alternative road design.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- While grid layouts are an accepted urban design principle for good subdivision design they are not an absolute response. Therefore, they should be used as a principle and not enforced through a rule.

Point Number 746.47

Summary of Decision Requested: **Delete** Rule 16.4.2 RD1 (a)(iv)- Subdivision- Te Kawhata Ecological Residential Area.

Decision Reasons:

- The submitter accepts that grid layouts result in increase permeability, legibility and walkability of residential areas. However, the establishment of formal and informal grid patterns may not be appropriate to all sites. Sites with topographical natural or physical constraints may be unable to practically implement a grid layout. There may also be sites where the lay of the land is best suited to an alternative road design.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- While grid layouts are an accepted urban design principle for good subdivision design they are not an absolute response. Therefore, they should be used as a principle and not enforced through a rule.

Point Number 746.48

Summary of Decision Requested: **Delete** Rule 16.4.1 RD1 (a)(iv) Subdivision - General (rear lot subdivision control) and make this a matter of discretion;
OR
Amend Rule 16.4.1 RD1(a) (iv) Subdivision - General (rear lot subdivision control) to increase the percentage of rear lots to no more than 25%.

Decision Reasons:

- The standard is not able to be achieved on some sites due to the configuration of the site and topographical constraints which mean the creation of roads will be difficult.
- The standard is arbitrary and there is no assessment in the s32 analysis to support the 15% standard.

Point Number 746.49

Summary of Decision Requested: **Amend** Rule 16.4.3 RD1 (a)(v)- Subdivision- Te Kauwhata West Residential Area to increase the percentage of rear lots to no more than 25%.

Decision Reasons:

- 15% is not able to be achieved on some sites due to the configuration of the site and topographical constraints which mean the creation of roads will be difficult.
- The standard is arbitrary and there is no assessment in the s32 analysis to support the 15% standard.

Point Number 746.50

Summary of Decision Requested: **Amend** Rule 16.4.3(a) (ii)-Subdivision- Te Kauwhata West Residential Area as follows:
(ii) Have a minimum average net site area of ~~875m²~~ 700m².

Decision Reasons:

- An average residential lot size of 875m² is considered to be an inefficient use of the residential land resource. fails to take into account the anticipated growth for the area.
- It fails to give effect to the Future Proof Strategy identified in I.S.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton (67%) and the larger settlements of the district (21%). This involves a reduction in the relative share of the population outside of the sub-region's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- It does not achieve the minimum density required by strategic Policy 4.1.5. This is an inconsistency between the rules and the Plans objectives. Therefore, for the rule should give effect to the Plan, this should be rectified.

Point Number 746.51

Summary of Decision Requested: **Delete** Rule 16.4.13 RD1(a)-Subdivision creating reserves and make this a matter of discretion

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective.
- This is an arbitrary standard which may not be relevant for all reserve types or developments.
- Safety and surveillance of reserves may be achieved with less road frontage.
- There is no analysis in the s32 stating why the 50% rule has been applied.
- This can be assessed through assessment criteria or a matter of discretion.

Point Number 746.52

Summary of Decision Requested: **Amend** Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips to adopt Operative Waikato District Plan - Franklin Section Rule 11.5 - Esplanade Reserves and Strips.

Decision Reasons:

- The submitter accept that esplanade reserves and esplanade strips enable public access and recreation. However, this needs to be assessed on a case by case basis and Council should allow a waiver or reduction in width in certain circumstances.

Point Number 746.53

Summary of Decision Requested: **Add** a new permitted activity (P19) to Rule 17.1.2 Permitted Activities, as follows:
P19 Multi-unit development of up to five units complying with the conditions
AND
Add the conditions from Rule 17.1.3 RD1 to the new rule.

Decision Reasons:

- The submitter supports the provision for multi-unit housing as it gives effect to the strategic direction outlined in Section A and Chapter B 4.1. The provision for multi-unit development supports variety in the future housing stock to help achieve policies 4.1.2, 4.1.5, 4.2.16 and 4.2.17.
- Multi-unit development of up to five units should be a Permitted Activity. This will allow for infill development and avoid unnecessary Resource Consent costs and time delays where and effects can be managed through permitted standards.
- Provision for low rise apartments close to town centre gives effect to the directive in Policy 4.2.17(a) Enable a variety of housing types in the Residential Zone where it is connected to public reticulation, including:
(i) Integrated residential development such as low-rise apartments and multi-unit development;
(ii) Retirement villages.

Point Number 746.54

Summary of Decision Requested: **Delete** Rule 17.1.5 NCI- Non-Complying Activities and amend to discretionary activity as captured by Rule 17.1.4 D3 Discretionary Activities

OR

Amend Rule 17.1.3 RDI- Restricted Discretionary Activities to allow residential development at the ground floor on sites that adjoin a residential zone.

Decision Reasons:

- Provision for low rise apartments close to town centre gives effect to the directive in Policy 4.2.17(a) Enable a variety of housing types in the Residential Zone where it is connected to public reticulation, including:
 - (i) Integrated residential development such as low-rise apartments and multi-unit development;
 - (ii) Retirement villages.
- Residential development at ground floor level may be an appropriate design response to the context of the site and surrounding area. Where buildings adjoin the residential zone, residential ground floor activities may be an appropriate design response.

Point Number 746.55

Summary of Decision Requested: **Delete** Rule 17.1.5 NC2-Non-Complying Activities, and amend to a discretionary activity status as set out below

AND

Add a new discretionary activity (D4) to Rule 17.14 as follows:

Residential activity that does not comply with an activity specific condition for a permitted activity under Rule 17.1.2 P4.

Decision Reasons:

- The non complying activity status is too restrictive and does not provide for innovation in design or development concepts which may promote good outcomes for the zone. Residential activities are seen as being appropriate for a residential zone and therefore the non-complying status does not enable this.
- Residential development at ground floor level may be an appropriate design response to the context of the site and surrounding area. Where buildings adjoin the residential zone, residential ground floor activities may be an appropriate design response.

Point Number 746.56

Summary of Decision Requested: **Amend** Rule 17.3.1.1 P1- Height- Building General as follows:

The maximum height of any building must not exceed ~~40m~~ 15m.

Decision Reasons:

- The building height should be increased to allow for 4 storeys.
- This will ensure development and re-development (especially of smaller sites) is economically viable for developers and allow for a range of uses making residential development viable on upper floors.

Point Number 746.57

Summary of Decision Requested: **Amend** Rule 17.3.2 P2 Daylight admission as follows:

Buildings must not protrude through a height control plane rising at an angle of ~~37-45~~ degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

Decision Reasons:

- It is inconsistent with previous planning documents which are less restrictive.
- it is too restrictive for urban areas.
- Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane.
- The 37 degree angle is difficult to calculate.

Point Number 746.58

Summary of Decision Requested: **Add** a new permitted activity (P19) to Rule 18.1.2 (Permitted Activities) as follows:

P19 Multi-unit development of up to five units complying with the conditions

AND

Add the conditions in Rule 18.1.3 RDI as activity specific conditions to the new P19.

Decision Reasons:

- The submitter supports the provision for multi-unit housing as it gives effect to the strategic direction outlined in Section A and Chapter B 4.1. The provision for multi-unit development supports variety in the future housing stock to help achieve policies 4.1.2, 4.1.5, 4.2.16 and 4.2.17.
- Multi-unit development of up to five units should be a Permitted Activity to allow for infill development and avoid unnecessary Resource Consent costs and time delays where and effects can be managed through permitted standards.

Point Number 746.59

Summary of Decision Requested: **Delete** Rule 18.1.5 NC3- Non-Complying Activities and amend to a discretionary activity as captured by Rule 18.1.4 D2 Discretionary Activities

OR

Amend Rule 18.1.3 RDI Restricted Discretionary Activities to allow residential development of the ground floor where the site adjoins a Residential Zone

Decision Reasons:

- Provision for low rise apartments close to town centre gives effect to the directive in Policy 4.2.17(a) Enable a variety of housing types in the Residential Zone where it is connected to public reticulation, including:

- (i) Integrated residential development such as low-rise apartments and multi-unit development;
- (ii) Retirement villages.
- Residential development at ground floor level may be an appropriate design response to the context of the site and surrounding area. Where buildings adjoin the residential zone, residential ground floor activities may be an appropriate design response.

Point Number 746.60

Summary of Decision Requested: Retain Rule 18.1.3 RD2 Restricted Discretionary Activities as notified.

Decision Reasons:

- It will ensure good design and character outcomes within the Town Centres.

Point Number 746.61

Summary of Decision Requested: Delete Rule 18.1.5 NC2 Non-complying Activities and amend to a discretionary activity as set out below
AND
Add a new rule to Rule 18.1.4 Discretionary Activities for residential activity on the ground floor.

Decision Reasons:

- The activity status is too restrictive and does not provide for innovation in design or development concepts which may promote good outcomes for the zone. Residential activities are seen as being appropriate for a residential zone and therefore the non-complying status does not enable this.
- Residential development at ground floor level may be an appropriate design response to the context of the site and surrounding area. Where buildings adjoin the residential zone, residential ground floor activities may be an appropriate design response.

Point Number 746.62

Summary of Decision Requested: Delete Rule 18.1.5 NC3-Non-Complying Activities and amend to be a discretionary activity as outlined below
AND
Add a new rule to Rule 18.1.4- Discretionary Activities for multi-unit development located on the ground floor.

Decision Reasons:

- The activity status is too restrictive and does not provide for innovation in design or development concepts which may promote good outcomes for the zone. Residential activities are seen as being appropriate for a residential zone and therefore the non-complying status does not enable this.
- Residential development at ground floor level may be an appropriate design response to the context of the site and surrounding area. Where buildings adjoin the residential zone, residential ground floor activities may be an appropriate design response.

Point Number 746.63

Summary of Decision Requested: Amend 18.3.1.1 P1- Height- Building general as follows:
The maximum height of any building must not exceed ~~4m~~ 15m.

Decision Reasons:

- The building height should be increased to allow for 4 storeys.
- This will ensure development and re-development (especially of smaller sites) is economically viable for developers and allow for a range of uses making residential development viable on upper floors.

Point Number 746.64

Summary of Decision Requested: Amend Rule 18.3.2 P1- Daylight admission as follows:
Buildings must not protrude through a height control plane rising at an angle of ~~35~~ 45 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

Decision Reasons:

- Inconsistent with previous Planning documents which are less restrictive.
- It is too restrictive for urban areas.
- Adequate amenity and daylight for adjoining sites can be achieved with a less restrictive control plane.
- The 37 degree angle is difficult to calculate.

Point Number 746.65

Summary of Decision Requested: Add full provisions for transferable rural lot subdivision within the Rural Zone to Chapter 22 Rural Zone;
AND
Add the Operative Waikato District Plan - Franklin Section Rule 22B.12 - Transferable Rural Lot Right including the provision to transfer "approved lots" to Chapter 22 Rural Zone.

Decision Reasons:

- There continues to be a demand for countryside living properties, and when there is no supply, the land values escalate. Land values can increase to the point where it becomes more economical to subdivide land to use for country lifestyle residential, rather than to use it for primary production. This would severely affect the districts primary focus to preserve the primary productive capabilities
- A large number of lots created for horticulture still remain. These are dispersed across the areas of land with little regard for locational constraints and loss of prime soils if developed as a countryside living property.
- It is appropriate to provide further countryside living on rural lots that have less versatile soils and can absorb adverse effects, and where redistribution of existing vacant lots/consented lots is achieved.
- Incentives can be offered for the transfer of existing titles of vacant lots and consented lots into such developments.
- Many small rural lots that are located in areas of prime/high quality soil do not have houses or other buildings on them. If all these titles were to be fully developed, the consequences would be major. The rural area would change in character and use, from rural to country living. This would have wide-ranging adverse effects on the rural economy, business sector and sustainability of prime/versatile soils. It

will provide an opportunity to transfer the title created off the property to another locality that is more appropriate and can absorb the development.

- There are environment benefits to this subdivision mechanism within the Waikato District for the reasons discussed above and below:
 - It enables the ability to transfer existing titles and consented titles that contain prime/high quality soils to other more suitable locations within the district that can better absorb development.
 - It enables land that has prime/high quality soils to be amalgamated together to allow larger farming units that are more efficient to operate as a rural production farming unit.
 - It enables the transfer of lots created by environmental protection (conservation lots) to localities that can better absorb the development and are more attractive in terms of distance to amenities, town and the motorway. These transfers will ensure the parent title can continue to operate as a larger and more productive farming unit.

Point Number 746.66

Summary of Decision Requested: Amend Rule 22.1.2 P2- Permitted Activities to increase event occurrences to 6 times per year.

Decision Reasons:

- It is consistent with the Franklin Section of the District Plan.
- An increase to 6 event occurrences allow for an average of one event every 2 months which is appropriate given other standards (eg hours of operation and general noise levels) are required to be complied with.

Point Number 746.67

Summary of Decision Requested: Amend Rule 22.1.2 P4(b)- Permitted Activities to allow for the storage of materials and machinery outside provided that they are fully screened (not visible) from places off site, including roads and highways.

Decision Reasons:

- Some rural properties are large enough and have sufficient on site features to ensure that materials and machinery can be adequately screened.
- Screening will achieve the same intent as storing them in a building.

Point Number 746.68

Summary of Decision Requested: Retain farming as a permitted activity in Rule 22.1.2 P7 Permitted Activities; note that amendments to the definition of "farming" are sought elsewhere in the submission.

Decision Reasons:

- The submitter supports Farming as a permitted activity, however, seek to have the definition of farming amended.

Point Number 746.69

Summary of Decision Requested: Add a new permitted activity (P13) to Rule 22.1.2 Permitted Activities for free-range poultry farming as follows:

Free-range poultry farming

Activity Specific conditions

(a) Coops and associated areas for the treatment and/or disposal of wastes and composting must be set back at least 20m from the nearest site boundary,

Decision Reasons:

- Free-range poultry farming is a distinct land based activity utilising pasture and should be treated the same as any other permitted livestock activity that utilises natural soil quality on the site.
- The Rural Zone is the only location that a free-range poultry activity can occur where poultry has access to areas of open grazing land.
- The effects of free-range poultry farming can be mitigated by compliance with certain standards.

Point Number 746.70

Summary of Decision Requested: Add five new permitted activities to Rule 22.1.2 Permitted Activities consistent with the Franklin Section of the Operative District Plan as follows:

- *On Site Primary Produce Manufacturing*
- *Farming Visit*
- *Public Garden*
- *Packhouse and coolstore*
- *Farmers' market (meeting certain performance standards).*

Decision Reasons:

- There needs to be greater scope for Permitted Activities.
- These activities are appropriate for the Rural Zone as they are associated with farming activities and can be readily expected to establish without the need for resource consent.

Point Number 746.71

Summary of Decision Requested: Add a new controlled activity (C1) to Section 22.1 Land Use- Activities for poultry hatcheries.

Decision Reasons:

- Poultry Hatcheries are a Controlled Activity in the Franklin Section of the Operative District Plan.
- The effects of production processing, incubation and hatching of fertilised eggs can be adequately controlled by performance standards and conditions of consent. This includes ancillary activities and buildings including rearing and production sheds which are essential to the biosecurity and operation requirements of a hatchery.
- Poultry Hatcheries also play a critical role in the continued operation and growth of the poultry industry which provides food for people and contributes to individual and community wellbeing.

Point Number 746.72

Summary of Decision Requested:	Retain produce stalls as a permitted activity in Rule 22.1.2 P9 Permitted Activities as notified; note that amendments to the definition of "Produce Stall" are sought elsewhere in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports Produce Stalls as a permitted activity, however, seek to have the definition of produce stall amended.
Point Number	746.73
Summary of Decision Requested:	Delete from Rule 22.1.3- Restricted Discretionary Activities any reference to free range poultry farming and impose more suitable setbacks.
Decision Reasons:	<ul style="list-style-type: none"> Free-range poultry farming is a distinct activity that should not come under the definition of intensive farming. Free-range poultry farming should not be subject to a 100m boundary setback. A 20m setback is adequate for a permitted free-range farming activity excluding grazing which should be allowed to occur in paddocks up to the boundary of the site (as per any other permitted livestock activity). Condition 22.1.3(d)(ii) should not apply to free-range poultry farming which should be treated the same as any other permitted livestock activity.
Point Number	746.74
Summary of Decision Requested:	Delete from Rule 22.1.3 RD1- Restricted Discretionary Activities any reference to poultry hatcheries OR Amend Rule 22.1.3 RD1- Restricted Discretionary Activities by excluding poultry from the conditions.
Decision Reasons:	<ul style="list-style-type: none"> The condition is too restrictive for other types of poultry farming to achieve when combined with the 300m building setback for a sensitive land use. With the introduction of minor dwellings as a permitted activity, any application for a new poultry farm would result in potentially affected parties given that such a farming activity will restrict a neighbour's ability to establish a dwelling or minor dwelling (or other residential activity like a sleepout) as a permitted activity.
Point Number	746.75
Summary of Decision Requested:	Delete the 300m boundary setback requirement for poultry farming from Rule 22.1.3 RD1- Restricted Discretionary Activities. AND Add a reference to assessment criteria/guidelines and effects of the activity as per the Franklin Section of the Operative District Plan.
Decision Reasons:	<ul style="list-style-type: none"> There is no 300m site boundary setback condition in the Franklin Section of the Operative District Plan, only assessment criteria which provide a buffer area/guideline of 20m from the boundaries of a site and 100m from an existing dwelling on an adjacent property. This is considered to be more appropriate as it recognises changes and technological advancement in modern poultry shed design including ventilation and feeding/drinking systems which reduce the effects of poultry farming. Any site boundary setbacks need to changes and advances in technology and the effects of the activity including the lower bird densities being introduced across the poultry industry. Unable to find in Council's Section 32 report for the Rural Zone the justification for a 300m setback.
Point Number	746.76
Summary of Decision Requested:	Add new Restricted Discretionary Activities to Rule 22.1.3 Restricted Discretionary Activities for small-scale commercial / retail activities that may be ancillary to rural activities occurring on the site e.g. <ul style="list-style-type: none"> Rural commercial services that support rural production activities; Small scale commercial activities ancillary to a primary rural activity, such as cafes on berry picking farms; Tourism activities and ancillary commercial or food and beverage activities; Small wedding venues; Veterinary Clinics; Boarding Kennels and Catteries; Care Centres (less than 10 people);
Decision Reasons:	<ul style="list-style-type: none"> Refer to the Auckland Unitary Plan definition and provisions for similar activities. The Plan fails to provide opportunities for small scale commercial/retail activities that may be ancillary to rural activities. There are a range of small scale activities that support the rural economy and can be appropriately accommodated in the Rural Zone. For example, the District has tourism opportunities which rural land owners may want to draw upon however the Plan makes no provision for. Changing the Plan to allow for some more Restricted Discretionary Activities will give more clarity around the types of non-productive activities that may be acceptable in the Rural Zone and are reasonably expected to locate in this area.
Point Number	746.77
Summary of Decision Requested:	Add a new restricted discretionary activity (RD3) to Rule 22.1.3 Restricted Discretionary Activities)for clean fill outside of an Outstanding Natural Landscapes, Outstanding Natural Feature, Outstanding Natural Character Area and a High Natural Character Area, with matters of discretion including: <ul style="list-style-type: none"> Waste acceptance Design and construction Site operation procedures Response to natural hazards Management of non-complying material Landscape Dust Noise Biodiversity Water quality Trraffic effects Monitoring.
Decision Reasons:	<ul style="list-style-type: none"> Cleanfill (as per the WasteMINZ definition) involves the depositing and handling of non-contaminated material. This material does not generate objectionable odour, contamination or high dust emissions, unlike other activities that involve disposal of material to land.

- With matters of discretion and assessment criteria restricted to waste acceptance, design and construction, site operation procedures, response to natural hazards, management of non-complying material, landscape effects, dust, noise, traffic effects and monitoring.

Point Number 746.78

Summary of Decision Requested: Retain Rule 22.2.3.1- Earthworks-General as notified.

Decision Reasons:

- The submitter is generally supportive of this provision.

Point Number 746.79

Summary of Decision Requested: Amend Section 22.3 Landuse - Building to clarify what buildings are permitted and how this relates to the activities in Rule 22.1- Land Use-Activities. This is to avoid any confusion, particularly in regards to Section 9 of the Resource Management Act.

Decision Reasons:

- This rule refers to permitted dwellings and minor dwellings but does not reference other buildings such as accessory buildings (eg garages and sleepouts) to dwellings/minor dwellings.
- It also does not reference buildings such as milking sheds or greenhouses that are associated with permitted farming activities.
- It is unclear if section 9 of the RMA applies here in that all buildings not listed under Rule 22.3 are Permitted as they will not contravene a district rule? There is no overriding activity status for any other building not listed in Rule 22.3 like there is under Rule 22.1 Land Use - Activities, so it is assumed that the buildings themselves are all permitted (subject to meeting the other standards in Rule 22.3). It is intended that an industrial or commercial building is a permitted land use in the Rural Zone as long as it meets the other standards in Rule 22.3, noting that the use of the building itself (i.e the industrial use/activity within the building) requires resource consent under Rule 22.1 land Use - Activities.

Point Number 746.80

Summary of Decision Requested: Amend Rule 22.3.1 P1 Number of dwellings within a lot to provide for three dwellings on lots over 100 hectares as a permitted activity.

Decision Reasons:

- Three Dwellings on lots over 100 hectares should be permitted as per the Franklin Section of the Operative District Plan.
- Lots of over 100 hectares are able to absorb and mitigate the effects of a third house by virtue of their size.

Point Number 746.81

Summary of Decision Requested: Amend Rule 22.3.2 P1(b)(i)-Minor dwelling as follows:

The minor dwelling must be located within ~~25m~~ 50m of the dwelling.

Decision Reasons:

- The submitter generally supports this provision, however, it impacts (along with other residential activities) on the identification of potentially affected persons for an application for a new intensive farming activity needs to be considered in relation to Rule 22.3.7.2(a) (vii).
- The submitter is also unable to find in Council's Section 32 report for the Rural Zone the justification for a 20m separation distance.
- There is no longer a requirement that the minor dwelling has to be occupied by a dependent relative, therefore a larger separation distance would provide enhanced privacy between residents of each dwelling.

Point Number 746.82

Summary of Decision Requested: Amend Rule 22.3.5 P1 - Daylight admission to allow the rule to be infringed where written consent of the land owners and occupiers of the abutting sites(s) have been obtained.

Decision Reasons:

- A daylight admission infringement is that similar to a yard infringement which only affects the adjoining neighbouring property.

Point Number 746.83

Summary of Decision Requested: Amend Rule 22.3.6 P1-Building Coverage to exclude buildings associated with permitted and controlled farming activities (including free range poultry farming and poultry hatcheries).

AND

Amend Rule 22.3.6 P1 (a) (i)-Building Coverage to increase the 2% building coverage limit.

OR

Delete Rule 22.3.6 P1 Building Coverage

Decision Reasons:

- The proposed rule could unduly restrict someone wanting to use the land for a productive purpose (e.g greenhouses).
- Consider whether a building coverage rule in the Rural Zone is necessary at all given there is no such requirement in the Franklin Section of the District Plan.

Point Number 746.84

Summary of Decision Requested: Amend Rule 22.3.7.1 Building setbacks - All boundaries to have a 12m setback from the boundary of an adjoining site.

AND

Amend Rule 22.3.7.1 Building setbacks - All boundaries to allow the setback to be reduced where written neighbours' consent has been obtained.

Decision Reasons:

- This rule should be allowed to be infringed where the written consent of the owners and occupiers of the abutting site(s) have been obtained. This should be specified as per the Franklin section without the need to pay Council \$350 to process a permitted boundary activity.
- A 25m boundary setback can be significant for a site under 1.6 hectares and can unduly restrict the use of the land. The 12m boundary setback referred to in other instances could be appropriate here as it is unclear as to what an extra 13m in an open rural landscape would achieve in relation to reducing reverse sensitivity effects from adjoining land. For example, 12m is still sufficient for a person on a property less than 1.6 hectares to establish screen planting or internal fencing to reduce potential effects.
- It is unclear as to why a habitable building on a property greater than 1.6 hectares needs to be 25m from every boundary other than a road boundary. While these properties are larger and have more room to accommodate the setback, we don't see why a 12m setback would not be adequate here similar to the reasons given above.
- Many existing dwellings, especially within the former Franklin District, will encroach into the new boundary setback. While these will have existing use rights it would mean any minor dwelling, extension to the existing dwelling or accessory building, within the curtilage area or the existing dwelling may not be able to comply with the permitted setback standards resulting in an increase in consents at additional costs to these land owners. The existing rural environment should be considered in the development appropriate boundary setbacks rather than applying the Operative Waikato Section Waikato District Plan standards which don't adequately reflect the existing environment or building setbacks.
- Council's Section 32 report for the Rural Zone (pg 84) states that larger setback are required if the neighbouring lot is over 6 hectares for reverse sensitivity reasons. However, there is no justification as to why 25m is an appropriate distance.

Point Number

746.85

Summary of Decision Requested:

Amend Rule 22.3.7.2 Building Setback -Sensitive land use after further consideration of its effect on applications for poultry farming activities

OR

Delete the setback distances in relation to poultry farming in Rule 22.3.7.2 Building Setback -Sensitive land use

Decision Reasons:

- Rule 22.3.7.2(a)(vii) sets an arbitrary distance for all 'intensive farming' which is not necessarily reflective of the effects of a poultry farm.
- It results in all properties within 300m of the boundary of a site proposed for a poultry farming operation being considered as adversely affected for notification purposes. This because the establishment of a new poultry farm would restrict a neighbour's ability to establish a potential dwelling or minor dwelling (or other residential activity like a sleepout) as a permitted activity in the future. Furthermore, this is not a breach of poultry farm activity rule and can't be included as a consent requirement in the application.
- The setback distance needs to be justified, amended or deleted so that it does not unduly result in the notification of applications for new poultry farms.
- In addition, any setback should be taken from the intensive farming activity itself, not the site boundary of the activity. This is because the effects that the setback is trying to mitigate are generated by/from the activity, not the site boundary. If an intensive farming activity decides to expand in the future within the site boundary then the effects of this on the receiving environment will simply need to be addressed at that time and the application considered on its merits.
- Poultry farms also generally establish on large rural sites and therefore a 300m sensitive building setback from the boundary (and not the activity) is even more significant. This is evidenced when a poultry farm is located in just one corner or at one end of a large (eg 40-100 hectare) property. When combined with Rule 22.1.3(e)(i), there is a total setback of 600m that affect poultry farm applications (i.e 300m from their site boundary to be a restricted discretionary activity and 300m from any dwelling/minor dwelling (or other sensitive activity like a sleepout) that is either existing or potentially able to be constructed on neighbouring land.
- It is almost impossible for a site to be found in the District where the 'Building setback sensitive land use' rule would not affect the establishment/notification of a poultry farm.
- The submitter was unable to find in Council's Section 32 report for the Rural Zone the justification for a 300m setback.

Point Number

746.86

Summary of Decision Requested:

Amend the activity status for Rule 22.4.1.1 PR1, PR2, PR3 and PR4 -Prohibited subdivision from Prohibited to Non-Complying Activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies.
- It is fanciful to think that every subdivision on high class soil would result in a significant adverse effect on the environment.
- Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unfair and unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site.
- Established rural activities include greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries or commercial orchard activities.
- Rural activities do not need to be held on the same certificate of title as other rural activities, and there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and the efficient and effective operation of the activity.
- A number of commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than having no other option but to dispose of the entire property, or the need to invest more capital in the operation.
- The prohibited activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable in the long-term following its separation from other rural activities on the site.
- PR4 states any subdivision of a lot previously amalgamated for the purpose of a transferable lot subdivision is prohibited.
- This rule may unreasonably restrict the subdivision potential over and above what is necessary to avoid undermining the intent of the rule under which these Records of Title were created.
- Under Rule 22B of the Franklin Section, the donor certificates of title had to meet a minimum area of 1ha each. However there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation.
- It is noted that under the Franklin Section of the District Plan there were no corresponding rules that limited any further subdivision of the donor lot.
- While subdividing lots amalgamated under Section 22B of the Franklin Section require closer scrutiny this should merit a Non-Complying status only. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbour without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected in the Rural Zone from inappropriate subdivision and development and that subdivision in the Urban Expansion Area does not undermine the integrated and efficient development of this zone.

Point Number

746.87

Summary of Decision Requested:

Amend Rule 22.4.1.1 - Prohibited subdivision to change all references of "lot" to "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title.
- This may occur where a stream or a public road bisects land held together in one Record of Title.

Point Number

746.88

Summary of Decision Requested:

Retain Rule 22.4.1.2 (a)(i) – (ii) General Subdivision as notified.

Decision Reasons:

- The submitter supports the inclusion of the General Subdivision rules.

Point Number 746.89

Summary of Decision Requested: Add a new discretionary activity to Rule 22.4.1.2 General Subdivision, as follows:

DL
(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RDL
(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RDL

Decision Reasons:

- General subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- This will ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not to meet an arbitrary rule.
- A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies and achieving the anticipated environmental results.
- For lots smaller than 8,000m² it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land.
- If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land.
- If the land comprises productive potential, then a Farm management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- The creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other activities on the site should be provided for.

Point Number 746.90

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v)-General Subdivision

AND

Add a new matter of discretion to Rule 22.4.1.2 RD1 (b)- General subdivision as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 report regarding the relevance or practicality of this rule.
- The submitter agrees with the intent of this rule, which is to design subdivision to avoid the fragmentation of the high class soils.
- The strict and arbitrary 80/20 requirement of this rule may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions.
- The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Land use Capability Reporting with every subdivision application under the General Provisions to demonstrate that this exact figure is met.
- This becomes an additional compliance cost that does not necessarily result in a better environmental outcome.
- Consent planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 746.91

Summary of Decision Requested: Retain Objective 4.2.17 Housing types.

Decision Reasons:

- Submitter supports this objective as it gives effect to the strategic direction outlined in section 4.1 and promotes variety in the future housing stock to help achieve 4.1.2 and 4.1.5.
- Enabling denser housing options gives effect to the Future Proof Strategy identified in 1.5.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton (67%) and the larger settlements of the district (21%). This involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- The Plan needs to provide more direction through the objectives and policies on this issue. As the Plan has one residential zone it needs to identify through the objectives and policies locations where medium density development is appropriate and encourage higher densities in appropriate locations. The Plan should specify that multi-unit development and smaller lots are encouraged close to Town Centres, public amenities and public transport stations. This will ensure the Strategic objectives and met by encouraging higher densities within a walkable distance to existing amenities.
- Diversity and a range of housing choice should also be promoted within greenfield sites. The rural areas of Tuakau contain versatile soils that are used for rural production activities. These soils contribute significantly to both regional and national food supply. Intensification of urban land at higher densities should be encouraged within Tuakau residential areas to ensure that land supply requirements meet while preserving the soil resources. The maximisation of the lands residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area past the lifetime of this Plan. Intensification and higher densities should be encouraged in appropriate locations to avoid additional sprawl into the rural areas.

Point Number 746.92

Summary of Decision Requested: Delete Policy 4.2.18 (b) (v) (D)- Multi-unit development.

Decision Reasons:

- Variation in roof design is a principle for good design and should be a directive with the design guidelines rather than a policy.

Point Number 746.93

Summary of Decision Requested: Retain Policy 4.7.3- Residential subdivision as notified.

Decision Reasons:

- The submitter supports the policies in 4.7.3 as they reflect good design principles while still providing flexibility in design outcomes.

Point Number 746.94

Summary of Decision Requested: Delete Policy 4.5.11(a)(ii)- Residential upper floors: Business Town Centre Zone and Business Zone.

Decision Reasons:

- There may be circumstances where ground floor residences are appropriate, especially where dealing with zone or heritage interfaces.

Point Number 746.95

Summary of Decision Requested: Retain Policy 4.7.2 (a) (i-vi)- Subdivision location and design.

Decision Reasons:

- Policy 4.7.2(a)(i-vi) promotes quality design.

Point Number 746.96

Summary of Decision Requested: Delete Policy 4.7.2 (a) (vii)- Subdivision location and design

OR

Amend Policy 4.7.2 (a) (vii)- Subdivision location and design as follows:

Promote consistent grid layout while allowing for alternative road designs where a grid layout is not appropriate due to topographical constraints.

Decision Reasons:

- Imposing and promoting a grid pattern in all circumstances is contrary to Policies 4.1.9(a) and 4.2.2(a)(ii) and 4.7.3(a)(vii) which require the contour, landform and character of the landscape to be maintained.
- The Plan needs to provide more flexibility for alternative roading designs to respond to the context of the site and the wider environment.
- The design guideline and Policy 4.7.3(a)(iv) aim to limit the length and number of cul-de-sacs which is a more appropriate policy response than promoting a consistent grid layout in all situations.

Point Number 746.97

Summary of Decision Requested: Retain Policy 7.4.7 Lot sizes, except for the amendments sought below

AND

Amend Policy 4.7.4- Lot sizes as follows:

*(a) Minimum lot size and dimension of lots enables the achievement of the character and density outcomes of each zone; ~~and~~
(b) Smaller lots size and multi-unit development promoted within walking distance to existing Town Centres, public amenities and public transport.
(c) Smaller lots size and multi-unit development promoted within new greenfield sites where the land is within walking distance to amenities and reserves.
(d) Avoid undersized lots in the Village Zone.*

Decision Reasons:

- Support Policy 4.7.4 (a).
- This policy needs to be expanded to cover multi-unit development.
- There is a need to promote intensification to achieve compact development to support future public transport.
- For public transport to be viable higher densities within walking distance from a transport station needs to be promoted.
- The policy needs to reflect that in residential areas the density is higher.
- This is important for Tuakau and Pokeno where a commuter train from Auckland to Hamilton is under discussion.
- As the Plan has one residential zone it needs to identify through the objectives and policies locations where medium density development is appropriate and encourage higher densities in appropriate locations.
- The Plan should specify that multi-unit development and smaller lots are encouraged close to Town Centres, public amenities and public transport stations.
- This will ensure the Strategic objectives are met by encouraging higher densities within a walkable distance to existing amenities.
- The rural areas of Tuakau contain versatile soils that are used for rural production activities.
- These soils contribute significantly to both regional and national food supply.
- Intensification of urban land at higher densities should be encouraged within Tuakau residential areas to ensure that land supply requirements meet while preserving the soil resources.
- The maximisation of the lands residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area past the lifetime of this Plan.
- Intensification and higher densities should be encouraged in appropriate locations to avoid additional sprawl into the rural areas.

Point Number 746.98

Summary of Decision Requested: Amend Policy 4.7.7 so that (a) and (b) do not contradict themselves

AND

Amend Policy 4.7.7 (b)- Achieving sufficient development density to support the provision of infrastructure services as follows:

Recognise that the minimum potential yield may not be achieved where there are proven geotechnical constraints or other topographical constraints.

Decision Reasons:

- Policy 4.7.7(a) and (b) are contradictory.
- There may also be other constraints such as flooding, overland, flow paths, rivers that mean the minimum density cannot be achieved.
- Supports the intent of the policy.

Point Number 746.99

Summary of Decision Requested: Add a new clause (iv) to Policy 4.7.10 (a)- Recreation and access as follows:

(iv) Giving effect to the Parks and Reserves Strategy.

Decision Reasons:

- The submitter supports the intent of the policy however development of reserves should be in accordance with the Parks and Reserves Strategy. This should be referenced in the Policy.

Point Number 746.100

Summary of Decision Requested: Retain Objective 5.1.1- The rural environment as notified.

Decision Reasons:

- The Waikato District encompasses valuable areas of high class soils that are of primary importance for food production both regionally and nationally.
- Protecting these soils from adverse effects of inappropriate use and development that may impact their life-supporting capacity is of national importance, this is now being recognised with a national policy statement for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- The submitter supports the strength of wording in this objective and agrees that urban development within the Rural Environment is an outcome contrary to the intent of the Proposed Plan and should be avoided.

Point Number 746.101

Summary of Decision Requested: **Retain** Objective 5.2.1- Rural resources, except for the amendments sought below
AND

Amend Objective 5.2.1 (a) (i)- Rural resources as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils.*

Decision Reasons:

- The submitter supports policy (i) which seeks to maintain or enhance the life-supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and that we suggest 'accessibility' be included in this policy.
- The submitter supports the enhancement and/or restoration of natural ecosystems, surface and ground water quality, and the natural characteristics of fresh waterbodies and coastal waters as set in sub-parts ii, iii and iv of this Policy.
- A method of enhancement should be incentivising the stock exclusion, restoration of biodiversity, and protection of waterways through rural subdivision.
- Providing for conservation lot subdivision via enhancement and/or restoration would enable this policy.

Point Number 746.102

Summary of Decision Requested: **Retain** Policy 5.2.2- High class soils as notified.

Decision Reasons:

- The submitter supports this policy which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 746.103

Summary of Decision Requested: **Add** a new residential zone to the Proposed District Plan, separating the residential zone into two zones to support intensification and compact growth within existing town centres and future public transport stations. A zone similar to the mixed housing zone used in the Auckland Unitary Plan or the medium density zone as defined in the Draft National Planning Standards would be suitable.

Decision Reasons:

- Supports the rezoning of land for residential purposes.
- The blanket zoning applied by the Council does not give effect to the following strategic direction outlined in Section A and Chapter B
 - 1.5.1 Compact Urban Development
 - 1.12.1- Waikato District Council as a Future Proof Partner has made a commitment to the Future Proof Strategy which will manage growth for the next 30 years. Settlement patterns are a key tool used within the Future Proof Strategy. They provide the blueprint for growth and development and aim to achieve a more compact and concentrated urban form over time.
 - 1.12.3(c) A district that has a compact urban environment that is focused in defined growth areas, and offers ease of movement, community well-being and economic growth.
 - 4.1.2 - Future settlement pattern is consolidated in and around existing towns and villages in the district.
 - 4.1.5(a) Encourage higher density housing and retirement villages to be located near to and support commercial centres, community facilities, public transport and open space.
 - 4.1.10(i) Subdivision, land use and development in Tuakau's new residential and business areas occurs in a manner that promotes the development of a variety of housing densities, diversity of building styles and a high quality living environment.
 - 4.2.16 and 4.2.17.
- The blanket residential zoning will result in a monotonous suburban form which does not meet the compact form and intensification outcomes sought by the strategic objectives of the Plan. This is at odds with the strategic direction which encourages a more compact urban form around existing Town Centres.
- As defined by the National Planning Standards the purpose of the residential zone is to provide primarily for residential activities in areas of suburban character. The residential zone should be broken into overlays to recognise the specific characteristics of each town. The residential zone should provide for smaller lot sizes and greater intensification within existing residential areas, this will ensure a compact urban form that is viable for future public transportation. New greenfield development can be subject minimum lot to meet the density requirements.

Point Number 746.104

Summary of Decision Requested: **Retain** Objective 3.1.1- Biodiversity and ecosystems as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 746.105

Summary of Decision Requested: **Retain** Policy 3.1.2- Policies as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 746.106

Summary of Decision Requested: **Retain** Policy 3.2.8 Incentivise subdivision, except for the amendments sought below

AND

Add a new clause (b) to Policy 3.2.8- Incentivise subdivision as follows:

(b) Incentivise subdivision in the Rural Zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous Biodiversity.

Decision Reasons:

- The submitter supports incentivising the protection of existing biodiversity with the ability to subdivide subject to meeting certain criteria.
- The submitter seeks that this policy be expanded to include provision for the enhancement and/or restoration of areas when once restored, would be of a suitable size and quality to achieve a functioning ecosystem. Appendix 2 of the Proposed Plan - 'Criteria for Determining Significance of Indigenous Biodiversity' could provide the basis for assessing the eligibility of these areas. Eligible areas would likely be wetlands and waterways which are degraded in the Waikato District due to farming activities such as stock and cropping.
- Incentivising restoration is in line with The Vision and Strategy for the Waikato River.

Point Number 746.107

Summary of Decision Requested: **Delete** Policy 4.2.15 (a) (iv)- Earthworks

OR

Amend Policy 4.2.15 (a) (iv)- Earthworks to enable land to be developed for residential activities as follows:

The importation of cleanfill is avoided in the Residential Zone *except where it is required to enable land to be developed for residential purposes.*

OR

Amend Policy 4.2.15 (a) (iv)- Earthworks to enable land to be developed for residential activities as follows:

The *inappropriate* importation of clean fill is avoided in the Residential Zone *where it is not required to enable greenfield land to be developed.*

Decision Reasons:

- Clean fill may be required in residential zoned sites to enable greenfield land to be developed for residential purposes. The requirement to avoid filling in all circumstances may restrict the ability to develop residential land where balanced cut to fill earthworks are inappropriate or cannot be achieved.
- This policy is contradictory to the Objective 4.2.14(a)-Earthworks which states that earthworks facilitate subdivision, use and development.
- Policy 4.2.15(iv) should be amended to avoid this contradiction.

Point Number 746.108

Summary of Decision Requested: **Retain** Objective 4.2.16 Housing options, except for the amendments sought below

AND

Add to Objective 4.2.16- Housing options as follows:

Multi-unit development including low rise apartments is promoted within walking distance to existing Town Centres, public amenities and public transport.

Smaller lots size and multi-unit development promoted within new greenfield sites where the land is within walking distance to amenities and reserves.

Decision Reasons:

- The submitter supports Objectives 4.2.16 and 4.2.17 as they give effect to the strategic direction outlined in Section 4.1 and promote variety in the future housing stock to help achieve Objectives 4.1.2 and 4.1.5.
- Enabling denser housing options gives effect to the Future Proof Strategy identified in 1.5.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton (67%) and the larger settlements of the district (21%). This involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- The Plan needs to provide more direction through the objectives and policies on this issue.
- As the Plan has one residential zone it needs to identify through the objectives and policies locations where medium density development is appropriate and encourage higher densities in appropriate locations.
- The Plan should specify that multi-unit development and smaller lots are encouraged close to Town Centres, public amenities and public transport stations. This will ensure the Strategic objectives and met by encouraging higher densities within a walkable distance to existing amenities.
- Diversity and a range of housing choice should also be promoted within greenfield sites.
- The rural areas of Tuakau contain versatile soils that are used for rural production activities. These soils contribute significantly to both regional and national food supply.
- Intensification of urban land at higher densities should be encouraged within Tuakau residential areas to ensure that land supply requirements meet while preserving the soil resources.
- The maximisation of the lands residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area past the lifetime of this Plan.
- Intensification and higher densities should be encouraged in appropriate locations to avoid additional sprawl into the rural areas.

Point Number 746.109

Summary of Decision Requested: **Amend** Rule 22.4.1.4- Boundary relocation as follows:

(a) *The boundary relocation must:*

(i) *Relocate a common boundary or boundaries between two or more existing Records of Title or consented lots that existed prior to 18 July 2018.*

Decision Reasons:

- Boundary relocation provisions support flexibility to allow rural properties to rationalise large landholdings to provide a logical lot arrangement that better supports the farming activity.
- Boundary relocations typically result in positive effects through the enhancement of the productive farming system and allow for the relocation of potential house sites to more favourable locations.
- Many farms in the District are held in multiple Records of Title, and have the ability to relocate boundaries and create General and Conservation Lots under the proposed provisions.
- The submitter would like to see provision made for the relocation of the boundaries of adjacent consented lots and Records of Title held in common ownership as per the Franklin Section of the District Plan
- Retention of the date, 18 July 2018 is appropriate as it would allow for closer scrutiny and a higher activity status for those Records of Title and consented lots created under the Transferable and Environmental Lot rules of the previous sections of the District Plan which had restrictions on size.

Point Number

746.110

Summary of Decision Requested:

Amend Rule 22.4.1.5 RD1 (a)-Rural Hamlet Subdivision to allow for the relocation of consented lots to ensure lots can be clustered within a Hamlet and reduce the lot size requirements to ensure from a visual, character and farming perspective that a Rural Hamlet is achieved. The amendments sought are as follows:

(a) Subdivision to create a Rural Hamlet must comply with all of the following conditions:

- (i) It results in 3 to 5 proposed lots being clustered together;
- (ii) All existing Records of Title and/or consented lots form one continuous landholding;
- (iii) Each proposed lot has a minimum of ~~0.5~~ **0.5** ~~000m²~~ **000m²**;
- (iv) Each proposed lot has a maximum area of ~~1.6~~ **1.6** ~~ha~~ **ha**;

...

AND

Amend the matters of discretion in Rule 22.4.1.5 RD1 (b)- Rural Hamlet Subdivision as follows:

(b) Council's discretion is restricted to the following matters:

- (i) subdivision layout and design including dimension, shape and orientation of the proposed lots and specified building areas;
- ...
- (vii) effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- The submitter supports subdivision provisions for Hamlet subdivision in the Rural Zone. When designed well positive benefits of Rural Hamlets include shared infrastructure, improved and enhancement of the productive farming system, and providing housing and lifestyle choices within the District.
- The submitter seeks the inclusion of consented lots, including General and Conservation Lots, in the Hamlet provisions. This would have positive outcomes through the provision of shared infrastructure, enhancement of the production systems. It would also limit the wide dispersal of lots and enable subdivision layout to account for effects from intensive farming or mineral extraction activities.
- Rural Hamlets can be difficult to achieve in reality and Hamlet design needs to specifically respond to the site circumstances and it may be more appropriate to have smaller size lots to ensure the benefits of Hamlet design are achieved. The purpose of Rural Hamlets is to allow for compact design within a rural setting, dwellings within a Hamlet borrow their rural character and amenity from adjoining rural production land.
- Five lots at 1.6ha would take up 8ha of land and would visually result in dispersed rural housing, not a Hamlet. The Hamlet provisions should ensure that a response to the landscape context is more important than meeting performance standards relating to lot size and should allow for a reduction in the lot size.
- Rural character and amenity values will be maintained by the over 20ha balance lot surrounding the Hamlet.

Point Number

746.111

Summary of Decision Requested:

Amend Rule 22.4.1.6 RD1-Conservation lot subdivision as follows:

(i) The lot must contain:

- ~~A. a contiguous area of existing Significant Natural Area either as shown on the planning maps, and/ or~~
- ~~B. a contiguous area to be enhanced and/or restored;~~

as determined by an experienced and suitably qualified ecologist in accordance with the table below...:

(ii) The area of Significant Natural Area and/or area to be enhanced and/or restored is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);

(iii) The Significant Natural Area or area to be restored is not already subject to legal protection ~~a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act.~~

(iv) The subdivision proposes to legally protect all areas of Significant Natural Area and/or area to be restored ~~by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth National Trust Act.~~

(v) An ecological management plan is prepared to address the ongoing management of the covenant protected area to ensure that the Significant Natural Area ~~area to be protected~~ is a self-sustaining and that plan:

- A. Addresses fencing requirement for the covenant protected area;
- B. Addresses ongoing pest plan and animal control;
- C. Identifies any enhancement and/or restoration ~~or edge~~ planting required within the covenant area to be protected.

...

(b) Council's discretion is restricted to the following matters:

- (i) Subdivision layout and proximity of building platforms to Significant Natural Area ~~the area to be protected~~;
- (ii) Matters contained in an ecological management plan for the covenant protected area;
- (iii) Effects of the subdivision on localised rural character and amenity values;
- (iv) Extent of earthworks including earthworks for the location of building platform and access ways;
- (v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- The submitter supports the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity which offers positive benefits for the Region.
- There is no provision for ecological enhancement and/or restoration in the Conservation Lot Rules.
- There are significant biodiversity and water quality benefits to be gained from ecological enhancement particularly along waterways and wetland areas. Water quality is a key issue identified by the Regional Policy Statement and The Vision and Strategy (which requires an improvement of water quality in the Waikato catchment, not simply maintenance).
- It is also recognised in the corresponding Rural Objectives and Policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways.
- The Plan should be enabling of improving both biodiversity and water quality within the Waikato Catchment and incentivise enhancement and/or restoration of areas that meet one or more criteria in Appendix 2: Criteria for Determining Significance of Indigenous Biodiversity.
- Revegetation approximately costs \$45,000 to \$70,000 per hectare, excluding fencing of revegetated areas from stock. Incentivisation through subdivision would assist in offsetting this cost and encourage enhancement and/or restoration planting.
- The submitter seeks that provisions for ecological enhancement and/or restoration of appropriate areas be included in the Conservation Lot Subdivision rules. Appropriate features to be restored should meet one or more criteria in Appendix 2: Criteria for Determining Significance of Indigenous Biodiversity, or areas identified as Significant Natural Areas that don't meet the minimum size requirements for subdivision are able to be increased in size through additional enhancement and/or restoration planting.
- The submitter agrees that any area that enables subdivision under these rule be legally protected by way of a registered interest on the Record of Title. However other forms of legal protection, such as the vesting of the conservation area in Council ownership (such as an esplanade reserve to afford public access) or by way of a section 221 consent notice (for areas that have unusual management requirement) may be appropriate. The submitter suggests that this rule require legal protection only and leave the mechanism of protection to the discretion of Council when assessing the application (eg. encumbrance, bond, consent notice, covenant or vesting as a reserve).

Point Number	746.112
Summary of Decision Requested:	Amend Rule 22.4.1.6 RD1 (iii)-Conservation Lot Subdivision to remove reference to Queen Elizabeth II and the Reserves Act.
Decision Reasons:	<ul style="list-style-type: none"> • Other mechanism maybe more appropriate, including the vesting in Council as Esplanade Reserve or the protection by way of Section 221 Consent Notice.
Point Number	746.113
Summary of Decision Requested:	Retain Rule 22.4.1.7-Subdivision to create a reserve as notified.
Decision Reasons:	<ul style="list-style-type: none"> • It enhances and incentivises public access through subdivision providing a win-win for the landowner and public.
Point Number	746.114
Summary of Decision Requested:	Amend Rule 22.4.9 RD1 (a)(i) Subdivision - Building Platform as follows: <i>(i) can accommodate a 30m diameter circle has an area of 1,000m² exclusive of boundary setbacks.</i>
Decision Reasons:	<ul style="list-style-type: none"> • The submitter would like to see this as a 30m diameter circle exclusive of setback, instead of a 1000m² area with no dimensions specified.
Point Number	746.115
Summary of Decision Requested:	Add a new rule to Section 22.4-Subdivision as follows: <u>Subdivisions of land containing mapped off-road walkways/trails/cycleways</u> <u>BD1</u> <i>(g) The subdivision where walkways/trails/cycleways shown on the planning maps are to be provided as part of the subdivision must comply with all of the following conditions: (i) The walkway/trail/cycle way is at least 3 metres wide and is designed and constructed for shared pedestrian and cycle use, as per Rule 14.12.1 P8 (Transportation); (ii) The walkway/trail/cycleway is generally in accordance with the walkway/trail/cycleway route shown on the planning maps; (iii) The walkway/trail/cycleway is shown on the plan of subdivision and vested in the Council.</i> <i>b) Council's discretion shall be restricted to the following matters: (i) Alignment of the walkway/trail/cycleway; (ii) Drainage in relation to the walkway/trail/cycleway; (iii) Standard of design and construction of the walkway/trail/cycleway; (iv) Land stability; (v) Amenity matters including batter slopes; and (vi) Connection to reserves.</i> <u>D1</u> <u>A subdivision that does not comply with the above Rule.</u>
Decision Reasons:	<ul style="list-style-type: none"> • The inclusion of trails/cycleways on the Planning Maps needs to be reflected in the plan provisions, particularly subdivision provisions.
Point Number	746.116
Summary of Decision Requested:	Amend Rule 23.2.3.1 P2 (a)(i)- Earthworks - General to increase the earthworks volume to 500m ³ .
Decision Reasons:	<ul style="list-style-type: none"> • Where subdivision has been approved by Council there should be no requirements for land owners to apply for additional consents for earthworks to undertake permitted activities on the land. • The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents. • Permitted land use standards should be able to control the adverse effects of any earthworks works.
Point Number	746.117
Summary of Decision Requested:	Retain Rule 23.3.2 P1-Minor Dwelling as notified.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	746.118
Summary of Decision Requested:	Amend Rule 23.3.5 P1-Daylight Admission as follows: <i>A building must not protrude through a height control plane rising at an angle of 45 37-degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.</i>
Decision Reasons:	<ul style="list-style-type: none"> • An angle of 37 degrees to be harder to follow than the general standard of 45 degrees that is presented across many other Plans in New Zealand. • 45 degrees is clear cut and easy to measure.
Point Number	746.119

Summary of Decision Requested:	Add to Rule 23.3.7.5 P1-Building Setbacks - Waterbodies as follows: <u>a building must be set back a minimum of 10 metres from the bank of a perennial or intermittent stream (named or unnamed).</u>
Decision Reasons:	<ul style="list-style-type: none"> • Rule 22.3.7.5 has not included minimum setbacks from the bank of a perennial or intermittent stream.
Point Number	746.120
Summary of Decision Requested:	Amend Rule 23.4.2 RD1 (a)(i)-General Subdivision as follows: <u>All proposed lots must have a minimum net site area of 3500m² and an average net site area of at least 5000m²</u>
Decision Reasons:	<ul style="list-style-type: none"> • A blanket minimum lot size can present challenges when designing a subdivision where there are different parent lot shapes, sizes and topographical/vegetative/other constraints. • Incorporating a minimum net site area and average net site area for the subdivision will provide for greater flexibility in the instances where physical constraints exist.
Point Number	746.121
Summary of Decision Requested:	Amend Rule 23.4.7 RD1 (a)-Subdivision - Road Frontage. AND Amend Rule 23.4.7-Subdivision-Road Frontage as per Rule 26.6.4-Vehicular Access Requirement of the Operative Waikato District Plan-Franklin Section.
Decision Reasons:	<ul style="list-style-type: none"> • The layout of a development is dependent on the size and shape of the site as well as its topography (amongst other constraints). While a 15m minimum width along a road boundary can generally work in many developments that have the ability to follow a grid design, not every site is flat with no size/shape constraints. • Sites with topographical natural or physical constraints may be unable to practically implement a layout that achieves 15m road frontage for all lots with the road. There may also be sites where the lay of the land is best suited to an alternative roading design. • There is no analysis in the s32 regarding this relevance or practicality of this rule.
Point Number	746.122
Summary of Decision Requested:	Delete Rule 23.4.9 RD1 (a)-Subdivision Creating Reserves and make it a matter of discretion
Decision Reasons:	<ul style="list-style-type: none"> • Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective. The enforcement of the rule may increase the cost of development which could be passed onto purchasers. • This is an arbitrary standard which may not be relevant for all reserve types or developments. • Safety and surveillance of reserves may be achieved with less road frontage. • There is no analysis in the s32 stating why the 50% road frontage rule has been applied. While this may be a principle to follow it should not be enforced through a rule.
Point Number	746.123
Summary of Decision Requested:	Retain Chapter 24: Village Zone as notified, except for the amendments sought below.
Decision Reasons:	<ul style="list-style-type: none"> • Village Zone provisions provide for the efficient use of the urban land resources. • Village Zone provisions enable the subdivision of land to provide for the growth of the district.
Point Number	746.124
Summary of Decision Requested:	Add a new permitted activity to Rule 24.1.1-Permitted activities as follows: <u>A new retirement village or alterations to an existing retirement village.</u>
Decision Reasons:	<ul style="list-style-type: none"> • Given the demand for such facilities, provision should be made for retirement villages in all urban areas, including the village zone.
Point Number	746.125
Summary of Decision Requested:	Amend Rule 24.2.4.1 P1 (a)(ii)-Earthworks - General to increase the earthworks volume to 500m ³ .
Decision Reasons:	<ul style="list-style-type: none"> • Where subdivision has been approved by Council there should be no requirements for land owners to apply for additional consents for earthworks to undertake permitted activities on the land. • The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents. • Permitted land use standards should be able to control the adverse effects of any earthworks.
Point Number	746.126
Summary of Decision Requested:	No specific decision is sought, but the submission recognises that the importation of fill to enable residential development is appropriate in Rule 24.2.4.1 Earthworks General, and questions whether this would be a permitted activity (P2) or a non-complying activity (NC1).
Decision Reasons:	

- These provisions seem to be workable but we are interested in the thoughts of other submitters.
- Cleanfill may be required in residential zoned sites to enable greenfield land to be developed for residential purposes.
- It is unclear whether cleanfill is a permitted activity (P2) or a non-complying activity (NC1). Non-complying would be too restrictive and needs to be more lenient to enable greenfield development within residential zones.

Point Number 746.127

Summary of Decision Requested: Retain Rule 24.3.2 P1 Minor dwelling as notified.

Decision Reasons:

- No reasons provided.

Point Number 746.128

Summary of Decision Requested: Amend Rule 24.3.4 P1-Daylight Admission as follows:

A building must not protrude through a height control plane rising at an angle of ~~45~~ 37 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

Decision Reasons:

- An angle of 37 degrees to be harder to follow than the general standard of 45 degrees that is presented across many other Plans in New Zealand.
- 45 degrees is clear cut and easy to measure.

Point Number 746.129

Summary of Decision Requested: Retain Rule 24.3.5 Building Coverage as notified.

Decision Reasons:

- These building coverages recognise the different attribute of lot connected to public wastewater and correspond with rule 24.4.2 Subdivision - Te Kowhai and Tuakau .

Point Number 746.130

Summary of Decision Requested: Retain Rule 24.3.6.3 P3 Building setback- Waterbodies except for the amendments sought below

AND

Amend Rule 24.3.6.3-Building setback - Waterbodies as follows:

P1(a)(l)C. Named River bank,

...

P3. A building must be set back a minimum of 10m from the bank of a perennial or intermittent named or unnamed stream.

Decision Reasons:

- It is important to define a stream to avoid confusion with the definition of a river. The RMA defines a river as "a continually or intermittently flowing body of fresh water; and includes a stream and modified watercourse." If a watercourse is named "Stream" then it should be subject to the appropriate setback by the Plan.

Point Number 746.131

Summary of Decision Requested: Amend Rule 24.4.1 RD1 (a)(i)- Subdivision- General as follows:

(i) Proposed lots not connected to public water and wastewater infrastructure must have a minimum net site area of 2,500m² and an average net site area of 3,000m², except where the proposed lot is an access allotment or reserve lot.

(ii) Proposed lots connected to public water and wastewater infrastructure must have a minimum net site area of 1,000m² except where the proposed lot is an access allotment or reserve lot.

Decision Reasons:

- Should reticulation become available in other locations (other than Te Kowhai and Tuakau), then the minimum lot size should reflect this.
- A blanket minimum lot size can present challenges when designing a subdivision where there are different parent lot shapes, sizes and topographical/vegetative/other constraints.
- Incorporating a minimum net size area and average net size area for the subdivision will provide for greater flexibility in the instances where physical constraints exist.

Point Number 746.132

Summary of Decision Requested: Retain Rule 24.4.2 RD2 (a)-Subdivision - Te Kowhai and Tuakau as notified.

Decision Reasons:

- No reasons provided.

Point Number 746.133

Summary of Decision Requested: Delete Rule 24.4.9 RD1 (a)-Subdivision - Road Frontage.

AND

Amend 24.4.9 RD1 (a)-Subdivision-Road Frontage to adopt the Vehicular Access Requirements of the Operative Waikato District Plan - Franklin Section.

Decision Reasons:

- The layout of a development is dependent on the size and shape of the site as well as its topography (amongst other constraints). While a 20m minimum width along a road boundary can generally work in many developments that have the ability to follow a grid design, not every site is flat with no size/shape constraints.
- Sites with topographical natural or physical constraints may be unable to practically implement a layout that achieves 20m road frontage for all lots with the road. There may also be sites where the lay of the land is best suited to an alternative roading design.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.

Point Number 746.134

Summary of Decision Requested: Delete Rule 24.4.11 RDI(a)-Subdivision Creating Reserves and make it a matter of discretion

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be justifiable from an economic perspective. The enforcement of the rule may increase the cost of development which could be passed onto purchasers.
- This is an arbitrary standard which may not be relevant for all reserve types or developments.
- Safety and surveillance of reserves may be achieved with less road frontage.
- There is no analysis in the s32 stating why the 50% road frontage rule has been applied. While this may be a principle to follow it should not be enforced through a rule.

Point Number 746.135

Summary of Decision Requested: Amend Rule 24.4.12-Subdivision of esplanade reserves and esplanade strips by adopting Operative Waikato District Plan- Franklin Section Rule 11.5 - Esplanade Reserves and Strips.

Decision Reasons:

- The submitter accepts that esplanade reserves and esplanade strips enable public access and recreation. However, this needs to be assessed on a case by case basis and Council should allow a waiver or reduction in width in certain circumstances.

Point Number 746.136

Summary of Decision Requested: Amend Appendix 3.4-Multi-unit Development to recognise alternative good design outcomes created by variations in setbacks and boundary treatment.

Decision Reasons:

- The submitter supports the principles and outcomes sought in the design guide. However, the design guidance preferring consistent front setbacks and separation between buildings as well as consistent fencing and boundary treatment (i.e. through fencing heights/materials, landscaping, the configuration of pedestrian entrances) encouraged by the design guide could create a repetitive built form.
- There may be good design outcomes created by variations in setbacks and boundary treatments.

Point Number 746.137

Summary of Decision Requested: No specific decision sought, but submission supports the direction of the Proposed District Plan as it gives effect to the National Policy Statement on Urban Development Capacity through rezoning of land and allowing for some intensification of existing urban areas.

Decision Reasons:

- The National Policy Statement provides direction to decision-makers under the Resource Management Act 1991 on planning for urban environments. It recognizes the national significance of well-functioning urban environments, with a particular focus on ensuring that local authorities, through their planning, both:
 - enable urban environments to grow and change in response to the changing needs of the communities, and future generations; and
 - provide enough space for their populations to happily live and work. This can be both through allowing development to go "up" by intensifying existing urban area, and "out" by releasing land in greenfield areas.
- In general, the submitter supports the direction of the Proposed District Plan as it gives effect to the National Policy Statement through the rezoning of land and allows for some intensification of existing urban areas.
-

Point Number 746.138

Summary of Decision Requested: Amend the Proposed District Plan to be consistent with the draft National Planning Standards structure.

Decision Reasons:

- The Proposed District Plan does not directly align with the Draft National Planning Standards.
- The Draft National Planning Standards has a particular structure set out for various Plans, in this case, the District Plan Structure Standard (page 15). The overall structure of the Proposed District Plan is inconsistent with the Draft National Planning Standards in the following regards:
 - The proposed zonings under the Proposed District Plan are inconsistent with the Draft National Planning Standards. For example, both the Village Zone and Country Living Zone do not feature at all in the Draft National Planning Standards.
 - The definitions section of the Proposed District Plan has been inserted into Section C Rules however the draft NPS requires the Definition section to sit within Part I Introduction and General Provisions, Interpretation.
 - The Draft Area Specific Matters Standard on page 43 gives a purpose statement to each zone. This will be a helpful tool when amending the zones in the PWDP to match the Draft NPS.
 - The Proposed District Plan Planning Maps do not align with the colour palette or symbology table in the Draft National Planning Standards.
 - The objectives and policies in the Proposed District Plan are separated out from the zones in section B, however, the draft NPS chapter form (page 63) requires objectives and policies to be embedded in the particular zone.
 - The Draft National Planning Standards has included a Definitions Standard (page 76) which provides mandatory definitions to improve plan consistency. The definitions listed in the Proposed district plan are inconsistent with the definitions outlined in the Draft National Planning Standards.

Point Number 746.139

Summary of Decision Requested: No specific relief sought, but submission considers that it is important that the Waikato District Plan looks beyond the 10 year life of the Plan and ensures that adequate densities and intensification are encouraged around existing Town Centres, especially where public transport stations are proposed to avoid further encroachment into rural land especially where the land is used for food supply purposes.

Decision Reasons:

- The Future Proof Strategy identifies 50 year land supply needs and seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton (67%) and the larger settlements of the district (21%). This involves a reduction in the relative share of the population outside of the sub-region's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- Growth in existing centres of Tuakau, Pokeno, Ngaruawahia and Huntly is supported and has been enabled through the rezoning of greenfield on the peripheries of these existing centres.
- Enabling denser housing options gives effect to the Future Proof Strategy.

Point Number 746.140

Summary of Decision Requested: Amend Section 5.1: The Rural Environment as necessary to reflect and give effect to the amendments sought throughout the submission.

Decision Reasons:

- The submitter is generally supportive of the Rural Zone objectives and policies, however, seek any changes necessary to give effect to the amendments sought throughout the submission.

Point Number 746.141

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(iv) General subdivision where the creation of a lot between 8,000m² and 1.6ha is a restricted discretionary activity.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha is supported.

Point Number 746.142

Summary of Decision Requested: Add a new matter of discretion to Rule 22.4.1.4-Boundary relocation as follows:

Effects on high class soils, farm management and productivity.

Decision Reasons:

- Relocation of a lot created under the previous Transferable Lot Rules from an area that contained no high class soils to high class soils would create an adverse outcome. The inclusion of high class soils as a matter of discretion together with the proposed objectives and policies in Chapter 5 (Rural Environment), would provide Council with a robust framework to ensure that adverse effects on high class soils were avoided.

Point Number 746.143

Summary of Decision Requested: Add a new discretionary rule to Rule 22.4.1.6- Conservation lot subdivision as follows:

DI

(g) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6(vi-vii) RDI.

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6(vi-vii) RDI.

Decision Reasons:

- Rule 22.4.1.6.vi requires a minimum area of 8000m², flexibility for lot area should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activities. This avoids unnecessary fragmentation of productive farming land. This could be addressed as a Matter of Discretion.

Point Number 746.144

Summary of Decision Requested: No specific decision sought, but submission supports with amendments Rule 23.2.3.1 P1 Earthworks - General and considers that where subdivision has been approved, there should be no requirements for land owners to apply for additional resource consents for earthworks to undertake permitted activities on the land.

Decision Reasons:

- The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents.
- Permitted land use standards should be able to control the adverse effects of any works.

Point Number 746.145

Summary of Decision Requested: No specific decision sought, but submission supports with amendments Rule 23.2.3.1 P3 Earthworks - General and considers that where subdivision has been approved, there should be no requirements for land owners to apply for additional resource consents for earthworks to undertake permitted activities on the land.

Decision Reasons:

- The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents.
- Permitted land use standards should be able to control the adverse effects of any works.

Point Number 746.146

Summary of Decision Requested: No specific decision sought, but submission supports with amendments Rule 24.2.4.1 P2 Earthworks - General and considers that where subdivision has been approved, there should be no requirements for land owners to apply for additional resource consents for earthworks to undertake permitted activities on the land.

Decision Reasons:

- The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents.
- Permitted land use standards should be able to control the adverse effects of any works.

Point Number 746.147

Summary of Decision Requested: No specific decision sought, but submission supports with amendments Rule 24.2.4.1 P3 Earthworks - General and considers that where subdivision has been approved, there should be no requirements for land owners to apply for additional resource consents for earthworks to undertake permitted activities on the land.

Decision Reasons:

- The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents.
- Permitted land use standards should be able to control the adverse effects of any works.

Point Number 746.148

Summary of Decision Requested: No specific decision sought, but the submission considers subdivision of larger sites within the existing urban area should be encouraged to ensure that intensification of the existing urban areas can be achieved in accordance with the Future Proof Strategy.

Decision Reasons:

- There are many larger sites (>1000m2) within the existing urban areas of Tuakau and Pokeno which are suitable for infill subdivision.
- This will ensure efficient use of the existing urban land resources allowing additional residential development close to existing services and amenities.

Point Number 746.149

Summary of Decision Requested: No specific decision sought, but the submission considers that intensification of land to rural residential (Country Living) in areas that do not contain elite / prime soils and adjoin urban development should be encouraged to ensure land supply requirements are met while preserving the soil resources.

Decision Reasons:

Some of the rural areas of Buckland / Tuakau contain elite / prime soils that are used for rural production activities. These soils contribute significantly to both regional and national food supply.

Point Number 746.150

Summary of Decision Requested: No specific decision sought, but the submission considers that maximizing the land's rural residential (Country Living and Village) development potential will future proof the capacity of land supply to avoid further encroachment into the rural areas past the lifetime of this Plan.

Decision Reasons:

Some of the rural areas of Buckland / Tuakau contain elite / prime soils that are used for rural production activities. These soils contribute significantly to both regional and national food supply.

Point Number 746.151

Summary of Decision Requested: No specific decision sought, but the submission supports the incentivisation of legally and physically protecting Significant Natural Area and other areas of existing biodiversity which offers positive benefits for the Region.

Decision Reasons:

No reasons provided.

Point Number 746.152

Summary of Decision Requested: **Amend** the Proposed District Plan to be enabling of improving both biodiversity and water quality within the Waikato Catchment, including adding provisions for ecological enhancement and/or restoration of appropriate areas into the Conservation Lot Subdivision rules.

Decision Reasons:

- There are no provisions for ecological enhancement and/or restoration in the Conservation Lot rules.
- There are significant biodiversity and water quality benefits to be gained from ecological enhancement, particularly along waterways and wetland areas.
- Revegetation approximately costs \$45,000-\$70,000 per hectare, excluding fencing of revegetated areas from stock. Incentivisation through subdivision would assist in offsetting this cost and encourage enhancement and /or restoration planting.
- Appropriate features to be restored should meet one or more criteria in Appendix 2: Criteria for Determining Significance of Indigenous Biodiversity, or areas identified as Significant Natural Areas that do not meet the minimum size requirements for subdivision need to be increased in size through additional enhancement and/or restoration planting.

Submitter Number: 747

Submitter:

Ryburn Lagoon Trust Limited

Point Number 747.1

Summary of Decision Requested: **Delete** the Significant Natural Area from the property legally described as Lot 4, DP 182809 on Certificate of Title NA113D/782.
AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Whereas the property may have qualified as a Significant Natural Area in the past (perhaps when the original Council survey work was undertaken), this was compromised when a Waikato Regional Council consent was granted to an adjoining landowner to lower the stream feeding the wetland.
- The wetland may have also been since further compromised by other unconsented diversions to the stream feeding it. The area identified as a Significant Natural Area on the property, has been predominantly dry in recent times and has limited natural habitat value (see attached aerial photo).
- The vegetation on the site is sparse with predominantly willows around the perimeter of the property.
- For these reasons the area identified does not meet the criteria for identification of a Significant Natural Area and this identification should be removed.

Point Number 747.2

Summary of Decision Requested: **Amend** Objective 3.2.1 Significant Natural Areas to acknowledge that enhancement may not always be practicable or achievable and restoration is a desirable management outcome with the following amendments:

Indigenous biodiversity in Significant Natural Areas is protected and enhanced restored or enhanced where appropriate.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- The Waikato Regional Policy Statement requires, at Policy 11.2, that significant indigenous vegetation and the significant habitats of indigenous fauna be protected by ensuring the characteristics that contribute to its significance are not adversely affected to the extent that the significance of the vegetation or habitat is reduced. This is consistent with RMA 1991 s6(c) requirements.
- Proposed District Plan Objective 3.2.1 also seeks enhancement as an outcome. The Objective should acknowledge that enhancement of Significant Natural Areas may not always be practicable or achievable and that in addition, restoration is also a desirable management outcome.

Point Number 747.3

Summary of Decision Requested: **Amend** Policy 3.2.2 - Identify and recognise as follows (or similar such amendments to give effect to the relief sought in this submission):

(a) *Identify significant indigenous vegetation and habitats of indigenous fauna in accordance with the Waikato Regional Policy Statement and identify as Significant Natural Areas.*

(b) *Recognise and protect Significant Natural Areas by ensuring the characteristics that contribute to their significance are not adversely affected to the extent that the significance of the vegetation or habitat is reduced.*

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Proposed Policy 3.2.2 applies a no adverse effects approach to managing effects on the characteristics of Significant Natural Areas. This goes beyond the requirements of the Waikato Regional Policy Statement, which seeks to ensure that the characteristics that contribute to areas of significant indigenous vegetation and significant habitats of indigenous fauna are not adversely affected to the extent that the significance of the vegetation or habitat is reduced. The policy should be tempered to recognise that the characteristics that contribute to the significance of the Significant Natural Area are not adversely affected to the extent that the significance of the vegetation or habitat is reduced.

Point Number 747.4

Summary of Decision Requested: **Delete** Rule 22.2.3.3 P1 (a)(i)-(iv) Earthworks - Significant Natural Areas

AND

Delete Rule 22.2.3.3 P2 Earthworks - Significant Natural Areas.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Rule 22.2.3.3 P1 (a) and P2 apply conditions to earthworks for the maintenance of existing tracks, fences, or drains within an identified Significant Natural Area. The conditions specifying volumes, depth and setback ((i)-(iv)) should be deleted from the maintenance of existing tracks, fences, or drains in these rules. Maintenance of these features as they are, and within the footprints already occupied, will ensure the characteristics that contribute to the significance of the Significant Natural Area are not adversely affected and that vegetation or habitat is not reduced.
- The conditions at (v)-(vii) provide standards for the reinstatement of earthworks, including re-vegetation, sediment control and natural water flow requirements.
- There is no reason to apply additional limitations on volumes, depth and setback of earthworks given the earthworks are for physical features already in place.

Point Number 747.5

Summary of Decision Requested: **Amend** Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area to ensure the link from the term "Indigenous vegetation clearance" does not go to the more generally defined "vegetation clearance" and that the rule only limits the clearance indigenous vegetation.

AND

Add an additional definition of "Indigenous vegetation clearance" if necessary to achieve the relief sought in the submission.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- The online version of Rule 22.2.8 links the term "Indigenous vegetation clearance" to a more general definition of "vegetation clearance", which includes for example cutting of all forms of vegetation, indigenous or otherwise. This is not the intent of the rule and a link to a more specifically defined "Indigenous vegetation clearance" should be made in the rule.

Point Number 747.6

Summary of Decision Requested: **Amend** Rule 22.3.7.5 Building setback - water bodies to exclude from the setback requirements for lakes and wetlands, buildings and structures with a recreation or functional need to be in close proximity to these water body, and specifically exclude maimai.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Maimai and other similar buildings are required to be in close proximity to lakes and wetlands and should be excluded from this requirement.

Point Number

747.7

Summary of Decision Requested:

Delete Rule 22.2.3.4 PI (a)(i)-(iv) Earthworks within Landscape and Natural Character Areas.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Rule 22.2.3.4 PI (a) applies conditions to earthworks for the maintenance of existing tracks, fences, or drains within an identified Landscape and Natural Character Area. The conditions specifying volumes, depth and slope ((i)-(iv)) should be deleted from the maintenance of existing tracks, fences, or drains in these rules.
- The maintenance of these features as they are, and within the footprints already occupied, will ensure the characteristics that contribute to the significance of the area are not adversely affected. The conditions at (v)-(vii) provide standards for the reinstatement of earthworks, including re-vegetation, sediment control and natural water flow requirements. There is no reason to apply additional limitations on volumes, depth and setback of earthworks given the earthworks are for physical features already in place.

Point Number

747.8

Summary of Decision Requested:

Amend Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area, to provide for the following additional permitted activity:

Indigenous vegetation clearance in a Significant Natural Area for the purposes of ecosystem protection, rehabilitation or restoration works.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Rule 22.2.7 has a limited list of permitted indigenous vegetation clearance in Significant Natural Areas. Its reference to "conservation fencing to exclude stock or pests" does not provide for the full range of clearance that might be required to protect the characteristics of a Significant Natural Area.
- Allowance for a full range of ecosystem protection, rehabilitation or restoration works should be made in the rule.

Point Number

747.9

Summary of Decision Requested:

Amend Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area to provide for the following additional permitted activity:

Indigenous vegetation clearance for the purposes of ecosystem protection, rehabilitation or restoration works.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- Rule 22.2.8 has a limited list of permitted indigenous vegetation clearance in Significant Natural Areas. Its reference to "conservation fencing to exclude stock or pests" does not provide for the full range of clearance that might be required to protect the characteristics of a Significant Natural Area. Allowance for a full range of ecosystem protection, rehabilitation or restoration works should be made in the rule.

Point Number

747.10

Summary of Decision Requested:

Amend Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area to ensure the link from the term "Indigenous vegetation clearance" does not go to the more generally defined "vegetation clearance" and that the rule only limits the clearance of indigenous vegetation.

AND

Add an additional definition of "Indigenous vegetation clearance" if necessary to achieve the relief sought in the submission.

AND

Amend the Proposed District Plan to provide other such relief and consequential amendments as to give effect to the relief sought in the submissions.

Decision Reasons:

- The online version of Rule 22.2.7 links the term "Indigenous vegetation clearance" to a more general definition of "vegetation clearance", which includes for example cutting of all forms of vegetation, indigenous or otherwise. This is not the intent of the rule and a link to a more specifically defined "Indigenous vegetation clearance" should be made in the rule.

Submitter Number:

748

Submitter:

Peter Reynolds

Organisation:

T A Reynolds Limited

Point Number

748.1

Summary of Decision Requested: Amend the amount of rates payable on the properties at 105 Bollard Road - Property number 302134, Whangarata Road - Property number 302125, 128 Bollard Road and 124 Bollard Road, Tuakau to be based on the current land use (cropping) and not the current zoning. The submission seeks some sort of rates relief.

Decision Reasons:

- These properties have been rezoned in the last few years with a steep hike in the rates payable.
- The landowners are receiving very little service on these properties because they are being farmed and none of the use is residential or industrial.

Point Number 748.2

Summary of Decision Requested: Amend boundaries of the planning maps after discussion with the landowners of 36 and 2339A Buckland Road and 39 Elizabeth Street, Tuakau.

Decision Reasons:

- The planning maps are very broad ranging and may need to be amended after discussion with landowners.

Point Number 748.3

Summary of Decision Requested: Amend the Proposed District Plan to provide Tuakau with a western access road that does not disrupt all of the agricultural land.

Decision Reasons:

- The planning maps are very broad ranging and may need to be amended after discussion with landowners.

Point Number 748.4

Summary of Decision Requested: Align rates payable on the land to the land use not the zone.

Decision Reasons:

- The rates on the farming land that is zoned Residential are too high.

Submitter Number: 749 **Submitter:** Housing New Zealand Corporation

Point Number 749.1

Summary of Decision Requested: Amend Policy 4.2.8 Excessive building scale by changing the heading as follows:

Policy - ~~Excessive~~ Building Scale

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the intent of the policy, however, does not agree the word 'excessive' needs to be included.
- The policy should focus on building scale and should not be qualified in terms of scale and size.

Point Number 749.2

Summary of Decision Requested: Delete Policy 4.2.12 Outdoor living court – Multi- unit development.

AND

Amend Policy 4.2.18(a) - Multi unit Development as follows:

Ensure multi-unit residential subdivision and development is designed in a way that:

- provides a range of housing types;*
- Addresses and Integrates with adjacent residential development, town centres and public open space;*
- Addresses ~~Manages~~ and responds to the constraints of the site, including ~~topography~~ topography, natural features and heritage values;*
- Provides usable and accessible outdoor living courts that maximises light access, functionality and privacy;*
- Supports an integrated transport network, including walking and cycling connections to public open space network;*
- ~~Maintains the amenity values of neighbouring sites.~~*

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- There is an existing policy proposed on Multi-unit development (Policy 4.2.18)
- There is no need to differentiate and create a separate policy on outdoor living court related to multi-unit development. It is best the policy words are added into 4.2.18(a).

Point Number 749.3

Summary of Decision Requested: Amend Policy 4.2.18(b) Multi unit development as follows:

Encourage the design of multi-unit residential developments to that promote the outcomes of the Waikato District Council's multi-unit development urban design guidelines (Appendix 3.4), in particular section 3 (site and context analysis), section 4 (movement, access and parking), section 5 (neighbourhood character), section 6 (street and public realm interface), and section 8 (communal open spaces and landscape treatment), in particular by:

- Responding to the immediate urban and built form;*
- Designing and locating ~~Locate~~ development to support connection to the surrounding context and local amenities;*
- Promoting the safe movement of pedestrians and vehicles on-site;*
- Ensuring design is ~~Be~~ contextually appropriate and promotes ~~promoting~~ of local characteristics to ~~that~~ contribute to community identity;*
- Designs that ~~Respond~~ to and promote the public interface by the provision of:*

A. Streets and public places;

B. Pedestrian safety and amenity;

C. Side setbacks; and

D. Variation in roof form.

vi. ~~Ensuring Provide~~ a communal outdoor living court is provided where private individual outdoor living courts are limited.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the intent of the 4.2.18 Policy – Multi-unit development.
- The submitter seeks deletion of the multi-unit development urban design guidelines from the Proposed District Plan.

Point Number 749.4

Summary of Decision Requested: Retain Objectives and Policies in Section 4.3 Village Zone as notified.

Decision Reasons:

- The submitter supports the objectives and policies of the Village Zone.

Point Number 749.5

Summary of Decision Requested: Retain the Objectives and Policies in Section 4.4 Residential and Village Zones - Noise, lighting, outdoor storage, signs and odour, as notified.

Decision Reasons:

- The submitter supports the objectives and policies of 4.4 Residential and Village Zones – Noise, lighting, outdoor storage, signs and odour.

Point Number 749.6

Summary of Decision Requested: Amend Policy 4.5.3 Commercial purpose: Business Town Centre Zone as follows:

(a) The role of the business town centres in Raglan, Huntly, Ngaruawahia, Te Kauwhata, Pokeno and Tuakau is strengthened by ensuring that:

(i) They are recognised and maintained as the primary retail, administration, commercial service and civic centre for each town; and

(ii) The scale of commercial activities supports their continued viability as the primary retail, administration and commercial service centre for each town; and

(iii) Enhances their vitality and amenity while providing for a range of commercial, residential and community activities and facilities; and

(iv) Opportunities for higher intensity residential development are provided to support a compact, urban form.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the intent of the objectives and policies of the Business Town Centre Zone; however, there is no recognition in the policies that support residential activity to occur in the zone.
- The Business Town Centre Zone enables residential on upper floors, and therefore the policies of the zone should recognise that residential development will occur in the centres.

Point Number 749.7

Summary of Decision Requested: Amend Policy 4.5.11 Residential upper floors: Business Town Centre Zone and Business Zone as follows:

~~4.5.11 Policy - Residential upper floors in the Business Town Centre Zone and Business Zone~~

~~a) Maintain the commercial viability of the Business Town Centre Zone and Business Zone while:~~

~~i. Providing for mixed use developments, ensuring residential activities are located in appropriate locations and in some cases above ground floor; and~~

~~ii. Avoiding residential activity located at ground level where it undermines commercial retail frontage and activity.~~

AND

Add a new policy to Section 4.5 to address residential upper floors in the Business Zone as follows:

4.5.11A Policy - Residential upper floors in the Business Zone.

g) Maintain the commercial viability of the Business Zone while:

(i) Providing for mixed use developments, ensuring residential activities are located above ground floor; and

(ii) Minimising residential activity located at ground level.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the intent of the policy, however disagrees that residential activity should be limited to upper floors in a Business Town Centre Zone. In some cases and locations, where appropriate, mixed use development could be provided at ground level in a Business Town Centre Zone.
- Residential on upper floors in a Business Zone can remain as it is appropriate.

Point Number 749.8

Summary of Decision Requested: Retain Objective 4.5.12 Business Town Centre - Character, as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 749.9

Summary of Decision Requested: **Amend** Policy 4.5.13 (a) (v) Town centre built form as follows:
(v) maintaining a low rise built form that supports and small scale pedestrian focussed retail activities;
AND
Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports this policy with minor amendments to remove the words "low rise" and "small scale" from Policy 4.5.13(a)(v).

Point Number 749.10

Summary of Decision Requested: **Amend** Policy 4.5.14 Raglan Town Centre to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed
AND
Amend Policy 4.5.14 Raglan Town Centre to remove reference to Town Centre Character Statements.
AND
Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.5.14 to 4.5.19.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.5.14 to 4.1.19, if the policy matter is not already listed or included. .

Point Number 749.11

Summary of Decision Requested: **Amend** Policy 4.5.15 Huntly Town Centre to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed
AND
Amend Policy 4.5.15 Huntly Town Centre to remove reference to Town Centre Character Statements.
AND
Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.5.14 to 4.5.19.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.5.14-4.5.19, if the policy matter is not already listed or included.

Point Number 749.12

Summary of Decision Requested: **Amend** Policy 4.5.16 Ngaaruwaahia Town Centre to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed
AND
Amend Policy 4.5.16 Ngaaruwaahia Town Centre to remove reference to Town Centre Character Statements.
AND
Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.5.14 to 4.5.19.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.5.14-4.5.19, if the policy matter is not already listed or included.

Point Number 749.13

Summary of Decision Requested: **Amend** Policy 4.5.17 Te Kauwhata Town Centre to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed
AND
Amend Policy 4.5.17 Te Kauwhata Town Centre to remove reference to Town Centre Character Statements.
AND
Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.5.14 to 4.5.19.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.5.14-4.5.19, if the policy matter is not already listed or included.

Point Number

749.14

Summary of Decision Requested:

Amend Policy 4.5.18 Pokeno Town Centre to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed

AND

Amend Policy 4.5.18 Pokeno Town Centre to remove reference to Town Centre Character Statements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.5.14 to 4.5.19.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.5.14-4.5.19, if the policy matter is not already listed or included.

Point Number

749.15

Summary of Decision Requested:

Amend Policy 4.5.19 Tuakau Town Centre to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed

AND

Amend Policy 4.5.19 Tuakau Town Centre to remove reference to Town Centre Character Statements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.5.14 to 4.5.19.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.5.14-4.5.19, if the policy matter is not already listed or included.

Point Number

749.16

Summary of Decision Requested:

Amend Policy 4.5.23 Height: Business Town Centre Zone as follows:

~~a) Ensure the height of new buildings is complementary to, and promotes, a high intensity and compact built form of three storeys in each town. Ensure the height of new buildings is complementary to, and promotes, the existing character of the business town centre within each town.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports this policy with a minor amendment to change the word 'character' to 'built form'.
- Character could imply the look and visual qualities of a building.
- Built form implies the height and scale of a building in an area, not the characteristics of buildings.

Point Number

749.17

Summary of Decision Requested:

Amend Policy 4.2.24 New buildings: Business Town Centre Zone as follows:

~~(a) New buildings within the Business Town Centre Zone are designed in a manner that are consistent with the Waikato District Council Urban Design Guidelines Town Centres (Appendix 3.3), and in particular:~~

~~(i)...~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Housing New Zealand supports the intent of the 4.5.24 Policy – New Buildings: Business Town Centre Zone, however seeks the deletion of the town centre urban design guidelines from the Proposed District Plan (reasons outlined later in submission).

Point Number

749.18

Summary of Decision Requested:

Retain Objective 4.5.30 Business Zone and Business Town Centre Zones - Amenity, as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 749.19

Summary of Decision Requested: Retain Policy 4.5.32 Adjoining site amenity, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 749.20

Summary of Decision Requested: Retain the Objectives and Policies in Section 4.7 Urban Subdivision and development, except for the amendments sought below
AND

Amend Policy 4.7.3 Residential Subdivision as follows:

Ensure Development meets the following, responds to the outcomes of Waikato District Council's Urban Design Guidelines Residential Subdivision (Appendix 2.1), section 4 (Connectivity and Movement Networks), section 5 (Neighbourhood Character), section 6 (Residential Block and Street Layout), section 7 (Open Space and Landscape Treatment), and section 8 (Low Impact Urban Design), in particular by:

(i)...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the objectives and policies of 4.7 Urban Subdivision and development, however seeks the deletion of the residential subdivision design guidelines from the Proposed WDP (reasons outlined later in submission).

Point Number 749.21

Summary of Decision Requested: Retain Objective 5.1 - The Rural Environment as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 749.22

Summary of Decision Requested: Retain the objectives and policies in Section 5.3 Rural Character and Amenity as notified.

Decision Reasons:

- The submitter supports the objectives and policies in section 5.3.

Point Number 749.23

Summary of Decision Requested: Retain the objectives and policies in Section 6.1 General Infrastructure as notified.

Decision Reasons:

- The submitter supports the objectives and policies in section 6.1.
- The submitter notes particular support for the following policies: 6.1.9, 6.1.10, 6.1.11, 6.1.12 and 6.1.13

Point Number 749.24

Summary of Decision Requested: Delete Section 6.2 National Grid, and all related provisions including the spatial extent of the overlay.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Housing New Zealand opposes the National Grid provisions in its current proposed state and seeks the full package of provisions (objectives, policies, rules and definitions) including the spatial extent of the overlay shown in the Proposed District Plan is deleted.
- Housing New Zealand acknowledges the need for the Proposed District Plan to give effect to the requirements of the National Policy Statement for Electricity Transmission (2008). However, the proposed National Grid provisions are overly restrictive and do not efficiently manage sensitive activities within close proximity to and under the National Grid.

Point Number 749.25

Summary of Decision Requested: Retain the objectives and policies in Section 6.4 Infrastructure, Subdivision and Development as notified.

Decision Reasons:

- The submitter supports the objectives and policies of section 6.4.
- The submitter notes particular support of policies 6.4.4 and 6.4.5.

Point Number 749.26

Summary of Decision Requested: Amend Chapter 13: Definitions to align with the final set of New Zealand Planning Standards, when gazetted in 2019.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- There is a draft National Planning Standard proposed for definitions.
- Any proposed definitions introduced in the Proposed WDP align to the final set of National Planning Standards, when gazetted in 2019.
- In the absence of these standards, further amendments are sought to a number of proposed definitions introduced in the Proposed WDP, see detail below.

Point Number

749.27

Summary of Decision Requested:

Amend Chapter 13: Definitions to create a list containing all acronyms and abbreviations

AND

Amend the definitions in Chapter 13: Definitions to add all acronyms and abbreviations with the principal term, rather than stand alone in the definitions list.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Certain abbreviations and acronyms should be with the principal term (not stand-alone in the definitions list).
- All abbreviations and acronyms should be included in a separate table list as part of Chapter 13: Definitions.

Point Number

749.28

Summary of Decision Requested:

Amend the definition of "accessory building" in Chapter 13 Definitions, as follows:

Means a building, the use of which is incidental to the use of the principal land use or building on that site. A garage that is integrated into and forms part of a dwelling is not an accessory building. Dwellings and minor dwellings are excluded.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition with a minor amendment to clarify that dwellings including minor dwellings are not an accessory building.

Point Number

749.29

Summary of Decision Requested:

Amend the definition of "Apartment" in Chapter 13 Definitions as follows:

Means a building containing three or more attached residential units connected by one or more accessory buildings, such as a garage or carport.

OR

Amend the definition of "Apartment" in Chapter 13 Definitions as follows:

Means a self-contained residential unit that occupies in a building with three or more attached residential units connected by one or more accessory buildings, such as a garage or carport.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition with a minor amendment to clarify that an apartment is a building that contains three or more residential units.
- Alternatively, submitter considered whether the definition of an apartment should refer to a 'self-contained residential unit that occupies in a building, generally with three or more attached residential units.'

Point Number

749.30

Summary of Decision Requested:

Amend the heading of the definition of "Boarding, breeding or animal training establishment" in Chapter 13 Definitions as follows:

Animal boarding, breeding, boarding or animal training establishment

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Separate the definition of boarding from breeding/animal training establishment or make it clear it is for animal purposes i.e. animal breeding, boarding and training establishment.

Point Number

749.31

Summary of Decision Requested:

Retain the definition of "boundary" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports the proposed definition.

Point Number

749.32

Summary of Decision Requested:

Amend the definition of "building" in Chapter 13 Definitions to include the full text of the Building Act definition (see the submission for the text sought) as part of (a) of the definition.

AND

Amend the definition of "Building" in Chapter 13 Definitions to restructure the list of exclusions and insert it as part (b) of the definition as follows:

(b) Excludes:

- a) a pergola, not roofed or enclosed, less than 3 metres in height; or a swimming pool, ornamental pool, deck; or
- b) other structure not roofed or enclosed, less than 1.5 metre in height; or
- ~~b)c)~~ a fence, or a wall other than a retaining wall, less than 2 metres in height; or
- ~~b)d)~~ public or cultural art in a public place less than 3 metres in height; or
- ~~b)e)~~ a retaining wall or retaining structure less than 1.5 metres in height, provided that where a fence or non-retaining wall is placed at the top of the retaining wall, the combined height is less than 2 metres; or
- ~~b)f)~~ a tank with a total capacity of no more than 35,000 litres, provided that no part of the tank protrudes more than 1 metre above natural ground level; or
- ~~b)g)~~ a structure that is permeable and less than 4 metres in height to protect crops for agricultural use.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition to have the same meaning as in the Building Act 2004.
- For ease of reading insert the Building Act 2004 definition in this section and separate out the exclusions in sub-clause (b).
- The draft National Planning Standards proposed a definition for 'Building'. The submitter has made a submission to the Ministry for the Environment on the draft National Planning Standards and in doing so expressed that a number of abnormalities always arise from this definition in terms of structures which would be included and excluded from the definition inappropriately. The submitter expressed that one option could be to consider using the definition of "building" set out in ss8-9 of the Building Act 2004.

Point Number

749.33

Summary of Decision Requested:

Amend the heading of term "Building Coverage" in Chapter 13 Definitions by deleting the term "Building"

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition, however notes that the term could be amended from 'Building Coverage' to 'Coverage'.
- The draft National Planning Standards proposed a definition for 'Coverage'. The submitter has made a submission to the Ministry for the Environment on the draft National Planning Standards and in doing so expressed that the definition reference to structure should be a reference to "buildings" (as defined in Building Act 2004).

Point Number

749.34

Summary of Decision Requested:

Delete the definition of "Building platform" in Chapter 13 Definitions.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- It is not clear why the term is included for a definition.
- It is unclear as to its relevance to building coverage.

Point Number

749.35

Summary of Decision Requested:

Amend the definition of "commercial activity" in Chapter 13 Definitions as follows:

Means activities involving the sale or distribution of goods and commercial services.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the definition and notes there is a definition for "commercial services. The defined term "commercial services" is not included in this definition or referenced.

Point Number

749.36

Summary of Decision Requested:

Amend the definition of "commercial services" in Chapter 13 Definitions as follows:

Means a business providing personal, property, financial, household, private or business services to the general public. It includes but is not limited to:

- a) authorised betting shops;
- b) copy and quick print services;
- c) financial and banking facilities;
- d) postal services;
- e) counter insurance services;
- f) dry cleaning and laundrette services;
- g) electrical goods repair services;
- h) footwear and leather goods repair services;
- i) hairdressing, beauty salons and barbers;
- j) internet and computer services;
- k) key cutting services;
- l) real estate agents and valuers;
- m) travel agencies, airline and entertainment booking services;
- n) optometrists;
- o) movie and game hire; ~~and~~
- p) animal welfare and/or grooming services; and
- g) government and administration services.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition, however notes the term is missing government administration services from the list of inclusions.
- It is unclear to what inclusion listed in the proposed definition would tenancy offices classify under.
- "It includes but is not limited to" would encompass any other commercial services that are not primarily listed under the definition.

Point Number 749.37

Summary of Decision Requested: **Retain** the definition of "community service court" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports the proposed definition.

Point Number 749.38

Summary of Decision Requested: **Amend** the definition of "community activity" Chapter 13 Definitions as follows:
Means the construction and use of ~~public~~ land and buildings...
 OR
Amend the definition of "community activity" Chapter 13 Definitions as follows:
Means the construction and use of public or Crown land and buildings...
 AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition, however notes that land and buildings (other than public) could be used for community activities, including Crown land.

Point Number 749.39

Summary of Decision Requested: **Amend** the definition of "Community facilities" in Chapter 13 Definitions as follows:

Means ~~in the Business Zone Tamahere~~, land or building used for community activities, generally established on a not-for-profit basis, and may include ~~but is not limited to~~ library, council offices, police station, public toilets or public rooms.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter does not support proposed term solely relating to, and only applying in, the Business Zone Tamahere.
- It is inappropriate to have general terms used for a specific zone and limit the application and use to a specific area.
- The term should be allowed to apply in all zones. There would be wider interest for the use of the term in the Proposed District Plan.

Point Number 749.40

Summary of Decision Requested: **Amend** the definition of "Comprehensive land development consent" as follows:

Means a bundle of land use consents that apply to an area of land of 5ha or more which provides for staged and integrated development ~~within the Te Kauwhata Lakeside Precinct Plan Area~~ and can cover a range of Residential, Business and Rural zonings.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter does not support the proposed terms solely relating to and only applying in the Te Kauwhata Lakeside Precinct Plan Area.
- It is inappropriate to have general terms used for a specific precinct area and limit the application and use to a specific area.
- The term should be allowed to apply in any precinct area or zone. There would be wider interest for the use of the term in the Proposed District Plan.

Point Number 749.41

Summary of Decision Requested: **Amend** the definition of "Comprehensive subdivision consent" in Chapter 13 Definitions as follows:

Means a comprehensive subdivision consent that relates to a comprehensive land development consent ~~the Te Kauwhata Lakeside Precinct Plan~~. A comprehensive subdivision is a subdivision of 5ha or more which provides for staged and integrated development ~~within the Te Kauwhata Lakeside Precinct Plan Area~~ and can cover a range of Residential, Business and Rural zonings.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter does not support the proposed terms solely relating to and only applying in the Te Kauwhata Lakeside Precinct Plan Area.
- It is inappropriate to have general terms used for a specific precinct area and limit the application and use to a specific area.
- The term should be allowed to apply in any precinct area or zone. There would be wider interest for the use of the term in the Proposed District Plan.

Point Number 749.42

Summary of Decision Requested: **Amend** the definition of "Contiguous" in Chapter 13 Definitions as follows:

Means abutting ~~or touching~~ at ~~some~~ any point, e.g..

AND

Amend the definition of "contiguous" in Chapter 13 Definition by removing the second illustration which shows sites touching at a single point.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter does not consider 'touching at some any point' to be contiguous.

Point Number 749.43

Summary of Decision Requested: **Amend** the definition of "Continuous landholding" in Chapter 13 Definitions as follows:

Means a series of adjoining Records of Title, including titles that may be contiguous or only be separated by a road.

AND

Add an illustration to the definition of "Contiguous landholding" in Chapter 13 Definitions.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the proposed definition.
- However it is unclear to how the definition "contiguous" relates to the definition of "continuous land holding".
- To help the reader an illustration should be provided with the definition.

Point Number 749.44

Summary of Decision Requested: **Amend** the definition of "Duplex" in Chapter 13 Definitions as follows:

Means two attached residential units, ~~including two units~~ connected by a common wall and/or an accessory building, such as a garage or a carport.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the proposed definition.
- However a duplex could be connected by a common wall and/or by an accessory building, such as a garage or a carport.

Point Number 749.45

Summary of Decision Requested: **Amend** the definition of "Dwelling" in Chapter 13 Definitions as follows:

~~Means a self-contained residential unit for living accommodation~~ Used for a residential purpose as a single household residence contained within one or more buildings, and served by a kitchen.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter notes that the draft National Planning Standards proposed a definition for 'Residential Unit' and not for "dwelling".
- The submitter has made a submission to the Ministry for the Environment on the draft National Planning Standards and in doing so expressed that the definition of a 'Residential Unit' is unclear.
- A distinction can be drawn between dwellings (i.e. used for a residential purpose as a single household residence contained within one or more buildings, and served by a kitchen) and a residential unit (a defined part of a building under different ownership).

Point Number 749.46

Summary of Decision Requested: **Amend** the definition of "Earthworks" in Chapter 13 Definitions by adding exclusions.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter notes that the draft National Planning Standards proposed a definition for 'Earthworks' and 'Land Disturbance'.
- The submitter has made a submission to the Ministry for the Environment on the draft National Planning Standards and in doing so expressed that the definition of a 'Earthworks' needs to include a number of exclusions.
- The submitter generally supports the proposed definition, however notes there are no exclusions listed.

Point Number 749.47

Summary of Decision Requested: **Amend** the definition of "Gross floor area" in Chapter 13 definitions to include exclusions, which may include some of the exclusions from the definition "Gross leasable floor area".

AND

Amend the definition of "Gross floor area" in Chapter 13 definitions to provide a link to gross leasable floor area.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The draft National Planning Standards proposed a definition for 'Gross Floor Area'. The submitter has made a submission to the Ministry for the Environment on the draft National Planning Standards and expressed that the definition of 'Gross Floor Area' needs to include a number of exclusions.
- The submitter generally supports the proposed definition.
- However there are no exclusions listed and no reference to "Gross leasable floor area" that is included in the Proposed District Plan.
- Some of the exclusions listed under the proposed definition of 'Gross leasable floor area' should be included as exclusions under 'Gross Floor Area'.

Point Number 749.48

Summary of Decision Requested: Amend the definition of "Gross leasable floor area" in Chapter 13 Definitions to include a link to the definition "Gross floor area".

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the proposed definition; however, is unclear to how it links with the definition of 'Gross floor area'.

Point Number 749.49

Summary of Decision Requested: Delete the term and the definition of "Hazard" in Chapter 13 definitions.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- It is not clear why the term 'hazard' is included for a definition.
- The term can apply to a range of matters that is not included in the proposed definition such as natural hazards or hazards related to health & safety.
- There are definitions already provided for "hazardous facility", "hazardous substance" and "hazardous waste".
- The submitter considers it is not necessary to have a specific definition of "hazard" included in the Proposed District Plan.

Point Number 749.50

Summary of Decision Requested: Amend the definition of "Height" in Chapter 13 Definitions to add exclusions.

AND

Amend the definition of "Height" in Chapter 13 Definitions to include specific methods of measurements such as rolling height and/or average ground level.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- That the draft National Planning Standards proposed a definition for 'Height' in relation to a district plan. Housing New Zealand has made a submission to the Ministry for the Environment on the draft National Planning Standards and in doing so expressed that the definition of 'Height' was overly simplistic and requires a method of measurement to be specified and explained (i.e. rolling height and/or average ground level) as well as contain a list of exclusions.
- The submitter supports the proposed definition, however notes there are only one or two exclusions listed and no reference to how height is measured on a hill/rolling contours.

Point Number 749.51

Summary of Decision Requested: Delete the definition of "Height control plane" in Chapter 13 Definitions;

AND

Add a definition of "Recession plane" to Chapter 13 Definitions as follows:

Means the height of a building or structure relative to its distance from the boundary of the site. The allowable height increases as the distance from the boundary increases up to the maximum height allowed.

The Recession Plane is measured by lines that proceed at a prescribed angle (e.g. 45 degrees) from the horizontal, measured from any point at a prescribed height (e.g. 2m) vertically above ground level along site boundaries. The angle of the recessions, plan and the height of the starting point vary by Zone.

This control does not apply to chimneys, finials, or other similar decorative features, flues and ventilation shafts, antennas, satellite dishes with a diameter not exceeding 0.6m, flagpoles or any other similar projections not exceeding 2 metres in height and 1 square metre in area.

AND

Consequential or further amendments required to give effect to the new term "recession plane" replacing "height control plane".

Decision Reasons:

- The submitter opposes the angle degrees reference in the definition and seeks it is amended to align with changes sought to the daylight admission rules.

Point Number 749.52

Summary of Decision Requested: Amend the definition of "Impervious surface" as follows:

Means a surface such as a road, rooftop, footpath, paving, decking, swimming pool, patio, driveway, vehicle access and manoeuvring area or highly compacted soil that is not vegetated and does not infiltrate runoff. It excludes wooden decks with spacing between boards of 4mm or more, where water is allowed to drain through to a permeable surface below the deck.

Means a surface that is not vegetated, does not infiltrate runoff, and prevents or significantly retards the soakage of water into the ground. This includes:

- *roofs;*
- *paved areas including driveways and sealed/compacted metal parking areas;*
- *patios;*
- *sealed and compacted metal roads; and*
- *layers engineered to be impervious such as highly-compacted soil.*

Excludes:

- *wooden decks with spacing between boards of 4mm or more, where water is allowed to drain through to a permeable surface below the deck;*
- *grass and bush areas;*
- *gardens and other vegetated areas;*
- *porous or permeable paving and living roofs;*
- *permeable artificial surfaces, fields or lawns;*
- *slatted decks;*
- *swimming pools, ponds and dammed water; and*
- *rain tanks.*

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the inclusion of such term in the Proposed District Plan; however, the definition as it is currently proposed is too complex.
- The term should be simplified with clear inclusions and exclusions listed.

Point Number

749.53

Summary of Decision Requested:

Amend the definition of "Landscape restoration area" in Chapter 13 Definitions as follows:

Means an area shown on the planning maps, within the Rangitahi Peninsula Zone, where existing native vegetation is to be complemented by additional landscape restoration planting. The purpose of the area is to promote stabilisation of steep slopes, encourage ecological and habitat linkages and enhance landscape amenity, particularly in and near coastal areas and on visually-prominent landforms.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter does not support the proposed term solely relating to and only applying in the Rangitahi Peninsula Zone.
- It is inappropriate to have general terms used for a specific precinct area and limit the application and use to a specific area. The term should be allowed to apply in any precinct area or zone.
- There would be wider interest for the use of the term in the Proposed District Plan.

Point Number

749.54

Summary of Decision Requested:

Amend the definition of "Living court" in Chapter 13 Definitions, as follows:

living court Outdoor Living Space

Means an area of outdoor open space directly related to the living area of a household unit, and for the household's exclusive use. It does not include parking, manoeuvring areas and buildings, but does include swimming pools, pergolas and similar open-framed structures.

AND

Consequential or further amendments required to give effect and reference the new term 'Outdoor living space' as replacing "Living court".

Decision Reasons:

- The submitter generally supports the proposed definition.
- It is noted that the draft National Planning Standards proposed a definition for 'outdoor living space' that is slightly different to the Proposed District Plan definition however both align in regards to approach.

Point Number

749.55

Summary of Decision Requested:

Retain the definition of "Minor dwelling" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports the proposed definition.
- It is noted that the draft National Planning Standards proposed a definition for "Minor residential unit" that is different to the Proposed District Plan definition.

Point Number

749.56

Summary of Decision Requested:

Amend the definition of "Multi-unit development" in Chapter 13 Definitions as follows:

Means multiple residential units or buildings which are planned and designed in an integrated ~~in a~~ and comprehensive manner and achieve compatibility between all buildings on a single site or multiple sites.

It includes:

- a) an apartment; ~~building and~~
- b) a duplex;
- c) terrace housing; and
- d) townhouses.

....

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the inclusion of such term in the Proposed District Plan and seeks minor additions and edits to the proposed definition.
- There is a definition of 'Multi-unit development' in the Multi-unit development urban design guidelines. This definition is slightly different to the definition listed in Chapter 13.
- The submitter is seeking the deletion of the guidelines (reasons outlined later in this submission) from the Proposed District Plan and if that happens then the duplication of definition in the guidelines will be removed.
- The Proposed District Plan should only contain one definition of 'multi-unit development' and this should only be in the definitions section.

Point Number

749.57

Summary of Decision Requested:

Retain the definition of "Net site area" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports the proposed definition.
- It is noted that the draft National Planning Standards proposed a definition for 'Net site area' that is slightly different to the Proposed District Plan definition.

Point Number 749.58

Summary of Decision Requested: **Amend** the definition of "Residential activity" in Chapter 13 Definitions, as follows:

~~Means the use of land and buildings by people for living accommodation in a household unit, where the occupants will generally refer to the site as their home and permanent address. For the purpose of this definition, includes emergency and refuge accommodation, or accommodation for supervision staff and residents, where residents are subject to care or supervision (e.g. homes for people with disabilities). Residential activity includes home detention (as defined in the Criminal Justice Act 1985), but not prisons or other places where residents are subject to detention.~~

~~Means the use of land and a building or group of buildings, for residential units. This includes: - emergency and refuge accommodation, or accommodation for supervision staff and residents, - where residents are subject to care or supervision (e.g. homes for people with disabilities), and - home detention (as defined in the Criminal Justice Act 1985), but not prisons or other places where residents are subject to detention.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the inclusion of such term in the Proposed District Plan as it is unclear to how it links to the proposed terms and definitions of 'residential unit' and 'dwelling'.
- The current definition is too complex. There are two terms in the Proposed District Plan that speak to residential activity – this is "residential unit" and "dwelling". Both terms need to be linked to the definition of 'residential activity'.

Point Number 749.59

Summary of Decision Requested: **Amend** the definition of "Residential unit" in Chapter 13 Definitions as follows:

~~Means a building or group of buildings, or part of a building or group of buildings that is:~~

~~a) used, or intended to be used as a dwelling or intended to be used, only or mainly for residential activities;~~

~~a) occupied, or intended to be occupied, exclusively as the home or residence of not more than one a single household.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Similar to Residential Activity, Housing New Zealand generally opposes the inclusion of such term in the Proposed WDP as it is unclear to how it links to the proposed terms and definitions of 'residential activity' and 'dwelling'. The current definition is confusing. The definition needs to include the term 'dwelling'.
- It is noted that the draft National Planning Standards proposed a definition for 'residential unit' that is slightly different to the Proposed WDP definition.

Point Number 749.60

Summary of Decision Requested: **Retain** the definition of "Road network activities" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports the proposed definition.

Point Number 749.61

Summary of Decision Requested: **Amend** the definition of "Service court" in Chapter 13 Definitions as follows:

~~Means an area of outdoor space for the exclusive use of the household unit for domestic requirements, such as garbage storage and clothes line, but excludes any space required for outdoor living space a living court, parking, manoeuvring, or buildings.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the inclusion of the term in the Proposed District Plan with minor amendments to align with relief sought to the definition of 'living court'.

Point Number 749.62

Summary of Decision Requested: **Retain** the definition of "Site" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports the proposed definition.
- It is noted that the draft National Planning Standards proposed a definition for 'Site' that is slightly different to the Proposed District Plan definition.

Point Number 749.63

Summary of Decision Requested: **Amend** the heading of the definition of "Use" in Chapter 13 Definitions to refer to "Hazardous use".

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The term "use" is too broad and should not be included in the definitions chapter.
- The definition provided with the term "use" should include the words "hazardous" as it relates more to "Hazardous Use" than in a general application of "use".

Point Number 749.64

Summary of Decision Requested:	Amend the definition of "Vegetation clearance" to include exclusions and method of measurements. AND Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.
Decision Reasons:	<ul style="list-style-type: none"> The submitter generally supports the inclusion of the term in the Proposed District Plan; however, seeks the term is quantified with measurements that determine what is included and excluded.
Point Number	749.65
Summary of Decision Requested:	Retain the definition of "Visually permeable" in Chapter 13 as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the proposed definition.
Point Number	749.66
Summary of Decision Requested:	Add to Chapter 13 Definitions a definition of "structure" as follows: <i>Means any building, equipment, device or other facility made by people and which is fixed to or located on land; and includes any raft, but excludes motorised vehicles that can be moved under their power.</i> AND Add a list of exclusions to the new definition of "Structure". AND Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.
Decision Reasons:	<ul style="list-style-type: none"> Other definitions include the term 'structure'. The draft National Planning Standards proposed a definition for 'structure'. The submitter has made a submission on the draft National Planning Standards and in doing so expressed that the definition of 'structure' was problematic because it would include things such as trailers and caravans parked in a driveway, even temporarily. The submitter has sought that the proposed definition on the draft National Planning Standards is amended to include a list of exclusions. The submitter seeks a similar approach is taken with the inclusion of the definition of 'structure' in the Proposed District Plan.
Point Number	749.67
Summary of Decision Requested:	Amend the following sentence for all Restricted Discretionary Activities in the Proposed District Plan: <i>"Council's discretion shall be restricted to <u>any of the</u> following matters".</i> AND Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.
Decision Reasons:	<ul style="list-style-type: none"> The submitter does not see the list as an inclusive list to which all matters need to be met. It could be that one or more matters may be relevant instead of all matters listed when the activity is triggered for consent.
Point Number	749.68
Summary of Decision Requested:	Retain Rule 14.2.1 Permitted Activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the activities listed under 14.2.1.
Point Number	749.69
Summary of Decision Requested:	Retain Rule 14.2.2 Restricted Discretionary Activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the activities listed under 14.2.2, in particular to RD1 and matters of discretion.
Point Number	749.70
Summary of Decision Requested:	Retain Rule 14.3.1 Permitted Activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the activities listed under 14.3.1.
Point Number	749.71
Summary of Decision Requested:	Retain Rule 14.3.3 Restricted Discretionary Activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the activities listed under 14.3.3, in particular RD1, RD2 and RD3 with respective matters of discretion.

Point Number 749.72

Summary of Decision Requested: Add a new activity to Rule 14.3.3 Restricted Discretionary Activities and matters of discretion as follows:

BDZ

Access and service connections for subdivision that do not comply with one or more of the conditions of 14.3.1.8

Discretion is restricted to:

- a) The adequacy of the service connection;
- b) The functional and operational needs of, and benefits derived from, the infrastructure;
- c) Site design, layout and amenity;
- d) Visual, streetscape and amenity effects; and
- e) Road network safety and efficiency;

AND

Delete Rule 14.3.4 D3 Discretionary Activities.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter does not support the activity 'Access and service connections for subdivision that do not comply with one or more of the conditions of Rule 14.3.1.8' to be a Discretionary Activity.
- The submitter seeks the activity is changed to a Restricted Discretionary Activity with matters of discretion added. The activity does not need to be subject to a range of matters when it has a number of conditions attached already to Rule 14.3.1.8.

Point Number 749.73

Summary of Decision Requested: Delete Section 14.4 National Grid and the full package of objectives, policies, rules and definitions including the spatial extent of the overlay.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the National Grid provisions in its current proposed state and seeks the full package of provisions (objectives, policies, rules and definitions) including the spatial extent of the overlay shown in the Proposed WDP is amended.
- The submitter acknowledges the need for the Proposed WDP to give effect to the requirements of the National Policy Statement for Electricity Transmission (2008). However, the proposed National Grid provisions are overly restrictive and do not efficiently manage sensitive activities within close proximity to and under the National Grid

Point Number 749.74

Summary of Decision Requested: Retain Section 14.11 Water, wastewater and stormwater as notified.

Decision Reasons:

- The submitter supports the activities listed under 14.11.1 with activity-specific conditions and activities listed under 14.11.2 with matters of discretion.

Point Number 749.75

Summary of Decision Requested: Retain Rule 14.12.1 Permitted Activities as notified.

Decision Reasons:

- The submitter supports the permitted activities with activity-specific conditions listed in 14.12.1.

Point Number 749.76

Summary of Decision Requested: Retain Table 14.12.5.1 Separation distances as notified.

Decision Reasons:

- The submitter supports the separation distances outlined in the table.

Point Number 749.77

Summary of Decision Requested: Amend Table 14.12.5.7 Required parking spaces and loading bays as follows:

Activity	Minimum Required Parking Spaces	Minimum Required Loading Bays
Bulk retail and car yards	...	
Minor dwelling	1 car space per dwelling	Nil
Dwelling	2 car spaces are required for dwellings with 2 or more bedrooms and one car space is required for studio or 1-bedroom residential units 1 car space per dwelling or unit	Nil
Retirement village	1 car space per dwelling or unit	1 HGV
Boarding houses / boarding establishments	1 car space per three units	Nil
Multi-unit development	0.5 space per dwelling or unit with only one bedroom, 1 car space per dwelling or unit with	Nil

	<u>two or more bedrooms</u>	
Emergency service facilities	...	

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the minimum required parking spaces for the following activities:
 - Minor dwelling
 - Dwelling
 - Multi-unit development
- Housing New Zealand seeks the minimum required parking spaces are reduced for dwelling and multi-unit development, and no parking spaces should be required for a minor dwelling. This will enable better utilisation of the site for residential development than parking spaces.
- Minimum required parking spaces should also be outlined for the activity 'boarding houses / boarding establishments' in the Proposed WDP.

Point Number

749.78

Summary of Decision Requested:

Amend Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) as follows:

Road Type	General				Seal Width			
	Number of Allotments or Activities	Design Speed (km/h)	Design Vehicle (RTS (B Vehicle)	Minimum Road/ROW Reserve Width (m)	Minimum Trafficable Carriageway (m)	Minimum Median Provision (m)	Parking Provision	Minimum Total Seal Width (m) (Does not include concrete kerb width)
Access and road conditions (Residential, Village, Business, Business Town Centre, Industrial and Heavy Industri								
Access leg to an allotment (Residential Village)	1	N/A	8m Rigid	0.2	N/A			
Access leg to an allotment (Business and Industrial)	1	N/A		0.2 (residential) 0.5m (business)	N/A			
Private access, including ROWs and access allotments (Residential Village)	2 to 4	N/A		0.2	0.2	N/A	N/A	0.2
Private access, including ROWs and access allotments (Business and Industrial)	2 to 8	N/A		0.2 (residential) 0.5 (business)	0.5		N/A	0.5
Access allotment (Residential Village)	5 to 8	N/A		0.2	0.5		Optional	0.5
Service Lane (Business and Industrial)	N/A	N/A	subject to specific design that has been certified		0.5		No parking	0.5
Local Road (Residential Village)	8	50	8m Rigid	0.2 (residential) 0.5 (business)	0.2	None	1m on each side	0.5
Local Road (Business and Industrial)			17m Semi		0.5		Optional	0.5

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the minimum road/ROW reserve, minimum trafficable carriageway and the minimum total seal width for a number of road types and allotments or activities.
- Reducing minimum widths will enable better utilisation of the site for residential development than for vehicle access and roading.

Point Number

749.79

Summary of Decision Requested:

Add a new activity to Rule 16.1.2 Permitted Activities by adding an activity and activity-specific condition as follows:

Pl 3. Boarding House

Activity Specific condition:

(g) No more than 10 people per site inclusive of staff and residents.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the permitted activities listed in 16.1.2; however, notes that there is no activity for boarding houses / boarding establishments included in the table.

Point Number

749.80

Summary of Decision Requested:

Amend Rule 16.1.3 RD1 Restricted Discretionary Activities as follows:

Activity

A Multi-Unit development that meets all of the following conditions:

- The Land Use – Effects rules in Rule 16.2;

- b. The Land Use – Building rules in Rule 16.3, except the following rules do not apply:
- i. Rule 16.3.1, Dwelling;
 - ii. Rule 16.3.8 Building coverage;
 - iii. Rule 16.3.9 Living court;
 - iv. Rule 16.3.10 Service court;
 - v. Rule 16.3.3 Height; and
 - vi. Rule 16.3.5 Daylight admission.
- c. ~~The minimum net site area per residential unit is 300m²;~~
- d. The Multi-Unit development is connected to public wastewater and water reticulation;
- e. Total building coverage of the site does not exceed 50%;
- f. ~~Each residential unit is designed and constructed to achieve the internal design sound level specified in Appendix 1 (Acoustic Insulation) – Table 14;~~
- g. Service court areas are provided to meet the following minimum requirements for each residential unit:
- i. At least 2.25m² with a minimum dimension of 1.5 metres of outdoor or indoor space at ground floor level for the dedicated storage of waste and recycling bins;
 - ii. (i) At least 3m² with a minimum dimension of 1.5 metres of outdoor space at ground floor level for washing lines; and
 - iii. (ii) The required spaces in (g)(i) or (g)(ii) for each residential unit shall be provided individually, or as a dedicated communal service court.
- (h) ~~Living court Outdoor Living Space~~ areas are provided to meet the following minimum requirements for each residential unit:
- Duplex dwelling**
- Area Minimum dimension**
- Studio unit or 1 bedroom ~~30m²~~ 1.6m² 4m
- 2 or more bedrooms ~~40m² 30m²~~ 4m
- Apartment Building Ground Level Residential Unit**
- Area Minimum dimension Building
- Studio unit or bedroom ~~1 20m²~~ 1.6m² 4m
- 2 or more bedrooms 30m² 4m
- Apartment Building Upper Level Residential Unit**
- Area Minimum dimension Building
- Studio unit or 1 bedroom 10m² ~~2m~~ 1.5m
- 2 or more bedrooms 15m² ~~2m~~ 1.5m
- (i) ~~The maximum height of any building must not exceed 11m in height.~~
- (j) ~~Buildings must not project beyond a 45 degree recession plan measured from a point 3m vertically above ground level along side and rear boundaries.~~
- (a) ~~Where the boundary forms part of a legal right of way, entrance strip or access site, the standard applies from the farthest boundary of that legal right of way, entrance strip or access site.~~
- (b) ~~This standard does not apply to existing or proposed internal boundaries within a site.~~
- (k) ~~Add Alternative Height in relation to Boundary controls as prescribed in the Auckland Unitary Plan, Rule H6.6.7 Alternative height in relation to boundary.~~

Council's discretion shall be restricted to any of the following matters:

- a. ~~Density Intensity~~ of the development;
- b. ~~The manner in which the provisions of the Multi-Unit Design contained in Appendix 3.4 have been incorporated;~~
- c. Contribution of the development to and engagement with adjacent streets and public open space;
- d. ~~The visual quality and interest created through design such as the separation of buildings, variety in built form and architectural detailing, glazing, materials and colour;~~
- e. The incorporation of ~~energy efficiency measures such as~~ passive solar principles;
- f. Amenity values for occupants and neighbours in respect of outlook, privacy, noise, light spill, access to sunlight, living court orientation, ~~site design and layout;~~
- g. Staging needed to ensure that development is carried out in a coordinated and timely manner;
- h. Avoidance or mitigation of natural hazards
- i. Geotechnical suitability for building;
- j. Provision of infrastructure to individual units,
- k. AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports, and seeks amendments to Activity RD1, Multi-unit development.
- A minimum density requirement for multi-unit development is not required and seeks a deletion of such rule in the Proposed WDP.
- The bulk, location, site coverage and assessment criteria sufficiently address the likely impacts on amenity values while providing for a range of housing typologies.
- The submitter seeks a maximum height of 11m to enable multi-unit development up to 3 storeys in height.
- The submitter seeks the deletion of the multi-unit development urban design guidelines from the Proposed District Plan (reasons outlined later in this submission), including any reference to such guidelines in a rule or policy approach.

Point Number 749.81

Summary of Decision Requested: Delete Rule 16.1.4 D2;

AND

Add a new activity to Rule 16.1.3 RD and matters of discretion as follows:

RD2. Any permitted activity that does not comply with the Land Use - Effects Rule 16.2 or Land Use - Building Rule 16.3 unless the activity status is specified as controlled, restricted discretionary or non-complying.

Matters of discretion:

- (g) Intensity of the development;
- (b) Contribution of the development to and engagement with adjacent streets and public open space;
- (c) The incorporation of passive solar principles;
- (d) Amenity values for occupants and neighbours in respect of outlook, privacy, noise, light spill, access to sunlight, living court orientation, site design and layout;
- (e) Avoidance or mitigation of natural hazards;
- (f) Geotechnical suitability for building; and
- (g) Provision of infrastructure.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the activity (D2) and seeks it be a restricted discretionary activity with matters of discretion included.

Point Number

749.82

Summary of Decision Requested:

Delete Rule 16.1.5 NCI Non-complying Activities.

AND

Add a new activity to Rule 16.1.4 Discretionary Activities as follows:

D3 Any activity that is not listed as Prohibited, Permitted, Restricted Discretionary or Discretionary.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the activity, NCI and seeks it is a discretionary activity.

Point Number

749.83

Summary of Decision Requested:

Amend Rule 16.2.4.1 P1(a) Earthworks - General as follows:

(a)...

(ii) Not exceed a volume of ~~250m³~~ 1000m³

(iii) Not exceed an area of ~~1000m²~~ 1ha

...

~~(iv) Earthworks are setback 1.5m from all boundaries;~~

...

AND

Amend Rule 16.2.4.1 P3(a) Earthworks - General as follows:

(i) Not exceed a total volume of ~~500m³~~;

(ii) Not exceed a depth of ~~1.5m~~;

~~(iv) Fill material is setback 1.5m from all boundaries;~~

...

AND

Amend Rule 16.2.4.1 RD1 Earthworks - General as follows:

...

(b) The Council's discretion shall be restricted to any of the following matters:

...

~~(viii) Protection of the Hauraki Gulf Catchment Area;~~

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the maximum volume and area allowed in the permitted activities listed in 16.2.4.1.
- The submitter generally opposes the matters of discretion listed for RD1 in 16.2.4.1 and seeks the word 'any' is inserted into 16.2.4.1, RD1 (b) so the list is not seen as an inclusive list to which all matters need to be met. It could be that one or more matters may be relevant instead of all matters listed when the activity is triggered for a consent.

Point Number

749.84

Summary of Decision Requested:

Amend Rule 16.2.4.4 P1 (a)(ii) Earthworks - Landscape and Natural Character Areas to change the area from 50m² to 250m² and the volume from 250m³ to 50m³.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the maximum volume and area allowed in the permitted activities listed in 16.2.4.4 and seeks the figures are amended.

Point Number

749.85

Summary of Decision Requested: **Amend** Rule 16.2.7.1 P2(a) Signs – general as follows:

(a) ...

(iii) ~~The sign does not exceed 1.0m² 0.25m²;~~

(iv) ~~The sign height does not exceed 2m in height;~~

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the sign measurements allowed in the permitted activities listed in 16.2.7.1 and seeks the figures are amended.

Point Number 749.86

Summary of Decision Requested: **Amend** Rule 16.2.7.2 D1 Signs – Effects on traffic to change the activity status to Restricted Discretionary and add matters of discretion as follows:

~~RD1~~ ~~Any sign that does not comply with Rule 16.2.7.2 P1~~

(g) ~~Council's discretion shall be restricted to any of the following matters:~~

(i) ~~Amenity values;~~

(ii) ~~Character of the locality;~~

(iii) ~~Effects on traffic safety;~~

(iv) ~~Glare and artificial light spill;~~

(v) ~~Content, colour and location of the sign;~~

(vi) ~~Effects on a notable tree;~~

(vii) ~~Effects on the heritage values of any heritage item due to the size, location, design and appearance of the sign;~~

(viii) ~~Effects on cultural values of any Maaori Site of Significance; and~~

(ix) ~~Effects on notable architectural features of a building.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the activity D1 and seeks it is a redistricted discretionary activity with matters of discretion included.

Point Number 749.87

Summary of Decision Requested: **Amend** Rule 16.3.1 P1 Dwelling as follows:

~~P1. One dwelling within a site: Up to three dwellings per site.~~

AND

Amend Rule 16.3.1 D1 Dwelling to change the activity status to a Restricted Discretionary Activity and add matters of discretion as follows:

~~RD1~~ ~~A dwelling that does not comply with Rule 16.3.1 P1~~

(a) ~~Four or more dwellings per site;~~

(b) ~~Council's discretion shall be restricted to any of the following matters:~~

(i) ~~Intensity of the development;~~

(ii) ~~Height of the building;~~

(iii) ~~Design and location of buildings;~~

(iv) ~~Extent of shading on adjacent sites;~~

(v) ~~Provision of infrastructure to individual units; and~~

(vi) ~~Privacy on adjoining sites.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the activity status for a dwelling that does not comply with Rule 16.3.1 P1.
- Provisions for building a second dwelling on site or multi-unit developments are restrictive and discourage the desired urban uplift sought in the district. It is found that any type of in-fill housing development (i.e. build a second dwelling on an existing lot) or multi-unit development will trigger a consent requirement. The Proposed District Plan permits one dwelling per site. Subdivision consent will be required first in order to construct an in-fill dwelling.
- One dwelling per site is unnecessary and overly restrictive regulation and will act to discourage any new residential development including any in-fill type developments to occur.
- It also does not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth in the Waikato District.
- Amendments are required to the Residential Zone as a means of better enabling and incentivising residential development in the district. In doing so, Housing New Zealand proposes changes are necessary to triggers for consent and matters of discretion.

Point Number 749.88

Summary of Decision Requested: **Amend** Rule 16.3.2 Minor dwelling as follows:

~~P1~~

(a) ~~One minor dwelling contained within a site must comply with all of the following conditions:~~

(i) ~~The net site area is 9000m² or more There must be no more than one minor dwelling per site;~~

(ii) ~~The site does not contain a Multi-unit development.~~

(iii) ~~The gross floor area shall not exceed 70m² excluding decks and garaging.~~

~~D1~~

~~A minor dwelling that does not comply with Rule 16.3.2 P1 (a)(iii).~~

~~NCL~~

~~More than one minor dwelling per site or does not comply with Rule 16.3.2 P1 (a)(ii).~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Housing New Zealand generally opposes the conditions attached to P1 minor dwelling activity and activity status.
- Provisions for building a minor dwelling on site is restrictive and discourage the desired urban uplift sought in the district.
- Provisions do not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth in the Waikato District.
- Amendments are required to the residential zone provisions to better enable residential intensification at different scales and typologies.

Point Number 749.89

Summary of Decision Requested: **Amend** Rule 16.3.3.1 Height - Building general as follows:

P1

The maximum height of any building must not exceed ~~7.5m~~9m.

~~RD16+~~

(g) Any building that does not comply with Rule 16.3.3.1 P1.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Design and location of the building;

(ii) Extent of shading on adjacent sites;

(iii) Privacy on adjoining sites.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The provision does not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, housing demands and population growth.
- Amendments are required to the residential zone and urban subdivision provisions to better enable residential intensification at different scales and typologies.
- Housing New Zealand proposes changes are necessary to triggers for consent and matters of discretion.

Point Number 749.90

Summary of Decision Requested: **Amend** Rule 16.3.4 P1 Fences or walls - Road boundaries and Reserve Zone boundaries as follows:

16.3.4 Fences or walls - Road boundaries ~~and Reserve Zone boundaries~~

P1

(a) Fences and walls between the applicable building setbacks under Rule 16.3.9 on a site and any road ~~and reserve zone~~ boundaries must comply with all of the following conditions:

(i) Be no higher than ~~1.5m~~ 1.2m if solid;

(ii) Be no higher than 1.8m if:

A. visually permeable for the full 1.8m height of the fence or wall; or

B. solid up to ~~1.5m~~ 1.2m and visually permeable between ~~1.5m~~ 1.2m and 1.8m.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes this rule.

Point Number 749.91

Summary of Decision Requested: **Amend** Section 1.5 What does this mean for Waikato district strategic objectives and directions? (including sections 1.5.1, 1.5.2 and 1.5.3) to emphasise the importance of giving priority to residential intensification in existing urban areas. The submission provides the following addition to Section 1.5.4 Urban Growth as an example:

d) Urban growth and residential development should focus on a compact urban form with growth concentrated in and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter supports the compact urban model for concentrating growth in and around existing urban settlements (towns and villages) in the Waikato District. However, more emphasis and priority needs to be placed on the compact urban model approach than allowing for urban sprawl/expansion.
- Residential intensification in and around towns and villages should be emphasised. This approach is weakened when new land is rezoned for suburban housing at the edges of existing urban settlements. This type of development starts to create urban sprawl and widespread residential suburban homes. The compact urban model is lost when intensification spreads instead of concentrating in and around existing centres. The consequences of such development lead to commercial services and other amenities popping up at the edge of towns and villages which reduces the amenity and vitality of existing centres.

Point Number 749.92

Summary of Decision Requested: **Retain** Section 1.12 Strategic directions and objectives for the district as notified.

Decision Reasons:

- The submitter supports the strategic directions and objectives to achieve a more compact and concentrated urban form over the next 30 years in the Waikato district, in particular to provide a wide variety of housing forms and offering a range of affordable options.

Point Number	749.93
Summary of Decision Requested:	<p>Amend the Proposed District Plan to clarify what is meant by 'high' and 'very high' natural character areas such as through additional or amended definitions of the terms.</p> <p>AND</p> <p>Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter generally supports the objectives and policies of the Natural Character. However, it is unclear to what is 'high' and 'very high' natural character areas mean. The words are outlined in Policies 3.5.2(b)(ii) however there is no definition or explanation to the meanings of high and very high natural character areas.
Point Number	749.94
Summary of Decision Requested:	<p>Amend Objectives and Policies in Section 4.1 Strategic Direction to emphasise:</p> <ul style="list-style-type: none"> The compact urban development model for concentrating growth in and around existing towns and villages, and Avoid unplanned encroachment into rural land through being contained within defined urban areas to avoid rural residential fragmentation and rural land subdivision. <p>AND</p> <p>Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submission provides examples of amendments in subsequent submission points. The submitter generally supports the objectives and policies set out in 4.1.1 to 4.1.5 and 4.1.8, however more emphasis and alignment is needed in the provisions to align with the strategic objectives and directions set out in 1.5.1, 1.5.2, and 1.5.4. The submitter supports the compact urban development model and wants to ensure this is carried through into the plan's objectives, policies and rules. The submitter is seeking an additional new residential zone 'Medium Density Residential Zone' is introduced into the Proposed WDP (reasons outlined later in this submission). An amendment will be required to 4.1.5 Policy – Density to include a minimum density target (number of households per hectare) for the new residential zone. This number will need to be significantly higher than the residential zone.
Point Number	749.95
Summary of Decision Requested:	<p>Amend 4.1.2 Objective – Urban growth and development as follows (or similar wording):</p> <p><i>(a) Future settlement pattern is consolidated in and around existing towns and villages in the district <u>to support a compact urban form.</u></i></p> <p>AND</p> <p>Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter generally supports the objectives and policies set out in 4.1.1 to 4.1.5 and 4.1.8, however more emphasis and alignment is needed in the provisions to align with the strategic objectives and directions set out in 1.5.1, 1.5.2, and 1.5.4. The submitter supports the compact urban development model and wants to ensure this is carried through into the plan's objectives, policies and rules.
Point Number	749.96
Summary of Decision Requested:	<p>Amend Policy 4.1.3 Location of development as follows (or similar wording):</p> <p><i>(b) Locate urban growth areas only where they are consistent with the Future Proof Strategy Planning for Growth 2017 <u>and within existing urban limits.</u></i> <i>(c) <u>Where possible, urban subdivision, use and development in the rural environment is avoided.</u></i></p> <p>AND</p> <p>Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter generally supports the objectives and policies set out in 4.1.1- 4.1.5 and 4.1.8, however more emphasis and alignment is needed in the provisions to align with the strategic objectives and directions set out in 1.5.1, 1.5.2, and 1.5.4. The submitter supports the compact urban development model and wants to ensure this is carried through into the plan's objectives, policies and rules.
Point Number	749.97
Summary of Decision Requested:	<p>Amend Policy 4.1.5 Density as follows (or similar wording):</p> <p><i>(a) Encourage higher density housing and retirement villages to be located near to and support <u>existing town commercial</u> centres, community facilities, public transport, <u>key strategic transport corridors</u> and open space.</i> <i>(b) Achieve a minimum density of 12-15 households per hectare in the Residential Zone.</i> <i>(c) <u>Achieve a minimum density of 30 households per hectare in the Medium Density Residential Zone.</u></i></p> <p>AND</p> <p>Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter generally supports the objectives and policies set out in 4.1.1-4.1.5 and 4.1.8, however more emphasis and alignment is needed in the provisions to align with the strategic objectives and directions set out in 1.5.1, 1.5.2, and 1.5.4.

- The submitter supports the compact urban development model and wants to ensure this is carried through into the plan's objectives, policies and rules.
- Housing New Zealand is seeking an additional new residential zone 'Medium Density Residential Zone' is introduced into the Proposed District Plan (reasons outlined later in this submission). An amendment will be required to 4.1.5 Policy – Density to include a minimum density target (number of households per hectare) for the new residential zone. This number will need to be significantly higher than the residential zone.

Point Number 749.98

Summary of Decision Requested: **Amend** Policy 4.1.10 Tuakau to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed WDP (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.99

Summary of Decision Requested: **Amend** Policy 4.1.11 Pokeno to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.100

Summary of Decision Requested: **Amend** Policy 4.1.12 Te Kauwhata to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.101

Summary of Decision Requested: **Amend** Policy 4.1.13 Huntly to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.102

Summary of Decision Requested: **Amend** Policy 4.1.14 Taupiri to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.103

Summary of Decision Requested: **Amend** Policy 4.1.15 Ngaruawahia to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.104

Summary of Decision Requested: **Amend** Policy 4.1.16 Horotiu to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.105

Summary of Decision Requested: **Amend** Policy 4.1.17 Te Kowhai to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.106

Summary of Decision Requested: **Amend** Policy 4.1.18 Raglan to include desired outcomes sought from the relevant Town Centre Character Statement (Appendix 10) if the policy matter is not already addressed, and emphasise residential intensification close to and around existing town centres and urban settlements.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports the policies set out in 4.1.11-4.1.18.
- There are desired outcomes sought in each town and village with regard to development. These are identified in Appendix 10: Town Centre Character Statements in the Proposed District Plan.
- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan, and seeks the deletion of all Town Centre Character Statements from the Proposed District Plan (reasons outlined later in submission).
- Any desired outcomes sought from each town and village as currently shown in the Town Centre Character Statement should be written out into policies to the respective town centre and village in section 4.1.11-4.1.18, if the policy matter is not already listed or included. Emphasis should be placed on residential intensification close to and around existing centres and urban settlements.

Point Number 749.107

Summary of Decision Requested: **Add** a new chapter with Objectives and Policies for a "Medium Density Residential Zone" into the Proposed District Plan, as outlined in Attachment 2 to the submission.

AND

Amend the Proposed District Plan to provide for consequential changes or further amendments required to give effect, and reference, the new residential zone. The submitter provides the example that wherever the Residential and Village Zones are referenced or compact urban form or medium to higher density residential living, the new residential zone 'Medium Density Residential Zone' will need to be referenced and included (where applicable and appropriate).

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The amalgamation of former residential zones under the Waikato and Franklin sections of the Operative Waikato District Plan into one 'Residential Zone' does not alone enable residential intensification and housing options close to and within existing town centres and urban settlements.
- The provisions of the residential zones do not sufficiently encourage housing choices that are necessary to support the social and economic demands of the Waikato District.
- The two proposed residential zones – Residential Zone and Village Zone – do not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth in the Waikato District.
- There is no differentiation in height, bulk and density controls for residential activities in the Residential and Village zones.
- To this end, Housing New Zealand proposes an additional new Residential Zone 'Medium Density Residential Zone' is introduced into the District Plan around key centres and urban settlements. The proposed new zone will enable apartment, terrace housing and multi-unit developments close to and around centres. This will support economic and residential growth in and close to town centres and settlements, and will provide certainty to landowners, developers and service providers for long-term investment decisions. All of which will improve the health and well-being of the wider community.

Point Number 749.108

Summary of Decision Requested: **Amend** the Objectives and Policies in Section 4.2 - Residential Zone to clearly state the outcome sought.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the objectives and policies of the 'Residential Zone' as notified.
- A lot of the objectives and policies read as an assessment criterion. Objectives and policies need to clearly state the outcome sought

Point Number 749.109

Summary of Decision Requested: **Amend** Rule 16.3.5 Daylight admission as follows:

PI

Buildings must not protrude through a height control plane rising at an angle of ~~37~~ 45 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

RDI

(a) A building that does not comply with Rule 16.3.5 PI.

(b) Council's discretion shall be restricted to the following matters:

...

(iv) Privacy on ~~another adjoining sites and~~

~~(f) Effects on amenity values and residential character.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the daylight admission and seeks a change to the height control plane.

Point Number 749.110

Summary of Decision Requested: **Add** a restricted discretionary activity provision to Rule 16.3.6 Building coverage that reads as follows:

BD1

(a) Total building coverage that does not comply with Rule 16.3.6 P1.

(b) Council's discretion shall be rested to any of the following matters:

(i) Design and location of the building;

(ii) Provision for outdoor living space;

(iii) Privacy on adjoining sites.

AND

Amend Rule 16.3.6 D1 Building coverage as follows:

Total building coverage that does not comply with Rule 16.3.6 P1, P2 or P3.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the trigger for consent on infringements to building coverage.
- Amendments are required to the residential zone provisions to better enable residential intensification at different scales and typologies.
- The submitter proposes changes are necessary to triggers for consent and matter of discretion.

Point Number 749.111

Summary of Decision Requested: **Amend** Rule 16.3.7 Living Court as follows:

P1

(a) A living court must be provided for each dwelling that meets all of the following conditions:

...

(iii) When located on the ground floor, it has a minimum areas of ~~80m²~~ 30m² and a minimum dimension of 4m in any direction; and

(iv) When located on a balcony of an above ground apartment, it must have a minimum area of 5m² for studio and one-bedroom dwellings, or 8m² for two or more bedroom dwellings ~~+5m²~~ and a minimum dimension of 1.5m ~~2m in any direction~~.

P2

(a) A living court must be provided for each minor dwelling that meets all of the following conditions:

...

(iii) When located on the ground floor it has a minimum area of 5m² for studio and one-bedroom dwellings, or 8m² for two or more bedroom dwellings ~~40m²~~ and a minimum dimension of 1.5m ~~4m in any direction~~;

(iv) When located on a balcony of an above ground apartment, it must have a minimum area of 5m² for studio and one-bedroom dwellings, or 8m² for two or more bedroom dwellings ~~+5m²~~ and a minimum dimension of 1.5m ~~2m in any direction~~.

~~BD1~~ RD1

(a) A living court that does not comply with Rule 16.3.7 P1 or P2.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Design and location of the building;

(ii) Provision for outdoor living space including access to sunlight and open space and the usability and accessibility of the outdoor living space proposed;

(iii) Privacy on adjoining sites; and

(iv) The proximity of the site to communal or public open space that has the potential to mitigate any lack of private outdoor living space.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the proposed living court provisions.
- The submitter seeks the minimum living court is reduced. This will enable better utilisation of the site for residential development.
- The submitter proposes changes are necessary to triggers for consent and matters of discretion.

Point Number 749.112

Summary of Decision Requested: **Amend** Rule 16.3.8 Service Court to read:

P1

(a) A service court must be provided for each dwelling and minor dwelling, each with all of the following dimensions:

(i) minimum area of ~~+5m²~~ 8m²; and

(ii) contains a circle of at least 3m diameter.

~~BD1~~ RD1

(a) A service court that does not comply with Rule 16.3.8 P1.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Design and location of the building;

(ii) Provision for service court space.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the proposed service court provisions.
- The submitter seeks the minimum service court is reduced.
- This will enable better utilisation of the site for residential development.
- The submitter proposed changes are necessary triggers for consent and matters of discretion.

Point Number 749.113

Summary of Decision Requested: **Amend** Rule 16.3.9 Building setbacks-All boundaries as follows:

P1

(a) A building must be setback a minimum of:

(i) 3m from the road boundary;

(ii) ~~4.5m~~ 3m from the edge of an indicative road;

(iii) ~~4.5m~~ 1m from every boundary other than a road boundary;

(iv) and 1.5m from every vehicle access to another site.

P2

(a) non-habitable building can be set back less than 1.5m from a boundary, where:

(i) the total length of all buildings within 1.5m of the boundary does not exceed 6m; and

(ii) the building does not have any windows or doors on the side of the building facing the boundary.

P3 P2

A garage must be setback behind the front street facing facade of the dwelling.

RD1

(a) A building that does not comply with Rule 16A.3.9.1 P1 ~~or P2 or P3~~.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Road network safety and efficiency;

(ii) Reverse sensitivity effects;

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the building setbacks and seeks a change to the building setback from every boundary other than a road boundary and from every vehicle access to another site.

Point Number 749.114

Summary of Decision Requested: **Delete** Rule 16.3.9.2 Building setback for sensitive land use

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes any rule for building setback for sensitive land use and seeks the deletion of all such rules in the Proposed District Plan.

Point Number 749.115

Summary of Decision Requested: **Delete** any rule for building setback for sensitive land use in all zones.

Decision Reasons:

- The submitter generally opposes any rule for building setback for sensitive land use and seeks the deletion of all such rules in the Proposed District Plan.

Point Number 749.116

Summary of Decision Requested: **Amend** Rule 16.3.9.3 P1(a)(i) Building setback - Water bodies as follows:

(a) Any building must be setback a minimum of:

(i) ~~20m~~ 23m from the margin of any;

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the distance setback from margin of any lake and wetland and seeks the distance is amended from 23m to 20m.

Point Number 749.117

Summary of Decision Requested: **Amend** Rule 16.3.11.6 Heritage precincts - Matangi and Huntly as follows:

C1

...

(b) Council's control is reserved over the following matters:

(i) Effects on historic heritage, ~~amenity values and character of the precinct,~~ and

...

C2

...

(b) Council's control is reserved over the following matters:

(i) Effects on historic heritage, ~~amenity values and character of the precinct,~~ and

...

C3

...

(b) Council's control is reserved over the following matters:

(i) Effects on historic heritage, ~~amenity values and character of the precinct,~~ and

...

RD1

...

(b) Council's discretion shall be restricted to the following matters:

(i) Effects on historic heritage, ~~amenity values and character of the precinct,~~ and

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter general opposes the words 'amenity values and character' from matters of control.

Point Number 749.118

Summary of Decision Requested:

Amend Rule 16.4.1 Subdivision - General as follows:

RD1

(a) Subdivision must comply with all of the following conditions:

(i) Proposed vacant lots must have a minimum site area of 200m² + 450m², except where the proposed vacant lot is an access allotment or utility allotment or reserve to vest.

(ii) Proposed vacant lots must be able to connect to public-reticulated water supply and wastewater;

(iii) Where roads are to be vested in Council, they ~~must~~ should generally, follow a grid layout;

...

(b) Council's discretion shall be restricted to any of the following matters:

...

~~(iii) Consistency with the matters contained within Appendix 2.1 (Residential Subdivision Guidelines)~~

...

AND

Add a new controlled activity to Rule 16.4.1 Subdivision as follows:

CL

(a) Any subdivision in accordance with an approved land use resource consent must comply with that resource consent.

(b) Council's control shall be reserved to any of the following matters:

(i) The effect of the design and layout of the proposed sites created;

(ii) Compliance with the approved land use consent; and

(iii) Provision of infrastructure.

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the subdivision provisions.
- These provisions are restrictive and discourage the desired urban uplift sought in the district. Any type of in-fill housing development (i.e. build a second dwelling on an existing lot) or multi-unit development will trigger a consent requirement.
- The Proposed District Plan permits one dwelling per site. Subdivision consent will be required first in order to construct an in-fill dwelling.
- The submitter considers the minimum net size area for subdivision to be high and will discourage any new residential development including any in-fill type developments to occur. It does not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth in the Waikato District.
- Amendments are required to the subdivision provisions as a means of better enabling and incentivising residential development in the district.
- Additionally the submitter seeks the decision of the residential subdivision design guideline from the plan.

Point Number 749.119

Summary of Decision Requested:

Amend Rule 16.4.4 Subdivision - Multi-unit development as follows:

~~RD+ CL~~

(a) Multi-Unit development must comply with all of the following conditions:

(i) An application for land use consent under Rule 16.1.3 (Multi-Unit Development) must accompany the subdivision or have been granted land use consent by Council;

~~(ii) Any subdivision relating to an approved land use consent must comply with that resource consent;~~

~~(iii) The minimum existing lot size where a new freehold (fee simple) lot is being created must be 300m² net site area~~

~~(iv) The minimum existing lot size where a new freehold (fee simple) lot is being created must be 300m² net site area.~~

(v) Where a residential unit is being created in accordance with the Unit Title Act 2010 it must meet the following minimum residential unit size:

...

Studio unit or 1 bedroom unit ~~60m²~~ 30m²

2 bedroom or more residential unit ~~2 bedroom unit~~ 80m² 45m²

~~3 or more bedroom units~~ +80m²

(b) Council's control discretion shall be reserved ~~restricted~~ to any of the following matters:

...

~~(iii) Provision of common areas for shared spaces, access and services;~~

...

(vi) Compliance with the approved land use consent.

Amenity values and streetscape;

~~(viii) Consistency with the matters contained, and outcomes sought, in Appendix 3.1 (Multi-Unit Development Guideline)~~

~~(viii) Consistency with any relevant structure plan or master plan, including the provision of neighbourhood parks, reserves and neighbourhood centres;~~

~~(ix) Vehicle, pedestrian and cycle networks;~~

~~(x) Safety, function and efficiency of road network and any internal roads or accessways.~~

D1

Subdivision that does not comply with Rule 16.4.4 ~~C1~~ R1.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the minimum residential unit size in Multi-unit development.
- The provisions for residential subdivision are restrictive and discourage the desired urban uplift sought in the district.
- Subdivision consent will be required first in order to construct an infill dwelling or multi-unit dwelling.
- The submitter considers that the minimum residential unit size to be high and will discourage any new residential development to occur.
- The provisions do not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth in the district.
- Amendments are required the subdivision provisions to enable and incentivise residential development.
- Reducing the minimum residential unit size will enable more units to be accommodate in a development and better utilisation of the site.
- The submitter seeks the deletion of the multi-unit development urban design guidelines from the Proposed District Plan, including any reference to such guidelines in a rule or policy approach.

Point Number

749.120

Summary of Decision Requested:

Amend Rule 16.4.5 D1 Subdivision - Boundary adjustments as follows:

~~D1~~ R1

(a) Boundary adjustments that does not comply with Rule 16.4.5 C1.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Subdivision layout;

(ii) Shape of titles and variation in lot sizes.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the activity status for this rule and seeks that the discretionary activity is changed to a restricted discretionary activity.

Point Number

749.121

Summary of Decision Requested:

Amend Rule 16.4.11 RD1 Subdivision - Road frontage as follows:

RD1

(a) Every proposed vacant lot with a road boundary, other than an access allotment, utility allotment, or a proposed vacant lot containing a ROW or access leg must have a width along the road boundary of at least 10m ~~4.5m~~.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Safety and efficiency of vehicle access and road network; ~~and~~

~~(iii) Amenity values and rural character.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the proposed subdivision - road frontage provisions.
- The submitter seeks the minimum width is reduced.
- This will enable better utilisation of the site for residential development and create more lots.

Point Number

749.122

Summary of Decision Requested:

Amend Rule 16.4.12 RD1(a) Subdivision - Building platform as follows:

RD1

(a) Every proposed vacant lot, other than one designed specifically for access, utility allotment must be capable of containing a building platform upon which a dwelling and living court could be sited as a permitted activity, with the building platform being contained within either of the following dimensions:

(i) a circle with a diameter of at least 18m exclusive of yards; or

(ii) a rectangle of at least 100m² ~~200m²~~ with a minimum dimension of 6m ~~12m~~ exclusive of yards.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the provisions and seeks the minimum area and distance is reduced.
- The sought amendments will enable better utilisation of the site for residential development and potentially create more lots.

Point Number 749.123

Summary of Decision Requested: **Retain** Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips as notified.

Decision Reasons:

- The submitter generally supports this rule.

Point Number 749.124

Summary of Decision Requested: **Add** a new chapter that provides for a "Medium Density Residential Zone" with appropriate Land Use - Activities, Land Use - Effects, Land Use - Building and Subdivision provisions as outlined in attachment 3 of the submission.

AND

Amend the Proposed District Plan to enable a number of consequential amendments to give effect to the "Medium Density Residential Zone" sought.

Decision Reasons:

- The submitter proposes an additional new Residential Zone to enable apartment, terrace housing and multi-unit developments within close proximity of centres.

Point Number 749.125

Summary of Decision Requested: **Amend** Chapter 16 Residential Zone to align with the activities and rules in the new "Medium Density Residential Zone" chapter sought.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- Certain rules and activities in the Residential Zone will need to be amended to align with the proposed Medium Density Residential Zone provisions.

Point Number 749.126

Summary of Decision Requested: **Retain** Rule 17.1.2 Permitted Activities as notified.

Decision Reasons:

- The submitter generally supports the permitted activities listed in Rule 17.1.2.

Point Number 749.127

Summary of Decision Requested: **Amend** Rule 17.1.3 RDI Restricted Discretionary Activities as follows:

(a) A multi-unit development that meets all of the following conditions:

...

(i) ~~Each residential unit must be designed and constructed to achieve the internal design sound levels specified in Appendix 1 (Acoustic Insulation), Table 1.4;~~

...

(vii) Living court area are provided above ground floor level to meet the following minimum requirements for each residential unit:

...

Studio unit or 1 bedroom min area 10m² ~~Min dimension: 1.5m 2m~~

2 or more bedroom min area 15m² ~~Min dimension: 1.5m 2m~~

AND

Amend the matters of discretion for Rule 17.1.3 Restricted Discretionary Activities Matters of Discretion as follows:

(a) Council's discretion is limited to any of the following matters:

(i) ~~The extent to which the development is consistent with Town Centre Guidelines contained in Appendix 3.3;~~

(ii) ~~The extent to which the development is consistent with the Multi-unit design guidelines contained in Appendix 3.4;~~

(iii) The extent to which the development contributes to and engages with adjacent streets and public open space;

(iv) ~~The extent to which the development creates visual quality and interest through the separation of buildings, variety in built form and architectural detailing, glazing and materials;~~

(v) The extent to which the design of the development incorporates ~~energy efficiency measures such as~~ passive solar principles;

(vi) ~~Amenity values for occupants and neighbours in respect of outlook, privacy, noise, light spill, access to sunlight, living court orientation, site design and layout;~~

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter considers that a medium density requirement for multi-unit development is not required and seeks a deletion of such rule in the Proposed District Plan.
- The bulk, location, site coverage and assessment criteria sufficiently address the likely impacts on amenity values while providing for a range of housing typologies.
- The submitter seeks the deletion of the multi-unit development urban design guidelines from the Proposed District Plan, including any reference to such guidelines in a rule or policy approach.

Point Number 749.128

Summary of Decision Requested: **Amend** Rule 17.2.2 P1 Servicing and hours of operation as follows:

The loading and unloading of vehicles and the receiving of customers and deliveries associated with a commercial activity on a site adjoining a residential activity and/or the Residential and Village Zones may occur between 6.30am and 7.30pm.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter seeks that reference to dwelling should be included in addition to the zones listed.
- The effects are to dwellings and residential activity, not solely to zones.
- This is listed as a matter of discretion when servicing and operation of a business zone activity does not comply with Rule 17.2.2 P1.

Point Number 749.129

Summary of Decision Requested: **Amend** Rule 17.3.1.1 Height - Building General as follows:

PI

The maximum height of any building must not exceed ~~12m~~10m.

RDLP+

(a) Any building that does not comply with Rule 17.3.1.1 P1.

(b) Council's discretion shall be restricted to any of the following matters:

(i) Height of the building;

(ii) Design and location of the building;

(iii) Extent of shading on adjacent sites; and

(iv) Privacy on adjoining sites.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the proposed permitted height and activity status.
- Amendments are required to the provision to provide for design flexibility as well as to better enable the delivery of centre intensification at a variety of different scales and typologies.
- The submitter proposes changes are necessary to establish triggers for consent and matters of discretion.

Point Number 749.130

Summary of Decision Requested: **Amend** Rule 17.3.2 P1 Daylight admission as follows:

(a) Any building must not protrude through a height control plane rising at an angle of ~~37.5~~ degrees commencing at an elevation of ~~2.5m~~ 2m above ground level at the site...

Decision Reasons:

- The submitter generally opposes the daylight admission and seeks a change to the height control plane.
- Amendments are sought to the provision to provide for design flexibility as well as to enable the delivery of centre intensification at a variety of different scales and typologies.

Point Number 749.131

Summary of Decision Requested: **Amend** Rule 17.4.1 General subdivision as follows:

(a) Subdivision of land must comply with all of the following conditions:

(i) Proposed vacant lots must have a minimum size of ~~200m²~~ 225m² net site area with the exception of access or utility allotments or reserves to vest.

(ii) Proposed vacant lots must be connected to public-reticulated water supply and wastewater.

(b) The Council's discretion shall be...

CL

(a) Any subdivision in accordance with an approved land use resource consent must comply with that resource consent.

(b) Council's control shall be reserved to any of the following matters:

(i) The effect of the design and layout of the proposed sites created;

(ii) Provision of infrastructure.

DI

Subdivision that does not comply with Rule 17.4.1 RD1 or CL.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the subdivision provisions. These provisions are restrictive and discourage the desired urban uplift sought in the district.
- Amendments are required to the subdivision provisions as a means of better enabling and incentivising development in the district.

Point Number 749.132

Summary of Decision Requested: Amend Rule 17.4.1.1 Subdivision - Multi-unit development as follows:

~~CI RD1~~

(a) Subdivision for multi-unit development must comply with all of the following conditions:

(i) An application for land use consent under Rule 17.1.4 (Multi-unit housing development) must either accompany the subdivision or been granted resource consent by Council;

(ii) Any subdivision relating to an approved land use consent must comply with that resource consent.

(iii) ~~Be~~ Be connected to public wastewater and water reticulation; and

(iv) ~~Where~~ Where a residential unit is being created in accordance with the Unit Titles Act 2010, it meets the following minimum unit size:

...

Studio unit or 1 bedroom unit ~~60m² 30m²~~

2 bedroom or more residential unit 2 bedroom unit 80m² 45m²

~~3 or more residential unit 100m²~~

(b) The Council's discretion shall be limited to any of the following matters:

...

(iii) ~~Provision of common areas for shared spaces, access and services;~~

(iii) ...

(vi) Compliance with the approved land use consent.

(vii) ~~Consistency with the matters contained and outcomes sought, in Appendix 3.1 (Multi-unit development guideline);~~

(viii) ~~Consistency with any relevant structure plan or master plan, including the provision of neighbourhood parks, reserves and neighbourhood centres;~~

(ix) ~~Vehicle, pedestrian and cycle networks;~~

(x) ~~Safety, function and efficiency of road network and any internal roads or accessways.~~

D1

Subdivision that does not comply with Rule 17.4.1.1 ~~CI RD1~~.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the minimum residential unit size in multi-unit development.
- The provisions for multi-unit residential development subdivision are restrictive and discourage the desired urban uplift sought in the district. It is found that any type of infill housing development or multi-unit development will trigger a consent requirement. Subdivision consent will be required first in order to construct an in-fill dwelling or multi-unit development.
- The submitter considers that the minimum residential unit size to be high and will discourage any new residential development to occur.
- The provision does not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth in the district.
- Amendments are required to enable and incentivise residential development in the district.
- Reducing the minimum residential unit size will enable more units to be accommodated within a development.
- The submitter seeks the deletion of the multi-unit development urban design guidelines from the Proposed District Plan, including any reference to such guidelines in a rule or policy approach.

Point Number 749.133

Summary of Decision Requested: Amend Rule 17.4.1.2 D1 Subdivision - Boundary adjustments as follows:

~~D1 RD1~~

(a) ~~Boundary adjustments that does not comply with Rule 17.4.1.2 C.~~

(b) Council's discretion shall be restricted to any of the following matters:

(i) Subdivision layout;

(ii) Shape of titles and variation in lot sizes.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the activity status for this rule, and seeks the discretionary activity is changes to a restricted discretionary activity with matters of discretion.

Point Number 749.134

Summary of Decision Requested: Amend Rule 18.1.2 P2 Permitted Activities as follows:

P2 Residential activity ~~Nil located above ground floor level~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes activity-specific conditions attached to permitted activities listed in 18.1.2.

Point Number 749.135

Summary of Decision Requested: Amend Rule 18.1.3 Restricted Discretionary Activities as follows:

Activity

RD1

(a) A multi-unit development that meets all of the following conditions:

...

~~(b) The multi-unit development must be located above the ground floor;~~

~~(c)...~~

~~(d) Each residential unit must be designed and constructed to achieve the internal design sound levels specified in Appendix 1 (Acoustic Insulation), Table 1.4;~~

~~(e)...~~

(f) Living court areas are provided above ground floor level to meet the following minimum requirements for each residential unit:

Residential Unit	Minimum Living Court	Minimum Dimensions
Studio unit or 1 bedroom	10m ²	2m x 1.5m
2 or more bedrooms	15m ²	2m x 1.5m

The Council's discretion shall be limited to and of the following matters:

~~(a) The extent to which the development is consistent with the Town Centre Guidelines contained in Appendix 3.3;~~

~~(b) The extent to which the development is consistent with the Multi-unit design guidelines contained in Appendix 3.4;~~

~~(c) The extent to which the development contributes to and engages with adjacent streets and public open space;~~

~~(d) The extent to which the development creates visual quality and interest through the separation of buildings, variety in built form and architectural detailing, glazing and materials;~~

~~(e) The extent to which the design of the development incorporates energy efficiency measures such as passive solar principles;~~

(f) Amenity values for occupants and neighbours in respect of outlook, privacy, noise, light spill, access to sunlight, living court orientation, ~~site design and layout;~~

~~(g) The extent to which staging is necessary to ensure that development is carried out in a coordinated and timely manner;~~

~~(h) Avoidance or mitigation of natural hazards;~~

~~(i) Geotechnical suitability for building;~~

(j) Adequacy of the communal service court for the intended purpose.

Decision Reasons:

- The submitter generally opposes and seeks amendments to Rule 18.1.3 RD1.
- The submitter considers a minimum density requirement for multi-unit development is not required and seeks a deletion of such rule in the Proposed District Plan and seeks the deletion of the requirement that a multi-unit development must be located above ground floor level.
- The bulk, location, site coverage and assessment criteria sufficiently address the likely impacts on amenity values while providing for a range of housing typologies.
- It may also be appropriate in some locations to have a multi-unit development from ground floor level and above.
- The orientation and design of such development can support commercial activity in certain locations.
- The submitter seeks a maximum height of 11m is introduced into the Proposed District Plan to enable multi-unit development up to 3 storeys in height.
- The submission seeks the deletion of the multi-unit development and town centre urban design guidelines from the Proposed District Plan, including any reference to such guidelines in a rule or policy approach.

Point Number

749.136

Summary of Decision Requested:

Delete Rule 18.1.5 NC2 Non-Complying Activities

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- To give effect to the submission sought to enable residential activity to be provided on the ground floor within the Business Town Centre Zone requires the deletion of Rule 18.1.5 NC2.

Point Number

749.137

Summary of Decision Requested:

Delete Rule 18.1.5 NC3 Non-Complying Activity

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- To give effect to the submission sought to enable residential activity to be provided on the ground floor within the Business Town Centre Zone requires the deletion of Rule 18.1.5 NC3.

Point Number

749.138

Summary of Decision Requested:

Amend Rule 18.2.2 P1 Servicing and hours of operation as follows:

The loading and unloading of vehicles and the receiving of customers and deliveries associated with a commercial activity on a site adjoining a residential activity and/or the Residential and Village Zones must only occur between 6.30am and 7.30pm.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

Point Number

749.139

Summary of Decision Requested:

Amend Rule 18.2.4.1 RD1(b) Earthworks - General as follows:

The Council's discretion shall be restricted to any of the following matters:

...

Decision Reasons:

- The submitter generally opposes the matters of discretion listed for Rule 18.2.4.1 RD1 and seeks that the wording "any of" be inserted.
- This will ensure that the list is not seen as an inclusive list to which all matters need to be met.
- It could be that one or more matters may be relevant instead of all matters listed when the activity is triggers for a consent.

Point Number

749.140

Summary of Decision Requested:

Amend Rule 18.3.1.1 Height - Building general as follows:

PI

~~The maximum height of any building must not exceed 12m +0m.~~

~~RD1~~

~~(a) Any building that does not comply with Rule 18.3.1.1 PI.~~

~~(b) Council's discretion shall be restricted to any of the following matters:~~

~~(i) Height of the building;~~

~~(ii) Design and location of the building;~~

~~(iii) Extent of shading on adjacent sites; and~~

~~(iv) Privacy on adjoining sites~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the proposed permitted height and activity status.
- Amendments to the building height standard within the Business Town Centre Zone should be amended to better provide for design flexibility as well as to better enable the delivery of centre intensification at a variety of different scales and typologies.
- The submitter perceives these amendments as necessary to ensure appropriate triggers for consent and matters of discretion are incorporated into the Proposed District Plan.

Point Number

749.141

Summary of Decision Requested:

Amend Rule 18.3.2 PI Daylight admission as follows:

~~(a) Any building must not protrude through a height control plane rising at an angle of 37.45 degrees commencing at an elevation of 2.5m 3m above ground level at the site boundary where it adjoins a:~~

....

OR

Amend Rule 18.3.2 PI Daylight admission to consider an alternative height in relation to the boundary standard in the Business Town Centre Zone.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the daylight admission and seeks a change to the height control plane.
- The amendments sought will better provide for design flexibility and enable the delivery of centre intensification at a variety of different scales and typologies.
- Consideration should also be made to an alternative height in relation to boundary control within the Business Town Centre Zone.

Point Number

749.142

Summary of Decision Requested:

Add a new clause to Rule 18.3.4 PI Display windows and building facades as follows:

~~(a) Any new building facade, or alteration of an existing building facade, must comply with the following conditions:~~

~~(i) Not be set back from the road boundary; and~~

~~(ii) Provide display windows comprising at least 50% of the building facade.~~

~~(b) Rule 18.3.4 PI (g) does not apply to multi-unit development.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes Rule 18.3.4 Display windows and building facades.

Point Number

749.143

Summary of Decision Requested:

Amend Rule 18.3.8 Dwelling as follows:

PI

~~(a) One Any dwelling within a lot must comply with all of the following conditions:~~

~~(i) The dwelling must not be located at ground level;~~

~~(ii) The dwelling must achieve the internal design sound levels specified in Appendix 1 (Acoustic Insulation), Table 1.4;~~

~~(b) Rule 18.3.8 PI (a) does not apply to multi-unit development (refer to Rule 18.1.3 RD1 (Multi-Unit Development)).~~

BD1

~~Any dwelling that does not comply with Rule 18.3.8 PI (a) (ii).~~

~~NE4~~

~~Any dwelling that does not comply with Rule 18.3.9(a)(i).~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- To give effect to the submission, a consequential amendment allowing residential activity to be provided on the ground floor in the Business Town Centre Zone requires the deletion of Rule 18.3.8 P1(a)(i).

Point Number 749.144

Summary of Decision Requested: **Amend** Rule 18.3.9 Living Court as follows:

~~PI~~

~~(a) A living court must be provided for each dwelling that meets all of the following conditions:~~

~~(i)...~~

~~(iii) It is located on a balcony containing at least 10m² + 5m² and a circle with a diameter of at least 1.5m ~~2.4m~~.~~

~~BDI~~

~~(a) A living court that does not comply with Rule 18.3.9 P1.~~

~~(b) Council's discretion shall be restricted to any of the following matters:~~

~~(i) Design and location of the building;~~

~~(ii) Provision for outdoor living space including access to sunlight and open space and the usability and accessibility of the outdoor living space proposed;~~

~~(iii) Privacy on adjoining sites; and~~

~~(iv) The proximity of the site to communal or public open space that has the potential to mitigate any lack of private outdoor living space.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally oppose the proposed living court provisions.
- The submitter seeks the minimum living court is reduced to enable the better utilisation of the site for residential development.
- The submitter proposes changes which are necessary to triggers for consent and matters of discretion.

Point Number 749.145

Summary of Decision Requested: **Amend** Rule 18.4.1 RD1 (a) General subdivision as follows:

~~RD1~~

~~(a) Subdivision of land must comply with all of the following conditions:~~

~~(i) Proposed vacant lots must have a minimum size of 200m² + 25m² net site area with the exception of access or utility allotments or reserves to vest;~~

~~(ii) Proposed vacant lots must be connected to public-reticulated water supply and wastewater.~~

AND

Add a new controlled activity to Rule 18.4.1 Subdivision- General as follows:

~~CI~~

~~(a) Any subdivision in accordance with an approved land use resource consent must comply with that resource consent.~~

~~(b) Council's control shall be reserved to any of the following matters:~~

~~(i) The effect of the design and layout of the proposed sites created;~~

~~(ii) Provision of infrastructure.~~

...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the subdivision provisions.
- The provisions are restrictive and discourage the desired urban uplift sought in the district.
- Amendments sought will enable and incentivise development in the district.

Point Number 749.146

Summary of Decision Requested: **Amend** Rule 18.4.2 RD1 Subdivision - Multi-Unit subdivision as follows:

~~CI RD1~~

~~(a) Subdivision for multi-unit development shall comply with all of the following conditions:~~

~~(i)...~~

~~(ii) Any subdivision relating to an approved land use consent must comply with that resource consent;~~

~~(iii) Be connected to public wastewater and water reticulation;~~

~~(iv) Where a residential unit is being created in accordance with the Unit Titles Act 2010, it meets the following minimum unit size:~~

...

~~Studio unit or 1 bedroom 60m² 30m²~~

~~2 bedroom or more residential unit 2 bedroom unit 80m² 45m²~~

~~3 or more bedroom unit 100m²~~

~~(b) The Council's control discretion shall be limited to any of the following matters:~~

~~(i)...~~

~~(ii) Provision of common areas for shared spaces, access and services;~~

~~##(j)~~ Avoidance or mitigation of natural hazards;

~~##(k)~~ Geotechnical suitability of site for buildings;

~~##(l)~~ Amenity values and streetscape;

~~(v) Compliance with an approved land use consent.~~

~~(vi) Consistency with the matters contained, and outcomes sought, in Appendix 3.4 (Multi-unit development guideline);~~

~~(vii) Consistency with any relevant structure plan or master plan, including the provision of neighbourhood parks, reserves and neighbourhood centres;~~

~~(viii) Vehicle, pedestrian and cycle networks;~~

~~(ix) Safety, function and efficiency of road network and any internal roads or accessways.~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the minimum residential unit size in Multi-unit development.
- The multi-unit subdivision provision is restrictive and discourages the desired urban uplift sought in the district.
- The submitter found that any type of in-fill housing development or multi-unit development will trigger a reason for consent.
- Subdivision consent will be required first in order to construct an in-fill dwelling or multi-unit development.
- The submitter considers the minimum residential unit size to be high and will discourage any new residential development to occur.
- The provision does not encourage sufficient housing choice and variety in residential built form to support changing demographics, lifestyles, rising housing costs, future housing demands and population growth within the district.
- Amendments are required to enable and incentivise residential development in the district.
- Reducing the minimum residential unit size will enable more units to be accommodated in a development and better utilisation of the site.
- The submitter seeks the deletion of the multi-unit development urban design guidelines from the Proposed District Plan., including any references to such guidelines in a rule or policy approach.

Point Number 749.147

Summary of Decision Requested: **Amend** Rule 18.4.3 D1 Subdivision - Boundary adjustments as follows:

BD1

(a) Boundary adjustments that does not comply with Rule 18.4.3 C1.

(b) Council's discretion shall be restricted to the following matters:

(i) Purpose of the boundary adjustment;

(ii) Effects on existing buildings.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes the activity status for this rule, and seeks the discretionary activity is changed to a restricted discretionary activity with matters of discretion inserted.

Point Number 749.148

Summary of Decision Requested: **Amend** Rule 20.2.1 P1 Servicing and hours of operation as follows:

P1

Servicing and operation of an industrial activity adjoining any residential activity and/or Residential, Village or Country Living Zone may load...

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter seeks that reference to dwelling should be included.
- The effects are to dwellings and residential activity, not solely to zones.
- This is listed as a matter of discretion when servicing and operation of an industrial activity does not comply with Rule 20.2.1 P1.

Point Number 749.149

Summary of Decision Requested: **Amend** Rule 21.2.1 P1 Servicing and hours of operation as follows:

Servicing and operation of an industrial activity adjoining any residential activity and/or Residential, Village or Country Living Zone may load or unload vehicles or receive customers or deliveries between 7.30am and 6.30pm.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter seeks that reference to dwelling should be included.
- The effects are to dwellings and residential activity, not solely to zones.
- This is listed as a matter of discretion when servicing and operation of an industrial activity does not comply with Rule 21.2.1 P1.

Point Number 749.150

Summary of Decision Requested: **Delete** Appendix I Acoustic Insulation;

AND

Delete all references to Appendix I- Acoustic Insulation in the Proposed District Plan as a consequential amendment;

OR

If the acoustic standards are sought **Add** new rules with the appropriate activity and zone in the relevant section of the Proposed District Plan.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the inclusion of an Acoustic Insulation document in the Proposed District Plan.
- The submitter opposes any policy or rule approach which would require development proposals to comply with standards in the Proposed District Plan. These matters should be addressed during the building consent process.
- If the standards are sought, then they should be written out as specific rules with the appropriate activity and zone in the relevant section of the Proposed District Plan.
- Appendix 1: Acoustic Insulation should be treated as a non-statutory document to inform design and development and not be included in the Proposed District Plan.

Point Number 749.151

Summary of Decision Requested: Delete Appendix 3 Design Guidelines

AND

Delete all references to Appendix 3 in the Proposed District Plan as a consequential amendment.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally supports design guidelines for residential subdivision, multi-unit development and town centre in principle being utilised by Council to provide further detail and guidance regarding best practice design outcomes, however, opposes any policy or rule approach which would require development proposals to comply with the design guidelines in the Proposed District Plan.
- Any requirements prescribed in a design guideline should be a specific rule or matter of discretion, not hidden in a design guideline.
- The design guidelines should be treated as non-statutory documents to inform design and development.

Point Number 749.152

Summary of Decision Requested: Delete Appendix 10 Town Centre Character Statements;

AND

Delete all references to Character Statements in the Proposed District Plan as a consequential amendment.

OR

If the desired outcomes are sought, **add** new specific policies into Chapter 4 Urban Environment of the Proposed District Plan that reflect the guidelines within Appendix 10 Town Centre Character Statements or as specific matters of discretion or rules with the appropriate activity and zone.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the inclusion of Town Centre Character Statements in the Proposed District Plan.
- The Town Centre Character Statements help to inform design and development in existing town centres, the outcomes sought and guidelines within these town centre character statements read as desired requirements and rules that a Consent Holder must follow.
- The submitter opposes any policy or rule approach which would require development proposals to comply with such character statements in the Proposed District Plan.
- If the guidelines and outcomes are sought, it should be written as specific policies within Chapter 4 of the Proposed District Plan as specific matters of discretion or rules within the appropriate activity and zone.
- The submitter seeks the deletion of all Town Centre Character Statements from the Proposed District Plan. These non-statutory documents inform design and development and should not be included in the Proposed District Plan.

Point Number 749.153

Summary of Decision Requested: **Amend** the extent of Residential Zone, Village Zone and Rural Zone as contained in Attachment 4 of the submission.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The Proposed District Plan has provided additional land for residential development, and therefore expanded the the urban boundaries of certain towns and villages.
- The submitter seeks no further area of residential and village zoning is proposed outside of the existing urban areas.
- The submitter supports the compact urban model for concentrating growth in and around existing urban settlements in the district, however, the compact urban model approach is weakened when new land is rezoned for suburban housing at the edges of existing urban settlements.
- This type of development starts to create urban sprawl and widespread residential suburban homes.
- The compact model is lost when intensification spreads instead of concentrating in and around existing centres.
- The consequences of such development leads to commercial services and amenities locating on the edges of urban settlements and therefore reducing amenity and vitality of existing centres.
- More emphasis and priority needs to be placed on the compact urban model approach.

Point Number 749.154

Summary of Decision Requested: **Add** a new "Medium Density Residential Zone" to the Proposed District Plan zone maps as contained in Attachment 4 of the submission for the following urban settlements:

- Huntly
- Ngaruawahia
- Pokeno
- Raglan
- Taupiri
- Te Kauwhata
- Tuakau

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- There is a need to provide for residential intensification to be located close to and within existing town centres and urban settlements in the district.
- The submitter proposes an additional new Residential Zone - Medium Density Residential Zone.
- The Medium Density Residential Zone will enable the development of apartments, terrace housing and multi-unit developments close to and around town centres, ranging from two to three storeys in height.
- The proposed zone seeks to provide for and enable further opportunities for medium density intensification and walkable catchments in Huntly, Pokeno, Tuakau and Ngaruawahia.
- The proposed new zone will support residential growth in and within close proximity to town centres and will provide certainty to landowners, developers and service providers for long-term investment.
- Improve health and well-being of the wider community.

Point Number 749.155

Summary of Decision Requested: **Delete** objectives, rules, rules and definitions relating to the National Grid.

AND

Delete overlays that provide for the National Grid.

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter opposes the National grid provisions.
- The submitter acknowledges the need for the Proposed District Plan to give effect to the requirements of the National Policy Statement for Electricity Transmission (2008). However, the proposed National Grid provisions are overly restrictive and do not efficiently manage sensitive activities within close proximity to the National Grid.

Point Number 749.156

Summary of Decision Requested: **Add** a definition of "Boarding House" within Chapter 13 Definitions as follows:

Boarding house (also known as boarding establishments);

Has the same meaning as section 66B of the Residential Tenancies Act 1986.

AND

Any consequential or further amendments to the Proposed District Plan to give effect and reference the term "Boarding house"

Decision Reasons:

- The term 'boarding establishments' is found in the Proposed WDP however there is no definition for such term.

Point Number 749.157

Summary of Decision Requested: **Retain** Rule 14.12.2 Restricted Discretionary Activities as notified.

Decision Reasons:

- The submitter supports the permitted activities with the restricted discretionary activities listed under 14.12.2 with matters of discretion listed.

Point Number 749.158

Summary of Decision Requested: **Amend** Rule 18.1.3 RD2 Restricted Discretionary Activities as follows:

RD2 (a) The construction of any new building that meets all of the following conditions:

(i) The Land Use- Effects in Rule 18.2;

(ii) The Land Use- Building in Rule 18.3

except;

A. Rule 18.3.9 (Dwellings) does not apply;

B. Rule 18.3.10 (Living court) does not apply;

The Council's discretion shall be limited to any of the following matters:

(i) The extent to which the building is consistent with the following matters ~~listed in Appendix 3.3 (Town Centre Design Guidelines) including:~~

A. A site and contextual analysis ~~that identifies and addresses the matters listed in section 3.3;~~

B. A connectivity and movement network analysis ~~that addresses the matters listed in section 4.3;~~

C. A neighbourhood character assessment ~~that identifies and addresses the elements listed in section 5;~~

D. Detailed design illustrating how the building will promote these character elements of the respective town to achieve the outcomes sought in section 5.2 of the design guide;

~~(iii) Consistency with the relevant Town Centre Character Statement contained within Appendix 10.1-10.6 (Town Character Statements);~~

AND

Amend the Proposed District Plan as consequential or additional relief as necessary to address the matters raised in the submission as necessary.

Decision Reasons:

- The submitter generally opposes and seeks amendments to Rule 18.1.3 RD1.
- The submission seeks the deletion of the multi-unit development and town centre urban design guidelines from the Proposed District Plan, including any reference to such guidelines in a rule or policy approach.

Submitter Number: 750

Submitter: Matthew Dean

On behalf of: Mangatawhiri River Catchment Care Group

Point Number 750.1

Summary of Decision Requested: **Beautify** the landscape around the bridge on Pioneer Road over the Mangatawhiri River after consultation with all interested parties;
AND
Erect an interpretation panel to tell the history of the Mangatawhiri area.
AND
Upgrade the section of the Te Araroa trail that passes through that area.
AND
Clean up the river in the longer term.

Decision Reasons:

- Site is a significant historic place.
- Site is registered with Heritage New Zealand.
- Site is an ugly eyesore and river banks overgrown with exotic willow and weed species.
- A catchment care group has been formed in the area to improve water quality.

Point Number 750.2

Summary of Decision Requested: Add to Planning Map 7.8a walkway/cycleway/bridleway along the route of the Te Araroa Walkway in the vicinity of Peioneer Road, Mercer.

Decision Reasons:

- Site is a significant historic place
- Site is registered with Heritage New Zealand
- Site is an ugly eyesore and river banks overgrown with exotic willow and weed species.
- A catchment care group has been formed in the area to improve water quality.

Submitter Number: 751 **Submitter:** Chanel Hargrave and Travis Miller

Point Number 751.1

Summary of Decision Requested: **Retain** Policy 4.7.4(a) Lot sizes except for the amendments sought below.

AND

ADD two new clauses to Policy 4.7.4 Lot sizes as follows:

(b) Smaller lot sizes and multi-unit development promoted within walking distance to existing Town Centres, public amenities and public transport.

(c) Smaller lots size and multi-unit development promoted within new greenfield sites where the land is within walking distance to amenities and reserves.

(d) Avoid undersized lots in the Village Zone.

Decision Reasons:

- The policy needs to be expanded to cover multi-unit development. There is a need to promote intensification to achieve compact development to support future public transport.
- Policy needs to reflect that in residential areas the density is higher.
- This is important for Tuakau and Pokeno, where a commuter train from Auckland to Hamilton is under discussion.
- The Residential Zone needs to provide for medium density development appropriately.
- The rural areas of Tuakau contain versatile soils which are used for rural production activities and contribute significantly to both regional and national food supply. Intensification within Tuakau residential areas should be encouraged to avoid further encroachment into the rural area past the lifetime of this Plan.

Point Number 751.2

Summary of Decision Requested: **Amend** Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services to ensure that policies (a) and (b) are not contradictory.

AND

Amend Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services as follows:

(b) recognise the minimum potential yield may not be achieved where there are proven geotechnical constraints or other topographical constraints.

Decision Reasons:

- Support intent of Policy 4.7.7.
- Sub-clauses (a) and (b) are contradictory.
- There may also be other constraints such as flooding, overland, flow paths, rivers that mean that minimum density cannot be achieved.

Point Number 751.3

Summary of Decision Requested: **Add** a new permitted activity to Rule 16.1.2 Permitted Activities as follows:

"P13 Multi-unit development of up to three dwellings is a Permitted Activity,"

with similar standards as Rule 16.1.3 RD1 (including proposed amendments as permitted applied as permitted activity standards).

Decision Reasons:

- Multi-unit development of up to three dwellings should be a permitted activity and will enable infill development and avoid unnecessary resource consent costs and time delays where effects could be managed through permitted standards.
- Construction of up to three dwellings is unlikely to result in adverse effects provided the relevant controls can be met.
- Will allow existing land to be developed more efficiently without the need to subdivide the land.

Point Number 751.4

Summary of Decision Requested: **Retain** Rule 16.1.3 RD 1 Restricted Discretionary Activities except for the amendments sought below.

AND

Amend Rule 16.1.3RD1 Restricted Discretionary Activities as follows:

A Multi-Unit development that meets all of the following conditions:

....

(c) The minimum net site area per residential unit is ~~300~~250m²;

...

(e) Total building coverage of the site does not exceed ~~50~~60%;

...

Where multi-unit apartments are proposed apply conditions in 1.7.1.3 RD1.

Decision Reasons:

- Supports the provision for multi unit housing as it gives effect to the strategic direction outlined in Section A and Chapter B.4.1.
- Achieves policies 4.1.2, 4.1.5, 4.2.16 and 4.2.17
- Will allow for infill development and avoid unnecessary resource consent costs and delays where effects can be managed by standards.
- Provision should also be made for low rise apartments close to the centre and support Policy 4.2.17(a).
- There are a number of large sections within the older existing residential areas in Tuakau, Te Kauwhata, Ngaruawahia and Pokeno. These sites are close to the Town Centre and could accommodate low-rise apartments and multi-unit developments.
- The provisions of the Plan encourage a typical suburban form rather than medium density development.
- The minimum net site area does not support diversity in building types.
- The building coverage should be increased.

Point Number

751.5

Summary of Decision Requested:

Amend Rule 16.2.4.1P1(a)(ii) Earthworks - General as follows:

Not exceed a volume of ~~250~~500m³;

Decision Reasons:

- Where subdivision has been approved by Council and lots have been created there should be no requirements for land owners to apply for additional resource consents for earthworks to undertake permitted activities on the land.
- The earthworks thresholds need to be lenient enough to ensure the land can be developed without additional consents.
- Permitted land use standards should be able to control the adverse effects of any works.

Point Number

751.6

Summary of Decision Requested:

Retain Rule 16.2.4.1P2 Earthworks - General

Decision Reasons:

Enables the creation of stable building platforms.

Point Number

751.7

Summary of Decision Requested:

Amend Rule 16.2.4.1P3(a) Earthworks - General as follows:

(a) Earthworks for purposes other than creating a building platform for residential purposes within a site, using imported fill material must meet all of the following conditions:

(i) Not exceed a total volume of ~~20~~100m³;

(ii) Not exceed a depth of 1.5m;

...

Decision Reasons:

- Cleanfill may be required in residential zones sites to enable greenfield land to be developed for residential purposes.
- The requirement to avoid filling in all circumstances may restrict development.
- The importation volume is too low to enable development

Point Number

751.8

Summary of Decision Requested:

Amend Rule 16.2.4.1 NC1 Earthworks - General to be considered a restricted discretionary activity, rather than a non-complying activity and read as follows:

~~NC1~~RD2 Earthworks including the importation of cleanfill to a site.

Decision Reasons:

- Cleanfill may be required in residential zoned sites to enable greenfield land to be developed.
- The requirement to avoid filling in all circumstances may restrict the ability to develop residential land where balanced cut to fill earthworks are inappropriate or cannot be achieved.
- The importation volume is too low to enable residential development.
- Non-complying status is too restrictive.

Point Number

751.9

Summary of Decision Requested:

Add a new permitted activity to Rule 16.3.1 Dwelling as follows:

P2 Multi-unit development of up to three dwellings added as a Permitted Activity.

AND

Add similar standards as Rule 16.1.3 RD1 [including proposed amendments] as permitted activity standards.

AND

Amend Rule 16.3.1 Dwelling to state that the rule does not apply to multi-unit developments.

Decision Reasons:

- Multi-unit development of up to three dwellings should be a Permitted Activity. This will allow for infill development and avoid unnecessary resource consent costs and time delays where the effects could be managed through permitted standards.
- There are a number of larger sections within the older existing residential areas within Tuakau, Te Kauwhata, Ngaruawahia and Pokeno and are often located close to Town Centres.
- These sites could accommodate low-rise apartments and multi-unit development to achieve the policy directions of the Proposed District Plan.
- Allow existing land to be developed more efficiently without the need to subdivide the land.
- Permitted standards can control amenity effects to ensure that neighbouring sites are not affected.
- Approach has been taken by Auckland Council where additional dwellings can be constructed on properties without resource consent provided permitted standards can be achieved.

Point Number 751.10

Summary of Decision Requested: **Retain** Rule 16.3.2 Minor Dwelling, except for the amendments sought below.

AND

Amend Rule 16.3.2 P1(a)(i) Minor dwelling as follows:

(i) *The net site area is ~~900~~500m² or more;*

Decision Reasons:

- The Proposed District Plan should encourage intensification and housing options in the Residential Zone, especially in growth areas such as Tuakau and Pokeno. The permitted standards will control if the site is an appropriate size to accommodate a minor dwelling.

Point Number 751.11

Summary of Decision Requested: **Amend** Rule 16.3.3.1 P1 Height - Building general as follows:

The maximum height of any building must not exceed ~~7.5~~11m.

AND

Amend Rule 16.3.5 P1 Daylight Admission as a consequential amendment .

Decision Reasons:

- The height limit does not enable the efficient use of urban land and fails to increase the development capacity of existing urban areas.
- The strategic direction outlined in the Proposed District Plan supports an increase in densities and housing choice. This includes the provision of low rise apartments and multi-unit development.
- The 7.5m height limit restricts the potential to build medium density housing.
- Opposes the 7.5m permitted height limit and request it be increased within the residential area surrounding Pokeno and Tuakau

Point Number 751.12

Summary of Decision Requested: **Amend** Rule 16.3.5 P1 Daylight admission as follows:

Buildings must not protrude through a height control plane rising at an angle of ~~37~~45 degrees commencing at an elevation of 2.5m above ground level at every point of the site boundary.

Decision Reasons:

- Inconsistent with previous planning documents, which are less restrictive.
- Too restrictive for urban areas.
- Adequate amenity and daylight for adjoining sites can be achieved with less restrictive control plane.
- The 37 degree angle is difficult to calculate.

Point Number 751.13

Summary of Decision Requested: **Amend** Rule 16.3.6 P1 Building Coverage as follows:

The total building coverage must not exceed ~~40~~60%.

Decision Reasons:

- The 40% building coverage does not enable the efficient use of urban land and fails to increase the development capacity of the urban areas.
- Increasing building coverage to allow greater utilisation of residential zoned land to support the strategic direction outlined in the Proposed District Plan to increase densities and housing choice.

Point Number 751.14

Summary of Decision Requested: **Amend** Rule 16.3.7 Living Court as follows:

P1

(a) *A living court must be provided for each dwelling that meets all of the following conditions:*

...

(iii) *When located on the ground floor it has a minimum area of ~~60~~40m² and a minimum dimension of ~~4~~2m in any direction.*

(iv) *When located on a balcony of an above ground apartment, it must have a minimum area of ~~45~~10m² and a minimum dimension of 2m in any direction.*

P2

(a) *A living court must be provided for each minor dwelling that meets all of the following conditions:*

...

(iii) *When located on the ground floor it has a minimum area of ~~40~~10m² and a minimum dimension of ~~4~~2m in any direction.*

(iv) *When located on a balcony of an above ground apartment, it must have a minimum area of ~~45~~8m² and a minimum dimension of ~~2~~1.6m in any direction....*

Decision Reasons:

- The Proposed District Plan required excessive outdoor living areas relative to 450m² lot size provision for residential lots.
- The Proposed District Plan will create a suburban form which is at odds with the strategic direction, objectives and policies for the urban environment.
- Excessive sized outdoor living areas will restrict the ability to develop urban land. The size standards exceed the existing Franklin District Plan standard which requires 60m² of outdoor living area.
- The perception of urban living is changing.
- Smaller outdoor living courts have been adopted by Auckland Council to promote a more compact living approach and this should be adopted by Waikato District Council.
- Reducing the minimum outdoor living court allows for a variety in lifestyle and lower maintenance.
- Rule 16.3.8 requires additional service court which ensures adequate outdoor spare space for living.

Point Number 751.15

Summary of Decision Requested: **Amend** Rule 16.3.8 Service Court as follows:

P1

(a) A service court must be provided for each dwelling and minor dwelling, each with the following dimensions:

(i) minimum area of ~~45~~5m²; and

(ii) contains a circle of at least ~~3~~2m diameter.

Decision Reasons:

- The Proposed Waikato District Plan required excessive service courts that will restrict the ability to develop urban land efficiently.
- There is no assessment in the s32 analysis to support the size of the service court.

Point Number 751.16

Summary of Decision Requested: **Amend** Rule 16.3.9.1 P1 Building setbacks - All boundaries as follows:

(a) A building must be set back a minimum of:

...

(iii) ~~4.5~~1.2m from every boundary other than a road boundary; and

(iv) ~~4.5~~1.2m from every vehicle access to another site.

Decision Reasons:

- The Proposed Waikato District Plan requires excessive building setbacks for residential lots that will restrict the ability to develop the urban land.
- The setbacks exceed the existing Operative District Plan requirements.
- Reducing the side yard allows for a variety in lifestyle and lower maintenance.

Point Number 751.17

Summary of Decision Requested: **Amend** Rule 16.3.9.3 Building setback - Waterbodies to adopt the provision of Rule 24.3.6.3 Building setbacks-water bodies, including the following amendments:

P1

(a) Any building must be setback a minimum of:

...

(ii) ...from the bank if any named river...

...

P3

A building must be set back a minimum of 10m from the bank of a perennial or intermittent named or unnamed stream.

Decision Reasons:

- These are not consistent with other zones or the Operative Waikato District Plan - Franklin Section provisions.

Point Number 751.18

Summary of Decision Requested: **Retain** Rule 16.4.1 Subdivision - General other than the specific points in other submission points.

Decision Reasons:

- Provides for the efficient use of the urban land resource.
- Enables the subdivision of land to provide for the growth of the district.

Point Number 751.19

Summary of Decision Requested: **Retain** the 450m² minimum net site area for greenfield subdivision in Rule 16.4.1 RDI (a)(i) Subdivision - General
AND

Add a provision for infill subdivision requiring a minimum net site area of 350m² in Rule 16.4.1(a) Subdivision - General.

Decision Reasons:

- Support the minimum lot size of 450m² for greenfield development areas.
- Many larger sites within Tuakau and Pokeno which are suitable for infill subdivision. Subdivision of larger sites within the existing urban area should be encouraged to ensure that intensification of the existing urban areas can be achieved in accordance with Future Proof.
- This will ensure efficient use of the existing urban land resources allowing additional residential development close to services and amenities.
- The submitter proposes the subdivision of existing sites to 350m² in accordance with the Franklin section of the Operative District Plan.

Point Number 751.20

Summary of Decision Requested: **Delete** Rule 16.4.1RDI (a)(iii) Subdivision-General.

Decision Reasons:

- The establishment of formal and informal grid patterns may not be appropriate to all sites.
- Sites with topographical natural or physical constraints may be unable to be practically implemented.
- There may also be sites where the lay of land is best suited to an alternative roading design.
- There is no analysis in the s32 regarding the relevance or practicality of this rule.

Point Number 751.21

Summary of Decision Requested: **Delete** Rule 16.4.1(a)(iv) Subdivision - General

AND

Add the number of rear lots as a matter of discretion to Rule 16.4.1 (b) Subdivision-General

OR

Amend Rule 16.4.1(a)(v) Subdivision - General to increase the percentage of rear lots to no more than 25%.

AND

Amend Rule 16.4.3 RD1 (a)(v) Subdivision Te Kauwhata West Residential Area to increase the percentage of rear lots to no more than 25%.

Decision Reasons:

- This is not able to be achieved on some sites due to the configuration of the site and topographical constraints which mean the creation of roads will be difficult.
- The standard is arbitrary and there is no assessment in the section 32 analysis.

Point Number

751.22

Summary of Decision Requested:

Amend Rule 16.4.3(a)(ii) Subdivision Te Kauwhata West Residential Area as follows:
Have a minimum average net site area of ~~875~~700m².

Decision Reasons:

- Minimum average net site area of 875m² is an inefficient use of land that fails to take into account the anticipated growth for the area.
- Fails to give effect to the Future Proof Strategy that seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton and larger settlements of the district.
- This involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development.
- Does not achieve the minimum density required by Strategic Policy 4.1.5 and this is an inconsistency between the rules and objectives.

Point Number

751.23

Summary of Decision Requested:

Delete Rule 16.4.13 RD1 (a) Subdivision creating reserves
AND
Add the road frontage of reserves as a matter of discretion for subdivision creating reserves.

Decision Reasons:

- Roading infrastructure is expensive and the rule will result in additional costs for developers which may not be economically justifiable.
- Arbitrary standard which may not be relevant for all reserve types
- Safety and surveillance of reserves may be achieved with less road frontage
- No analysis within the s32 report
- This can be assessed through assessment criteria or a matter of discretion.

Point Number

751.24

Summary of Decision Requested:

Amend Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips to adopt the Waikato District Plan - Franklin Section Rule 11.5 - Esplanade Reserves and Strips.

Decision Reasons:

- Accept that esplanade reserves and esplanade strips enable public access and recreation, however this needs to be assessed on a case by case basis.
- Council should allow a waiver or reduction in width in certain circumstances.

Point Number

751.25

Summary of Decision Requested:

Amend Rule 22.3.2 P1 (b) (i) Minor dwelling as follows:
(i) The minor dwelling must be located within ~~20~~20m of the dwelling;

Decision Reasons:

- No justification for the 20m separation distance within the s32 report.
- There is no longer a requirement that the minor dwelling has to be occupied by a dependent relative, therefore a larger separation distance would provide enhanced privacy between residents of each dwelling.
- Generally support this rule, but it impacts (along with other residential activities) on the identification of potentially affected persons for an application for a new intensive farming activity (Rule 22.3.7.2 (a) (vii)).

Point Number

751.26

Summary of Decision Requested:

Amend Rule 22.3.6 P1 Building coverage to exclude buildings associated with permitted and controlled farming activities (including free range poultry farming and poultry hatcheries).
AND
Amend Rule 22.3.6 Building coverage after considering whether a building coverage rule in the Rural Zone is necessary given there is no such requirement in the Waikato District Plan - Franklin Section.
OR
Amend Rule 22.3.6 P1 Building coverage to increase the 2% limit.

Decision Reasons:

- Buildings associated with permitted and controlled farming activities should be exempt from this rule.
- This rule will restrict someone wanting to use the land for a productive purposes
- Overall, the 2% building coverage is too low.

Point Number

751.27

Summary of Decision Requested:

Amend Rule 22.3.7.1 Building Setbacks - All boundaries to have a 10m setback from the boundary of an adjoining site (or this may be reduced where written consent is obtained from an affected neighbour).

Decision Reasons:

- This rule should be allowed to be infringed where the written consent of the owners and occupiers of the neighbouring sites have been obtained.
- A 25m boundary setback can be significant for a site under 1.6ha and can unduly restrict the use of the land. The s32 report for the Rural Zone states that larger setbacks are required if the neighbouring lot is over 6ha for reverse sensitivity reasons.
- There is no justification as to why 25m is appropriate.
- The 10m boundary setback referred to in the Franklin District Plan could be more appropriate.
- It is unclear as to why a habitable building on a property greater than 1.6ha needs to be set back 25m from every road boundary other than a road boundary.

- Many existing dwellings will encroach into the new boundary setback. It would mean that any minor dwelling, extension to an existing dwelling or accessory building may not be able to comply with the permitted setback standard, resulting in additional consent costs.

Point Number 751.28

Summary of Decision Requested: Amend Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited Activity to be a non-complying activity, rather than a prohibited activity.

Decision Reasons:

- With regards to PR2 and PR3, there may be circumstances where the subdivision of high class soils have overall positive effects that can be supported by objectives and policies.
- There are circumstances where it may be unavoidable to create an additional Record of Title
- The rule relies on a definition of High Class Soils which may not be versatile due to a range of factors identified through case law.
- Unfair to prohibit the creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site.
- Rural activities that do not need to be held on the same certificate of title as other rural activities, there may be circumstances where subdivision enables more significant opportunities for economic wellbeing and efficient operations.
- Commercial reasons would necessitate subdivision including the desire to sell or lease the business partially.
- Prohibited activity status prevents opportunities for subdivision where there is significant capital investments.
- PR4 states any subdivision of a lot previously amalgamated for the purpose of a transferable lots subdivision is prohibited. This rule may unreasonably restrict the subdivision potential over and above what is necessary to avoid undermining the intent of the rule under which these Records of Title were created.
- Under Rule 22B of the Franklin Section require close scrutiny this should merit a non-complying activity status.
- The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries with a neighbour without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed District Plan should be sufficiently strong to protect high class soils.
- It may be necessary to create multiple lots and hold them in one Record of Title.

Point Number 751.29

Summary of Decision Requested: Retain Rule 22.4.1.2 RD1 (a)(i)-(ii) General subdivision

Decision Reasons: Support the inclusion of the General Subdivision rules.

Point Number 751.30

Summary of Decision Requested: Retain Rule 22.4.1.2 RD1 (a)(iv) General subdivision

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha is supported
- The creation of any additional lot between 8,000m² and 1.6ha as a restricted discretionary activity is supported.

Point Number 751.31

Summary of Decision Requested: Add a discretionary activity rule to Rule 22.4.1.2 General subdivision as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2(iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- A discretionary rule should be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the lot size whilst remaining consistent with the Proposed District Plan.
- General subdivision creating a child lot around an existing dwelling, where a curtilage is established and the farming regime is already in place on the balance lot
- This will ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land.
- For lots smaller than 8,000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises of existing curtilage around the house, then the lot will not result in any unreasonable effects with respect to productive potential.
- The creation of lots that accommodate existing and well-established rural activities is appropriate.

Point Number 751.32

Summary of Decision Requested: Delete Rule 22.4.1.2 RD1 (a)(v) General subdivision

AND

Add a matter of discretion to Rule 22.4.1.2 RD1 (b) as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis of this rule in the s32 report.
- Agree with the intent of this rule, however the strict 80/20 requirement may not necessarily result in the best layout, design or farming outcomes.
- Like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for General Subdivision.
- Objectives, policies and matters of discretion will sufficiently ensure adverse effects on high class soils are avoided.
- The 80/20 split requirement will result in the need for Landuse Capability Reporting with every subdivision application under the General Provisions to demonstrate the exact figure was met, which is an additional cost

Point Number 751.33

Summary of Decision Requested: No specific decision is sought, but submission considers that the Proposed Waikato District Plan lacks provision of residential land supply as required by the Future Proof Strategy.

Decision Reasons:

- Does not provide residential land supply as required by the Future Proof Strategy.

Point Number	751.34
Summary of Decision Requested:	No decision sought, but the submission considers the Proposed District Plan should encourage the subdivision of larger residential sites within the existing urban area to encourage intensification within existing urban areas.
Decision Reasons:	<ul style="list-style-type: none"> • Subdivision of larger sites within the existing urban area should be encouraged to ensure that intensification of the existing urban areas can be achieved in accordance with the Future Proof Strategy. • This will ensure efficient use of the existing urban land resources allowing additional residential development close to existing services and amenities.
Point Number	751.35
Summary of Decision Requested:	No specific decision sought, but the submission considers that intensification to rural residential (Country Living) in areas that do not contain elite/prime soils and adjoin urban development should be encouraged to ensure land supply requirements are met while preserving the soil resources.
Decision Reasons:	<ul style="list-style-type: none"> • These soils contribute to both regional and national food supply. • The maximisation of rural residential (Country Living and Village) development potential will future proof the capacity of land supply to avoid encroachment into the rural areas past the lifetime of the Plan.
Point Number	751.36
Summary of Decision Requested:	No specific decision is sought, but submission supports the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity.
Decision Reasons:	<ul style="list-style-type: none"> • This offers positive benefits to the region.
Point Number	751.37
Summary of Decision Requested:	No specific decision sought, however the submitter states that the proposed access standards are excessive.
Decision Reasons:	<ul style="list-style-type: none"> • The access standard will result in inefficient use of land and prevent infill development. • The extra seal width will also increase impervious surfaces and stormwater runoff without any benefits relating to traffic. • Will add additional costs to developments. • There are national documents that cover access to properties.
Point Number	751.38
Summary of Decision Requested:	No specific decision is sought, but the submission supports the direction of the Proposed Waikato District Plan as it gives effect to the National Policy Statement on Urban Development Capacity through rezoning of land and allows for some intensification of existing urban areas.
Decision Reasons:	No reasons provided.
Point Number	751.39
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to provide for an additional Residential Zone to support intensification and compact growth within existing Town Centres and future public transport stations. The proposed new Residential Zone shall be similar to the Auckland Unitary Plan's Mixed Housing Zone or the medium density zone as defined in the Draft National Planning Standards. The Residential Zone should be broken into overlays to recognise the specific characteristics of each town.
Decision Reasons:	<ul style="list-style-type: none"> • The current blanket zoning of land for residential purposes throughout the District does not give effect to the following strategic directions within the Proposed District Plan: <ul style="list-style-type: none"> - 1.5.1 Compact Urban Development - 1.12.1(a) Strategic Direction - 1.12.3(c) Built environment - Objective 4.1.2 Urban growth and development - Policy 4.1.5(a) Density - Policy 4.1.10(i) Tuakau - Objective 4.2.16 Housing options - Policy 4.2.17 Housing types • The blanket Residential Zone will result in a monotonous suburban form which does not meet the compact form and intensification outcomes sought by the strategic objectives of the Proposed Waikato District Plan. This is at odds with the strategic direction. • The National Planning Standards explain that the purpose of the Residential Zone is to provide for residential activities in areas of suburban character. • The residential zone should provide for smaller lot sizes and greater intensification within existing residential areas, this will ensure a compact urban form that is viable for future public transportation. New greenfield development can be subject to minimum lot to meet the density requirements.
Point Number	751.40
Summary of Decision Requested:	Amend the location of the Walkway, Cycleway, Bridleway from the property at 33 Kowhai Street, Tuakau to be contained within the reserve to the southeast of the site.
Decision Reasons:	No reason provided.
Point Number	751.41
Summary of Decision Requested:	Retain the Residential Zone at 33 Kowhai Street, Tuakau as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Consistent with the previous planning documents. • Supports the financial investment from the landowner who has begun preliminary design and investigation to develop the land. • Zoning of residential land is consistent with the National Policy Statement on Urban Land Capacity. • The site contains minimal constraints and is appropriate for residential use. • Supported by the existing community facilities, amenity and infrastructure in Tuakau Town Centre.

Point Number 751.42

Summary of Decision Requested: Ensure that the property at 18 Booth Crescent, Tuakau is zoned to allow multiple dwellings and small lot sizes.

Decision Reasons:

- Enable the site to be developed more intensively.

Point Number 751.43

Summary of Decision Requested: **Delete** Policy 4.2.15(a)(iv) Earthworks

OR

Amend Policy 4.2.15(a)(iv) Earthworks to ensure fill can be imported where required to enable land to be developed for residential activities as follows:

The importation of cleanfill is avoided in the Residential Zone, except where it is required to enable land to be developed for residential purposes.

OR

Amend Policy 4.2.15(a)(iv) Earthworks to ensure fill can be imported where required to enable land to be developed for residential activities follows:

~~The importation of cleanfill is avoided in the Residential Zone~~ The inappropriate importation of cleanfill is avoided in the Residential Zone where it is not required to enable greenfield land to be developed.

Decision Reasons:

- Cleanfill may be required in Residential Zoned sites to enable greenfield development and to avoid filling in all circumstances may restrict the ability to develop residential land.
- The policy contradicts Objective 4.2.14(a) which states that earthworks facilitate subdivision, use and development.
- Policy 4.2.15 (iv) should be amended to avoid this contradiction.

Point Number 751.44

Summary of Decision Requested: **Retain** Objective 4.2.16 Housing options, except for the amendments below.

AND

Add to Objective 4.2.16 Housing Objectives the following:

Multi-unit development including low rise apartments is promoted within walking distance to existing Town Centres, public amenities and public transport.

Smaller lots size and multi-unit development, promoted within new greenfield sites where the land is within walking distance to amenities and reserves.

Decision Reasons:

- Gives effect to the strategic direction outlined in section 4.1 and promotes the variety in the future housing stock to help achieve 4.1.2 and 4.1.5.
- Enabling densified housing options give effect to the Future Proof Strategy identified in 1.5.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a compact urban form.
- Involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- The Plan should specify that multi-unit development and smaller lots are encouraged close to the Town Centres, public amenities and public transport stations.
- Diversity and a range of housing choice should also be promoted within greenfield sites. The rural areas of Tuakau contain versatile soils that are used for rural production activities. These soils contribute significantly to both regional and national food supply.
- The maximisation of the lands residential development potential will future proof the capacity of land supply to avoid further encroachment into the rural area.
- Intensification and higher densities should be encouraged to avoid additional sprawl into rural areas.

Point Number 751.45

Summary of Decision Requested: **Retain** Policy 4.2.17 Housing types.

Decision Reasons:

- Gives effect to the strategic direction outlined in section 4.1 and promote the variety in the future housing stock to help achieve 4.1.2 and 4.1.5.
- Enabling densified housing options give effect to the Future Proof Strategy identified in 1.5.1 of the Plan that seeks a shift in the existing pattern of land use towards accommodating growth through a compact urban form.
- Involves a reduction in the relative share of the population outside of the subregion's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- Diversity and a range of housing choice should also be promoted within greenfield sites.

Point Number 751.46

Summary of Decision Requested: **Delete** Policy 4.2.18(b)(v) (D) Multi-unit development

Decision Reasons:

This is a principle for good design and should be a directive with the design guidelines rather than a policy.

Point Number 751.47

Summary of Decision Requested: **Retain** Policy 4.7.3 Residential subdivision

Decision Reasons:

The policy reflects good design principles while still providing flexibility in design outcomes.

Point Number 751.48

Summary of Decision Requested: **Retain** Policies 4.7.2(a)(i) - (vi) Subdivision location and design

Decision Reasons:

Promotes quality design

Point Number	751.49
Summary of Decision Requested:	<p>Delete Policy 4.7.2 (a) (vii) Subdivision location and design</p> <p>OR</p> <p>Amend Policy 4.7.2(a)(vii) Subdivision location and design as follows:</p> <p><i>Promote consistent grid layout <u>while allowing for alternative road designs where a grid layout is not appropriate due to topographical constraints.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> Imposing a grid pattern in all circumstances is contrary to Policies 4.1.9(a) and 4.2.2(a)(ii) and 4.7.3(a)(vii) which require the contour, landform and character of the landscape to be maintained. The Plan needs to be more flexible to provide for this. The design guideline and Policy 4.7.3(a)(iv) aim to limit the length and number of cul-de-sacs which is a more appropriate policy response than promoting a consistent grid layout in all situations.
Point Number	751.50
Summary of Decision Requested:	<p>Amend Rule 22.4.1.4 RD1 (a) (i) Boundary relocation as follows:</p> <p>(a) <i>The boundary relocation must:</i></p> <p>(i) <i>Relocate a common boundary or boundaries between two <u>or more</u> existing Records of Title <u>or consented lots</u> that existed prior to 18 July 2018.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Support the inclusion of boundary relocation provisions to support and allow rural properties to rationalise large landholdings. Rural boundary relocation typically is undertaken where land is exchanged between two Records of Title to accommodate the existing farming activity or when a farmer owns multiple titles and wants to create a small rural lot for a dwelling and hold the balance of the farm in one Record of Title. Boundary relocation typically result in positive effects on productive farming systems. The submitter would like to see provision made for the relocation of the boundaries of adjacent consented lots and Records of Title held in common ownership as per the Franklin Section of the Operative District Plan. Consider the retention of the date 18 July 2018 to be appropriate to allow for closer scrutiny and a higher activity status for those Records of Title and consented lots created under the Transferable and Environmental Lot rules of the previous section of the District Plan which had restrictions on size.
Point Number	751.51
Summary of Decision Requested:	<p>RETAIN Rule 22.4.1.5 Rural Hamlet Subdivision except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 22.4.1.5 Rural Hamlet Subdivision to enable the relocation of consented lots and reduce lot size as follows:</p> <p>(a) <i>Subdivision to create a Rural Hamlet must comply with all of the following conditions:</i></p> <p>(i) <i>It results in 3 to 5 proposed lots being clustered together</i></p> <p>(ii) <i>All existing Records of Title <u>and/or consented lots</u> form one continuous landholding;</i></p> <p>(iii) <i>Each proposed lot has a minimum area of 80005,000m²;</i></p> <p>(iv) <i>Each proposed lot has a maximum area of 1.4ha;</i></p> <p>(v) <i>The proposed balance lot has a minimum area of 20ha; and</i></p> <p>(vi) <i>It does not create any additional lots beyond the number of existing Records of Title;</i></p> <p>(b) <i>Council's discretion is restricted to the following matters:</i></p> <p>(i) <i>subdivision layout and design including dimension, shape and orientation of the proposed lots <u>and specified building areas</u>;</i></p> <p>(ii) <i>effects on rural character and amenity values;</i></p> <p>(iii) <i>effects on landscape values;</i></p> <p>(iv) <i>potential for reverse sensitivity effects;</i></p> <p>(v) <i>extent of earthworks including earthworks for the location of the building platforms and access ways;</i></p> <p>(vi) <i>effects on rural productivity and fragmentation of high class soils.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> Support subdivision provisions for Hamlet subdivision within the Rural Zone. Positive benefits of Rural Hamlets include shared infrastructure, improved and enhanced farming systems and providing lifestyle choices. Seek the inclusion of consented lots (General and Conservation lots) in the Hamlet provisions as it would have positive outcomes through the provision of shared infrastructure and enhancement of production systems. It would also limit wide dispersal of lots. The Hamlet provision should ensure that a response to the landscape context is more important than meeting performance standards relating to lot size. Maintain rural character and amenity values.
Point Number	751.52
Summary of Decision Requested:	<p>Amend Rule 22.4.1.6 Conservation lot subdivision as follows:</p> <p>RDI</p> <p>(a) The subdivision must comply with all of the following conditions:</p> <p>(i) The lot must contain:</p> <p><u>A</u>, a contiguous area of existing Significant Natural Area either as shown on the planning maps; <u>and/or</u></p> <p><u>B</u>, a contiguous area to be protected, enhanced and/or restored</p> <p>as determined by an experienced and suitably qualified ecologist in accordance with the table below:</p> <p>...</p> <p>(ii) The area of Significant Natural Area <u>and/or area to be enhanced and/or restored</u>, is assessed by a suitably-qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);</p> <p>(iii) The Significant Natural Area <u>or area to be restored</u> is not already subject to <u>legal protection a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977</u>;</p> <p>(iv) The subdivision proposes to legally protect all areas of Significant Natural Areas <u>and/or areas to be restored</u> <u>by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977</u>;</p> <p>(v) An ecological management plan is prepared to address ongoing management of the <u>covenant protected</u> area to ensure that that the Significant Natural Area <u>area to be protected</u> is self-sustaining and that plan:</p>

- A. Addresses fencing requirement for the ~~covenant-protected~~ area
- B. Addresses ongoing pest plant and animal control;
- C. Identifies any enhancement ~~and/or restoration or~~ edge planting required within the ~~covenant~~ area to be protected.
- ...
- (b) Council's discretion is rested to the following matters:
- (i) Subdivision layout and proximity of building platforms to ~~Significant Natural Area~~ the area to be protected;
- (ii) Matters contained in an ecological management plan for the ~~covenant-protected~~ area;
- (iii) Effects of the subdivision on localised rural character and amenity values;
- (iv) Extent of earthworks including earthworks for the location of building platforms and access ways.
- (v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- The submitter supports the incentivisation of legally and physically protecting Significant Natural Areas and other areas of existing biodiversity which offers positive benefits.
- There is no provision for ecological enhancement and/or restoration within the Conservation Lot rules.
- There are significant biodiversity and water quality benefits to be gained from ecological enhancement along waterways and wetlands.
- Regional Policy Statement identified water quality is a key issue.
- Rural Zone objectives and policies also seek enhancement of surface and ground water quality.
- Incentivisation through subdivision would assist in offsetting the cost of enhancement and restoration.
- Provisions for ecological enhancement and/or restoration of appropriate areas to be included in the conservation lot subdivision rules. Minimum areas for enhancement and/or restoration should be in accordance with Rule 22.4.1.6.
- Agree that any area that enables subdivision under this rule be legally protected by way of a registered interest on the Record of Title. Suggest that this rule require legal protection only and leave the mechanism to the discretion of Council when assessing.

Point Number 751.53

Summary of Decision Requested: **Delete** specific references to Queen Elizabeth II National Trust Act 1977 and the Reserves Act 1977 within Rule 22.4.1.6RD1 (a)(iii) Conservation lot subdivision.

Decision Reasons:

- Other mechanisms may be more appropriate, including the vesting in Council as Esplanade Reserve or the protection by way of s221 Consent Notice.
- A s221 Consent Notice may be more appropriate for areas that are being restored and require site specific maintenance schedules.

Point Number 751.54

Summary of Decision Requested: **Retain** Rule 22.4.1.7 Subdivision to create a reserve

Decision Reasons:

- Support the enhancement of public access and incentivising the provision of access through subdivision provides a win for both landowners and the public.

Point Number 751.55

Summary of Decision Requested: **Amend** Rule 22.4.9 (RD1) (a) (i) Subdivision - Building Platform as follows:
(i) ~~can accommodate a 30m diameter circle~~ has an area of 1,000m² exclusive of boundary setbacks;

Decision Reasons:

- The submitter would like to see this as a 30m diameter circle exclusive of setback, instead of a 1000m² area with no dimensions specified.
- Supports the requirement for a building platform.

Point Number 751.56

Summary of Decision Requested: **Add** a new rule within Rule 22.4 Subdivision as follows:

Subdivisions of land containing mapped off-road walkways/trails/cycleways

RD1

(g) The subdivision where walkways/trails/cycleways shown on the planning maps are to be provided as part of the subdivision must comply with all of the following conditions

(i) The walkway/trail/cycleway is at least 3 metres wide and is designed and constructed for shared pedestrian and cycle use, as per Rule 14.12.1 P8 (Transportation);

(ii) The walkway/trail/cycleway is generally in accordance with the walkway/trail/cycleway route shown on the planning maps;

(iii) The walkway/trail/cycleway is shown on the plan of subdivision and vested in the Council.

(b) Council's discretion shall be restricted to the following matters:

(i) Alignment of the walkway/trail/cycleway;

(ii) Drainage in relation to the walkway/trail/cycleway;

(iii) Standard of design and construction of the walkway/trail/cycleway;

(iv) Land stability;

(v) Amenity matters including batter slopes; and

(vi) Connection to reserves.

DL

A subdivision that does not comply with the above Rule.

Decision Reasons:

- Include additional trails/cycleways shown on the Planning Maps need to be reflected in the provisions, particularly subdivision provisions for each zone.

Point Number 751.57

Summary of Decision Requested: Amend Appendix 3.4 Multi Unit Development to recognise alternative options may be more suitable.

Decision Reasons:

- The design guidance preferring consistent front setbacks and separation between buildings as well as consistent fencing and boundary treatment is encouraged by the design guide to create a repetitive form. There may be good design outcomes created by variations in setbacks and treatments.

Point Number 751.58

Summary of Decision Requested: No decision sought, but submission supports growth in existing centres of Pokeno, Tuakau, Ngaruawahia and Huntly and the rezoning of greenfield on the edge of the existing centres.

Decision Reasons:

- Enabling densified housing options gives effect to Future Proof Strategy.
- Adequate densities and intensification need to be encouraged around existing town centres especially where public transport stations are proposed and to avoid further encroachment on rural land especially where the land is used for food supply purposes.

Point Number 751.59

Summary of Decision Requested: Delete Rule 16.4.2 RD1(a)(iv) Subdivision - General

Decision Reasons:

- The establishment of formal and informal grid patterns may not be appropriate to all sites.
- Sites with topographical natural or physical constraints may be unable to be practically implemented.
- There may also be sites where the lay of land is best suited to an alternative roading design.
- There is no analysis in the s32 regarding the relevance or practicality of this rule.

Point Number 751.60

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited Activity to change the references of 'lot' to 'Record of Title'.

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title.

Point Number 751.61

Summary of Decision Requested: Add a new matter of discretion to Rule 22.4.1.4 RD1 (b) as follows:

(v) Effects on high class soils, farm management and productivity.

Decision Reasons:

This will provide Council with a robust framework to ensure adverse effects on high class soils are avoided.

Point Number 751.62

Summary of Decision Requested: Add a new discretionary rule Rule 22.4.1.6 Conservation lot subdivision as follows:

DL

(a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6(vi-vii) RD1.

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6(vi-vii) RD1.

Decision Reasons:

- Flexibility for lot area should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activity.

Point Number 751.63

Summary of Decision Requested: No specific relief sought, but submission considers that it is important that the Waikato District Plan looks beyond the 10 year life of the Plan and ensures that adequate densities and intensification are encouraged around existing Town Centres, especially where public transport stations are proposed to avoid further encroachment into rural land especially where the land is used for food supply purposes.

Decision Reasons:

- The Future Proof Strategy identifies 50 year land supply needs and seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form based on concentrating growth in and around Hamilton (67%) and the larger settlements of the district (21%). This involves a reduction in the relative share of the population outside of the sub-region's existing major settlements through tighter control over rural-residential development and encouraging greater urban densities in existing settlements.
- Growth in existing centres of Tuakau, Pokeno, Ngaruawahia and Huntly is supported and has been enabled through the rezoning of greenfield on the peripheries of these existing centres.
- Enabling denser housing options gives effect to the Future Proof Strategy.

Submitter Number: 752

Submitter: Jeff Weake

Organisation: McGowan-Weake Limited

Point Number 752.1

Summary of Decision Requested: Retain Chapter 9.2- Objectives and policies for Te Kowhai Airpark zone (whole of chapter), as notified.

Decision Reasons:

- Is going to add to the community.
- Is going to add to the region.
- Submission is in full support of proposal.

Point Number 752.2

Summary of Decision Requested: Retain Chapter 27- Te Kowhai Airpark Zone (whole of chapter), as notified.

Decision Reasons:

- Is going to add to the community.
- Is going to add to the region.
- Submission is in full support of proposal.

Submitter Number: 753 **Submitter:** Gavin Brown

Point Number 753.1

Summary of Decision Requested: Retain Chapter 9.2- Objectives and policies for Te Kowhai Airpark zone (whole of chapter), as notified.

Decision Reasons:

- Te Kowhai airfield is a valuable resource to the aviation community both locally and nationally.
- Hamilton historically has been a hub for aviation innovation and Te Kowhai airfield is an important part of this.
- The Airfield offers exceptional facilities and opportunities for those presently in aviation and for pilots of the future.
- Proposed changes will ensure the airfield is able to provide the services required to facilitate the advancement of aviation.

Point Number 753.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark zone (whole of chapter), as notified.

Decision Reasons:

- Te Kowhai airfield is a valuable resource to the aviation community both locally and nationally.
- Hamilton historically has been a hub for aviation innovation and Te Kowhai airfield is an important part of this.
- The Airfield offers exceptional facilities and opportunities for those presently in aviation and for pilots of the future.
- Proposed changes will ensure the airfield is able to provide the services required to facilitate the advancement of aviation.

Submitter Number: 754 **Submitter:** Pieter Van Leeuwen

Point Number 754.1

Summary of Decision Requested: Amend the zoning of area east of Pokeno bounded by State Highway 2 to the north, Baird Road to the east, Avon Road to the south and State highway 1 to the west from the Rural Zone to Country Living Zone (see map attached to submission).

Decision Reasons:

- The area is contiguous with the existing Country Living Zone on the eastern side of State Highway 1.
 - Due to proximity of the Residential Zone, the use of this land for legitimate rural uses is significantly constrained by reverse sensitivity complaints from the Residential Zone including odour and noise.
 - The area is being used for primary rural industry.
 - Rural uses create amenity effects and operation of the farms is constrained by reverse sensitivity complaints due to residential zoning.
 - Rezoning will allow improved environmental outcomes with retirement and restoration of streams.
 - Rezoning will result in improved water quality in the stream from retirement from farming practices.
 - Rezoning for rural residential development meets the criteria in the Waikato Regional Policy Statement for rural-residential development.
 - Rezoning enables existing accesses to State Highway 2 to be removed, as Avon, Fraser, Baird and Gulland Roads provide access opportunities.
 - Area has constraints (proximity to State Highway, Transpower electricity transmission lines and a stream) however the Proposed District Plan manages these constraints effectively through appropriate setbacks and yard requirements.
 - Provides additional housing choice to stock offered in the Residential Zone in Pokeno.
 - The area is serviced for reticulated water supply.
 - It is a discrete area of land with defensible road boundaries.
 - The area is separated from Rural Zone by roads to prevent any consequential reverse sensitivity effects.
 - It provides an effective transition from Rural Zone with rural activities, to the Residential Zone with urban expectations and activities.
 - State Highway 2 is a logical and defensible boundary between the Rural Zone and the Country Living Zone.
 - State Highway 1 is a logical and defensible delineation between Country Living and the Residential Zone.
 - Resource consent has already been granted for 96 Avon Road for a number of residential chalets. Development's density is more similar to a residential development. Development compromises any rural character and serves to illustrate the area's character is more consistent with the adjoining Country Living zone versus Rural.
 - Will not undermine the form and function of Pokeno as an urban town.
-

Point Number 754.2

Summary of Decision Requested: Amend 23.4.2 RD1 (a)(i)-General Subdivision to read as follows:
All proposed lots must have a net site area of at least ~~5000~~ 3000m².

Decision Reasons:

- There is no need or justification for a 5000m² minimum lot size.
 - Residents living in these areas have urban expectations and struggle maintaining 5000m².
 - Country Living Zone is actually a large lot residential and not a rural zone.
 - Smaller site size is more in accordance with such housing and living choice.
 - Reducing minimum lot size will enable more efficient use of land.
 - Aligns more clearly with the 2500m² minimum site size required for on-site wastewater management.
 - Enables an open and spacious character; in accordance with large lot residential form of Country Living Zone.
-

Point Number 754.3

Summary of Decision Requested: Amend Rule 23.3.6 P1 - Building Coverage to read as follows:
The total building coverage must not exceed 10% or ~~300~~ 400m², whichever is the larger.

Decision Reasons:

- This is a consequential amendment to enabling a smaller minimum site size.
 - Still enable a useable gross floor area of principal dwelling, minor dwelling and accessory buildings.
 - Will still ensure an open and spacious character is in accordance with the large lot residential form of the Country Living Zone.
-

Point Number 754.4

Summary of Decision Requested: **Retain** the following aspects of Rule 23.3.2 Minor dwelling:

- Permitted activity status;
- 70m² maximum gross floor area;
- Conditions for the minor dwelling;
- Absence of limitations on the type of person occupying the minor dwelling; and
- Enabling the minor dwellings to be permanent buildings.

Decision Reasons:

- Minor dwellings provide housing choice, particularly when the families are changing their makeup.
- Minor dwellings provide an affordable option for housing.
- Minor dwellings provide the elderly with independent living whilst maintaining a close distance to family for supported living.
- The effects are not different from that of a sleep out.
- In terms of additional occupancy, the effects and their occupancy rate are no different to a large primary dwelling.
- The limits of size ensure they are secondary to the primary household.

Point Number 754.5

Summary of Decision Requested: **Retain** the following aspect of Rule 22.3.2 Minor Dwelling:

- Permitted activity status;
- 70m² maximum gross floor area;
- Absence of limitations on the type of person occupying the minor dwelling; and
- Enabling the minor dwelling to be a permanent building.

Decision Reasons:

- Minor dwellings provide housing choice, particularly when families are changing in their makeup.
- Ability to provide housing choice is in accordance with the National Policy Statement for Urban Development Capacity and the Waikato Regional Policy Statement.
- Minor dwellings provide the elderly with independent living whilst maintaining a close distance to family for supported living.
- The effects are not different to that of a sleep out.
- Minor dwellings provide affordable options for housing.
- The size limit ensures they will be secondary to the primary dwelling.
- In terms of additional occupancy, they are no different to a large household.

Point Number 754.6

Summary of Decision Requested: **Delete** Rule 22.3.2 PI (b)(i) Minor dwelling requiring the minor dwelling to be within 20m of the primary dwelling.

Decision Reasons:

- The condition requiring the minor dwelling to be located 20m away from the primary dwelling is arbitrary.
- On a Rural zoned property, sheds can be located anywhere on the property so long as they comply with the yard requirements and daylight admission rules. Minor dwellings should have a similar approach.
- In terms of rules, there are no effects with a minor dwelling being located greater than 20m from the principal dwelling.
- Deletion of this condition will allow more effective use of the land and more optimal layout.
- No need for the principal and minor dwelling to be located in close proximity.

Point Number 754.7

Summary of Decision Requested: **Retain** Rule 23.3.7.2 PI (a) (ii) Building setback sensitive land use, as notified.

Decision Reasons:

15m setback from a national route or regional arterial boundary is an appropriate minimum setback to mitigate against noise and vibration effects generated from the State Highway.

Point Number 754.8

Summary of Decision Requested: **Amend** Rule 23.3.6 PI Building coverage to increase the permitted building coverage limits.

Decision Reasons:

- For genuine rural enterprises, accessory buildings (e.g. hay shed, stables, garages, tractor sheds) are necessary.
- The proposed limit of 2% or 500m² (whichever is the larger) is too constraining to enable the level of buildings required to support rural production activities.

Submitter Number: 755

Submitter: Jade Penn

Point Number 755.1

Summary of Decision Requested: **Amend** the Proposed Waikato District Plan to include a resource management framework for the management of Genetically Modified Organisms that is regional-specific taking into account environmental, economic and social well-being considerations.

Decision Reasons:

- Submitter has concerns around the potential risks posed by Genetically Modified Organisms release into the environment.
- Genetically Modified Organisms have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of people, communities and tangata whenua.
- Regardless of the care taken to crafting consent conditions for Genetically Modified Organisms there inevitably remains a risk, even if small. Such conditions may be breached by poor management, human error, natural events and sabotage of projects.
- Once Genetically Modified Organisms have been released into the environment they would be very difficult, near impossible, to eradicate and "GE Free" status and market advantages may be lost permanently.
- Application of integrated management and a precautionary approach to Genetically Modified Organisms under the RMA is the best available technique for managing the potential adverse effects posed by Genetically Modified Organisms within the region.
- This approach is also consistent with sustainable management purpose and Part II of RMA to establish district plan provisions and management of Genetically Modified Organisms where they have potential to adversely affect the environment and other land use activities.

Point Number 755.2

Summary of Decision Requested: Amend the Proposed Waikato District Plan to include strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same, or similar, as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

- Decision Reasons:**
- Submitter has concerns around the potential risks posed by Genetically Modified Organisms release into the environment.
 - Genetically Modified Organisms have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of people, communities and tangata whenua.
 - Regardless of the care taken to crafting consent conditions for Genetically Modified Organisms there inevitably remains a risk, even if small. Such conditions may be breached by poor management, human error, natural events and sabotage of projects.
 - Once Genetically Modified Organisms have been released into the environment they would be very difficult, near impossible, to eradicate and "GE Free" status and market advantages may be lost permanently.
 - Application of integrated management and a precautionary approach to Genetically Modified Organisms under the RMA is the best available technique for managing the potential adverse effects posed by Genetically Modified Organisms within the region.
 - Ensures a consistent approach across Northland, Auckland and the Waikato.
 - Eliminates cross boundary issues.

Point Number 755.3

Summary of Decision Requested: Amend the Proposed Waikato District Plan to require consents which would require exemption from plan rules, to be automatically be publicly notifiable, whether the rules are on Genetically Modified Organisms or any other matter.

- Decision Reasons:**
- Submitter has concerns around the potential risks posed by Genetically Modified Organism release into the environment.
 - Genetically Modified Organisms have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of people, communities and tangata whenua.
 - Regardless of the care taken to crafting consent conditions for Genetically Modified Organisms there inevitably remains a risk, even if small. Such conditions may be breached by poor management, human error, natural events and sabotage of projects.
 - Once Genetically Modified Organisms have been released into the environment they would be very difficult, near impossible, to eradicate and "GE Free" status and market advantages may be lost permanently.
 - Application of integrated management and a precautionary approach to Genetically Modified Organisms under the RMA is the best available technique for managing the potential adverse effects posed by Genetically Modified Organisms within the region.

Submitter Number: 756 **Submitter:** Simon Upton

Point Number 756.1

Summary of Decision Requested: Amend the extent of the proposed extension of Residential Zoning on the south side of Ngaruawahia as detailed on Map 20.7 to provide a clear urban boundary and transition to the rural zone that preserves the integrity of the gully system and stream margins on the south side of the existing town and reflects the landscape, visual, open green space, green linkages and amenity values promoted elsewhere in the PDP.

AND

Defer the re-issue of any amended version of the residential zoning limits detailed in Map 20.7 until the March 2017 Structure Plan has been revised to reflect the strategic directions, objectives and policies of the PDP and has been subjected to full consideration of alternative zone boundaries as required by s 32 RMA.

- Decision Reasons:**
- The zoning is based on a non-statutory document – the March 2017 Structure Plan – which has not been subject to s32 analysis and does not form part of the Proposed District Plan.
 - It is based on but departs from non-statutory document-March 2017 Structure Plan, which does not form part of Proposed District Plan and has not been subject to s32 analysis.
 - Any extension of residential zoning in this area should fully preserve key topographical and landscape features from development and clearly indicated how key amenities are to be provided for.
 - Map 20.7 should be withdrawn and reconsidered in light of technical reports on pre-existing landscape, visual and amenity effects, relevant sections of the Waikato Regional Policy Statement and key sections of PDP.
 - The March 2017 Structure Plan should be appraised for consistency with the above documents.
 - The Proposed District Plan does not include a Structure Plan that supports the residential zoning change.
 - The 2017 Structure Plan provides no indication that any of the landscape and open space concerns have been taken into account.
 - No regard for residential extension limits proposed in March 2017 Structure Plan.
 - Boundaries were different from those in PC17, therefore it is inconsistent with new residential limits.
 - Proposed District Plan differs radically from the Structure Plan in that it extends the Residential Zone to only a small sliver of land to the west of gully intersecting Rangimarie Road, and adds land on the south side of the proposed road linking Saubrey Road and Rangimarie Road.
 - Extension to east of Rangimarie Road is problematic in that it cuts across the gully system and proposes a road through the middle of the wetland and also encompasses hills of high local landscape values and marked as being less suitable for development.
 - No rationale provided for not continuing the zone all the way to the Ngaruawahia-Te Kowhai Road.
 - No proper consideration of landscape and open space issues.
 - Blanket extension of Residential Zoning between Rangimarie and Saubrey roads cuts through gently rolling hills and a stream, a critical point in local landscape.
 - Elevated ground particularly significant part of larger area of rolling country and thus part of a distinctive significant local landscape that is the backdrop to Ngaruawahia, Horotiu and parts of Te Kowhai.
 - No clear town boundary and transition to rural zone.
 - Extending residential zone to Saubrey Road places at risk the continued separation of Ngaruawahia and Horotiu, and under this proposal there will be one-farm separating the two built up spaces.
 - Submitter takes note of 2014 Mansergh Graham report, supporting PC 17.
 - Residential proposed south of railway line is little more than a ribbon of development permanently cut off by key transport arteries.
 - No consideration of alternative zoning solutions.
 - Any decision to alter town boundaries by rezoning rural land as residential will have irreversible effects and is not a minor environmental impact.
 - Permanently obliterates some environmental, amenity and landscape values and replaces them with residential and commercial values.
 - Major and irreversible changes should only be made after careful consideration of alternatives.
 - Approach is not consistent with Proposed District Plan objectives and policies.
 - The approach indicated in Map 20.7 and the Structure Plan on which it is based is not consistent with the Proposed District Plan's objectives and policies, specifically:
 - section 1.12 dealing with significant landscape features and availability of public space;
 - section 1.12.6 dealing with the protection and enhancement of open green space and areas of ecological ... and environmental significance;
 - sections 4.7.2 and 4.7.3 promoting subdivision that is sympathetic to the natural & physical qualities and characteristics of the surrounding environment, connectivity, green linkages and a layout that reflects the underlying topography;
 - section 4.7.10 concerning the prominence and accessible by pedestrians.

Submitter Number: 757 **Submitter:** Karen White

Point Number 757.1

Summary of Decision Requested: Amend Policy 4.1.8 Raglan to include the following as a minimum:

- Consideration to Naturally Raglan documentation shall provide development guidance.
- Development shall complement and maintain Raglans built form and character that reflects its harbor setting and is compatible with Raglans seaside village character.
- Protection of the coastal environment and character.
- All residential development to utilise the Waikato Urban Design Guidelines "Residential Subdivision".
- Town Development shall utilize the WDC Character statements - Raglan Town Centre as the minimum basis for any new buildings/development within the town.
- Any development within the town centre (or overlay areas) shall be notified for public consultation.
- The ongoing development of cycling and pedestrian facilities and links to the rural community.
- Raglan is a place to work and live rather a place of commuters.

Decision Reasons:

- Policy 4.1.8 is totally inadequate.
- Needs to be expanded to ensure the character, amenity and aspirations of Raglan can be managed, maintained and achieved.
- Greater focus must be given to vision and aspirations expressed by community, particularly with WDC's support of developing Raglan Naturally and since WDC recently consented the appalling development of 11 apartments on corner of Wainui Rd/Stewart Street.
- Although the 2005 development/character assessment has been re-vitalized into WDC Raglan Character Statement (2018), it needs considerable more work to define character areas and expand on the design guidelines/outcomes sought, which must be done in consultation with Raglan area residents.

Point Number 757.2

Summary of Decision Requested: Amend Policy 4.1.18 Raglan to require housing for the elderly in all new developments.

Decision Reasons:

- Submission states support for Whaingaroa Environmental Defence's submission in that "the former Lazarus village on fairly level ground, close to Raglan's main facilities. It is therefore better suited to house Raglan's above average elderly population than most sites in the town and should be restored to that use. Without protection it is likely that the only non-hospital housing for elderly people in Raglan will be permanently lost."

Point Number 757.3

Summary of Decision Requested: Amend Policy 5.3.9 (a) Non-Rural Activities to include "gun club shooting activities."

Decision Reasons:

- The noise and obtrusiveness of such an activity is completely incompatible with the area, especially as it occurs over weekends.
- This amendment would allow management/avoidance of existing/proposed gun club activities, which are incompatible with local quiet rural amenity values.

Point Number 757.4

Summary of Decision Requested: Amend Policy 5.3.11 (a) Home occupations to include "promote" and make it easier for people working from home.

Decision Reasons:

- Make it easier for people working from home to achieve Policy 5.3.11.
- Avoid the high costs associated with applying for resource consents.
- There are a number of real benefits in promoting and supporting occupation activities such as improved productivity by removing travel time, less travel and resulting in better environmental outcomes while promoting sustainable rural communities.

Point Number 757.5

Summary of Decision Requested: Amend Policy 5.3.15 Noise and vibration to include the provision for defined flight path corridors for recreational and schools/training light aircraft that avoid rural properties, fly avoidance/exclusion zones and noise control of aircraft engines.

AND

Amend Policy 5.3.15 Noise and vibration to include a total ban on engine stall on all rural land/housing and only allowed way offshore.

Decision Reasons:

- Number and frequency of light aircraft movement and noise within the area has increase dramatically over the past 10 years, mainly due to CTC training international pilots based out of Hamilton falling within flight routes.
- The Amenity of the quiet rural community is consistently being eroded and affected by frequency and noise of small/light aircraft either flying to Raglan Airport or by use of the air space by CTC Aviation Training facility who frequently circle for hours.
- With high demand for pilots worldwide and the increase in local people flying more regularly the situation is likely to get worse.
- Waikato District Council needs to map areas of low habitation and define acceptable flight path routes.
- Engine stall exercises are not only daunting but increases noise when they thrust engines back on.
- Variation in engine noise of light aircraft varies dramatically.
- Measures need to go beyond mere flying height or decibel requirement as effects on a very low decibel environment is incredibly intrusive and affects resident's wellbeing and health.

Point Number 757.6

Summary of Decision Requested: Amend Chapter 9 Specific Zones to include Raglan township and surrounds as a Specific Zone.

Decision Reasons:

- Inclusion is requested due to it being Waikato's only substantial and special seaside community.
- Submitter is concerned Raglan's special character is being eroded.
- Planning policy and rules are inadequate to manage the future growth of Raglan.
- Raglan has been identified as a special place for local, national and international visitors largely due to its uniqueness.
- Town's character is related to its 'wild west coast' environment and character.
- Diverse buildings, mix of people, relaxed quirky and arty environment prevails and individual expression contributes to amenity and character of Raglan.
- It is pedestrian and bike friendly place with key characteristics and attributes including water-views, human scale buildings and no multi story/row apartment buildings.

Point Number 757.7

Summary of Decision Requested: Amend Rule 22.2.3.1 (a) (iii) P4 Earthworks- General to a maximum slope of 1:2.5.

Decision Reasons:

- A 1:2 slope is on the limit of stability and is poor practice.
- Instability/risk of failure is higher, unless a geotechnical design is developed to minimize the risk.
- Steeper slopes are difficult to top soil and plant.

Point Number 757.8

Summary of Decision Requested: **Add** to Rule 22.2.3.1 P1 (a) Earthworks - General the following text:

"over any consecutive 12 month time period."

Decision Reasons:

- This would add limits to total development, consistent with maintaining the values of the site (topographical form, retaining vegetation, natural water flows).
- Manage accumulative effects to ensure character of area is maintained.
- Incremental annual changes can amount to significant destruction or visual changes resulting in adverse effects.

Point Number 757.9

Summary of Decision Requested: **Amend** Schedule 30.2 (Notable Trees) to include the following notable trees associated with Raglan:

- Trees within 30m of high water mark between the Bow St jetty and Helen Place;
- Trees adjacent to the airfield;
- Trees within 10m of Marine Parade;
- Trees between the recreation ground and Lily Street;
- Trees on Wallis Street at the foot of Government Road;
- Trees in the gully between Rose Street and Lily Street;
- Trees to the south west of SH23 between Hills Road and Greenslade Road;
- Trees in the Lorenzen Bay reserve; and
- Large trees.

Decision Reasons:

- Tree protection is clearly inadequate, as unauthorized removal of listed trees by council has shown.
- Trees are important for landscape, nature and carbon storage.
- All large trees should be protected.
- Schedule 30.2 does not cover sufficient notable trees within the definition.
- Such trees are important as they help define character of amenity of Raglan.
- Provide diversity for wildlife habitat.
- Only 160 notable trees listed for the whole District.

Point Number 757.10

Summary of Decision Requested: **Add** to the maps all tracks shown on the Strategy maps and walkways through the residential zones linking Lorenzen Bay with Kaitoke Walkway allowing a circular walk around Raglan, a cycle track from Wallis Street to Violet Street, a link to the national Te Araroa walkway using paper roads etc. (via Karioi, Bridal Veil), walkways (and where possible cycle ways) along the whole coast, a track from Raglan to the summit of Karioi using esplanades, reserves and paper roads and a link along Wainui Stream from Wainui reserves to Bryant Reserve.

Decision Reasons:

- At the last Plan revision Council said detailed rules for walk/cycle ways are not appropriate for a District Plan however there are 35 pages (14.2) about vehicle turning circles, road widths, sight lines etc. By contrast, there is just a rule about bus spaces and a rule for some new buildings to have cycle parking.
- Page 42 of Raglan Naturally states 'there is strong public support for harbor and coastal walkways' and 'create coastal walkways.' Local support reflects national trends showing walking being ahead of all other active sports and pursuits.
- Encouraging tourists to walk more than drive could become a valuable asset, giving an economic, health/recreation impetus for policy implementation around the importance of walking.
- Lack of progress indicates opportunities are not taken with subdivisions.
- More detail needs to be included in the District Plan.

Point Number 757.11

Summary of Decision Requested: **Amend** Rule 16.4.14 Subdivision of esplanade reserves and esplanade strips, to include the following:

The developer of lots 4ha shall be required to provide esplanade facilities that will include as a minimum a 1.8m wide timber edge, gravel path walkway and 10% of area landscape planting.

Decision Reasons:

Promotes the development and linkages of esplanade areas to increase the areas walking and cycling facilities.

Point Number 757.12

Summary of Decision Requested: **Amend** the Proposed Waikato District Plan to include a resource management framework for the management of Genetically Modified Organisms that is regional specific taking into account environmental, economic and social well-being considerations.

Decision Reasons:

- Submitter has significant concerns about the potential risks posed by release of Genetically Modified Organisms into the environment.
- Submitter has significant concerns about the ethical issues associated with development of Genetically Modified Organisms in relation to food, plant medicine and pest control.
- Provisions are allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Release of Genetically Modified Organisms has a potential to cause significant adverse effects on the environment, including the following:
 1. biological or ecosystem harm
 2. harm to tangata whenua cultural values such as mauri and tikanga
 3. harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. harm from Genetically Modified Organisms contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to Genetically Modified Organisms under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of Genetically Modified Os where they have the potential to adversely affect the environment.

Point Number	757.13
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to include strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.
Decision Reasons:	<ul style="list-style-type: none"> • Submitter has significant concerns about the potential risks posed by release of Genetically Modified Organisms into the environment. • Submitter has significant concerns about the ethical issues associated with development of Genetically Modified Organisms in relation to food, plant medicine and pest control. • Provisions are allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89. • Release of Genetically Modified Organisms has a potential to cause significant adverse effects on the environment, including the following: <ol style="list-style-type: none"> 1. biological or ecosystem harm 2. harm to tangata whenua cultural values such as mauri and tikanga 3. harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing 4. harm from Genetically Modified Organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependant on an uncontaminated environmental brand. 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood. • Conditions of consent may be breached by poor management, human error, natural events. • Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate. • Application of integrated management and precautionary approach to Genetically Modified Organisms under the RMA is the best technique for managing potential adverse effects. • It is consistent with the sustainable management purpose and Part II of the Resource Management Act to establish district plan provisions that manage the release, location and management of Genetically Modified Organisms where they have the potential to adversely affect the environment.
Point Number	757.14
Summary of Decision Requested:	Amend Rule 24.2.8- Indigenous vegetation clearance inside a Significant Natural Area to reduce the removal of Manuka and Kanuka from 5m ³ to 3m ³ . AND Delete reference to "Coastal Environment" from Rule 24.2.8- Indigenous vegetation clearance inside a Significant Natural Area.
Decision Reasons:	<ul style="list-style-type: none"> • Manuka and Kanuka are important habitat environments. • Manuka and Kanuka provide visual amenity. • 3m³ should be adequate for heating purposes with non-native wood sources available.
Point Number	757.15
Summary of Decision Requested:	Amend Rule 24.3.3.1 Height - Building general to encourage the use of variable building heights, stepped facades to maintain the built character of Raglan. Submission provides the following example: <u><i>A maximum height of a building must not exceed 7.5m, and where continuous roof lines occur (more than one unit) then variable roof lines should be implemented to maintain the character of Raglan.</i></u>
Decision Reasons:	<ul style="list-style-type: none"> • Provision for a maximum height makes that height more of a target. • Does not allow and encourage variable roof heights that would complement the built character of Raglan. • Housing in and around Raglan have variable heights and forms that contribute to character of the area, which needs to be considered.
Point Number	757.16
Summary of Decision Requested:	Amend Policy 8.1.2 Provision, use and development of public open space and reserves, to include the following: <u><i>Residential development will conform to the Waikato Urban Design Guidelines 'Residential Subdivision' in relation to layout around open space and stormwater design features.</i></u>
Decision Reasons:	Developments need to ensure properties integrate with open space and storm water devices rather than have them fenced in or with properties 'turning' their back to them.
Point Number	757.17
Summary of Decision Requested:	Add provision for new cycle/walkways, not only in major new developments, to implement Council's Walking, Cycling and Bridle Trails Strategy.
Decision Reasons:	<ul style="list-style-type: none"> • Submission states support for Whaingaroa Environmental Defence's submission in that 1.10.2.3 includes the strategy as relevant, yet there is no implementation of the Strategy. • Without support from the District Plan it is unlikely that most of the Strategy will be achieved. • 4.1.10 Policy- Tuakau, 4.1.11 Policy- Pokeno, 4.1.12 Policy- Te Kauwhata, 4.1.14 Policy- Taupiri, 4.1.15 Policy- Ngaruawahia, 4.1.16 Policy- Horotiu and 4.1.17 Policy- Te Kowhai all mention walking and cycling provision, but leave the means and locations unclear. • 4.1.18 Policy- Raglan is the only town policy <u>not</u> to mention cycling and walking, despite a May 2018 staff report to Council saying "Raglan has the district's highest walking/cycling communities." • At the last Plan revision Council said detailed rules for walk/cycle ways are not appropriate for a District Plan however contains 35 pages detailing (14.2) about vehicle turning circles, road widths, sight lines etc. By contrast, there is just a rule about bus spaces and a rule for some new buildings to have cycle parking. • Page 42 of Raglan Naturally states 'there is strong public support for harbour and coastal walkways' and 'create coastal walkways.' • Local support reflects national trends showing walking being ahead of all other active sports and pursuits. • Encouraging tourists to walk more than drive could become a valuable asset, giving an economic, health/recreation impetus for policy implementation around the importance of walking. • Lack of progress indicates opportunities are not taken with subdivisions. • More detail needs to be included in the District Plan.
Point Number	757.18
Summary of Decision Requested:	Add to the maps the planned Wainui Road to Te Hutewai Road walk/cycle track and other unformed roads not shown on the maps.
Decision Reasons:	<ul style="list-style-type: none"> • At the last Plan revision Council said detailed rules for walk/cycle ways are not appropriate for a District Plan however contains 35 pages (14.2) about vehicle turning circles, road widths, sight lines etc. By contrast, there is just a rule about bus spaces and a rule for

- some new buildings to have cycle parking.
- Page 42 of Raglan Naturally states 'there is strong public support for harbor and coastal walkways' and 'create coastal walkways.' Local support reflects national trends showing walking being ahead of all other active sports and pursuits.
- Encouraging tourists to walk more than drive could become a valuable asset, giving an economic, health/recreation impetus for policy implementation around the importance of walking.
- Lack of progress indicates opportunities are not taken with subdivisions.

- It is consistent with the sustainable management purpose and Part II of the Resource Management Act to establish district plan provisions that manage the release, location and management of Genetically Modified Organisms where they have the potential to adversely affect the environment

Point Number 759.2

Summary of Decision Requested: Amend the Proposed Waikato District Plan to include strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan, to ensure a consistent approach across Northland, Auckland the Waikato and to eliminate cross boundary issues.

Decision Reasons:

- Submitter is concerned about the liability of introduction of genetically modified/engineered/edited plant or animal species unintentionally entering their property.
- Submitter has significant concerns about the potential risks posed by release of Genetically Modified Organisms into the environment.
- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Release of Genetically Modified Organisms has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from Genetically Modified Organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependent on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to Genetically Modified Organisms under the Resource Management Act is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of Genetically Modified Organisms where they have the potential to adversely affect the environment.

Submitter Number: 760 **Submitter:** Patrick Day

On behalf of: P & B Day

Point Number 760.1

Summary of Decision Requested: Retain Significant Amenity Landscape overlay on the property at 656 Wainui Road, Raglan as notified.

Decision Reasons:

- Submitter accepts Significant Amenity Landscape designation.
- Understand the need to protect the environment.
- Submitter would like to continue work exterminating pests, fencing bush areas from stock, removing invasive species such as asparagus fern from the bush and selectively felling old Manuka and kanuka from edges of bush.
- Would like to continue to allow access to the Karioi Project to the land.

Point Number 760.2

Summary of Decision Requested: Delete the Significant Natural Area overlay from 656 Wainui Road, Raglan.

Decision Reasons:

- Object to compulsory covenanting of a large part of the subject property.
- No suggestion of compensation or quid pro quo arrangements.
- Areas within proposed Significant Natural Area is currently used for other rural purposes.
- Area south and east of subject property should not be designated Significant Natural Area as:
 - There are some small trees very close to the house which may need removal if they become a safety threat.
 - Is already a service area containing a water tank and pump shed present.
 - Adjacent to the water tank (south) is a storage area for country property equipment, hosing, metal and fence materials.
 - Adjacent to the water tank (north) is a shed storing beekeeping equipment.
 - From the storage area south to the road was a former road the submitter replanted and submitter would like to retain right to use this area as required for rural purposes and as an attractive local native flora entrance.
- The area to the north of the property should not be a Significant Natural Area as:
 - Boundary fences protecting the bust must be kept clear of vegetation.
 - Pathways (low impact) within the bush, built by the submitters, allowed access to the property and the beach which must be kept clear. Such pathways are also used as access for pest eradication and the Karioi project people seem to place all their traps adjacent to the constructed paths.
 - Additional low impact pathways may also need constructing for firefighting access as previous experiences proved such access was difficult.

Point Number 760.3

Summary of Decision Requested: Delete the requirement for boundaries to not divide a Significant Natural Area or Significant Amenity Landscape.

Decision Reasons:

- No reasons stated.

Submitter Number: 761 **Submitter:** Lyndendale Farms Limited

Point Number 761.1

Summary of Decision Requested: Retain proposed Rural zoning for the property at 180 Horsham Downs Road, Horsham Downs (Lot 5 DP 505127) and surrounding properties in the immediate area.

Decision Reasons:

- Lyndendale support the proposed Rural zoning and notation the three designations and policy overlays/areas insofar as they relate to the property at 180 Horsham Downs Road.
- Land in immediate surrounding area is also zoned Rural.
- Property at 180 Horsham Downs Road considered appropriate for a retirement village due to proximity to Hamilton city, existing residential suburb of Rototuna and proposed expansion of Rototuna to Horsham Down's road.
- A Rural Zoning is considered appropriate for subject property and existing land uses activities and development.
- Rural zone provisions do not include provisions for a Retirement Village however, which is proposed at 180 Horsham Downs Road.
- Retirement villages are a Non-Complying Activity under Rule 22.15 NCS and amendments to Rural Zone rules are sought to provide for the development at 180 Horsham Downs Road.

Point Number 761.2

Summary of Decision Requested: **Amend** to clarify whether the requiring authority for Designation U13 is Chorus New Zealand or Transpower New Zealand.
AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Online planning maps identify Designation U13 (Chorus New Zealand Limited) running along the southern boundary of the property at 180 Horshams Downs Road.
- Clarification is sought as to whether Chorus New Zealand are the correct requiring authority for the existing transmission lines designation, as LFL have previously been advised to consult with Transpower New Zealand in regards to the existing designation, rather than Chorus.

Point Number 761.3

Summary of Decision Requested: **Retain** the designation for the Waikato Expressway (I17) as shown on the planning maps running alongside the southern boundary of the property at 180 Horsham Downs Road, Horsham Downs.

Decision Reasons:

- Runs alongside property at 180 Horshams Down but does not encroach into the LFL property.
- LFL and NZTA have previously subdivided the site to set land aside for the Waikato Expressway.
- Designation should therefore not encroach onto the LFL property at 180 Horsham Downs Road, Horsham Downs.

Point Number 761.4

Summary of Decision Requested: **Amend** the Rural Zone provisions in Chapter 22 to include specific provisions for new Retirement Village activities, including the proposed Lyndendale Lifestyle Village at 180 Horsham Downs Road, Horsham Downs (Lot 5 DP 505 127).

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Proposed Rural Zone provisions in Chapter 22 of PDP do not include any specific provisions for a Retirement Village.
- Retirement Village is a non-complying activity in accordance with Rule 22.1.5 (NCS).
- Amendments sought to Chapter 22 to include suitable provisions for new retirement villages.

Point Number 761.5

Summary of Decision Requested: **Amend** to Rule 22.1.3 Restricted Discretionary Activities to a new rule RD3 to include specific provisions for a new Retirement Village, or alterations to an existing retirement village as follows:

RD3- A new retirement village, or alterations to an existing retirement village at 180 Horsham Downs Road (legally described as Lot 5 DP 505 127) that meets all of the following conditions:

a) Minimum living court or balcony area and dimensions:

i) Apartment- 10m² area within minimum dimension horizontal and vertical of 2.5m.

ii) Studio unit or 1 bedroom unit- 12.5m² area with minimum dimension horizontal and vertical of 2.5m; or

iii) 2 or more bedroomed unit- 15m² area with minimum dimension horizontal and vertical of 2.5m;

b) Minimum service court is either:

i) Apartment- communal outdoor space (i.e. no individual service courts required); or

ii) All other units- 10m².

c) Building height does not exceed 10m;

d) Building setbacks- a 7.5m setback is required from a local road, and a 12m setback is required from all other boundaries; except internal site boundaries where no setback shall apply;

e) The following Land Use- Effects rule in Rule 22.2 do not apply;

i. Rule 22.2.6.1 (Signs- General),

ii. Rule 22.2.6.2 (Signs- Effects on traffic),

f) The following Land Use- Building rules in Rule 22.3 do not apply;

i. Rule 22.3.1 (No. of Dwellings);

ii. 22.3.6 Building Coverage

iii. Rule 22.3.7.1 Building Setbacks

iv. Rule 22.3.7.2 Building Setback- Sensitive Land Use.

g) The following Infrastructure and Energy rule in Chapter 4 does not apply; Rule 14.12.1 P4(L)(d.) Traffic Generation

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Amendments are sought to Activity Status table in Rule 22.1.3 to include a new rule (RD3) to provide for new retirement villages and their future additions and expansion as a Restricted Discretionary Activity in the Rural Zone.
- Restricted Discretionary activity status is considered appropriate for new Retirement Village activities or alterations to an existing retirement village in the Rural Zone, including the proposed retirement village at 180 Horshams Downs Road.
- Conditions for a Retirement Village are proposed (based on activity specific conditions in Chapter 16 (Residential Zone)- Rule 16.1.2 (P3) which provide for 'A new retirement village or alteration to an existing retirement village' as a Permitted Activity in the Residential Zone).

- Adoption of a similar approach as in 16.1.2 is supported.

Point Number 761.6

Summary of Decision Requested: **Amend** Rule 22.1.5 NC5 non-complying activities so that NC5 does not apply to a retirement village activity (including the proposed retirement village at 180 Horsham Downs Road) in the Rural Zone.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Retirement Villages are currently a non-complying activity under Rule 22.1.5 (NC5).
- Non-complying status is opposed.
- Retirement Village activities that are proposed at 180 Horsham Downs Road will provide an essential service for the local community.
- The establishment of a retirement village (and its future redevelopment or expansion) in the Rural Zone should be expressly provided for as a Restricted Discretionary Activity.
- Retirement village activities need to be excluded from Rule 22.1.5 NC5.

Point Number 761.7

Summary of Decision Requested: **Amend** Rule 22.2.6 Signs- General so that the signage provisions in Rules 22.2.6.1 and 22.2.6.2 do not apply to a retirement village (including the proposed retirement village at 180 Horsham Downs Road, Horsham Downs- the Lyndendale Lifestyle Village) by adding the following:

3.) Rules 22.2.6.1 and 22.2.6.2 do not apply to a retirement village.

OR

Amend Rule 22.2.6.1 Signs-General and Rule 22.2.6.2 Signs-Effects on Traffic so that signage provisions do not apply to a retirement village.

OR

Add a new rule to Rule 22.2.6.1 Signs-General as follows:

(x) Rules P1, P2, P3 and RDI above do not apply to a retirement village.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Rules relating to signage should not be applicable to a Retirement Village, particularly those limiting the number, area and height of signage in Rule 22.2.6.1 (P2).
- Signage forms an integral part of a retirement village development.
- Signage is necessary to clearly identify the various buildings, facilities and car parking areas within a retirement village for residents, visitors and emergency vehicles.
- LFL are opposed to any restrictions regarding signage, insofar as they relate to their proposed Retirement Village Development at 180 Horsham Downs Road.

Point Number 761.8

Summary of Decision Requested: **Amend** Rule 22.2.6 Signs-effects on traffic so that signage provisions in Rules 22.2.6.1 and 22.2.6.2 do not apply to a retirement village by including the following:

(3) Rules 22.2.6.1 and 22.2.6.2 do not apply to a retirement village.

OR

Amend Rule 22.2.6.1 Signs-General and Rule 22.2.6.2 Signs- Effects on traffic so that the signage provisions do not apply to a retirement village

AND

Add to Rule 22.2.6.2 Signs - effects on traffic the following:

(x) Rules P1 and D1 above do not apply to a retirement village.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Rules relating to signage (particularly those preventing signs from imitating the content, color or appearance of any traffic control sign and those restricting the location of the sign and the number of characters or symbols) in Rule 22.2.6.2 should not be applicable to Retirement Villages.
- Signage forms an integral part of a retirement village development.
- Signage is necessary to clearly identify the various buildings, facilities and car parking areas within a retirement village for residents, visitors and emergency vehicles.
- LFL are opposed to any restrictions regarding signage for a retirement village.
- Rule 22.2.6.2 (Signs - effects on traffic) applies to 'any sign directed at road users,' therefore applying to any internal signage erected along a private road or internal access within a retirement village.
- Private internal access roads within a retirement village development need to be appropriately signposted and often include signage that imitates the appearance of a traffic control sign.

Point Number 761.9

Summary of Decision Requested: **Retain** Rule 23.4.1.1 P1 Height- Building-General as notified.

Decision Reasons:

- LFL support a maximum building height of 10m in the Rural Zone.
- Maximum permitted building height of 10m is appropriate for the retirement village development that is proposed at 180 Horsham Downs Road.
- 180 Horsham Downs Road is of sufficient size and area to accommodate 10m high buildings.
- 10m high buildings can be appropriately positioned within the site to comply with the building setback and height to boundary requirements.

Point Number 761.10

Summary of Decision Requested: **Amend** the Rule 22.4- Subdivision to allow for subdivision associated with the proposed Retirement Village at 180 Horsham Downs Road, Horsham Downs; including subdivision to separate the proposed retirement village from the balance of the rural property.

AND

Amend Rule 22.4.1.1- Prohibited Subdivision to exclude subdivision associated with a retirement village activity.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Amendments are required to allow subdivision associated with a Retirement Village activity in the Rural zone.
- LFL Property (180 Horsham Downs Road) has an area of approximately 52ha and currently comprises a single certificate of title.
- Existing title was recently created as part of the Waikato Expressway designation.
- Further subdivision of the existing title is likely either:
 1. As part of the proposed Retirement Village Development (create individual certificates of title within the development) and/or
 2. To separate the proposed Retirement Village activities from the existing farming activities on the balance of the existing title.
- Amendments are required to proposed subdivision provisions to allow for the types of subdivision anticipated.

Point Number

761.11

Summary of Decision Requested:

Amend Rule 22.4- Subdivision to allow for subdivision associated with the retirement village activities at 180 Horsham Downs Road as a Restricted Discretionary Activity.

AND

Add Rule 22.4.1.2 RDI to provide for subdivision associated with a retirement village at 180 Horsham Downs Road, Horsham Downs as a Restricted Discretionary Activity.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Amendments are required to the general subdivision rules (22.4.1.2) to provide for subdivision associated with the proposed retirement village at 180 Horsham Downs Road as a Restricted Discretionary Activity.

Point Number

761.12

Summary of Decision Requested:

Amend Section 5.1- The Rural Environment, Section 5.2- Productive Versatility of Rural Resources and Section 5.3- Rural Character and Amenity to provide for Retirement Village Development within the Rural Zone, only at 180 Horsham Downs Road, Horsham Downs.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- The Rural Zone is considered an appropriate zone for a Retirement Village.
- Amendments are required to the Rural Zone policy framework for the Rural Zone to recognize and provide for the Retirement Village development at 180 Horsham Downs Road.

Point Number

761.13

Summary of Decision Requested:

Amend the definition of "Residential Activity" in Chapter 13: Definitions to specifically include (and refer to) a Retirement Village.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- A retirement village is clearly a residential activity and should be expressly stated within the definition.

Point Number

761.14

Summary of Decision Requested:

Delete the definition of "Rest home" from Chapter 13- Definitions.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- There are no rules relating to the definition.
- There are no reasons to differentiate between a "retirement village" and a "rest home."
- The definition for rest home should be deleted in its entirety.

Point Number

761.15

Summary of Decision Requested:

Retain the definition for "Retirement Village" in Chapter 13-Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number

761.16

Summary of Decision Requested:

Amend Chapter 13-Definitions to include definitions for "habitable" and "non-habitable" buildings.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Rule 22.3.7.1 differentiates between "habitable" and "non-habitable" buildings," yet neither of these terms are defined in Chapter 13 of the Proposed District Plan.
- A retirement village has a range of shared buildings/facilities that could arguably be both habitable or non-habitable.
- Appropriate definitions are therefore required to provide certainty.
- Definitions are required to provide clarification with respect to the intended building setbacks.

Point Number 761.17

Summary of Decision Requested: **Delete** the following standards from Table 14.12.5.7- Required parking spaces and loading bays:

- Retirement Village: 1 car space per dwelling or unit.
- Housing for the elderly/residential care: 1 car space per 4 occupants.
- Hospital or care facilities associated with retirement village: 2 car spaces per 3 patients accommodated plus 1 per 2 full time staff equivalents.

AND

Add the following standard to Table 14.12.5.7- Required Parking spaces and loading bays:

Retirement Village: 1 car space per 4 occupants that the facility can accommodate and one per dwelling or freestanding unit.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Provisions under Table 14.12.5.7 (Required parking spaces and loading bays) are confusing.
- Provisions are essentially 3 different standards for the same activity and all 3 could be applied to a retirement village.
- District Plan does not need to differentiate between the specified activities in Table 14.12.5.7.
- A single standard for a retirement village would suffice.
- The standards for "housing for the elderly/residential car" and "hospital and care facilities" should therefore be deleted.

Point Number 761.18

Summary of Decision Requested: **Amend** Rule 14.12.1.4(1)d)-Traffic Generation so that it does not apply to a retirement village at 180 Horsham Downs Road.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Restrictions regarding vehicle movements should not apply to the proposed retirement village at 180 Horsham Downs Road.

Point Number 761.19

Summary of Decision Requested: **Amend** the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Various reasons outline in the submission.

Point Number 761.20

Summary of Decision Requested: **Retain** Rule 22.3.4.1 P2 Height- Building-General insofar as it excludes the property at 180 Horsham Downs Road, Horsham Downs, which is not identified as having a Significant Amenity Landscape.

AND

Retain the property at 180 Horsham Downs Road, Horsham Downs as not having a Significant Amenity Landscape identified on it.

Decision Reasons:

- Rule P2 permits a maximum building height of 7.5m in a Significant Amenity Landscape.
- Property at 180 Horsham Downs not identified as an Significant Amenity Landscape
- Location of property at 180 Horsham Downs Road **outside** of a Significant Amenity Landscape is supported
- Any proposal to identify 180 Horsham Downs Road within a Significant Amenity Landscape would compromise the plans for the proposed Retirement Village and would therefore be opposed.

Point Number 761.21

Summary of Decision Requested: **Retain** the height to boundary requirement (37 degrees at 2.5m above ground level) in Rule 22.3.5 Daylight admission.

AND

Amend Rule 22.3.5 P1 Daylight admissions so the height control plane only applies to the external boundaries of Retirement Villages and not to any internal boundaries for individual certificate of title boundaries.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- Retention of existing height to boundary provision is supported.
- Height to boundary requirement should only be applicable to the external boundaries of a retirement village, not the boundaries of individuals titles within a Retirement Village.

Point Number 761.22

Summary of Decision Requested: **Retain** Rule 22.3.5 RD1-Daylight admission as notified.

Decision Reasons:

- Restricted Discretionary Activity status is supported.

Point Number 761.23

Summary of Decision Requested: **Amend** Rule 22.3.6- Building coverage so that the building coverage requirements do not apply to a Retirement Village.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- The rule relating to building coverage in Rule 22.3.6(P1) should not be applicable to a Retirement Village.
- Larger sized buildings form an integral part of a retirement village development, therefore are necessary to accommodate the shared services and specialized medical facilities essential for a retirement village.
- LFL are opposed to any restrictions regarding building coverage for a retirement village.

Point Number 761.24

Summary of Decision Requested: **Amend** Rule 22.3.7.1 Building setbacks- All boundaries as follows:

Rules P1, P2, P3, P4 and RD1 do not apply to the proposed Retirement Village at 180 Horsham Downs Road; and

Building setback requirements only apply to the external boundaries of a Retirement Village and there are no internal setback requirements; and there are no internal setback requirements; and

The different rules for "habitable and non-habitable" buildings do not apply to a Retirement Village; and

Site specific building setbacks are included for a Retirement Village.

AND

Amend the Proposed District Plan to make any consequential amendments that are required to give effect to the submission.

Decision Reasons:

- The submitter opposes building setback provisions that are proposed in Rule 22.3.7.1.
- Proposed building setback provisions do not provide certainty with respect to the proposed Retirement Village Development at 180 Horsham Downs Road.
- The provisions don't include a building setback from the Waikato Expressway.
- The provisions do not include any activity specific setbacks for a Retirement Village.
- Building setback provisions stated in Rule P1, P2, P3 and P4 and RD1 should not apply to a Retirement Village.
- Provisions in Rules P3 and P4 would currently apply to 80 Horsham Downs Road.
- The size and number of certificates of title is likely to change, as a result of the subdivision associated with the proposed Retirement Village.
- Existing building setback rules do not provide for Retirement village development.
- The building setbacks for a Retirement Village (P1-P4) should not refer to the size of the Record of Title.
- References to "habitable" and "non-habitable" buildings are not defined and not relevant to retirement villages.

Submitter Number: 762 **Submitter:** Simon Thomson

Point Number 762.1

Summary of Decision Requested: **Amend** the Proposed District Plan to include a resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social wellbeing considerations.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Submitter concerned about potential risks posed by release of Genetically Modified Organisms into environment.
- Release of Genetically Modified Organisms has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to Tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from Genetically Modified Organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependent on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to Genetically Modified Organisms under the Resource Management Act is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the Resource Management Act to establish district plan provisions that manage the release, location and management of Genetically Modified Organisms where they have the potential to adversely affect the environment.

Point Number 762.2

Summary of Decision Requested: **Amend** the Proposed District Plan to include strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Precautionary approach would place liability with creators and owners of genetic material.
- Submitter concerned about potential risks posed by release of Genetically Modified Organisms into environment.
- Ensures a consistent approach across Northland, Auckland and Waikato.
- Eliminates cross boundary issues.
- Release of Genetically Modified Organisms has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to Tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from Genetically Modified Organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependent on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to Genetically Modified Organisms under the Resource Management Act is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the Resource Management Act to establish district plan provisions that manage the release, location and management of Genetically Modified Organisms where they have the potential to adversely affect the environment.

Point Number 762.3

Summary of Decision Requested: **Amend** the Proposed District Plan to include that liability for spread and damage caused by Genetically Modified Organism's be with the owners of that genetic material, and secondly local and regional councils.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Submitter is concerned about liability of introduction of Genetically Modified Organisms.
- Submitter also concerned about potential risks posed by release of Genetically Modified Organisms into environment.
- A precautionary approach would place the liability with the creators and owners of genetic material.
- Would allow farmers and individuals to take legal action against companies and corporates, and against councils for negligence.
- Release of Genetically Modified Organisms has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to Tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from Genetically Modified Organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependent on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate.

Point Number

762.4

Summary of Decision Requested:

Amend the Proposed District Plan to require those who introduce Genetically Modified Organism material into the environment be required to pay a bond to council equal in order of magnitude greater than any possible clean-up to eradicate at the genetic material.

Decision Reasons:

- Provisions allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Submitter concerned about potential risks posed by release of Genetically Modified Organisms into environment.
- Release of Genetically Modified Organisms has the potential to cause significant adverse effects on the environment, including the following:
 1. Biological or ecosystem harm
 2. Harm to Tangata whenua cultural values such as mauri and tikanga
 3. Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 4. Harm from Genetically Modified Organism contamination to existing or potential forms of land use including farming, forestry and other primary production activities dependent on an uncontaminated environmental brand.
 5. Adverse effects to these land uses could include: loss of organic and Genetically Modified Organism-free certification, reputational damage, loss of markets and premiums paid for Genetically Modified Organism free produce and loss of livelihood.
- Conditions of consent may be breached by poor management, human error, natural events.
- Once Genetically Modified Organisms have been released they would be very difficult, if not impossible to eradicate.
- Application of integrated management and precautionary approach to Genetically Modified Organisms under the Resource Management Act is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the Resource Management Act to establish district plan provisions that manage the release, location and management of Genetically Modified Organisms where they have the potential to adversely affect the environment.

Submitter Number:

763

Submitter:

Fiona Jones

Point Number

763.1

Summary of Decision Requested:

Amend the Proposed District Plan to enable subdivision of 25 Renown Road, Waikokowai and 22 McDonald Mine Road, Waikokowai into two.

Decision Reasons:

- 25 Renown Road is a house, tank, septic tank and separate road/fences/driveway access.
- Small Significant Natural Area in between both properties.
- 25 Renown Road was on two titles historically.
- Subdivision would allow submitter to protect Significant Natural Area and keep the public out.
- 5 Kauri trees located on 22 McDonald Mine Road side.
- Unique subdivision as the site was an old school (120 years old).

Submitter Number:

764

Submitter:

Ambury Properties Limited

Point Number

764.1

Summary of Decision Requested:

Amend the zoning of the property at 231 Tahuna Road and 52, 56 and 58 Lumsden Road, Ohinewai from Rural Zone to Industrial, Business and Residential Zone as shown on the plan attached to the submission (see Attachment 1 of the submission).

AND

Add the Ohinewai Structure Plan attached to the original submission in a new 'Appendix 13' within the Proposed District Plan.

AND

Amend the Proposed District Plan as necessary to support the relief set out in the submission.

Decision Reasons:

- To be consistent with the purpose and principles of the Resource Management Act.
- Promote the sustainable management of natural and physical resources.
- Enable people and communities to provide for their social and economic wellbeing.
- Meet the foreseeable needs of future generations.
- Provide industrial, business and residential land to give effect to the National Policy Statement on Urban Development Capacity.
- Consistent with sound resource management practice.
- Will enable a standalone manufacturing facility that will have road and rail connections.
- An area of 9.5ha is proposed to be allocated to business use and shall principally be used as a bulk factory outlet centre associated with the manufacturing business.
- The property is well suited to a service centre type development as it is accessible from the Waikato Expressway.
- The site is intended to include a group of neighbourhood shops of a scale to service the local residents.
- This will result in a residential yield of approximately 900 dwellings to assist staff into affordable housing, that will be a mix of medium to high density. Some of the housing will be offered to the private market.
- Residential activity and industrial activity will be separated by an open space/recreational buffer area with a width of 100m.
- Residential area will adjoin Lake Rotokawau and provides connections to Lake Waikare and Te Kauwhata.
- Waikato District Council have indicated that they are investigating options for reticulated wastewater and water supply to Ohinewai and the submitter is investigating stormwater options.
- The investment in this location will encourage reinvestment and growth in Huntly.
- The development provides an opportunity to provide for this anticipated future growth in a strategic location close to transport routes and will provide employment opportunities whilst encouraging redevelopment and planned growth for Huntly.

- The Waikato Regional Policy Statement recognizes alternative land release and timing where criteria and development principles are met.

Point Number 764.2

Summary of Decision Requested: **Amend** Objective 4.1.2 Urban growth and development as follows:
 (a) Future settlement pattern is consolidated in and around existing and planned towns and villages in the district.
 AND

Amend the Proposed District Plan as necessary to support the relief set out in the submission.

Decision Reasons:

- To be consistent with the purpose and principles of the Resource Management Act.
- Promote the sustainable management of natural and physical resources.
- Enable people and communities to provide for their social and economic wellbeing.
- Meet the foreseeable needs of future generations.
- Provide industrial, business and residential land to give effect to the National Policy Statement on Urban Development Capacity.
- Consistent with sound resource management practice.
- The objectives of the Proposed District Plan are supportive of economic growth and new development and therefore support the rezoning of the property.
- This submission demonstrates that it is not always possible for a large industrial development with requirements for long term expansion to be located within an existing township.
- There is a need to recognise that development is also to be consolidated in new towns and villages where this is planned for.

Point Number 764.3

Summary of Decision Requested: **Amend** Policy 4.1.3(a) Location of development as follows:
 (a) Subdivision and development of a residential, commercial and industrial nature is to occur within existing and planned towns and villages where infrastructure and services can be efficiently and economically provided for.
 AND

Amend the Proposed District Plan as necessary to support the relief set out in the submission.

Decision Reasons:

- To be consistent with the purpose and principles of the Resource Management Act.
- Promote the sustainable management of natural and physical resources.
- Enable people and communities to provide for their social and economic wellbeing.
- Meet the foreseeable needs of future generations.
- Provide industrial, business and residential land to give effect to the National Policy Statement on Urban Development Capacity.
- Consistent with sound resource management practice.
- The policies of the Proposed District Plan are supportive of economic growth and new development and therefore support the rezoning of the property.
- This submission demonstrates that it is not always possible for a large industrial development with requirements for long term expansion to be located within an existing township.
- There is a need to recognise that development is also to be consolidated in new towns and villages where this is planned for.

Point Number 764.4

Summary of Decision Requested: **Add** a new policy for Ohinewai to provide a policy framework for the subdivision, use and development of the Industrial, Business and Residential zoned land at 231 Tahuna Road, 52, 56 and 58 Lumsden Road, Ohinewai, as sought in the submission.
 OR
Amend Policy 4.1.13 Huntly to provide a policy framework for the subdivision, use and development of the Industrial, Business and Residential zoned land at 231 Tahuna Road, 52, 56 and 58 Lumsden Road, Ohinewai, as sought in the submission.
 AND

Amend the Proposed District Plan as necessary to support the relief set out in the submission.

Decision Reasons:

- To provide a framework for the subdivision, use and development of the Industrial, Business and Residential land within the submitter's property.

Point Number 764.5

Summary of Decision Requested: **Amend** objectives and policies to enable the subdivision, use and development of the property at 231 Tahuna Road, 52, 56 and 58 Lumsden Road, Ohinewai as sought within the submission.
 OR
Add objectives and policies to enable the subdivision, use and development of the property at 231 Tahuna Road, 52, 56 and 58 Lumsden Road, Ohinewai as sought within the submission.
 AND

Amend the Proposed District Plan as necessary to support the relief set out in the submission.

Decision Reasons:

- To provide for the subdivision, use and development of the Property.

Point Number 764.6

Summary of Decision Requested: **Add** an Ohinewai Structure Plan such as Attachment 2 within the submission as a new Appendix 13 in Chapter 29 Appendices.
 AND

Amend the Proposed District Plan as necessary to support the relief set out in the submission.

Decision Reasons:

- To be consistent with the purpose and principles of the Resource Management Act.
- Promote the sustainable management of natural and physical resources.
- Enable people and communities to provide for their social and economic wellbeing.
- Meet the foreseeable needs of future generations.
- Provide industrial, business and residential land to give effect to the National Policy Statement on Urban Development Capacity.
- Consistent with sound resource management practice.
- Will enable a standalone manufacturing facility that will have road and rail connections.

- An area of 9.5ha is proposed to be allocated to business use and shall principally be used as a bulk factory outlet centre associated with the manufacturing business.
- The property is well suited to a service centre type development as it is accessible from the Waikato Expressway.
- The site is intended to include a group of neighbourhood shops of a scale to service the local residents.
- This will result in a residential yield of approximately 900 dwellings to assist staff into affordable housing, that will be a mix of medium to high density. Some of the housing will be offered to the private market.
- Residential activity and industrial activity will be separated by an open space/recreational buffer area with a width of 100m.
- Residential area will adjoin Lake Rotokawau and provides connections to Lake Waikare and Te Kauwhata.
- Waikato District Council have indicated that they are investigating options for reticulated wastewater and water supply to Ohinewai and the submitter is investigating stormwater options.
- The investment in this location will encourage reinvestment and growth in Huntly.
- The development provides an opportunity to provide for this anticipated future growth in a strategic location close to transport routes and will provide employment opportunities whilst encouraging redevelopment and planned growth for Huntly.
- The Waikato Regional Policy Statement recognizes alternative land release and timing where criteria and development principles are met.

Submitter Number: 765 **Submitter:** Tamahere Eventide Home Trust
On behalf of: Atawhai Assisi Retirement Village

Point Number 765.1
Summary of Decision Requested: **Retain** the Country Living Zoning of Tamahere Eventide Retirement Village and the surrounding land in the immediate area at 621 State Highway One (Lot 2 DPS 88165), 0 State Highway One (Lot 1 DPS 88165) and 597 State Highway One (Pt Lot 2 DPS 2182) as notified.

Decision Reasons:

- Entire Tamahere Eventide Retirement Village Site is zoned Country Living.

Point Number 765.2
Summary of Decision Requested: **Retain** the proposed overlays as notified identified in Planning Maps for Tamahere Eventide Retirement Village and the surrounding properties in the immediate area at 621 State Highway One (Lot 2 DPS 88165), 0 State Highway One (Lot 1 DPS 88165) and 597 State Highway One (Pt Lot 2 DPS 2182).

Decision Reasons:

- The submission identifies the following policy overlays/areas as applicable to Tamahere Eventide Site:
 - Significant Natural Area
 - Waikato River Catchment
 - Walkway Cycle way Bridleway
 - Airport Noise Subdivision Control Boundary,
 - Airport Obstacle Limitation Surface,
 - Airport Noise Outer Control Boundary,
 - Hamilton Basis Ecological Management.
- Land immediately west of Tamahere Eventide is a designated site (Waikato Expressway).

Point Number 765.3
Summary of Decision Requested: **Add** a new activity to Rule 23.1.1 Permitted Activity for Tamahere Eventide as follows:
P5. A retirement village (including alterations, expansions) at the Tamahere Eventide.

AND

Add activity specific conditions to Rule 23.1.1 P5 Permitted Activity for Tamahere Eventide as follows:

Any additions or expansion at the Tamahere Eventide Retirement Village

(a) Minimum living court or balcony area and dimensions:

(iv) Apartment- 10m2 area within minimum dimension horizontal and vertical of 2.5m;

(v) Studio unit or 1 bedroom unit- 12.5m2 area with minimum dimension horizontal and vertical of 2.5m; or

(vi) 2 or more bedroomed unit- 15m2 area with minimum dimension horizontal and vertical of 2.5m;

(a) Minimum service court is either:

(iii) Apartment- communal outdoor space (i.e. no individual service courts required); or

(iv) All other units- 10m2 for each unit;

(a) Building height does not exceed 8m, except 15% of total building coverage, where buildings may be up to 10m high;

(b) Building setbacks – a 7.5m setback is required from a local road, and a 12m setback is required from all other boundaries; except internal site boundaries where no setback shall apply.

(c) The following Land Use- Effects rule in Rule 23.2 do not apply;

(i) Rule 23.2.6 (Signs- General);

(ii) Rule 23.2.6.2 (Signs- Effects on traffic);

(a) The following Land Use- Building rules in Rule 23.3 do not apply;

(i) Rule 23.3.1 (Dwelling);

(ii) Rule 23.3.4.1 (Height- Building General);

(iii) 23.3.5 Daylight Admission

(iv) 23.3.6 Building Coverage

(v) Rule 23.3.7.2 Building Setback- Sensitive Land Use.

(a) The following Infrastructure and Energy Rule in Chapter 14 does not apply;

(i) Rule 14.12.1 P4 10 (a).

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Permitted Activity Table in Rule 23.1.1 does not include any provisions for existing and future retirement villages at Tamahere Eventide and is therefore opposed.
- Operative District Plan includes a site specific schedule for Tamahere Eventide Village and allows for a range of Retirement Village activities as a Permitted Activity.
- In the Proposed Plan, Tamahere Eventide is a Non-Complying in the Country Living Zone.
- Submitter recognises adoption of zone wide provisions for retirement villages provides appropriate certainty and guidance for operations establishing new retirement village developments, however it does not appropriately recognise or protect existing retirement village developments.
- The Proposed District Plan does not differentiate between establishment of a 'new' retirement village and/or minor alterations or additions to an 'existing' retirement village.
- Minor alterations/extensions would require resource consent for a non-complying activity under the Proposed Plan provisions and is opposed.

Point Number 765.4

Summary of Decision Requested: **Add** a restricted discretionary table into Rule 23.1 Land Use- Activities with a new restricted discretionary activity for retirement villages as follows:

RD1 (g) The following Retirement Village Activities are Restricted Discretionary in the Country Living Zone:

1. A new retirement village
2. Alterations to existing retirement villages (excluding Tamahere Eventide);
3. Alterations to Tamahere Eventide that do not comply with the Activity Specific Conditions in Rule 23.1.1.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Activity Tables in Chapter 23 do not include any provisions for Restricted Discretionary Activities.
- Restricted Discretionary activity status is considered appropriate for the activities identified in 1-3.

Point Number 765.5

Summary of Decision Requested: **Delete** Rule 23.1.3 NC3- Non-Complying Activities.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Opposes non-complying activity status for a 'retirement village' in the Country Living Zone.
- Under Operative District Plan, a retirement village activity is specifically provided for as a Permitted Activity at Tamahere Eventide.

Point Number 765.6

Summary of Decision Requested: **Add** a new rule to Rule 23.2.6 Signs as follows:

(3) Rules 23.2.6.1 and 23.2.6.2 do not apply to a retirement village.

OR

Add a new row to the activity table in Rule 23.2.6 Signs- General as follows:

(x) Rules P1, P2, P3 and RD1 above do not apply to a retirement village.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Signage forms an integral part of a retirement village development and is necessary to clearly identify the various buildings, facilities and car parking areas within a retirement village.
- Opposed to any restrictions regarding signage for Tamahere Eventide.
- The rules relating to signage (particularly those limiting the number, area and height of signage in Rule 23.3.6.1 P2) should not be applicable to Tamahere Eventide.

Point Number 765.7

Summary of Decision Requested: **Add** a new rule to Rule 23.2.6 Signs as follows:

(3) Rule 23.2.6.1 and 23.2.6.2 do not apply to a retirement village

OR

Add a new rule to Rule 23.3.6.2 Signs-Effects on traffic as follows:

(x) Rules P1, P2, P3 and RD1 above do not apply to a retirement village.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Signage forms an integral part of a retirement village development and is necessary to clearly identify the various buildings, facilities and car parking areas within a retirement village.
- Opposed to any restrictions regarding signage for Tamahere Eventide.
- The rules relating to signage (particularly those preventing signs from imitating the content, colour or appearance of any traffic control sign and those restricting the location of the sign and the number of character or symbols) in Rule 23.2.6.2 should not be applicable to Tamahere Eventide.

Point Number 765.8

Summary of Decision Requested: **Amend** Rule 23.3.4.1- Height- Building Control so that it does not apply to Tamahere Eventide.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- An alternative height standard is proposed for Tamahere Eventide (in activity specific conditions elsewhere in the submission).

- The maximum permitted building height (7.5m) shouldn't be applicable to a retirement village development.
- Modern retirement village developments typically comprise of multi-level buildings that are often greater than 7.5m in height.
- Retirement village sites are of sufficient size and area so that buildings higher than 7.5m can be appropriately positioned within the site to comply with the building setback and height-boundary requirements.
- A height rule is proposed for 'a new retirement village or alterations to an existing retirement village' should apply, similar to Residential Zone Rule 16.1.2 P3 (f).

Point Number 765.9

Summary of Decision Requested: **Retain** Rule 23.3.5 PI Daylight admission

AND

Amend Rule 23.3.5- Daylight Admission so that it only applies to the external boundaries of Tamahere Eventide (not internal boundaries between the individual certificates of title that collectively make up the retirement village site).

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Retention of existing height-boundary provision (37 degrees at 2.5m above ground level) is supported, however proposed minor amendments ensure the that rule is only applied to the external site boundaries of Tamahere Eventide.
- Existing rest home and retirement village development at Tamahere Eventide comprise 3 separate adjacent certificates of titles.
- The height to boundary requirement should only be applicable to the external boundaries of the village, not the boundaries of each title.

Point Number 765.10

Summary of Decision Requested: **Amend** Policy 5.6.2- Country Living Character as follows:

(a) Any building and activity within the Country Living Zone are designed, located, scaled and serviced in a manner that does not detract from the character of the area by:

(i) Maintaining the existing open space character;

(ii) Maintaining existing low density residential development;

(iii) Recognizing the absence of Council wastewater services and lower levels of other infrastructure.

(b) Maintain existing views and vistas of the rural hinterland beyond, including, where applicable, Waikato River, wetlands, lakes and the coast.

(c) Maintain an existing road pattern that follows the natural contour of the landform.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Amendments are required to also recognise the existing open space and development.

Point Number 765.11

Summary of Decision Requested: **Retain** Policy 5.6.4- Building setbacks, insofar as it seeks to maintain the existing spaciousness between adjoining sites (as opposed to the internal boundaries within a development).

Decision Reasons:

- Approach is consistent with the other submission points in relation to Rule 23.3.7, which seeks amendments so that the building setbacks only apply to the external boundaries of the Tamahere Eventide site.

Point Number 765.12

Summary of Decision Requested: **Amend** Policy 5.6.5- Scale and intensity of development as follows:

Minimise the adverse effects of development created by excessive building scale, overshadowing, building bulk, excessive site coverage or loss of privacy, except where such development correlates to existing site development.

OR

Add a new policy for Tamahere Eventide.

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Amendments are required to Policy 5.6.5 so that it does not apply to existing development or an existing Retirement Village.

Point Number 765.13

Summary of Decision Requested: **Add** a new policy for Tamahere Eventide after policy 5.6.8 Non-residential activities as follows:

Policy 5.6.X: Tamahere Eventide

(a) Permit additions and expansions at Tamahere Eventide where they:

(i) Have functional need to locate within the Country Living Zone; and

(ii) Provide for the health and wellbeing of the community,

AND

Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- The intent of the proposed policy 5.6.8 is also applicable to Tamahere Eventide Retirement Village, but would not apply because a Retirement Village is not considered a 'non-residential activity.'

Point Number 765.14

Summary of Decision Requested:	Amend the definition of "Residential activity" in Chapter 13: Definitions to specifically include and refer to a Retirement Village. AND Any consequential amendments that are required to give effect to the above submission.
Decision Reasons:	<ul style="list-style-type: none"> A retirement village is clearly a residential activity and should be expressly stated within the definition.
Point Number	765.15
Summary of Decision Requested:	Delete the definition of "Rest home" from Chapter 13: Definitions. AND Any consequential amendments that are required to give effect to the above submission.
Decision Reasons:	<ul style="list-style-type: none"> There are no rules relating to this definition. No reason to differentiate between a "retirement village" and a "rest home."
Point Number	765.16
Summary of Decision Requested:	Retain the definition for "Retirement Village" in Chapter 13: Definitions as notified.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	765.17
Summary of Decision Requested:	Delete the following from Table 14.12.5.7- Required parking spaces and loading bays: <ul style="list-style-type: none"> Retirement Village: 1 car space per dwelling or unit. Housing for the elderly/residential care: 1 car space per 4 occupants. Hospital or care facilities associated with retirement village: 2 car space per 3 patients accommodated plus 1 per 2 full time staff equivalents. AND Any consequential amendments that are required to give effect to the above submission.
Decision Reasons:	<ul style="list-style-type: none"> Provisions are confusing. There are essentially 3 different standards for the same activity; and all 3 could be applied to existing retirement village activities at Tamahere Eventide. The District Plan does not need to differentiate between the various activities. A single standard for a retirement village would suffice. A single car parking standard should apply to the overall site (as opposed to different car parking requirements for each of the retirement village related activities).
Point Number	765.18
Summary of Decision Requested:	Add parking standards to Table 14.12.5.7- Required parking spaces and loading bays as follows: <ul style="list-style-type: none"> <u>Retirement Village: 1 car space per 4 occupants.</u> AND Any consequential amendments that are required to give effect to the above submission.
Decision Reasons:	<ul style="list-style-type: none"> Provisions are confusing. There are essentially 3 different standards for the same activity; and all 3 could be applied to existing retirement village activities at Tamahere Eventide. The District Plan does not need to differentiate between the various activities. A single standard for a retirement village would suffice. A single car parking standard should apply to the overall site (as opposed to different car parking requirements for each of the retirement village related activities).
Point Number	765.19
Summary of Decision Requested:	Add new Policy 5.6.X (a) Tamahere Eventide as follows: <i>(g) Enable the existing Tamahere Eventide activities to continue and support their redevelopment and expansion, provided they do not have a significant adverse effect on the character and amenity of the Country Living Zone.</i> AND Any consequential amendments that are required to give effect to the above submission.
Decision Reasons:	<ul style="list-style-type: none"> The intent of the proposed policy 5.6.8 is also applicable to Tamahere Eventide Retirement Village, but would not apply because a Retirement Village is not considered a 'non-residential activity.'
Point Number	765.20
Summary of Decision Requested:	Retain Building Rule 23.3.5 RD1 - Daylight Admission.
Decision Reasons:	<ul style="list-style-type: none"> Restricted Discretionary Activity status is supported.
Point Number	765.21

Summary of Decision Requested: Amend Rule 23.3.6- Building Coverage so that the building coverage rules do not apply to Tamahere Eventide.
AND
Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Rules relating to building coverage in 23.3.6 (P1) should not be applicable to Tamahere Eventide.
- Larger sized buildings (greater than 300m²) form an integral part of a retirement village development and are necessary to accommodate the shared services and specialised medical facilities that are essential for a retirement village.

Point Number 765.22

Summary of Decision Requested: Amend Rule 23.3.7.1- Building setbacks - All boundaries so that the setback requirements do not apply to Tamahere Eventide.
AND
Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Requirements for building setbacks and height-boundary should only apply to the external boundaries of the submitter's site, not the internal boundaries of the individual certificates of title that collectively apply to the site.
- Site specific building setbacks are proposed for Tamahere Eventide elsewhere in the submission.

Point Number 765.23

Summary of Decision Requested: Amend Rule 23.3.7.2 Building setback- Sensitive Land Use so that the setback requirements do not apply to Tamahere Eventide.
AND
Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- P1 (a)(iii) requires a 35m setback from the designated boundary of the Waikato Expressway, which is larger than what currently exists at the site (as per the existing Operative District Plan)
- Site specific setbacks are proposed for Tamahere Eventide elsewhere in the submission.

Point Number 765.24

Summary of Decision Requested: Amend Objective 5.6.1 (a)- Country Living Zone to recognise the existing character and abutting character/amenity, not just amenity and character of the zone.
AND
Any consequential amendments that are required to give effect to the above submission.

Decision Reasons:

- Character of existing retirement village activities at Tamahere Eventide should be considered.

Submitter Number: 766 **Submitter:** Nicky Hogarth

Organisation: Holcim (New Zealand) Limited

Point Number 766.1

Summary of Decision Requested: Retain Policy 6.2.5 Environmental effects insofar as it gives effect to submitters relief sought.

Decision Reasons:

- Submitter supports the intention of the objective to recognise and provide for protection of the National Grid.
- Provisions relating to the National Grid yard are too restrictive and should be amended as per relief sought to Chapter 14.4 provisions.

Point Number 766.2

Summary of Decision Requested: Retain Policy 6.2.6 Reverse sensitivity and the National Grid insofar as it gives effect to submitter's relief sought.

Decision Reasons:

- Submitter supports the intention of the objective to recognise and provide for protection of the National Grid.
- Provisions relating to the National Grid yard are too restrictive and should be amended as per relief sought to Chapter 14.4 provisions.

Point Number 766.3

Summary of Decision Requested: Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development insofar as it gives effect to the relief sought.

Decision Reasons:

- Submitter supports the intention of the objective, subject to the relief sought elsewhere in the submission.

Point Number 766.4

Summary of Decision Requested: Amend Policy 6.4.5 (i) and (ii) Roading Infrastructure to provide an exclusion for Industrial Zones.
AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number

766.5

Summary of Decision Requested:

Amend the definition of "National Grid" in Chapter 13 Definitions so that yard setbacks are reduced to align with decisions on appeals and consents orders on Auckland Unitary Plan and the current Auckland Unitary Plan rules.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the 'Yard' is measured at 12m in any direction from outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line rather than up to 37m either side of a 220kV transmission line.
- There is no reason for Waikato District Plan to have a wider restriction buffer than Auckland when effect on the National Grid would be the same regardless of region.
- Auckland rules apply immediately adjoining the submitter's site.
- Since Auckland has the most recent case law on the National Grid network through Auckland Unitary Plan appeals process, it is not unreasonable to consider that its provisions are suitable to meet the NPS for Electricity Transmission.

Point Number

766.6

Summary of Decision Requested:

Amend Rule 14.4.1 Permitted Activities by reducing yard setbacks to align with the decisions on appeals and consent orders on the current Auckland Unitary Plan rules which allow for carparking or hard stand surfaces (and in associated drainage) with limited storage height on Industrial zoned land within the National Grid Yard.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the 'Yard' is measured at 12m in any direction from the outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line, rather than up to 37m either side of 220kV transmission line.
- There is no reason for Waikato District Plan to have a wider restriction buffer than Auckland when the effect on the National Grid would be the same regardless of region.
- Auckland rules apply immediately adjoining the submitter's site.
- Since Auckland has the most recent case law on the National Grid network through the Auckland Unitary Plan appeals process, it is not unreasonable to consider that its provisions are suitable to meet the NPS for Electricity Transmission.

Point Number

766.7

Summary of Decision Requested:

Amend Rule 14.4.2 Restricted Discretionary Activities by reducing yard setbacks to align with the decisions on appeals and consent orders, in the current Auckland Unitary Plan rules which allow for car parking or hard stand surfaces (and associated drainage) with limited storage height on Industrial zoned land within the National Grid Yard.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the 'Yard' is measured at 12m in any direction from the outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line, rather than up to 37m for a 220kV transmission line.
- There is no reason for Waikato District Plan to have a wider restriction buffer than Auckland when effect on the National Grid would be the same regardless of region.
- Auckland rules apply immediately adjoining the submitter's site.
- Since Auckland has the most recent case law on the National Grid network through the Auckland Unitary Plan appeals process, it is not unreasonable to consider that its provisions are suitable to meet the NPS for Electricity Transmission.

Point Number

766.8

Summary of Decision Requested:

Amend Rule 14.4.3 Discretionary Activities by reducing yard setbacks to align with the decisions on appeals and consent orders, in the current Auckland Unitary Plan rules which allow for carparking or hard stand surfaces (and associated drainage) with limited storage height on Industrial zoned land within the National Grid Yard.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the 'Yard' is measured at 12m in any direction from the outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line, rather than up to 37m for a 220kV transmission line.
- There is no reason for Waikato District Plan to have a wider restriction buffer than Auckland when effect on the National Grid would be the same regardless of region.
- Auckland rules apply immediately adjoining the submitter's site.
- Since Auckland has the most recent case law on the National Grid network through the Auckland Unitary Plan appeals process, it is not unreasonable to consider that its provisions are suitable to meet the NPS for Electricity Transmission.

Point Number

766.9

Summary of Decision Requested:

Amend Rule 14.4.4 Non-Complying Activities by reducing yard setbacks to align with decisions on appeals and consent orders, in the current Auckland Unitary Plan rules which allow for carparking or hard stand surfaces (and associated drainage) with limited storage height on Industrial zoned land within the National Grid Yard.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Overlay and its provisions should reflect the minimums allowed under the Auckland Unitary Plan, whereby the 'Yard' is measured at 12m in any direction from the outer edge of a National Grid support structure and 12m either side of the centerline of any overhead National Grid line, rather than up to 37m for a 220kV transmission line.
- There is no reason for Waikato District Plan to have a wider restriction buffer than Auckland when effect on the National Grid would be the same regardless of region.
- Auckland rules apply immediately adjoining the submitter's site.
- Since Auckland has the most recent case law on the National Grid network through the Auckland Unitary Plan appeals process, it is not unreasonable to consider that its provisions are suitable to meet the NPS for Electricity Transmission.

Point Number 766.10

Summary of Decision Requested: Delete Rule 14.12.1 P4(e) Permitted Activities.
AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Concerned at traffic generation threshold allowable for Light Industrial Zone (Maximum 250 per day and no more than 15% of these heavy vehicle).
- The Industrial zones are characterised by heavy vehicle movements and to limit these to only 15% of the trip generations unnecessarily restrictive on industrial operations.
- The objectives and policies in Chapter 6.5 do not support this restriction on transportation.

Point Number 766.11

Summary of Decision Requested: Add the following activities as a minimum to Rule 20.1.1 Permitted Activities:

(a) Hire Centers

(b) Wholesale

(c) Trade Supply Outlet

(d) Transport depot

(e) Garden Centers

(f) Retailing of agricultural and industrial motor vehicles and machinery

(g) Processing, storage, distribution and sale (wholesale or retail) of aggregates

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Under the Proposed District Plan there is no activity distinction between those activities provide for in the Heavy Industrial Zone and the Industrial Zone whereby the listed permitted activities are the same.
- This is inconsistent with Policy 4.6.2 which seeks to provide for different functions within the zones but also a 'range of activities,' as the range of permitted activities is too constrained and does not take into account activities which are more land intrusive and of lower amenity value, which should be located in a Industrial Zone rather than the Business Zone.
- The area of Business Zoned land nearby in the vicinity of Pokeno is very limited and in close proximity to more services areas (i.e. residential).
- Activities could reasonably locate in an Industrial Zone and not be incompatible with surrounding activities.
- As they are not considered under P1-P6 they would default to Non-Complying (NC1).

Point Number 766.12

Summary of Decision Requested: Delete any restriction on gross floor area in Rule 20.1.1- Permitted Activities.

AND

Amend Rule 20.1.1 Permitted Activities to allow for any office which is ancillary to a permitted activity.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- There is no reason to arbitrary restrict offices associated with permitted activities where these support the efficient and effective operation of a permitted activity.

Point Number 766.13

Summary of Decision Requested: Add a new permitted activity to Rule 20.1.1 Permitted Activities as follows:

The construction of a building for any permitted activity, (which complies with the development controls).

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Activity status of building is unclear.
- The Amendment is needed to clarify activity status.

Point Number 766.14

Summary of Decision Requested: Delete Rule 20.2.1 Servicing and hours.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- This control is without precedent and represents a restrictive and inappropriate regime.

Point Number	766.15
Summary of Decision Requested:	Amend Rule 20.2.2 Landscape planting by modifying the Controlled Activity requirement for landscape planting to be a Permitted Activity instead. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> This control is without precedent and represents a restrictive and inappropriate regime.
Point Number	766.16
Summary of Decision Requested:	Delete Rule 20.2.2 C1(b) in its entirety. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> This control creates a mandatory requirement for planting of streams irrespective of what the proposal is (e.g. carpark shortfall) and without any consideration of costs associated.
Point Number	766.17
Summary of Decision Requested:	Retain Rule 20.2.3 Noise as notified.
Decision Reasons:	<ul style="list-style-type: none"> The control is appropriate in managing effects between zones.
Point Number	766.18
Summary of Decision Requested:	Amend Rule 20.2.4 Glare and Artificial Light Spill to insert an exclusion so that the rule does not apply between sites in the Industrial Zones. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> Rules should only apply to sites adjoining a residential, reserve or countryside living zone and should not be applicable between Industrial sites.
Point Number	766.19
Summary of Decision Requested:	Retain the Earthworks standards in Rule 20.2.5.1 Earthworks - General as notified.
Decision Reasons:	<ul style="list-style-type: none"> The control is appropriate in managing effects.
Point Number	766.20
Summary of Decision Requested:	Amend Rule 20.2.7.1 P2(a) Signs- General by inserting clarification that (a) applies to free standing signs only. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> There is no valid reason to restrict signage of buildings to the criteria in (a).
Point Number	766.21
Summary of Decision Requested:	Amend Rule 20.2.7.1 P2 Signs- General by increasing the signage rules to allow for at least 10m2 per site. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The signage rules are unnecessarily restrictive in terms of free standing sign size being limited to one sign per site at 3m2. Does not take into account the use of a site for more than 1 activity. Combined with the allowance for all other signs to be 1m2 would create more visual clutter than allowing a larger free standing sign in the first instance.
Point Number	766.22
Summary of Decision Requested:	Amend Rule 20.2.7.1 Signs- General so that Signs are excluded from yard setbacks. AND Amend Rule 20.3.3 Daylight admission to exclude signs, if the amendments sought on Daylight Admission are not granted. OR Amend the definition of "Building" in Chapter 13 Definitions to exclude free-standing signs. AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Without the proposed exclusions, signs will not be easily visible from road as they would be classified as a "building" creating significant costs of compliance to achieve signage for site identification purposes.

Point Number 766.23

Summary of Decision Requested: Amend Rule 20.2.7.2 Signs-Effects on traffic to specify that the Rule does not apply to site identification signs.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- It is unclear what is meant by "any sign directed at road users" as arguably any sign for identification of a business could be deemed to be directed at a road user, however effects associated with identification signs are already managed by rule 20.2.7.1.

Point Number 766.24

Summary of Decision Requested: Delete Rule 20.2.8 PI (a)(iv) Outdoor storage of goods or materials.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Opposes any restriction on the percentage of the site allowable to be used for storage.
- Should be deleted as storage activities are permitted.
- Any associated visual effects with outdoor storage are already mitigated by maximum height, set back and screening requirements contained in this rule.

Point Number 766.25

Summary of Decision Requested: Retain 15m as the maximum height or greater in Rule 20.3.1 Building height.

Decision Reasons:

- A height of 15m is similar to that which has already started to develop/establish in the Pokeno Light Industrial 2 Zone, and there is no reason for this height to be decreased.

Point Number 766.26

Summary of Decision Requested: Amend Rule 20.3.3 Daylight Admission to increase the height from 2.5m to 3m.

AND

Amend Rule 20.3.3 Daylight Admission to specifically exclude roads from any daylight admission plane.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- There is no justification to reduce the height to boundary recession plane, to a height which is lower than the previous Franklin provisions when the maximum heights have been kept the same.
- There is no reason to apply a daylight recession plane against roads in Industrial Zones as these areas are generally of a lower amenity and have less pedestrian traffic.

Point Number 766.27

Summary of Decision Requested: Retain Rule 20.3.4.1 PI (a)(i) Building setbacks, which should not be increased.

OR

Amend Rule 20.3.4.1 PI (a)(i) Building setbacks to be less than 5m.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- A front yard setback of 5m is similar to that which has already started to develop/establish in the Pokeno Light Industrial 2 Zone, and there is no reason for setback to be increased.
- Submitter would support a decrease in setback.

Point Number 766.28

Summary of Decision Requested: Retain Rule 20.3.4.1 PI (a)(ii) Building setbacks so that the setback requirement does not apply to boundaries of other Industrial Zone sites.

Decision Reasons:

- Submitter supports provisions for side yards to only apply to zones other than Industrial and Heavy Industrial Zones.
- This is consistent with daylight provisions which also do not apply to adjoining industrial zoned sites.

Point Number 766.29

Summary of Decision Requested: Amend Rule 20.3.4.1 PI (a)(ii) Building setbacks to reduce the setback between sites with other zones to 3m.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- There is no justification to increase the yard setbacks between the Industrial Zones and other zones to 7.5m, when previous Franklin provisions were more permissive.
- The 3m landscape buffer is sufficient and therefore there is no reason to have an additional 4.5m building setback.

Point Number 766.30

Summary of Decision Requested: **Retain** Rule 20.4.1 RD1(a)(i) General subdivision requiring new lots to have a minimum net site area of 1000m2
OR
Amend Rule 20.4.1 RD1(a)(i) General subdivision to have a minimum net site area of less than 1000m2
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Proposed lot sizes are considered an efficient use of land for industrial activities.
- Submitter would also support a decrease in minimum area and average.

Point Number 766.31

Summary of Decision Requested: **Retain** Rule 20.4.1 RD1(a)(ii) general subdivision requiring new lots to have an average area of at least 2000m2
OR
Amend Rule 20.4.1 RD1(a)(ii) General subdivision to have an average lot size of less than 2000m2.
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Proposed lot sizes are considered an efficient use of land for industrial activities.
- Submitter would also support a decrease in minimum area and average.

Point Number 766.32

Summary of Decision Requested: **Retain** the Industrial Zoning of the property at 611 Ridge Road, Bombay as notified (see submission for map of site).

Decision Reasons:

- The Proposed Industrial Zone best recognises the best development potential for the site, once aggregate resource is depleted and quarrying activities cease.
- The Zoning recognises the ability of the site to provide for Industrial activities and future ongoing needs of Waikato District to support economic growth and employment.

Point Number 766.33

Summary of Decision Requested: **Delete** the Aggregate Extraction Area Overlay once quarrying activities have ceased, including the site at 611 Ridge Road, Bombay.
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The Overlay affects future subdivision/building platforms only within the vicinity of the overlay and is not associated with any more enabling provisions for extraction itself.
- Overlay applies to part Waikato Pit, which has currently ceased extraction.
- Submitter is in the process of winding down aggregate extraction on its landholdings and is moving towards rehabilitation, therefore it is requested that the Aggregate Extraction Area is 'lifted' or no longer applies once extraction activities cease to ensure future activities are not unnecessarily restricted by the overlay.

Point Number 766.34

Summary of Decision Requested: **Retain** Objective 4.6.1 Economic growth of industry insofar as it gives effect to the relief sought.

Decision Reasons:

- Submitter supports objective to the extent that its land retains proposed Industrial Zone.
- Land Use provisions are missing the enabling provisions to support economic growth.

Point Number 766.35

Summary of Decision Requested: **Retain** Policy 4.6.2 Provide Industrial Zones with different functions insofar as it gives effect to the relief sought.

Decision Reasons:

- Submitter supports intention of the policy to enable a range of activities however this is not reflected in the Land Use provisions.
- Supports the policy insofar as it gives effect to the relief sought.

Point Number 766.36

Summary of Decision Requested: **Retain** Policy 4.6.3 Maintain a sufficient supply of industrial land as notified insofar as it gives effect to the relief sought.

Decision Reasons:

- Submitter supports intention of the policy to enable a sufficient supply of Industrial Zoned land.
- Support the policy insofar as it gives effect to the relief sought.

Point Number 766.37

Summary of Decision Requested:	Retain Policy 4.6.4 Maintain industrial land for industrial purposes as notified insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports the intention of the policy to enable ancillary activities related to industrial activities, however this is not reflected in land use provisions. • Support the policy insofar as it gives effect to the relief sought.
Point Number	766.38
Summary of Decision Requested:	Retain Policy 4.6.5 Recognition of industrial activities outside of urban areas as notified insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports intention of policy to recognise and provide for existing industrial activities, however this is not reflected in land use provisions. • Support the policy insofar as it gives effect to the relief sought.
Point Number	766.39
Summary of Decision Requested:	Retain Objective 4.6.6 Manage adverse effects as notified insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> • Submission supports the intention of the objective to manage adverse effects on sensitive activities in other zones and ecosystems; however, the provisions are unnecessarily restrictive and could be modified as per the submitter's relief to achieve the same outcome.
Point Number	766.40
Summary of Decision Requested:	Retain Policy 4.6.7 Management of adverse effects within industrial zones insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports the intention of this objective to manage adverse effects on sensitive activities in other zones and ecosystems, however provisions are unnecessarily restrictive and could be modified as per the submitter's relief to achieve the same outcome.
Point Number	766.41
Summary of Decision Requested:	Amend Policy 4.7.2 Subdivision location and design to provide an exclusion for Industrial Zones. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • The features of Policy 4.7.2 are unnecessarily restrictive for industrial development. • Industrial areas are generally of a lower amenity than town centre/residential areas, and subject to less pedestrian thoroughfare, therefore there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.
Point Number	766.42
Summary of Decision Requested:	Amend Policy 4.7.5 Servicing requirements to provide an exclusion for Industrial Zones for provision of cycle ways/pedestrian connections. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • As Industrial areas are subject to less pedestrian thoroughfare/recreational cyclist facilities, there is no reason to require industrial areas to adhere to same amenity standards as residential and higher amenity zones.
Point Number	766.43
Summary of Decision Requested:	Retain Policy 4.7.7(a) Achieving sufficient development density to support the provision of infrastructure services, to the extent that the industrial lot sizes are retained or reduced.
Decision Reasons:	<ul style="list-style-type: none"> • Policy 4.7.7(a) supports maximising yield for subdivision, of which submitter supports to the extent industrial lot sizes are retained or reduced. • Proposed lot sizes are considered as a minimum for the efficient use of land designated for industrial activities, whilst enabling provision for industrial subdivision. • The Policy in its current form would also support a reduction in the average or minimum lot size.
Point Number	766.44
Summary of Decision Requested:	Amend Policy 4.7.9 Connected neighborhoods to provide an exclusion for Industrial zones for provision of cycle ways/pedestrian connections. AND Any additional or consequential relief to give effect to the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.
Point Number	766.45
Summary of Decision Requested:	Amend Policy 4.7.10 Recreation and access to provide an exclusion for Industrial zones for provision of cycle ways/pedestrian connections.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian thoroughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 766.46

Summary of Decision Requested: Retain Objective 6.2.1 National Grid insofar as it gives effect to the relief sought.

Decision Reasons:

- Submitter supports the intention of the objective to recognise and provide for protection of the National Grid.
- Provisions relating to the National Grid yard are too restrictive and should be amended as per relief sought to Chapter 14.4 provisions.

Point Number 766.47

Summary of Decision Requested: Retain Policy 6.2.2- Recognise the national grid insofar it give effects to submitters relief sought.

Decision Reasons:

- Submitter supports intention of policy to recognize and provide for protection of the National Grid.
- Provisions relating to National Grid yard are too restrictive and should be amended as per the relief sought under Chapter 14.4 provisions.

Point Number 766.48

Summary of Decision Requested: Retain Policy 6.2.3 Operation and development of the National grid insofar as it give effect to the submitters relief sought.

Decision Reasons:

- Submitter supports the intention of the objective to recognise and provide for protection of the National Grid.
- Provisions relating to the National Grid yard are too restrictive and should be amended as per relief sought to Chapter 14.4 provisions.

Point Number 766.49

Summary of Decision Requested: Retain Policy 6.2.4 Maintenance and minor upgrade the National Grid insofar as it gives effect to the submitters relief sought.

Decision Reasons:

- Submitter supports the intention of the objective to recognise and provide for protection of the National Grid.
- Provisions relating to the National Grid yard are too restrictive and should be amended as per relief sought to Chapter 14.4 provisions.

Point Number 766.50

Summary of Decision Requested: Delete Rule 20.4.1 RDI (a)(iii) General subdivision requiring no more than 20% rear lots to be created.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- The 20% restriction on rear sites creation results in inefficiencies of land resources, which are already scarce, as it will significantly reduce the amount of land available for industrial activities.
- These areas are generally of a lower amenity than town centre/residential areas and subject to less pedestrian thoroughfare therefore there is no reason for such restrictions.

Point Number 766.51

Summary of Decision Requested: Delete Rule 22.3.6 Building Coverage.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- A restriction on building coverage and particularly one as low as the proposed 500m2 is not consistent with a working rural environment, requiring storage shed, hay barns etc.

Point Number 766.52

Summary of Decision Requested: Amend Rule 22.3.7 Building setbacks by reducing the yard separation between sites (other than a road) to 12m or less in all instances.

AND

Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Opposes yard setbacks (of up to 22m) as they are too onerous.
- Setbacks could be reduced and still achieve sufficient separation between activities and maintain an open landscape character.

Point Number 766.53

Summary of Decision Requested: Delete all references to the title date within Rules 22.4 Subdivision.
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- No justification to have an arbitrary title date for further subdivision or boundary adjustments.
- Potential fragmentation issues can be dealt via other less arbitrary mechanisms.

Point Number 766.54

Summary of Decision Requested: Delete Rule 22.4.1.1 Prohibited Subdivision.
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- Effects on soil classification can be managed in other ways (i.e. objectives and policies) which are far more consistent with an effects based approach to resource management.
- There should be no prohibited activity subdivisions.

Point Number 766.55

Summary of Decision Requested: Amend Rule 22.4.1.6 Conservation lot subdivision to take into account enhancement planting for the total area to be protected.
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- There is a significant environmental benefit to be obtained from enhancement planting, particularly to 'join up' areas of SEA (and other non-identified features).

Point Number 766.56

Summary of Decision Requested: No specific decision sought, but the submission expresses the following concerns with the Industrial Zone:

- The use of outdated Waikato Section controls in the former Franklin Section, and these are more conservative and less enabling than the provisions of the current Franklin Section.
- The proposed Industrial Zone is significantly more restrictive than the Light Industrial Zone being applied by Auckland Council in Pukekohe, Waiuku and Drury South.
- The proposed Industrial Zone is less enabling than the existing Operative Industrial Zones are applied at Tuakau and Pokeno.
- Rules are outdated and less effective and efficient when compared with Industrial Zones applying to the current Franklin Section and other Districts where industrial activities are enabled.

Decision Reasons:

- If the rules for development are too onerous, industrial development and hence employment will move to a more enabling Industrial Zone in Auckland or another region.
- Does not support economic development, employment and the provision of wellbeing in the Waikato District.
- Council is placing industrial zoned land at a competitive disadvantage when compared with Auckland.

Point Number 766.57

Summary of Decision Requested: Amend the proposed provisions be amended to address the concerns set out in the submission to ensure on-going sustainable management of the Waikato District' natural and physical resources and thereby achieving the principles and purpose of the Resource Management Act.
AND
Any additional or consequential relief to give effect to the matters raised in the submission.

Decision Reasons:

- For those provisions of the Proposed Plan that the submitter opposes, those provisions require amendment, as per the relief sought in Attachment 1. This is because, without the amendments proposed by the submitter, the provisions:
- Will not promote sustainable management of resources,
- Will not Achieve the purpose of the RMA and are contrary to Part 2 and other provisions of the RMA;
- Will not enable the social and economic wellbeing of the community in the District;
- Will not sustain the potential of the physical resource represented by the submitter's assets in the District for the future;
- Are not adequate to protect and enable the submitter's operations in the District generally;
- Do not have sufficient regard to the efficient use and development of the submitter's assets and of those resources which are dependent on, or benefit from, the submitter's assets and operations; and
- Do not represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means, and do not discharge the Council's duty under section 32 of the RMA.

Submitter Number: 767 **Submitter:** Simon Clark

Point Number 767.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- No reasons provided.

Point Number 767.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- No reasons provided.

Submitter Number:	768	Submitter:	Don Jacobs
Point Number	768.1		
Summary of Decision Requested:	Amend the zoning of the entire property at 7 Uenuku Street, Ngaruawahia, to Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The current and proposed zoning of the site is inappropriate. • There is an opportunity to formalise the current stormwater drainage reserve and to accommodate residential land use such as that surrounding the property. As a result of the stormwater discharge on the site, oil, contaminants and debris from the road reserve has entered the land and prevented the use of the land for the grazing of livestock due to the risk of contaminant ingestion. • An appropriate engineering assessment has been undertaken and is attached as Attachment A to the submission. The engineering assessment concludes that the site is suitable to contain residential land use activities. • The rezoning of the site to Residential Zone would integrate the land with the surrounding residential character. • A conceptual land use development plan has been undertaken and is attached to the submission. The plan shows potential transportation linkages and functionality with the wider Residential Zone as well as formalisation of the drainage reserve. • An assessment of the Proposed Waikato District Plan objectives and policies for the proposed rezoning shows that it is not contrary to them. The assessment is contained within the submission. • Will provide for new warm, dry and affordable housing. • Property has been used as a wreckers previously but this will be remediated with residential development and thus contribute to a better residential character and amenity that matches the surrounding residential area. • The Proposed Waikato District Plan process acts as an appropriate mechanism to notify the local community in advance. • Consultation has been undertaken with KiwiRail and is attached to the submission as Attachment C. • The request is not out of scope for the Proposed District Plan. • The residential land use and storm water Management purposes will not be contrary to the Objectives and Policies of the District Plan. • The matters arising from reverse sensitivity and the operation of the section of Kiwi Rail NIMT rail corridor do not prevent residential use of the subject property. 		
Point Number	768.2		
Summary of Decision Requested:	No specific decision sought, but submission supports the intent of the supporting information behind residential plan change density in the Proposed Waikato District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		
Point Number	768.3		
Summary of Decision Requested:	No specific decision sought, but the submission objects to the current location, allocation and distribution of the district's residential zones as proposed in the Proposed Waikato District Plan.		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		

Submitter Number:	769	Submitter:	Tamahere Eventide Trust
On behalf of:	Tamahere Eventide Retirement Village		
Point Number	769.1		
Summary of Decision Requested:	<p>Amend the zoning of Atawhai Assisi at 158 Matangi Road (Lot 1 DPS 21156, CTS20A/1259) from Rural Zone to Country Living Zone.</p> <p>AND</p> <p>Amend the zoning of 168 Matangi Road (Lot DPS 6744 and Part Allotment 54 Parish of Tamahere (CT SA3A/912) from the Rural to Country Living Zone.</p> <p>AND</p> <p>Amend the zoning of 174 Matangi Road (Section 1 Survey Office Plan 457326 CT 610816) from Rural Zone to Country Living zone.</p> <p>AND</p> <p>No specific decision sought, but submission opposes the Rural policy overlays/areas for the Atawhai Assisi property and the two adjoining properties.</p> <p>AND</p> <p>Amend the Proposed District Plan to make consequential amendments to give effect to the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Tamahere Eventide Home Trust oppose both the rural zoning and Rural Policy overlays/areas proposed for Atawhai Assisi site (Designation NZ (Airways Corporation of NZ Limited), Airport Obstacle Limitation Surface, Rural SNA, Designation J17 to east of Assisi site). • Land in the immediate surrounding area is zoned Country Living Zone. • All land on western side of Designation J17 (Waikato Expressway) and southern side of Matangi Road should be zoned Country Living. • Country Living Zone is more appropriate for the following reasons: <ol style="list-style-type: none"> 1. It is more appropriate for existing land use activities and density of Atawhai development than rural zoning. 2. More compatible with zoning in immediate surrounding area (to west and south). 3. Rural Zone doesn't include any provisions for Retirement villages, whereas Country Living zone does. 4. It is more consistent with Country Living zoning at TEH's other retirement village nearby (Tamahere Eventide). • Extending the Country Living zone boundary to align with Waikato Expressway designation to the east and Matangi Road to north considered a practical and logical expansion of zone boundary. • Waikato Expressway and Matangi Road form a suitable zone boundary between Country Living and Rural zones. • Abutting property east of main Atawhai Site (158 Matangi Road) also zoned rural. • Tamahere Eventide Home Trust (TEH) oppose both the rural zoning and Rural Policy overlays/areas proposed for Atawhai Assisi site (Designation NZ (Airways Corporation of NZ Limited), Airport Obstacle Limitation Surface, Rural SNA, Designation J17 (NZTA)). • Land in the immediate surrounding area (i.e. West and South of Atawhai Assisi) all zoned Country Living. • All land on Western side of Designation J17 and Southern side of Matangi Road should be zoned Country Living. • Country Living zone more appropriate as it is a small title and therefore not suitable for future rural development and zoning. 		

- Extending Country Living zone boundary to align with Waikato Expressway Designation boundary to the east and Matangi Road to the North considered a practical and logical expansion of zone boundary.
- Waikato Expressway and Matangi Road form a suitable zone boundary.

Point Number 769.2

Summary of Decision Requested: **Delete** all references to Designation NI Airways Corporation of NZ Ltd insofar as it relates to the Atawhai Assisi site at 158 Matangi Road, Tamahere (Lot 1 DPS 21156, CTSA20A/1259) from Section E Designations and the Planning Maps.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- There should be no designations on 158 Matangi Road.
- Submitter opposes identification of airport related Designation (NI) on the Atawhai Assisi site.
- The Airport related designation is not relevant to subject property utilised as existing Retirement Village activities.
- The property at 158 Matangi Road utilised is a private retirement village and therefore doesn't form part of the airport runway for Hamilton Airport, nor has the property been designated for any other purpose.
- The notation appears to be an error on Councils part.

Point Number 769.3

Summary of Decision Requested: **Amend** the Country Living Zone provisions in Chapter 23 to include specific provisions for existing and future Retirement Village activities and expansion at Atawhai Assisi (if the request to rezone the sites is accepted).

OR

Amend the Rural Zone provisions in Chapter 22 to include specific provisions for existing and future Retirement Village activities and expansion at Atawhai Assisi (if the request to rezone the sites is rejected).

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The submitter has limited scope of this submission point to their existing (and future) retirement village activities at the property located at 158 Matangi Road (Lot 1 DPS 21156, CTSA20A/1259).
- If the request to rezone the sites is accepted, the submitter will have no further submissions with respect to Chapter 22 of the Proposed District Plan because they would no longer be applicable to Atawhai Assisi. Instead Chapter 23 provisions would apply.
- If Council does not accept the rezoning request the submitter requests that Rural Zone provisions are amended to also address those points/matters relating to the Country Living Zone.
- Similar amendments would be required to the Rural Zone provisions to include suitable provisions for existing Retirement Village activities at the existing Atawhai Assisi site.

Point Number 769.4

Summary of Decision Requested: **Add** a new activity rule to Rule 23.1.1 Permitted Activities as follows:

P5. A retirement village including alterations and expansions at Atawhai Assisi.

AND

Add activity specific conditions for the new Rule 23.1.1 P5 as follows:

Any additions or expansion at the Atawhai Assisi Retirement village

(a) Minimum living court or balcony area and dimensions;

(iv) Apartment- 10m² area within minimum dimension horizontal and vertical of 2.5m;

(v) Studio unit or 1 bedroom unit- 12.5m² area with minimum dimension horizontal and vertical of 2.5m; or

(vi) 2 or more bedroomed unit- 15m² area with minimum dimension horizontal and vertical of 2.5m;

(b) Minimum service court is either:

(iii) Apartment- communal outdoor space (i.e. no individual service courts required); or

(iv) All other units- 10m² for each unit;

(c) Building height does not exceed 8m, except for 15% of the total building coverage, where buildings may be up to 10m high;

(d) Building setbacks- a 7.5m setback is required from a local road, and 12m setback is required from all other boundaries; except internal site boundaries where no setback shall apply. A 12m setback is required from the Waikato Expressway.

(e) The following Land Use- Effects rule in Rule 23.2 do not apply;

i. Rule 23.2.6 (Signs-General);

ii. Rule 23.2.6.2 (Signs- effects on traffic);

(f) The following Land Use- Building rules in Rule 23.3 do not apply;

i. Rule 23.3.1 (Dwelling);

ii. Rule 23.3.4.1 (Height- Building General);

iii. 23.3.5 Daylight Admission

iv. 23.3.6 Building Coverage

v. Rule 23.3.7.1 Building Setbacks- all boundaries

vi. Rule 23.3.7.2 Building Setback- Sensitive land use

(g) The following Infrastructure and Energy Rule in Chapter 14 does not apply;

i. Rule 14.12.1 P4(10), (a) Traffic Generation

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Retirement village is specifically identified as a Non-Complying activity in the Country Living Zone.
- The submitter seeks to retain existing permitted activity status for a retirement village activity, including any future alterations or expansion at Atawhai Assisi and include site specific standard for retirement village activities for Atawhai Assisi.
- Adoption of zone wide provisions for retirement villages provides appropriate certainty and guidance for those establishing new retirement developments, however it doesn't recognize/protect existing developments.
- The Proposed District Plan does not differentiate between establishment of a 'new' and 'existing' retirement village and/or minor alterations.

- Minor alterations/extensions would require resource consent as a non-complying activity.
- The Permitted Activity Table in Rule 23.1.1 requires amending to include activity specific conditions for a retirement village.
- While the Residential Zone rules contain activity specific standards for a retirement village, there are no equivalent rules for the Country Living Zone.

Point Number 769.5

Summary of Decision Requested: **Add** a new restricted discretionary rule into Rule 23.1 Land Use Activities as follows:

(g) RD1 The following Retirement Village Activities are Restricted Discretionary in the Country Living Zone

1. *A new retirement village;*
2. *Alterations to existing retirement villages (excluding Atawhai Assisi);*
3. *Alterations to Atawhai Assisi that do not comply with the Activity Specific Conditions in Rule 23.1.1*

Decision Reasons:

- A restricted discretionary activity is considered appropriate for the three activities.
- Activity tables in Chapter 23: Country Living Zone do not include any provisions for Restricted Discretionary Activities.

Point Number 769.6

Summary of Decision Requested: **Delete** Rule 23.1.3 NC3- Non-Complying Activities.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The submitter opposes non-complying activity status in Rule NC3 for a "retirement village" in the Country Living Zone.
- Existing Retirement Village and Hospital Activities at Atawhai Assisi are well established and provide an essential service to the local community.
- Non-complying activity status for any future additions, redevelopment or expansion is also opposed.
- The activities associated with retirement villages are sought by the submission to become permitted or restricted discretionary activities.

Point Number 769.7

Summary of Decision Requested: **Amend** Signs Rule 23.2.6 so that signage provisions in Rules 23.2.6.1- General and 23.3.6.2- Effects on Traffic don't apply to a retirement village as follows:

(3) Rules 23.2.6.1 and 23.2.6.2 do not apply to a retirement village.

OR

Add a new row to Rule 23.2.6.1 Signs General as follows:

(x) Rules P1, P2, P3 and RD1 above do not apply to a retirement village.

AND

Add a new row to Rule 23.2.6.2 Signs- effects on traffic as follows:

(x) Rules P1, P2, P3 and RD1 above do not apply to a retirement village.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Rules relating to signage should not be applicable to Atawhai Assisi.
- Signage forms an integral part of a retirement village development and is necessary to clearly identify the various buildings, facilities and car parking areas.
- Private internal roads are often sign posted with signage that imitates traffic signs.

Point Number 769.8

Summary of Decision Requested: **Amend** Building Rule 23.3.4.1-Height - Building General so that it does not apply to Atawhai Assisi.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The submitter opposes 7.5 maximum height (7.5m) proposed under Rule 23.2.4.1 P1.
- Should not be applicable to a retirement village development.
- Modern retirement village developments typically comprise of multi-level buildings that are often greater than 7.5m in height.
- Retirement village sites are of sufficient size and area so that buildings higher than 7.5m can be appropriately positioned within the site to comply with building setback and height to boundary requirements.
- Height rule proposed for in 16.1.2 P3 (f) should also apply to retirement villages in the Country Living Zone.
- An alternative height is proposed as an activity specific condition elsewhere in the submission.

Point Number 769.9

Summary of Decision Requested: **Retain** Rule 23.3.5 P1 Daylight admission, except for amendments sought below

AND

Amend Rule 23.3.5- Daylight admission so that it only applies to the external boundaries of Atawhai Assisi, not the internal boundaries between the individual certificates of title.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Retention of existing height-boundary provision (37 degrees at 2.5m above ground level) is supported.
- Existing rest home and retirement village development at Atawhai Assisi currently comprises of a single certificate of title, however the site may be expanded in future.

- In order to future proof the site, height-boundary requirement should only be applicable to the external boundaries of the retirement village.

Point Number 769.10

Summary of Decision Requested: **Retain** Policy 5.6.4- Building setbacks.

Decision Reasons:

- The submitter supports Policy 5.6.4 insofar as it seeks to maintain the existing spaciousness between adjoining sites.
- The approach is consistent with submission in relation to Rule 23.3.7 elsewhere in the submission.

Point Number 769.11

Summary of Decision Requested: **Amend** Policy 5.6.5- Scale and intensity of development to include the additional wording as follows:

Except where such development correlates to existing site development.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Amendments are required to Policy 5.6.5 so that it does not apply to existing development or an existing Retirement Village.

Point Number 769.12

Summary of Decision Requested: **Add** a new Policy to Section 5.6 Country Living Zone for Atawhai Assisi as follows:

Policy 5.6.8 (g); Atawhai Assisi

(g) Permit additions and expansions at Atawhai Assisi where they:

(i) Have a functional need to locate within the Country Living Zone; and

(ii) Provide for the health and well-being of the community.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The intent of current Country Living Zone Policy 5.6.8- Non-residential activities is also applicable to Atawhai Assisi Retirement, but would not apply because a Retirement Village is not considered a 'non-residential activity.'

Point Number 769.13

Summary of Decision Requested: **Add** a new Policy to Section 5.6 Country Living Zone as follows:

Policy 5.6.9 (g); Atawhai Assisi

(g) Enable the existing Atawhai Assisi activities to continue and support their redevelopment and expansion, provided they do not have a significant adverse effect on the character and amenity of the Country Living Zone.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The intent of Country Living Zone Policy 5.6.9- Existing non-residential activities is also applicable to Atawhai Assisi Retirement Village, but would not apply because it is not considered a 'non-residential activity.'

Point Number 769.14

Summary of Decision Requested: **Amend** the definition of "Residential Activity" in Chapter 13: Definitions to specifically include, and refer to, a retirement village.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- A retirement village is clearly a residential activity and should be expressly stated within the definition.

Point Number 769.15

Summary of Decision Requested: **Delete** the definition of "Rest home" from Chapter 13: Definitions.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- There are no rules relating to Rest home definition.
- There is no reason to differentiate between a "retirement village" and "rest home."

Point Number 769.16

Summary of Decision Requested: **Retain** the definition of "Retirement Village" definition in Chapter 13: Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number 769.17

Summary of Decision Requested: **Delete** the following parking standards from Table 14.12.5.7- Required parking spaces and loading bays:

- Retirement Village: 1 car space per dwelling or unit.
- Housing for the elderly/residential care: 1 car space per 4 occupants.
- Hospital or care facilities associated with retirement village: 2 car spaces per 3 patients accommodated plus 1 per 2 full time staff equivalents.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The provisions are confusing as there are essentially 3 different standards for the same activity and all 3 could be applied to existing retirement village activities at Atawhai Assisi.
- The District Plan doesn't need to differentiate between the specified activities.

Point Number 769.18

Summary of Decision Requested: **Add** a parking standard for Table 14.12.5.7- Required parking space and loading bays as follows:

- Retirement Village: 1 car space per 4 occupants.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- A single standard for a retirement village would suffice.
- A single car parking standard should apply to the overall site, as opposed to different car parking requirements for each of the retirement village related activities.

Point Number 769.19

Summary of Decision Requested: **Retain** Rule 23.3.5 RD1-Daylight admission.

Decision Reasons:

- Restricted Discretionary Activity Status is supported.

Point Number 769.20

Summary of Decision Requested: **Amend** Rule 23.3.6 P1- Building coverage so that the building coverage requirements do not apply to Atawhai Assisi.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Rule relating to building coverage in Rule 23.3.6 P1 should not be applicable to Atawhai Assisi.
- Larger sized buildings (greater than 300m²) form an integral part of a retirement village development and are necessary to accommodate the shared services and specialised medical facilities essential for a retirement village.
- The submitter is opposed to any restrictions regarding building coverage for Atawhai Assisi.

Point Number 769.21

Summary of Decision Requested: **Amend** Rule 23.3.7.1- Building setbacks - All boundaries so that the building set back requirements do not apply to Atawhai Assisi.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Setbacks should only apply to a external boundaries, not internal boundaries between individual certificates of title.
- While the existing retirement village currently comprises of a single certificate of title, this could change in the future (either by subdividing the existing site or acquiring additional land in the future).
- Alternate setback standards are sought as an activity specific condition elsewhere in the submission.

Point Number 769.22

Summary of Decision Requested: **Amend** Objective 5.6.1 (a)- Country Living Zone to recognise character and abutting character/amenity, not just amenity and character of the zone.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- The character of existing retirement village activities at Atawhai Assisi should be considered.

Point Number 769.23

Summary of Decision Requested: **Amend** Policy 5.6.2 (a)- Country Living Character as follows:

(a)Any building and activity within the Country Living Zone are designed, located, scaled and serviced in a manner that does not detract from the character of the area by:

(i)Maintaining the existing open space character;

(ii)Maintaining existing low density residential development;

(iii)Recognising the absence of Council wastewater services and lower levels of other infrastructure.

(b)Maintain existing views and vistas of the rural hinterland beyond, including, where applicable, Waikato River, wetlands, lakes, and the coast.

(c) Maintain existing road pattern that follows the natural contour of the landform.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission.

Decision Reasons:

- Amendments required to wording of Policy 5.6.2 to also recognise the existing open space and development.

Submitter Number: 770 **Submitter:** Gordon Sanders

Point Number 770.1

Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Te Kowhai Aerodrome provides a safe emergency landing option, convenient refueling place, recreation and educational resources, safe training airfield.
- Development as a residential airpark would provide a valuable community amenity similar to popular overseas developments, create additional income for local businesses and rates for Council and show that the district is concentrating on increasing quality of life.

Point Number 770.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Te Kowhai Aerodrome provides a safe emergency landing option, convenient refueling place, recreation and educational resources, safe training airfield.
- Development as a residential airpark would provide a valuable community amenity similar to popular overseas developments, create additional income for local businesses and rates for Council and show that the district is concentrating on increasing quality of life.

Submitter Number: 771 **Submitter:** Alison Brown

Organisation: Bathurst Resources Ltd and BT Mining Ltd

Point Number 771.1

Summary of Decision Requested: **Retain** the continued recognition of existing coal mining operations in the Proposed District Plan.

AND

Amend the Proposed District Plan to provide for the continuation of existing coal mine operations.

AND

Any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- While coal is a transitional fuel source, it is an essential ingredient of the steel making process.
- There is no reason why coal should not be productively mined for the next 20-30 years.
- The Proposed District Plan is unnecessarily pessimistic about the future of coal mining in the District.

Point Number 771.2

Summary of Decision Requested: **Amend** Section 1.4.2.3 (viii) Challenges as follows:

(a) Economic development challenges facing the district are as follows:

...

(viii) A perceived decline in the mining sector which needs to be addressed by making provision for existing mining activities to expand into areas outside the existing Coal Mining and Aggregate Extraction Areas while addressing with coal resources in particular becoming increasingly difficult and expensive to access, as well as public concerns about the ground environmental impacts of coal and mineral mining in the region, are a concern, considering its share of the district's GDP.

AND

Any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Rotowaro coalfield is currently subject to exploration permits held by BT Mining Ltd and where the resource is currently drilled.
- The submitter does not accept that there is a decline in the coal mining sector and provided no absolute barriers are put in the way, the submitter expects to be able to continue to economically mine coal in the district.
- The past record of rehabilitation of areas subject to coal mining shows that it is a transitory activity on the land, which can be returned to other productive uses post mining.
- The controls placed on coal mining through various permissions required, provide appropriate controls to ensure that effects on the environment are properly managed.

Point Number 771.3

Summary of Decision Requested: **Retain** Section 1.4.3(a) The Rural Environment as notified.

Decision Reasons:

- Supports the recognition of mineral resources in the rural areas, the need to site mining operations where the mineral resources are located.
- Supports the recognition of the fact that the introduction of other activities may have the potential to curtail these activities.

Point Number	771.4
Summary of Decision Requested:	Retain Section 1.4.3.1 Rural activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the recognition of mineral resources in the rural areas, the need to site mining operations where the mineral resources are located. • Supports the recognition of the fact that the introduction of other activities may have the potential to curtail these activities.
Point Number	771.5
Summary of Decision Requested:	Retain Section 1.4.3.2 Protecting the rural environment as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the recognition of mineral resources in the rural areas, the need to site mining operations where the mineral resources are located. • Supports the recognition of the fact that the introduction of other activities may have the potential to curtail these activities.
Point Number	771.6
Summary of Decision Requested:	<p>Amend Section 1.5.7.7 Energy as follows:</p> <p><i>(a) The district plan recognises the national and regional importance of existing energy resources and infrastructure, which include coalfields, coal mines, Huntly Power Station, gas, electricity transmission, and coal conveyance facilities, as well as renewable energy. The plan addresses the positive and adverse effects of energy infrastructure and development and makes provision for the continued supply of coal by recognising and making provision for future expansion of existing coal mines.</i></p> <p>AND</p> <p>Any consequential amendments necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • There should be adequate recognition in the Proposed District Plan for the expansion of existing coal mines into adjacent known coalfields. • Supports the recognition of existing coalfields and coalmines.
Point Number	771.7
Summary of Decision Requested:	<p>Delete the Significant Natural Area overlay from areas within the Rotowaro coal mining licence 37 355, ancillary coal mining licence 37 155/01, mining permit 60 422, exploration permits 40 698 and 56 220 and the extended Rotowaro coalfield areas.</p> <p>AND</p> <p>Any consequential amendments necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The identification of Significant Natural Areas within the areas, is not warranted. • These areas are already mined or consented to be mined and for other areas will have the effect of sterilising the future extraction of the coal resource.
Point Number	771.8
Summary of Decision Requested:	<p>Amend the Proposed District Plan to ensure that where an activity is regionally significant and cannot be located other than where it is proposed, provisions for offsets should be considered as mitigation for adverse effects on areas of Significant Natural Areas which cannot be avoided.</p> <p>AND</p> <p>Any consequential amendments necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Where there is a regionally significant mineral resource consideration of a significant natural area should be given to balancing the needs of the community by allowing offsets to mitigate the temporary effects of any mineral extraction.
Point Number	771.9
Summary of Decision Requested:	Retain Policy 4.7.1 (b) Reverse Sensitivity as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the recognition of reverse sensitivity issues.
Point Number	771.10
Summary of Decision Requested:	<p>Amend Policy 5.3.7(a)(iii) Reverse sensitivity effects as follows:</p> <p><i>(a) Recognise the following features are typical of the rural environment and the effects are accepted and able to be managed:</i></p> <p>....</p> <p><i>(iii) Existing mineral extraction and processing activities <u>and future extraction and processing activities within Coal Mining Resource Areas:</u></i></p> <p>AND</p> <p>Any consequential amendments necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Consider that this should not apply not only to existing coal mining operations but also to future coal mining operations, particularly within those areas identified as coal mining resource areas.
Point Number	771.11

Summary of Decision Requested: **Add** a new clause (iii) to Policy 5.4.2(b) Access to minerals and extractive industries as follows:

(b) Protect access to, and extraction of, mineral resources by:

...

(iii) Identifying the site of a potential coal extractive industry within the Coal Mining Resource Area on the planning maps.

AND

Add a definition for "Coal Mining Resource Area" to Chapter 13: Definitions as follows:

Coal Mining Resource Area means an area identified on the planning maps.

AND

Add a Coal Mining Resource Area Overlay to the Planning Maps to areas subject to significant coal deposits in the Waikato District and as a minimum this should cover the indicative Rotowaro Coalfield as attached in the original submission.

AND

Any consequential amendments necessary to give effect to Coal Mining Resource Areas.

Decision Reasons:

- To enable the continuation of coal mining in the district, it is appropriate to identify Coal Mining Resource Areas, as has been done for aggregates, to provide for future expansion of coal mining particularly into the Rotowaro coalfield.

Point Number 771.12

Summary of Decision Requested: **Delete** Rule 22.1.5 NC2 Non-Complying Activities, thus making all extractive industries in the Rural Zone a discretionary activity (Rule 22.1.5 D8 Discretionary Activities).

AND

Any consequential amendments necessary to address the matters raised in the submission.

Decision Reasons:

- Do not support the classification of extractive activities in the rural zone as non-complying activity.
- This would make all extractive industries in the Rural Zone discretionary as Rule 22.1.5 D8 Discretionary Activities.

Point Number 771.13

Summary of Decision Requested: **Add** provisions enabling exploration and prospecting in the Rural Zone as a permitted activity where effects are minor and restricted discretionary activity otherwise.

AND

Any consequential amendments necessary.

Decision Reasons:

- Prospecting and exploration are appropriately defined in the Proposed District Plan but do not appear to be any rules in the Rural Zone relating to these activities.

Point Number 771.14

Summary of Decision Requested: **Retain** Section 5.4 Minerals and extractive industries, except for the amendments sought elsewhere in the submission.

Decision Reasons:

- Supports the recognition of the importance of mining to the district (and indeed Waikato Region).
- To enable the continuation of coal mining in the district it is appropriate to identify Coal Mining Resource Areas, as has been done for aggregates, to provide for future expansion of coal mining particularly in the Rotowaro coalfield.

Submitter Number: 772 **Submitter:** The House Movers

Organisation: House Movers Section of New Zealand Heavy Haulage Association (Inc)

Point Number 772.1

Summary of Decision Requested: **Add** provisions including objectives, policies, rules, assessment criteria, definitions, methods and reasons to regulate the removal, re-siting and relocation of buildings;

AND

Add a rule which expressly providing for relocated buildings as a permitted activity in all zones subject to the following performance standards:

(i) compliance with the relevant standards for permitted activities in the District Plan;

(ii) Any relocated dwelling must have been previously designed, built and used as a dwelling;

(iii) A building inspection report shall accompany the building consent that identifies all reinstatement work required to the exterior of the building/dwelling (refer to Schedule 1 attached to the submission which provides an example of such a report);

(iv) The building shall be located on permanent foundations approved by building consent, no later than 2 months of the building being moved to the site;

(v) All work required to reinstate the exterior of any relocated building/dwelling, including the siting of the building/dwelling on permanent foundations, shall be completed within 12 months of the building being delivered to the site.

AND

Add a default rule for a restricted discretionary activity for non-compliance with performance standards, expressly provided for as a non-notification/non-service application. Assessment criteria (or similar) include:

(i) proposed landscaping

(ii) proposed timetable for completion of the work required to reinstate the exterior of the building and connections to services

(iii) the appearance of the building following reinstatement.

AND

Amend the Proposed District Plan to make consequential amendments to give effect to the submission, including definitions, objectives, policies, other matters and reasons to give appropriate recognition to the positive effects of removal, re-siting and relocation of dwellings.

Decision Reasons:

- A policy and rule framework is required that expressly provides for relocated buildings (including their removal and re-siting) as a permitted activity subject to performance standards in order to retain a degree of regulatory control and achieve, in the most appropriate way, the purpose of the RMA.
- The requested restricted discretionary activity default rule reflects the Environment Court's decision in *New Zealand Heavy Haulage Association Inc v The Central Otago District Council (C45/2004)* which held that there was no difference in effect and amenity value terms between the in situ construction of a new dwelling and relocation of a second-hand dwelling, subject to appropriate permitted activity performance standards.

Submitter Number: 773 **Submitter:** Michael Hayman

Point Number 773.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Te Kowhai Airpark would be a valuable asset for the community.

Point Number 773.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Te Kowhai Airpark would be a valuable asset for the community.

Submitter Number: 774 **Submitter:** Stuart Cummings

Organisation: Surrey Chambers

Point Number 774.1

Summary of Decision Requested: No specific decision sought, however the submission opposes the adoption of the identification of landscapes and natural character if that means that existing use rights regarding height and boundary are affected.

Decision Reasons:

- If this were allowed, it would amount to retrospective imposition of restrictions on property rights to the detriment of the previously uninformed owner. For example, if an existing height use is allowed to continue, these cannot logically be any increase in the "lost" amenity value or vision disturbance.

Point Number 774.2

Summary of Decision Requested: Amend the zoning of the property at 593A Wainui Road, Raglan, the other properties on the driveway and the adjacent properties in Earl's Place or between the subject property and Raglan Township from Rural Zone to Country Living Zone or a similar zone.

Decision Reasons:

- The site is characterised by 11 different structures and is not used for rural or agricultural purposes.
- There is nothing on the site or any of the other properties on Earl's Place that has anything to do with farming or agriculture.
- The current use of the subject site and the developments on it are inconsistent with the zoning of rural.
- The whole area is comparative to the surrounding land relatively intensely developed and not considered to be Rural.

Submitter Number: 775 **Submitter:** Sanderson Group Limited

Point Number 775.1

Summary of Decision Requested: Amend the activity status for retirement villages within the Rural Zone to a Discretionary Activity, rather than a Non-Complying Activity as currently provided for under Rule 22.1.5 Non-Complying Activities.

AND

Any further relief and/or amendments necessary to support the relief as set out in the submission.

Decision Reasons:

- The submitter has lodged a resource consent application with the Waikato District Council to establish and operate a retirement village at 650 Airport Road, 618 Airport Road, 608 Airport Road and 46 Tamahere Drive (LUC0023/19).
- The site is an ideal location for those who have lived in the rural environment and do not desire to live in an urban environment upon retirement.
- Consultation with surrounding landowners has been undertaken.
- The retirement village will be developed with minor and environmental effects.
- The aging population and concept of retirement villages is evolving, and this is recognised in the proposed retirement village.
- Retirement villages are currently a discretionary activity within the Operative District Plan and is a good fit for assessing proposed retirement villages.
- The objectives and policies for development in Rural Zones are similar in both the Operative and Proposed District Plans and therefore should retain the Discretionary activity status within the Proposed District Plan.
- The increasing importance of retirement villages supports the activity being recognised as a discretionary activity.

Submitter Number: 776 **Submitter:** GE Free Northland (in food & environment)

Point Number 776.1

Summary of Decision Requested: Add a resource management framework for the management of genetically modified organisms that is region specific, taking into account environmental, economic, cultural and social well-being considerations.

Decision Reasons:

- The requested framework of issues, objectives, policies, rules and methods is consistent with the sustainable management purpose and Part 2 of the Resource Management Act to manage the release, location and management of genetically modified organisms where they have the potential to adversely affect the environment and other land use activities. Refer to original submission for various hyperlinks to supporting documents.
- Wish to keep unwanted organisms out of Taitokerau and Auckland regions.
- There are potential risks posed by outdoor GE experiments, field trials or the release of GMOs into the environment.
- GMOs have the potential to adversely affect ecological, economic, and resource management, shared values, social, cultural well-being of all communities.

Point Number 776.2

Summary of Decision Requested: Add strong precautionary and prohibitive provisions, policies and rules relating to genetically modified organisms that are aligned with those in the Far North District Plan, the Whangarei District Plan, the Auckland Unitary Plan and Northland Regional Policy Statement.

Decision Reasons:

- The requested framework of issues, objectives, policies, rules and methods is consistent with the sustainable management purpose and Part 2 of the Resource Management Act to manage the release, location and management of genetically modified organisms where they have the potential to adversely affect the environment and other land use activities. Refer to original submission for various hyperlinks to supporting documents.
- Wish to keep unwanted organisms out of Taitokerau and Auckland regions.
- There are potential risks posed by outdoor GE experiments, field trials or the release of GMOs into the environment.
- GMOs have the potential to adversely affect ecological, economic, and resource management, shared values, social, cultural well-being of all communities.

Submitter Number: 777 **Submitter:** Radio New Zealand Limited

Point Number 777.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, especially Objective 5.1.1 (a)(iii), except for the amendments sought below;
AND
Amend 5.1.1 Objective - The rural environment as follows:
Subdivision, use and development is provided for within the rural environment where:
...

Decision Reasons:

- Supports the policy.
- The requested text results in this objective being expressed more clearly.

Point Number 777.2

Summary of Decision Requested: Retain Policy 5.3.4(a) Density of dwelling and buildings within the rural environment, as notified.

Decision Reasons:

- The submitter supports the retention of open spaces to ensure that rural character is maintained.

Point Number 777.3

Summary of Decision Requested: Retain Policy 5.3.7 Reverse sensitivity effects, except for the amendments sought below;
AND
Amend Policy 5.3.7(a)(ii) Reverse sensitivity effects, as follows:
Recognise the following features are typical of the rural environment and the effects are accepted and able to be managed:
...
(ii) Noise, odour, dust, traffic and visual effects associated with the use of land for farming, horticulture, forestry, farm quarries, and infrastructure;
AND
Add a new clause to Policy 5.3.7 Reverse Sensitivity effects, as follows:
(j) Avoid any adverse effects of reverse sensitivity to ensure the ongoing and efficient operation of infrastructure is not compromised.

Decision Reasons:

- Infrastructure which is typical of the rural environment may have associated noise, odour, dust and traffic effects with land use. For example, Radio NZ operates a back-up generator for testing and emergency purposes and this makes noise.
- Greater consistency is required with Policy 6.1.7 Reverse sensitivity and infrastructure, due to the submitter's concern with reverse sensitivity effects on its transmission in terms of their civil defence role.

Point Number 777.4

Summary of Decision Requested: Amend Policy 5.3.8(e) and (f) Effects on rural character and amenity from rural subdivision, as follows:
(e) ~~Ensure~~ Subdivision, use and development does not compromise opportunities ensure that rural character and amenity values are maintained.
(f) Subdivision, use and development ~~ensures that~~ the effects on public infrastructure are ~~minimised~~ avoided.

Decision Reasons:

- The addition of the requested text in clause (e) expresses this policy more clearly.
- In respect to clause (f), greater consistency is required with Policy 6.1.7 Reverse sensitivity and infrastructure, due to the submitter's concern with reverse sensitivity effects on its transmission in terms of its civil defence role.

Point Number 777.5

Summary of Decision Requested: **Amend** Policy 5.3.15(a)(v) Noise and vibration, as follows:
(v) ~~Managing the location of sensitive land uses~~ noise-sensitive activities, particularly in relation to lawfully-established activities:

Decision Reasons:

- It is more appropriate to use the notified definition of "noise-sensitive activities" than "sensitive land use".

Point Number 777.6

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance, as notified.

Decision Reasons:

- The submitter supports the recognition, development and maintenance of infrastructure.

Point Number 777.7

Summary of Decision Requested: **Retain** Policy 6.1.4 Infrastructure benefits as notified, particularly clause (a)(vii) which identifies the benefits provided for lifeline utility services.

Decision Reasons:

- The submitter supports the recognition of the benefits of infrastructure and particularly the importance of infrastructure to provide for lifeline utility services.

Point Number 777.8

Summary of Decision Requested: **Retain** Objective 6.1.6 Reverse sensitivity, as notified.

Decision Reasons:

- The submitter supports the protection of infrastructure from reverse sensitivity effects.

Point Number 777.9

Summary of Decision Requested: **Retain** Policy 6.1.7 Reverse sensitivity and infrastructure, as notified.

Decision Reasons:

- The submitter supports the protection of infrastructure from the reverse sensitivity effects of subdivision, use and development.

Point Number 777.10

Summary of Decision Requested: **Amend** Policy 5.3.8(f) Effects on rural character and amenity from rural subdivision to replace the term "public infrastructure" with "infrastructure", and all other instances where this term is used;
OR
Add a new definition for "public infrastructure" to Chapter 13 Definitions, which includes Radio New Zealand.

Decision Reasons:

- It is not clear what kind of infrastructure Policy 5.3.8(f) refers to.

Point Number 777.11

Summary of Decision Requested: **Add** a new definition for "rural hamlet" to Chapter 13 Definitions.

Decision Reasons:

- It is not clear what is meant by "rural hamlet" and a definition would be useful to district plan users.

Point Number 777.12

Summary of Decision Requested: **Add** a new definition for "urban subdivision" to Chapter 13 Definitions.

Decision Reasons:

- A definition of "urban subdivision" would provide clarity.

Point Number 777.13

Summary of Decision Requested: **Add** a new setback requirement to Rule 22.3.7.2 PI(a) Building setback - sensitive land use as follows:
(a) Any building for a sensitive land use must be set back a minimum of:
...
(x) 800m from the boundary of any radio transmitter owned and operated by Radio New Zealand, as defined in section 2(1) of the Radiocommunications Act 1989.

Decision Reasons:

- The submitter is concerned with any reverse sensitivity effects on its transmission in terms of its civil defence role.
- The requested 800m building setback is an effective way of mitigating and avoiding adverse effects.

Point Number 777.14
Summary of Decision Requested: Retain the S1 designation for Radio New Zealand Limited and the wording for this designation as notified.

Decision Reasons:

- No reasons provided.

Point Number 777.15
Summary of Decision Requested: Retain clause (c) in the definition of "infrastructure" in Chapter 13 Definitions, as notified.

Decision Reasons:

- No reasons provided.

Point Number 777.16
Summary of Decision Requested: Retain the definition of "Minor upgrading of existing infrastructure" in Chapter 13 Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number 777.17
Summary of Decision Requested: Retain the definition of "Network utility operator" in Chapter 13 Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number 777.18
Summary of Decision Requested: Retain the definition of "Noise-sensitive activity" in Chapter 13 Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number 777.19
Summary of Decision Requested: Amend the definition of "sensitive land use" in Chapter 13 Definitions as follows:

~~Means an education facility including a childcare facility, waananga and koohanga roa, a residential activity, papakainga building, rest home, retirement village, travellers' accommodation, home stay, health facility or hospital.~~

Means:

(a) an education facility including a childcare facility and waananga and koohanga roa;

(b) buildings used for residential activities including a papakainga building, rest home, retirement village, travellers' accommodation and home stay; and

(c) a health facility or hospital.

AND

Amend the definitions of "sensitive land use" and "noise-sensitive activity" in Chapter 13 Definitions to consider combining into a single defined term.

Decision Reasons:

- The notified definition implies that all "sensitive land uses" are education facilities, yet it expands to include places and activities that are not strictly 'educational'.
- The definitions for "noise-sensitive activity" and "sensitive land use" are very similar and may therefore be able to be merged into a single definition.

Submitter Number: 778 **Submitter:** Shand Properties Limited

Point Number 778.1
Summary of Decision Requested: Amend Policy 4.1.13 - Huntly as follows:

4.1.3 Policy - Huntly

(a) Huntly is developed to ensure:

(i) infill and redevelopment of existing sites occurs;

(ii) Reverse sensitivity effects from the strategic transport infrastructure networks are avoided or minimised;

(iii) Development of areas where there are hazard and geotechnical constraints is managed to ensure the associated risks do not exceed acceptable levels.

(iv) Development is avoided on areas with ~~hazard, geotechnical and ecological constraints~~ significant hazard and geotechnical constraints that are unable to be remedied or sufficiently mitigated to achieve an acceptable level of risk.

(v) Ecological values are maintained or enhanced.

(vi) Development of areas with significant ecological value is avoided.

AND

Any further relief and/or amendments to other provisions as necessary to support the relief sought.

Decision Reasons:

-

- This policy should acknowledge that some constraints will be able to be safely mitigated or managed without causing undue risk.
- Ecological and geotechnical constraints need to be separately addressed because of their differing effects.
- Areas 1 and 2 are located within the urban limits identified in the Waikato Regional Policy Statement and the Future Proof Strategy.
- Ecological constraints or values vary widely and therefore avoiding all development where these are present is overly onerous.
- A framework is therefore required that manages the avoidance of development where there are high ecological values or the mitigation or offsetting of effects where ecological values are lower.

Point Number 778.2

Summary of Decision Requested: Amend the zoning of approximately 74.06ha in Huntly located between Great South Road and East Mine Road from Rural Zone to Industrial Zone (see submission for map and list of legal descriptions).

AND

Any further relief and/or amendments to the Proposed District Plan as necessary to support the relief sought.

Decision Reasons:

- There is a projected demand for industrial land in Huntly over and above the available supply in the medium and long term when the National Policy Statement - Urban Development Capacity is taken into account.
- Areas 1 and 2 are located within the urban limits identified in the Waikato Regional Policy Statement and the Future Proof Strategy.
- The Waikato Regional Policy Statement identifies that approximately 23ha of industrial land is needed for the long-term growth of Huntly through to 2061.
- Areas 1 and 2 are in close proximity to key transport networks including the North Island Main Trunk railway, Great South Road and the Huntly Bypass which provide ideal connections for industrial activities that involve freight movements.
- Greenfield industrial land at Huntly is a scarce resource because of flooding, subsidence or topographical limitations.
- A number of future growth changes are anticipated throughout the Waikato Corridor.
- Areas 1 and 2 adjoin the existing extent of urban development at the northern end of Huntly.

Point Number 778.3

Summary of Decision Requested: Amend the zoning of approximately 22.95ha in Huntly, south of East Mine Road from Rural Zone to Residential Zone (see submission for map and list of legal descriptions).

AND

Any further relief and/or amendments to the Proposed District Plan as necessary to support the relief sought in the submission.

Decision Reasons:

- The area provides an opportunity for additional residential growth in Huntly.
- The area is contiguous with the existing residential environment and represents a logical extension of Huntly's Residential Zone.
- There is demand for residential development in Huntly over the short, medium and long term.
- Full uptake of infill and redevelopment subdivision is unlikely and it is therefore appropriate to provide more opportunities for greenfill development.
- The area is located within the urban limits identified in the Waikato Regional Policy Statement and the Future Proof Strategy.
- The area is in close proximity to key transport networks including Great South Road and the Huntly Bypass.
- The land is in the indicative urban limit within the Future Proof Strategy.
- The RPS predicts that the residential population of Huntly will grow by 12,275 by 2061. Additional residentially zoned land will be required to accommodate the additional housing demand. This 23ha provides an opportunity to provide for Huntly's residential growth.

Submitter Number: 780 **Submitter:** John Lawson (Whaingaroa Environmental Defence Incorporated)

On behalf of: Whaingaroa Environmental Defence Incorporated Society

Point Number 780.1

Summary of Decision Requested: Add areas of Significant indigenous vegetation or habitat through the use of LENZ and in consultation with conservation and environment groups.

AND

Add rules for Significant indigenous vegetation and habitat as follows:

In a significant indigenous vegetation or habitat area the following are discretionary activities:-

- Cultivation.
- Spreading soil or other material (including fertilizer or lime) in excess of existing routine application rates.
- Drainage works apart from routine maintenance.
- Land reclamation from estuary or other wetlands.
- Modifications to watercourses apart from routine maintenance.
- Flood defences.
- Infilling ditches, ponds, pits, pools, marshes or historic earthwork features.
- Clearing vegetation or land (by physical removal, burning, application of herbicides, or deliberate overgrazing, trampling, or rooting by livestock) in preparation for cultivation.
- Introducing livestock (including poultry) at intensive stocking rates, or increasing stocking rates to intensive levels.

Decision Reasons:

- Large amount of indigenous forest and scrub in the Waikato District and that up to 50% of it is threatened and most of that is not legally protected.
- The NZ Biodiversity Strategy (page 33) set the 2020 goal as, "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats (such as lowland forests and grasslands, wetlands and dunelands) have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Point Number 780.2

Summary of Decision Requested: Add rules to Chapter 16 Residential Zone to provide for protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:

- (a) from SH23 (north of Maungatawhiri Rd) to Kaitoke Creek
- (b) all existing views of the bar from Main Road, Bow St and Norrie Avenue
- (c) all existing views of Karioi from Raglan CBD
- (d) from Wainui Rd to the coast between the Bryant Reserve and the Bible Crusade Camp
- (e) from SH23 summit to Karioi

(f) AroAro salt marsh from Wallis St.

AND

Amend the planning maps for any consequential relief required to give effect to this submission.

Decision Reasons:

- Rules in each zone are required to give effect to Policies 3.3.3 (a) and 4.5.14 (a) (iii).
- Views are a part of Raglan's character. Raglan Naturally makes various references to 'view'. The original submission notes these references in detail.
- RMA (Section 5) includes "well being" which was included in Raglan Naturally and this clearly includes protection of views.
- Raglan Naturally needs to be considered as a part of the district plan review.
- Other district plans protect views (Auckland and Hastings).

Point Number

780.3

Summary of Decision Requested:

Add rules to Chapter 18 Business Town Centre Zone to provide for protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:-

- (a) from SH23 (north of Maungatawhiri Rd) to Kaitoke Creek
- (b) all existing views of the bar from Main Road, Bow St and Norrie Avenue
- (c) all existing views of Karioi from Raglan CBD
- (d) from Wainui Rd to the coast between the Bryant Reserve and the Bible Crusade Camp
- (e) from SH23 summit to Karioi
- (f) AroAro salt marsh from Wallis St.

AND

Amend the planning maps for any consequential relief required to give effect to this submission.

Decision Reasons:

- Rules in each zone are required to give effect to Policies 3.3.3 (a) and 4.5.14 (a) (iii).
- Views are a part of Raglan's character. Raglan Naturally makes various references to 'view'. The original submission notes these references in detail.
- RMA (Section 5) includes "well being" which was included in Raglan Naturally and this clearly includes protection of views.
- Raglan Naturally needs to be considered as a part of the district plan review.
- Other district plans protect views (Auckland and Hastings).

Point Number

780.4

Summary of Decision Requested:

Add rules to Chapter 22 Rural Zone to provide for protection of defined views from public places to the harbour, coast and natural backdrops and to include at least the following defined views:

- (a) from SH23 (north of Maungatawhiri Rd) to Kaitoke Creek
- (b) all existing views of the bar from Main Road, Bow St and Norrie Avenue
- (c) all existing views of Karioi from Raglan CBD
- (d) from Wainui Rd to the coast between the Bryant Reserve and the Bible Crusade Camp
- (e) from SH23 summit to Karioi
- (f) AroAro salt marsh from Wallis St.

AND

Amend the planning maps for any consequential relief required to give effect to this submission.

Decision Reasons:

- Rules in each zone are required to give effect to Policies 3.3.3 (a) and 4.5.14 (a) (iii).
- Views are a part of Raglan's character. Raglan Naturally makes various references to 'view'. The original submission notes these references in detail.
- RMA (Section 5) includes "well being" which was included in Raglan Naturally and this clearly includes protection of views.
- Raglan Naturally needs to be considered as a part of the district plan review.
- Other district plans protect views (Auckland and Hastings).

Point Number

780.5

Summary of Decision Requested:

Add new rules for all zones as follows:

Construction of a building or other structure and planting of trees and other vegetation is a permitted activity, if:

(a) it can be shown that it will not significantly block views of sea, river, bush or hills from neighbouring properties, or

(b) neighbouring property owners confirm in writing that any loss of view does not concern them, or

(c) it can be shown that the planted vegetation is of native plants and likely to contribute to reduction of river, or coastal erosion, or

(d) it can be shown that the planting would improve views from public places.

Any activity that does not comply with a condition for a permitted activity is a discretionary activity.

Decision Reasons:

- Sea and other views add monetary value to properties.
- Property rights of owners should take precedence over developers. Developers should be required to obtain written agreement from neighbours that the development does not concern them in terms of views lost, unless it is native planting to protect land from erosion, hides unsightly developments or will not significantly affect views.
- While no requirement under the RMA to protect views, no provisions against either. Feasible to protect views as shown by other district plans.
- Only 4.7.2 requires view sharing and this will not apply to most developments as they do not require consent.

Point Number 780.6

Summary of Decision Requested: **Add** provisions to Chapter 16 – Residential Zone, to restrict further holiday accommodation in Raglan's residential and business areas.

AND

Add provisions for an area of high density development near the cement silos, of similar height to them and to the density and design of a traditional European fishing village, available for low cost purchase and rental by permanent residents for leases of no less than a year.

Decision Reasons:

- Raglan is very short of permanent accommodation and the Plan makes no provision for affordable properties protected from use for holiday occupation.

Point Number 780.7

Summary of Decision Requested: **Add** provisions to Chapter 17 – Business Zone, to restrict further holiday accommodation in Raglan's residential and business areas.

AND

Add provisions for an area of high density development near the cement silos, of similar height to them and to the density and design of a traditional European fishing village, available for low cost purchase and rental by permanent residents for leases of no less than a year.

Decision Reasons:

- Raglan is very short of permanent accommodation and the Plan makes no provision for affordable properties protected from use for holiday occupation.

Point Number 780.8

Summary of Decision Requested: **Add** provisions to Chapter 18 – Business Town Centre Zone, to restrict further holiday accommodation in Raglan's residential and business areas.

AND

Add provisions for an area of high density development near the cement silos, of similar height to them and to the density and design of a traditional European fishing village, available for low cost purchase and rental by permanent residents for leases of no less than a year.

Decision Reasons:

- Raglan is very short of permanent accommodation and the Plan makes no provision for affordable properties protected from use for holiday occupation.

Point Number 780.9

Summary of Decision Requested: **Add** a Raglan structure plan

AND

Consider postponing the application of the Proposed Waikato District Plan to Raglan ward until such structure plan is in place.

Decision Reasons:

- Plan is missing important sections, marked with "placeholders".
- Website is difficult to load/read and compare to existing plan.
- Issues with online submission process.
- Structure Plan for Raglan is still incomplete.
- Good case for not applying the Plan to Raglan until more complete and better consultation methods have been devised.
- Most other growth areas have Structure Plans. Without a Structure Plan it is not apparent that the proposed Plan will work for Raglan ward. Raglan increased by 40% over the period 1991-2001 and could more than double over the next 10 years if all the development options are taken up.
- The Plan does not estimate population might be and services required. Without estimates hard to know what areas to set aside or what environmental problems might arise.
- Structure Plan is needed to take account of Raglan Naturally (2001) and to expand on it, including any revisions. The submission goes into detail as to what the Raglan Naturally document entails, including aspirations and priorities for action.

Point Number 780.10

Summary of Decision Requested: **Add** rules for each catchment to Section C Rules - to provide to support the following:

- on-site stormwater disposal
- sufficient capacity to enable disposal of stormwater
- best-practice low impact design
- on-site treatment
- minimises impervious surfaces
- retains pre-development hydrological conditions
- not increase the flow of stormwater runoff
- not reduce storage capacity on-site
- stormwater catchment management plan
- promotes clean water reuse and groundwater recharge

AND

Amend Section C Rules to provide rules for individual limits to suit each catchment, rather than permitted up to 70% impermeable cover everywhere.

AND

No specific decision sought but submission opposes Policy 4.2.7 Site coverage and permeable surfaces, Policy 6.4.7 Storm water and Rule 14.1.1.1.2 RD2.

Decision Reasons:

- The submitter opposes policies 4.2.7 and 6.4.7, as the only rules implementing them in Raglan are discretionary and ill-defined. For example, "where appropriate" is not defined.
- No scientific stormwater plan for Raglan has been completed, though a settling pond at AroAro was designed in 2011 as a filtration wetland for the stormwater. Pollutants such as copper are at or near their limits and addition of more sites with 70% impermeable cover will exacerbate the pollution. Application of Rule 14.1.1.2 RD2's discretion without clear scientific evidence of effects will make pollution even worse.

Point Number 780.11

Summary of Decision Requested: **Add** rules to support Policy 4.2.7 - Site Coverage and Permeable Surfaces.

Decision Reasons:

- The submitter supports the policies of having sufficient open space to provide for landscaping, on-site stormwater disposal in the Residential Zone, but objects that they do not appear to have any corresponding rules, except for Te Kowhai Airpark Zone Rule 27.3.3.

Point Number 780.12

Summary of Decision Requested: **Retain** Activity specific standard 14.11.1 (a)(iii)- Permitted Activities pertaining to P3 waste water servicing which requires wastewater to comply with AS/NZS 1547:2012

Decision Reasons:

- AS/NZS 1547:2012 covers the whole range of options which may be appropriate, including Waterless composting toilets, covered in the related AS/NZS 1546.2:2008. I support investigation of such systems to minimise water consumption and sewage volumes, thus making it more possible to treat sewage as a valuable resource, rather than an expensive waste.

Point Number 780.13

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays - to provide for an option for developments to meet much lower standards of provision for parking, etc, depending on the extent to which they provide for use of public transport, walking, or cycling by people using the site. Submission makes reference to 7.3.1(4) of the Christchurch Plan as an example.

Decision Reasons:

- For reasons of climate change, resource use, safety and congestion, the current average of roughly one car per person needs to be reduced. Maintenance of inflexible rules on parking, etc perpetuates the current problem and requires developers to subsidise car transport. Alternatives should be encouraged, as they already are in Auckland, Christchurch, Queenstown, etc.

Point Number 780.14

Summary of Decision Requested: **Amend** the Planning Maps to differentiate between Business Town Centre, Business and Industrial Zone. Submission references Appendix 2.30 Raglan Map, and seeks clarification of the term "Commercial Area".

Decision Reasons:

- Commercial Area is indicated in purple, yet in the text of the Plan the term is only used to define land at Tamahere. Submitter opposes use of this map until the meaning of Commercial Area is clarified.

Point Number 780.15

Summary of Decision Requested: **Amend** Rule 16.5.8.7 Building setbacks - All boundaries to provide for variable setbacks to suit the character of each road

OR

Amend Rule 16.5.8.7 Building setbacks - All boundaries to require a minimum 6m setback from the road boundary for all developments in the Residential Zone.

Decision Reasons:

- There are locations where there is no need for any setback, but it is not clear that any generic rule can be set to identify them.
- A 6m setback will generally retain the village character of Raglan and protect many views.
- The submitter does not understand why Council is not accounting for the Environment Court decision (NZEVC 411 - paragraph 59, page 17) and there is no reference to it in the s32 documents.
- The 2017 Infrastructure Issues and Options report for item 21.49 - Building set back, makes no mention of the environment court decision and only mentions the Roading Team's view on technical matters, not amenity.
- The s32 – 12 – residential zone – setback report lists assertions that the 6m setback is odd, doesn't work and is generally not practical due to topography, set against other assertions that setback should reflect the character of the roads within Raglan, protect Raglan views and retain Raglan's existing character. None of these seems to have been evaluated by the s32 report, which is silent about the Environment Court.

Point Number 780.16

Summary of Decision Requested: **Amend** Policy 4.1.5 Density to identify density ranges for each street.

Decision Reasons:

- A minimum density of 12-15 households per hectare is imprecise (is it 12, 15, or what, where and why?) and not suitable for parts of the Residential Zone. Some streets could take much more and some less. Submitter opposes the policy unless sites are assessed for wildlife, stormwater, visual attraction and transport factors.

Point Number 780.17

Summary of Decision Requested: **Amend** Policy 4.1.18 Raglan, as follows:

(a) Raglan is developed to ensure:

(i) Infill and redevelopment of existing sites occurs, subject to development of a Structure Plan to identify where this can be done without loss of character, trees, or other natural features.

(ii) A variety of housing densities is provided for and adequate housing reserved for low cost rentals and purchases by permanent residents;

(iii) Rangitahi is the only area that provides for the medium term future growth and is developed in a manner that connects has cycle, footway and public transport connections to the existing town and maintains and enhances the natural environment; and

(iv) There are good quality cycle, footway and public transport connections between the town centre, the Papahua Reserve and Raglan Wharf.

Decision Reasons:

- 2009 Raglan Structure Plan Issues and Options report said; "In simple terms the existing District Plan already zones enough land in the immediate Raglan area to provide for around 1.6 times the amount of land that will be needed up to 2061."

- Rangitahi development will add 500 houses.
- There is a lack of detailed population figures but it is apparent that Raglan needs infill and redevelopment. Without the detailed analysis of sites, it is likely that some would lose their character, trees and other features. Opposes Policy unless sites are differentiated.
- There is a housing shortage in Raglan, but the shortage is for housing available to local people at affordable prices. Providing more holiday homes will not solve housing problem.
- Rangitahi will provide for future growth and will have good walking and cycle links within it, but not to the CBD and no ferry/bus service. CBD has parking and congestion issues at peak times without adding cars from Rangitahi. Therefore good alternatives to cars are needed.
- Papahua Reserve and Raglan Wharf need to account for 4.1.12 (b)(v) "particularly walking and cycling" provision, along with the proposal in Raglan Naturally to provide for a free shuttle.

Point Number 780.18

Summary of Decision Requested: Add a new clause (iii) to Policy 7.1.4 Matangi and Huntly Heritage precinct for Raglan and policies similar to those for Matangi and Huntly.

Decision Reasons:

- In 2017, Waikato District Council often used the phrase "Raglan is the jewel in the crown of the Waikato". The proposed Waikato District Plan still mentions Raglan's "seaside village character" but reduced from 12 in the current plan to 3 in the proposed one and that is only for Rangitahi.
- The original submission makes reference to 1.6.1 of the current plan ("Raglan will retain its seaside village character as it grows, while protecting the harbour."), as well as a description of Raglan from Lonely Planet. The submission wants "Raglan will retain its seaside village character as it grows, while protecting the harbour." from the current plan included in the proposed.
- Submitter is of the opinion that Policy 7.1.4 also applies to Raglan.

Point Number 780.19

Summary of Decision Requested: Amend the Proposed Waikato District Plan by making the Coastal Overlay a conservation area and including provisions where all major changes and consents which infringe District Plan rules, or which exceed one storey, are publicly notified.

AND

Delete Policy 4.5.14(f) Raglan Town Centre

Decision Reasons:

- In 2017, Waikato District Council often used the phrase "Raglan is the jewel in the crown of the Waikato". The proposed Waikato District Plan still mentions Raglan's "seaside village character" but reduced from 12 in the current plan to 3 in the proposed one and that is only for Rangitahi.
- The original submission makes reference to 1.6.1 of the current plan ("Raglan will retain its seaside village character as it grows, while protecting the harbour."), as well as a description of Raglan from Lonely Planet.
- The Lonely Planet comment that "It's small enough to have escaped mass development" is of value and should be enforced by limiting developments to one storey and features in accordance with the Waikato District Council 2003 design guide.
- Developments can occur but needs to avoid changing Raglan's character which can be done by public notification (of consents).
- Most of the coast is visible from Raglan and as such, is a part of its character and should be protected.
- Most street corners have single storey buildings which are or should be listed as historic heritage buildings.
- As the character statement for Raglan Town Centre says it is characterised by "Small scale (one to two level, narrow frontages) buildings". It also says "Encourage new development that is sympathetic to the existing main street built form (height, scale, form) and the surrounding context, whilst still promoting the eclectic and artistic nature of the town".
- A possible alternative could be similar to Hamilton's Special Character areas.

Point Number 780.20

Summary of Decision Requested: Delete Rule 18.3.5 P1(a)(vi) Verandahs

Decision Reasons:

- It is inconsistent with Policy 4.5.14 (v)(B) which refers to post supported verandahs (for the Raglan Town Centre)

Point Number 780.21

Summary of Decision Requested: Add policies and rules to protect ridgelines from development.

AND

Amend Policy 3.3.2 (a0(i) to not just recognise but to protect.

Decision Reasons:

- Policy 3.3.2 (a) (i) only recognises the attributes. Ridgelines are widely visible, so development of them has a disproportionate effect.

Point Number 780.22

Summary of Decision Requested: Amend Rule 16.1.2 P9 Permitted Activities to provide for the registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. Queenstown has rules requiring registration as a Homestay, or a Holiday Home and, for larger properties, resource consent for change of use. Raglan needs similar rules.

Point Number 780.23

Summary of Decision Requested: Amend Rule 22.1.2 P10 Permitted Activities to provide for the registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. Queenstown has rules requiring registration as a Homestay, or a Holiday Home and, for larger properties, resource consent for change of use. Raglan needs similar rules.

Point Number 780.24

Summary of Decision Requested: Amend Rule 23.1.1 P2 Permitted Activities to provide for the registration of Homestay or Visitor accommodation.

Decision Reasons:

- Raglan needs a plan similar to that of Queenstown to avoid more residential accommodation becoming available only to visitors. As residents tend to move to and from the surrounding country areas, the same policy needs to apply there. Queenstown has rules requiring registration as a Homestay, or a Holiday Home and, for larger properties, resource consent for change of use. Raglan needs similar rules.

Point Number 780.25

Summary of Decision Requested: Delete Policy 4.2.22 Bankart Street and Wainui
AND
Add provision for Wi Neera Street.

Decision Reasons:

- The area behind the corrugated iron on Wi Neera St is still be developed and residents will be forced out of their homes by rate rises, overlooking, noise, etc. Raglan needs housing for locals far more than extra holiday apartments.

Point Number 780.26

Summary of Decision Requested: Amend Rule 17.1.3 RD1 (a)(i) Restricted Discretionary activities as follows:
The extent to which the development is consistent with 4.5.3 Policy - Commercial purpose: Business Town Centre Zone, in strengthening those areas as the primary retail, administration, commercial service and civic centre for each town and with Town Centre Guidelines contained in Appendix 3.3

Decision Reasons:

- The 2006 Supporting Information for Lorenzen Bay Business Zone said at 4.4.3 that "It is likely that a Service Centre would comprise convenience shops such as a dairy or fruit and vegetable shop." It was on that basis that the area was rezoned from Residential to Business. By specifying a minimum lot size of 225m² it is unlikely that such small shops are going to occupy the site. A large supermarket is more likely, which would affect the viability of Raglan CBD.

Point Number 780.27

Summary of Decision Requested: Amend Rule 17.4.1 RD1 (a)(i) General subdivision as follows:
(a) Subdivision of land must comply with all of the following conditions:
(i) Proposed lots must have a minimum size of 225m² net site area with the exception of access or utility allotments or reserves to vest;
(ii) Proposed lots must be connected to public-reticulated water supply and wastewater.

Decision Reasons:

- It is inconsistent with Policy 4.5.3 - Commercial purpose: Business Town Centre Zone, which aims to strengthen town centres as the primary retail, administration, commercial service and civic centre for each town.

Point Number 780.28

Summary of Decision Requested: Retain Rule 18.3.1.1 Height – Building general.

Decision Reasons:

- Submitter is pleased that note was taken of objections to the proposed increase to 12m. However, 10m should not become a target and most buildings should remain single storey.

Point Number 780.29

Summary of Decision Requested: Delete the Raglan navigation beacon rules from Zone rules to which they have no relevance.

Decision Reasons:

- Although the Raglan navigation beacons are only in Business Town Centre, Reserve and Residential Zones, this policy applies also to Business and Rural zones! Only policies relevant to zones should be included in their chapters. There is already too much repetition in the Plan, which makes it hard to comprehend.

Point Number 780.30

Summary of Decision Requested: Amend the Proposed District Plan to require consents requiring exemption from plan rules to be automatically publicly notified, whether the rule is on genetically modified organisms or not.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- The submission raises concern regarding liability and potential cost to ratepayers as well as the implications under the Resource Management Act.
- Submission also raises concerns regarding harm to farmers, clean green image, irreversible impacts from GMO's, scientific uncertainty, lack of demand for GE food from main markets, transgenic pollution.
- Wants GE experiments and releases prohibited except in Ruakura.
- Conventional and organic reproductive crops must be protected and integrity of heritage seeds is critical.
- No mention is made of the hazards of genetically modified substances in the Proposed District Plan.
- GE poses risks to our environment, economy and public health.
-

Point Number 780.31

Summary of Decision Requested: Retain Chapter 22 Rural Zone.

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 780.32

Summary of Decision Requested: Amend the earthworks rules for all zones that prescribe limits over a specified timeframe e.g. 12 month period to add limits to total development, consistent with maintaining the values of the site.

Decision Reasons:

- Incremental annual changes can amount to significant destruction of areas which should be protected.

Point Number 780.33

Summary of Decision Requested: Amend Rule 17.2.9 P2 Indigenous vegetation clearance inside a Significant Natural Area as follows:

Removing of up to 5m³ of manuka and/or kanuka outside of the Coastal Environment per single consecutive 12 month period per property for domestic firewood purposes or arts and craft, provided the removal will not directly result in the death, destruction or irreparable damage to any other tree, bush or plant.

Decision Reasons:

- Manuka/Kanuka are important environments and 3m³ is adequate for heating a well insulated house.

Point Number 780.34

Summary of Decision Requested: Add policies and rules to all zones for energy efficiency (refer to the original submission for details)

Decision Reasons:

- The Resource Management Act requires Council's to have regard to effects of climate change and benefits of renewable energy. The Proposed Waikato District Plan only makes passing reference to climate change and makes no mention of the drivers of climate change. There is also no commitment to solar and wind energy and micro-hydro reference has been removed.
- The submitter is disappointed on timing of Stage 2 and wants adequate considerations for energy and climate change and noted that the IPCC report came out 24 hours before close of submissions.

Point Number 780.35

Summary of Decision Requested: Add a new requirement to Rule 16.5.8.6 RD1(b)(iv) Living Court that windows and balconies overlooking adjacent outdoor spaces and living areas have been avoided so as to respect the amenity and comfort of neighbouring properties.

Decision Reasons:

- This follows Housing NZ's Simple Guide expectation that buildings and spaces should relate well to each other.

Point Number 780.36

Summary of Decision Requested: Add provision for new cycle/walkways to implement Council's Walking, Cycling and Bridle Trails Strategy, not only in major new developments. Submission makes reference to Policies 8.1.3 Esplanade reserves and walkways and Rule 16.5.3 Restricted Discretionary activities.

Decision Reasons:

- 1.10.2.3 of the Proposed Waikato District Plan includes the Strategy as relevant, yet there is no timeframe for implementation of the Strategy. Without support from the District Plan it is unlikely that most of the Strategy will be achieved. The submission goes on further to quote the relevant sections of Policy 4.1.8. Refer to original submission for details.
- 4.1.10 Policy - Tuakau, 4.1.11 Policy - Pokeno, 4.1.12 Policy - Te Kauwhata, 4.1.14 Policy - Taupiri, 4.1.15 Policy - Ngaruawahia, 4.1.16 Policy - Horotiu and 4.1.17 Policy - Te Kowhai all mention walking and cycling provision, though leave the means and locations unclear.
- 4.1.18 Policy - Raglan is the only town policy not to mention cycling and walking, despite a May 2018 staff report to Council saying, "Raglan has the district's highest walking/cycling communities".
- The Proposed Waikato District Plan has a disproportionate amount of rules relating to roading and vehicles, compared to public transportation and cycling.
- On page 42 Raglan Naturally says, "There is strong public support for harbour and coastal walkways." and "Create coastal walkways, eg Raglan to Whale Bay, Whale Bay to Te Toto Gorge." This local support reflects national trends; time use surveys show walking as being ahead of all other active sports and pursuits. European surveys have similar results, so that environmental tourism, encouraging tourists to spend more time walking than driving, could be made a much more valuable asset, giving an economic, as well as health and recreation, impetus to the need to implement policies in recognition of the importance of walking and cycling as noted at 1.4.3.1. The lack of progress indicates that opportunities are not taken with subdivisions and that more detail needs to be included in the District Plan.

Point Number 780.37

Summary of Decision Requested: Add the following to the planning maps:

- The planned Wainui Rd to Te Hutewai Rd walk/cycle track.
- All the tracks shown on the Strategy maps and walkways through the residential zones linking Lorenzen Bay with Kaitoke Walkway, allowing a circular walk around Raglan.
- A cycle track from Wallis St to Violet St.
- A link to the national Te Araroa walkway using paper roads, etc (via Karioi, Bridal Veil).
- Walkways (and where possible cycleways) along the whole coast.
- A track from Raglan to the summit of Karioi using esplanades, reserves and unformed roads.
- A link along Wainui Stream from Wainui Reserve to Bryant Reserve.

Decision Reasons:

- 1.10.2.3 of the Proposed Waikato District Plan includes the Strategy as relevant, yet there is no timeframe for implementation of the Strategy. Without support from the District Plan it is unlikely that most of the Strategy will be achieved. The submission goes on further to quote the relevant sections of Policy 4.1.8. Refer to original submission for details.
- 4.1.10 Policy - Tuakau, 4.1.11 Policy - Pokeno, 4.1.12 Policy - Te Kauwhata, 4.1.14 Policy - Taupiri, 4.1.15 Policy - Ngaruawahia, 4.1.16 Policy - Horotiu and 4.1.17 Policy - Te Kowhai all mention walking and cycling provision, though leave the means and locations unclear.
- 4.1.18 Policy - Raglan is the only town policy not to mention cycling and walking, despite a May 2018 staff report to Council saying, "Raglan has the district's highest walking/cycling communities".
- The Proposed Waikato District Plan has a disproportionate amount of rules relating to roading and vehicles, compared to public transportation and cycling.
- On page 42 Raglan Naturally says, "There is strong public support for harbour and coastal walkways." and "Create coastal walkways, eg Raglan to Whale Bay, Whale Bay to Te Toto Gorge." This local support reflects national trends; time use surveys show walking as being ahead of all other active sports and pursuits. European surveys have similar results, so that environmental tourism, encouraging tourists to spend more time walking than driving, could be made a much more valuable asset, giving an economic, as well as health and recreation, impetus to the need to implement policies in recognition of the importance of walking and cycling as noted at 1.4.3.1. The lack of progress indicates that opportunities are not taken with subdivisions and that more detail needs to be included in the District Plan.

Point Number 780.38

Summary of Decision Requested: **Amend** the Proposed District Plan to require housing for the elderly in all new developments, not just Te Kauwhata (e.g. Policy 4.1.12(b)(i) Te Kauwhata).

Decision Reasons:

- Wants the former Lazarus village restored for use of the elderly and thinks that without protection, the only non-hospital housing for elderly people in Raglan will be permanently lost.
- Refers to Section 1.12.3 "A district which provides a wide variety of housing forms which reflect the demands of its ageing population".

Point Number 780.39

Summary of Decision Requested: **Add** a new chapter that provides the following:

- A resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social well-being considerations.
- Strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan, to ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues.

Decision Reasons:

- Several Councils have passed resolutions that there should be no further development and field-testing of transgenic organisms envisaged for agriculture, horticulture and forestry in their areas until the risk potential has been adequately identified and evaluated and a strict liability regime put in place.
- The submission raises concern regarding liability and potential cost to ratepayers as well as the implications under the Resource Management Act.
- Submission also raises concerns regarding harm to farmers, clean green image, irreversible impacts from GMO's, scientific uncertainty, lack of demand for GE food from main markets, transgenic pollution.
- Wants GE experiments and releases prohibited except in Ruakura.
- Conventional and organic reproductive crops must be protected and integrity of heritage seeds is critical.
- No mention is made of the hazards of genetically modified substances in the Proposed District Plan.
- GE poses risks to our environment, economy and public health.

Point Number 780.40

Summary of Decision Requested: **Undertake** a survey of notable trees;

AND

Add the following trees in Raglan to Schedule 30.2 - Notable Trees:

- trees within 30m of the high water mark between Bow St jetty and Helen Pl
- trees adjacent to the airfield
- trees within 10m of Marine Parade
- trees between the recreation ground and Lily St
- trees on Wallis St at the foot of Government Rd
- trees in the gully between Rose St and Lily St
- trees to the south west of SH23 between Hills Rd and Greenslade Rd
- trees in the Lorenzen Bay reserve
- large trees should all be protected.

Decision Reasons:

- Schedule 30.2 clearly doesn't cover every notable tree, as there are only 160 listings for the whole District. Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.

Point Number 780.41

Summary of Decision Requested: **Retain** Policy 2.16.1 Whaanga Coast Specific Area as notified.

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 780.42

Summary of Decision Requested: **Retain** Policy 2.16.2 Aahuatanga Motuhake (special features) as notified.

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (Policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 780.43

Summary of Decision Requested: Retain Rule 22.1.2 Permitted Activities as notified.

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (Policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 780.44

Summary of Decision Requested: Retain Section 22.7 Specific Area – Whaanga Coast Development Areas as notified.

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (Policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 780.45

Summary of Decision Requested: Add a rule to Section 16.3 Land Use - Building to the effect that:

- (a) Construction of a building or other structure within sight of SH23 at Raglan is a permitted activity if it will be screened from SH23 by planting with indigenous species that will achieve an average height of 3m after 5 years, mature to over 9m in the residential zone and 12m in the Business Zone and be of sufficient density to visually screen the activity from SH23.
- (b) Any activity that does not comply with a condition for a permitted activity is a discretionary activity.

Decision Reasons:

- The zone extensions have increased the extent of urban development along the main approach to Raglan. That could be mitigated by screening further development.

Point Number 780.46

Summary of Decision Requested: Add a rule to Section 17.3 Land Use - Building to the effect that:

- (a) Construction of a building or other structure within sight of SH23 at Raglan is a permitted activity if it will be screened from SH23 by planting with indigenous species that will achieve an average height of 3m after 5 years, mature to over 9m in the residential zone and 12m in the business zone and be of sufficient density to visually screen the activity from SH23.
- (b) Any activity that does not comply with a condition for a permitted activity is a discretionary activity.

Decision Reasons:

- The zone extensions have increased the extent of urban development along the main approach to Raglan. That could be mitigated by screening further development.

Point Number 780.47

Summary of Decision Requested: Amend Rule 17.3.5 Horotiu Acoustic Area, to also apply to the Raglan business zones.

Decision Reasons:

- The SH23 business zone is next to the Lorenzen Bay residential zone.

Point Number 780.48

Summary of Decision Requested: Amend the Proposed District Plan so that all resource consents for vegetation clearance are publicly notified, including informing adjoining authorities and the regional council. The submission makes reference to Section 1.5.7 Natural Environment, Chapter 3 and Maps.

Decision Reasons:

- As per Section 1.5.7 which ensures Council will inform adjoining authorities and the regional council are informed of all resource consent applications received for vegetation clearance, this requirement should be extended to public notification of all such applications.

Point Number 780.49

Summary of Decision Requested: Add to the planning maps areas such as Hauroto Bay and other sites of indigenous vegetation, as recorded in Estuarine vegetation survey - Raglan (Vhaingaroa) Harbour.

Decision Reasons:

- No reasons provided.

Point Number 780.50

Summary of Decision Requested: Retain Rule 22.7.1.1 Permitted Activities as notified.

Decision Reasons:

- Considers it appropriate that the provisions for Marae and papakāinga are recognised and provided for in the Waikato Proposed District plan as it gives effect to a range of policies.
- The New Zealand Coastal Policy Statement 2010 (policy d)
- The Waikato Regional Policy Statement (Policy 6.4)
- Future Proof Strategy (Priority 15)

Point Number 780.51

Summary of Decision Requested: No specific decision sought, but submission states that it is not clear that the policies and rules sufficiently identify and protect Significant Natural Areas. The submission refers to section 1.5.7 Natural Environment, Chapter 3 Natural Environment and Maps.

Decision Reasons:

- The 2005 WDC State of Environment Report states that over 50% of remaining indigenous cover is classified as threatened and much of this land is not legally protected. An average of 2 consents for vegetation clearance are issued each year.
- The NZ Biodiversity Strategy set a 2020 goal of "A net gain has been made in the extent and condition of natural habitats and ecosystems important for indigenous biodiversity. Scarce and fragmented habitats (such as lowland forests and grasslands, wetlands and dune lands) have increased in area and are in better ecological health due to improved connections and the sustainable management of surrounding areas. Some modified habitats are restored."

Submitter Number: 781 **Submitter:** Ministry of Education

Point Number 781.1

Summary of Decision Requested: Amend Chapter 13 Definitions, by deleting the definition of 'Education facility' and replacing with a new definition as follows:

Education facility

~~Means premises where groups of people are given tuition and training on a formal basis and includes childcare facilities, schools, tertiary education institutions and specialised training facilities, and their ancillary administrative, cultural and health facilities.~~

Education facilities: means land and/or buildings used to provide regular instruction or training and includes schools, community education, early childhood education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments and includes their ancillary administrative and support facilities (including cultural, recreational, communal or accommodation).

Decision Reasons:

- The Ministry of Education supports the principle that education facilities are defined. However, in order to comprehensively recognise the range of activities that may be provided at an education facility, the relief sought will accurately reflect the activities that may be required to support the efficient and effective provision of this education.
- The proposed definition is consistent with what the Ministry has provided for other district plans and is in line with the Ministry's national standards for all education facilities.

Point Number 781.2

Summary of Decision Requested: Delete the definition of "Child care facility" from Chapter 13: Definitions.

Decision Reasons:

- The notified definition does not accurately reflect the broad range of activities associated with a child care facility, including other education facilities. The requested definition of 'education facility' includes facilities for early childhood education as addressed elsewhere in the submission.

Point Number 781.3

Summary of Decision Requested: Amend 4.1.6 Policy - Commercial and industrial activities, so that education facilities are included as follows:

4.1.6 Policy - Education, commercial and industrial activities

(a) Provide for education facilities, commercial and industrial development in the following zones:

...

Decision Reasons:

- There are no policies that currently provide for education facilities.
- Education facilities such as tertiary education institutions, work skill training centres and early childhood education centres may need to be located within commercial and industrial areas for the convenience of parents and students.

Point Number 781.4

Summary of Decision Requested: Add a new policy in Chapter 5: Rural Environment to provide for education facilities in the rural environment as follows:

Policy - Education Facilities within the Rural Environment

To allow activities which are compatible with the role, function and predominant character of the Rural Environment, while managing the effects of the activities on the environment, including;

Education facilities

Decision Reasons:

- There are no policies that currently provide for education facilities in the rural environment.
- Education facilities such as schools, community education, early childhood education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments located within rural areas are essential social infrastructure required to support rural areas.

Point Number 781.5

Summary of Decision Requested: Add a new policy to Chapter 8: Reserves to provide for education facilities in reserves as follows:

Policy - Education Facilities and Reserves

Allow activities which are compatible with the role, function and predominant character of the Reserves, while managing the effects of the activities on the environment, including;

Education facilities

Decision Reasons:

- There are no policies that currently provide for education facilities in the reserves.
- Education facilities such as schools, community education, early childhood education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments located within reserves are essential social infrastructure.

Point Number

781.6

Summary of Decision Requested:

Add a new policy to Chapter 9: Specific Zones that provides for education facilities in Specific Zones as follows:

Policy - Education Facilities and Specific Zones

Allow activities which are compatible with the role, function and predominant character of Specific Zones, while managing the effects of the activities on the environment in the following zones:

(i) Hampton Downs motor sport and recreation

(ii) Te Kowhai Airpark

(iii) Rangitahi Peninsula; and

(iv) Business Zone Tamahere

Decision Reasons:

- There are no policies that currently provide for education facilities in Specific Zones.
- Education facilities such as schools, community education, early childhood education, tertiary education institutions, work skills training centres, outdoor education centres and sports training establishments located in various areas are essential social infrastructure to support district growth. Examples include:
 - driver training (including motor racing)
 - pilot training
 - schools
 - tertiary education work skills training centres

Point Number

781.7

Summary of Decision Requested:

Amend Table 14.12.5.7 - Required parking spaces and loading bays, so that it reads as follows:

~~Child care~~ Early Childhood Education facility 1 car space per every full-time staff equivalent plus 1 car space per 5 children that the facility is designed to accommodate

2.5 car parks per new classroom or classroom equivalent (to be allocated as visitor parking, plus one 99% car loading bay, (or pick-up/drop-off bay), per 100 pupils.

School: Primary 1 car space for every full-time staff equivalent plus 2 for every 50 students accommodated. Secondary 1 car space for every full-time staff equivalent plus 1 per 10 students accommodated in Years 11 to 13

2.5 car parks per new classroom or classroom equivalent (to be allocated as visitor parking, plus one 99% car loading bay, (or pick-up/drop-off bay), per 100 pupils.

Tertiary education facilities: 1 car space per every full-time staff equivalent plus 1 per every 2 full-time equivalent students provided for by the institution 1 space per 50m² of GFA; plus 1 space per staff.

Except where the Council accepts, on the basis of a specifically commissioned parking study by an appropriate qualified engineer and/or transportation planner, that a lesser level is appropriate.

Decision Reasons:

- The requested amendments are in line with the Ministry's national standards for all education facilities and are consistent with their requested definition for 'education facilities'.
- For consistency, "childcare facility" is replaced with "Early childhood education facility."

Point Number

781.8

Summary of Decision Requested:

Amend Table 14.12.5.13 - Traffic generation rates as follows:

Table 14.12.5.13 - Traffic ~~generation~~ movement rates

...

~~Childcare~~ Early childhood education and day care facility

AND

Amend the note in Rule 14.12.1 Permitted Activities P4 Traffic Generation as follows:

Note: Table 14.12.5.13 provides indicative traffic ~~generation~~ movements rates for various activities

Decision Reasons:

- The term 'traffic generation' is unclear and does not accurately reflect the activity. Consistency is required with the Ministry's requested definition of 'Education Facilities'.

Point Number

781.9

Summary of Decision Requested:

Amend Rule 17.1.2 P5 Permitted Activities as follows:

P5 Education ~~facility~~ facilities

Decision Reasons:

- Submitter requests consistency with their requested definition of 'Education facilities'.

Point Number

781.10

Summary of Decision Requested:

Add a new activity for Education Facilities in Rule 16.1.3 Restricted Discretionary Activities as follows:

Activity

RD2 Education Facilities

Council's discretion shall be restricted to the following matters:

- a. The extent to which the location, bulk, scale and built form of building(s) impacts on natural, ecological, landscape and/or historic heritage values.
- b. The extent to which the activity may adversely impact on the transport network.

- c. Ability to soften the visual impact of buildings from adjoining residential properties.
- d. The extent to which the activity may adversely impact on the streetscape.
- e. The extent to which the activity may adversely impact on the noise environment.

Decision Reasons:
