Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Supports the proposed changes in the Waikato District Plan.
- Te Kowhai Aerodrome is a very unique facility supporting aviation enthusiasts and local community activities.
- The future of the airstrip is reliant on the proposed changes to advance in the future.

Point Number 473.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Supports the proposed changes in the Waikato District Plan.
- Te Kowhai Aerodrome is a very unique facility supporting aviation enthusiasts and local community activities.
- The future of the airstrip is reliant on the proposed changes to advance in the future.

Submitter Number: 474

Submitter:

Charlotte Brown

Organisation:

Fara Kurima Partnership

Point Number 474.1

Summary of Decision Requested: **Amend** the zoning of the 44.5437ha properties at 20 and 42 Plantation Road, Te Kauwhata from Rural Zone to Countryside Living/Residential (see map attached to the submission).

Decision Reasons:

- The property has access to water supply.
- Proximity to Te Kauwhata town (walkable distance).
- Proximity to State Highway 1 (1 minute drive).
- Perfectly positioned between Auckland, Hamilton and coastlines.
- Proximity to rail for commuter services.
- Availability of services to meet immediate needs.
- Employment opportunities both locally and for commuters.
- Demand for lifestyle properties.
- Countryside Living largely taken up and sold in Te Kauwhata.

Submitter Number:	479	Submitter:	Olivia Dean-Chambers
Point Number	479.1		
Summary of Decision Requested:	Horses should have access to the beach down the walking track.		
Decision Reasons:	<ul style="list-style-type: none"> It is safer for horses and riders to access the beach by that track rather than walking along the busy roads. 		

Submitter Number:	480	Submitter:	Susan Carter
Point Number	480.1		
Summary of Decision Requested:	Add a resource management framework for the management of genetically modified organisms (GMOs) that is region-specific, taking into account environmental, economic and social wellbeing considerations.		
Decision Reasons:	<ul style="list-style-type: none"> GMOs are not needed in New Zealand, there has been insufficient research done on this. GMOs have the potential to adversely affect ecological, economic and resource management values and the social and cultural wellbeing of people, communities and tangata whenua. Once GMOs have been released into the environment, they would be very difficult if not impossible to eradicate. No matter how carefully conditions of consent are crafted, there inevitably remains a risk. <p>The release of GMOs has the potential to cause significant adverse on the environment which could include:</p> <ul style="list-style-type: none"> Biological or ecosystem harm; Harm to tangata whenua cultural values such as mauri and tikanga; Harm to the cultural values and lifestyle decision of people and communities; Harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming, and other primary production activities dependent on an uncontained environmental brand. Adverse effects include loss of organic GMO-free certification, reputational damage, loss of markets and premiums for GMO-free produce and loss of livelihood. The amendments requested are consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that concern the release, location and management of GMOs where they have potential to adversely affect the environment and other land use activities. 		
Point Number	480.2		
Summary of Decision Requested:	No specific decisions sought, but submission expresses concern at the lack of iwi consultation for road works and traffic detours, particularly on Wainui Road and Gilmour Street, Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> There are clear guidelines as to the consultation process in the District Plan. Sediment is running into the harbour area as a result of this work. It is disgraceful that Gilmour Street is part of the detour when Gilmour Street is not even a proper road. 		
Point Number	480.3		
Summary of Decision Requested:	Amend the rules for Raglan to make it a conservation area - similar to the approach taken in the United Kingdom for the Peak District.		
Decision Reasons:	<ul style="list-style-type: none"> There is no foresight for Raglan's residents who should be able to enjoy their environment. Questions Council's goals. 		
Point Number	480.4		
Summary of Decision Requested:	Add strong precautionary and prohibitive provisions, policies and rules for Genetically Modified Organisms that are the same (or similar) to those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.		
Decision Reasons:	<ul style="list-style-type: none"> GMOs are not needed in New Zealand, there has been insufficient research done on this. GMOs have the potential to adversely affect ecological, economic and resource management values and the social and cultural wellbeing of people, communities and tangata whenua. Once GMOs have been released into the environment, they would be very difficult if not impossible to eradicate. No matter how carefully conditions of consent are crafted, there inevitably remains a risk. 		

- The release of GMOs has the potential to cause significant adverse on the environment which could include:
 - Biological or ecosystem harm;
 - Harm to tangata whenua cultural values such as mauri and tikanga;
 - Harm to the cultural values and lifestyle decision of people and communities;
 - Harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming, and other primary production activities dependent on an uncontaminated environmental brand.
 - Adverse effects include loss of organic GMO-free certification, reputational damage, loss of markets and premiums for GMO-free produce and loss of livelihood.
 - The amendments requested are consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that concern the release, location and management of GMOs where they have potential to adversely affect the environment and other land use activities.

Submitter Number:	481	Submitter:	Bruce and Kirstie Hill
Organisation:	Culverden Farm		
Point Number	481.1		
Summary of Decision Requested:	Amend the approach to identifying Significant Natural Areas and Significant Amenity Landscapes from private land so that identification is provisional based on owners acceptance and therefore contestable submission seeks that Council has disclosed the specific criteria and significance levels for each of these areas, followed by ground-truthing and acceptance by the landowner.		
Decision Reasons:	<ul style="list-style-type: none"> • The mapped Significant Natural Areas and Significant Amenity Landscapes have not been fully investigated and it is unclear how these area have been identified or what a landowner's obligations are. • Rules for these areas potentially render land incapable of reasonable use and could impact on health and safety standards, existing farm practices and a property's capital value. • The consultation process for the Proposed District Plan has not provided sufficient information on how each Significant Natural Area or Significant Amenity Landscape has been defined on private land. • Ecologists report noted that there was incomplete information and it was a desktop exercise. • It can have a serious impact on the farming use of parts of properties and should be properly investigated before being imposed on landowners. 		
Point Number	481.2		
Summary of Decision Requested:	Amend the approach and number of conservation lots that can be created from Significant Natural Areas in Rule 22.4.1.6 RD1 Conservation lot subdivision, by properly accounting for by a transaction which is commensurate with the value of area concerned.		
Decision Reasons:	<ul style="list-style-type: none"> • It is inequitable to disallow conservation lots from indigenous bush areas less than 5ha and set a maximum number of 3 conservation lots from indigenous bush areas greater than 10ha. • Council needs to recognise the values offered by the landowner in the subdivision process that include forfeiting productive land, allowing encroachments onto private land that are enjoyed by the landowner, forfeiting control of the covenanted area and the on-going management obligations and costs associated with maintaining tracks, fencing, drainage and pest control. • Options for monetary compensation must be provided which could include transferable titles. • Encouraging protection of the large, significant and high quality Significant Natural Areas should involve proportionately higher value compensation. 		
Point Number	481.3		
Summary of Decision Requested:	Amend the definition of "farming" by removing the link to soil fertility.		
Decision Reasons:	<ul style="list-style-type: none"> • Clarity is needed in respect to whether the use of stock feed or silage brought in from off-site falls within the definition of 'farming' or 'intensive farming'. 		
Point Number	481.4		
Summary of Decision Requested:	Amend the definition of "intensive farming" in Chapter 13 Definitions, to be more detailed, in the context of Rule 22.4.1.3 RD1 Restricted Discretionary Activities.		
Decision Reasons:	<ul style="list-style-type: none"> • There is no consistency with the activities that are included or excluded from the definition of "intensive farming." • Glasshouses present a significant visual impact on the landscape and do not rely on the fertility of in-situ soils. • There is no consistency with the activities that are included or excluded from the definition of "intensive farming." • It is unclear whether the use of stock feed or silage brought in from off-site might turn a farming activity into intensive farming. 		
Point Number	481.5		
Summary of Decision Requested:	<p>Delete the limits on volume, area and cut in Rule 22.2.3.3 PI Earthworks- Significant Natural Areas where the purpose is to maintain existing farming infrastructure.</p> <p>AND</p> <p>Amend Rule 22.2.3.3 PI Earthworks- Significant Natural Areas, to allow earthworks for new farming infrastructure including fencing, tracks and drains.</p> <p>AND</p> <p>No specific decision sought but submission opposes limits on earthworks within 1.5m of boundaries in Rule 22.2.3.3 PI Earthworks- Significant Natural Areas.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Landowners must be able to maintain existing farm tracks to meet health and safety standards, • It is not possible to repair a track, fence or drain with a volume limit of 50m3. • Fencelines are often along property boundaries and may need earthworks to provide a stable platform. 		
Point Number	481.6		
Summary of Decision Requested:	Delete the limits on volume, area and cuts in Rule 22.2.3.4 PI Earthworks within Landscape and Natural Character Areas, for the purposes of maintaining existing farming infrastructure.		

AND

Amend Rule 22.2.3.4 P1 Earthworks within Landscape and Natural Character Areas to permit earthworks for new infrastructure within these areas such as fencing, tracks and drains.

Decision Reasons:

- Regular and complete maintenance of tracks is essential to meet health and safety requirements.

Point Number

481.7

Summary of Decision Requested:

Amend the limit of 250m² for indigenous vegetation clearance for building and access in Rule 22.2.7 P3 Indigenous vegetation clearance inside a Significant Natural Area as it is not enough allowance for both a platform for building and driveway.

Decision Reasons:

- The location of any building site is highly dependent on topography and access and the 250m² area limit is not sufficient for a building platform and driveway.

Point Number

481.8

Summary of Decision Requested:

Delete the limits in respect to area, species, height, age and location of indigenous vegetation removal in Rule 22.2.8 P1 Indigenous Vegetation clearance outside a Significant Natural Area for the maintenance of productive pasture.

AND

Amend Rule 22.2.8 P1 Indigenous Vegetation clearance outside a Significant Natural Area, to allow vegetation clearance for new farming infrastructure including fencing, tracks and drains;

AND

Amend Rule 22.2.8 P1 Indigenous Vegetation clearance outside a Significant Natural Area, to allow vegetation clearance for new dwellings and buildings including access.

Decision Reasons:

- It is not clear what "outside a Significant Natural Area" means.
- Indigenous vegetation clearance for any farming purpose should be permitted because farming is a permitted activity.
- The setback distance between cleared indigenous vegetation and a waterbody is excessive and inconsistent with other proposed land use policies.
- Over the long term this rule will render land that is not a Significant Natural Area incapable for reasonable use as persistent invasive species encroach on pasture.

Point Number

481.9

Summary of Decision Requested:

Amend Rule 22.3.4.1 P2 Height - Building General, to increase the maximum height limit to 10 metres for buildings within a Significant Amenity Landscape for permitted farming activities and buildings.

OR

Delete the Significant Amenity Landscape overlay from the Proposed District Plan, if the amendments sought to Rule 22.3.4.1 P2 Height-Building General above are not accepted.

Decision Reasons:

- Large parts of some properties containing Significant Amenity Landscapes will render land incapable of reasonable use for activities that are expected in the Rural Zone.
- If an existing farming activity is located within a Significant Amenity Landscape, that activity has been assessed as not having an adverse effect on the amenity landscape.

Point Number

481.10

Summary of Decision Requested:

Delete the proposed limit of 20m³ for fill in Rule 22.2.3.3 P2 Earthworks- Significant Natural Areas.

Decision Reasons:

- It may be necessary to bring in fill to repair a fence line or track and there is no reason for a 20m³ limit.

Point Number

481.11

Summary of Decision Requested:

Amend the number of conservation lots that can be created from Significant Natural Areas in Rule 22.4.1.6 RD1 Conservation lot subdivision, particularly for Significant Natural Areas under 5ha and over 10ha.

AND

Offer suitable monetary compensation for all Significant Natural Areas proportional to the size of the Significant Natural Area.

Decision Reasons:

- It is inequitable to disallow conservation lots from indigenous bush areas less than 5ha and set a maximum number of 3 conservation lots from indigenous bush areas greater than 10ha.
- Council needs to recognise the values offered by the landowner in the subdivision process that include forfeiting productive land, allowing encroachments onto private land that are enjoyed by the landowner, forfeiting control of the covenanted area and the on-going management obligations and costs associate with maintaining tracks, fencing and drainage and pest control.
- Ongoing costs and liabilities to landowners must be calculated and compensated on a per hectare basis.
- Many landowners do not wish to subdivide so the subdivision incentive is somewhat academic.

Point Number

481.12

Summary of Decision Requested:

No specific decision sought but submission opposes the restrictions on subdivision boundaries to avoid dividing a Significant Amenity Landscape in Rule 22.4.2 RD1 Title Boundaries - Natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas.

Decision Reasons:

- Boundaries must be determined by topography and some Significant Amenity Landscapes are already divided by property boundaries.

Point Number

481.13

Summary of Decision Requested: No specific decision sought, but submission opposes the restrictions on subdivision boundaries to avoid dividing a Significant Natural Area in Rule 22.4.3 RD1 Title boundaries- Significant Natural Areas, heritage items, Maori sites of significance and Maori areas of significance.

Decision Reasons:

- Boundaries must be determined by topography and some Significant Natural Areas are already divided by property boundaries.

Point Number 481.14

Summary of Decision Requested: **Delete** Environmental Protection Areas;
AND
Delete Rule 22.4.6 Subdivision of land, containing all or part of an Environment Protection Area.

Decision Reasons:

- An Environmental Protection Area is not defined in the Proposed District Plan and there is no apparent reason for having these as well as Significant Natural Areas.

Point Number 481.15

Summary of Decision Requested: **Delete** the limit of 20m3 for fill in Rule 22.2.3.3 P2 Earthworks - Significant Natural Areas.

Decision Reasons:

- There is no reasons for a 20m3 limit to bring in fill to repair a fence line or a track.

Point Number 481.16

Summary of Decision Requested: **Amend** the rules relating to Significant Natural Areas and Significant Amenity Landscapes to better enable existing practices for activities which are usual and expected in the Rural Zone.

Decision Reasons:

- Such overlays and associated restrictions potentially render land incapable of reasonable use. This has wide ranging impacts on maintenance of health and safety standards, the economics of current farming operations, as well as significant implications on capital land value.

Submitter Number: 482 **Submitter:** Kirstie Hill

On behalf of: Hill Country Farmers Group

Point Number 482.1

Summary of Decision Requested: **Delete** the limits on volume, area and cuts in Rule 22.2.3.4 P1 Earthworks within Landscape and Natural Character Areas, for the purpose of maintaining existing farming infrastructure.

AND

Amend Rule 22.2.3.4 P1 Earthworks within Landscape and Natural Character Areas to permit earthworks, for new infrastructure such as fencing, tracks and drains.

Decision Reasons:

- Regular and complete maintenance of tracks is essential to meet health and safety requirements.

Point Number 482.2

Summary of Decision Requested: **Amend** the limit of 250m2 for indigenous vegetation clearance for building and access in Rule 22.2.7 P3 Indigenous vegetation clearance inside a Significant Natural Area as it is not enough allowance for both a platform for building and driveway.

Decision Reasons:

- The location of any building site is highly dependent on topography and access and the 250m2 area limit is not sufficient for a building platform and driveway.

Point Number 482.3

Summary of Decision Requested: **Delete** the limits in respect to area, species, height, age and location of indigenous vegetation removal in Rule 22.2.8 P1 Indigenous vegetation clearance outside a Significant Natural Area for the maintenance of productive pasture.

AND

Amend Rule 22.2.8 P1 Indigenous vegetation clearance outside a Significant Natural Area, to allow vegetation clearance for new farming infrastructure including fencing, tracks and drains;

AND

Amend Rule 22.2.8 P1 Indigenous vegetation clearance outside a Significant Natural Area, to allow vegetation clearance for new dwellings and buildings including access.

Decision Reasons:

- It is not clear what "outside a Significant Natural Area" means.
- Indigenous vegetation clearance for any farming purpose should be permitted because farming is a permitted activity.
- The setback distance between cleared indigenous vegetation and a waterbody is excessive and inconsistent with other proposed land use policies.
- Over the long term this rule will render land that is not a Significant Natural Area incapable for reasonable use as persistent invasive species encroach on pasture.

Point Number 482.4

Summary of Decision Requested: **Amend** Rule 22.3.4.1 P2 Height - Building General, to increase the maximum height limit to 10 metres for buildings within a Significant Amenity

Landscape for permitted farming activities and buildings.

OR

Delete the Significant Amenity Landscape overlay from the Proposed District Plan if the amendments sought to Rule 22.3.4.1 P2 Height Building General as sought above are not accepted.

Decision Reasons:

- Large parts of some properties containing Significant Amenity Landscapes will render land incapable of reasonable use for activities that are expected in the Rural Zone. If an existing farming activity is located within a Significant Amenity Landscape, that activity has been assessed as not having an adverse effect on the amenity landscape.

Point Number

482.5

Summary of Decision Requested:

Amend the approach to identifying Significant Natural Areas and Significant Amenity Landscapes, for private land so that identification is provisional based on owners acceptance and therefore contestable. Submission seeks that Council discloses the criteria and significance levels for each of these areas, followed by ground-truthing and acceptance by the landowner.

Decision Reasons:

- The mapped Significant Natural Areas and Significant Amenity Landscapes have not been fully investigated and it is unclear how these areas have been identified or what a landowner's obligations are.
- Rules for these areas potentially render land incapable of reasonable use and could impact on health and safety standards, existing farm practices and a property's capital value.
- The consultation process for the Proposed District Plan has not provided sufficient information on how each Significant Natural Area or Significant Amenity Landscape has been defined on private land.
- Ecologist's reports notes that there is incomplete information and it was a desktop exercise.
- It can have a serious impact on the farming use of parts of properties and should be properly investigated before being imposed on landowners.

Point Number

482.6

Summary of Decision Requested:

Amend the definition of "Farming" by removing the link to soil fertility.

Decision Reasons:

- Clarity is needed in respect to whether the use of stock feed or silage brought in from off-site falls within the definition of 'farming' or 'intensive farming'.

Point Number

482.7

Summary of Decision Requested:

Amend the definition of "Intensive Farming", in the context of Rule 22.1.3 RD1 Restricted Discretionary activities.

Decision Reasons:

- There is no consistency with the activities that are included and excluded from the definition of 'intensive farming'.
- It is unclear whether the use of stock feed or silage brought in from off-site might turn a farming activity into intensive farming.

Point Number

482.8

Summary of Decision Requested:

Delete limits on area, and cut in Rule 22.2.3.3 P1 Earthworks - Significant Natural Area where the purpose is to maintain existing farm infrastructure.

AND

Amend Rule 22.2.3.3 P1 Earthworks - Significant Natural Areas, to allow earthworks for new farming infrastructure including fencing, tracks and drains.

AND

No specific decision sought, but submission opposes limits on earthworks within 1.5m of boundaries in Rule 22.2.3.3 P1 Earthworks - Significant Natural Areas.

Decision Reasons:

- Landowners must be able to maintain existing farm tracks to meet health and safety standards,
- It is not possible to repair a track, fence or drain with a volume limit of 50m³.
- Fencelines are often along property boundaries and may need earthworks to provide a stable platform.

Point Number

482.9

Summary of Decision Requested:

Delete the proposed limit of 20m³ for fill in Rule 22.2.3.3 P2 Earthworks - Significant Natural Areas.

Decision Reasons:

- There is no reason for a 20m³ limit to bring in fill to repair a fenceline or track.

Point Number

482.10

Summary of Decision Requested:

Amend the number of conservation lots that can be created from Significant Natural Areas in Rule 22.4.1.6 RD1 Conservation lot subdivision, particularly for Significant Natural Areas under 5ha and over 10ha.

AND

Offer suitable monetary compensation for all Significant Natural Areas proportional to the size of the Significant Natural Area.

Decision Reasons:

- It is inequitable to disallow conservation lots from indigenous bush areas less than 5ha and set a maximum number of 3 conservation lots from indigenous bush areas greater than 10ha.
- Council needs to recognise the values offered by the landowner in the subdivision process that include forfeiting productive land, allowing encroachments onto private land that are enjoyed by the landowner, forfeiting control of the covenanted area and the on-going management obligations and costs associated with maintaining tracks, fencing, drainage and pest control.
- Ongoing costs and liabilities to landowners must be calculated and compensated on a per hectare basis.
- Many landowners do not wish to subdivide so the subdivision incentive is somewhat academic.

Point Number	482.11
Summary of Decision Requested:	No specific decision sought, but submission opposes the restrictions on subdivision boundaries to avoid dividing a Significant Amenity Landscape in Rule 22.4.2 RD1 Title boundaries – natural hazard area, contaminated land, Significant Amenity Landscape, notable trees, intensive farming activities, aggregate extraction areas.
Decision Reasons:	<ul style="list-style-type: none"> Boundaries must be determined by topography and some Significant Amenity Landscapes are already divided by property boundaries.
Point Number	482.12
Summary of Decision Requested:	No specific decision sought, but submission opposes the restrictions on subdivision boundaries to avoid dividing a Significant Natural Area in Rule 22.4.3 RD1 Title boundaries – Significant Natural Areas, heritage items, Maaori sites of significance and Maaori areas of significance.
Decision Reasons:	<ul style="list-style-type: none"> Boundaries must be determined by topography and some Significant Natural Areas are already divided by property boundaries.
Point Number	482.13
Summary of Decision Requested:	Delete Environmental Protection Areas; AND Delete Rule 22.4.6 Subdivision of land containing all or part of an Environmental Protection Area.
Decision Reasons:	<ul style="list-style-type: none"> Environmental Protection Area is not defined in the Proposed District Plan and there is no apparent reason for having these as well as Significant Natural Areas.

Submitter Number:	483	Submitter:	Frederick April
Point Number	483.1		
Summary of Decision Requested:	Amend the Proposed District Plan to create a multi-purpose recreation and events zone alongside a Residential Zone for the 183ha on East Mine Road, Huntly (CFR 805391, CFR SA50A/762, CFR SA 10D/800, CFR 1955501, CFR SA 61B/799, CFR SA 18B/1138, CFR SA 30A/356, SA 40D/985, CFR 251/176, SA 26C/345 and SA 51/131).		
Decision Reasons:	<ul style="list-style-type: none"> It will have educational outcomes for youth. It will have significant employment opportunities. It will improve recreational living and lifestyles for residents through outdoor activities and watersports. It is a great opportunity for Huntly to become a tourist destination. This project has the ability to transform Huntly. It is time that the Council gave 100% support, endorsement and commitment to the beautification of Huntly. 		

Submitter Number:	484	Submitter:	Rudy Van Spreeuwel
On behalf of:	Emza Zader Australia Pty Ltd		
Point Number	484.1		
Summary of Decision Requested:	Delete the Significant Natural Area 3578 from 189 Settlement Road, Pukekohe (see map attached to submission) AND Amend the Significant Natural Area 3579 by increasing it to the boundary line of the property at 189 Settlement Road, Pukekohe (see map attached to submission).		
Decision Reasons:	<ul style="list-style-type: none"> There are no trees, only marked garden land in area 3578 (as marked red on attachment to the submission). There are native trees in the suggested area (as marked green on attachment to the submission). 		

Submitter Number:	485	Submitter:	Ella Stewart
Point Number	485.1		
Summary of Decision Requested:	Allow freedom to ride horses down the tracks to access the Raglan beach.		
Decision Reasons:	<ul style="list-style-type: none"> It would be a shame to not be able to ride in and around Raglan's beautiful beaches. 		

Submitter Number:	486	Submitter:	Louise Whyte
Point Number	486.1		
Summary of Decision Requested:	Add a proposed cycleway around 35 Buckland Road, Tuakau to access the Waikato River via the river stop banks;		

AND

Purchase the land contained within the Waikato River stop banks near Buckland Road, Tuakau by for parkland (see the maps attached to the submission for further detail).

Decision Reasons:

- The Plan allows a unique opportunity to gain land for River access, leisure activities and possibly a park.
- The Council-owned stop banks are wide enough to accommodate large farm vehicles and could easily be an extension of the proposed walkway/cycleway.
- The only current access to the River is via River Road, which is hazardous for pedestrians and cyclists.
- Purchasing this land would allow for a future connection via walkway/cycleway to the River Road access.
- The River is stunning at this location.
- It could become a major attraction to the town, enabling a positive future for its residents.
- Access to this land will become difficult if the land up to Buckland Road becomes Residential.

Point Number 486.2

Summary of Decision Requested: **Amend** the Proposed District Plan to not allow more unsustainable or environmentally practical waste facilities to be located by the River on the land between Buckland Road, Tuakau and the Waikato River.

Decision Reasons:

- The reclaimed alluvial river plains were reclaimed for soil conservation (for rural use) and erosion protection.

Point Number 486.3

Summary of Decision Requested: No specific decision sought, but submission opposes the rezoning of land around River Road, Tuakau from the Business and Rural Zone to the Industrial Zone (see map attached to submission).

Decision Reasons:

- There is a large industrial area already proposed within the District Plan at Bollard Road, Tuakau. All industry should be encouraged to eventually relocate within this one large Industrial Zone.
- The residents of Tuakau wish to have a physical as well as cultural connection with the Waikato River. River road is the only access Tuakau residents and tourists have to the Waikato River. Industry should be discouraged from River Road to allow a safe walkway and/or cycleway to enable safe family access without any detrimental effect from Industry.
- Industry emitting unlawful odour is a long-term problem along River Road. Tuakau has a poor reputation because of this as it affects residents, tourists, and all those that use River Road. Odorous Industry should be discouraged from being located on the only access road to the River and from being located near the River, the River and the River Park being Tuakau's major attraction.
- This proposed spattering of industrial re-zoning outside of the main industrial zone will detrimentally affect Tuakau's future.
- Regional Council has proven to be ineffective in controlling the detrimental effects of some of the operations within their land boundaries on this land proposed to be rezoned. This may attract other industry unable to control affects outside their boundaries to be located within these areas. The area outside these boundaries is important for local amenity.

Submitter Number: 487 **Submitter:** Charlotte Simsar

Point Number 487.1

Summary of Decision Requested: **Allow** free access for horse riding through the paddocks.

Decision Reasons:

- There are not many tracks to ride with horses around Raglan.
- This is access through paddocks, where cows graze.
- The submitter does not see how two or three horses walking through per day could damage the soil.
- It currently leaves barely any other safe areas to ride, leaving only the road, making it unsafe and unpleasant.

Submitter Number: 488 **Submitter:** Jocelyn Stewart

Point Number 488.1

Summary of Decision Requested: **Allow** access to the beach for horse riding using the walking track from Wainui Reserve.

Decision Reasons:

- The submitters have lived there for a long time and there is usually only one horse at a time using that track/walkway.
- The submitter has never noticed any damage to the track from horses.

Submitter Number: 489 **Submitter:** Ann-Maree Gladding

Point Number 489.1

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR4 (a) Prohibited subdivision, to maintain and allow for Transferable Rural Lot subdivisions as a Restricted Discretionary and Discretionary activity throughout the Waikato District.

Decision Reasons:

- The transferable rural lot process simply allows for the transfer of existing titles or consented conservation lots (still allowed for under the draft district plan) to more appropriate areas in the district, there is no net increase in the overall number of development rights across the district.
- The process has been working well for many years in the former Franklin Area and is an effective mechanism for promoting development in more appropriate areas whilst protecting high quality versatile soils.

- For a transferable rural lot subdivision to be a prohibited activity is unnecessary and it compromises the current and proposed objectives for the rural area.
- The natural outcome of the transferable rural lot process is to transfer existing and consented titles from less intensively developed outlying areas to the more intensively developed central areas.
- It seeks to manage growth in the Rural Zone and to avoid the wide dispersal of lots and protection of larger rural blocks.
- The Transferable Rural Lot Provisions of the former Franklin District Plan were designed to protect and enhance the potential use of high quality versatile soils, by encouraging the transfer of surplus Titles to more environmentally sustainable locations. This is consistent with the Draft District Plan objectives and Policies and the Objectives of the Resource Management Act 1991.
- The fact that the former Franklin District is now administered by WDC does not remove the underlying objectives of wiser use of resources. The same resources remain in the same district. The fact that the administering authority may want a consistent set of subdivision rules across the district is not relevant.
- It will prevent the consolidation of existing titles;
- It will not promote the protection of productive land or versatile soils within the District;
- It will not assist in the reorganisation of the wide dispersal of and a reduction in rural titles, and will negate opportunities for the retention of land versatility and larger lot sizes in rural areas and for productive farming units to better manage the use of soils and rural land;
- It will not promote positive effects on the rural environment, rural character and rural amenity;
- It will not reduce reverse sensitivity effects when existing title rights are developed in rural production areas of the District;
- It will not promote outcomes that are consistent with the rural objectives and policies of the draft District Plan.
- The majority of transferable rural lot subdivision applications in the Waikato District are removing titles from the larger productive land holdings, thus reducing or eliminating adverse effects on unplanned and scattered rural residential development in the more remote rural Waikato, and reducing the burden on infrastructure, particularly in more remote areas. If these rights are now restricted to where they currently are within the Waikato District, they will result in the uptake and development of latent capacity in outlying areas of the District, which is inconsistent with and contrary to the objectives and policies.

Point Number 489.2

Summary of Decision Requested: Amend Rule 22.4.1.2 RD1 (a)(iv) General subdivision, as follows:

(iv) *The additional lot must have a proposed area of between ~~8,000m²~~ 4,000m² and 1.6 ha;*

Decision Reasons:

- In the submitters experience with rural subdivisions and discussions with numerous farm owners, the proposed area range of between 8,000m² – 1.6ha would be too large for a rural lifestyle block and will force developers to turn potentially productive farming paddocks into areas that will not be utilised for farming and may become neglected. The best maintenance of open pasture (all classes of soils) is grazing animals. The lots created will be too small to be productive or grazed, yet they are too big to be easily managed as lifestyle properties.
- If a rural site owner is subdividing off an existing farm cottage for instance, the house and curtilage area will be approx. 2000m². This will result in at least 6000m² of potentially productive farming land being wasted or not utilised. The high-class soil rule will restrict this to some degree but just because an area of land is not classified as 'high class soil', it doesn't mean that it can't be used for productive purposes or add valuable support to a farming operation.

Point Number 489.3

Summary of Decision Requested: Delete Rule 22.4.1.4 RD1 (a)(i) Boundary relocation;

OR

Amend Rule 22.4.1.4 RD1 Boundary relocation, to allow for more than two existing titles and allow for boundary adjustments to titles created after 18th July 2018.

Decision Reasons:

- Many landholdings in the Waikato District are made up of several titles and the proposed Boundary Relocation and Rural Hamlet rules will restrict logical layouts that are usually site specific to particular rural properties. Boundary adjustments are a legitimate way to adjust legal boundaries to facilitate access to the land and soil resource, all that generally changes is lines on the title plan and nothing physical on the actual site, the potential for adverse effects are generally minimal.
- The assumption is that the intent of Rule (a) (i) is to prevent making new Conservation lots or the additional title created from the General subdivision rule that is larger. The trouble is that this intent will now potentially restrict or make boundary adjustments tougher for larger rural blocks that may have a title created after 18 July 2018. These newer titles could have been subject to another minor boundary adjustment or could be the larger balance lot of a General Subdivision application. The submitter does not think that a further boundary relocation of these larger lots should be a discretionary activity as it then becomes too restrictive on these larger land holdings that may be relocating boundaries for legitimate reasons. Rule (a) (i) does not recognise the legitimate need to adjust rural lot boundaries to support rural land use and create a better environmental outcome, it also doesn't allow for the logical restructure of landholdings with more than two existing larger titles.

Point Number 489.4

Summary of Decision Requested: Amend Rule 22.4.1.5 RD1 (a)(i) Rural Hamlet Subdivision to remove the maximum number of titles (5) that can be proposed for the subdivision.

AND

Amend Rule 22.4.1.5 Rural Hamlet subdivision to be a more workable approach.

Decision Reasons:

- The current draft Rural Hamlet subdivision rule will not be a workable provision for better restructuring existing titles on many rural properties, especially larger landholdings.
- The rural zone varies drastically throughout the district from open flat countryside predominantly used for dairy farming, to more undulating hilly terrain with scattered mature vegetation predominantly used for dry-stock farming. Often, the most logical subdivision layout on rural properties that preserve the largest area of land for productive purposes and have the least potential for adverse effects on the surrounding environment, are influenced by site specific characteristics such as topography, vegetation, road frontage and existing built development on that particular property. In an ideal world, all new lots clustered together as a hamlet styled subdivision would be great but (unlike the residential zoned land) planning ideology such as the proposed only works on a small minority of the rural zoned land in the District and provision or more desecration needs to be allowed for to cater for these other landholdings.
- In the rural environment especially in the upper Waikato, these physical restraints greatly restrict such a logical layout. Often it may be a far better result for that particular environment to position the existing titles around existing development on the property or at other ends of the property from each other, which could be kilometres apart and accessed off different public roads.

Point Number 489.5

Summary of Decision Requested: Amend Rule 22.4.1.6 RD1 (a) Conservation lot subdivision, to allow for conservation lot subdivisions by way of riparian planting;

AND

Amend Rule 22.4.1.6 RD1 (a) Conservation lot, to provide clarification on enhancement planting to Significant Natural Areas.

Decision Reasons:

- The draft Conservation Lot subdivision rules are generally positive but further allowance can still be made for additional lots through riparian planting of streams and rivers. This will provide incentive for farmers to plant the sides of their waterways, which will obviously bring significant ecological gain to the district. Under the current draft rules, it is unclear if it is saying that the current amount of native vegetation in the Waikato District is adequate.
- The cost to a property owner of protecting, and maintaining; in perpetuity, significant stands of vegetation are substantial, in real financial terms. The cost of appropriate bush covenant fencing alone is currently around \$30 per meter. Including planting costs and ongoing maintenance of the plants and fences, the costs quickly escalate into the hundreds of thousands of dollars. Farmers are

becoming more and more acceptable to riparian planting on their properties but this significant cost will need to be offset to incentivise this ecological enhancement.

- As a close and recent example, under the former Franklin District Council Plan within the Auckland jurisdiction, a significant number of property owners underwent significant ecological riparian planting. Unfortunately through the introduction of the Auckland Unitary Plan, there is no longer any workable provision for conservation lots through riparian planting which has brought about a significant drop in riparian planting. This is all because there is no more incentive for property owners to plant, the submitter subsequently advises the Council to not to make the same mistake as Auckland.
- The usual signoff requirements with ecologists certifying that the riparian planting is self-sustaining would still be applicable.

Point Number 489.6

Summary of Decision Requested: **Amend** Rule 22.3.2 P1 (b)(i) Minor Dwelling, as follows:

The minor dwelling must be located within ~~20m~~ 150m of the dwelling;

Decision Reasons:

- The submitter commends having an actual separation distance stated as the Auckland Unitary plan just says 'in close proximity' which causes significant interpretation issues, however a minor dwelling 20m away from a main dwelling is far too close and does not allow for existing site restraints such as curtilage area, effluent disposal fields and other ancillary buildings.
- Everything in the rural area is at a much larger scale than residential environments and 150m is not far, so it will have no significant increase in potential adverse effects than 20m would.
- 150m will make a huge difference to the functionality of the rural property and will allow some degree of privacy between the main dwelling and minor dwelling.

Point Number 489.7

Summary of Decision Requested: **Delete** Rule 22.3.7.1 P1 (iii) Boundary Setbacks - All boundaries;

AND

Amend Rule 22.3.7.1 P1 (iv) Boundary Setbacks – All boundaries, as follows:

~~(iv)(iii)~~ 12m from the boundary of an adjoining site. ~~that is less than 6m~~

Decision Reasons:

- 10m has always worked well in the Franklin area.
- 25m is far too long and restrictive and there is no good reason for it to be this long.
- In large open rural properties, there is no difference to the naked eye between 25m and 12m but when picking appropriate building sites, a 25m no build area does restrict houses from being built on more appropriate sites.

Point Number 489.8

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P2 (iii) Boundary Setbacks – All boundaries, as follows:

~~12m~~ 5m from every boundary other than a road boundary.

Decision Reasons:

- 12m is far too long and restrictive for a non-habitable building.
- Many people move to rural blocks to have space for a garage or shed, having these 12m from the boundary is too restrictive.

Point Number 489.9

Summary of Decision Requested: **Amend** Rule 22.3.7.1 P3 (iii) Boundary Setbacks – All boundaries, as follows:

~~25m~~ 12m from every boundary other than a road boundary.

Decision Reasons:

- 25m is far too long and restrictive, there is no good reason for it to be this long.
- These smaller sized rural blocks are usually created on more undulating and low class soils and a 25m boundary setback will greatly restrict where a dwelling can be built.

Point Number 489.10

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (a)(i) Subdivision – General, as follows:

(i) Proposed lots must have a minimum net site area of ~~450m²~~ 400m², except where the proposed lot is an access allotment or utility allotment or reserve to vest;

Decision Reasons:

- A 450m² minimum lot size is too large and restrictive.
- Smaller lot sizes are generally more popular now for easier maintenance and 400m² is still large enough to fit a decent sized dwelling.

Point Number 489.11

Summary of Decision Requested: **Amend** Rule 16.4.1 RD1 (a)(iv) Subdivision – General, to have an area requirement of 1ha or similar before triggering a "rear lot" rule.

Decision Reasons:

- The draft rule does not seem to be very workable for smaller infill subdivisions.
- This rule should only be applicable to larger subdivision sites.

Point Number 489.12

Summary of Decision Requested: **Delete** Rule 22.4.1.2 RD1 (a)(v) General subdivision.

Decision Reasons:

- Subdivision rules have to be clear and easy to understand and not open for interpretation between the Council planner and developer / agent as it wastes everyone's time and money. This rule doesn't seem to make any logical or practical sense and will be far too difficult to administer or interpret correctly in the rural environment and the potential gains are negligible.

- The rule will trigger an expensive Land use Capability Report for the very small amount of soil proposed. The General Subdivision rule allows for a 2-lot subdivision of a 20 hectare sized lot, with one of the lots being between 8000m² and 1.6 hectares. It is unclear if this rule means that if one has a 20 hectare sized title that has 1 hectare of high class soil, 80% of that high class soil can be on the smaller lot and 20% on the larger lot, or if it is the other way round.
- The objectives and policies promote the protection of high-class soil, which is encouraged but this rule makes compliance harder than it needs to be with no actual gain. Due to the size restrictions on the new lot being created (8000m² - 1.6 ha), the maximum amount of high class soil that could ever be removed from production is 8% of the overall property (based on a 20 hectare sized site) size that would never be bigger enough to be economically productive in the first place. Most titles eligible for this subdivision opportunity will be much larger than 20 hectares, so the overall potential loss of high class soil in terms of an overall percentage will be significantly less and negligible in terms of the overall scale of the rural property.
- Too much emphasis is put on the percentage of high class soils on a particular property, it would be more appropriate to be in terms of the actual size of the high class soils. For instance, a larger rural property that only has say 10% high class soils may have significantly more high-class soil than a smaller property that has say 80% high class soils. The percentage rule does not practically achieve what it intends to.

Point Number 489.13

Summary of Decision Requested: Amend Rule 22.4.1.5 NCI Rural Hamlet Subdivision, to become a discretionary activity if Rules 22.4.1.5 RD1 (a)(i-v) are not met rather than a non-complying activity status.

Decision Reasons:

- Making a rural subdivision application a Non-Complying activity for creating a better overall result for that particular environment is too restrictive and needs to at least become a Discretionary activity.
- The submitters are currently working on a subdivision where they are restructuring eight existing contiguous titles on a large landholding. The title structure is currently very untidy with titles made up of various parcels at other ends of the property. They will be relocating the titles around existing development on the property or locations that will have least effect on the rural landscape, whilst trying to preserve a larger balance for rural production; they are simply bringing some logical structure to the landholding. This same application would be a non-complying application under the proposed rules, which does not seem right.
- In some cases (like the above), it may also be better and cleaner to have two large balance lots say if they are over 100 hectares in size. This rule needs rethinking, as the submitter does not think it will work as well as it could do 'on the ground'. This rule is only going to work effectively on a small minority of rural properties, especially in the upper Waikato District.

Point Number 489.14

Summary of Decision Requested: Amend Rule 22.3.7.1 P4 (iii) Boundary Setbacks – All boundaries, as follows:

~~±2m~~ 5m from every boundary other than a road boundary.

Decision Reasons:

- 12m is far too long and restrictive for a non-habitable building.
- Many people move to rural blocks to have space for a garage or shed, having these 12m from the boundary is too restrictive.

Point Number 489.15

Summary of Decision Requested: Amend Rule 22.3.7.2 P1 (iv) and (v) Building setback sensitive land use, to add text to clarify that the setback distances are taken from the actual extraction area only and not from the legal boundaries of the title that contains the extraction area;

OR

Amend the definition of "Aggregate Extraction Area" in Chapter 13 Definitions, to clarify that the setback distances are taken from the actual extraction area only and not from the legal boundaries of the title, that contains the extraction area.

Decision Reasons:

- The Council has interpreted the current operative rule incorrectly on subdivisions, and it has cost the submitter's clients a lot of money to legally clarify.

Point Number 489.16

Summary of Decision Requested: Amend Rule 22.3.7.2 P1 (vii) Building setback sensitive land use, to be 300m from the actual intensive farming activity, rather than the boundary of the site. Submission seeks rewording and clarification of the rule.

Decision Reasons:

- If there is an intensive farming activity at one end of a very large site, it is unfair that a neighbouring property at the other end of the site (potentially several 100 meters away) cannot subdivide or develop because they are within 300m of the site boundary.
- It just does not make logical sense.
- One neighbouring property may be 301m away from the activity and can subdivide or develop, however a property that may be a 1000m or more away from the activity cannot because they are still within 300m of the site boundary.

Point Number 489.17

Summary of Decision Requested: Amend Rule 22.4.9 RD1 (a)(ii) Building platform, as follows:

(iii) Has an average gradient not steeper than ~~4:8~~ 1:6;

Decision Reasons:

- An average of 1:8 is too restrictive in the rural area, especially in the upper Waikato District, where the building sites are more likely to be on more undulating topography.
- The objectives and policies promote new lots away from high class soils, this will force new lots and their building sites onto steeper topography.
- A grade of 1:6 is still very workable as long as a geotechnical report supports the location.

Point Number 489.18

Summary of Decision Requested: Delete Rule 23.4.2 RD1 (a) General subdivision;

AND

Amend the zoning of Country Living Zoned properties to the Village Zone;

AND

Amend Rule 24.4.1 RD1 (a) Subdivision-General as follows:

(a) Proposed lots must have a minimum net site area of ~~3,000m²~~ 2,000m², except where the proposed lot is an access allotment, utility allotment or reserve to vest.

Decision Reasons:

- The Countryside Living Zone provides for an inefficient rural -residential living opportunity. At a minimum lot size of 5000m², the lots created are too small to be productive or grazed, yet they are too big to be easily managed as lifestyle properties.
- A smaller lot size of 2000m² still creates a rural-residential character, of open space, but at the same time can be planted, fenced, mowed and maintained easily.
- New houses are generally no larger than 300m² and an effluent disposal field is generally 600m² in size, this still leaves over 1000m² for additional curtilage area and will maintain consistency with the draft objectives and policies of this zone whilst making more efficient use of the land. An appropriate level of amenity is still achieved, yet at the same time there is a lower intensity of development, and a rural outlook and character.

Submitter Number: 490 **Submitter:** Jack Mounsey
Organisation: Altus Intelligence

Point Number 490.1
Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.
Decision Reasons:

- The submitter is a local who works on and uses the airfield.

Point Number 490.2
Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.
Decision Reasons:

- The submitter is a local who works on and uses the airfield.

Submitter Number: 491 **Submitter:** Dwayne Martin
Organisation: Altus Intelligence

Point Number 491.1
Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.
Decision Reasons:

- The submitter is interested in the development of the airfield, both commercially and residentially.

Point Number 491.2
Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.
Decision Reasons:

- The submitter is interested in the development of the airfield, both commercially and residentially.

Submitter Number: 492 **Submitter:** Ryan Cadwallader
Organisation: Altus UAS

Point Number 492.1
Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.
Decision Reasons:

- The submitter is a local resident with local interest.

Point Number 492.2
Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.
Decision Reasons:

- The submitter is a local resident with local interest.

Submitter Number: 493 **Submitter:** Jackie Colliar

Point Number 493.1

Summary of Decision Requested: Amend the Proposed District Plan to ensure that the objectives, policies, principles and intent of the Tangata Whenua Chapter are provided for across the Plan and how they are implemented.

Decision Reasons:

- Submission supports the introduction of a specific Chapter addressing Tangata Whenua concerns, issues and opportunities.
- It is important that Tangata Whenua issues are not simply addressed in this Tangata Whenua chapter but throughout the proposed consent plan, to ensure a holistic approach is taken to resource management, consistent with the principles of whakapapa, whanaunatanga, tangata whenuatanga, and kaitiaki.

Point Number 493.2

Summary of Decision Requested: Amend the Proposed District Plan to allow for greater use of Maaturanga Maaori.

Decision Reasons:

- Submitter would expect that Waikato District Council would be looking to Maaturanga Maaori to remedy adverse effects of development.
- Matauranga Maaori is increasingly being used as conditions of resource consents and in the identification of restoration projects as an alternative to engineering solutions.

Point Number 493.3

Summary of Decision Requested: Amend the Proposed District Plan after engaging with Waikato-Tainui and mana whenua to ensure that the Waikato-Tainui Environmental Plan, Tai Tumu, Tai Pari, Tai Ao and marae environmental plans have been included in the Waikato District Plan.

Decision Reasons:

- The proposed plan should signal and provide for greater opportunities to utilise Maaturanga Maaori for the benefit of the environment.
- There may be future opportunities to develop initiatives and programs of work where marae and Maaori owned land is better utilised for the benefit of the land owners.

Point Number 493.4

Summary of Decision Requested: Amend the Proposed District Plan to integrate the concept of environmental enhancement including in the Biodiversity Offsetting provisions.

Decision Reasons:

- No reasons provided.

Point Number 493.5

Summary of Decision Requested: Amend the Proposed District Plan and maps to include the Waikato River in its entirety as both an Outstanding Natural Feature and Outstanding Natural Landscape.

Decision Reasons:

- Submission does not support the assessment of and non-inclusion of the Waikato River as an Outstanding Natural Feature and/or Landscape in its entirety.
- The submitter believes that the Waikato River must be viewed holistically and therefore do not believe that parts of the Waikato River can be cut into sections.
- The assessment of the Waikato River as Outstanding Natural Feature and Landscape is both a historic and contemporary issue. Beyond the rich history of the Waikato River pre and post European settlement, a variety of legislative and policy directions have been developed that support the identification of the Waikato River as an Outstanding Natural Feature.
- The Proposed Plan and maps provide for the Waikato River as an Outstanding Natural Feature, only from the river delta to inside the river mouth. Submitter considers the Waikato River is an Outstanding Natural Feature in its entirety and the reasons for it not attaining regional significance was based on interpretation and a lack of work on behalf of those researching the cultural significance of the river.

Point Number 493.6

Summary of Decision Requested: Amend the Proposed District Plan to include a Waikato River Corridor Zone to recognise the special status and importance of the Waikato River.

Decision Reasons:

- The Waikato River must be viewed holistically and therefore parts of the Waikato River can not be cut into sections.

Point Number 493.7

Summary of Decision Requested: Amend the Proposed District Plan to provide greater clarity as to what information must be provided when developing a Concept Management Plan.

Decision Reasons:

- The submitter seeks additional information to the implementation of the plans.
- Whilst the introduction of the Concept Management Plans and the potential for reduced regulation is positive, the submitter wants to ensure that the development of these is not overly onerous.
- The submitter does not want to see individual marae or Maaori freehold land owners required to provide a Concept Management Plan and then still require further resource consents applications to satisfy district plan requirements.
- The introduction of Concept Management Plans is generally supported.
- The ability of Marae or trusts to develop Maaori Freehold Land has historically proven challenging and any initiative which remedies this is generally supported.

Point Number 493.8

Summary of Decision Requested: **Amend** the Proposed District Plan to provide further information as to how Concept Management Plans will be implemented as part of a Resource Management Act process.

Decision Reasons:

- The submitter is of the opinion that the development and process of Concept Management Plans requires greater explanation in the Proposed District Plan.
- Whilst submitter supports supports ease of development on marae and Maaori freehold land, the potential still remains for a lengthy consenting process.

Point Number 493.9

Summary of Decision Requested: **Amend** the Proposed District Plan to provide greater clarity to the application of the Plan if a Concept Management Plan is not developed.

Decision Reasons:

- The submitter seeks greater clarification in the Proposed Plan, as to the application of the plan zoning when a concept management plan is not developed.
- It is presumed that the underlying zoning will apply.
- Submitter understands that Marae and Papakainga housing will default to Discretionary Activity status without an approved Concept Management Plan. This would appear to be a restrictive activity status for what could be small scale development.

Point Number 493.10

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure consistency of wording in the rural and residential zones, in relation to the approval process for a Concept Management Plan.

Decision Reasons:

- If the underlying zoning will apply, this could create issues for those located in residential and rural zones.

Point Number 493.11

Summary of Decision Requested: **Provide** greater clarity as to who resources the development of Concept Management Plans and what council information and assistance will be provided to Marae and/or trusts.

Decision Reasons:

- No reasons provided.

Point Number 493.12

Summary of Decision Requested: **Amend** the Proposed District Plan to provide for the most enabling provisions to facilitate the development of marae and papakainga throughout the district.

Decision Reasons:

- Submitter understands that Marae and papakainga housing will default to Discretionary Activity status without an approved Concept Management Plan. This would appear to be a restrictive activity status for what could be small scale development.
- Aside from Resource Management Act issues around Concept management Plans, the submitter understands the key benefits being the development of papakainga housing and the ability to futureproof in some situations future land use.
- This is supported provided additional resource consents are not required to satisfy district plan requirements.

Point Number 493.13

Summary of Decision Requested: **Add** a new district-wide Maaori land chapter that includes specific objectives and policy framework, a wider range of activities relevant to Maori land such as urupa and koohangas (could be specifically identified rather than just covered by the definition of "Marae Complex") and would apply District-wide.

Decision Reasons:

- The submitter considers a more effective and efficient method of providing for the use and development of Maaori land in accordance with maatauranga and tikanga is by way of a district-wide Maaori land chapter.
- The use of the proposed Concept Management Plans could provide for Permitted Activities, should the clarification of the Concept Management Plans sought from this submission occur.
- In addition to the practical benefits, this would ensure that the Tanagata Whenua Chapter as notified is brought through the entire plan, not simply a heading at the beginning of the proposed plan. This approach has been successfully implemented in the Auckland Unitary Plan.

Point Number 493.14

Summary of Decision Requested: **Retain** the activity status and clearance thresholds for indigenous vegetation clearance for Marae, dwellings and papakainga on Maaori Freehold Land or Maaori Customary Land in the Proposed District Plan.

Decision Reasons:

- The Proposed District Plan provides for the clearance of indigenous vegetation (both within identified significant natural areas and outside of significant natural areas) on Maaori Freehold Land or Maaori Customary Land for the purpose of a Marae complex (1500m2), dwellings (500m2 per dwelling) and a papakainga building (500m2), as a permitted activity.
- If provisions cannot be compiled with then a resource consent for a discretionary activity (clearance of indigenous vegetation within a significant natural area) or restricted discretionary activity (clearance of indigenous vegetation outside of a significant natural area) is required.

Point Number 493.15

Summary of Decision Requested: **Amend** the Proposed District Plan to provide for earthworks in Significant Natural Areas that are for the establishment of Marae, papakainga, dwellings and associated access, parking and manoeuvring as a permitted activity.

Decision Reasons:

- It appears however that earthworks within significant natural areas and associated with Marae, papakainga and dwellings are not afforded the same permitted status as vegetation clearance; they would be a restricted discretionary activity.
- Only the maintenance of existing tracks, fences or drains are permitted within certain parameters.
- There seems little point in providing for a permitted indigenous vegetation clearance for these activities but then requiring a resource consent for any earthworks.
- As currently drafted a resource consent for a restricted discretionary activity would potentially need to be obtained to establish building platforms and access.
- The submitter supports the ability to clear indigenous vegetation for the purpose of establishing these activities on Maaori Freehold Land or Maaori Customary Land. However, I seek that provision be made in the earthworks in Significant Natural Areas rules to allow earthworks associated with Marae, papakainga and dwellings as a permitted activity.
- The Proposed District Plan also provides for indigenous vegetation clearance associated with the gathering of plants in accordance with Maaori customs and values as a permitted activity. This is supported.

Point Number 493.16

Summary of Decision Requested: **Amend** Policy 4.7.3 (xvi) Residential Subdivision, to refer to low impact stormwater design, to improve consistency with Policy 6.4.7 Stormwater which does mention low impact design being adopted where appropriate

Decision Reasons:

- Submission seeks that the proposed District Plan utilizes Low Impact Design in all new developments.

Point Number 493.17

Summary of Decision Requested: **Amend** the Proposed District Plan to re instate deferred zoning to a point in time when Waikato District Council have clarity around their infrastructure and how the areas will be serviced.

Decision Reasons:

- The Proposed Waikato District Plan 'live zones' or assigns Residential Zoning to areas of land that were previously Rural Zoned/Future Urban/Deferred Zones.
- For most of this land there is uncertainty around infrastructure timing and funding and structure planning is yet to be undertaken.
- Given the wastewater issues that the Waikato District Council currently have and are facing in the future, it seems almost impossible that Waikato District Council infrastructure will be able to cope with the live zoning of the district.
- The submitter is concerned that live zoning will create an expectation, that the Waikato River will absorb greater volumes of wastewater and stormwater discharge, an expectation that is contrary to and does not give effect to the Vision and Strategy for the Waikato River.
- The submitter strongly opposes this proposition and believe deferred zoning is required in most if not all locations that cannot be catered for through existing infrastructure.

Point Number 493.18

Summary of Decision Requested: **Amend** Chapter 14 Infrastructure and Energy, to provide clear provisions to manage the effects of infrastructure and energy activities on Maaori Areas of Significance and Maaori Sites of Significance. This may include making amendments to the activity status, rules and defining terms such as "identified areas."

Decision Reasons:

- The first paragraph of Chapter 14 Infrastructure and Energy states that the zone chapters and their associated overlays, objectives, policies and rules do not apply to infrastructure and energy activities unless specifically referred to within the Infrastructure and Energy Chapter. Chapter 14 is largely designed to be self-contained and standalone.
- The submitter seeks clarity as to what activity status and provisions would apply to infrastructure and energy activities proposed on Maaori Areas of Significance or Maaori Sites of Significance.
- Throughout the Chapter the terminology 'identified areas' is used. This term is not defined in Chapter 13 definitions and therefore it is unclear if this is intended to capture Maaori Areas of Significance or Maaori Sites of Significance.
- Without clear provisions regarding infrastructure and energy activities in Maaori Areas of Significance or Maaori Sites of Significance there is a risk that these areas and sites may be adversely affected by activities with very few checks and balances in place.
- It is important to note that not all Areas of Significance to mana whenua are listed or public knowledge; this is well understood by all parties.

Point Number 493.19

Summary of Decision Requested: **Withdraw** or place on hold the Proposed District Plan Review Process to allow for the Hazards Chapter to be developed, integrated and considered as part of a thorough District Plan review process.

Decision Reasons:

- The submitter is concerned that the Natural Hazards Chapter has been omitted from the notified proposed district plan.
- It is very challenging to consider a proposed district plan without a natural hazards chapter and how a future inserted natural hazards chapter will relate to other chapters in the plan.
- Given the vast array of natural hazards in the Waikato District, the submitter is of the opinion that it is not realistic to progress the plan without this chapter being considered in tandem with all the other chapters of the plan.
- The submitter considers that this is a major flaw in the process and to ensure consistency and integration across the plan, the plan review should be placed on hold to allow for the Hazards Chapter to be considered in conjunction with all other proposed chapters of the district plan.

Point Number 493.20

Summary of Decision Requested: Amend the Proposed District Plan to include integrated catchment management planning as a method of sustainably managing land development and Three Waters infrastructure.

Decision Reasons:

- The submitter would like to see, integrated catchment management planning used as a tool to help manage the form and function of Three Waters infrastructure in an integrated, effective, efficient, functional, safe and sustainable manner, particularly in urban centres.
- Water Impact Assessments should also be used as a tool to assess and ensure Three Waters integration at a more detailed level.

Point Number 493.21

Summary of Decision Requested: Amend the Proposed District Plan following engagement with Waikato-Tainui and mana whenua to ensure that respective land development plans and opportunities are adequately provided for.

Decision Reasons:

- The Proposed Plan should signal and provide for greater opportunities to utilise Matauranga Maori for the benefit of the environment.
- There may be future opportunities to develop initiatives and programs of work where Marae and Maori owned land is better utilised for the benefit of the land owners.

Point Number 493.22

Summary of Decision Requested: Undertake a Natural Character Assessment of the Waikato River to determine if there are any areas of High or Outstanding Natural Character.

Decision Reasons:

- It is also a concern that no natural character assessment has been undertaken for the Waikato River.
- The submitter believes that the Waikato River must be viewed holistically and therefore do not believe that parts of the Waikato River can be cut into sections.

Point Number 493.23

Summary of Decision Requested: Amend the definition of "Maori Customary Land" within Chapter 13 Definitions to ensure consistency with section 129(2) (a) of the Te Ture Whenua Maori Act 1993.

Decision Reasons:

- The submitter seeks the definitions applying to Maori land are clarified.
- Some definitions remain undefined and very broad.
- The submitter seeks greater clarity of these definitions.

Point Number 493.24

Summary of Decision Requested: Recognise tikanga and Maatauranga Maori in the Blueprint and structure plan processes.

Decision Reasons:

- The submitter is pleased that structure plans were referenced in various parts of the proposed district plan, however there appears to be an absence of structure plans when attempting to locate them in the plan.
- The submitter understands a 'Blueprinting' exercise is currently underway and will provide the basis for any future structure plans.
- Whilst submission supports this initiative, especially considering the growth challenges that the district faces in the north; the timing of this process is unfortunate and would have been more effective if the process had been undertaken pre the notification of the Proposed District Plan.
- The submitter is concerned that the Blueprinting exercise and potential structure plans will require plan change processes to implement as part of the district plan.
- Locations such as Huntly, Mercer and Pokeno are in need of high-level planning assessment and it is disappointing that resource and time be required to get these guiding plans part of the district plan.
- The submitter is also of the opinion that any structure plans or Blueprinting exercises should recognise Waikato-Tainui tikanga and Maatauranga Maaori, to reflect the districts rich Maaori heritage.

Point Number 493.25

Summary of Decision Requested: Amend the Proposed District Plan to clarify situations where low impact design is not appropriate, as provided for in the Proposed District Plan.

Decision Reasons:

- Submission seeks that the proposed District Plan utilizes Low Impact Design in all new developments.

Point Number 493.26

Summary of Decision Requested: Retain the provisions allowing for indigenous vegetation clearance associated with the gathering of plants in accordance with Maori customs and values as a Permitted Activity.

Decision Reasons:

- Submitter supports these provisions.

Point Number 493.27

Summary of Decision Requested: No specific decision sought, but submission supports the introduction of a specific chapter addressing Tangata Whenua concerns, issues and opportunities.

Decision Reasons:

- No reasons provided.

Point Number 493.28

Summary of Decision Requested: No specific decision sought, but submission supports efforts to identify areas of high and outstanding natural character and outstanding natural features and landscapes, the engagement of experts and with mana whenua.

Decision Reasons:

- No reasons provided.

Point Number 493.29

Summary of Decision Requested: No specific decision sought, but submission generally supports the introduction of concept plans.

Decision Reasons:

- The ability of Marae trusts to develop Maori freehold land has historically proven challenging and any initiative that remedies this is generally supported.

Point Number 493.30

Summary of Decision Requested: No specific decision sought, but submission supports referencing of structure plans but notes the absence of structure plans in the Proposed District Plan.

Decision Reasons:

- No reasons provided.

Point Number 493.31

Summary of Decision Requested: **Retain** the ability to clear indigenous vegetation for the purposes of establishing a Marae complex, dwellings and papakainga building on Maori Freehold Land or Maaori Customary Land.

Decision Reasons: Supports the ability to clear indigenous vegetation for these activities.

Point Number 493.32

Summary of Decision Requested: **Amend** the Proposed District Plan to utilise low impact design in all new developments.

Decision Reasons: No reason provided.

Point Number 493.33

Summary of Decision Requested: **Amend** the definition of "Marae Complex" in Chapter 13 Definitions, although submission does not set out specific amendments sought.

Decision Reasons:

- No reasons provided.

Point Number 493.34

Summary of Decision Requested: **Amend** the definition of "Maori Freehold Land" within Chapter 13 Definitions, to ensure consistency with section 129(2)(b) of the Te Ture Whenua Maaori Act 1993.

Decision Reasons:

- The submitter seeks the definitions applying to Maaori land are clarified.
- Some definitions remain undefined and very broad.
- The submitter seeks greater clarity of these definitions.

Point Number 493.35

Summary of Decision Requested: **Put** the District Plan review process on hold so that outcomes of the blueprinting exercise can be accommodated in the District Plan, including the development of structure plans

Decision Reasons:

- The submitter is pleased that structure plans were referenced in various parts of the proposed district plan, however there appears to be an absence of structure plans when attempting to locate them in the plan.
- The submitter understands a 'Blueprinting' exercise is currently underway and will provide the basis for any future structure plans.
- Whilst submission supports this initiative, especially considering the growth challenges that the district faces in the north; the timing of this process is unfortunate and would have been more effective if the process had been undertaken pre the notification of the Proposed District Plan.
- The submitter is concerned that the Blueprinting exercise and potential structure plans will require plan change processes to implement as part of the district plan.
- Locations such as Huntly, Mercer and Pokeno are in need of high-level planning assessment and it is disappointing that resource and time be required to get these guiding plans part of the district plan.
- The submitter is also of the opinion that any structure plans or Blueprinting exercises should recognise Waikato-tainui tikanga and Maatauranga Maaori, to reflect the districts rich Maaori heritage.

Point Number 493.36

Summary of Decision Requested: **Amend** the Proposed District Plan to provide setbacks from waterways that are consistent with Proposed Plan Change 1 to the Waikato

Decision Reasons:

- The proposed Waikato District Plan provides for Earthworks in specific zones. Concerned that the earthworks setbacks do not adequately protect waterways and fail to be consistent with the notified Proposed Plan Change 1 to the Waikato Regional Plan.
- This plan change process, triggered by the need to give effect to the Vision and Strategy for the Waikato River, requires a minimum setback of 5m from a waterway (for cropping only) to be considered a permitted activity.
- The Proposed Waikato District Plan allows for a 1.5m setback in the residential zone and appears to have no setbacks at all for earthworks in the rural zone.
- The submitter does not believe that this lack of setback for earthworks from a waterway is appropriate and has failed to have regard to the Vision and Strategy for the Waikato River and the Waikato-Tainui Environmental Plan.
- As a minimum it would be anticipated that the Proposed District Plan change would be consistent with Proposed Plan Change 1 to Waikato Regional Plan.

Point Number 493.37

Summary of Decision Requested: Retain earthworks on Maaori Sites of Significance and Maaori Areas of significance as a restricted discretionary activity.

Decision Reasons:

- Earthworks on Maaori Sites of Significance and Maaori Areas of significance are a restricted discretionary activity. Submitter supports this as early warning when such activities are being undertaken.

Submitter Number: 494 **Submitter:** Derek Tate
On behalf of: D & J Tate

Point Number 494.1

Summary of Decision Requested: Delete the Airport Obstacle Limitation Surface Overlay from the property at 219 Woolrich Road, Te Kowhai.

Decision Reasons:

- Council staff do not have a clear understanding as to how this change was decided e.g. using what methodology
- Council staff do not have an understanding as to why the Airport Obstacle Limitation Surface is on the property.
- Council staff do not know how the overlay will affect the property, as some of it is the airfield's height.
- Height restrictions are in place under the Operative District Plan.

Point Number 494.2

Summary of Decision Requested: Delete the Significant Natural Area from the property at 72 James Road, Huntly.

Decision Reasons:

- The mapped Significant Natural Area contains no significant vegetation or natural habitat.
- The land is in pasture.
- It has a high water table when Lake Hakanoa is flooding during the winter.
- There are some bushes growing due to the wet area.
- Council have previously visited the site and agreed to remove the Significant Natural Area in 2015.

Point Number 494.3

Summary of Decision Requested: Delete the Significant Amenity Landscape from the property at 185B Hakarimata Road, Ngaruawahia.

Decision Reasons:

- This is a very small area of land that is separated from the River Bank by Hakarimata Road.
- This area on the submitter's property is flat, in pasture and includes a house.

Point Number 494.4

Summary of Decision Requested: Delete the Significant Natural Area from the property at 185B Hakarimata Road, Ngaruawahia.

Decision Reasons:

- The proposed is not just a name change. It is changing the property from making the owner able to making the owner unable to do anything easily, such as cutting the tree.
- The proposed overlay is changing this property into a Reserve for the public, with no compensation for landowners.

Point Number 494.5

Summary of Decision Requested: Delete the Outstanding Natural Feature from the property at 185B Hakarimata Road, Ngaruawahia.

Decision Reasons:

- The ONF has been arbitrarily placed on the property without any due diligence as to what is around it. i.e grass, pine forest.
- There is already policy in place to preserve/protect this area, re 60m line.
- The ONF also restricts access within the property for future foresting of the pine forest.
- The ONF is changing this property into a reserve for the public with no compensation for the landowner.

Submitter Number: 495 **Submitter:** Norris Peart

Point Number	495.1
Summary of Decision Requested:	Amend the boundary of the Maaori Site of Significance overlay R14/51 at 274 Okete Road, Raglan so that the southern boundary is aligned with the existing fence protecting the site.
Decision Reasons:	<ul style="list-style-type: none"> The mapped area of the Maaori Site of Significance R14/51 does not align with the area historically and currently protected by the existing landowners, whose family has farmed there since 1910. The currently protected area is considerably larger than required to protect the sites.
Point Number	495.2
Summary of Decision Requested:	Amend the boundary of the Natural Character overlay at 274 Okete Road, Raglan so that the southern boundary is aligned with the existing fence put in place over 40 years ago in consultation with Council to protect these areas, including Maaori Site of Significance R14/51.
Decision Reasons:	<ul style="list-style-type: none"> The mapped area of the Natural Character does not align with the area historically and currently protected by the existing landowners, whose family has farmed there since 1910. The existing protected area was put in place over 40 years ago in consultation with Council. The proposed area has large open spaces of grazing land.
Point Number	495.3
Summary of Decision Requested:	Amend the boundary of the Significant Natural Area at 274 Okete Road, Raglan so that the southern boundary is aligned with the existing fence put in place over 40 years ago, in consultation with Council to protect these areas, including Maaori Site of Significance R14/51.
Decision Reasons:	<ul style="list-style-type: none"> The existing protected area was put in place over 40 years ago in consultation with Council. The proposed area has large open spaces of grazing land.

Submitter Number:	496	Submitter:	Andrea Millar
Organisation:	The Department of Corrections		
Point Number	496.1		
Summary of Decision Requested:	Add a new definition for "community corrections activity" in Chapter 13 Definitions, as follows: <u>Community corrections activity</u> <i>Means the use of land and buildings for non-custodial services for safety, welfare and community purposes, including probation, rehabilitation and reintegration services, assessments, reporting, workshops and programmes, administration, and a meeting point for community works groups.</i> And any other consequential amendments required to give effect to this relief.		
Decision Reasons:	<ul style="list-style-type: none"> Non-custodial corrections activities (and the associated facilities) do not clearly fall within any of the current activity definitions of the Plan, and consequently are not specifically provided for under the rules of any of the zones. It would then default to discretionary or non-complying. Community corrections activities are essential social infrastructure and play a valuable role in reducing reoffending. They enable people and communities to provide for their social and cultural well-being and for their health and safe 		
Point Number	496.2		
Summary of Decision Requested:	Amend the definition of "community activity" in Chapter 13 Definitions, as follows: <i>Community activity</i> <i>Means the construction and use of public land and buildings which provides for individual or community health, welfare, care, safety, recreation, cultural, ceremonial, spiritual, community corrections activities, art and craft purposes and includes cemeteries.</i> AND Any other consequential amendments required to give effect to this relief.		
Decision Reasons:	<ul style="list-style-type: none"> A definition is provided for community activity but it does not specifically incorporate community corrections activities. Community corrections activities are essential social infrastructure and play a valuable role in reducing reoffending. They enable people and communities to provide for their social and cultural well-being and for their health and safety. This is to allow for their reference and integration with the Plan. The amendment of the definition of community activity will result in community corrections activities becoming a subset of this definition. Adopting this approach means that community corrections activities can be considered together with community activities throughout the Plan where this is appropriate, whilst also allowing reference to them specifically where this is necessary. 		
Point Number	496.3		
Summary of Decision Requested:	Retain the definition of "correctional facility" in Chapter 13 Definitions, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> This will enable custodial corrections activities to be considered and provided for appropriately. 		
Point Number	496.4		
Summary of Decision Requested:	Retain the definition of "residential activity" in Chapter 13 Definitions as notified.		
Decision Reasons:	<ul style="list-style-type: none"> The submitter has self-care units both within the grounds of its correctional facilities and in the community. Self-care units are residential accommodation that are occupied by offenders nearing release (located on prison grounds) or following release (located in the 		

- community). They are designed to assist offenders with integration back into the community. They encompass a household living scenario. They have all the characteristics of residential activities.
- The proposed definition reflects living and care arrangements within the community, including that undertaken by the Department in its self-care units.

Point Number 496.5

Summary of Decision Requested: Amend Rule 16.1.2 P7 Permitted Activities, to provide an exclusion for a community corrections activity as follows:

P7 Community activity –

Activity Specific Conditions:

Excluding a community correction activity, ##

AND

Any other consequential amendments required to give effect to this relief.

Decision Reasons:

- The submission is seeking community correction activities be a subset of community activities.
- This would result in community correction activities being permitted in the Residential Zone. This is not an appropriate outcome for the zone, as the activity has the potential to result in adverse effects on residential character and amenity.
- It is appropriate that any community corrections activity in the Residential Zone is subject to a resource consent application to assess the effects on the environment.

Point Number 496.6

Summary of Decision Requested: Retain Rule 17.1.2 P3 Permitted Activities.

Decision Reasons:

- The submission is seeking community correction activities be a subset of community activities.
- This would result in community correction activities being permitted in the Business Zone.
- This activity is compatible and appropriate exemplified by the existing facilities that are located in the Business Zone within Huntly, Ngaruawahia and Raglan. Such facilities are appropriately suited to these areas on the basis that they are easily accessible to the communities they serve.
- Locating community corrections facilities in Business Zones mean that they have good accessibility to other social government agencies, such as the courts, Police and Work and Income.
- It would provide for community corrections activities therefore it is supported.

Point Number 496.7

Summary of Decision Requested: Retain Rule 18.1.2 P6 Permitted Activities.

Decision Reasons:

- The submission is seeking community correction activities be a subset of community activities.
- This would result in community correction activities being permitted in the Business Town Centre Zone.
- This activity is compatible and appropriate in this zone. Such facilities are appropriately suited to these areas on the basis that they are easily accessible to the communities they serve.
- Locating community corrections facilities in Business Zones mean that they have good accessibility to other social government agencies, such as the courts, Police and Work and Income.
- It would provide for community corrections activities therefore it is supported.

Point Number 496.8

Summary of Decision Requested: Add to Rule 20.1.1 Permitted Activities a new activity:

P7 Community corrections activity –

Activity specific conditions:

Nil

AND

Any other consequential amendments required to give effect to this relief.

Decision Reasons:

- Because community correction facilities are not listed, this would result in community correction activities being non-complying in the Industrial Zone, but it is an appropriate and compatible activity within the Industrial Zone.
- Industrial Zones provide suitable sites for community corrections activities, in particular the community work components where large sites with yard-based activities and large equipment and/or vehicle storage are often required.
- This rule should provide for community corrections activities in the Industrial Zone.

Point Number 496.9

Summary of Decision Requested: Amend Rule 24.1.1 P5 Permitted Activities, to provide an exclusion for community corrections activity as follows:

P5 Community activity –

Activity specific conditions

Excluding a community correction activity, ##

AND

Any other consequential amendments required to give effect to this relief.

Decision Reasons:

- This would result in community correction activities being permitted in the Village Zone. The submitter considers it appropriate that this activity in the Village Zone should be subject to a resource consent application process to allow the Council to assess the effects on the environment.

Point Number 496.10

Summary of Decision Requested: Retain the provisions in the Proposed District Plan as notified, other than the provisions addressed in the submission.

Decision Reasons:

- Submitter supports the remainder of the Proposed District Plan provisions.

Point Number 496.11

Summary of Decision Requested: Retain the definition of "Residential unit" in Chapter 13 Definitions.

Decision Reasons:

- The submitter has self-care units both within the grounds of its correctional facilities and in the community. Self-care units are residential accommodation that are occupied by offenders nearing release (located on prison grounds) or following release (located in the community). They are designed to assist offenders with integration back into the community. They encompass a household living scenario. They have all the characteristics of residential activities.
- The definition reflects living and care arrangements, such as those provided within self-care units monitored by the Department.
- The definition recognises and captures a variety of household types.

Point Number 496.12

Summary of Decision Requested: Add a new definition for "household" in Chapter 13 Definitions, as follows:

Household

Means a person or group of people who live together as a unit whether or not:

(a) Any or all of them are members of the same family; or

(b) One or more members of the group (whether or not they are paid), provides day-to-day care, support and supervision to any other member(s) of the group.

AND

Any other consequential amendments required to give effect to this relief.

Decision Reasons:

- The submitter has self-care units both within the grounds of its correctional facilities and in the community. Self-care units are residential accommodation that are occupied by offenders nearing release (located on prison grounds) or following release (located in the community). They are designed to assist offenders with integration back into the community. They encompass a household living scenario. They have all the characteristics of residential activities.
- The definitions of residential activity and residential unit refer to household, however no definition is provided for such.
- A new definition provides for clarity.
- It captures modern living arrangements, including the sort that are supported within self-care facilities provided by the department – not limited to a family unit or flatting agreement.

Submitter Number: 497

Submitter:

Shane Smart

Point Number 497.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- The submitter is a local plane owner and a local resident.

Point Number 497.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark zone, as notified.

Decision Reasons:

- The submitter is a local plane owner and a local resident.

Submitter Number: 498

Submitter:

Kent Baigent

Organisation: Tuakau Business Park Limited

Point Number 498.1

Summary of Decision Requested: Amend Chapter 14.1.1 Water wastewater and stormwater; to confirm cost sharing, to enable developers to recover a fair, equitable and proportionate proportion of the total cost of capital expenditure necessary to service growth or existing development upstream of new developments.

Decision Reasons:

- Existing infrastructure from neighbouring properties and the road reserve, which is legally unprotected, is being conveyed into the subject properties at 94 and 100D Bollard Road, Tuakau, increasing the overall volume for catchment analysis and calculations for further subdivision.
- Waikato District Council have advised that in order to satisfy the conditions of a subdivision consent on the subject property, the developer is required to upgrade the servicing of the entire stormwater catchment, without compensation.
- If developers have to cater for publically owned land, existing or future development of private land upstream, and subsequently be required to increase capacity of the new water, wastewater and stormwater infrastructure to accommodate this additional volume, then a fair, equitable and proportionate portion of the total cost of capital expenditure necessary to service growth or existing development up-catchment should be provided to the developer by the territorial authority and or contributing properties.
- In order to be consistent with the Local Government Act which allows territorial authorities to recover costs from developers for the additional burden on infrastructure through financial Development Contributions, it is only fair that private developers receive the same if they incur additional costs to cater for wider catchments.

Point Number 498.2

Summary of Decision Requested: Amend Rule 20.1.1 P6 Permitted Activities, as follows:

Ancillary Detail - Does not exceed ~~40%~~ 30% of all buildings on the site.

Decision Reasons:

- No reasons provided.

Point Number

498.3

Summary of Decision Requested:

Delete resource recovery centres and recovery operations from Rule 20.1.2 D3 Discretionary Activities
AND
Add "resource recovery centres and recovery operation" to Rule 20.1.1 Permitted Activities.

Decision Reasons:

- No reasons provided.

Point Number

498.4

Summary of Decision Requested:

Amend Rule 20.4.1(a) Subdivision General, as follows:
(a) Subdivision must comply with all of the following conditions:
(i) Proposed lots must have a minimum net site area of ~~4000m²~~ 700m²
(ii) Proposed lots must have an average area of at least ~~2000m²~~ 1200m²
(iii) No more than ~~20%~~ 30% rear lots are created.

Decision Reasons:

- No reasons provided.

Point Number

498.5

Summary of Decision Requested:

Add a new activity to Rule 20.1.1 Permitted Activities, as follows:
Living quarters above warehousing/manufacturing.

Decision Reasons:

- No reason provided.

Submitter Number:

499

Submitter:

Adrian Morton

Point Number

499.1

Summary of Decision Requested:

Amend Policy 4.1.18 Raglan, to include the following (as a minimum):

- Consideration to Naturally Raglan documentation shall provide development guidance
- Development shall complement and maintain the Raglan's built form and character form that reflects its harbour setting and is compatible with Raglan's seaside village character.
- Protection of the coastal environment and character
- All residential development will utilise the Waikato Urban Design Guidelines Residential Subdivision'
- Town Development shall utilise the WDC Character statements – Raglan Town Centre as the minimum basis for any new buildings/development within the town
- Any development within the town centre (or overlay areas) shall be notified for public consultation
- The ongoing development of cycling and pedestrian facilities and links to the rural community
- Raglan is a place to work and live rather than a place of commuters

Decision Reasons:

- The policy for Raglan is totally inadequate and needs to be greatly expanded to ensure the character, amenity and aspirations of Raglan can be managed, maintained and achieved.
- Needs greater focus needs to be given to the vision and aspirations expressed by the community.
- The development and character assessment needs more work to define the character areas and the design guidelines/outcomes sought, in consultation with Raglan area residents.

Point Number

499.2

Summary of Decision Requested:

Amend Policy 4.1.18 Raglan, to require housing for the elderly in all new developments and designate the former Lazarus village to prevent it being sold off and redeveloped.

Decision Reasons:

- Supports WED's submission that states that the former Lazarus village is on fairly level ground, and is well suited to house Raglan's elderly.
- The former Lazarus village should be restored. Without protection there is the risk that it will be permanently lost.

Point Number

499.3

Summary of Decision Requested:

Amend Policy 5.3.9 Non-rural activities, to include "gun club shooting activities".

Decision Reasons:

- The noise and obtrusiveness of this activity is completely incompatible with the area, especially as it occurs over weekends.
- The inclusion would allow management/avoidance of existing/proposed gun club activities, which are incompatible with the local rural amenity values.

Point Number

499.4

Summary of Decision Requested:

Amend Policy 5.3.11 to include "promote".

AND

Amend the Proposed District Plan to remove the requirement for resource consent for home occupations;

OR

Amend the Proposed District Plan to make it easier and cheaper to obtain permission for a home office.

Decision Reasons:

There are real benefits in promoting and supporting occupation activities, including improved productivity by removing travel time, less travel and resulting in better environmental outcomes and promotes sustainable rural communities.

Point Number

499.5

Summary of Decision Requested:

Amend Policy 5.3.15 Noise and vibration to include:

- Defined flight path corridors for recreational and training light aircraft that avoid rural properties;
- Fly avoidance/exclusion zones; and
- Noise control of aircraft engines.

Decision Reasons:

- The number and frequency of light aircraft movement and noise within the area has increased dramatically over the past 10 years.
- The amenity is affected by the noise of small/light aircraft.
- The situation is likely to get worse with the demand for pilots and more local people flying.
- WDC need to map areas of low habitation and define acceptable flight path routes.
- The variation in engine noise of light aircraft needs to be managed.
- There are potential effects on resident's well-being and health.

Point Number

499.6

Summary of Decision Requested:

Add new Specific Zone for Raglan Township and surrounds.

Decision Reasons:

- Waikato's only substantial and special seaside community
- Concerned that Raglan's special character is being eroded
- Planning policy is inadequate to manage the future growth of Raglan
- Raglan has been identified as a special place for visitors
- The town's character is derived from its "wild west" environment

Point Number

499.7

Summary of Decision Requested:

Amend Rule 22.4.1.2 P3 (a)(iii) General subdivision to change maximum slopes from 1:2 to 1:2.5.

Decision Reasons:

- A 1:2 slope is on the limit of stability and would be poor practice to allow. At 1:2 slope instability/risk of failure is higher, unless a geotechnical design is developed to minimise the risk, plus steeper slopes are difficult to top soil and plant.
- Note: Potentially incorrect rule reference in submission.

Point Number

499.8

Summary of Decision Requested:

Amend Rule 22.4.4.4 P1 (a) General subdivision to add the text "over any consecutive 12 month time period"

Decision Reasons:

- To manage accumulative effects to ensure the character of the area is maintained, as incremental annual changes can amount to significant destruction or visual change of an areas resulting in adverse effects.
- Note: Potentially incorrect rule reference in submission.

Point Number

499.9

Summary of Decision Requested:

Amend Schedule 30.2 Notable Trees, to include the following notable trees associated with Raglan:

- Trees within 30 metres of the high water mark between the Bow St jetty and Helen Place, Raglan.
- Trees adjacent to the Raglan Airfield.
- Trees within 10 metres of Marine Parade.
- Trees between the recreation ground and Lily Street, Raglan.
- Trees on Wallis Street at the foot of Government Road, Raglan.
- Trees in the gully between Rose Street and Lily Street, Raglan.
- Trees to the south west of State Highway 23, Raglan between Hills Road and Greenslade Road.
- Trees in the Lorenzen Bay reserve.
- All large trees.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number

499.10

Summary of Decision Requested:

Amend Schedule 30.2 Notable Trees, to include the trees adjacent to the Raglan Airfield.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).

- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.11

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees, to include trees within 10 metres of Marine Parade.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.12

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees, to include the trees between the recreation ground and Lily Street, Raglan.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.13

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees, to include the trees on Wallis Street at the foot of Government Road, Raglan.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.14

Summary of Decision Requested: Amend Rule 24.3.3.1 Height - Building general to encourage the use of variable building heights, stepped facades to maintain the built character of Raglan for example:

A maximum height of a building must not exceed 7.5m, and where continuous roof lines occur (more than one unit) then variable roof lines should be implemented to maintain the character and amenity of Raglan

Decision Reasons:

- The provision for a 'maximum height' makes it more of a target and does not allow/encourage variable roof heights that would be better at complementing the built character of Raglan. Housing in and around Raglan typically have variable heights and forms that contribute to the character of the area, which needs to be reflected in the policy.

Point Number 499.15

Summary of Decision Requested: Amend Policy 8.1.2 Provision, use and development of public open space and reserves, to require that residential development will conform to the Residential Subdivision Urban Design Guidelines in relation to layout around open space and stormwater design features.

Decision Reasons:

- Developments need to ensure properties integrate with open space and stormwater devices such as wetland ponds rather than have them fenced in or with properties 'turning' their back to them.

Point Number 499.16

Summary of Decision Requested: Amend Policy 8.1.3 to add provision for new cycle/walkways, not only in major new developments but to implement to Councils Walking, Cycling and Bridle Trails strategy

Decision Reasons:

- 1.10.2.3 includes the Strategy as relevant, yet there is no timeframe for implementation of the Strategy. Without support from the District Plan it is unlikely that most of the Strategy will be achieved. 4.1.8 states the Plan will, - "(a) Ensure effective integration within and between new developments and existing areas, including in relation to public open space networks and infrastructure by: (i) Providing good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle, and pedestrian routes".
- 4.1.10 Policy - Tuakau, 4.1.11 Policy - Pokeno, 4.1.12 Policy - Te Kauwhata, 4.1.14 Policy - Taupiri, 4.1.15 Policy - Ngaruawahia, 4.1.16 Policy - Horotiu and 4.1.17 Policy - Te Kowhai all mention walking and cycling provision, though leave the means and locations unclear.
- 4.1.18 Policy - Raglan is the only town policy not to mention cycling and walking, despite a May 2018 staff report to Council saying, "Raglan has the district's highest walking/cycling communities".
- For example, 1.4.2.2 mentions, "Revocation of parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways", yet nowhere in the Plan is it indicated where some might be, though it is clearly a land use issue. At the last Plan revision, Council said detailed rules for walk/cycleways are not appropriate for a District Plan, yet have expanded to 35 pages the detail in 14.12 about vehicle turning circles, road widths, sight lines, etc. By contrast, there is just a rule about buses having a space for 200 school students and a rule that some new buildings should have cycle parking.
- On page 42 Raglan Naturally says, "There is strong public support for harbour and coastal walkways." and "Create coastal walkways, eg Raglan to Whale Bay, Whale Bay to Te Toto Gorge." This local support reflects national trends; time use surveys show walking as being ahead of all other active sports and pursuits. European surveys have similar results, so that environmental tourism, encouraging tourists to spend more time walking than driving, could be made a much more valuable asset, giving an economic, as well as health and recreation, impetus to the need to implement policies in recognition of the importance of walking and cycling as noted at 1.4.3.1. The lack of progress indicates that opportunities are not taken with subdivisions and that more detail needs to be included in the District Plan.

Point Number 499.17

Summary of Decision Requested: **Add** the following to the planning maps:

- The planned Wainui Road to Te Hutewai Road walk/cycle track
- All unformed roads not shown on the maps
- All the tracks shown on the Strategy maps.
- Walk ways through the residential zones linking Lorenzen Bay with Kaitoke Walkway.
- A cycle track from Wallis Street to Violet Street, Raglan.
- Circular walk around Raglan
- A link from Raglan to the Te Ararua walkway using paper roads via Karioi and Bridal Veil Falls.
- Walkway/cycleway/bridle way maps to include walkways, and where possible cycleways, along the whole coast.
- A track from Raglan to the summit of Karioi using esplanades, reserves and paper roads.
- A link along Wainui Stream from Wainui Reserve to Bryant Reserve.

Decision Reasons:

- 1.10.2.3 includes the Strategy as relevant, yet there is no timeframe for implementation of the Strategy. Without support from the District Plan it is unlikely that most of the Strategy will be achieved. 4.1.8 states the Plan will,
- "(a) Ensure effective integration within and between new developments and existing areas, including in relation to public open space networks and infrastructure by:
(i) Providing good access to facilities and services by a range of transport modes through the provision of integrated networks of roads, public transport, cycle, and pedestrian routes".
- 4.1.10 Policy - Tuakau, 4.1.11 Policy - Pokeno, 4.1.12 Policy - Te Kauhata, 4.1.14 Policy - Taupiri, 4.1.15 Policy - Ngaruawahia, 4.1.16 Policy - Horotiu and 4.1.17 Policy - Te Kowhai all mention walking and cycling provision, though leave the means and locations unclear.
- 4.1.18 Policy - Raglan is the only town policy not to mention cycling and walking, despite a May 2018 staff report to Council saying, "Raglan has the district's highest walking/cycling communities".
- For example, 1.4.2.2 mentions, "Revocation of parts of State Highway 1 will offer opportunities for some town centre improvements and cycle/walk ways", yet nowhere in the Plan is it indicated where some might be, though it is clearly a land use issue. At the last Plan revision, Council said detailed rules for walk/cycleways are not appropriate for a District Plan, yet have expanded to 35 pages the detail in 14.12 about vehicle turning circles, road widths, sight lines, etc. By contrast, there is just a rule about buses having a space for 200 school students and a rule that some new buildings should have cycle parking.
- On page 42 Raglan Naturally says, "There is strong public support for harbour and coastal walkways." and "Create coastal walkways, eg Raglan to Whale Bay, Whale Bay to Te Toto Gorge." This local support reflects national trends; time use surveys show walking as being ahead of all other active sports and pursuits. European surveys have similar results, so that environmental tourism, encouraging tourists to spend more time walking than driving, could be made a much more valuable asset, giving an economic, as well as health and recreation, impetus to the need to implement policies in recognition of the importance of walking and cycling as noted at 1.4.3.1. The lack of progress indicates that opportunities are not taken with subdivisions and that more detail needs to be included in the District Plan.

Point Number 499.18

Summary of Decision Requested: **Amend** Rule 16.4.14(b) Subdivision of esplanade reserves and esplanade strips to require the developer of lots 4ha to provide esplanade facilities that will include as a minimum a 1.8m wide timber edge gravel path walkway and 10% of area landscape planting.

Decision Reasons:

- To promote the development and linkages of esplanade areas to increase the areas walking and cycling facilities.

Point Number 499.19

Summary of Decision Requested: **Add** a resource management framework for the management of Genetically Modified Organisms that is regional specific taking into account environmental, economic and social well-being considerations.

Decision Reasons:

The submitter has significant concerns about the potential risks posed by the release of GMOs into the environment and the ethical issues associated with the development of GMOs in relation to food, pest control, corporate control and financial gain. GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of people, communities and tangata whenua that may not be able to be avoided, remedied or mitigated.

1. The release of GMOs has a potential to cause significant adverse effects on the environment, which could include:

- (a) biological or ecosystem harm or damage;
- (b) harm to tangata whenua cultural values such as mauri and tikanga especially in relation to native plants and animals;
- (c) harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing. This is particularly relevant in relation to the quality of food and potential health related issues of GMO food on humans (extent of research is poor and the research that does exist indicates issues around GMO foods); and
- (d) harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependent on an uncontaminated environmental brand. Adverse effects to these land uses could include:
 - (i) loss of organic and GMO-free certification;
 - (ii) reputational damage;
 - (iii) loss of markets and premiums paid for GMO free produce; and
 - (iv) loss of livelihood.

2. No matter how carefully conditions of consent for GMOs are crafted, there inevitably remains a risk, even if small, that conditions may be breached by poor management, human error, natural events such as severe storms and even the sabotage of projects.

3. Once GMOs have been released into the environment, they would be very difficult if not impossible to eradicate. In the case of a food product, the "GE free" status of a district would likely be lost permanently along with the market advantages of that status.

4. Application of integrated management and a strong precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region. In addition, the liability of cross contamination of non-GMO crops should be held to the manufacturer or registered user(s) to protect growers that do not support this flawed science model.

5. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions (e.g. issues, objectives, policies, rules and methods) that manage the release, location and management of GMOs where they have the potential to adversely affect the environment and other land use activities.

Point Number 499.20

Summary of Decision Requested: **Add** strong precautionary and prohibitive provisions, policies and rules relating to GMOs that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan, to ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues.

Decision Reasons:

The submitter has significant concerns about the potential risks posed by the release of GMOs into the environment and the ethical issues associated with the development of GMOs in relation to food, pest control, corporate control and financial gain. GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of people, communities and tangata whenua that may not be able to be avoided, remedied or mitigated.

1. The release of GMOs has a potential to cause significant adverse effects on the environment, which could include:

- (a) biological or ecosystem harm or damage;
- (b) harm to tangata whenua cultural values such as mauri and tikanga especially in relation to native plants and animals;
- (c) harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing. This is particularly relevant in relation to the quality of food and potential health related issues of GMO food on humans (extent of research is poor and the research that does exist indicates issues around GMO foods); and
- (d) harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependent on an uncontaminated environmental brand. Adverse effects to these land uses could include:
 - (i) loss of organic and GMO-free certification;

- (ii) reputational damage;
 - (iii) loss of markets and premiums paid for GMO free produce; and
 - (iv) loss of livelihood.
2. No matter how carefully conditions of consent for GMOs are crafted, there inevitably remains a risk, even if small, that conditions may be breached by poor management, human error, natural events such as severe storms and even the sabotage of projects.
3. Once GMOs have been released into the environment, they would be very difficult if not impossible to eradicate. In the case of a food product, the "GE free" status of a district would likely be lost permanently along with the market advantages of that status.
4. Application of integrated management and a strong precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region. In addition, the liability of cross contamination of non—GMO crops should be held to the manufacturer or registered user(s) to protect growers that do not support this flawed science model.
5. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions (e.g. issues, objectives, policies, rules and methods) that manage the release, location and management of GMOs where they have the potential to adversely affect the environment and other land use activities.

Point Number 499.21

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees, to include the trees in the gully between Rose Street and Lily Street, Raglan.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.22

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees, to include the trees to the south west of State Highway 23, Raglan between Hills Road and Greenslade Road.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.23

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees, to include trees in the Lorenzen Bay reserve.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.24

Summary of Decision Requested: Amend Schedule 30.2 Notable Trees to include all large trees.

Decision Reasons:

- Notable Trees Schedule 30.2 clearly doesn't cover sufficient notable trees within the definition.
- Tree are important as they help define the character and amenity of Raglan plus provide diversity for wild life habitat (it is noted that only 160 notable trees are listed for the whole District).
- Tree protection is clearly inadequate, as unauthorised removal of listed trees by council has shown. Trees are important for landscape, nature and carbon storage.
- Large trees should all be protected.

Point Number 499.25

Summary of Decision Requested: Amend Rule 24.2.8 P6 Indigenous vegetation clearance inside a Significant Natural Area to reduce the 5m³ limit to 3m³ and remove reference to the Coastal Environment.

Decision Reasons:

- Manuka and kanuka are important habitat environments and provide visual amenity. Therefore, 3m³ should be adequate for heating purposes with non-native wood sources available.

Submitter Number: 500

Submitter: Andrea Cadwallader

Point Number 500.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark as notified.

Decision Reasons:

- The submitter is a local resident.
- Professional interest in airfield.

Point Number 500.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The submitter is a local resident.
- Professional interest in airfield.

Submitter Number:	501	Submitter:	John Swann
Point Number	501.1		
Summary of Decision Requested:	Amend the extent of the Significant Natural Area on the property at 65 Karioi Road, Raglan to reduce the size of it as shown on the map attached to the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • Parts of proposed Significant Natural Area is 20-30 year old Kanuka/Manuka. These are low quality trees. • There is also gorse woolly nightshade, blackberry. • The attached map to the submission indicates areas that have higher value vegetation. 		
Point Number	501.2		
Summary of Decision Requested:	Amend Rule 22.2.3.3 Earthworks - Significant Natural Areas, to permit earthworks to construct new tracks through Significant Natural Areas.		
Decision Reasons:	<ul style="list-style-type: none"> • This rule needs to enable the construction of tracks in Significant Natural Areas associated with farming operations and developments. 		
Point Number	501.3		
Summary of Decision Requested:	Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area by deleting '5m ³ ' and 'coastal environment'.		
Decision Reasons:	<ul style="list-style-type: none"> • Kanuka/Manuka matures quickly and spreads easily. • Kanuka/Manuka is good firewood. • Kanuka/Manuka does not need protecting. 		

Submitter Number:	502	Submitter:	Se Gi Noh
Point Number	502.1		
Summary of Decision Requested:	Amend zoning of the properties on the western side of Helenslee Road and north of Munro and Huia Roads, Pokeno (see maps included in the submission) from the proposed Residential Zone to Rural Zone. The addresses are:		
	(a) 53, 53A and 55 Munro Road		
	(b) 87, 109, 119, 133, 145A, 145B and 145C Helenslee Road		
Decision Reasons:	<ul style="list-style-type: none"> • The proposed re-zoning doesn't include 166 Pokeno Road, which is in the same Central Rural Area. 		
Point Number	502.2		
Summary of Decision Requested:	Amend the zoning of the property at 166 Pokeno Road, Pokeno from Rural Zone to Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • The site is within 400m of the bus route. • The property is within the Central Rural Area, same as the properties proposed as Residential Zone on the western side of Helenslee Road. • The zoning of land on the northern side of the railway line should match that on the southern side of the railway line on Pokeno Road. • The property is surrounded by two roads so has easy access for residential dwellings. 		

Submitter Number:	503	Submitter:	Kenneth Rowe
Point Number	503.1		
Summary of Decision Requested:	Amend the zoning of the property at 233 Wilton Collieries Road (Lot 20 DP 431591) from Rural Zone to Country Living Zone to join up with the Operative District Plan zoning of the neighbouring property.		
Decision Reasons:	<ul style="list-style-type: none"> • The land is not sustainable for commercial farming and is better off for housing. • The property was zoned Country Living Zone in the Operative District Plan. 		

Submitter Number:	504	Submitter:	Michael Edmonds
Point Number	504.1		
Summary of Decision Requested:	Amend Section 2.2(a) Background, to apply the RMA definitions as follows:		

Tangata whenua: In relation to a particular area, means the iwi, or hapu, that holds mana whenua over that area.

Mana whenua: Means customary authority exercised by an iwi or hapu in an identified area.

AND

Amend Section 2.2 Background which states that Waikato-Tainui is Tangata whenua of the Waikato District.

Decision Reasons:

- Waikato-Tainui is not 'the' Tangata whenua, as if to proclaim that they are an entity that is has a higher status than other iwi, hapu and marae.
- Waikato-Tainui Iwi Authority was established to receive settlement funds from the Crown as a result of Raupatu. Waikato District Council must not confuse authority exercised by an iwi or this entity with its obligation under the RMA to all Tangata whenua groupings within its district.
- On behalf of the Uri o Te Kopua 2B3, the only Tangata whenua in Whaingaroa are those that can whakapapa to Whaingaroa.

Ko Karioi te maunga

Ko Whaingaroa te Moana
Ko Tainui te Waka
Ko Tainui te Iwi
Ko Ngati Koata, Ngati Hounuku,
Ngati Te Ikaunahi, Ngati Kahu, Ngati Karu,
Ko Ngati Paetoka, Ngati Pukoro, Ngati Tira,
Ngati RuaAruhe, Ngati Heke, Ngati Tahau,
Ngati Te Kore nga hapu

Point Number

504.2

Summary of Decision Requested:

Amend the rules to provide for the following as permitted activities on Riria Kereopa Drive, Raglan.

- Facilities for surface water activities;
- Recreation;
- Kohanga reo;
- Education facilities;
- Public toilets;
- Camp site and associated car wash, grocery or boating store and marae;
- Restaurant;
- Conference facilities; and
- Travellers' accommodation.

Decision Reasons:

- The current (operative) rules reflect the aspirations of the Uri o Te Kopua 2B3 Trust shareholders.

Point Number

504.3

Summary of Decision Requested:

Retain and protect Maaori sites of significance in Schedule 30.3.

Decision Reasons:

- Supports the protection and retention of Maori sites of significance.

Point Number

504.4

Summary of Decision Requested:

Retain and protect Maaori areas of significance in Schedule 30.4.

Decision Reasons:

Supports the protection and retention of Maori areas of significance.

Submitter Number:

Ngati RuaAruhe, Ngati Heke, Ngati Tahau,
Ngati Te Kore nga hapu

Point Number

505.2

Summary of Decision Requested:

Amend the rules to provide for the following as permitted activities on Riria Kereopa Drive, Raglan:

- Facilities for surface water activities;
- Recreation;
- Kohanga reo;
- Education facilities;
- Public toilets;
- Camp site and associated car wash,
- Grocery or boating store and marae;
- Restaurant; Conference facilities; and Travellers' accommodation.

Decision Reasons:

- The current (operative) rules reflect the aspirations of the Uri o Te Kopua 2B3 Trust shareholders and align with the Tihei Mauriora Plan lodged with Council.

Point Number 505.3

Summary of Decision Requested: **Retain** and protect the Maori Sites of Significance in Schedule 30.3.

Decision Reasons:

- Supports the protection and retention of Maori sites of significance.

Point Number 505.4

Summary of Decision Requested: **Retain** and protect Maori Areas of Significance in Schedule 30.4.

Decision Reasons:

- Support the protection and retention of Maori Areas of Significance.

Submitter Number: 506 **Submitter:** Dean Hansen

Organisation: Hansens Farms Ltd

Point Number 506.1

Summary of Decision Requested: **Clarify** why an area of 83 Paulsen Road, Waerenga is identified as a Significant Amenity Landscape;
AND
Amend the District Plan to provide for track maintenance in the Significant Amenity Landscape.

Decision Reasons:

- The submitter has always wanted to build a small house in the vicinity of the Significant Amenity Landscape.
- Have camped up there in a tent.
- Need to continue maintaining the existing track as it is used for a community fundraising event every year.
- Too dangerous to fence, if fenced weeds and scrubs would take over and change the area for the worse.
- Questions the value of Significant Amenity Landscape to anyone other than the landowners and visitors.

Point Number 506.2

Summary of Decision Requested: **Clarify** why three Significant Natural Areas have been identified on 83 Paulsen Road, Waerenga.

Decision Reasons:

- Submitter has not been informed or convinced by Waikato District Council how they decided these were Significant Natural Areas or what makes them Significant Natural Areas.
- Two of the Significant Natural Areas are thin patches of T-Tree which you can see through.
- These areas do not warrant being called or identified as Significant Natural Areas.

Submitter Number: 507 **Submitter:** Whitford Farms Limited

Point Number 507.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The Rural Environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting these soils from adverse effects of inappropriate use and development is of national importance and is recognised with a National Policy Statement for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land.
- Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Agree that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 507.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND

Amend Objective 5.2.1 (a) (i) Rural resources, as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils...*

Decision Reasons:

- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 507.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Policy 5.2.2 seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 507.4

Summary of Decision Requested: **Amend** Objective 5.3.1 Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the district.

Decision Reasons:

- Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of "Rural Character" should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 507.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i-iii) General Subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of the General Subdivision rules.

Point Number 507.6

Summary of Decision Requested: **Add** a new discretionary activity to Rule 22.4.1.2 General subdivision as follows:

DI

(a) *General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD I.*

(b) *General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD I.*

Decision Reasons:

- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number 507.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General subdivision (80/20 Rule)

AND

Add a new matter of discretion to Rule 22.4.1.2(b) General subdivision as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- The strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 507.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary activity.

Point Number 507.9

Summary of Decision Requested: Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

...

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas:~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy 5.3.8 (b) duplicates Policy 5.3.8(d)(ii) and 5.3.8(e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses and are recognised as important components of primary production activities which form part of the rural environment.

Point Number 507.10

Summary of Decision Requested: Amend the activity status for Rule 22.4.1.1 PR1, PR2, PR3, PR4 Prohibited subdivision, from Prohibited to Non-Complying Activities.

Decision Reasons:

- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- In some instances it may be unavoidable to create an additional Record of Title.
- The rule relies on a definition of "High Class Soils". High class soils as defined in the Proposed Plan (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities which are viable and sustainable such as greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business, rather than disposal of the entire property or the need to invest more capital in the operation.
- This activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings, and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 228 of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation, under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 507.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace "lot" with "Record of Title".

Decision Reasons:

- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 508

Submitter: Robert Brown

On behalf of: Tui Ridge Limited

Point Number 508.1

Summary of Decision Requested: Amend the proposed zoning of Lot 2 DP 481971 and Lot 5 DP 481971 (western side of Hall Road, Te Kauwhata) from Rural Zone to Country Living Zone;

AND

Any other consequential amendments necessary to give effect to the matters raised and relief sought in the submission.

Decision Reasons:

- As noted in the Future Proof Strategy (November 2017) the growth pressures facing Waikato District include the significant influence of Auckland, the growth of Hamilton City and demographic and land use changes.
- The Proposed Plan provides for a large amount of additional residential land in and around Te Kauwhata, including the Lakeside Developments area to the west of Lake Waikare which was subject to a hearing for Proposed Private Plan Change 20 in early 2018.
- Over 200 ha of land on the north-western side of Te Kauwhata is also proposed as Country Living Zone within the Proposed Plan. However, the amount of land in this area zoned Country Living Zone within the Proposed Plan appears identical to that shown on the planning maps for the Operative Waikato District Plan (Waikato Section).
- Te Kauwhata is strategically important in terms of accommodating growth between Auckland and Hamilton, and given the expected continued development of the Te Kauwhata area a larger supply of lower density in this area will be required to meet the district's demands.
- Recent growth within the Waikato District has demonstrated a desire for lifestyle block properties which are self-serviced, contain adequate space for small scale agriculture or livestock raising and retain a peri-rural outlook and character.
- The site has good links to Te Kauwhata and the wider area via the Waikato Expressway; with the Te Kauwhata and Hampton Downs interchanges in the vicinity.
- A large farm-park development with a density similar to that provided for by the proposed Country Living Zone provisions of the Proposed Plan has also previously been approved within the site through a subdivision consent.

Point Number 509.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting these soils from adverse effects of inappropriate use and development is of national importance and is recognised with a National Policy Statement for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land.
- Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Submitter supports strength of wording in this objective and agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 509.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendment sought below
AND
Amend Objective 5.2.1 Rural resources, as follows:
(a) *Maintain or enhance the:*
(i) *Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils...*

Decision Reasons:

- Support sub policy (i) which seeks to maintain or enhance the life-supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 509.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Submitter supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 509.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendment sought below
AND
Amend Objective 5.3.1 Rural character and amenity, as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings particularly in the northern part of the district which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of "Rural Character" should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 509.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i-iii) General Subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of the General Subdivision rules.

Point Number 509.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below
AND
Amend Rule 22.4.1.2 General subdivision to create new discretionary activities, as follows:
DI
(a) *General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.*
(b) *General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.*

Decision Reasons:

- Support Rule 22.4.1.2 (s)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient on-going management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.

- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 509.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision;
AND

Add a new matter of discretion to Rule 22.4.1.2(b) General subdivision as follows:

(b) (vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) id opposed. There is no analysis in s32 regarding the relevance or practicality of this rule.
- Submitter agrees with the intent of this rule which is to design subdivision to avoid fragmentation of the high class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 509.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General Subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number 509.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part with amendments.
- Policy 5.3.8 (b) duplicates Policy 5.3.8(d)(ii) and 5.3.8(e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 509.10

Summary of Decision Requested: **Amend** the activity status for Rule 22.4.11 PR1, PR2, PR3 and PR4 Prohibited subdivision, from Prohibited to Non-Complying Activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities and should be considered as non-complying activities.
- With regards to PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- In some instances it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and hold together by covenant.
- The rule relies on a definition of "High Class Soils". High class soils as defined in the Proposed Plan (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business, rather than disposal of the entire property or the need to invest more capital in the operation.
- This activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings, and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 509.11

Summary of Decision Requested:	Amend Rule 22.4.1.1 Prohibited Subdivision, to replace 'lot' with 'Record of Title'.
Decision Reasons:	<ul style="list-style-type: none"> • Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.' • It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number:	510	Submitter:	Bob Carter
Point Number	510.1		
Summary of Decision Requested:	Delete the Significant Natural Area from the property at 57 Upper Wainui Road, Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> • This is perhaps due to aerial image distortion as the area is lawn. 		
Point Number	510.2		
Summary of Decision Requested:	Amend District Plan to detail all impacts of the Coastal Environment overlay.		
Decision Reasons:	<ul style="list-style-type: none"> • It is not clear what impact the Coastal Environment overlay has on a property. 		
Point Number	510.3		
Summary of Decision Requested:	Amend District Plan to clarify what impact Significant Amenity Landscapes has on a property.		
Decision Reasons:	<ul style="list-style-type: none"> • It is not clear what impact a Significant Amenity Landscape has on a property. 		
Point Number	510.4		
Summary of Decision Requested:	Amend planning maps to provide clearer symbols; AND Amend planning maps to not have overlays on top of one another.		
Decision Reasons:	<ul style="list-style-type: none"> • It is very hard to differentiate between overlays and items on the legend. • It is very hard to differentiate between mapped items including on the online maps. 		
Point Number	510.5		
Summary of Decision Requested:	Amend Rule 22.23.4 Earthworks - within landscape and natural character areas, by swapping around the area and volume figures of 50m ² and 250m ³ .		
Decision Reasons:	<ul style="list-style-type: none"> • These limits would be impossible if complying with batter rules. • Probably a typo. • Area should always be no less than volume. 		
Point Number	510.6		
Summary of Decision Requested:	Amend Rule 22.2.8 Indigenous vegetation clearance - outside a Significant Natural Area heading, as follows: <u>Naturally Occurring Vegetation Clearance outside a Significant Natural Area.</u>		
Decision Reasons:	<ul style="list-style-type: none"> • Council should not be involved with privately planted trees/vegetation, whether exotic or indigenous, unless they are part of a consent notice or conservation order. • There are number of reasons why trees may need removal such as size, storm damage, damage to private drainage and infrastructure and for maintaining view shafts, open-space and daylight. 		

Submitter Number:	511	Submitter:	Victoria Kemp
On behalf of:	Huntly Districts Residents and Ratepayers Association		
Point Number	511.1		
Summary of Decision Requested:	Amend the Rural Zone of 183ha on East Mine Road Huntly to a multi-purpose recreation and events zone alongside a residential zoning for the following properties: CFR 805391, CFR SA50A/762, CFR SA10D/800, CFR 1955501, CFR SA 61B/799, CFR SA 18B/1138, CFR SA30A/356, SA 40D/985, CFR SA251/176, SA 26C/345, SA 51/131.		
Decision Reasons:	<ul style="list-style-type: none"> • The rezoning will provide the following benefits: <ul style="list-style-type: none"> - Educational outcomes for youth; - Significant employment opportunities; - Improved recreational, living and lifestyle opportunities for residents through outdoor activities and water sports; 		

- A great opportunity for Huntly to become a destination for tourists; and
- This project has the ability to transform Huntly.

Submitter Number:	512	Submitter:	Enton Farms Limited
Point Number	512.1		
Summary of Decision Requested:	Retain Objective 5.1.1 The rural environment, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally. • Protecting these soils from adverse effects of inappropriate use and development is of national importance and is recognised with a National Policy Statement for Versatile Land and High Class Soils under consideration. • Urban subdivision is an inefficient use of rural production land. • Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas. • Submitter supports the strength of wording in the objective and agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided. 		
Point Number	512.2		
Summary of Decision Requested:	Retain Objective 5.2.1 Rural resources, except for the amendments sought below AND Amend Objective 5.2.1 Rural resources, as follows: (a) <i>Maintain or enhance the:</i> (i) <i>Inherent life-supporting capacity, <u>accessibility</u> and versatility of soils, in particular high class soils...</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Supports sub-policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils. • Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy. 		
Point Number	512.3		
Summary of Decision Requested:	Retain Policy 5.2.2 High class soils, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil. 		
Point Number	512.4		
Summary of Decision Requested:	Amend Objective 5.3.1 Rural character and amenity, as follows: <i>Rural character and amenity are maintained <u>while recognising the localised character of different parts of the district.</u></i>		
Decision Reasons:	<ul style="list-style-type: none"> • Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District. • The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the Northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc. • Consideration of "Rural Character" should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology. 		
Point Number	512.5		
Summary of Decision Requested:	Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below AND Amend Rule 22.4.1.2 General subdivision to create new discretionary activities, as follows: <u>DI</u> (a) <u>General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.</u> (b) <u>General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.</u>		
Decision Reasons:	<ul style="list-style-type: none"> • Support Rule 22.4.1.2 (a)(iv) in part with amendments. • General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue. • Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and note meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land. • A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. • There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies. • For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries. • Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate. • Creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site should be provided for. 		

Point Number 512.6

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General subdivision 80/20 Rule.
AND
Add a new matter of discretion to Rule 22.4.1.2 (b) General subdivision as follows:
(b),(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in s32 regarding the relevance or practicality of this rule.
- Submitter address with the intent of this rule which is to design subdivision to avoid the fragmentation of the high class soils.
- However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost with every subdivision application under the General provisions that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 512.7

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited Subdivision, to replace "lot" with "Record of Title".

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Point Number 512.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary activity.

Point Number 512.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~
...
(d) Rural hamlet subdivision and boundary relocations ensure the following:
(i) Protection of rural land for productive purposes;
(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;
(iii) Minimisation of cumulative effects.
(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part with amendments.
- Policy 5.3.8 (b) duplicates Policy 5.3.8(d)(ii) and 5.3.8.(e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised rural landscapes can be visually altered by structures and buildings such as greenhouses and pack houses, however these are recognised as important components of primary production activities, which form part of the rural environment, and are generally considered rural in appearance and value.

Point Number 512.10

Summary of Decision Requested: **Amend** the activity status for Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, from Prohibited to Non-Complying Activities.

Decision Reasons:

- Oppose the Prohibited Activity Status for the rural subdivision activities listed under Section 22.4.1.1.
- Submitter suggests the Prohibited Activities listed under 22.4.1.1 be considered as non-complying activities.
- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title.
- The rule relies on a definition of "High Class Soils". High class soils as defined in the Proposed Plan (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent nature and it is appropriate for those to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business, rather than disposal of the entire property or the need to invest more capital in the operation.
- This activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each,

however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.

- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 512.11

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i-iii) General Subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of the General Subdivision rules.

Submitter Number: 513 **Submitter:** Vanoo Limited

Point Number 513.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting these soils from adverse effects of inappropriate use and development is of national importance and is recognised with a National Policy Statement for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land.
- Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Submitter supports the strengthening of wording in this objective and agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 513.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below

AND

Amend Objective 5.2.1 Rural resources as follows:

(a) Maintain or enhance the:

(i) *Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils;*

...

- Decision Reasons:**
- Supports sub-policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
 - Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 513.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils as notified.

Decision Reasons:

- Submitter supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life supporting properties of high class soil.

Point Number 513.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 Rural character and amenity as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

- Decision Reasons:**
- Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
 - The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
 - Consideration of "Rural Character" should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 513.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i-iii) General subdivision as notified.

Decision Reasons:

- The submitter supports the inclusion of the General Subdivision rules.

Point Number 513.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.2 General subdivision to create new discretionary activities as follows:

DI

(g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.

Decision Reasons:

- Supports Rule 22.4.1.2 (a)(iv) in part with amendments.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling.
- There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number

513.7

Summary of Decision Requested:

Delete Rule 22.4.1.2(a)(v) General subdivision (80/20 Rule)

AND

Add a new matter of discretion to Rule 22.4.1.2(b) General subdivision as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in s32 regarding the relevance or practicality of this rule.
- Submitter agrees with the intent of this rules, which is to design and avoid fragmentation of the high class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number

513.8

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8000m² and 1.6ha is supported as a restricted discretionary activity.

Point Number

513.9

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part with amendments.
- Policy 5.3.8 (b) duplicates Policy 5.3.8(d)(ii) and 5.3.8(e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity.
- The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number

513.10

Summary of Decision Requested:

Amend the activity status for Rule 22.4.1.1 PR1, PR2, PR3, PR4 Prohibited subdivision from Prohibited to Non-Complying Activities.

Decision Reasons:

- Oppose the Prohibited activity status for rural subdivision activities listed under Rule 22.4.1.1. Submitter suggests that these activities be considered as Non-Complying activities.
- With regards to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title i.e. where a title is limited to parcels and held together by covenant.

- The rule relies on a definition of "High Class Soils". High class soils as defined in the Proposed Plan (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business, rather than disposal of the entire property or the need to invest more capital in the operation.
- This activity status prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 228 of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. Under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 513.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace "lot" with "Record of Title".

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 514 **Submitter:** DP & LJ Ramsey Limited

Point Number 514.1

Summary of Decision Requested: Retain Policy 3.2.8 Incentivise Subdivision, except for the amendments sought below
AND

Add to Policy 3.2.8 Incentivise Subdivision, as follows:

(b) Incentivise subdivision in the Rural Zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous biodiversity.

Decision Reasons:

- Supports incentivising the protection of existing biodiversity with the ability to subdivide subject to meeting certain criteria.
- Seeks Policy 3.2.8 be expanded to include provision for the enhancement and/or restoration of areas, when once restored, would be of a suitable size and quality to achieve a functioning ecosystem. Appendix 2 of the Proposed Plan - 'Criteria for Determining Significance of Indigenous Biodiversity' could provide the basis for assessing the eligibility of these areas. Eligible areas would likely be wetlands and waterways which are degraded in the Waikato District due to farming activities such as stock and cropping. Incentivising restoration is in line with the Vision and Strategy for the Waikato River.

Point Number 514.2

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Submitter supports the strengthening of wording in the objective and agrees that urban development within the Rural Environment is an outcome contrary to the intent of the Proposed District Plan.

Point Number 514.3

Summary of Decision Requested: Retain Objective 5.2.1 (a)(i) Rural resources, except for the amendments sought below
AND

Amend Objective 5.2.1(a)(i) Rural resources, as follows:

(a) Maintain or enhance the:

(i) Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils;

Decision Reasons:

- Supports sub-policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and that 'accessibility' should be included in this policy.

Point Number 514.4

Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Submitter supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 514.5

Summary of Decision Requested: Retain Policy 5.2.3 Effects of subdivision and development on soils.

AND

Amend Policy 5.2.3(b) Effects of subdivision and development on soils, as follows:

Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).

Decision Reasons:

- This policy only provides for subdivision where existing indigenous biodiversity is being protected. There are a number of waterways and wetlands in the Rural Zone that would benefit from stock exclusion and enhancement and/or restoration.
- Subdivision offers an incentive for landowners to undertake restoration works which they would un-likely do without a financial offset, restoration is around \$45,000 + GST / hectare.
- Allowing for the protection and/or restoration, particularly of waterways, would achieve Policy 5.2.1(a)(iii). It would also support Policy 3.1.2.
- Incentivising the fencing and restoration of waterways would contribute positively to the improvement of water quality and achieving the objectives of the Vision and Strategy.

Point Number

514.6

Summary of Decision Requested:

Retain Objective 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 (a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Recognition of the variation of what defines rural character and amenity values across a large District is needed.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number

514.7

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- There is duplication between Policy 5.3.8 (b), (d)(ii) and (e) which both seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses, however these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number

514.8

Summary of Decision Requested:

Retain the definition for "Significant Natural Area" in Chapter 13 Definitions, except for the amendment sought below

AND

Amend the definition for "Significant Natural Area" in Chapter 13 Definitions, as follows:

Means an areas of significant indigenous biodiversity that is identified as a Significant Natural Area on the Planning maps or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity (Appendix 2) by a suitably qualified Ecologist.

Decision Reasons:

- Support definition with amendments to be assessed by a suitably qualified ecologist.
- This would align with the wording of the Conservation Lot Subdivision provisions which allows for subdivision where an area meets the Criteria for Determining Significance of Indigenous Biodiversity.

Point Number

514.9

Summary of Decision Requested:

Amend the activity status for Rule 22.4.1.1 PR1, PR2, PR3, PR4 (Prohibited subdivision) from Prohibited to Non-Complying Activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities listed under Rule 22.4.1.1. Submitter suggests that these activities be considered as non-complying activities.
- With regards to PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are some circumstances where it may be unavoidable to create an addition Record of Title, i.e. where the title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these viable and sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site. Established activities include greenhouses, pack house, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.

- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 228 of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 514.10

Summary of Decision Requested: **Retain** Appendix 2 Criteria for determining significance of indigenous biodiversity.

Decision Reasons:

- Supports the inclusion of these criteria.

Point Number 514.11

Summary of Decision Requested: **Add** a new discretionary activity to Rule 22.4.1.6 Conservation lot subdivision, as follows:

- DI*
- a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6(vi-vii) RDI.*
- b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6(vi-vii) RDI.*

Decision Reasons:

- Rule 22.4.1.6.vi requires a minimum area of 8000m², flexibility for lot area should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activities. This avoids unnecessary fragmentation of productive farming land. This could be addressed as a Matter of Discretion.

Point Number 514.12

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General Subdivision as notified.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number 514.13

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited Subdivision to replace references to 'lot' with 'Record of Title'

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Point Number 514.14

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(i-iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 514.15

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below

- AND
- Amend** Rule 22.4.1.2 General Subdivision to add new discretionary activities, as follows;
- DI*
- a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.*
- b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.*

Decision Reasons:

- Support Rule 22.4.1.2 (a) (iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries.
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site should be provided for.

Point Number 514.16

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision;

AND

Add a new matter of discretion to Rule 22.4.1.2 General Subdivision, as follows:

(b). (vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in s32 regarding the relevance of practicality of this rule.
- Submitter agrees with the intent of this rule which is to design subdivision to avoid fragmentation of the high class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils.
- Supports the inclusion of matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions.
- The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the general provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number

514.17

Summary of Decision Requested:

Retain Rule 22.4.1.5 Conservation lot subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.6 Conservation lot Subdivision, as follows:

(i) The lot must contain:

A. a contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist which meets; or

B. a contiguous area, to be enhanced and/or restored;

in accordance with the table below:

(ii) The area of Significant Natural Area, or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);

(iii) The Significant Natural Area or area to be restored is not already subject to a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act legal protection.

iv) The subdivision proposes to legally protect all areas of Significant Natural Area or area to be restored by way of a covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act.

(v) An ecological management plan is prepared to address ongoing management of the covenant-protected area to ensure that the Significant Natural Area area to be protected is self sustaining and that plan:

A. Addresses fencing requirements for the covenant protected area;

B. Addresses ongoing pest plant and animal control;

C. Identifies any enhancement and/or restoration or edge-planting required within the covenant area to be protected;

(b) Council's discretion is restricted to the following matters:

(i) Subdivision layout and proximity of building platforms to Significant Natural Area the area to be protected;

(ii) Matters contained in an ecological management plan for the covenant protected area;

(iii) Effects of the subdivision on localised rural character and amenity values;

(iv) Extent of earthworks including earthworks for the location of building platforms and access ways.

(v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- Incentivising legal and physical protection of Significant Natural Areas and other areas of existing biodiversity offers positive benefits for the Region.
- Significant biodiversity and water quality benefits can be gained from ecological enhancement along waterways and wetland areas. Water quality is a key issue in the Regional Policy Statement and Vision and Strategy.
- Enhancement is also recognised in corresponding rural objectives and policies in regards to surface water and ground water quality and the natural character of waterways.
- The plan should be enabling of improving both biodiversity and water quality within the Waikato Catchment.
- Revegetation approximately costs \$45,000 per hectare, excluding fencing of revegetated areas from stock. Incentivising through subdivision would assist in offsetting costs associated with revegetation and fencing.
- Provisions for ecological enhancement and/or restoration of appropriate areas be included in the Conservation Lot Subdivision rules. Appropriate features to be restored should meet one or more criteria in Appendix 2: Criteria for Determining Significance of Indigenous Biodiversity, or areas identified as Significant Natural Areas that don't meet the minimum size requirements for subdivision without additional enhancement and/or restoration planting. Minimum areas for enhancement and/or restoration should be in accordance with Rule 22.4.1.6.
- Rule 22.4.1.6 does not cover all forms of legal protection. The rule should require legal protection only and leave the mechanism of protection to the discretion of Council (e.g. encumbrance, bond, consent notice, covenant or vesting as a reserve).
- Rule 22.4.1.6.vi requires a minimum area of 8000m², flexibility for lot area should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activities. This avoids unnecessary fragmentation of productive farming land. This could be addressed as a Matter of Discretion.

Submitter Number:

516

Submitter:

Anthony and Maureen Vazey

Point Number

516.1

Summary of Decision Requested:

Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number

516.2

Summary of Decision Requested:

Retain Objective 5.2.1 Rural resources, except for the amendments sought below

AND

Amend Objective 5.2.1 Rural resources, as follows:

(a) Maintain or enhance the:

Decision Reasons:

- Supports sub-policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 516.3

Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Submitter supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 516.4

Summary of Decision Requested: Retain Objective 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1(a) Rural character and amenity as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 516.5

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 516.6

Summary of Decision Requested: Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

D1

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2, (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2, (iv) RD1.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 516.7

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);

AND

Add new matters of discretion to Rule 22.4.1.2(b) General subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- The submitter agrees with the intent of this rule which is to design subdivision to avoid fragmentation of the high class soils. However, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with even subdivision application under the general provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 516.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision, which classifies creation of an additional lot between 8,000m² and 1.6ha as a restricted discretionary activity.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number 516.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(i) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses, however these are recognised as important components of primary production activities, form part of the rural environment, and are generally considered rural in appearance and value.

Point Number 516.10

Summary of Decision Requested: **Amend** the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities under Rule 22.4.1.1.
- Submitter suggests that Prohibited Activities be considered as non-complying.
- With regards to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are some circumstances it may be unavoidable to create an additional Record of Title, i.e. where it is limited to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities are viable and sustainable and permanent nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 516.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 517 **Submitter:** Amanda and Brian Billington

Point Number 517.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 517.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Amend Objective 5.2.1 Rural resources, as follows:
(a) *Maintain or enhance the:*
(i) *Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils...*

Decision Reasons:

- Supports sub policy (i) seeking to maintain or enhance the life-supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 517.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 517.4

Summary of Decision Requested: **Amend** Objective 5.3.1(a) Rural character and amenity, as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the rule but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the district, which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 517.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 517.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below
AND
Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:
DI
(a) *General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD1.*
(b) *General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD1.*

Decision Reasons:

- Support Rule 22.4.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 517.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);
AND
Add new matters of discretion to rule 22.4.1.2(b), as follows:
(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of the rule, however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems

addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.

- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 517.8

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a restricted discretionary activity.

Point Number 517.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses and are recognised as important components of primary production activities, however these form part of the rural environment and generally considered rural in appearance and value.

Point Number 517.10

Summary of Decision Requested: Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity Status for the rural subdivision activities in Rule 22.4.1.1.
- Prohibited activities as listed should be considered as non-complying activities.
- With regards to PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where title is limited to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and of permanent nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include sustainable such as greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 517.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 518

Submitter: Neville Ritchie

Organisation: Queen's Redoubt Trust

Point Number 518.1

Summary of Decision Requested: Develop a consent plan for development/beautification of 'Te Aukati Mangatawhiri Wahi Tapu' (and immediate surrounds along the banks of the Mangatawhiri Stream) as a significant historic place. This includes land between State Highway 1 and Pioneer Road, Pokeno in the vicinity of the Pioneer bridge including Mangatawhiri Stream.

Decision Reasons:

- The Mangatawhiri Stream in the vicinity of the Pioneer Road Bridge is a significant historic place.
- This site needs a concept plan in consultation with all parties
- The Mangatawhiri Stream is a significant historic place, particularly the section in the immediate vicinity of the Pioneer Road Bridge. On the 17 July 1863 General Cameron's forces crossed the Mangatawhiri Stream, initiating the military campaign against Waikato Tainui. This site was also the northern boundary of Waikato Tainui.
- The Queens Redoubt Trust is planning a display in its Visitors centre at the redoubt illustrating the significance of the Mangatawhiri Stream

Submitter Number: 519 **Submitter:** B and N Balle Limited

Point Number 519.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 519.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below

AND

Amend Objective 5.2.1 Rural resources, as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...*

Decision Reasons:

- Supports sub policy (i).
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 519.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 519.4

Summary of Decision Requested: **Retain** Objective 5.3.1 (a) Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1(a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District

Decision Reasons:

- Supports the intent of the policy but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 519.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 519.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2, (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2, (iv) RDI.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 519.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);
AND
Add new matters of discretion to Rule 22.4.1.2(b) General subdivision, as follows:
(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Oppose Rule 22.4.1.2 (a)(v).
- Submitter agrees with the intent, however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under general provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 519.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary activity.

Point Number 519.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses, however these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 519.10

Summary of Decision Requested: **Amend** the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity Status for rural subdivision activities and should be considered as non-complying activities.
- With regards to PR2 and PR3, there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent in nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include such as greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.

- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. - The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 519.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 520 **Submitter:** Finlayson Farms Limited

Point Number 520.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 520.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Amend Objective 5.2.1 Rural resources, as follows:

- (a) Maintain or enhance the:
(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...*

Decision Reasons:

- Supports sub policy (i) which seeks to maintain or enhance the life-supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 520.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 520.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendments sought below
AND
Amend Objective 5.3.1(a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 520.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 520.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI

(g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number

520.7

Summary of Decision Requested:

Delete Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);

AND

Add new matters of discretion to Rule 22.4.1.2(b) General subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Oppose Rule 22.4.1.2 (a)(v).
- Submitter agrees with intent of this rule, however there is no analysis in the s32 regarding this relevance or practicality of this rule.
- The strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number

520.8

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number

520.9

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and generally considered rural in appearance and value.

Point Number

520.10

Summary of Decision Requested:

Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities and should be considered as non-complying activities.
- With regards to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by a covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.

- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent in nature and it is appropriate for those to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 520.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 521 **Submitter:** Max and Denise Irwin

Organisation: A Irwin & Son Limited

Point Number 521.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 521.2

Summary of Decision Requested: Retain Objective 5.2.1 Rural resources, except for the amendment sought below

AND

Amend Objective 5.2.1 Rural resources, as follows:

(a) Maintain or enhance the:

(i) Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils...

Decision Reasons:

- Support sub policy (i) which seeks to maintain or enhance the life-supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 521.3

Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Submitter supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 521.4

Summary of Decision Requested: Retain Objective 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1(a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings particularly in the northern part of the district which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 521.5

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number

521.6

Summary of Decision Requested:

Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number

521.7

Summary of Decision Requested:

Delete Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);

AND

Add new matters of discretion to rule 22.4.1.2(b), as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of this rule however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provision to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number

521.8

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of an vacant lot between 8,000m² and 1.6ha as a Restricted Discretionary Activity is supported.

Point Number

521.9

Summary of Decision Requested:

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that Rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number

521.10

Summary of Decision Requested:

Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity Status for rural subdivision activities and should be considered as non-complying activities.
- With regard to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and a permanent nature and it is appropriate for those to be subdivided from other rural activities on site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. - The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 521.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 522 **Submitter:** Joy & Wayne Chapman

Point Number 522.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 522.2

Summary of Decision Requested: Retain Objective 5.2.1 Rural resources, except for the amendments sought below

AND

Amend Objective 5.2.1 Rural resources, as follows:

(a) Maintain or enhance the:

(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...*

Decision Reasons:

- Support sub-policy (i) which seeks to maintain and enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 522.3

Summary of Decision Requested: Retain Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 522.4

Summary of Decision Requested: Retain Objective 5.3.1 (a) Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1(a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 522.5
Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 522.6
Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision except for the amendments sought below
AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD1.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 522.7
Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);
AND

Add new matters of discretion to Rule 22.4.1.2(b) General subdivision as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of the rule, however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.

Point Number 522.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 523 **Submitter:** R & B Litchfield Limited

Point Number 523.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 523.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND
Amend Objective 5.2.1 Rural resources, as follows:
(a) *Maintain or enhance the:*
(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...*

Decision Reasons:

- Supports sub policy (i) which seeks to maintain and enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 523.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 523.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendments sought below
AND
Amend Objective 5.3.1(a) Rural character and amenity, as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 523.5

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 523.6

Summary of Decision Requested: Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below
AND
Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:
DL
(g) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD1.
(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD1.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not need to meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 523.7

Summary of Decision Requested: Delete Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);
AND
Add new matters of discretion to Rule 22.4.1.2(b) General subdivision as follows:
(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of the rule however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 523.8

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of a vacant lot between 8,000m and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number 523.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~
...
(d) Rural hamlet subdivision and boundary relocations ensure the following:
(i) Protection of rural land for productive purposes;
(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;
(iii) Minimisation of cumulative effects.
(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.

- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 523.10

Summary of Decision Requested: Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for the rural subdivision activities and should be considered as non-complying activities.
- With regards to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by a covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent in nature and it is appropriate for those to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 523.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 524 **Submitter:** Anna Noakes

Point Number 524.6

Summary of Decision Requested: Defer hearing of submission until after the National Planning Standards have been adopted and/or stage 2 of the review of Future Proof/updated Waikato Regional Policy Statement.

Decision Reasons:

- New National Planning Standards, potential changes in land use patterns through the adoption of revisions in Future Proof that will then inform the Waikato Regional Policy Statement, all raise question marks regarding the timing of the review as subsequent changes to the Proposed District Plan brought about by these documents will be unnecessarily time consuming and expensive.
- Deferring the Proposed District Plan will also allow for more thorough editing of the document.

Point Number 524.7

Summary of Decision Requested: Retain Section 1.4.4 The urban environment, except for the amendments sought below
AND
Amend Section 1.4.4. (a) The urban environment, as follows:
A key issue for the district is to maintain and enhance the productive capacity...

Decision Reasons:

- The impact of urban development on the rural environment should not restrict the productive capacity of the rural resource to existing levels. The policy should allow for enhanced rural productivity.

Point Number 524.8

Summary of Decision Requested: Retain Section 1.5.2 Planning for urban growth and development, except for the amendments sought below
AND
Amend Section 1.5.2. (a) Planning for urban growth and development, as follows:
Defined growth areas have been zoned and their development will be guided through the application of objectives and policies and through processes such as the development of master plans, comprehensive structure plans, within the district plan and any future changes to the district plan. The agreed Future Proof settlement pattern for urban growth and development is to assist to avoid unplanned encroachment ...

Decision Reasons:

- Oppose in part.
- The Environment Court has questioned the legality of the use of Structure Plans/Master Plans and the like where the activity status of a proposal is determined through such documents.

- The need for owners of properties within a 'Structure Plan' area to collaborate over development in accordance with 'required' Structure Plan provisions is questionable.
- Future Proof is a dynamic document and will undergo change throughout the term of the plan and reference to the current document may be misleading.

Point Number 524.9

Summary of Decision Requested: **Retain** Section 1.10.1.1 Waikato District Development Strategy, except for the amendments sought below
AND
Amend Section 1.10.1.1 (a) Waikato District Development Strategy 2015, as follows:
The Waikato District Development Strategy (WDDS) provides a high-level thirty year strategic and spatial development guide for the district. The strategy replaces and integrates the Waikato District Growth Strategy (2009) and the Franklin District Growth Strategy (2008). However, the latter document remains live by virtue of Policy 6.1.1 in the Waikato Regional Policy Statement ...

Decision Reasons:

- Oppose in part.
- Refers to wrong WRPS Policy in the second line.

Point Number 524.10

Summary of Decision Requested: **Retain** Section 1.12.1 Strategic direction, except for the amendments sought below
AND
Delete Section 1.12.1.(b) and (c) Strategic direction.

Decision Reasons:

- Oppose in part.
- The policy relating to the use of Master Plans where adherence to the Plans may change the activity status of a proposal is questioned.
- The Environment has questioned the legality of the use of Structure Plans/Master Plans and the like where the activity status of a proposal is determined through such documents.
- The need for owners of properties within a 'Structure Plan' area to collaborate over development in accordance with 'required' Structure Plan provisions is questionable.
- Future Proof is a dynamic document and will undergo change throughout the term of the plan and reference to the current document may be misleading.
- It is not clear in the document what is meant by Master Plans and where they are referenced in the rules

Point Number 524.11

Summary of Decision Requested: **Retain** Objective 4.1.1 Strategic, except for the amendments sought below
AND
Amend the policies associated with Objective 4.1.1 (a) and (b) Strategic, to provide policies and support for additional residential zoning opportunities to cater for anticipated demand for the next 27 years;
AND
Amend the Planning Maps to increase the residential zoned areas around existing established communities in line with Future Proof expectations.

Decision Reasons:

- 4.1.1 (a) and (b) Support sustainable communities and the objective of providing for 13,300 - 17,500 additional dwellings with the District 2018-2045.

Point Number 524.12

Summary of Decision Requested: **Retain** Objective 4.1.2 (a) Urban growth and development, as notified.

Decision Reasons:

- Support Objective 4.1.2 (a) in consolidating growth around existing towns/villages.

Point Number 524.13

Summary of Decision Requested: **Amend** Policy 4.1.3 (b) Location of development, as follows:
Locate urban growth areas only where they are consistent with legislative requirements and strategic documents such as Future Proof the Future Proof Strategy Planning for Growth 2017.

Decision Reasons:

- Urban Growth should align with the Waikato Regional Policy Statement informed through Future Proof, however the Future Proof settlement patterns are to be updated 2018/19 to take into account legislative reforms such as the National Policy Statement and Urban Development Capacity and strategic requirements.

Point Number 524.14

Summary of Decision Requested: **Amend** Policy 4.7.3 Residential subdivision, to clarify position regarding guidelines and activity status and/or process for changes to guidelines.

Decision Reasons:

- The subdivision development responds to the outcomes of the Urban Design Guidelines is supported-but it is noted that the document reference directs users to the Operative Plan provisions rather than Proposed Plan. The status of this document forming part of the Proposed Plan is also questionable with regard to the ability of the public to submit on changes to the guidelines.

Point Number 524.15

Summary of Decision Requested:	Delete reference to Structure Plans in Policy 4.7.6(a)(ii) and (iii) Coordination between servicing development and subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • Opposes reference to Structure Plans for the following reasons: • The policy relating to the use of Master Plans where adherence to the Plans may change the activity status of a proposal is questioned as per submission point 524.8. as per below; • The Environment Court has questioned the legality of the use of Structure Plans/Master Plans and the like where the activity status of a proposal is determined through such documents. • The need for owners of properties within a 'Structure Plan' area to collaborate over development in accordance with 'required' Structure Plan provisions is questionable.
Point Number	524.16
Summary of Decision Requested:	Retain Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	524.17
Summary of Decision Requested:	Retain Policy 4.7.8 Staging of subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	524.18
Summary of Decision Requested:	Retain Policy 4.7.9 Connected neighbourhoods.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	524.19
Summary of Decision Requested:	Retain Policy 4.7.10 Recreation and access.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	524.20
Summary of Decision Requested:	Retain Policy 4.7.11 Reverse sensitivity, except for the amendments sought below AND Amend the Proposed District Plan to encourage new residential areas to be developed where topographical or physical constraints provide a natural separation between conflicting land uses.(eg roads/rails lines, significant planted areas as the buffer) in accordance with Policy 4.7.11(a) and (b) Reverse sensitivity.
Decision Reasons:	<ul style="list-style-type: none"> • Support in part • While the Policies discuss protecting against reverse sensitivity, identified areas for Residential development with communities such as Pokeno do not contain any buffer between the proposed residential and existing rural environment. Residential development, has the potential to impact on existing farming operations whether or not they are intensive in nature, and/or may be negatively impacted by existing farming practices.
Point Number	524.21
Summary of Decision Requested:	Delete from Policy 4.7.14 Structure and master planning the references to Structure Plans and Master Plans.
Decision Reasons:	<ul style="list-style-type: none"> • Opposed to the reference to Structure Plans/Master Plans. • The Environment Court has questioned the legality of the use of Structure Plans/Master Plans and the like where the activity status of a proposal is determined through such documents. • The need for owners of properties within a 'Structure Plan' area to collaborate over development in accordance with 'required' Structure Plan provisions is questionable. • It is not clear in the document what is meant by Master plans and where they are referenced in the rules.
Point Number	524.22
Summary of Decision Requested:	Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development.
Decision Reasons:	<ul style="list-style-type: none"> • Submission supports the objective of the integration of the infrastructure with subdivision and development.
Point Number	524.23
Summary of Decision Requested:	Retain Policy 6.4.2 Provide adequate infrastructure.

Decision Reasons:

- Support the Policy 6.4.2.

Point Number 524.24

Summary of Decision Requested: Retain Policy 6.4.3 Infrastructure location and services.

Decision Reasons:

- Support Policy 6.4.3.

Point Number 524.25

Summary of Decision Requested: Retain Policy 6.4.4 Road and rail network.

Decision Reasons:

- Support Policy 6.4.4.

Point Number 524.26

Summary of Decision Requested: Retain Policy 6.4.5 Roading infrastructure.

Decision Reasons:

- Support Policy 6.4.5.

Point Number 524.27

Summary of Decision Requested: Retain Objective 6.4.6 Stormwater and drainage.

Decision Reasons:

- Support Objective 6.4.6.

Point Number 524.28

Summary of Decision Requested: Retain Policy 6.4.7 Stormwater.

Decision Reasons:

- Support Policy 6.4.7.

Point Number 524.29

Summary of Decision Requested: Amend planning maps to remove indicative walkway cycleways unless the underlying land has been earmarked for residential or commercial/industrial development.

Decision Reasons:

- While supporting pedestrian and off road cycleways, the identification and location of such should not impact on property rights without Council Designating land for such purposes.

Point Number 524.30

Summary of Decision Requested: Retain definition of "Fill material" except for the amendments sought below

AND

Amend the definition of "Fill material" in Chapter 13 Definitions, as follows:

Means material used for filling activities including, but not limited to, materials such as sand, soil, clay or aggregate.

Decision Reasons:

- Support in part.
- Clarify that the list is not inclusive - other materials could be fill such as sand.

Point Number 524.31

Summary of Decision Requested: Amend the definition for "Impervious surface" in Chapter 13 Definitions, as follows:

Means a surface such as a road, rooftop, footpath, paving, decking, swimming pool, patio, driveway, vehicle access and manoeuvring area or highly-compacted soil that is not vegetated and does not infiltrate runoff.

It excludes wooden decks with spacing between boards of 4mm or more, or surfaces such as gobi paving, where water is allowed to drain through to a permeable surface below the deck.

Decision Reasons:

- Support in part.
- Definition is unduly restrictive and does not cater for 'pervious' materials that may be used for driveways etc.

Point Number 524.32

Summary of Decision Requested: Amend terminology used in Overlays on the Planning Maps and provisions to provide consistency between maps and text.

Decision Reasons:

- There is inconsistency in terminology used in the Overlays on the Planning Maps v provisions within the text for example in the Rural zone reference Outstanding Natural Character v Maps Natural Character.

Point Number 524.33

Summary of Decision Requested: Amend the Proposed District Planning maps (inclusive of Legend) to provide explanation as to what is meant by Stage 1.

Decision Reasons:

- There is no explanation as to what is meant by Stage 1.

Point Number 524.34

Summary of Decision Requested: Amend Map 07 Tuakau/Pokeno and Environs, to examine all zoning options for growth within land in Pokeno and surrounds to provide for the required level of Residential for the next 30 year period as detailed within the Future Proof Strategy;

AND

Delay zoning the land until new legislative planning requirements, and revised regional growth strategies have been determined.

Decision Reasons:

- Submission refers to the proposed Residential Zoning of the 160 ha block identified on attachment VI hatched in purple known as Pokeno West. The zoning of this block appears to have been developed as a private plan change and then added to the DP review and therefore has not gone through the consultative processes normally anticipated from Plan changes. Council has not completed an independent Section 32 to ensure robust decision making under the RMA.
- There has been no analysis of alternative sites for residential zoning on the periphery of Pokeno particularly with regard to the proposed Objectives and Policies of the Residential Zone. For example, while the proposed zoning provides for a degree of residential growth needed for Pokeno, the constraints within the land make achieving the density targets likely unachievable.
- It is unclear as to the nature and ownership of the large areas of 'open space' with the indicative 'Master Plan' for the development. If it is in public ownership, such a high level of public open space will place a potentially excessive burden on the rate payer for development and ongoing maintenance.
- Areas chosen for residential growth should be consistent with the Objectives and Policies of the Residential Zone, as well as Regional and National Legislative and Strategic documents. Further analysis is needed prior to determining that this area should be the 'next off the block'.

Point Number 524.35

Summary of Decision Requested: Amend the zoning of the property at Lot 2 DP 176205, Pokeno from Rural Zone on to Residential Zone (see submission for map)

Decision Reasons:

- Council has not identified enough land within Pokeno and the immediate surrounds to meet the residential growth expectations within Future Proof.
- Lot 2 DP 176205 is a 23.5 ha block immediately west of the exiting residential zone boundary of Pokeno and adjoins the Pokeno Village Estate subdivision. (see attachment VI and VI.1). The property is proposed Rural Zoning and this is inconsistent with the residential growth expectations and is not consistent with the Objectives and Policies of either the proposed Rural Zone or Residential Zone growth expectations.
- The block can be serviced from the east, is in proximity to new water infrastructure (is 250m away from a current development) and includes a future walkway cycleway.
- The geographical location of the site, separated from rural land to the north by the east west rail line and to the south by a substantial covenanted bush block, makes the property ideal for Residential Zoning.
- The site provides a logical extension of the residential development of the adjoining land, offering connectivity, access and development options that otherwise may be difficult to in the future if connectivity is lost through a lack of appropriate zoning to facilitate development options.

Point Number 524.36

Summary of Decision Requested: Amend subdivision rules to enable the required outcomes of Policies 4.7.7-4.7.10.

Decision Reasons:

- No reason provided.

Point Number 524.37

Summary of Decision Requested: Amend the rules relating to subdivision to give effect to policies 6.4.2-6.4.7 and ensure greenfield sites for urban growth are investigated through section 32 analysis to assess the ability to appropriately, effectively and efficiently service these areas in comparison to other areas.

Decision Reasons:

- No reasons provided.

Point Number 524.38

Summary of Decision Requested: Retain Policy 6.5.2 (a)(iv) Construction and operation of the land transport network, where land is earmarked for residential or commercial/industrial development

Decision Reasons:

- No reason provided.

Point Number 524.39

Summary of Decision Requested: Retain Policy 4.1.4 Staging of development

Decision Reasons:

- Supports the integrated and staged approach to development where infrastructure supports such development

Point Number	524.40
Summary of Decision Requested:	Retain Policy 4.1.5 (b) Density.
Decision Reasons:	<ul style="list-style-type: none"> Support the minimum density requirements but notes that physical/geotechnical limitation and market trends may impede achieving minimum requirements especially when existing land holdings are in fragmented ownership.
Point Number	524.41
Summary of Decision Requested:	Retain Policy 4.1.11 (a) (ii) Pokeno, where walking and cycling networks form part of the urban framework.
Decision Reasons:	<ul style="list-style-type: none"> Submission references the proposed walkway/cycleway at Lot 2 DP176205, Pokeno.
Point Number	524.42
Summary of Decision Requested:	No specific decision sought, but submission opposes policy 4.1.11 (a) (ii), Pokeno where the underlying land is not part of the planned urban area.
Decision Reasons:	<ul style="list-style-type: none"> Opposed policy 4.1.11 (a) (ii) which may lead to walkway, cycleways impinging on property rights where the underlying land is not part of the planned urban area. Submission refers to Lot 2 DP 176205, as identified in the submission.
Point Number	524.43
Summary of Decision Requested:	Retain Objective 4.2.14 Earthworks, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Earthworks that facilitate residential subdivision is supported

Submitter Number:	525	Submitter:	Gillian Marie
--------------------------	-----	-------------------	---------------

Point Number	525.1
Summary of Decision Requested:	Add a resource management framework for the management of GMOs that is regional specific taking into account environmental, economic and social well-being considerations.
Decision Reasons:	<ul style="list-style-type: none"> Provisions are allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89. Release of GMOs has a potential to cause significant adverse effects on the environment, including the following: <ul style="list-style-type: none"> Biological or ecosystem harm Harm to tangata whenua cultural values such as mauri and tikanga Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing Harm from GMO contamination to existing or potential forms of land use including farming, bee keeping, forestry and other primary production activities dependant on an uncontaminated environmental brand. Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood. The Waikato has three major milk suppliers which have a GMO Free requirement for the milk products. The ability to control the grass genetic pollution is a major concern. There are several organic producers in Waikato Conditions of consent may be breached by poor management, human error, natural events. Once GMOs have been released they would be very difficult, if not impossible to eradicate. The GE Free status of the district potentially would be lost permanently along with the market advantage of that status. This along with the potential health hazards to all living things as the long term impact of GMO's has not been ascertained. Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number	525.2
Summary of Decision Requested:	Add strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms that are the same (or similar) as those in the Far North District Plan, Whangarei District Plan and the Auckland Unitary Plan.
Decision Reasons:	<ul style="list-style-type: none"> Provisions are allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89. Release of GMOs has a potential to cause significant adverse effects on the environment, including the following: <ul style="list-style-type: none"> Biological or ecosystem harm Harm to tangata whenua cultural values such as mauri and tikanga Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing Harm from GMO contamination to existing or potential forms of land use including farming, bee keeping, forestry and other primary production activities dependant on an uncontaminated environmental brand.

- Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- The Waikato has three major milk suppliers which have a GMO Free requirement for the milk products. The ability to control the grass genetic pollution is a major concern.
- There are several organic producers in Waikato
- Conditions of consent may be breached by poor management, human error, natural events.
- Once GMOs have been released they would be very difficult, if not impossible to eradicate. The GE Free status of the district potentially would be lost permanently along with the market advantage of that status. This along with the potential health hazards to all living things as the long term impact of GMO's has not been ascertained.
- Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number 525.3

Summary of Decision Requested: Amend the Proposed District Plan to required all consent applications to be automatically publicly notified, regardless of whether the application is regarding genetically modified organisms or not.

Decision Reasons:

- Provisions are allowed under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council [2015] NZEnC 89.
- Release of GMOs has a potential to cause significant adverse effects on the environment, including the following:
 - Biological or ecosystem harm
 - Harm to tangata whenua cultural values such as mauri and tikanga
 - Harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing
 - Harm from GMO contamination to existing or potential forms of land use including farming, bee keeping, forestry and other primary production activities dependant on an uncontaminated environmental brand.
- Adverse effects to these land uses could include: loss of organic and GMO-free certification, reputational damage, loss of markets and premiums paid for GMO free produce and loss of livelihood.
- The Waikato has three major milk suppliers which have a GMO Free requirement for the milk products. The ability to control the grass genetic pollution is a major concern.
- There are several organic producers in Waikato
- Conditions of consent may be breached by poor management, human error, natural events.
- Once GMOs have been released they would be very difficult, if not impossible to eradicate. The GE Free status of the district potentially would be lost permanently along with the market advantage of that status. This along with the potential health hazards to all living things as the long term impact of GMO's has not been ascertained.
- Application of integrated management and precautionary approach to GMOs under the RMA is the best technique for managing potential adverse effects.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment.

Point Number 525.4

Summary of Decision Requested: Cease using toxic sprays for weed control and stop the requirement to opt out of having their berm sprayed; and replace with a system where people to pay for this service and have to opt in.

Decision Reasons:

- Strongly object to the proposal that if you do not want your berm to be sprayed you must pay a fee to the council to go on the No Spray Register, ie you must pay for a non-service. The tradition of cutting grass along roadside dates back to when cars backfired which may cause fires, or people threw cigarettes out the car window. Cars no longer backfire and peoples behaviour regarding cigarettes has changed.

Point Number 525.5

Summary of Decision Requested: WDC to monitor water quality more closely and look at innovative ways of dealing with Whaingaroa sewage and waste water, preferably in a land based system.

Decision Reasons:

- WDC should be doing more to monitor and improve the quality of water entering waterways and harbour
- Piping water from the sewage pond into the ocean is a highly irresponsible and toxic way of dealing with sewage water waste.

Submitter Number: 526

Submitter: Roy & Lesley Wright

Point Number 526.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary important for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 526.2

Summary of Decision Requested: Retain Objective 5.2.1 Rural resources, except for the amendments sought below

AND

Amend Objective 5.2.1 Rural resources, as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...*

Decision Reasons:

- Support sub policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 526.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 526.4

Summary of Decision Requested: **Retain** Objective 5.3.1 (a) Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1(a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings, particularly in the northern part of the district which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 526.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 526.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

D I

(a) *General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD 1.*

(b) *General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD 1.*

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 526.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);

AND

Add new matters of discretion to rule 22.4.1.2(b), as follows:

(v) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Oppose Rule 22.4.1.2 (a)(v).
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of the rule however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provisions to demonstrate that this exact figure is met. This becomes an additional compliance

cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 526.8

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of an additional lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number 526.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(i) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses and are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 526.10

Summary of Decision Requested: Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities and these should be considered as non-complying activities.
- With regards to PR2 and PR3 there may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable and permanent in nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 526.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number: 527

Submitter: Mark Scobie

Point Number 527.1

Summary of Decision Requested: Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.
- Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration.
- Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas.
- Supports the objective and agrees that urban development within the rural environment should be avoided.

Point Number 527.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below
AND

Amend Objective 5.2.1 Rural resources, as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils...*

Decision Reasons:

- Support sub policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy.

Point Number 527.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports Policy 5.2.2 seeking to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil.

Point Number 527.4

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendments sought below
AND

Amend Objective 5.3.1(a) Rural character and amenity, as follows:

Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the objective.
- Needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings particularly in the northern part of the district and primarily pastoral uses and smaller landholdings which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 527.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i), (ii) and (iii) General Subdivision, as notified.

Decision Reasons:

- Supports the inclusion of the General Subdivision rules.

Point Number 527.6

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision except for the amendments sought below
AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI

(a) *General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RD1.*

(b) *General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RD1.*

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.
- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 527.7

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);
AND

Add new matters of discretion to rule 22.4.1.2(b) as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Oppose Rule 22.4.1.2 (a)(v).
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of this rule however the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 527.8

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(iv) General subdivision.

Decision Reasons:

- Creation of an additional lot between 8,000m² and 1.6ha is supported as a Restricted Discretionary Activity.

Point Number 527.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

(i) Protection of rural land for productive purposes;

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

(iii) Minimisation of cumulative effects.

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Policies 5.3.8(b), (d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures. These are also areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 527.10

Summary of Decision Requested: Amend the activity status for Rules 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for the rural subdivision activities and should be considered non-complying.
- With regards to PR2 and PR3 here may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- There are circumstances where it may be unavoidable to create an additional Record of Title, i.e. where a title is limited as to parcels and held together by a covenant.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.
- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities where these are viable and sustainable, permanent in nature and it is appropriate for these to be subdivided from other rural activities on the site. Established rural activities include greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone

Point Number 527.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Submitter Number:	528	Submitter:	Amanda Schaake
On behalf of:	Internal Communications NZ Ltd		
Point Number	528.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports the proposed development as they considered it will be good for the Te Kowhai community. Te Kowhai Airfield has been an integral and valuable contributing community group. • The submitter is keen to see a unique and valuable asset of an airpark in the community. 		
Point Number	528.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports the proposed development as they considered it will be good for the Te Kowhai community. Te Kowhai Airfield has been an integral and valuable contributing community group. • The submitter is keen to see a unique and valuable asset of an airpark in the community. 		

Submitter Number:	529	Submitter:	Wilcox Properties Limited
Point Number	529.1		
Summary of Decision Requested:	Retain Policy 3.2.8 Incentivise subdivision, except for the amendments sought below AND Add to Policy 3.2.8(b) Incentivise subdivision, as follows: <i>(b) Incentivise subdivision in the Rural Zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous Biodiversity.</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Supports the policy in part. • Seeks that Policy 3.2.8 be expanded to include provision for the enhancement/restoration of areas as this is in line with the Vision and Strategy for the Waikato River. • Supports incentivising the protection of existing biodiversity with subdivision subject to meeting certain criteria. Appendix 2 of the Proposed District Plan Criteria for Determining Significance of Indigenous Biodiversity could provide the basis for determining eligibility. 		
Point Number	529.2		
Summary of Decision Requested:	Retain Objective 5.1.1 The rural environment, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally. • Protecting high class soils from adverse effects of inappropriate use and development is of national importance and is recognised with a NPS for Versatile Land and High Class Soils under consideration. • Urban subdivision is an inefficient use of rural production land. Urban subdivision, particularly ad-hoc subdivision, may undermine the integrated development of identified townships and expansion areas. • Supports the objective and agrees that urban development within the Rural Environment should be avoided. 		
Point Number	529.3		
Summary of Decision Requested:	Retain Objective 5.2.1 Rural resources, except for the amendments sought below AND Amend Objective 5.2.1 Rural resources, as follows: (a) <i>Maintain or enhance the:</i> (i) <i>Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils;</i>		
Decision Reasons:	<ul style="list-style-type: none"> • Accessibility to versatile land is also a key consideration in managing this resource and should be included in this policy. • Support the sub-parts ii,iii and iv of the policy. Providing for conservation lot subdivision via enhancement/restoration would enable this policy. • Support sub-parts (i) which seeks to maintain or enhance the life-supporting capacity and versatility of soils. 		
Point Number	529.4		
Summary of Decision Requested:	Retain Policy 5.2.2 High class soils, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Supports Policy 5.2.2 which seeks to retain high class soils and ensure adverse effects do not compromise the life support properties of high class soil. 		
Point Number	529.5		

Summary of Decision Requested: **Retain** Policy 5.2.3 Effects of subdivision and development on soils, except for the amendments sought below
AND
Amend Policy 5.2.3. (b) Effects of subdivision and development on soils, as follows:
(b) Subdivision which provides a range of lifestyle options is directed away from high class soils and/ or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).

Decision Reasons:

- This policy only provides for subdivision where existing indigenous biodiversity is being protected. There are waterways and wetlands in the Rural Zone that would benefit from stock exclusion and enhancement/restoration.
- The cost of restoration is approximately \$45,000 per ha. Subdivision offers an incentive for landowners to undertake restoration works.
- To allow for protection/restoration would achieve Policy 5.2.1(a)(iii) and Policy 3.1.2.
- Incentivising restoration would achieve the objectives of the Vision and Strategy for the Waikato River, improving water quality.

Point Number 529.6

Summary of Decision Requested: **Retain** Objective 5.3.1 Rural character and amenity, except for the amendments sought below
AND
Amend Objective 5.3.1(a) Rural character and amenity, as follows:
Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Support the intent of the objective but needs recognition of the variation of what defines rural character and amenity values across a large District.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings and primarily pastoral uses and smaller landholdings particularly in the northern part of the district which is used for higher value production activities such as intensive cropping, greenhouses etc.
- Consideration of 'Rural Character' should take into account the unique variables of the locality including land holding pattern, built form, landuse activities, vegetation and geomorphology.

Point Number 529.7

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~
...
(d) Rural hamlet subdivision and boundary relocations ensure the following:
(i) Protection of rural land for productive purposes;
(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;
(iii) Minimisation of cumulative effects.
...
(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Supported in part.
- Policies 5.3.8 (b),(d)(ii) and (e) are duplicates which seek to ensure that rural character and amenity are maintained.
- Not all rural areas comprise open space character and amenity. The district's rural character is varied in nature and comprises landscapes, landforms and structures and are areas of active and dynamic primary production and associated activities rather than necessarily benign landscapes.
- It should be recognised that rural landscapes can be visually altered by structures and buildings such as greenhouses and pack houses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance value.

Point Number 529.8

Summary of Decision Requested: **Retain** the definition for "Significant Natural Area" in Chapter 13: Definitions, except for the amendments sought below
AND
Amend the definition for "Significant Natural Area" in Chapter 13: Definitions, as follows:
Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area on the planning maps or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity, (Appendix 2) by a suitably qualified Ecologist

Decision Reasons:

- Support definition in part.
- Definition for Significant Natural Area needs to be expanded to include areas assessed by a suitably qualified Ecologist. This would align with the wording of the Conservation Lot Subdivision provisions.

Point Number 529.9

Summary of Decision Requested: **Amend** the activity status for Rules 22.4.1.1 PR1, PR2, PR3, PR4 Prohibited subdivision, from prohibited to non-complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities and they should be considered non-complying activities.
- There may be circumstances where the subdivision of high class soils has overall positive effects that can be supported by the objectives and policies. Relocating consented lots within a holding (multiple Records of Title held in the same ownership) may produce a better outcome from a farming and landscape perspective.
- In some instances it may be unavoidable to create an addition of Record of Title.
- The rule relies on a definition of High Class Soils. High class soils as defined in the Proposed Plan, (relying on soil classification only), may not be versatile due to a range of factors identified through case law.

- It is unreasonable to prohibit the creation of lots that accommodate existing and well-established rural activities which are viable and sustainable such as greenhouses, packhouse, packing sheds, intensive farming, poultry hatcheries or commercial orchards.
- Rural activities do not need to be held on the same certificate of title as other rural activities. Subdivision may enable more opportunities for economic wellbeing and the efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision including the desire to sell or lease the business rather than disposal of the entire property or the need to invest more capital in the operation.
- Prevents opportunities for subdivision where there is a significant capital investment, particularly in buildings and the intensive rural activity will continue to be commercially viable and sustainable following separation from other rural activities on the site.
- PR4 unreasonably restricts subdivision potential over what is necessary to avoid undermining the intent of the rule under which these Record of Title were created. Rule 22B of the Franklin Section the donor certificates of title had to meet a minimum area of 1ha each, however, there is no maximum, with many donor Records of Title ranging upwards from 20ha prior to the amalgamation. It is noted that under the Franklin Section of the District Plan there was no corresponding rule that limited any further subdivision of the donor lot. While subdividing lots amalgamated under Section 22b of the Franklin Section require closer scrutiny this should merit a Non-Complying Activity status. The land affected may contain qualifying Significant Natural Areas or may be able to relocate boundaries without creating an outcome that may compromise the prior transferable subdivision.
- The objectives and policies of the Proposed Plan should be sufficiently strong to ensure that the subdivision of land containing high class soils is protected and that subdivision in the Urban Expansion Zone does not undermine the integrated and efficient development of this zone.

Point Number 529.10

Summary of Decision Requested: **Retain** Appendix 2 Criteria for Determining Significance of Indigenous Biodiversity, as notified.

Decision Reasons:

- Submission supports the inclusion of Appendix 2 in the Proposed District Plan.

Point Number 529.11

Summary of Decision Requested: Add a new discretionary activity to Rule 22.4.1.6 Conservation lot subdivision, as follows:

DI

- Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6 (vi-vii) RDI.
- Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6 (vi-vii) RDI.

Decision Reasons:

- Rule 22.4.1.6 vi requires a minimum area of 8000m², flexibility for lot area should be provided where the lot boundaries encompass an existing dwelling curtilage or established rural activities. This avoids unnecessary fragmentation of productive farming land. This could be addressed as a Matter of Discretion.

Point Number 529.12

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(iv) General subdivision, which classifies creation of an additional lot between 8,000m² and 1.6ha as a restricted discretionary activity.

Decision Reasons:

- The creation of any additional lots is supported as a Restricted Discretionary Activity.

Point Number 529.13

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, to replace the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' as used in these rules be changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them in one Record of Title. This may occur when a stream or a public road bisects land held together in one Record of Title.

Point Number 529.14

Summary of Decision Requested: **Retain** Rule 22.4.1.2(a)(i-iii) General Subdivision, as notified.

Decision Reasons:

- Support the inclusion of the General Subdivision rules.

Point Number 529.15

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI

(a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2. (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2. (iv) RDI.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- General Subdivision creating a child lot around an existing dwelling, where a curtilage is established and farming regime is already in place on the balance lot, should be provided flexibility in lot size to ensure that the existing farming regime can continue.
- Ensure the boundaries proposed are a practical outcome to ensure the most efficient ongoing management of the land and not meet an arbitrary rule. A lot size consistent with the established farming regime will avoid the redevelopment of farm tracks and fence lines to access what is a relatively small piece of land.

- A discretionary rule should also be provided for lots less than 8,000m² and greater than 1.6ha where they contain an existing dwelling. There may be site specific factors that create a unique situation that is conducive to the proposed lot size whilst remaining consistent with the objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm the provision of services within the lot boundaries
- Lots greater than 1.6ha may need an assessment with respect to the productive potential of the land. If the land comprises existing curtilage around the house then the lot will not result in any unreasonable effects with respect to the productive potential of the balance land. If the land comprises productive potential, then a Farm Management report should be provided to demonstrate that the both the proposed lot and the balance lot are sized to ensure rural land uses continue to predominate.
- Creation of lots should be provided for that accommodate existing and well-established rural activities where these are of a viable, sustainable and permanent nature, and it is appropriate for these to be subdivided from other rural activities on the site.

Point Number 529.16

Summary of Decision Requested: **Delete** Rule 22.4.1.2(a)(v) General Subdivision (80/20 Rule);
AND

Add new matter of discretion to Rule (b), as follows:

(b)(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- There is no analysis in the s32 regarding this relevance or practicality of this rule.
- Submitter agrees with the intent of the rule, however, the strict and arbitrary 80/20 requirement of this rule though may not necessarily result in the best layout, design or farming outcome for the site.
- The objectives and policies (5.1.1, 5.2) give primacy to the protection of high class soils. In addition to the objectives and policies (5.2), the submitter would like to see matters relating to the retention of high class soils and the maintenance of productivity/farming systems addressed as a matter of discretion for the General Subdivision provisions. The strength of the objectives and policies together with expanded matters of discretion are sufficiently strong to ensure adverse outcomes on high class soils are avoided.
- The requirement to demonstrate the 80/20 split will result in the necessary inclusion of Landuse Capability Reporting with every subdivision application under the General provisions to demonstrate that this exact figure is met. This becomes an additional compliance cost that does not necessarily result in a better environmental outcome. Council's Consent Planners should have the discretion of where these are required in accordance with the recommended matter of discretion.

Point Number 529.17

Summary of Decision Requested: **Retain** Rule 22.4.1.6 Conservation lot subdivision, except for the amendments sought below
AND

Amend Rule 22.4.1.6 Conservation lot subdivision as follows:

The lot must contain:

A. a contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist which meets; or

B. a contiguous area, to be enhanced and/or restored

in accordance with the table below: (see table in PDP)

- The area of Significant Natural Area, or area to be enhanced and/or restored is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);
- The Significant Natural Area, or area to be restored is not already subject to a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977 legal protection.
- The subdivision proposes to legally protect all areas of Significant Natural Area or area to be restored, by way of a conservation covenant pursuant to the Reserves Act 1977 or the Queen Elizabeth II National Trust Act 1977;
- An ecological management plan is prepared to address ongoing management of the covenant protected area to ensure that the Significant Natural Area area to be protected is self-sustaining and that plan:
 - Addresses fencing requirements for the covenant protected area;
 - Addresses ongoing pest plant and animal control;
 - Identifies any enhancement and/or restoration or edge planting required within the covenant area to be protected.

(b) Council's discretion is restricted to the following matters:

- Subdivision layout and proximity of building platforms to Significant Natural Area-the area to be protected;
- Matters contained in an ecological management plan for the covenant protected area;
- Effects of the subdivision on localised rural character and amenity values;
- Extent of earthworks including earthworks for the location of building platforms and access ways.
- Mechanism of legal protection for the area to be protected

Decision Reasons:

- Support rules 22.4.1.6 in part.
- Incentivisation of the protection of Significant Natural Area and existing biodiversity offer positive benefits.
- There is no provision for ecological enhancement/restoration in the Conservation Lot Rules. There are significant biodiversity and water quality benefits to be gained by enhancement.
- Water quality is a key issue identified in the Regional Policy Statement and The Vision and Strategy.
- It is recognised in the Rural Objectives and Policies which seek enhancement of surface and ground water quality and the natural characteristics of waterways.
- Incentivising through subdivision would assist in offsetting the cost of enhancement/restoration.

Submitter Number: 530

Submitter: John Van Lieshout

Point Number 530.1

Summary of Decision Requested: **Retain** Objective 5.1.1 - The rural environment as notified.

Decision Reasons:

- The Waikato District has valuable areas of high class soils which are of primary importance for food production both regionally and nationally.

- Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils.
- Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas.
- Submitter agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 530.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Objective - Rural Resources, except for the amendment sought below
AND
Amend Objective 5.2.1 Rural Resources, as follows:
(a) *Maintain or enhance the:*
(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;*

Decision Reasons:

- Support sub policy (i) which seeks to maintain or enhance the life supporting capacity and versatility of soils.
- Accessibility to versatile land is also a key consideration in managing the soil resource.

Point Number 530.3

Summary of Decision Requested: **Retain** Policy 5.2.2 Policy - High class soils as notified.

Decision Reasons:

- Submitter supports this policy seeking to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number 530.4

Summary of Decision Requested: **Retain** Objective 5.3.1 - Rural character and amenity, except for the amendments sought below
AND
Amend Objective 5.3.1 - Rural character and amenity, as follows:
(a) *Rural character and amenity are maintained while recognising the localised character of different parts of the District.*

Decision Reasons:

- The variation in rural character and amenity values needs to be recognised.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number 530.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below
AND
Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:
DI (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.
(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- Support Rule 22.4.1.2 (a)(iv) in part.
- This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue.
- This will avoid redevelopment of farm tracks and fencelines for a relatively small lot.
- There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm that services can be provided.
- A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.

Point Number 530.6

Summary of Decision Requested: **Delete** Rule 22.4.1.2 (a)(v) General subdivision
AND
Add a matter of discretion to Rule 22.4.1.2(b) General subdivision as follows:
(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- The section 32 analysis does not justify this rule.
- Submitter agrees with the intent of the rule, however the 80/20 percentage requirement may not result in the best layout, design or farming outcome.
- Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils.
- The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be a matter of discretion rather than necessary.

Point Number 530.7

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(iv) General Subdivision.

Decision Reasons:

- The creation of an additional vacant lot between 8000m2 and 1.6ha is supported.
- The creation of any additional lot between 8000m2 and 1.6ha as a restricted discretionary activity is supported.

Point Number 530.8

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(i)-(iii) General Subdivision.

Decision Reasons:

- Submitter supports the inclusion of the General Subdivision rules.

Point Number 530.9

Summary of Decision Requested: Retain Policy 5.3.8 - Effects on rural character and amenity from rural subdivision, except for amendments sought below
AND

Amend Policy 5.3.8 - Effects on rural character and amenity from rural subdivision as follows:

...

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the follow:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity.
- Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can therefore be altered by structure and buildings such as greenhouses and packhouses. These are recognised as important components of primary activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 530.10

Summary of Decision Requested: Amend the activity status of Rule 22.4.1.1 Prohibited subdivision PR1, PR2, PR3 and PR4, from prohibited activities to non-complying activities.

Decision Reasons:

- Oppose the Prohibited activity status for the rural subdivision activities and should be considered as non-complying activities.
- With regards to PR2 and PR3 there may be circumstances where a subdivision of high class soils has overall positive effects supported by objectives and policies. Relocating consented lots within a landholding may produce a better outcome from farming and landscape perspectives.
- There are circumstances where it may be unavoidable to create an additional Record of Title. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high class soils which are defined in the Proposed Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unfair to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. This can result in economic wellbeing and a more efficient and effective operation of those types of activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of the operative Franklin Section Rule 22B and therefore a non-complying activity status is more appropriate. For example, the land may be able to be subdivided using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number 530.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the term 'lot' is changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Submitter Number: 532

Submitter: Joanne & Kevin Sands

Point Number 532.1

Summary of Decision Requested: Retain Objective 5.1.1 - The rural environment as notified.

Decision Reasons:

- Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils. Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas.
- Submitter agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 532.2

Summary of Decision Requested:	<p>Retain Objective 5.2.1 Rural resources, except for the amendments sought below</p> <p>AND</p> <p>Amend Objective 5.2.1 (a)(i) Rural Resources as follows:</p> <p><i>(i) Inherent life-supporting capacity, <u>accessibility</u>, and versatility of soils, in particular high class soils;</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Support sub policy (i) in part. • Accessibility to versatile land is also a key consideration in managing the soil resource.
Point Number	532.3
Summary of Decision Requested:	Retain Policy 5.2.2 High class soils as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Supports this policy seeking to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.
Point Number	532.4
Summary of Decision Requested:	<p>Retain Policy 5.3.1 Rural character and amenity, except for the amendments sought below</p> <p>AND</p> <p>Amend Objective 5.3.1 (a) Rural character and amenity as follows:</p> <p><i>(a) Rural character and amenity are maintained <u>while recognising the localised character of different parts of the District</u>.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Supports the intent of the objective but the variation in rural character and amenity values needs to be recognised. • The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses. • Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.
Point Number	532.5
Summary of Decision Requested:	<p>Retain Rule 22.4.1.2 General subdivision except for the amendments sought below</p> <p>AND</p> <p>Add a new discretionary activity (D1) to Rule 22.4.1.2 General subdivision as follows:</p> <p><i><u>D1 (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.</u></i></p> <p><i><u>(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Support rule 22.4.1.2 (a) (iv) in part. • This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue. • This will avoid redevelopment of farm tracks and fencelines for a relatively small lot. • There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies. • For lots smaller than 8000m², it is only necessary to confirm that services can be provided. • A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.
Point Number	532.6
Summary of Decision Requested:	<p>Delete Rule 22.4.1.2 (a)(v) General subdivision</p> <p>AND</p> <p>Add a new matter of discretion to Rule 22.4.1.2 (b) General subdivision as follows:</p> <p><i><u>(v) Effects on rural productivity and fragmentation of high class soils.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Rule 22.4.1.2 (a)(v) is opposed. • The section 32 analysis does not justify this rule. • Submitter agrees with intent however the 80/20 percentage requirement may not result in the best layout, design or farming outcome. • Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils. • The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.
Point Number	532.7
Summary of Decision Requested:	Retain Rule 22.4.1.2 (a)(i-iii) General subdivision as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports the inclusion of general subdivision provisions.
Point Number	532.8
Summary of Decision Requested:	Retain Rule 22.4.1.2 (a)(iv) General subdivision, as notified.
Decision Reasons:	

- The creation of an additional vacant lot between 8,000m2 and 1.6ha is supported.
- The creation of any additional lot between 8,000 and 1.6ha as a restricted discretionary activity is supported.

Point Number 532.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision as follows:

...

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the follow:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity.
- Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can therefore be altered by structure and buildings such as greenhouses and packhouses, these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 532.10

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from Prohibited to non-complying activities.

Decision Reasons:

- Oppose the Prohibited activity status for rural subdivision activities and these should be considered non-complying activities.
- With regards to PR2 and P43 there may be circumstances where a subdivision of high-class soils has overall positive effects supported by objectives and policies. Relocating consented soils within a landholding may produce a better outcome from farming and landscape perspectives.
- There may be circumstances where the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high-class soils, which are defined in the Proposed District Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unreasonable to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. Subdivision may enable more opportunities for economic wellbeing and a more efficient and effective operation of those types of activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest in more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of Franklin Section Rule 22B in the Operative District Plan and therefore a non-complying activity status is more appropriate. For example, the land may be able to subdivide using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development the Urban Expansion Area.

Point Number 532.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with "Record of Title".

Decision Reasons:

- Submitter seeks that the word 'lot' is changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Submitter Number: 533 **Submitter:** Colin & Rae Hedley

Point Number 533.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils. Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas.
- Submitter agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 533.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendments sought below

AND

Amend Objective 5.2.1 (a)(i) Rural Resources, as follows:

(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;

Decision Reasons:

- Support sub policy (i) in part.
- Accessibility to versatile land is also a key consideration in managing the soil resource.

Point Number 533.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- This policy seeks to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number 533.4

Summary of Decision Requested: **Retain** Policy 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 (a) Rural character and amenity, as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Supports the intent of the objective but the variation in rural character and amenity values needs to be recognised.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number 533.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity (DI) to Rule 22.4.1.2 General subdivision, as follows:

DI (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- Supports rule 22.4.1.2 (a)(iv) in part.
- This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue.
- This will avoid redevelopment of farm tracks and fencelines for a relatively small lot.
- There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm that services can be provided.
- A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.

Point Number 533.6

Summary of Decision Requested: **Delete** Rule 22.4.1.2 (a)(v) General subdivision;

AND

Add a new matter of discretion to Rule 22.4.1.2 (b) General subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(iv) is opposed.
- The section 32 analysis does not justify this rule.
- Submitter agrees with intent however the 80/20 percentage requirement may not result in the best layout, design or farming outcome.
- Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils.
- The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.

Point Number 533.7

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(i-iii) General subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of general subdivision provisions.

Point Number 533.8

Summary of Decision Requested: **Retain** Rule 22.4.1.2 (a)(iv) General subdivision, as notified.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m2 and 1.6ha is supported.
- The creation of any additional lot between 8,000 and 1.6ha as a restricted discretionary activity is supported.

Point Number 533.9

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

...

~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the follow:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity.
- Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can therefore be altered by structure and buildings such as greenhouses and packhouses. These are recognised as important components of primary production activities, part of the rural environment and are generally considered rural in appearance and value.

Point Number 533.10

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from Prohibited to non-complying activities.

Decision Reasons:

- Oppose the Prohibited activity status for rural subdivision activities and these should be considered non-complying activities.
- There may be circumstances where a subdivision of high class soils has overall positive effects supported by objectives and policies. Relocating consented lots within a landholding may produce a better outcome from farming and landscape perspectives. There may be circumstances where the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high class soils which are defined in the Proposed Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unreasonable to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. Subdivision may enable more opportunities for economic wellbeing and a more efficient and effective operation of those types of activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of the operative Franklin Section Rule 22B and therefore a non-complying activity status is more appropriate. For example, the land may be able to subdivided using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number 533.11

Summary of Decision Requested: **Amend** Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with "Record of Title".

Decision Reasons:

- Submitter seeks that the word 'lot' is changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Submitter Number: 534 **Submitter:** Sven Seddon

Point Number 534.1

Summary of Decision Requested: **Delete** the prohibition on horse access to Ngarunui Beach via the northern end carpark.

Decision Reasons:

- There is a lack of suitable alternative beach accesses for horses located on northern Wainui Road.

Submitter Number: 535 **Submitter:** Lance Vervoort

Organisation: Hamilton City Council

Point Number 535.1

Summary of Decision Requested: **Retain** the intent of Section 1.5.5(f) Services and general infrastructure except for the amendments sought below;
AND
Amend Section 1.5.5(f) Services and general infrastructure to strengthen when and with whom.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter would invite stronger direction being stated to ensure a clear understanding of the importance of having dialogue with both iwi and adjoining councils.
- The submitter is particularly seeking direction from the Proposed District Plan on when users and potential consent applicants are to engage with the City on proposals within the City's Area of Interest.

Point Number 535.2

Summary of Decision Requested: **Retain** Section 1.5.5(g) Services and general infrastructure.

Decision Reasons:

- The submitter supports an integrated approach to growth and the need for greater planning for infrastructure, services, transportation and facilities.
- The submitter welcomes dialogue on how cross-boundary services (such as public transport) are provided to Huntly or Raglan residents who work in Hamilton, to minimise single car trips.

Point Number 535.3

Summary of Decision Requested: **Retain** the intent of Section 1.5.6 Transport and logistics, except for the amendments sought below.

AND

Amend Section 1.5.6(a) Transport and logistics, by placing greater emphasis on the regional management of transport.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the intent of issue 1.5.6 Transport and logistics but considers that greater emphasis needs to be placed on the regional management of transport.
- The submitter supports the statement that reads: "There is a need to promote a more regional and holistic consideration of the interactions between land use and transport infrastructure."

Point Number 535.4

Summary of Decision Requested: **Retain** Section 1.5.7(a) Natural Environment, except for the amendments sought below.

AND

Amend 1.5.7(a) Natural environment, by deleting the reference to "adjoining authorities" and replacing with "adjoining territorial authorities".

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The term "adjoining authorities" is ambiguous whereas "adjoining territorial authorities" may provide clarity.

Point Number 535.5

Summary of Decision Requested: **Amend** Section 1.12.1 Strategic direction, to provide an understanding of the location and forms of development that are sought and how the district will accommodate the growth projected in the National Policy Statement - Urban Development Capacity.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- This section of the Proposed Plan is one of the key opportunities for Council to signal how it wishes to manage and grow its district.
- While there are some general references to the Future Proof Strategy, the need for master planning and the need to consider the National Policy Statement - Urban Development Capacity, this section could be strengthened to help the reader better understand any particular geographical focus and what forms of development Council wishes to foster. In particular - how Council intends on prioritising growth in its towns and villages, how it intends to accommodate the growth projected in work that has responded to the National Policy Statement - Urban Development Capacity and what way it is building in commitments to a compact urban form.

Point Number 535.6

Summary of Decision Requested: **Amend** Section 1.12.3 Built environment, by identifying the growth areas and articulate the variety and location of housing types.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The three objectives provide a good starting point relating to a quality, planned built environment. However, these need to be strengthened and expanded to better articulate, for example, what variety of housing is sought, where and why.
- Without specifically identifying growth areas, there is the perception that a large variety of villages and towns are all earmarked for growth which may prove difficult to manage to avoid an 'anything, everywhere' built environment.

Point Number 535.7

Summary of Decision Requested: **Retain** Policy 3.2.4 - Biodiversity Offsetting.

AND

Add to Chapter 22 Rural Zone a new subdivision rule that provides specifically for biodiversity offsetting, does not set a minimum lot size and requires the lot and any areas subdivided under such a framework to be restored and protected in perpetuity.

AND

Add to Chapter 23 Country Living Zone a new subdivision rule that provides specifically for biodiversity offsetting, does not set a minimum lot size and requires the lot and any areas subdivided under such a framework to be restored and protected in perpetuity.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the concept and use of a biodiversity offsetting tool when in line with the criteria in the Waikato Regional Policy Statement and Appendix 6 in the Proposed Plan.
- Dialogue is also welcomed between Waikato District Council, Hamilton City Council and Waikato Region to investigate opportunities for potentially placing offsets generated within Hamilton City to locate within Waikato District, where appropriate rather than within Hamilton City.
- This type of subdivision rule would be a type of biodiversity offsetting tool.

Point Number 535.8

Summary of Decision Requested: **Delete** Policy 3.2.6 (a)(iv) Providing for vegetation clearance.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Any vegetation clearance within a Significant Natural Area is inappropriate because the protection of significant vegetation and significant habitats of indigenous fauna is a matter of national importance and should therefore not be eroded through a harvesting activity.

Point Number 535.9

Summary of Decision Requested: **Retain** Chapter 4 Urban Environment subject to ensuring alignment between objectives, policies, rules and methods, including those that control the type and rate of development use with Hamilton's 'Area of Interest' (shown as a map attached to submission) in order to be consistent with Hamilton City Council's strategic land use plans and urban growth strategies, except for the amendments sought below

AND

Amend Chapter 4 Urban Environment to include objectives and policies which ensure that land use within the 'Area of Interest' (shown as a map attached to submission) is controlled and enabled at a rate which is consistent with and prioritises Hamilton City's strategic land use plans and urban growth strategies including avoidance of urban sprawl, inefficient land use and infrastructure and non-rural land uses.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Sustainable management requires a cross boundary and integrated approach to strategic land use issues to ensure consistency with Hamilton City Council's strategic land use plans and urban growth strategies.

Point Number 535.10

Summary of Decision Requested: **Amend** Section 4.1 Strategic Direction, by creating a separate strategic direction for towns and villages.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The objective and policy framework does not adequately differentiate between towns and villages. A Residential Zone and Village Zone create different forms of development and different ranges of effects. While there are some specific objectives and policies for various places, the overall strategic direction for villages and towns appears to be interchangeable and both are the primary focus of growth.
- The proposed Village zoning addressed in Chapter 4 would result in densities and characteristics that are similar to the Country Living Zone. This zoning is problematic for Te Kowhai, in particular, because the provisions will enable a large area of rural residential development near Hamilton's boundary with potential pressure on this city's infrastructure and services.

Point Number 535.11

Summary of Decision Requested: **Retain** Objective 4.1.1(b) Strategic Direction except for the amendments sought below

AND

Amend Objective 4.1.1(b) - Strategic Direction, so that it aligns with the medium and long term housing targets in the National Policy Statement - Urban Development Capacity plus a buffer for the 2018-2046 period.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the intent of this objective but it needs to reflect the requirements of the National Policy Statement - Urban Development Capacity for housing over the medium and long term, including the required buffer.

Point Number 535.12

Summary of Decision Requested: **Retain** Objective 4.1.2 Urban growth and development except for the amendments sought below.

AND

Add to Objective 4.1.2 Urban growth and development, a table/map that identifies growth areas.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Proposed Plan appears to be relatively permissive for growth in and around all existing towns and villages. A map/table that identifies growth areas will provide parameters as to where these growth locations are.

Point Number 535.13

Summary of Decision Requested: **Retain** Policy 4.1.3(a) Location of development except for the amendments sought below.

AND

Amend Policy 4.1.3(a) Location of development as follows:

(a) Subdivision and development of a residential, commercial and industrial nature is to occur within towns and villages where infrastructure and services can be efficiently and economically provided; in a coordinated manner with other development; and

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The requested expansion of Policy 4.1.3(a) will ensure that the Proposed Plan recognises that, even if infrastructure can be provided, this should be in the context of all other existing and planned infrastructure investment to ensure that growth is coordinated.
- Both clauses (a) and (b) need to be satisfied when considering the location of development.

Point Number 535.14

Summary of Decision Requested: **Retain** Policy 4.1.3(b) Location of development except for the amendments sought below.

AND

Add to Policy 4.1.3(b) Location of development a table/map that identifies the growth areas.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Clarification could be provided as to what the urban growth location areas are.
- The reference to Future Proof is welcomed.

Point Number 535.15

Summary of Decision Requested: **Retain** Policy 4.1.4 Staging of development.

Decision Reasons:

- The submitter supports the intent of this policy.

Point Number 535.16

Summary of Decision Requested: **Retain** Policy 4.1.5 Density except for the amendments sought below.

AND

Amend Policy 4.1.5 Density, by including a greater range of densities, canvassing growth in both greenfield and fill areas;

AND

Amend subdivision rules as a consequential amendment.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- One of the key principles of the Waikato Regional Policy Statement and Future Proof is accommodating residential growth in existing towns. The submitter supports opportunities to grow these towns rather than additional greenfield areas.
- While the density targets are supported, the policy needs to respond to the Housing and Business Development Capacity Assessment by including a greater range of densities.
- The proposed densities should reflect greenfield growth and create infill opportunities within existing towns, including higher density housing in existing centres.
- This amended policy could affect subdivision rules and multi-unit standards.

Point Number 535.17

Summary of Decision Requested: **Amend** Policy 4.1.6 Commercial and industrial activities, so that it reads as a policy and reflects the difference between commercial and industrial activities, their intended location and management of effects.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- At present the wording does not provide clear directive to link into the Objective for Urban Environment.
- The submitter seeks clarity through a well defined set of policies within 4.1.6 to reflect the difference between Commercial and Industrial activities, the intended locations for such activities, and management of effects.

Point Number 535.18

Summary of Decision Requested: **Amend** Policy 4.1.16 Horotiu, to ensure that cross boundary impacts are included, particularly involving infrastructure, physical and social impacts on Hamilton;

AND

Amend the relevant objectives and policies to ensure that land around existing industrial nodes is safeguarded for future industrial use.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The proposed zoning changes within Horotiu to accommodate additional residential development is opposed because the policy does not recognise Horotiu's location directly on the boundary with Hamilton. Instead, the focus is on connections with the existing village, avoiding impacts on the existing road networks and minimising or avoiding reverse sensitivity effects from strategic transport infrastructure that does not impact on the existing local road network.
- Horotiu is one of the strategic industrial nodes identified in the Waikato Regional Policy Statement and Future Proof and the Proposed Plan does not appear to provide for any additional industrial land supply. Recent work to satisfy the requirements of the National Policy Statement - Urban Development Capacity suggests that additional industrial land is needed in Waikato in the longer term and it may therefore be prudent to safeguard land for future industrial use around these industrial nodes.

Point Number 535.19

Summary of Decision Requested: Amend Policy 4.1.17 Te Kowhai, to ensure the type and quantum of growth at Te Kowhai is in accordance with the Waikato Regional Policy Statement and Future Proof and avoids effects on Hamilton.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter is concerned that the type and quantum of growth proposed for Te Kowhai is not in accordance with either Waikato Regional Policy Statement or Future Proof requirements.
- The impact of growth in this area has also not been considered with regards to potential impact on Hamilton's infrastructure, or how such effects would be mitigated.
- The policy is referring to residential development in the Village zoning, being with lower density (3000m² sections) serviced by on site non-reticulated wastewater, water and storm water networks, or higher density (1000m² sections) serviced by public reticulated networks.
- The policy also refers to the need to maintain open space character and rural landscape, while the village is still a key area of 'residential growth'.
- The policy, with its size requirements, reads more like a rule or implementation method.
- The quantum of potential development increases significantly from the existing plan and introduces a range of new areas including an Air Park subdivision, which were previously either zoned Rural or Country living.
- The submitter was not able to locate, within either in the Proposed Plan or the accompanying supporting information, what this quantum of new development could be.
- It would be helpful if Waikato District Council could supply data and its understanding as to how much growth will be provided for in this area, which would help us to better understand the impacts of the proposals.
- There is a mixed message created by the term 'residential growth', when in reality, the proposals appear to create a much bigger Country Living enclave on the outskirts of Hamilton is of concern to Hamilton City Council.
- Such large section sizes do not create the densities required for efficient, affordable and practical infrastructure such as reticulated networks or public transport. The lot sizes, even with the desire to control the location of future dwellings, will also not avoid issues with land fragmentation, should the area ever be fully urbanised in the future. The large increase in housing, has not been matched with a policy setting focused on place-making.
- The policy framework does not include mention of the need to consider cross-boundary effects, even though the village is very near the boundary with Hamilton.
- There is a significant difference between the subdivision rules, based on whether sites can or cannot be serviced with public infrastructure.
- It would therefore be helpful to understand what work has been done in terms of providing servicing solutions for 3-waters and what modelling and/or assessment has been undertaken to understand transport/traffic impacts of the two subdivision options. Such an analysis would provide better information as to how much subdivision can be expected in the area.

Point Number 535.20

Summary of Decision Requested: Retain Objective 4.2.16 Housing options.

Decision Reasons:

- The submitter supports the focus on a range of housing options within the Residential Zone.

Point Number 535.21

Summary of Decision Requested: Amend Policy 4.2.17 Housing types, by introducing a suite of policies including those on other housing types and high design quality.

AND

Amend the wider zone provisions as a consequential amendment.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- As Future Proof and the Waikato Regional Policy Statement seek compact development in existing towns and villages.
- The submitter seeks to better understand how and where growth will be accommodated.
- However the objective and policies are focused on maintaining the character of the Residential Zone.
- Duplex or multi-unit development may not necessarily maintain the status quo. Additional policies would allow focus on positive changes in terms of affordability and choice of housing.

Point Number 535.22

Summary of Decision Requested: Amend Section 4.3 Village Zone, to better define the purpose of the Village Zone which has more alignment with the objectives and policies relating to rural amenity. The Village Zone needs to better consider cross-boundary impacts of growth.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter is concerned that the overall strategic direction of the Proposed Plan directs growth similarly to towns and villages.
- Preferably there would be a strong objective and policy framework to direct growth opportunities to existing towns, rather than comparatively large lots within the villages which would weaken sub-regional infrastructure planning for public transport and 3-waters.
- It would create densities that may make accommodating future growth projections difficult.
- Policies in Section 4.3 (e.g. 4.3.2- Character) are very similar to the those of section 5.6 Country living Zone.
- In many ways, the purpose of these two separate zones are very similar, and both, if occurring in the outskirts of Hamilton, cause some concern for Hamilton City Council. In the past, development within the Country living Zone has caused cross-boundary issues within Hamilton, including the road networks, provided little impetus to improve passenger transport patronage and placed strain on existing facilities. The new Village Zone, particularly when located in the outskirts of Hamilton, has the potential to have the same cross boundary issues.
- Given the Village Zone (1000m² to 3000m²) accommodates smaller lot sizes than the Country Living Zone (5,000m²), the cross boundary impacts are arguably exacerbated.

Point Number 535.23

Summary of Decision Requested: No specific decision sought, but submission opposes further growth in Te Kowhai and Policy 4.3.3 Future development Tuakau and Te Kowhai.

Decision Reasons:

- Growth is not opposed per se, just the type and amount included in the current proposal.
- The policy encourages future development in Te Kowhai when services are available, however the submitter questions if further growth as identified is appropriate at Te Kowhai.

Point Number 535.24

Summary of Decision Requested: **Retain** Policy 4.6.3 Maintain a sufficient supply of industrial land.

Decision Reasons:

- As signalled in the Future Proof Strategy, industrial land supply for employment and economic benefit should be maintained to support the wider sub-regional needs.
- The National Policy Statement - Urban Development Capacity identifies the potential need, in the longer term, for additional industrial land in the Waikato.

Point Number 535.25

Summary of Decision Requested: **Retain** Policy 4.6.4 Maintain industrial land for industrial purposes.

Decision Reasons:

- The policy supports the sub-regional need for industrial land to be managed and maintained and not lost to other non-industrial purposes, such as large format retail.

Point Number 535.26

Summary of Decision Requested: **Retain** the intent of the objectives and polices in Section 4.7 Urban Subdivision and development subject to amendments to other rules.

Decision Reasons:

- The submitter supports the approach of Section 4.7 however the submitter is also submitting on a number of rules that relate directly to the intent of this suite of policies.
- Any changes to the rules may impact on the principles as set out in these policies.

Point Number 535.27

Summary of Decision Requested: **Retain** Chapter 5 Rural Environment subject to ensuring alignment and giving effect to the Hamilton City Council 'Area of Interest' (shown as a map attached to submission) and the supporting objectives, policies, rules and methods. Objectives and policies are sought which ensure that land use within the 'Area of Interest' (shown as a map attached to submission) is controlled and enabled at a rate which is consistent with and prioritises Hamilton City Council's strategic land use plans and urban growth strategies including avoidance of urban sprawl, inefficient use of land and infrastructure and non-rural land uses.

Decision Reasons:

- Sustainable management requires a cross boundary and integrated approach to strategic land use issues.
- Objectives and policies are sought to ensure that land use within Hamilton's 'Area of Interest' is controlled and enabled at a rate which is consistent with the submitter's strategic land use plans and urban growth strategies that address the avoidance of urban sprawl, inefficient land use and infrastructure and non-rural land uses.

Point Number 535.28

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, subject to ensuring alignment and giving effect to Hamilton's 'Area of Interest' and supporting objectives, policies, rules and methods. Objectives and policies are sought to ensure that activities within the 'Area of Interest' are controlled and enabled at a rate which is consistent with Hamilton City Council's strategic land use plans and urban growth strategies that address the avoidance of urban sprawl, inefficient land use and non-rural land uses.

Decision Reasons:

- The submitter supports the intent of this objective which is to protect rural land.

Point Number 535.29

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources.

Decision Reasons:

- The submitter supports the intent of this objective which is to protect rural land.

Point Number 535.30

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils.

Decision Reasons:

- The submitter supports the intent of this policy which is to protect rural land.

Point Number 535.31

Summary of Decision Requested: **Retain** Policy 5.2.3 Effects of subdivision and development on soils as notified.

Decision Reasons:

- The submitter supports the intent of this policy which is to protect rural land.

Point Number 535.32

Summary of Decision Requested: **Amend** the structure of the entire Proposed Plan and include usable cross-referencing between the objectives, policies and rules to enable easier use by the reader.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The general layout is supported although there are opportunities for refinement and amendment.

Point Number 535.33

Summary of Decision Requested: **Amend** the Proposed District Plan to reflect and relate to sub-regional growth data including the National Policy Statement on Urban Development Capacity.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Work by Future Proof on the Housing and Business Development Capacity Assessment, as required by the National Policy Statement - Urban Development Capacity, is underway and there is an opportunity to amend the Proposed Plan to include the recent work on resulting growth projections and articulate the management of that growth.

Point Number 535.34

Summary of Decision Requested: **Amend** Section 1.2 What is the purpose of the Waikato District Plan, by correcting the population figure for Hamilton City, so that the second to last sentence in clause (c) reads as follows:

(c) ... The district is located between two large urban centres - Auckland, with a population of over 1 million and lies to the north, and Hamilton with a population of ~~over 110,000~~ more than 165,000, which lies to the south.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified population figure of 110,000 is outdated as the 2017 figure for Hamilton City has been estimated to be more than 165,000.

Point Number 535.35

Summary of Decision Requested: **Retain** Section 1.4.3.1(b) The Rural environment, except for the amendment sought below.

AND

Amend Section 1.4.3.1(b) The Rural environment, to include fragmentation of rural land.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Ad hoc development on the city boundary can also have an adverse effect on future urban use and therefore the fragmentation of rural land needs to be included as an effect.
- The submitter agrees that excessive rural lifestyle development can have adverse effects which should be avoided.

Point Number 535.36

Summary of Decision Requested: **Retain** Section 1.4.3.2 (b) Protecting the rural environment.

Decision Reasons:

- The submitter supports the level of control on subdivision in the Rural and Country Living Zones within the 'Area of Interest' identified in the map provided with the submission.
- It also supports the prevention of rural land fragmentation near the city boundary and limiting the extent of non-rural activities within the Rural Zone so that they instead establish within towns and villages where growth is anticipated.
- Ad hoc development on the city's boundary impacts on existing infrastructure and creates demand for infrastructure that is not planned or funded which may then compromise efficient urbanisation.

Point Number 535.37

Summary of Decision Requested: **Retain** the intent of Section 1.5.1 Compact urban development, except for the amendments sought below

AND

Amend Section 1.5.1(a) Compact urban development, italics below and either list or include a map of those towns and villages where growth is anticipated:

(a) The Future Proof Strategy seeks a shift in the existing pattern of land use towards accommodating growth through a more compact urban form ~~based on concentrating growth in and around Hamilton~~ (67%) and the larger settlements of the district (21%).

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Future Proof Strategy seeks that growth is emphasised in towns and selected villages, however Section 1.5.1 needs to make it clear that growth in the Waikato District is not intended to be concentrated around Hamilton's boundaries.
- The submitter supports the approach of ensuring compact urban development.

Point Number 535.38

Summary of Decision Requested: **Retain** Section 1.5.1(b) Compact urban development.

Decision Reasons:

- The expressed settlement pattern is consistent with Future Proof and the Waikato Regional Policy Statement.

Point Number 535.39

Summary of Decision Requested: **Retain** Section 1.5.1 (c) Compact urban development.

Decision Reasons:

- The submitter supports an integrated approach to growth and greater planning for infrastructure, services, transportation and facilities.
- Dialogue is welcomed on how cross boundary services (such as public transport) are provided, including the support of Huntly and Raglan residents who work in Hamilton, to minimise single car trips.

Point Number 535.40

Summary of Decision Requested: **Retain** Section 1.5.2 Planning for urban growth and development.

Decision Reasons:

- The expressed settlement pattern is consistent with Future Proof and the Waikato Regional Policy Statement.

Point Number 535.41

Summary of Decision Requested: **Retain** Section 1.5.3 Cross-boundary issues.

Decision Reasons:

- The need to work collaboratively is a significant sub-regional issue.
- The submitter endorses the approach of section 1.5.3 on this matter.

Point Number 535.42

Summary of Decision Requested: **Amend** Section 1.5.4 (a) Urban growth, by deleting the phrase "harmonious cross boundary development" in the last sentence of clause (a), and reword in a way that provides greater clarity on how growth demands will not impact on or be caused by adjoining councils.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter is fully supportive of planned and integrated provision of regional services and the sustainable management of effects of development by neighbouring councils through strong and effect RMA planning mechanisms.

Point Number 535.43

Summary of Decision Requested: **Retain** Section 1.5.4 (b) Urban growth.

Decision Reasons:

- The submitter fully agrees with the last sentence in clause (b) which reads: "*Uncoordinated urban growth can adversely affect the quality, character and vitality of urban environments and undermine the efficient provision and utilisation of infrastructure and services.*"

Point Number 535.44

Summary of Decision Requested: **Retain** Section 1.5.4(c) Urban growth.

Decision Reasons:

- Hamilton City Council supports the settlement pattern as it is consistent with Future Proof and the Waikato Regional Policy Statement.

Point Number 535.45

Summary of Decision Requested: **Amend** Section 1.5.5(a) Services and general infrastructure, by clarifying what core services are anticipated to be shared and actively work together to discuss intentions and their implications for Hamilton City Council.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter is concerned what is meant by the sentence in clause (a) which reads: "Development patterns that promote the efficient use of new and existing infrastructure and services across boundaries can contribute significantly to improved cost effectiveness, to the general health and wellbeing of communities and help safeguard the environment ..."
- Separate service agreements and funding mechanisms agreed with Hamilton City Council would need to be secured if services are to be shared and there should be no assumption that this will occur.

Point Number 535.46

Summary of Decision Requested: **Amend** Section 1.5.5(b) Services and general infrastructure, by clarifying what core services are anticipated to be shared and actively work together to understand what core services are anticipated to be shared and the implications of this on Hamilton City Council.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter is concerned what is implied by the sentence in clause (b) which reads: "It is important that the district share the provision of core services with neighbouring council service providers, particularly in the north and south."

- Separate service agreements and funding mechanisms agreed with Hamilton City Council would need to be secured if services are to be shared and there should be no assumption that this will occur.

Point Number 535.47

Summary of Decision Requested: **Retain** Section 1.5.5(c) Services and general infrastructure.

Decision Reasons:

- The submitter supports a consistent approach to infrastructure and the effects of it across territorial boundaries.

Point Number 535.48

Summary of Decision Requested: **Retain** Section 1.5.5 (d) Services and general infrastructure.

Decision Reasons:

- The submitter supports the need for a consistent approach to infrastructure and the effects of it across territorial boundaries.

Point Number 535.49

Summary of Decision Requested: **Retain** Section 1.5.5(e) Services and infrastructure.

Decision Reasons:

- The submitter supports consultation between relevant parties when cross-boundary issues are considered.

Point Number 535.50

Summary of Decision Requested: **Retain** Policy 5.3.3 Industrial and commercial activities.

Decision Reasons:

- The submitter supports the intent of this policy to protect rural land from industrial and commercial development, particularly within Hamilton's 'Area of Interest'.

Point Number 535.51

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision.

Decision Reasons:

- The submitter supports the intent of this policy which is to protect rural character and amenity.

Point Number 535.52

Summary of Decision Requested: **Retain** Policy 5.3.9 Non-rural activities.

Decision Reasons:

- The submitter supports the intent of this policy which is to manage non-rural activities in the Rural zone, particularly within Hamilton's 'Area of Interest'.

Point Number 535.53

Summary of Decision Requested: **Retain** Objective 5.5.1 Hamilton's Urban Expansion Area.

Decision Reasons:

- The submitter supports this objective as it sets out a key mechanism to ensure the future urban development potential of the land in the identified areas is not compromised.

Point Number 535.54

Summary of Decision Requested: **Amend** Objective 5.5.1 (a) Hamilton's Urban Expansion Area, as follows:

(a) ~~Manage~~ **Avoid** subdivision, use and development within Hamilton's Urban Expansion Area to ensure that future urban development is not compromised.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The current wording 'manage' does not provide appropriate direction and ability to protect land in the Urban Expansion Area from inappropriate subdivision, development and use and therefore future urban use can be compromised.
- The Urban Expansion area, with its objectives, policies and activity controls are key to ensuring a greater development potential in the future to occur in an integrated and functional manner.

Point Number 535.55

Summary of Decision Requested: **Retain** Policy 5.6.8 Non-residential activities.

Decision Reasons:

- The submitter supports the intent of this policy which is to limit the establishment of non-residential activities in the Country Living Zone and therefore ensure that existing commercial centres are maintained.

Point Number 535.56

Summary of Decision Requested: **Amend** Section 6.4 Infrastructure, Subdivision and Development, to add specific objectives and policies for wastewater and water after Policy 6.4.7.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Proposed District Plan does not contain specific policies on wastewater or water.
- Including policies relevant to waste and waste water are required to provide certainty during subdivision, land use or development.

Point Number 535.57

Summary of Decision Requested: No specific decision sought, but submission opposes the objectives and policies in Chapter 9.2 Te Kowhai Airpark.

Decision Reasons:

- The range of activities proposed will not provide an appropriate level of development given the uncertainty of service availability.
- The range of activities proposed are not adequately justified or controlled by the associated rules.

Point Number 535.58

Summary of Decision Requested: **Amend** Activity specific condition 14.11.1.1(a)(ii) relating to P1 Stormwater systems for new development or subdivision, to include a higher standard that is aligned with Hamilton City Council's requirements.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The attenuation standard (10% annual exceedance probability (AEP)) is inadequate. Attenuation to at least 1% AEP of pre-development rates should be used when discharging upstream of a catchment shared with Hamilton City.
- If there are existing downstream/flooding issues, then further mitigation should be required so that Hamilton City Council's requirements are not compromised (such as its Comprehensive Stormwater Discharge Consent).

Point Number 535.59

Summary of Decision Requested: **Amend** Activity specific condition 14.11.1.1(a)(iv) relating to P1 Stormwater systems for new development or subdivision, to clarify the meaning of the phrase "specific to the area".

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is unclear whether the phrase "specific to the area" creates a requirement to undertake local rainfall gauging where existing data is not "specific" enough, or whether the intent is to allow for the use of the "most relevant existing rainfall data".

Point Number 535.60

Summary of Decision Requested: **Amend** Activity specific condition 14.11.1.1 (a)(v) relating to P1 Stormwater systems for new development or subdivision, to clarify how the hierarchical permitted condition will be implemented. For example, what and who determines how the choice of stormwater measure moves down the hierarchy.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Given the use of permitted conditions, there is no certainty that the stormwater treatment measures are appropriate to the particular catchment and its values. For example, what type of contaminants are an issue and will the treatment measures address them). The provision also needs to allow measures which ensure the protection and enhancement of the Waikato and Waipa rivers.

Point Number 535.61

Summary of Decision Requested: **Amend** Activity specific control 14.11.1.3 relating to P3 Wastewater servicing for new development or subdivision, to clarify that the options are a hierarchy: clause (ii) - connection to a community-scale wastewater system and clause (iii) - a site-contained alternative method that complies with AS/NZS 1547:2012, are not allowed if the method set out in clause (i) - connection to a public, reticulated wastewater network is available.

AND

Add an equivalent rule for water servicing.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Amend rule to ensure that if a reticulated wastewater network is available, this should be required before considering the other options set out in clauses (ii) and (iii).
- If development exceeds the capacity of the existing system, upgrades should be required before other options are used.
- An equivalent rule for water servicing would give clear guidance on water management at the time of subdivision.

Point Number 535.62

Summary of Decision Requested: **Amend** Activity Specific condition 14.11.1.8 relating to P8 Stormwater ponds or wetlands, so it is relevant to the control of stormwater infrastructure.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The sizing/design of stormwater infrastructure should not be constrained by building coverage rules in a zone which have not been developed with infrastructure in mind.
- The area to be calculated needs to be made clear. For example, there is uncertainty as to whether the surface area of standing water during normal flow should be calculated up to a design level (e.g. 10% annual exceedance probability), including all slopes, batters, etc.

Point Number

535.63

Summary of Decision Requested:

Amend Activity specific condition 14.12.1.8 (a)(i) relating to P8 Off-road pedestrian and cycle facilities, to provide for instances when the minimum width of 2 metres is not appropriate.

AND

Amend Activity specific condition 14.12.1.8 (a)(i) relating to P8 off-road pedestrian and cycle facilities, to define/clarify what is meant by "off-road pedestrian and cycling facilities".

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There are some circumstances when off-road pedestrian and cycle facilities need to be wider than 2 metres (such as along arterial corridors or when forming, or connecting to, part of a wider network with a wider standard). Shared facilities should be at least 2.5 metres.
- The rule is unclear as to whether the conditions only apply to facilities outside the road corridor or whether it also includes off-carriageway facilities located inside the road corridor.

Point Number

535.64

Summary of Decision Requested:

Amend Activity specific condition 14.12.1.8 (a)(iii) relating to P8 off-road pedestrian and cycle facilities, to clarify what effects this rule is managing.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Pedestrian and cycling facilities do not generate bulk or dominance related effects.
- Having to comply with a zone setback (particularly if off-road facilities are still within the road corridor) is an inefficient use of land.

Point Number

535.65

Summary of Decision Requested:

Amend Table 14.12.5.1 - Separation distances, to require compliance with more onerous district plan provisions of an adjoining District Plan.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The amendment will improve consistency and avoid potential cross-boundary related effects, such as new vehicle accesses in the vicinity of an adjoining local authority.

Point Number

535.66

Summary of Decision Requested:

Amend Table 14.12.5.3 - Minimum sight distances, to require compliance with more onerous district plan provisions of an adjoining District Plan.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The amendment will improve consistency and avoid potential cross-boundary related effects, such as new vehicle accesses in the vicinity of an adjoining local authority.

Point Number

535.67

Summary of Decision Requested:

Amend Table 14.12.5.6 - Road Hierarchy list, as follows:

- Clarifying whether the "Gordonton Road" length identified as a regional arterial is different to, or a duplicate of, the "Gordonton Road" length identified as an arterial;
- Adding the following roads as arterials: Kay Road (River Road to Borman Road (west)), Horsham Downs Road (Kay Road to Waikato Expressway/HCC boundary);
- Adding these roads as collectors: Exelby Road (SH39 to Hamilton City Council boundary), Rotokauri Road (Bagust Road to Hamilton City Council boundary), Kay Road (Borman Road (west) to Horsham Downs Road), Brymer Road (Rotokauri Road to Hamilton City Council boundary).

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Inclusion of the listed roads as arterials or collectors will align with the road hierarchy in Hamilton City.

Point Number

535.68

Summary of Decision Requested:

Delete 20.1.2 'D6 An office' and 'D7 A retail activity' from the list of discretionary activities.

AND

Add an office and a retailing activity to Rule 20.1.3 Non-Complying Activities, so that they are instead considered as non-complying activities.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The relevant objective and policy contained in Chapter 4: Urban Environment are relatively directive that industrial land should not be lost to non-industrial activities, therefore it is more appropriate to match this with a non-complying status in the rules.
- Commercial activity should be directed to the town centres and business zones.
- The Hamilton City District Plan has a strong emphasis on keeping Industrial zones for industrial purposes.
- While it is not the expectation that adjoining districts have matching rules, in this instance, it would be preferable for a similar zoning approach be taken by Waikato District. It would seem appropriate there be some policy alignment to deliver on the Regional Policy Statement and Future Proof principles, by ensuring Hamilton remains the primary commercial hub of the sub-region.
- In industrial areas in Hamilton, industrial and office activities are non-complying activities to support the 'centres based' approach to business areas within the City are not impacted.

Point Number

535.69

Summary of Decision Requested:

Retain Chapter 22: Rural Zone subject to ensuring alignment and giving effect to the submitter's 'Area of Interest' (shown in map attached to submission) and supporting objectives, policies, rules and methods. Objectives and policies are sought which ensure that land use within the 'Area of Interest' (shown in map attached to submission) is controlled and enabled at a rate which is consistent with and prioritises Hamilton City Council's strategic land use plans and urban growth strategies including avoidance of urban sprawl, inefficient use of land and infrastructure and non-rural land uses.

Decision Reasons:

- Sustainable management requires a cross boundary and integrated approach to these strategic land use issues.
- Objectives and policies are therefore required to ensure that land use within Hamilton's 'Area of Interest' is controlled and enabled at a rate which is consistent with Hamilton City Council's strategic land use plans and urban growth strategies that address the avoidance of urban sprawl, inefficient land use and infrastructure and non-rural land uses.

Point Number

535.70

Summary of Decision Requested:

Delete the non-rural activities from Rule 22.1.5 NC4 Non-Complying Activities as they relate to the Urban Expansion Area.
AND
Add these activities to Rule 22.1.1 Prohibited as prohibited activities.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Land within the Urban Expansion Area needs to be protected from incompatible land use otherwise it will compromise future urban development.
- This aim is supported by the 2005 Strategic Agreement on Future Urban Boundaries between Hamilton City Council and Waikato District Council.
- The section 32 analysis offers no sound reasoning as to why the status of these activities is proposed to be non-complying (rather than prohibited as per the Operative Waikato District Plan).
- Under the Operative Waikato District Plan, the Urban Expansion Policy Area has a number of prohibited activities to ensure that the future development of the areas is not compromised. During the consultation of the draft district plan, the prohibited activity list was reviewed and amended in consultation with HCC staff, increasing the activity status of some activities to a stricter prohibited activity status within the area.
- The notified Proposed Plan has not retained the prohibited activity status with the exception of subdivision, where an extra lot is created, with all non-rural activities now either non-complying or discretionary activities.
- The section 32 offers no sound reasoning as to why the activity status has been changed. HCC strongly disagrees with approach and the assumption for how the different non-rural activities were 'allocated' either non-complying or discretionary status.
- Non-complying activities were because of adverse effects, reverse sensitivity and incompatibility with urban uses in the future. Discretionary activities were applied where the use would be compatible with future urban use. The submitter does not consider this approach satisfactory at all because such activities have the potential to impact on the future ability to comprehensively plan for the area as a whole.

Point Number

535.71

Summary of Decision Requested:

Delete Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area;
AND
Delete Rule 22.2.7 P6 Indigenous vegetation clearance inside a Significant Natural Area.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Any vegetation clearance from a Significant Natural Area is not appropriate because the protection of significant vegetation and significant habitats of indigenous fauna is a matter of national importance and this should not be eroded through a harvesting activity.

Point Number

535.72

Summary of Decision Requested:

Retain the prohibited activity status for Rule 22.4.1.1 PRI Prohibited Subdivision.
AND
Add a clause to Rule 22.4.1.1 PI Prohibited subdivision as follows:
Any boundary relocation or rural hamlet subdivision.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- A prohibited activity status is imperative in the Urban Expansion Area to ensure that the objectives and policies for this area are achieved.
- The submitter supports prohibiting subdivision which results in the creation of any additional lots as this ensures the future urban development of the land is not compromised.
- Boundary relocations and rural hamlet subdivisions do not create additional lots but they still result in land fragmentation that will impede comprehensive future urban development.

Point Number

535.73

Summary of Decision Requested:

Amend Rule 22.4.1.2 RD1 (a) (ii) General subdivision, as follows:

(a)(ii) The Record of Title to be subdivided must be at least ~~20~~ 40 hectares in area;

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Further fragmentation of land, particularly near Hamilton's boundary, is inappropriate because of impact on the city's infrastructure and demand for unplanned services.
- It is estimated that approximately 254 properties could be subdivided within Hamilton's 'Area of Interest' if the 20 ha parent lot size is retained.
- This number would reduce to approximately 119 properties using a 40 ha parent lot size.
- Increasing the threshold to 40 ha would be in line with Waipa District and would ensure the sustainable management of the 'Area of Interest' for future urban growth.

Point Number

535.74

Summary of Decision Requested:

Retain Chapter 23: Country Living Zone subject to ensuring alignment and giving effect to the submitter's 'Area of Interest' (shown in map attached to submission) and supporting objectives, policies, rules and methods. Objectives and policies are sought which ensure that land use within the 'Area of Interest' (shown in map attached to submission) is controlled and enabled at a rate which is consistent with and prioritises Hamilton City Council's strategic land use plans and urban growth strategies including avoidance of urban sprawl, inefficient use of land and infrastructure and non-rural land uses.

Decision Reasons:

- Sustainable management requires a cross boundary and integrated approach to strategic land use issues.
- Objectives and policies are sought to ensure that land use within this area if controlled and enabled at a rate which is consistent with Hamilton City Council's strategic land use plans and urban growth strategies that address the avoidance of urban sprawl, inefficient land use and infrastructure and non-rural land uses.

Point Number

535.75

Summary of Decision Requested:

Amend Rule 23.1.3 Discretionary Activities, to ensure existing commercial centres are maintained (currently listed as D3) in the Country Living Zone;

AND

Add objectives and policies as a consequential amendment.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Almost all of the Country Living zone is located near Hamilton or main towns.
- It is therefore important to maintain the primacy of existing commercial centres in Hamilton and the main towns by restricting commercial activities in this zone or add objectives and policies that better direct commercial activities to zones that are more appropriate than the Country Living Zone.

Point Number

535.76

Summary of Decision Requested:

Delete Rule 23.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area.

AND

Delete Rule 23.2.8 P6 Indigenous vegetation clearance inside a Significant Natural Area.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Any vegetation clearance from a Significant Natural Area is not appropriate.
- The protection of significant vegetation and significant habitats of indigenous fauna is a matter of national importance and therefore such vegetation should not be eroded through a harvesting activity.

Point Number

535.77

Summary of Decision Requested:

Retain the Prohibited Activity status of Rule 23.4.1 Prohibited subdivision, as notified.

Decision Reasons:

- A prohibited activity status for subdivision is imperative in the Urban Expansion Area to ensure that the objectives and policies for this area are achieved.

Point Number

535.78

Summary of Decision Requested:

Retain Chapter 24: Village Zone subject to ensuring alignment and giving effect to the submitter's 'Area of Interest' and supporting objectives, policies and rules and methods.

Decision Reasons:

- Objectives and policies are sought which ensure that land use within the Area of Interest is controlled and enabled at a rate which is consistent with the priorities of Hamilton City Council's strategic land use plans and urban growth strategies including avoidance of urban sprawl, inefficient use of land and infrastructure and non-rural land uses.
- Sustainable management requires a cross boundary and integrated approach to strategic land use issues.
- Objectives and policies are sought to ensure that land use within this area is controlled and managed at a rate that is consistent with Hamilton City Council's strategic land use plans and urban growth strategies that address the avoidance of urban sprawl, inefficient land use and infrastructure and non-rural land uses.

Point Number

535.79

Summary of Decision Requested:

Delete Rule 24.2.8 P2 Indigenous vegetation clearance inside a Significant Natural Area.

AND

Delete Rule 24.2.8 P6 Indigenous vegetation clearance inside a Significant Natural Area.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The submitter does not consider any vegetation clearance within a Significant Natural Area is not appropriate.
- The protection of significant vegetation and significant habitats of indigenous fauna is a matter of national importance and therefore such vegetation should not be eroded through a harvesting activity.

Point Number

535.80

Summary of Decision Requested:

No specific decision sought, but submission opposes the subdivision provisions for Te Kowhai in Rule 24.4.2 Subdivision Te Kowhai and Tuakau.

Decision Reasons:

- The uncertainty about the servicing of these areas, makes quantifying and understanding the effects of the proposals on Hamilton's own infrastructure and the sub-regional land use pattern, difficult. The proposed low densities of the area, may make meeting the District's growth projections difficult.
- New areas have been included within the Village Zone which were previously zoned Rural or Country living without sufficient justification or comfort that the impacts of such development can be managed; or that the built form will deliver best results for delivering sustainable growth with a compact built urban form.
- Issues have been created in the past for Hamilton City, by the creation of rural residential enclaves on the City boundary - while this particular zone has a different name (i.e. Village Zone), it will still have the same, if not greater impacts across the boundary.

Point Number

535.81

Summary of Decision Requested:

No specific decision sought, but submission opposes the rules for Te Kowhai Airpark in Chapter 27: Te Kowhai Airpark Zone.

Decision Reasons:

- The submitter does not believe the range of activities proposed will provide an appropriate level of development in such an uncertain servicing setting. The range of activities proposed are not adequately justified or controlled by the associate rules (also refer to the submission point on Chapter 9).

Point Number

535.82

Summary of Decision Requested:

Amend Rule 27.1.1 P31 and P32 Activity Status Table, to ensure commercial zoning at the airpark does not increase in scale and risk impacting on established commercial centres within Hamilton City.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Cafes and Restaurants, and Retail (up to 300m² within the four precincts), are provided for as a permitted activity in this zone on the outskirts of Hamilton.
- The submitter questions how this commercial hub fits within Waikato District's own aspirations for the main village of Te Kowhai and how well integrated these will be with the existing community.
- The submitter has concerns about the impact the Commercial zoning at the airpark will have on the nearby established commercial centres, particularly in relation to the permitted activity status of retail in the Airpark.
- It is also not immediately clear whether this is 300m² in total spread between the 4 precincts, or whether it is 1200m² of retail. Nevertheless, both of the quantum are questioned, but most particularly the larger one.
- Te Kowhai is not a major commercial centre, and any commercial activities proposed should be of a scale to serve the community within which it is located.

Point Number

535.83

Summary of Decision Requested:

Amend Rule 27.4.2 Subdivision Allotment Size, to simplify the subdivision framework and clarify what the infrastructure implications are, what quantum of development can occur and what effects are anticipated from subdivision within this zone.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- As this area is located very close to the boundary of Hamilton any subdivision increasing the number of urban lots has a strong potential for cross boundary impacts, particularly to Hamilton's roading, waters and community infrastructures.
- The proposal to allow a range of allotment sizes, ranging in size from 450m², to 1000m² to 2500m² and 800m² (depending on the reticulation available, and the location within the precincts) indicates an intensity that may prove unacceptable when there is difficulty in providing all necessary services to the future intended residential of the area.
- There is no clear way to determine the overall maximum allotment number or what infrastructure would be provided.

Point Number

535.84

Summary of Decision Requested:

Delete Appendix 9 Te Kowhai Airfield Precincts Zoning.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The proposal does not appear well connected to the Te Kowhai Village.
- The s32 mentions that the design has been altered to ensure better connectivity, but this is not immediately obvious from the plans contained within Appendix 9.
- It would be helpful for the development to better define itself in terms of integration and connectivity with Te Kowhai, particularly from an infrastructure and community services perspective. For example, at present the location of the access to the development potentially lends itself more to connectivity to Hamilton than it does to Te Kowhai.

Point Number

535.85

Summary of Decision Requested: Add to Schedule 30.1 Historic Heritage Items St Paul's Methodist Church (which is to be shifted from its present location at London Street in Hamilton to Te Kowhai).

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Resource consent has issued to develop the site at Te Kowhai with this church which is to be relocated from London Street in Hamilton.
- This building is currently listed in the Hamilton City District Plan as a heritage item (H61) and has regional heritage significance (refer to submission for details from Hamilton City Council's Built Heritage Inventory Form).

Point Number 535.86

Summary of Decision Requested: Retain the extent of Country Living Zone as notified on the Planning Maps.

Decision Reasons:

- The submitter supports the amount of land zoned Country Living remaining static.

Point Number 535.87

Summary of Decision Requested: Amend the planning maps by adding an overlay that illustrates the submitters 'Area of Interest' (shown as a map attached to submission) and potentially integrate this with Hamilton's Urban Expansion Area, and if appropriate the mapped Urban Expansion Area can be extended to give effect to the submitters 'Area of Interest' (shown as a map attached to submission).

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The planning maps need to illustrate Hamilton City Council's 'Area of Interest' to support objectives, policies and rules sought for this area to ensure that land use within this area is controlled and enabled at a rate which is consistent with Hamilton City Council's strategic land use plans and urban growth strategies that address the avoidance of urban sprawl, inefficient land use and infrastructure and inappropriate land uses.
- Integration of Hamilton's Urban Expansion Area with this mapped 'Area of Interest' could be an efficient method of giving effect to this strategic land use intent.

Point Number 535.88

Summary of Decision Requested: No specific decision sought, but the submission opposes the Te Kowhai Airpark Zoning.

Decision Reasons:

- The uncertainty about the servicing of these areas, makes quantifying and understanding the effects of the proposals on Hamilton's own infrastructure and the sub-regional land use pattern, difficult.
- The proposed low densities of the area, may make meeting the District's growth projections difficult.
- New areas have been included within the Village Zone which were previously zoned Rural or Country Living, without sufficient justification or comfort that the impacts of such development can be managed; or that the built form will deliver best results for delivering sustainable growth with a compact built urban form.
- Issues have been created in the past for Hamilton City, by the creation of rural residential enclaves on the City boundary - while this particular zone has a different name (i.e. Village Zone), it will still have the same, if not greater impacts across the boundary.

Point Number 535.89

Summary of Decision Requested: No specific decision sought, but submission opposes the Te Kowhai Village Zoning.

Decision Reasons:

- The submitter opposes both the Airpark and Village Zoning. The uncertainty about the servicing of these areas, makes quantifying and understanding the effects of the proposals on Hamilton's own infrastructure and the sub regional land use pattern, difficult. The proposed low densities of the area, may make meeting the District's growth projections difficult.
- The Airpark does not appear well connected to the Village and would relate more to Hamilton than Te Kowhai due to ease of accessibility and connection.
- New areas have been included within the Village Zone which were previously zoned Rural or Country Living, without sufficient justification or comfort that the impacts of such development can be managed; nor that the built form will deliver best results for delivering sustainable growth with a compact built urban form.
- Issues have been created in the past for Hamilton City, by the creation of rural residential enclaves on the City boundary - while this particular zone has a different name (i.e. Village Zone), it will still have the same, if not greater impacts across the boundary.

Point Number 535.90

Summary of Decision Requested: Retain the notified extent of residential growth at Ngaruawahia, provided that no further residential growth occurs along former State Highway 1.

Decision Reasons:

- The submitter supports new residential growth within Ngaruawahia, being one of the major towns within the District. However, the town has been gradually stretching and growing along the former State Highway. This has created a situation whereby Ngaruawahia is nearly contiguous with Horotiu, which over time will become contiguous with Hamilton as it grows to its Urban Limit.
- While not opposing the current Proposed Plan, it is requested that in accordance with the Waikato Regional Policy Statement and the Future Proof Strategy, which seek to avoid ribbon development along the road network; and plan for obvious gaps between towns, that no further growth along former State Highway 1 should be enabled.

Point Number 535.91

Summary of Decision Requested: Retain the intent of Section 1.5.4 Urban growth except for the amendments outlined elsewhere in the submission.

Decision Reasons:

- The submitter supports the District's settlement pattern as it is consistent with Future Proof and the Regional Policy Statement.

Point Number	535.92
Summary of Decision Requested:	Retain the intent of Section 1.5.5 Services and general infrastructure, except for the amendments outlined elsewhere in the submission.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the intent of the issue subject to the specific amendments sought below.
Point Number	535.93
Summary of Decision Requested:	No specific decision sought, but the submission opposes the extent of new residential zoning from Country Living Zone on Map 26.1 Horotiu, pending the satisfactory resolution of infrastructure implications, and addressing how future industrial needs in the southern areas of Waikato District will be met.
Decision Reasons:	<ul style="list-style-type: none"> The 'live' Residential zoning at Horotiu is of concern to the submitter. It is not clear how the new growth will be serviced, and we wish to understand more about the intentions here. The proposed zoning change is directly adjacent to the City boundary and we feel it is appropriate to understand how the area will be serviced with wastewater and water supply, and how stormwater will be managed. The quantum of people living in the town could significantly increase, and given the proximity to the City, could place pressures on the City's physical and social infrastructure. Horotiu is one of the Strategic Employment Nodes in the sub-region, yet there are no plans to include any industrial growth in this location. The submitter acknowledges that the somewhat uncertain planning situation in the adjoining part of Hamilton, being Te Awa lakes, is probably contributing to some uncertainty for the future planning of Horotiu. While the City has signalled it supports a Special Housing Area at Te Awa Lakes, this has yet to be formally gazetted and a Plan Change process is currently on hold. It is not yet clear how these proposals will progress and over what timeframe.
Point Number	535.94
Summary of Decision Requested:	Add the Hamilton City Council 'Area of Interest' map into the Proposed District Plan (as attached to the submission). This could take the form of an overlay; AND Add objectives and policies specific to the 'Area of Interest' which seek to avoid urban subdivision and development in rural zones and provide only for rural land uses in that zone; AND Add a supporting set of rules and methods including deploying a prohibited activity status for certain non-rural land uses and subdivision. AND Any consequential amendments and/or additional relief required to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> This Area of interest has been determined to be a rough indicator the area of the City's economic and social influence and represents its various communities of interest. This will enable the submitter to have an enhanced level of control and input into strategic land use planning and resource consenting of land uses within a defined area adjacent to the Hamilton City Council boundary within the Waikato District. The extent of the areas will be fine tuned as further analysis is undertaken. Objectives and policies area sought which ensure that land use within the Area of Interest is controlled and enabled at a rate which is consistent with and prioritises Hamilton City Council's strategic land use plans and urban growth strategies including avoidance of sprawl.

Submitter Number:	536	Submitter:	LJ & TM McWatt Limited
Point Number	536.1		
Summary of Decision Requested:	Retain Objective 5.1.1 The rural environment as notified.		
Decision Reasons:	<ul style="list-style-type: none"> Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils. Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas. Submitter agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided. 		
Point Number	536.2		
Summary of Decision Requested:	Retain Objective 5.2.1 Rural resource, except for the amendments sought below AND Amend Objective 5.2.1(a)(i) Rural Resources as follows: <i>(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;</i>		
Decision Reasons:	<ul style="list-style-type: none"> Support sub-policy (i). Accessibility to versatile land is also a key consideration in managing the soil resource. 		
Point Number	536.3		
Summary of Decision Requested:	Retain Policy 5.2.2 High class soils as notified.		

Decision Reasons:

- Supports this policy seeking to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number

536.4

Summary of Decision Requested:

Retain Objective 5.3.1 Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 Rural character and amenity as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District

Decision Reasons:

- Supports the intent of the objective but the variation in rural character and amenity values needs to be recognised. The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number

536.5

Summary of Decision Requested:

Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

DI (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RDI.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RDI.

Decision Reasons:

- Support rule 22.4.1.2 (a)(iv) in part.
- This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue. This will avoid redevelopment of farm tracks and fencelines for a relatively small lot. There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies. For lots smaller than 8000m², it is only necessary to confirm that services can be provided.
- A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.

Point Number

536.6

Summary of Decision Requested:

Delete Rule 22.4.1.2(a)(v) General subdivision;

AND

Add a new matter of discretion to Rule 22.4.1.2(b) General subdivision, as follows:

(b) Council's discretion is restricted to the following matters:

...

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Oppose rule 22.4.1.2 (a)(v).
- The section 32 analysis does not justify this rule.
- Submitter agrees with the intent however the 80/20 percentage requirement may not result in the best layout, design or farming outcome. Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils. The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.

Point Number

536.7

Summary of Decision Requested:

Retain Rule 22.4.1.2(a)(i)-(ii) General Subdivision.

Decision Reasons:

- Supports the inclusion of the General subdivision rules.

Point Number

536.8

Summary of Decision Requested:

Retain Rule 22.4.1.2 RDI(a)(iv) General subdivision, which classifies creation of an additional lot between 8,000m² and 1.6ha as a restricted discretionary activity.

Decision Reasons:

- The creation of an additional vacant lot between 8000m² and 1.6ha is supported.
- The creation of an additional lot between 8000m² and 1.6ha as a restricted discretionary activity is supported.

Point Number

536.9

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below

AND

Amend Policy 5.3.8 Policy Effects on rural character and amenity from rural subdivision, so that it reads as follows:

~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas*~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the follow:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity. Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can therefore be altered by structure and buildings such as greenhouses and packhouses. These are recognised as important primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number

536.10

Summary of Decision Requested:

Amend Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from Prohibited to Non-Complying Activities.

Decision Reasons:

- Oppose the prohibited activity status.
- With regards to PR2 and PR3 and there may be circumstances where a subdivision of high class soils has overall positive effects supported by objectives and policies. Relocating consented lots within a landholding may produce a better outcome from farming and landscape perspectives.
- There are circumstances where the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high class soils which are defined in the Proposed Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unreasonable to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. Subdivision may enable more opportunities for economic wellbeing and a more efficient and effective operation of the activity.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of the operative Franklin Section Rule 22B and therefore a non-complying activity status is more appropriate. For example, the land may be able to subdivided using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number

536.11

Summary of Decision Requested:

Amend Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with "Record of Title".

Decision Reasons:

- Submitter seeks that the word 'lot' is changed to 'Record of Title.'
- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Submitter Number:

537

Submitter:

Kelvin & Joy Smith

Point Number

537.1

Summary of Decision Requested:

Amend the zoning of the property at 116 Swan Road, Te Kauwhata from the Rural Zone to Country Living Zone.

Decision Reasons:

- The recent Residential zoning nearby will adversely affect the submitter's farming practices (spraying and machinery use).
- The property at 116 Swan Road is suitable for country living because it has rolling to flat topography and is close to Te Kauwhata village.
- Due to the deterioration of Hawke Road, the adjoining properties off that road could be better serviced by a new road through this submitter's property.

Point Number

537.2

Summary of Decision Requested:

Amend the Proposed District Plan to allow the subdivision of the property at 116 Swan Road, Te Kowhai into two blocks.

Decision Reasons:

- For selling options.

Submitter Number:

538

Submitter:

Paul Brydon

Point Number

538.1

Summary of Decision Requested:

Retain Chapter 9.2: Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The provisions provide for and safeguard the needs of the aviation community.
- The aerodrome will be safer.
- Recognises the amount of aviation infrastructure that already exists.
- Future-proofs the aerodrome.

Point Number 538.2

Summary of Decision Requested: **Retain** Chapter 27: Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The provisions provide for and safeguard the needs of the aviation community.
- The aerodrome will be safer.
- Recognises the amount of aviation infrastructure that already exists.
- Future-proofs the aerodrome.

Submitter Number: 539

Submitter:

Garyowen Properties (2008) Limited

Point Number 539.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils. Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas.
- Submitter agrees that urban development in the rural environment is contrary to the intent of the Proposed District Plan and should be avoided.

Point Number 539.2

Summary of Decision Requested: **Retain** Objective 5.2.1 Rural resources, except for the amendment sought below;

AND

Amend Objective 5.2.1 (a)(i) Rural Resources as follows:

(i) Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;

Decision Reasons:

- Support sub policy (i) in part.
- Accessibility to versatile land is also a key consideration in managing the soil resource.

Point Number 539.3

Summary of Decision Requested: **Retain** Policy 5.2.2 High class soils, as notified.

Decision Reasons:

- Supports this policy seeking to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number 539.4

Summary of Decision Requested: **Retain** Objective 5.3.1 (a) Rural character and amenity, except for the amendments sought below

AND

Amend Objective 5.3.1 (a) Rural character and amenity, as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District

AND

Retain Policy 5.3.1 Rural character and amenity as notified.

Decision Reasons:

- Supports the intent of the objective but the variation in rural character and amenity values needs to be recognised.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number 539.5

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General subdivision, except for the amendments sought below

AND

Add a new discretionary activity (D1) to Rule 22.4.1.2 General subdivision, as follows:

D1. (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- Support rule 22.4.1.2 (a)(iv) in part.
- This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue.
- This will avoid redevelopment of farm tracks and fencelines for a relatively small lot.
- There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm that services can be provided.
- A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.

Point Number 539.6

Summary of Decision Requested: Delete Rule 22.4.1.2 (a)(v) General subdivision;
AND
Add a new matter of discretion to Rule 22.4.1.2 (b) General subdivision as follows:
(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- The section 32 analysis does not justify this rule.
- Submitter agrees with intent however the 80/20 percentage requirement may not result in the best layout, design or farming outcome.
- Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils.
- The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.

Point Number 539.7

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(i-iii) General subdivision, as notified.

Decision Reasons:

- The submitter supports the inclusion of general subdivision provisions.

Point Number 539.8

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(iv) General subdivision, as notified.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha is supported.
- The creation of any additional lot between 8,000 and 1.6ha as a restricted discretionary activity is supported.

Point Number 539.9

Summary of Decision Requested: Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND
Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:
...
~~(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.~~
...
(d) Rural hamlet subdivision and boundary relocations ensure the follow:
...
(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;
...
(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity.
- Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can be altered by structure and buildings such as greenhouses and packhouses. These are recognised as important component of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 539.10

Summary of Decision Requested: Amend Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from Prohibited to Non-Complying Activities.

Decision Reasons:

- Oppose the prohibited activity status for rural subdivision activities, and these should be considered as non-complying activities.
- With regards to PR2 and PR3 there may be circumstances where a subdivision of high class soils has overall positive effects supported by objectives and policies. Relocating consented lots within a landholding may produce a better outcome from farming and landscape perspectives.
- There may be circumstances where the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high class soils which are defined in the Proposed Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unfair to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. Subdivision may enable more opportunities for economic wellbeing and a more efficient and effective operation of these activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of the operative Franklin Section Rule 22B and therefore a non-complying activity status is more appropriate. For example, the land may be able to subdivided using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number 539.11

Summary of Decision Requested: Amend Rule 22.4.1.1 Prohibited subdivision, by replacing the term 'lot' with 'Record of Title'.

Decision Reasons:

- Submitter seeks that the word 'lot' is changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Submitter Number:

540

Submitter:

Glen Alvon Farms Limited

Point Number

540.1

Summary of Decision Requested:

Retain Policy 3.2.8 Incentivise Subdivision as notified except for the amendments sought below
AND

Add a new clause (b) to Policy 3.2.8 Incentivise Subdivision as follows:

(b) Incentivise subdivision in the Rural Zone when there is the enhancement and/or restoration of biodiversity, legal and physical protection of areas that are of a suitable size and meet the Criteria for Determining Significance of Indigenous Biodiversity.

Decision Reasons:

- Policy 3.2.8 needs to be expanded to provide for the enhancement and/or restoration of areas that achieve a functioning ecosystem and allow for subdivision on the basis of compliance with Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity). Eligible areas would likely be wetlands and waterways which have become degraded due to stock farming and cropping and restoring these would be in line with the Vision and Strategy for the Waikato River.
- Supports incentivising the protection of existing biodiversity with the ability to subdivide subject to meeting certain criteria.
- Incentivising restoration is in line with the vision and strategy for the Waikato River.

Point Number

540.2

Summary of Decision Requested:

Retain Objective 5.1.1 The rural environment, as notified.

Decision Reasons:

- Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils. Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas.
- Support the strength of wording in this objective and agree that urban development within the Rural Environment is an outcome contrary to the intent of the Proposed Plan and should be avoided.

Point Number

540.3

Summary of Decision Requested:

Retain Objective 5.2.1 Rural Resources, except for the amendments sought below;
AND

Amend Objective 5.2.1 (a) (i)- Rural Resources as follows:

(a) Maintain or enhance the:

(i) Inherent life-supporting capacity, accessibility and versatility of soils, in particular high class soils;

Decision Reasons:

- Accessibility to versatile land is also a key consideration in managing the soil resource.

Point Number

540.4

Summary of Decision Requested:

Retain Policy 5.2.2 High class soils.

Decision Reasons:

- This policy seeks to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number

540.5

Summary of Decision Requested:

Retain Policy 5.2.3 Effects of subdivision and development on soils, except for the amendment sought below;
AND

Amend Policy 5.2.3- effects of subdivision and development on soils as follows:

(b) Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).

Decision Reasons:

- Policy is supported in part.
- The notified policy only provides for subdivision where existing indigenous biodiversity is protected. There are a number of waterways and wetland in the Rural Zone that would benefit from stock exclusion (through fencing), enhancement and/or restoration.
- The cost of full restoration is approximately \$45,000+GST per ha (excluding fencing to revegetated areas). Subdivision offers an incentive for landowners to undertake restoration works which would unlikely occur unless there was a financial offset.
- Protection and/or restoration (particularly waterways) would achieve the outcome sought in Policy 5.2.1 (a)(iii) which is to enhance water quality and support Policy 3.1.2 which seeks enhancement of indigenous biodiversity values through planting, pest control and other biosecurity measures.
- The Vision and Strategy for the Waikato River seeks restoration of the health and wellbeing of the Waikato River catchment over time. Incentivising the fencing and restoration of waterways would contribute positively to the improvement of water quality and achieve the objective of the Vision and Strategy.

Point Number

540.6

Summary of Decision Requested: **Amend** Objective 5.3.1 Rural character and amenity, by adding text shown in underlined italics, as follows:

(a) Rural character and amenity are maintained while recognising the localised character of different parts of the District.

Decision Reasons:

- Support in part however the variation in rural character and amenity values needs to be recognised.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character varies depending on local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number 540.7

Summary of Decision Requested: **Retain** Policy 5.3.8 Effects on rural character and amenity from rural subdivision except for the amendments sought below

AND

Amend 5.3.8 Policy - Effects on rural character and amenity from rural subdivision, as follows:

...

~~*(b) Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~

...

(d) Rural hamlet subdivision and boundary relocations ensure the following:

...

(ii) Maintenance of the localised rural character and amenity of the surrounding rural environment;

...

(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained

Decision Reasons:

- Policy supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity. Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can be altered by structure and buildings such as greenhouses and packhouses. However these are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number 540.8

Summary of Decision Requested: **Amend** the definition of "Significant Natural Area" in Chapter 13 Definitions, as follows:

Means an area of significant indigenous biodiversity that is identified as a Significant Natural Area on the planning maps or has been assessed as meeting one or more of the Criteria for Determining Significance of Indigenous Biodiversity, (Appendix 2) by a suitably qualified Ecologist.

Decision Reasons:

- Supports the inclusion of Significant Natural Area's definition.
- This definition needs to be expanded to include areas that have been assessed by a suitably qualified ecological as meeting the criteria in Appendix 2 of the Proposed Plan (*Criteria for Determining Significance of Indigenous Biodiversity*).
- This would align with the wording of the subdivision rule for conservation lots.

Point Number 540.9

Summary of Decision Requested: **Amend** Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision from Prohibited Activities to Non-Complying Activities.

Decision Reasons:

- Oppose the prohibited activity status for rural subdivision activities and should be considered non-complying activities.
- With regard to PR2 and PR3 there may be circumstances where a subdivision of high class soils has overall positive effects supported by objectives and policies. Relocating consented lots within a landholding may produce a better outcome from farming and landscape perspectives.
- There may be circumstances where the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high class soils which are defined in the Proposed Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unfair to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. This can result in economic wellbeing and a more efficient and effective operation of those types of activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of the operative Franklin Section Rule 22B and therefore a non-complying activity status is more appropriate. For example, the land may be able to be subdivided using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number 540.10

Summary of Decision Requested: **Retain** Rule 22.4.1.6 Conservation lot subdivision, except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.6 Conservation lot subdivision, as follows:

DI

(a) Conservation lot subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.6(vi-vii) RD1.

(b) Conservation lot subdivision around established rural activities that does not comply with Rule 22.4.1.6(vi-vii) RD1.

Decision Reasons:

- There may be instances where it is not appropriate for the area of a conservation lot to be at least 8000m² due to an existing curtilage for a dwelling or established rural activities.

Point Number	540.11
Summary of Decision Requested:	Retain Appendix 2 Criteria for Determining Significance of Indigenous Biodiversity.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the inclusion of the criteria.
Point Number	540.12
Summary of Decision Requested:	Retain Rule 22.4.1.2 (a) (i)-(iii) General subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • Submitter supports inclusion of the General Subdivision rules.
Point Number	540.13
Summary of Decision Requested:	Retain Rule 22.4.1.2 RD1 (a) (iv) General subdivision.
Decision Reasons:	<ul style="list-style-type: none"> • The creation of an additional vacant lot between 8,000m² and 1.6ha as a restricted discretionary activity is supported.
Point Number	540.14
Summary of Decision Requested:	Amend Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with "Record of Title."
Decision Reasons:	<ul style="list-style-type: none"> • Submitter seeks that the word 'lot' is changed to 'Record of Title.' • It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.
Point Number	540.15
Summary of Decision Requested:	<p>Retain Rule 22.4.1.2 General subdivision, except for the amendments sought below</p> <p>AND</p> <p>Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:</p> <p><i>D1 (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.</i></p> <p><i>(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue. • This will avoid redevelopment of farm tracks and fencelines for a relatively small lot. • There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies. For lots smaller than 8000m², it is only necessary to confirm that services can be provided. • A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.
Point Number	540.16
Summary of Decision Requested:	<p>Delete Rule 22.4.1.2 (a) (v) General subdivision;</p> <p>AND</p> <p>Add a new matter of discretion in Rule 22.4.1.2 RD1 as follows:</p> <p><i>(v) Effects on rural productivity and fragmentation of high class soils.</i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Oppose rule 22.4.1.2 General subdivision. • The section 32 analysis does not justify this rule. • Submitter agrees with the intent however the 80/20 percentage requirement may not result in the best layout, design or farming outcome. Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils. • The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.
Point Number	540.17
Summary of Decision Requested:	<p>Retain Rule 22.4.1.6 Conservation lot subdivision, except for the amendments sought below</p> <p>AND</p> <p>Amend Rule 22.4.1.6 Conservation lot subdivision, as follows:</p> <p><i>RD1 (a) The subdivision must comply with all of the following conditions:</i></p> <p><i>(i) The lot must contain:</i></p> <p><i>A. a contiguous area of existing Significant Natural Area either as shown on the planning maps or as determined by an experienced and suitably qualified ecologist which meets; or</i></p> <p><i>B. a contiguous area, to be enhanced and/or restored;</i></p> <p><i>in accordance with the table below:</i></p> <p>...</p> <p><i>(ii) The area of Significant Natural Area, or area to be enhanced and/or restored, is assessed by a suitably qualified person as satisfying at least one criteria in Appendix 2 (Criteria for Determining Significance of Indigenous Biodiversity);</i></p>

(iii) The Significant Natural Area or area to be restored is not already subject to a ~~conservation covenant pursuant to the Reserves Act 1992 or the Queen Elizabeth II National Trust Act 1977~~; legal protection.

(iv) The subdivision proposes to legally protect all areas of Significant Natural Area or area to be restored by way of a ~~conservation covenant pursuant to the Reserves Act 1992 or the Queen Elizabeth II National Trust Act 1977~~;

(v) An ecological management plan is prepared to address ongoing management of the covenant protected area to ensure that the Significant Natural Area area to be protected is self-sustaining and that plan:

A. Addresses fencing requirements for the covenant protected area;

B. Addresses ongoing pest plant and animal control;

C. Identifies any enhancement and/or restoration or edge-planting required within the covenant area to be protected;

(vi) All proposed lots are a minimum size of 8000m²;

(vii) All proposed lots excluding the balance lot, must each have a maximum area of 1.6ha;

(viii) This rule or its equivalent in a previous district plan has not previously been used to gain an additional subdivision entitlement;

Decision Reasons:

- Protecting Significant Natural Areas and other areas of existing biodiversity offer positive benefits to the region.
- Significant biodiversity and water quality benefits can be gained from ecological enhancements, particularly along waterways and wetlands and these are actions identified by the Waikato Regional Policy Statement, the Vision and Strategy and the objectives and policies for the Rural Zone.
- Revegetation costs would be offset by providing further subdivision opportunities.
- A covenant is not the only legal protection mechanism available as vesting in Council or managing the conservation area through a section 221 consent notice may be appropriate alternatives.

Point Number

540.18

Summary of Decision Requested:

Retain Rule 22.4.1.6 Conservation lot subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.6 RD1 (b) Conservation lot subdivision, as follows:

(b) Council's discretion is restricted to the following matters:

(i) Subdivision layout and proximity of building platforms to ~~Significant Natural Area~~ the area to be protected;

(ii) Matters contained in an ecological management plan for the covenant protected area;

(iii) Effects of the subdivision on localised rural character and amenity values;

(iv) Extent of earthworks including earthworks for the location of building platforms and access ways.

(v) Mechanism of legal protection for the area to be protected.

Decision Reasons:

- Support in part.
- Apart from a covenant, there are alternative methods for legal protection of a conservation area such as vesting in Council or a section 221 consent notice.
- There may be instances where it is not appropriate for the area of a conservation lot to be at least 8000m² due to an existing curtilage for a dwelling or established rural activities.

Submitter Number:

541

Submitter:

Jack Schaae

Point Number

541.1

Summary of Decision Requested:

Retain Chapter 9.2 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- This submitter owns a hangar and aircraft based at Te Kowhai.
- The provisions will keep the aerodrome in operation as a unique feature of Te Kowhai.
- The Obstacle Surface Limitation is important for safety reasons.

Point Number

541.2

Summary of Decision Requested:

Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- This submitter owns a hangar and aircraft based at Te Kowhai.
- The provisions will keep the aerodrome in operation.
- It is a unique feature of Te Kowhai.
- The Obstacle Surface Limitation is important for safety reasons.

Submitter Number:

542

Submitter:

Mark Silence

Point Number

542.1

Summary of Decision Requested:

Retain the Proposed Residential zoning of properties on the eastern side of Geraghtys Road, Tuakau.

Decision Reasons:

- No reasons provided.

Point Number

542.2

Summary of Decision Requested:

Amend the Proposed zoning of properties on the western side of Geraghtys Road, Tuakau from the Rural Zone to Residential Zone.

Decision Reasons:

- No reasons provided.

Point Number 542.3

Summary of Decision Requested: **Amend** Chapter 16: Residential Zone, so that the existing old quarter acre titles on the eastern side of Geraghtys Road, Tuakau that already contain a dwelling remain without change but possibly enable every 5th or 6th title in this location to contain no more than two dwellings.

Decision Reasons:

- Development in this location should be in keeping with the spacious residential environments located on McEvoy Avenue, Coolen Place, St Johns Avenue and Thorn Road, Tuakau.

Submitter Number: 543

Submitter:

Fellrock Developments Limited and TTT Products Limited

Point Number 543.1

Summary of Decision Requested: **Retain** the proposed Industrial Zone of the property at 42-97 Bollard Road, Tuakau (comprising Lot 1 and Part Lot 2 DP 32049 – NA51D/1149, Lot 1 DP 41468, Lot 2 DP 96093, Lot 1 DP 97810 and Part Lot 3 DP 32049 – NA53B/720 and Lot 1 DP 96093 – NA52A/673) with amendments to Rules 20.2.1 and 20.3.1 as sought in the submission;

OR

Amend the zoning of property located at 42 to 97 Bollard Road, Tuakau from Industrial to Heavy Industrial Zone if the amendments sought to the Industrial Zone, as sought in the submission, are not accepted.

Decision Reasons:

- The site currently sits within Business Zoned land occupied by a range of business and employment-based activities. We generally support the zoning of the site and land adjoining to Industrial. However, the overly restrictive requirements on hours of operation (Rule 20.2.1) and height of buildings (Rule 20.3.1) would mean a Heavy Industrial zoning may be more appropriate for the TTT Products Ltd site. Heavy Industrial zoning would enable the continued operation and growth of the TTT Products Ltd business.

Point Number 543.2

Summary of Decision Requested: **Amend** the definition of 'industrial activity' in Chapter 13 Definitions, as follows:

Means the production, processing, bulk moving or storage in bulk of any materials, goods or products: and other accessory activities:

...

Decision Reasons:

- Supports the inclusion of a definition for industrial activities.
- This definition needs to be expanded to include activities that are accessory or incidental to the primary industrial activities such as fuel tanks, lunch rooms, etc.

Point Number 543.3

Summary of Decision Requested: **Retain** ancillary retail (P6) and offices ancillary to an industrial activity (P4) being permitted activities (Rule 20.1.1);

AND

Amend Rule 20.1.1 P4 and P6 Permitted Activities, as follows:

Activity		Activity-specific conditions
...	Office ancillary to an industrial activity	Less than 100m² gfa; or
P4		Does not exceed 30% of all buildings on the site; Nil
...	Ancillary retail	Does not exceed 10% of all buildings on the site; Nil
P6		

Decision Reasons:

- Many industrial activities involve outdoor processing and storage and the only buildings that may occupy the site are for offices and retail transactions. Retention of the work 'ancillary' is sufficient to ensure that the retail and office activities are secondary to the primary industrial activities on the site.
- Supports retail and office activities to the industrial use of the site being permitted activities within the Industrial Zone.
- Do not support the limitations on size.

Point Number 543.4

Summary of Decision Requested: **Delete** Rule 20.2.1 Servicing and hours of operation.

Decision Reasons:

- This rule is overly restrictive and the environmental outcome that it seeks is already addressed by other rules (such as those relating to noise and glare).
- Many industrial based business operate with shift work and/or require incoming and outgoing deliveries during off peak times. This trend is increasing given the need to minimise transport costs and delays from inadequate roading infrastructure. The restrictions in this rule may therefore hinder efficient operations by not enabling them to expand and adapt to markets.
- It is unreasonable to allow a courier to deliver to a residence at 7.00am but not to a nearby industrial business.

Point Number 543.5

Summary of Decision Requested: **Amend** Rule 20.2.2 C1 Landscape planting, as follows:

(a) Any new activity on a lot that has a side and/or rear boundary adjoining any Residential, Village, Country Living or Reserve Zone shall provide a ~~3m~~ 1m wide landscaped strip running parallel with the side and/or rear boundary; and

(b) Any new activity on a lot that contains, or is adjacent to, a river or a permanent ~~or intermittent~~ stream shall provide an 8m wide landscaped strip measured from the top edge of the closes bank and extending across the entire length of the watercourse.

Decision Reasons:

- Supports the inclusion of landscaping strips adjoining sensitive receiver and permanent waterways.
- The landscaping requirements should only apply to new developments as existing activities may not be able to comply with this rule.
- A 3m wide landscaped strip is unnecessarily wide and will result in a considerable loss of land that could otherwise be used for industrial development or car parking.
- Maintenance of this landscaped width also places an unreasonable burden and cost on the owner/operator.
- A 1m landscaped strip is more appropriate and would provide for a well maintained hedge in an urban setting. Applying this rule to intermittent streams is onerous and may raise concerns in regard to overland flows and potentially restrict development.

Point Number 543.6

Summary of Decision Requested: **Retain** Rule 20.2.5.1 Earthworks, except for the amendments outlined below;
AND

Amend Rule 20.2.5.1 PI (a) Earthworks - General, as follows:

(a) Earthworks (excluding the importation of fill material) within a site must meet all of the following conditions:

(i) be located more than 1.5 m horizontally from any waterway, open drain or overland flow path;

(ii) not exceed a volume of more than ~~250m³~~ 2000m³;

(iii) not exceed an area of more than ~~1000m²~~ 10,000m² over any consecutive 12 month period;

~~(iv) the total depth of any excavation or filling does not exceed 1.5m above or below ground level;~~

...

Decision Reasons:

- The notified area, volume and depth limits are too low given that most industrial sites are typically large and require a high degree of land modification for the installation of services, stormwater retention devices for hard stand, the high percentage of building coverage and hard surfaces.
- If the Industrial Zone was subdivided into lots with a minimum area of 1000m² and average area of 2000m², this earthworks rule would likely be breached with every new development. For instance, a 1000m² site with 0.2m of topsoil would create 200m³ of earthworks for just the stripping of the topsoil.
- Controls on volume and areas are sufficient to manage environmental effects, so limit on excavation/fill depth are not needed.

Point Number 543.7

Summary of Decision Requested: **Retain** Rule 20.2.6 Hazardous Substances;
AND
Retain Appendix 5 Hazardous Substances.

Decision Reasons:

- Supports the proposed volumes and weights of hazardous substances specified in Appendix 5, and they should not be reduced.

Point Number 543.8

Summary of Decision Requested: **Retain** notified Rule 20.2.7.1 Signs - General.

Decision Reasons:

- The submitter states that this proposed rule is workable.

Point Number 543.9

Summary of Decision Requested: **Amend** Rule 20.2.8 PI Outdoor storage of goods or materials, as follows:

PI (a) Outdoor storage of goods or materials must comply with all the following conditions:

...

~~(iv) not exceed 30% site coverage;~~

...

(v) be set back at least ~~3m~~ 1.5m from the boundary of any:

...

Decision Reasons:

- The maximum site coverage of 30% is too restrictive as it does not enable appropriate industrial activities to be established in the Industrial Zone.
- A setback of 3m is excessive, particularly given that outdoor storage is addressed elsewhere in the daylight admission rule (Rule 20.3.3) that ensures that neighbouring properties retain sufficient access to daylight.

Point Number 543.10

Summary of Decision Requested: **Amend** Rule 20.3.4.2 PI (a)(i)(B) Building setback - water bodies, as follows:

PI (a) A building must be set back a minimum of 30m from:

(i) the margin of any:

A. lake;

B. wetland identified as a Significant Natural Area of the planning maps; and

...

Decision Reasons:

- Supports Rule 20.3.4.2 PI in part, with the exception of 30m setback from wetlands.
- There is a wide variation as to what may meet the definition of a wetland and this may include any area inundated with water for a period of time with minimal vegetation, irrespective of its ecological function or biodiversity.
- A man-made wetland has been established on the property owned by Tuakau Timber Treatment Products Limited to assist with stormwater disposal from the industrial activity.
- It would be unreasonable to require a 30m setback in this instance as it would restrict development and potentially discourage wetlands being used for stormwater disposal and treatment.
- This disposal method is supported by local iwi groups.

Point Number 543.11

Summary of Decision Requested: **Retain** Rule 20.4.1 Subdivision General, except for the amendments outlined below;

AND

Delete Rule 20.4.1 RD1 (a)(iii) Subdivision - General;

AND

Amend Rule 20.4.1 RD1 (b) Subdivision- General to add additional matters of discretion related to the design, layout and number of rear lots (or include this as a requirement where more than 5 lots are being created).

AND

Add a new Controlled Activity to Rule 20.4.1 Subdivision General for subdivision around an existing development with the matters of control being limited to design, layout, access and servicing.

Decision Reasons:

- Most small scale subdivision creating 1-3 additional lots could not satisfy this rule and would therefore become non-complying activities. Council could potentially address design and layout as a matter of restricted discretion to minimise rear lots or apply this to proposals that create more than 5 lots.

Point Number 543.12

Summary of Decision Requested: **Retain** Rule 20.4.2 Subdivision - Boundaries for Records of Title.

Decision Reasons:

- The submitter supports the flexibility afforded by this rule to relocate boundaries in order to accommodate industrial activities.

Point Number 543.13

Summary of Decision Requested: **Retain** Rule 20.2.9 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The submitter states that all Significant Natural Areas need to be protected.

Point Number 543.14

Summary of Decision Requested: **Amend** Rule 20.3.1 PI(a)(i) Building height, as follows:

PI (a) The maximum height of a building must not exceed:

(i) ~~15m~~ 20m; or

Decision Reasons:

- The proposed maximum building height of 15m is too restrictive and not appropriate for the type of activities seeking to locate in the Industrial Zone (such as manufacturing and warehousing). Shading and privacy in adjoining zones will remain protected through the daylight admission and setback rules (Rules 20.3.3 and 20.3.4.1).

Point Number 543.15

Summary of Decision Requested: **Retain** Rule 20.3.2 Building height in an Outstanding Natural Feature, Outstanding Natural Landscape or Significant Amenity Landscape.

Decision Reasons:

- More onerous controls over building height are required to preserve these identified areas within the Waikato District.

Point Number 543.16

Summary of Decision Requested: **Retain** Rule 20.3.3 Daylight admission, except for the amendments outlined below;

AND

Amend Rule 20.3.3 Daylight Admission to exclude boundaries with the Heavy Industrial Zone.

Decision Reasons:

- Supports the daylight admission provisions and considers that these are workable.
- Seeks an exclusion of the Heavy Industrial Zone as well as Industrial Zone.

Point Number 543.17

Summary of Decision Requested: **Retain** Rule 20.3.4.1 Building setbacks.

Decision Reasons:

- The submitter considers that this rule is workable and that it is appropriate that side and rear setbacks not apply to buildings on sites that adjoin other sites in the Industrial or Heavy Industrial Zones.

Submitter Number: 544 **Submitter:** KR & BC Summerville

Point Number 544.1

Summary of Decision Requested: **Retain** Objective 5.1.1 The rural environment as notified.

Decision Reasons:

- Protecting high class soils in the Waikato District is a matter of national importance which is now being recognised with the development of the National Policy Statement for Versatile Land and High Class Soils.
- Urban subdivision, particularly ad hoc development, in the rural environment should be avoided because this is an inefficient use of productive rural land which may undermine the integrated development of identified townships and expansion areas.
- Supports the strength of wording in this objective and agrees that urban development within the rural environment is an outcome contrary to the intent of the Proposed Plan and should be avoided.

Point Number

544.2

Summary of Decision Requested:

Retain Objective 5.2.1 Rural Resources, except for the amendments sought below;
AND

Amend Objective 5.2.1 Rural Resources (a)(i) as follows:

(a) *Maintain or enhance the:*

(i) *Inherent life-supporting capacity, accessibility, and versatility of soils, in particular high class soils;*

Decision Reasons:

- Accessibility to versatile land is also a key consideration in managing the soil resource.
- Supports the enhancement and/or restoration of natural ecosystems, surface and groundwater quality and the natural characteristics of fresh water bodies and coastal waters in clauses (ii),(iii) and (iv).

Point Number

544.3

Summary of Decision Requested:

Retain Policy 5.2.2 High class soils as notified.

Decision Reasons:

- Supports this policy which seeks to retain high class soils and ensure that adverse effects do not compromise their life-supporting properties.

Point Number

544.4

Summary of Decision Requested:

Retain Policy 5.2.3 Effects of subdivision and development on soils, except for the amendments sought below;
AND

Amend Policy 5.2.3 (b) as follows:

(b) *Subdivision which provides a range of lifestyle options is directed away from high class soils and/or where indigenous biodiversity is being protected, enhanced, and/or restored (with plantings).*

Decision Reasons:

- The notified policy only provides for subdivision where existing indigenous biodiversity is protected. There are a number of waterways and wetland in the Rural Zone that would benefit from stock exclusion (through fencing), enhancement and/or restoration.
- The cost of full restoration is approximately \$45,000 + GST per ha (excluding fencing to revegetated areas). Subdivision offers an incentive for landowners to undertake restoration works which would unlikely occur unless there was a financial offset.
- Protection and/or restoration (particularly waterways) would achieve the outcome sought in Policy 5.2.1 (a)(iii) which is to enhance water quality and support Policy 3.1.2 which seeks enhancement of indigenous biodiversity values through planting, pest control and other biosecurity measures.
- The Vision and Strategy for the Waikato River seeks restoration of the health and welling of the Waikato River catchment over time. Incentivising the fencing and restoration of waterways would contribute positively to the improvement of water quality and achieve the objectives of the Vision and Strategy.

Point Number

544.5

Summary of Decision Requested:

Retain Objective 5.3.1 Rural character and amenity, except for the amendments sought below
AND

Amend Objective 5.3.1 - Rural character and amenity as follows:

(a) *Rural character and amenity are maintained while recognising the localised character of different parts of the District.*

Decision Reasons:

- Supports in part the intent of this objective but considers that the variation in rural character and amenity values needs to be recognised.
- The Waikato District encompasses coastal areas, hill country comprising large landholdings used primarily for pastoral use, and smaller landholdings (particularly in the north) used for higher value productive activities such as intensive cropping and greenhouses.
- Rural character should take into account the unique variables, including local landholding patterns, built form, land uses, vegetation and geomorphology.

Point Number

544.6

Summary of Decision Requested:

Retain Policy 5.3.8 Effects on rural character and amenity from rural subdivision, except for the amendments sought below
AND

Amend Policy 5.3.8 Effects on rural character and amenity from rural subdivision, as follows:

...

~~(b) *Ensure development does not compromise the predominant open space, character and amenity of rural areas.*~~

...

(d) *Rural hamlet subdivision and boundary relocations ensure the following:*

...

(ii) *Maintenance of the localised rural character and amenity of the surrounding rural environment;*

...
(e) Subdivision, use and development opportunities ensure that localised rural character and amenity values are maintained.

Decision Reasons:

- Policy is supported in part.
- Clause (b) should be deleted as it duplicates the statements in clauses (d)(ii) and (e) which also seek to maintain rural character and amenity.
- Not all rural areas comprise open space character and amenity as they can include active and dynamic primary productive activities.
- It should be recognised that rural landscapes can be altered by structure and buildings such as greenhouses and packhouses. These are recognised as important components of primary production activities, form part of the rural environment and are generally considered rural in appearance and value.

Point Number

544.7

Summary of Decision Requested:

Amend Rule 22.4.1.1 PR1, PR2, PR3 and PR4 Prohibited subdivision, from Prohibited Activities to Non-Complying activities.

Decision Reasons:

- Oppose the Prohibited Activity status for rural subdivision activities and should be considered as non-complying activities.
- With regards to PR2 and PR3 there may be circumstances where a subdivision of high class soils has overall positive effects supported by objectives and policies. Relocating consented lots within a landholding may produce a better outcome from farming and landscape perspectives.
- There are circumstances where the creation of an additional Record of Title is unavoidable. For example, where a title is limited as to parcels and the land parcels are held together by a covenant.
- The subdivision rule relies on a definition of high class soils which are defined in the Proposed Plan, yet they may not be versatile due to a range of factors (not just the classification of soil).
- It is unreasonable to prohibit the creation of lots that accommodate well-established, viable and sustainable rural activities (such as greenhouses, packhouses, packing sheds, intensive farming, poultry hatcheries and commercial orchards) which are appropriate to separate from other rural activities on the site. This can result in economic wellbeing and a more efficient and effective operation of those types of activities.
- Commercial reasons could necessitate subdivision, such as selling or leasing the business, rather than having no other option but to sell the entire property or invest more capital.
- PR4 may unreasonably restrict subdivision over and above what is necessary to avoid undermining the intent of the operative Franklin Section Rule 22B and therefore a non-complying activity status is more appropriate. For example, the land may be able to subdivided using a Significant Natural Area or the boundary relocation rule without compromising the intent of the transferable development right subdivision rule.
- Objectives and policies should be sufficiently strong to protect high class soils from inappropriate subdivision and development and not compromise future urban development in the Urban Expansion Area.

Point Number

544.8

Summary of Decision Requested:

Amend Rule 22.4.1.1 Prohibited subdivision, by replacing the term "lot" with "Record of Title".

Decision Reasons:

- Submitter seeks that the word 'lot' is changed for 'Record of Title.'
- It may be necessary to create multiple lots and hold them together in one Record of Title. This may occur where a stream or a public road physically separates land parcels that are held in one Record of Title.

Point Number

544.9

Summary of Decision Requested:

Retain Rule 22.4.1.2 General subdivision except for the amendments sought below

AND

Add a new discretionary activity to Rule 22.4.1.2 General subdivision, as follows:

D1 (a) General subdivision around an existing dwelling and associated curtilage that does not comply with Rule 22.4.1.2 (iv) RD1.

(b) General subdivision around established rural activities that does not comply with Rule 22.4.1.2 (iv) RD1.

Decision Reasons:

- Support rule 22.4.1.2 (a)(iv) in part.
- This rule should enable a lot to be created around an existing dwelling and curtilage so that the farming regime can continue. This will avoid redevelopment of farm tracks and fencelines for a relatively small lot.
- There may be situations where it is appropriate to create a new lot that is less than 8000m² or larger than 1.6ha which is consistent with objectives and policies.
- For lots smaller than 8000m², it is only necessary to confirm that services can be provided.
- A farm management report may be provided that confirms productive rural capacity for any lot greater than 1.6ha and the balance lot.

Point Number

544.10

Summary of Decision Requested:

Retain Rule 22.4.1.4 Boundary relocation, except for the amendment sought below

AND

Add a new matter of discretion to Rule 22.4.1.4 RD1 (b) Boundary relocation, as follows:

(v) Effects on high class soils, farm management and productivity.

Decision Reasons:

- Support in part.
- The relocation of a lot created under the previous transferable lot rules from an area that contains no high class soils to an area of high class soils would create an adverse outcome.
- The inclusion of high class soils as a matter of discretion would provide Council with a robust framework to ensure that adverse effects on high class soils are avoided.

Point Number

544.11

Summary of Decision Requested: Retain Rule 22.4.1.2 (a)(iv) General subdivision.

Decision Reasons:

- The creation of an additional vacant lot between 8,000m² and 1.6ha is supported as a restricted discretionary activity.

Point Number 544.12

Summary of Decision Requested: Delete Rule 22.4.1.2 General subdivision clause (a)(v);

AND

Add a new matter of discretion to Rule 22.4.1.2 (b) General subdivision, as follows:

(vi) Effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Rule 22.4.1.2 (a)(v) is opposed.
- The section 32 analysis does not justify this rule.
- Submitter agrees with the intent however the 80/20 percentage requirement may not result in the best layout, design or farming outcome.
- Objectives and policies (5.1.1 and 5.2) and the expanded matters of discretion are sufficiently strong to avoid adverse outcomes on high class soils.
- The rule will mean that every subdivision application will require a land use capability report to demonstrate compliance with the 80/20 percentage requirement which is costly and this should be discretionary rather than necessary.

Point Number 544.13

Summary of Decision Requested: Retain Rule 22.4.1.5 Rural Hamlet Subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.5 RD1 Rural Hamlet Subdivision, as follows:

(a) Subdivision to create a Rural Hamlet must comply with all of the following conditions:

- (i) it results in 3 to 5 proposed lots being clustered together;*
- (ii) All existing Records of Title and/or consented lots form one continuous landholding;*
- (iii) Each proposed lot has a minimum area of ~~8000m²~~ 5000m²;*
- (iv) Each proposed lot has a maximum area of ~~1.6ha~~ 1.0ha;*
- (v) The proposed balance lot has a minimum area of 20 ha; and*
- (vi) It does not create any additional lots beyond the number of existing Records of Title.*

Decision Reasons:

- Supported in part.
- The inclusion of 'consented lots' in this rule (such as general lots and conservation lots) would have positive outcomes through shared infrastructure and enhancement of production systems.
- It would also limit the wide dispersal of lots and enable the subdivision layout to account for effects from intensive farming or mineral extraction activities.
- The subdivision design needs to specifically respond to site circumstances and it may be more appropriate to have smaller sized lots to result in a compact design within a rural setting where dwellings within a hamlet can borrow their rural character and amenity from adjoining rural productive land.
- If 5 lots were created, this could potentially result in a total of 8ha of land being taken up, resulting in dispersed rural housing rather than being characterised as a hamlet.

Point Number 544.14

Summary of Decision Requested: Retain Rule 22.4.1.5 Rural Hamlet Subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.5 RD1 (b) Rural Hamlet Subdivision, as follows:

(b) Council's discretion is restricted to the following matters:

(i) subdivision layout and design including dimension, shape and orientation of the proposed lots and specified building areas;

...

(vi) effects on rural productivity and fragmentation of high class soils.

Decision Reasons:

- Supported in part.
- The hamlet provisions should require a response to the landscape context that is more important than meeting the performance standards relating to lot size. This is because rural character and amenity values will be maintained by the 20ha balance lot surrounding the hamlet.

Point Number 544.15

Summary of Decision Requested: Retain Rule 22.4.1.4 Boundary relocation, and the flexibility to allow rural properties to rationalise large landholdings to provide a logical lot arrangement that better supports the farming activity;

AND

Amend Rule 22.4.1.4 (a)(i) as follows:

RD1 (a) The boundary relocation must:

(i) Relocate a common boundary or boundaries between two or more existing Records of Title or consented lots that existed prior to 18 July 2018;

...

Decision Reasons:

- Support in part.
- Many farms in the district are held in multiple Records of Titles which have the ability to be relocated. The boundary relocation rule should reflect the operative Franklin Section rule which enables an existing title or consented lot to be relocated within a property or, alternatively, within properties where boundaries are shared and are in common ownership.

- These types of boundary relocations typically result in positive effects by enhancing the productive farming system and allowing for the relocation of potential house sites to more favourable locations.
- Considers the retention of the 18 July 2018 date is appropriate as this allows closer scrutiny and a higher activity status for those Records of Title and consented lots created under the transferable and environmental lot rules.

Point Number 544.16

Summary of Decision Requested: Retain Rule 22.4.1.2(a)(i)-(iii) General subdivision.

Decision Reasons:

- No reasons provided.

Submitter Number: 545

Submitter: Bryce Mounsey

Point Number 545.1

Summary of Decision Requested: Amend the proposed Rural zoning of the 183ha area on East Mine Road, Huntly, comprising the following 11 titles to enable development of a recreation and events zone alongside a residential zone:

CFR 805391, CFR SA 50A/762, CFR SA 10D/800, CFR 1955501, CFR SA 61B/799, CFR SA 18B/1138, CFR SA 30A/356, SA 40D/985, CFR SA 251/176, SA 26C/345 and SA 51/131

Decision Reasons:

- The proposal will provide the following activities and outcomes:
- Educational outcomes for youth;
- Significant employment opportunities;
- Improved recreational living and lifestyle for residents through outdoor activities and water sports; and
- Will transform Huntly and enable it to become a tourist destination. It is time that Council gave 100% support, endorsement and commitment to the beautification of Huntly.

Submitter Number: 546

Submitter: Lynne Adrienne

Point Number 546.1

Summary of Decision Requested: Add strong precautionary and prohibitive policies and rules relating to the management of genetically modified organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- Provided for under the Resource Management Act 1991 and pursuant to the ruling in Federated Farmers of New Zealand v Northland Regional Council.
- Concerns about the potential risks posed by the release of GMO's into the environment.
- GMO's have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural wellbeing of people, communities and tangata whenua.
- There is a risk that conditions of consent may be breached by poor management, human error, natural events.
- Once GMO's have been released into the environment they would be difficult if not impossible to eradicate.
- The GE status of a district would likely be lost permanently along with the market advantages with that status.
- Integrated management and a precautionary approach to GMO's under the RMA 1991 is the best available technique for managing the potential adverse effects posed for GMO's within the region.
- It is consistent with the purpose and Part II of the RMA to establish plan provisions e.g. issues, objectives, policies, rules and methods that manage the release, location and management of GMO's where they have the potential to adversely affect the environment and other land use activities.
- Further adverse effects are elaborated on in the submission.

Point Number 546.2

Summary of Decision Requested: Add the requirement to use the Raglan Naturally document as guiding principles for all future decisions on development of Raglan.

Decision Reasons:

- Strongly reflects the input and wishes of the diverse groups that make up the Raglan community.
- The residents of Raglan are empowered through decision making.
- This would help prevent poor decisions that have recently been made.

Point Number 546.3

Summary of Decision Requested: Amend Policy 7.1.4 Matangi and Huntly Heritage Precinct, to include the redesign of new buildings and structures and external alterations or additions in Raglan.

Decision Reasons:

- Buildings should be compatible with the setting, scale, detailing, style, materials, character of the precinct and protect the heritage values.
- New and existing buildings within the town centre and coastal strips need to have a height limit of two-storeys to retain the seaside village character (no higher than the Raglan hotel).
- There needs to be a much stronger focus on the character of the CBD area that retains and enhances Raglans simple, modest architecture rather than commercial development recently approved.
- Sustainability and alternative design should be a requirement for all developers and buildings.

Point Number 546.4

Summary of Decision Requested: Add provisions to ensure adequate provision is being made for social/affordable housing and that a high proportion of housing are not holiday homes and occupied for a small proportion of the year.

Decision Reasons:

- No reasons provided.

Point Number	546.5
Summary of Decision Requested:	Amend the Proposed District Plan to require public notification of all consents, whether it concerns genetically modified organisms or any other matter.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.6
Summary of Decision Requested:	Amend the Proposed District Plan to require notification of residents of any Waikato District Council-approved departure from the rules protecting the district's environment, heritage and special character.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.7
Summary of Decision Requested:	Add the requirement for Council to take into account advice received from the Raglan Community Board in any future growth and development decisions made by council and decision-making be devolved to the Community Board.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.8
Summary of Decision Requested:	Amend the Proposed District Plan rules to have a height limit of two-storeys in the Raglan town centre and coastal strips in Raglan (no higher than the Raglan Hotel.)
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.9
Summary of Decision Requested:	Amend the Proposed District Plan to require all developers and buildings to provide sustainability and alternative designs.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.10
Summary of Decision Requested:	Amend the Proposed District Plan to strengthen the focus on the character of Raglan's CBD, and to retain and enhance Raglan's simple, modest architecture.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.11
Summary of Decision Requested:	Add a network of cycleways and walking routes in the District.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	546.12
Summary of Decision Requested:	Add a resource management framework for the management of genetically modified organisms that is regional specific taking into account environmental, economic and social well-being considerations.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	547	Submitter:	Murray Farrand
On behalf of:	Dargaville Aero Club		
Point Number	547.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark as notified.		
Decision Reasons:	<ul style="list-style-type: none"> Dargaville Aero Club recognises the significance of Te Kowhai Airfield for recreational aircraft and the Aviation community. 		
Point Number	547.2		

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone as notified.

Decision Reasons:

- Dargaville Aero Club recognises the significance of Te Kowhai Airfield for recreational aircraft and the Aviation community.

Submitter Number: 548 **Submitter:** Murray & Cathy McWatt

Organisation: Grander Investments Limited

Point Number 548.1

Summary of Decision Requested: Amend the zoning of the property at 62 Bluff Road, Pokeno, from Rural Zone to Heavy Industrial Zone.

Decision Reasons:

- Site purchased because of the Aggregate Extraction and Processing zoning in the Operative District Plan.
- Resource consent application for clean filling and topsoil/concrete recycling has been lodged in accordance with the level of effects and land modification anticipated in that zone.
- Given the pressure for growth and expansion in the northern part of the District, identifying suitable sites for the disposal of surplus material is a necessary part of enabling that growth.
- Clean filling and recycling activities can generate noise and dust effects and heavy truck movements.
- These activities are better placed in industrial areas where such effects are tolerated due to the lower expected levels of amenity and the absence of sensitive receivers (dwellings, accommodation, and educational facilities etc.).
- The subject site adjoins industrial activities to the north (proposed Heavy Industrial Zone) that contribute to the Pokeno economy and that of the wider region.
- Zoning of the site to Heavy Industrial would potentially allow for some expansion of industrial activities that border site to the north (Hynds, Synlait), and would enhance Pokeno as an 'Industrial Node'.
- Negotiations are currently being undertaken to obtain access to the site through to McDonald Road which is located within the proposed Heavy Industrial Zone and to also exchange land with another land owner in the proposed Heavy Industrial Zone to accommodate future industrial uses in this location.

Point Number 548.2

Summary of Decision Requested: Delete the Significant Natural Area on the property at 62 Bluff Road, Pokeno, identified as a wetland.

AND

Retain the Significant Natural Area on the property at 62 Bluff Road, Pokeno identified as boulder stream (see diagram attached to the submission).

Decision Reasons:

- The wetland does not drain freely into the Mangatawhiri wetlands and the culverts are clogged.
- Ecological assessment provided with submission.
- The boulder stream is relatively unique and merits inclusion as a Significant Natural Area.

Point Number 548.3

Summary of Decision Requested: Amend the definition of "cleanfill" in Chapter 13 Definitions, to be more consistent with WasteMINZ definition.

Decision Reasons:

- Support the inclusion of a definition of cleanfill.
- Amend definition to define what material can be used for cleanfill activities (e.g. re-contouring for roads and building platforms) to minimise risk of contamination of land and water from the use of inappropriate material.
- Definition of cleanfill is inconsistent with the national technical document for waste management in New Zealand - WasteMINZ Technical Guidelines for Disposal to Land.
- Different cleanfill standards can lead to inconsistencies between the Regional and District council acceptance criteria.
- The proposed District Plan definition of cleanfill is more akin to 'Controlled Cleanfill' in the WasteMINZ guidelines.
- See submission for full comparison of the definitions.

Point Number 548.4

Summary of Decision Requested: Amend the definition for "Waste management facility" in Chapter 13 Definitions, as follows:

waste management facilities include: ~~disposal of waste to land (excluding cleanfill), landfills, cleanfills, commercial composting operations, recovery operations, transfer stations, recycling centres and resource recovery centres.~~

Decision Reasons:

- Definition needs to be in accordance with the WasteMINZ Technical Guidelines for Disposal to Land.
- The current definition only refers to Landfill and Cleanfill.
- Amend definition to accept cleanfill for disposal, distinct from where cleanfill is imported for rural production purposes, or to form building sites, roads etc.
- Cleanfill facilities should be provided for in appropriate zones (Rural and Industrial Zones) where the effects can be managed.
- Refer to submission for suggested waste management definition.

Point Number 548.5

Summary of Decision Requested: Retain Policy 4.1.6 (a) Commercial and Industrial Activities, as notified.

Decision Reasons:

- Industrial and commercial activities are enabled by appropriate zoning and provisions.

Point Number 548.6

Summary of Decision Requested: Amend Policy 4.1.6 (b) Commercial and Industrial Activities, as follows:

"Industry is ~~only to be located in~~ enabled in identified Industrial Zones and the industrial strategic growth nodes of..."

Decision Reasons:

- Wording of the policy too restrictive.

- Industry outside these nodes may have a local function or support an already established operation.
- Refer to submission for suggested policy amendment.

Point Number 548.7

Summary of Decision Requested: **Retain** Objective 4.6.1 Economic Growth of Industry, as notified.

Decision Reasons:

- Support zones that provide for industrial uses.

Point Number 548.8

Summary of Decision Requested: **Retain** Policy 4.6.2 Provide Industrial Zones with different functions, except for the amendments sought below

AND

Amend Policy 4.6.2 Provide Industrial Zones with different functions as follows:

(a) Recognise and provide for a variety of industrial activities within two industrial zones that have different functions depending on their purpose and effects as follows:

(i) Industrial Zone

A. Recognise and provide for a range of industrial, waste management and other compatible activities that can operate in close proximity to more sensitive zones due to the nature and relatively limited effects of these activities, including visual impact from buildings and associated parking and loading spaces, outdoor storage, lighting, noise, odour and traffic, subject to appropriate separation distances.

(ii) Heavy Industrial Zone

A. Recognise and provide for a range of industrial, waste management and other compatible activities that generate potentially significant effects on more sensitive zones, including relatively high levels of visual impact from buildings and associated parking and loading spaces, outdoor storage, lighting, noise, odour and heavy traffic, subject to appropriate separation distances.

Decision Reasons:

- Zoning appropriate for waste management and recycling activities.
- Industrial Zoning appropriate for waste management and recycling activities.
- Heavy Industrial Zoning appropriate for waste management and recycling activities.
- Waste management processes and facilities are compatible with outcomes sought for the Industrial Zone.

Point Number 548.9

Summary of Decision Requested: **Retain** Policy 4.6.3 Maintain a sufficient supply of Industrial Land.

Decision Reasons:

- Policy 4.1.6 identifies Pokeno as an "Industrial Strategic Growth node".
- Zoning the subject site Heavy Industrial is in keeping with policy 4.6.3 and the strategic direction of PDP.

Point Number 548.10

Summary of Decision Requested: **Add** a new definition for "Cleanfill facility" in Chapter 13 Definitions, as follows:

A facility where clean fill material is accepted for disposal

Excludes:

- *Storage and use of clean fill material within an earthworks site for the purpose of engineering contours for specific activities;*
- *Placement of clean fill material associated with road construction and road maintenance activities; and*
- *Onsite storage and use of overburden or aggregate by-product that is clean fill material associated with mineral extraction activities.*

Decision Reasons:

Point Number 548.11

Summary of Decision Requested: **Retain** Policy 4.6.5 Recognition of Industrial Activities Outside of Urban Areas, as notified.

Decision Reasons:

- No reason provided.

Point Number 548.12

Summary of Decision Requested: **Amend** Policy 5.3.13(a) Waste Management Activities, as follows:

Provide for the ~~rehabilitation of existing quarry sites, including~~ landfill and cleanfill activities, where siting is appropriate, environmental effects are managed and there is environmental gain...

Decision Reasons:

- There is a surplus of fill material making it difficult to dispose of waste.
- The Proposed Plan does not recognise disposal of surplus of material as an essential part of the construction process or need to provide within the Rural Zone.
- Seeks to revise Policy to provide for Landfills Classes 1-5 in the Rural Zone to recognise the economic and social wellbeing of the District.

Point Number 548.13

Summary of Decision Requested: **Add** P7 Waste Management Facility to Rule 21.1.1 Permitted activities and one new Activity Specific Condition as follows:

Excludes disposal of waste to land.

Decision Reasons:

- Industrial activities should be incentivised to locate in Industrial Zones by way of a permitted activity status.

- Waste management facilities that do not dispose of waste to land (i.e. landfill, managed fill, cleanfill) should be permitted in the Heavy Industrial Zone.
- Recycling of materials is no different to the processing of materials.
- The effects of waste management processes and facilities are within the anticipated outcomes for the Heavy Industrial Zone and should be provided for in that zone.

Point Number 548.14

Summary of Decision Requested: Delete Rule 21.1.2 D2 Cleanfill as a Discretionary Activity;
AND
Add a new Restricted Discretionary Activity for Cleanfill in Rule 21.1 Industrial Zone Heavy;
AND
Add the following matters of discretion:

- Waste acceptance
- Design and construction
- Site operation procedures
- Response to natural hazards
- Management of non-complying material and monitoring.
- Monitoring

Decision Reasons:

- Activities within the Waste Management Facility definition are appropriate within the Heavy Industrial Zone without Resource Consent.
- Cleanfill does not generate objectionable odour, contamination or high dust emissions unlike other activities that involve disposal of material to land.
- Activity status for Cleanfill should be Restricted Discretionary in the Heavy Industrial Zone.
- With matters of discretion and assessment criteria restricted to waste acceptance, design and construction, site operation procedures, water quality, response to natural hazards, management of non-complying material and monitoring.

Point Number 548.15

Summary of Decision Requested: Delete Rule 22.1.5 D4 Waste Management facilities as a Discretionary Activity;
AND
Add a new Restricted Discretionary activity for Cleanfill outside of an Outstanding Natural Landscape; an Outstanding Natural Feature, an Outstanding Natural Character Area; and a High Natural Character Area in Rule 22.1.5 Discretionary Activities;
AND
Add the following matters of discretion:

- Waste acceptance
- Design and construction
- Site operation procedures
- Response to natural hazards
- Management of non-complying material
- Landscape
- Dust
- Noise
- Biodiversity
- Water quality
- Traffic effects
- Monitoring

Decision Reasons:

- Cleanfill facility should be a Restricted Discretionary Activity.
- Refer to submission for full suggestion.
- Activities within the Waste Management Facility definition are appropriate within the Rural Zone without Resource Consent.
- Cleanfill does not generate objectionable odour, contamination or high dust emissions unlike other activities that involve disposal of material to land.
- Activity status for Cleanfill should be Restricted Discretionary in the Rural Zone.
- With matters of discretion and assessment criteria restricted to waste acceptance, design and construction, site operation procedures, water quality, response to natural hazards, management of non-complying material and monitoring.
- See full submission for Assessment of Ecological Effects report for 62 Bluff Road, Pokeno.

Submitter Number: 549 **Submitter:** Shanon Eyre

On behalf of: Matamata Aero Club

Point Number 549.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Restricting housing heights and locations in the Te Kowhai Aerodrome area will help maintain the safety of both the pilots and residents.

Point Number 549.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Restricting housing heights and locations in the Te Kowhai Aerodrome area will help maintain the safety of both the pilots and residents.

Submitter Number: 551 **Submitter:** Dinah Robcke

Point Number 551.1

Summary of Decision Requested: Amend the zoning of approximately 16ha on the property at 859 Waingaro Road, Glen Massey from Rural Zone to Village Zone or Country Living Zone (as it was in the Operative District Plan);

AND

Amend the Proposed District Plan to make consequential changes to give effect to the zone change.

Decision Reasons:

- Further development in and around Glen Massey will enable better use and improvements to be made to existing infrastructure.
- Operative District Plan zoning provides for logical extension of the Glen Massey village and community.
- Development will increase stock and diversity of dwellings/lifestyle choices.
- The proposed net site area in the Country Living Zone is 5000m², which makes development in Glen Massey marginal/uneconomic.
- Retaining a larger area as Country Living Zone enables innovative development designs to be explored with the potential for steeper areas to be set aside within the overall development.

Point Number 551.2

Summary of Decision Requested: Amend Rule 23.4.2(a)(i) General Subdivision requiring a 5000m² minimum net site area to enable greater flexibility in subdivision development standards as they relate to the Country Living Zone in Glen Massey e.g. minimum net site area of 2500m² with an average of 5000m²;

OR

Amend the zoning of the land on 859 and 889 Waingaro Road, Glen Massey that was zoned Country Living Zone in the Operative District Plan to Village Zone;

AND

Amend the Proposed District Plan to make consequential changes.

Decision Reasons:

- Introduce greater flexibility in subdivision development standards in Glen Massey.
- 5000m² development in the Country Living Zone is marginal/uneconomic.
- 2500m² lots are able to be serviced onsite.
- Careful design will ensure character and amenity values can be maintained and enhanced.
- Land in and around Glen Massey is poor quality in terms of productive capacity.
- 5000m² net site area is inappropriate for available land resource and creates pressure for 'infill' subdivision.
- Opportunity to develop subdivision standards for the Country Living Zone to enable innovative development designs to be explored (e.g. averaging, reduced minimum lot sizes).

Point Number 551.3

Summary of Decision Requested: Amend Rule 23.4.8(a)(i) Subdivision – Building Platform requiring 1000m² minimum building platform sizes to enable greater flexibility in subdivision development standards e.g. building platform of 500m² as they relate to the Country Living Zone in Glen Massey.

Decision Reasons:

- Careful design will ensure character and amenity values can be maintained and enhanced.

Point Number 551.4

Summary of Decision Requested: Amend Rule 23.4.8(a)(ii) Subdivision – Building Platform requiring average gradients to be no steeper than 1:8, to enable greater flexibility in building development standards as they relate to the Country Living Zone in Glen Massey;

OR

Amend the zoning of the land on 859 and 889 Waingaro Road, Glen Massey that was previously zoned Country Living Zone in the Operative District Plan to Village Zone;

AND

Amend the Proposed District Plan to make consequential changes.

Decision Reasons:

- Opportunity to develop subdivision standards for the Country Living Zone to enable innovative development designs to be explored (e.g. averaging, reduced minimum lot sizes).
- Potential for steeper areas to be set aside from development.

Submitter Number: 552

Submitter: Stephanie Henderson

Point Number 552.1

Summary of Decision Requested: Add a rule to Chapter 22 Rural Zone to ensure wetlands do not become a dam, stopping the flow of water and flooding neighbouring properties.

Decision Reasons:

- There is no rule to maintain effects from wetlands on neighbouring properties.
- Nearby wetland floods submitters property as the natural flow of water is hampered.

Submitter Number: 553

Submitter: Malibu Hamilton

Point Number 553.1

Summary of Decision Requested: Add strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms. The same or similar to those in the Far North District Plan, Whangarei District Plan and the Auckland Unitary Plan.

Decision Reasons:

- Submitter has concerns about the potential risks by the release of GMOs into the environment.
- GMOs have the potential to adversely affect ecological, economic and resource management values, and the social and cultural wellbeing of people, communities and Tangata Whenua.
- The release of GMOs has a potential to cause significant adverse effects on the environment, which could include:
 - (a) biological or ecosystem harm;
 - (b) harm to Tangata whenua cultural values such as mauri and tikanga;

- (c) harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing; and
- (d) harm from GMO contamination to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependant on an uncontaminated environmental brand. Adverse effects to these land uses could include loss of organic and GMO-free certification;
- (i) reputational damage;
- (ii) loss of markets and premiums paid for GMO free produce;
- (iii) loss of livelihood; and
- (iv) The Waikato has three major milk suppliers. Tātua, Fonterra and Miraka Milks have a GMO Free requirement for their milk products and rely on shareholders farmers milk supply. The ability to control the grass genetic pollution is a major concern and it is important to have a precautionary approach to any escape and release of GM until the negative effects are known in the region. Additionally there are also several other organic producers in the Waikato.

- No matter how carefully conditions of consent for GMOs are crafted, there inevitably remains a risk, even if small, that conditions may be breached by poor management, human error, natural events such as severe storms and even the sabotage of projects.
- Once GMOs have been release into the environment, they would be very difficult if not impossible to eradicate. In the case of a food product, the "GE free" status of a district would likely be lost permanently along with the market advantages of that status.
- Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs within the region.
- It is consistent with the sustainable management purpose and Part II of the RMA to establish District Plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment and other land use activities.

Point Number 553.2

Summary of Decision Requested: **Amend** Objective 6.3.1(a) Renewable energy, as follows:
Energy efficient design and an increase in renewable electricity generation activities are ~~promoted~~ established.

Decision Reasons:

- Promoting only is in conflict with other policies that are more proactive.

Point Number 553.3

Summary of Decision Requested: **Amend** Policy 4.1.18(a)(iii) Raglan, as follows:
Rangitahi is the only area that provides for the medium term future growth and is developed in a manner that connects to the existing town and maintains and enhances the natural environment.

Decision Reasons:

- The policy is restrictive for other areas to be developed in residential zones.
- Several infill sections available along with Lorezen Bay Structure Plan area will contribute to medium term growth.

Point Number 553.4

Summary of Decision Requested: **Amend** the home stay provisions to consider wastewater effects on the environment.

Decision Reasons:

- A more targeted approach is needed to ascertain whether areas that do have septic tank systems can cope with extra people onsite.
- Many areas with septic tanks such as Whale Bay are under pressure from overcrowding.
- Adverse effects on the environment, including the awa and the moana.

Point Number 553.5

Summary of Decision Requested: **Amend** Policy 6.4.7(a)(i) Stormwater, as follows:
Adopts, ~~where appropriate~~, a best-practice low impact design approach to the management of stormwater

Decision Reasons:

- The use of "where appropriate" is not required and is not defined.

Point Number 553.6

Summary of Decision Requested: **Add** a new clause (iv) to Policy 3.3.2 Recognising values and qualities, as follows:

...~~(iv)~~ The Whaanga Coastline

Decision Reasons:

- Nationally significant surf breaks form a unique set of coastal reserve area that are comprised of volcanic boulders approximately 6m in depth.
- The characteristics on the Whaanga coast create some of the best surf breaks in Aotearoa.
- The Whaanga Coast surf breaks are recognised in the New Zealand Coastal Policy Statement 2012 as being Nationally Significant along with being world renowned.
- NZCPS Policy 13(2)(c) states: natural landforms such as headlands, peninsulas, cliffs, dunes, wetlands, reefs, freshwater springs and surf breaks and Policy 15 seeks protection of those features and landscapes.
- Those natural features form part of the Coastal Marine Area that District Council has jurisdiction of to mean high water mark.

Point Number 553.7

Summary of Decision Requested: **Add** a new clause (iv) to Policy 4.5.38(a)(iv) Artificial outdoor lighting, as follows:
(iv) Artificial outdoor lighting is installed and operated so that light spill does not contribute to pollution of the night sky,
 or similar wording.

Decision Reasons:

- Light pollution can cause adverse impacts to wildlife and migratory birds and disrupt their normal patterns of behaviour.
- Villages and towns contribute to wider adverse impacts.
- All exterior lighting should have shields to force lighting towards the ground.
- There are no policies dealing with adverse effects of night sky pollution.
- LED lights need to be coated with phosphor that converts the blue light to yellow to avoid adverse effects of blue light.

Point Number	553.8
Summary of Decision Requested:	Retain Rule 18.3.1.1 Building height, restricting the maximum building height limit to 10m in the Whaingaroa Township.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the 10m max height limit. • New development should be carefully designed to fit the existing main street height, scale and form and align with the corresponding immediate surroundings. • Maintaining the existing character of the historic buildings is crucial.
Point Number	553.9
Summary of Decision Requested:	Add a resource management framework for the management of genetically modified organisms that is regional-specific, taking into account the environmental, economic and social well-being considerations.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	553.10
Summary of Decision Requested:	Amend the Proposed District Plan to require public notification of all consents, whether the rules are on genetically modified organisms, or any other matter.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	553.11
Summary of Decision Requested:	Retain Policy 2.16.1 Whaanga Coast Specific Area.
Decision Reasons:	<ul style="list-style-type: none"> • The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises tangata whenua needs for papakāinga, marae. • The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions. • The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region. • RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata Whenua.
Point Number	553.12
Summary of Decision Requested:	Retain Policy 2.16.2 Aahuatanga Motuhake (special features).
Decision Reasons:	<ul style="list-style-type: none"> • The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae. • The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions. • The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region. • RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.
Point Number	553.13
Summary of Decision Requested:	Retain Policy 3.2.6(b) Providing for vegetation clearance.
Decision Reasons:	<ul style="list-style-type: none"> • The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae. • The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions. • The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region. • RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.
Point Number	553.14
Summary of Decision Requested:	Retain Rule 16.2.4.2 Earthworks – Maaori Sites and Maaori Areas of Significance.
Decision Reasons:	<ul style="list-style-type: none"> • The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae. • The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions. • The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region. • RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.
Point Number	553.15
Summary of Decision Requested:	Retain Rule 17.1.2 P16, P17 and P18 Permitted Activities.
Decision Reasons:	<ul style="list-style-type: none"> • The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae. • The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions. • The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region. • RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.16

Summary of Decision Requested: Retain Rule 17.2.5.2 Earthworks – Maaori Sites and Maaori Areas of Significance.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.17

Summary of Decision Requested: Retain Rule 17.2.9 P2, P4, P5, and P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.18

Summary of Decision Requested: Retain Rule 18.2.4.2 Earthworks – Maaori Sites and Maaori Areas of Significance.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.19

Summary of Decision Requested: Retain Rule 18.4.5 Subdivision – Title boundaries – Maaori Sites and Areas of significance to Maaori.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.20

Summary of Decision Requested: Retain Rule 20.2.9 P2, P4, P5, and P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.21

Summary of Decision Requested: Retain Rule 22.1.2 P1, P2, P3, and P4 Permitted Activities.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.22

Summary of Decision Requested: Retain Rule 22.2.3.2 Earthworks – Maaori Sites and Maaori Areas of Significance.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.23

Summary of Decision Requested: Retain the following rules in Rule 22.7 Specific Area – Whaanga Coast Development Areas:

- 22.7.1.1 Permitted Activities
- 22.7.1.2 Discretionary Activities (1)
- 22.7.1.3 Earthworks within a Development Area
- 22.7.1.4 Building height within a Development Area
- **22.7.1.5 Accessory building within a Development Area**
- **22.7.1.6 Building setback within a Development Area**
- **22.7.1.7 Papakainga Building – Gross Floor Area**
- **22.7.1.8 Dwelling – Gross Floor Area**

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.24

Summary of Decision Requested: Retain Rule 22.2.7 P4, P5 and P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.25

Summary of Decision Requested: Retain Rule 22.2.8 P1 (vi), P1 (vii), P2, and P3 Indigenous vegetation clearance outside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.26

Summary of Decision Requested: Retain Rule 22.4.1.3 Subdivision of Maaori Freehold Land.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.27

Summary of Decision Requested: Retain Rule 22.8.2 P1, P2, P3, and P4 Permitted Activities.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.28

Summary of Decision Requested: Retain Rule 23.2.8 P3, P4, P5, and P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.29

Summary of Decision Requested: Retain Rule 23.2.9 P1 (a)(vi), P1 (a)(vii), P2, and P3 Indigenous vegetation clearance outside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.

- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.30

Summary of Decision Requested: Retain Rule 24.1.1 Permitted Activities.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.31

Summary of Decision Requested: Retain Rule 24.2.4.2 Earthworks for Maaori Sites and Maaori areas of Significance.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.32

Summary of Decision Requested: Retain Rule 24.2.8 P1 (a)(v), P4, P5, and P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.33

Summary of Decision Requested: Retain Rule 28.2.4.2 Earthworks – Maaori Sites and Maaori Areas of Significance.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.34

Summary of Decision Requested: Retain Rule 28.2.8 P4, P5, and P6 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata Whenua.

Point Number 553.35

Summary of Decision Requested: Retain Policy 3.3.4 The relationships of Maaori with natural resources and land.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.36

Summary of Decision Requested: Retain Policy 5.3.18 Specific area – Whanga Coast Development Areas.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.37

Summary of Decision Requested: Retain Policy 5.3.7 (a)(v) Reverse sensitivity effects.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.38

Summary of Decision Requested: Retain Rule 16.1.2 P2, P4, and P6 Permitted Activities.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Point Number 553.39

Summary of Decision Requested: Retain Rule 16.2.8 P2, P4 and P5 Indigenous vegetation clearance inside a Significant Natural Area.

Decision Reasons:

- The New Zealand Coastal Policy Statement 2010 in Policy (d) recognises Tangata whenua needs for papakāinga, marae.
- The Waikato Regional Policy Statement, 2016 also has Policy 6.4 Marae and papakāinga provisions.
- The Future Proof Strategy Planning for Growth November 2017 has Priority 15 that seeks developments of papakāinga housing that meets the needs and aspirations in the sub-region.
- RMA sections 6(e), 7(a), and 8 set out legal obligations when managing the natural and physical resources of the region to Tangata whenua.

Submitter Number: 554 **Submitter:** Gaylene Himona

Point Number 554.1

Summary of Decision Requested: Add a specific zone called Kimihia Lakes Recreation and Events Zone, with a new Chapter 9.5 containing objectives and policies and a new Chapter 29 containing rules, and new definitions in Chapter 13 Definitions (as outlined in the submission from Louise Feathers Planning on behalf of Allen Fabrics Limited).

AND

Amend the zoning of the 183ha site (comprising CFR 805391, CFR SA01D/80D, CFR SA 61B/799, CFR SA50A/762, CFR 195501, CFR SA18B/1138, CFR SA 30A/356, SA40D/985, CFR SA251/176, SA26C/345, SA51/131) on East Mine Road, Huntly from Rural Zone to Kimihia Lakes Recreation and Events Zone and Residential zone (as outlined in the submission from Louise Feathers Planning on behalf of Allen Fabrics Limited).

Decision Reasons:

- It will be beneficial to the community and Huntly.

Submitter Number: 555 **Submitter:** Colleen Earby

Point Number 555.1

Summary of Decision Requested: Amend the zoning of the 183ha site (comprising CFR 805391, CFR SA50A/762, CFR 195501, CFR SA 61B/799, CFR SA18B/1138, CFR SA 30A/356, SA40D/985, CFR SA251/176, SA26C/345, SA51/131) on East Mine Road, Huntly from the Rural Zone to a multi-purpose recreation and events zone alongside a Residential Zone.

Decision Reasons:

- Educational outcomes for youth.
- Significant employment opportunities.
- Improved recreational living and lifestyle for residents through outdoor activities, e.g. watersports.
- Great opportunity for Huntly to become destination for tourists and be known as a lake district.
- Fantastic opportunity for local Huntly family, who have empathy for Huntly, to make their vision happen.
- Huntly benefits.
- Rather consent be approved now and go to Huntly family than to a city developer in future.
- Project has ability to transform Huntly.
- Huntly needs growth and new residential areas will bring that.
- Recreational lake will add to existing sport facilities i.e. stockcars and gun club.
- Any residential consent change should not compromise the existing sports activities currently in practice for now and for the future.

Submitter Number: 556 **Submitter:** Alan Kosoof

Point Number 556.1

Summary of Decision Requested: Amend the zoning of the 183ha site (comprising CFR 805391, CFR SA50A/762, CFR 195501, CFR SA 61B/799, CFR SA18B/1138, CFR SA 30A/356, SA40D/985, CFR SA251/176, SA26C/345, SA51/131) on East Mine Road, Huntly from the Rural Zone to a multi-purpose recreation and events zone alongside a Residential Zone.

Decision Reasons:

- Develop a recreation and events zone alongside Residential Zoning.
- Educational outcomes for youth.
- Significant employment opportunities.
- Improved recreational living and lifestyle for residents through outdoor activities, water sports.
- Great opportunity for Huntly to become destination for tourists and know as a lake district.
- Fantastic opportunity for local Huntly family, who have empathy for Huntly, to make their vision happen.
- Huntly benefits.
- Rather consent be approved now and go to Huntly family than to a city developer in future.
- Project has ability to transform Huntly.
- Huntly needs growth and new residential areas will bring that.
- Recreational lake will add to existing sport facilities i.e. stockcars & gun club.
- Any residential consent change should not compromise the existing sports activities currently in practice for now and for the future.

Submitter Number:

557

Submitter:

Bronwyn Kosoof

Point Number

557.1

Summary of Decision Requested:

Amend the zoning of the 183ha site (comprising CFR 805391, CFR SA50A/762, CFR 195501, CFR SA 61B/799, CFR SA18B/I 138, CFR SA 30A/356, SA40D/985, CFR SA251/176, SA26C/345, SA51/131) on East Mine Road, Huntly from the Rural Zone to a multi-purpose recreation and events zone alongside a Residential Zone.

Decision Reasons:

- Educational outcomes for youth.
- Significant employment opportunities.
- Improved recreational living and lifestyle for residents through outdoor activities, water sports.
- Great opportunity for Huntly to become destination for tourists and know as a lake district.
- Fantastic opportunity for local Huntly family, who have empathy for Huntly, to make their vision happen.
- Huntly benefits.
- Rather consent be approved now and go to Huntly family than to a city developer in future.
- Project has ability to transform Huntly.
- Huntly needs growth and new residential areas will bring that.
- Recreational lake will add to existing sport facilities i.e. stockcars & gun club.
- Any residential consent change should not compromise the existing sports activities currently in practice for now and for the future.

Submitter Number:

558

Submitter:

Linda Rowe

Point Number

558.1

Summary of Decision Requested:

Amend the zoning of 233 Wilton Collieries Road, Glen Massey from Rural to Country Living Zone to join up with the adjacent site which is zoned Country Living Zone in the Operative District Plan.

Decision Reasons:

- Opportunity to have country living available on farm land.
- Better off for housing.
- Not sustainable for commercial farming.

Submitter Number:

559

Submitter:

Sherry Reynolds

On behalf of:

Heritage New Zealand Lower Northern Office

Point Number

559.1

Summary of Decision Requested:

Amend plan to provide for objectives policies and rules related to a topic e.g. Tangata Whenua or Historic Heritage values to be located within a single chapter.

Decision Reasons:

- This format allows the reader to view the framework and cascade of reasoning and related actions for a topic.
- This type of format has been advocated as part of the proposed National Planning Standards.

Point Number

559.2

Summary of Decision Requested:

Retain the format of a separate chapter relating to Tangata whenua values.

AND

Amend the format of the Proposed District Plan to include the related rules and matters of control and discretion that give effect to the objectives and policies into the Tangata whenua chapter.

OR

Amend the Proposed District Plan to include cross referencing to the rule numbers within the other chapters of the Plan that give effect to the objective and policies.

AND

Amend the Proposed District Plan to make any other consequential amendments as required.

Decision Reasons:

- Submitter seeks that plan objectives, policies and rules related to a topic, for example Tangata Whenua values or Historic Heritage values are located within a single chapter.
- This format allows the reader to view the framework and cascade of reasoning and related actions for a topic.
- This type of format has been advocated as part of the proposed National Planning Standards.
- The plan would be easier to follow if the rules that give effect to these issues, objectives and policies were included within the same chapter, much as they are shown in the objective, policies and rules cascade within the s32 discussion documents.
- In the alternative there needs to be a system to link the Objectives and Policies with the rules.

Point Number 559.3

Summary of Decision Requested: **Retain** the format of a separate chapter relating to historic heritage.

AND

Amend the format of the Proposed District Plan to include the related rules and matters of control and discretion that give effect to the objectives and policies to the chapter.

OR

Amend the Proposed District Plan to include cross referencing to the rule numbers within the other chapters of the Plan that give effect to the objective and policies.

AND

Add any other consequential amendments as required.

Decision Reasons:

- Submitter seeks that plan objectives, policies and rules related to a topic, for example Tangata whenua values or Historic Heritage values are located within a single chapter.
- This format allows the reader to view the framework and cascade of reasoning and related actions for a topic.
- This type of format has been advocated as part of the proposed National Planning Standards.
- Submitters supports that the plan retains the Historic Heritage Chapter, as the Plan is required to recognise and provide for the Resource Management Act 1991, Part 2 – s6 Matters of National Importance, in particular, s6(f) “the protection of historic heritage from inappropriate subdivision, use and development”
- The plan would be easier to follow if the rules that give effect to these issues, objectives and policies were included within the same chapter, much as they are shown in the objective, policies and rules cascade within the s32 discussion documents.
- In the alternative there needs to be a system to link the Objectives and Policies with the rules.

Point Number 559.4

Summary of Decision Requested: **Amend** the Proposed District Plan to include incentives and bonus provisions to encourage the retention of heritage, as follows:

- Permitted activity status for repairs and maintenance, and
- Appropriate activity status for adaptive reuse and earthquake strengthening, and
- The non-supply of car parking spaces at the time of the adaptive reuse, and
- Bonus provisions for the permanent protection of heritage sites.

Decision Reasons:

- The plan is required to recognise and provide for matters of national importance, in particular 6(f) “the protection of historic heritage from inappropriate subdivision, use and development”
- The submitter considers that there are many ways that a plan can support heritage, including the use of positive regulatory (incentive) measures.
- These provisions not only encourage the sustainable management of heritage, they are also an important way to gain support from owners and the public as sometimes provisions such as carparking requirements can be a disincentive for the reuse of heritage buildings, particularly in urban areas. Relaxing these requirements is a cost effective way for councils to incentivise the preservation of heritage buildings.
- The submitter notes that while the plan does provide a permitted activity status for some repairs and maintenance, there are no other incentive rules.

Point Number 559.5

Summary of Decision Requested: **Amend** Chapter 12 How to use and interpret the rules, to clearly state that the design policies, rules and various design guidelines are subservient to the historic heritage rules and matters of assessment, which will ensure the maintaining of heritage values.

Decision Reasons:

- Submitter has concerns regarding the relationship between heritage items identified in Schedule 30.1 and the vast range of design and heritage guidance in the Plan, which appear at various locations within the Plan.
- The plan does not state which provisions have priority if there is a conflict between design rules and heritage rules for development and works in relation to a heritage item.
- While it is appreciated that the design guidance seeks a cohesive look for a township or village, this should not be at the expense of heritage values. For example the requirement to provide a verandah at the time of development when such works could compromise the values of a heritage building.
- Amendments need to clarify the relationship of these measures, and to ensure the retention of heritage values at the time of development.

Point Number 559.6

Summary of Decision Requested: **Amend** Chapter 1 Introduction, section 1.4 issues, to include a discussion relating to the Historic Heritage issues for the Waikato District and to use the Historic heritage issue contained within the S32 document as a basis for that discussion.

Decision Reasons:

- The submitter is concerned that the resource management “issue” found in the s32 document (page 16) “Activities that damage or destroy historic heritage lead to the loss of tangible connections to the communities social, cultural and economic past” is not discussed within section 1.4 Issues for the Waikato District.
- Other issues have been discussed and a case made for the resolution of the issue.
- The two small references made to heritage as part of discussions related to other issues within section 1.4 of this Chapter are not a sufficient base on which to establish the policy and rule frameworks that exists in the plan.
- It is important that this section of the plan identify the historic heritage issue that is an existing or potential problem that must be resolved to promote the purpose of the Resource Management Act.
- A discussion around the historic heritage issue within this section would also assist the reader in understanding the cascade of resource management provisions related to heritage.

Point Number 559.7

Summary of Decision Requested: **Retain** Strategic Objective 2.11 Tautoko te Whakaturanga.

Decision Reasons:

- Supports Strategic Objective 2.11 Tautoko te Whakaturanga as this objective gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.8

Summary of Decision Requested: Retain Strategic Objective 2.12 Whakapapa (connection to nature).

Decision Reasons:

- Supports Strategic Objective 2.12 Strategic Objective Whakapapa (connection to nature) as this objective provides for the relationship of traditional resources on all lands not just Maaori owned land.
- It also gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.9

Summary of Decision Requested: Retain Policy 2.12.1(a) Whanaungatanga (relationship to nature).

Decision Reasons:

- Supports Policy 2.12.1 Whanaungatanga (relationship to nature) as it gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.10

Summary of Decision Requested: Retain Objective 2.13 Whenuatanga (land management).

Decision Reasons:

- Supports Objective 2.13 Whenuatanga (land management) as it gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.11

Summary of Decision Requested: Retain Policy 2.13.1(a), (b) and (c) Tangata Whenuatanga (utilisation by landowners).

Decision Reasons:

- Supports Policy 2.13.1(a), (b) and (c) Tangata Whenuatanga (utilisation by landowners) as it gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.12

Summary of Decision Requested: Retain Objective 2.14 Kaitiaki (steward/guardian).

Decision Reasons:

- Supports Objective 2.14 Kaitiaki (steward/guardian) as it gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.13

Summary of Decision Requested: Retain Policy 2.14.1 Kaitiakitanga (stewardship/guardianship).

Decision Reasons:

- Supports Policy 2.14.1 Kaitiakitanga (stewardship/guardianship) as it gives effect to Part 2 matters, in particular s7(a).

Point Number 559.14

Summary of Decision Requested: Retain Objective 2.15 Waikatotanga (way of life)

Decision Reasons:

- Supports Objective 2.15 Waikatotanga (way of life) as it gives effect to Part 2 s6 Matters of national importance, in particular s6(e) and s6(f).

Point Number 559.15

Summary of Decision Requested: Retain Policy 2.15.1 Ngaa taonga tuku iho (Maaori sites and areas of significance), except for the amendments sought below.

AND

Amend Policy 2.15.1 Ngaa taonga tuku iho (Maaori sites and areas of significance) as follows:

Maaori sites and areas of significance and waahi tapu

(a) Ensure subdivision, use and development does not compromise the cultural and spiritual significance of areas, including waahi tapu, urupaa, maunga and other landforms, mahinga kai, and indigenous flora and fauna.

(b) Area and sites of significance to Maaori including waahi tapu sites and waahi tapu areas are protected from adverse effects of development or activities on those sites, including inappropriate modification.

(c) Avoid the destruction areas and sites of significance to Maaori and Waahi Tapu Sites and Waahi Tapu Areas.

Decision Reasons:

- Submitter supports in parts Policy 2.15.1 as the submitter is concerned that these policies do not explicitly address the matters of modification or destruction.
- Inclusion of these matters within this policy would contribute to a policy and rules cascade that assesses these matters.

- Currently these activities are not addressed in the Plan rules and amendment is being sought to include these matters into the rules.

Point Number 559.16

Summary of Decision Requested: Retain Objective 2.16 Tikanga aa-iwi o te takiwaa o Waikato.

Decision Reasons:

- Gives effect to Part 2, s6 Matters of National Importance, in particular s6(e) and s6(f).

Point Number 559.17

Summary of Decision Requested: Retain Policy 2.16.1 Whaanga Coast Specific Area.

Decision Reasons:

- Gives effect to Part 2, s6 Matters of National Importance, in particular s6(e) and s6(f).

Point Number 559.18

Summary of Decision Requested: Retain Policy 2.16.2 Aahuatanga Motuhake (special features).

Decision Reasons:

- Gives effect to Part 2, s6 Matters of National Importance, in particular s6(e) and s6(f).

Point Number 559.19

Summary of Decision Requested: Retain Rule 16.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 16.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks, ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.20

Summary of Decision Requested: Retain Rule 17.2.5.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 17.2.5.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks, ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

AND

Amend Rule 17.2.5.2 RD1 Earthworks - Maaori Sites and Maaori Areas of Significance to be consistent with the equivalent rule in other zone chapters.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.21

Summary of Decision Requested: Retain Rule 18.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 18.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks, ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.22

Summary of Decision Requested: **Retain** Rule 22.2.3.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 22.2.3.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.23

Summary of Decision Requested: **Retain** Rule 23.2.3.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 23.2.3.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.24

Summary of Decision Requested: **Retain** Rule 24.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 24.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

AND

Amend Rule 24.2.4.2 RD1 Earthworks - Maaori Sites of Significance to be consistent with the equivalent rule in other zone chapters.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.25

Summary of Decision Requested: **Retain** Rule 25.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 25.2.4.2 RD1 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.3 (Maaori sites of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.

Point Number 559.26

Summary of Decision Requested: **Retain** Rule 16.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 16.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori Area of Significance as identified in Schedule 30.4 (Maaori Areas of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number

559.27

Summary of Decision Requested:

Retain Rule 17.2.5.2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 17.2.5.2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori site of Significance as identified in Schedule 30.4 (Maaori Areas of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

AND

Amend Rule 17.2.5.2 RD1 Earthworks - Maaori Sites and Maaori Areas of Significance to be consistent with the equivalent rule in other zone chapters.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number

559.28

Summary of Decision Requested:

Retain Rule 18.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 18.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori Area of Significance as identified in Schedule 30.4 (Maaori Area of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number

559.29

Summary of Decision Requested:

Retain Rule 22.2.3.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 22.2.3.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks ancillary earthworks and rural ancillary earthworks within a Maaori Area of Significance as identified in Schedule 30.4 (Maaori Areas of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number 559.30

Summary of Decision Requested: **Retain** Rule 23.2.3.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 23.2.3.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks, ancillary earthworks and rural ancillary earthworks within a Maaori area of Significance as identified in Schedule 30.4 (Maaori area of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number 559.31

Summary of Decision Requested: **Retain** Rule 24.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 24.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks, ancillary earthworks and rural ancillary earthworks within a Maaori area of Significance as identified in Schedule 30.4 (Maaori area of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

AND

Amend Rule 24.2.4.2 Earthworks – Maaori Sites and Maaori Areas of Significance to be consistent with the equivalent rule in other zone chapters.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number 559.32

Summary of Decision Requested: **Retain** Rule 25.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance, except for the amendments sought below.

AND

Amend Rule 25.2.4.2 RD2 Earthworks – Maaori Sites and Maaori Areas of Significance as follows:

(a) Earthworks, ancillary earthworks and rural ancillary earthworks within a Maaori area of Significance as identified in Schedule 30.4 (Maaori area of Significance) and shown on the planning maps.

(b) Council's discretion is restricted to the following matters:

(i) Nature, design, extent and location of activity in relation to the site;

(ii) Effects of the proposal on heritage and cultural values

(iii) The purpose and necessity for the works and any alternatives considered.

Decision Reasons:

- Submitter considers that the matters of discretion are not of sufficient breadth to understand the nature of the impacts on the Maaori Areas of significance of any proposed earthworks.
- The submitter is also concerned that works covered under the definition of ancillary earthworks and rural ancillary earthworks could occur as a permitted activity within these sites.
- Considers that these other types of earthworks should also be assessed for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number 559.33

Summary of Decision Requested: **Add** a new earthworks rule to each zone chapter as follows:

DJ- Earthworks, new ancillary earthworks and new rural ancillary earthworks within a waahi tapu as identified in Schedule 30.6 (Significant Waahi Tapu and Waahi Tapu area) and shown on the planning maps.

AND

Provide recognition of the full extent of Waahi tapu Te Aukati ki Mangatawhiri, Meremere, Te Teo Teo and Rangiriri (as this relates to the schedules). (Refer to subsequent submission points).

Decision Reasons:

- Submitter seeks a revised rule and mapping framework to provide elevated recognition in the Plan of four well known wahi tapu site/areas, being Te Aukati ki Mangatawhiri, Meremere, Te Teo Teo and Rangiriri.

- This would assist the Plan to give improved effect to strategic objective 2.12(a).
- These wahi tapu sites/areas are already recognised within the Plan in part through the Maaori sites and areas of significance mapping and rule framework.
- The submitter considers that it is important within the Plan that there are examples of significant Maaori sites or areas, whose integrity is protected through full recognition in the Plan maps and an associated rule framework.
- As the wahi tapu sites/areas are of local, regional and national importance, it is appropriate to ensure that the entire site is mapped and protected to retain the footprint of the wahi tapu/wahi tapu area as the physical marker, which enables the continued understanding and identification of each site and its history.
- The submitter seeks that these four wahi tapu are recognised to the same extent as the Heritage New Zealand wahi tapu listing within the Plan maps, and the rule framework related to earthworks, and destruction-proposed through a HNZPT point of submission, is applied to the same extent.
- It may be over time that additional wahi tapu are included onto this schedule and recognised in this enhanced manner.
- The submitter also seeks that new works covered under the definition of ancillary earthworks, and rural ancillary earthworks are assessed within these sites for their suitability to occur within these sites and the effect that they will have on heritage values.

Point Number 559.34

Summary of Decision Requested: Add a new non-complying rule NCI within each zone chapter to regarding the destruction of Maaori sites and areas of significance and wahi tapu sites and scheduled areas (as sought through the submission) as follows:

NCI – the destruction of a site or area of significance to maaori, or a Waahi Tapu or Waahi Tapu area.

AND

Amend the plan to provide for any other consequential amendments as required.

Decision Reasons:

- The submitter is concerned that there is no rule relating to the destruction of Maaori sites or area of significance.
- Considers that in the absence of this rule, results in the Plan being unable to give effect to Strategic Objective 2.12(a) and the requirements of Part 2, s6 Matters of National Importance, in particular s6(e) and s6(f).
- The submitter seeks that the plan is amended to include such a rule and that the proposed rule also covers the new proposed schedule of significant wahi tapu sites and areas.

Point Number 559.35

Summary of Decision Requested: Retain Rule 16.1.2 P2 - A Marae complex or Papakainga Housing development on Maaori Freehold land or on Maaori Customary Land.

Decision Reasons:

- The submitter supports these permitted activities as this gives effect to s6(e), s6(f) and 6(g) of the Resource Management Act.

Point Number 559.36

Summary of Decision Requested: Retain Rule 17.1.2 P16 - A Marae complex or Papakainga Housing development on Maaori Freehold land or on Maaori Customary Land.

Decision Reasons:

- The submitter supports these permitted activities as this gives effect to s6(e), s6(f) and 6(g) of the Resource Management Act.

Point Number 559.37

Summary of Decision Requested: Retain Rule 22.1.2 P1 - A Marae complex or Papakainga Housing development on Maaori Freehold land or on Maaori Customary Land.

Decision Reasons:

- The submitter supports these permitted activities as this gives effect to s6(e), s6(f) and 6(g) of the Resource Management Act.

Point Number 559.38

Summary of Decision Requested: Retain Rule 24.1.2 P2 - A Marae complex or Papakainga Housing development on Maaori Freehold land or on Maaori Customary Land.

Decision Reasons:

- The submitter supports these permitted activities as this gives effect to s6(e), s6(f) and 6(g) of the Resource Management Act.

Point Number 559.39

Summary of Decision Requested: Retain Policy 3.2.7(a)(vii) Managing Significant Natural Areas.

Decision Reasons:

- The submitter supports Policy 3.2.7 (a)(vii) as these policies give effect to s6(e) of the Resource Management Act.

Point Number 559.40

Summary of Decision Requested: Retain Policy 3.3.2 (a)(iv), (b)(iv) and (c)(iv) Recognising values and qualities.

Decision Reasons:

- The submitter supports Policy 3.3.2 (a)(iv), (b)(iv) and (c)(iv) as these policies give effect to s6(e) of the Resource Management Act.

Point Number 559.41

Summary of Decision Requested: Retain Policy 3.3.4 (a), (b) and (c) The relationships of Maaori with natural resources and land.

Decision Reasons:

- The submitter supports Policy 3.3.4 (a), (b) and (c) as these policies give effect to s6(e) of the Resource Management Act.

Point Number 559.42

Summary of Decision Requested: Retain Policy 3.4.4 (a), (b) and (c) - The relationships of Maaori with natural resources and land.

Decision Reasons:

- The submitter supports Policy 3.4.4 (a), (b) and (c) as these policies give effect to s6(e) of the Resource Management Act.

Point Number 559.43

Summary of Decision Requested: Retain Objective 4.1.7 Character of Towns except for the amendments sought below.

AND

Amend Objective 4.1.7 Character of Towns as follows:

(a) Development in the residential, village, industrial and business zones is attractive, connected and reflects the existing character and historic heritage values of towns.

Decision Reasons:

- The submitter supports Objective 4.1.7 in part, as the policy does not reflect that many of the town contain important heritage items or have heritage precincts.
- These heritage values need to be recognised at the time of development and would not be fully captured through the use of just the word "character" within this policy.
- This policy needs to be amended to avoid adverse effects on heritage at the time of development.

Point Number 559.44

Summary of Decision Requested: Retain Policy 4.1.12 (b)(v) Te Kauwhata.

Decision Reasons:

- The submitter supports Policy 4.1.12 (b) (iv) as this reflects an outcome of a recent plan change process and provides for the recognition of Tangata whenua within this new residential development.

Point Number 559.45

Summary of Decision Requested: Add to Policy 4.2.15 Earthworks a new clause 'f' as follows:

(a) ...

(f) Earthworks are designed and undertaken in a manner that they do not adversely affect historic heritage and cultural values.

Decision Reasons:

- The submitter supports Policy 4.2.15 Earthworks in part as this policy does not reflect the need to provide for the protection of historic and cultural values at the time of earthworks.
- The policy needs to be amended to reflect the need to give effect to s6 of the RMA.

Point Number 559.46

Summary of Decision Requested: Add a new clause 'f' to Policy 4.3.15 Earthworks as follows:

(a) ...

(f) Earthworks are designed and undertaken in a manner that they do not adversely affect historic heritage and cultural values.

Decision Reasons:

- The submitter supports Policy 4.3.15 Earthworks in part as this policy does not reflect the need to provide for the protection of historic and cultural values at the time of earthworks.
- The policy needs to be amended to reflect the need to give effect to s6 of the RMA.

Point Number 559.47

Summary of Decision Requested: Retain Policy 4.5.14 (a)(v)G. Raglan Town Centre.

Decision Reasons:

- The submitter supports Policy 4.5.14 (a)(v)G. as this policy gives effect to Part 2 s6 Matters of National Importance, in particular s6(e).

Point Number 559.48

Summary of Decision Requested: Retain Policy 4.5.16 (a)(v)A. Ngaaruwaahia Town Centre.

Decision Reasons:

- The submitter supports Policy 4.5.16 (a)(v)A. as this policy gives effect to Part 2 s6 Matters of National Importance, in particular s6(e).

Point Number 559.49

Summary of Decision Requested: Retain Policy 4.5.17(a) Te Kauwhata Town Centre.

Decision Reasons:

- The submitter supports Policy 4.5.17(a) as this policy gives effect to Part 2 s6 Matters of National Importance, in particular s6(e).

Point Number 559.50

Summary of Decision Requested: Retain Policy 4.5.18 (a)(iv)D. Pokeno Town Centre.

Decision Reasons:

- The submitter supports Policy 4.5.18 (a)(iv)D. as this policy gives effect to Part 2 s6 Matters of National Importance, in particular s6(e).

Point Number 559.51

Summary of Decision Requested: Retain Policy 4.5.19 (a)(iv)E. Tuakau Town Centre.

Decision Reasons:

- The submitter supports Policy 4.5.19 (a)(iv)E. as this policy gives effect to Part 2 s6 Matters of National Importance, in particular s6(e).

Point Number 559.52

Summary of Decision Requested: Retain Policy 4.5.41 Earthworks, except for the amendments sought below.

AND

Add a new clause 'b' to Policy 4.5.41 Earthworks as follows:

(a)...

(b) Earthworks are designed and undertaken in a manner that they do not adversely affect historic heritage and cultural values.

Decision Reasons:

- The submitter supports Policy 4.5.41 Earthworks in part as this policy does not reflect the need to provide for the protection of historic and cultural values at the time of earthworks.
- The policy needs to be amended to reflect the need to give effect to s6 of the Resource Management Act.

Point Number 559.53

Summary of Decision Requested: Retain Policy 4.7.2 Subdivision location and design, except for the amendments sought below.

AND

Add a new clause 'viii' to Policy 4.7.2(a) Subdivision location and design as follows:

(a) *Ensure subdivision is located and designed to:*

(i) *Be sympathetic to the natural and physical qualities and characteristics of the surrounding environment;*

(ii) *Establish boundaries that avoid buildings and structures dominating adjoining land or public places, the coast, or fresh waterbodies;*

(iii) *Arrange allotments to allow for view sharing, where possible;*

(iv) *Retain existing access to public space;*

(v) *Promote safe communities through quality urban design;*

(vi) *Accommodate building platforms and vehicle accesses that are safe and stable; and*

(vii) *Promote consistent grid layout and*

(viii) Avoid adverse effects on historic heritage and cultural values.

Decision Reasons:

- The submitter supports Policy 4.7.2 in part as this policy does not reflect the need to provide for the protection of historic and cultural values at the time of subdivision location and design.
- The policy needs to be amended to reflect the need to give effect to s6 of the Resource Management Act.

Point Number 559.54

Summary of Decision Requested: Retain Policy 5.3.5 Earthworks activities, except for the amendments sought below.

AND

Add a new clause 'v' to Policy 5.3.5 Earthworks as follows:

(v) Avoid adverse effects on historic heritage and cultural values.

Decision Reasons:

- The submitter supports Policy 5.3.5 Earthworks in part as this policy does not reflect the need to provide for the protection of historic and cultural values at the time of earthworks.
- The policy needs to be amended to reflect the need to give effect to s6 of the Resource Management Act.

Point Number 559.55

Summary of Decision Requested: Retain Policy 5.6.7 Earthworks, except for the amendments sought below.

AND

Amend Policy 5.6.7(e) Earthworks as follows:

(d) *Subdivision and development occurs in a manner that maintains shape, contour, and landscape characteristics and avoids adverse effects on historic heritage and cultural values.*

Decision Reasons:

- The submitter supports Policy 5.6.7 Earthworks activities in part as this policy does not reflect the need to provide for the protection of historic and cultural values at the time of earthworks.
- The policy needs to be amended to reflect the need to give effect to s6 of the Resource Management Act.

Point Number 559.56

Summary of Decision Requested: **Retain** Policy 5.3.14 Signs, except for the amendments sought below.

AND

Amend Policy 5.3.14(e) Signs as follows:

(e) Provide for appropriate signage on heritage items, notable trees and Maaori sites of significance for the purpose of identification ~~or~~ interpretation.

Decision Reasons:

- The submitter supports Policy 5.3.14 Signs in part as the policy broadly assumes at (e) that signage can be placed on heritage buildings for both identification and interpretation.
- The policy needs to be amended to a slightly more cautious approach given the sensitive nature of heritage items, and Maaori sites of significance to an inappropriate design or quantity of signage.

Point Number 559.57

Summary of Decision Requested: **Retain** Objective 6.1.8 (a) Infrastructure in the community and identified areas.

Decision Reasons:

- The submitter supports Objective 6.1.8 as this policy gives consideration to the environment, which includes historic heritage and identified areas which can contain historic heritage or Maaori Sites or Areas of significance therefore giving effect to s6 of the Resource Management Act.

Point Number 559.58

Summary of Decision Requested: **Retain** Policy 6.1.9 (a) Environmental effects, community health, safety and amenity.

Decision Reasons:

- The submitter supports Objective 6.1.9 as this policy seeks to avoid, remedy or mitigate adverse effects on the environment, which includes historic heritage therefore giving effect to s6 of the RMA.

Point Number 559.59

Summary of Decision Requested: **Retain** Policy 6.1.10 (a) Infrastructure in identified areas, except for the amendments sought below.

AND

Amend Policy 6.1.10 (a) Infrastructure in identified areas as follows:

(a) Ensure consideration of the values, qualities and characteristics of Significant Natural Areas, Landscape and Natural Character Areas and Heritage Items, heritage precincts, and Maaori Sites and Areas of significance, including Waahi Tapu and Waahi Tapu Areas when proposing new infrastructure or undertaking significant upgrades to existing infrastructure.

Decision Reasons:

- The submitter supports Policy 6.1.10 as this policy aligns in part only with the identified areas included within the rules at Chapter 14: Energy and Infrastructure.
- The submitter seeks that this policy is amended to make reference to; heritage precincts, and Maaori Sites and Areas of Significance, including Wahi Tapu and Wahi Tapu Areas.

Point Number 559.60

Summary of Decision Requested: **Retain** Policy 6.1.11 (a) Undergrounding new infrastructure, except for the amendments sought below.

AND

Amend Policy 6.1.11 (a)(iii) undergrounding new infrastructure as follows:

(iii) There are significant operational, functional, technical, cultural, historic heritage or economic reasons that require the infrastructure to be above ground.

Decision Reasons:

- The submitter supports Policy 6.1.11 in part as this policy needs to be amended at (iii) to make reference to historic heritage reasons in addition to cultural reasons being relevant for the deployment of the infrastructure above the ground, to avoid adverse effects.

Point Number 559.61

Summary of Decision Requested: **Retain** Policy 6.1.12 (a) Co-location of compatible facilities, except for the amendments sought below

AND

Amend Policy 6.1.12 (a) Co-location of compatible facilities as follows:

(a) Encourage compatible infrastructure to share location or facilities where operational advantages can be achieved and adverse effects are ~~reduced~~ avoided, remedied or mitigated.

Decision Reasons:

- The submitter supports Policy 6.1.12 in part.
- The submitter supports the co-location of infrastructure as a method that has the potential to minimise the adverse effects on historic heritage.
- The wording of this policy does not encourage the reduction of adverse effects and needs to be amended to reflect that this should be sought at the time of co-location of compatible facilities.

Point Number 559.62

Summary of Decision Requested: **Retain** Policy 6.2.2 (a) Recognise the national grid, except for the amendments sought below.

AND

Amend Policy 6.2.2 (a) Recognise the national grid as follows:

Decision Reasons:

- The submitter supports Policy 6.1.12 in part.
- The submitter recognises the importance of the National Grid, Heritage New Zealand is concerned the policy appears to include unspecified network utilities as having the same status as the National Grid.
- Government has determined that the National Grid, as nationally important infrastructure, requires a greater level of recognition and protection than other regional and local infrastructure.

Point Number 559.63

Summary of Decision Requested: **Retain** Policy 6.2.5 (a) Environmental effects, except for the amendments sought below.
AND

Amend Policy 6.2.5 (a)(v) Environmental effects as follows:

(v) Addressing the adverse effects on any heritage values, cultural values, outstanding natural landscapes, areas of high natural character, town centres, areas of high recreation value and existing sensitive activities including the avoidance of adverse effects ~~where practicable~~.

Decision Reasons:

- The submitter supports Policy 6.2.5 in part, as the inclusion of the words "where practicable" serve to dilute the consideration of the protection of historic heritage and cultural values within this policy.
- These words also weaken the associated rule framework.
- This is particularly important given that the related energy and infrastructure rules of the Plan do not rely on the heritage protection framework found in the zone rules, rather there is reliance on a generic protection rules framework for "Identified Area" which includes scheduled historic heritage or Maaori sites or areas of significance in addition to such matters as significant natural areas.
- In addition within this framework, some activities are non-complying in "Identified areas" and this activity status should be supported by a robust policy.
- To give effect to s6 matters the policy and rule framework must ensure that development of infrastructure avoids adverse effects.
- To avoid adverse effects on s6 matters this policy also needs to include reference to "Cultural values".

Point Number 559.64

Summary of Decision Requested: **Retain** Objective 6.5.1 Land transport network, except for the amendments sought below.
AND

Amend Policy 6.5.1(a)(ii) Land transport network as follows:

(ii) Adverse effects from the construction, maintenance and operation of the transport network are ~~managed~~ avoided, remedied or mitigated.

Decision Reasons:

- As transport projects can have adverse effects on historic heritage and cultural values and adverse effects should be avoided and if they cannot be avoided should be remedied or mitigated.
- The use of the word managed does not provide sufficient guidance in this regard.

Point Number 559.65

Summary of Decision Requested: **Amend** Chapter 7 Historic Heritage to include a reference to the individual rules that give effect to those objectives and policies.

Decision Reasons:

- The submitter is concerned that the objectives and policies site in isolation from the Historic Heritage rules throughout the plan and vice versa.
- This does not enable a useful understanding of the overall framework for the protection of historic heritage at the time of resource consent application and provide guidance to avoid adverse effects.
- The submitter seeks that a reference is made in this section to the historic heritage rule framework and Schedule 30.1 Historic Heritage Items to which the rules are applicable.
- It would be preferable if a link could be made between the various policies and the rules which give effect to the individual policies.

Point Number 559.66

Summary of Decision Requested: **Retain** Objective 7.1.1(a), except for the amendments sought below.
AND

Amend Objective 7.1.1(a) as follows:

(a) A district that acknowledges its past by: recognising, identifying, protecting, conserving and promoting historic heritage.

Decision Reasons:

- The submitter supports Objective 7.1.1(a) in part as it considers that the policy also needs to include recognition of the need and role for "conservation" in the ongoing retention of heritage items into the future.
- The conservation of physical structures ensures the sustainability of the heritage resource for future generations.

Point Number 559.67

Summary of Decision Requested: **Retain** Policy 7.1.2 (a) - Identification, except for the amendments sought below.
AND

Amend Policy 7.1.2(a) - Identification as follows:

(a) Identify ~~and~~ schedule, and develop a rule framework for historic heritage throughout the District that represent the heritage and cultural themes and activities of the district, where the values may include:

(i) Architectural;

(ii) Archaeological;

(iii) Cultural;

(iv) Technological;

(v) Scientific;

(vi) Intrinsic or amenity values; and

(vii) Any other significant feature.

Decision Reasons:

- The submitter supports Policy 7.1.2(a) in part as this policy assists to ensure that the heritage recognised within the plan would contribute to the understanding of the District's heritage, however it would be appropriate to amend this policy by including the criteria for identification that are contained within the policy at Policy 7.1.3(b) Heritage Items.

Point Number

559.68

Summary of Decision Requested:

Retain Policy 7.1.3 (a) Heritage Items, except for the amendments sought below.

AND

Amend Policy 7.1.3(a) Heritage Items as follows:

(a) The contribution of historic heritage to the Waikato District and its communities is maintained through the protection and conservation of its buildings, sites, structures, places and areas through maintenance and repair restoring, conserving and reusing.

Decision Reasons:

- The submitter supports Policy 7.1.3(a) in part as this policy assists to ensure that the heritage recognised within the plan would contribute to the understanding of the District's heritage, however it would be appropriate to amend this policy by including the criteria for identification that are contained within the policy at Policy 7.1.3(b) Heritage Items.

Point Number

559.69

Summary of Decision Requested:

Retain Policy 7.1.3 (b) Heritage Items, except for the amendments sought below.

AND

Amend Policy 7.1.3(b) Heritage Items as follows:

(b) Protect scheduled heritage items and their values from inappropriate subdivision, use and development of land ~~where the values may include:~~

~~*(i) Architectural;*~~

~~*(ii) Archaeological;*~~

~~*(iii) Cultural;*~~

~~*(iv) Technological;*~~

~~*(v) Scientific;*~~

~~*(vi) Intrinsic or amenity values; and*~~

~~*(vii) Any other significant features.*~~

Decision Reasons:

- The submitter supports Policy 7.1.3(b) in part as the submitter considers that the list of values for which a heritage item could be selected for protection is better suited to being included as part of policy 7.1.2(a), which relates to the identification of items for protection.
- Policy 7.1.3(b) covers the protection of heritage items at the time of subdivision, use and development.

Point Number

559.70

Summary of Decision Requested:

Retain Policy 7.1.3 (c) Heritage Items, except for the amendments sought below.

AND

Add new clauses (i), (ii) and (iii) to Policy 7.1.3(c) Heritage Items as follows:

(c) Relationships between heritage buildings, sites, structures, places and their settings, are:

(i) Not adversely affected at the time of site development, and

(ii) Retained within one lot at the time of subdivision, and

(iii) including the view of the identified heritage items are retained.

AND

Clarify the phrase "the view of the identified heritage item are retained".

Decision Reasons:

- The submitter supports Policy 7.1.3(b) in part as the submitter recognises that the relationship between heritage items, sites structures, places and their settings is very important to the retention of heritage values. This relationship can be adversely affected by additional buildings, inappropriately placed buildings or structures and subdivision processes.
- The submitter seeks that the policy is amended to reflect the following:
 - various processes that may adversely affect these important relationships; and
 - the aspirational goal of retaining the building and its entire setting in one lot.
- These amendments will create improved guidance and create a link between this policy and the related rules of site development and subdivision of land containing heritage items.
- The submitter also seeks clarification of the following part of the statement "including the view of the identified heritage item is retained".
- It is unclear if this is the view of the identified heritage item within the site or beyond the site or both?
- Clarification of this aspect would be helpful for those administering these policies and giving advice to building owners.

Point Number

559.71

Summary of Decision Requested:

Retain Policy 7.1.3 (d) Heritage Items.

Decision Reasons:

- The submitter supports Policy 7.1.3(d) as this gives effect to the need to provide appropriate protection to historic heritage as required under s6 of the Resource Management Act.

Point Number 559.72

Summary of Decision Requested: **Amend** Policy 7.1.3 (e) Heritage Items as follows:
 (e) Protect scheduled heritage items from demolition, relocation or removal, ~~unless~~
 AND
Delete Policy 7.1.3(e)(i) and (ii) Heritage Items.

Decision Reasons:

- The submitter supports Policy 7.1.3(d) in part.
- The first line of the policy only refers to demolition and removal of items, whereas the related suite of rules also refers to relocation of items, therefore the policy needs to be amended so guidance is available for relocation.
- It would also be helpful to include the world heritage within the policy.
- The remainder of the policy provides instances of exemptions where protection is not considered necessary.
- It is considered that this direction is not appropriate as each instance should be reviewed and assessed on a case by case basis through a resource consent application.
- The Resource Management Act already allows for the consideration of these matters.

Point Number 559.73

Summary of Decision Requested: **Retain** Policy 7.1.3(f) Heritage Items, except for the amendments sought below.
 AND
Amend Policy 7.1.3(f) Heritage Items as follows:
 (f) Ensure alterations and additions to identified heritage items and curtilage are:
 (i) Consistent with the scale, detailing, style, materials and character of the heritage item;
 (ii) Retain cultural and historic heritage values;
 (iii) Do not compromise the heritage item, or have a design that competes with its heritage item, or have a design that competes with its historic heritage values; and
 (iv) Do not compromise the heritage setting of the item.

Decision Reasons:

- The submitter supports Policy 7.1.3(f) in part as the policy only refers to alterations, whereas the related rule framework also refers to additions.
- For consistency and for the policy framework to be applicable to both additions under s6 of Resource Management Act, the policy should be amended.

Point Number 559.74

Summary of Decision Requested: **Retain** Policy 7.1.3(g) Heritage Items, except for the amendments sought below.
 AND
Amend Policy 7.1.3(g) Heritage Items as follows:
 (g) Ensure maintenance and repairs protects ~~the significant features~~ the heritage values of the heritage items in (Schedule 30.1 Heritage Item)

Decision Reasons:

- The submitter supports Policy 7.1.3(g) in part.
- The wording of the policy relates to the permitted restricted discretionary activities relating to maintenance and repairs and significant features of a heritage item.

Point Number 559.75

Summary of Decision Requested: **Retain** Policy 7.1.3(h) Heritage Items, except for the amendments sought below.
 AND
Amend Policy 7.1.3(h) Heritage Items as follows:
 (h) Ensure signs on scheduled heritage items are only for the purposes of identification or ~~and~~ interpretation, and ...

Decision Reasons:

- The submitter supports Policy 7.1.3(h) in part as this policy seeks to limit the content and nature of the signage that can occur on a heritage item.
- The submitter considers that the policy needs to adopt a more cautious approach as a heritage building may not have the capacity to accommodate both identification and interpretation signage.
- The change to the policy is sought in conjunction with amendments to the rules ensuring that the adverse effects cannot occur to the heritage item, in fulfilment of s6 of the Resource Management Act.

Point Number 559.76

Summary of Decision Requested: **Retain** Policy 7.1.4(a) Matangi and Huntly Heritage precinct, except for amendments sought below.
 AND
Amend Policy 7.1.4(a) Matangi and Huntly Heritage precinct as follows:
 (a) Ensure the design of the new buildings and structures and external alterations or additions to buildings are compatible with the settings, detailing, style, materials and character of the precinct and protect heritage values within:
 (i) Matangi Heritage Precinct
 (ii) Huntly heritage precinct

(iii) Rangiriri Heritage precinct

AND

Amend the planning maps to include the Rangiriri Heritage Precinct guidelines, with additional information to protect the relationship of the cemetery to the village.

Decision Reasons:

- The submitter supports Policy 7.1.4(a) as the policy recognises these heritage precincts and the importance of ensuring that new builds do not detract from the elements for which the precinct is recognised.
- The submitter is aware that the Proposed Plan does not include a heritage precinct for the Rangiriri township as found in the Operative Plan.
- Council have advised that as the Rangiriri Hotel and heritage cemetery are now both included in the heritage schedule, that a precinct is no longer required for the protection of these heritage items.
- The submitter considers that the rules that relate to heritage items, while protecting the heritage item and the relationship with its own site, do not protect a heritage from the potentially adverse effect of activities for adjacent sites, or protect the relationship between separate heritage items in the same locale.
- The heritage cemetery and the Rangiriri Hotel are very disparate in nature. Therefore any proposed development needs to be carefully managed to ensure that the heritage values of both items are protected and not eroded.
- The submitter seeks that the Rangiriri heritage Precinct guideline and map is reinstated to the plan, with additional guidance to protect the relationship of the heritage cemetery to the village.

Point Number

559.77

Summary of Decision Requested:

Retain Policy 7.1.5 Subdivision, except for the amendments sought below.

AND

Amend Policy 7.1.5(a) Subdivision as follows:

(a) Subdivision and development ~~should retain the heritage item or features and their setting within one lot within an identified precinct do not compromise and are sympathetic to the existing historic heritage items or features.~~

Decision Reasons:

- The submitter supports Policy 7.1.5 in part.
- The submitter is concerned that the policy does not:
 - Include the aspirational goal that the heritage item and its setting are retained within one lot at the time of subdivision and development, and
 - Provide guidance as to the desired outcomes at the time of subdivision and development in relation to a heritage item and its setting in other zones.
- The submitter considers that both matters need to be addressed to provide appropriate protection to meet the requirements of s6 of the Resource Management Act.

Point Number

559.78

Summary of Decision Requested:

Add a new policy to Chapter 7 Historic Heritage as follows:

Earthquake strengthening and safety works

Encourage and facilitate the strengthening of buildings included in the heritage schedule to increase their ability to withstand future earthquakes while minimising the significant loss of associated heritage values.

Decision Reasons:

- The submitter considers that there is an obligation under the Resource Management Act, not just the Building Act to provide for the consideration of earthquake strengthening and safety works.
- It is acknowledged that these works could be undertaken under the current provisions, but seeks to have them specifically identified through policy and rules, with an associated restricted discretionary activity status.

Point Number

559.79

Summary of Decision Requested:

Add a new policy to Chapter 7 Historic Heritage to include the following:

Fire safety works

Encourage and facilitate the planning and implementation of fire safety works to buildings in the heritage schedule to increase their ability to withstand fire while minimising the significant loss of associated heritage values.

Decision Reasons:

- The submitter considers that there is an obligation under the Resource Management Act, not just the Building Act to provide for the consideration of fire safety works.
- Fire safety works do have the potential to be very intrusive on historic heritage values and consideration of these works needs to be undertaken early if considering works on an historic heritage item.
- It is acknowledged that these works could be undertaken under the current provisions, but seeks to have them specifically identified through policy and rules, with an associated restricted discretionary activity status.

Point Number

559.80

Summary of Decision Requested:

Amend Rule 16.2.7.1 P2.Sigs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.

AND

Amend Rule 16.2.7.1 RD1 to include signage on Heritage items and Maaori Sites of Significance.

AND

Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.81

Summary of Decision Requested: **Amend** Rule 17.2.7.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 17.2.7.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.82

Summary of Decision Requested: **Amend** Rule 18.2.7.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 18.2.7.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maaori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.83

Summary of Decision Requested: **Amend** Rule 20.2.7.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 20.2.7.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maaori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.84

Summary of Decision Requested: **Amend** Rule 21.2.7.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 21.2.7.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maaori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.85

Summary of Decision Requested: **Amend** Rule 22.2.6.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 22.2.6.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maaori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.86

Summary of Decision Requested: **Amend** Rule 23.2.6.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 23.2.6.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maaori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maaori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maaori sites of significance.
- To avoid adverse effects to heritage items and Maaori sites of significance it would be more appropriate for any signage on heritage items and Maaori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.87

Summary of Decision Requested: **Amend** Rule 24.2.7.1 P2 Signs - general to exclude any type of signage on Heritage Items and Maaori Sites of Significance.
AND
Amend Rule 23.2.7.1 RD1 Signs - general to include signage on Heritage items and Maaori Sites of Significance.
AND
Add an advice note under this new rule to advise of the other heritage building related rules within the Chapter.
AND
Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support the P2 Signs General where the zone rules that relate to signage, including on heritage items or Maori sites of significance are permitted activities with variations between the zones as to the permitted size and height of signage.
- While signs generally are not permitted in heritage buildings or Maori sites of significance, a sign of 3m2 on a heritage building could be permitted in some zones if the sign was for identification or interpretation purposes.
- The generic, zoned based approach does not reflect the need to assess the suitability of a signage proposal against the specific heritage values of the individual building or site.
- The generic approach has the potential to cause adverse effects of historic heritage and Maori sites of significance.
- To avoid adverse effects to heritage items and Maori sites of significance it would be more appropriate for any signage on heritage items and Maori sites of Significance to be elevated to a restricted discretionary activity level of assessment and subject to the matters of discretion already included (i.e. (vi) and (vii)).

Point Number 559.88

Summary of Decision Requested: Retain Rule 16.3.11.1 NCI Group A heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.89

Summary of Decision Requested: Retain Rule 17.3.8.1 NCI Group A heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.90

Summary of Decision Requested: Retain Rule 18.3.10.1 NCI Group A heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.91

Summary of Decision Requested: Retain Rule 20.3.5.1 NCI Group A heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.92

Summary of Decision Requested: Retain Rule 22.3.8.1 NCI Group A heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.93

Summary of Decision Requested: Retain Rule 23.3.9.1 NCI Group A heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.94

Summary of Decision Requested: Retain Rule 24.3.8.1 NCI Group A heritage item – Demolition, removal or relocation

Decision Reasons:

- The submitter supports the non-complying rule as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.95

Summary of Decision Requested: Delete Rule 18.3.10.2 PI Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter is concerned regarding the permitted status of this rule.
- It is unclear why the Council considers that they should exempt from the Resource Management Act assessment process that all other landowners are required to be subject to, should they wish to demolish a heritage building.
- The submitter seeks that this exemption is deleted from the plan and the Council owned building is subject to the assessment required in this plan for the demolition of a "B" category item.

Point Number 559.96

Summary of Decision Requested: Retain Rule 16.3.11.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.97

Summary of Decision Requested: Retain Rule 17.3.8.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.98

Summary of Decision Requested: Retain Rule 18.3.10.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.99

Summary of Decision Requested: Retain Rule 20.3.5.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.100

Summary of Decision Requested: Retain Rule 22.3.8.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.101

Summary of Decision Requested: Retain Rule 23.3.9.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.102

Summary of Decision Requested: Retain Rule 24.3.8.2 D1 Group B heritage item – Demolition, removal or relocation.

Decision Reasons:

- The submitter supports the discretionary activity rule for the demolition, removal or relocation of a Group B heritage item as this activity status recognises that demolition, removal or relocation of a heritage item must be subject to a high level of scrutiny.

Point Number 559.103

Summary of Decision Requested: Amend Rule 18.3.10.2 D2 Group B heritage item – Demolition, removal or relocation to ensure that item 104 Ngaruawahia Plunket rooms is subject to the same demolition rules as other “B” ranked items.

Decision Reasons:

- The submitter supports in part the Discretionary activity and considers that item 104 (Ngaruawahia Plunket rooms) should be subject to the same demolition rules as any other scheduled item.

Point Number 559.104

Summary of Decision Requested: Delete Rule 23.3.9.3 P1 All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.

- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Point Number 559.105

Summary of Decision Requested: Delete Rule 24.3.8.3 P1 All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.
- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Point Number 559.106

Summary of Decision Requested: Retain Rule 16.3.11.3 RD1 All heritage items – Alterations or additions, except for amendments sought below.

AND

Amend Rule 16.3.11.3 RD1 as follows:

(a) ~~Any activity that does not comply with Rule 16.3.11.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items.~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The submitter supports that additions and alterations are a restricted discretionary activity.
- The existing restricted discretionary activity should be amended to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.
- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number 559.107

Summary of Decision Requested: Retain Rule 17.3.8.3 RD1 All heritage items – Alterations or additions, except for the amendments sought below.

AND

Amend Rule 17.3.8.3 RD1 as follows:

(a) ~~Any activity that does not comply with Rule 17.3.8.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The submitter supports that additions and alterations are a restricted discretionary activity.
- The existing restricted discretionary activity should be amended to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.
- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number 559.108

Summary of Decision Requested: Retain Rule 18.3.10.3 RD1 All heritage items – Alterations or additions except for amendments sought below.

AND

Amend Rule 18.3.10.3 RD1 All heritage items - alterations or additions as follows:

(a) ~~Any activity that does not comply with Rule 18.3.10.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The existing restricted discretionary activity should be amended to recognise this, to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.

- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number 559.109

Summary of Decision Requested: **Retain** Rule 20.3.5.3 RD1 All heritage items – Alterations or additions, except for the amendments sought below.
AND

Amend Rule 20.3.5.3 RD1 as follows:

(a) ~~Any activity that does not comply with Rule 20.3.5.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values;

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The submitter supports that additions and alterations are a restricted discretionary activity.
- The existing restricted discretionary activity should be amended to recognise this, to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.
- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number 559.110

Summary of Decision Requested: **Retain** Rule 22.3.8.3 RD1 All heritage items – Alterations or additions, except for the amendments sought below.
AND

Amend Rule 22.3.8.3 RD1 as follows:

(a) ~~Any activity that does not comply with Rule 22.3.8.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values;

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The submitter supports that additions and alterations are a restricted discretionary activity.
- The existing restricted discretionary activity should be amended to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.
- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number 559.111

Summary of Decision Requested: **Retain** Rule 23.3.9.3 RD1 All heritage items – Alterations or additions, except for the amendments sought below.
AND

Amend Rule 23.3.9.3 RD1 as follows:

(a) ~~Any activity that does not comply with Rule 23.3.9.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values;

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The submitter supports that additions and alterations are a restricted discretionary activity.
- The existing restricted discretionary activity should be amended to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.
- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number 559.112

Summary of Decision Requested: **Retain** Rule 24.3.8.3 RD1 All heritage items – Alterations or additions, except for the amendments sought below.
AND

Amend Rule 24.3.9.3 RD1 as follows:

(a) ~~Any activity that does not comply with Rule 24.3.9.3 P1, Any alteration or addition to a heritage item in Schedule 30.1 Heritage items~~

(b) Council's discretion is restricted to the following matters:

(i) ~~Location, Form, scale, style, materials and appearance; and~~

(ii) Effects on heritage values;

(iii) Effects on the setting of the heritage item.

Decision Reasons:

- The submitter supports that additions and alterations are a restricted discretionary activity.
- The existing restricted discretionary activity should be amended to include any alteration or addition to a heritage building to ensure that any potential to negatively impact on the building is captured through the resource consent process.
- Further amendments are also required to address relevant matters to achieve an appropriate level of assessment.

Point Number	559.113
Summary of Decision Requested:	<p>Add a new Restricted Discretionary Activity rule to the District Plan as follows:</p> <p><u>Rule RD1</u></p> <p>(a) <u>Any activity required to be undertaken to provide for building or fire safety and/or earthquake strengthening.</u></p> <p>(b) <u>Council's discretion is restricted to the following matters:</u></p> <p>(c) <u>Effects on heritage values, including appearance and integrity of the heritage item.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers that there is an obligation under the Resource Management Act, not just the Building Act to provide for the consideration of earthquake strengthening and safety works. It is acknowledged that these works could be undertaken under the current provisions, but seeks to have them specifically identified through policy and rules, with an associated restricted discretionary activity status. The suggested rules framework seeks to minimise the effects on heritage values.
Point Number	559.114
Summary of Decision Requested:	<p>Retain Rule 16.3.11.4 PI All heritage items – Maintenance or repair, except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 16.3.11.4 PI All heritage items - Maintenance or repair as follows:</p> <p>(a) <u>Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:</u></p> <p>(i) <u>No significant feature of interest is destroyed or damaged; and</u></p> <p>(b) <u>Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports Rule 16.3.11.4 PI All heritage items – Maintenance or repair in part only. The permitted activity of maintenance and repair should occur in alignment with the definition of such works. Any proposed works not within the scope of the defined term should be assessed as an alteration or addition. The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.
Point Number	559.115
Summary of Decision Requested:	<p>Retain Rule 17.3.8.4 PI All heritage items – Maintenance or repair, except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 17.3.8.4 PI All heritage items - Maintenance or repair as follows:</p> <p>(a) <u>Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:</u></p> <p>(i) <u>No significant feature of interest is destroyed or damaged;</u></p> <p>(b) <u>Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports Rule 17.3.8.4 PI All heritage items – Maintenance or repair in part only. The permitted activity of maintenance and repair should occur in alignment with the definition of such works. Any proposed works not within the scope of the defined term should be assessed as an alteration or addition. The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.
Point Number	559.116
Summary of Decision Requested:	<p>Retain Rule 18.3.10.4 PI All heritage items – Maintenance or repair, except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 18.3.10.4 PI All heritage items - Maintenance or repair as follows:</p> <p>(a) <u>Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:</u></p> <p>(i) <u>No significant feature of interest is destroyed or damaged;</u></p> <p>(b) <u>Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports Rule 18.3.10.4 PI All heritage items – Maintenance or repair in part only. The permitted activity of maintenance and repair should occur in alignment with the definition of such works. Any proposed works not within the scope of the defined term should be assessed as an alteration or addition. The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.
Point Number	559.117
Summary of Decision Requested:	<p>Retain Rule 20.3.5.4 PI All heritage items – Maintenance or repair, except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 20.3.5.4 PI All heritage items – Maintenance or repair as follows:</p> <p>(a) <u>Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:</u></p> <p>(i) <u>No significant feature of interest is destroyed or damaged;</u></p> <p>(b) <u>Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.</u></p>

Decision Reasons:

- The submitter supports Rule 20.3.5.4 PI All heritage items – Maintenance or repair in part only.
- The permitted activity of maintenance and repair should occur in alignment with the definition of such works.
- Any proposed works not within the scope of the defined term should be assessed as an alteration or addition.
- The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.

Point Number 559.118

Summary of Decision Requested: **Retain** Rule 22.3.8.4 PI All heritage items – Maintenance or repair, except for amendments sought below.
AND

Amend Rule 22.3.8.4 PI All heritage items – Maintenance or repair as follows:

(a) *Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:*

~~(i) No significant feature of interest is destroyed or damaged;~~

(b) *Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.*

Decision Reasons:

- The submitter supports Rule 22.3.8.4 PI All heritage items – Maintenance or repair in part only.
- The permitted activity of maintenance and repair should occur in alignment with the definition of such works.
- Any proposed works not within the scope of the defined term should be assessed as an alteration or addition.
- The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.

Point Number 559.119

Summary of Decision Requested: **Retain** Rule 23.3.9.4 PI All heritage items – Maintenance or repair, except for the amendments sought below.
AND

Amend Rule 23.3.9.4 PI All heritage items – Maintenance or repair as follows:

(a) *Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:*

~~(i) No significant feature of interest is destroyed or damaged;~~

(b) *Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.*

Decision Reasons:

- The submitter supports Rule 23.3.9.4 PI All heritage items – Maintenance or repair in part only.
- The permitted activity of maintenance and repair should occur in alignment with the definition of such works.
- Any proposed works not within the scope of the defined term should be assessed as an alteration or addition.
- The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.

Point Number 559.120

Summary of Decision Requested: **Retain** Rule 24.3.8.4 PI All heritage items – Maintenance or repair, except for the amendments sought below.
AND

Amend Rule 24.3.8.4 PI All heritage items – Maintenance or repair as follows:

(a) *Maintenance or repair of a heritage item listed in Schedule 30.1 (Historic Heritage Items), where:*

~~(i) No significant feature of interest is destroyed or damaged;~~

(b) *Replacement materials are the same as, or similar to, the original in terms of colour, texture, form and design to the original that it replaces, form, style and appearance.*

Decision Reasons:

- The submitter supports Rule 24.3.8.4 PI All heritage items – Maintenance or repair in part only.
- The permitted activity of maintenance and repair should occur in alignment with the definition of such works.
- Any proposed works not within the scope of the defined term should be assessed as an alteration or addition.
- The permitted activity and definition both need to be amended to offer a greater level of guidance to plan users.

Point Number 559.121

Summary of Decision Requested: **Delete** Rule 16.3.11.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair, they elevate into additions or alteration that are assessed under a related rule.
- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.122

Summary of Decision Requested: **Delete** Rule 17.3.8.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair, they elevate into additions or alteration that are assessed under a related rule.

- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.123

Summary of Decision Requested: Delete Rule 18.3.10.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair , they elevate into additions or alteration that are assessed under a related rule.
- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.124

Summary of Decision Requested: Delete Rule 20.3.5.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair , they elevate into additions or alteration that are assessed under a related rule.
- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.125

Summary of Decision Requested: Delete Rule 22.3.8.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair , they elevate into additions or alteration that are assessed under a related rule.
- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.126

Summary of Decision Requested: Delete Rule 23.3.9.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair, they elevate into additions or alteration that are assessed under a related rule.
- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.127

Summary of Decision Requested: Delete Rule 24.3.8.4 RD1 All heritage items – Maintenance or repair.

Decision Reasons:

- The submitter is concerned regarding the restricted discretionary activity relating to repairs and maintenance.
- When works on a heritage building no longer fit within the defined terms of maintenance and repair, they elevate into additions or alteration that are assessed under a related rule.
- Using this type of rule cascade sets a clear framework for those undertaking works on their heritage building.

Point Number 559.128

Summary of Decision Requested: Delete Rule 18.3.10.5 PI All heritage items – Site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
- While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
- The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.

Point Number 559.129

Summary of Decision Requested: Delete Rule 22.3.8.5 PI All heritage items – Site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
- While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
- The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.

Point Number 559.130

Summary of Decision Requested: Delete Rule 23.3.9.5 P1 All heritage items – Site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
 - While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
 - The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.
-

Point Number 559.131

Summary of Decision Requested: Delete Rule 24.3.8.5 P1 All heritage items – Site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
 - While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
 - The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.
-

Point Number 559.132

Summary of Decision Requested: Delete Rule 20.3.5.5 P1 All heritage items – Site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
 - While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
 - The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.
-

Point Number 559.133

Summary of Decision Requested: Retain Rule 18.3.10.5 RD1 All heritage items – all site development, except for the amendments sought below.

AND

Amend Rule 18.3.10.5 RD1 All heritage items - all site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity~~ Site development is a restricted discretionary activity.

~~(b)~~ Discretion is restricted to:

- (i) Effects on the values, context and setting of the heritage item
- (ii) Location, design, size, materials and finish
- (iii) Landscaping
- (iv) The relationship of the heritage item with the setting.

Decision Reasons:

- The submitter supports only the restricted discretionary activity, as this allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
 - The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.
 - The submitter is concerned that the matters of discretion are slightly different between the zones.
 - The submitter seeks that the matters of discretion are amended to be consistent throughout the zones.
-

Point Number 559.134

Summary of Decision Requested: Retain Rule 22.3.8.5 RD1 All heritage items – all site development, except for the amendments sought below.

AND

Amend Rule 22.3.8.5 RD1 All heritage items – all site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity~~ Site development is a restricted discretionary activity.

(a) Discretion is restricted to:

- (i) Effects on the values, context and setting of the heritage item
- (ii) Location, design, size, materials and finish
- (iii) Landscaping
- (iv) The relationship of the heritage item with the setting.

Decision Reasons:

- The submitter supports only the restricted discretionary activity, as this allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
- The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.

- The submitter is concerned that the matters of discretion are slightly different between the zones.
- The submitter seeks that the matters of discretion are amended to be consistent throughout the zones.

Point Number 559.135

Summary of Decision Requested: **Retain** Rule 23.3.9.5 RD1 All heritage items – all site development, except for the amendments as sought below:
AND

Amend Rule 23.3.9.5 RD1 All heritage items – all site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity. Site development is a restricted discretionary activity.~~

(a) Discretion is restricted to:

- (i) Effects on the values, context and setting of the heritage item
- (ii) Location, design, size, materials and finish
- (iii) Landscaping
- (iv) The relationship of the heritage item with the setting.

Decision Reasons:

- The submitter supports only the restricted discretionary activity, as this allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
- The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.
- The submitter is concerned that the matters of discretion are slightly different between the zones.
- The submitter seeks that the matters of discretion are amended to be consistent throughout the zones.

Point Number 559.136

Summary of Decision Requested: **Retain** Rule 24.3.8.5 RD1 All heritage items – all site development, except for the amendments as sought below.
AND

Amend Rule 24.3.8.5 RD1 All heritage items – all site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity. Site development is a restricted discretionary activity.~~

(a) Discretion is restricted to:

- (i) Effects on the values, context and setting of the heritage item
- (ii) Location, design, size, materials and finish
- (iii) Landscaping
- (iv) The relationship of the heritage item with the setting.

Decision Reasons:

- The submitter supports only the restricted discretionary activity, as this allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
- The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.
- The submitter is concerned that the matters of discretion are slightly different between the zones.
- The submitter seeks that the matters of discretion are amended to be consistent throughout the zones.

Point Number 559.137

Summary of Decision Requested: **Delete** Rule 16.3.11.5 PI All heritage items – site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
- While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from the adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
- The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.

Point Number 559.138

Summary of Decision Requested: **Delete** Rule 17.3.8.5 P1 All heritage items – All site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.
- While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from the adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
- The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.

Point Number 559.139

Summary of Decision Requested: **Delete** Rule 20.3.5.5 P1 All heritage items – all site development.

Decision Reasons:

- The submitter cannot support the permitted activity rule.

- While the parameters of the rule are clear for a permitted activity, it is unclear how this rule effectively protects each heritage item and its setting from the adverse effects of the proposed activity in every specific instance, as the nature of the site development is not defined and the special features of the heritage items varies from the whole item in some instances to particular facades or specific features for others.
- The protection of heritage items from potential adverse effects of site development would be better achieved through the case by case analysis of a restricted discretionary activity resource consent assessment.

Point Number 559.140

Summary of Decision Requested: **Retain** Rule 16.3.11.5 RD1 All heritage items – site development, except for the amendments as sought below.

AND

Amend Rule 16.3.11.5 RD1 All heritage items – site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity Site development is a restricted discretionary activity.~~

(b) Discretion is restricted to:

(i) *Effects on the values, context and setting of the heritage item*

(ii) *Location, design, size, materials and finish*

(iii) *Landscaping*

(iv) *The relationship of the heritage item with the setting, including the area between the front of the heritage item and the road.*

Decision Reasons:

- The submitter supports in part the restricted discretionary activity as this rule allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
- The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.
- The zone rules included the area between the front of the heritage item and the road.
- It is considered that all of the setting is important therefore this aspect should be deleted to ensure the entire setting is equally considered.

Point Number 559.141

Summary of Decision Requested: **Retain** Rule 17.3.8.5 RD1 All heritage items – all site development, except for the amendments sought below.

AND

Amend Rule 17.3.8.5 RD1 All heritage items – all site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity Site development is a restricted discretionary activity.~~

(b) Discretion is restricted to:

(i) *Effects on the values, context and setting of the heritage item*

(ii) *Location, design, size, materials and finish*

(iii) *Landscaping*

(iv) *The relationship of the heritage item with the setting, including the area between the front of the heritage item and the road.*

Decision Reasons:

- The submitter supports in part the restricted discretionary activity as this rule allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
- The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.
- It is considered that all of the setting is important therefore this aspect should be deleted to ensure the entire setting is equally considered.

Point Number 559.142

Summary of Decision Requested: **Retain** Rule 20.3.5.5 RD1 All heritage items – all site development, except for the amendments as sought below.

AND

Amend Rule 20.3.5.5 RD1 All heritage items – all site development as follows:

~~(a) Any activity that does not comply with a condition for a permitted activity Site development is a restricted discretionary activity.~~

(b) Discretion is restricted to:

(i) *Effects on the values, context and setting of the heritage item*

(ii) *Location, design, size, materials and finish*

(iii) *Landscaping*

(iv) *The relationship of the heritage item with the setting, including the area between the front of the heritage item and the road.*

Decision Reasons:

- The submitter supports in part the restricted discretionary activity as this rule allows for the appropriate level of assessment of the possible impacts that site development could have on the heritage values of the heritage item and its setting.
- The trigger for the rule will be the activity of site development itself, rather than not meeting the permitted activity performance standards.
- It is considered that all of the setting is important therefore this aspect should be deleted to ensure the entire setting is equally considered.

Point Number 559.143

Summary of Decision Requested: **Amend** Rule 16.3.11.6 CI Heritage Precincts-Matangi and Huntly by changing the activity status from a Controlled Activity to a Restricted Discretionary Activity

AND

Amend Rule 16.3.11.6 CI (b) Heritage Precincts- Matangi and Huntly as follows:

(a) Construction of a building in the Matangi and Huntly Heritage Precincts identified on the planning maps that is set back at least 8m from road boundaries.

(b) Council's ~~control~~ discretion is reserved over the following matters:

(i) Effects on historic heritage, amenity values and character of the precinct; and

(ii) Building height, side setbacks, scale, form, materials and architectural style to be consistent with the relevant part of Appendix 3.6 (Matangi Heritage Precinct Design Guide) or Appendix 3.5 (Huntly Heritage Precinct Design Guide)

Decision Reasons:

- The submitter supports in part only the controlled activity heritage precinct rules.
- The submitter cannot support the controlled activity status of this rule, which allows a building set back 8m into the site.
- There could be significant impacts on the heritage items a restricted discretionary activity status would be more appropriate in the event that the proposal should be declined.

Point Number 559.144

Summary of Decision Requested: Delete the definition of "Maintenance and Repair" in Chapter 13: Definitions.
AND

Replace the definition for "Maintenance and Repair" in Chapter 13: Definitions with the following definition:

Means (for historic heritage items listed in Appendix 30.1) work for the purpose of weatherproofing, plumbing and electrical work restoration and for the purpose of repair which includes patching, piecing in, splicing or consolidating of any original structure including the repair of materials and replacement of minor components where there are beyond repair or are missing. The replacement should be original or similar material and maintain a consistency in colour, texture, form and design as the original it replaces.

Decision Reasons:

- The submitter opposes the defined term "Maintenance and Repair".

Point Number 559.145

Summary of Decision Requested: Delete the definition of "Restoration" in Chapter 13: Definitions.

Decision Reasons:

- The submitter is concerned that the defined term for "Restoration" does not appear to be reflected within the rule framework and is already included as part of the proposed definition of maintenance and repair.
- Some of the activities within the defined term would warrant scrutiny as part of a resource consent process as there would be potential for adverse effects to occur to heritage values when undertaking these activities
- These activities are already covered by the defined terms of maintenance and repair or additions and alterations.

Point Number 559.146

Summary of Decision Requested: Amend the definition of "Significant feature of interest" in Chapter 13: Definitions as follows:

Means those parts of a historic heritage building, which is shown on the planning maps and listed in Appendix 30.1, that area described in the individual historic heritage item record form.

Decision Reasons:

- The submitter generally supports the recognition of significant features of interest as part of the historic heritage item record form and in relation to the Heritage Items identified in the Plan.
- The submitter is concerned that listing the significant features and developing a rule framework around the significant features risks encouraging a piecemeal approach and not considering the heritage place holistically.
- Changes to non-protected elements can incur negative effects on significant features if they are compromised by what happens around them.
- The column in the schedule referring to significant features implies that everything else is not of particular significance.
- This approach is not helpful to the retention of the heritage values of the whole of the heritage item.
- It would be more appropriate if the schedule is tied to the record form descriptions and the significant features are seen in the context of the entire building.

Point Number 559.147

Summary of Decision Requested: Amend Chapter 14 Infrastructure and Energy to make the activities subject to the relevant zone rules as they apply to Heritage Precincts, Heritage Items, Maaori sites of significance.

Decision Reasons:

- The submitter is concerned with the statement at (i).
- While provision has been made within this Infrastructure and Energy Chapter for the assessment of activities on Identified features, as outline in section (3) of the introduction, that includes:
 - h. Heritage Precincts,
 - i. Heritage Items
 - j. Maaori sites of significance
 - k. Maaori areas of significance
- This level of assessment is not as robust as the assessments that would take place as if the actual rules related to Heritage Precincts, Heritage Items, Maaori sites of significance and Maaori areas of significance.
- Such assessment would provide greater protection as required under s6 of the Resource Management Act.

Point Number 559.148

Summary of Decision Requested: Add the following advice note to Chapter 14.1 Introduction:

The New Zealand Archaeological Association

Archaeological sites are included on the planning maps for District Plan information purposes only. However these sites are subject to the requirements of the Heritage New Zealand Pouhere Taonga Act 2014. Heritage New Zealand Pouhere Taonga must be contacted regarding development on or in proximity to these sites and the need to undertake an archaeological authority.

The Heritage New Zealand Pouhere Taonga Act 2014 protects both recorded and unrecorded archaeological sites.

Decision Reasons:

- The submitter considers that as many of the proposed activities in this chapter will include earthworks, some of which are potentially substantial in terms of depth and area, that an advice not relating to the obligations and requirements of the Heritage New Zealand Pouhere Taonga Act 2014 should be included within the introduction section of the chapter.

Point Number 559.149

Summary of Decision Requested: Retain Rule 14.2.3 NC3 Non-Complying Activities.

Decision Reasons:

- The submitter supports Rule 14.2.3 NC3 as this catch all rule will ensure that the Identified Areas are protected from the adverse effects of energy and infrastructure activities.

Point Number 559.150

Summary of Decision Requested: Retain Rule 14.3.1 P4, condition (1)(h), except for the amendments sought below.

AND

Amend Rule 14.3.1 P4 condition (1)(h) Permitted Activities as follows:

(h) Earthworks are not located within any Historic Heritage sites identified within Appendix 30.1, or any Maori Sites or areas of Significance as identified in Appendix 30.3 and 30.4.

Decision Reasons:

- The submitter supports in part permitted activity specific condition (h), as the reference to only Appendix 30.1 does not cover the identified items of both Historic Heritage and cultural importance and the activity specific condition needs to be amended to include the other appendices so as to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.151

Summary of Decision Requested: Retain activity specific condition 14.3.1.7 relating to P8 Service Connections.

Decision Reasons:

- The submitter supports in part permitted activity specific condition 14.3.1.7 as this activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.152

Summary of Decision Requested: Retain activity specific condition 14.3.1.7 relating to P9 Minor infrastructure structure.

Decision Reasons:

- The submitter supports in part permitted activity specific condition 14.3.1.7 as this activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.153

Summary of Decision Requested: Retain activity specific condition 14.3.1.7 relating to P10 Closed-circuit television (CCTV) systems attached to existing buildings and structures.

Decision Reasons:

- The submitter supports in part permitted activity specific condition 14.3.1.7 as this activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.154

Summary of Decision Requested: Retain Rule 14.3.3 RD2 Earthworks associated with infrastructure that do not comply with one or more of the conditions of Rule 14.3.1.3, except for the amendments sought below.

AND

Amend Rule 14.3.3 RD2 Earthworks associated with infrastructure that do not comply with one or more of the conditions of Rule 14.3.1.3 as follows:

Discretion is restricted to:

(a) Management of sediment and dust, including the staging of works;

(b) The volume, extent and depth of the earthworks activities;

(c) The location of the earthworks activities, taking into account any effects on the values, qualities and characteristics of the site, including sites and areas of Significance to Maori and any Heritage Items;

(d) Any flood or land stability risks; and

(e) Visual, landscape and amenity effects.

Decision Reasons:

- The submitter supports in part only the Restricted Discretionary rule RD2 and the matters of discretion.
- While the matter of discretion (c) could be applicable in part to heritage items and cultural sites, it is considered that the clause should be amended to be readily applicable to heritage items and cultural sites so as to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.155

Summary of Decision Requested: Retain Rule 14.3.3 RD6, subject to the acceptance of any related submission points identified elsewhere in the submission.

Decision Reasons:

- The submitter supports Restricted Discretionary Rule RD6.

Point Number 559.156

Summary of Decision Requested: Add new clause '(c)' to Rule 14.4.1(1) P3 Earthworks activities within the National Grid Yard as follows:

14.4.1.3(1) *Earthworks for National Grid support poles and any stay wires that comply with the following conditions:*

(c) are not located within an Identified area.

AND

Add new clause '(f)' to Rule 14.4.1(2)P3 Earthworks within the National Grid Yard as follows:

14.4.1.3(2) *Earthworks for National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) that comply with the following conditions:...*

(f) are not located within an Identified area.

AND

Provide for any consequential amendments as required to ensure that these earthworks that are located within an identified area will be a restricted discretionary activity.

Decision Reasons:

- The submitter cannot support the permitted activity status of earthworks for National Grid support poles and any stay wires at Rule 14.1.1.3(a) and for support towers at 14.4.1.3(2).
- These permitted activity rules do not exclude earthworks in identified areas and this approach could cause adverse effect to historic heritage and Maaori sites and Areas of significance.
- An amendment is required to ensure these works cannot occur as a permitted activity.

Point Number 559.157

Summary of Decision Requested: Retain Rule 14.4.3 D1 Discretionary activities.

Decision Reasons:

- The submitter supports Discretionary activity Rule D1, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.158

Summary of Decision Requested: Retain Rule 14.4.4 NCI Non-complying activities.

Decision Reasons:

- The submitter supports Non-complying activity Rule NCI, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.159

Summary of Decision Requested: Retain Rule 14.5.3(a) D2 Discretionary activities.

Decision Reasons:

- The submitter supports Discretionary activity Rule D2, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.160

Summary of Decision Requested: Retain activity specific condition 14.6.1.1(a)(a) relating to P1 Small-scale electricity generation.

Decision Reasons:

- The submitter supports Permitted activity Rule P1, as the activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.161

Summary of Decision Requested: Retain activity specific condition 14.6.1.1 (a)(a) relating to P2 Community-scale electricity generation.

Decision Reasons:

- The submitter supports Permitted activity Rule P2, as the activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.162

Summary of Decision Requested: Retain activity specific condition 14.6.1.2(a)(v) relating to P3 Research and exploratory-scale investigations for renewable electricity generation activities.

Decision Reasons:

- The submitter supports Permitted activity Rule P3, as the activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.163

Summary of Decision Requested: Amend Rule 14.6.2 Restricted Discretionary Activities RD1, RD2 and RD3 to become Discretionary Activities for works in an identified area that do not comply with the permitted standards.

Decision Reasons:

- The submitter does not support the Restricted Discretionary activity status for Rule 14.6.2 RD1, RD2 and RD3 for activities that do not comply with the permitted standards, as this level of resource consent activity would not provide the appropriate level of protection and assessment to provide protection for works in an "identified area" as required under section 6 of the Resource Management Act 1991.

Point Number 559.164

Summary of Decision Requested: Retain Rule 14.6.4 NCI Non-Complying Activities.

Decision Reasons:

- The submitter supports Non-Complying Rule NCI, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.165

Summary of Decision Requested: Retain activity specific condition 14.7.1.1(a)(iii) relating to P1 Below ground pipelines for the conveyance of liquid fuels and gas.

Decision Reasons:

- The submitter supports permitted activity P1 and specific activity condition (a)(iii) as this condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.166

Summary of Decision Requested: Delete Rule 14.7.1 P2 and activity specific condition 14.7.1.2(a) Below ground pipelines located within an Identified Area.
AND

Amend Rule 14.7.1 P2 Below ground pipelines located within an Identified Area by changing the activity status from a permitted activity to a discretionary activity.

Decision Reasons:

- The submitter cannot support permitted activity P2, as it is not clear why the below ground pipelines are able to be located within the identified areas as a permitted activity.
- This appears to be inconsistent with the similar activities that are only permitted if they are not located within the identified areas.

Point Number 559.167

Summary of Decision Requested: Retain activity specific condition 14.7.1.3(a) relating to P3 Storage facilities and pump stations for liquid fuels and gas.

Decision Reasons:

- The submitter supports permitted activity P3 and specific activity condition 14.7.1.3(a), as this activity specific condition ensures that the activity will provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.168

Summary of Decision Requested: Retain Rule 14.7.2 D1 Discretionary Activities, subject to amendments sought elsewhere in the submission.

Decision Reasons:

- The submitter supports Discretionary Rule D1, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.169

Summary of Decision Requested: Retain Rule 14.7.2 D2 Discretionary Activities, subject to amendments sought elsewhere in the submission.

Decision Reasons:

- The submitter supports Discretionary Rule D2, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.170

Summary of Decision Requested: Retain activity specific condition 14.8.1.1 (a)(iii) relating to P1 Meteorological enclosures and buildings including automatic weather stations.

Decision Reasons:

- The submitter supports Permitted Rule P1 and the activity specific conditions 14.8.1.1.

Point Number 559.171

Summary of Decision Requested: Retain activity specific condition 14.8.1.2(a)(iii) relating to P2 Meteorological and air quality monitoring structures and devices.

Decision Reasons:

- The submitter supports Permitted Rule P2 and the activity specific conditions 14.8.1.2.

Point Number 559.172

Summary of Decision Requested: Retain Rule 14.8.3 D1 Discretionary Activities.

Decision Reasons:

- The submitter supports Discretionary Rule D1 as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.173

Summary of Decision Requested: **Retain** Rule 14.8.3 D2 Discretionary Activities.

Decision Reasons:

- The submitter supports Discretionary Rule D2 as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.174

Summary of Decision Requested: **Retain** activity specific condition 14.9.1.1 (a)(iii) relating to P1 Antennas associated with amateur radio configurations.

Decision Reasons:

- The submitter supports Permitted activity Rule P1 Antennas associated with amateur radio configurations, activity specific condition 14.9.1.1 (iii) as this condition will ensure the integrity of the identified areas is retained.

Point Number 559.175

Summary of Decision Requested: **Retain** activity specific condition 14.9.1.2(a)(vii) relating to P2 Aerials associated with amateur radio configurations.

Decision Reasons:

- The submitter supports Permitted activity Rule P2 Aerials associated with amateur radio configurations, activity specific condition 14.9.1.2 (vii) as this condition will ensure the integrity of the identified areas is retained.

Point Number 559.176

Summary of Decision Requested: **Retain** activity specific condition 14.9.1.3 (a)(v) relating to P3 Permitted Activities - Support Structures associated with amateur radio configurations.

Decision Reasons:

- The submitter supports Permitted activity Rule P3, Support structures associated with amateur radio configurations activity specific condition 14.9.1.3 (v) as this condition will ensure the integrity of the identified areas is retained.

Point Number 559.177

Summary of Decision Requested: **Retain** Rule 14.9.3, D2 Discretionary Activities.

Decision Reasons:

- The submitter supports Discretionary activity D2, as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.178

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.1 (a)(l) relating to P1 - Ancillary equipment and activity-specific condition 14.10.1.1.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.179

Summary of Decision Requested: **Retain** Rule 14.10.1 P2 - Below ground telecommunications and radiocommunications facilities, lines, cables and ducts, except for the amendments sought below

AND

Add a specific activity condition to Rule 14.10.1 P2 - Below ground telecommunications and radiocommunications facilities, lines, cables and ducts as follows:

not located within an identified area

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support P2 as currently proposed. This activity requires an activity specific condition to ensure that there are not adverse effects to an identified.

Point Number 559.180

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.2 (a)(i) relating to P3 Cabinets.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.181

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.3 (a)(i) relating to P4 - Antennas and line attached to retaining walls, tunnels, bridges and other structures located within the road

AND

Delete activity specific condition 14.10.1.3(b) relating to P4 Antennas and line attached to retaining walls, tunnels, bridges and other structures located within the road.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter cannot support Rule 14.10.1 Permitted Activity P4, activity specific condition 14.10.1.3(b) as this allows antennas and lines to be attached to a heritage item.

Point Number 559.182

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.4 (a)(i) and(b) relating to P5 - Antennas attached to a building and/or structure.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.183

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.5(a)(iii) and (iv) relating to P7 - Antennas attached to a building and/or structure.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.184

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.6 (a)(ii) and (iii) relating to P8 Small cell units exceeding the permitted volumetric dimension of 0.11m² regulated in the NESTF.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.185

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.7 (a)(i) and (iii) relating to Permitted Activities P9 - Poles, antennas and headframes.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.186

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.8 (a)(iv) relating to P10 - Externally-mounted telecommunication satellite dishes and ancillary components.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.187

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.9 (a)(ii) and (iii) relating to P11 - Telecommunication kiosk.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.188

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.10 (a)(v) relating to P12 - Telephone exchanges, including the installation and operation of equipment inside existing telephone exchanges.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.189

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.11 (a)(i) and (ii) relating to P13 - Self-contained power units.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.190

Summary of Decision Requested: **Retain** activity specific condition 14.10.1.13 (a)(ii) relating to P15 - Lightning rods.

AND

Provide for any consequential amendments as required.

Decision Reasons:

- The submitter supports the permitted activity conditions as they will ensure the integrity and the historic heritage values of the identified areas are retained.

Point Number 559.191

Summary of Decision Requested: **Retain** matters of control 14.10.2(a)(iv) relating to Controlled Activities C1, C2, C5, C6, C7, except for the amendments sought below.

AND

Amend matters of control 14.10.2 (a)(iv) relating to Controlled Activities C1, C2, C5, C6, C7 as follows:

(iv) Effects on the values, qualities and characteristics of the site and/or items in Schedule 30 L.

Decision Reasons:

- The submitter supports the controlled activity status of the activities C1, C2, C5, C6, C7 and supports in part the associated matters of control.

Point Number 559.192

Summary of Decision Requested: **Amend** Rule 14.10.2 Controlled Activities C8 activity status to become a restricted discretionary activity status.

Decision Reasons:

- The submitter cannot support the controlled activity status of activity C8 as it is considered that compliance with the Rule 14.10.1.7, which would allow poles and head frames of a height of between 15-30m, dependant on the zone, within an identified area has the potential to cause adverse effects on historic heritage and cultural values.
- While there are relevant assessment criteria, the activity should have restricted discretionary activity status to ensure that the activity could be refused, if inappropriate.

Point Number 559.193

Summary of Decision Requested: **Retain** Rule 14.10.2 (iii) Controlled Activities C9, except for the amendments sought below.

AND

Amend Rule 14.10.2 Controlled Activities C9 as follows:

(a) Externally-mounted telecommunications satellite dishes and ancillary components:...

(iii) Are not located within an Identified Area

AND

Amend Rule 14.10.2 Controlled activities, C9 activity status to become Restricted Discretionary activity status.

AND

Provide for any consequential amendments,

Decision Reasons:

- The submitter cannot support the inclusion of the identified areas within the controlled activity status of activity C9 as the activity has the potential to cause adverse effects on historic heritage and cultural values.
- While there are relevant assessment criteria relating to effects, the activity should have restricted discretionary activity status to ensure that the activity could be refused, if inappropriate.
- An amendment is sought to ensure that identified areas are not included as part of the controlled activity.

Point Number 559.194

Summary of Decision Requested: **Retain** Rule 14.10.2 C10 Telecommunication kiosks, located within road or unformed road adjacent to an Identified Area, that complies with the conditions for a new infrastructure activity and associated structures under Rule 14.2.1.1.

Decision Reasons:

- The submitter supports this controlled activity and the need to comply with the conditions for new infrastructure.

Point Number 559.195

Summary of Decision Requested: **Retain** Rule 14.10.3 Restricted Discretionary Activities RD1, RD2, RD3, RD4, RD6, RD7, except for the amendments sought below
AND
Amend matters of discretion 14.10.3 (e) relating to RD1, RD2, RD3, RD4, RD6, RD7, as follows:
...
(e) *Effects on the values, qualities and characteristics of the site, the heritage item or area.*

Decision Reasons:

- The submitter supports the restricted discretionary status of the activities at 14.10.3.
- The submitter supports in part only the matters of discretion, as it is considered that the matters of discretion need to reflect the items or areas that are part of the identified areas, for the assessment to provide for the protection required under section 6 of the Resource Management Act.

Point Number 559.196

Summary of Decision Requested: **Retain** Rule 14.10.4 Discretionary Activities D1, D2, D3, D4, D5, D6, D7, D8.

Decision Reasons:

- The submitter supports the discretionary activity status of the activities at 14.10.4, as these activities are located within the Identified areas, which include heritage items and Maaori sites and areas of significance.
- This is an appropriate level of resource consent activity providing the appropriate level of protection and assessment as required under section 6 of the Resource Management Act 1991.

Point Number 559.197

Summary of Decision Requested: **Retain** activity specific condition 14.11.1.4(a)(ii) relating to P4 Below ground pipelines for the conveyance of water, wastewater and stormwater.
AND
Delete activity specific condition 14.11.1.4(b) relating to P4 Below ground pipelines for the conveyance of water, wastewater and stormwater.

Decision Reasons:

- The submitter supports 14.11.1 Permitted activities P4 and the activity specific condition, as this will ensure that works are not located within the Heritage items or Maaori sites or areas of significance.
- The submitter cannot support the exception in activity specific condition 14.11.1.4(b), as some of the bridges within the Waikato District are heritage items and an assessment should take place to consider the impact on heritage values.

Point Number 559.198

Summary of Decision Requested: **Amend** Rule 14.11.1 Permitted Activity P5 Below ground pipelines for the conveyance of water, wastewater and stormwater located within an Identified Area from a permitted activity status to become a Restricted Discretionary Activity status.

Decision Reasons:

- The submitter cannot support the permitted activity rule P5 and the associated Activity specific condition 14.11.1.5(a) as the pipes both above and below ground have the potential to impact on cultural and heritage values and need to be assessed.

Point Number 559.199

Summary of Decision Requested: **Retain** activity specific condition 14.11.1.6(a)(i) relating to P6 Pump stations for the conveyance of water, wastewater and stormwater.

Decision Reasons:

- The submitter supports Rule 14.11.1 Permitted activities P6 and the activity specific condition 14.11.1.6(a)(i), as this will ensure that works are not located within the Heritage items and Maaori sites or areas of significance and will avoid adverse impacts on heritage values.

Point Number 559.200

Summary of Decision Requested: **Retain** activity specific condition 14.11.1.8(a)(i) relating to P9 Ventilation facilities, drop shafts and manholes.
AND
Amend numbering of specific activity condition to 14.11.1.9.

Decision Reasons:

- The submitter supports Rule 14.11.1 Permitted activities P9 and the activity specific condition 14.11.1.8(a)(i), as this will ensure that works are not located within the Heritage items and Maaori sites or areas of significance and will avoid adverse impacts on heritage values.

Point Number 559.201

Summary of Decision Requested: **Retain** activity specific condition 14.11.1.9 (a)(i) relating to **P10** Below ground reservoirs.
AND
Amend numbering of specific activity condition to 14.11.1.10.

Decision Reasons:

- The submitter supports Rule 14.1.1.1 Permitted activities P9 and the activity specific condition 14.1.1.9(a)(i), as this will ensure that works are not located within the Heritage items and Maaori sites or areas of significance and will avoid adverse impacts on heritage values.

Point Number 559.202

Summary of Decision Requested: Retain Rule 14.1.1.2 RD4, RD5, RD6, RD7, RD8 and RD9 Restricted Discretionary Activities and the associated matters of discretion (e).

Decision Reasons:

- The submitter supports Rule 14.1.1.2 Restricted Discretionary activities RD4, RD5, RD7, RD8 and RD9 and the associated matter of discretion (e)
- The submitter considers this is an appropriate level of resource consent activity, providing the appropriate level of protection and assessment as required under section 6 of the Resource Management Act 1991.

Point Number 559.203

Summary of Decision Requested: Retain Rule 14.1.1.1 NCI, NC2 and NC3 Non Complying Activities.

Decision Reasons:

- The submitter supports Rule 14.1.1.4 Non-Complying activities NC1, NC2 and NC3 as this level of resource consent activity provides the appropriate level of protection and assessment to provide protection as required under section 6 of the Resource Management Act 1991.

Point Number 559.204

Summary of Decision Requested: Retain activity specific conditions 14.12.1.5(1)(d) relating to P5 Operation, maintenance and minor upgrading of existing public roads, State Highways and associated road network activities.

Decision Reasons:

- The submitter supports Permitted activity P5 and the activity specific condition 14.12.1.5(1)(d) as this will ensure that works are not located within the Heritage items or, subject to the acceptance of the related Heritage New Zealand submission point, Maaori sites or areas of significance, and therefore adverse impacts on heritage values will be avoided.

Point Number 559.205

Summary of Decision Requested: Retain activity specific condition 14.12.1.6 (1)(g) relating to P6 New public roads, including where the road has been identified on the planning maps as an Indicative road, and associated road network activities.

Decision Reasons:

- The submitter supports Permitted activity P6 and the activity specific condition 14.12.1.6(1)(g) as this will ensure that works are not located within the Heritage items or, subject to the acceptance of the related Heritage New Zealand submission point, Maaori sites or areas of significance, and therefore adverse impacts on heritage values will be avoided.

Point Number 559.206

Summary of Decision Requested: Retain activity specific condition 14.12.1.7(4) relating to P7 Access and New Roads – Te Kowhai Airpark Zone.

Decision Reasons:

- The submitter supports Permitted activity P7 and the activity specific condition 14.12.1.7(4) as this will ensure that works are not located within the Heritage items or, subject to the acceptance of the related Heritage New Zealand submission point, Maaori sites or areas of significance, and therefore adverse impacts on heritage values will be avoided.

Point Number 559.207

Summary of Decision Requested: Retain activity specific condition 14.12.1.8(iv) and(v) relating to P8 Off-road pedestrian and cycle facilities.

Decision Reasons:

- The submitter supports permitted activities P8 and activity specific condition 14.12.1.8(iv) and (v) as this will ensure that works are not located within the Heritage items or Maaori sites or areas of significance, and therefore adverse impacts on heritage values will be avoided.

Point Number 559.208

Summary of Decision Requested: Retain activity specific condition 14.12.1.9 (1)(a) and (b) relating to P9 Stock underpasses located within (a) Road and unformed road (b) Rural Zone.

Decision Reasons:

- The submitter supports permitted activities P9 and activity specific condition 14.12.1.9(a) and (b) as this will ensure that works are not located within the Heritage items or Maaori sites or areas of significance, and therefore adverse impacts on heritage values will be avoided.

Point Number 559.209

Summary of Decision Requested: Retain matters of discretion 14.12.2(g) relating to RD5 Operation, maintenance and minor upgrading of existing public roads, State highways and associated road network activities that does not comply with one or more of the conditions of Rule 14.12.1.5.

Decision Reasons:

- The submitter supports activity RD5 and the matter of discretion (g).
- This is an appropriate level of resource consent activity providing the appropriate level of resource consent activity providing the appropriate level of protection and assessment as required under section 6 of the Resource Management Act 1991.

Point Number 559.210

Summary of Decision Requested: **Retain** Rule 14.12.2 RD6 Restricted Discretionary Activities.

Decision Reasons:

- The submitter supports activity RD6, as new roads are excluded from the restricted discretionary activity status.
- This is appropriate as new roads have the potential to cause significant adverse effects on heritage and cultural values and should be assessed with a more stringent level of resource consent activity to ensure the protection as required under s6 of the Resource Management Act is achieved.

Point Number 559.211

Summary of Decision Requested: **Amend** matters of discretion 14.12.2(i) relating to RD7 Access and New Roads – Te Kowhai Airpark Zone that do not comply with one or more of the conditions of Rule 14.12.1.7 as follows:

(i) The location of the earthworks activities, taking into account any effects on the values, qualities and characteristics of the site or area.

Decision Reasons:

- The submitter supports the restricted discretionary activity status of activity RD7 and the associated matters of discretion in part.
- While this is an appropriate level of resource consent activity providing the appropriate level of resource consent activity providing the appropriate level of protection and assessment as required under section 6 of the Resource Management Act 1991, the matters of discretion need to be expanded by including the word "area" as some sites are part of larger Maori areas and this larger context needs to be acknowledged and considered as part of the consenting process.

Point Number 559.212

Summary of Decision Requested: **Add** a new matter of discretion (e) to 14.12.2 relating to RD8 Off-road pedestrian and cycle facilities that do not comply with one or more of the conditions of Rule 14.12.1.8 as follows:

(e) The location of the earthworks activities, taking into account any effects on the values, qualities and characteristics of the site or area.

Decision Reasons:

- The submitter is concerned that the matters of discretion for Restricted Discretionary Activities RD8 do not include any assessment related to the identified areas as found for example in Rule 14.12.2 Restricted Discretionary Activities RD7, matters of discretion (i).

Point Number 559.213

Summary of Decision Requested: **Amend** Rule 18.3.5 P1 Verandahs as follows:

P1

(a) Any new building, or alteration to an existing building, except a building included in Schedule 30.1 – Historic Heritage Items, on land with a verandah line identified on the planning maps, must be provided with a verandah that complies with the following conditions:

...

Decision Reasons:

- The submitter opposes Rule 18.3.5 Verandahs in part as this rule has the potential to undermine the heritage values of items contained within Schedule 30.1 Historic Heritage Items and cause adverse effects.
- The plan does not provide clear guidance that Heritage items should be exempt from these types of design rules. Heritage New Zealand seeks that the rule is amended to exclude Heritage items from being subject to the Verandah rules.

Point Number 559.214

Summary of Decision Requested: **Retain** Rule 18.3.5 D1 Verandahs (subject to historic heritage items being excluded from these requirements).

Decision Reasons:

- The submitter supports the discretionary activity status of Rule 18.3.5, subject to historic heritage items being excluded from these requirements, as identified in the submission point relating to 18.3.5 P1 Verandahs.

Point Number 559.215

Summary of Decision Requested: **Add** to the proposed District Plan Planning Maps the Rangiriri Heritage precinct as per the mapping included in Attachment 2 (refer to submission – Attachment 2: Reinstatement of Rangiriri Heritage Precinct).

AND

Add to the proposed District Plan the Rangiriri Heritage Precinct and the associated rule framework as per the Operative Plan.

Decision Reasons:

- The submitter is concerned that the Rangiriri Heritage precinct has been deleted from the Plan.
- The submitter seeks that the Rangiriri Heritage precinct is reinstated into the Plan.

Point Number 559.216

Summary of Decision Requested: **Retain** Schedule 30.1 – Historic Heritage Items, except for the amendments sought below

AND

Amend Schedule 30.1 – Historic Heritage to include an advice note regarding the extensive heritage and archaeological information held by Council that can be obtained on request.

Decision Reasons:

- The submitter supports the proposed Schedule 30.1 – Historic Heritage items which includes 74 new items.
- This Schedule contains a wide range of heritage items from within the Waikato District.
- Extensive work has been undertaken to research and record these items to include them as part of the schedule, which helps to ensure their protection from inappropriate subdivision, development and use into the future.

- Other heritage related work also undertaken includes the recording of additional heritage items which on evaluation did not meet the heritage assessment criteria for inclusion in the plan, and other work on heritage overviews of various parts of the district.
- There are also extensive studies related to archaeological sites, and therefore useful as part of the matters that an applicant may have to consider as part of their application proposals.
- Consideration needs to be given to making applicants aware of the additional heritage information that the Council holds. This could assist with the development of application proposals including heritage impact assessments or as background to inform structure plans or similar at the time of development.

Point Number 559.217

Summary of Decision Requested: **Amend** the third column heading in Schedule 30.1 – Historic Heritage Items from "H.P.T. to "HNZPT".

AND

Add the Heritage New Zealand listing numbers as identified in Attachment 3 to this submission into Schedule 30.1 (refer to Attachment 3 of the submission).

Decision Reasons:

- The submitter seeks that the heading in the third column is amended from "HPT" (the old acronym for Historic Places Trust) to "NZHPT" to recognise Heritage New Zealand Pouhere Taonga.
- The submitter also seeks that in addition to the category of the Heritage New Zealand listed items that the Heritage New Zealand list number is also included. This will assist plan users to more readily access information regarding the listing and ensure that its heritage values are protected.

Point Number 559.218

Summary of Decision Requested: **Amend** schedule 30.1 Heritage Items by deleting the column containing the significant features to be protected and replacing with a notation or hyperlink to refer the reader to the relevant Heritage record forms for information relating to the history, setting, extent of scheduling and significant features of the building to all be given regard at the time of works on the Heritage Item.

AND

Add to Schedule 30.1 Heritage Items the heritage record form to be part of Schedule 30.1-Historic Heritage Items in the Plan.

Decision Reasons:

- The submitter is concerned at the inclusion of the "significant features to be protected" column, within Schedule 30.1-Historic Heritage Items and how this column is used in conjunction with the rule framework, which allows works on the building that do not impact on the significant feature.
- As currently worded the rules would allow unfettered works on the parts of the building not identified as special features.
- The submitter is concerned that a listed property, Riverdale is proposed to be removed due to modifications which would indicate that the rules framework is not working.
- This approach risks encouraging a piecemeal approach and not considering the heritage place holistically. Even changes to non-protected elements can incur negative effects on protected features if they are comprised by what happens around them.
- The column in the schedule referring to significant features implies that everything else is not of particular significance, which is not helpful or correct. If the schedule is tied to the record forms, one can understand that the significant features are part of the total heritage values.

Point Number 559.219

Summary of Decision Requested: **Add** to Schedule 30.1, Heritage New Zealand Pouhere Taonga List item number 4256 – Riverdale, known in the Operative Plan as former FH Edgcombe Residence, Heritage item 115 as a 'B' ranking.

Decision Reasons:

- The submitter is concerned that a Heritage New Zealand listed item, known as Riverdale and also known as Former FH Edgcombe Residence, a Category A scheduled item, is proposed to be deleted from the Operative District Plan.
- Council's heritage expert suggests that it could be retained within the Plan as a "B" item.
- The submitter considers that the item is worthy of being retained within the Plan, despite the modifications and seeks that the item is retain with a "B" ranking.

Point Number 559.220

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1, Heritage New Zealand Pouhere Taonga List item number 7129 – Komakorau Hall located at 50 Woodlands Road, Gordonton.

Decision Reasons:

- The submitter is concerned that this item continues to not be recognised within the District Plan, and considers that while this item has been relocated to 50 Woodlands Road, Gordonton, it will still retain some heritage values worthy of recognition in the schedule.
- The submission details historical points of note for this heritage item (refer to the submission).
- The submitter considers that the hall should be recognised in Schedule 30.1.

Point Number 559.221

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1 Heritage New Zealand Pouhere Taonga List item number 4250 – Former Burnett Residence located at 11 Luff Place, Ngaruawahia, Heritage Item number 116 in the Operative District Plan.

Decision Reasons:

- The submitter is concerned that this item has not been retained within the Heritage Schedule.
- The c1875/80 building has historic heritage values and despite relocation has been retained within the same general locale. The building still retains some heritage values worthy of recognition in the schedule.

Point Number 559.222

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1, Heritage New Zealand Pouhere Taonga List item number 4241 – Former Post office (Relocated) located at 10 Amber Lane, Puketaha.

Decision Reasons:

- The submitter is concerned that the list item 4241, Former Post Office, originally located in the South Waikato District at the Arapuni Dam station and then moved to Arapuni Village, then moved off site in the 1990s to a relocatable building haulage yard and relocated to Puketaha in early 2000, is not included in Schedule 30.1, Heritage items.
- The item is also not scheduled in the Operative Waikato Plan 2013.
- The submitter considers that the item does retain sufficient heritage values to be recognised through the scheduling process.

Point Number 559.223

Summary of Decision Requested: **Amend** Heritage Schedule 30.1 to include the setting of heritage item number 98 – Potatau Monument as shown on Attachment 4 to the submission (refer to submission).

Decision Reasons:

- The submitter supports that the Potatau Monument and its immediate setting are part of Schedule 30.1 Historic Heritage Items.
- While this item is not on the Heritage New Zealand list, Heritage New Zealand has indicated publicly that it is interested to list this site for both its historic and wahi tapu values.
- While this listing work is in the early stages of development and consultation, it is considered that the extent of the Heritage New Zealand listing would likely extend beyond the current "setting" on the Potatau Monument record form, to the edge of the grassed reserve area in recognition of the many aspects, including the ancestral footprint and archaeological values that contribute to the importance of this item.
- It is considered that there is merit in seeking that the current recognised setting of heritage item number 98 is extended as shown on Attachment 4.
- This is important as the current setting is contained within one allotment and the way that the rules are written there is no opportunity to control development and avoid adverse effects on the immediate area, which is the reserve but on another allotment.

Point Number 559.224

Summary of Decision Requested: **Consider** how heritage Item number 17A (of the Operative District Plan) – First Industries cottage and site located at 92 B Te Onetea Road, Rangiriri, which has a current "B" ranking can be retained in Council's records.

AND

Consider how any additional information can be captured at the time of demolition.

Decision Reasons:

- The submitter is concerned at the proposed deletion of this pre 1881 item from the schedule.
- While the submitter acknowledges what appears from a desktop review to be the very, very poor condition of the building, the early date of the site/building does indicate that the site/building is of heritage interest.
- An archaeological authority will be required potentially for the demolition of the building if it is pre 1900 and any earthworks required on the site at the time of demolition or for new development.

Point Number 559.225

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1, Heritage Item number 76 - Former government departmental building from the Operative District Plan, located at 78 Matangi Street, Matangi and rank the building as a 'B' category building.

Decision Reasons:

- The submitter is concerned at the proposed deletion of this building from the plan.
- The submitter appreciates that the building has been relocated, however considers that the building has significant architectural qualities.
- While relocated it has connections to a particular style of government building nationwide, at the time playing an important function in the development of New Zealand.

Point Number 559.226

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1, Heritage Item number 125 – Former Mines/King House from the Operative District Plan, located at 14 Galileo Street, Ngaruawahia and rank the building as a 'B' category building.

Decision Reasons:

- The submitter is concerned that the building is proposed to be deleted from the heritage schedule.
- The building appears to be in very original condition and has been maintained.
- It is very visible, and has architectural value, including the bull nose verandah feature.
- The submitter considers that it retains sufficient interest and heritage values to be retained within the schedule.

Point Number 559.227

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1, Heritage Item number 155 – Former Gilmore Bros Shop from the Operative District Plan, located at 11 Bow Street, Raglan and rank the building as a 'B' category building.

Decision Reasons:

- The submitter is concerned that the building is proposed to be deleted from the heritage schedule.
- The submitter considers that while some of the features have been modified there are still distinctive architectural features such as the gable, with the shingles and rounded arch.
- The building has significant historic and social significance and contributes to the local identity.
- The modifications have not fundamentally damaged the character and design of the building.

Point Number 559.228

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1, Heritage Item number 161 – Former AR Langley building from the Operative District Plan, located at 19 Bow Street, Raglan and rank the building as a 'B' category building.

Decision Reasons:

- The submitter is concerned that the post 1906 building is proposed to be deleted from the heritage schedule.

- The building is located on a prominent corner site and is part of the community history.
- The modifications have not totally compromised the building and it retains sufficient interest to be retained within the schedule.

Point Number 559.229

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1 the Former Marist Juniorate Training College building, located at 139 Dominion Road, Tuakau and rank the building as a 'A' category building.

Decision Reasons:

- The submitter is concerned that the 1925-26 buildings identified as the Former Marist Juniorate Training College building, Lavalla College, recommended to have a "A" ranking has not been included within the Heritage Schedule, despite being supported as an item for inclusion in the Plan in the peer review by conservation architect Adam Wild.
- The submitter considers that this is a very distinctive building with strong architectural values and decorative brick work and forms part of the social history of the district and the wider catholic church warrant the items included within the Schedule.

Point Number 559.230

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1 the Former Kosoof building bungalow/Rimu house, located at 40 Main Street, Huntly and rank the building as a 'B' category building.

Decision Reasons:

- The submitter is concerned that the c1929 building which has a recommended "B" ranking has not been included within the Heritage Schedule, despite being supported as an item for inclusion in the Plan in the peer review by conservation architect Adam Wild.
- The submitter considers that this is a very distinctive building with strong architectural values and decorative brick work and forms part of the social history of the district.

Point Number 559.231

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1 the Former Taupiri Post office & postmasters residence, located at 3 the Crescent, Taupiri and rank the building a 'B' category building.

Decision Reasons:

- The submitter is concerned that the 1920-21 building has not been included within the Heritage Schedule, despite being supported as an item for inclusion in the Plan in the peer review by conservation architect Adam Wild.
- The submitter supports the advice contained in the Adam Wild report that despite modifications the building has architectural values and is part of the history of the district.

Point Number 559.232

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1 the Former Robinsons Boarding House, located at 79 Wilton Collieries Road, Glen Massey and rank the building a 'B' category building.

Decision Reasons:

- The submitter is concerned that the 1914 building has not been included within the Heritage Schedule, despite being supported as an item for inclusion in the Plan in the peer review by conservation architect Adam Wild.
- Many buildings do have the potential to be restored and it's premature for the building to not be included onto the Heritage schedule.

Point Number 559.233

Summary of Decision Requested: **Add** to the Heritage Schedule 30.1 the Former Cavanagh Residence, located at 67 Ellery Street, Ngaruawahia and rank the building a 'B' category building.

Decision Reasons:

- The submitter that the 1912/14 building has not been included within the Heritage Schedule, despite being supported as an item for inclusion in the Plan in the peer review by conservation architect Adam Wild.
- Many buildings do have the potential to be restored and it's premature for the building to not be included onto the Heritage schedule.

Point Number 559.234

Summary of Decision Requested: **Amend** the Proposed District Plan to administer the Ngaruawahia Centennial Memorial Plunket Rooms and Women's Rest Rooms in the same manner as other items in Schedule 30.1.

Decision Reasons:

- The submitter that the 1940 building has not been included within the Heritage Schedule as a regular heritage item, despite being supported as an item for inclusion in the Plan in the peer review by conservation architect Adam Wild.
- Many buildings do have the potential to be restored and it is premature for the building to not be administered in the same manner as the other heritage buildings included in the Heritage Schedule.
- The submitter seeks that this building is recognised and administered in the same way as other items in the schedule.

Point Number 559.235

Summary of Decision Requested: **Retain** in the Heritage Schedule 30.1 the Former Huntly Railway worker's Cottages as follows:

- Heritage Item number 64 from the Operative District Plan located at 47 Harris Street, Huntly.
- Heritage Item number 65 from the Operative District Plan located at 41 Harris Street, Huntly.
- Heritage Item number 66 from the Operative District Plan located at 39 Harris Street, Huntly.
- Heritage Item number 67 from the Operative District Plan located at 37 Harris Street, Huntly.
- Heritage Item number 68 from the Operative District Plan located at 35 Harris Street, Huntly.
- Heritage Item number 69 from the Operative District Plan located at 33 Harris Street, Huntly.

AND

Amend the Proposed District Plan to recognise collectively the Huntly railway workers cottage, located on Harris Street, Huntly as a Precinct.

AND

Add rules as found in the Hamilton City Council Plan, Special Heritage Zone - Frankton Railway Village.

AND

Provide further information in regards to the status of the Historic Heritage Items changing status from "A" to "B".

Decision Reasons:

- The submitter is supportive of the recognition of the cluster of former Huntly Railway worker's Cottages within Schedule 30.1 Historic Heritage Items.
- These items are part of the Operative Plan and recognised as "A" items, whereas the proposed plan demotes those items to a "B" status.
- No explanation has been provided in the available background material as to why they are considered to now only have a "B" status. Some information on this would be helpful.
- The submitter considers that there is merit in recognising the particular features of railway cottages such as their plain simple style and aspects of the sites such as lack of garaging and typical low fencing.
- There would be benefit in rules, such as those contained within the Hamilton City Council Plan, Special Heritage Zone – Frankton Railway Village that seek to maintain the important elements of these building, with rules allowing addition at the rear only, garaging at the rear of the house and maintaining low fencing. This already established type of rule framework would ensure the retention of the heritage values of the cottages and the group of houses as a whole.

Point Number

559.236

Summary of Decision Requested:

Add to the Heritage Schedule 30.1 the following NZ War Memorial Heritage inventory items as follows:

- Kariotahi School Roll of Honour
- Ngaruawahia NZ Wars Memorial
- Otaua War Memorial Bowling Green
- Otaua Hall
- Tauwhare War Memorial Hall
- Te Hoe Memorial Hall
- Te Uku & District Memorial Hall
- Tuakau Services Memorial
- Waikaretu War Memorial Hall
- Whatawhata Cemetery NZ Wars Memorial
- Whitikahu Memorial Hall

Decision Reasons:

- The submitter is concerned that there has only been partial recognition of the NZ War Memorial inventory supplied to the council, within Schedule 30.1 – Historic Heritage Items.
- The Heritage New Zealand Pouhere Taonga NZ War Memorial Heritage inventory project sought to capture a range of monuments and memorials to the World Wars.
- Many of these items have been funded in part or whole by their local communities and placed on land donated by communities.
- This type of heritage has sometimes not been included within Heritage Schedules and this has led in some instance to their demise or relocation.

Point Number

559.237

Summary of Decision Requested:

Retain Schedule 30.3 - Maaori sites of Significance within the Plan, except for the amendments sought below.

AND

Amend the introductory notes to Schedule 30.3 to include the following advice note:

The Maaori Sites and Areas of Significance are also recorded archaeological sites and may also contain unrecorded archaeological sites. These sites are subject to the requirements of the Heritage New Zealand Pouhere Taonga Act 2014. Heritage New Zealand Pouhere Taonga must be contacted regarding development on or in proximity to these sites and the need to undertake an archaeological assessment to determine the need for an archaeological authority. The Heritage New Zealand Pouhere Taonga Act 2014 protects both recorded and unrecorded archaeological sites.

Decision Reasons:

- The submitter typically supports protection for the whole extent of a scheduled site.
- The submitter understands that the methodology used by Waikato District Council for the Maaori Sites and Areas of significance is largely a desktop methodology.
- There are risks to using desktop survey only to identify archaeological sites in that the fullest extent of the site may not be protected or there may be inaccuracies in historical record.
- As these sites are not being scheduled for their archaeological values along but instead their cultural significance to tangata whenua, the submitter considers it appropriate that the extents of these sites be identified by tangata whenua.
- As stated by Dr Des Kahotea in his methodology, these sites are being scheduled for more than just their archaeological values and "low archaeological values have no influence on cultural significance and sections 2(1) and 6(e) assigns tangata whenua, hapu and iwi the role and status.
- While the plan is recognising these sites for their cultural values, the plan needs to acknowledge these sites are also New Zealand Archaeological Association recorded archaeological sites and therefore subject to the requirements of the Heritage New Zealand Pouhere Taonga Act 2014, which provides for the protection of both recorded and unrecorded archaeological sites. While the plan provides the recording number on the Plan maps and in the schedule, it would be helpful for the reader to be advised of the need to contact Heritage New Zealand in relation to their proposed works and the need or otherwise for an archaeological assessment to determine the need for an archaeological authority.

Point Number

559.238

Summary of Decision Requested:

Retain Schedule 30.4 – Maaori Areas of Significance within the Plan, except for the amendments sought below.

AND

Amend the introductory notes to Schedule 30.4 to include the following advice note:

The Maaori Sites and Areas of Significance are also recorded archaeological sites and may also contain unrecorded archaeological sites. These sites are subject to the requirements of the Heritage New Zealand Pouhere Taonga Act 2014. Heritage New Zealand Pouhere Taonga must be contacted regarding development on or in proximity to these sites and the need to undertake an archaeological assessment to determine the need for an archaeological authority. The Heritage New Zealand Pouhere Taonga Act 2014 protects both recorded and unrecorded archaeological sites.

Decision Reasons:

- The submitter typically supports protection for the whole extent of a scheduled site.
- The submitter understands that the methodology used by Waikato District Council for the Maaori Sites and Areas of significance is largely a desktop methodology.
- There are risks to using desktop survey only to identify archaeological sites in that the fullest extent of the site may not be protected or there may be inaccuracies in historical record.
- As these sites are not being scheduled for their archaeological values along but instead their cultural significance to tangata whenua, the submitter considers it appropriate that the extents of these sites be identified by tangata whenua.
- As stated by Dr Des Kahotea in his methodology, these sites are being scheduled for more than just their archaeological values and "low archaeological values have no influence on cultural significance and sections 2(1) and 6(e) assigns tangata whenua, hapu and iwi the role and status.
- While the plan is recognising these sites for their cultural values, the plan needs to acknowledge these sites are also New Zealand Archaeological Association recorded archaeological sites and therefore subject to the requirements of the Heritage New Zealand Pouhere Taonga Act 2014, which provides for the protection of both recorded and unrecorded archaeological sites. While the plan provides the recording number on the Plan maps and in the schedule, it would be helpful for the reader to be advised of the need to contact Heritage New Zealand in relation to their proposed works and the need or otherwise for an archaeological assessment to determine the need for an archaeological authority.

Point Number

559.239

Summary of Decision Requested:

Amend Schedule 30.3 - Maaori sites of Significance by extending SS60 as depicted in Attachment 4 of the submission (refer to the submission).

Decision Reasons:

- The submitter supports the inclusion of SS60 Maaori Areas of Significance that includes the Potatau Monument and the immediate reserve surrounds.
- While this item is not on the Heritage New Zealand list is not on the Heritage New Zealand list, Heritage New Zealand has indicated publically that it is interested to list this site for both its historic and wahi tapu values.
- While this listing work is in the early stages of development and consultation, it is considered that the extent of the Heritage New Zealand listings would likely extend beyond the SS60 to the edge of the grassed reserve area in recognition of the many aspects, including the ancestral footprint and archaeological values that contribute to the importance of this item.
- It is considered that there is merit in seeking that ss60 is extended as shown on Attachment 4 of this submission, which would align with the likely footprint of the proposed wahi tapu listing.

Point Number

559.240

Summary of Decision Requested:

Add a new schedule to the Proposed District Plan entitled Schedule 30.6 – Significant Waahi Tapu and Waahi Tapu areas and include the following Heritage New Zealand Pouhere Taonga listed waahi tapu sites:

- Te Aukati ki Mangatawhiri - Waahi Tapu Heritage New Zealand list number 9632.
- Meremere - Waahi Tapu Heritage New Zealand list number 9609.
- Te Teo Teo - Waahi Tapu Heritage New Zealand list number 9607, and
- Rangiriri- Waahi Tapu Area Heritage New Zealand list number 7720.

AND

Add maps in the District Plan Maps showing the same extent as the Heritage New Zealand Pouhere Taonga listing as included in Attachment 6 (refer to submission).

Decision Reasons:

- The submitter requests a new schedule in the plan to be known as Schedule 30.6 – Significant Wahi Tapu and Wahi Tapu areas.
- The submitter requests that these wahi tapu and wahi tapu areas are to be mapped as per the extent shown in Attachment 6 to this submission.

Point Number

559.241

Summary of Decision Requested:

Retain the archaeological advice note in the Introduction to Section E, except for the amendments sought below.

AND

Amend the archaeological advice note in the Introduction to Section E to read as follows:

Advice Note

A designation does not exempt a requiring authority from first obtaining an authority from Heritage New Zealand Pouhere Taonga if an archaeological site is to be destroyed, ~~damaged~~ or modified.

Decision Reasons:

- The submitter supports in part the advice note contained within the Introduction to section E – Designations.
- It is important that parties undertaking works are aware of their obligations with regard to the protection of archaeology, both recorded and unrecorded.
- The wording in the Heritage New Zealand Pouhere Taonga Act 2014, s42, relates to a person "modifying or destroying" an archaeological site. The word damaging is not included within this section of the Act.
- The submitter therefore seeks that the wording of the advice note is amended to reflect the language of the Act.

Point Number

559.242

Summary of Decision Requested:

Amend condition 5 of designation for the Minister of Corrections as follows:

5.0 Archaeological

5.1

If any urupa, traditional sites, taonga (significant artefacts), koiwi (human remains), or other archaeological sites are exposed during site works the following procedures shall apply:

- a. Immediately it becomes apparent that an urupa, traditional site, taonga, koiwi or other archaeological site has been exposed, all site works in the immediate vicinity shall cease;

- b. The site supervisor shall immediately secure the area in a way that ensures that any artefacts or remains are not further disturbed; and
- c. The site supervisor shall notify the Waikato Rauapatu Lands Trust and a nominated Ngati Naho hapu representative, ~~the New Zealand Historic Places Trust, Heritage New Zealand Pouhere Taonga~~ the Department of Conservation, the Waikato District Council, the Waikato Regional Council and in the case of human remains, the New Zealand Police, that an archaeological or traditional site has been exposed so that appropriate action can be taken.
- ~~This includes such persons being given reasonable time as determined by the Waikato District Council to record and recover archaeological features discovered before work may recommence on the site. The Minister of Corrections shall not be in breach of this condition if Ngati Naho hapu does not nominate or cannot agree to a representative.~~

Decision Reasons:

- The submitter seeks amendments within the conditions of the Minister of Corrections designation to correct the naming of Heritage New Zealand as changed under the Heritage New Zealand Pouhere Taonga Act 2014 and as the regulatory authority related to archaeology remove from the condition the decision making role that has been incorrectly assigned to the Waikato District Council.

Point Number

559.243

Summary of Decision Requested:

Amend Rule 16.3.11.6 C2 Heritage Precincts-Matangi and Huntly by changing the activity status from a Controlled Activity to a Restricted Discretionary Activity.

AND

Amend Rule 16.3.11.6 C2(b) Heritage Precincts- Matangi and Huntly as follows:

(a) *Alteration of a building in the Matangi or Huntly Heritage Precincts identified on the planning maps.*

(b) *Council's ~~discretion controls~~ will be reserved over the following matters: ...*

Decision Reasons:

- The submitter supports in part only the controlled activity heritage precinct rules.
- The submitter considers that the activity status, as a controlled activity presents no clear trigger point at which the activity tips to a restricted discretionary activity.
- Given the sensitive nature of these works the activity status should be restricted discretionary to allow a more robust assessment and be able to decline inappropriate activity.

Point Number

559.244

Summary of Decision Requested:

Amend Rule 16.3.11.6 C3 Heritage Precincts-Matangi and Huntly by changing the activity status from a controlled activity to a restricted discretionary activity.

AND

Amend Rule 16.3.11.6 C3 (a) as follows:

(a) ~~Attachment~~ Placement of an advertising sign ~~(a) to a building or located~~ within the 8m setback from the road boundaries in the Matangi or Huntly heritage precincts identified on the Planning Maps.

Decision Reasons:

- The submitter supports in part only the controlled activity heritage precinct rules.
- The submitter is concerned that the rule allows advertising signage on buildings within the precinct, which has the potential to erode heritage values of individual buildings and the precinct.
- It would be appropriate that this type of signage was on the site only to minimise the adverse effects and the status of the rules was restricted discretionary to allow the application to be declined.

Point Number

559.245

Summary of Decision Requested:

Delete Rule 16.3.11.6 RD1 Heritage Precincts-Matangi and Huntly.

Decision Reasons:

- The submitter has sought that the previous controlled activities related to the precincts are amended to restricted discretionary activities, the restricted discretionary activity, (which contains a typo in the first line with the additional word "to") can be deleted.

Point Number

559.246

Summary of Decision Requested:

Retain Rule 17.4.1.5 RD1 Subdivision – land containing heritage items, except for the amendments sought below.

AND

Amend Rule 17.4.1.5 RD1 Subdivision – land containing heritage items as follows:

(a) *Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)*

(b) *The Council's discretion is restricted to the following matters:*

(i) *Effects on heritage values;*

(ii) *Context and setting of the heritage item;*

(iii) *The extent to which the relationship of the heritage item with its setting is maintained within one lot.*

AND

Amend Rule 17.4.1.5 RD1 Subdivision – land containing heritage items, to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number

559.247

Summary of Decision Requested: **Retain** Rule 18.4.6 RD1 Subdivision – land containing heritage items, except for the amendments sought below.
AND
Amend Rule 18.4.6 RD1 Subdivision - land containing heritage items as follows:
(a) Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)
(b) Council's discretion is restricted to the following matters:
(i) Effects on heritage values;
(ii) Context and setting of the heritage item;
(iii) The extent to which the relationship of the heritage item with its setting is maintained within one lot.
AND
Amend Rule 18.4.6 RD1 Subdivision - land containing heritage items to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number 559.248

Summary of Decision Requested: **Retain** Rule 20.4.5 RD1 Subdivision of land containing a heritage item, except for the amendments sought below.
AND
Amend Rule 20.4.5 RD1 Subdivision of land containing a heritage item as follows:
(a) Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)
(b) Council's discretion is restricted to the following matters:
(i) Effects on heritage values;
(ii) Context and setting of the heritage item;
(iii) The extent to which the relationship of the heritage item with its setting is maintained within one lot.
AND
Amend Rule 20.4.5 RD1 Subdivision of land containing a heritage items to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number 559.249

Summary of Decision Requested: **Retain** Rule 23.4.6 RD1 Subdivision of land containing heritage items, except for the amendments sought below.
AND
Amend Rule 23.4.6 RD1 Subdivision of land containing heritage items as follows:
(a) Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)
(b) Council's discretion is restricted to the following matters:
(i) Effects on heritage values;
(ii) Context and setting of the heritage item;
(iii) The extent to which the relationship of the heritage item with its setting is maintained within one lot.
AND
Amend Rule 23.4.6 RD1 Subdivision of land containing heritage items to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number 559.250

Summary of Decision Requested: **Retain** Rule 24.4.8 RD1 Subdivision – land containing heritage items except for the amendments sought below.
AND
Amend Rule 24.4.8 RD1 Subdivision – land containing heritage items as follows:
(a) Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)
(b) Council's discretion is restricted to the following matters:
(i) Effects on heritage values;
(ii) Context and setting of the heritage item;

(iii) The extent to which the relationship of the heritage item with its setting is maintained within one lot.

AND

Amend Rule 24.4.8 RD1 Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number

559.251

Summary of Decision Requested:

Retain Rule 16.4.10 RD1 Subdivision – land containing heritage items, except for the amendments sought below.

AND

Amend Rule 16.4.10 RD1 Subdivision – land containing heritage items as follows:

(a) *Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)*

(b) *Council's discretion is restricted to the following matters:*

(i) *Effects on heritage values;*

(ii) *Context and setting of the heritage item;*

(iii) *The extent to which the relationship of the heritage item with its setting is maintained within one lot.*

AND

Amend Rule 16.4.10 RD1 Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number

559.252

Summary of Decision Requested:

Retain Rule 22.4.8 RD1 Subdivision – land containing heritage items, except for the amendments sought below.

AND

Amend Rule 22.4.8 RD1 Subdivision – land containing heritage items as follows:

(a) *Subdivision of land containing a heritage item listed in Schedule 30.1 (Historic Heritage Items)*

(b) *Council's discretion is restricted to the following matters:*

(i) *Effects on heritage values;*

(ii) *Context and setting of the heritage item;*

(iii) *The extent to which the relationship of the heritage item with its setting is maintained within one lot.*

AND

Amend Rule 22.4.8 RD1 Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters, including heritage items being retained in one lot.

Decision Reasons:

- The submitter supports in part the restricted discretionary activity status of the rule relating to the subdivision of land containing heritage items and the associated matters of discretion, as these assessment criteria will assist to give effect to the related policy.
- An amendment is required to the assessment criteria to recognise that the retention of a heritage item and its setting is best achieved when they are located within the same lot.
- The inclusion of threshold creates a clear distinction for those administering the Plan as to when the activity becomes a non-complying activity.

Point Number

559.253

Summary of Decision Requested:

Retain Rule 17.4.1.5 NC1 Subdivision – land containing heritage items, except for the amendments sought below.

AND

Amend Rule 17.4.1.5 NC1 Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number

559.254

Summary of Decision Requested:

Amend Rule 18.4.6 D1 Subdivision – land containing heritage items to reflect a non-complying activity status for proposals that cannot achieve compliance with RD1.

AND

Amend Rule 18.4.6 D1 Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number 559.255

Summary of Decision Requested: **Retain** Rule 20.4.5 NCI Subdivision – land containing heritage items, except for the amendments sought below.
AND

Amend Rule 20.4.5 NCI Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number 559.256

Summary of Decision Requested: **Retain** Rule 23.4.6 NCI Subdivision – land containing heritage items, except for the amendments sought below.
AND

Amend Rule 23.4.6 NCI Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number 559.257

Summary of Decision Requested: **Amend** Rule 24.4.8 D1 Subdivision – land containing heritage items to reflect a non-complying activity status for proposals that cannot achieve compliance with Rule 24.4.8 RDI.
AND

Amend Rule 24.4.8 D1 Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number 559.258

Summary of Decision Requested: **Retain** Rule 16.4.10 NCI Subdivision – land containing heritage items, except for the amendments sought below.
AND

Amend Rule 16.4.10 NCI Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number 559.259

Summary of Decision Requested: **Retain** Rule 22.4.8 NCI Subdivision – land containing heritage items, except for the amendments sought below.
AND

Amend Rule 22.4.8 NCI Subdivision – land containing heritage items to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports the non-complying status of the rule relating to the subdivision of land containing heritage items, when the restricted discretionary activity status of the rule is not achieved.
- This stringent assessment will assist to ensure that the heritage values of the heritage item with its setting are maintained.

Point Number 559.260

Summary of Decision Requested: **Retain** Rule 16.4.9 RDI Title boundaries - Maori sites and Maori areas of significance.

Decision Reasons:

- The submitter supports Rule 16.4.9 RDI Subdivision – land containing heritage items.
- This rule will give effect to Part 2 section 6 Matters of National Importance, in particular s6(e).

Point Number 559.261

Summary of Decision Requested: **Retain** Rule 16.4.9 NCI Title boundaries – Maori sites and Maori areas of Significance.

Decision Reasons:

- The submitter supports Rule 16.4.9 NCI Title boundaries – Maori sites and Maori areas of Significance.

- This rule applies a more stringent activity status therefore giving effect to Part 2 section 6 Matters of National Importance.

Point Number 559.262

Summary of Decision Requested: **Retain** Rule 17.4.1.4 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance, except for the amendments sought below

AND

Amend Rule 17.4.1.4 RD1 Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to be consistent with other zone chapters, including sites and areas not being divided by a proposed lot boundary line.

AND

Amend Rule 17.4.1.4 RD1 Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports Rule 17.4.1.4 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance.
- This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.263

Summary of Decision Requested: **Retain** Rule 18.4.5 RD1 Title boundaries – Maaori sites and areas of Significance to Maaori, except for the amendments sought below.

AND

Amend Rule 18.4.5 RD1 Title boundaries - Maaori sites and areas of Significance to Maaori to be consistent with other zone chapters, including sites and areas not being divided by a proposed lot boundary line.

AND

Amend Rule 18.4.5 RD1 Title boundaries - Maaori sites and areas of Significance to Maaori to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports Rule 18.4.5 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance.
- This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.264

Summary of Decision Requested: **Retain** Rule 22.4.3 RD1 Title boundaries – Significant Natural Areas, Heritage Items, Maaori sites of Significance and Maaori areas of Significance, except for the amendment sought below.

AND

Amend Rule 22.4.3 RD1 Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to be consistent with other zone chapters, including sites and areas not being divided by a proposed lot boundary line.

AND

Amend Rule 22.4.3 RD1 Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports Rule 22.4.3 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance.
- This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.265

Summary of Decision Requested: **Retain** Rule 24.4.6 RD1 Title boundaries – Significant Natural Areas, Heritage Items and Archaeological sites, sites of Significance to Maaori, except for the amendments sought below.

AND

Amend Rule 24.4.6 RD1 Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to Maaori to be consistent with other zone chapters, including sites and areas not being divided by a proposed lot boundary line.

AND

Amend Rule 24.4.6 RD1 Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to Maaori to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports Rule 24.4.6 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance.
- This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.266

Summary of Decision Requested: **Retain** Rule 28.4.5 RD1 Title boundaries – Significant Natural Areas, Maaori sites of Significance, except for the amendments sought below.

AND

Amend Rule 28.4.5 RD1 Title boundaries - Significant Natural Areas, Maaori sites of Significance to be consistent with other zone chapters, including sites and areas not being divided by a proposed lot boundary line.

AND

Amend Rule 28.4.5 RD1 Title boundaries - Significant Natural Areas, Maaori sites of Significance to be consistent with the equivalent rules in other zone chapters.

Decision Reasons:

- The submitter supports Rule 28.4.5 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance.
- This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number	559.267
Summary of Decision Requested:	<p>Retain Rule 17.4.1.4 NCI Title boundaries – Significant Natural Areas, Maaori sites and Maaori areas of Significance to Maaori, except for the amendments sought below.</p> <p>AND</p> <p>Amend Rule 17.4.1.4 NCI Title boundaries - Significant Natural Areas, Maaori sites and Maaori areas of Significance to be consistent with the equivalent rules in other zone chapters, including the provision of heritage items.</p>

Point Number	559.272
Summary of Decision Requested:	Retain Rule 23.4.5 RDI Site boundaries – Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori.
Decision Reasons:	<ul style="list-style-type: none"> • The submitter supports Rule 23.4.5 RDI Title boundaries – Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori. • This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).
Point Number	559.273
Summary of Decision Requested:	Retain Rule 23.4.5 NCI Site boundaries – Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori.
Decision Reasons:	

- The submitter supports Rule 23.4.5 NCI Title boundaries – Significant Natural Areas, heritage items, archaeological sites, sites of significance to Maaori.
- This rule and the more stringent activity status will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.274

Summary of Decision Requested: Retain Rule 17.4.1.4 RD1 Title boundaries – Significant Natural Areas, Maaori sites and Areas of Significance to Maaori.

Decision Reasons:

- The submitter supports Rule 17.4.1.4 RD1 Title boundaries – Significant Natural Areas and Areas of Maaori sites and Areas of Significance to Maaori.
- This rule will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.275

Summary of Decision Requested: Retain Rule 17.4.1.4 NCI Title boundaries – Significant Natural Areas, Maaori sites and Areas of Significance to Maaori.

Decision Reasons:

- The submitter supports Rule 17.4.1.4 NCI Title boundaries – Significant Natural Areas and Maaori sites of Significance.
- This rule and the more stringent activity status will give effect to Part 2, section 6 Matters of national Importance, in particular s6(e) and 6(f).

Point Number 559.276

Summary of Decision Requested: Retain Rule 16.3.3.2 P1 Height – Building and vegetation in a battlefield view shaft area.

Decision Reasons:

- The submitter supports Rule 16.3.3.2 P1 Height – Building and vegetation in a battlefield view shaft area as this height range would allow for a reasonable sized building within the large view shafts, yet is not so large that the entire battlefield could be obscured. Therefore the heritage values of the battle sites will be retained.

Point Number 559.277

Summary of Decision Requested: Retain Rule 22.3.4.4 P1 Height – Building and vegetation in a battlefield view shaft area.

Decision Reasons:

- The submitter supports Rule 22.3.4.4 P1 Height – Building and vegetation in a battlefield view shaft area as this height range would allow for a reasonable sized building within the large view shafts, yet is not so large that the entire battlefield could be obscured. Therefore the heritage values of the battle sites will be retained.

Point Number 559.278

Summary of Decision Requested: Retain Rule 16.3.3.2 D1 Height – Building and vegetation in a battlefield view shaft area.

Decision Reasons:

- The submitter supports the discretionary activity Rule 16.3.3.2 D1 Height - Building and vegetation in a battlefield view shaft area.
- It is appreciated that as a discretionary activity the assessment can be very broad.
- This can ensure that buildings, structures or vegetation are developed in such a manner that the view of the battlefield will be protected into the future, therefore meeting the requirements of section 6 of the Resource Management Act.

Point Number 559.279

Summary of Decision Requested: Retain Rule 22.3.4.4 D1 Height – Building and vegetation in a battlefield view shaft area.

Decision Reasons:

- The submitter supports the discretionary activity Rule 22.3.4.4 D1 Height – Building and vegetation in a battlefield view shaft area.
- It is appreciated that as a discretionary activity the assessment can be very broad.
- This can ensure that buildings, structures or vegetation are developed in such a manner that the view of the battlefield will be protected into the future, therefore meeting the requirements of section 6 of the Resource Management Act.

Point Number 559.280

Summary of Decision Requested: Add a new advice note to zone rules for Land use – Effects that directs the plan reader to the signage rules relating to heritage items and Maaori sites of significance.

Decision Reasons:

- The submitter is concerned that the rules that relate to signage on heritage buildings are located within another part of the zone chapter as part of the Land use effects rules – historic heritage and may not be readily located by the plan user.
- Signage can cause adverse effects on heritage building the same as buildings can.

Point Number 559.281

Summary of Decision Requested: Add a new cultural and heritage based objective and policy to Chapter 8: Reserves as follows:

Objective – Cultural and Heritage Values

The cultural and historic heritage values of public open space, natural reserves and parks are maintained and conserved.

Decision Reasons:

- The submitter is concerned that Chapter 8: Reserves contains no Objectives and Policies in recognition of cultural or heritage values that are often prevalent within Reserves, particularly Heritage Reserves, and reserves adjacent to river or coastal locations.
- The submitter acknowledges the role of reserve management plans, however considers that just as natural values are covered by objectives and policies, cultural and heritage values should also be part of the land management processes considered under any Resource Management Act process for these important sites and meet the considerations required under section 6 of the Act.

Point Number 559.282

Summary of Decision Requested: Retain Objective 9.3.4 Heritage.

Decision Reasons:

- The submitter is supportive of the continued retention of the existing objective related to the development of the Rangitahi Peninsula.

Point Number 559.283

Summary of Decision Requested: Retain Policy 9.3.4.1 Cultural and historic sites of significance.

Decision Reasons:

- The submitter is supportive of the continued retention of the existing policies related to the development of the Rangitahi Peninsula.

Point Number 559.284

Summary of Decision Requested: Retain Policy 9.3.4.2 Heritage protection.

Decision Reasons:

- The submitter is supportive of the continued retention of the existing policies related to the development of the Rangitahi Peninsula.

Point Number 559.285

Summary of Decision Requested: Retain Chapter 12.1 How to use and interpret the rules, except for the amendments sought below.

AND

Add a new section (k) to Chapter 12.1 How to use and interpret the rules as follows:

(k) The New Zealand Archaeological Association archaeological sites are included on the planning maps for District Plan information purposes only. However these sites are subject to the requirements of the Heritage New Zealand Pouhere Taonga Act 2014. Heritage New Zealand Pouhere Taonga must be contacted regarding development on or in proximity to these sites and the need to undertake an archaeological assessment to determine the need for an archaeological authority. The Heritage New Zealand Pouhere Taonga Act 2014 protects both recorded and unrecorded archaeological sites.

Decision Reasons:

- The submitter is concerned that the New Zealand Archaeological Association (NZAA) sites are shown on the Plan planning maps for information only, yet the purpose is not discussed in the parts of the Chapter 12 that refer to the planning maps.
- The submitter considers that it needs to be highlighted in Chapter 12, through an advice note that the NZAA sites are included for information as they have the potential to impact on the natural of the proposed development and property owners and developers need to be aware of their obligations under the Heritage New Zealand Pouhere Taonga Act 2014 protects both recorded and unrecorded archaeological sites.

Point Number 559.286

Summary of Decision Requested: Retain the definition of "Ancillary rural earthworks" in Chapter 13: Definitions, subject to below.

AND

Amend rules to ensure Ancillary rural earthworks are being assessed as a restricted discretionary activity should they occur in a Maaori site or area of significance, or waahi tapu site or waahi tapu area, or the setting of a heritage item.

Decision Reasons:

- The submitter supports the definition of Ancillary rural earthworks in so far as they should be assessed at the time of works in a cultural site or area of significance, wahi tapu or wahi tapu area, or the setting of a heritage item or as recognised in the schedules of the plan, as the scale of some of the works within this definition have the potential for adverse effects.

Point Number 559.287

Summary of Decision Requested: Delete the definition of "Rural Ancillary Earthworks" in Chapter 13: Definitions.

Decision Reasons:

- The submitter considers that the definition of "Rural Ancillary Earthworks" replicates the definition for "ancillary rural earthworks".

Point Number 559.288

Summary of Decision Requested: Retain the definition of "earthworks" in Chapter 13: Definitions, subject to below.

AND

Amend rules to ensure earthworks are being assessed as a restricted discretionary activity should they occur in sites and areas of significance to Maaori.

Decision Reasons:

- The submitter supports the definition of "earthworks" as all earthworks within sites and areas of significance to Maaori are subject to resource consent.

Point Number 559.289

Summary of Decision Requested: Amend the heading of the definition of "addition or alteration" in Chapter 13: Definitions to be "addition" as follows:
~~Alteration or Addition~~

Decision Reasons:

- The submitter supports the actual definition for "addition or alteration", however considers that this definition should be a definition for additions only, rather than a definition for "addition or alteration", as there is already a separate definition for alterations.

Point Number 559.290

Summary of Decision Requested: Retain the definition of "Alteration" in Chapter 13: Definitions.

Decision Reasons:

- The submitter supports the definition of "alteration" as the breadth of works defined as an alteration will ensure the range of works that could impact on heritage values are captured for assessment as an alteration.

Point Number 559.291

Summary of Decision Requested: Retain the definition of "Historic heritage" in Chapter 13: Definitions.

Decision Reasons:

- The submitter supports the definition of "historic heritage" as it uses the same definition as section 2 of the Resource Management Act.
- This ensures consistency of consideration at the time of assessing works in relation to Appendix 30.1 (Historic Heritage Items).

Point Number 559.292

Summary of Decision Requested: Add the definition of "Historic heritage values" to Chapter 13: Definitions to have the same meaning as Part 2 of the Resource Management Act.
AND
Provide for any consequential amendments as required throughout the Proposed District Plan.

Decision Reasons:

- This undefined term is used within the Maaori sites and areas of significance – Matters of discretion earthworks rules.
- Heritage New Zealand considers that this term could be ambiguous and seeks that the term is amended to historic heritage values and has the same meaning as Part 2 of the Resource Management Act.
- This ensures consistency of consideration at the time of assessing works in relation to Maaori sites and areas of significance – Matters of discretion earthworks rules.

Point Number 559.293

Summary of Decision Requested: Delete Rule 16.3.11.3 PI All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.
- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Point Number 559.294

Summary of Decision Requested: Delete Rule 17.3.8.3 PI All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.
- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Point Number 559.295

Summary of Decision Requested: Delete Rule 18.3.10.3 PI All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.
- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Point Number 559.296

Summary of Decision Requested: Delete Rule 20.3.5.3 PI All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.
- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Point Number 559.297

Summary of Decision Requested: Delete Rule 22.3.8.3 PI All heritage items – Alterations or additions.

Decision Reasons:

- The submitter has concerns regarding the permitted activity rule related to alterations or additions.
- Concerned that that only protecting the significant physical features or specified facades of buildings has the potential for adverse effects on the heritage values of the entire building
- Works that are located out of public view or that do not involve significant features could have the potential to adversely affect or undermine heritage values.
- The rule ignores the intrinsic heritage values of the whole of the heritage items.
- Alterations and additions under this rule as a permitted activity could cumulatively impact on the overall building, not just the significant features or specified facades.
- In addition it is incorrect to assume that works that are located out of public view or that do not involve significant features are unimportant and do not have the potential to adversely affect or undermine heritage values.
- Any alterations or additions should be assessed through a resource consent process to consider the holistic impact of the proposed works on the historic heritage item, ensuring minimal loss of heritage fabric, and that the design, form, scale, workmanship, location of works and the curtilage and setting are respected.

Submitter Number: 560

Submitter: Jon Farmer

On behalf of: Te Kowhai Aerodrome

Point Number 560.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Airparks are becoming popular overseas and in New Zealand i.e. Pauanui, Whitianga and Kaipara Flats.
- Good way to build houses close to airfields for people who are not likely to make noise complaints.

Point Number 560.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Airparks are becoming popular overseas and in New Zealand i.e. Pauanui, Whitianga and Kaipara Flats.
- Good way to build houses close to airfields for people who are not likely to make noise complaints.

Submitter Number:	561	Submitter:	Tracey Lolesi
Point Number	561.1		
Summary of Decision Requested:	Amend the zoning of the 183ha site (comprising CFR 805391, CFR SA50A/762, CFR 195501, CFR SA 61B/799, CFR SA18B/1138, CFR SA 30A/356, SA40D/985, CFR SA251/176, SA26C/345, SA51/131) on East Mine Road, Huntly from Rural Zone to a multi-purpose recreation and events zone alongside a Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Educational outcomes for youth. • Significant employment opportunities. • Improved recreational living and lifestyle for residents through outdoor activities, water sports. • Great opportunity for Huntly to become destination for tourists • Most importantly the project has ability to transform Huntly. 		

Submitter Number:	562	Submitter:	Gladys Button
Point Number	562.1		
Summary of Decision Requested:	Add a cairn or plaque on Hakarimata Road to recognise the first Maaori School established in the North Waikato by Rev B.Ashwell and Heta Tarawhiti in May 1946.		
Decision Reasons:	<ul style="list-style-type: none"> • Recognition of site's historical importance. • To erect appropriate signage. • Mark the beginning of Maori education in Waikato. 		

Submitter Number:	563	Submitter:	Andrew Mowbray
Point Number	563.1		
Summary of Decision Requested:	Amend the zoning of the property at 452 Tauwhare Road, Matangi, from Business Zone to Industrial Zone. AND Amend provisions to "create a special flexible zoning so the site can move towards a Business Town Centre zoning" for the property at 452 Tauwhare Road, Matangi.		
Decision Reasons:	<ul style="list-style-type: none"> • Supports Mowbray Groups submission for 452B Tauwhare Road. • The Matangi Dairy Factory site is also wanting this zoning and is owned by the same family. • Going forward to plan for the factory site to be designated as industrial does not fit with what the vision for Matangi Village should be. 		
Point Number	563.2		
Summary of Decision Requested:	Amend the provisions to enable placement of cottages and railway houses on the property at 452 Tauwhare Road, Matangi.		
Decision Reasons:	<ul style="list-style-type: none"> • Density of houses would be significantly beyond what is presently allowed. • Matangi community happy with proposal. • Would like to get the land designated for this to happen. • See full submission for Powerpoint. 		

Submitter Number:	564	Submitter:	Mark Chrisp
Point Number	564.1		
Summary of Decision Requested:	Amend Rule 23.4.2(a)(i) - General Subdivision, as follows: <i>(i) All proposed lots must have a net site area of at least 5000 3000m².</i>		
Decision Reasons:	<ul style="list-style-type: none"> • The 5000m² minimum net site area results in a very inefficient use of land. • It is contrary to the purpose and principals of the Resource Management Act 1991 and cannot be justified in relation to section 32 of the Resource Management Act. • All of the objectives of the Proposed Waikato District Plan can easily be achieved with a minimum net area of 3,000m². • A reduction in the minimum net site area to 3,000m² will not result in the further subdivision of the vast majority of existing lots within the Country Living Zone that have already been subdivided for 'large lot' residential purposes. This is because most of the existing lots that have already been subdivided are less than 6,000m² and would therefore be ineligible for further subdivision. • Many properties that are over 6,000m² have a substantial dwelling located in the middle of the property whereby it would be impossible to further subdivide without demolishing the existing dwelling and it would be uneconomic to do so. • The relief sought provides for a more efficient use of land in relation to any 'greenfield' subdivision. • The relief sought provides for a reconfiguration of existing lots where the boundaries of two or more existing lots could be reconfigured to create one or more additional lots. 		

Submitter Number:	565	Submitter:	Rochelle Hulme
Point Number	565.1		
Summary of Decision Requested:	Delete the medium and higher density precincts from Lakeside Development Area, Te Kauwhata.		

Decision Reasons:

- The lakeside lot sizes are too small for the semi-rural area with limited infrastructure.
- It will damage the village.

Point Number

565.2

Summary of Decision Requested:

Amend Rule 16.5.9.1 C1 (a)(ii) - Subdivision Lakeside - general, by deleting A, B and C and replacing with the lot sizes in the Te Kauwhata West Residential Area Rule 16.4.3, as notified (minimum 650m2, average 875m2) or a minimum lot size of 450m2.

Decision Reasons:

- The lakeside lot sizes are too small for the semi-rural area with limited infrastructure.
- It will damage the village.

Submitter Number:

566

Submitter:

Dave Etchells

Point Number

566.1

Summary of Decision Requested:

Retain Chapter 9.2 - Te Kowhai Airpark, as notified.

Decision Reasons:

- The upgrade/enhancement to the facility is fantastic for the community in general.
- It provides interest and opportunity.
- The aviation community would be thrilled with the vision for airfield after 30 years of a mediocre facility.

Point Number

566.2

Summary of Decision Requested:

Retain Chapter 27 - Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The upgrade/enhancement to the facility is fantastic for the community in general.
- It provides interest and opportunity.
- The aviation community would be thrilled with the vision for airfield after 30 years of a mediocre facility.

Submitter Number:

567

Submitter:

Ngati Tamaoho Trust

Point Number

567.1

Summary of Decision Requested:

Amend Section 1.1 - What is a district plan?, fourth sentence of the first paragraph as follows:
...effects of land use activities. Rules set within the Plan are a minimum requirement, not an aspiration but a starting point. It must include...

Decision Reasons:

- Does not feel that the proposed district plan covers environmental future effects.

Point Number

567.2

Summary of Decision Requested:

Add a new point to Section 1.5.7.3 - Water, as follows:
clean groundwater recharge should be encouraged where soils allow.

Decision Reasons:

- No reasons provided.

Point Number

567.3

Summary of Decision Requested:

Add clause (c) to Objective 4.1.1 - Strategic, as follows:
(c) natural waterbodies are maintained or enhanced within integrated development for all towns and promote park edge development for all open spaces, especially adjacent to waterbodies.

Decision Reasons:

- No reasons provided.

Point Number

567.4

Summary of Decision Requested:

Amend Objective 4.5.12(c) - Business Town Centre - Character, as follows:
Development of town centres is designed in a functional, ~~and~~ attractive and environmentally sustainable manner serving the needs of the community.

Decision Reasons:

- No reasons provided.

Point Number

567.5

Summary of Decision Requested:

Amend Objective 4.6.1 - Economic growth of industry, as follows:
The economic growth of the district's industry is supported and strengthened in industrial zones while maintaining a healthy environment.

Decision Reasons:

- No reasons provided.

Point Number

567.6

Summary of Decision Requested:

Add a new clause (viii) to Policy 4.7.2 - Subdivision location and design, as follows:
(viii) promote park edge design that enhances the interface with urban design and public access and amenity.

Decision Reasons:

- No reasons provided.

Point Number

567.7

Summary of Decision Requested:

Add a new clause (b) to Policy 5.3.6 - Intensive farming activities, as follows:
(b) promote the use of earth-bunds and silt traps for all cropping, tree clearance and harvesting activities.

Decision Reasons:

- No reasons provided.

Point Number

567.8

Summary of Decision Requested:

Add a new clause (vii) to Policy 6.1.2 - Development, operation and maintenance, as follows:
(vii) is environmentally sustainable.

Decision Reasons:

- No reasons provided.

Point Number

567.9

Summary of Decision Requested:

Add a new clause (b) to Policy 6.1.16 - Water conservation, as follows:
(b) clean water is captured for reuse and groundwater recharge.

Decision Reasons:

- No reasons provided.

Point Number

567.10

Summary of Decision Requested:

Add a new clause (c) to Policy 7.1.8 - Tree protection, as follows:
(c) trees over 200 years old unless in poor health are automatically protected.

Decision Reasons:

- No reasons provided.

Point Number

567.11

Summary of Decision Requested:

Add to Rule 16.2.6 Notable Trees and all sections of the Proposed District Plan where notable trees are referred to, the following:
trees over 200 years old unless in poor health are automatically protected.

Decision Reasons:

- No reasons provided.

Point Number

567.12

Summary of Decision Requested:

Add the following to Section 12.1 - Introduction, as follows:
(k) Rules set within the Plan are a minimum requirement, not an aspiration but a starting point. Each activity must set how the development/activity will aspire to more than minimum requirements.

Decision Reasons:

- No reasons provided.

Point Number

567.13

Summary of Decision Requested:

Add a new condition to Rule 16.4.14 - Subdivision of esplanade reserves and esplanade strips, as follows:
must be bordered by park edge roading for safety, environment, amenity and urban design purposes.
AND
Add an additional provision for Subdivision of esplanade reserves and esplanade strips in all sections of the Proposed District Plan where esplanade reserves are referred to as follows:
must be bordered by park edge roading for safety, environment, amenity and urban design purposes.

Decision Reasons:

- Esplanade strip can be a stream, river or coastal.
- Sections backing onto a waterbody can become dumping ground.
- Road frontage and walkway adjacent to an esplanade lends to passive surveillance and a healthy environment for both the waterbody and people using it.

Point Number	567.14
Summary of Decision Requested:	Add a new matter of discretion to Rule 22.8.3 RD1- Restricted Discretionary Activities, as follows: <i>(v) <u>environmental effects</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.15
Summary of Decision Requested:	Amend Table 4.3 in Appendix 3.1 - Residential Subdivision Guidelines to include ticks for all small (s) and medium (m) for connectivity and movement networks.
Decision Reasons:	<ul style="list-style-type: none"> Over time often small developments intensify. If there is not good urban design from the outset a good outcome can never be attained.
Point Number	567.16
Summary of Decision Requested:	Amend Table 5.3 in Appendix 3.1 - Residential Subdivision Guidelines to include ticks for all small (s) for guidelines for neighbourhood character.
Decision Reasons:	<ul style="list-style-type: none"> Small developments can intensify over time and if good urban design is not achieved at the onset, it cannot be attained in the future.
Point Number	567.17
Summary of Decision Requested:	Amend Tables 6.3 in Appendix 3.1 - Residential Subdivision Guidelines to include ticks for all small (s) and medium (m).
Decision Reasons:	<ul style="list-style-type: none"> Over time often small developments intensify. If there is not good urban design from the outset, a good outcome can never be attained.
Point Number	567.18
Summary of Decision Requested:	Amend Tables 7.3 in Appendix 3.1 - Residential Subdivision Guidelines to include ticks for all small (s) and medium (m).
Decision Reasons:	<ul style="list-style-type: none"> Over time often small developments intensify. If there is not good urban design from the outset, a good outcome can never be attained.
Point Number	567.19
Summary of Decision Requested:	Amend Table 8.3 in Appendix 3.1 - Residential Subdivision Guidelines to show intention for offline stormwater treatment.
Decision Reasons:	<ul style="list-style-type: none"> No clear if wetlands and waterbodies are to be protected outside of stormwater devices and stormwater can be discharged into them only after pre-treatment. No specific decision sought but submission considers all stormwater treatment must be "offline" to any natural waterbody in the context of Section 8 of Appendix 3.1 Residential Subdivision Guidelines. No specific decision sought but submission considers wetlands should be promoted as they provide shade, terrestrial habitat and contaminant removal. Pictures in 8.3 of Appendix 3.1 Residential Subdivision Guidelines show ponds as treatment devices. Ponds are not successful in maintaining water quality. No specific decision sought, but submission considers Section 8.3 Guidelines in Appendix 3.1 Residential Subdivision Guidelines is not clear that natural wetlands/streams/ponds/watercourses are to be protected outside of stormwater devices and water can be discharged into them only following pre-treatment.
Point Number	567.20
Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no mention of sustainable development in Appendix 10: Town Centre Character Statements - 10.4 - Pokeno Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.21
Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no consideration for road contaminants being treated through vegetated swales or rain gardens in Appendix 10: Town Centre Character Statements - 10.4 - Pokeno Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.22
Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no discussion of enhancement of streams in Appendix 10: Town Centre Character Statements - 10.4 - Pokeno Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.23

Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no mention of sustainable development in Appendix 10: Town Centre Character Statements - 10.6 - Tuakau Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.24
Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no consideration for road contaminants being treated through vegetated swales or rain gardens in Appendix 10: Town Centre Character Statements - 10.6 - Tuakau Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> Does not feel that the proposed district plan covers environmental future effects.
Point Number	567.25
Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no discussion of enhancement of streams in Appendix 10: Town Centre Character Statements - 10.6 - Tuakau Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.26
Summary of Decision Requested:	Amend Planning Map 7.9 - Pukekawa, so that the extent of the area included in Plan Change 14 Franklin District does not enable development to 'be up the sides of the hill'.
Decision Reasons:	<ul style="list-style-type: none"> Pukekawa Pa is a site of significance to Ngati Tamaoho.
Point Number	567.27
Summary of Decision Requested:	Amend the planning maps for Pokeno so that land is not rezoned where: <ul style="list-style-type: none"> Land is steep and undevelopable without major earthworks. Has an impact on the Whangamarino wetland RAMSAR site or any other significant ecological area. Contains a Pa (within urban or industrial zones).
Decision Reasons:	<ul style="list-style-type: none"> Once an area is rezoned, landowners have expectation that land can be developed even when land contains ridgelines, steep gullies, wetlands and tributaries.
Point Number	567.28
Summary of Decision Requested:	Add the following policy to all town centres: <i>In a functional, attractive and environmentally sustainable manner.</i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.29
Summary of Decision Requested:	No specific decision sought, but submission questions if it is an intended omission that there is no discussion of enhancement of streams in Appendix 10.4 Town Centre Character Statements for Pokeno Team Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.30
Summary of Decision Requested:	Add the following clause to all Town Centre Objectives: <i>Natural waterbodies are maintained or enhanced within integrated development for all towns</i> AND <i>Promote park edge development for all open spaces especially adjacent to waterbodies.</i>
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.31
Summary of Decision Requested:	No specific decision sought, but submission supports the Papakainga Section.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	567.32

Summary of Decision Requested: No specific decision sought, but submission supports the landscape inclusions.

Decision Reasons:

- No reasons provided.

Point Number 567.33

Summary of Decision Requested: No specific decision sought, but submission supports the additional heritage sites.

Decision Reasons:

- No reasons provided.

Point Number 567.34

Summary of Decision Requested: **Add** a matter of discretion to Rule 22.1.3 (RD1) - Restricted Discretionary Activities, as follows:

(y) environmental effects.

Decision Reasons:

- No reasons provided.

Point Number 567.35

Summary of Decision Requested: **Add** a matter of discretion of Rule 22.1.3 (RD2) - Restricted Discretionary Activities, as follows:

(y) environmental effects.

Decision Reasons:

- Does not feel that the proposed district plan covers environmental future effects.

Point Number 567.36

Summary of Decision Requested: **Amend** Rule 22.4.1.6 Conservation lot subdivision by adding a separate box for wetland protection.

Decision Reasons:

- A wetland over 2 Ha in size is large and not many remaining and as such, does not create much of an incentive to protect remaining wetlands.
- The rule is confusing.

Point Number 567.37

Summary of Decision Requested: **Add** a new activity specific condition to Rule 22.8.2 P7 - Permitted Activities for Forestry, as follows:

appropriate silt and sediment control.

Decision Reasons:

- No reasons provided.

Point Number 567.38

Summary of Decision Requested: **Add** a new activity specific condition to Rule 22.8.2 P18 - Permitted Activities for Horticulture, as follows:

appropriate silt control through traps and bunding.

Decision Reasons:

- No reasons provided.

Submitter Number: 568

Submitter:

JoonYoung Moon

Point Number 568.1

Summary of Decision Requested: **Amend** the planning maps for Tuakau, near Geraghtys Road and Buckland Road, so that the cycleway/walkway is extended to access the Waikato River along the stop banks (refer to submission for maps of the location of the cycleway/walkway).

Decision Reasons:

- Proposed district plan cuts off the land where the cycleways are proposed from land proposed for rezoning and the land itself is marginal.
- Access to the land (for farming) will be difficult if proposed rezoning of land occurs.
- Council owned stop banks are wide enough to accommodate cycleway/walkway.
- Land adjacent to the Waikato River is 20.12m wide and is public land.
- The Waikato River is Tuakau's main attraction and is stunning in this location and the cycleway/walkway extension would enable a positive future for residents.
- Currently the only access to the Waikato River is by way of River Road which is hazardous for cyclists and pedestrians due to heavy traffic.
- Proposed extension to the cycleway/walkway would enable future connection via another walkway/cycleway to the reserve accessed from River Road.

Point Number 568.2

Summary of Decision Requested: Submitter seeks that the council purchase the land contained within the Waikato River stop banks for parkland.

Decision Reasons:

- Purchasing the land could enable the future connection via walkway/cycleway to the park accessed from River Road.
- Purchasing this land would enable the future connection via walkway/cycleway of the River access to extend along to the River Road park.
- The Proposed District Plan allows for a unique opportunity to gain land for River access, leisure activities and possibly a park.

Point Number 568.3**Summary of Decision Requested:** Amend the zoning of the land at 50 Geraghtys Road, Tuakau, from Rural Zone to Residential Zone.**Decision Reasons:**

- No detailed reasoning as to why the proposed Residential boundary location has been selected. The s32 analysis appears to rely solely on the Tuakau Structure Plan to establish the rural/residential boundary. The Tuakau Structure Plan is not explicit in its assessment of locations of zone boundaries.
- The proposed Residential zone boundary does not meet a key objective of the Tuakau Structure Plan in that it does not provide a clear edges for the town to retain its rural context.
- The proposed rezoning (of the adjacent property at 46 Geraghtys Road) will create a definite, defensible and a permanent urban edge being bounded by a Significant Natural Area and Outstanding Natural Feature.
- Based on existing technical reports (included within the s32 documentation) no geotechnical, infrastructure, archaeological, transport or landscape impact effects likely to arise from the extension of the Residential Zone which cannot be appropriately managed or mitigated.

Point Number 568.4**Summary of Decision Requested:** Delete the Industrial zoning for the Tuakau Protein site on Lapwood Road and various properties which contain existing businesses on the western side of River Road, Tuakau (refer to the map in the submission for further detail).**Decision Reasons:**

- Large Industrial area is already proposed and all industry should relocate there. Spattering of industrial areas outside of this will detrimentally affect Tuakau's future.
- Tuakau residents want to have a physical and cultural connection to the Waikato River and as River Road is the only access to the Waikato River for Tuakau, industry should be discouraged to enable a safe walkway/cycleway.
- Odorous industry should be discouraged from being located on the access to the Waikato River (River Road), near the Waikato River, the Waikato River itself and the park near the Waikato River which is also Tuakau's main tourist attraction.
- May attract industry that cannot contain adverse effects to their site only.
- Area outside rezoned boundaries is important for local amenity.
- Submitter has not identified the zoning that is sought for these properties.

Point Number 568.5**Summary of Decision Requested:** Amend the Proposed District Plan to prevent more waste facilities locating by the Waikato River near Geraghtys Road, Tuakau, (see submission for map of site).**Decision Reasons:**

- Residents do not want waste facilities adjacent to the Waikato River.
- Waste facilities are not sustainable nor environmentally friendly.

Submitter Number: 569**Submitter:**

Andrew George Reeves

Point Number 569.1**Summary of Decision Requested:** Amend the zoning of the land at 461 Harrisville Road, Pukekohe, from Rural Zone to Country Living Zone.**Decision Reasons:**

- The surrounding area to the north and west within the Auckland Council territory has been zoned Future Urban Zone under the Auckland Unitary Plan.
- The Future Urban Zone could result in residential housing and therefore residential environment in this locality rather than open rural space.
- The property does not contain any prime soils.
- The property is in close proximity to the village of Buckland and town of Pukekohe which means that a change of zone from Rural to Country Living is a logical progression in zoning.

Submitter Number: 570**Submitter:**

Raymond & Cheryl Higgins

Point Number 570.1**Summary of Decision Requested:** Amend the Proposed District Plan to allow construction of a mini house a little larger than 70m2 on the site at 321 Whiriwhiri Road, Waiuku.**Decision Reasons:**

- To have a building bigger than a granny flat (i.e. 70m2).

Submitter Number: 571**Submitter:**

Michael James Honiss

On behalf of: MK & NL Honiss**Point Number** 571.1**Summary of Decision Requested:** Retain Rule 22.4.1.6 Conservation lot subdivision; specifically the minimum 1ha of significant natural area required for a conservation lot subdivision.**Decision Reasons:**

- Supports the reduction in contiguous area to a minimum of 1 Ha.

- The submitter has already undertaken significant investment in enhancement of a gully area identified as "significant" on their property and long tailed bats roost in the gully area.
- Strongly endorse Council's initiatives in protecting the significant flora and fauna.

Submitter Number:	572	Submitter:	Litania Liava'a
Point Number	572.1		
Summary of Decision Requested:	Amend the planning maps for Tuakau near Geraghtys Road and Buckland Road, so that the cycleway/walkway is extended to access the Waikato River along the stop banks (refer to submission for maps of the location of the cycleway/walkway).		
Decision Reasons:	<ul style="list-style-type: none"> • Proposed district plan cuts off the land where the cycleways are proposed from land proposed for rezoning and the land itself is marginal. • Access to the land (for farming) will be difficult if proposed rezoning of land occurs. • Council owned stop banks are wide enough to accommodate cycleway/walkway. • Land adjacent to the Waikato River is 20.12m wide and is public land. • The Waikato River is Tuakau's main attraction and is stunning in this location and the cycleway/walkway extension would enable a positive future for residents. • Currently the only access to the Waikato River is by way of River Road which is hazardous for cyclists and pedestrians due to heavy traffic. • Proposed extension to the cycleway/walkway would enable future connection via another walkway/cycleway to the reserve accessed from River Road. 		
Point Number	572.2		
Summary of Decision Requested:	Submitter seeks that council purchase the land contained within the Waikato River stop banks for parkland.		
Decision Reasons:	<ul style="list-style-type: none"> • Purchasing the land could enable the future connection via walkway/cycleway to the park accessed from River Road. • Purchasing this land would enable the future connection via walkway/cycleway of the River access to extend along to the River Road park. • The Proposed District Plan allows for a unique opportunity to gain land for River access, leisure activities and possibly a park. 		
Point Number	572.3		
Summary of Decision Requested:	Delete the Industrial zoning for the Tuakau Protein site on Lapwood Road and various properties which contain existing businesses on the western side of River Road, Tuakau (refer to the map in the submission for further detail).		
Decision Reasons:	<ul style="list-style-type: none"> • Large Industrial area is already proposed and all industry should relocate there. Spattering of industrial areas outside of this will detrimentally affect Tuakau's future. • Tuakau residents want to have a physical and cultural connection to the Waikato River and as River Road is the only access to the Waikato River for Tuakau, industry should be discouraged to enable a safe walkway/cycleway. • Odorous industry should be discouraged from being located on the access to the Waikato River (River Road), near the Waikato River, the Waikato River itself and the park near the Waikato River which is also Tuakau's main tourist attraction. • May attract industry that cannot contain adverse effects to their site only. • Area outside rezoned boundaries is important for local amenity. 		
Point Number	572.4		
Summary of Decision Requested:	Amend the Proposed District Plan to prevent more waste facilities locating by the Waikato River near Geraghtys Road, Tuakau (see submission for map of site).		
Decision Reasons:	<ul style="list-style-type: none"> • Residents do not want waste facilities adjacent to the Waikato River. • Waste facilities are not sustainable nor environmentally friendly. 		

Submitter Number:	573	Submitter:	Peter Gilbert
Organisation:	LPG Association of New Zealand		
Point Number	573.1		
Summary of Decision Requested:	Delete the quantity limits for hazardous substances throughout the Proposed District Plan; AND Consequently amend the hazardous substances provisions to comply with the Resource Management Act so that they manage hazardous substances on a site specific basis, only when the Health and Safety at Work Act (2015) or the Hazardous Substances and New Organisms Act 1996 controls are considered insufficient. The sections affected include:		
Decision Reasons:	<ul style="list-style-type: none"> • Issues: Management of Hazardous Substances • Section 32 Report: 5.3 - Objective - Hazardous Substances • Chapter 10.1 - Hazardous substances • Rules • Appendix 05 - Table 5.1 - Activity status table - permitted activity thresholds. <ul style="list-style-type: none"> • The Resource Legislation Amendment Act (2017) made changes to how district plans deal with hazardous substances (sections 30 and 31) such that Council only place controls where they are necessary (i.e. not covered by HSNO or HSWA) in any particular case. As such, Table 5.1 and the imposition of general controls is not in accordance with the Resource Legislation Amendment Act (2017). • The submission references the Ministry for the Environment – Resource Legislation Amendments 2017 – Fact sheet 2 and a copy of this is attached with the submission. • The submission notes that the s32 report for the proposed waikato district plan mirrors that of Christchurch City Council where the Independent Hearings Panel required a revision be made to the s32 report as a part of an interim ruling. A copy of the decision made after the revised s32 report was undertaken is attached to the submission. 		

Submitter Number:	574	Submitter:	TaTa Valley Limited
Point Number	574.1		
Summary of Decision Requested:	<p>Amend the Proposed District Plan in order to:</p> <ul style="list-style-type: none"> • Represent the most appropriate means of achieving the purpose of the Resource Management Act 1991; • Give effect to the Waikato Regional Policy Statement; and • Meet the requirements of the Resource Management Act 1991 including but not limited to section 32. <p>AND</p> <p>Any consequential amendments and other relief to give effect to the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided. 		
Point Number	574.2		
Summary of Decision Requested:	<p>Amend the Proposed District Plan to simplify it and to represent good plan drafting practice, including (but not limited to) the following examples:</p> <ul style="list-style-type: none"> • Have the objectives and policies of the zone in the same chapter as the zone rules to enable "cascade" principles. • Replace "activity specific conditions" with "activity specific standards" for permitted, controlled and restricted discretionary activities. • A single infringement of a permitted activity "condition" be classified as a controlled or restricted discretionary activity rather than a discretionary activity. <p>AND</p> <ul style="list-style-type: none"> • Any consequential amendments and other relief to give effect to the matters raised in the submission. 		
Decision Reasons:	<ul style="list-style-type: none"> • The objectives and policies are separated from methods and is unclear how "cascade" principals apply. • Unclear what is meant by the term "conditions", when they appear to be "standards". • Instances where permitted activities not meeting one "condition" become discretionary activities which does not represent good practice or justified in the s32 reporting. 		
Point Number	574.3		
Summary of Decision Requested:	<p>Amend the zoning for parts of the land at 242 Bluff Road, Pokeno, from Rural Zone to Resort Zone (refer to the submission for maps showing the proposed areas - TaTa Valley Precinct Plan - Appendix A of the submission).</p> <p>AND</p> <p>Any consequential amendments and other relief to give effect to the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Seeking a new zoning for the site, being Resort Zone so that the envisioned development of the site better aligns with the objectives, policies and rules while also providing for the future development and operation of the site. 		
Point Number	574.4		
Summary of Decision Requested:	<p>Amend the zoning for parts of the land at 35 Trig Road, Pokeno, from Rural Zone to Resort Zone</p> <p>AND</p> <p>Identify the property as part of Precinct 2.</p> <p>(Refer to the submission for maps showing the proposed rezoning and Precinct areas - TaTa Valley Precinct Plan - Appendix A of original submission).</p> <p>AND</p> <p>Any consequential amendments and other relief to give effect to the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Include the site in the proposed Resort Zone. 		
Point Number	574.5		
Summary of Decision Requested:	<p>Add new provisions to the Proposed District Plan for the Resort Zone (as a new Chapter 29).</p> <p>See Appendix A of the submission for provisions sought and Appendix B of the submission for the supporting s32AA report.</p> <p>AND</p> <p>Any consequential amendments and other relief to give effect to the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • A new Resort Zone will enable the development of the TaTa Valley resort while recognising areas of high natural value and managing potential adverse effects of the development and operation of the resort activities. • Acknowledges the site's rural environment and it is the intention to develop the site in a way that retains the quiet nature and rural character of the site. Accordingly, a number of Rural Zone rules of the PDP have been used as a base for the development of the proposed Resort Zone. These are highlighted green in Appendix A of the original submission. 		
Point Number	574.6		
Summary of Decision Requested:	<p>Delete the Significant Amenity Landscape from the property at 242 Bluff Road, Pokeno.</p> <p>AND</p> <p>Any consequential amendments and other relief to give effect to the matters raised in the submission.</p>		
Decision Reasons:			

- The area of the Significant Amenity Landscape on the submitter's land appears to be a rollover of the previous District Plan notation with no ground truthing undertaken.
- An expert assessment has been prepared by Rob Pryor, Landscape Architect (LA4 Landscape Architects) which concludes that attributes onsite are not aligned to those described in the study and the Significant Amenity Landscape should be removed from the site (attached as Appendix C to the submission).
- The proposed Resort Zone provisions include amenity values as matters of discretion for a number of activities and proposed Objective 29.1.2 and associated policies includes consideration of amenity effects (these are detailed in Appendix A to the submission).

Point Number 574.7

Summary of Decision Requested: **Amend** the Proposed District Plan provisions where required to reflect the new Resort Zone for the TaTa Valley site.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- It is proposed to contain all relevant provisions of the Plan within one chapter; however, there are still provisions that will continue to apply in other chapters being Chapter 14 (Infrastructure and Energy), and Appendix 5 (Hazardous Substances). Should there be a relevant chapter that the submitter has not identified changes to reflect this new zone, the submitter seeks the opportunity to update such a Chapter accordingly.

Point Number 574.8

Summary of Decision Requested: **Amend** Section 1.4.3.1 (a) Rural activities, as follows:
Productive rural activities are those activities that use rural resources for economic gain or which cannot be carried out easily or appropriately in an urban setting. Farming activities, including dairy, dry stock, horse breeding/training, honey production, horticulture, pig and poultry, mining, and forestry are all significant industries in economic terms for the Waikato district. These activities also provide tourism opportunities to showcase the district's rural character and activities.
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Seeks additional wording to reflect that productive rural activities can also be important opportunities for rural tourism that builds on the Waikato's rural character.

Point Number 574.9

Summary of Decision Requested: **Retain** Policy 3.2.8 - Incentivise subdivision

Decision Reasons:

- Supports Policy 3.2.8 regarding the incentives for subdivision.

Point Number 574.10

Summary of Decision Requested: **Amend** Section 3.2 - Significant Natural Areas and related rules, to apply a bespoke approach for the management of indigenous biodiversity on the TaTa Valley site as outlined in the proposed provisions (refer to Appendix A of the submission).
AND
Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Opposes the approach (including rules) to the management of Significant Natural Area's on their land and seeks the application of a bespoke approach to the management of indigenous biodiversity and Significant Natural Area's on the TaTa Valley Resort site.
- Approach recognises that some areas of indigenous biodiversity will be removed to allow for development of the resort but overall biodiversity across the site will be maintained through a combination of ecological mitigation, enhancement, offset, compensation and protection.
- Submission notes that proposed areas of Significant Natural Areas for removal are identified on the Precinct Plan (Areas A and B), attached to the submission as Appendix A.
- Submission also notes that this approach is informed by a report from Wildlands Consultants Ltd.

Point Number 574.11

Summary of Decision Requested: **Amend** the Proposed District Plan to include a schedule that reflects the outcomes of the Waikato District Landscape Study, which notes the attributes and features that lend itself to the Significant Amenity Landscape status.

OR

Delete all Significant Amenity Landscapes from the Proposed District Plan including associated objectives, policies in Section 3.4 and rules that reference Significant Amenity Landscapes.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Objectives and policies in 3.4 reference 'attributes' and 'features'. The significant amenity landscapes and these attributes should be included in a schedule to allow for resource consents to be assessed against the relevant objectives and policies in Section 3.4. Waikato District Landscape Study was prepared to support the mapping of the

Point Number 574.12

Summary of Decision Requested: **Amend** Policy 3.4.4 (a) The relationships of Maaori with their resources and land, if Significant Amenity Landscapes are retained in the Proposed District Plan, by elaborating on ways in which the relationship of Maaori with Significant Amenity Landscapes can be provided for.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Policy 3.4.4(a) does not state how the relationship can be provided for and this creates uncertainty for applicants and processing planners when assessing a consent against this policy.

Point Number 574.13

Summary of Decision Requested: **Delete** the definition of Significant Natural Area in Chapter 13 Definitions, and replace with a new definition that is more descriptive as to what a Significant Natural Area is.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Significant Natural Areas can be comprised of significant indigenous vegetation, exotic vegetation and significant habitats of indigenous fauna. The current definition just directs users back to the planning maps, and as such is insufficient.

Point Number 574.14

Summary of Decision Requested: **Amend** the definition for "Travellers' Accommodation" in Chapter 13 Definitions, as follows:

...and recreation facilities for the use of the guests staying at the site. It includes hotels...

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- It is commonplace for members of the public to use certain amenities or facilities at accommodation whilst not necessarily staying onsite (e.g. hotel restaurant).

Point Number 574.15

Summary of Decision Requested: **Add** a definition to Chapter 13 Definitions or "Special Event", as follows:

A temporary event that exceeds the permitted noise standard of the Resort Zone.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The definition will enable these types of activities to be identified and referred to within the Resort Zone.

Point Number 574.16

Summary of Decision Requested: **Amend** the definition for "Temporary Event" in Chapter 13 Definitions, as follows:

Means a social, cultural or recreation event ~~that has a duration of less than 72 hours~~, including entertainment events, carnivals, festivals, fairs, markets, and exhibitions, and associated temporary buildings and car parks.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Reference to duration is more appropriately included in the permitted activity standards, and as such should be removed from the definition.

Point Number 574.17

Summary of Decision Requested: **Amend** the Proposed District Plan as follows:

Chapter ~~29~~ 30; Appendices

AND

Chapter ~~30~~ 31; Schedules

AND

All references to these chapters within the Proposed District Plan as required.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Consequential amendments to Chapters 29 and 30 to re-number these to Chapter 30 and 31 are required due to the proposed new Chapter 29 (Resort Zone).

Point Number 574.18

Summary of Decision Requested: **Retain** the provisions in the Rural Zone that have been included in the new Resort Zone provisions as set out in Appendix A of the submission.

AND

Amend provisions for the proposed Resort Zone as a consequence of any changes to the Proposed District Plan, including, the Rural Zone chapters, to ensure consistency and achievement of the outcomes sought by TaTa Valley Limited.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The proposed Resort Zone has taken a number of relevant rules from the Proposed Rural Zone chapter and applied these to the Proposed Resort Zone for consistency and acknowledgement of its location in the Rural environment. TaTa Valley Limited supports these provisions and seeks their retention.

- Should the Proposed Rural Zone rules change as a result of submissions and/or the hearing subsequently the rules of the Resort Zone may also need changing.

Point Number 574.19

Summary of Decision Requested: **Retain** the second sentence of Section 1.4.3.1 (b) Rural activities, regarding recreational use.

Decision Reasons:

- The recreational use of the rural environment is also important to the district, with activities such as hunting, fishing, tramping, and cycling being very important in terms of tourism.

Point Number 574.20

Summary of Decision Requested: **Amend** Section 3.2 Significant Natural Areas and associated rules, to provide for greater flexibility and to enable development subject to appropriate mitigation or offsetting.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Considers that objectives and policies (except for 3.2.8) are overly restrictive.

Point Number 574.21

Summary of Decision Requested: **Amend** the definition of "Informal Recreation" in Chapter 13 Definitions, as follows:

Means any activity whose primary aim is the enjoyment of leisure of a primarily non-competitive, casual nature. It includes amenity and conservation plantings, children's play areas, shelters, and public toilets ~~and other buildings necessary for the maintenance of the park.~~

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- It is not appropriate to provide for "other buildings necessary for the maintenance of the park" because this is too loose of a statement.
- There are rules in place in regard to bulk and location of buildings and it is considered that any buildings should be considered in accordance with those rules.
- Deleting the reference in the definition will avoid large buildings being built as of right under this definition.

Point Number 574.22

Summary of Decision Requested: **Add** a definition to Chapter 13 Definitions, for "Workers Accommodation", as follows:

Means a dwelling for people whose duties require them to live onsite. This definition includes seasonal workers.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- The operation of the proposed Resort and other activities is likely to require some staff to live onsite and as such, a definition is required.

Point Number 574.23

Summary of Decision Requested: **Add** a definition to Chapter 13 Definitions for "Outdoor Recreation", as follows:

Physical activity undertaken in outdoors or natural settings to connect to the outside environment and whose primary aim is the enjoyment of leisure. Activities include: Walking and cycling, bush walks, bird watching, mini golf, paintball, zip lining, golf driving range.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- Definition will enable these types of activities to be identified and referred to within the Resort Zone.

Point Number 574.24

Summary of Decision Requested: **Add** a definition to Chapter 13 Definitions, for "Recreation Facility", as follows:

A facility where the primary purpose is to provide for outdoor recreation activities.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- This definition is linked to Outdoor Recreation activities and relates to a facility required to undertake Outdoor Recreation activities.

Point Number 574.25

Summary of Decision Requested: **Add** a definition to Chapter 13 Definitions, for "Entertainment Facility", as follows:

A facility used for entertainment, including: cinema, showground, performance/cultural venue.

AND

Any consequential amendments and other relief to give effect to the matters raised in the submission.

Decision Reasons:

- This definition will enable these facilities to be identified and referred to within the Resort Zone.

Submitter Number:	575	Submitter:	Fulton Hogan Limited
Point Number	575.1		
Summary of Decision Requested:	<p>Delete the definitions for 'Aggregate extraction activities', 'Extractive industry' and 'Mineral extraction and processing' in Chapter 13: Definitions;</p> <p>AND</p> <p>Add a new definition for 'Mineral and aggregate extraction activities' to Chapter 13 Definitions as follows (or words to similar effect):</p> <p><i>Mineral and aggregate extraction activities mean those activities associated with mineral and aggregate extraction, including:</i></p> <p><i>g) excavation, blasting, processing, (crushing, screening, washing and blending);</i></p> <p><i>b) the storage, distribution and sale of minerals or aggregates by wholesale to industry or by retail;</i></p> <p><i>c) ancillary earthworks;</i></p> <p><i>d) the removal and deposition of overburden;</i></p> <p><i>e) treatment of stormwater and wastewater;</i></p> <p><i>f) landscaping and rehabilitation work, including cleanfilling;</i></p> <p><i>g) ancillary buildings and structures; and</i></p> <p><i>h) residential accommodation necessary for security purposes.</i></p> <p>AND</p> <p>Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • There are three different definitions in the PDP covering a range of extractive industries: aggregate extraction activities, mineral extraction and processing, and the extractive industry. Having three separate definitions adds unnecessary confusion which can be avoided by removing the superfluous definitions and retaining only one for 'mineral and aggregate extraction activities' as proposed. 		
Point Number	575.2		
Summary of Decision Requested:	Retain Objective 3.2.1 - Significant Natural Areas.		
Decision Reasons:	<ul style="list-style-type: none"> • Supports the aim of protection SNAs throughout the district, provided such overlays are used appropriately and without limiting the commercial viability of legally established quarries. 		
Point Number	575.3		
Summary of Decision Requested:	<p>Retain Objective 3.3.1 Outstanding natural features and landscapes, except for the amendments sought below</p> <p>AND</p> <p>Amend Objective 3.3.1 - Outstanding Natural Features and Landscapes, as follows (or words to similar effect):</p> <p><i>(a) Outstanding Natural Features and Outstanding Natural Landscapes and their attributes are recognised and protected from inappropriate subdivision, use and development <u>excluding any legally established mineral or aggregate extraction activities.</u></i></p> <p>AND</p> <p>Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • Fulton Hogan support the objective to recognise and protect ONFAL and SAL in the district as they may make up character which Waikato District is known for. • Seek amendments as the proposed district plan includes Outstanding Natural Features, Outstanding Natural Landscapes and Significant Amenity Landscapes over existing lawfully established quarries which limits the ability for expansion of these quarries, which will hinder the financial prosperity of the same. • This could cause social and economic harm to the company and community. • The proposed amendment is to ensure that these are sufficiently safeguarded. This is also in line with the RPS, which provides specific protection to mineral extraction activities. 		
Point Number	575.4		
Summary of Decision Requested:	Retain Objective 3.4.1, provided that the Significant Natural Areas, Outstanding Natural Features and Outstanding Natural Landscapes are removed as sought elsewhere in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • Fulton Hogan support the objective to recognise and protect SAL in the district as they make up character which Waikato District is known for. • Seek amendments as the proposed district plan includes Outstanding Natural Features, Outstanding Natural Landscapes and Significant Amenity Landscapes over existing lawfully established quarries which limits the ability for expansion of these quarries, which will hinder the financial prosperity of the same. • This could cause social and economic harm to the company and community. 		
Point Number	575.5		
Summary of Decision Requested:	<p>Retain Objective 5.4.1- Minerals and extractive industries, except for the amendments sought below</p> <p>AND</p> <p>Amend Objective 5.4.1 - Minerals and extractive industries, as follows (or words to similar effect):</p>		

Mineral resource use and mineral and aggregate extraction activities provides economic, social and environmental benefits to the district and these activities are protected.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Fulton Hogan support this objective based on the fact that it provides a level of protection for the mineral resource industry.
- By inserting the proposed words, the protection is strengthened which is key, given that this industry is vital to this district and contributes an important share of its GDP.
- This approach is supported by the RPS, particularly Objective 3.10 and Policies 4.4 and 6.8, which specifically protect regionally significant industries and recognise the importance of mineral extraction to sustain anticipated regional growth.

Point Number

575.6

Summary of Decision Requested:

Retain Policy 3.2.2 (b) Identify and Recognise, except for the amendments sought below.

AND

Amend Policy 3.2.2 (b) Identify and Recognise, as follows (or words to similar effect):

(b) Recognise and protect Significant Natural Areas by ensuring the characteristics that contribute to their significance are not adversely affected by activities other than mineral and aggregate extraction.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Fulton Hogan supports the intent of the policy but seeks amendments, noting that the RPS specifically protects mineral extraction activities, which is currently not achieved by the proposed wording of Policy 3.2.2.
- Proposed amendments make it clear that extraction activities may removal stands of indigenous vegetation without impacting on the characteristics that contribute to the significance of SNA.
- While not a matter for the relief sought on this submission point, the submission notes that Fulton Hogan request that the SNA overlays imposed over its properties are removed in their entirety, so as to ensure that the commercial viability of these quarries are not unreasonably obstructed.

Point Number

575.7

Summary of Decision Requested:

Retain Policy 3.2.3 Management hierarchy, except for the amendments sought below.

AND

Amend Policy 3.2.3 Management hierarchy, as follows:

(i) avoiding the significant adverse effects of vegetation clearance and the disturbance of habitats unless specific activities need to be enabled such as mineral and aggregate extraction activities.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Support the intent of this policy but concerned that it would hinder the lawful operations of existing quarries. Amendment is sought as the removal of indigenous forestry may be necessary to support growth of the district and region.

Point Number

575.8

Summary of Decision Requested:

Retain Policy 3.2.4 Biodiversity offsetting.

Decision Reasons:

- Supports the use of offsetting noting that mineral and aggregate extraction activities can create adverse effects on significant natural areas.
- Also support the signal that applications that may result in any adverse effects on any SNAs or indigenous biodiversity outside an SNA be allowed to be offered by a resource consent applicant.

Point Number

575.9

Summary of Decision Requested:

Retain Policy 3.2.7 Managing Significant Natural Areas, except for the amendments sought below.

AND

Amend Policy 3.2.7 (a)(v) Managing Significant Natural Areas, as follows (or words to similar effect):

(v) avoiding ~~physical and~~ legal fragmentation

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Fulton Hogan support a policy that sets out the management of Significant Natural Areas.
- There are instances where significant natural areas may be physically separated due to expansion in lawfully established quarries. Proposed amendment would still safeguard significant natural areas while ensuring that extractive industries near significant natural areas can stay viable.
- While not a matter for the relief sought on this submission point, the submission notes that Fulton Hogan request that the SNA overlays imposed over its properties are removed in their entirety, so as to ensure that the commercial viability of these quarries are not unreasonably obstructed.

Point Number

575.10

Summary of Decision Requested:

Retain Policy 3.3.2 - Recognising values and qualities, provided that the Significant Natural Areas, Outstanding Natural Features and Outstanding Natural Landscapes are removed as sought elsewhere in the submission.

Decision Reasons:

- Supports the recognition of values and qualities of the Outstanding Natural Features and Outstanding Natural Landscapes but seeks to remove the overlays from the Waingaro quarry.
- Proposed overlays will unreasonably restrict the ability to operate commercial aggregate extraction activities at this site. It further risks that the existing resource is sterilised, as it will become very difficult to expand the quarry's footprint, which is detrimental not only to Fulton Hogan but to the district as a whole, which relies on the extractive industry for economic development and growth.

Point Number 575.11

Summary of Decision Requested: **Retain** Policy 3.3.3 Protection from inappropriate subdivision, use and development, provided that the Significant Natural Areas, Outstanding Natural Features and Outstanding Natural Landscapes are removed as sought elsewhere in the submission.

Decision Reasons:

- Supports the recognition of values and qualities of the Outstanding Natural Features and Outstanding Natural Landscapes but seeks to remove the overlays from the Waingaro quarry.
- Proposed overlays will unreasonably restrict the ability to operate commercial aggregate extraction activities at this site. It further risks that the existing resource is sterilised, as it will become very difficult to expand the quarry's footprint, which is detrimental not only to Fulton Hogan but to the district as a whole, which relies on the extractive industry for economic development and growth.

Point Number 575.12

Summary of Decision Requested: **Retain** 3.3.4 Policy The relationships of Maaori with natural resources and land, provided that the Significant Natural Areas, Outstanding Natural Features and Outstanding Natural Landscapes are removed as sought elsewhere in the submission.

Decision Reasons:

- Supports the recognition of values and qualities of the Outstanding Natural Features and Outstanding Natural Landscapes but seeks to remove the overlays from the Waingaro quarry.
- Proposed overlays will unreasonably restrict the ability to operate commercial aggregate extraction activities at this site. It further risks that the existing resource is sterilised, as it will become very difficult to expand the quarry's footprint, which is detrimental not only to Fulton Hogan but to the district as a whole, which relies on the extractive industry for economic development and growth.

Point Number 575.13

Summary of Decision Requested: **Retain** Policy 3.4.3 Maintaining and enhancing Significant Amenity Landscapes, provided that the Significant Amenity Landscape overlay is removed, as sought elsewhere in the submission.

Decision Reasons:

- Supports intent to protect Significant Amenity Landscapes across the district but, seeks removal of the overlay from the Tuakau Quarry (subject to a separate submission point).

Point Number 575.14

Summary of Decision Requested: **Retain** Policy 5.4.2 Access to minerals and extractive industries, except for the amendments sought below
AND
Amend Policy 5.4.2 (a) and (b) Access to minerals and extractive industries, as follows (or words to similar effect):

- a. *Enable extractive industries provided that adverse effects are avoided, remedied or mitigated insofar as it is reasonable and practicable while still ensuring that the industry remains viable.*
- b. *Protect access to, and extraction of, mineral resources by:*
 - i. *Identifying lawfully established extractive industries in or outside of Aggregate Extraction Areas and Coal Mining Areas on planning maps;*
 - ii. *Identifying the site of a potential extractive industry within or outside of an Aggregate Resource Area on planning maps;*

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Submission supports the policy but seeks amendments as the protection afforded by the policy only extends to existing quarries and not new extractive industries.
- It provides no protection to new extractive industries, as such properties would have to apply for a plan change.
- Aggregate is a significant and economically vital natural resource and contributes to the economic and social wellbeing of the area.

Point Number 575.15

Summary of Decision Requested: **Amend** Rule 22.1.5 NC2 Non-Complying Activities, as follows (or words to similar effect):
(a) A new or not yet lawfully existing, (as at the date this plan became operative), extractive industry proposed to be located within all or part of any of the following:...
(i) Outstanding Natural Feature;
(ii) Outstanding Natural Landscape;
(iii) High Natural Character Area;
(iv) Outstanding Natural Character Area.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Fulton Hogan opposes Rule 22.1.5 as it restricts their operations from growing in the future and seeks amendments so that existing extraction activities (like the Waingaro Quarry) are not unreasonably hindered should the overlay remain. It will still ensure that no new quarries are established in Outstanding Natural Feature; Outstanding Natural Landscape areas, which is presumed to be the key intent of the Rule.
- Submission notes that there are separate relief sought to have the respective overlays removed, elsewhere in the submission.

Point Number 575.16

Summary of Decision Requested: **Add** a new rule to Section 22.2.1 - Noise, (22.2.1.4), as follows (or words to similar effect):

NOISE – MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

Any noise created by a mineral or aggregate extraction activities is permitted provided that if measured at the notional boundary of any dwelling which existed at [insert date of plan becoming operative], does not exceed:

- 55dBA (L₁₀) 7am to 7pm Monday to Friday;
- 55dBA (L₁₀) 7am to 6pm Saturday;
- 50dBA (L₁₀) 7pm to 10pm Monday to Friday;
- 50dBA (L₁₀) 7am to 6pm Sundays and Public Holidays;

e. 45dBA (L₁₀) and 70dBA (L_{max}) at all other times including Public Holidays.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Submission states preference for rules currently in the Operative District Plan and as such, seek to add the new rule to define the effects anticipated and accepted and to safeguard both the industry as well as the surrounding properties (insofar as reasonable and practicable). This is particularly important in relation to effects relating to noise, dust and vibration, as these are key elements of an activity of this kind.

Point Number 575.17

Summary of Decision Requested: **Add** a new rule - Mineral and aggregate extraction activity - vibrations and blasting rules, as follows (or words to similar effects):

VIBRATION AND BLASTING – MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

- The measurement of blast noise (airblast) and ground vibration from blasting shall be carried out in accordance with best practice standards.
- The noise created by the use of explosives measured at a notional boundary of 20 metres from occupied dwellings shall not exceed a peak overall sound pressure of 128 dB.
- Blasting shall be confined to two occasions per day except where necessary for safety reasons.
- Where blasting is irregular and the occupiers of neighbouring sites could be alarmed, they shall be advised of pending blasts, at least one hour before any such blast.
- When blasting, the limit of particle velocity (peak particle velocity) measured on any foundation of an adjacent occupied building not connected with the site, or suitable location adjacent to the building, shall not exceed 25mm/second for commercial buildings or 10mm/second for dwellings and buildings of similar design.
- Every blast shall be recorded with particular attention to details of charge weight and delay practice. Monitoring using reliable and appropriate methods representative of all blasts, at varying distances and various sites of different sensitivity shall be carried out to ensure that clauses ii and vi above are complied with. Blast records and monitoring results shall be made available to the Council on request.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Submission states preference for rules currently in the Operative District Plan and as such, seek to add the new rule to define the effects anticipated and accepted and to safeguard both the industry as well as the surrounding properties (insofar as reasonable and practicable). This is particularly important in relation to effects relating to noise, dust and vibration, as these are key elements of an activity of this kind.

Point Number 575.18

Summary of Decision Requested: **Add** a new rule - Mineral and aggregate extraction activity - air emission rules, as follows (or words to similar effect):

AIR EMISSIONS – MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

Subject to any resource consent which may have been obtained, dust or any other airborne contaminant shall not be discharged at a level that is likely to cause a nuisance or affect the amenity values of any property in the area.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Submission states preference for rules currently in the Operative District Plan and as such, seek to add the new rule to define the effects anticipated and accepted and to safeguard both the industry as well as the surrounding properties (insofar as reasonable and practicable). This is particularly important in relation to effects relating to noise, dust and vibration, as these are key elements of an activity of this kind.

Point Number 575.19

Summary of Decision Requested: **Retain** Rule 22.2.3.1 (i) Earthworks- General except for the amendments sought below

AND

Amend Rule 22.2.3 (a)(i) Earthworks as follows (or words to similar effect):

(i) Ancillary rural and mineral and aggregate extraction earthworks;

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Earthworks are a natural part of extracting minerals and aggregate. Without stripping the overburden/topsoil, you cannot extract the underlying aggregate.
- It is important that the industry is able to carry out ancillary earthworks as a Permitted Activity to avoid unnecessary cost and delay of expansion.
- With appropriate conditions in place, any effects created by these types of activities will still be able to be appropriated managed.

Point Number 575.20

Summary of Decision Requested: **Retain** Rule 22.2.3.4 Earthworks within Landscape and Natural Character Areas

OR

Amend Rule 22.2.3.4 Earthworks if the Significant Natural Areas, Outstanding Natural Features and Outstanding Natural Landscapes are not removed from Fulton Hogan lawfully existing quarries as sought elsewhere in the submission.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Has no opposition to the rule in principal but seeks removal of the overlays from existing quarries.

Point Number 575.21

Summary of Decision Requested: **Retain** Rule 22.3.7.2 (a) Building setback sensitive land use except for the amendments sought below

AND

Amend Rule 22.3.7.2 (a) Building setbacks sensitive land use, as follows (or word to similar effect):

(a) Any building for a sensitive land use must be set back a minimum of...

(iv) 200m from an Aggregate Extraction Area, mineral or aggregate extraction activities containing a sand resource;

(v) 500m from an Aggregate Extraction Area, mineral or aggregate extraction activities containing a rock resource;...

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Mineral and aggregate extraction can result in effects which give rise to reverse sensitivity.
- By ensuring that appropriate setback rules apply not only to those quarries which are subject to the proposed overlays but also to others (including future quarries which would need to apply for a Plan change to have the same level of protection), this will provide sufficient safeguards for the industry going forward from reverse sensitivity.

Point Number 575.22

Summary of Decision Requested: **Add** a new rule - regarding subdivision, as follows (or words to similar effect):

ALLOTMENT BOUNDARY – MINERAL AND AGGREGATE EXTRACTION ACTIVITIES

Subdivision is a restricted discretionary activity if the boundary of every allotment is drawn so that it is within:

(a) 200m of the boundary of a lawfully established mineral and aggregate extraction activity used for sand extraction; and

(b) 500m of the boundary of a lawfully established mineral and aggregate extraction activity used for rock extraction.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- In order to safeguard existing quarry operations, the proposed rule sought will limit the risk of creating reverse sensitivity effects by ensuring that Fulton Hogan are considered an affected party in situations where properties adjacent to their existing quarries are subject to a subdivision application.

Point Number 575.23

Summary of Decision Requested: **Delete** Significant Natural Area from the Tauhei quarry at 1500 Tauhei Road, Tuakau (property 1005650).

(A map of the respective area sought for deletion is attached to the original submission as Appendix B).

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The Significant Natural Areas areas encroach on a large amount of potential extraction land.
- The quarry is also subject to the 'Aggregate Extraction Areas' overlay, which is intended to protect lawfully established quarry activities. The overlapping overlays creates unnecessary confusion as to what takes priority and will make any future expansion of these quarries complex and costly.

Point Number 575.24

Summary of Decision Requested: **Delete** Significant Natural Area from the Waingarō quarry land (Waingarō Road, Ngaruawahia - properties [2006029](#), 1012692, 1012697 and 1012732).

(A map of the respective area sought for deletion is attached to the original submission as Appendix B).

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The Significant Natural Areas areas encroach on a large amount of potential extraction land.
- The quarry is also subject to the 'Aggregate Extraction Areas' overlay, which is intended to protect lawfully established quarry activities. The overlapping overlays creates unnecessary confusion as to what takes priority and will make any future expansion of these quarries complex and costly.

Point Number 575.25

Summary of Decision Requested: **Delete** the Outstanding Natural Feature from the Waingaro quarry land (Waignaro Road, Ngaruawahia - properties 2006029, 1012692, 1012697 and 1012732).

(A map of the respective area sought for deletion is attached to the original submission as Appendix B).

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The land identified is directly adjacent to current operations, meaning that any future expansion (or continued extraction) could involve land subject to this overlay.
- This overlay overlaps with the 'Aggregate Extraction Areas' overlay, which is intended to protect lawfully established quarry activities.
- The overlapping overlays creates unnecessary confusion as to what takes priority and will make any future expansion of the quarry unnecessarily complex and costly.

Point Number 575.26

Summary of Decision Requested: **Delete** the Significant Amenity Landscape on the Tuakau quarry land (Friedlander Road, Tuakau - property 301603).

(A map of the respective area sought for deletion is attached to the original submission as Appendix B).

OR

Amend the Significant Amenity Landscape on Tuakau quarry land (Friedlander Road, Tuakau - property 301603) to reduce the extent as shown on Appendix B of the submission to only cover farmland.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This a misrepresentation of what the existing environment looks like (which has been operating as a quarry for over a decade) and is inappropriate given the use of the land for a quarry and other activities not usually found in SALs (such as farming, treatment ponds etc).
- Overlay overlaps with the 'Aggregate Extraction Areas' overlay, and this overlap creates unnecessary confusion as to what takes priority and will make any future expansion of the quarry unnecessarily complex and costly.
- Request that the SAL overlay be removed insofar as it impacts on the quarry. They further request that the remaining overlay be removed OR reduced insofar as it covers the surrounding farm lands.

Point Number 575.27

Summary of Decision Requested: **Retain** the "Aggregate Extraction Area" overlay applying across all three quarries in Tuakau, Waingaro and Tauhei.

Decision Reasons:

- No reason provided.

Point Number 575.28

Summary of Decision Requested: **Retain** Policy 5.3.3 Industrial and commercial activities except for the amendments sought below.

AND

Add a new clause to Policy 5.3.3 -Industrial and Commercial Activities, by adding on an additional point as follows:

(a) *Rural industries and services are managed to ensure they are in keeping with the character of the Rural Zone.*

(b) *Avoid locating industrial and commercial activities in rural areas that do not have a genuine functional connection with the rural land or soil resource.*

(c) *Allowing for mineral and aggregate extraction activities insofar as they are lawfully established in the Rural Zone.*

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Fulton Hogan support the restriction of Industrial and Commercial activities in the Rural Zone. Amendment sought to ensure that aggregate and mineral extraction is still specifically catered for in the Rural Zone.
- This industry is of both regional and district-wide importance and protection of the same is consistent with the RPS (which safeguards mineral extraction to ensure that the region can continue to grow).

Point Number 575.29

Summary of Decision Requested: **Retain** Policy 5.3.7 (h) Reverse sensitivity effects, except for the amendments sought below;

AND

Amend Policy 5.3.7 (h) Reverse sensitivity effects, as follows (or words to similar effect):

(h) *Provide for intensive farming activities and mineral and aggregate extraction activities, recognising the potential adverse effects that need to be managed, including noise, visual amenity, rural character or landscape effects, and odour.*

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Submission supports the policy but seeks the amendment to ensure that not only established quarries, but potentially new mineral or aggregate extraction activities are able to be established in the Rural Zone. Noting that it is vital to the survival of the aggregate extraction industry.

Point Number 575.30

Summary of Decision Requested: **Retain** Policy 5.3.9 Non-rural activities, as notified.

Decision Reasons:

- Supports the management of non-rural activities and structures in the rural zone.

- Concerned that non-rural activities may cause reverse sensitivity effects on quarry operations undertaken within the Rural Zone.

Point Number 575.31

Summary of Decision Requested: **Retain** Policy 5.3.13 Waste management activities, except for the amendments sought below

AND

Amend Policy 5.3.13 (a)Waste management activities, as follows (or words to similar effect):

Provide for the rehabilitation of existing quarry sites upon decommission, including landfill and cleanfill activities, where there is an environmental gain.

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Support the provision but seek amendment so that rehabilitation occurs upon decommission (unless a particular site lends itself to ongoing rehabilitation, which will be determined by site specific factors).
- Wants to ensure that once extractive processes of the quarry are no longer viable and/or equitable, the proposed district plan will encourage restoration of the landscape.
- The original state of the environment may not be able to be achieved but with then right steps, quarry sites will be able to blend into the environment after being decommissioned.

Point Number 575.32

Summary of Decision Requested: **Retain** Policy 5.3.15 Noise and vibration, except for the amendments sought below;

AND

Amend Policy 5.3.15 (a)(iii) Noise and vibration, as follows (or words to similar effect):

(iii) Maintaining appropriate buffers between high noise environments and noise sensitive activities insofar as that is practicable...

AND

Amend the Proposed District Plan to make consequential and additional amendments as necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Supports the principal of policy but seek amendments as quarrying and aggregate extraction create large amounts of noise and vibration from time to time which may make compliance with the policy challenging.
- Amendment will ensure that existing quarry sites (such as the Fulton Hogan quarries) can continue their operations without additional requirements insofar as noise and vibration buffers are concerned.

Submitter Number: 576 **Submitter:** Transpower New Zealand Ltd

Point Number 576.1

Summary of Decision Requested: **Retain** Section 1.4.3.2(c) Protecting the rural environment, as notified.

Decision Reasons:

- Section 1.4.3.2 (c) relates to protecting the rural environment. The submitter supports recognition within the section directing rural-residential built development away from electricity transmission.

Point Number 576.2

Summary of Decision Requested: **Retain** Section 1.5.5 (a) Services and general infrastructure, as notified.

Decision Reasons:

- The submitter supports recognition within the section that inappropriate subdivision and use and development can adversely affect regional infrastructure.

Point Number 576.3

Summary of Decision Requested: **Retain** Section 1.5.5 (d) Services and general infrastructure, as notified.

Decision Reasons:

- The submitter supports recognition within the section of the need for a consistent approach, and protection of regionally and nationally significant infrastructure.
- Such an approach is consistent with the NPSET.

Point Number 576.4

Summary of Decision Requested: **Retain** Section 1.5.5 (f) Services and general infrastructure, except for the amendments sought below

AND

Amend Section 1.5.5 (f) Services and general infrastructure as follows:

(f) There are key transmission lines located in the district. The transmission of electricity in the National Grid plays a vital role in the well-being of New Zealand, its people and communities. The national significance of the National Grid is recognised in the National Policy Statement on Electricity Transmission 2008. Environmental effects of the National Grid are often experienced at a district level while the benefits of the National Grid extend to a regional or national level. These effects are a result of particular physical characteristics and operational/technical requirements and may not always be able to be avoided or mitigated. The lines are critical for ensuring an efficient and secure supply of electricity throughout the district and beyond. In accordance with the National Policy Statement on Electricity Transmission 2008 and the Regional Policy Statement, the Council is required to manage development to ensure that any ~~third party~~ subdivision, land use and development in the transmission corridor does not affect the ongoing operation, maintenance, upgrading, and development of the lines or result in any incompatibility or reverse sensitivity effects. It is important that Council manages ~~third party activities~~ subdivision, land use and development in the vicinity...

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports Section 1.5.5 (f) as the clause accurately reflects the issue of the effect of subdivision, land use and development activities on the National Grid.
- The submitter prefers the term 'subdivision, land use and development' over 'third party' in this context as it more appropriately relates to the activity as opposed to tenure.
- However, while the statement is supported, subdivision, land use and development are only one component of matters identified in the NPSET (refer to Policies 10 and 11 of the NPSET).
- Policy 1 of the NPSET requires recognition of the National Grid, and Policies 2-9 relate to managing the environmental effects of transmission.
- In order to give effect to the NPSET, the submitter supports amendment to the section to recognize the other two matters provided in the NPSET, being the benefits of the National Grid, and the environment effects of transmission.

Point Number 576.5

Summary of Decision Requested: **Retain** Policy 3.2.3 Management hierarchy, as notified.

Decision Reasons:

- Significant Natural Areas are identified on the planning maps and feature widely across the district. Although not defined in the Proposed District Plan, SNA are those areas containing significant habitats of indigenous fauna and flora.
- The submitter supports the identification of such areas, and the hierarchy approach provided within Policy 3.2.3, and in particular the reference within clause (i) to 'unless specific activities need to be enabled'.
- The reference is supported as it recognises that there are some activities (for example the National Grid) which in some circumstances may need to be enabled.
- The policy gives effect to Policy 8 of the NPSET which recognises that within the rural environment, planning and development of the National Grid should seek to avoid adverse effects on outstanding natural landscapes, areas of high natural character and areas of high recreation value and amenity and existing sensitive activities.

Point Number 576.6

Summary of Decision Requested: **Retain** Policy 3.2.6 Providing for vegetation clearance, except for the amendments sought below

AND

Add a new clause (v) to Policy 3.2.6 (a) Providing for vegetation clearance as follows (or equivalent references to Regionally significant infrastructure or the National Grid):

(v) associated with the operation, maintenance and upgrading of infrastructure

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of policy providing for the clearance of indigenous vegetation in Significant Natural Areas for certain circumstances as the policy recognizes there are some activities for which clearance is required.
- The submitter supports expansion of the policy to recognise vegetation associated with the operation, maintenance and upgrading of infrastructure.
- Such policy recognition would reflect the permitted activity rule 14.3.1. P5, and the need for vegetation clearance around the National Grid for safety reasons.
- While the submitter has recommended the policy apply to infrastructure generally, it would support the policy being specific to Regionally Significant Infrastructure (noting that this term is not defined or widely used in the Proposed District Plan), or the National Grid.

Point Number 576.7

Summary of Decision Requested: **Retain** Objective 3.3.1 Outstanding natural features and landscapes, as notified.

Decision Reasons:

- The submitter supports the mapping of such areas and their clear identification as it assists plan users and provides clarity as to the application of the Proposed District Plan provisions.
- The submitter supports reference within the objective to 'inappropriate' as such reference is consistent with Section 6(b) of the RMA, Waikato RPS Objectives 3.12 and 3.20, and also recognises that not all development is to be avoided, rather the emphasis is on that which is inappropriate.

Point Number 576.8

Summary of Decision Requested: **Retain** Objective 3.5.1 Natural Character, as notified.

Decision Reasons:

- The submitter supports the mapping of such areas and their clear identification as it assists plan users and provides clarity as to the application of the Proposed District Plan provisions.
- The submitter supports reference within the objective to 'inappropriate' as such reference is consistent with Section 6(a) of the RMA, Waikato RPS Objectives 3.12 and 3.22, and also recognises that not all development is to be avoided, rather the emphasis is on that which is inappropriate.

Point Number 576.9

Summary of Decision Requested: **Retain** Policy 3.5.4 Protecting the natural character of wetlands, and lakes and rivers and their margins, as notified.

Decision Reasons:

- The submitter supports reference within the policy to "inappropriate" as such reference is consistent with Section 6(a) of the RMA, Waikato RPS Objectives 3.12 and 3.22 and also recognises that not all development is to be avoided, rather the emphasis is on that which is inappropriate.
- Clause (ii) is also supported in that it requires to 'minimise, to the extent practicable', thereby recognising it is not always practicable to minimise adverse effects.

Point Number 576.10

Summary of Decision Requested: **Retain** the recognition of reverse sensitivity in Policy 4.7.11 Reverse sensitivity, except for the amendments sought below.

AND

Amend Policy 4.7.11 (b) Reverse sensitivity, as follows (or equivalent references to Regionally Significant Infrastructure or the National Grid):

(b) Avoid potential reverse sensitivity effects of locating new dwellings in the vicinity of an intensive farming, infrastructure, extraction industry or industrial activity.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter would support specific recognition of the reverse sensitivity effects of locating new dwellings in the vicinity of infrastructure. The inclusion of reference to infrastructure would not be inconsistent with the notified references to intensive farming and extractive or industrial activities.
- It is noted that while the sought amendment refers to 'Infrastructure' to align with the terminology used in the Proposed District Plan, the submitter would support the reference being specific to Regionally Significant Infrastructure or the National Grid.
- The submitter supports the provision of policy providing for the clearance of Indigenous vegetation in Significant Natural Areas for certain circumstances as the policy recognizes there are some activities for which clearance is required.

Point Number 576.11

Summary of Decision Requested: **Add** a new clause (c) to Policy 5.3.9 Non-rural activities, as follows:

(c) Recognise that some activities require a rural location

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter opposes Policy 5.3.9 in so far as it fails to recognise those activities which require a rural location but may not be in keeping with rural character and amenity values.

Point Number 576.12

Summary of Decision Requested: **Amend** Policy 5.5.2 Activities within Hamilton's Urban Expansion Area, as follows:

(a) Manage urban subdivision, use and development within Hamilton's Urban Expansion Area to ensure that future urban development is not compromised, recognising existing Infrastructure within the Area and ensuring the ongoing operation, maintenance, upgrading and development of the Infrastructure is not compromised.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Hamilton's Urban Expansion Area is identified on the planning map 27 and features the National Grid 110kV Hamilton - Meremere B Line.
- The submitter is not opposed to the development of the identified expansion area, subject to recognition of the existing National Grid Infrastructure and imposition of an appropriate National Grid corridor, and recognition that in the future, the existing line may require upgrade or development.
- Given the presence of the existing National Grid, the submitter seeks amendment to the policy wording to clarify that it is urban development which is to be managed to ensure further urban development is not compromised, and that the ongoing operation, maintenance, upgrading and development of the National Grid is not compromised.

Point Number 576.13

Summary of Decision Requested: **Amend** the planning maps/legend to clarify if the zoning of the Urban Expansion Area is Rural Zone.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter seeks clarification that the zoning of the Urban Expansion Area is actually Rural as there is no Urban Expansion Area under the Notified Zoning section on the planning map legend.

Point Number 576.14

Summary of Decision Requested: **Retain** Section 6.1 General Infrastructure, except for the amendments sought below

AND

Add to Section 6.1 General Infrastructure a preface with the following note:

In addition to Sections 6.2, 6.3, 6.4 and 6.5, the following objective and policies apply, unless otherwise stated.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter's understanding of the Proposed District Plan is that while Section 6.2 is specific to the National Grid, Section 6.1 Infrastructure also applies to the National Grid because it is included within the definition of Infrastructure provided within Chapter 13 Definitions. For the avoidance of doubt, the submitter supports specific reference that Section 6.1 also applies to The National Grid (and to Sections 6.3—Section 6.5).
- On the basis Sections 6.1 and 6.2 both apply to the National Grid; the submitter makes the following comments (as provided in the following submission points) to Chapter 6.1.

•

Point Number 576.15

Summary of Decision Requested: **Retain** Section 6.2 National Grid, except for the amendments sought to particular provisions addressed elsewhere in the submission.

Decision Reasons:

- The submitter supports the provision of a policy suite specific to the National Grid as such provisions enable and provide for the NPSET to be given effect to.
- Given the Proposed District Plan does not distinguish between Infrastructure generally, and Regionally significant infrastructure or infrastructure that is of national importance, specifically policy recognition of the National Grid which is of National significance, is supported.

Point Number 576.16

Summary of Decision Requested: **Retain** Objective 6.2.1 National grid, except for the amendments sought below

AND

Amend Objective 6.2.1 National grid, as follows:

6.2.1 Objective – National Grid

(a) The national significance of the National Grid is recognised, ~~and~~ protected and provided for.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the objective.
- The submitter seeks amendment to the objective to ensure that the national significance is not only recognised and protected, but that it is also provided for.
- The insertion of 'provided for' would be consistent with the terminology used in the NPSET, specifically Policy 2 which requires that "in achieving the purpose of the Act, decision makers must recognise and provide for the effective operation, maintenance, upgrading and development of the electricity transmission network".
- While the requirements to 'recognise and protect' are supported, they do not have the same meaning as 'provide for'.
- Specifically, 'recognise' does not carry the same weight or directive nature, and 'protect' relates to protecting the grid from subdivision, land use and development activities as opposed to enabling its ongoing development, operation and maintenance.
- The insertion of 'provide for' would also be consistent with Objective 3.5(e) of the Waikato RPS which requires that "Energy use is managed, and electricity generation and transmission is operated, maintained, developed and upgraded, in a way that: e) recognises and provides for the national, regional and local benefits of electricity transmission and renewable electricity generation".
- It would be consistent with Policy 6.2.3.

Point Number 576.17

Summary of Decision Requested: **Retain** Policy 6.2.2 Recognise the national grid, except for the amendments sought below

AND

Amend Policy 6.2.2 Recognise the national grid, as follows:

6.2.2 Policy – Recognise the needs and constraints of the National Grid

(a) Recognise the operational, functional and technical needs and constraints of the National Grid, and the interconnectedness of networks.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Amendment is sought to the policy title to more accurately articulate and convey the content of the policy, and insertion of the word 'needs' to reflect the provided definition of 'functional need' and 'operational need'.
- The provision of a policy which recognises the constraints associated with the National Grid is supported and gives effect to Policy 3 of the NPSET and Objective 3.5.h) and Policy 6.6.c) of the Waikato BPS.

Point Number 576.18

Summary of Decision Requested: **Retain** Policy 6.2.3 Operation and development of the National Grid, except for the amendments sought below

AND

Amend Policy 6.2.3 (a) Operation and development of the National Grid, as follows:

(a) Provide for the operation, maintenance, upgrading and development of the National Grid

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Amendment is sought to the policy to include 'maintenance' within the policy, thereby giving effect to Policy 2 of the NPSET which includes the term 'maintenance'.
- Submission also details reasons for supporting the Policy as notified, but not subject to any specific relief sought.
- The provision of a policy which requires that the ongoing operation, upgrading and development of the National Grid be 'provided for' is supported, and gives effect to Policy 2 of the NPSET, and Objective 3.12.i) of the Waikato BPS.

Point Number 576.19

Summary of Decision Requested: **Amend** Policy 6.2.4 (a) Maintenance and minor upgrade the National Grid, as follows:

(a) Enable the operation, repair, maintenance, replacement and minor upgrade of the National Grid.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Amendment is sought within the Policy to refer to 'operation', thereby ensuring the ongoing use of the National Grid is also enabled. Policy 5 of the NPSET also refers to 'operation'.
- The submitter supports Policy 6.2.4 to enable the maintenance and minor upgrade of the National Grid. Such policy recognition gives effect to Policy 5 of the NPSET, and Objective 3.12.i) and Policy 6.3.c) of the Waikato BPS.

Point Number 576.20

Summary of Decision Requested: **Retain** Policy 6.2.5 Environmental effects, except for the amendments sought below

AND

Amend Policy 6.2.5 (a) Environmental effects, as follows:

(i) Recognising and providing for the national, regional and local benefits of sustainable, secure and efficient electricity transmission;

(ii) Considering the extent to which any ~~Avoiding, remedying or mitigating~~ adverse effects ~~through consideration of~~ have been avoided, remedied or mitigated by the route, site and method selection;

(iii) Seeking to reduce, the existing adverse effects as part of any substantial upgrade;

(iv) ...

(v) ~~Within rural environments, seeking to avoid~~ Addressing the adverse effects on ~~any identified~~ heritage values, outstanding natural landscapes, areas of high natural character, ~~town centres, areas of high recreation value and existing sensitive activities, including seeking to the avoidance of adverse effects where practicable.~~

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Amendment is sought to (i) for the insertion of 'providing for' to ensure that the benefits are not only recognised, but they are also provided for. Such wording reflects that used in Policy 1 of the NPSET and RPS Objective 3.5.e).
- Amendment is sought to (ii) wording to better reflect that in NPSET Policy 4 and make it clear that the key consideration is the extent to which adverse effects have been avoided remedy or mitigated.
- An amendment is sought to (iii) to better reflect the wording and outcome sought in NPSET Policy 6 which provides that "Substantial upgrades of transmission infrastructure should be used as an opportunity ...". The wording within the NPSET is less directive than that proposed in clause (iii). On this basis an amendment is sought to clause (iii) to amend the absolute directive nature of the policy and better give effect to NPSET Policy 6.
- Amendment is sought to (v) to reflect the policy directive within the NPSET Policy 8 "to seek to avoid adverse effects".
- The submitter supports the provision of a policy to relating to managing the effects of the National Grid electricity transmission network. The policy largely gives effect to Sections 6 and 7 (policies 1-8) of the NPSET.
- Notwithstanding its support for the objective as notified, the submitter seeks amendment to the objective to ensure that the national significance is not only recognised and protected, but that it is also provided for.

Point Number 576.21

Summary of Decision Requested: **Retain** Policy 6.2.6 Reverse sensitivity and the National Grid, except for the amendments sought below.

AND

Amend Policy 6.2.6 Reverse sensitivity and the National Grid, as follows:

6.2.6 Policy – Reverse sensitivity, Adverse effects on Infrastructure, and the National Grid

...

(ii) ~~Sensitive~~ Land uses (including sensitive activities) and buildings and structures that may compromise the National Grid, including intensive farming activities, are excluded from establishing within the National Grid Yard;

...

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submission supports the policy in that it recognises the adverse effects of subdivision, land use and development on the operation, maintenance, upgrading and developing of the National Grid. Such policy recognition gives effect to policies 8 and 9 of the NPSET, and Waikato RPS Policy 4.4f and Policy 6.6a.
- An amendment is sought to the policy title to reflect that it is not only reverse sensitivity effects which may compromise the National Grid but also the adverse effects from other activities.
- In particular, the submitter supports:
 - (i) as it gives effect to Policy 11 of the NPSET
 - (ii) as in that it recognises sensitive activities what may compromise the National Grid. However, an amendment is sought to the policy to give effect to NPSET Policy 10 and recognise that it is not only sensitive activities which are to be managed, but also those activities which compromise the ongoing operation, maintenance, upgrading and development of the National Grid. NPSET Policy 10 and 11 are to be read together and reflect the Transpower corridor management approach proposed by Transpower throughout NZ, that Policy 11 need not be limited solely to the management of sensitive activities. A buffer corridor is also an efficient and effective method (in terms of is 32 RMA) to give effect to the requirements of Policy 10 and to manage the risks imposed by other activities, such as earthworks, on the transmission network.
 - (iii) and (iv) as it gives effects to the NPSET and reflect the submitter's wide corridor management approach.

Point Number 576.22

Summary of Decision Requested: **Delete** Policy 8.2.2 Natural values.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitters concerns with the policy are that the matters covered by clause (i) and (ii) are addressed in Chapter 3 Natural Environment, and the landscape/character/area overlays are not only on Reserve zoned land. As such, it appears the policy is trying to address two issues which are not necessarily linked.
- In terms of Clause (iii) the absolute requirement for restoring and linking habitats for indigenous species is opposed given the policy does not provide any recognition of the scale of the habitat or its significance.

Point Number 576.23

Summary of Decision Requested: **Retain** Section 14.1 (1) Introduction as notified.

Decision Reasons:

- The submitter supports the introductory statement within Section 14.1 that clarifies the relationship between Chapter 14, and other plan provisions. The statement provides clarity to plan users and will assist in plan interpretation and application.

Point Number 576.24

Summary of Decision Requested: **Retain** Section 14.1 (6) Introduction, as notified.

Decision Reasons:

- Paragraph 6 of Section 14.1 outlines the relationship between the Proposed District Plan and the NESETA. The clarification is supported and will assist plan users in plan interpretation and application. In particular, the reference to the NESETA provisions 'shall prevail', is supported.

Point Number 576.25

Summary of Decision Requested: **Retain** Section 14.3.1 Permitted Activities.

AND

Amend to clarify the relationship between the rules within Section 14.3 and those in the subsequent sections.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activity rules.
- With respect to the sought amendment, it is presumed the rules apply in addition to the National Grid provisions within Section 14.4. Clarification as to the relationship between the rules within Section 14.3 and the subsequent sections would be beneficial to assist plan users. It is presumed only limited provisions within Section 14.2 apply to the National Grid in that the more specific provisions within Section 14.4 apply.

Point Number 576.26

Summary of Decision Requested: **Retain** Rule 14.3.1 P1 Permitted Activities, as notified.

Decision Reasons:

- The provision of a permitted activity rule for the ongoing operation, maintenance, repair and removal of existing infrastructure is supported as it recognises existing infrastructure and provides for its ongoing use.
- A permitted activity status reflects that provided within the NESETA.

Point Number 576.27

Summary of Decision Requested: **Retain** Rule 14.3.1 P2 Permitted Activities, as notified.

Decision Reasons:

- A permitted activity status for the minor upgrading of existing infrastructure is supported as it appropriately recognises existing infrastructure and enables its ongoing use.
- Specific to the National Grid, the NESETA provides for various 'upgrade' works as permitted activities. While there are some inconsistencies with the conditions within rule P2 and the NESETA, given the NESETA prevails over the Proposed District Plan provisions, Rule P2 is of limited relevance to the National Grid.

Point Number 576.28

Summary of Decision Requested: **Retain** Rule 14.3.1 P3 Permitted Activities, as notified.

Decision Reasons:

- A permitted activity status for temporary activities is supported as it recognises that in some circumstances, temporary infrastructure is required to either support existing infrastructure or facilitate the development of new infrastructure.
- A permitted activity status reflects Regulation 17 of the NESETA.

Point Number 576.29

Summary of Decision Requested: **Retain** Rule 14.3.1.3 P4 Permitted Activities, except for the amendments sought below

AND

Amend Activity specific condition 14.3.1.3 P4 Permitted Activities, as follows:

(1) Any earthworks associated with infrastructure, including formation and maintenance of access tracks, must comply with all of the following conditions:

....

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Earthworks are often required to provide access to, and enable the ongoing operation, maintenance, repair and removal of infrastructure.
- Specific to the National Grid, the submitter regularly undertakes earthworks to either access existing National Grid assets (such as for the formation and maintenance of suitable access tracks) or to undertake routine maintenance or upgrade works such as structure replacements, tower strengthening, foundation works, or reconductoring.
- The NESETA provides for earthworks as a permitted activity subject to conditions where the earthworks are within a natural area (being an Outstanding natural feature or landscape or Significant Natural area in the Proposed District Plan). The 50m³ within Rule P4 matches that within NESETA Regulation 33.
- While the submitter largely supports Rule P4, a minor amendment is sought to provide clarity for plan users, that the permitted earthworks rule also applies to access tracks.
- As noted above, the submitter is often required to undertake earthworks on access tracks in order to gain access to National Grid support structures. The insertion would fit within the proposed condition framework in that proposed limits relate to an activity as opposed to a site.

Point Number 576.30

Summary of Decision Requested: **Retain** Rule 14.3.1.4 P5 Permitted Activities, except for the amendments sought below

AND

Amend Activity Specific Condition 14.3.1.4 P5 Permitted Activities, as follows:

(1) Any trimming, maintenance or removal of vegetation or trees associated with infrastructure including access tracks, that meet all of the following conditions:

....

(2) Any trimming, maintenance or removal of vegetation where required for the safe operation or maintenance of the National Grid or to remove a potential fire risk associated with the National Grid

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- It is important the submitter is able to trim, maintain or remove any vegetation that could affect the safe operation, maintenance or upgrade of its lines. Where tree branches are close to or in contact with a transmission line they can create a flashover from the conductor to the tree which may cause:
 - A circuit fault that affects the operation and supply of the National Grid;
 - Injury or death to anyone who may be near the tree at the time of the fault; and

- Damage to the tree, land or property.
- If a tree causes a flashover, dangerous voltages may arise in the tree itself or in the ground around the tree. These voltages have the potential to cause severe injury or death. Flashover to a tree where high voltages are involved can cause the tree to ignite and cause a wider fire hazard if the tree is near buildings. As such, it is vital that trees and all other vegetation are able to be trimmed, maintained or removed.
- The NESETA provides for trimming, felling or removal of any trees or vegetation as permitted activities subject to conditions. Resource consent is required if the tree or vegetation is in a natural area, or a rule prohibits or restricts the works. P5 restricts works to scheduled trees only. However, the NESETA restriction to 'natural areas' still applies and a restricted discretionary activity status would apply. The provision of a permitted activity rule specific to the National Grid would reflect the permitted activity status within the NESETA.
- The submitter supports Rule P5 but a minor amendment is sought to provide clarity for plan users that the permitted tree and vegetation rule also applies to access tracks, and a new condition specific to the National Grid be inserted.

Point Number 576.31

Summary of Decision Requested: Retain Rule 14.3.3 RD1 Restricted Discretionary Activities, as notified.

Decision Reasons:

- The submitter supports a restricted discretionary activity status for minor upgrades which do not meet the permitted activity conditions. Such an activity status enables a full assessment of effects.

Point Number 576.32

Summary of Decision Requested: Retain the definition for "Building" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The submitter supports the proposed definition of 'building' insofar as the definition has the same meaning as that within the Building Act 2004, which excludes a Network Utility Operator pylon from the definition of a building.

Point Number 576.33

Summary of Decision Requested: Delete the definition for "Energy Corridor" from Chapter 13 Definitions if it is not shown on the planning maps
OR
Amend the planning maps legend so that plan users can readily identify where the Energy corridor applies if it is shown on the planning maps.

Decision Reasons:

- It is unclear as to where the definition applies as it does not appear to be shown on the planning maps or identified on the planning legend.

Point Number 576.34

Summary of Decision Requested: Retain the definition for "Functional Need" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The term 'Functional need' is used within Policy 6.1.2(a)(i) (noting that the term 'functional' is also elsewhere in the plan but is not specific to 'need').
- On the basis the Proposed District Plan also contains the term 'Operational need' and this term is also used within Policy 6.2.1, the definition is supported.

Point Number 576.35

Summary of Decision Requested: Retain the definition for "Infrastructure" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The submitter supports the proposed definition of 'Infrastructure', specifically reference to lines and support structures to convey electricity.

Point Number 576.36

Summary of Decision Requested: Add a new definition for "Regionally Significant Infrastructure" as provided in the Waikato Regional Policy Statement.

AND

Amend the Proposed District Plan to use the term "Regionally Significant Infrastructure".

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The Proposed District Plan does not contain a definition of 'Regionally significant infrastructure'.
- While the lack of such a definition is not in itself opposed on the basis specific recognition is provided within the Proposed District Plan to the National Grid, the submitter notes the provision of a definition for 'Regionally significant infrastructure' would reflect the provision of a definition as provided in the Waikato Regional Policy Statement 2016 and provide a distinction between infrastructure that is important at a regional level.
- The provision of a definition of Regionally significant infrastructure and its use throughout the plan would also reflect the approach used within the Regional Policy Statement.

Point Number 576.37

Summary of Decision Requested: Retain the definition for "Minor upgrading of existing infrastructure" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition is supported on the basis it provides clarity for plan users as to what constitutes minor upgrading, and therefore assists in plan interpolation and application.
- It is noted the NESETA provides specific provisions for upgrade works to the National Grid which prevail over the Proposed District Plan rules.

Point Number 576.38

Summary of Decision Requested: **Retain** the definition for "National grid" in Chapter 13 Definitions, except for the amendment sought below

AND

Amend the definition for "National grid" in Chapter 13 Definitions, as follows:

National ~~g~~Grid

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- A minor grammatical correction is sought.
- The definition of "National grid" is supported as it provides clarity for plan users as to what is the National Grid.
- The definition is consistent with that provided in the NPSET 2008.

Point Number 576.39

Summary of Decision Requested: **Retain** the definition for "National Grid yard" in Chapter 13 Definitions, except for the amendments sought below

AND

Amend the definition for "National Grid yard" in Chapter 13 Definitions, as follows:

National ~~Grid~~ Subdivision Corridor ~~yard~~

Means the area measured either side of the centre line of any above-ground electricity transmission line as follows:

(a) 14m for the 110kV national grid lines on single poles;

~~(b) 16m for the 110kV national grid lines on pi poles;~~

~~(c) 32m for 110kV national grid lines on towers; and~~

~~(d) 37m for the 220kV transmission lines.~~

The National Grid Yard and National Grid Subdivision Corridor does not apply to underground cables or any transmission line (or sections of lines) that are designated by Transpower. The measurement of setback distances from National Grid lines shall be taken from the centre line of the transmission line and the outer edge of any support structure. The centre line at any point is a straight line between the centre points of the two support structures at each end of the span.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The subdivision 'National Grid Corridor' width of 37m (maximum) is based on the distance from the centerline between the support structures to a point where the conductor would swing under possible high wind conditions, and is the swing of the 95th percentile span across the country, as well as other variables. It is important that the swing of conductors can be taken into account in the subdivision process so that the allotment(s) can be safely developed and used. This is why differing widths are provided for different voltage lines.
- In essence the Corridor is wider than the Yard and it should be noted that the Corridor and Yard overlap.
- However, while generally supported, two amendments are sought as follows:
 1. By way of summary, the National Grid yard applies to land use and the National Grid Corridor applies to subdivision. Amendment to the definition title would accurately reflect this. It is noted the terms are used correctly throughout the PWDP; it is only the definition titles which are incorrect.
 2. Removal of reference to pi poles as there are none in the district.

Point Number 576.40

Summary of Decision Requested: **Retain** the definition for "National Grid Corridor" in Chapter 13 Definitions, except for the amendments sought below

AND

Amend the definition for "National Grid corridor" in Chapter 13 Definitions, as follows (see submission for diagram):

National ~~Grid~~ ~~corridor~~ Yard

Means the area located within:

(a) 12 metres in any direction from the outer visible edge of a national grid support structure foundation; and

(b) 10 metres either side of the centre line of any above-ground 110kV national grid line on single poles; and

(c) 12 metres either side of the centre line of any above-ground national grid line on towers.

The National Grid Yard and National Grid Subdivision Corridor does not apply to underground cables or any transmission line (or sections of lines) that are designated by Transpower. The measurement of setback distances from National Grid lines shall be taken from the centre line of the transmission line and the outer edge of any support structure. The centre line at any point is a straight line between the centre points of the two support structures at each end of the span.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The 'National Grid Yard', is a 12m width calculated as the distance from the centerline between the support structures to the point where the conductor would swing under everyday conditions (noting that maintenance is not generally undertaken in high wind conditions).
- However, while generally supported, three amendments are sought to the definition as follows:
 1. By way of summary, the National Grid Yard applies to land use and the National Grid Corridor applies to subdivision. Amendment to the definition title would accurately reflect this.
 2. Inclusion of a statement to clarify when the term applies to assist in its application.
 3. Minor amendment to insert 'foundation' in relation to measurement from a support structure, and 'within'.

Point Number 576.41

Summary of Decision Requested: **Retain** the definition for "Operational need" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The term 'Operational need' is used within Policy 6.1.2(a)(i) (noting that the term 'operational' is also elsewhere in the plan but is not specific to 'need').

- On the basis the Proposed District Plan also contains the term 'Functional need' and this term is also used within Policy 6.2.1, the definition is supported.

Point Number 576.42

Summary of Decision Requested: **Retain** the definition for "Outstanding Natural Feature" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition is supported on the basis it applies to the area as identified on the planning maps.
- Such identification assists plan users and provides clarity on the application of the Proposed District Plan provisions that relate to the definition.

Point Number 576.43

Summary of Decision Requested: **Retain** the definition for "Outstanding Natural Character Area" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition is supported on the basis it applies to the area as identified on the planning maps.
- Such identification assists plan users and provides clarity on the application of the Proposed District Plan provisions that relate to the definition.

Point Number 576.44

Summary of Decision Requested: **Retain** the definition for "Outstanding Natural Landscape" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition is supported on the basis it applies to the area as identified on the planning maps.
- Such identification assists plan users and provides clarity on the application of the Proposed District Plan provisions that relate to the definition.

Point Number 576.45

Summary of Decision Requested: **Retain** the definition for "Sensitive land use" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition of 'sensitive land use' is used within Policy 6.2.5 and 6.2.6 specific to the National Grid, as well as within Chapter 14.
- The definition is supported insofar as it is applied to the National Grid corridor management provisions within the Proposed District Plan.

Point Number 576.46

Summary of Decision Requested: **Retain** the definition for "Significant Amenity Landscape" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition is supported on the basis it applies to the area as identified on the planning maps.
- Such identification assists plan users and provides clarity on the application of the Proposed District Plan provisions that relate to the definition.

Point Number 576.47

Summary of Decision Requested: **Retain** the definition for "Significant Natural Area" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition is supported on the basis it applies to the area as identified on the planning maps.
- Such identification assists plan users and provides clarity on the application of the Proposed District Plan provisions that relate to the definition.

Point Number 576.48

Summary of Decision Requested: **Retain** the definition for "Temporary Infrastructure" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The definition is supported as it recognises and provides for infrastructure that is not permanent.

Point Number 576.49

Summary of Decision Requested: **Amend** Section 1.4.3.2 (b) Protecting the rural environment, as follows:

~~...towns or villages. Non-rural activities must occur in towns, villages and defined growth areas, and the expansion of such areas should be managed so that adverse effects on rural areas are minimised.~~

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter does not oppose limiting the extent of non-rural activities within the rural environment, it does not support the absolute nature of the statement within Section 1.4.3.2(b) that "Non-rural activities must occur in towns, villages and defined growth areas, and the expansion of such areas should be managed so that adverse effects on rural areas are minimised."
- The statement fails to recognise that some activities such as infrastructure, which can be of a linear nature, requires/is best placed in a rural location.

Point Number	576.50
Summary of Decision Requested:	Retain Rule 14.3.3 RD2 Restricted Discretionary Activities, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports a restricted discretionary activity status for minor upgrades with do not meet the permitted activity conditions. Such an activity status enables a full assessment of effects.
Point Number	576.51
Summary of Decision Requested:	Retain Rule 14.3.3 RD3 Restricted Discretionary Activities, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports a restricted discretionary activity status for minor upgrades with do not meet the permitted activity conditions. Such an activity status enables a full assessment of effects.
Point Number	576.52
Summary of Decision Requested:	Retain Section 14.4 National Grid, subject to amendments sought elsewhere in this submission.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the provision of a suite of rules and associated conditions specific to the National Grid. The proposed rules are specific to the National Grid Yard and the National Grid (subdivision) Corridor, both of which are identified on the planning maps and further defined in Chapter 13 Definitions. The provision of a specific suite of provisions is consistent with the approach adopted across New Zealand, gives effect to the NPSET, and also gives effect to the Waikato RPS, specifically Implementation Method 6.6.2. As highlighted in the higher order policy documents (specifically the NPSET and the RPS) a significant resource management issue in the district and across New Zealand is inappropriate development, land use and subdivision in close proximity to the National Grid which can compromise its operation, maintenance, development and upgrade. Given the national significance of the National Grid, inappropriate development is a potential issue. In order to manage subdivision and other land uses that have the potential to compromise the operation, maintenance, upgrading and development of the National Grid, the submitter supports the provision of a corridor management approach which allows for the reasonable use of land inside the transmission line corridor, with several standards and rules imposed to ensure that any subdivision, land use and development that might compromise the Grid is either avoided or managed. The approach sought by the submitter has been rolled out across New Zealand for the past seven years as plans have come up for review.
Point Number	576.53
Summary of Decision Requested:	<p>Retain Activity Specific Conditions 14.4.1.1 P1 Permitted Activities, except for the amendments sought below</p> <p>AND</p> <p>Amend Activity Specific Conditions 14.4.1.1 P1 Permitted Activities, as follows:</p> <p>(1)</p> <p>(a)</p> <p>(b) <u>New, or additions to existing buildings and/or structures that are not for a sensitive land use;</u></p> <p>(c) <u>Infrastructure Network Utilities (other than for the reticulation and storage of water for irrigation purposes) or any part of electricity infrastructure undertaken by a network utility operator as defined in the Resource Management Act 1991.</u></p> <p>(d) <u>New non-habitable accessory buildings or structures.</u></p> <p>(e) <u>Fences less than 2.5m in height</u></p> <p>(2) ...</p> <p>(a)</p> <p>(b) <u>Locate a minimum of 12m from the outer visible foundation of any National Grid support structure tower and a minimum 12m from any pole and associated stay wire, unless it is one of the following:</u></p> <p>i. <u>A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances NZECP34:2001 ISSN 0114-0663;</u></p> <p>ii. <u>The maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid Tower. Fences less than 2.5m in height and located a minimum of 5m from the nearest National Grid support structure foundation</u></p> <p>iii. <u>Network utilities (other than for the reticulation and storage of water for irrigation purposes) or any part of electricity infrastructure undertaken by a network utility operator as defined in the Resource Management Act 1991, that connects to the National Grid.</u></p> <p>(c) <u>Not permanently physically impede existing vehicular access to a national grid support structure</u></p> <p>AND</p> <p>Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> Amendments are sought to Rule P1 in the form of reformatting/restructuring to clarify the intent of the provisions and recognition of network utilities. A condition is inserted requiring that any new structures or buildings not permanently physically impede existing vehicular access to a National Grid support structure. Such a condition would ensure physical access is maintained to the line and assets to enable the ongoing operation, maintenance and upgrade of the National Grid. The submitter supports the provision of permitted activity rules which is based on the corridor management approach.
Point Number	576.54
Summary of Decision Requested:	<p>Retain Activity Specific Condition 14.4.1.2 P2 Permitted Activities, except for the amendments sought below</p> <p>AND</p> <p>Amend Activity Specific Condition 14.4.1.2 P2 Permitted Activities, as follows:</p> <p>(1) <u>Within the National Grid Yard in the Business, Industrial, Country Living, Heavy Industrial, Rural, Town Centre Business, Hampton Downs Motorsport and Recreation, Tamahere Business, Te Kowhai Airpark, or Reserves Zone or Coal Mining Area, Aggregate Extraction Area or Aggregate Resource Area:</u></p> <p>(a) <u>Building alterations and additions to an existing building or structure for sensitive activities that does not involve an increase in the building height or footprint; or</u></p> <p>(b) <u>Infrastructure Network Utilities (other than for the reticulation and storage of water for irrigation purposes) or any part of electricity infrastructure undertaken by a network utility operator as defined in the Resource Management Act 1991; or</u></p>

(c) Non-habitable buildings or structures for farming activities in rural zones (but not including any intensive farming buildings, commercial greenhouses and milking/dairy sheds (accessory structures are permitted)); or

~~(d) Yards for milking/dairy sheds; or~~

~~(g) Non-habitable horticultural buildings; or~~

(e) Artificial crop protection and support structures (excluding commercial greenhouses and PSA structures).

~~(f) Fences less than 2.5m in height~~

(2) ...

(a) ...

~~(b) Locate a minimum 12m from the outer visible foundation of any National Grid support structure foundation tower and locate a minimum 12m from any pole and associated stay wire, unless it is:~~

~~i. A building or structure where Transpower has given written approval in accordance with clause 2.4.1 of the New Zealand Electrical Code of Practice for Electrical Safe Distances NZECP34:2001 ISSN 0114-0663; or~~

~~ii. Fences less than 2.5m in height and located a minimum of 5m from the nearest National Grid support structure foundation; or~~

~~iii. Artificial crop protection: Network utilities (other than for the reticulation and storage of water for irrigation purposes) or any part of electricity, infrastructure undertaken by a network utility operator as defined in the Resource Management Act 1991, that connects to the National Grid; and~~

~~(3) The maximum height of fences are 2.5m within 5m from the nearest National Grid Pole or 6m from the nearest National Grid tower.~~

~~(c) Not permanently, physically impede existing vehicular access to a national grid support structure~~

~~(4) Artificial crop protection structures and crop support structures between 8m and 12m from a single pole support structure (but not a tower), and any associated guy wire (but not tower) must that:~~

~~(a) Meets the requirements of the New Zealand Electrical Code of Practice for Electrical Safe Distances NZECP34:2001 ISSN 0114-0663 for separation distances from the conductor;~~

~~(b) Be Are a maximum of 2.5m high;~~

~~(c) Be Are removable or temporary, to allow a clear working space of at least 12 metres from the pole when necessary for maintenance and emergency repair purposes;~~

~~(d) ...~~

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- Within Rural and other zones (Rule P2), the submitter is satisfied that there are some activities that are appropriate within the National Grid Yard due to their nature and small scale, and because they will not compromise the operation, maintenance or any upgrade of the network itself. Certain structures (such as rural hay barns, pump sheds and implement sheds) are less problematic within 10-12m of the line (noting that they will still need to be set back 12m from National Grid support structures) on the basis they are unlikely to "build out" a line.
- The notified provisions allow for paddocks, fencing (as high as deer fences), landscaping and small sheds, and larger farm buildings in proximity to conductors not used for intensive farming purposes.
- Grazing, cropping, and car parking activities are not restricted.
- Conversely, examples of development that has severely restricted or blocked the submitters ability to effectively access its assets include dairy sheds, piggeries, poultry sheds and commercial hothouses and glass houses, as well as sensitive activities. These activities can cover an extensive area of land, and it may be expensive to disrupt or require these activities to be relocated while the submitter carries out work on its transmission assets.
- Amendments are sought to Rule P2 in the form of reformatting/restructuring to clarify the intent of the provisions; as well as recognition of network utilities (as opposed to Infrastructure generally). Amendment is also sought to clause 1) to clarify where the rule applies noting that existing National Grid assets do not traverse all zones and any new lines would be designated and therefore not be subject to Rule P2.
- For the avoidance of doubt reference is also made to mining and extractions resource areas as it is not clear if they are subject to the rule as notified.
- No more restrictive provisions are sought than those notified.

Point Number

576.55

Summary of Decision Requested:

Retain Activity Specific Conditions 14.4.1.3 P3 Permitted Activities, except for the amendments sought below

AND

Amend Activity Specific Conditions 14.4.1.3 P3 Permitted Activities, as follows:

~~(1) Earthworks within the National Grid Yard for National Grid support poles and any stay wires that comply with the following conditions:~~

~~(a) Do not exceed a depth (measured vertically), of 300mm within 12m of the outer visible edge any National Grid support structure foundation, 2.2m of the pole or stay wire; and~~

~~(b) Do not exceed a depth of 750mm between 2.2m and 5m of the pole or stay wire.~~

~~(2) Earthworks for National Grid support towers (including any tubular steel tower that replaces a steel lattice tower) that comply with all of the following conditions:~~

~~(a) Do not exceed 300m depth within 6m of the outer edge of the visible foundation of the tower;~~

~~(b) Do not exceed 3m between 6m and 12m of the outer edge of the visible foundation of the tower;~~

~~(c) ...~~

~~(d) ...~~

~~(e) Do not result in a reduction in the ground to conductor clearance distances of less than 6.5m (measured vertically), from a 110kV National Grid transmission line, or 7.5m (measured vertically), from a 220kV National Grid transmission line. Must be less than the minimum ground to conductor clearance distances in Table 4 of the New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.~~

~~(3) The following earthworks activities are exempt from Rules 14.4.1.3(1) (a) and (2):~~

~~(a)...~~

~~(4) Earthworks for which a dispensation has been granted by Transpower under New Zealand Electrical Code of Practice for Electrical Safe Distances 34:2001 ISSN 0114-0663.~~

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activity earthwork provisions on the basis such activities can compromise the National Grid and are a form of development contemplated by the NPSET.
- Amendments are sought to Rule P3 to simplify the rule and also recognise that the risks to the National Grid extend beyond those addressed by NZECP34.

Point Number

576.56

Summary of Decision Requested: Retain Rule 14.4.2 RD1 Restricted Discretionary Activities, as notified.

Decision Reasons:

- It provides an appropriate consenting framework in which to consider new National Grid assets.
- The distinction between identified areas and non-identified area is supported (however, noting that as outlined below, the non-complying activity status for identified areas is opposed).

Point Number 576.57

Summary of Decision Requested: Retain Rule 14.4.2 RD2 Restricted Discretionary Activities, as notified.

Decision Reasons:

- It provides an appropriate consenting framework in which to consider new National Grid assets.
- The distinction between identified areas and non-identified area is supported (however, noting that as outlined below, the non-complying activity status for identified areas is opposed).

Point Number 576.58

Summary of Decision Requested: Retain Rule 14.4.2 RD3 Restricted Discretionary Activities, except for the amendments sought below

AND

Amend Rule 14.4.2 RD3 Restricted Discretionary Activities, as follows:

Earthworks within the National Grid Yard that does not comply with ~~one or more of the conditions (a)(e) or (d) of Rules 14.4.1.3(1) and 14.4.1.3(2) but complies with conditions (c), (g) and (e) of Rule 14.4.1.3(1).~~

Discretion is restricted to:

(a)

(e) Technical advice provided by the National Grid owner (Transpower);

(f) Any effects on National Grid support structures including the creation of an unstable batter

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of standards specific to earthworks on the basis such activities can compromise the National Grid, and are a form of development contemplated by the NPSET. Specifically, earthworks restrictions are supported as earthworks have the potential to undermine transmission line structures, generate dust, reduce the clearances between the ground and conductors.
- They have the potential to restrict the submitters ability to access the line and locate the heavy machinery required to maintain support structures around the lines and may lead to potential tower failure and significant constraints on the operation of the line.
- Amendment is sought to Rule RD3 to include two additional matters of discretion to better reflect the range of issues relevant in the consideration of earthworks in proximity of the National Grid support structures. An important distinction is also sought for those earthworks which result in a reduced conductor clearance and which pose significant potential safety issues (condition (e)), compromise the stability of a National Grid support structure (condition (c)), and earthworks that result in a permanent loss of vehicular access to any National Grid support structure (condition (d)). For such earthworks, a non-complying activity status is sought. For remaining earthworks, a restricted discretionary activity status is supported where permitted condition (a) (being depth) is not complied with.

Point Number 576.59

Summary of Decision Requested: Retain Rule 14.4.2.1 RD4 Restricted Discretionary Activities, except for the amendments sought below

AND

Amend Rule 14.4.2.1 RD4 Restricted Discretionary Activities, as follows:

The subdivision of land in any zone within the National Grid Corridor that complies with all of the following conditions:

(a) All resulting allotments intended to contain a sensitive land use must provide be able to demonstrate that they are capable of accommodating a building platform for the likely principal building(s) and any building(s) for a sensitive land use to be located outside of the National Grid Yard, other than where the allotments are for roads, access ways or infrastructure; or and

(b) ...

Discretion is restricted to:

(a) The subdivision layout and design in regard to how this may impact on the operation, maintenance, upgrading and development of, including access to, the National Grid;

(b) ...

(d) The nature and location of any vegetation to be planted in the vicinity of National Grid transmission lines, and the how such landscaping will impact on the operation, maintenance, upgrade and development (including access) of the National Grid;

(e) The risk to the structural integrity of the National Grid;

(f) The extent to which the subdivision design and consequential development will minimise the potential reverse sensitivity on and amenity and nuisance effects of the National Grid asset

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supported the suite of rules for subdivision within the National Grid (Subdivision) Corridor: allotments are for roads, access ways or Subdivision within the National Grid Subdivision Corridor would be a restricted discretionary activity where the newly created lots are infrastructure; or capable of accommodating all building platforms outside the National Grid Yard.
- Where the subdivision application is unable to demonstrate that this can be achieved, a non-complying activity status would apply to the subdivision.
- A restricted discretionary activity status for subdivision provides an appropriate incentive to design subdivision layouts that avoid building sites within the National Grid Yard.
- Subdivision is considered the most effective point at which to ensure future reverse sensitivity effects, balance area maintenance access issues, and adverse effects of transmission lines (including amenity issues) are avoided.
- This can be achieved by designing subdivision layouts to properly accommodate transmission corridors (including, for example, through the creation of reserves and/or open space where buffer corridors are located).
- Slightly amended wording is sought to the rule to reflect the current approach.
- A minor reference is sought to the wording to make it clear both conditions (a) and (b) must be met, as appears the intent from the opening text to the rule.

Point Number 576.60

Summary of Decision Requested: Amend Rule 14.4.3 D1 Discretionary Activities, as follows:

New above and below ground transmission lines associated with the National Grid within identified areas

AND

Amend Rule 14.4.3 Discretionary Activities, to clarify what are identified areas;

AND

Retain Rule 14.4.3 D2 Discretionary Activities, as notified.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of discretionary activities.
- Policy 8 of areas the NPSET directs that within rural environments planning and development of the National Grid should seek to avoid adverse effects on certain identified environments (being outstanding natural landscapes, area of high natural character and recreation values and amenity and existing sensitive activities) areas.
- The wording of NPSET Policy 8 ("should seek to avoid") does not impose an absolute requirement for the National Grid to avoid all adverse effects. Rather, the NPSET recognises total avoidance is not always possible given the technical and operational requirements of the National Grid (as recognised in Policy 3 of the NPSET). On this basis, given the locational constraints of the National Grid and the national significance of the National Grid (as provided for in the NPSET), the submitter supports a discretionary activity status for new structures associated with the National Grid within the identified areas. As a discretionary activity, a full assessment of effects would be required as well as a robust route, site and method selection process (Policy 4, NPSET), appropriate conditions imposed, and the application able to be granted or declined.

Point Number

576.61

Summary of Decision Requested:

Add a new rule (D3) to Rule 14.4.3 Discretionary Activities, as follows:

D3 Substations and switching stations associated with the National Grid located within identified areas

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- To provide for Substations and switching stations associated within the National Grid within identified areas as discretionary activities rather than non-complying under Rule 14.4.4. (Note: reference to Transformers are removed as they are not provided in isolation from a substation.)

Point Number

576.62

Summary of Decision Requested:

Delete Rule 14.4.4 NC1 Non-Complying Activities.

AND

Delete Rule 14.4.4 NC2 Non-Complying Activities.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The Proposed District Plan is required to give effect to the NPSET. Policy 8 of the NPSET directs that within rural environments planning and development of the National Grid should seek to avoid adverse effects on certain identified environments (being outstanding natural landscapes, area of high natural character and recreation values and amenity and existing sensitive activities) areas.
- The wording of NPSET Policy 8 ("should seek to avoid") does not impose an absolute requirement for the National Grid to avoid all adverse effects. Rather, the NPSET recognises total avoidance is not always possible given the technical and operational requirements of the National Grid (as recognised in Policy 3 of the NPSET). On this basis, given the locational constraints of RSL and the national significance of the National Grid (as provided for in the NPSET), the submitter supports a discretionary activity status for new structures associated with the National Grid within the identified areas. As a discretionary activity, a full assessment of effects would be required as well as a robust route, site and method selection process (Policy 4, NPSET), appropriate conditions imposed, and the application able to be granted or declined.
- The non-complying activity status of the activities provided in Rule NC 1 is inconsistent with the activity status for similar activities provided in Section 14.5.
- Section 14.5 relates to Electricity distribution (essentially local line companies). The most restrictive activity status for new overhead distribution lines, support structures or substations is as a discretionary activity where as the equivalent for the National Grid would be Non-Complying.
- The differing activity status does not reflect the national significance of the National Grid and requirement to give effect to the NPSET, and provides an inconsistent consenting framework for very similar activities with very similar visual and construction and ongoing operational effects.

Point Number

576.63

Summary of Decision Requested:

Retain Rule 14.4.4 NC5 Non-Complying Activities, except for the amendments sought below;

AND

Amend Rule 14.4.4 NC5 Non-Complying Activities, as follows:

NC5 Any new building for a sensitive land use, or addition to an existing building that involves an increase in the building envelope or height for a sensitive land use, within the National Grid Yard

AND

Amend Rule 14.4.4 NC5 Non-Complying Activities, to clarify intent and application of the rules and provide better linkage to permitted activity rules.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activities status for certain activities and structures (specifically fences, network utilities, existing sensitive activity structures which do not increase the height or footprint and non-intensive/uninhabitable farm or horticultural buildings and structures) within the National Grid Yard, but also supports the provision of a non-complying activity status for new sensitive activities, or additions to existing sensitive activities, milking and dairy sheds and other intensive farm buildings, and any buildings and structures which do not meet safe conductor (line) clearances.
- A non-complying activity status is considered the most effective means of given effect to the NPSET; objective of managing the adverse effects of the network and managing the adverse effects of other activities on the network.
- A non-complying activity status most appropriately recognises and provides for the effective operation, maintenance, upgrading and development of the network, as required by NPSET Policy 2.
- A non-complying activity status is the best method to manage other activities to ensure the operation, maintenance, upgrading, and development of the network is not compromised, as required by NPSET Policy 10.
- A non-complying activity status recognises the policy directive within Policy 11 to identify an appropriate buffer corridor within which it can be expected that sensitive activities will generally not be provided for.

- NPSET Policy 10 contains the phrase 'avoid reverse sensitivity effects' and 'to ensure that the operation, maintenance, upgrading and development of the electricity transmission network is not compromised'. NPSET Policy 11 gives a clear direction that 'sensitive activities will generally not be provided for in plans and/or given resource consent'. The use of the words 'avoid' and 'ensure' and the phrase 'will generally not be provided for' provide a strong direction that cannot be achieved by use of the restricted discretionary activity status. Such policy direction can only be achieved by way of a non-complying activity status.
- A non-complying activity status promotes consistency in decision-making, and more effectively manages landowner expectations about what activities are appropriate or otherwise in the National Grid Yard.
- The Environment Court has noted in the past that there are many reasons why activities might have non-complying status in district plans: one of those reasons is the activity in question is, in some way, likely to produce significant adverse effects. This contrasts with the approach that a discretionary activity status implies that, in general, a particular activity is an efficient use and development of resources.
- Given the potential adverse effects that encroachments could have on the National Grid corridor, such an indication is inappropriate.
- Minor amendment is sought to clarify the intent and application of the rules and provide better linkage to the permitted activity rules.

Point Number 576.64

Summary of Decision Requested: Retain Rule 14.4.4 NC9 Non-Complying Activities, except for the amendments sought below;

AND

Amend Rule 14.4.4 -NC9 Non-Complying Activities, as follows:

NC9 Dairy/milking sheds (excluding accessory structures and buildings), commercial glass houses, PSA structures or buildings for intensive farming within the National Grid Yard

AND

Amend Rule 14.4.4 NC9 Non-Complying Activities, to clarify intent and application of the rules and provide better linkage to permitted activity rules.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activities status for certain activities and structures (specifically fences, network utilities, existing sensitive activity structures which do not increase the height or footprint and non-intensive/uninhabitable farm or horticultural buildings and structures) within the National Grid Yard, but also supports the provision of a non-complying activity status for new sensitive activities, or additions to existing sensitive activities, milking and dairy sheds and other intensive farm buildings, and any buildings and structures which do not meet safe conductor (line) clearances.
- A non-complying activity status is considered the most effective means of given effect to the NPSET's objective of managing the adverse effects of the network and managing the adverse effects of other activities on the network.
- A non-complying activity status most appropriately recognises and provides for the effective operation, maintenance, upgrading and development of the network, as required by NPSET Policy 2.
- A non-complying activity status is the best method to manage other activities to ensure the operation, maintenance, upgrading, and development of the network is not compromised, as required by NPSET Policy 10.
- A non-complying activity status recognises the policy directive within Policy 11 to identify an appropriate buffer corridor within which it can be expected that sensitive activities will generally not be provided for.
- NPSET Policy 10 contains the phrase 'avoid reverse sensitivity effects' and 'to ensure that the operation, maintenance, upgrading and development of the electricity transmission network is not compromised'. NPSET Policy 11 gives a clear direction that 'sensitive activities will generally not be provided for in plans and/or given resource consent'. The use of the words 'avoid' and 'ensure' and the phrase 'will generally not be provided for' provide a strong direction that cannot be achieved by use of the restricted discretionary activity status. Such policy direction can only be achieved by way of a non-complying activity status.
- A non-complying activity status promotes consistency in decision-making, and more effectively manages landowner expectations about what activities are appropriate or otherwise in the National Grid Yard.
- The Environment Court has noted in the past that there are many reasons why activities might have non-complying status in district plans: one of those reasons is the activity in question is, in some way, likely to produce significant adverse effects. This contrasts with the approach that a discretionary activity status implies that, in general, a particular activity is an efficient use and development of resources.
- Given the potential adverse effects that encroachments could have on the National Grid corridor, such an indication is inappropriate.
- Minor amendment is sought to clarify the intent and application of the rules and provide better linkage to the permitted activity rules.

Point Number 576.65

Summary of Decision Requested: Retain Rule 14.4.4 NC10 Non-Complying Activities, except for the amendments sought below

AND

Amend Rule 14.4.4 NC10 Non-Complying Activities, as follows:

NC10 Any subdivision of land in any zone within the National Grid Corridor that does not comply with ~~one or more of the conditions of Rule 14.4.2.1 (RD4)~~

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activities status for certain activities and structures (specifically fences, network utilities, existing sensitive activity structures which do not increase the height or footprint and non-intensive/uninhabitable farm or horticultural buildings and structures) within the National Grid Yard, but also supports the provision of a non-complying activity status for new sensitive activities, or additions to existing sensitive activities, milking and dairy sheds and other intensive farm buildings, and any buildings and structures which do not meet safe conductor (line) clearances.
- A non-complying activity status is considered the most effective means of given effect to the NPSET's objective of managing the adverse effects of the network and managing the adverse effects of other activities on the network.
- A non-complying activity status most appropriately recognises and provides for the effective operation, maintenance, upgrading and development of the network, as required by NPSET Policy 2.
- A non-complying activity status is the best method to manage other activities to ensure the operation, maintenance, upgrading, and development of the network is not compromised, as required by NPSET Policy 10.
- A non-complying activity status recognises the policy directive within Policy 11 to identify an appropriate buffer corridor within which it can be expected that sensitive activities will generally not be provided for.
- NPSET Policy 10 contains the phrase 'avoid reverse sensitivity effects' and 'to ensure that the operation, maintenance, upgrading and development of the electricity transmission network is not compromised'. NPSET Policy 11 gives a clear direction that 'sensitive activities will generally not be provided for in plans and/or given resource consent'. The use of the words 'avoid' and 'ensure' and the phrase 'will generally not be provided for' provide a strong direction that cannot be achieved by use of the restricted discretionary activity status. Such policy direction can only be achieved by way of a non-complying activity status.
- A non-complying activity status promotes consistency in decision-making, and more effectively manages landowner expectations about what activities are appropriate or otherwise in the National Grid Yard.
- The Environment Court has noted in the past that there are many reasons why activities might have non-complying status in district plans: one of those reasons is the activity in question is, in some way, likely to produce significant adverse effects. This contrasts with the approach that a discretionary activity status implies that, in general, a particular activity is an efficient use and development of resources.
- Given the potential adverse effects that encroachments could have on the National Grid corridor, such an indication is inappropriate.
- Minor amendment is sought to clarify the intent and application of the rules and provide better linkage to the permitted activity rules.

Point Number 576.66

Summary of Decision Requested: Add a new non-complying activity (NC11) to Rule 14.4.4 Non-Complying Activities, as follows:

NC11 Earthworks within the National Grid Yard that is not a permitted activity under Rule 14.4.1.P3 or a restricted discretionary activity under Rule 14.4.2.RD3.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- NC11 relates to earthworks and provides a linkage to the sought amendment to restricted discretionary rule RD3, and provides a non-complying activity status for earthworks which do not achieve the necessary conductor clearance distances to ensure safety, do not maintain access to support structures, or earthworks which compromise the stability of a support structure. Given the safety risks of the works and potential effects on the operation, maintenance and upgrade of the assets, a non-complying activity is sought to reflect that the activity is not appropriate.
- A non-complying activity status also gives a very strong policy signal that under-build and earthworks that increase ground level or result in destabilisation of a National Grid support structure or permanently physically restrict vehicular access, within the National Grid Yard are not appropriate as they can potentially compromise the security of supply, safety, and impinge on the ability of Transpower to maintain its assets. Whilst an application can still be made under the RMA, it would need to show the proposed activity would not be contrary to the objectives and policies of the District Plan or that its adverse effects on the environment would be no more than minor

Point Number 576.67

Summary of Decision Requested: **Add** a new non-complying activity (NC12) to Rule 14.4.4 Non-Complying Activities, as follows:

NC12 Any building or structure within the National Grid Yard that is not a permitted activity under Rule 14.4.1, Restricted discretionary activity under Rule 14.4.2 or Discretionary activity under Rule 14.4.3.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- It provides a linkage to the other rules within Section 14.4.1 relating to the National Grid and acts as a default 'catch all' rule.
- A non-complying activity status also gives a very strong policy signal that under-build and earthworks that increase ground level or result in destabilisation of a National Grid support structure or permanently physically restrict vehicular access, within the National Grid Yard are not appropriate as they can potentially compromise the security of supply, safety, and impinge on the ability of the submitter to maintain its assets. Whilst an application can still be made under the RMA, it would need to show the proposed activity would not be contrary to the objectives and policies of the District Plan or that its adverse effects on the environment would be no more than minor.

Point Number 576.68

Summary of Decision Requested: **Add** a new advice note under Section 14.4.4 Non-Complying Activities, as follows:

Transpower or a suitably qualified engineer should be contacted for assistance with clearance requirements in NZCEP 34:2001.

(1) Compliance with the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZCEP 34:2001) is mandatory under the Electricity Act 1992. All activities regulated by NZCEP34:2001, including buildings, structures, earthworks and the operation of mobile plant, must comply with that regulation. Activities should be checked for compliance even if they are permitted by the District Plan.

(2) An activity, including buildings and structures, earthworks, quarrying and planting vegetation, within the National Grid Corridor or National Grid Yard may require resource consent. Transpower New Zealand limited will be considered to be an affected party where consent is required. Where an activity requires resource consent solely because it is within the National Grid Yard and/or Corridor public notification of the application is precluded. However, limited notification will be given to Transpower unless the written approval from Transpower is provided at the time the application is lodged.

(3) The Electricity (Hazards from Trees) Regulations 2003 applies to vegetation planted within the National Grid Corridor or near sub-transmission or distribution electricity lines and must be complied with. Vegetation to be planted within the National Grid Yard as shown on the District Plan Maps should be selected and/or managed to ensure that it will not result in that vegetation breaching the Electricity (Hazards from Trees) Regulations 2003 or prevent access to support structures. To discuss works, including tree planting near any electricity line especially works within the National Grid Yard, contact the relevant network utility operator.

OR

Add a new advice note into the Introduction to Chapter 14 Infrastructure and Energy, as follows:

Transpower or a suitably qualified engineer should be contacted for assistance with clearance requirements in NZCEP 34:2001.

(1) Compliance with the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZCEP 34:2001) is mandatory under the Electricity Act 1992. All activities regulated by NZCEP34:2001, including buildings, structures, earthworks and the operation of mobile plant, must comply with that regulation. Activities should be checked for compliance even if they are permitted by the District Plan.

(2) An activity, including buildings and structures, earthworks, quarrying and planting vegetation, within the National Grid Corridor or National Grid Yard may require resource consent. Transpower New Zealand limited will be considered to be an affected party where consent is required. Where an activity requires resource consent solely because it is within the National Grid Yard and/or Corridor public notification of the application is precluded. However, limited notification will be given to Transpower unless the written approval from Transpower is provided at the time the application is lodged.

(3) The Electricity (Hazards from Trees) Regulations 2003 applies to vegetation planted within the National Grid Corridor or near sub-transmission or distribution electricity lines and must be complied with. Vegetation to be planted within the National Grid Yard as shown on the District Plan Maps should be selected and/or managed to ensure that it will not result in that vegetation breaching the Electricity (Hazards from Trees) Regulations 2003 or prevent access to support structures. To discuss works, including tree planting near any electricity line especially works within the National Grid Yard, contact the relevant network utility operator.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- To assist plan users in understanding the National Grid and relationship with external documents, the submitter supports the provision of three advice notes. Such advice notes would assist in plan interpretation and application.
- The three advice notes relate to:
 - Advising that notwithstanding the PWDR, compliance with the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZCEP 34:2001) is mandatory under the Electricity Act 1992
 - Advising that Transpower New Zealand limited will be considered to be an affected party where consent is required.
 - Advising that notwithstanding the Proposed District Plan, the Electricity (Hazards from Trees) Regulations 2003 applies to vegetation planted within the National Grid Corridor or near sub-transmission or distribution electricity lines and must be complied with.

Point Number 576.69

Summary of Decision Requested: **Retain** the identification of the National Grid on the planning maps as notified.

Decision Reasons:

- The submitter supports the identification of the National Grid on the planning maps as it provides clear guidance for plan users as to the location of the National Grid and will assist in plan interpretation.

Point Number 576.70

Summary of Decision Requested: **Retain** the Transpower designations K1 and K3-8 in Section E - Designations, as notified.

Decision Reasons:

- The submitter supports designations K1 and K3-K8 as listed in Section E of the proposed plan, as the list reflects existing designated National Grid assets.

Point Number 576.71

Summary of Decision Requested: **Amend** Designation K7 - Ohinewai Switching Station, to include references to ongoing conditions.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number 576.72

Summary of Decision Requested: **Add** a designation to Section E - Designations - K Transpower, for Hamilton to Meremere B Underground Transmission Line Cable (DES0008/18), (K2), as follows:

<u>Des #</u>	<u>Purpose of designation</u>	<u>Location</u>	<u>Area (ha)</u>
<u>K2</u>	<u>Hamilton to Meremere B Underground Transmission Line Cable</u>	<u>Puketaha Road</u>	<u>1.96ha</u>

AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter has provided notice to Waikato District Council on 11 June 2018 that its existing designations under the Operative District Plan (Waikato Section) and Operative District Plan (Franklin Section) are required to be included in the Proposed Waikato District Plan without modification, and rolled over. Specific details were provided including the existing designation (accepted in October 2017) *Hamilton to Meremere B Underground Transmission Line Cable (DES0008/18)*.
- While the designation is identified on the planning maps (Map Eureka 27) as Designation K2, it is not shown within the Designation Schedule E within the Proposed District Plan. The submitter seeks the designation be included within Schedule E. As outlined in the 11 June 2018 notice, no ongoing conditions are applicable because construction has occurred.

Point Number 576.73

Summary of Decision Requested: **Retain** Objective 6.1.1 (a) Development, operation and maintenance of infrastructure, except for the amendments sought below
AND
Amend Objective 6.1.1 (a) Development, operation and maintenance of infrastructure, as follows:
(a) Infrastructure is developed, operated and maintained and upgraded to benefit the social, economic, cultural and environmental wellbeing of the district, region and nation.
AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the policy recognition of the benefits of infrastructure. However, amendment is sought to refer to 'upgrade', as well as the insertion of recognition of the regional and national benefits given infrastructure can have wider benefits than those at a district level.

Point Number 576.74

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance, as notified.

Decision Reasons:

- The submitter supports Policy 6.1.2 as it appropriately recognises the need to provide for infrastructure, and the range of influences and considerations that are associated with the development, operation, maintenance, repair, replacement, upgrading and removal of infrastructure.
- The policy gives effect to Policies 1-4 of the NPSET.

Point Number 576.75

Summary of Decision Requested: **Retain** Policy 6.1.3 Technological advances, as notified.

Decision Reasons:

- This policy is supported as it recognises technological advances. Given the 10-year life of the plan and the ever-changing technological advances, the recognition of flexibility is supported.

Point Number 576.76

Summary of Decision Requested: **Retain** Policy 6.1.4 Infrastructure benefits, as notified.

Decision Reasons:

- The recognition of the benefits of infrastructure within Policy 6.1.4 is supported, and gives effect to Policy 1 of the NPSET, and Waikato RPS Objective 3.5(e), Policy 4.4, and Policy 6.6.

Point Number 576.77

Summary of Decision Requested: **Retain** Objective 6.1.6 Reverse sensitivity, except for the amendments sought below
AND

Amend Objective 6.1.6 Reverse sensitivity, as follows:

6.1.6 Objective – ~~Reverse sensitivity~~ Adverse Effects on Infrastructure

(a) ...

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The provision of an objective specific to reverse sensitivity is supported, as is the specific reference to the National Grid within the objective.
- However, amendment is sought to the objective title to recognise that it is not only sensitive activities which can compromise infrastructure, but also the adverse effects of subdivision, land use and development.
- The submitter can be affected by other activities that establish beneath or in close proximity to its lines and/or structures. Such activities can generate reverse sensitivity effects where landowners/operators request a Council to impose constraints on existing infrastructure to manage effects such as noise, reduced visual amenity, radio and television interference, perceived Electric and Magnetic Field (EMF) effects, or interference with business activities beneath the lines.
- Subdivision, land use and development can also compromise the National Grid through activities such as access to the National Grid assets being blocked, buildings and structures being located close to assets and causing risk and safety issues (such as flashovers) or the location of buildings and activities, particularly 'sensitive activities' such as schools and residential properties, beneath or in close proximity to lines and/or structures can limit the submitter's ability to maintain, upgrade and develop the National Grid.
- The recognition of subdivision, land use and development activities not compromising infrastructure (and in particular the National Grid) would give effect to Policy 10 of the NPSET.

Point Number

576.78

Summary of Decision Requested:

Retain Policy 6.1.7 Reverse sensitivity and infrastructure, except for the amendments sought below

AND

Amend Policy 6.1.7 Reverse sensitivity and infrastructure, as follows:

6.1.7 Policy – ~~Reverse sensitivity~~ Adverse Effects on end-infrastructure

(a) *Avoid reverse sensitivity effects on infrastructure from subdivision, use and development as far as reasonably practicable, and ensure ~~so that~~ the ongoing and efficient operation of infrastructure is not compromised.*

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The provision of a policy specific to reverse sensitivity is supported.
- However, amendment is sought to the policy to recognise that it is not only sensitive activities which can compromise infrastructure, but also the adverse effects of subdivision, land use, and development.

Point Number

576.79

Summary of Decision Requested:

Retain Policy 6.1.9 - Environmental effects, community health, safety and amenity on the basis that Policy 6.2.5 is retained (with amendments).

Decision Reasons:

- The submitter is supportive of the provision of a general policy for avoiding, remedying or mitigation of adverse effects.
- However, the provision of a policy specific to the National Grid (Policy 6.2.5) is supported as it gives effect to the NPSET and recognises the particular requirements, issues and constraints associated with the National Grid.

Point Number

576.80

Summary of Decision Requested:

Add a new definition for "Identified area" to Chapter 13 Definitions.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the intent of the policy in that infrastructure development in certain areas should require greater consideration.
- However, it is unclear what exactly constitutes as an "identified area" as the term is not defined within the Proposed District Plan, but is used within policies and widely throughout the rules.
- While 'lists' of identified areas are provided within the Proposed District Plan provisions in Rule 14.1(3) and Rule 22.4.5, these lists are not consistent and therefore could be confusing to plan users as to whether an "identified area" is caught by the policy or numerous rules which refer to "identified areas".

Point Number

576.81

Summary of Decision Requested:

Retain Policy 6.1.11 Undergrounding new infrastructure, as notified.

Decision Reasons:

- The submitter supports this policy in that it provides the ability for recognition of the significant operational, functional, technical, cultural or economic reason (constraints) as to why undergrounding of new infrastructure is not always possible.

Point Number

576.82

Summary of Decision Requested:

Retain Rule 14.4.4 NC3 Non-Complying Activities, except for the amendment sought below

AND

Amend Rule 14.4.4 NC3 Non-Complying Activities, to clarify intent and application of the rules and provide better linkage to permitted activity rules.

AND

Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activities status for certain activities and structures (specifically fences, network utilities, existing sensitive activity structures which do not increase the height or footprint and non-intensive/uninhabitable farm or horticultural buildings and structures) within the National Grid Yard, but also supports the provision of a non-complying activity status for new sensitive activities, or additions to existing sensitive activities, milking and dairy sheds and other intensive farm buildings, and any buildings and structures which do not meet safe conductor (line) clearances.
- A non-complying activity status is considered the most effective means of given effect to the NPSET's objective of managing the adverse effects of the network and managing the adverse effects of other activities on the network.
- A non-complying activity status most appropriately recognises and provides for the effective operation, maintenance, upgrading and development of the network, as required by NPSET Policy 2.
- A non-complying activity status is the best method to manage other activities to ensure the operation, maintenance, upgrading, and development of the network is not compromised, as required by NPSET Policy 10.
- A non-complying activity status recognises the policy directive within Policy 11 to identify an appropriate buffer corridor within which it can be expected that sensitive activities will generally not be provided for.
- NPSET Policy 10 contains the phrase 'avoid reverse sensitivity effects' and 'to ensure that the operation, maintenance, upgrading and development of the electricity transmission network is not compromised'. NPSET Policy 11 gives a clear direction that 'sensitive activities will generally not be provided for in plans and/or given resource consent'. The use of the words 'avoid' and 'ensure' and the phrase 'will generally not be provided for' provide a strong direction that cannot be achieved by use of the restricted discretionary activity status. Such policy direction can only be achieved by way of a non-complying activity status.
- A non-complying activity status promotes consistency in decision-making, and more effectively manages landowner expectations about what activities are appropriate or otherwise in the National Grid Yard.
- The Environment Court has noted in the past that there are many reasons why activities might have non-complying status in district plans: one of those reasons is the activity in question is, in some way, likely to produce significant adverse effects. This contrasts with the approach that a discretionary activity status implies that, in general, a particular activity is an efficient use and development of resources.
- Given the potential adverse effects that encroachments could have on the National Grid corridor, such an indication is inappropriate.
- Minor amendment is sought to clarify the intent and application of the rules and provide better linkage to the permitted activity rules.

Point Number 576.83

Summary of Decision Requested: **Retain** Rule 14.4.4 NC4 Non-Complying Activities, except for the amendments sought below
 AND
Amend Rule 14.4.4 NC4 Non-Complying Activities, to clarify intent and application of the rules and provide better linkage to permitted activity rules.
 AND
Amend the Proposed District Plan to make consequential amendments to address the matters raised in the submission.

Decision Reasons:

- The submitter supports the provision of permitted activities status for certain activities and structures (specifically fences, network utilities, existing sensitive activity structures which do not increase the height or footprint and non-intensive/uninhabitable farm or horticultural buildings and structures) within the National Grid Yard, but also supports the provision of a non-complying activity status for new sensitive activities, or additions to existing sensitive activities, milking and dairy sheds and other intensive farm buildings, and any buildings and structures which do not meet safe conductor (line) clearances.
- A non-complying activity status is considered the most effective means of given effect to the NPSET's objective of managing the adverse effects of the network and managing the adverse effects of other activities on the network.
- A non-complying activity status most appropriately recognises and provides for the effective operation, maintenance, upgrading and development of the network, as required by NPSET Policy 2.
- A non-complying activity status is the best method to manage other activities to ensure the operation, maintenance, upgrading, and development of the network is not compromised, as required by NPSET Policy 10.
- A non-complying activity status recognises the policy directive within Policy 11 to identify an appropriate buffer corridor within which it can be expected that sensitive activities will generally not be provided for.
- NPSET Policy 10 contains the phrase 'avoid reverse sensitivity effects' and 'to ensure that the operation, maintenance, upgrading and development of the electricity transmission network is not compromised'. NPSET Policy 11 gives a clear direction that 'sensitive activities will generally not be provided for in plans and/or given resource consent'. The use of the words 'avoid' and 'ensure' and the phrase 'will generally not be provided for' provide a strong direction that cannot be achieved by use of the restricted discretionary activity status. Such policy direction can only be achieved by way of a non-complying activity status.
- A non-complying activity status promotes consistency in decision-making, and more effectively manages landowner expectations about what activities are appropriate or otherwise in the National Grid Yard.
- The Environment Court has noted in the past that there are many reasons why activities might have non-complying status in district plans: one of those reasons is the activity in question is, in some way, likely to produce significant adverse effects. This contrasts with the approach that a discretionary activity status implies that, in general, a particular activity is an efficient use and development of resources.
- Given the potential adverse effects that encroachments could have on the National Grid corridor, such an indication is inappropriate.
- Minor amendment is sought to clarify the intent and application of the rules and provide better linkage to the permitted activity rules.

Point Number 576.84

Summary of Decision Requested: **Retain** Rule 14.4.4 NC6 Non-Complying Activities, as notified;
 AND
Retain Rule 14.4.4 NC7 Non-Complying Activities, as notified;
 AND
Retain Rule 14.4.4 NC8 Non-Complying Activities, as notified.

Decision Reasons:

- The submitter supports the provision of permitted activities status for certain activities and structures (specifically fences, network utilities, existing sensitive activity structures which do not increase the height or footprint and non-intensive/uninhabitable farm or horticultural buildings and structures) within the National Grid Yard, but also supports the provision of a non-complying activity status for new sensitive activities, or additions to existing sensitive activities, milking and dairy sheds and other intensive farm buildings, and any buildings and structures which do not meet safe conductor (line) clearances.
- A non-complying activity status is considered the most effective means of given effect to the NPSET's objective of managing the adverse effects of the network and managing the adverse effects of other activities on the network.
- A non-complying activity status most appropriately recognises and provides for the effective operation, maintenance, upgrading and development of the network, as required by NPSET Policy 2.
- A non-complying activity status is the best method to manage other activities to ensure the operation, maintenance, upgrading, and development of the network is not compromised, as required by NPSET Policy 10.
- A non-complying activity status recognises the policy directive within Policy 11 to identify an appropriate buffer corridor within which it can be expected that sensitive activities will generally not be provided for.
- NPSET Policy 10 contains the phrase 'avoid reverse sensitivity effects' and 'to ensure that the operation, maintenance, upgrading and development of the electricity transmission network is not compromised'. NPSET Policy 11 gives a clear direction that 'sensitive activities will generally not be provided for in plans and/or given resource consent'. The use of the words 'avoid' and 'ensure' and the phrase 'will generally not be provided for' provide a strong direction that cannot be achieved by use of the restricted discretionary activity status. Such policy direction can only be achieved by way of a non-complying activity status.
- A non-complying activity status promotes consistency in decision-making, and more effectively manages landowner expectations about what activities are appropriate or otherwise in the National Grid Yard.
- The Environment Court has noted in the past that there are many reasons why activities might have non-complying status in district plans: one of those reasons is the activity in question is, in some way, likely to produce significant adverse effects. This contrasts with the approach that a discretionary activity status implies that, in general, a particular activity is an efficient use and development of resources.
- Given the potential adverse effects that encroachments could have on the National Grid corridor, such an indication is inappropriate.

Submitter Number: 577

Submitter: Dilworth Trust Board

Point Number 577.1

Summary of Decision Requested: **Add** a new policy to Section 5.3 - Rural Character and Amenity, as follows:

5.3.19 Policy – Specific area – Dilworth School – Rural Campus

(g) Recognise and protect the continued operation and ongoing development of the Dilworth School – Rural Campus.

(b) Provide for the operation and development of education facilities and boarding and accommodation activities that are integral to the Dilworth School – Rural Campus, and which complement the surrounding rural environment.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- The proposed Rural Zone provisions do not appropriately provide for the Rural Campus.
- The Proposed objectives and policies for the Rural Zone enable rural activities and manage effects from non-rural activities but submission seeks amendments to afford protection to lawfully established non-rural activities, including future expansions.
- Any future development of non-rural activities may conflict with the outcomes that are otherwise anticipated by the Rural Zone.
- Submission supports for area specific provisions. The nature of the Rural Campus is such that it is appropriate to include specific policies to relate to, recognise, and protect the activity, similar to the policies that are included for other 'Specific Areas' in the Rural Zone.

Point Number 577.2

Summary of Decision Requested: **Add** a new 'Specific Area' in Chapter 22 - Rural Zone, to provide for the Dilworth School - Rural Campus facility. See Appendix 2 of the submission for full details of provisions sought for the 'Specific Area'.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- Rural Zone provisions do not appropriately provide for the nature of activities that occur at the Rural Campus (including any intensification of those activities).
- While education facilities are a discretionary activity, the Proposed Rural Zone does not cater for any ancillary boarding or staff accommodation for a Rural Campus. Any development would be subject to an onerous resource consent process.
- Requests 'Specific Area' provided for to provide for education facilities, boarding and staff accommodation, and associated activities as Permitted activities within the site.
- Submission notes particular issues with proposed rules of the Rural Zone, namely:
 - Rule 22.3.1 Number of dwellings within a lot / Rule 22.3.2 Minor dwelling - Extent of accommodation in related to staff requirements and school roll and as such, one dwelling/minor dwelling will be inefficient.
 - Rule 22.3.6 Building coverage - Dilworth currently has building coverage of 8,500m² and only 3,050m² would be permitted under the proposed rules.
 - Rule 22.3.7 Building setbacks - building setback rules do not appropriately reflect the existing (and optimal future) layout of development within the Rural Campus site, which comprises multiple buildings within 25m of side boundaries and as such, site-specific setbacks have been requested (refer to Appendix 2 of the original submission).
 - Rule 22.3.7.2 P1(a)(vii) of the Proposed Plan, Dilworth site has a maximum width of 320m. concerned with the 'double-handling' effect of this rule, and with the significant constraints that this rule imposes on the development of the Rural Campus site should any neighbouring property be developed for intensive farming activities in the future. an intensive farming activity could be readily located more than 1km from the Rural Campus on a neighbouring site, yet Rule 22.3.7.2 P1(a)(vii) would still require a 300m setback for any new school building from the common boundary, or for an onerous and costly resource consent process.
 - It is not appropriate to impose a subsequent resource consent process on Dilworth to justify the appropriateness of any further development within the Rural Campus, particularly given the constraints to the size and shape of the site, and the large available land area within the neighbouring properties which enable adverse effects to be internalised to those sites.
- Submission also seeks rule exceptions. These are specified in Appendix 2 of the original submission (for example Rule 22.2.3.1). With respect to Rule 22.2.3.1 - Earthworks, submission states:
 - There is no difference in terms of effects on the environment between earthworks for a rural or residential activity, and earthworks for the development of an established education facility in the rural environment and as such, most appropriately managed by specific earthworks rules in the Specific Area provisions that are sought.
- With respect to rule 14.12.1 P2 - On-site parking and loading, exception, the submission notes that the on-site parking requirements for the facility are atypical of an educational facility, such that the minimum parking and loading requirements for school activities, set out in Rule 14.12.1 P2, do not reflect the requirements of the facility and that it is appropriate that the parking requirements of the Rural Campus are left to Dilworth to determine and provide for, and therefore no minimum or maximum parking requirements should be imposed on the Rural Campus.
- With respect to rule 14.12.1 - P4, Traffic Generation, exception, the submission notes that a higher number of vehicle trips may be necessary and that the trip generation threshold, as it relates to the Rural Campus, does not effectively address an adverse effect on the environment. Traffic movement requirements of the Rural Campus are left to Dilworth to determine and provide for, and therefore no maximum traffic movement requirements should be imposed on the Rural Campus.

Point Number 577.3

Summary of Decision Requested: **Retain** Rule 22.1.3(1) RD1 Restricted Discretionary Activities.

Decision Reasons:

- Non-compliance with this rule results in a Discretionary activity resource consent, which will enable a robust assessment of any adverse effects on the Rural Campus and a consideration of mitigation measures.
- Considers that this adequately manages the potential adverse effects that may arise from future development of intensive farming activities on properties adjoining the Rural Campus

Point Number 577.4

Summary of Decision Requested: **Amend** Rule 22.2.3.3 P1 (a) Earthworks - Significant Natural Areas, as follows:

(a) Earthworks for the maintenance of existing tracks, fences or drains, and for the purpose of remediation and stabilisation of banks of a stream, river or other water body, within an identified Significant Natural Area must meet all of the following conditions:..

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission.

Decision Reasons:

- The Rural Campus site is bordered by the Mangatawhiri stream that floods and as such, represents a risk to the site. Stream restoration and erosion control works have been undertaken previously by way of resource consent. A portion of the area requiring works is within a Significant Natural Area.
- As such, the Proposed Plan needs to be enabling of earthworks for erosion control works for the remediation and stabilisation of stream banks to protect the health and safety of the students, staff and visitors to the site, and the buildings and property. Considers

that this is an issue that is relevant for all rural land in the Waikato District, and that the provisions for the Rural Zone must provide for earthworks for such a purpose.

Point Number 577.5

Summary of Decision Requested: **Amend** Rule 22.2.7 P1 (a) Indigenous vegetation clearance inside a Significant Natural Area, as follows:

(i) Gathering plants in accordance with Maaori customs and values; or

...

(vi) Remediating or stabilising the banks of a stream, river or other water body.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- There is no provision for indigenous vegetation clearance for the purpose of erosion control works for the remediation and stabilisation of banks of streams and rivers.
- The Proposed Plan must be enabling of erosion control works to protect the health and safety of the students, staff and visitors to the site, and the buildings and property, and to enable vegetation management and removal along the banks of streams and rivers for such purposes.

Point Number 577.6

Summary of Decision Requested: **Amend** Rule 22.2.8 P1 (a) Indigenous vegetation clearance - outside a Significant Natural Area, as follows:

(vii) A building platform and associated access, parking and manoeuvring up to a total of 500m² clearance of indigenous vegetation; or

(viii) Remediating or stabilising the banks of a stream, river or other water body.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- Provisions that apply to vegetation clearance outside of Significant Natural Areas are similarly not enabling of vegetation modification for the purposes of remediation and stabilisation of the banks of streams and rivers.
- Vegetation clearance must provide for such works.

Submitter Number: 578 **Submitter:** Ports of Auckland Limited

Point Number 578.1

Summary of Decision Requested: **Amend** Rule 20.2.5.1 P3 Earthworks - General, as follows:

(a) Earthworks for purposes other than creating a building platform for ~~residential~~ industrial within a site, using imported fill material (excluding cleanfill) must meet all of the following conditions:

(i) not exceed a total volume of 2,500m³;

~~(ii) not exceed a depth of 1m;~~

(iii) the slope of resulting filled area in stable ground must not exceed a maximum slope of 1:2 (1 vertical to 2 horizontal);

~~(iv) fill material is setback 1.5m from all boundaries;~~

(v) areas exposed by filling are revegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;

(vi) sediment resulting from the filling is retained on the site through implementation and maintenance of erosion and sediment controls; and

(vii) do not divert or change the nature of natural water flows, water bodies ~~or established drainage paths;~~

(viii) within overland flow paths, the extent of earthworks must maintain the same entry and exit point at the boundaries of the site and not result in any adverse changes in flood hazards beyond the site.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The extent of permitted earthworks proposed is insufficient to enable the comprehensive redevelopment of Industrial Zoned sites and in the context of greenfield industrial areas such as the Horotiu Industrial Plan.
- Therefore the permitted earthworks needs to be increased to 2500m² and 2500m³ per site within the Industrial Zone.
- Opposes the requirement for earthworks to be setback 1.5m from all boundaries.
- In the Industrial Zone there is a lower amenity expectation than other sensitive zones and these constraints are unnecessarily onerous and no justification has been provided for these provisions.
- Earthworks are not permitted to divert or change the nature of drainage paths and this is unnecessarily onerous, considering it can be enabled a permitted activity where the entry of exit point is not altered.
- References made to building platform for 'residential purposes' should be appropriately referenced 'industrial purposes'.

Point Number 578.2

Summary of Decision Requested: **Retain** Rule 20.2.5.1 RD1 Earthworks - General as notified, in that it is a restricted discretionary activity for earthworks that do not comply with Rule P1, P2, P3.

Decision Reasons:

- Supports the restricted discretionary activity status for earthworks that do not comply with rule P1, P2 and P3, and seek that RD1 be retained as notified.

Point Number 578.3

Summary of Decision Requested: **Amend** Rule 20.2.6 P1 Hazardous Substances, as follows:

(a) *The use, storage or disposal of any hazardous substances within a hazardous facility, where:*

(i) *the aggregate quantity of a hazardous substances of any hazard classification on a site is less than the quantity specified for the Industrial Zone in Table 5.1 contained within Appendix 5 (Hazardous Substances).*

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- A clarification is required in Rule 20.2.6 P1 to link the storage of hazardous substances to a hazardous facility, thereby ensuring that the corresponding policies that are contained with Chapter 10 of the Proposed District Plan are implemented.

Point Number 578.4

Summary of Decision Requested: **Amend** Rule 20.2.6 D1 Hazardous Substances, from a discretionary activity to a restricted discretionary activity, as follows:

BD1

The use storage or disposal of any hazardous substances that does not comply with Rule 20.2.6 P1, P2 or C1.

Council's discretion shall be restricted to the following matters:

(i) *the proposed operation and site layout;*

(ii) *the separation distances from the receiving environment and other land uses;*

(iii) *the degree and acceptability of residual risk;*

(iv) *consideration of potential health and environmental hazards and exposure pathways arising from the proposed facility;*

(v) *minimising potential cumulative risks including in conjunction with other nearby hazardous facilities;*

(vi) *proposed emergency management planning;*

(vii) *transport routes times and frequencies for the transport of hazardous substances on and off-site;*

(viii) *waste management;*

(ix) *compliance with relevant codes of practice and standards for specific materials/substances;*

(x) *measures to minimise to mitigate potential adverse effects that may result from natural hazards; and*

(xi) *the social and economic benefits of hazardous facilities.*

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Does not support a discretionary activity status for activities that do not comply with the permitted rules, and seeks a restricted discretionary activity status with respect to this matter.

Point Number 578.5

Summary of Decision Requested: **Amend** Rule 20.2.7.1 P2 (c) Signs - General, as follows:

(c) *Where the sign is a freestanding sign, it must:*

(i) *not exceed an area of 15m² for one sign per site, and 2+m² for any other freestanding sign on the site; and*

(ii) *be setback at least 5m from the boundary of any site a Residential, Village or Country Living Zone;*

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Supports rule 20.2.7.1 as notified, however does not agree with the maximum area for freestanding signs. In the Industrial Zone, where large buildings are provided for as a permitted activity, the receiving environment has the ability to accommodate larger freestanding signs than 3m². A 15m² freestanding sign can be accommodated as a permitted activity.

Point Number 578.6

Summary of Decision Requested: **Retain** Rule 20.2.7.1 RD1 Signs - General, as notified.

Decision Reasons:

- Supports the restricted discretionary activity status and seeks that RD1 be retained as notified.

Point Number 578.7

Summary of Decision Requested: **Amend** Rule 20.2.8 P1 Outdoor storage of goods or materials, to read:

(a) *Outdoor storage of goods or materials must comply with all the following conditions:*

- (i) be associated with the activity operating from the site;
- (ii) not encroach on required parking or loading areas;
- (iii) not exceed a height of 9m unless located within the Horotiu Industrial Park where it must not exceed a height of 21m;
- (iv) not exceed 30% site coverage;

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Does not support the application of the 'outdoor storage' rule to the Horotiu Industrial Park in its current form. The nature of the Port of Auckland Limited's activities are such that they will require stacking containers and other materials to heights up to 21 metres.
- The maximum permitted height for the Horotiu Industrial Park within the Operative District Plan is 25 metres. However given its location to more sensitive land uses, it is considered appropriate to enable the permitted outdoor storage of materials to 21 metres within the Horotiu Industrial Park.

Point Number 578.8

Summary of Decision Requested: **Retain** Rule 20.2.8 RD1 Outdoor storage of goods or materials, as notified.

Decision Reasons:

- Supports the restricted discretionary status and seeks that RD1 be retained as notified.

Point Number 578.9

Summary of Decision Requested: **Amend** Rule 20.3.IPI Building height, as follows:

(a) *The maximum height of a building must not exceed:*

(i) 15m; or

(ii) 10m if located on Tregowath Lane and within 50m of the Residential Zone in Huntly.

(iii) within the Horotiu Industrial Park;

A. it is located in Stage 1, Stage 2, Stage 3A or Stage 3B, and is:

1. more than 400m from Horotiu Road; and

2. height does not exceed 25m; and

3. height does not exceed 15m over 90% of the site; and

B. height does not exceed 10m within 50m of Horotiu Road boundary.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Proposed District Plan seeks to reduce the permitted height from 25m to 15m within the Horotiu Industrial Park.
- In the context of the 130 ha site such a reduction is significant. Opposes as it will not provide for an efficient use of the industrial site.
- Seeks the retention of the existing building height controls for the Horotiu Industrial Park.

Point Number 578.10

Summary of Decision Requested: **Add** a new permitted activity rule in Rule 20.3.1 Building height, to specifically address building height within the Horotiu Industrial Park as follows:

(g) Despite Rule 20.3.3 Daylight Admission, within the Horotiu Industrial Park the construction or alteration of an aerial and its support structures is a permitted activity if:

(i) the height of the aerial or support structures do not exceed:

A. 15m; or

B. 10m within 50m of the Horotiu Road boundary; or

C. 5m more than the height of a building the aerial is mounted on, where that building is higher than 20m; and

(b) no dish antennae exceed 5m diameter, and no panel antennae exceeds 2.5m in any dimension.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Operative District Plan provisions for the Horotiu Industrial Park relating to aerials have not been included within the Proposed District Plan. No justification is provided within the section 32 analysis to justify the deletion of the provisions. Seek the inclusions of the operative provisions within the Proposed District Plan.

Point Number 578.11

Summary of Decision Requested: **Add** a new permitted activity Rule in rule 20.3.1 Building height, to specifically provide for lighting masts within the Horotiu Industrial Park as follows:

Despite Rule 20.3.3 Daylight Admission, the construction or alteration of lighting masts is a permitted activity if:

(g) the height of the lighting masts:

(i) located more than 400m from Horotiu Road; and

(ii) do not exceed 25m in height.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Seek specific provisions for lighting masts within the Horotiu Industrial Park to a height of 25m. It is consistent with the maximum permitted height for other buildings within this part of the Industrial Zone and is consistent with the resource consent held by the Ports of Auckland Ltd. It is necessary to ensure the safe and efficient operation of industrial activities.

Point Number 578.12

Summary of Decision Requested: Retain Rule 20.3.1 RD1 Building height, as notified.

Decision Reasons:

- Supports the restricted discretionary status and seeks that RD1 be retained as notified.

Point Number 578.13

Summary of Decision Requested: Add a new restricted discretionary activity rule in Rule 20.3.1 Building height to specifically address activities within the Horotiu Industrial Park that do not comply with the permitted activity rules requested in this submission. The new rule will read:

(a) Any activity that does not comply with Rules 20.3.1 P2 and P3.

(b) Council's discretion is restricted to the following matters:

(i) the extent to which the visual amenities of the residential Zone are maintained.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Operative District Plan provisions for the Horotiu Industrial Park relating to aeriels have not been included within the Proposed District Plan. No justification is provided within the section 32 analysis to justify the deletion of the provisions. Seek the inclusions of the operative provisions within the Proposed District Plan.
- Seeks specific provisions for lighting masts within the Horotiu Industrial Park to a height of 25m. It is consistent with the maximum permitted height for other buildings within this part of the Industrial Zone and is consistent with the resource consent held by the Ports of Auckland Ltd. It is necessary to ensure the safe and efficient operation of industrial activities.

Point Number 578.14

Summary of Decision Requested: Retain Rule 20.3.3 Daylight admission, as notified.

Decision Reasons:

- Support rule 20.3.3 as notified.

Point Number 578.15

Summary of Decision Requested: Retain Rule 20.3.4.1 Building setbacks, as notified.

Decision Reasons:

- Support Rule 20.3.4.1 as notified

Point Number 578.16

Summary of Decision Requested: Amend Rule 20.3.4.2 P1 Building setback - waterbodies, as follows:

(a) A building must be set back a minimum of 30m from:

(i) the margin of any:

A. lake;

B. wetland; and

C. river bank whose bed has an average width of 3m or more, other than the Waikato River and Waipa River.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Port of Auckland Limited's inland freight hub site is bound by an unnamed tributary of the Te Rapa Stream. The Proposed District Plan has removed the 3m qualifying bed width which applied in the Operative District Plan.

- Does not support Rule 20.3.4.2 in its current format as it has the potential to constrain future developments within the inland freight hub.
- The imposition of the building setback requirement has the potential to constrain the efficient development of the significant regional industrial node.
- As a minimum, the submitter seeks that the Operative District Plan's qualifying standard is applied to the rule.

Point Number 578.17

Summary of Decision Requested: **Amend** Rule 20.3.4.2 P3 Building setback - water bodies, as follows:

A building must be setback a minimum of 10m from the bank of a perennial or intermittent stream whose bed has an average width of 3m or more.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Port of Auckland Limited's inland freight hub site is bound by an unnamed tributary of the Te Rapa Stream. The Proposed District Plan has removed the 3m qualifying bed width applied in the Operative District Plan.
- Does not support rule 20.3.4.2 in its current format as it has the potential to constrain future developments within the inland freight hub.
- The imposition of the building setback requirement has the potential to constrain the efficient developments of the significant regional industrial node.
- Seeks as a minimum that the Operative District Plan's qualifying standard is applied to this rule.

Point Number 578.18

Summary of Decision Requested: **Amend** Rule 20.3.4.2 D1 from a discretionary activity rule to a restricted discretionary activity rule and as follows:

BD1

A building that does not comply with Rule 20.3.4.2 P1, P2, P3 or P4.

Council's discretion shall be restricted to the following matters:

(a) effects of the location, intensity, scale and form of subdivision, use and development in relation to natural character;

(b) the extent of indigenous vegetation clearance and modification (including earthworks, disturbance and structures);

(c) cumulative effects on natural character and landscapes.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Opposes the discretionary activity status and seeks a restricted discretionary activity.

Point Number 578.19

Summary of Decision Requested: **Add** a new rule providing for subdivision within the Horotiu Industrial Park to be undertaken as a controlled activity under Rule 20.4.1 Subdivision - General. The new rule will read:

CL

(a) Subdivision within the Horotiu Industrial Park is a controlled activity where it complies with all of the following conditions:

(i) every allotment in the Horotiu Industrial Park area has a net site area of at least 500m², excluding access allotments or utility allotments which shall have a minimum net site area of 100m²;

(ii) prior to any subdivision or development of the Stage 3A areas on earth bund is constructed generally in the location of the farm and height shown on Figure 20.6(B);

(iii) any subdivision of land adjoining Horotiu Road includes a minimum 5m wide landscaping strip adjoining Horotiu Road (excluding access) to be planted and maintained with indigenous species that will achieve a height of at least 5m within 5 years and sufficient density to visually screen the land from the Residential Zone;

(iv) any subdivision of land adjoining the designated boundary of the Waikato Expressway includes landscape planting and maintenance of indigenous species that will achieve an average height of 3m within 5 years and of sufficient density to visually screen the industrial activity, from the Expressway in combination with any existing or proposed landscaping within the Expressway designation.

(b) Control is reserved over:

(i) amenity values;

(ii) construction and maintenance of bund area;

(iii) planting and maintenance of bund area.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Under the Operative District Plan, subdivision within the Horotiu Industrial Park can be undertaken as a controlled activity subject to standards.
- No justification has been provided within the section 32 analysis which supports the Proposed District Plan as to why a restricted discretionary activity status is necessary and why different subdivision standards are appropriate within the Horotiu Industrial Park.

Point Number 578.20

Summary of Decision Requested: Amend Rule 20.4.1 RD1 Subdivision - General, as follows:
(a) In all other areas, subdivision must comply with all of the following conditions...
OR
Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).
AND
Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Under the Operative District Plan, subdivision within the Horotiu Industrial Park can be undertaken as a controlled activity subject to standards.
- No justification has been provided within the section 32 analysis which supports the Proposed District Plan as to why a restricted discretionary activity status is necessary and why different subdivision standards are appropriate within the Horotiu Industrial Park.

Point Number 578.21
Summary of Decision Requested: Retain Rule 20.4.2 Subdivision - Boundaries for Records of Title, as notified.

Decision Reasons:

- Supports Rule 20.4.2 as notified.

Point Number 578.22
Summary of Decision Requested: Amend Rule 20.4.4 RD1 Subdivision - Esplanade Reserves and Esplanade Strips, as follows:
(a) Subdivision must create an esplanade reserve or strip 20m wide (or other width stated in Appendix 4 (Esplanade Priority Areas) from every proposed lot:
(i) less than 4ha and within 20m of any:
A. mean high water springs;
B. bank of any river whose bed has an average width of 3m or more and is not a perennial or intermittent stream; or
C. lane whose bed ..."

OR
Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).
AND
Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Supports the intent of Rule 20.1.1, however considers that item 'B' required further clarification that it is not intended to apply for a perennial or intermittent stream.

Point Number 578.23
Summary of Decision Requested: Add the staging plans for Horotiu Industrial Park, that reflect the resource consents that have been approved and granted to Ports of Auckland Limited. Refer to the staging plans, bunding map and proposed Horotiu Road intersection in the submission.
AND
Add a new rule 20.2.10 Land Use Staging in Chapter 20 Industrial Zone, to provide for the staged release of the land within Horotiu Industrial Park (see submission for details of the new rule).
AND
Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Operative District Plan provided for a staged release of land in conjunction with staged improvements to the transport network and other infrastructure.
- An integrated approach to development within the Horotiu Industrial Park is required and there is concern that not including the 'Land Use Staging' within the Proposed District Plan will prevent this from occurring. Such an outcome would be contrary to the Waikato Regional Policy Statement.
- The staging plans shown in the submission reflect the resource consents that have been granted to the Ports of Auckland Limited.
- Under the Operative District Plan, subdivision within the Horotiu Industrial Park can be undertaken as a controlled activity subject to standards.
- No justification has been provided within the section 32 analysis which supports the Proposed District Plan as to why a restricted discretionary activity status is necessary and why different subdivision standards are appropriate within the Horotiu Industrial Park.
- The Operative District Plan provided for a staged release of land in conjunction with staged improvements to the transport network and other infrastructure.
- An integrated approach to development within the Horotiu Industrial Park is required and there is concern that not including the 'Land Use Staging' within the Proposed District Plan will prevent this from occurring. Such an outcome would be contrary to the Waikato Regional Policy Statement.

Point Number 578.24
Summary of Decision Requested: Retain the planning maps for the Horotiu area, as notified.

Decision Reasons:

- Supports the rezoning of the land to the north of the NIMT railway line from 'Heavy Industrial Zone' to 'Industrial Zone' and considers that there is further scope to extend the Industrial Zone at this location to strengthen the strategic industrial node.
- Generally supports the zoning pattern for the Horotiu area as notified.

Point Number 578.25
Summary of Decision Requested: Investigate rezoning the land to the south of Horotiu from "Rural Zone" to "Industrial Zone".
AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Considers that there is further scope to extend the Industrial Zone at this location to strengthen the strategic industrial node.

Point Number 578.26

Summary of Decision Requested: **Add** a new Section 20.6 to Chapter 20 Industrial Zone, that contains a set of standalone provisions for the Horotiu Industrial Park, as an alternative relief to amending the notified provisions for the Industrial Zone.

Refer to Schedule 2 of the submission for the requested provisions.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- This request is an alternative to altering the Industrial Zone provisions, which is consistent with the approach taken for the Nau Mai Business Park.

Point Number 578.27

Summary of Decision Requested: **Amend** Rule 16.1.2 P3 to remove retirement villages as a permitted activity within the Residential Zone.

AND

Amend Rule 16.1.3 Restricted Discretionary Activities, to include rules relating to new or altered retirement villages as follows:

RD2

A new retirement village or alterations to an existing retirement village that meets all of the following conditions:

(a) The Land Use – Effects rules in Rule 16.2, except that the following rules do not apply:

(i) Rule 16.2.7 (Signs);

(b) The Land Use – Buildings rules in Rule 16.3, except the following rules do not apply:

(i) Rule 16.3.1 (Dwelling);

(ii) Rule 16.3.3 (Building Height);

(iii) Rule 16.3.7 (Living Court);

(iv) Rule 16.3.8 (Service Court);

(c) The site or combination of sites where the retirement village is proposed to be located has a minimum net site area of 3ha;

(d) The site is either serviced by or within 400m walking distance of public transport;

(e) The site is connected to public water and wastewater infrastructure;

(f) Minimum living court or balcony area and dimensions:

(i) Apartment – 10m² area with minimum dimensions horizontal and vertical of 2.5m;

(ii) Studio unit or 1-bedroom unit – 12.5m² area with minimum dimension horizontal and vertical of 2.5m; or

(iii) 2 or more bedroomed unit – 15m² area with minimum dimension horizontal and vertical of 2.5m;

(g) Minimum service court is either:

(i) Apartment – Communal outdoor space (i.e. no individual service courts required); or

(ii) All other units – 10m² for each unit;

(f) Building height does not exceed 8m, except for 15% of the total building coverage, where buildings may be up to 10m high.

Council's discretion shall be restricted to the following matters:

(a) Density of the development;

(b) Adequacy of the information provided to address matters specified, and outcomes sought, within Sections 3, 4, 5 and 6 of Appendix XX (Multi-unit Design Guideline);

(c) Avoidance or mitigation of natural hazards

(d) Geotechnical suitability for building

(e) Amenity values and streetscapes

(f) Avoidance of reverse sensitivity effects on industrial activities

(g) Protection of noise sensitive activities from the effects of noise generated by industrial activities.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Concerned that the residential intensification that would be enabled through a retirement village has the potential to adversely affect the efficient operation of the Horotiu Industrial Park.
- Concerned that traffic generation associated with the permitted retirement villages will not be appropriately managed by the Proposed District Plan as they have unlimited density.
- Concerned that the density of permitted retirement villages will not be appropriately managed and therefore will not protect amenity of the receiving Residential Zone.
- Such an approach would be consistent with the approach taken by the Proposed District plan for 'Multi-unit' development and these are arguably smaller density and built form outcomes compared to that enabled for 'Retirement villages'.

Point Number 578.28

Summary of Decision Requested: **Add** matters of discretion to Rule 16.1.3RD1 to give consideration of reverse sensitivity effects as follows:

(a) Density of the development;

...

(j) Provision of infrastructure to individual units,

(k) Avoidance of reverse sensitivity effects on industrial activities;

(l) Protection of noise sensitive activities from the effects of noise generated by industrial activities.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- FutureProof recognises that residential development in this area needs to be carefully considered. There is a risk that significant residential intensification of the type that would be enabled by the Proposed District Plan would implicate the efficient operation of the Horotiu Industrial Park.
- If multi-unit housing development rule is retained, it is critical to ensure that the Horotiu Industrial Park is not adversely affected by considering reverse sensitivity effects.

Point Number 578.29

Summary of Decision Requested: **Add** a permitted activity rule to Rule 16.3.10 to manage reverse sensitivity effects associated with noise, as follows:

P2

Activities sensitive to noise must be subject to a restrictive no-complaint covenant in favour of Ports of Auckland Limited.

For the purposes of this rule a 'restrictive non-complaint covenant' is defined as a restrictive covenant registered on the Title to the property or a binding agreement to covenant, in favour of the Horotiu Industrial Park, by the landowner (and binding any successors in title) not to complain as to effects generated by the lawful operation of industrial activities from the Park. The restrictive no-complaint covenant is limited to the effects that could be lawfully generated by industrial activities at the time the agreement to covenant is entered into. This does not require the covenantor to forego any right to lodge submissions in respect of resource consent applications or plan changes in relation to industrial activities (although an industrial restrictive non-complaint covenant may do so).

AND

Amend Rule 16.3.10 RD1 Building-Horotiu Acoustic Area, as follows:

(a) Construction, addition to or alteration of a building that does not comply with Rule 16.3.10 #4

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Proposed Plan enables the intensification of activities that are sensitive to noise within close proximity to the Horotiu Industrial Park.
- The RPS provides clear direction that the Proposed Plan should minimise potential reverse sensitivity effects
- The Proposed District Plan should provide clear direction on where and how sensitive activities should be enabled within the vicinity of the Horotiu Industrial Park to avoid and mitigate potential reverse sensitivity effects.
- Considers it is appropriate to require new buildings and the alteration of existing buildings within the Horotiu area to be subject to 'no complaints' covenants in favour of Ports of Auckland Ltd, and be subject to minimum acoustic insulation requirements which can be achieved through amendments to the Noise Control Boundary. This overlay should be applied to the entirety of the Horotiu residential area.
- Such measures will provide for the ongoing lawful operation and establishment of industrial activities.

Point Number 578.30

Summary of Decision Requested: **Retain** Appendix 1 Acoustic Insulation.

Decision Reasons:

- Supports Appendix 1 and considers that it will (in combination with the amendments that are sought to Rule 16.3.10) appropriately avoid, remedy or mitigate the potential reverse sensitivity effects on the Horotiu Industrial Park.

Point Number 578.31

Summary of Decision Requested: **Amend** the extent of the Horotiu Acoustic Area as sought in Schedule 3 of the submission, to include all land zoned Residential, Country Living and Business within Horotiu and that activities that are sensitive to noise within the overlay be subject to a restrictive no-complaints covenant in favour of Ports of Auckland.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Appropriate to establish noise contours within the Horotiu Acoustic Area to provide guidance to residents in respect of the anticipated noise levels when determining appropriate acoustic insulation.

Point Number 578.32

Summary of Decision Requested: **Retain** Rule 14.2.3 Discretionary Activities, as notified.

Decision Reasons:

- Supports a discretionary activity status for 'activities not otherwise provided for' and consider such an approach to be consistent with section 87B of the RMA.

Point Number 578.33

Summary of Decision Requested: **Retain** Rule 14.7.1 Permitted Activities as notified.

Decision Reasons:

- Retain the rule as notified.
- A high-pressure gas line intersects the eastern portion of the Ports of Auckland Limited's site at Horotiu Industrial Park. Ports of Auckland limited currently hold a resource consent to lower the gas line as part of the development of the inland freight hub.

Point Number 578.34

Summary of Decision Requested: **Amend** Rule 14.7.2 Discretionary Activities, to provide for pipelines and storage facilities that do not comply with the permitted activity rule as a restricted discretionary activity as follows:

14.7.2 Discretionary Activities

(a) The activities listed below are discretionary activities

D1

Pipelines for the conveyance of liquid fuels and gas that do not comply with one or more of the conditions of Rule 14.7.1.1 or 14.7.1.2

D2

Storage of facilities and pump stations for liquid fuels and gas that do not comply with one or more of the conditions of Rule 14.7.1.3

14.7.2 Restricted Discretionary Activities

(a) The activities listed below are restricted discretionary activities.

(b) Discretion to grant or decline consent and oppose conditions is restricted to the matters of discretion set out in the following table:

Activity	Matters of Discretion
RD1 <u>Pipelines for the conveyance of liquid fuels and gas that do not comply with one or more of the conditions of Rule 14.7.1.1 or 14.7.1.2</u>	(a) <u>The functional and operational needs of, and benefits derived from the infrastructure;</u> (b) <u>Visual, landscape, streetscape and amenity effects;</u> (c) <u>The risk of hazards affecting public or individual safety and risk of property damage;</u> (d) <u>Effects on the values, qualities and characteristics of any Identified Area.</u>
RD2 <u>Storage facilities and pump stations for liquid fuels and gas that do not comply with one or more of the conditions of Rule 14.7.1.3</u>	(a) <u>The functional and operational needs of, and benefits derived from the infrastructure;</u> (b) <u>Visual, landscape, streetscape and amenity effects;</u> (c) <u>The risk of hazards affecting public or individual safety and risk of property damage;</u> (d) <u>Effects on the values, qualities and characteristics of any Identified Area.</u>

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The matters that are required to be considered can be clearly determined and primarily relate to visual effects and safety.
- A Restricted Discretionary Activity status is considered appropriate in respect of pipeline or storage facilities that do not comply with one or more of the conditions.

Point Number 578.35

Summary of Decision Requested: Retain Rule 14.11.1 Permitted Activities, as notified.

Decision Reasons:

- Support rule as notified and the inclusion of an infrastructure chapter.

Point Number 578.36

Summary of Decision Requested: Retain Rule 14.11.2 Restricted Discretionary Activities, as notified.

Decision Reasons:

- Support rule as notified and the inclusion of an infrastructure chapter.

Point Number 578.37

Summary of Decision Requested: Retain Rule 14.11.3 Discretionary Activities, as notified.

Decision Reasons:

- Support rule as notified and the inclusion of an infrastructure chapter.

Point Number 578.38

Summary of Decision Requested: Retain Rule 14.11.4 Non-complying activities, as notified.

Decision Reasons:

- Support rule as notified and the inclusion of an infrastructure chapter.

Point Number 578.39

Summary of Decision Requested: Retain Rule 14.12.1 Permitted Activities, except for the amendments sought below.

AND

Amend activity specific condition 14.12.1.4 relating to P4 Traffic Generation as follows:

(1) Any activity must comply with the following traffic generation conditions:

...

(j) from the Horotiu Industrial Park: does not exceed 15.4 trips/ha gross land area/peak hour.

Note: Where the likely traffic generation rates of the actual generation rates of the actual activity are unknown, Table 14.12.5. provides indicative traffic generation rates for various activities.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Supports rule 14.12.1, with the exception of rule 14.12.1P4 Traffic generation
- The Proposed District Plan does not retain schedule 24B - Horotiu Industrial Park (from the Operative District Plan) and therefore the maximum permitted traffic generation has been altered.
- The Operative Waikato District Plan requires trip generation from the Horotiu Industrial Park not to exceed 15.4 trips per gross hectare of land during the peak hour, whereas the Proposed District Plan would result in the maximum permitted traffic generation being reduced to 250 vehicle movements per day. This will have implications on the operation of the Horotiu Industrial Park.
- Such a control does not recognise the regional significance of the Horotiu industrial Park.
- Clarification is required to the note that table 14.12.5.13 only applies where the likely traffic generation of the activity is unknown.

Point Number 578.40

Summary of Decision Requested: **Retain** Rule 14.12.2 Restricted Discretionary Activities, as notified.

Decision Reasons:

- Support rule as notified and the inclusion of an infrastructure chapter.

Point Number 578.41

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays, as follows:

<i>Activity</i>	<i>Minimum Required Parking Spaces</i>	<i>Minimum Required Loading Bays</i>
...
<i>Industrial activity</i>	<i>1 car park space per 100m² GFA, or 0.7 per FTE employee (where the number of employees is known), whichever results in requiring a lower amount of on-site parking</i>	<i>1 HGV</i>

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Warehousing and distribution activities are to be undertaken within the inland freight hub and will require large building footprints with comparatively low levels of staff. The standard to provide 1 car park per 100m² GFA is excessive.
- An example is within the first warehouse activity that will be established will be expected to provide 137 parking spaces under the Proposed District Plan, with only 9 FTE staff employed.
- This is not an efficient method for such activities within an Industrial Zone.
- Provide a more flexible approach to parking that recognises situations where staff numbers are low compared to the size of the building.

Point Number 578.42

Summary of Decision Requested: **Retain** the definition of "Accessory building" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.43

Summary of Decision Requested: **Add** clause (f) to the definition of "building", as follows:

Building

Has the meaning in the Building Act 2004, excluding:

...

(g) a structure that is permeable and less than 4 metres in height to protect crops for agricultural uses; or;

(f) cargo and containers associated with industrial activities within the Horotiu Industrial Park.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The stacking of cargo and containers is a permitted activity in the Industrial Zone and will be carried out daily in the inland freight hub. Cargo and containers should be excluded from the definition of 'building'.

Point Number 578.44

Summary of Decision Requested: **Retain** the definition of "building coverage" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.45

Summary of Decision Requested: **Retain** the definition of "Building platform" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.46

Summary of Decision Requested: **Retain** the definition of "Functional need" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.47

Summary of Decision Requested: **Retain** the definition of "Gross floor area" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.48

Summary of Decision Requested: **Add** exceptions to the definition of "Hazardous facility" in Chapter 13 Definitions as follows:

Hazardous facility

Means activities involving hazardous substances and premises at which these substances are used, stored or disposed of. Storage includes vehicles for their transport located at a facility for more than short periods of time, and excludes:

- fuel in mobile plant, motor vehicles, boats and small engines; and
- the temporary storage, handling and distribution of national or international cargo.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The inland port operations are such they store hazardous substances within plant and machinery on the site. This needs to be recognised in the definition.
- Hazardous substances also travel through the freight hub regularly as part of cargo, break bulk and bulk cargo. Maximum dwell times for such cargo is less than one week.
- Significant cost and operational implications if the above matters are not excluded from the definition of hazardous facilities.

Point Number 578.49

Summary of Decision Requested: **Retain** the definition of "Hazardous substances" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.50

Summary of Decision Requested: **Retain** the definition of "Heavy vehicle" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.51

Summary of Decision Requested: **Amend** the definition of 'Height' in Chapter 13 Definitions as follows:

Height

Means, in relation to a structure, the vertical

No account shall also be taken of:

- lift wells;
- lift towers;
- elevator and stair bulkheads;
- roof water tanks;
- machinery rooms;
- plant, including cooling towers, air-conditioning units, including any access walkways and screening directly associated with the plant;
- cranes;
- derricks;
- reefer gantries;
- cargo stacking and lifting devices;
- conveyors;
- stacking of cargo;
- telecommunications equipment associated with industrial activities;
- lighting poles and associated equipment that are ancillary to industrial activities; and
- aerials that are ancillary to industrial activities.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There are a range of ancillary structures that are necessary to ensure the efficient day-to-day operation of the industrial activities, including the inland freight hub, which may have the potential to infringe the maximum permitted height control.
- There are a number of structures that require exclusion, those of which are noted in the amendment sought.
- Should not be required to obtain resource consents for these critical ancillary structures imply because they may infringe the height control.
- It is not an effective and efficient use of the Industrial Zoned land.

Point Number	578.52
Summary of Decision Requested:	Retain the definition of 'Height control plane'.
Decision Reasons:	<ul style="list-style-type: none"> Support the definition as notified.
Point Number	578.53
Summary of Decision Requested:	Retain the definition of "Impervious surface" in Chapter 13 Definitions, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Support the definition as notified.
Point Number	578.54
Summary of Decision Requested:	Retain the definition of "Industrial activity" in Chapter 13 Definitions as notified.
Decision Reasons:	Support the definition as notified.
Point Number	578.55
Summary of Decision Requested:	Retain the definition of "Minor infrastructure structure" in Chapter 13 Definitions, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Support the definition as notified.
Point Number	578.56
Summary of Decision Requested:	Retain the definition of "Minor upgrading of existing infrastructure" in Chapter 13 Definitions, as notified.
Decision Reasons:	<ul style="list-style-type: none"> Support the definition as notified.
Point Number	578.57
Summary of Decision Requested:	<p>Amend Rule 20.1.2 Discretionary Activities, to provide for activities that do not comply with Land Use-Effects Rule 20.2 or Land Use-Building Rule 20.3, as follows:</p> <p><u>20.1.2A Restricted Discretionary Activities</u></p> <p><i>(a) The activities listed below are restricted discretionary activities.</i></p> <p><u>RD1 Any permitted activity that does not comply with an activity specific condition in Rule 20.1.1.</u></p> <p><u>RD2 Any activity that does not comply with Land Use – Effects Rule 20.2 or Land Use – Building Rule 20.3 unless the activity status is specified as controlled, discretionary or noncomplying.</u></p> <p>OR</p> <p>Add a new Section 20.6 within Chapter 20 Industrial Zone specifically providing for the Horotiu Industrial Park (see schedule 2 of the submission for specific provisions).</p> <p>AND</p> <p>Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The discretionary activity status rule required applicants to undertake a full assessment of the effects of the activity on the environment and infringements and this is considered unnecessary and onerous. A restricted discretionary activity status is more appropriate as it will enable applicants to undertake a focused analysis of the effects generated as a result of the infringement and therefore reducing inefficiencies, cost and time. Amendment is consistent with the Policies of the Industrial Zone that seek to maintain a sufficient supply of industrial land for industrial purposes.
Point Number	578.58
Summary of Decision Requested:	<p>Amend Rule 20.1.3 Non-complying Activities, as follows:</p> <p>NC1 Any activity that is not listed as a permitted or discretionary activity.</p> <p><u>NC1A Retail not otherwise provided for</u></p> <p><u>NC2 Offices not otherwise provided for</u></p> <p><u>NC3 Commercial services</u></p> <p><u>NC4 Community activities</u></p> <p><u>N5 Noise sensitive activities</u></p> <p><u>N6 Places of assembly</u></p> <p><u>N7 Sensitive land uses</u></p> <p>AND</p> <p>Amend Rule 20.1.2-Discretionary Activities as a consequential amendment, as follows:</p> <p>D1 Any permitted activity that does not comply with an activity specific condition in Rule 20.1.1.</p> <p>D2 Any activity that does not comply with Land Use – Effects Rule 20.2 or Land Use – Building Rule 20.3 unless the activity status is specified as controlled, restricted discretionary or noncomplying.</p> <p><u>D3 A waste management facility</u></p>

D4 Hazardous waste storage, processing or disposal

D5 An extractive industry

D6 ~~An office Ancillary offices not provided for as a permitted activity~~

D7 Any activity that is not listed as a permitted, discretionary or non-complying activity.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see schedule 2 of the submission for specific reasons).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Submitter does not support the default non-complying activity status for activities. Instead POAL considers that a discretionary activity status be considered the default for activities that are not specifically provided for.
- Discretionary activity status will enable the district plan to respond to future developments and innovative methods, whereas the non-complying activity status will act as a bar to innovation and development.
- The default non-complying activity status is inconsistent with section 87B of the RMA, which provides for a default discretionary activity for activities not specifically provided for within a district plan.
- Submitter does not agree that all office activities should be provided for as a discretionary activity. Offices not ancillary to industrial activities are not compatible with an industrial environment and have the potential to result in reverse sensitivity effects and/or constrain the efficient operation of the industrial activities.
- Considers it appropriate for the Proposed District Plan to identify activities that it wishes to actively discourage within the Industrial Zone as they would be inappropriate or inconsistent with the outcomes intended through a non-complying activity status.
- Amendments will be consistent with the objectives and policies of the Industrial zone.
- This is an outcome consistent with the policies of the Industrial Zone that seek to maintain a sufficient supply of industrial land for industrial purposes.

Point Number

578.59

Summary of Decision Requested:

Retain Rule 20.2.1 Servicing and hours of operation, as notified.

Decision Reasons:

- Submitter supports Rule 20.2.1 as notified and considers that it appropriately implements the policies for the Industrial Zone in respect of the management of adverse effects.

Point Number

578.60

Summary of Decision Requested:

Amend Rule 20.2.2 C1 (b) Landscape planting, as follows:

C1

(a)...

~~*(b) Any activity on a lot that contains, or is adjacent to a river or a permanent or intermittent stream shall provide an 8m wide landscaped strip measured from the top edge of the closest bank and extending across the entire length of the watercourse.*~~

(b) Any activity located in the Horotiu Industrial Park within 5m of the Horotiu Road boundary shall be planted and maintained with a 5m wide buffer strip of indigenous species that will achieve a height of at least 5m within 5 years and sufficient density to visually screen the activity, from the Residential Zone.

...

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Ports of Auckland Limited sites share a boundary with a permanent or intermittent stream. The requirement for all activities to obtain a resource consent for matters pertaining to landscaping is onerous and will result in an inefficient and costly process.
- Will not support economic growth of the district's industry and does not provide for the efficient development of the industrial land resource.
- No justification has been provided in the section 32 analysis that supports the 8m landscape strip.
- To ensure consistency with the provisions of the Operative District Plan for the Horotiu Industrial Park, an amendment will require activities within 5m of Horotiu Road to provide a 5m wide buffer strip of planting to screen the Residential zone to appropriately manage adverse effects.
- The rule will constrain economic growth and reduce employment opportunities within the District.

Point Number

578.61

Summary of Decision Requested:

Amend Rule 20.2.3.1 Noise – General, as follows:

P1 Noise generated by emergency generators and emergency sirens.

P2 (a) Noise measured within any other site:

(i) In the Horotiu Industrial Park must not exceed:

A 75 dBA (LAeq) at any time.

Despite the above, construction noise and emergency sirens are not subject to this rule.

(i) In any other Industrial Zone must not exceed:

A 75dB (LAeq) 7am to 10pm; and

B. 55dB (LAeq) and 85dB (LMax) 10pm to 7am the following day.

P3 (g) Noise measured within the notional boundary of any site zoned Residential or Rural from an activity within the Horotiu Industrial Park must not exceed:

(i) 55 dBA(LAeq), 7am to 10pm

(ii) 45 dBA (LAeq) and 70 dBA(Lmax), 10pm to 7am the following day.

Despite the above, construction noise and emergency sirens are not subject to this rule.

(a) Noise measured within any site in any zone other, than the Industrial Zone and the Heavy Industrial Zone, must meet the permitted noise levels for that zone.

P4 (a) Noise levels must be measured in accordance with the requirements of NZS 680:2008 Acoustics – Measurement of Environmental Sound.

(b) Noise levels must be assessed in accordance with the requirements of NZS 6802:2008 "Acoustics Environmental noise".

~~BB2~~ (a) Noise that does not comply with Rule 20.2.3.1 P2, P3 or P4.

(g) Council's discretion is restricted to the following matters:

(i) effects on amenity values

(ii) hours of operation

(iii) location of noise sources in relation to boundaries

(iv) frequency or other special characteristics of noise;

(v) mitigation measures

(vi) noise levels and duration

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Due to the deletion of the Horotiu Industrial Park schedule, the noise requirements are more stringent due to the Country Living Zone and Residential Zone boundaries.
- The Horotiu Industrial Park is identified within the Waikato Regional Policy Statement as a regionally significant industrial node and its proximity to the state highway and rail networks is intended to operate 24 hours a day. The imposition of the noise limit will constrain the efficient and effective operation of the industrial node and be detrimental to the economy.
- No justification has been provided within the section 32 analysis to impose the noise limits.
- Ports of Auckland limited have commenced the construction of a new inland freight hub which has good road and rail connections and will improve access to overseas markets for Waikato based exporters and encourage investment in the district.
- The proposed noise limits will undermine the delivery and operation of the freight hub.
- It is critical for the operation of the Horotiu Industrial Park that the noise standards under the Operative District Plan are retained.

Point Number

578.62

Summary of Decision Requested:

Retain Rule 20.2.3.2 Noise - Construction, as notified.

Decision Reasons:

- The New Zealand standard for construction noise is considered to be an appropriate mechanism to control the adverse effects of construction noise.

Point Number

578.63

Summary of Decision Requested:

Amend Rule 20.2.4 P1 Glare and Artificial Light Spill, as follows:

Glare and artificial light spill must not exceed 10 lux measured horizontally and vertically within any other site: beyond the boundary of the Industrial Zone and the Heavy Industry Zone. Lighting associated with plant and machinery is excluded from this Rule.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The lighting levels proposed are considered to be unnecessarily onerous, and do not facilitate the safe and efficient use of the industrial land resource for industrial purposes and activities that require night time illumination.
- Given the remoteness of the Horotiu Industrial Park to any sensitive residential receivers, it is considered that this rule should be amended so 10 lux standard only applied to sites that contain a dwelling beyond the boundary of the Industrial zone.
- As the objective of the Industrial Zone is to protect the amenity values of sensitive activities and ecosystem values beyond the boundary of the Industrial Zone, it is appropriate for the rule to relate to sites not zoned industrial.
- Clarification is also required to confirm that lighting associated with plant and machinery is excluded from this control.

Point Number

578.64

Summary of Decision Requested:

Amend Rule 20.2.5.1 P1 Earthworks - General, as follows:

(a) Earthworks within a site must meet the following conditions:

(i) be located more than 1.5m from a public sewer, open drain, overland flow path or other service pipe;

(ii) not exceed a volume of more than ~~250m³~~ 2500m³ and an area of more than ~~4,000m²~~ 2500m² within a site;

(iii) the height of the resulting cut, filled areas or fill batter face in stable ground, not including any surcharge, does not exceed ~~1.5m~~ with a maximum slope of 1:2 (1 vertical to 2 horizontal);

(iv) areas exposed by earthworks are re-vegetated to achieve 80% ground cover within 6 months of the commencement of the earthworks;

(v) sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls;

(vi) Do not divert or change the nature of natural water flows, water bodies ~~or established drainage paths;~~

(vii) ~~within overland flow paths, the earthworks must maintain the same entry and exit point at the boundaries of the site and not result in any adverse changes in flood hazards beyond the site.~~

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The extent of permitted earthworks proposed is insufficient to enable the comprehensive redevelopment of Industrial Zoned sites and in the context of greenfield industrial areas such as the Horotiu Industrial Plan.
- Therefore the permitted earthworks needs to be increased to 2500m² and 2500m³ per site within the Industrial Zone.

- Opposes the requirement for excavation or filling not to exceed 1.5m above or below ground level.
- In the Industrial Zone there is a lower amenity expectation than other sensitive zones and these constraints are unnecessarily onerous and no justification has been provided for these provisions.
- Earthworks are not permitted to divert or change the nature of drainage paths and this is unnecessarily onerous, considering it can be enabled as a permitted activity where the entry of exit point is not altered.

Point Number 578.65

Summary of Decision Requested: **Amend** Rule 20.2.5.1 P2 Earthworks - General, as follows:

(a) Earthworks for the purpose of creating a building platform for residential industrial purposes with a site using imported fill material must meet the following condition:

(i) be carried out in accordance with NZS 4431: 1989 Code of Practice for Earth Fill for Residential Development.

OR

Add a new section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see Schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- References made to building platform for 'residential purposes' should be appropriately referenced 'industrial purposes'.

Point Number 578.66

Summary of Decision Requested: **Retain** Objective 4.6.1 - Economic growth of industry, as notified.

Decision Reasons:

- The objective and associated policies are considered to appropriately give effect to the Waikato Regional Policy Statement.

Point Number 578.67

Summary of Decision Requested: **Retain** Policy 4.6.2 Provide Industrial Zones with different functions, as notified.

Decision Reasons:

- Supports this policy as notified.

Point Number 578.68

Summary of Decision Requested: **Retain** Policy 4.6.3 Maintain a sufficient supply of industrial land, as notified.

Decision Reasons:

- Supports Policy 4.6.3 as notified.

Point Number 578.69

Summary of Decision Requested: **Retain** Policy 4.6.4 - Maintain industrial land for industrial purposes, as notified.

Decision Reasons:

- Supports policy 4.6.4 as notified.

Point Number 578.70

Summary of Decision Requested: **Retain** Policy 4.6.5 - Recognition of industrial activities outside of urban areas, as notified.

Decision Reasons:

- Support the policy as notified.

Point Number 578.71

Summary of Decision Requested: **Retain** Objective 4.6.6 Manage adverse effects, as notified.

Decision Reasons:

- Supports this objective as notified.

Point Number 578.72

Summary of Decision Requested: **Retain** Policy 4.6.7 - Management of adverse effects within industrial zones as notified.

Decision Reasons:

Supports policy 4.6.7 as notified.

Point Number 578.73

Summary of Decision Requested: **Add** new objectives and policies to Section 4.6 Industrial and Heavy Industrial Zones, that acknowledge the Horotiu Industrial Park, as follows:

Objectives

4.6.8

Industrial development is consistent with the long-term land use pattern for Horotiu and occurs in an integrated and coordinated manner.

4.6.9

The Horotiu Industrial Park is developed as a strategic industrial node in a manner which enables industrial activities to locate and function efficiently within the zone.

4.6.10

The Horotiu Industrial Park is protected from reverse sensitivity effects from activities sensitive to noise.

4.6.11

The Horotiu Industrial Park is serviced by efficient road and rail network connections.

Policies

4.6.12

Industrial development in the Horotiu Industrial Park is enabled in a manner that aligns with the capacity improvements to the infrastructure, including roading.

4.6.13

Industrial development in the Horotiu Industrial Park is encouraged to make use of both road and rail network connections to enable the efficient use of the industrial land resource.

4.6.14

Industrial development, prior to the require infrastructure capacity improvements being completed, should be managed in order to avoid, remedy or mitigate adverse effects on the existing and future planned road network, connections to that network, and on other infrastructure.

4.6.15

Traffic and transportation effects should be managed through land use planning, peak traffic generation controls and integrated, multi-modal transport approaches to ensure industrial development at the Horotiu Industrial Park does not adversely affect the safety and efficiency of the wider roading network.

4.6.16

Activities within the Horotiu Industrial Park that do not support the primary function of the zone are to be avoided.

4.6.17

Activities that are sensitive to noise are required to protect themselves from noise arising from the operation of the Horotiu Industrial Park.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Seeks a 'bespoke' set of provisions for Horotiu Industrial Park that recognise the importance of the Horotiu Industrial Node to the economic and social wellbeing of the Waikato Region.
- The provisions need to make a clear distinction between the Horotiu Industrial Park and other Industrial zoned land within the district and facilitate the efficient development of the Industrial Park without restricting the day-to-day practicalities within an industrial environment.
- Gives effect to the Waikato Regional Policy Statement by recognising the regional significance of the Horotiu Industrial Park and set the framework under which any residential growth may be enabled within the Horotiu area.
- The Horotiu Industrial Park connects to the State Highway network and North Island Main Trunk railway line, which are of strategic significance to the industrial node and need to be recognised.

Point Number

578.74

Summary of Decision Requested:

Add additional permitted activities in Rule 20.1.1, as follows:

P7 Workers accommodation

Activity Specific conditions: 1 unit per site

P8 Rail operations including associated sidings, structures, and earthworks within the Horotiu Industrial Park

Activity specific conditions: Nil

OR

Add a new Section 20.6 within Chapter 20 Industrial Zone, specifically providing for the Horotiu Industrial Park (see schedule 2 of the submission for specific provisions).

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Supports the permitted activity status for the activities identified within Rule 20.1.1 for the Industrial zone for the activities and considers this is an efficient mechanism to achieve the objective of the zone and enable economic growth.
- A permitted activity status recognises and provides for a variety of industrial activities and the corresponding rules will ensure that the adverse effects are appropriately managed.
- Considers it necessary to provide for workers accommodation for people whose duties require them to live on site. Such activities are required from time to time to facilitate 24-hour operation of industrial activities as well as to provide safety and security that does not result in reverse sensitivity effects.
- Reference to rail operations and associated activities within the Horotiu Industrial Park are anticipated and provided for in this location and will enable the efficient use of the industrial land resource.

Point Number

578.75

Summary of Decision Requested:

Retain the definition of "Net site area" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number

578.76

Summary of Decision Requested:

Amend the definition of "Noise-sensitive activity" in Chapter 13 Definitions, as follows:

Noise-sensitive activity

Means the following:

(a) buildings for residential activities, including boarding establishments, rest homes, retirement villages, papakainga housing development, in-house aged care facilities, travellers' accommodation, and other buildings used for residential accommodation but excluding camping grounds, and worker's accommodation;

...

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Does not incorporate worker's accommodation which is required to be located on land where noisy activities are likely to occur.
- Without the amendment sought, workers accommodation within the Industrial Zone will require resource consent as noise-sensitive activities.

Point Number 578.77

Summary of Decision Requested: **Retain** the definition of "Operational need" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.78

Summary of Decision Requested: **Retain** the definition of "Road network activities" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.79

Summary of Decision Requested: **Add** the definition of "Sensitive land use" as follows:

Sensitive land use

Means an education facility including a childcare facility, waananga and koohanga reo, a residential activity excluding worker's accommodation, ...

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Exclude worker's accommodation from the definition of sensitive land uses.
- Without the amendment sought, workers accommodation within the Industrial Zone will require resource consent as sensitive land uses.

Point Number 578.80

Summary of Decision Requested: **Add** a definition of "Worker's accommodation" in Chapter 13 Definitions, as follows:

Worker's accommodation

A dwelling for people whose duties require them to live on-site, and in the rural zones for people who work on the site or in the surrounding rural area.

Includes:

a) accommodation for rangers;

b) artists in residence;

c) farm managers and workers; and

d) staff.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Provision has been sought for worker's accommodation within the Industrial Zone. A corresponding definition is therefore proposed.

Point Number 578.81

Summary of Decision Requested: **Retain** the definition of "Infrastructure" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support the definition as notified.

Point Number 578.82

Summary of Decision Requested: **Add** a matter of discretion to Rule 16.4.1 RD1(b) Subdivision - General, to give consideration to reverse sensitivity effects as follows:

Council's discretion shall be restricted to the following matters:

(i) Subdivision layout;

...

(xi) Avoidance of reverse sensitivity effects on industrial activities.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Generally supportive of the subdivision requirements set out but note that consideration of reverse sensitivity effects, particularly in regards to the Horotiu Industrial Park has not been included as a matter of discretion.

Point Number

578.83

Summary of Decision Requested:

Add a matter of discretion to Rule 16.4.4RD1 (b) Subdivision - Multi-unit development, to give consideration to reverse sensitivity effects as follows:

Council's discretion shall be restricted to the following matters:

(i) *Subdivision layout including common boundary and party walls for the Multi-unit development;*

...

(xi) *Avoidance of reverse sensitivity effects on industrial activities.*

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Generally supportive of the subdivision requirements set out but note that consideration of reverse sensitivity effects, particularly in regards to the Horotiu Industrial Park has not been included as a matter of discretion.

Point Number

578.84

Summary of Decision Requested:

Add matters of discretion to Rule 17.1.3 RD1 Restricted Discretionary Activities, to provide for the avoidance of reverse sensitivity and protection of lawfully established industrial activities from reverse sensitive effects. The matters of discretion will read:

(a) *Council's discretion is limited to the following matters:*

(i) *The extent to which the development is consistent with Town Centre Guidelines contained in Appendix 3.3;*

...

(ix) *Geotechnical suitability for building.*

(x) *Avoidance of reverse sensitivity effects on industrial activities;*

(xi) *Protection of noise sensitive activities from the effects of noise generated by industrial activities.*

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Generally supportive of the subdivision requirements set out but note that consideration of reverse sensitivity effects, particularly in regards to the Horotiu Industrial Park has not been included as a matter of discretion.

Point Number

578.85

Summary of Decision Requested:

Amend Rule 17.3.5 P1 Horotiu Acoustic Area, as follows:

Construction, addition to or alteration of a building for a noise-sensitive activity within the Horotiu Acoustic Area shall be designed and constructed to achieve the internal design sound level specified in Appendix 1 (Acoustic Insulation) - Table 9.1.1.

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- Minor correction sought.

Point Number

578.86

Summary of Decision Requested:

Add a new permitted activity rule in Rule 17.3.5 Horotiu Acoustic Area, as follows:

P2

Activities sensitive to noise must be subject to a restrictive no-complaint covenant in favour of Ports of Auckland Limited.

For the purposes of this rule a 'restrictive non-complaint covenant' is defined as a restrictive covenant registered on the Title to the property or a binding agreement to covenant in favour of the Horotiu Industrial Park, by the landowner (and binding any successors in title) not to complain as to effects generated by the lawful operation of industrial activities from the Park. The restrictive no-complaint covenant is limited to the effects that could be lawfully generated by industrial activities at the time the agreement to covenant is entered into. This does not require the covenantor to forego any right to lodge submissions in respect of resource consent applications or plan changes in relation to industrial activities (although an individual restrictive non-complaint may do so).

AND

Amend Rule 17.3.5 RD1 Horotiu Acoustic Area, as follows:

(a) *Construction, addition to or alteration of a building that does not comply with Rule ~~17.3.4.3 P1~~ 17.3.5.*

(b)...

AND

Amend the Proposed District Plan to make alternative or consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- The Proposed plan enables the intensification of activities that are sensitive to noise within close proximity to the Horotiu Industrial Park.
- The RPS provides clear direction that the Proposed Plan should minimise potential reverse sensitivity effects that have the potential to occur on the Horotiu Industrial Park by the intensification that will be enabled within the area.
- The Proposed District Plan should provide clear direction on where and how sensitive activities should be enabled within the vicinity of the Horotiu Industrial Park to avoid and mitigate potential reverse sensitivity effects.
- Considers it is appropriate to require new buildings and the alteration of existing buildings within the Horotiu area to be subject to 'no complaints' covenants in favour of Ports of Auckland Ltd, and be subject to minimum acoustic insulation requirements which can be achieved through amendments to the Noise Control Boundary. This overlay should be applied to the entirety of the Horotiu residential area.
- Such measures will provide for the ongoing lawful operation and establishment of industrial activities.

Point Number 578.87
Summary of Decision Requested: Retain Objective 6.1.1 Development, operation and maintenance of infrastructure, as notified.
Decision Reasons:

- Supports this objective as notified and the inclusion of an infrastructure chapter.

Point Number 578.88
Summary of Decision Requested: Retain Policy 6.1.2 Development, operation and maintenance, as notified.
Decision Reasons:

- Support policy as notified.

Point Number 578.89
Summary of Decision Requested: Retain Policy 6.1.3 Technological advances, as notified.
Decision Reasons:

- Support policy as notified and the inclusion of an infrastructure chapter.

Point Number 578.90
Summary of Decision Requested: Retain Policy 6.1.4 Infrastructure benefits, as notified.
Decision Reasons:

- Supports this policy as notified and the inclusion of an infrastructure chapter.

Point Number 578.91
Summary of Decision Requested: Retain Policy 6.1.5 Natural hazards and climate change, as notified.
Decision Reasons:

- Support policy as notified and the inclusion of an infrastructure chapter.

Point Number 578.92
Summary of Decision Requested: Retain Objective 6.1.6 Reverse sensitivity, as notified.
Decision Reasons:

- Support objective as notified and the inclusion of an infrastructure chapter.

Point Number 578.93
Summary of Decision Requested: Retain Policy 6.1.7 Reverse sensitivity and infrastructure, as notified.
Decision Reasons:

- Support policy as notified and the inclusion of an infrastructure chapter.

Point Number 578.94
Summary of Decision Requested: Retain Objective 6.1.8 Infrastructure in the community and identified areas, as notified.
Decision Reasons:

- Support objective as notified and the inclusion of an infrastructure chapter.

Point Number 578.95
Summary of Decision Requested: Retain Policy 6.1.9 Environmental effects, community health, safety and amenity, as notified.
Decision Reasons:

- Support policy as notified and the inclusion of an infrastructure chapter.

Point Number 578.96
Summary of Decision Requested: Retain Policy 6.1.11 Undergrounding new infrastructure, as notified.
Decision Reasons:

- Support policy as notified and the inclusion of an infrastructure chapter.

Point Number 578.97

Summary of Decision Requested:	Retain Policy 6.1.12 Co-location of compatible facilities, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.
Point Number	578.98
Summary of Decision Requested:	Retain Policy 6.1.13 Future growth areas, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.
Point Number	578.99
Summary of Decision Requested:	Retain Policy 6.1.16 Water conservation, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.
Point Number	578.100
Summary of Decision Requested:	Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support objective as notified and the inclusion of an infrastructure chapter.
Point Number	578.101
Summary of Decision Requested:	Retain Policy 6.4.2 Provide adequate infrastructure, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.
Point Number	578.102
Summary of Decision Requested:	Retain Policy 6.4.3 Infrastructure Location and Services, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.
Point Number	578.103
Summary of Decision Requested:	<p>Add a new clause (b) to Policy 6.4.4 Road and rail network, as follows:</p> <p><i>(a) Discourage subdivision, use and development that would compromise:</i></p> <p><i>(i) The road function, as specified in the road hierarchy, or the safety and efficiency of the roading network; and</i></p> <p><i>(ii) The safety and efficiency of the railway network.</i></p> <p><i>(b) <u>Encourage subdivision, use and development that makes efficient use of the road and rail network.</u></i></p>
Decision Reasons:	<ul style="list-style-type: none"> • Support this policy, however consider that provision needs to be made for the efficient operation of the road and rail network to ensure the infrastructure can integrate efficiently with subdivision, use and development.
Point Number	578.104
Summary of Decision Requested:	Retain Policy 6.4.5 Roothing infrastructure, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.
Point Number	578.105
Summary of Decision Requested:	Retain Objective 6.4.6 Stormwater and drainage, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support objective as notified and the inclusion of an infrastructure chapter.
Point Number	578.106
Summary of Decision Requested:	Retain Policy 6.4.7 Stormwater, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.

Point Number	578.107
Summary of Decision Requested:	Retain Objective 6.5.1 Land transport network, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support objective as notified and the inclusion of an infrastructure chapter.
Point Number	578.108
Summary of Decision Requested:	Retain Policy 6.5.2 Construction and operation of the land transport network, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified and the inclusion of an infrastructure chapter.

Point Number	578.113
Summary of Decision Requested:	Retain Policy 10.1.4 Reverse sensitivity effects, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Support policy as notified.
Point Number	578.114
Summary of Decision Requested:	Retain Rule 14.2.1 Permitted Activities, as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Considers that it appropriately enables the provision of new infrastructure to service development.
Point Number	578.115
Summary of Decision Requested:	Retain Rule 14.2.2 Restricted Discretionary Activities as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the restricted discretionary activity status for new infrastructure that does not comply with the standards of rule 14.2.1 • Considers the matters of discretion to be appropriate.

Submitter Number:	579	Submitter:	Simon Ash
Organisation:	Lakeside Developments 2017 Limited		
Point Number	579.1		
Summary of Decision Requested:	Amend Rule 16.5.2PI (a)(i) Activity-Specific conditions as follows: (a) <i>Secondary Access Control:</i> (i) <i>A secondary road access into the Lakeside Precinct Plan Area (as shown on Lakeside Precinct Plan 16.5.1(3)(e)) must be opened for traffic before the number of dwellings include independent living units within a retirement village...</i>		

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number

579.2

Summary of Decision Requested:

Delete matter of discretion (a) (ii) for Rule 16.5.3RD1 Restricted Discretionary Activities relating to matters identified in the assessment criteria.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Incorrect reference as there are no assessment criteria.

Point Number

579.3

Summary of Decision Requested:

Amend Rule 16.5.3 (2) (RD1) (a) (ii) (e) as follows:

(ii) A CLDC is in accordance with the Lakeside Precinct Plans identified above if:

....

E. Lakeside Walkway is within ~~40~~30m of the location shown on Precinct Plan Rule 16.5.1(3)(c);...

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Update to allow amended alignment.

Point Number

579.4

Summary of Decision Requested:

Amend Rule 16.5.4 (1) D2 Discretionary Activities as follows:

(iii) Any activity that does not comply with one or more of the activity specific conditions for a permitted activity under Rule 16.1.2 ~~applies under the~~ or Land Use - Effects Rule 16.2 or Land Use Buildings Rule 16.3.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Ensures provision is workable and correct.

Point Number

579.5

Summary of Decision Requested:

Delete Rule 16.5.7.2 P3 Earthworks - general.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Flood risk area has been removed and as such provision is no longer required.

Point Number

579.6

Summary of Decision Requested:

Amend Rule 16.5.9.1 C1 (a) (i) Subdivision Lakeside - general as follows:

(i) Subdivision is for an existing or approved housing development or is applied for concurrently with an application for housing development.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Allows housing development to be applied for at the same time in subdivision.

Point Number

579.7

Summary of Decision Requested:

Delete Rule 16.5.9.2 RD1 (b) (ii) Lakeside Comprehensive Subdivision Consent relating to matters identified in the assessment criteria.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Incorrect reference as no assessment criteria.

Point Number

579.8

Summary of Decision Requested: **Amend** Rule 16.5.9.2RD1 (a) (iv) Lakeside Comprehensive Subdivision Consent (CS) as follows:
(iv) The Lakeside Walkway is within ~~4030m~~ of the location shown on Precinct Plan 16.5.1(3)(c);
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Update to allow amended alignment.

Point Number 579.9

Summary of Decision Requested: **Amend** Rule 16.5.9.2 D1 (a) (v) Lakeside Comprehensive Subdivision Consent (CS) as follows:
(v) Lakeside Walkway is within ~~40m-20m~~ 30-50m of the location shown on Precinct Plan Rule 16.5.1(3)(c);
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Update to allow amended alignment.

Point Number 579.10

Summary of Decision Requested: **Amend** Lakeside Te Kauwhata Precinct Plan 3 in Rule 16.5.1(3) to show the provision of four parks, with the park in the north western portion of the site being deleted.
OR
Retain Lakeside Te Kauwhata Precinct Plan 3 in Rule 16.5.1 (3) with five parks if Council confirms that it is financially able to maintain 5 parks.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- LDL will form and vest parks at it own cost, but does not want to be in a position where the Council wants only four parks because the ongoing operational funding issues, but the plan provisions require five parks.
- Plan Change 20 originally proposed two parks, Council wanted to increase this to 5 which LDL accepted. The Council should either commit to the number of parks it wants or leave the number fluid and therefore remove the depiction of five parks within diagram 3.

Point Number 579.11

Summary of Decision Requested: **Retain** the Business Zone rules as applicable to Specific Area: Lakeside Te Kauwhata Precinct are appropriate, except those to which amendments are sought in subsequent submission points.

Decision Reasons:

- The Business Zone and Lakeside Te Kauwhata Precinct rules clearly identify what provisions apply.

Point Number 579.12

Summary of Decision Requested: **Amend** Rule 17.5.1(2) Application of rules as follows:
(2) The rules that apply to a permitted activity in Rule ~~17.5.2 P1-P17~~ 17.1.2 P1-P18 within the...
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number 579.13

Summary of Decision Requested: **Delete** Rule 17.5.2 RD1 Restricted Discretionary Activities matters of discretion (a) (ii) relating to matters identified in the assessment criteria.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Incorrect reference as non-assessment criteria.

Point Number 579.14

Summary of Decision Requested: **Amend** Rule 17.5.4 NCI Non-complying Activities as follows:
A CLDC that does not meet the requirements of Rule 17.5.2 RD1 ~~(b)~~ relating to infrastructure requirements.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number 579.15

Summary of Decision Requested: **Amend** Rule 17.5.5 PI Daylight admission as follows:

Any building shall not protrude through a height control plane rising at an angle of 45 degrees commencing at an elevation of 3.5m above ground level at every point of the site boundary where it adjoins a residential zone.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct spelling.

Point Number 579.16

Summary of Decision Requested: **Amend** Rule 17.5.6 RD1 Gross floor area, as follows:

(a) Any building which does not comply with Rule 17.5.6~~2~~ P1.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number 579.17

Summary of Decision Requested: **Amend** Rule 17.5.9 RD1 (a) Subdivision as follows:

(a) A Comprehensive Subdivision Consent (CS) that meets all of the following conditions:

(i) is in accordance with Te Kawhata Lakeside Precinct Plan 16.5.1(3)(a); the roading network, walkways and cycleways shown on Precinct Plan 16.5.1(3)(b); and the open space shown on Precinct Plan ~~16.5.1(3)(c)~~, as set out in the precinct parameters below; and

(ii) A CS is in accordance with the Lakeside Precinct Plans identified above if:

A. Primary roads are within 50m of the location shown on Precinct Plan 16.5.1(3)(b); and

B. Bus route is either on the alignment shown on Precinct Plan 16.5.1(3)(b) or a continuous alignment that achieves the same circulation; and

~~C. Indicative areas of open space are within 200m of the location shown on Precinct Plan 16.5.1(3)(c).~~

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number 579.18

Summary of Decision Requested: **Amend** Rule 17.5.9 RD1 (f)- Subdivision as follows:

(f) Council's discretion is limited to the following matters:

(i) consistency with the Te Kawhata Lakeside Precinct Plan in 16.5.1(3)(a), (b) and (c);

~~*(ii) matters identified in the assessment criteria in X;*~~

(iii) managing the effects of wastewater and stormwater;

(iv) roading network and compliance with a Council approved roading standard;

(v) provision and location of existing and future utilities and connections;

(vi) location of roads and their connections;

(vii) provision of open space, including linkages between residential areas, open space and Lake Waikare;

(viii) effects of natural hazards (including flooding), geotechnical suitability and land contamination;

(ix) provision of the historic Iwi overlay area shown on Precinct Plan 16.5.1.3(~~bc~~).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Incorrect reference as no assessment criteria.
- Correct referencing.

Point Number 579.19

Summary of Decision Requested: **Amend** Rule 17.5.9 D1 Subdivision as follows:

(a) A CS that does not comply with Rule 17.5.9 RD1 and meets all of the following conditions and condition 17.5.9RD1(~~pe~~) relating to infrastructure...

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct reference.

Point Number 579.20

Summary of Decision Requested: **Amend** Rule 17.5.9 NC1 Subdivision as follows:

A CS that does not meet the requirements of Rule 17.5.9 RD1(eb) relating to Infrastructure Requirements, shall be a non-complying activity.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number 579.21

Summary of Decision Requested: **Add** a new restricted discretionary activity rule to Rule 22.8.3(1) as follows:

Activity:

RD1

(g) A comprehensive land development consent (CLDC) that meets all of the following conditions:

(i) is in accordance with Te Kauwhata Lakeside Precinct Plan 16.5.1(3)(g); the roading network, walkways and cycle ways shown on Precinct Plan 16.5.1(3)(y); and the open space shown on Precinct Plan 16.5.1(3)(c) as set out in the precinct parameters below; and

(b) A CLDC is in accordance with the Lakeside Precinct Plans identified below if:

(i) Primary roads are within 50m of the location shown on Precinct Plan 16.5.1(3)(b); and

(ii) Bus route is either on the alignment shown on Precinct Plan 16.5.1(3)(b) or a continuous alignment that achieves the same circulation; and

(iii) Subject to (y) below, the indicative walkways/cycle ways are within 100m of the location shown on Precinct Plan 16.5.1(3)(b), provided that connections are retained between the Lakeside Walkway and the residential development; and

(iv) Subject to (y) below, the Lakeside Walkway is within 30m of the location shown on Precinct Plan 16.5.1(3)(b);

(y) Any walkway/cycle way or the Lakeside Walkway that needs to be aligned so as to avoid an area of infested alligator weed as identified within an alligator weed management plan may be relocated from the alignment shown on 16.5.1(3)(b) to the extent necessary to avoid the infested area.

(c) A CLDC can relate to the entire Te Kauwhata Lakeside Precinct Plan Area, or may be for an individual stage or stages beyond the business zone, provided that an individual stage is 5ha or more.

(d) Applications for approval of a CLDC as a restricted discretionary activity will be considered without public notification and without the need to serve notice on or obtain the written approval of any affected persons.

(e) LDC approval does not constitute authorization by the Waikato District Council as road controlling authority in terms of Section 357 of the Local Government Act 1974. Written authorisation is required from the Waikato District Council prior to any works commencing that affect public roads.

Matters of Discretion:

(g) Council's discretion is reserved over:

(i) consistency with the Te Kauwhata Lakeside Precinct Plans in 16.5.1(3)(g), 16.5.1(3)(b) and 16.5.1(3)(c);

(ii) managing the effects of wastewater and stormwater;

(iii) roading network and compliance with a Council-approved roading standard;

(iv) provision and location of existing and future utilities and connections;

(v) location of roads and their connections;

(vi) provision of open space, including linkages between residential areas, open space and Lake Waikare;

(vii) effects of natural hazards (including flooding), geotechnical suitability and land contamination.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The provision for a Comprehensive Land Development Consent (CLDC) has been omitted from the provisions.
- The inclusion of a CLDC as a restricted discretionary activity is necessary as there is infrastructure and earthworks that need to be installed in the Rural Zone within the Te Kauwhata Precinct to service the residential development.
- The provision for a CLDC in the Rural Zone was accepted as part of Plan Change 20.

Point Number 579.22

Summary of Decision Requested: **Amend** Rule 22.8.1 Application of rules as follows:

(1) Rules 22.8.2, ~~22.8.3~~, 22.8.4 and 22.8.5 apply in the Lakeside Te Kauwhata Precinct, ~~in addition to the activity rules in:~~

~~22.1.2 (Permitted Activities);~~

~~22.1.3 (Restricted Discretionary Activities);~~

~~22.1.4 (Discretionary Activities); and~~

~~22.1.5 (Non-complying Activities);~~

(2) The rules that apply to a permitted activity in 22.8.2 P1-18 within the Lakeside Te Kauwhata Precinct are as follows:

(a) Rule 22.2 (Land Use - Effects), except:

(i) Rule 22.2.7.1 (Earthworks - General) does not apply where earthworks consent has been obtained under Rule 22.8.8 (Comprehensive Land Development Consent);

(b) The following provisions in Rule 22.3 (Land Use - Building):

(i) Rule 22.3.4 (Height);

(ii) Rule 22.3.5 (Daylight admission);

(iii) Rule 22.3.6 (Building coverage);

(iv) Rule 22.3.7 (Building setbacks);

(3) Rule 22.8.6 and 22.8.7 apply to subdivision in the Te Kauwhata Precinct in addition to:

(a) Rule 22.4.1.7 Subdivision creating Reserves; and

(b) Rule 22.4.7 (Esplanade reserves and Esplanade strips);

~~(4)~~ (4) The following precinct plan applies to the Rural Zone in the Lakeside Te Kauwhata Precinct as identified on the planning maps.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Needs to be reformatted so that it is clear which provisions apply within the Precinct and also to be consistent with the layout of the Business Zone provisions.

Point Number 579.23

Summary of Decision Requested: **Delete** Rule 22.8.2 P1 relating to A Marae Complex or Papakainga Housing Development on Maaori Freehold Land or on Maaori Customary Land.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Such an activity is inappropriate within the Te Kauwhata Precinct.

Point Number 579.24

Summary of Decision Requested: **Amend** Rule 22.8.2 P6 as follows:

P6 Pastoral Farming only.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The provisions provide for a wide range of activities including forestry, industrial activity and waste management facilities. It is unnecessary and inappropriate to provide for these activities in locations adjoining medium/high density residential development.
- These activities should be provided for in the wider Rural Zone, but it is not appropriate for these site specific provisions.

Point Number 579.25

Summary of Decision Requested: **Amend** the activity specific conditions for Rule 22.8.2 P21 relating to Information Kiosk as follows:

(a) Provided it is ~~entered~~ located within the cultural and heritage overlay show on on Precinct 4.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Spelling correction.

Point Number 579.26

Summary of Decision Requested: **Add** a provision for a CLDC as a restricted discretionary activity to Rule 22.8.3 RD1 Restricted Discretionary Activities.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Provision for a CLDC is necessary to enable the required infrastructure to be installed within the Rural zoned land in the Te Kauwhata precinct.

Point Number 579.27

Summary of Decision Requested: **Add** a provision within Rule 22.8.4 Discretionary Activities for a CDC that does not comply with the provisions for a Restricted Discretionary activity as follows:

(a) A CLDC that does not comply with Rule 22.8.3 RD1 and meets all of the following conditions:

(i) Primary roads are within 50m-100m of the location shown on Precinct Plan 16.5.3.1(3)(b); and

(ii) Bus route is either on the alignment shown on the Precinct Plan 16.5.3.1(3)(b) or a continuous alignments that achieved the same circulation; and

(iii) Indicative walkways are within 150m of the location shown on the Precinct Plan 16.5.3.1(3)(b);

(iv) Lakeside walkway is within 70m of the location shown on Proposed Plan 16.5.3.1(3)(b).

The matters over which Council reserves discretion shall be used for assessing discretionary applications under this rule.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Provision for a CLDC is necessary to enable the required infrastructure to be installed within the Rural Zoned land of the Te Kauwhata Precinct.

Point Number 579.28

Summary of Decision Requested: **Delete** Rule 22.8.4 D4 Waste management facility.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- These activities are not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.29

Summary of Decision Requested: Delete Rule 22.8.5 NCI Non-complying Activities.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This provision is unnecessary as indicative roads can be re-aligned around buildings.

Point Number 579.30

Summary of Decision Requested: Delete Rule 22.8.6 Earthworks - General.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- There is no need to provide for earthworks within a flood risk area as the flood risk control has been removed.

Point Number 579.31

Summary of Decision Requested: Amend Rule 22.8.7 C1 - Subdivision Lakeside General as follows:

Subdivision is in accordance with the Lakeside Precinct Plans identified above if...

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Amendment is necessary to understand and give effect to the provisions.

Point Number 579.32

Summary of Decision Requested: Retain the approach of Lakeside being a 'Specific Area'.

AND

Retain the 'Te Kauwhata Specific Area' provisions contained within the Residential, Business and Rural sections of the Proposed Waikato District Plan.

Decision Reasons:

- Lakeside is a comprehensive planned community with unique and special development controls.
- Supports the carrying over of Plan Change 20 into the Proposed Waikato District Plan for the following reasons:
 - It will create significant growth and development within the district, with approximately 1600 residential lots, a community hub, retirement village and recreational reserves.
 - Will take advantage of the Waikato expressway and will focus growth around the existing Te Kauwhata centre and economic corridor between Auckland and Hamilton.
 - Upgrade of wastewater infrastructure required to service the long term development will result in a significantly improved system.
 - Assist the Council in the provision of infrastructure for the broader Te Kauwhata area, and support Council with applications under the Housing Infrastructure Fund, and subsequently assist in providing upgraded wastewater, water and roading infrastructure for Te Kauwhata.
 - The creation of 43 hectares of recreational reserves on the land which borders the western edge of Lake Waikare and provides a public walkway network, in excess of 5km in length will be constructed.
 - Recreational opportunities proposed for the reserves include an Iwi Reserve, recreational sports ground, children's playground and an equestrian park. The remainder of the reserve land will be managed to allow wetland regeneration alongside replanting.
 - Consents have been granted which demonstrate a genuine commitment to the development of the Te Kauwhata Lakeside development. It is of fundamental importance in creating an efficient regulatory framework and under which the Lakeside development can progress.

Point Number 579.33

Summary of Decision Requested: Amend the title for Section 16.5 Lakeside Te Kauwhata Precinct as follows:

16.5 Specific Area: Lakeside Te Kauwhata Precinct

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- It is noted that the description of the Te Kauwhata provisions in the Business and Rural sections refer to a 'Specific Area'. This does not occur within the Residential Zone chapter.
- Amendment required to give consistency.

Point Number 579.34

Summary of Decision Requested: Retain Objective 4.1.1 Strategic as notified.

Decision Reasons:

- Objective recognises the need to clearly provide for significant growth in the Waikato and that this growth is focused around existing towns and villages, such as Te Kauwhata.

Point Number 579.35

Summary of Decision Requested: **Retain** Objective 4.1.2 Urban growth and development, except for the amendments sought below

AND

Amend Objective 4.1.2 Urban growth and development as follows:

(a) Future settlement pattern is consolidated in and around existing towns and villages in the district and along the rail corridor.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Objective recognises the need to clearly provide for significant growth in the Waikato and that this growth is focused around existing towns and villages, such as Te Kauwhata.
- Considers that growth along the rail corridor should be provided for.

Point Number 579.36

Summary of Decision Requested: **Retain** Policy 4.1.4 Staging of developments as notified.

Decision Reasons:

- Policy recognises the need to clearly provide for significant growth in the Waikato and that this growth is focused around existing towns and villages, such as Te Kauwhata.

Point Number 579.37

Summary of Decision Requested: **Retain** Policy 4.1.3 Location of development, except for the amendments sought below

AND

Amend Policy 4.1.3 Location of development, as follows:

(a) Subdivision and development of a residential, commercial and industrial nature is to occur within towns and villages, and along the rail corridor, where infrastructure and services can be efficiently and economically provided.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Policy recognises the need to clearly provide for significant growth in the Waikato and that this growth is focused around existing towns and villages, such as Te Kauwhata.
- Considers that growth along the rail corridor should be provided for.

Point Number 579.38

Summary of Decision Requested: **Retain** Policy 4.1.5 Density as notified.

Decision Reasons:

- Policy recognises the need to clearly provide for significant growth in the Waikato and that this growth is focused around existing towns and villages, such as Te Kauwhata.
- Supports the identification of minimum densities as this provides guidance on the nature and form of future development.

Point Number 579.39

Summary of Decision Requested: **Retain** Policy 4.1.8 Integration and connectivity as notified.

Decision Reasons:

- Policy recognises the need to clearly provide for significant growth in the Waikato and that this growth is focused around existing towns and villages, such as Te Kauwhata.

Point Number 579.40

Summary of Decision Requested: **Retain** Policy 4.1.12 Te Kauwhata as notified.

Decision Reasons:

- Policy recognises that growth at Te Kauwhata is an important method for achieving the overall growth objective within the Waikato District.

Point Number 579.41

Summary of Decision Requested: **Amend** Objective 6.4.6 Stormwater and drainage, as follows:

(a) The hydrological characteristics of the natural drainage processes are managed to achieve a treatment train process and minimise stormwater effects effects.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The effect of the amendment is to provide a managed process to control stormwater and promote best practice.
- The notified objective would prevent development like Lakeside which is a planned growth in Te Kauwhata which was previously rural land.
- The requested amendment will ensure high standards of stormwater management will be achieved in the urban development.

Point Number 579.42

Summary of Decision Requested: **Amend** Policy 6.4.7 Stormwater as follows:

(a) Ensure that stormwater and drainage infrastructure for subdivision, land use and development:

(i) Adopts, where appropriate, a best-practice low impact design approach to the management of stormwater;

(ii) Manages stormwater in accordance with a drainage hierarchy, with a preference for initial on-site treatment;

(iii) ~~Minimises~~ Manage impervious surfaces to meet agreed impervious standard within respective zones so as to reduce stormwater runoff;

~~(iv) Retains pre-development hydrological conditions as far as practicable;~~

(v) Manage ~~Does not increase~~ the flow of stormwater to minimise runoff onto adjoining properties or flood plains, ~~or reduce site storage capacity on-site;~~

(vi) ...

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The effect of the amendment is to provide a managed process to control stormwater and promote best practice.
- The notified policy would prevent development like Lakeside.
- The requested amendments will ensure high standards of stormwater management will be achieved in the urban development.
- The objective and policy are unworkable as no new development that includes roads, houses and paved surfaces will be above the "pre-development hydrological conditions".
- The incorporation of "as far as practicable" in the policy is recognized by it is considered that this will invite debate on what that means.

Point Number 579.43

Summary of Decision Requested: **Retain** the "roll-over" of the Residential, Rural and Business Zones from Plan Change 20 on sites within the Lakeside Precinct (see Diagram 1 of submission).

Decision Reasons:

- The zones and overlays provide a clear indication to the community as to the outcomes sought within the site/area.
- Support the zones within the Proposed District Plan, which are effectively a 'roll-over' of the zones from Plan Change 20.

Point Number 579.44

Summary of Decision Requested: **Amend** the position of the Lakeside walkway to ensure it is located only within the Lakeside Development 2017 Limited property boundary, Te Kauwhata and west of the Significant Natural Area and Outstanding Natural Feature (see map included in submission).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Supports the identification of the walkway along the edge of the property adjoining Lake Waikare.
- The walkway has been well supported by a range of parties through the Plan Change 20 process.
- Seeks the realignment of the Lakeside walkway to ensure that the walkway is entirely located within the Lakeside Property boundary.

Point Number 579.45

Summary of Decision Requested: **Delete** the Significant Natural Area overlays from the lake edge within the Lakeside Developments 2017 Limited property (see map included in submission).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- It is considered that the mapping of the Significant Natural Area overlays should be pulled back from the walkway and from the lake edge.
- The overlapping of the walkway and the overlays may frustrate the consenting process and the works that are required for the stop bank and to keep out the koi carp and alligator weed.

Point Number 579.46

Summary of Decision Requested: **Delete** the Development Precinct from the Lakeside Development 2017 Limited property, Te Kauwhata.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The identification of the Development Precinct is considered to be unnecessary as it does not link to a particular rule and as the precincts are already shown on the Precinct Plans in the Residential Zone provisions.

Point Number 579.47

Summary of Decision Requested: **Retain** the Residential zone provisions as they relate to the Te Kauwhata Lakeside Precinct, except the provisions for which amendments are requested.

Decision Reasons:

- The Residential Zone is a fundamental tool in enabling the development of 1600 homes.
- The key enabling mechanism in the zone are the provision for a "Comprehensive Development Consent" and "Comprehensive Subdivision".
- These provisions enable for a bundled consent for the creation of lots and associated infrastructure.
- It is a comprehensive approach which will ensure the integration of housing development with the provision of infrastructure.

Point Number 579.48

Summary of Decision Requested: **Amend** Rule 16.5.1(1) Application of rules, as follows:

(1) The rules that apply to a permitted activity in Rule 16.5.2 within the Lakeside Te Kauwhata Precinct as identified in the planning maps are as follows:

(i) Rule 15.2 (Land Use - Effects) except:

...

A. Rule 16.2.4.1 (Earthworks - general) and Rule 16.2.4.2 (Earthworks - Maori Sites and Maori Areas of Significance) does not apply and Rule 16.5.7.2 applies instead

B....

C. Rule 16.2.6 Notable trees

~~¶~~ D. Rule 16.5.7.1 Noise and Vibration - North Island Main Trunk line (NIMT)

~~¶~~ E. Rule 16.3 (Land Use - Building) does not apply, Rule 16.5.8 (Land use- Building) applies instead.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Correct referencing.

Point Number 579.49

Summary of Decision Requested: **Amend** Rule 16.5.1(3) by replacing the Lakeside Te Kauwhata Precinct plans with the updated Lakeside Te Kauwhata Precinct plans (included as Diagram within the submission).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Revised precinct plans show new alignment of main boulevard.

Point Number 579.50

Summary of Decision Requested: **Amend** Rule 22.8.7 C1 (x) Subdivision Lakeside General as follows

(x) subject to v) below Lakeside Walkway is within ~~40~~30m of the location shown on Precinct Plan 16.5.1(3)(c);

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Amendment is necessary to enable works to locate appropriately given the stop bank, property boundary and alligator weed.

Point Number 579.51

Summary of Decision Requested: **Amend** Rule 22.8.8 RD1 (a) (ii) D Lakeside Comprehensive Subdivision Consent as follows:

D. Lakeside Walkway is within ~~40~~30m of the location shown on Precinct Plan 16.5.1(3)(c).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Amendment is necessary to enable works to locate appropriately given the stop bank, property boundary and alligator weed.

Point Number 579.52

Summary of Decision Requested: **Delete** Rule 22.8.8 RD1 (c)(ii) Lakeside Comprehensive Subdivision Consent.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Reference is not required.

Point Number 579.53

Summary of Decision Requested: **Amend** Rule 22.8.8 D1 (a)(iv) as follows:

iv) Lakeside Walkway is within ~~40m~~30-20~~50~~m of the location shown on Precinct Plan 16.5.1(3)(b).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Amendment is necessary to enable works to locate appropriately given the stop bank, property boundary and alligator weed.

Point Number 579.54

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays by annotating the control on dwellings with a sentence as follows:
except in Te Kauwhata Lakeside on sites 300m2 or less.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m2 to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.55

Summary of Decision Requested: **Add** a new line within Table 14.12.5.7 Required parking spaces and loading bays as follows:
Te Kauwhata Lakeside dwelling on sites of 300m2 or less - minimum of one car parking space per dwelling plus on-street parking at a ratio of 0.7 carparking spaces per allotment, or...
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m2 to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.56

Summary of Decision Requested: **Amend** Table 14.12.5.7 Required parking spaces and loading bays by annotating the control on retirement villages as follows:
except in Te Kauwhata Lakeside.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m2 to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.57

Summary of Decision Requested: **Add** a new line within Table 14.12.5.7 Required parking spaces and loading bays as follows:
Te Kauwhata Lakeside Retirement Village - 0.5 car parking spaces per independent living unit and one visitor space for every 10 residents
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m2 to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.58

Summary of Decision Requested: **Amend** Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) to insert specific provisions which provide for a minimum local road width of 16m and a reduction in the seal width from 8m to 6m.
AND
Amend Table 14.12.5.14 Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones) to insert specific provisions which provide for private ways which have passing bays and/or dual carriageway to serve more than 8 allotments.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m2 to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.59

Summary of Decision Requested: **Amend** Table 14.12.5.19 Te Kauwhata Structure Plan - Road cross sections - Collector Roads to insert specific provisions which provide for a minimum local road width of 16m and a reduction in the seal width from 8m to 6m.
AND
Amend Table 14.12.5.19 Te Kauwhata Structure Plan - Road cross sections - Collector Roads to insert specific provisions which provide for private ways which have passing bays and/or dual carriageway to serve more than 8 allotments.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m² to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.60

Summary of Decision Requested: **Amend** activity specific conditions in Rule 14.2.1.1 (1) (a) relating to P1 New Infrastructure as follows:

(a) Not exceed 10m² in area above-ground, for any one structure

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The restriction on the size of above-ground infrastructure should apply individual structures.
- In developments it is possible there could be multiple structures such as pump stations.

Point Number 579.61

Summary of Decision Requested: **Amend** activity-specific conditions 14.11.1.(a)(ii) A relating to P1 Stormwater systems for new development or subdivision as follows:

(ii) Manages stormwater in the following manner:

A. Primary systems detain runoff from all impervious surfaces during a 10% Annual Exceedance Probability AEP storm event to ensure that the rate of any stormwater discharge offsite is at or below pre-development rates or connects to a stormwater treatment train, process approved by the Council as part of a previous consent.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This rule is unrealistic in greenfield subdivision or development.
- Lakeside will go through a comprehensive land development consent process and will address stormwater. When this is addressed, individual development of houses may still trigger discharges above pre-development rates.

Point Number 579.62

Summary of Decision Requested: **Amend** activity-specific conditions in Rule 14.11.1.2 relating to P2 Impervious surfaces as follows:

(a) The establishment of impervious surfaces associated with new development or subdivision that complies with the following condition:

(ii) The maximum impervious surface of a site within the Residential Zone, Rangitahi Peninsula Zone, Village Zone or Country Living Zone is 70% and within the Te Kauwhata Lakeside Precinct is 75%.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- The impervious surface should be increased to 75% to take account of required driveways and paths.

Point Number 579.63

Summary of Decision Requested: **Amend** activity-specific conditions in Rule 14.11.1.8 (a) (i) relating to P8 Stormwater ponds or wetlands, as follows:

(i) The area of the pond or wetland does not exceed the equivalent site building coverage conditions applicable to the zone, except that this control does not apply in the Rural Zone.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Stormwater ponds or wetland are limited in area to the site building coverage.
- While this works in most zones, to impose this control in the Rural Zone is inappropriate.

Point Number 579.64

Summary of Decision Requested: **Amend** the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in this submission.

Decision Reasons:

- Recognise there may be alternatives or other consequential changes that are necessary to give effect to the matters raised in this submission.
- Various as outlined in the submission.

Point Number 579.65

Summary of Decision Requested: **Delete** Rule 16.5.9.3 (b) (ii) Subdivisions- Sites less than 5ha.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Reference is incorrect.

Point Number 579.66

Summary of Decision Requested: No specific decision sought, but submission supports the objectives and policies in Chapter 4 Urban Environment.

Decision Reasons:

- They recognise the need to clearly provide for significant growth in the Waikato and that this growth should be focused in and around existing towns and villages such as Te Kauwhata.

Point Number 579.67

Summary of Decision Requested: **Delete** the Significant Natural Feature overlays from the lake edge within the Lakeside Developments 2017 Limited property, Te Kauwhata (see map included in submission).

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

Point Number 579.68

Summary of Decision Requested: **Delete** Rule 22.8.2 P4 relating to A home occupation.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Such an activity is inappropriate within the Te Kauwhata Precinct.

Point Number 579.69

Summary of Decision Requested: **Delete** Rule 22.8.2 P5 relating to Afforestation.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Such an activity is inappropriate within the Te Kauwhata Precinct.

Point Number 579.70

Summary of Decision Requested: **Delete** Rule 22.8.2 P7 relating to Forestry.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Such an activity is inappropriate within the Te Kauwhata Precinct.

Point Number 579.71

Summary of Decision Requested: **Delete** Rule 22.8.2 P9 relating to Homestay.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Such an activity is inappropriate within the Te Kauwhata Precinct.

Point Number 579.72

Summary of Decision Requested: **Amend** the activity specific conditions for Rule 22.8.2 P22 relating to Structures providing information on culture, history or environment of the Lake Waikare and Te Kauwhata area as follows:

(a) Provided it is ~~entered~~ located within the cultural and heritage overlay shown on Precinct 4.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Spelling correction.

Point Number 579.73

Summary of Decision Requested: **Amend** Rule 22.8.2 P23 relating to Memorials recognising the culture and history of the Lake Waikare and Te Kauwhata area as follows:

(a) Provided it is ~~entered~~ located within the cultural and heritage overlay shown on Precinct 4.

AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Spelling correction.

Point Number 579.74

Summary of Decision Requested: Delete Rule 22.8.3 RD1 Restricted Discretionary Activities (relating to Intensive Farming).
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Rural industry and intensive farming are not appropriate to adjoin large scale residential development.

Point Number 579.75

Summary of Decision Requested: Delete Rule 22.8.4 D5 Hazardous waste storage, processing or disposal.
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.76

Summary of Decision Requested: Delete Rule 22.8.4 D7 A correctional facility.
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.77

Summary of Decision Requested: Delete Rule 22.8.4 D8 An extractive industry.
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.78

Summary of Decision Requested: Delete Rule 22.8.4 D9 Commercial activity, excluding a produce stall.
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.79

Summary of Decision Requested: Delete Rule 22.8.4 D10 Industrial activity.
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.80

Summary of Decision Requested: Delete Rule 22.8.4 D11 Travellers accommodation for more than 5 people.
AND

Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.81

Summary of Decision Requested: Delete Rule 22.8.4 D12 Transport depot.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.82

Summary of Decision Requested: Delete Rule 22.8.4 D13 Place of assembly.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.83

Summary of Decision Requested: Delete Rule 22.8.4 D14 Boarding, breeding or animal training establishments.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- This activity is not appropriate for the Rural Zoned land within the Te Kauwhata Precinct.

Point Number 579.84

Summary of Decision Requested: **Amend** Table 14.12.5.20 Te Kauwhata Structure Plan- Road cross sections- Local Roads to insert specific provisions which provide for a minimum local road width of 16m and a reduction in the seal width from 8m to 6m.
AND
Amend Te Kauwhata Structure Plan- Road cross sections- Local Roads to insert specific provisions which provide for private ways which have passing bays and/or dual carriageway to serve more than 8 allotments.
AND
Amend the Proposed District Plan to make any amendments or consequential changes that are necessary to give effect to the matters raised in the submission.

Decision Reasons:

- Plan change 20 identified a special parking control for Lakeside applying for sites less than 300m² to recognise the lower car ownerships of smaller households and promote affordable housing.
- Recognition of possible future public transport services to Te Kauwhata.

Point Number 579.85

Summary of Decision Requested: No specific decision sought, but submission supports the identification of indicative roads in Lakeside, Te Kauwhata.

Decision Reasons:

- They provide a clear indication as to how the Lakeside development will integrate with the surrounding street network and Te Kauwhata in general.

Point Number 579.86

Summary of Decision Requested: No specific decision sought, but submission supports the straightened alignment of the main boulevard in Lakeside, Te Kauwhata as compared with Plan Change 20.

Decision Reasons:

- The new alignment will enable better views of the Iwi Reserve and Lake Waikare and beyond.

Point Number 579.87

Summary of Decision Requested: No specific decision sought, but submission supports the identification of the walkway along the edge of the property at Lakeside, Te Kauwhata adjoining Lake Waikare.

Decision Reasons:

- The walkway has been well established and well supported by a range of parties, including the community through the Plan Change 20 process.

Point Number 579.88

Summary of Decision Requested: No specific decision sought, but submission generally supports the objective and policies relating to Tangata Whenua (Chapter 2 Tangata Whenua).

Decision Reasons:

- No reasons provided.

Point Number 579.89

Summary of Decision Requested: No specific decision sought, but submission generally supports the objectives and policies relating to the Natural Environment (Chapter 3 Natural Environment).

Decision Reasons:

- No reasons provided.

Point Number 579.90

Summary of Decision Requested: No specific decision sought, but submission generally supports the objectives and policies relating to Rural development (Chapter 5 Rural Environment).

Decision Reasons:

- No reasons provided.

Point Number 579.91

Summary of Decision Requested: Delete Rule 22.8.3 RD2 Restricted Discretionary Activities (relating to Rural Industry).

Decision Reasons:

- No reasons provided.

Submitter Number: 580 **Submitter:** Andrew Feierabend

Organisation: Meridian Energy Limited

Point Number 580.1

Summary of Decision Requested: **Retain** the core activities listed in the definition of "Infrastructure" in Chapter 13 Definitions.
AND
Amend the definition of "Infrastructure" in Chapter 13 Definitions to explicitly include large-scale wind farms, subject to the confirmation of the National Planning Standards definition of "Infrastructure".
OR
Amend the definition of "Infrastructure" in Chapter 13 definitions to include large-scale wind farms and the ancillary activities necessary to support these including earthworks, access tracks, and ancillary structures, subject to the confirmation of the National Planning Standards definition.
OR
Amend the policies and rules for addressing "Infrastructure" to explicitly include "large scale windfarms" in a manner that includes all necessary supporting ancillary activities, subject to confirmation of the final Natural Planning Standards definitions.
OR
Add equivalent objectives, policies, and rules for "large scale wind farms" (including all ancillary activities and structures) as are currently provided for "Infrastructure" as sought in the submission.
AND
Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The definition of "Infrastructure" only includes the core activities of a wind farm.
- The rules for establishing new wind farms refer to "large scale wind farms". The definition of 'large-scale wind farms' refers to access tracks, buildings and structure and is inclusive of most of the ancillary activities.
- The definition of "Infrastructure" is silent on these integral ancillary activities. The definition of "Infrastructure" should include these ancillary activities so that they are embraced by the policies and rules.
- This could be achieved by explicitly referencing "large-scale wind farms" in the definition of "Infrastructure".

Point Number 580.2

Summary of Decision Requested: **Retain** the definition of "minor upgrading" in Chapter 13 Definitions, provided it explicitly includes all the ancillary activities and structures necessary to support large-scale wind farms through the amended definition of "Infrastructure" as sought elsewhere in the submission, and subject to confirmation of the National Planning Standards definition.

Decision Reasons:

- There is ambiguity about whether all of the ancillary activities that are essential to large-scale wind farms are included in the permitted activity provision for 'minor upgrading' of 'infrastructure'.
- Ancillary activities and structures need to be included by definition, either including 'large-scale wind farms' in the definition of 'infrastructure' or by explicitly referencing the ancillary activities and structure in the definition of infrastructure.

Point Number 580.3

Summary of Decision Requested: **Retain** the definition of "Large-scale wind farm" in Chapter 13 Definitions.

Decision Reasons:

- The definition refers to access tracks, buildings and structures and is inclusive of most ancillary activities in addition to the core generation activity.

Point Number 580.4

Summary of Decision Requested: **Retain** the permitted activity provision for minor upgrading in Rule 14.3.1 P2, except for the amendments sought below

AND

Amend the activity specific conditions in Rule 14.3.1.1(1) as follows:

The realignment, configuration, relocation or replacement of infrastructure and associated structures that meet all of the following conditions:

- (a) *Are within ~~100m~~ 5m of the existing alignment or location;*
- (b) *Do not increase the height of any existing pole or support structure by more than ~~50%~~ 15%;*
- (c) *Do not increase the diameter (width) of any existing pole or support structure by more than ~~50%~~ 15%;*
- (d) *Do not increase the diameter of any existing above-ground pipe by more than 15%; and*
- (e) *Do not increase the area of any existing above-ground structure by more than 15%.*

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The proposed limits do not allow flexibility to enable re-powering and upgrading of existing facilities and the consequential location changes that result from upgrading wind electricity generation componentry.

Point Number

580.5

Summary of Decision Requested:

Amend the activity-specific conditions in Rule 14.6.1.2(a)(ii) for research and exploratory-scale investigations for renewable electricity generation activities, as follows:

(ii) The height of any equipment must not exceed 80m the building height limit of the zone in which they are located by more than 3m;

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The proposed height limit is too low to practically allow for meaningful investigations of potential wind energy at the height required for large-scale wind farms.

Point Number

580.6

Summary of Decision Requested:

Retain the discretionary activity status for large scale wind farms within the Rural Zone in Rule 14.6.3(D1) Discretionary Activities.

Decision Reasons:

- The discretionary activity classification is appropriate for wholly new large-scale wind farms in all situations.

Point Number

580.7

Summary of Decision Requested:

Add reference to NZ 6808:2010 as the accepted Industry-specific Standard applicable for the measurement of noise for large-scale wind farms.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- No reference is made to NZS 6808:2010 other than in the standards for small-scale and community-scale electricity generation.
- The standard is not referred to in policies or rules for large-scale wind farms.
- It is important that the plan acknowledges the specific applicability of the standard.

Point Number

580.8

Summary of Decision Requested:

Amend the activity specific conditions of Rule 14.8.1.1(a)(ii) for Meteorological enclosures and buildings, including automatic weather stations, as follows:

(ii) Meteorological measurement masts must not exceed 80 metres in height and all other structures must comply with any relevant building height condition for the applicable zone; ~~The structure complies with any relevant building height condition for the applicable zone;~~

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The proposed height limit is too low to practically allow meaningful investigations of potential wind energy at the height required for large-scale wind farms.

Point Number

580.9

Summary of Decision Requested:

Amend the activity-specific conditions of Rule 14.8.1.2(a)(i) for Meteorological and air quality monitoring structures and devices, as follows:

(i) Do not exceed ~~80m+2m~~ in height...

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The proposed height limit is too low to practically allow meaningful investigations of potential wind energy at the height required for large-scale wind farms.

Point Number

580.10

Summary of Decision Requested:

Add a new clause (x) into Rule 22.3.7.2P1(a) Building setback sensitive land use, as follows:

(x) the distance necessary to ensure wind turbine noise from any authorised or lawfully established large-scale wind farm does not exceed 40 dBA measured at the sensitive land use in accordance with NZS6808:2010.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Non-compliance with this rule triggers a discretionary activity status.
- The same reverse sensitivity noise issues arise for lawfully established large-scale wind farms and they equally warrant the protection of a minimum setback distance.
- Inclusion of a setback distance for large-scale wind farms is necessary to give effect to Objective 6.1.6 and Policy 6.1.7 addressing reverse sensitivity.
- The minimum setback would be specified by NZS 6808:2010

Point Number 580.11

Summary of Decision Requested: **Add** to Rule 22.3.7.4 PI Building - Noise Sensitive Activities a new clause (b), as follows:

(b) Construction of, or addition, or alteration to a building containing a noise-sensitive activity is permitted provided the building is set back from any authorised or lawfully established large-scale wind farm by a distance necessary to ensure wind turbine noise does not exceed 40 dBA measured at the noise-sensitive activity in accordance with NZS6808:2010.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Non-compliance with this rule results in a discretionary activity status.
- The same reverse sensitivity effects relating to noise issues arise for lawfully established large-scale wind farms and they equally warrant the protection of a minimum setback distance.
- Inclusion of a setback distance of large-scale wind farms is necessary to give effect to Objective 6.1.6 and Policy 6.1.7 to address reverse sensitivity.
- Setback could be specified by reference to the relevant standard NZS 6808:2010 or as a minimum distance proxy to protect against reverse sensitivity effects.

Point Number 580.12

Summary of Decision Requested: **Amend** Objective 3.2.1 Significant Natural Areas as follows:

(a) Indigenous biodiversity in Significant Natural Areas is protected, ~~and enhanced.~~

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The obligation of section 6(c) of the RMA is protection and does not require enhancement.

Point Number 580.13

Summary of Decision Requested: **Retain** Policy 3.2.3 Management Hierarchy, except for the amendments sought below

AND

Amend Policy 3.2.3(a)(iv) Management Hierarchy as follows:

(iv) after remediation or mitigation has been undertaken, provide for managing residual effects by means of environmental compensation or biodiversity offsets in accordance with Policy 3.2.4.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Environmental compensation is an important method in the toolbox of approaches to managing adverse effects and should be explicitly included in the management hierarchy particularly for the consideration of large infrastructure projects.

Point Number 580.14

Summary of Decision Requested: **Retain** Objective 6.1.6 Reverse Sensitivity.

Decision Reasons:

- Endorse the explicit protection of infrastructure from reverse sensitivity effects, noting that renewable energy facilities are included in "infrastructure".
- Seek to ensure that the Plan rules follow through by genuinely protecting authorised and existing lawfully established large-scale wind farms from adverse reverse sensitivity effects.

Point Number 580.15

Summary of Decision Requested: **Retain** Policy 6.1.7 Reverse sensitivity and infrastructure.

Decision Reasons:

- Endorse the explicit protection of infrastructure from reverse sensitivity effects, noting that renewable energy facilities are included in "infrastructure".
- Seek to ensure that the Plan rules follow through by genuinely protecting authorised and existing lawfully established large-scale wind farms from adverse reverse sensitivity effects.

Point Number 580.16

Summary of Decision Requested: **Retain** Objective 6.3.1 Renewable Energy, except for the amendments sought below

AND

Amend Objective 6.3.1 Renewable Energy as follows:

(a) Energy efficient design and an increase in renewable electricity generation, ~~activities are promoted.~~

OR

Add a new objective for renewable energy as follows:

Increased electricity, generation from renewable sources.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- The objective of the National Policy Statement for Renewable Electricity Generation is not simply a promotion of renewable electricity generation.
- The objective is to achieve an increase in electricity generation from renewable energy sources to a level that meets or exceeds the New Zealand Government's national target for renewable electricity generation.

Point Number 580.17

Summary of Decision Requested: **Retain** Policy 6.3.3 Enabling renewable electricity generation.

Decision Reasons:

- Endorses this policy and seeks to ensure that the Plan rules follow through by genuinely enabling the investigation, use and development of renewable energy generation.

Point Number 580.18

Summary of Decision Requested: **Retain** Policy 6.3.4 Future renewable electricity.

Decision Reasons:

- Endorses this policy and seeks to ensure that the Plan rules follow through by genuinely enabling the investigation, use and development of renewable energy generation.

Point Number 580.19

Summary of Decision Requested: **Retain** Policy 6.3.5 Existing renewable electricity facilities.

Decision Reasons:

- Endorses this policy and seeks to ensure that the plan rules follow through by genuinely protecting authorised and existing lawfully established large-scale wind farms from adverse reverse sensitivity effects, including effects caused by allowing noise sensitive activities.

Point Number 580.20

Summary of Decision Requested: **Amend** the Proposed District Plan as necessary to address the matters raised in submission.

Decision Reasons:

- Various, as outlined in the submission.

Point Number 580.21

Summary of Decision Requested: **Retain** Policy 3.2.4 Biodiversity Offsetting, except for the amendments sought below

AND

Amend Policy 3.2.4(a) Biodiversity Offsetting to provide for environmental compensation as follows:

(a) Allow for a biodiversity offset or environmental compensation to be offered by a resource consent applicant where an activity will result in significant residual adverse effects on a Significant Natural Area, or on indigenous biodiversity outside such Significant Natural Areas.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Environmental compensation is an important method in the toolbox of approaches to managing adverse effects and should be explicitly included in the management hierarchy, particularly for the consideration of large infrastructure projects.

Point Number 580.22

Summary of Decision Requested: **Retain** Policy 3.3.2 Recognising values and qualities.

Decision Reasons:

- Endorses the approach proposed by Policy 3.3.2.

Point Number 580.23

Summary of Decision Requested: **Retain** Policy 3.3.3 Protection from inappropriate subdivision, use and development, except for the amendment sought below

AND

Amend Policy 3.3.3(a)(i) Protection from inappropriate subdivision, use and development as follows:

(i) requiring buildings and structures to be integrated into the Outstanding Natural Landscape or feature to the extent reasonably practicable to minimise any visual impacts.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Supports the approach provided it recognises the functional and operational difficulty that some large-scale infrastructure (e.g. wind turbines) will have integrating into the landscape.

Point Number 580.24

Summary of Decision Requested: **Retain** Policy 6.1.2 Development, operation and maintenance, except for the amendments sought below

AND

Amend Policy 6.1.2(a)(iii) to reference "site" as plural as follows:

(iii) Locational constraints related to the need to access suitable resources or sites;

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Minor editorial matter to ensure the policy does not limit its application.
- Many forms of infrastructure will involve multiple sites.

Point Number 580.25

Summary of Decision Requested: **Retain** Policy 6.1.4 Infrastructure Benefits, except for the amendments sought below

AND

Add a new clause (b) to Policy 6.1.4 Infrastructure Benefits as follows:

(b) Have particular regard to the benefits that the use and development of renewable energy provides.

AND

Amend the Proposed District Plan as necessary to address the matters raised in the submission.

Decision Reasons:

- Amendment required to give effect to section 7(j) of the RMA and the National Policy Statement - Renewable Electricity Generation.

Submitter Number: 581 **Submitter:** Penny Gallagher

Organisation: Synlait Milk Ltd

Point Number 581.1

Summary of Decision Requested: **Retain** Section 1.5.1(c) Compact Urban development as notified.

Decision Reasons:

- This clause recognises the need for an integrated approach to growth to provide certainty to landowners and to inform long-term investment decisions.
- Synlait relies on Council to implement policies to integrate infrastructure with development, including wastewater, water and roading in a manner that anticipates and provide for heavy industry at the 45 McDonald Road, Pokeno site.
- Reliant on the Council to implement policies that will protect significant capital investment in the dairy industry from sensitive activities that may demand more restrictive environmental conditions.

Point Number 581.2

Summary of Decision Requested: **Retain** Section 1.5.5(c) Services and general infrastructure as notified.

Decision Reasons:

- The clause recognises that growth should be managed to avoid, remedy or mitigate conflicts or incompatibilities (including reverse sensitivity effects)
- Synlait relies on Council to implement policies to integrate infrastructure with development, including wastewater, water and roading in a manner that anticipates and provide for heavy industry at the 45 McDonald Road, Pokeno site.
- Reliant on the Council to implement policies that will protect significant capital investment in the dairy industry from sensitive activities that may demand more restrictive environmental conditions.

Point Number 581.3

Summary of Decision Requested: **Retain** Policy 4.1.6(b) Commercial and industrial activities.

Decision Reasons:

- Synlait's development at 45 McDonald Road is consistent with policy 4.1.6(b).
- Pokeno is identified as an "industrial strategic growth node".
- As an industrial strategic growth node, the provision of infrastructure and services is a strategic and regionally important matter.
- A range of industrial activity is provided for in this location and protected from sensitive activities which may undermine the efficient operation of the activity/site of strategic importance.

Point Number 581.4

Summary of Decision Requested: **Amend** Objective 4.6.1 Economic growth of industry to recognise that the economic growth of the district's industry is supported and strengthened by providing for heavy and general industrial activities.

Decision Reasons:

- Economic growth is strengthened where diversity in economic activity is provided for.
- The definition of industry covers a broad spectrum of activities from those industrial activities which operate at a service level through to heavier processing and manufacturing.
- The district plan objectives and policies require greater articulation to recognise the range in industrial activity and further explanation as to how these activities will be provided for.
- Heavier industrial activities need to have confidence that there are locations within the district where their associated traffic, bulk, scale and amenity effects will be provided for.

Point Number 581.5

Summary of Decision Requested: Amend Policy 4.6.2(ii) Provide Industrial Zones with different functions to provide greater distinction between the General Industrial and Heavy Industrial Zones in terms of the activities and environmental outcomes anticipated.

Decision Reasons:

- The policy difference in the Proposed District Plan between Industrial and Heavy Industrial zones is limited to being either close to or separated from more sensitive zones.
- The policy fails to acknowledge that it is important for heavy industry to have a place to go where it can operate efficiently with more lenient provisions.
- The policy fails to recognise the economic benefits of heavy industry that require protection from reverse sensitivity or having to reduce operation to address high environmental outcomes sought by sensitive activities.

Point Number 581.6

Summary of Decision Requested: Amend Policy 4.6.3 Maintain a sufficient supply of industrial land as follows:

Maintain a sufficient supply of appropriately located industrial land ~~within strategic nodes to meet foreseeable future demands, having regard to the requirement of different industries to avoid the need for industrial activities to located in non-industrial zones recognising the different locations required by heavy industry and general industry.~~

Decision Reasons:

- Part of a wider concern that the Proposed District Plan does not provide sufficient articulation of the different requirements between general and heavy industrial land uses.
- The location of Heavy Industrial Zoning should also be protected from encroachment by sensitive activities and proposals for residential and rural-residential rezoning.

Point Number 581.7

Summary of Decision Requested: Add a new objective **and policy** that recognises the adverse effects arising from General Industrial and Heavy Industrial Zones may require different management approaches with more lenient standards in the Heavy Industrial Zone being appropriate.

Decision Reasons:

- The current wording of Objective 4.6.6 is about managing effects on sensitive activities and ecosystem values outside industrial zones. It does not consider managing adverse effects between the two industrial zones.
- Managing effects approach should include the location of the zones.
- The role of the General Industrial Zone is to provide a buffer between Heavy industrial Zones and more sensitive zones.
- This policy approach would in turn enable different standards of management of environmental effects between the two zones, allowing the Heavy Industrial Zone to provide for heavier activities which have more noise, odour, heavy traffic etc.

Point Number 581.8

Summary of Decision Requested: Amend Policy 4.6.7 Management of adverse effects within industrial zones to address management of adverse effects through the location of zones (relative to more sensitive environments) and the use of the General Industrial Zone as a buffer.

Decision Reasons:

- Managing effects approach should include the location of the zones.
- The role of the General Industrial Zone is to provide a buffer between Heavy Industrial Zones and more sensitive zones.
- This policy approach would in turn enable different standards of management of environmental effects between the two zones, allowing the Heavy Industrial Zone to provide for heavier activities which have more noise, odour, heavy traffic etc.

Point Number 581.9

Summary of Decision Requested: Amend Policy 4.6.7 Management of adverse effects within industrial zones so that "significant" adverse effects from heavy industrial sites are managed and mitigated where practicable but otherwise that adverse effects (that are not significant) should be considered consistent with the environmental outcomes anticipated for heavy industrial activity.

Decision Reasons:

- The policy approach for management of adverse effects does not distinguish between general and heavy industrial zones.
- There needs to be an appropriate zone for Heavy industry which allows heavy industry to produce adverse effects with a more lenient threshold than general industry and general industry should buffer those zones from sensitive activities.
- There is no policy for protecting heavy industry within Heavy Industrial Zones from encroaching residential and sensitive activities.

Point Number 581.10

Summary of Decision Requested: Amend Policy 4.7.14 Structure and master planning to refer to approved structure or master plans that are either included within or incorporated by reference into the Proposed District Plan.

Decision Reasons:

- This scenario would mean that landowners and developers may be forced to comply with a Structure Plan which they have not had any ability to submit on in accordance with Schedule 1 processes of the RMA.

Point Number 581.11

Summary of Decision Requested: Add the Pokeno Structure Plan within the Proposed District Plan or incorporated by reference in the Proposed District Plan.

Decision Reasons:

- There is concern that a Structure Plan which is "approved" by the Council, but not included in the District Plan will take on the effect of a rule through application of Policy 4.7.14.

Point Number 581.12

Summary of Decision Requested: Add policies to Chapter 5 Rural Environment which specifically address the potential for increased housing density in the rural environment to encroach on lawfully established heavy industry activities in adjoining zones.

Decision Reasons:

- To achieve the objectives in Chapter 4.6 Heavy and Industrial Zones, it is essential that the efficient operation of heavy industrial activities located in appropriate zones is not threatened or undermined by the development and encroachment of dwellings or other sensitive activities within an adjoining rural zone.

Point Number 581.13

Summary of Decision Requested: Add a new clause (iv) to Policy 5.3.2 Productive rural activities as follows:

(iv) Encourage the adoption of sustainable farming practices to ensure long-term operation of farming as part of the rural economy.

Decision Reasons:

- Supports the adoption of best practice in farming.
- Synlait "Lead with Pride" programme recognises and rewards suppliers who achieve dairy farming practice. Synlait considers a similar policy should be incorporated into the Proposed District Plan to support long-term economic use and land use within a quality rural environment.

Point Number 581.14

Summary of Decision Requested: Retain the definition of 'Noise-sensitive activity' in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Point Number 581.15

Summary of Decision Requested: Retain the definition of "Notional boundary" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Point Number 581.16

Summary of Decision Requested: Retain the definition of "Sensitive land use" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Point Number 581.17

Summary of Decision Requested: Retain the definition of "Significant Natural Areas" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Point Number 581.18

Summary of Decision Requested: Retain the definition of "Use" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Point Number 581.19

Summary of Decision Requested: Retain the definition of "Vegetation clearance" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Point Number 581.20

Summary of Decision Requested: Amend the definition of "industrial activity" in Chapter 13 Definitions to be consistent with the definition proposed in the Draft National Planning Standard.

OR

Amend the definition of "industrial activity" in Chapter 13 Definitions to include ancillary activities such as research facilities, laboratories, yard-based activities, logistics and transport related activities.

Decision Reasons:

- The definition in the Proposed District Plan is too limiting and does not take account of ancillary activities associated with industrial activities.
- The definition in the Proposed District Plan is inconsistent with the Draft National Planning Standard.

Point Number 581.21

Summary of Decision Requested: Delete Rule 14.11.IPI Permitted activity to remove duplication of regional rules concerning management of stormwater.

OR

Amend Rule 14.11.IPI Permitted activities to remove duplication of regional rules concerning management of stormwater.

Decision Reasons:

- These provisions appear to duplicate the regional council rules.
- The duplication of regional plan rules in a district plan is neither efficient or effective. It adds costs and duplication of compliance to achieve the same environmental outcome.

Point Number 581.22

Summary of Decision Requested: **Amend** Rule 14.12.IP4(l)(e) Permitted Activities to increase the maximum number of vehicle movements per day and the maximum percentage of heavy vehicle movements.

OR

Delete Rule 14.12.IP4(l)(e) Permitted activities and replace with a new rule where developments over 10,000m² trigger a requirement for an integrated transport assessment.

Decision Reasons:

- The rule is restrictive and the place for heavy vehicle movements is in a Heavy Industrial Zone. Any limit within this rule should reflect the types of activities anticipated in the zone.
- Require larger scaled developments to undertake an integrated transport assessment will enable the specific traffic profile associated with larger scaled activities and the characteristics of the locality to be assessed.

Point Number 581.23

Summary of Decision Requested: **Amend** Rule 21.1.1 Permitted Activities to broaden the range of ancillary activities permitted under the Heavy Industrial Zone.

Decision Reasons:

- The current list of ancillary activities provided for fails to acknowledge the broad range of activities which may be co-located or ancillary to a heavy industry activity.
- The submission provides as an example the ancillary activities at a dairy processing plant.

Point Number 581.24

Summary of Decision Requested: **Amend** Rule 20.2.2C1(b) Landscape planting to require that where a lot contains a permanent or intermittent stream, a total width of 4m on both sides of the the stream will provide an 8m wide landscape strip in total.

Decision Reasons:

- The creation of 8m wide landscape strips either side of a permanent or intermittent stream within an industrial zoned property may result in the loss of land available for efficient uses.
- A setback is not required for the purposes of enhancing a publicly accessible environment, although it is acknowledged that planting will assist in improved water quality.

Point Number 581.25

Summary of Decision Requested: **Retain** Rule 21.2.3.1 Noise - General.

Decision Reasons:

- The proposed rule provides for an appropriate level of noise effects, consistent with activities in a Heavy Industrial Zone.

Point Number 581.26

Summary of Decision Requested: **Retain** Rule 21.2.3.3 Noise - Construction.

Decision Reasons:

- The proposed rule provides for an appropriate level of noise effects, consistent with activities in a Heavy Industrial Zone.

Point Number 581.27

Summary of Decision Requested: **Delete** Rule 21.2.5.IP1(a), (ii), (iii) and (iv) Earthworks - General.

AND

Add new provisions to Rule 21.2.5.IP1 that enable earthworks to be permitted at scale consistent with the scale of buildings anticipated in a Heavy Industrial Zone, for example:

- total depth of fill or cut: 5m
- not exceed an area greater than 10,000m² for each earthwork project
- maximum volume: 10,000m³ for each earthwork project
- no controls on imported fill material where it is to be used for a building platform for which building consent has been obtained.

Decision Reasons:

- Imported fill for a building platform with building consent, there are no or negligible environmental effects arising from the use of the material.
- There should not be a limit on the volume or area of such material. This is also a potential duplication of regulation, with a resource consent offering non environmental outcomes beyond those already achieved through building consent.
- The construction of large-footprint buildings can be anticipated within the Heavy Industrial Zone. Accordingly, an earthworks rule should establish an appropriate threshold for consideration of environmental effects for permitted activities.
- The district plan provisions should align with the earthworks controls under the Regional Plan and the Building Act.

Point Number 581.28

Summary of Decision Requested: **Delete** Rule 21.2.5.IP3(a)(i) and (ii) Earthworks - General

AND

Add new provisions to Rule 21.2.5.IP3 that enable earthworks to be permitted at scale consistent with the scale of buildings anticipated in a Heavy Industrial Zone, for example:

- total depth of fill or cut: 5m
- not exceed an area greater than 10,000m² for each earthwork project
- maximum volume: 10,000m³ for each earthwork project
- no controls on imported fill material where it is to be used for a building platform for which building consent has been obtained.

Decision Reasons:

- There should not be a limit on the volume or area of such material. This is also a potential duplication of regulation, with a resource consent offering non environmental outcomes beyond those already achieved through building consent.
- The construction of large-footprint buildings can be anticipated within the Heavy Industrial Zone. Accordingly, an earthworks rule should establish an appropriate threshold for consideration of environmental effects for permitted activities.
- The district plan provisions should align with the earthworks controls under the Regional Plan and the Building Act.

Point Number 581.29

Summary of Decision Requested: **Add** a new rule to Rule 21.2.7.1 Signs - General to permit signs for way-finding, health and safety and other regulatory requirements e.g. signage required for storage of hazardous substances.

Decision Reasons:

- Signage relating to way-finding, health and safety and other regulatory requirements is typically internal to the operation of a site.
- These types of signs are generally sized to provide messages to users within a site and therefore have no external impact on the amenity values of the Heavy Industrial Zones.

Point Number 581.30

Summary of Decision Requested: **Amend** Rule 21.3.1 P1(ii) Height - general as follows:
~~to 25m~~ over the balance of the net site area.

Decision Reasons:

- Large buildings can be anticipated within the Heavy Industrial zone and may require height above 20m to accommodate the activities and storage associated with warehousing and distribution activities.

Point Number 581.31

Summary of Decision Requested: **Delete** the requirement for a recession plane in the Heavy Industrial Zone in Rule 21.3.3 Daylight admission, except where a Heavy Industrial Zone site adjoins a Residential Zone site.

Decision Reasons:

- Heavy Industrial Zones are where activities with the potential to create more adverse environmental effects are located within a district. The land values, activities and large buildings require a high degree of land use efficiency. These factors do not support a high degree of amenity access and therefore the inclusion of recession plane control is unnecessary and results in inefficient land use within the Heavy Industrial Zone.

Point Number 581.32

Summary of Decision Requested: **Amend** Rule 22.3.7.2 Building setback - sensitive land use to include a requirement for sensitive land uses to be setback from a Heavy Industrial Zone boundary.

Decision Reasons:

- The Proposed District Plan fails to protect sensitive activities for Heavy Industrial zones and/or prevent reverse sensitivity effects from encroaching housing and sensitive activities. Encroachment of housing and sensitive activities may result in restrictions on the efficient operation of heavy industrial activities within the Heavy Industrial Zone.

Point Number 581.33

Summary of Decision Requested: **Amend** Rule 22.3.7.4 Building setback - Noise sensitive areas to include a requirement for noise sensitive activities to be setback from a Heavy Industrial Zone boundary.

Decision Reasons:

- The Proposed District Plan fails to protect noise sensitive activities for Heavy Industrial zones and/or prevent reverse sensitivity effects from encroaching housing and sensitive activities. Encroachment of housing and sensitive activities may result in restrictions on the efficient operation of heavy industrial activities within the Heavy Industrial Zone.

Point Number 581.34

Summary of Decision Requested: **Amend** Rule 22.4.1.2RD1(b)(iv) General subdivision as follows:
(iv) potential for subdivision and subsequent activities to adversely affect adjoining activities through reverse sensitivity effects;

Decision Reasons:

- Concise wording would assist in the administration of the District Plan.
- Seeks a more clearly articulated provisions that describes the scenario where reverse sensitivity may arise as an issue.

Point Number 581.35

Summary of Decision Requested: **Amend** Rule 22.4.1.5RD1(b)(iv) Rural Hamlet Subdivision as follows:
(iv) potential for subdivision and subsequent activities to adversely affect adjoining activities through reverse sensitivity effects;"

Decision Reasons:

- Concise wording would assist in the administration of the District Plan.
- Seeks a more clearly articulated provisions that describes the scenario where reverse sensitivity may arise as an issue.

Point Number 581.36

Summary of Decision Requested: **Delete** Rule 21.2.6 Hazardous substances.

Decision Reasons:

- The inclusion of rules for hazardous substances in the Proposed District Plan duplicated legislation and offers no additional environmental protections to those already achieved through other regulations, such as in the Heavy Industrial Zone provisions where hazardous substances are anticipated.

Point Number 581.37

Summary of Decision Requested: **Delete** Rule 14.1.1.P7 Permitted activities to remove duplication of regional rules concerning management of stormwater.

OR

Amend Rule 14.1.1.P7 Permitted activities to remove duplication of regional rules concerning management of stormwater.

Decision Reasons:

- These provisions appear to duplicate the regional council rules.
- The duplication of regional plan rules in a district plan is neither efficient or effective. It adds costs and duplication of compliance to achieve the same environmental outcome.

Point Number 581.38

Summary of Decision Requested: **Add** a new rule to Rule 21.2.7.2 Signs - Effects on traffic to permit signs for way-finding, healthy and safety and other regulatory requirements e.g. signage required for storage of hazardous substances.

Decision Reasons:

Point Number 581.39

Summary of Decision Requested: **Amend** Objective 6.3.1 Renewable energy as follows:

Energy efficient design and an increase in renewable electricity generation activities and the use of carbon-free energy sources are promoted.

Decision Reasons:

- Supports initiatives to investigate, trial and potentially adopt practices that will positively contribute to the achievement of a low carbon economy.

Point Number 581.40

Summary of Decision Requested: **Add** new policy to Section 6.3 Energy as follows:

6.3.6 Policy - Future carbon free energy sources

(g) Provide for the investigation, development, operation, maintenance and upgrading of carbon free energy sources associated with industrial activities.

Decision Reasons:

- It is appropriate that the District Plan contains a policy that supports the introduction of structures and activities which may be required to investigate, develop, operate, maintain and upgrade new and non-traditional forms of energy generation for industrial activities.
- Supports initiatives to investigate, trial and potentially adopt practices that will positively contribute to the achievement of a low carbon economy.

Point Number 581.41

Summary of Decision Requested: **Retain** Policy 6.4.3 Infrastructure Location and Services.

Decision Reasons:

- Supporting that the zoning or urban areas, including Heavy Industrial Zones, is coordinated with the supply of infrastructure and services. This should ensure that the Heavy Industrial Zone is able to be used for its intended purposes without undue limitation on traffic movements and access to water and wastewater services.

Point Number 581.42

Summary of Decision Requested: **Delete** Section 10.1 Hazardous Substances and its attendant Objective 10.1.1 and Policies 10.1.1.4;

OR

Amend Section 10.1 so that the objectives and policies in the Proposed District Plan only concern the management of the Hazardous Substances in highly sensitive environments such as Significant Natural Areas.

Decision Reasons:

- Inclusion of objectives and policies for hazardous substances in the Proposed District Plan duplicates legislation and offer not additional protections. This is particularly relevant in the Heavy Industry Zone where hazardous substances are anticipated.

Point Number 581.43

Summary of Decision Requested: **Retain** the definition of "Earthworks" in Chapter 13 Definitions as notified.

Decision Reasons:

- The definition provides appropriate interpretation in administration of the District Plan.

Submitter Number: 582 **Submitter:** Sarah Clark

Point Number 582.1

Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- As part owner of an aircraft currently being built, we require facilities to house aircraft.
- Te Kowhai is well located and it has a good community that uses the current facilities.
- It would be good to see this expand for private pilots/owners who would like to live nearer to the hangar and facilities.

Point Number 582.2
Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- As part owner of an aircraft currently being built, we require facilities to house aircraft.
- Te Kowhai is well located and it has a good community that uses the current facilities.
- It would be good to see this expand for private pilots/owners who would like to live nearer to the hangar and facilities.

Submitter Number: 583 **Submitter:** Katrina Langlands
On behalf of: Huntly Community Board

Point Number 583.1

Summary of Decision Requested: Amend the zoning of the 183ha sites on East Mine Road, Huntly (CFR 805391, CFR SA50A/762, CFR SA10D/800, CFR 1955501, CFR SA 61B/799, CFR SA 18B/1138, CFR SA30A/356, SA 40D/985, CFR SA251/176, SA 26C/345, SA 51/131) from Rural Zone to the appropriate zone(s) that will support the the Kimihia Lakes Restoration Re-development project.

Decision Reasons:

- The project will align with the Huntly Community Boards Plan and Project 5000.
- The project will have significant long term beneficial impacts on the community.
- The project will focus on outdoor activities such as cycling, walking, rowing, waka ama and most aquatic non-motorised activities will assist in re-branding Huntly as a high quality destination.
- The right people and momentum have gathered around this project and this adds to its credibility, sustainability and achievability.
- The project will provide a great place to live, work and play with employment opportunities and commuter convenience.
- The project will support a positive and optimistic future for families and young people.

Submitter Number: 584 **Submitter:** Murray & Jennifer Allen
Organisation: Allen Fabrics Limited

Point Number 584.1

Summary of Decision Requested: Add a new zone titled 'Kimihia Lakes Recreation and Events Zone' to the planning maps.
AND

Amend the zoning of the parcels of land with the legal descriptions Section 3 SO 482553, Lot 1 DPS 20619, Section 1 SO Plan 60522, Allotment 740 Parish of Taupiri, Allot 857 Parish of Taupiri and Allotment 6 Paris of Taupiri from Rural Zone to the proposed Kimihia Lakes Recreation and Events Zone (See Table 6.1 within the submission for details).

AND

Amend the Proposed District Plan to make consequential amendments as necessary to address the matters raised in the submission.

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.
- Excludes the existing Lake Kimihia which is owned and managed by the Department of Conservation.

Point Number 584.2

Summary of Decision Requested: Add a new section 9.5 Kimihia Lakes Recreation and Events Zone within Chapter 9 Specific Zones containing objectives and policies specifically catering for the Kimihia Lakes Recreation and Events Zone as set out in section 4.2.2 of the submission.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognized that overlays are in relation to significant tracks of land covering various zones (SNA etc).
- Waikato District Council no linger desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number 584.3

Summary of Decision Requested: Add a new definition for "Ancillary Buildings (Kimihia Lakes Recreation and Events Park)"to Chapter 13 Definitions as follows:

Means a supporting building that is subordinate and incidental to a permitted activity undertaken in the Park, including storage units, administration and ablution facilities and clubrooms.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.4

Summary of Decision Requested: **Add** a new definition for "Commercial Node Areas" to Chapter 13 Definitions as follows:
Means those specified areas identified on Zone Maps in the Kimihia Lakes Recreation and Events Zone as 'Commercial Node Areas'
AND
Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.5

Summary of Decision Requested: **Add** a definition for "Community Activities and Facilities (Kimihia Lakes Recreation and Event Park)" to Chapter 13 as follows:
Means in the Kimihia Lakes Recreation and Events Zone, land or building used for community activities, generally established on a not-for-profit basis, and includes buildings for educational purposes, community functions and public toilets or public rooms.
AND
Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.6

Summary of Decision Requested: **Add** a definition for "Operational Facilities" to Chapter 13 Definitions as follows:
Means the construction and use of facilities and/or infrastructure to assist in the day to day operation of the Kimihia Lakes Recreation and Events Parks, including but not limited to car parking, internal access, ticketing offices, storage and maintenance sheds, and helipads.
AND
Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.7

Summary of Decision Requested: **Add** a new definition for "Outdoor Education" to Chapter 13 Definitions as follows:
Means in the Kimihia Lakes Recreation and Events Zone, land or buildings used for the formal or informal education or training and includes (but is not limited to) confidence courses.
AND
Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.8

Summary of Decision Requested: **Add** a new definition for "Outdoor Pursuits" to Chapter 13 as follows:
Means moving across land by non-powered means for example biking, orienteering, tramping, and horse trekking.
AND
Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.9

Summary of Decision Requested: **Add** a definition for "Recreation Activity and Facilities" to Chapter 13 Definitions as follows:
Means any non-motorised indoor or outdoor passive or active leisure, sports, entertainment, games or recreational pursuits and buildings in the Kimihia Lakes Recreation and Events Park Zone for participants and/or spectators, whether or not they are undertaken for profit or reward or for which no charge is made, and shall include such activities on or in water or land, or in the air and includes but is not limited to:

- *Recreational events and activities*
- *Walking, running and cycling tracks*
- *Training or education*
- *Club Days and practice activities*
- *Organised Events and festivals*
- *Concerts*
- *Multi sport and off road running events*
- *Outdoor skate parks and playgrounds*
- *Informal Recreation*
- *Tourism related activities*
- *Outdoor Pursuits*

AND
Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.10

Summary of Decision Requested: No specific decision sought, but the submission notes that the of the Regional Infrastructural Specifications (RITS) and the Waikato Regional Council Regional Plan will be the relevant documents for some developments in the park

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- No reasons provided.

Point Number 584.11

Summary of Decision Requested: **Amend** the zoning of the parcels of land with the legal descriptions Allotment 746 Parish of Taupiri, Lot 20 DP 347582, Lot 21 DP 347582, Allotment 777 Parish of Taupiri and Lot 23A Section 463 Parish of Taupiri from Rural Zone to Residential Zone (See Table 6.1 of the submission for further details).

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- This area is located abutting existing Residential Zoned land and so forms a contiguous residential tract, ensuring services and infrastructure can easily be extended to the new residential area.
- Tunnel mining was undertaken west of the site and under the Huntly township including State Highway 1, Schools, the Power Station, the Waikato River and Riverine Lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining would not occur in this location. Residential use of the land is therefore not subject to that risk.

Point Number 584.12

Summary of Decision Requested: **Retain** the Residential Zone on the parcels of land with the legal descriptions Lot 18 DP 347582, Lot 19 DP 347582, Sec 3 SO Plan 400374, Allot 515 Parish of Taupiri and Allot 789 Parish of Taupiri (see Table 6.1 of the submission for further details).

Decision Reasons:

- Tunnel mining was undertaken west of the site and under the Huntly township including SH1, schools, the Power Station, the Waikato River and Riverine lakes but no tunnel mining was undertaken at the Huntly East Mine. Subsidence as a result of mining, would not occur in this location. Residential use of the land is therefore not subject to that risk.

Point Number 584.13

Summary of Decision Requested: **Add** a new Chapter 29 to Kimihia Lakes Recreation and Events Zone that contains rules for the Kimihia Lakes Recreation and Events Zone as outlined within section 4.2.4 of the submission.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- There is currently no zone/provisions within the Proposed District Plan that provide for a land use such as the Propose Kimihia Lakes Recreation and Events Park. Neither do the provisions contained within the existing zones be able to be relied on to establish the park.
- The District Plan provides for these 'out-of-box' developments through the creation of purpose-written zones (e.g. Hampton Downs Motorsport Park Zone). A comparison can be made between these sites and the Recreation and Events Park.
- Relying on resource consent creates uncertainty and may result on going costs and time delays and is deemed an uneconomic option.
- A specific overlay is not appropriate. It is recognised that overlays are in relation to significant tracts of land covering various zones (SNA etc).
- Waikato District Council no longer desire the use of site specific schedules within the district plan.
- The adoption of specific zoning is appropriate and will achieve the sought outcome.

Point Number 584.14

Summary of Decision Requested: **Amend** Rule 14.12.1 Activity specific conditions 14.12.1.1(1)(e) relating to P1 vehicle access for all activities as follows:

(1) All activities must comply with the following vehicle access conditions:

...

(e) On a site with legal access to two roads, the activity only accesses the road with the lower classification in the road hierarchy in Tables 14.12.5.5 and 14.2.5.6 (where the roads have the same classification, access is only to the road with the lower average daily traffic movements) except in the Kimihia Lakes Recreation and Events Zone where this rules does not apply;

...

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number 584.15

Summary of Decision Requested: **Add** a new clause (2) to Activity-specific conditions 14.12.1.2 relating to P2 on site parking and loading as follows:

(1) All activities must comply with the following..

(2) In the Kimihia Lakes Recreation and Events Zone the above standards do not apply, providing that:

(a) A minimum of 1500 on-site parking spaces shall be provided except where activities are undertaken within the carpark area or where activity demand exceeds 1500 car parks, then the temporary alternative on-site parking shall be provided.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

584.16

Summary of Decision Requested:

Add clause (j) to Activity-specific condition 14.12.1.4(1) relating to P4 traffic generation as follows:

(1) Any activity must comply with the following traffic generation conditions:

...

(j) Within the Kimihia Lakes Recreation and Events Zone, there shall be no maximum traffic generation provided that:

a) A certified Traffic Management Plan (which shall include, but is not limited to, the provisions of a wide area assessment) shall be in place and implemented for all activities. The Traffic Management Plan shall:

i) Provide for the supervision and control of patrons entering and exiting the Kimihia Lakes Recreation and Events Park, and the transportation of patrons to and from the Park;

ii) Limit the speed of traffic within the Kimihia Lakes Recreation and Events Park to 30km/h

iv) Provide for monitoring and reporting on the number of vehicle movements for all activities and events;

v) Include protocols for undertaking reviews of the Traffic Management Plan by an Implementation Monitoring Committee consisting of the New Zealand Police, the Council and the Kimihia Lakes Recreation and Events Park operator

vj) Be reviewed, certified and endorsed by Council, by (date) of each year.

b) For any activity or event, or combination of activities and events where there is likely to be in excess of 5,000 people, the operator of the park shall advise the Council a minimum of 10 working days before the activity and event occurs of the details of the activity and event and the relevant provisions of the Traffic Management Plan that are to be implemented.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Point Number

584.17

Summary of Decision Requested:

Add clause (b) to Activity-specific conditions 14.12.1.8 relating to P8 off-road pedestrian and cycle facilities as follows:

(b) In the Kimihia Lakes Recreation and Events Zone there shall be no activity specific conditions.

AND

Amend the Proposed District Plan for any further or other consequential relief required to give effect to the relief sought in this submission

Decision Reasons:

- New provisions are required to support the establishment of a zone to enable development of the Kimihia Lakes Recreation and Events Zone.

Submitter Number:

585

Submitter:

Lucy Roberts

Organisation:

Department of Conservation

Point Number

585.1

Summary of Decision Requested:

Delete policy 3.2.6(a)(iv) Providing for vegetation clearance.

Decision Reasons:

- The policy is too permissive for vegetation clearance in Significant Natural Areas.

Point Number

585.2

Summary of Decision Requested:

Delete Policy 3.2.6(b) Providing for vegetation clearance.

Decision Reasons:

- This policy is too permissive for vegetation clearance within a Significant Natural Area.

Point Number

585.3

Summary of Decision Requested:

Amend Objective 3.5.1 Natural Character as follows:

(a) The high and Outstanding Natural Character of the coastal environment...

Decision Reasons:

- Section 6(a) of the RMA and Policy 13 of the New Zealand Coastal Policy Statement requires consideration of all natural character in the coastal environment.

Point Number

585.4

Summary of Decision Requested:

Amend Policy 3.5.3(a)(iv) Protecting the natural character qualities of the coastal environment, as follows:

(a) Protect the qualities of outstanding and high natural character areas in the coastal environment from inappropriate subdivision, use and development by:

...

(iv) avoiding activities that damage the stability of functioning identified coastal dune systems;

Decision Reasons:

- Part of the functioning of coastal dune systems involves a level of instability and this should be reflected in the policy.
- All dune systems should be covered and not just those identified, to ensure protection for any which may have been overlooked during the mapping process.

Point Number 585.5

Summary of Decision Requested: **Amend** Policy 5.3.5 Earthworks activities to address the management of kauri dieback and measures to prevent the spread of the disease.

Decision Reasons:

- The disease is threatening kauri and any land disturbance works within three times the radius of the canopy of a kauri dripline can cause potential contamination of an uninfected site.
- Seek that the provisions of the final decision of the Thames Coromandel District Plan as appropriate are adopted into the Proposed District Plan.

Point Number 585.6

Summary of Decision Requested: **Delete** Policy 5.3.13(c) Waste management activities.

Decision Reasons:

- Waste management facilities should not be located within the identified outstanding landscape or natural character areas and significant natural areas.

Point Number 585.7

Summary of Decision Requested: **Amend** Policy 5.6.7 Earthworks to address the management of kauri dieback and measures to prevent the spread of the disease.

Decision Reasons:

- The disease is threatening kauri with functional extinction and requires collaborative work to manage the disease and control any further spread.
- Any land disturbance within three times the radius of the canopy of the dripline of a kauri tree can cause potential contamination of an uninfected site and spread of disease.
- The Director-General considers that provisions of the Thames Coromandel District Plan as appropriate be adopted into the Proposed Waikato District Plan.

Point Number 585.8

Summary of Decision Requested: **Amend** the forestry provisions in the Proposed District Plan to afford greater protection to indigenous vegetation and Significant Natural Areas within or adjacent to plantation forestry.

Decision Reasons:

- Under regulation 6(2)(b) of the National Environmental Standard for Plantation Forestry, a district plan may be more stringent than the regulations if the rule recognises and provides for Significant Natural Areas.
- The Director-General considers it necessary for the Plan to recognise and provide for the protection of Significant Natural Areas within or adjacent to plantation forest.

Point Number 585.9

Summary of Decision Requested: **Add** a new definition of "Biodiversity offset" to Chapter 13 Definitions, as follows:

Biodiversity offsets are measurable conservation outcomes resulting from actions designed to compensate for significant residual adverse biodiversity impacts arising from project development after appropriate prevention and mitigation measures have been taken. The goal of biodiversity offsets is to achieve no net loss and preferable a net gain of biodiversity on the ground.

Decision Reasons:

- The addition of a definition for biodiversity offsetting will reflect the Guidance for Biodiversity Offsetting in New Zealand.

Point Number 585.10

Summary of Decision Requested: **Add** a new definition of "Environmental Compensation" Definitions as follows:

Environmental compensation comprises actions offered as a means to address residual adverse effects on the environment arising from project development that are not intended to result in no net loss or a net gain of biodiversity on the ground.

Decision Reasons:

- The addition of a definition for environmental compensation will reflect Guidance on Biodiversity Offsetting in New Zealand.

Point Number 585.11

Summary of Decision Requested: **Add** additional matters of discretion to Rule 14.6.2 Restricted Discretionary activities to address any adverse effects to the environment associated with the construction, operation and decommissioning of small-scale and community-scale electricity generation projects, particularly wind farms.

Decision Reasons:

- Wind farms have the potential to have significant ecological impacts, particularly on avifauna and bats. Additional matters of discretion are requested to address these impacts for small-scale and community-scale electricity generation.

Point Number 585.12

Summary of Decision Requested: **Retain** Rule 14.6.3 Discretionary activities as notified.

Decision Reasons:

- Support the discretionary activity status for large scale wind farms located within the Rural Zone.

Point Number 585.13

Summary of Decision Requested: Retain Rule 14.6.4 Non complying activities as notified.

Decision Reasons:

- Supports the non-complying activity status of large-scale wind farms located outside the Rural Zone, including in identified areas.

Point Number 585.14

Summary of Decision Requested: Retain Appendix 6 Biodiversity offsetting, except for the amendments sought below

AND

Amend Appendix 6 Biodiversity offsetting as follows:

Introduction

....

The following sets out a framework for the use of biodiversity offsets. It should be read in conjunction with the New Zealand government Guidance on Good Practice Biodiversity Offsetting in New Zealand, New Zealand Government et al., August 2014 (or any successor document).

2 Biodiversity offsetting framework

....

2. A proposed biodiversity offset will contain an qualitative assessment of losses and gains commensurate with the scale of effects of the activity, and should demonstrate the manner in which no net loss can be achieved.

AND

Amend bullet 8 of Appendix 6 Biodiversity Offsetting to ensure that any offset not replacing biodiversity on a like for like basis should not 'trade up' from already threatened or at risk biodiversity.

Decision Reasons:

- Generally support appendix 6, however requests amendment to better reflect guidance on Biodiversity Offsetting.

Point Number 585.15

Summary of Decision Requested: Amend Rule 16.2.8 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of Manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.16

Summary of Decision Requested: Amend Rule 17.2.9 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of Manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.17

Summary of Decision Requested: Amend Rule 20.2.9 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of Manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.18

Summary of Decision Requested: **Amend** Rule 21.2.9 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.19

Summary of Decision Requested: **Amend** Rule 22.2.7 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.20

Summary of Decision Requested: **Amend** Rule 23.2.8 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume;

AND

Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.21

Summary of Decision Requested: **Amend** Rule 24.2.8 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.22

Summary of Decision Requested: **Amend** Rule 25.2.8 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m3 may be clearance of an area of a few 5m2, where a few large trees have been harvested.

- An area limit is more suitable to ensure consistency of removal.

Point Number 585.23

Summary of Decision Requested: **Amend** Rule 28.2.8 Indigenous vegetation clearance inside a Significant Natural Area as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Change P2 to a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- P2 describes a maximum volume of manuka and kanuka that may be removed per 12 months outside of the coastal environment. A volume of timber is dependent on the size of trees and their density where 5m³ may be clearance of an area of a few 5m², where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.24

Summary of Decision Requested: **Add** rules for Indigenous vegetation clearance inside a Significant Natural Area in all Zones as follows:

- Include a maximum vegetation clearance permitted activity rule for all purposes; and
- Include a minimum setback distance from water bodies for all purposes; and
- Include a maximum area of clearance rather than a maximum volume; and
- Any other relevant amendments.

Decision Reasons:

- The current rules for vegetation clearance within Significant Natural Areas fails to adequately protect or manage biodiversity values present in these areas.
- It is important to appropriately manage indigenous vegetation clearance to prevent further fragmentation and loss in the Waikato District.
- A volume of timber is dependent on the size of trees and their density where 5m³ may be clearance of an area of a few 5m², where a few large trees have been harvested.
- An area limit is more suitable to ensure consistency of removal.

Point Number 585.25

Summary of Decision Requested: **Retain** Rule 16.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.26

Summary of Decision Requested: **Retain** Rule 17.2.9 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.27

Summary of Decision Requested: **Retain** Rule 20.2.9 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.28

Summary of Decision Requested: **Retain** Rule 21.2.9 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.29

Summary of Decision Requested: **Retain** Rule 22.2.7 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.30

Summary of Decision Requested: **Retain** Rule 23.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.31

Summary of Decision Requested: **Retain** Rule 24.2.8 D1 Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.32

Summary of Decision Requested: **Add** introductions and/or zone descriptions at the beginning of each chapter.

Decision Reasons:

- The lack of introductions and zone descriptions result do not provide plan users with sufficient information. In particular, Chapter 3 requires a good overview of the indigenous biodiversity within the district, the loss of indigenous vegetation and ecosystems over time, it significance now and therefore the issues relating to biodiversity in the area.
- More guidance on the Plan's structure is needed for plan users.

Point Number 585.33

Summary of Decision Requested: **Add** new objectives, policies and rules to address the management of kauri dieback, particularly around earthworks and measures to prevent spread of the disease.

Decision Reasons:

- The disease is threatening Kauri with functional extinction and requires collaboration work to manage the disease and control any further spread.
- Any land disturbance works within three times the radius of the canopy of the dripline of New Zealand Kauri Tree can cause potential contamination of an uninfected site.
- The provisions of Thames Coromandel District Plan, as they relate to Kauri Dieback, should be adopted into the Proposed District Plan where appropriate.

Point Number 585.34

Summary of Decision Requested: **Retain** the mapping of the Coastal Environment line, except for the amendments sought below
AND

Amend the coastal environment line at Port Waikato to take into account the position of the boundary for the coastal marine area as shown in the Waikato Regional Coastal Plan and make any consequential amendments.

Decision Reasons:

- Supports the mapping of the Coastal Environment line in the district, however requests a reassessment of any discrepancies.

Point Number 585.35

Summary of Decision Requested: **Retain** the mapping of Significant Natural Areas, except for the amendments sought below
AND

Amend the Plan to manage areas that are not mapped, but meet the criteria for Significant Natural Areas stated in the Waikato Regional Policy Statement.

Decision Reasons:

- Support the mapping of Significant Natural Areas but also request provisions to ensure unmapped areas that the Significant Natural Area criteria are managed appropriately.

Point Number 585.36

Summary of Decision Requested: **Add** a schedule identifying the Outstanding Natural Features and Outstanding Natural Landscapes.

Decision Reasons:

- Requests the reintroduction of schedules for Outstanding Natural Features and Landscapes to better recognise the individual attributes that make specific areas outstanding.

Point Number 585.37

Summary of Decision Requested: **Add** new objectives, policies and rules to recognise and implement measures to address and manage the revised conservation status of *Kunzea* and *Leptospermum taxa*.

Decision Reasons:

- With the advent of myrtle rust, all *Kunzea* and *Leptospermum taxa* are considered threatened.
- The taxonomy and current threatened status of Manuka and kanuka must be reflected and managed appropriately through objectives, policies and rules in the Proposed District Plan.

Point Number 585.38

Summary of Decision Requested: **Add** new maps, objectives, policies and rules recognising and providing for bat zones and tree protection (see submission for an example of a rule from the Draft Timaru District Plan).

Decision Reasons:

- Both exotic and native trees provide habitat for native and threatened bats. The removal of such trees on fragmented landscapes will impact on the native species habitat and survival.

Point Number 585.39
Summary of Decision Requested: Retain Objective 3.1.1 Biodiversity and ecosystems as notified.
Decision Reasons:

- The objective is consistent with section 6(c) of the RMA.
-

Point Number 585.40
Summary of Decision Requested: Amend Policy 3.1.2(a)(i) Policies as follows:
(a) Enable activities that maintain or enhance indigenous biodiversity including:
(i) planting and reintroducing eco-sourced using indigenous species suitable to the habitat;

Decision Reasons:

- Request recognition of potential initiatives to reintroduce fauna as components of habitats.
- Eco-sourcing refers to plants grown from seeds or propagules collected from the naturally occurring vegetation close to the restoration site. Application of this principle will support species adapting to local conditions.
- To avoid plant species not native to Waikato District becoming invasive and impacting on the local native vegetation, eco-sourced indigenous plants should be used.

Point Number 585.41
Summary of Decision Requested: Amend Policy 3.1.2 (a)(iii) Policies as follows:
Enable activities that maintain or enhance indigenous biodiversity including:
...
(iii) biosecurity works including management of plant diseases.

Decision Reasons:

- Plant diseases such as kauri dieback and myrtle rust present immediate threats to indigenous species. Recognising plant diseases will provide better acknowledgement of the potential risks from these diseases.

Point Number 585.42
Summary of Decision Requested: Retain Policy 3.2.2 (b) Policies except for the amendments sought below
AND
Amend Policy 3.1.2(b) as follows:
(b) Consider the following when avoiding, remedying or mitigating adverse effects on indigenous biodiversity including by considering:
....

Decision Reasons:

- Support the intent of this provision to avoid, remedy or mitigate adverse effects on indigenous biodiversity, however the current wording of the policy does not allow for consideration of aspects of indigenous biodiversity outside of those listed. Amendment of this policy will give effect to the Waikato Regional Policy Statement.

Point Number 585.43
Summary of Decision Requested: Amend Policy 3.1.2(c) Policies to appropriately recognise and implement measures to address and manage *Kunzea* and *Leptospermum* in light of their re-assessed conservation status.

Decision Reasons:

- A 2017 assessment identified that all species of *Kunzea* and *Leptospermum* are threatened due to the threat of Myrtle Rust.

Point Number 585.44
Summary of Decision Requested: Retain Objective 3.2.1 Significant Natural Areas as notified.

Decision Reasons:

- Director-General supports this objective.

Point Number 585.45
Summary of Decision Requested: Retain Policy 3.2.2 Identify and Recognise as notified.

Decision Reasons:

- The Director-General supports this policy.

Point Number 585.46
Summary of Decision Requested: Retain Policy 3.2.3 Management hierarchy, except for the amendments sought below
AND
Amend Policy 3.2.3 Management hierarchy as follows:
(a) Recognise and protect indigenous biodiversity within Significant Natural Areas by:
(i) avoiding the significant adverse effects of vegetation clearance and the disturbance of habitats unless specific activities need to be enabled as a preference;
...

Decision Reasons:

- Generally supports Policy 3.2.3, however seek amendments to ensure the policy gives effect to the Waikato Regional Policy Statement and is consistent with the Guidance for Biodiversity Offsetting.
- Avoidance of adverse effects should apply to all activities before other measures are considered.

Point Number 585.47

Summary of Decision Requested: **Retain** Policy 3.2.4 (b) Biodiversity Offsetting, except for the amendments sought below
AND

Amend Policy 3.2.4(b) Biodiversity as follows:

(b) Within a Significant Natural Area, a biodiversity offset will only be considered appropriate where adverse effects have been preferentially, avoided, then remedied or mitigated in accordance with the hierarchy established in Policy 3.2.3; and...

Decision Reasons:

- Supports the inclusion of a policy to address biodiversity offsets, however seeks amendment to reflect the management hierarchy in policy 3.2.3.

Point Number 585.48

Summary of Decision Requested: **Add** a new clause (c) to Policy 3.2.4 Biodiversity offsetting that provides for consideration of environmental compensation in cases where biodiversity offsetting cannot be reasonably achieved as to address environmental effects that cannot be avoided, remedied or mitigated.

Decision Reasons:

- Environmental compensation should be provided for in cases where it is demonstrated that biodiversity offsetting cannot achieve its no net loss goal.
- This gives effect to s104(ab) of the RMA.

Point Number 585.49

Summary of Decision Requested: **Amend** Policy 3.2.5 Biodiversity in the coastal environment by moving it to section 3.1
AND

Amend Policy 3.2.5 Biodiversity in the coastal environment as follows:

(a) Avoid the adverse effects of subdivision use and development ~~within Significant Natural Areas~~ of the coastal environment on:

Decision Reasons:

- Amendments to ensure the policy covers all of the coastal environment in the district, not just within Significant Natural Areas.
- Policy 11 of the New Zealand Coastal Policy Statement requires the protection of indigenous biological diversity in all areas of the coastal environment.

Point Number 585.50

Summary of Decision Requested: **Retain** Rule 25.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Point Number 585.51

Summary of Decision Requested: **Retain** Rule 28.2.8 DI Indigenous vegetation clearance inside a Significant Natural Area, in particular, retain the cascade to discretionary activity upon non-compliance with the permitted activity standards.

Decision Reasons:

- The Director-General supports vegetation clearance outside permitted activity standards becoming a discretionary activity.

Submitter Number:

586

Submitter:

Simon Lockie

Organisation:

West Auckland Airport, Parakai

Point Number

586.1

Summary of Decision Requested: **Retain** Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- The airport is a valuable asset to the NZ aviation community.
- Additional protections of the OLS as sought by Te Kowhai Airport will ensure the airports needs are able to be met well into the future.

Point Number

586.2

Summary of Decision Requested: **Retain** Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- The airport is a valuable asset to the NZ aviation community.
- Additional protections of the OLS as sought by Te Kowhai Airport will ensure the airports needs are able to be met well into the future.

Submitter Number:	587	Submitter:	Bruce Cameron
Point Number	587.1		
Summary of Decision Requested:	Amend the definition of "Intensive farming" in Chapter 13 Definitions to increase the stock permitted from 30 to 500.		
Decision Reasons:	<ul style="list-style-type: none"> The definition of "Intensive farming" is too restrictive, particularly when it limits as a permitted activity less than 30 stock unless rearing for own replacements. 		
Point Number	587.2		
Summary of Decision Requested:	No specific decision sought, but the submission states (with reference to policy 5.3.7 Reverse sensitivity effects) that intensive farming must operate within their own boundaries and any setbacks must not extend into neighbouring properties and must not affect neighbouring properties in any activities they wish to carry out within their boundaries.		
Decision Reasons:	<ul style="list-style-type: none"> Intensive farming must not affect neighbouring properties in any activities they wish to carry out within their boundaries. 		
Point Number	587.3		
Summary of Decision Requested:	Amend the Significant Natural Areas to be confirmed through direct consultation with the landowner.		
Decision Reasons:	<ul style="list-style-type: none"> The Significant Natural Areas must only come about with direct consultation with the landowner. The landowners are the ones that need to drive it with support from Council. 		
Point Number	587.4		
Summary of Decision Requested:	Amend Policy 3.2.7(a)(i) Managing Significant Natural Areas, to enable conservation subdivision with transferable titles to support stock exclusion from Significant Natural Areas.		
Decision Reasons:	<ul style="list-style-type: none"> Provides the landowner an opportunity to sell the title and afford to undertake fencing to exclude stock from the Significant Natural Area. Gives the landowner an incentive to conserve the Significant Natural Area and does not require Council to financially contribute. 		
Point Number	587.5		
Summary of Decision Requested:	Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, as follows: <i>Removal of up to 5m3 of manuka and/or kanuka outside of the Coastal Environment per single consecutive 12 month period per property Significant Natural Area..</i>		
Decision Reasons:	<ul style="list-style-type: none"> A landowner could have a 2000ha property and not be permitted to remove more than 5m2 of vegetation even though there is only one Significant Natural Area. 		
Point Number	587.6		
Summary of Decision Requested:	Amend Rule 22.2.7 P2 Indigenous vegetation clearance inside a Significant Natural Area, to allow removal of bastard Totara trees.		
Decision Reasons:	<ul style="list-style-type: none"> Bastard totara trees are thinly dispersed totara trees that have grown a wide spread of low branches and needs to be added to the list. 		
Point Number	587.7		
Summary of Decision Requested:	Amend Policy 3.2.7 Managing Significant Natural Areas, to not require fencing of a Significant Natural Area if no transferable title is granted or other sources of financing are available.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	587.8		
Summary of Decision Requested:	No specific decision sought, but submission fully supports the submission from Federated Farmers.		
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided. 		
Point Number	587.9		
Summary of Decision Requested:	Amend the Proposed District Plan to include provisions enabling one transferable title per Significant Natural Area or one transferable title per 3ha area or part thereof.		
Decision Reasons:	<ul style="list-style-type: none"> Provides the landowner an opportunity to sell the title and afford to undertake fencing to exclude stock from the Significant Natural Area. Gives the landowner an incentive to conserve the Significant Natural Areas and does not require Council to financially contribute. Just recognising Significant Natural Areas on council maps is going to achieve nothing. 		

Point Number 587.10

Summary of Decision Requested: **Amend** the Proposed District Plan to ensure there are no setbacks imposed on farm operations adjacent to a Significant Natural Area.

Decision Reasons:

- There should be no setbacks imposed on any farm operation adjacent to an Significant Natural Area.

Point Number 587.11

Summary of Decision Requested: **Amend** the Proposed District Plan to recognise that landowners need the ability to clear bush and prepare building sites within a Significant Natural Areas.

Decision Reasons:

Landowners need the ability to clear bush and soil for building sites within an Significant Natural Area.

Submitter Number: 588 **Submitter:** Peter Buchan

Organisation: Woolworths NZ Ltd

Point Number 588.1

Summary of Decision Requested: **Delete** Policy 4.5.29 New Buildings - Business Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.2

Summary of Decision Requested: **Amend** Policy 4.5.31 Reverse sensitivity as follows:

(a) Reverse sensitivity is ~~managed by ensuring residential activities and development~~ within Business and Business Town Centre Zones ~~is managed by ensuring residential activities and development~~ are acoustically insulated to mitigate adverse effects of noise.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- No reasons provided.

Point Number 588.3

Summary of Decision Requested: **Delete** Policy 4.5.33 Reverse sensitivity.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- No reason provided.

Point Number 588.4

Summary of Decision Requested: **Retain** Policy 4.5.32 Adjoining site amenity as notified.

Decision Reasons:

- No reason provided.

Point Number 588.5

Summary of Decision Requested: **Delete** Policy 4.5.42 Adjoining site amenity.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- No reason provided.

Point Number 588.6

Summary of Decision Requested: **Amend** Policy 4.5.36 Signage as follows:

(a) In the Business Town Centre and Business Zone provide for:

- The establishment of signs where they are associated with the activity carried out on the site on which they are located;*
- Public information signs that are of benefit to community well-being; and*
- Establishment of signage to support the commercial function and vibrancy of the zones with controls on the site, location, appearance and number of signs to ensure they do not detract from the visual amenity of the surrounding environment, including avoiding, remedying or mitigating adverse effects arising from*

illumination, light spill, flashing or reflection;

iv. Control of the location, colour, content and appearance of signs directed at traffic are controlled to ensure signs do not distract, confuse or obstruct motorists, pedestrians and other road users;

v. the placement of signs that do not obstruct the free movement of;

A. Pedestrians along the footpath;

B. Vehicle use of the road carriageway,

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Assessment of signage in commercial zones needs to consider the importance of corporate branding for consistency and cohesion and ensure that consideration sites along the urban design aspirations for the centres in the district.
- Businesses need to be instantly recognisable for customers and not "watered down" to achieve a character

Point Number 588.7

Summary of Decision Requested: Delete Policy 4.5.37 Managing the adverse effects of signs.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- This policy is a copy and achieves the outcomes sought within other policies.

Point Number 588.8

Summary of Decision Requested: **Amend** Rule 14.12.1P2 On-site parking and loading activity-specific conditions 14.12.1.2(1)(a)(i) as follows:

(i) On-site parking spaces and loading bays are not required on sites with sole frontages to the following (but for the avoidance of doubt, can still be provided without result in a non-compliance with this rule);

(i) Main Street, Huntly...

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Require clarification to ensure that parking, loading and on-site manoeuvring and queuing space for sites on the listed streets are not precluded but rather that their provision is optional in favour of urban design controls for those centres.
- As it reads, it might suggest that provision for these matters on the identified streets would result in a non-compliance and a require a traffic assessment.

Point Number 588.9

Summary of Decision Requested: **Amend** Rule 14.12.1 P3 On-site manoeuvring and queuing activity-specific conditions 14.12.1.3(1)(f) as follows:

(f) On-site manoeuvring and queuing spaces are not required on sites with vehicle accesses / entrances to the following (but for the avoidance of doubt, can still be provided without resulting in a non-compliance with this rule);

(i)...

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Require clarification to ensure that parking, loading and on-site manoeuvring and queuing space for sites on the listed streets are not precluded but rather that their provision is optional in favour of urban design controls for those centres.
- As it reads, it might suggest that provision for these matters on the identified streets would result in a non-compliance and a require a traffic assessment.

Point Number 588.10

Summary of Decision Requested: **Amend** Rule 14.12.1P4 Traffic generation activity-specific conditions 14.12.1.4(1) as follows:

(1) Any activity must comply with the following traffic generation conditions:

...

(c) Within the Business Zone Tamahere, Business Zone or Business Town Centre Zone there is a maximum of 300 vehicle movements per day and no more than 15% of these vehicle movements are heavy vehicle movements, except for supermarkets which are governed by (c)(i) below;

(c)(i) Supermarkets within the Business Zone or Business Town Centre Zone must not exceed traffic generation of 100 vehicles per hour (any hour) or must not exceed 1667m² gross floor area.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Traffic generation rates are too low.
- Seeks the adoption of the standard employed within the Auckland Unitary Plan that requires a restricted discretionary activity for activities that exceed 100 vehicles per hour or for retail activities that exceed 1667m² gross floor area.
- Suggested that the permitted threshold is too low and requires reconsideration.

Point Number 588.11

Summary of Decision Requested: **Amend** Table 14.12.5.7 - Required parking spaces and loading bays as follows:

Activity	Minimum Required Parking Spaces	Minimum Required Loading Bays
...

Supermarket

1 car space per 25m² GFA

~~2-HGV~~

Under 2500m² GFA – 1 HGV

Over 2500m² GFA – 2HGV

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Support the minimum parking rate for supermarkets, but does not support any parking rate maxima.
- Seek that the loading rate should be relative to gross floor area, rather than a blanket 2 HGV loading space requirement for all supermarkets.

Point Number

588.12

Summary of Decision Requested:

Amend Table 14.12.5.10 Required Bicycle Spaces as follows:

Activity

Number of bicycle spaces

All activities

Bicycle parking spaces are provided at a ratio of 1 bicycle space for ever ~~10~~15 car park spaces required

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Bicycle parking rates are too onerous and suggest that 1 bike park per 15 car parking spaces is sufficient to accommodate demand.

Point Number

588.13

Summary of Decision Requested:

Amend Rule 17.1.2 P2 Commercial activities Activity Specific Condition as follows:

~~##~~ Subject to Control 17.3[x] regarding Gross floor area

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Seek amendment to achieve the differentiated roles for Business Zone as per the objectives and policies

Point Number

588.14

Summary of Decision Requested:

Add a new rule within Section 17.1 Land Use - Activities as follows:

17.3[x] Gross floor area

PI

Any individual tenancy must have a gross floor area of greater than 500m²

BDI

(a) Any individual tenancy with a gross floor area less than 500m²

(b) The Council's discretion shall be limited to the following matters:

i. Design and location of the building

ii. Effects on vitality and amenity of nearby Business Town Centre zones and centres.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Insert a gross floor area limitation on small-scale retail activities to achieve the differentiated roles for Business and Business Town Centre zones as per the objectives and policies.

Point Number

588.15

Summary of Decision Requested:

Amend Rule 17.2.3D1 On-site parking areas - Landscaping from a discretionary activity to a restricted discretionary activity as follows:

BDI

(a) On-site parking areas that do not comply with Rule 17.2.3 PI.

(b) The Council's discretion shall be limited to the following matters:

i. Design and location of the parking area

ii. Effects on streetscape amenity.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Adopt restricted discretionary activity status where activities infringe the various standards.
- Incorporate appropriate assessment criteria alongside the retention of a restricted discretionary activity status.

Point Number

588.16

Summary of Decision Requested:

Amend Rule 17.2.7.1 Signs - General to read:

P2

(a) A sign must comply with all of the following conditions:

...

(v) where the sign is a freestanding sign, it must:

A. Not exceed an area of ~~20~~2m² for one sign ~~face~~ and 4m² for any other free-standing sign on the site;

B. Must not exceed one sign per site; and

C. Be set back at least 5m from the boundary of the Residential Zone.

...

RD1

...

(xi) extent to which the signage is consistent with corporate branding and represents a cohesive visual appearance with the commercial activity on-site.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Permitted limits for signage are too prescriptive and unrealistic.
- Seek an increase in respect of the area per sign face for free-standing signs and suggests a restricted discretionary activity status is appropriate.
- Assessment of signage in commercial zones needs to consider the importance of corporate branding for consistency and cohesion and consideration sits alongside the urban design aspirations within the district.
- Effects arising from signage can be appropriately assessed via a restricted discretionary activity assessment.

Point Number

588.17

Summary of Decision Requested:

Amend Rule 17.3.4.1 Building setbacks - Zone boundaries as follows:

PI

(a) A building must be set back at least:

i. ~~7.5~~3m from rear and side boundaries adjoining any:

A. Residential Zone

B...

BD1

(g) Any building that does not comply with Rule 17.3.4.1 PI.

(b) The Council's discretion shall be limited to the following matters:

i. Height, design and location of the building relative to the boundary.

ii. Privacy on other site

iii. Effects on amenity values of adjacent property.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- A 3m side and rear yard is a more appropriate separation distance than the 7.5m as notified, when considering how best to manage the interface with sensitive activities yet retain an efficient use of a business zoned site.
- 7.5m yard setback from residential zones is excessive.
- The Auckland Unitary Plan suggests a side and rear yard to residential zones of 3m.
- Considering a height to boundary control also applies a 3m setback is considered suitable and allows for the efficient use of the commercial sites.

Point Number

588.18

Summary of Decision Requested:

Amend Rule 18.1.2 Permitted Activities to read:

P4 Retail activity

~~##~~ Subject to Control 18.3.3 regarding Gross floor area

P4A Supermarket

Nil (for the avoidance of doubt, this activity is not subject to Control 18.3.3 regarding Gross floor area).

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Ensure an appropriate permitted activity status for supermarkets as set out in the assessment contained in the submission.
- In comparison, the Proposed District Plan as notified ascribes a non-complying activity status for supermarkets in the Business Town Centre zone, while the Operative District Plan allows for any activity in the zone as permitted, provided similar urban design controls are met.

Point Number

588.19

Summary of Decision Requested:

Amend Rule 18.1.3 RD2 Restricted Discretionary Activity as follows:

(a) ~~The construction of any new building that meets all of the following conditions:~~

...

(a) The Council's discretion shall be limited to the following matters:

(i)...

(iii) For the purpose of assessing supermarkets against the above criteria, regard shall be had to the following operational and functional requirements:

a) store visibility that is easily identifiable when viewed from the street and surrounding area

b) the provision of appropriate customer parking, which is clearly visible, accessible to motorists approaching the store from the local road network and to customers on site, and functionally well connected to the store entrance

c) where large building formats are required, there is provision for solid facades to facilitate internal shelving and fresh produce display.
d) adequate and accessible servicing areas that are preferably separated from customer vehicle traffic and pedestrian movements.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- A restricted discretionary activity status remains appropriate, rather than defaulting to a more onerous discretionary status remains appropriate.
- Restricted discretionary activity status can be accompanied by suitably limited criteria that still ensure an appropriate assessment of effects is undertaken, whilst providing certainty to applicants where activities are anticipated.

Point Number 588.20

Summary of Decision Requested: **Amend** Rule 18.2.7.1 Signs - General as follows:

P2

(a) A sign must comply with all of the following conditions:

...

(v) Where the sign is a freestanding sign, it must:

A. Not exceed an area of ~~320~~2 for one sign face and 1m² for any other freestanding sign on the site;

B. Must not exceed one sign per site; and

C. Be set back at least 5m from the boundary of the Residential Zone.

....

RD1

(a) A sign that does not comply with Rules 18.2.7.1 P2 or P3.

(b) The Council's discretion shall be limited to the following matters:

...

(xi) Extent to which the signage is consistent with corporate branding and represents a cohesive visual appearance with the commercial activity on-site.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Permitted limits for signage are too prescriptive and unrealistic.
- Seek an increase in respect of the area per sign face for free-standing signs and suggests a restricted discretionary activity status is appropriate.
- Assessment of signage in commercial zones needs to consider the importance of corporate branding for consistency and cohesion and consideration sits alongside the urban design aspirations within the district.
- Effects arising from signage can be appropriately assessed via a restricted discretionary activity assessment.

Point Number 588.21

Summary of Decision Requested: **Amend** Rule 18.3.3 Gross leasable floor area as follows:

18.3.3 Gross ~~leasable~~ floor area

P1

Any individual tenancy must have a gross ~~leasable~~ floor area of no more than ~~500~~50m²

~~RD1~~

Any individual tenancy with a gross ~~leasable~~ floor area over ~~500~~50m² and no greater than 500m²

~~NC1~~

~~Any individual tenancy with a gross leasable floor area over 500m²~~

The Council's discretion shall be limited to the following matters:

(i) The matters listed in 18.1.3 RD2(b).

(ii) Extent to which operational and functional requirements dictate the necessity for a floor area over 500m².

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Considers that the urban form component is already addressed by the restricted discretionary activity consent status for new buildings and the urban design controls.
- There is no need to go beyond restricted discretionary status for activities that exceed 500m² as an appropriately comprehensive assessment can still be made so long as the specific matters listed cover the recognised and relatable effects.

Point Number 588.22

Summary of Decision Requested: **Retain** Rule 18.3.4 P1 Display windows and building facades as notified

AND

Amend Rule 18.3.4 D1 Display windows and building facades to be a restricted discretionary rather than a discretionary activity, as follows:

~~RD1~~

(a) A building that does not comply with Rule 18.3.4 P1

(b) The Council's discretion shall be limited to the following matters:

i. Design and location of the building having regard to the operational and functional requirements of the activity to be accommodated

ii. Extent to which the activity achieves the intent of the control by other means, to enable passive surveillance and promote pedestrian safety.

Effects on amenity values and town centre character.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Propose a set of appropriate restricted matters of discretion to address potential effects of this infringement.

Point Number 588.23

Summary of Decision Requested:

Retain Rule 18.3.5 P1 Verandahs as notified

AND

Amend Rule 18.3.5 D1 Verandahs, to be a restricted discretionary activity rather than a discretionary activity as follows:

RD1

(a) A building that does not comply with Rule 18.3.5 P1.

(b) The Council's discretion shall be limited to the following matters:

i. Design and location of the building having regard to the operational and functional requirements of the activity to be accommodated

ii. Extent to which the activity achieves the intent of the control by other means, to encourage continuous pedestrian shelter and maintain pedestrian amenity

iii. Effects on amenity values and town centre character.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Propose a set of appropriate restricted matters of discretion to address potential effects of this infringement.

Point Number 588.24

Summary of Decision Requested:

Amend Rule 18.3.6 Building setbacks - zone boundaries, as follows:

PI

(a) A building must be set back a minimum of:

i. ~~7.5~~3m from rear and side boundaries adjoining any:

A. Residential Zone

...

RD1

(g) A building that does not comply with Rule 18.3.6 P1

(b) The Council's discretion shall be limited to the following matters:

i. Height design and location of the building relative to the boundary

ii. Privacy on other site

iii. Effects on amenity values of adjacent property.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Propose a set of appropriate restricted matters of discretion to address potential effects of this infringement,
- 7.5m yard setback from residential zones is excessive.
- The Auckland Unitary Plan suggests a side and rear yard to residential zones of 3m.
- Considering a height to boundary control also applies a 3m setback is considered suitable and allows for the efficient use of the commercial sites.

Point Number 588.25

Summary of Decision Requested:

Add a rule within Section 20.1 Land Use - Activities as follows:

20.1(x) Restricted Discretionary Activities

RD1

(g) Supermarkets

(b) The Council's discretion shall be limited to the following matters:

i. Reverse sensitivity effects on industrial areas

ii. Effects on vitality and amenity of nearby Business Town Centre zones.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Non-industrial activity that does not undermine the integrity of the Industrial Zone, in terms of avoiding reverse sensitivity, and compatible, should be able to be assessed via a resource consent process.
- Seeks that supermarkets be provided for as a restricted discretionary activity within the Industrial Zone and the assessment criteria appropriately address any potential effects on the amenity and vitality of town centres and reverse sensitivity effects on industrial activities.

Point Number 588.26

Summary of Decision Requested:

Amend Rule 20.2.7.1 Signs - General as follows:

P2

...

(c) where the sign is a freestanding sign, it must:

A. Not exceed an area of 203m² for one sign face and 1m² for any other freestanding sign on the site;

B. Must not exceed one sign per site; and

C. Be set back at least 5m from the boundary of any site a Residential, Village or Country Living Zone.

...

RD I

...

(b) Council's discretion shall be restricted to the following matters:

...

(ix) extent to which the signage is consistent with corporate branding and represents a cohesive visual appearance with the commercial activity on-site.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Permitted limits for signage are too prescriptive and unrealistic.
- Seek an increase in respect of the area per sign face for free-standing signs and suggests a restricted discretionary activity status is appropriate.
- Assessment of signage in commercial zones needs to consider the importance of corporate branding for consistency and cohesion and consideration sits alongside the urban design aspirations within the district.
- Effects arising from signage can be appropriately assessed via a restricted discretionary activity assessment.

Point Number 588.27

Summary of Decision Requested: **Amend** Rule 20.3.4.1 Building setbacks as follows:

PI

(a) A building must be set back at least:

(i) 5m from a road boundary;

(ii) ~~7.5~~3m from any other boundary where the site adjoins another zone, other than the Heavy Industrial Zone;...

RD I

(b) The Council's discretion shall be limited to the following matters:

(i) effects on amenity values;

~~ii~~(ii) effects on streetscape;

~~iii~~(iii) traffic and road safety; and

~~iiii~~(iv) effects on the earth bund located on Lot 17 DP 494347 (53 Holmes Road, Horotiu).

Decision Reasons:

- 7.5m yard setback from residential zones is excessive.
- The Auckland Unitary Plan suggests a side and rear yard to residential zones of 3m.
- Considering a height to boundary control also applies a 3m setback is considered suitable and allows for the efficient use of the commercial sites.

Point Number 588.28

Summary of Decision Requested: **Add** a new definition of "Supermarket" in Chapter 13 Definition as follows:

An individual retail outlet having a store footprint over 1,000m² GFA that sells, primarily by way of self-service, a comprehensive range of:

a) domestic supplies, fresh food, groceries, such as fresh meat and produce, chilled, frozen, packaged, canned and bottled foodstuffs and beverages; and general housekeeping and personal goods, including (but not limited to) cooking, cleaning and washing products; kitchenwares; toilet paper, diapers and other paper tissue products; pharmaceuticals, health and personal hygiene products and other toiletries; cigarettes, magazines and newspapers, greeting cards and stationery, batteries, flashlights, light bulbs and related products; and

b) non-domestic supplies and comparison goods comprising not more than 20 per cent of all products offered for sale as measured by retail floor space, including (but not limited to) clothing and footwear; furniture; electrical appliances; office supplies; barbeque and heating fuels; audio visual products.

Note

Retail floor space means that area of the premises to which the public has access for the purpose of shopping, together with any area:

a) taken up for the purpose of display of goods; and

b) any counter areas used by or occupied exclusively by staff members whilst actively engaged in serving the public.

This area does not include floor space used for:

- storerooms
- back of house including delivery areas
- trolley storage areas
- entrance lobbies
- behind counter areas; and
- checkouts

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supermarkets are distinct from general retail activity.
- The Proposed District Plan provides for supermarkets as a distinct category within the Transport chapter.
- Seeks inclusion of a suitable definition of a Supermarket.

Point Number 588.29

Summary of Decision Requested: **Retain** Policy 4.5.2 Commercial function and purpose, so long as the amendments sought regarding the importance and appropriate nature of supermarkets within town centres are accepted.

Decision Reasons:

- Support the policy, so long as the amendments sought regarding the importance of supermarkets as appropriate town centre activities are recognised.

Point Number 588.30

Summary of Decision Requested: **Retain** Policy 4.5.3 Commercial purpose: Business Town Centre Zone in respect of the Proposed District Plan is intended purpose for the Business Town Centre Zone, so long as the amendments sought elsewhere in this submission are incorporated into the Proposed Waikato

District Plan.

Decision Reasons:

- The policy is supported in respect of the Proposed Waikato District Plan's intended purpose for the Business Town Centre Zone, with amendments sought.

Point Number

588.31

Summary of Decision Requested:

Retain Policy 4.5.4 Commercial Purpose: Business Zone in respect of the Proposed District Plan's intended purpose for the Business Zone, provided the ability for supermarkets to be accommodated within the Business Town Centre Zone are not precluded.

Decision Reasons:

- Support the policy provided they do not preclude the ability for supermarkets to be accommodated within the Business Town Centre Zone

Point Number

588.32

Summary of Decision Requested:

Consider that Pokeno be removed from the Proposed District Plan and not subject to the Proposed District Plan review process.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The zoning layout for Pokeno would benefit of a broader strategic assessment into how the town centre should develop. Pockets of residentially zoned land dissect Business and Town Centre zoned land.
- Proposals for alternative focal points for the centre exist along Great South Road and have not been determined through any strategic assessment.
- A large proportion of Pokeno's residential growth has occurred to the north and the Proposed District Plan has not considered connecting the new community to the existing town centre.
- Proposed District Plan has not considered a Mixed Use Zone within the settlement to engender more compact growth in the future.
- It will enable a strategic and comprehensive assessment of the best way to encourage growth in Pokeno, in line with the higher order objectives of the Proposed District Plan.

Point Number

588.33

Summary of Decision Requested:

Amend Policy 4.5.10 Policy - Retail: Business Town Centre Zone and Business Zone as follows:

(a) Locate small scale retail activities and key commercial activities, including supermarkets within the Business Town Centre Zone and discourage other large scale retail activities from establishing within the Business Town Centre Zone.

(b) Locate other large scale retail and commercial activities ~~to~~ within the Business Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in this approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto the operational and functional requirements of commercial activities in commercial zones.
- Supports the current approach in the Proposed District Plan that does not preclude consideration of 'out-of-centre' supermarkets where it can be demonstrated that the activity will not have adverse effects in terms of vitality and amenity of centres, nor traffic effects.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.

Point Number

588.34

Summary of Decision Requested:

Amend Policy 4.5.13 Policy – Town centre built form as follows:

(a) The scale and form of new development in the Business Town Centre Zone is to:

(i) Provide for a safe, accessible, compact and attractive town centre environment;

(ii) Facilitate the integration of retail shopping, administration and commercial services, residential, civic and community activities, recognising that the operational and functional requirements of these activities need to be taken into account when assessing built form;

(iii) Reflect the role and character of the business town centre;

(iv) Increase the prominence of buildings on street corners;

(v) Maintain a low rise built form and small scale, pedestrian focused retail activities, with the exception of supermarkets; and

(vi) Manage adverse effects on the surrounding environment, particularly at the interface with residential areas.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in the approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto for the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.

Point Number

588.35

Summary of Decision Requested:

Amend Policy 4.5.14 Policy - Raglan Town Centre as follows:

(a) Development maintains and enhances the role of the Raglan Town Centre by:

- (i) Maintaining wide footpaths and high quality public space, prioritising and providing for pedestrian movement and safety;
- ~~(ii) Maintaining a pedestrian focus by discouraging vehicle access across footpaths;~~
- (iii) Maintaining built form framing views towards Raglan Harbour;
- (iv) Providing for a building scale appropriate to the town centre;
- (v) Protecting and enhancing the character of ~~the existing buildings centre~~ through new built form being consistent with the outcomes of the Town Centre Character Statement for Raglan Town Centre (Appendix 10.1), ~~in particular by:~~
 - ~~A. Promoting traditional roof forms (hipped or gable ends) and symmetry through window design and placement;~~
 - ~~B. Providing continuous post supported verandahs sheltering footpaths;~~
 - ~~C. Promoting recessed shop fronts;~~
 - ~~D. Providing parking, loading and storage where rear access to buildings exists;~~
 - ~~E. Promoting active street frontages by developing up to the street boundaries;~~
 - ~~F. Reinforcing the street corners by ensuring the design is two storey and is transparent on both sides of the street corner;~~
 - ~~G. Encouraging the preservation and promotion of cultural features.~~

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognizing the unique character of each settlement, however a failing is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto for the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.
- The detail in this policy is more appropriately covered by standards as assessment criteria.

Point Number

588.36

Summary of Decision Requested:

Amend Policy 4.5.15 Policy - Huntly Town Centre as follows:

(a) Development maintains and enhances the role of the Huntly Town Centre by:

- (i) Maintaining wide footpaths and high quality public space, prioritising and providing for pedestrian movement and safety;
- ~~(ii) Maintaining a pedestrian focus by discouraging vehicle access across footpaths;~~
- (iii) Providing for a building scale appropriate to the town centre;
- (iv) Protecting and enhancing the character of ~~the existing buildings centre~~ through new built form being consistent with the outcomes of the Town Centre Character Statement for Huntly Town Centre (Appendix 10.3), ~~in particular by:~~
 - ~~A. Providing transparent facades and window displays at ground level;~~
 - ~~B. Providing continuous suspended verandahs sheltering footpaths;~~
 - ~~C. Symmetrical window detailing; and~~
 - ~~D. Promoting active street frontages by developing up to the street boundary.~~

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in the approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.
- The detail in this policy is more appropriately covered by standards or assessment criteria.

Point Number

588.37

Summary of Decision Requested:

Amend Policy 4.5.16 Policy - Ngaaruwaahia Town Centre as follows:

(a) Development maintains and enhances the role of the Ngaaruwaahia Town Centre by:

- (i) Maintaining wide footpaths, prioritising and providing for pedestrian movement and safety;
- ~~(ii) Maintaining a pedestrian focus by discouraging vehicle access across footpaths;~~
- (iii) Promoting improved pedestrian and cycle linkages with Te Awa River ride, Ngaaruwaahia swimming pool and town centre;
- (iv) Providing for an appropriate building scale and narrow frontages;
- (v) Protecting and enhancing the character of ~~the existing buildings centre~~ through new built form being consistent with the outcomes of the Town Centre Character Statement for Ngaaruwaahia Town Centre (Appendix 10.2), ~~in particular by:~~
 - ~~A. Recognising and promoting Ngaaruwaahia's cultural and heritage value set within the setting of the Waikato River and Hakerimata Range.~~
 - ~~B. Encouraging the preservation and promotion of Maori heritage;~~
 - ~~C. Providing transparent facades and window displays at ground level;~~
 - ~~D. Providing continuous suspended verandahs sheltering footpaths;~~
 - ~~E. Providing parking, loading and storage where rear access to buildings exists; and~~
 - ~~F. Promoting active street frontages by developing up to the street boundary.~~

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in this approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto for the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.
- The detail in this policy is more appropriately covered by standards or assessment criteria.

Point Number 588.38

Summary of Decision Requested: **Amend** Policy 4.5.17 Policy - Te Kauwhata Town Centre as follows:

- (a) *Development maintains and enhances the role of the Te Kauwhata Town Centre by:*
- (i) *Maintaining wide footpaths, prioritising and providing for pedestrian movement and safety;*
- (ii) ~~Maintaining a pedestrian focus by discouraging vehicle access across footpaths;~~
- (iii) *Providing for an appropriate building scale with narrow frontages; and*
- (iv) *Protecting and enhancing the character of the existing buildings-centres through new built form being consistent with the outcomes of the Town Centre Character Statement for Te Kauwhata Town Centre (Appendix 10.5) in particular by:*
- ~~A. Providing transparent facades and window displays at ground level;~~
- ~~B. Providing continuous suspended verandahs sheltering footpaths;~~
- ~~C. Symmetrical window detailing;~~
- ~~D. Promoting flat or low pitched roofs;~~
- ~~E. Providing parking, loading and storage where rear access to buildings exists;~~
- ~~F. Promoting mixed use and residential activities on upper floors;~~
- ~~G. Recognising the connections between the town centre and Whangamarino Wetland;~~
- ~~H. Encouraging the preservation and promotion of cultural features; and~~
- ~~I. Promoting active street frontages by developing up to the street boundary.~~

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in this approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto for the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.
- The detail in this policy is more appropriately covered by standards or assessment criteria.

Point Number 588.39

Summary of Decision Requested: **Amend** Policy 4.5.18 Pokeno Town Centre as follows:

- (a) *Development maintains and enhances the role of the Pokeno Town Centre by:*
- i. *Maintaining wide footpaths, prioritising and providing for pedestrian movement and safety;*
- ii. ~~Maintaining a pedestrian focus by discouraging vehicle access across footpaths;~~
- iii. *Providing for an appropriate building scale with narrow frontages; and*
- iv. ~~Protecting and enhance the character of the existing centre buildings through new built form being consistent with the outcomes of the Town Centre Character Statement for Pokeno Town Centre (Appendix 10.4) in particular by:~~
- ~~A. Promoting transparent facades and window displays at ground level;~~
- ~~B. Providing continuous suspended verandahs sheltering footpaths;~~
- ~~C. Providing parking, loading and storage where rear access to buildings exists;~~
- ~~D. Encouraging the preservation and promotion of cultural features;~~
- ~~E. Promoting active street frontages by developing up to the street boundary;~~
- ~~F. Ensuring built form is consistent with Waikato District Council Pokeno Town Centre Architectural Form, Materials and Signage Design Guide, and in particular section 6 (Architectural Style, Material and Appearance)~~

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in this approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto for the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.
- The detail in this policy is more appropriately covered by standards or assessment criteria.

Point Number 588.40

Summary of Decision Requested: **Amend** Policy 4.5.19 Tuakau Town Centre as follows:

- (a) *Development maintains and enhanced the role of the Tuakau Town Centre by;*

- i. Maintaining wide open streets, with wide pedestrian footpaths;
 - ~~ii. Maintaining a pedestrian focus by discouraging vehicle access across footpaths;~~
 - iii. Providing for an appropriate building scale ~~with narrow frontages;~~ and
 - ~~iv. Protecting and enhancing the character of the existing centre buildings through new built form being consistent with the outcomes of the Town Centre Character Statement for Tuakau Town Centre (Appendix 10.6)-in particular by:~~
 - ~~A. Providing parking, loading and storage where rear access to buildings exists;~~
 - ~~B. Promoting mixed use and residential activities on upper floors;~~
 - ~~C. Providing transparent facades and window displays at ground level;~~
 - ~~D. Providing continuous suspended verandahs sheltering footpaths;~~
 - ~~E. Encouraging the preservation and promotion of cultural features;~~
 - ~~F. Promoting active street frontages by developing up to the street boundary;~~
- AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Supports the overarching centres focus of the Proposed Waikato District Plan.
- Understand the intention to achieve high intensity yet fine grained town centres across the District, recognising the unique character of each settlement, however a failing in this approach is the absence of provision for supermarkets within the Business Town Centre.
- Supermarkets are recognised as retail anchors for centres and commercial development and act as a catalyst for investment by others.
- The scale and function of supermarkets unique operational and functional requirements can be managed through consideration of design, bulk and location.
- It is important to recognise that urban design aspirations should not be used to veto for the operational and functional requirements of commercial activities in commercial zones.
- Seek a number of amendments to the centre specific objectives and policies in Chapter 4.5 to ensure that the sensible outcome sought by Objective 4.5.12 is not overlooked in favour of prescriptive urban design controls.
- The detail in this policy is more appropriately covered by standards or assessment criteria.

Point Number 588.41

Summary of Decision Requested: Delete Policy 4.5.20 Pedestrian frontages: active street frontages - Business Town Centre Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.42

Summary of Decision Requested: Delete Policy 4.5.21 Corner Buildings - Business Town Centre Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.43

Summary of Decision Requested: Delete Policy 4.5.22 Landscaping - Business Town Centre Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.44

Summary of Decision Requested: Delete Policy 4.5.23 Height - Business Town Centre Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.45

Summary of Decision Requested: Delete Policy 4.5.24 New Buildings - Business Town Centre zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.46

Summary of Decision Requested: Delete Objective 4.5.25 Character - Business Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of this repetitive objective is more appropriately addressed in standards and assessment criteria.

Point Number 588.47

Summary of Decision Requested: Delete Policy 4.5.26 Landscaping of onsite parking areas - Business Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.48

Summary of Decision Requested: Delete Policy 4.5.27 Front setback - Business Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.49

Summary of Decision Requested: Delete Policy 4.5.28 Height - Business Zone.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The content of these repetitive policies is more appropriately addressed in standards and assessment criteria.

Point Number 588.50

Summary of Decision Requested: Retain Policy 4.5.8 Role and function of the Business Zone, subject to an amendment to discourage small-scale retail activities within this zone is controlled with a limit on gross floor area.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- The policy is supported regarding the role and function of the Business Zone, noting the above suggested amendment that this intention to discourage small-scale retail activities within the zone is carried through into the rules with a limit on gross floor area.

Point Number 588.51

Summary of Decision Requested: Retain Policy 4.5.9 Employment opportunities: Business Town Centre Zone and Business Zone.

Decision Reasons:

- Support this policy in that it recognises the importance of both the Business Town Centre and Business Zones to encourage and increase employment opportunities. Supermarkets will achieve this

Point Number 588.52

Summary of Decision Requested: Retain Objective 4.5.12 Business Town Centre - Character, insofar as it ensures development is designed in a functional manner.

Decision Reasons:

- To ensure development is designed in a functional and attractive manner is appropriate within the commercial environment.

Point Number 588.53

Summary of Decision Requested: Retain the approach where a restricted discretionary activity status is ascribed to an activity that infringes certain standards e.g. Rule 18.2.2 Servicing and hours of operation and Rule 18.2.8 Outdoor storage.

Decision Reasons:

- The submitter suggests that where activities infringe identified standards, a restricted discretionary activity status remains appropriate, rather than defaulting to a more onerous discretionary, where discretion is unfettered in assessment.,

Point Number 588.54

Summary of Decision Requested: Amend the Proposed District Plan to clarify that where buildings (which already require restricted discretionary activity consent) infringe standards, the activity status does not default to discretionary but remains restricted discretionary and a suitably limited set of criteria is applied.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Restricted discretionary activity status can be accompanied by suitably limited criteria that still ensure an appropriate assessment of effects is undertaken, whilst providing a level of certainty to applicants that where activities of effects is undertaken, whilst providing a level of certainty to applicants that where activities are anticipated, such assessments will be rational and streamlined.

Point Number 588.55

Summary of Decision Requested: **Retain** the objectives and policies for the Industrial Zone in Section 4.6 Industrial and Heavy Industrial.

Decision Reasons:

- The objectives and policies for the Industrial Zone as they sensibly allow consideration of non-industrial use in the zone where it is compatible with industrial activities and uses.

Point Number 588.56

Summary of Decision Requested: **Retain** Rule 16.1.5 Non-complying Activities, insofar as supermarkets are more appropriately accommodated in zones that provide principally for commercial activities.

Decision Reasons:

- Supports the non-complying activity status for supermarkets within the Residential Zone as it will suitably assess the activity under section 104D of the Act and this approach is generally consistent with other plans in the region.

Point Number 588.57

Summary of Decision Requested: **Retain** restricted discretionary activity status for activities that infringe permitted activity standards in terms of transport, including the assessment criteria.

Decision Reasons:

- Support the well drafted and appropriate assessment criteria associated with the restricted discretionary activity status within the Transport chapter.

Point Number 588.58

Summary of Decision Requested: **Delete** the New Zealand Transport Agency designation J14 that applies to the frontage of 16-18 Tumate Mahuta Drive, Huntly and allow unrestricted access to and from the affected frontage for the supermarket site.

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- Operates a supermarket at 16/18 Tumate Mahuta Drive, Huntly and the site frontage is designated (NZTA, J14), which precludes vehicle access.
- It is understood that this section of the road will have its State Highway status rescinded and the designation will be surrendered.

Point Number 588.59

Summary of Decision Requested: **Amend** Rule 14.12.1 P4 Traffic generation activity-specific conditions 14.12.1.4(1)(d) as follows:

(d) Within the Industrial Zone and Heavy Industrial Zone (excluding the Huntly Power Station and Huntly Quarry);

(i) Maximum ~~250 vehicle movements per day~~ 100 vehicles per hour (any hour), and no more than 15% of these vehicle movements are heavy vehicle movements

AND

Amend the Proposed District Plan to make consequential or alternative relief to give effect to the specific amendments sought.

Decision Reasons:

- It is inconsistent that activities in the Industrial Zone have an even lower traffic generation permitted threshold since the Industrial Zone is anticipated to accommodate heavy traffic and at greater volumes.

Submitter Number: 589

Submitter: Z Energy Ltd

Point Number 589.1

Summary of Decision Requested: **Amend** the zoning of the property at 41 Great South Road, Pokeno from Business Town Centre Zone to Business Zone.

OR

Amend the provisions for Business Town Centre Zone to enable additions and alterations to the existing truckstop at 41 Great South Road, Pokeno to recognise the investment, the benefits to the community, the need to maintain and upgrade facilities, and not be consistent with urban design guidelines in the event that the rezoning request is not accepted.

AND

Amend the Proposed District Plan, including consequential amendments, to address the matters raised in the submission.

Decision Reasons:

- The Business Town Centre zone is inappropriate for the site at 41 Great South Road, Pokeno.
- Business Town Centre is appropriate for small retail/commercial services.
- The Business Zone provides for a wide range of commercial activities at a scale that supports the commercial viability of towns and villages and discourages small retail/commercial services, and therefore more appropriate for the Z Energy truck stop refuelling facility to be located within.
- The existing facility is appropriate in the context of the Business Zone policy framework.

Point Number 589.2

Summary of Decision Requested: **Delete** the Verandah Overlay applied to the frontage of 41 Great South Road, Pokeno.

AND

Amend the Proposed District Plan, including consequential amendments, to address the matters raised in the submission.

Decision Reasons:

- The Verandah Overlay is inappropriately applied to the site at 41 Great South Road, Pokeno. This may be in part as a result of being inappropriately zoned as Business Town Centre zone, rather than the Business Zone.
- It will be triggered irrespective of the extent or location of the alteration or new buildings, including applying to above ground tanks.

Point Number

589.3

Summary of Decision Requested:

Amend Rule 18.3.5 D1 Verandahs from a Discretionary activity to a Restricted Discretionary activity and include relevant matters of discretion:

~~DRD1~~

Any verandah that does not comply with Rule 18.3.5 P1.

Discretion is restricted to:

- (i) The effects on the amenity of the streetscape;*
- (ii) The character and layout of the building;*
- (iii) The nature, design and location of the verandah; and*
- (iv) The functional requirements of the activities that the buildings are intended to accommodate.*

AND

Amend the Proposed District Plan, including consequential amendments, to address the matters raised in the submission.

Decision Reasons:

- This rule captures a "new building or the alteration of an existing building" and will be triggered irrespective of the extent or location of the alteration or new building.
- Non-compliance with the overlay rule triggers a full discretionary activity and this is inappropriate. It is possible to restrict the matters relevant and required to be considered and therefore should be considered a restricted discretionary activity.
- It needs to be recognised that there are some commercial activities that have a different form and function to that enshrined in the proposed approach, but which are still appropriately located in the business environment.
- The Z Pokeno truckstop is an established business that provides a function and facility to the public. The design requirements of a service station will not meet the verandah overlay standard. It is important that the operating requirements of such activities are accommodated.

Point Number

589.4

Summary of Decision Requested:

Amend Policy 4.5.29 New Buildings: Business Zone, as follows:

(a) New buildings within the Business Zone are consistent with the Waikato District Council Urban Design Guidelines Town Centres (Appendix 3.3), and in particular:

- (i) Responds to the specific site characteristics and wider street;*
- (ii) Promotes architectural form, building features and placement;*
- (iii) Provides landscape and open space design that responds to the characteristics and qualities of the area;*
- (iv) Minimises visual and visual amenity impacts of accessways and parking facilities; and*
- (v) Accommodates pedestrian access and safety.*

Except that where an activity has a specific functional or operational design or layout requirement, to consider (i) - (v) in the context of the following;

- (i) the investment in existing activities;
- (ii) the nature of the existing environment;
- (iii) the degree to which new buildings have been designed to address the street and the street edge, to the degree practicable, and otherwise to mitigate the visual impact of blank walls, including through design features or landscaping; and
- (iv) the degree to which visibility of and for pedestrians is maintained and pedestrian movements along the footpath can be prioritised.

AND

Amend the Proposed District Plan, including consequential amendments, to address the matters raised in the submission.

Decision Reasons:

- Does not make satisfactory provision for the continued use and redevelopment of existing commercial use and redevelopment of existing commercial sites.
- There is a need to recognise that there are business activities which have a different form and function, but which are appropriately located in a business environment.
- Service stations are activities that provide important functions for the public and the design requirements of service stations mean that many of the requirements within the Proposed District Plan will not be able to be met. It is important that their operating requirements are accommodated, To do otherwise would be inefficient and ineffective and will generate greater costs than benefits.

Point Number

589.5

Summary of Decision Requested:

Retain the Waikato River Catchment Overlay, insofar as consultation with iwi is to be determined on a case by case basis, as is relevant to the application and its associated effects.

Decision Reasons:

- The Waikato River Catchment Overlay is supported insofar as consultation with iwi is to be determined on a case by case basis, as is relevant to the application and its associated effects.

Point Number

589.6

Summary of Decision Requested:

Retain the Industrial Zone at 392 Great South Road, Huntly.

Decision Reasons:

- The zoning is appropriate.
- Provides for a variety of industrial activities that can operate in close proximity to more sensitive zones due to the nature and relatively limited effects of these activities.
- Appropriate in the context of the proposed Industrial Zone policy framework.

Point Number	589.7
Summary of Decision Requested:	Retain the Business Zone at 106 Great South Road, Ngaruawahia.
Decision Reasons:	<ul style="list-style-type: none"> This zone provides for a wide range of commercial activities at a scale that supports the viability of towns/villages and discourages small scale retail activities/commercial services in this zone. It is considered appropriate the site is zoned Business Zone given the context of the Business Zone policy framework. The provision of services stations as permitted within this zone is appropriate.

Submitter Number:	590	Submitter:	Jenny Kelly
--------------------------	-----	-------------------	-------------

Point Number	590.1
Summary of Decision Requested:	Amend the rules supporting Objective 5.1.1(a)(i), (ii) and (iii) to be stringent, not politically pragmatic, and according to the soil productivity levels, including the following: <ul style="list-style-type: none"> Subdivision should not be permitted in the Rural Zone Rule 22.3.1 P1(b) and Rules 22.4.1.2 RD1(a)(v)A and B do not comply with Objective 5.1.1(a) Soil testing should be mandatory before any proposed minor or other building is considered Any building should be on the least productive land.
Decision Reasons:	<ul style="list-style-type: none"> As the population increases Waikato District is well placed and experienced as a primary produce provider. Once land is subdivided or built on, its natural productivity is lost. The nation's long-term needs must be considered, not just limited short-term gains.

Point Number	590.2
Summary of Decision Requested:	Amend the Proposed District Plan to consider the inclusion of a central district repository of heritage and community archives within Chapter 7 Historic Heritage.
Decision Reasons:	<ul style="list-style-type: none"> Following the Waikato District Heritage Strategy in 2015, the need for a central district repository for Heritage and Community Archives was identified. More democracy, respecting the collective knowledge of community representatives, rather than staff-drive bureaucracy might enable wiser expenditure.

Point Number	590.3
Summary of Decision Requested:	Retain Policy 5.6.2(a)(i) Country Living character, and ensure it is not contradicted.
Decision Reasons:	<ul style="list-style-type: none"> The Resource Management Act's liberal provision for resource consents have enabled this policy to be contradicted in Te Kauwhata. The Resource Management Act is a flawed system that required significant resources and expenditure under the guide of a democratic process. As for elected Council Representatives not being able to hear community concerns, relating to the planning process, because they are commissioners is farcical. This is not democracy.

Point Number	590.4
Summary of Decision Requested:	Retain Policy 5.6.3(a)(i) and (ii) Subdivision within the Country Living Zone, and ensure it is not contradicted.
Decision Reasons:	<ul style="list-style-type: none"> The Resource Management Act's liberal provision for resource consents have enabled this policy to be contradicted in Te Kauwhata. The Resource Management Act is a flawed system that required significant resources and expenditure under the guide of a democratic process. As for elected Council Representatives not being able to hear community concerns, relating to the planning process, because they are commissioners is farcical. This is not democracy.

Submitter Number:	591	Submitter:	Stevenson Waikato Ltd
--------------------------	-----	-------------------	-----------------------

Point Number	591.1
Summary of Decision Requested:	Add a new permitted activity within Rule 22.2.3.1 Earthworks - General, as follows: <i>P5 Earthworks for extractive industry within the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps, provided that sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls.</i> <i>NB earthworks for extractive industry within the Aggregate Extraction Areas and Aggregate Resource Areas shown are not subject to the conditions of P2 above.</i>
Decision Reasons:	<ul style="list-style-type: none"> Provision should be made for earthworks in association with extractive industry in the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps as a permitted activity.

Point Number	591.2
Summary of Decision Requested:	Add a new permitted activity rule within Rule 22.2.3.3 Earthworks - Significant Natural Areas, as follows: <i>P3 Earthworks for extractive industry within the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps, provided that sediment resulting from the earthworks is retained on the site through implementation and maintenance of erosion and sediment controls.</i>
Decision Reasons:	

- Provision should be made for earthworks in association with extractive industry within Aggregate Extractive Areas and Aggregate Resource Areas shown on planning maps as a permitted activity including within the Significant Natural Area.

Point Number 591.3

Summary of Decision Requested: **Add** a new permitted activity rule within Rule 22.2.7 Indigenous vegetation clearance within Significant Natural Areas, as follows:
P7 Indigenous Vegetation clearance for extractive industry within the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps.

Decision Reasons:

- Provision should be made for vegetation clearance in association with extractive industry in the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps as a permitted activity including within Significant Natural Area.

Point Number 591.4

Summary of Decision Requested: **Add** a new permitted activity rule within Rule 22.2.8 Indigenous vegetation clearance outside a Significant Natural Area, as follows:
P4 Indigenous Vegetation clearance for extractive industry within the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps.

Decision Reasons:

- Provision should be made for vegetation clearance in association with extractive industry in the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps as a permitted activity.

Point Number 591.5

Summary of Decision Requested: **Retain** Policy 3.2.6 Providing for vegetation clearance, except for the amendments sought below
AND

- Amend** Policy 3.2.6(a) Providing for vegetation clearance as follows:
- (a) Provide for the clearance of indigenous vegetation in Significant Natural Areas when:
- (i) maintaining tracks, fences and farm drains
 - (ii) avoiding loss of life injury or damage to property
 - (iii) collecting material to maintain traditional Maaori cultural practices
 - (iv) collecting firewood for domestic use
 - (v) undertaking extractive industry within Aggregate Extraction and Aggregate Resource Areas shown on the planning maps.

Decision Reasons:

- Supports providing for the clearance of indigenous vegetation in Significant Natural Areas for a range of activities but seeks that the policy be extended to cover the extractive industry, where Significant Natural Areas are shown within these areas.
- There is little point in identifying areas for aggregate extraction or future aggregate extraction if it is prevented by the presence of a Significant Natural Area.

Point Number 591.6

Summary of Decision Requested: **Amend** Policy 5.4.2 Access to minerals and extractive industries as follows:

(a) Enable extractive industries, provided that adverse effects are avoided, remedied or mitigated.

(b) Protect access to, and ~~enable the~~ extraction of, mineral resources by:

- (i) Identifying lawfully established extractive industries in Aggregate Extraction Areas and Coal Mining Areas on planning maps and enabling extractive industry within those areas;
- (ii) Identifying the site of a potential extractive industry within an Aggregate Resource Areas on planning maps and enabling the expansion of extractive industry from within adjacent Aggregate Extraction Areas;
- (c) Ensure that ~~lawfully established~~ extractive industries within Aggregate Extraction Areas and Aggregate Resource Areas are not compromised by new subdivision, use or development;
- (d) Avoid the location of any sensitive land use within 500 metres of Aggregate Extraction Areas and Aggregate Resource Areas in the case of a rock resource and 200 metres in the case of a sand resource specified buffer areas otherwise risk the effective operation of a lawfully established extractive industry.

Decision Reasons:

- The policy does not give effect to the Waikato Regional Policy Statement or Objectives 5.4.2 or 5.4.1 of the Proposed District Plan.
- The policy should protect access to and extraction of mineral resources by enabling that access and extraction within the areas identified for that purpose.
- Where Aggregate Resource Areas are adjacent to Aggregate Extraction Areas it is clear they provide expansion areas for the lawfully established extractive industry and this should be recognised in the policy.
- Vague reference to "specified buffer areas" needs to be made specific and apply not only to existing extractive industry.
- It is unnecessary to repeat "lawfully established" when referring to extractive industry within the Aggregate Extraction Area as by definition all such industry within such an area has been lawfully established.

Point Number 591.7

Summary of Decision Requested: **Amend** the definition of "Extractive Industry" in Chapter 13 Definitions, as follows:
...The term also includes the removal, stockpiling and filling of overburden sourced from the same site and the following activities:

- blasting;
- storing, distributing and selling mineral products;
- accessory earthworks;
- treating stormwater and waste water;
- landscaping and rehabilitation of quarries;
- cleanfills and managed fills;
- recycling or reusing aggregate from demolition waste such as concrete, masonry, or asphalt;
- accessory activity and accessory buildings and structure such as weighbridges, laboratories and site offices.

It includes all ...

Decision Reasons:

- The definition does not include all the activities commonly carried out at a quarry or other extractive industry.

Point Number 591.8

Summary of Decision Requested: **Amend** Rule 14.12.1 P4(d) Traffic Generation, as follows:

(d) *Within the Rural Zone:*

(i) *There is a maximum 200 vehicle movements per day and no more than 15% of these vehicle movement are heavy vehicle movements; or*

(ii) *Within the Agricultural Research Centres identified on the planning maps as a Specific Area there is maximum 3000 vehicle movements per day; or*

(iii) *Within the Aggregate Extraction Areas or Aggregate Resource Areas identified on the planning maps there is a maximum of 400 vehicle movements per day including heavy vehicle movements.*

Decision Reasons:

- There is no provision in the permitted traffic generation rule for lawfully established extractive industry and their associated truck movements other than a specific provision for the "Huntly Quarry".
- Most extractive industry sites are located in the Rural Zone. The rule has a maximum of 200 vehicle movement of which no more than 15% can be heavy vehicle movements. Quarries cannot comply with this rule and some lawfully established extractive industry can generate up to a maximum of 400 heavy vehicle movements a day.
- It cannot have been Council's intention to make all quarries non-compliant with regard to this rule.

Point Number 591.9

Summary of Decision Requested: **Add** a new permitted rule within Rule 22.1.2 Permitted Activities, as follows:

P1.3 Extractive Industry within the Aggregate Extractive Areas and Aggregate Resource Areas shown on the planning maps.

AND

Amend Rule 22.1.5 D8 Discretionary Activities, as follows:

An extractive industry outside the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps.

AND

Add new rules for noise and vibration specifically in relation to extractive industry activities (see the submission for specific amendments sought).

AND

Add a new provision within Rule 22.2.1 Noise to specifically address noise standards within the Aggregate Extraction Areas and Aggregate Resource Areas, as follows:

22.2.1.4 Noise and Vibration - Extraction Industry within the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning map

P1 Noise from extractive industry must not exceed the noise levels in Table 1 below at a notional boundary from any dwelling outside the Aggregate Extraction Areas and Aggregate Resource Areas and not in the ownership of the operator of the extractive industry. Noise must be measured and assessed in accordance with New Zealand Standard on Acoustics - Measurement of Environmental Sound (NZS 6801:2008), and New Zealand Standard on Acoustics - Environmental Noise (NZS 6802:2008).

Table 1

Noise levels	Times
<u>7am-10pm, Monday to Saturday</u>	<u>LAeq 55dB</u>
<u>All other times and on public holidays</u>	<u>LAeq 45dB LAFmax 75dB</u>

P2 Noise created from the use of explosives must not exceed a peak overall sound pressure of 128dB Lzpeak.

P3 The measurement of blast noise (air blast) and ground vibration from blasting must be measured at the notional boundary of a dwelling outside the Aggregate Extraction Areas and Aggregate Resource Areas and not in the ownership of the operator of the extraction industry.

P3 Vibration generated by blasting shall be measured within a building in accordance with Appendix J of Part 2 of Australian Standard AS 2187 2006.

P4 All blasting is restricted to:

(a) 9am-5pm, Monday to Saturday.

(b) an average of two occasions per day over a calendar fortnight except where necessary because of safety reasons.

P5 Blasting activities must be controlled to ensure any resulting ground vibration does not exceed the limits set out in German standard DIN 1503 1999: Structural vibration - Part 3 Effects of vibration on structures when measured on the foundation in the horizontal axis on the highest floor of an affected building.

RD1 Noise or vibration that does not comply with the above standards.

Council's discretion is restricted to the following matters:

(i) effects on amenity values;

(ii) hours and days of operation;

(iii) noise levels, location of noise source, frequency, duration or other special characteristics of noise;

(iv) benefits derived from extracting the resource; and

(v) mitigation measures.

Decision Reasons:

- Agree that extractive industry should be a discretionary activity where it is not identified within the Aggregate Extraction Areas and Aggregate Resource Areas shown on planning maps.
- Where an Aggregate Extraction Area and Aggregate Resource Area is identified then extractive industry should be enabled subject to appropriate standards.
- This approach is adopted by the Franklin section of the Operative District Plan, Waipa District Plan and the Auckland Unitary Plan.
- There is no basis for adopting a more restrictive approach in the Proposed Waikato District Plan.
- The proposed amendment can be accommodated within the existing Rural Zone and there is no need to adopt a special purpose zone as asserted in the section 32 analysis.
- The duplication and inefficiencies from administering multiple zones as noted in the section 32 report as the only reason for rejecting this option does not exist.

Point Number 591.10

Summary of Decision Requested: **Add** a new height rule within Rule 22.3.4 Height, as follows:

22.3.4.5 Building Height for extractive industry in industry in the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps

P1

Building height must not exceed 20m.

RD1

Building height that does not comply with above standard.

Council's discretion is restricted to the following matters:

(i) effects on amenity values;

(ii) extent and visibility of non-compliance from adjacent zones;

(iii) building form, location, external cladding and colour.

Decision Reasons:

- Provision should be made for buildings up to 20 metres in height in association with extractive industry in the Aggregate Extraction Areas and Aggregate Resource Areas shown on the planning maps as a permitted activity.

Point Number 591.11

Summary of Decision Requested: **Amend** Rule 22.3.7.2 P1 Building setback sensitive land use, as follows:

- (a) Any building for a sensitive land use must be set back a minimum of:*
- (i) 5m from the designated boundary of the railway corridor;*
 - (ii) 15m from a national route or regional arterial road;*
 - (iii) 35m from the designated boundary of the Waikato Expressway;*
 - (iv) 200m from Aggregate Extraction Area or Aggregate Resource Area containing a sand resource;*
 - (v) 500m from an Aggregate Extraction Area or Aggregate Resource Area containing a rock resource;*
 - (vi) 100m from a site in the...*

Decision Reasons:

- Where Aggregate Resource Areas are adjacent to Aggregate Extraction Areas it is clear that they provide expansion areas for the lawfully established industry and this should be recognised.
- The building setback needs to applied in the Aggregate Extraction Areas and Aggregate Resource Areas identified in the planning maps.

Point Number 591.12

Summary of Decision Requested: **Amend** the extent of the Aggregate Extraction Area to cover the overburden areas in association with the Stevenson Huntly Quarry at 300 River Road, Huntly and shown in the plan attached to the submission.

Decision Reasons:

- Overburden disposal is included in the definition of extractive industry and consequently should be mapped as an integral part of the Aggregate Extraction Area.

Point Number 591.13

Summary of Decision Requested: **Delete** the Significant Natural Area overlay in areas where it overlaps with the Aggregate Extraction Area or Aggregate Resource Area at Stevenson's Huntly Quarry at 300 River Road, Huntly.

Decision Reasons:

- There is little point in identifying areas of aggregate extraction or future aggregate extraction if it will be prevented by a significant natural area.
- Alternative is to make a special provision for earthworks and vegetation clearance within the policies and rules for the situation where the Extraction Areas and Aggregate Resource Area overlaps overlap with the Significant Natural Area.
- The Significant Natural Area should be removed from the planning maps. This Significant Natural Area is considered to be only of local significance.

Submitter Number: 592 **Submitter:** Christine Montagna
On behalf of: David James Evans

Point Number 592.1

Summary of Decision Requested: **Amend** the zoning of the properties located on the southern side of Whangarata Road, Tuakau to Country Living Zone.

Decision Reasons:

- Will provide a wide range of housing options and ensure buildings are positioned in a manner that provides for transition from large lots to smaller lots in Tuakau.
- Will promote the development of a variety of housing densities, diversity of building styles and a high quality living environment in Tuakau.
- Will ensure existing farming activities are protected from the effects of reverse sensitivity by considering the location of new residential development.
- The properties are located on the southern side of Whangarata Road back onto the pony club and need to stay rural.

Submitter Number: 593 **Submitter:** Christine Montagna

Point Number 593.1

Summary of Decision Requested: **Retain** the rural zoning around Buckville Road, Logan Road and Golding Road, Buckland.

Decision Reasons:

- Rural zoning of this area is appropriate as it enables a rural lifestyle, which would otherwise be lost if any more subdivision was to occur.
- It is important to retain existing productive farmland in order to sustainably manage the resource.

Point Number 593.2

Summary of Decision Requested: **Retain** Rule 22.4.1.2 General Subdivision, as notified.

Decision Reasons:

- Constraints upon subdivision are appropriate in order to retain productive rural land and preserve the soil resource.
- Further rural subdivision has adverse effects on wildlife, the environment and amenity of local residents.

Submitter Number: 594 **Submitter:** Douglas Birt

Organisation: NZ Association of Radio Transmitters Inc (NZART)

Point Number 594.1

Summary of Decision Requested: **Add** a definition for 'Amateur radio configurations' in Chapter 13 Definitions, as follows:
Means aerials, antennas and associated support structures which are owned and operated by licensed amateur radio operators

Decision Reasons:

- The Proposed Plan does not define 'amateur radio configurations'. The requested definition would effectively capture all antennas, aerials and support structures used by licensed radio amateurs.

Point Number 594.2

Summary of Decision Requested: **Amend** the Proposed District Plan including Rule 14.9.1 P1 and P2 Permitted Activities, by clarifying the difference between antennas and aerials.

Decision Reasons:

- The term 'antenna' is defined although 'aerial' is not. From a technological point of view, these are alternative terms for the same thing.

Point Number 594.3

Summary of Decision Requested: **Amend** Rule 14.9.1 Permitted Activities, by removing inconsistencies between P2 Aerials associated with amateur radio configurations (Rule 14.9.1.2) and P3 Support structures associated with amateur radio configurations (Rule 14.9.1.3), so that there are consistent references across the clauses in these two rules to zone height plus 2 metres (as per Rule 14.9.1.3 (a)(iv)).

Decision Reasons:

- It is appropriate to have consistency across the rules in respect to expressing the allowable dimensions for aerials and support structures.

Point Number 594.4

Summary of Decision Requested: **Retain** Rule 14.9.1 P1 Antennas associated with amateur radio configurations, as notified.

Decision Reasons:

- No reasons provided.

Point Number 594.5

Summary of Decision Requested: **Amend** Rule 14.9.1 P2 (a) (v) Aerials associated with amateur radio configurations, to correct a reference error as follows:
(a)(v) No part of the aerial exceeds the maximum stated height applying to buildings in the applicable zone by more than 2m (except for vertical aerials as provided for in ~~Rule 14.9.1.2(f)(f) below~~ Rule 14.9.1.2(g)(v));

Decision Reasons:

- The reference to Rule 14.9.1.2(f)(f) appears to be an error and needs to be replaced with a reference to Rule 14.9.1.2(a)(vi) instead.

Point Number 594.6

Summary of Decision Requested: **Amend** Rule 14.9.1.2 P2 Aerials associated with amateur radio configurations, to enable at least one additional pole structure which exceeds the height limits applying to zone height rules, but this second pole need not be 20m.

Decision Reasons:

- For 3.6MHz aerials, one end of such a wire could be attached to the main supporting structure, but unless some other provision is made in say 14.9.1.2(a), there is no way of holding up the other end at the required height because zone height plus 2m is not high enough. There needs to be provision for just one additional pole to be at, say, 14m height. Without this exception, the very simple low visual impact wire antenna cannot be used in its preferential horizontal configuration.

Point Number 594.7

Summary of Decision Requested: **Amend** Rule 14.9.1 P2 (a)(vi) Aerials associated with amateur radio configurations, to correct a referencing error as follows:
(a)(vi) For vertical aerials, one vertical aerial to a maximum height of 20m, provided there is only one vertical aerial or one supporting structure (and attached aerial(s) or antenna(s) under ~~Rule 14.9.1.3(i)(c) below~~ Rule 14.9.1.3(g)(iii)) per site that exceeds the maximum stated height applying to buildings in the applicable zone by more than 2m;

Decision Reasons:

- The reference to Rule 14.9.1.3(i)(c) appears to be an error and should be replaced with a reference to Rule 14.9.1.3(a)(iii).

Point Number 594.8

Summary of Decision Requested: **Amend** Rule 14.9.1 P3 Support structures associated with amateur radio configurations, so that the numbering of clauses and format are improved.

AND

Amend Rule 14.9.1.3 P3 Support structure associated with amateur radio configurations to be clearer and replace with the following:

(a) Support structures associated with amateur radio configurations that comply with all of the following;

(i) For wire aerials of less than 1 / 5mm in outside diameter, no more than six support poles per site provided that:

A. The maximum height of the support poles does not exceed the maximum building height in the zone in which they are located by more than 2m;

B. The setback and height in relation to boundary shall not apply to these support poles;

(ii) Where guy wire are used these must not exceed 12mm in diameter;

(iii) At no point must any guy wire or aerial overhang the boundary;

(iv) For each site, one support structure can exceed the maximum stated height applying to buildings in the applicable zone by more than 2m, provided that:

A. The maximum height of the support structure and any attached aerials or antennas is 20m;

B. The support structure may be a pole or lattice mast, it may be guyed or self supporting but the inscribed circle of the structure below 9m shall be 1000mm, and above 9m must fit within a tapering envelope with a maximum inscribed circle of 660mm at 9m, and 420mm at 20m.

AND

Amend Rule 14.9.1.2 P2 (a) (vi) as follows:

(a)(vi) For each site, one pole structure or vertical antenna to a maximum height of 14 metres provided there is only one vertical aerial in addition to the one supporting structure under rule 14.9.1.3 below per site that exceeds the maximum stated height applying to buildings in the applicable zone by more than 2m.

Decision Reasons:

- The numbering and format of clauses in Rule 14.9.1 P3 need improvement.

Point Number

594.9

Summary of Decision Requested:

No specific decision sought, but submission considers that where amateur radio clubrooms are set up, amateur radio configurations should be erected on a permitted basis at those clubroom sites.

Decision Reasons:

- The Proposed District Plan is silent on this issue.

Submitter Number:

595

Submitter:

Philip Parkes

Point Number

595.1

Summary of Decision Requested:

Add provisions that would support any project suggested to improve the use of the Huntly East Mine and increase the availability to the public/community of Huntly.

Decision Reasons:

- This will bring people into the area.
- It will give/make jobs for local people.

Shand Properties Ltd

Point Number

597.1

Summary of Decision Requested:

Amend the Proposed District Plan to enable the Kimihia Lakes Restoration and Development Plan through a new specific zone and corresponding rules.

Decision Reasons:

- This will create outdoor education and recreational opportunities for the benefit of Huntly and North Waikato.
- This will help the community thrive, share and engage in activities together, including the development of the project.

Submitter Number:	598	Submitter:	Withers Family Trust
Point Number	598.1		
Summary of Decision Requested:	Defer the hearing of submissions on Stage 1 until after the National Planning Standards have been adopted and/or until completion of both Stage 2 of the Future Proof Strategy and the updated Waikato Regional Policy Statement.		
Decision Reasons:	<ul style="list-style-type: none"> Legislative reforms are currently occurring with respect to the National Planning Standards (NPS) which are expected to be adopted in 2019. The NPS intend to improve consistency in the format and content of a district plan, particularly definitions. The Waikato Regional Policy Statement (WRPS) will be reviewed to account for the area of the former Franklin District that is now part of Waikato District. The Future Proof Strategy will be reviewed over the 2018/2019 period and will inform the WRPS in respect to settlement patterns. In turn, the district plan is required to give effect to the WRPS. The timing of the review is therefore questioned because changes to the district plan that result from changes to other legislative documents will be unnecessarily time-consuming and expensive. 		
Point Number	598.2		
Summary of Decision Requested:	Amend Section 1.4.4(a) The urban environment, as follows: (a) A key issue for the district is to maintain <u>and enhance</u> the productive capacity of the rural resource and ensure that population growth and associated built development is managed in a way that results in efficient and high-amenity urban areas. ...		
Decision Reasons:	<ul style="list-style-type: none"> The impact of urban development on the rural environment should not restrict the productive capacity of the rural resource to existing levels. The policy should therefore allow for enhanced rural productivity. 		
Point Number	598.3		
Summary of Decision Requested:	Amend Section 1.5.2(a) Planning for urban growth and development as follows: (a) Defined growth areas have been zoned and their development will be guided through the application of objections and policies and through processes such as the development of master plans, comprehensive structure plans, within the district plan and any future changes to the district plan. The agreed Future Proof settlement pattern for urban growth and development is to will assist to avoid unplanned encroachment into rural land and is to be contained within defined urban areas to avoid rural residential fragmentation.		
Decision Reasons:	<ul style="list-style-type: none"> The Environment Court has questioned the legality of structure plans and master plans and the like which determine the activity status of a proposal. The need for landowners within a structure plan area to collaborate is questionable. Reference to the current Future Proof document may be misleading because this is a dynamic document that will change. 		
Point Number	598.4		
Summary of Decision Requested:	Delete Section 1.12.1 (b) and (c) Strategic direction.		
Decision Reasons:	<ul style="list-style-type: none"> The policy relating to the use of master plans where adherence to the plans may change the activity status of a proposal is questioned. The Environment court has questioned the legality of structure plans and master plans and the like which determine the activity status of a proposal. Further, it is not clear what is meant by master plans and where they are referenced in the rules (despite reference to them in Policy 4.7.14). 		
Point Number	598.5		
Summary of Decision Requested:	Retain Objective 4.1.1 (a) and (b) Strategic.		
Decision Reasons:	<ul style="list-style-type: none"> This objective supports sustainable communities and will provide for 13,300-17,500 additional dwellings within the district in the period 2018-2045. 		
Point Number	598.6		
Summary of Decision Requested:	Retain Objective 4.1.2 - Urban growth and development.		
Decision Reasons:	<ul style="list-style-type: none"> This objective will consolidate growth around existing towns and villages. 		
Point Number	598.7		
Summary of Decision Requested:	Retain Policy 4.1.3 (b) Location of development, except for the amendments sought below AND Amend Policy 4.1.3(b) Location of development as follows: (b) Locate urban growth areas only where they are consistent with legislative requirements and strategic documents such as Future Proof, the Future Proof Strategy Planning for Growth 2017.		
Decision Reasons:	<ul style="list-style-type: none"> Urban growth should align with the Waikato Regional Policy Statement which is informed by Future Proof. However, the Future Proof Strategy is to be updated in 2018/2019 in accordance with legislative reform which includes the National Policy Statement - Urban Development Capacity and strategic requirements. 		
Point Number	598.8		

Summary of Decision Requested: Retain Policy 4.1.4 Staging of development.

Decision Reasons:

- An integrated and staged approach to development is appropriate where it is supported by infrastructure.

Point Number 598.9

Summary of Decision Requested: Retain Policy 4.1.5(b) but the submitter notes that physical/geotechnical limitations, market trends and fragmented land ownership may impede achieving these minimum density requirements.

Decision Reasons:

- Achieving a minimum density of 12-15 households per hectare in the Residential Zone may be impeded due to physical/geotechnical limitations, market trends and fragmented land ownership.

Point Number 598.10

Summary of Decision Requested: Retain Objective 4.2.14 Earthworks.

Decision Reasons:

- Earthworks that facilitate residential subdivision are supported.

Point Number 598.11

Summary of Decision Requested: Retain Policy 4.7.3 Residential subdivision, insofar as subdivision development responds to the outcomes of the Urban Design Guidelines.

AND

Clarify the Urban Design Guidelines and the activity status and/or the process for changing these guidelines.

Decision Reasons:

- Reference is made to the operative plan provisions rather than the Proposed Plan. The status of the document 'Waikato District Council's Urban Design Guidelines Residential Subdivision' in Appendix 3.1 is questionable as to the public's ability to submit on changes to these guidelines.

Point Number 598.12

Summary of Decision Requested: Delete Policy 4.7.6 (a)(ii) and (iii) Coordination between servicing and development and subdivision.

Decision Reasons:

- Oppose reference to structure plans, as the Environment Court has questioned the legality of structure plans and master plans and the like which determine the activity status of a proposal.

Point Number 598.13

Summary of Decision Requested: Retain Policy 4.7.7 Achieving sufficient development density to support the provision of infrastructure services.

Decision Reasons:

- The subdivision rules need to ensure this policy outcome.

Point Number 598.14

Summary of Decision Requested: Retain Policy 6.4.2 - Provide adequate infrastructure.

Decision Reasons:

- Ensure that the Rules relating to subdivision give effect to the proposed Policies, and that where greenfield sites are identified for urban growth, that the ability to appropriately, effectively and efficiently service these areas in comparison to other areas has been adequately investigated through Section 32 RMA analysis.

Point Number 598.15

Summary of Decision Requested: Retain Policy 6.4.3 Infrastructure Location and Services.

Decision Reasons:

- Ensure that the Rules relating to subdivision give effect to the proposed Policies, and that where greenfield sites are identified for urban growth, that the ability to appropriately, effectively and efficiently service these areas in comparison to other areas has been adequately investigated through Section 32 RMA analysis.

Point Number 598.16

Summary of Decision Requested: Retain Policy 6.4.4 Road and rail network.

Decision Reasons:

- Ensure that the Rules relating to subdivision give effect to the proposed Policies, and that where greenfield sites are identified for urban growth, that the ability to appropriately, effectively and efficiently service these areas in comparison to other areas has been adequately investigated through Section 32 RMA analysis.

Point Number 598.17

Summary of Decision Requested: Retain Policy 6.4.5 Roading infrastructure.

Decision Reasons:

- Ensure that the Rules relating to subdivision give effect to the proposed Policies, and that where greenfield sites are identified for urban growth, that the ability to appropriately, effectively and efficiently service these areas in comparison to other areas has been adequately investigated through Section 32 RMA analysis.

Point Number 598.18

Summary of Decision Requested: Retain Objective 6.4.6 Stormwater and drainage.

Decision Reasons:

- Ensure that the Rules relating to subdivision give effect to the proposed Policies, and that where greenfield sites are identified for urban growth, that the ability to appropriately, effectively and efficiently service these areas in comparison to other areas has been adequately investigated through Section 32 RMA analysis.

Point Number 598.19

Summary of Decision Requested: Retain Policies 6.4.7 Stormwater.

Decision Reasons:

- Ensure that the Rules relating to subdivision give effect to the proposed Policies, and that where greenfield sites are identified for urban growth, that the ability to appropriately, effectively and efficiently service these areas in comparison to other areas has been adequately investigated through Section 32 RMA analysis.

Point Number 598.20

Summary of Decision Requested: Retain the definition of "Fill Material" in Chapter 13 Definitions, except for the amendments sought below

AND

Amend the definition of "Fill Material" in Chapter 13 Definitions as follows:

Means material used for filling activities including, but not limited to, materials such as sand, soil, clay or aggregate.

Decision Reasons:

- The list of allowable fill materials needs to be expanded and should include sand.

Point Number 598.21

Summary of Decision Requested: Retain the definition of "impervious surface" in Chapter 13: Definitions, except for the amendments sought below

AND

Amend the definition of "impervious surface" in Chapter 13: Definitions as follows:

Means a surface such as a road, rooftop, footpath, paving, decking, swimming pool, patio, driveway, vehicle access and manoeuvring area or highly-compacted soil that is not vegetated and does not infiltrate runoff. It excludes wooden decks with spacing between boards of 4mm or more, or surfaces such as gabi paving, where water is allowed to drain through to a permeable surface below the deck.

Decision Reasons:

- The notified definition is unduly restrictive and does not cater for pervious materials that may be used for driveways, etc.

Point Number 598.22

Summary of Decision Requested: Amend terminology so that there is consistency between the district plan text and planning maps, for example Natural Character versus Outstanding Natural Character.

Decision Reasons:

- There appears to be inconsistency between terminology in the district plan text and planning maps. For example, the Rural Zone refers to 'Outstanding Natural Character' whereas the planning maps refer to 'Natural Character'.

Point Number 598.23

Summary of Decision Requested: Amend the Proposed District Plan (including planning maps) to explain what is meant by Stage 1.

Decision Reasons:

- There is no explanation that the notified planning maps (including the legend) relate to Stage 1 of the review process.

Point Number 598.24

Summary of Decision Requested: Amend the extent of Residential zoning at Pokeno (after examining all zoning options) to provide for growth within a 30 year time period as signalled in the Future Proof Strategy and potentially postpone zoning (including for the 160 ha block known as 'Pokeno West') until new legislative requirements and revised regional growth strategies are determined.

Decision Reasons:

- Rezoning for the 160ha block known as 'Pokeno West' has not involved a consultation process or an independent section 32 report which is typically required for a private plan change before being adopted by Council.
- There has been no analysis of alternative sites on the periphery of Pokeno having noted the physical constraints with the 'Pokeno West' block and the target of 12-15 households per hectare.
- Further, the large areas of 'open space' within the 'Master Plan' for this particular block raises questions about public ownership and the burdens on ratepayers for its development and maintenance.
- The constraints of the land will make the density targets of both Future Proof and the Proposed District Plan unachievable.

Point Number	598.25
Summary of Decision Requested:	Amend the zoning of the 27ha property located at 135 Potter Road, Pokeno (Lot 3 DP 176205) from Rural Zone to Residential Zone.
Decision Reasons:	<ul style="list-style-type: none"> The notified Rural zoning for this property is not consistent with the objectives and policies for the Rural Zone or the residential growth expectations set out in the Future Proof Strategy. This property is 400 metres from the current Residential Zone boundary and urban services can be extended to it if and when the neighbouring property immediately to the east (157 Potter Road) is similarly developed. Its separation from Rural land to the north by the railway line and the covenanted bush to the south also make the property ideal for residential development. The property does not contain any dwelling or other substantial impediments to development.
Point Number	598.26
Summary of Decision Requested:	Retain Policy 4.7.11 Reverse sensitivity. AND Amend the Proposed District Plan to encourage new Residential areas to be developed where topographical or physical constraints provide a natural separation between conflicting land uses, for example, roads, railway lines, significant planted areas could be used as a buffer.
Decision Reasons:	<ul style="list-style-type: none"> While policies discuss protecting against reverse sensitivity, areas identified for residential development (such as Pokeno) are not buffered from rural activities and may therefore give rise to reverse sensitivity issues between proposed residential and existing rural environment. Residential development has the potential to impact on existing farming operations whether or not they are intensive in nature and/or may be negatively impacted by existing farming practices.
Point Number	598.27
Summary of Decision Requested:	Clarify what is meant by "master plans", as referenced in various provisions such as Section 1.12.1(f) and Policy 4.7.14, and where they are referenced in the rules.
Decision Reasons:	<ul style="list-style-type: none"> It is not clear in the document what is meant by master plans.
Point Number	598.28
Summary of Decision Requested:	Add policies and support for additional residential zoning opportunities to cater for anticipated demand for the next 27 years.
Decision Reasons:	<ul style="list-style-type: none"> Support sustainable communities and the objective of providing for 13,300-17,500 additional dwellings within the District 2018-2045.
Point Number	598.29
Summary of Decision Requested:	Retain Policy 4.7.8 Staging of subdivision.
Decision Reasons:	<ul style="list-style-type: none"> The subdivision rules need to achieve this policy outcome.
Point Number	598.30
Summary of Decision Requested:	Retain Policy 4.7.9 Connected neighbourhoods.
Decision Reasons:	<ul style="list-style-type: none"> The subdivision rules need to achieve this policy outcome.
Point Number	598.31
Summary of Decision Requested:	Retain Policy 4.7.10 Recreation and access.
Decision Reasons:	<ul style="list-style-type: none"> The subdivision rules need to achieve this policy outcome.
Point Number	598.32
Summary of Decision Requested:	Delete Policy 4.7.14 Structure and master planning.
Decision Reasons:	<ul style="list-style-type: none"> Oppose reference to structure plans/master plans. The Environment Court has questioned the legality of structure plans and master plans and the like which determine the activity status of a proposal.
Point Number	598.33
Summary of Decision Requested:	Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development.
Decision Reasons:	<ul style="list-style-type: none"> Infrastructure needs to be integrated with subdivision and development.

Submitter Number:	599	Submitter:	Martin Hastings
Point Number	599.1		
Summary of Decision Requested:	Add strong precautionary and prohibitive provisions, rules and policies relating to the management of Genetically Modified Organisms, made similar or the same as those in the Far North District Plan, the Whangarei District Plan, and the Auckland Unitary Plan.		
Decision Reasons:	<ul style="list-style-type: none"> To ensure a consistent approach across Northland, Auckland and the Waikato and to eliminate cross boundary issues. GMOs have the potential to adversely affect ecological, economic, resource management values, the cultural and social well-being of people and tangata whenua. The release of GMOs has the potential to cause significant adverse effects on the environment. No matter how carefully conditions of consent are crafted, there is a risk that conditions may be breached. Once GMOs are in the environment, they would be very difficult if not impossible to eradicate. Application of integrated management and a precautionary approach to GMO under the RMA is the best available technique for managing the potential adverse effects posed by GMOs It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location, and management of GMOs where they have the potential to adversely affect the environment and other land use activities. 		
Point Number	599.2		
Summary of Decision Requested:	Add a resource management framework for the management of Genetically Modified Organisms that is regionally specific, taking into account environmental, economic, and social well-being considerations.		
Decision Reasons:	<ul style="list-style-type: none"> GMOs have the potential to adversely affect ecological, economic, resource management values, the cultural and social well-being of people and Tangata whenua. No matter how carefully conditions of consent are crafted, there is a risk that conditions may be breached. Application of integrated management and a precautionary approach to GMO under the RMA is the best available technique for managing the potential adverse effects posed by GMOs. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location, and management of GMOs where they have the potential to adversely affect the environment and other land use activities. The release of GMOs has a potential to cause significant adverse effects on the environment, which could include: <ul style="list-style-type: none"> biological or ecosystem harm harm to Tangata whenua cultural values such as mauri and tikanga harm to the cultural values and lifestyle decisions of people and communities at a local level concerning what constitutes their wellbeing harm to existing or potential forms of land use including farming, forestry, beekeeping, marine farming and other primary production activities dependent on an uncontaminated environmental brand reputational damage loss of markets and premiums paid for GMO free produce loss of livelihood The Waikato has three major milk suppliers - Tatua, Fonterra and Miraka Milks have a GMO Free requirement for the milk products and rely on shareholders farmers milk supply. Once GMOs have been released into the environment, they are difficult to eradicate. In the case of a food product, the GE Free status of a district would likely be lost permanently along with the market advantages. 		
Point Number	599.3		
Summary of Decision Requested:	Add a requirement for public notification when consents require exemption from Plan rules, whether Genetically Modified Organism-related or any other matter.		
Decision Reasons:	<ul style="list-style-type: none"> No matter how carefully conditions are crafted, there is a risk that conditions be breached by poor management, human error, natural events, or sabotage of projects. 		

Submitter Number:	600	Submitter:	Susanne Giessen-Prinz
Point Number	600.1		
Summary of Decision Requested:	Amend item 140 in Schedule 30.1 Historic Heritage Items, to reflect the significant features of interest for 58 Wallis Street, Raglan.		
Decision Reasons:	<ul style="list-style-type: none"> The relevant text for item 140 in Schedule 30.1 states that the significant features to be protected are "The location to be protected." but the meaning of this is not clear. 		

Submitter Number:	601	Submitter:	Robert Limmer
On behalf of:	Limmer Ltd		
Point Number	601.1		
Summary of Decision Requested:	Amend the area of Significant Natural Area at 596 Waikare Road, Te Kauwhata, to reflect the original bush area of seven acres that existed in 18 September 1987.		
Decision Reasons:	<ul style="list-style-type: none"> The proposed Significant Natural Area will impose costs and limit the farming potential of the land The original seven acres of bush from 1987 is the best quality bush of the property No persons allowed on property The farm is for sale. 		
Point Number	601.2		
Summary of Decision Requested:	Amend the area of Significant Natural Area on the property at 209 Whangamarino Road, Te Kauwhata.		

Decision Reasons:

- The proposed Significant Natural Area will impose costs on the landowner and limit the farming potential of the land.
- No persons allowed on the property.

Submitter Number: 602 **Submitter:** Greig Metcalfe

Point Number 602.1

Summary of Decision Requested: **Delete** Rule 24.3.6.1 P3 Building setbacks.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There are instances when it is appropriate to locate the garage in front of the façade of the dwelling.

Point Number 602.2

Summary of Decision Requested: **Amend** Rule 24.3.3.2 Height - Buildings, structures of vegetation within an airport obstacle limitation surface, as follows:
PI A building, structure or vegetation must not protrude through the airport obstacle limitation surface as identified in Appendix 9 - Te Kowhai Airpark and as shown on the planning maps.
DI A building, structure or vegetation that does not comply with Rule 24.3.3.2 PI.
OR
Amend Rule 24.3.3.2 Height - Buildings, structures of vegetation within an airport obstacle limitation surface, as follows:
PI A building, structure or vegetation not already existing at 18 July 2018 must not protrude through the airport obstacle limitation surface as identified in Appendix 9 - Te Kowhai Airpark and as shown on the planning maps.
AND
Any consequential amendments to Rule 24.3.3. Height.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Rule 25.49 (c) in the Operative Waikato District Plan only controls the height of buildings in the airport obstacle limitation surface (AOLS), not vegetation.
- The property legally described as Lot 2 DP 456538 (CFR 590290) contains a large number of trees that will breach the proposed AOLS but will benefits from existing use rights in terms of section 10 of the Resource Management Act.
- While consultation between the submitter and Te Kowhai Airpark landowners is on-going, there is not yet any understanding or agreement as to how breaches of the proposed AOLS will be managed.

Point Number 602.3

Summary of Decision Requested: **Amend** Rule 24.3.6.3 P1 Building setback - water bodies as follows:
(a) A building must be setback a minimum of 30m
(i) from the margin of any:
A. Lake with a bed area of 8ha or more;
B. Wetland with an area greater than 1ha; and
C. River bank, other than the Waikato River and Waipa River whose bed has an average width 3m or more.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There needs to be parameters as to when this rule applies.
- The parameters from the Operative Waikato District Plan are sought.

Point Number 602.4

Summary of Decision Requested: **Amend** Rule 24.3.7 P1 Building - Airport Noise Outer Control Boundary, as follows:
PI Construction, addition to or alteration of a dwelling within the Airport Noise Outer Control Boundary must achieve the internal design sounds levels specified in Appendix 1 - Acoustic Insulation, Section 3 Table 6.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- This rule should only apply to dwellings located within the identified Airport Noise Outer Control Boundary.

Point Number 602.5

Summary of Decision Requested: **Amend** Rule 24.4.2 RD1 and RD2 Subdivision, as follows:
RD1 (a) Subdivision in Te Kowhai and Tuakau must comply with all of the following conditions:
(i) Proposed lots not connected to public water and reticulated wastewater infrastructure must have a minimum net area of 3000m², except where the proposed lot is an access allotment, utility allotment or reserve lot.
RD2 (a) Subdivision in Te Kowhai and Tuakau must comply with all of the following conditions:

(j) Proposed lots connected to ~~public water and reticulated~~ wastewater infrastructure must have a minimum net site area of 1000m², except where the proposed lot is an access allotment, utility allotment or reserve lot.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is feasible for development in the Village Zone to be serviced by reticulated services that are privately owned (i.e. community scale) and therefore this provision should not be limited to publicly owned infrastructure network.

Point Number

602.6

Summary of Decision Requested:

Amend Rule 24.4.4 C2 (a) Subdivision - Amendments to cross lease and flats plans and conversions, as follows:

~~(a) Amendment or update to a cross lease flats plan including additions or alterations to any buildings, and areas for exclusive use by an owner or owners.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Changing an exclusive area is not deemed to be a subdivision under section 218 of the Resource Management Act as it is a private covenant matter which is not able to be controlled by Council.

Point Number

602.7

Summary of Decision Requested:

Amend Rule 24.4.9 RDI (a) Road frontage, by deleting RDI (a) and replacing with the following:

~~(a) Every proposed lot must have at least 20m frontage to a road boundary, except where the proposed lot is an access allotment, utility allotment or a right of way or access leg is provided.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The requested replacement wording for RDI (a) is an improvement to the notified version.

Point Number

602.8

Summary of Decision Requested:

Amend Rule 24.4.10 (a) RDI Subdivision - Building platform, as follows:

~~(a) Every proposed lot, other than a new lot specifically for access, utility allotment & an access allotment, utility allotment or reserve allotment, must be capable of containing a building platform upon which a dwelling could be sited as a permitted activity, with the building platform being contained within either of the following dimensions:~~

...

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The requested wording for RDI (a) is an improvement to the notified version and reserve allotments need to be included.

Point Number

602.9

Summary of Decision Requested:

Add the following activities to Rule 27.1.1 Activity Status Table:

- Flight training school - Non-complying activity in all precincts
- Circuit training - Non-complying activity in all precincts

AND

Add definitions for these terms to Chapter 13 Definitions.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Pilot training associated with a flight training school based at Te Kowhai Airpark or another airfield that uses Te Kowhai Airpark as a de facto training runway could lead to increases in noise and neighbour irritation/anxiety.

Point Number

602.10

Summary of Decision Requested:

Amend Rule 27.2 Land Use - Effects, by inserting appropriate standards for "general aviation" and "recreational flying" so that these activities are carried out in accordance with "Fly Neighbourly" principles to avoid adverse impacts on neighbours. These standards should include, but not be limited to:

- A requirement to adhere to an "Airpark Management Plan" prepared in consultation with neighbours and Te Kowhai community.
- A stipulation on the hours of operation to limit night flying.
- A stipulation on the maximum of aircraft movements being 21,000 per annum.

• AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Adherence to 'Fly Neighbourly' principles will ensure that the type of, and repetitive nature of, noise from aircraft operations is managed in and around noise-sensitive areas. Further reading can be found in the NZ Aviation Industry Association Environmental Code of Practice and the Helicopter Association International (HAI) "Fly Neighbourly Guide".

Point Number

602.11

Summary of Decision Requested:

Amend Rule 27.2.6 P1(a) and P2 Noise - Other than Taxiways, as follows:

P1 (a) Noise from any activity in PRECINCT B must not exceed the following noise limits when measured at the notional boundary of a site within the Rural Zone or Village Zone....

P2 (a) Noise from any activity in PRECINCTS C OR D must not exceed the following noise limits when measured at the notional boundary of any site in the Rural zone or Village Zone outside of the Te Kowhai Airpark Zone ...

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Village Zone is located near Te Kowhai Airpark and should therefore be included in this noise rule.

Point Number

602.12

Summary of Decision Requested:

Amend Rule 27.2.7 P1 (a)(ii) Noise - Taxiways, as follows:

(ii) When measured at the notional boundary of any other site in the Rural Zone or Village Zone ...

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Village Zone is near Te Kowhai Airpark and should therefore be included in this noise rule.

Point Number

602.13

Summary of Decision Requested:

Amend Appendix 9: Te Kowhai Airfield, so that it carries over the existing Obstacle Limitation Surfaces in the Operative Waikato District Plan, which satisfies the requirement in the CAA Advisory Circular AC 139-7 Section 3.2 Day VFR Runway.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Obstacle Limitation Surfaces (OLS) in the Operative Waikato District Plan satisfy the Civil Aviation Authority's Advisory Circular AC 139-7 section 3.2 Day VFR Runway.
- Lot 2 DP 456538 (CRF 590290) is affected by the proposal to lower the OLS to satisfy the Civil Aviation Authority's Advisory Circular AC 139-7 section 3.3 Night or instrument approach runway.
- This means a reduction in the potential building height (i.e. where the OSL is lower than the zone limit of 7.5m) and a large number of trees that breach the proposed OSL, notwithstanding that they would have existing use rights under section 10 of the Resource Management Act.
- While consultation between this submitter and Te Kowhai Airpark landowners is on-going, there is not yet any understanding or agreement as to how these breaches would be managed in the future.

Point Number

602.14

Summary of Decision Requested:

Amend Rule 18.1.2 P2 Permitted Activities, as follows:

Located above ground floor level exclusive of any entrance lobby, stairwell, lift, vehicle access, parking, manoeuvring or service court.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Ancillary residential activities on the ground floor are inevitable and should not require resource consent as a non-complying activity.

Point Number

602.15

Summary of Decision Requested:

Amend Rule 18.1.3 RD1 (b) Restricted Discretionary Activities, as follows:

(b) The multi-unit development must be located above the ground floor level exclusive of any entrance lobby, stairwell, lift, vehicle access, parking, manoeuvring or service court.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Ancillary residential activities on the ground floor are inevitable and should not require resource consent to a non-complying activity.

Point Number

602.16

Summary of Decision Requested:

Amend Rule 18.1.3 RD1 (e) Restricted Discretionary Activities, by adding text to RD1 (e), as follows:

(e) A communal service court is provided comprising:

A. a minimum area of 20m²; and

B. a minimum dimension of 3m;

Or alternatively a private service court is provided for each residential unit comprising:

A. a minimum area of 10m²; and

B. a minimum dimension of 2.5m.

Decision Reasons:

- Standards are required for service courts to provide clarity.

Point Number

602.17

Summary of Decision Requested:

Amend Rule 18.1.3 Restricted Discretionary Activities, by deleting RD1 (c) and replacing with the following minimum floor area requirements:

(c) A detailed site plan depicting the proposed title boundaries for each residential unit and any common areas (including access and services) must be provided, ensuring that a freehold (fee simple) or unit title subdivision complies with Rule 18.1.2 (Subdivision of multi-unit developments).

The floor area of any unit or apartment in a Multi-Unit Development must comply with the following:

<u>Unit or Apartment</u>	<u>Minimum Floor Area</u>
<u>Studio unit</u>	<u>35m²</u>
<u>1 bedroom unit</u>	<u>45m²</u>
<u>2 bedroom unit</u>	<u>70m²</u>
<u>3 or more bedroom unit</u>	<u>90m²</u>

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The multi-unit developments currently contained in the subdivision rules should be within the land use section. The requested unit floor areas are consistent with those in Hamilton City.

Point Number 602.18

Summary of Decision Requested: **Amend** Rule 18.1.3 RD1 (f) Restricted Discretionary Activities, as follows:

<u>Residential unit</u>	<u>Minimum Living Court Area</u>	<u>Minimum dimension</u>
<u>Studio unit or 1 bedroom</u>	<u>10m²</u>	<u>2m</u>
<u>2 or more bedroom</u>	<u>15m² <u>12m²</u></u>	<u>2m</u>
<u>Communal living court</u>	<u>10m² per unit</u>	<u>2m</u>

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The requested living court areas are consistent with those in Hamilton City.

Point Number 602.19

Summary of Decision Requested: **Amend** Rule 18.1.5 NC2 Non-Complying Activities, as follows:

NC2 Residential activity on the ground floor exclusive of any lobby, stairwell, lift, vehicle access, parking, manoeuvring or service court.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Ancillary residential activities on the ground level are inevitable and should not require resource consent as a non-complying activity.

Point Number 602.20

Summary of Decision Requested: **Amend** Rule 18.1.5 NC3 Non-Complying Activities, as follows:

NC3 A multi-unit development located on the ground floor exclusive of any entrance lobby, stairwell, lift, vehicle access, parking, manoeuvring or service court.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Ancillary residential activities on the ground floor are inevitable and should not require resource consent as a non-complying activity.

Point Number 602.21

Summary of Decision Requested: **Amend** Rule 18.2.8 P1(a)(i) Outdoor storage, as follows:

(i) Be associated with the activity, operating from the site.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The word 'activity' is missing from this sentence.

Point Number 602.22

Summary of Decision Requested: **Amend** Rule 18.3.4 P1(a) Display windows and building facades, as follows:

(a) Any new building façade adjoining a road boundary, or alteration of an existing building façade adjoining a road boundary, must comply with the following conditions:

(i) Not be set back from the road boundary at ground floor level; and

(ii) Provide display windows comprising at least 50% of the building façade at ground floor level.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The display window interface is only relevant to facades facing a road boundary and at ground floor level only.

Point Number 602.23

Summary of Decision Requested: Amend Rule 18.3.8 P1(a)(i) Dwelling, as follows:
(i) The dwelling must not be located at ground level exclusive of any entrance lobby, stairwell, lift, vehicle access, parking, manoeuvring or service court.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Ancillary residential activities on the ground floor are inevitable and should not require resource consent as a non-complying activity.

Point Number 602.24

Summary of Decision Requested: Amend Rule 18.3.9 P1(a)(iii) Living court, as follows:
(iii) It is located on a balcony containing at least 10m² and with a minimum dimension of 2m, +5m² and a circle with a diameter of at least 2.4m.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Consistency is required with the multi-unit development standards.

Point Number 602.25

Summary of Decision Requested: Amend Rule 18.4.1 RD1(a)(i) Subdivision - general, as follows:
(a) Subdivision shall comply with all of the following conditions:
(i) Proposed lots shall have a minimum size of 225m² net site area, with the exception of access or utility allotments, ~~or~~ reserves to vest, or a Unit Title subdivision of existing lawfully established buildings;
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Rule 18.3.3 anticipates small tenancies in the Town Centre Zone. Individual tenancies should be able to be held in unit title tenure.

Point Number 602.26

Summary of Decision Requested: Amend Rule 18.4.2 RD1(a)(i) Subdivision - Multi-unit subdivision, as follows:
(i) An application for land use consent under Rule 18.1.3 (Multi-Unit Development) must either accompany the subdivision application or have been granted resource consent by Council. The subdivision (including boundaries for each residential unit and any common areas including access and services) shall be in accordance with the land use consent.
AND
Delete Rule 18.4.2 RD1(a)(iii) Subdivision-Multi Unit Subdivision.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Unit sizes should be established through the land use consent process. A subdivision should be in accordance with the approved land use.

Point Number 602.27

Summary of Decision Requested: Add a definition of "real estate sign" to Chapter 13 Definitions, as follows:
A real estate sign advertising a property or business for sale, for lease, for rent or by any other such method.
AND
Add a definition for "Header Real Estate Sign" in Chapter 13 Definitions.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Real estate signs are not currently defined and they can include more than just for sale as per the notified rule.
- A header sign can be used for the sale of a rear site off a private lane. In this situation, the sign needs to be located on another property to indicate that the property for sale is down the private lane.

Point Number 602.28

Summary of Decision Requested: Amend Rule 16.2.7.1 P3(a) Sign - general as follows:
(a) Any real estate ~~for sale~~ sign relating to the site on which it is located must comply with all of the following conditions:
(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;
(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;
(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;
~~*(iv) The sign is not illuminated;*~~
~~*(v) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;*~~
~~*(vi) The sign does not project into or over road reserve.*~~
(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.
AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number

602.29

Summary of Decision Requested:

Amend Rule 17.2.7.1 P3 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

~~(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~

~~(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~

~~(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~

~~(iv) The sign is not illuminated;~~

~~(v) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~

~~(vi) The sign does not project into or over road reserve.~~

~~(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number

602.30

Summary of Decision Requested:

Amend Rule 18.2.7.1. P3 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

~~(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~

~~(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~

~~(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~

~~(iv) The sign is not illuminated;~~

~~(v) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~

~~(vi) The sign does not project into or over road reserve.~~

~~(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number

602.31

Summary of Decision Requested:

Amend Rule 19.2.6.1. P3 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

~~(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~

~~(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~

~~(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~

~~(iv) The sign is not illuminated;~~

~~(v) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~

~~(vi) The sign does not project into or over road reserve.~~

~~(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number 602.32

Summary of Decision Requested: **Retain** the proposed Village zoning of the two titles located at 702 Horotiu Road (Lot 2 DP 456538) and 730 Horotiu Road (Lot 3 DP 353526);

AND

Amend the extent of the Obstacle Limitation Surface as a consequential amendment.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The Village Zone allows for large lot residential development and is consistent with the Future Proof settlement pattern which identifies Te Kowhai as a growth centre.

Point Number 602.33

Summary of Decision Requested: **Add** the following terms and definitions to Chapter 13 Definitions:

- Identified Area
- Boundary adjustment
- Wastewater treatment plant
- General aviation
- Recreational flying
- Flight training school
- Circuit training
- Community scale wastewater system
- Wastewater treatment plant
- Real estate header sign

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Not having definitions for these terms leads to ambiguity and uncertainty.

Point Number 602.34

Summary of Decision Requested: **Amend** Policy 4.1.5(c) - Density, as follows:

(c) Achieve a minimum density of 8-10 households per hectare in the Village Zone where ~~public~~ reticulated services can be provided.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is feasible for development in the Village Zone to be serviced by privately owned and managed reticulation (i.e. community scale) and therefore the policy should not be limited to publicly owned infrastructure networks.

Point Number 602.35

Summary of Decision Requested: **Amend** Policy 4.1.17(a) - Te Kowhai, as follows:

(a) The scale and density of residential development in Te Kowhai Village Zone achieves:

(i) Lower density (3000m2 ~~sections-lots~~) where the development can be serviced by on-site non-reticulated wastewater, ~~water and stormwater networks~~; or

(ii) higher density (1000m2 ~~sections-lots~~) where the development can be serviced by ~~public~~ reticulated wastewater, ~~water and stormwater networks~~;

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is feasible for development in the Village Zone to be serviced by reticulation that is privately owned and managed (i.e. community scale) and therefore this policy should not be limited to publicly owned and managed infrastructure networks.
- The term "sections" is not defined and should be replaced by the defined term "lot".

Point Number 602.36

Summary of Decision Requested: **Amend** Policy 4.3.2(a)(iii) - Character, as follows:

(iii) Recognises lower levels of infrastructure and in some locations the absence of ~~Council~~ reticulated wastewater services.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Reticulated wastewater services are anticipated in the future for Te Kowhai and Tuakau.

Point Number 602.37

Summary of Decision Requested: **Add** clauses to Policies 9.2.2.1 - Airpark standards as follows:

(a) Manage adverse airpark effects through the application of general and airpark-specific performance standards including:

(i) Noise

(ii) Hazardous substances;

(iii) Building setbacks;

(iv) Minimum site areas; ~~and~~

(v) Subdivision allotment size;

(vi) Management Plan based on Fly Neighbourly principles;

(vii) Hours of operation; and

(viii) Maximum aircraft movements.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Adherence to 'Fly Neighbourly' principles will ensure that the operation of aircraft recognises the issues with flying in and around noise-sensitive areas.
- A proactive approach should be taken by managing the type of, and repetitive nature of, aircraft noise. Further reading can be found in the NZ Aviation Industry Association Environmental Code of Practice and the Helicopter Association International (HAI) 'Fly Neighbourly Guide'.

Point Number 602.38

Summary of Decision Requested: Amend Rule 14.3.1.8 P12 Permitted Activities, as follows:

14.3.1.8

...

(2) Rule 14.3.1.8(1)(a) does not apply to any allotment that is serviced by a site-contained wastewater system in accordance with Rule 14.1.1.3; and Rule 14.3.1.8(1)(b) does not apply where reticulated water supply is unavailable.

(3) Within all zones, except the Rural, Village and Country Living Zones, the water supply required under Rule 14.3.1.8(1)(b) must be adequate for fire fighting purposes.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- In some situations, water supply will be from roof water harvesting or a bore and will not be provided by a service connection at the boundary. Like the Rural and Country Living Zones, water supply in the Village Zone may not be pressurised.

Point Number 602.39

Summary of Decision Requested: Retain Rule 14.1.1.3 P3(a)(ii) Permitted Activities, which allows for connections to community-scale wastewater systems.

Decision Reasons:

- This clause allows for a range of wastewater solutions to be considered at the time of subdivision or development.

Point Number 602.40

Summary of Decision Requested: Delete Rule 14.1.1.8 relating to P8 Storm water ponds or wetlands.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Stormwater ponds and wetlands are not buildings and should not be subject to building coverage provisions.

Point Number 602.41

Summary of Decision Requested: Add Village Zone to Rule 14.1.1.3 D2 Wastewater treatment plants.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- A wastewater management plan may need to be established in the Village Zone to service proposed development and this should be considered as a discretionary activity.

Point Number 602.42

Summary of Decision Requested: Delete Rule 14.1.1.4 NC2 (xxi) which refers to the Village Zone.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- A wastewater management plant may need to be established in the Village Zone to service development and this should be considered as a discretionary activity rather than a non-complying activity.

Point Number 602.43

Summary of Decision Requested: Amend Rule 14.12.1.2 P2(1)(i) On-site parking and loading, as follows:

(i) On-site car parking spaces and loading bays are not required on sites with ~~side~~ frontages to the following.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Corner sites in town centres should also be exempt from providing parking and loading as they benefit from on-street provisions in the same way as other main street properties.

Point Number 602.44

Summary of Decision Requested: **Amend** Table 14.12.5.14 Access and road conditions, to require the following minimum access widths for the Village and Residential Zones:

- 1 to 4 lots = 3.6m
- 5 to 8 lots = 4.5m

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified access width (8 metres) is excessive and will result in inefficient use of land.

Point Number 602.45

Summary of Decision Requested: **Amend** Table 14.12.5.7 - Required parking spaces and loading bays, so that the calculation for the minimum required parking spaces for a retailing activity reads, as follows:

Retail activity 1 car space per ~~30m²~~ 45m² GFA, including indoor and outdoor retail area.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The calculation for retail activities should be carried over from the Operative Waikato District Plan (Waikato Section).

Point Number 602.46

Summary of Decision Requested: **Add** a new rule to Rule 24.1.1 Permitted Activities for "A new retirement village or alterations to an existing retirement village" and appropriate activity-specific conditions.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Retirement villages are an appropriate land use in the Village Zone.

Point Number 602.47

Summary of Decision Requested: **Delete** Rule 24.2.4.1 P1(a)(i) Earthworks - General.

AND

Delete Rule 24.2.1 P3(a)(iv) Earthworks - General.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Earthworks within 1.5m of a boundary are inevitable and even the most minor activity, such as digging a posthole, would trigger the requirement for resource consent.

Point Number 602.48

Summary of Decision Requested: **Delete** Rule 24.2.4.1 NCI Earthworks - General.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The importation of cleanfill is provided for as a permitted activity by other rules (P2 and P3).

Point Number 602.49

Summary of Decision Requested: **Amend** Rule 24.3.5 P1 and P2 Building coverage, as follows:

P1 On a lot connected to ~~public reticulated~~ wastewater ~~and a water supply~~, the total building coverage must not exceed 40%.

P2 On a lot not connected to ~~public reticulated~~ wastewater ~~and a water supply~~, the total building coverage must not exceed 20%.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is feasible for development in the Village Zone to be serviced by reticulated services that are privately owned (i.e. community scale) and therefore this provision should not be limited to publicly owned infrastructure networks.

Point Number 602.50

Summary of Decision Requested: **Amend** Rule 20.2.7.1. P3 (a) Signs - general, as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;

(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;

(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;

~~##~~ (v) The sign is not illuminated;

~~##~~ (y) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;

~~##~~ (vi) The sign does not project into or over road reserve.

(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number

602.51

Summary of Decision Requested:

Amend Rule 21.2.7.1. P3 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;

(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;

(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;

~~##~~ (v) The sign is not illuminated;

~~##~~ (y) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;

~~##~~ (vi) The sign does not project into or over road reserve.

(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number

602.52

Summary of Decision Requested:

Amend Rule 22.2.6.1. P3 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;

(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;

(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;

~~##~~ (iv) The sign is not illuminated;

~~##~~ (v) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;

~~##~~ (vi) The sign does not project into or over road reserve.

(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number

602.53

Summary of Decision Requested:

Amend Rule 23.2.6.1. P3 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

(i) There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;

(ii) There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;

(iii) There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;

~~##~~ (v) The sign is not illuminated;

~~##~~ (y) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;

~~##~~ (vi) The sign does not project into or over road reserve.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number 602.54

Summary of Decision Requested: Amend Rule 24.2.7.1. P3 (a) Signs - general, as follows:

- (a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:
- (i) ~~There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~
- (ii) ~~There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~
- (iii) ~~There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~
- ~~(iv) (y) The sign is not illuminated;~~
- ~~(v) (y) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~
- ~~(vi) (y) The sign does not project into or over road reserve.~~
- ~~(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number 602.55

Summary of Decision Requested: Amend Rule 26.2.11 P2 (a) Signs - general, as follows:

- (a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:
- (i) ~~There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~
- (ii) ~~There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~
- (iii) ~~There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~
- ~~(iv) (y) The sign is not illuminated;~~
- ~~(v) (y) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~
- ~~(vi) (y) The sign does not project into or over road reserve.~~
- ~~(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number 602.56

Summary of Decision Requested: Amend Rule 27.2.12 P3 (a) Signs - general as follows:

- (a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:
- (i) ~~There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~
- (ii) ~~There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~
- (iii) ~~There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~
- ~~(iv) (y) The sign is not illuminated;~~
- ~~(v) (y) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~
- ~~(vi) (y) The sign does not project into or over road reserve.~~
- ~~(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number 602.57

Summary of Decision Requested: Amend Rule 28.2.6.1 P2 (a) Signs - general as follows:

(a) ~~Any real estate 'for sale' sign relating to the site on which it is located~~ must comply with all of the following conditions:

(i) ~~There is no more than 1 sign per agency measuring 600mm x 900mm per road frontage of the site to which the sign relates;~~

(ii) ~~There is no more than 1 sign measuring 1800mm x 1200mm per site to which the sign relates;~~

(iii) ~~There is no more than 1 real estate header sign measuring 1800mm x 1200mm on one other site;~~

~~(iv) The sign is not illuminated;~~

~~(v) The sign does not contain any moving parts, fluorescent, flashing or revolving lights or reflective materials;~~

~~(vi) The sign does not project into or over road reserve.~~

(vii) Any real estate sign shall be removed from display within 60 days of sale/lease or upon settlement, whichever is the earliest.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The notified rules for real estate signs are too restrictive.
- Corner sites should be able to have additional sign opportunities without adversely affecting residential character and amenity.
- Allowance should be made for feature signs which are commonly used for properties going to auction or tender.
- Header signs should be able to be established on another sign (often on a high volume road) to direct purchasers to the site which is for sale (often on a low volume road).

Point Number 602.58

Summary of Decision Requested: Retain the provisions for dwellings in Table 14.12.5.7 Required Parking Spaces and loading bays.

Decision Reasons:

- The notified parking requirements for dwellings are appropriate.

Point Number 602.59

Summary of Decision Requested: Retain the provisions for multi-unit development in Table 14.12.5.7 Required for parking spaces and roading bays.

Decision Reasons:

- The notified parking requirements for multi-unit developments are appropriate.

Submitter Number: 603 **Submitter:** Helen Clotworthy

On behalf of: Pokeno Community Committee

Point Number 603.1

Summary of Decision Requested: Add to the Proposed District Plan the suggestions and concerns expressed by the Pokeno Community Group relating to the blueprint workshop.

Decision Reasons:

- The submitter understands there will be modifications to the District Plan and agree with the process and the variations put forward.

Point Number 603.2

Summary of Decision Requested: No specific decision sought, but submission agrees with the work being done on the Economic Corridor.

Decision Reasons:

- The submitter is hoping for a positive outcome for Pokeno.

Point Number 603.3

Summary of Decision Requested: Identify car and bus parking in Pokeno Town Centre.

Decision Reasons:

- No reasons provided.

Point Number 603.4

Summary of Decision Requested: Amend the Proposed District Plan to require residential car parking spaces to be located one block back from Great South Road, Pokeno (excluding parking spaces for hotel/motel accommodation).

Decision Reasons:

- No reasons provided.

Point Number 603.5

Summary of Decision Requested:	Retain the character statement for the Business Town Centre Zone/Pokeno Town Centre.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	604	Submitter:	Lee Slomp
Point Number	604.1		
Summary of Decision Requested:	Amend Rule 24.4.2 RD1 Subdivision - Te Kowhai and Tuakau to ensure that subdivision in Te Kowhai does not proceed until wastewater infrastructure is available to every property in Te Kowhai (existing, new and proposed capacity).		
Decision Reasons:	<ul style="list-style-type: none"> Wastewater infrastructure would enable better utilization of the land resource by enabling subdivision down to smaller lots. Current minimum lot size of 3000m2 means Te Kowhai will not achieve good growth, land utilization, and future optional sizes of properties (for less than 3000m2). With options for smaller property sizes the village can maintain its tone and not sprawl. 		

Submitter Number:	605	Submitter:	Wendy Harlock
Point Number	605.1		
Summary of Decision Requested:	Amend zoning of 183ha around the former Huntly East Mine at East Mine Road, Huntly to accommodate a multipurpose development, including a recreation and events zone alongside a housing zone.		
Decision Reasons:	<ul style="list-style-type: none"> Huntly needs to move ahead and the Kimihia Lakes Project will be a wonderful positive way to achieve this. The submission suggests the Kimihia Lakes Project could be similar to Rotorua's entertainment and adventure business. Huntly needs something to bring people to Huntly to see what it has to offer. Huntly needs to be a destination, not just a place people drive past. 		

Submitter Number:	606	Submitter:	Bill Wasley
Organisation:	Future Proof Implementation Committee		
Point Number	606.1		
Summary of Decision Requested:	Retain Section 1.4 Issues for Waikato district.		
Decision Reasons:	<ul style="list-style-type: none"> The issues are consistent with the principles outlined in section 1.3 of the Future Proof Strategy. The submitter particularly supports the issues identified in section 1.4.4 on the urban environment. 		

Point Number	606.2		
Summary of Decision Requested:	Retain the strategic directions and objectives in Section 1.12, but move these so that they are contained in a single chapter with other strategic directions and objectives from various chapters.		
Decision Reasons:	<ul style="list-style-type: none"> There is benefit in having all strategic directions and objectives for the Waikato District contained in a single chapter to provide a strategic overview for the whole of the District Plan. For example, some of these strategic directions and objectives are hidden in Chapter 1 - Introduction. 		

Point Number	606.3		
Summary of Decision Requested:	Amend Section 1.10.2.5 (b) Future Proof Growth Strategy and Implementation Plan, as follows: <i>(b) The Future Proof Growth Strategy identifies fifty thirty year land supply needs in the subregion and proposes a sequenced release and development of the land according to its ability to be serviced by appropriate infrastructure and to be funded equitably. The original land use and settlement pattern has been incorporated in the Waikato Regional Policy Statement. This district plan gives effect to this settlement pattern through adopting policy direction, rules, and a zoning pattern for the Waikato district that is consistent with the WRPS and the Future Proof Growth Strategy.</i>		
Decision Reasons:	<ul style="list-style-type: none"> The Future Proof Strategy was updated in 2017 and the timeframe for the settlement pattern has shifted to 30 years to be consistent with the National Policy Statement on Urban Development Capacity. 		

Point Number	606.4		
Summary of Decision Requested:	Retain Section 4.1 Strategic Direction, except for the amendments sought below; AND Amend Section 4.1 Urban Environment and the policies for each of the urban areas, to reflect the Hamilton-Auckland Corridor Plan as required.		
Decision Reasons:	<ul style="list-style-type: none"> The strategic direction in section 4.1 is consistent with the Future Proof Strategy and Future Proof Housing and Business Development Capacity Assessment. The policies for each of the urban areas are consistent with the direction set out in the Future Proof Strategy. FutureProof also wishes to signal that the Proposed Plan may need to be updated to reflect the outcome of the work currently underway for the Hamilton-Auckland Corridor Plan. 		

Point Number 606.5

Summary of Decision Requested: **Amend** Section 4.1 Strategic Direction in Chapter 4 Urban Environment, so that a distinction is made between the growth of towns and villages and a greater concentration of growth in the townships.

Decision Reasons:

- The focus of future urban growth should be in the townships.
- Greater distinction is needed between towns and villages.
- The submitter supports the strategic direction outlined in Section 4.1.

Point Number 606.6

Summary of Decision Requested: **Amend** the Proposed District Plan following a review of the extent of live zoning and its ability to be serviced with infrastructure;
AND
If the Zoning approach is retained, **add** stronger development staging rules which are linked to the provision of infrastructure and the development of infrastructure, including Chapter 4 Urban Environment, Chapter 16 Residential Zone, Planning Maps and any other linked chapters.

Decision Reasons:

- No reasons provided.

Point Number 606.7

Summary of Decision Requested: **Review** the extent of the Village Zones in collaboration with Hamilton City Council, with consequential amendments to Chapter 4 Urban Environment and Chapter 24 Village Zone.

Decision Reasons:

- The extent of Village zoning around key growth areas could undermine the objective of having a more compact and concentrated urban form.
- The minimum density of 8-10 households per hectare where reticulation can be provided will be much lower if on-site servicing occurs which could encourage a dispersed land use pattern around main townships and compromise efficient infrastructure servicing.
- Further investigation and structure planning should be undertaken for these areas which could result in a Residential Zone, rather than Village Zone, such as at Tuakau.
- Waikato District Council and Hamilton City Council should work closely on this matter, particularly as it relates to the Hamilton Area of Interest map provided with Hamilton City Council's submission so that future strategic land use plans are not compromised.

Point Number 606.8

Summary of Decision Requested: **Amend** 4.1.16 Policy - Horotiu and associated rules and maps, following a review of residential growth at Horotiu that is the result of the demand for industrial land and the need for further cross-boundary and infrastructure investigations.

Decision Reasons:

- The Future Proof Strategy and the Waikato Regional Policy Statement identify Horotiu as a Strategic Industrial Note.
- Land at Horotiu therefore needs to be safeguarded to ensure that sufficient industrial land is provided.
- Providing additional residential development in this location is therefore opposed until Future Proof works with Council to achieve better integration between land use and infrastructure and ensure that environmental effects are managed.

Point Number 606.9

Summary of Decision Requested: **Amend** the Proposed District Plan provisions and maps to provide for the outcomes identified in the Auckland-Hamilton Corridor Plan, the Future Proof Strategy Phase 2 Update and Waikato District Council's local area blueprints.

Decision Reasons:

- The submitter wishes to signal that work on these documents may result in significant changes to Waikato District's settlement pattern. The more minor amendments should be incorporated in onto the Proposed District Plan.

Point Number 606.10

Summary of Decision Requested: **Retain** Objective 4.2.16 Housing options.

Decision Reasons:

- This is consistent with a key Future Proof principle relating to providing housing choices.

Point Number 606.11

Summary of Decision Requested: **Amend** the Proposed District Plan, to allow for higher density and mixed use developments close to transport hubs, especially train stations that have been signalled for potential re-opening, town centres and community hubs, through amendments to the following parts of the Proposed District Plan:

- Policy 4.1.5 Density
- Chapter 16 Residential Zone
- Chapter 17 Business Zone
- Chapter 18 Business Centre Zone
- Planning Maps; and
- Any other relevant chapters.

Decision Reasons:

- The submitter supports the additional land identified in key growth areas such as Tuakau, Pokeno and Te Kauwhata. This is in line with the Future Proof Strategy (see section 6.2 on Growth Management Areas), the Regional Policy Statement (see Policy 6.14 and section 60, table 6-1) and work completed as part of the Northern Waikato Programme Business Case with the NZ Transport Agency.
- The submitter has concerns around the approach of 'live' zoning significant areas of land rather than undertaking a more staged approach, e.g. through the use of future urban zones. Some of the areas that have been zoned for development have uncertainties around provision of infrastructure.
- Policy PA1 of the National Policy Statement on Urban Development Capacity requires that development capacity must be feasible, zoned and serviced with development infrastructure for the short term, or that the funding for development infrastructure required must be identified in the long-Term Plan or Infrastructure Strategy for the medium and long-term.
- It is important that growth areas are adequately planning for and funded.

- A piecemeal approach to infrastructure servicing, including on-site infrastructure, could compromise the ability of these areas to grow in the future.
- There are also significant funding implications of not servicing development or undertaking a staged approach, this includes the ability to collect appropriate development contributions under the local Government Act 2002.
- An integrated approach to land use, infrastructure and funding is consistent with Future Proof Strategy principles which set out that the settlement pattern should align with the partners long-term plans and that development should be encouraged within established settlements to support existing infrastructure (Section 1.3 of the Future Proof Strategy 2017).

Point Number 606.12

Summary of Decision Requested: Consider alternatives to live zoning including:

- Using a Rural Zone with an overlay similar to Hamilton's Urban Expansion overlay
- Applying an urban zone with an overlay that signals that additional subdivision and development will not be considered until there is certainty about infrastructure provision.
- A new Urban Expansion Zone with its own suite of provisions for managing land use and subdivision
- A Future Urban Zone to signal additional land would need to be serviced with infrastructure and structure planned before it is zoned for urban development.

Decision Reasons:

- Future Proof has concerns around the approach of 'live' zoning significant areas of land rather than undertaking a more staged approach, e.g. through the use of future urban zones. Some of the areas that have been zoned for development have uncertainties around provision of infrastructure.
- If the live zoning approach is to be used then the Council should consider a much stronger approach to staging which is tied to the provision of infrastructure and structure planning.
- Policy PA1 of The National Policy Statement on Urban Development Capacity requires that development capacity must be feasible, zoned and serviced with development infrastructure for the short term, or that the funding for development infrastructure required must be identified in the long-Term Plan or Infrastructure Strategy for the medium and long-term.
- It is important that growth areas are adequately planned for and funded. A piecemeal approach to infrastructure servicing, including on-site infrastructure, could compromise the ability of these areas to grow in the future. There are also significant funding implications of not servicing development or undertaking a staged approach, this includes the ability to collect appropriate development contributions under the local Government Act 2002. An integrated approach to land use, infrastructure and funding is consistent with Future Proof Strategy principles which set out that the settlement pattern should align with the partners long-term plans and that development should be encouraged within established settlements to support existing infrastructure.

Point Number 606.13

Summary of Decision Requested: **Amend** the provisions relating to the growth of Te Kowhai (including Section 4.3 Village Zone, Policy 4.3.3 Future development - Te Kowhai, Chapter 24 Village Zone, Chapter 27 Te Kowhai Park Airpark Zone and planning maps) by restricting additional growth at Te Kowhai until detailed structure planning work is undertaken and servicing is in place. An infrastructure plan for reticulated services, transport and community facilities is needed.

Decision Reasons:

- Further investigative work is required regarding the provision of infrastructure for Te Kowhai as the Future Proof Strategy identifies this village for future development. Development needs to be of a form and scale that allows integration into Hamilton City's infrastructure network in the future.
- This requires further study of the structure plan for Ngaruawahia and its surrounds, the Te Kowhai Blueprint, development of a detailed structure plan/infrastructure plan for a 30 year time frame and the need to provide infrastructure before development occurs.

Point Number 606.14

Summary of Decision Requested: **Amend** (as necessary) Chapter 5 Rural Environment, Chapter 22 Rural Zones and Planning Maps after undertaking further work on the objectives, policies, rules and methods that cover the cross boundary area between Hamilton City and Waikato District to manage this area appropriately.

Decision Reasons:

- The submitter supports the idea of a cross boundary area between Hamilton City and Waikato District such as that shown on the Hamilton area of interest map attached to the Hamilton City Council submission. However, this will require further investigation, in particular the cross-boundary land use effects.
- Any cross boundary or area of influence will need to be determined via an evidence base. This is fundamental given the third party rights that the Resource Management Act confers.
- Objectives, policies, rules and methods need to emanate from the evidence.
- There needs to be a strategic, integrated approach to this work and the submitter wishes to work alongside the Hamilton City Council, and the Waikato District Council to assist this outcome.

Point Number 606.15

Summary of Decision Requested: **Amend** Chapter 20 Industrial Zone, Chapter 21 Industrial Zone Heavy and the Planning Maps as a result of reviewing the amount of land zoned at Horotiu for industrial purposes and market demand.

AND

Any consequential amendments to any other relevant plan provisions.

Decision Reasons:

- There may be insufficient land at Horotiu for industrial purposes given market demand.
- The Future Proof Housing and Business Development Capacity Assessment has found that industrial land demand in Waikato District is high. The Future Proof Strategy identifies that Horotiu will become a substantial inland freight hub and employment area.
- This requires a staged development for a large land area. Future Proof and the Waikato Regional Policy Statement provide for additional industrial land to be added and brought forward for development if certain criteria are met.

Point Number 606.16

Summary of Decision Requested: **Amend** Rule 22.1 Land Use - Activities, by changing the activity status for non-rural activities in the Urban Expansion Area to prohibited.

Decision Reasons:

- The Urban Expansion Area has been in place for some time as it reflects the strategic agreement between Waikato District Council and Hamilton City Council.
- It is important that this land is not compromised through fragmentation or establishment of non-rural activities.
- The existing prohibited rule therefore needs to be carried over from the Operative Waikato District Plan.

Point Number	606.17
Summary of Decision Requested:	Amend Chapters 4, 5, 14, 16 - 24 and Planning Maps following a review of provisions relating to cross boundary integration to ensure that pressures from Auckland and Hamilton are managed. AND Any consequential amendments to any other provisions.
Decision Reasons:	<ul style="list-style-type: none"> The submitter notes and supports statements in the Proposed District Plan relating to cross boundary pressures with both Auckland and Hamilton. Cross boundary issues are an important feature of the Future Proof Strategy 2017. Waikato District Council should continue to work closely with Auckland Council and Hamilton City Council. In particular on any specific actions arising from the Hamilton-Auckland Corridor Plan. For success these will require a partnership approach. Through the Future Proof partnership, Waikato DC and Hamilton City Council should work closely on the area of interest to Hamilton City. This wider partnership also involves the Waikato Regional Council, Waipa DC, the NZ Transport Agency and Tangata whenua.

Submitter Number:	607	Submitter:	Stephanie Hooper
Point Number	607.1		
Summary of Decision Requested:	Amend Rule 16.1.2 Permitted Activities by adding childcare facility as a permitted activity.		
Decision Reasons:	<ul style="list-style-type: none"> Pokeno Playcentre is due to lose its facility as Pokeno School is reclaiming the land for expansion. Early childcare education allows great benefits for preschools and families within the Pokeno community. The Plan permits that early childcare education is in the Business Zone only. Within the Business Zone adds further risk to children on the road during drop offs and pick up times. 		
Point Number	607.2		
Summary of Decision Requested:	Amend Rule 22.1.2 Permitted Activities by adding childcare facility as a permitted activity.		
Decision Reasons:	<ul style="list-style-type: none"> Pokeno Playcentre is due to lose its facility as Pokeno School is reclaiming the land for expansion. Early childcare education allows great benefits for preschools and families within the Pokeno community. The Plan permits that early childcare education is in the Business Zone only. Within the Business Zone adds further risk to children on the road during drop offs and pick up times. 		

Submitter Number:	608	Submitter:	Michael Draper
Point Number	608.1		
Summary of Decision Requested:	Retain the extent of the Proposed Residential zoning (with particular reference to northern Ngaruawahia).		
Decision Reasons:	<ul style="list-style-type: none"> Residential growth to the north of Ngaruawahia and in the vicinity of Starr Road represents a sensible approach given connectivity to transport corridors and integration with existing residential land use to the south. The land surrounding Starr Road contains an area that used to contain intensive farming activities however that particular land use has now ceased. The flat developable nature of land in the vicinity of Starr Road will integrate with residential land use to the south-west and will cater for urban development demand. 		

Submitter Number:	609	Submitter:	Helen Thomas
Point Number	609.1		
Summary of Decision Requested:	Amend the current rural zoning of 134 Logan Road, Buckland, to become Country Living Zone.		
Decision Reasons:	<ul style="list-style-type: none"> Surrounding area to the North and West within the Auckland Council Territory boundary, under the Auckland Unitary Plan, has been zoned future urban. Potential for a residential environment in this locality, rather than a large open space rural environment. The areas close proximity to Bucklands Village and Pukekohe means a change of zoning from Rural to Country Living Zone is a logical progression. 		

Submitter Number:	610	Submitter:	Ken Barry
Point Number	610.1		
Summary of Decision Requested:	No specific decision sought, but submission refers to property located at 45 Checkley Road, Te Uku, and references coastal/rural zoning, high quality soil and hill country.		
Decision Reasons:	<ul style="list-style-type: none"> Struggle to farm profitably under increased costs. Increasing requirements to require hill country erosion problems, fencing waterways and planting out areas. 		

Submitter Number:	611	Submitter:	David Gibberd
Point Number	611.1		
Summary of Decision Requested:	Amend the Proposed District Plan so that further restrictions are not imposed on the farming operation at 53B McGovern Road, Taniwha, Waerenga.		
Decision Reasons:	<ul style="list-style-type: none"> • Submitter has chosen not to eradicate several native areas and have fenced some to prevent stock from entering. • Have also fenced some waterways. • Do not think it is appropriate that the Waikato District Council is wanting to impose further restrictions on our farming operation. • Submitter disagrees with the limiting of track and road maintenance per year on their farm, as this is necessary for Health and Safety management of their operation. 		

Submitter Number:	612	Submitter:	CDL Land New Zealand Ltd
Point Number	612.1		
Summary of Decision Requested:	Amend Rule 22.4.1.1 PR1 Prohibited Subdivision, to change the activity status for subdivision in the Urban Expansion Area to Discretionary; AND Add the following standards: <u>Subdivision within the Urban Expansion Area must comply with the following conditions:</u> - <u>(g) The Record of Title to be subdivided must have been issued prior to 18 July 2018.</u> - <u>(b) The Record of Title to be subdivided must be at least 1.6ha.</u> - <u>(c) The proposed subdivision must create no more than 1 additional record of title.</u> - <u>(d) The additional Record of Title must contain a lawfully established dwelling existing as at 18 July 2018.</u> - <u>(e) The additional Record of Title must have a net area between 3000m² and 1ha.</u> - <u>(f) A consent notice must be registered on the Record of Title for the balance lot advising that no additional dwellings are permitted under Rules 22.3.1 and 22.3.2.</u>		
Decision Reasons:	<ul style="list-style-type: none"> • The submitter has recently acquired a large landholding in the R2 growth cell, situated between the eastern boundary of Hamilton City and the Waikato Expressway. • In the future it is intended for R2 to be transferred from Waikato District to Hamilton City Council, with provisions in the Proposed Plan seeking to protect the Urban Expansion Area for future development, of which the submitter is fully supportive. • Concerned that prohibition of all subdivision in the Urban Expansion Area is a blunt tool and does not allow for interim subdivision, which is capable of facilitating better long term urban growth outcomes via aggregation of land. • Land in the Urban Expansion Area can potentially be aggregated for future development. • Overcome issues of land fragmentation and land banking by existing owners who want to remain in their dwellings. 		

Point Number	612.2		
Summary of Decision Requested:	Amend Rule 22.4.1.1 PR3 (b) Prohibited Subdivision, to include the following provisions: <u>(v) Subdivision within the Urban Expansion Area (Rule number TBC),</u> <u>(vi) Boundary Relocation (Rule 22.4.1.4),</u> <u>(vii) Rural Hamlet Subdivision (Rule 22.4.1.5),</u>		
Decision Reasons:	<ul style="list-style-type: none"> • As a consequence of amendment sought to Rule 22.4.1.1 PR1, within the Urban Expansion Area subdivision must be provided as an exception to PR3. • Boundary relocation and Rural Hamlet subdivision also needs to be provided as an exception as they should be able to occur irrespective of issuing of Record of Title. 		

Point Number	612.3		
Summary of Decision Requested:	Amend Rule 22.4.1.4 Boundary Relocation RD1, as follows: (a) A Boundary relocation must: (i) Relocate a common boundary or boundaries between two records of title that existed prior to 18 July 2018. (ii) The Records of Title must form a continuous landholding; (iii) Not result in additional lot <u>Records of Title.</u> (iv) Create one lot of at least 8000m ² <u>except in the Urban Expansion Area where one lot shall be at least 3000m².</u> (b) Council's discretion is restricted to the following matters: (i) subdivision layout and design including dimension, shape and orientation of the proposed lots; (ii) effects on rural character and amenity values; (iii) effects on landscape values; and (iv) potential for reverse sensitivity effects.		
Decision Reasons:	<ul style="list-style-type: none"> • Boundary location must occur irrespective of when Record of Title was issued. • Replacement of 'lot' in (iii) with 'Record of Title' enables boundary relocation to be given effect by way of amalgamation. • In the Urban Expansion Area, the size of one allotment should be encouraged to be as big as possible to facilitate better future urban growth opportunities. 		

Submitter Number:	613	Submitter:	Dave Norris
Organisation:	Kiwi Balloon Company		
Point Number	613.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Policy framework recognizes the significance of the existing aerodrome to the aviation community. • Objectives and policies align with the sustainability principles of the RMA. • Development represents a practical use of a scarce and limited resource. • Objectives and policies safeguard the future needs of the aviation community. • Policy framework provides for a diversity of residential and commercial opportunities. • Makes use of existing infrastructure, which cannot be easily replicated elsewhere. • Te Kowhai Airpark is and will remain a strategic site associated with hot air ballooning. 		
Point Number	613.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone, as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Provisions allow for flexibility of land use activity. • Proposed obstacle limitation surface (OLS) enables use of aerodrome for both VFR and IFR non-air transport operations. • Proposed obstacle limitation surface (OLS) enhances safety and functionality of Te Kowhai aerodrome. • Proposed zoning gives an opportunity to establish an integrated and unique airpark, able to take advantage of existing critical infrastructure and proximity to Hamilton. • Proposed airpark meets the niche requirements of the aviation community. • Provisions of Chapter 27 recognizes the distinct nature of the proposed airpark and its extreme scarcity as a physical resource. • Without such provisions, ongoing operational needs of the aerodrome would not be met. • Rezoning of Te Kowhai Aerodrome from 'Rural' to 'Airpark zone' is entirely appropriate. • Te Kowhai Airpark is and will remain a strategic site associated with hot air ballooning. 		
Submitter Number:	614	Submitter:	Neil & Margaret Dudley
Point Number	614.1		
Summary of Decision Requested:	Retain proposed Residential zoning at 7 Dromgools Road, Tuakau.		
Decision Reasons:	<ul style="list-style-type: none"> • Need for more residential sections. • Close proximity to both primary and secondary schools, sporting and recreational areas, and waste water disposal. • Ease of roading construction. 		
Submitter Number:	615	Submitter:	David & Jill Messent
Point Number	615.1		
Summary of Decision Requested:	Amend the zoning to allow for the Kimihia Lakes and Events Zone and special overlay at 191 Kimiha Road, Huntly.		
Decision Reasons:	<ul style="list-style-type: none"> • Enables further lake associated attractions. • Raise awareness of how uniquely appealing and welcoming Huntly is. • Seeing new development area has given a sense of appreciation for the owners foresight and incredible generosity. • Looking forward to others enjoying future views and activities alongside them. 		
Submitter Number:	616	Submitter:	Kim Bredenbeck
Point Number	616.1		
Summary of Decision Requested:	<p>Amend the Rural Zone of 183 hectares on East Mine Road, Huntly to a multi-purpose recreation and events zone alongside a residential zoning for the following properties:</p> <p>CFR 805391, CFR SA50A/762, CFR SA10/800, CFR 1955501, CFR SA 61B/799, CFR SA18B/1138, CFR SA30A/356, SA 40D/985, CFR SA251/176, SA 26C/345, SA 51/131</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The rezoning will provide the following benefits: <ul style="list-style-type: none"> - The designation of a multi-use or Mixed Use Development is key to success of this project for Huntly; - Significant opportunities for local youth; - Employment outcomes for locals; - Enhanced recreational lifestyles for all connecting the outdoors through water based activities; - The tourism potential of a key destination of the future; and - Huntly needs this to shift outside perceptions and instill local pride. 		
Submitter Number:	617	Submitter:	Nicole Falkner
Organisation:	Pokeno Playcentre		

Point Number 617.1
Summary of Decision Requested: Amend Rule 16.1.2 Permitted Activities, by adding childcare facility as a permitted activity.

Decision Reasons:

- Early childcare education provides a large benefit to the young, growing community of Pokeno.
- Appropriate for early childcare education centres to be located in Residential Zone, close to where people reside.
- Will not have adverse effects on residential activities.
- Only zone permitting early childcare education centres is the Business Zone, however the area is limited resulting in dangerous pick ups/drop offs.
- Losing current site due to expansion of school.

Point Number 617.2
Summary of Decision Requested: Amend Rule 22.1.2 Permitted Activities, by adding childcare facility as a permitted activity.

Decision Reasons:

- Early childhood education provides a large benefit to the young, growing community of Pokeno.
- Appropriate for early childcare education centres to be located in Residential Zone, close to where people reside.
- Will not have adverse effects on recreational activities.
- Only zone permitting early childcare education centres is the Business Zone, however the area is limited resulting in dangerous pick ups/drop offs.
- Losing current site due to expansion of school.

Submitter Number: 618 **Submitter:** William James Walker

Point Number 618.1
Summary of Decision Requested: Amend the zoning at East Mine Road, Huntly, to allow for the development of a multipurpose recreation and events zone, alongside a residential zoning for the following titles totalling 183ha:
CFR 805391, CFR SA50A/762, CFR SA10D/800, CFR 1955501, CFR SA61B/799, CFR SA 18B/1138, CFR SA 30A/356, SA 40D/985, SA 251/176, SA26C/345, SA 51/131.

Decision Reasons:

- Provides educational outcomes for youth.
- Provides significant employment opportunities.
- Improved recreational living and lifestyle for residents.
- Opportunity for Huntly to become a tourist destination.

Submitter Number: 619 **Submitter:** Dawn Walker

Point Number 619.1
Summary of Decision Requested: Amend the zoning at East Mine Road, Huntly, to allow for the development of a multipurpose recreation and events zone, alongside a residential zoning for the following titles totalling 183ha:
CFR 805391, CFR SA50A/762, CFR SA10D/800, CFR 1955501, CFR SA61B/799, CFR SA 18B/1138, CFR SA 30A/356, SA 40D/985, SA 251/176, SA26C/345, SA 51/131.

Decision Reasons:

- Provides educational outcomes for youth.
- Provides significant employment opportunities.
- Improved recreational living and lifestyle for residents.
- Opportunity for Huntly to become a tourist destination.

Submitter Number: 620 **Submitter:** Waikato District Heritage Forum

Point Number 620.1
Summary of Decision Requested: Add the Rangiriri Heritage Precinct Design Guide to the Proposed District Plan as currently included in the Operative District Plan (Rule 23.62 and Appendix D in Part 3) around the Rangiriri Hotel and village, Rangiriri Road, and Talbot Street.

Decision Reasons:

- Rangiriri is a significant part of Waikato District and NZ Heritage, with growing tourism opportunities.
- One professional opinion should not be sufficient for the Council to abandon the fostering of a heritage concept.
- Rangiriri's significant, small and confined village provides the opportunity for the Council to demonstrate its claims in Objective 7.1.1(a).

Submitter Number: 621 **Submitter:** Peter Varga

Point Number 621.1
Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- The airpark development will provide a unique environment which will allow like-minded people the opportunity to live and dream their passions.

- With this one-off special area, aviation will stay alive for generations to come.

Point Number 621.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark, as notified.

Decision Reasons:

- The airpark development will provide a unique environment which will allow like-minded people the opportunity to live and dream their passions.
- With this one-off special area, aviation will stay alive for generations to come.

Submitter Number: 622

Submitter: Ken Williamson

Point Number 622.1

Summary of Decision Requested: Retain the proposed zone changes in the District Plan, with specific reference to Great South Road and Kernott Road, Horotiu: CT References 789960, SAC30C/689, 749406.

Decision Reasons:

- Horotiu is a developing community and needs more amenities and residential housing as this area continues to grow.
- There is no value in industry being based in our Awa and the submitter supports the proposed zone change from Rural Residential to Residential as proposed in the District Plan.

Submitter Number: 623

Submitter: Paul Hoogeveen

Point Number 623.1

Summary of Decision Requested: Delete the Significant Natural Area from the property at 156 Paddy Road, Te Kauwhata.

Decision Reasons:

- This small area of the Significant Natural Area is poor quality vegetation with recent regrowth of undesirable species.

Point Number 623.2

Summary of Decision Requested: Delete the Outstanding Natural Feature from the property at 156 Paddy Road, Te Kauwhata.

Decision Reasons:

- The Outstanding Natural Feature is separate from the main wetland by the railway corridor and is not part of the wetland in a practical sense.

Submitter Number: 624

Submitter: Glenn Soroka & Louise Meredith

Organisation: Trustees of the Pakau Trust

Point Number 624.1

Summary of Decision Requested: Add new Rural Zone subdivision rules in Rule 22.4 Subdivision, to recognise Pakau Trust's residual entitlement of 35 Environmental Lots which can be used as transferable rural title rights as follows:

Rule 22.4.XX Pakau Trust Entitlement Rule

For the purpose of Rule 22.4.XX, 35 transferable rural lot rights exist, that were secured by the protection of 204 hectares of significant indigenous vegetation at Klondyke Road, Port Waikato. Those transferable rural lot rights may be utilised under Rule 22.4.XXX where:

(i) The number of transferable rural lot rights available, will reduce by the number utilised at each receiving property, when a survey plan is lodged for the subdivision approved at that receiving property;

(ii) A subdivision plan is only required for the receiver property;

(iii) Transferable rural lot rights cannot be generated on any other donor property.

Rule 22.4.XXX Transferable Rural Lot Right Subdivision

RD1

(a) Transferable Rural Lot Right Subdivisions utilising transferable rural lot rights under Rule 22.4.XX [Pakau Trust Entitlement Rule] must comply with all of the following conditions:

(i) The Record of Title to be subdivided must be 1 hectare or greater in area;

(ii) The additional lots must have a proposed area of between 2500m² and 1.6 hectares;

(iii) One transferable lot right originating under Rule 22.4.XX [Pakau Trust Entitlement Rule] shall be utilised for every two additional lots created on the receiver property;

(b) For the purposes of this rule a subdivision plan is required only for the receiver property and not the donor property.

(c) Council's discretion is restricted to the following matters on the receiving property;

(i) subdivision layout and design including dimensions, shape and orientation of the proposed lots;

(ii) effects on rural character and landscape values;

(iii) potential for reverse sensitivity effects;

(iv) extent of earthworks required for building platforms and accessways.

D1

Transferable rural lot right subdivision that does not comply with Rule 22.4.XXX RD1

AND

Amend the Proposed District Plan further with any necessary consequential or other relief that addresses Pakau Trust's concerns.

Decision Reasons:

- The Proposed District Plan fails to provide an appropriate opportunity for, and recognition of, the protection in perpetuity of significant indigenous vegetation.
- The cost to a property owner of protecting and maintaining, in perpetuity, significant stands of indigenous vegetation are substantial, in real financial terms.
- The property owner foregoes development potential, and subdivision of that property, where a significant environmental and community benefit is achieved by the protection of significant indigenous vegetation.
- In effect, the legal protection of significant indigenous vegetation provides a public benefit, at the expense of the private property owner. This should be recognised and compensated for.
- The subdivision application lodged in April 2012 secured Pakau Trust's entitlement to 64 Environmental Lots - 29 of which have been used and 35 remain to be used as transferable rural lot rights.
- Transferable rural lot rights enable an environmental feature to be protected while relocating the development potential elsewhere on appropriate receiver properties.
- Pakau Trust's position is unique.

Point Number

624.2

Summary of Decision Requested:

Add new Country Living Zone subdivision rules in Rule 23.4 Subdivision, to recognise Pakau Trust's residual entitlement of 35 Environmental Lots which can be used as transferable rural title rights, as follows:

Rule 23.4.XX Pakau Trust Entitlement Rule

For the purpose of Rule 23.4.XX, 35 transferable rural lot rights exist, that were secured by the protection of 204 hectares of significant indigenous vegetation at Klondyke Road, Port Waikato. Those transferable rural lot rights may be utilised under Rule 23.4.XXX where:

(i) The number of transferable rural lot rights available, will reduce by the number utilised at each receiving property when a survey plan is lodged for the subdivision approved at that receiving property;

(ii) A subdivision plan is only required for the receiver property;

(iii) Transferable rural lot rights cannot be generated on any other donor property;

Rule 23.4.XXX Transferable Rural Lot Right Subdivision

BDI

(a) Transferable Rural Lot Right Subdivisions utilising transferable rural lot rights under Rule 23.4.XX [Pakau Trust Entitlement Rule] must comply with all of the following conditions:

(i) All proposed lots must have a net site area of at least 2500m²;

(ii) Two additional lots can be created on the receiver property for every one transferable lot right originating under Rule 23.4.XX [Pakau Trust Entitlement Rule];

(b) For the purposes of this rule a subdivision plan is required only for the receiver property and not the donor property;

(c) Council's discretion is restricted to the following matters at the receiving property;

(i) subdivision layout and design including dimensions, shape and orientation of the proposed lots;

(ii) adverse effects on amenity values;

DI

Transferable rural lot right subdivision that does not comply with Rule 23.4.XXX BDI

AND

Amend the Proposed District Plan further with any necessary consequential or other relief that addresses Pakau Trust's concerns.

Decision Reasons:

- The Proposed District Plan fails to provide an appropriate opportunity for, and recognition of, the protection in perpetuity of significant indigenous vegetation.
- The cost to a property owner of protecting and maintaining, in perpetuity, significant stands of indigenous vegetation are substantial, in real financial terms.
- The property owner foregoes development potential, and subdivision of that property, where a significant environmental and community benefit is achieved by the protection of significant indigenous vegetation.
- In effect, the legal protection of significant indigenous vegetation provides a public benefit, at the expense of the private property owner. This should be recognised and compensated for.
- The subdivision application lodged in April 2012 secured Pakau Trust's entitlement to 64 Environmental Lots - 29 of which have been used and 35 remain to be used as transferable rural lot rights.
- Transferable rural lot rights enable an environmental feature to be protected while relocating the development potential elsewhere on appropriate receiver properties.
- Pakau Trust's position is unique.

Point Number

624.3

Summary of Decision Requested:

Add new Village Zone subdivision rules in 24.4 Subdivision, to recognise Pakau Trust's residual entitlement of 35 Environmental Lots which can be used as transferable rural title rights, such rules shown in underlined italics as follows:

Rule 24.4.XX Pakau Trust Entitlement Rule

For the purpose of Rule 24.4.XX, 35 transferable rural lot rights exist, that were secured by the protection of 204 hectares of significant indigenous vegetation at Klondyke Road, Port Waikato. Those transferable rural lot rights may be utilised under Rule 24.4.XXX where:

(i) The number of transferable rural lot rights available, will reduce by the number utilised at each receiving property when a survey plan is lodged for the subdivision approved at that receiving property;

(ii) A subdivision plan is only required for the receiver property;

(iii) Transferable rural lot rights cannot be generated on any other donor property;

Rule 24.4.XXX Transferable Rural Lot Right Subdivision

BDI

(a) Transferable Rural Lot Right Subdivisions utilising transferable rural lot rights under Rule 24.4.XX [Pakau Trust Entitlement Rule] must comply with all of the following conditions:

(i) All proposed lots must have a net site area of at least 2000m²;

(ii) Two additional lots can be created on the receiver property for every one transferable lot right originating under Rule 24.4.XX [Pakau Trust Entitlement Rule];

(b) For the purposes of this rule a subdivision plan is required only for the receiver property and not the donor property;

(c) Council's discretion is restricted to the following matters at the receiving property;

(i) Shape, location and orientation of proposed lots;

(ii) Matters referred to in the Infrastructure chapter;

(iii) Consistency with the matters, and outcomes sought, in Appendix 3.1 (Residential Subdivision Guidelines);

(iv) Impacts on stormwater and wastewater disposal;

(v) Impacts on Significant Natural Areas;

(vi) Impacts on identified Maaori Sites of Significance; and

(vii) Roads and pedestrian networks.

DI

Transferable rural lot right subdivision that does not comply with Rule 24.4.XXX RD1.

AND

Amend the Proposed District Plan further with any necessary consequential or other relief that addresses Pakau Trust's concerns.

Decision Reasons:

- The Proposed District Plan fails to provide an appropriate opportunity for, and recognition of, the protection in perpetuity of significant indigenous vegetation.
- The cost to a property owner of protecting and maintaining, in perpetuity, significant stands of indigenous vegetation are substantial, in real financial terms.
- The property owner foregoes development potential, and subdivision of that property, where a significant environmental and community benefit is achieved by the protection of significant indigenous vegetation.
- In effect, the legal protection of significant indigenous vegetation provides a public benefit, at the expense of the private property owner. This should be recognised and compensated for.
- The subdivision application lodged in April 2012 secured Pakau Trust's entitlement to 64 Environmental Lots - 29 of which have been used and 35 remain to be used as transferable rural lot rights.
- Transferable rural lot rights enable an environmental feature to be protected while relocating the development potential elsewhere on appropriate receiver properties.
- Pakau Trust's position is unique.

Submitter Number:

625

Submitter:

Sharon Burman

On behalf of:

Kainui Homes

Point Number

625.1

Summary of Decision Requested:

Amend Rule 16.4.1 Subdivision - General, for greater intensification of existing residential properties by allowing subdivisions of properties to 420m² as opposed to the 450m² set in the District Plan.

Decision Reasons:

- Reduced costs for establishing new subdivision amenities.
- Subdivision of a smaller size would enable intensive use of sections within the residential area which would mean slower urban sprawl into rural areas.
- Large sections within town boundaries could create more properties required for home dwellings.
- Opportunity for home ownership and meeting housing needs.
- Sections of smaller size have in the past been previously set.

Submitter Number:

626

Submitter:

Vineyard Road Properties Limited

Point Number

626.1

Summary of Decision Requested:

Amend the zoning of the following properties from Country Living Zone to the Village Zone:

- Properties on the eastern side of Vineyard Road from 4 to 122 Vineyard Road, Te Kauwhata; and
- Properties on the western side of Vineyard Road from 186 Wayside Road to 122 Vineyard Road, Te Kauwhata (see map attached to the submission)

OR

Amend the minimum lots size for the Country Living Zone from 5,000m² to 2,000m².

Decision Reasons:

- These properties on Vineyard Road exhibit a compromised and fragmented rural character and therefore rural residential subdivision will not compromise productive potential and will be the best use of the land resource.
- Changing the zoning to Country Living Zone in this location would:
 - Give effect to the National Policy Statement - Urban Development Capacity which identifies Waikato District as a high growth urban area and would represent a consistent and fair approach to growth as provided for in both Te Kowhai and Tuakau.
 - Complement the aim of the Future Proof Strategy to achieve a more compact and concentrated urban form over time, including the target of 10-12 households per hectare, and lead to more affordable infrastructure and amenity facilities.
 - Te Kauwhata is recognised as important for the Auckland 'spill over' and, as a result of established transport links, educational facilities, playgrounds and a shopping precinct, can easily absorb an increased density of residential development (more so than Te Kowhai).
 - The change to Village Zone will not increase any loss of productive Rural land and is a more effective and efficient use of land.
 - It is unclear from the section 32 analysis how the Countryside Living Zone and Village Zone are determined. The Countryside Living Zone is said to predominantly enable a residential development with a less dense character, low intensity development and rural outlook compared to an urban zone. Yet the Village Zone is intended to provide a wide range of living opportunities, of rural lifestyle.
 - There is no justification for the 5000m² lot size in the Countryside Living Zone and the values that are strived for in this zone are not set out in Objective 5.6.1.
 - The section 32 report does not acknowledge that on-site servicing is possible with a lot size of 2000m².
 - The section 32 report does not acknowledge that open space, rural views and landscaped areas between houses can be achieved with a lot size of 2000m² and design and servicing matters can be sufficiently considered when subdivision applications are made.

Point Number

626.2

Summary of Decision Requested:

Amend the minimum net site area for general subdivision in the Village Zone to 2000m², whether or not the lots are publicly reticulated;

AND/OR

Amend the Proposed District Plan with any necessary consequential or other relief that addresses these concerns.

Decision Reasons:

- A lot size of 2000m² creates an open space rural-residential character but can be planted, fenced, mowed and maintained easily while achieving a rural setting.
- This lot size can still accommodate on-site services and it also involves a more efficient use of the land resource compared to 5000m² lots in the Country Living Zone.

- A smaller lot size of 2000m2 achieves an appropriate level of amenity while still having a low intensity of development and a Rural outlook and character.

Point Number 626.3

Summary of Decision Requested: **Retain** the restricted discretionary activity status for general subdivision in the Country Living Zone and the matters of discretion for those.

Decision Reasons:

- No reasons provided.

Point Number 626.4

Summary of Decision Requested: **Retain** the restricted discretionary activity status for general subdivision in the Village Zone and the matters of discretion for those.

Decision Reasons:

- No reasons provided.

Submitter Number: 627

Submitter: Gloria Jean Beverland

Point Number 627.1

Summary of Decision Requested: **Amend** the zoning of properties on McVie Road, Huntly to allow Kimihia Lakes Recreation and Events to develop.

Decision Reasons:

- Supports positive developments for Huntly.

Submitter Number: 628

Submitter: Maris O'Rourke

Point Number 628.1

Summary of Decision Requested: No specific decision sought, but submission opposes the proposed developments in Raglan such as the condominiums proposed for Wainui Road and Stewart Street.

Decision Reasons:

- Concerned Raglan's special character is being eroded.
- True community and charming place of character.
- Wants to see Raglan's unique nature continue.

Point Number 628.2

Summary of Decision Requested: **Add** provisions for Raglan/Whaingaroa area to be granted special character status. The following matters to be included in the Special Character Designation:

- Concerned Raglan's special character is being eroded.
- True community and charming place of character.
- Wants to see Raglan's unique nature continue.
- Preservation and augmentation of natural environment particularly the wild seashore and sand dunes.
- Maintenance of diverse local businesses e.g. ban the introduction of big box chain stores and fast food outlet as they have in many places in France.
- Maintenance of a strong Maori partnership with local iwi and cultural respect for their views and wishes as tangata whenua.
- Maintenance of a relaxed friendly lifestyle.
- Maintenance of a business area confined to a small central zone which is pedestrian and cycle friendly.
- Limited population e.g. a limited number of subdivisions so residents don't live on top of each other.
- Limited number of businesses in town centre so business are not on top of each other.
- Maintenance of human dimensions of buildings e.g. limit heights of buildings to two or three storeys to preserve character.
- Maintenance and augmentation of pedestrian walkways, cycleways and sea views for all e.g. regulations so that people don't build each other out.
- Limit to the amount of holiday accommodation so there is a true community, not a tourist centred economy where locals cannot find accommodation.
- Attention to infrastructure e.g. the use of tourist dollars to fund public parking lots, lighting, upgrade sewerage system and/or e.g. introduce a per night tourist tax (such as Banff and other tourist areas in Canada) where the money goes directly back to Raglan to fund services for the public.

Decision Reasons:

- Concerned Raglan's special character is being eroded.
- True community and charming place of character.
- Wants to see Raglan's unique nature continue.
- Preservation and augmentation of natural environment particularly the wild seashore and sand dunes.

Point Number 628.3

Summary of Decision Requested: **Amend** the Proposed District Plan to require all building activity in the district that do not comply with District Plan to be publicly notified.

Decision Reasons:

- No reasons provided.

Submitter Number:	629	Submitter:	Sharon Burman
On behalf of:	Burman Family Trust		
Point Number	629.1		
Summary of Decision Requested:	Amend Rule 22.4.1.2 General Subdivision, to allow for sites less than 20 hectare in the Rural Zone to be subdivided to create one additional site.		
Decision Reasons:	<ul style="list-style-type: none"> • At present rural farms can subdivide one property if over 20 hectares. • Properties under 20 hectares are often less productively viable. • It would make greater sense to allow smaller blocks to create areas of subdivision – home ownership and occupancy. 		

Submitter Number:	630	Submitter:	John Loe
Point Number	630.1		
Summary of Decision Requested:	Decline the proposal which prohibits horse access to the Ngarunui Beach in Raglan via the north-end carpark track.		
Decision Reasons:	<ul style="list-style-type: none"> • To allow for safe access to the beach. 		

Submitter Number:	631	Submitter:	Allan Dennis
Point Number	631.1		
Summary of Decision Requested:	Retain Chapter 9.2 Te Kowhai Airpark as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Secure a future for the Light Aviation Fraternity. • Allow for the expansion of existing facilities. 		
Point Number	631.2		
Summary of Decision Requested:	Retain Chapter 27 Te Kowhai Airpark Zone as notified.		
Decision Reasons:	<ul style="list-style-type: none"> • Secure a future for the Light Aviation Fraternity. • Allow for the expansion of existing facilities. 		

Submitter Number:	632	Submitter:	Amanda Church
Point Number	632.1		
Summary of Decision Requested:	Decline the proposal for the prohibition of horse access to Ngarunui Beach, Raglan via the North end carpark track.		
Decision Reasons:	<ul style="list-style-type: none"> • Charisma of Raglan. • Enjoyment of recreational facilities and nature by all. • Safety via prevention of having to use the only other access which is a thin dangerous road. • Minimal to nil impact. • Have been using access for years. • Have already lost the mountain bike trails. • Are happy to share these places but do not want to be kicked out completely. 		

Submitter Number:	633	Submitter:	Alan Henderson
Organisation:	Van Den Brink Group		
Point Number	633.1		
Summary of Decision Requested:	Delete Policy 4.5.42(a)(ii) Adjoining site amenity to reduce height adjoining residential or reserve zoned land. AND Any consequential amendments and/or additional relief required to address the matters raised in the submission.		
Decision Reasons:	<ul style="list-style-type: none"> • Policy 4.5.42 Adjoining site amenity is a duplicate of Policy 4.5.31 Reverse sensitivity. • The policy is not supported by the rules, and is inconsistent with the relief sought elsewhere in the submission. 		

Point Number 633.2
Summary of Decision Requested: **Retain** Objective 4.6.1 Economic growth of industry, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports objective to the extent that the property at Whangarata Road retains its industrial zone.
- The enabling provisions to support economic growth are not reflected in the land use provisions.

Point Number 633.3
Summary of Decision Requested: **Retain** Policy 4.6.2 Provide Industrial Zones with different functions, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports the intention of the policy to enable a range of activities.
- This policy is not reflected in the land use provisions.

Point Number 633.4
Summary of Decision Requested: **Retain** Policy 4.6.3 Maintain a sufficient supply of industrial land, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports the intention of the policy to enable a sufficient supply of industrial zone land, which includes the rezoning of the land at Whangarata Road.
- This policy is not reflected in the land use provisions.

Point Number 633.5
Summary of Decision Requested: **Retain** Policy 4.6.4 Maintain Industrial land for industrial purposes, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports the intention of the policy to enable ancillary activities to industrial activities.
- This policy is not reflected in the land use provisions.

Point Number 633.6
Summary of Decision Requested: **Retain** Policy 4.6.5 Recognition of industrial activities outside of urban areas, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports the intention of the policy to recognise and provide for existing industrial activities.
- This policy is not reflected in the land use provisions.

Point Number 633.7
Summary of Decision Requested: **Retain** Objective 4.6.6 Manage adverse effects, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports the intention of the objective to manage adverse effects on sensitive activities in other zones and ecosystems.
- The provisions are unnecessarily restrictive and could be modified to achieve the same outcome.

Point Number 633.8
Summary of Decision Requested: **Retain** Policy 4.6.7 Management of adverse effects within industrial zones, insofar as it gives effect to the relief sought.
Decision Reasons:

- Supports the intention of the objective to manage adverse effects on sensitive activities in other zones and ecosystems.
- The provisions are unnecessarily restrictive and could be modified to achieve the same outcome.

Point Number 633.9
Summary of Decision Requested: **Amend** Policy 4.7.2 Subdivision location and design to provide an exclusion for Industrial zones.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The policy requires subdivision design and layout to adhere to a grid pattern and which enable public viewing for all urban zones. These features are unnecessarily restrictive for industrial development.
- As Industrial areas are generally of a lower amenity than town centre or residential areas and subject to less pedestrian throughfare, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 633.10
Summary of Decision Requested: **Delete** any requirement to adhere to "Guidelines" in Policy 4.7.3 Residential subdivision.

AND

Amend Policy 4.7.3 Residential subdivision to ensure the policy enables infill development in existing residential areas without making it adhere to the same standards as new greenfield development.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Policies should not require development to adhere to guidelines.
- The direct outcome should instead be the matters listed in the policy.
- The police outcomes seek to achieve design and layout which is only readily achievable on new greenfield sites, rather than infill development in existing towns.
- The policy should make a distinction between the outcomes to be achieved in each scenario.

Point Number

633.11

Summary of Decision Requested:

Amend Policy 4.7.5 to provide an exclusion for Industrial zones for provision of cycleways/pedestrian connections.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian throughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number

633.12

Summary of Decision Requested:

Retain Policy 4.7.7(a) Achieving sufficient development density to support the provision of infrastructure services to the extent that the industrial lot sizes are retained or reduced.

Decision Reasons:

- The proposed lot sizes are considered as a minimum the efficient use of land for industrial activities, whilst enabling provision for industrial subdivision.
- The policy in its current form would also support a reduction in average or minimum lot size.

Point Number

633.13

Summary of Decision Requested:

Amend Policy 4.7.9 Connected neighbourhoods to provide an exclusion for provision of cycleways/pedestrian connections in industrial zones.

AND

Amend Policy 4.7.9 Connected neighbourhoods to enable infill development in existing residential areas without making it adhere to the same standards as new greenfield development.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- As industrial areas are subject to less pedestrian throughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.
- The police outcomes seek to achieve design and layout which is only readily achievable on new greenfield sites, rather than infill development in existing towns.
- The policy should make a distinction between the outcomes to be achieved in each scenario.

Point Number

633.14

Summary of Decision Requested:

Amend Policy 4.7.10 Recreation and access to provide an exclusion for industrial zones for the provision of cycleways/pedestrian connections.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- As industrial areas are subject to less pedestrian throughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number

633.15

Summary of Decision Requested:

Retain Objective 6.4.1 Integration of infrastructure with subdivision, land use and development, insofar as it gives effect to the relief sought.

Decision Reasons:

- Support the intention of the objective.

Point Number

633.16

Summary of Decision Requested:

Amend Policy 6.4.5 (a)(i) and (ii) Roading infrastructure to provide an exclusion for Industrial zones.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- As Industrial areas are subject to less pedestrian throughfare or recreational cyclist facilities, there is no reason to require industrial areas to adhere to the same amenity standards as residential and higher amenity zones.

Point Number 633.17

Summary of Decision Requested: **Delete** Rule 14.12.1 P4(c) Permitted Activities in its entirety.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Concerns at the traffic generation threshold allowable for the Business zone. Being a maximum 300 vehicle movements per day and no more than 15% of these vehicle movements are heavy vehicle movements.
- The Business zones are characterised by heavy vehicle movements and to limit these to only 15% of the trip generations unnecessarily restricts business operations.
- The objectives and policies do not support this restriction on transportation.

Point Number 633.18

Summary of Decision Requested: **Delete** Rule 14.12.1P4(e) Permitted Activities in its entirety.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The applicant is concerned at the traffic generation threshold allowable for the industry zone, being "Maximum 250 vehicle movements per day and no more than 15% of these vehicle movements are heavy vehicle movements".
- The Industrial zones are characterised by heavy vehicle movements and to limit these to only 15% of the trip generations unnecessarily restrictive on industrial operations.
- The objectives and policies and contained in Chapter 6.5 do not support this restriction on transportation.

Point Number 633.19

Summary of Decision Requested: **Retain** the activities listed in Rule 17.1.2 P1 – P14 as Permitted Activities
AND
Add Retail activities as a Permitted activity to Rule 17.1.2 Permitted Activities.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The specific activity status of retail activities is unclear - it could fall under a commercial activity.
- In the Town Centre zone, it is specifically listed which could cause ambiguity for future resource consent applications.
- Large format retail is specifically envisaged by Policy 4.5.8 and 4.5.10.

Point Number 633.20

Summary of Decision Requested: **Add** the construction of a building as a permitted activity (which complies with the development controls) to Rule 17.1.2 Permitted Activities.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The activity status of buildings is unclear.
- The amendment is needed to clarify the activity status.

Point Number 633.21

Summary of Decision Requested: **Amend** the activity status for more than one dwelling (i.e. multi-unit development) from Restricted Discretionary (Rule 17.1.3) to Permitted activity (Rule 17.1.2).
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Mixed use development should be encouraged in the Business Zones as well as maximising an efficient use of land.
- Only enabling one dwelling per building as a permitted activity is inefficient.

Point Number 633.22

Summary of Decision Requested: **Delete** Rule 17.3.2 Daylight Admission in its entirety.
AND
Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- This control is without precedent and represents a restrictive and inappropriate regime.

Point Number 633.23

Summary of Decision Requested: **Retain** Rule 17.2.3 P1 On site parking areas - Landscaping in relation to the 1.5m landscape strip.
OR

Amend Rule 17.2.3 P1 On site parking areas to reduce the 1.5m landscape strip requirement.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The control is considered suitable to ensure adequate amenity.
- Would also support a reduction in width.

Point Number 633.24

Summary of Decision Requested: **Retain** Rule 17.2.5.1 Earthworks - General.

Decision Reasons:

- The control is appropriate in managing effects.

Point Number 633.25

Summary of Decision Requested: **Add** clarification to Rule 17.2.7.1 P2 (a) Signs that the rule applies to free standing signs only.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There is no reason to restrict signage of buildings to the criteria in P2 (a).

Point Number 633.26

Summary of Decision Requested: **Amend** Rule 17.2.7.1 P2 Signs to increase the area to at least 10m² per site.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The signage rules are unnecessarily restrictive in terms of free standing sign size being limited to one sign per site at 3m².
- This does not take into account the use of a site for more than one activity and combined with the allowance for all other signs to be 1m² would create more visual clutter than allowing a larger free standing in the first instance.

Point Number 633.27

Summary of Decision Requested: **Amend** Rule 17.2.7.1 Signs to exclude signs from the yard setbacks.

AND

If the relief on daylight admission is not accepted, **amend** to exclude signs Rule 20.3.3 Daylight Admission.

OR

Amend the definition of "buildings" in Chapter 13 Definitions to exclude free-standing signs.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Without the proposed exclusions, signs should not be easily visible from the road, as they would be classified as a "building".
- This will create significant costs of compliance to achieve signage for site identification purposes.

Point Number 633.28

Summary of Decision Requested: **Amend** Rule 17.2.7.2 Signs - Effects on Traffic to specify that Rule 20.2.7.2 does not apply to site identification signs.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is unclear what is meant by "any sign directed at road users".
- Arguably any sign for identification of a business could be deemed to be directed at road users.
- Effects associated with identification signs are already managed by Rule 20.2.7.1.

Point Number 633.29

Summary of Decision Requested: **Amend** Rule 17.3.2 P1(a) (Daylight Admission) to increase height from 2.5m to 3m.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There is no justification to reduce the height to boundary recession plane to a height which is lower than the previous Franklin provisions.

Point Number 633.30

Summary of Decision Requested: **Amend** Rule 17.3.4.1 P1(a)(i) Building setback – Zone boundaries to reduce the setback between sites with other zones to 3m.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There is no justification to increase the yard setbacks to 7.5m when the previous Franklin provisions were more permissive.

Point Number

633.31

Summary of Decision Requested:

Amend Rule 17.3.7 P1 (a) Living Court to reduce the balcony size requirements to 8m2 and a depth of 1.5m.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The balcony size requirements are too onerous and should be reduced to as a maximum the former Franklin standard.
- There is no justification to increase the balcony size from 8m2 to 15m2.

Point Number

633.32

Summary of Decision Requested:

Amend the zoning of properties at Ryders Road and Harrisville Road, Tuakau from Industrial Zone to Business Zone (see attachment 2 to the submission).

AND

Rezone a portion of the property at 24 Ryders Road, Tuakau from Village Zone to Business Zone. (see attachment 2 to the submission).

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Proposed rezoning effectively represents a downzoning of this land.
- Will remove development potential and commercial value.
- Council should not zone land based solely on current land uses.
- The land is situated within proximity to the centre of Tuakau, with redevelopment can provide opportunities to support the residential growth projected for this area.
- The location of this land lends itself to commercial development opportunities such as retail, office to support an increasing population .
- The Proposed District Plan has not sought to rezone additional business or industrial land in Tuakau, even though the predicted population growth is significant.
- Consequently, the potential self sufficiency of Tuakau for retail, commercial services and employment activities will be reduced as the population grows. This is not effective or efficient resource management, nor does it promote the wellbeing of the local community.
- The expansion of the zone into 24 Ryders Road, also reflects the use of that part of the site for car parking associated with the existing processing plant (authorised by Resource Consent)
- This land also provides an effective opportunity for increased business development opportunities as Tuakau grows.

Point Number

633.33

Summary of Decision Requested:

Retain Industrial zoning of the submitter's properties at the Whangarata Business Park, Tuakau as notified.

Decision Reasons:

- Zoning represents the most appropriate zone for the land and reflects it existing zoning under the Franklin Section of the District Plan.

Point Number

633.34

Summary of Decision Requested:

Retain Objective 4.5.1 Commercial function and purpose, insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports this objective to the extent that the submitters land is zoned Business.

Point Number

633.35

Summary of Decision Requested:

Retain Policy 4.5.2 Commercial function and purpose, insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports this policy to the extent that the land is zoned Business.

Point Number

633.36

Summary of Decision Requested:

Retain Policy 4.5.4 Commercial purpose: Business Zone, insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports the intention of the policy to enable a range of commercial activities.

Point Number

633.37

Summary of Decision Requested:

Retain Policy 4.5.8 Role and function of the Business Zone insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports the intention of the policy to enable large scale retail and commercial activities in the Business Zone.

- This is not reflected in the land use provisions.

Point Number 633.38

Summary of Decision Requested: Retain Policy 4.5.9 Employment opportunities: Business Town Centre Zone and Business Zone insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports the intention of the policy to provide for employment opportunities.

Point Number 633.39

Summary of Decision Requested: Retain Policy 4.5.10 Retail: Business Town Centre Zone and Business Zone insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports the intention of the policy to enable large scale retail and commercial activities in the Business Zone.
- This is not reflected in the land use provisions.

Point Number 633.40

Summary of Decision Requested: Retain Policy 4.5.11 Residential upper floors: Business Town Centre Zone and Business Zone insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports the intention of the policy to mixed use developments, in particular residential activities in the Business Zone.
- Considers that providing for more than one residential activity as a Restricted Discretionary activity only does not given effect to this policy in the most efficient way.

Point Number 633.41

Summary of Decision Requested: No specific decision requested, but submission opposes Objective 4.5.25 Business Zone Character; where this is inconsistent with the submitter's primary relief to have their landholding re-zoned as Business.

Decision Reasons:

- The objective only requires maintenance of character - this is not consistent with developing new business areas to support residential growth.

Point Number 633.42

Summary of Decision Requested: Retain Policy 4.5.26 Landscaping of onsite parking areas - Business Zone insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports intention of these policies to manage effects in the Business Zone (and on other more sensitive activities in adjoining zones) subject to the relief sought by the submitter.

Point Number 633.43

Summary of Decision Requested: Retain Policy 4.5.27 Front setback - Business Zone insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports intention of these policies to manage effects in the Business Zone (and on other more sensitive activities in adjoining zones) subject to the relief sought by the submitter.

Point Number 633.44

Summary of Decision Requested: Retain Policy 4.5.28 Height - Business Zone, insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports intention of these policies to manage effects in the Business Zone (and on other more sensitive activities in adjoining zones) subject to the relief sought by the submitter.

Point Number 633.45

Summary of Decision Requested: Delete the policy reference to design guidelines and architectural form in Policy 4.5.29 New Buildings: Business Zone.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The policy is not supported by the rules and is inconsistent with the relief sought elsewhere in the submission.

Point Number 633.46

Summary of Decision Requested: Retain Objective 4.5.30 Business Zone and Business Town Centre Zone - Amenity, insofar as it gives effect to the relief sought.

Decision Reasons:

- Supports the intention of the objective to protect amenity values, subject to the relief sought by the submitter.

Point Number	633.47
Summary of Decision Requested:	Retain Policy 4.5.31 Reverse Sensitivity, insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the intention of the objective to protect amenity values, subject to the relief sought elsewhere in the submission. • Policy 4.5.31 is a duplicate of Policy 4.5.33.
Point Number	633.48
Summary of Decision Requested:	Retain Policy 4.5.33 Reverse Sensitivity, insofar as it gives effect to the relief sought.
Decision Reasons:	<ul style="list-style-type: none"> • Supports the intention of the objective to protect amenity values, subject to the relief sought elsewhere in the submission. • Policy 4.5.33 is a duplicate of Policy 4.5.31.
Point Number	633.49
Summary of Decision Requested:	Delete Policy 4.5.32(a)(ii) Adjoining site amenity to reduce height adjoining residential or reserve zoned land. AND Any consequential amendments and/or additional relief required to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • Policy 4.5.31 Reverse sensitivity is a duplicate of Policy 4.5.42 Adjoining site amenity. • The policy is not supported by the rules and is inconsistent with the relief sought elsewhere in the submission.
Point Number	633.50
Summary of Decision Requested:	Retain Rule 17.4.1(a) General Subdivision in relation to the minimum lot size of 225m2. OR Amend Rule 17.4.1(a) General Subdivision to reduce the minimum lot size. AND Any consequential amendments and/or additional relief required to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • The proposed lot sizes are considered an efficient use of land for business activities. • Would also support a decrease in minimum area.
Point Number	633.51
Summary of Decision Requested:	Add the following to include the following permitted activities as a minimum to Rule 20.1.1 Permitted Activities: <i>(a) Hire Centres</i> <i>(b) Wholesale</i> <i>(c) Trade Sub/ly outlet</i> <i>(d) Transport depot</i> <i>(e) Garden Centres</i> <i>(f) Retailing of agricultural and industrial motor vehicles and machinery</i> <i>(g) Processing, storage, distribution and sale (wholesale or retail) of aggregates</i> AND Any consequential amendments and/or additional relief required to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • There is no activity distinction between those activities provided for in the Heavy Industry zone and Industry zone – the listed permitted activities are the same. • This is inconsistent with Policy 4.6.2 which seeks to provide for “different functions” with the zones, but also a “range of activities”. • The range of permitted activities is too constrained and does not take into account activities which are more land intensive and of a lower amenity value, which should locate in these areas rather than the Business Zone (where they are otherwise provided for as “commercial activities”). • These activities could locate in an Industry area (and not be incompatible with surrounding activities) and do not fall under the listed P – P6 and unless specifically provided for would therefore default to Non-Complying (under NC1).
Point Number	633.52
Summary of Decision Requested:	Delete any restrictions on gross floor area from Rule 20.1.1 Permitted Activities. AND Amend Rule 20.1.1 Permitted Activities to allow for any office which is ancillary to a permitted activity. AND Any consequential amendments and/or additional relief required to address the matters raised in the submission.
Decision Reasons:	<ul style="list-style-type: none"> • There is no reason to restrict offices associated with permitted activities where these support the efficient and effective operation of a permitted activity.

Point Number 633.53

Summary of Decision Requested: **Add** the construction of a building for any permitted activity as a permitted activity (which complies with the development controls) to Rule 20.1.1 Permitted Activities.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The activity status of buildings is unclear.
- The amendment is needed to clarify the activity status.

Point Number 633.54

Summary of Decision Requested: **Delete** Rule 20.2.1 Servicing and hours of operation in its entirety.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- This control is without precedent and represents a restrictive and inappropriate regime.

Point Number 633.55

Summary of Decision Requested: **Amend** Rule 20.2.2 C1 Landscape Planting from a Controlled Activity, to become a Permitted Activity instead.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- This control is without precedent and represents a restrictive and inappropriate regime.

Point Number 633.56

Summary of Decision Requested: **Delete** Rule 20.2.2 C1(b) in its entirety.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- This control creates a mandatory requirement for planting of streams irrespective of what the proposal is (for example a car parking shortfall) and without any consideration of the costs associated with the rule.

Point Number 633.57

Summary of Decision Requested: **Retain** the noise standards in Rule 20.2.3 Noise.

Decision Reasons:

- This control is appropriate in managing effects between zones.

Point Number 633.58

Summary of Decision Requested: **Add** an exclusion to Rule 20.2.4 Glare and Artificial Light spill to ensure that it does not apply between sites in the industrial zones.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- These rules should only apply to sites adjoining a residential, reserve or countryside living zone (similar to the landscape screening and lower noise limits) and should not be applicable between Industrial sites.

Point Number 633.59

Summary of Decision Requested: **Retain** the earthworks standards in Rule 20.2.5.1 Earthworks - General.

Decision Reasons:

- The control is appropriate in managing effects.

Point Number 633.60

Summary of Decision Requested: **Add** clarification that Rule 20.2.7.1 P2(a) Signs applies to free standing signs only.

Decision Reasons:

- There is no reason to restrict signage of buildings to the criteria in (a).

Point Number 633.61

Summary of Decision Requested: **Amend** Rule 20.2.7.1 P2 Signs to increase the area to at least 10m2.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The signage rules are unnecessarily restrictive in terms of free standing sign size being limited to one sign per site at 3m2.
- This does not take into account the use of a site for more than one activity and combined with the allowance for all other signs to be 1m2 would create more visual clutter than allowing a larger free standing in the first instance.

Point Number 633.62

Summary of Decision Requested: Amend Rule 20.2.7.1 (Signs) to exclude signs from the yard setbacks;

AND

If the above relief is not accepted, amend Rule 20.3.3 Daylight Admission to exclude signs;

OR

Amend the definition of "buildings" in Chapter 13 Definitions to exclude free-standing signs;

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Without the proposed exclusions signs would not be easily visible from the road, as they would be classified as a "building".
- This will create significant costs of compliance to achieve signage for site identification purposes.

Point Number 633.63

Summary of Decision Requested: Amend Rule 20.2.7.2 Signs – Effects on traffic to specify that this rule does not apply to site identification signs.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- It is unclear what is meant by "any sign directed at road users."
- Arguably any sign for identification of a business could be deemed to be directed at road users.
- Effects associated with identification signs are already managed by Rule 20.2.7.1.

Point Number 633.64

Summary of Decision Requested: Delete Rule 20.2.8 PI (iv) Outdoor Storage of goods for material.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Any restriction on the percentage of the site allowable to be used for storage should be deleted, as storage activities are permitted.
- Any visual effects associated with outdoor storage are already mitigated by the maximum height, setback and screening requirements contained in this rule.

Point Number 633.65

Summary of Decision Requested: Amend Rule 20.3.1 PI (a) Building Height to increase the maximum height to 18m or greater.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- A height of 18m is similar to that which has already started to develop/establish in the Whangarata Industrial zone and there is no reason for this height to be decreased to 15m.

Point Number 633.66

Summary of Decision Requested: Amend Rule 20.3.3 PI Daylight Admission to increase height from 2.5m to 3m.

AND

Amend Rule 20.3.3 Daylight Admission to specifically exclude roads from any daylight admission plane.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There is no justification to reduce the height to boundary recession plane to a height which is lower than the previous Franklin provisions when the maximum height has been kept the same.
- There is no reason to apply a daylight recession plan against roads in the Industrial zones, as these are areas are generally lower amenity and less pedestrian trafficked.
- No reason to apply a daylight restriction against the road network.

Point Number 633.67

Summary of Decision Requested: Retain Rule 20.3.4.1 PI (i) Building setback in relation to the maximum front yard setback of 5m.

OR

Amend Rule 20.3.4.1 PI (i) Building Setback to have a reduced front yard setback.

AND

Retain Rule 20.3.4.1 PI (ii) Building setback so that the rule does not apply to boundaries of other industrial zoned sites.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- A front yard setback of 5m is similar to that which has already started to develop/establish in the Whangarata Industrial zone.
- There is no reason for the setback to be increased.
- Would support a decrease in setback.
- Supports the provisions for side yards to only apply to zones other than the Industrial and Heavy Industrial zones.
- Also backed up with the daylight provisions which also do not apply to adjoining industrial zoned sites.

Point Number

633.68

Summary of Decision Requested:

Amend Rule 20.3.4.1 PI (ii) Building setbacks to reduce the setback between sites with other zones to 3m.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- There is no justification to increase the yard setbacks between the industrial zoned site with other zones to 7.5m when the previous Franklin provisions were more permissive.
- The 3m landscape buffer is sufficient.
- No reason to have an additional 4.5m of building setback.

Point Number

633.69

Summary of Decision Requested:

Retain Rule 20.4.1 RD1(a) General Subdivision in relation to a minimum lot size of 1,000m² and average of 2,000m².

OR

Amend Rule 20.4.1 RD1(a) General subdivision to reduce the minimum lot size and average lot size.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The proposed lot sizes are considered an efficient use of land for industrial activities.
- Would also support a decrease in minimum area and average.

Point Number

633.70

Summary of Decision Requested:

Delete Rule 20.4.1 RD1(a)(iii) General Subdivision in relation to the 20% restriction on rear lots.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- The restriction on 20% rear sites creates inefficiencies of land resources
- It will significantly reduce the amount of land available for industrial activities (and other similar uses).
- These types of areas are generally of a "lower amenity" than town centre or residential areas and subject to less pedestrian throughfare.
- There is no reason to restrict the number of rear lots created via subdivision.

Submitter Number:

634

Submitter:

Kathryn Gold

Point Number

634.1

Summary of Decision Requested:

Rebuild the single lane bridge at Wainui Road, Raglan.

Decision Reasons:

- Has become an urgent project.
- Need to cater for all recreational and residential movement that use this bridge as access to homes, beaches and boat ramps.
- Leaving the bridge as is for another nine years is reckless.
- Congestion caused by the one lane bridge is a major disruption to residents and visitors.
- Emergency services are extremely disadvantaged.
- Safety issues for children crossing the bridge for school due to the constant stream of traffic.
- From early morning until late evening residents unable to get into town in the weekends with roads blocked with cars, waiting as far as 3km away.

Submitter Number:

635

Submitter:

Neroli Henwood

Point Number

635.1

Summary of Decision Requested:

Retain Chapter 9.2- Te Kowhai Airpark, as notified.

Decision Reasons:

- Te Kowhai airfield is an important community asset with a long history for both the aviation community and the Waikato area.
- For a viable future, the airfield needs to be able to develop into a sustainable area.
- Changes will protect and fulfill the needs of airpark's users.

Point Number 635.2

Summary of Decision Requested: Retain Chapter 27-Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Te Kowhai airfield is an important community asset with a long history for both the aviation community and the Waikato area.
- For a viable future, the airfield needs to be able to develop into a sustainable area.
- Changes will protect and fulfill the needs of airpark's users.

Submitter Number: 636 **Submitter:** Anna Noakes

Point Number 636.1

Summary of Decision Requested: Amend definition of "Intensive Farming" by reverting to the definition in the Operative District Plan.
AND
Delete "Goat Farming" from the definition of "Intensive Farming."

Decision Reasons:

- The definition is confusing and contradictory.
- Intensive Goat Farming should not form part of the intensive farming list.
- Goat farming, whether housed or outdoor, is dependent on the fertility of the soils on which it is located.
- The only difference between housed and outdoor dairy stock is housed have their grass cut and brought to them while outdoor walk to the paddock and eat the grass.

Point Number 636.2

Summary of Decision Requested: Delete the catch all rule from the Proposed District Plan.

Decision Reasons:

- If Council hasn't allowed for an activity it shouldn't automatically be given a non-complying activity status.
- A non-complying activity status would pose an applicant a lot of work, time and cost which may not be of value.
- It indicates the high possibility of a refusal.

Point Number 636.3

Summary of Decision Requested: Delete Policy 5.3.6 (a) Intensive farming activities.

Decision Reasons:

- Policy is not clearly defined and open for interpretation.

Point Number 636.4

Summary of Decision Requested: Amend Policy 5.3.2 Productive rural activities, to include Intensive Farming.

Decision Reasons:

- Policy is not clearly defined and open for interpretation.
- Intensive farming relies on the productive capacity of soils on the site.

Point Number 636.5

Summary of Decision Requested: Amend the definition of Intensive Farming, by reverting to the Operative Plan definition for Intensive Farming.

Decision Reasons:

- The proposed Intensive Farming definition is inconsistent.

Point Number 636.6

Summary of Decision Requested: Amend the activity status for Intensive farming from Restricted Discretionary to Permitted Activity.

Decision Reasons:

- Rules should support the status of intensive farming reliant on productive soils as a permitted activity
- Intensive farming should then need to be compliant with rural rules around their activities eg noise, odour, visual etc.

Submitter Number: 637 **Submitter:** Livestock Improvement Corporation

Point Number 637.1

Summary of Decision Requested: Delete Policy 5.3.16 Specific Area- Agricultural Research Centres

AND

Add the following new Objectives and Policies:

5.7 Specific Area – Agricultural Research Centres

5.7.1 Objective – Specific Area – Agricultural Research Centres

To recognise, provide for and protect the continued operation and development of Agricultural Research Centres that are an integral part of the agricultural sector.

5.7.1.1 Policy – Operation and Development of Agricultural Research Centres

Enable the continued operation and development of the Livestock Improvement Corporation and DairyNZ Agricultural Research Centres by providing for a wide range of agricultural research activities and rural activities that complement each other.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Policy 5.3.16(a) focuses on recognising and protecting the continued operation of Agricultural Research Centres, but does not adequately recognise and provide for the future development of these facilities.
- This is inconsistent with the parallel Policy 6.8.4 in the Operative District Plan (submission sets this out).
- The submitter seeks that provision for future development of Agricultural Research Centres be continued in the relevant policy framework of the Proposed District Plan.
- Policy 5.3.16 is one of the various policies listed to implement Objective 5.3 Rural Character and Amenity.
- Policy 5.3.16 is focused on recognising and protecting Agricultural Research Centres so is not considered relevant to rural character and amenity issues.
- In comparison, the Operative District Plan includes Objective 6.8.1 which is relevant to Agricultural Research Centres (submission sets out objective). Objective 6.8.1 is supported by four policies in the Operative District Plan.
- The submitter considers that the Proposed District Plan should continue the same approach by including an Objective and Policy specific to Agricultural Research Centres.

Point Number

637.2

Summary of Decision Requested:

Retain the definition of "Agricultural and horticultural research activities" in Chapter 13 Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number

637.3

Summary of Decision Requested:

Retain the definition of "Agricultural Research Centres" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Supports retention of the definition.

Point Number

637.4

Summary of Decision Requested:

Retain the definition of "Campus" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Supports retention of the definition.

Point Number

637.5

Summary of Decision Requested:

Retain Rule 14.12.1.4(d)(ii) Permitted Activities - Traffic Generation.

Decision Reasons:

- Rule 14.12.1.4(d)(ii) (Traffic Generation) retains the permitted traffic movements for an Agricultural Research Centre from Schedule 25C of the Operative Waikato District Plan, which is supported.

Point Number

637.6

Summary of Decision Requested:

Amend Rule 22.2.3.1 P1 (a)(iv) Earthworks - General as follows:

(a) Earthworks for...

...~~(iv) A building platform for a residential activity, including accessory buildings identified on a building consent, or required outside the building, platform to maintain stable slopes for the authorised construction work.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Rule 22.2.3.1(P1) provides for "ancillary rural earthworks", "farm quarry", "construction and/or maintenance of tracks, fences or drains" and "a building platform for a residential activity, including accessory buildings" as permitted activities which is supported by the submitter.
- The rule provides for earthworks associated with "A building platform for a residential activity, including accessory buildings" as a permitted activity. However there is no permitted activity provision for building platforms associated with non-residential activities (such as farm buildings, or in the case of the submitter, buildings associated with Agricultural Research Centres)

Point Number

637.7

Summary of Decision Requested:

Amend Rule 22.2.3.1 P2(b) Earthworks - General as follows:

(b) With the exception of earthworks for the activities listed in Rule 22.2.3.1 P1, eEarthworks within a site must meet all of the following conditions...

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Current permitted activity limits on earthworks in Rule 22.2.3.1(P2) could trigger resource consent for future development work either within the Campus area or on the Research Farm.
- Seeks to amend rule 22.2.3.1 P1 to permit earthworks incidental to an approved building consent.
- Would avoid unnecessary bureaucracy and cost associated with resource consent.
- Rule 22.2.3.1(P2) applies various limits to earthworks within a site. The way the rule are written, the limits would apply to the list of permitted activities in Rule 22.2.3.1 (P1), which could unnecessarily trigger resource consent for typical and accepted farming activities.
- Amendment is required to ensure the various limits do not apply to the list of permitted activities in P1.
- These activities are a fundamental requirement for being able to undertake efficient farming operation and an accepted element in the rural landscape.
- Earthworks are already regulated by the Regional Plan.
- A requirement for resource consent would impose unnecessary duplication and compliance costs onto typical farming operations.

Point Number

637.8

Summary of Decision Requested:

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research, as follows:

(a) The rules that apply to a permitted activity within the Agricultural Research Centres Specific Area as identified on the planning maps are as follows:

(i) Rule 22.2 Land use – Effects;

(ii) Rule 22.3 Land Use – Building; except for building within a Campus.

A. Rule 22.3.4.1 Height – Building general will not apply and Rule 22.5.3.4 will apply instead; and Rule 22.5.3.4 will apply instead; and

B. Rule 22.3.6 Building coverage will not apply and Rule 22.5.4.5 will apply instead.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Rule 22.5.2 lists permitted activities within the Agricultural Research Centres Specific Area. “An agricultural or horticultural research activity” is permitted in addition to various activities incidental to agricultural or horticultural research.
- Under Schedule 25C (Agricultural Research Centres) of the Operative District Plan, Rule 25C.4.1(e) provides for “a commercial activity” that is “incidental to agricultural and horticultural research” as a permitted activity.
- This rule has not been transferred to Rule 22.5.2.
- As a result, Rule 22.1.5(1)(D), a discretionary activity resource consent would be required for a “commercial activity”.
- The submitter seeks a continued permitted activity status consistent with Schedule 25C of the Operative District Plan.

Point Number

637.9

Summary of Decision Requested:

Add “Agricultural Research Centre Campus” in Table 5.1 of Appendix 5 Hazardous Substances Activity Status Table – Permitted Activity Thresholds in the column for the Business, Business Town Centre, Business Tamahere, Industrial, Heavy Industrial, Hampton Downs Motor Sport and Recreation and Te Kowhai Airpark Zones.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- In the Operative Waikato District Plan, Appendix H (Hazardous Substances) includes “Agricultural Research Centre Campus” and “Waikato Innovation Park” with the Industrial Zone in Table HT1 (Permitted Activities by Zone).
- No corresponding provision for an “Agricultural Research Centre Campus” in Table 5.1 Activity Status Table – Permitted Activity Thresholds.
- Consequently, the more restrictive permitted activity thresholds from the underlying Rural zone would apply.

Point Number

637.10

Summary of Decision Requested:

Amend the Proposed District Plan to include the provisions from the Operative District Plan in Schedule 25C for Agricultural Research Centres as they were originally intended.

Decision Reasons:

- No reasons provided.

Point Number

637.11

Summary of Decision Requested:

Amend the Proposed District Plan to recognise and provide for all key existing and future activities in the Agricultural Research Centres.

Decision Reasons:

- No reasons provided.

Point Number

637.12

Summary of Decision Requested:

Delete any site-specific conditions relating to Agricultural Research Centres that are sufficiently covered by District-wide provisions.

Decision Reasons:

- No reasons provided.

Point Number

637.13

Summary of Decision Requested:	<p>Retain the parts of Rule 22.2.3.1 (P1) relating to:</p> <ul style="list-style-type: none"> • Earthworks that provide for ancillary rural earthworks, • Farm quarry construction and/or maintenance of tracks, fences or drains, and • Building platform for a residential activity, including accessory buildings.
Decision Reasons:	<ul style="list-style-type: none"> • No reasons provided.
Point Number	637.14
Summary of Decision Requested:	<p>Retain the boundaries of the "Agricultural Research Centre LIC".</p> <p>AND</p> <p>Retain the "Agricultural Research Centre LIC/DairyNZ Campus".</p> <p>AND</p> <p>Retain the "Specific Area/Activity" overlay.</p> <p>AND</p> <p>Retain the underlying Rural Zone.</p>
Decision Reasons:	<p>The boundaries of the "Agricultural Research Centre LIC" and the "Agricultural Research Centre LIC/DairyNZ Campus" have been shown correctly as a "Specific Area/Activity" overlay on the planning maps.</p>
Point Number	637.15
Summary of Decision Requested:	<p>Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:</p> <p>P6 Disposal or storage of solid organic waste or cleanfill that is incidental to agricultural or horticultural research where the extracted material is used on the Agricultural Research Centre site.</p> <p>AND</p> <p>Any consequential amendments and/or additional relief required to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • P6 is not necessary to provide for the on-site disposal or storage of solid organic or cleanfill waste, or an extractive industry for on-site use. The relevant Waikato Regional Plan rules are adequate and can be relied upon.
Point Number	637.16
Summary of Decision Requested:	<p>Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:</p> <p>P7 A staff facility that is incidental to agricultural or horticultural research that includes:</p> <ol style="list-style-type: none"> 1. A dwelling located at least 200m from the site containing Inghams Feed Mill in Hamilton City Council's jurisdiction; 2. A recreational facility; 3. Social club; 4. Cafeteria or café. <p>AND</p> <p>Any consequential amendments and/or additional relief required to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • P7 is not necessary, as there is no need for a 200m setback for a dwelling in relation to the Inghams Feed Mill under P7(1). • This rule has been transferred from Rule 25C.4.1(j) of Schedule 25C of the Operative DP. • It was only relevant to the AgResearch Centre, which is no longer located within the Waikato District (now within HCC). • The Inghams Feed Mill is located over 2.5km from the nearest boundary of the LIC or DairyNZ Agricultural Research Centres. • 200m setback is not necessary. • A "social club" has not been included as an example of a staff facility despite being included in the original Rule 25C.4.1(j) of Schedule 25C of the Operative DP.
Point Number	637.17
Summary of Decision Requested:	<p>Add the following activities to Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:</p> <p><u>P7 A Commercial activity that is incidental to agricultural or horticultural research.</u></p> <p><u>P8 Offices that are incidental to agricultural or horticultural research.</u></p> <p><u>P9 Laboratories that are incidental to agricultural or horticultural research.</u></p> <p><u>P10 Warehouse or storage facilities that are incidental to agricultural or horticultural research.</u></p> <p><u>P11 Conference facilities that are incidental to agricultural or horticultural research.</u></p> <p>Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:</p> <p>P7 A staff facility that is incidental to agricultural or horticultural research that includes:</p> <ol style="list-style-type: none"> 1. A dwelling located at least 200m from the site containing Inghams Feed Mill in Hamilton City Council's jurisdiction; 2. A recreational facility; 3. Social club; 4. Cafeteria or café. <p>AND</p> <p>Any consequential amendments and/or additional relief required to address the matters raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Under Rule 22.5.2, there are a number of other key activities integral and essential to the operation of the LIC and DairyNZ Agricultural Research Centres which are not listed as permitted activities. • These include: offices, laboratories, conference facilities, warehouse or storage facilities and staff cafeterias or cafes. • Concern that these activities would default to a non-complying activity. • This was not as problematic with the Operation District Plan because it has a more effects based where any activity is permitted if it complies with the relevant performance standards (and is not listed as restricted discretionary, discretionary or prohibited).

Point Number	637.18
Summary of Decision Requested:	Retain Chapter 22.5 Specific Area – Agricultural Research Centres, with amendments sought in the submission.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.

Submitter Number:	638	Submitter:	Nora van der Voorden
--------------------------	-----	-------------------	----------------------

Point Number	638.1
Summary of Decision Requested:	Amend the Proposed Waikato District Plan to include a resource management framework for the management of Genetically Modified Organisms that is regionally specific taking into account environmental, economic and social well-being considerations.
Decision Reasons:	<ul style="list-style-type: none"> There is currently a major push in Aotearoa to adopt GE technology, citing competition from other countries attempting to be lower cost producers. Industry lobby pressure is being applied to the public and EPA to process experiments in containment to actual release into the environment without robust regulations on release. Therefore it is crucial that protective mechanisms are included in the Proposed District Plan to reduce potential liability. Concerned about potential risks posed by release of GMOs into the environment. GMOs have the potential to adversely affect ecological, economic and resource management values, and the social and cultural wellbeing of people, communities and Tangata whenua. Release of GMOS have potential to cause significant adverse effects on the environment. Regardless of the care given to crafting consent conditions for GMOs, there inevitably remains a risk (albeit small) that conditions may be breached by poor management, human error, natural events and even sabotage of projects. Once GMOs are released into the environment, they would be difficult, if not impossible, to eradicate. 'GE Free' status of a district would likely be lost as well as their market advantages. Application of integrated management and precautionary approach to GMOs under the RMA is best available technique for managing potential adverse effects posed by GMOs within region. It is consistent with sustainable management purpose and Part II of the RMA to establish district plan provisions that manage the release, location and management of GMOs where they have the potential to adversely affect the environment and other land use activities. Numerous significant adverse effects on the environment which would include biological or ecosystem harm, cultural values, contamination to existing farming, reputational damage and loss of markets and premiums paid for GMO free produce.

Point Number	638.2
Summary of Decision Requested:	Amend the Proposed District Plan to include strong precautionary and prohibitive provisions, policies and rules relating to Genetically Modified Organisms that are the same (or similar) as those in the Far North District Plan, the Whangarei District Plan and Auckland Unitary Plan.
Decision Reasons:	<ul style="list-style-type: none"> There is currently a major push in Aotearoa to adopt GE technology, citing competition from other countries attempting to be lower cost producers. Industry lobby pressure is being applied to the public and EPA to process experiments in containment to actual release into the environment without robust regulations on release. Submitter Number:	639	Submitter:	Dairy NZ Incorporated
--------------------------	-----	-------------------	-----------------------

Point Number	639.1
Summary of Decision Requested:	Delete Policy 5.3.16 Specific Area- Agricultural Research Centres AND Add the following new Objectives and Policies:

5.7 Specific Area – Agricultural Research Centres

5.7.1 Objective – Specific Area – Agricultural Research Centres

To recognise, provide for and protect the continued operation and development of Agricultural Research Centres that are an integral part of the agricultural sector.

5.7.1.1 Policy – Operation and Development of Agricultural Research Centres

Enable the continued operation and development of the Livestock Improvement Corporation and DairyNZ Agricultural Research Centres by providing for a wide range of agricultural research activities and rural activities that complement each other.

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

~~PZ~~ A staff facility that is incidental to agricultural or horticultural research that includes:

1. A dwelling ~~located at least 200m from the site containing Inghams Feed Mill in Hamilton City Council's jurisdiction;~~
2. A recreational facility;
3. Social club;
4. Cafeteria or café.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Policy 5.3.16(a) focuses on recognising and protecting the continued operation of Agricultural Research Centres, but does not adequately recognise and provide for the future development of these facilities.
- This is inconsistent with the parallel Policy 6.8.4 in the Operative District Plan (submission sets this out).
- The submitter seeks that provision for future development of Agricultural Research Centres be continued in the relevant policy framework of the Proposed District Plan.
- Policy 5.3.16 is one of the various policies listed to implement Objective 5.3 Rural Character and Amenity.
- Policy 5.3.16 is focused on recognising and protecting Agricultural Research Centres so is not considered relevant to rural character and amenity issues.
- In comparison, the Operative District Plan includes Objective 6.8.1 which is relevant to Agricultural Research Centres (submission sets out objective). Objective 6.8.1 is supported by four policies in the Operative District Plan.
- The submitter considers that the Proposed District Plan should continue the same approach by including an Objective and Policy specific to Agricultural Research Centres.

Point Number 639.2

Summary of Decision Requested: **Retain** the definition of "Agricultural and horticultural research activities" in Chapter 13 Definitions as notified.

Decision Reasons:

- No reasons provided.

Point Number 639.3

Summary of Decision Requested: **Retain** the definition of "Agricultural Research Centres" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports retention of the definition.

Point Number 639.4

Summary of Decision Requested: **Retain** the definition of "Campus" in Chapter 13 Definitions as notified.

Decision Reasons:

- The submitter supports retention of the definition.

Point Number 639.5

Summary of Decision Requested: **Retain** Rule 14.12.1.4(d)(ii) Permitted Activities - Traffic Generation.

Decision Reasons:

- Rule 14.12.1.4(d)(ii) Permitted Activities Traffic Generation retains the permitted traffic movements for an Agricultural Research Centre from Schedule 25C of the Operative Waikato District Plan, which is supported.

Point Number 639.6

Summary of Decision Requested: **Amend** Rule 22.2.3.1 P1 (a)(iv) Earthworks - General as follows:

(a) Earthworks for...

...~~(iv) A building platform for a residential activity, including accessory buildings identified on a building consent, or required the building platform to maintain stable slopes for the authorised construction work.~~

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

~~PZ~~ A staff facility that is incidental to agricultural or horticultural research that includes:

1. A dwelling ~~located at least 200m from the site containing Inghams Feed Mill in Hamilton City Council's jurisdiction;~~
2. A recreational facility;
3. Social club;
4. Cafeteria or café.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Rule 22.2.3.1(P1) provides for "ancillary rural earthworks", "farm quarry", "construction and/or maintenance of tracks, fences or drains" and "a building platform for a residential activity, including accessory buildings" as permitted activities which is supported.

- The rule provides for earthworks associated with "A building platform for a residential activity, including accessory buildings" as a permitted activity. However there is no permitted activity provision for building platforms associated with non-residential activities (such as farm buildings, or in the case of the submitter, buildings associated with Agricultural Research Centres)

Point Number 639.7

Summary of Decision Requested:

Amend Rule 22.2.3.1 P2(b) Earthworks - General as follows:

(b) With the exception of earthworks for the activities listed in Rule 22.2.3.1 P1, earthworks within a site must meet all of the following conditions...

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

~~P2~~ A staff facility that is incidental to agricultural or horticultural research that includes:

1. A dwelling located at least 200m from the site containing Inghams Feed Mill in Hamilton City Council's jurisdiction;
2. A recreational facility;
3. Social club;
4. Cafeteria or café.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Current permitted activity limits on earthworks in Rule 22.2.3.1(P2) could trigger resource consent for future development work either within the Campus area or on the Research Farm.
- Seeks to amend rule 22.2.3.1 P1 to permit earthworks incidental to an approved building consent.
- Would avoid unnecessary bureaucracy and cost associated with resource consent.
- Rule 22.2.3.1(P2) applies various limits to earthworks within a site. The way the rule are written, the limits would apply to the list of permitted activities in Rule 22.2.3.1 (P1), which could unnecessarily trigger resource consent for typical and accepted farming activities.
- Amendment is required to ensure the various limits do not apply to the list of permitted activities in P1.
- These activities are a fundamental requirement for being able to undertake efficient farming operation and an accepted element in the rural landscape.
- Earthworks are already regulated by the Regional Plan.
- A requirement for resource consent would impose unnecessary duplication and compliance costs onto typical farming operations.

Point Number 639.8

Summary of Decision Requested:

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

(a) The rules that apply to a permitted activity within the Agricultural Research Centres Specific Area as identified on the planning maps are as follows:

(i) Rule 22.2 Land use – Effects;

(ii) Rule 22.3 Land Use – Building; except for building within a Campus

A. Rule 22.3.4.1 Height – Building general will not apply and Rule 22.5.3.4 will apply instead; and Rule 22.5.3.4 will apply instead; and

B. Rule 22.3.6 Building coverage will not apply and Rule 22.5.4.5 will apply instead.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Rule 22.5.2 lists permitted activities within the Agricultural Research Centres Specific Area. "An agricultural or horticultural research activity" is permitted in addition to various activities incidental to agricultural or horticultural research.
- Under Schedule 25C (Agricultural Research Centres) of the Operative District Plan, Rule 25C.4.1(e) provides for "a commercial activity" that is "incidental to agricultural and horticultural research" as a permitted activity.
- This rule has not been transferred to Rule 22.5.2.
- As a result, Rule 22.1.5(1)(D), a discretionary activity resource consent would be required for a "commercial activity".
- The submitter seeks a continued permitted activity status consistent with Schedule 25C of the Operative District Plan.

Point Number 639.9

Summary of Decision Requested:

Add "Agricultural Research Centre Campus" in Table 5.1 of Appendix 5 Hazardous Substances Activity Status Table – Permitted Activity Thresholds in the column for the Business, Business Town Centre, Business Tamahere, Industrial, Heavy Industrial, Hampton Downs Motor Sport and Recreation and Te Kowhai Airpark Zones.

Decision Reasons:

- In the Operative Waikato District Plan, Appendix H (Hazardous Substances) includes "Agricultural Research Centre Campus" and "Waikato Innovation Park" with the Industrial Zone in Table HT1 (Permitted Activities by Zone).
- No corresponding provision for an "Agricultural Research Centre Campus" in Table 5.1 Activity Status Table – Permitted Activity Thresholds.
- Consequently, the more restrictive permitted activity thresholds from the underlying Rural zone would apply.

Point Number 639.10

Summary of Decision Requested:

Amend the Proposed District Plan to include the provisions from the Operative District Plan in Schedule 25C for Agricultural Research Centres as they were originally intended.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number 639.11

Summary of Decision Requested:

Amend the Proposed District Plan to recognise and provide for all key existing and future activities in the Agricultural Research Centres.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number

639.12

Summary of Decision Requested:

Delete any site-specific conditions relating to Agricultural Research Centres that are sufficiently covered by District-wide provisions.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number

639.13

Summary of Decision Requested:

Retain the parts of Rule 22.2.3.1 (P1) relating to:

- Earthworks that provide for ancillary rural earthworks,
- Farm quarry construction and/or maintenance of tracks, fences or drains, and
- Building platform for a residential activity, including accessory buildings.

Decision Reasons:

- No reasons provided.

Point Number

639.14

Summary of Decision Requested:

Retain the boundaries of the "Agricultural Research Centre LIC"

AND

Retain the "Agricultural Research Centre LIC/DairyNZ Campus".

AND

Retain the "Specific Area/Activity" overlay.

AND

Retain the underlying Rural Zone.

Decision Reasons:

- the boundaries of the "Agricultural Research Centre LIC" and the "Agricultural Research Centre LIC/DairyNZ Campus" have been shown correctly as a "Specific Area/Activity" overlay on the planning maps.

Point Number

639.15

Summary of Decision Requested:

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

~~P6 Disposal or storage of solid organic waste or cleanfill that is incidental to agricultural or horticultural research where the extracted material is used on the Agricultural Research Centre site.~~

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- P6 is not necessary to provide for the on-site disposal or storage of solid organic or cleanfill waste, or an extractive industry for on-site use. The relevant Waikato Regional Plan rules are adequate and can be relied upon.

Point Number

639.16

Summary of Decision Requested:

Amend Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

~~P7 A staff facility that is incidental to agricultural or horticultural research that includes:~~

1. A dwelling ~~located at least 200m from the site containing Inghams Feed Mill in Hamilton City Council's jurisdiction;~~
2. A recreational facility;
3. Social club;
4. Cafeteria or cafe.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- P7 is not necessary, as there is no need for a 200m setback for a dwelling in relation to the Inghams Feed Mill under P7(1).
- This rule has been transferred from Rule 25C.4.1(j) of Schedule 25C of the Operative DP.
- It was only relevant to the AgResearch Centre, which is no longer located within the Waikato District (now within HCC).
- The Inghams Feed Mill is located over 2.5km from the nearest boundary of the LIC or DairyNZ Agricultural Research Centres.
- 200m setback is not necessary.
- A "social club" has not been included as an example of a staff facility despite being included in the original Rule 25C.4.1(j) of Schedule 25C of the Operative DP.

Point Number

639.17

Summary of Decision Requested:

Add the following activities to Rule 22.5.2 Permitted Activities – Agricultural and Horticultural Research as follows:

P7 A Commercial activity that is incidental to agricultural or horticultural research.

P8 Offices that are incidental to agricultural or horticultural research.

P9 Laboratories that are incidental to agricultural or horticultural research.

P10 Warehouse or storage facilities that are incidental to agricultural or horticultural research.

AND

Any consequential amendments and/or additional relief required to address the matters raised in the submission.

Decision Reasons:

- Under Rule 22.5.2, there are a number of other key activities integral and essential to the operation of the LIC and DairyNZ Agricultural Research Centres which are not listed as permitted activities.
- These include: offices, laboratories, conference facilities, warehouse or storage facilities and staff cafeterias or cafes.
- Concern that these activities would default to a non-complying activity.
- This was not as problematic with the Operation District Plan because it has a more effects based where any activity is permitted if it complies with the relevant performance standards (and is not listed as restricted discretionary, discretionary or prohibited).

Point Number 639.18

Summary of Decision Requested: Retain Chapter 22.5 Specific Area – Agricultural Research Centres, with amendments sought in the submission.

Decision Reasons:

- No reasons provided.

Submitter Number: 640 **Submitter:** Timothy Bodle

Point Number 640.1

Summary of Decision Requested: Amend the boundary of the Significant Amenity Landscape area on the property at 316 Hooker Road, Tamahere (Property No. 1008619) to align with the Significant Natural Area (i.e. from river to bush line, but not including the farm/pasture land); or any other relief which would address the reasons for this submission.

Decision Reasons:

- Do not oppose identification of Significant Natural Area.
- Significant Amenity Landscape is now over pasture/farmland which we do not consider an Significant Amenity Landscape.
- Area has been increased to include farmland, which does not seem appropriate.
- The submitter has not been provided sufficient information to confirm the Significant Amenity Landscape classification.
- New overlay will trigger requirement for resource consent in certain circumstances in an area with an 'inappropriate' Significant Amenity Landscape site.
- Does not achieve the purpose of RMA.

Submitter Number: 641 **Submitter:** Gary Hooper

On behalf of: Harrisville Family Trust

Point Number 641.1

Summary of Decision Requested: Amend the zoning of the property at 639 Harrisville Road, Pukekohe, from Rural Zone to Country Living Zone.

Decision Reasons:

- The surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan.
- This potential could mean residential housing and therefore a residential environment in this locality rather than a large open space rural environment.
- The subject property does not contain prime soils.
- Given the close proximity to the village of Buckland and town of Pukekohe a change of zoning from Rural to Country Living is a logical progression in zoning for this area.

Submitter Number: 642 **Submitter:** Waikato River Authority

Point Number 642.1

Summary of Decision Requested: Add a section to the Proposed District Plan dedicated to the Vision and Strategy, including its objectives and strategies, and relationship to the District Plan.

Decision Reasons:

- Section 13 of the Waikato River Act requires every local authority to review its regional or district plan to see whether it gives effect to the vision and strategy.
- Section 17 of the Waikato River Act describes the effect of the vision and strategy as it relates to the carrying out of the functions or the exercise of powers under the Acts referred to in subsections (4) and (7), in particular the Resource Management Act 1991.
- The Vision and Strategy for the Waikato River carries significant weighting in relation to the District Plan, as the primary direction setting document for the Waikato River.

Point Number 642.2

Summary of Decision Requested: Add a section to the Proposed District Plan acknowledging the related settlements to the Waikato District area including the Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010.

Decision Reasons:

- Section 13 of the Waikato River Act requires every local authority to review its Regional or District Plan to see whether it gives effect to the vision and strategy.
- Section 17 of the Waikato River Act describes the effect of the vision and strategy as it relates to the carrying out of the functions or the exercise of powers under the Acts referred to in subsections (4) and (7), in particular the Resource Management Act 1991.
- The Vision and Strategy for the Waikato River carries significant weighting in relation to the District Plan, as the primary direction setting document for the Waikato River.

Point Number	642.3
Summary of Decision Requested:	Retain the Taangata Whenua chapter to better express and give effect to the relationship between River Iwi, Hapuu and Marae, to the Waikato River and all it embraces.
Decision Reasons:	<ul style="list-style-type: none"> To realise the Vision and Strategy, the following objectives (B, C and M) will be pursued: <ul style="list-style-type: none"> The restoration and protection of the relationship of Waikato-Tainui with the Waikato River, including their economic, social, cultural and spiritual relationships. The restoration and protection of the relationship of the Waikato River iwi according to their tikanga and kawa, with the Waikato River, including their economic, social, cultural and spiritual relationships. The application to the above of both Maatauranga Maaori and the latest available scientific methods.
Point Number	642.4
Summary of Decision Requested:	Amend the Proposed District Plan to allow for greater integration of Maatauranga Maaori throughout the various policies in the Plan.
Decision Reasons:	<ul style="list-style-type: none"> To realise the Vision and Strategy, the following objectives (B, C and M) will be pursued: <ul style="list-style-type: none"> The restoration and protection of the relationship of Waikato-Tainui with the Waikato River, including their economic, social, cultural and spiritual relationships. The restoration and protection of the relationship of the Waikato River iwi according to their tikanga and kawa, with the Waikato River, including their economic, social, cultural and spiritual relationships. The application to the above of both Maatauranga Maaori and the latest available scientific methods.
Point Number	642.5
Summary of Decision Requested:	Amend the Proposed District Plan, including maps, to include the Waikato River in its entirety as both an Outstanding Natural Feature and an Outstanding Natural Landscape.
Decision Reasons:	<ul style="list-style-type: none"> The Authority supports the identification of areas of high and outstanding natural character and outstanding natural features and landscapes. To achieve the objectives of the Vision and Strategy, the Waikato River must be included as an Outstanding Natural Feature in its entirety and should under no circumstance be considered in parts or sections. Recognition of the Waikato River acknowledges the significant role and contribution that the river has provided and sacrificed to the wellbeing of the nation, region and district. The Vision and Strategy for the Waikato River is the primary direction setting document for the Waikato River and all it embraces. The Waikato District Council is responsible for the largest portion of the Waikato River, by a single territorial authority in length and area. It would be remiss of the Council to not take this opportunity to further acknowledge the Waikato River as a primary feature that requires great protection and restoration. National recognition of the Waikato River, and legislative weighting justifies the rivers recognition as an Outstanding Natural Feature and Outstanding Natural Landscape.
Point Number	642.6
Summary of Decision Requested:	Amend The Proposed District Plan earthworks provisions to provide for setbacks from waterways that are consistent with the Proposed Plan Change 1 to the Waikato Regional Council and gives effect to the Vision and Strategy.
Decision Reasons:	<ul style="list-style-type: none"> The proposed Plan provides for Earthworks in specific zones. The Vision and Strategy promotes "betterment" to ensure that minimum levels of mitigation or prevention are improved. The earthworks setbacks proposed by the District Plan does not adequately protect water ways and is inconsistent with the notified Proposed Plan change 1 to the Waikato Regional Plan. Proposed Plan Change 1 was triggered by the need to give effect to the Vision and Strategy for the Waikato River, and requires a minimum set back of 5m from a waterway (for cropping only) to be considered a permitted activity. The Proposed Plan only allows for a 1.5m setback in the residential zone and appears to have no setbacks at all for earthworks in the rural zone. The Council has failed to have particular regard to the Vision and Strategy for the Waikato River, in particular objectives F, G and H (as set out in the submission).
Point Number	642.7
Summary of Decision Requested:	Retain the identification of areas of High and Outstanding Natural Character.
Decision Reasons:	<ul style="list-style-type: none"> The identification of High and Outstanding Natural Character areas supports the Vision and Strategy for the Waikato River.
Point Number	642.8
Summary of Decision Requested:	Retain the identification of Outstanding Natural Features and Outstanding Natural Landscapes.
Decision Reasons:	<ul style="list-style-type: none"> The identification of Outstanding Natural Features and Outstanding Natural Landscapes will assist in the achieving the objectives of the Vision and Strategy for the Waikato River.
Point Number	642.9
Summary of Decision Requested:	Demonstrate to the Waikato River Authority how the Proposed District Plan Stage 1 has given "particular regard" to the Vision and Strategy for the Waikato River.
Decision Reasons:	<ul style="list-style-type: none"> It is the view of the Waikato River Authority that Regional and District Councils have an opportunity to realise the opportunity to realise the objectives of the Vision and Strategy, each time an Resource Management Act planning document is reviewed or amended. The Council has made some improvements, but more can be achieved by accepting the recommendations in our submission.

Point Number 643.1

Summary of Decision Requested: Delete the Significant Natural Area from the property at 40B Cameron Town Road, Pukekohe (Property no. 301359).

Decision Reasons:

- Proposed Significant Natural Area is purely a commercial cropping area being a Pinus Radiata and Eucalyptus plantation first established 25 years ago.
- No original component of natural bush except minor secondary growth at foot of pines and is grazed by sheep.
- Prior to the establishment of the pine and gum plantation, the site was a scoria quarry abandoned in 1950s and stripped of soil and any natural growth.
- The Existing plantation has now reached maturity and needs to be harvested and replanted.
- Suggests the Significant Natural Area is an error and the aerial survey misidentified the submitter's pine and gum crop as natural vegetation, which it is not and never has been.

Submitter Number: 644 **Submitter:** Spark New Zealand Trading Limited

Point Number 644.1

Summary of Decision Requested: Amend the format of the District Plan as necessary to adopt the format and requirements of the National Planning Standards, including F-4 Spatial Planning Tools (District) Standard should these come into effect before decisions on the Proposed District Plan are made.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- National Planning Standards are currently under consideration by the Ministry for the Environment.
- It is likely at least some standards will have legal effect prior to the issue of decisions on the Proposed Plan.
- Submitter request the decision maker considers reformatting the notified content and any changes made as part of this process into the National Planning Standards requirements, for example F-4 Spatial Planning Tools (District) Standard.
- The purpose of the submission point is to give Council scope to change notified content.
- Any changes made as part of this process to meet any obligations of the approved National Planning Standards, likely to come into effect in April 2019.

Point Number 644.2

Summary of Decision Requested: Retain Objective 3.1.1 Biodiversity and ecosystems, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.3

Summary of Decision Requested: Retain 3.1.2 Policy - Indigenous Vegetation and Habitats, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas. Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.4

Summary of Decision Requested: Retain Objective 3.2.1 Significant Natural Areas, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.5

Summary of Decision Requested: Retain Policy 3.2.2 Identify and Recognise, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas. Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.6

Summary of Decision Requested: Retain Policy 3.2.3 Management hierarchy, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.

- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.7

Summary of Decision Requested: Retain Policy 3.2.4 Biodiversity Offsetting, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.8

Summary of Decision Requested: Retain Policy 3.2.5 Biodiversity in the coastal environment, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.9

Summary of Decision Requested: Retain Policy 3.2.6 Providing for vegetation clearance, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.10

Summary of Decision Requested: Retain Policy 3.2.7 Managing Significant Natural Areas, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.11

Summary of Decision Requested: Retain Objective 3.3.1 Outstanding natural features and landscapes, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.12

Summary of Decision Requested: Retain Policy 3.3.2 Recognizing values and qualities, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.13

Summary of Decision Requested: Retain Policy 3.3.3 Protection from inappropriate subdivision, use and development, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.14

Summary of Decision Requested: Retain Objective 3.5.1 Natural Character, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.15

Summary of Decision Requested: Retain Policy 3.5.2 Recognising natural character, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.16

Summary of Decision Requested: Retain Policy 3.5.3- Protecting the natural character qualities of the coastal environment as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.17

Summary of Decision Requested: Retain Policy 3.5.4- Protecting the natural character of wetlands, and lakes and rivers and their margins as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.18

Summary of Decision Requested: Retain Objective 6.1.1- Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- These provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 644.19

Summary of Decision Requested: Retain Policy 6.1.2- Development, operation and maintenance as notified.

Decision Reasons:

- These provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 644.20

Summary of Decision Requested: Retain Policy 6.1.4- Infrastructure benefits as notified.

Decision Reasons:

- These provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 644.21

Summary of Decision Requested: Retain Policy 6.1.5- Natural Hazards and climate change as notified.

Decision Reasons:

- These provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 644.22

Summary of Decision Requested: Retain Policy 6.1.7- Reverse sensitivity and Infrastructure as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 644.23

Summary of Decision Requested: Retain Objective 6.1.8- Infrastructure in the community and identified areas as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.24

Summary of Decision Requested:

Retain Policy 6.1.9- Environmental effects, community health, safety and amenity as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.25

Summary of Decision Requested:

Retain Policy 6.1.10- Infrastructure in identified areas as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.26

Summary of Decision Requested:

Retain Policy 6.1.11- Undergrounding new infrastructure as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.27

Summary of Decision Requested:

Retain Policy 6.1.12- Co-location of compatible facilities as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.28

Summary of Decision Requested:

Retain Policy 6.1.13- Future growth areas as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.29

Summary of Decision Requested:

Retain Policy 6.1.14- Electromagnetic and radio frequency fields as notified.

Decision Reasons:

- These provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number

644.30

Summary of Decision Requested:

Amend Policy 6.1.3- Technological advances by replacing it with the following wording as proposed in the draft National Planning Standard for Network Utilities or other changes of like effect:

Provide flexibility for network utilities to adopt new technologies that:

1. Improve access to, and efficient use of, networks and services;

2. Allow for the re-use of redundant services and structures;

3. Increase resilience, safety or reliability of networks and services;

4. Result in environmental benefits and enhancements; or

5. Promote environmentally sustainable outcomes including green infrastructure and the increased the utilisation of renewable resources.

OR

Amend Policy 6.1.3- Technological advances by using "or" rather than "and" to remove the conjunctive nature of the clauses.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Policy 6.1.3 seeks to provide flexibility to use new technologies subject to a number of conjunctive limbs (i.e. all have to be met).
- It is unclear how clause (iii) would be interpreted where a new technology may have a significant community benefit but does necessarily reduce environmental effects.
- Wording of the equivalent policy in the draft National Planning Standard for Network Utilities is a preferred approach to promoting the use of technological advances, as it provides alternative means to satisfy the policy.
- Draft National Planning Standard for Network Utilities provisions are being used as best practice by stakeholders for discussion with councils undertaking plan reviews and the content of submissions.

Point Number

644.31

Summary of Decision Requested:

Retain Chapter 14: Infrastructure and Energy as notified, except where specific amendments have been requested in this submission.

Decision Reasons:

- Generally, Chapter 14 is supported in regard to infrastructure and particularly sections 14.1-14.3 and 14.10- Telecommunications except where specific amendments have been requested.

Point Number 644.32

Summary of Decision Requested: **Amend** Rule 14.2.1.1 New Infrastructure- Activity Specific Conditions relating to P1 New Infrastructure by providing an exemption for service connections including any associated support poles from all heights in relation to boundary controls.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Support poles associated with service connections should be exempt from any height in relation to boundary controls either within a road or outside of a road (e.g. along a right of way) on the basis that they have very minor bulk compared with more substantial buildings and structures.

Point Number 644.33

Summary of Decision Requested: **Amend** Rule 14.3.1.1 Minor Infrastructure Upgrading- Activity Specific Conditions, as follows:

(1) (b) Amend the existing the permitted height increase for an existing pole to "the lesser of 25m or 30%."

(1) (c) Amend the permitted pole or support structure width to twice the width of the existing pole at the widest point, unless a double pole is required to replace a single pole where the permitted pole or support structure width required is three times the width of the existing pole at the widest point (double poles may be required for electricity networks).

(3) The addition, replacement or relocation of existing antennas where:

(a) The antennas shall not increase in the face area by more than 20% of the relevant permitted standard for new panel antennas and shall not increase the diameter of a dish antenna by more than 20% of the relevant permitted standard for a new dish antenna; and

(b) The antennas shall not increase in height by more than 20% of the relevant permitted standard for new dish and panel antennas.

Note that area controls are not applied to other antennas types such as those made up of rods and tubes, which are controlled by standard (3)(b).

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- A number of proposed conditions relevant to telecommunications are impractical to support rapid technical changes or maintenance requirements.
- Not aligned with draft National Planning Standard for Network Utilities.
- Submitter seeks various amendments to seek more alignment with the National Planning Standard that is currently under development and intended to provide a practical envelope for typical infrastructure upgrading activity to respond with rapidly changing technology requirements and/or necessary maintenance activities.

Point Number 644.34

Summary of Decision Requested: **Amend** Rule 14.3.1.3 Earthworks associated with infrastructure- Activity Specific Conditions and the related rules cascade so that it is clear what the activity status is in all Identified Areas where earthworks either exceed the permitted volumes in Rule 14.3.1.3, are restricted by a clause in Rule 14.3.1.3 (e.g. scheduled historic heritage site), or where the rule is silent (e.g. Significant Natural Area).

AND

Amend Rule 14.2.3 NC3 Non-Complying Activities so that earthworks ancillary to infrastructure do not cascade by default to non-complying status under the rule 14.2.3 NC3.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- These standards include earthworks thresholds in many Identified Areas, including Significant Natural Areas, and includes a standard not allowing earthworks on scheduled historic heritage sites.
- It is unclear if earthworks not subject to a specific threshold in an overlay, or subject to a rule that does not allow any earthworks as a permitted activity, would then default to be a non-complying activity regardless of scale under Rule 14.2.3, NC3.
- For avoidance of doubt, the submitter seeks Rule 14.3.1.3 and associated rules cascade makes it clear what the status is of earthworks either not covered by a standard in 14.3.1.3 or are subject to a rule not providing for them as a permitted activity in a particular area (e.g. scheduled historic heritage) and ensure they do not cascade by default to non-complying under Rule 14.2.3 NC3.

Point Number 644.35

Summary of Decision Requested: **Add** a new controlled activity rule under Rule 14.3.2 General Infrastructure as follows:

C2 A service connection to an area façade or item specifically listed in Schedule 30.1.

Matters of Control:

- Design and placement of the service connection to minimise impacts on the values and attributes of the listed area, façade or item.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule P8 in the General Infrastructure rules provides for service connections as a permitted activity other than where connected to an area, façade or item specifically listed in Schedule 30.1.
- There have been ongoing discussion between telecommunications operators and Heritage New Zealand Pouhere Taonga over how service connections to heritage listed buildings should be addressed.
- Agreement has been reached on other Plans that these are appropriately dealt with as a controlled activity to enable method of connection to be controlled to minimise impacts on heritage items while still allowing for reasonable and practical use of heritage listed buildings.

Point Number 644.36

Summary of Decision Requested: **Amend** Rule 14.10.1.3 (a) (iii) P4- Antennas and lines attached to retaining walls, tunnels, bridges and other structures located within the road by changing the permitted dish antenna size descriptor from 0.6m "width" to 0.6m "diameter."

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Activity specific controls in 14.10.1.3 include a 0.6m "width" restriction for dish antennas and should be changed to "diameter."

Point Number 644.37

Summary of Decision Requested: **Amend** Activity Rule 14.10.1 P7- Antennas not attached to a building and/or structure and any other rules as necessary so that the equipment covered by the activity specific conditions in Rule 14.10.1.5 may be attached to buildings, structures and poles covered in Rules P4, P5 and P9 as follows:

Activity title: ~~Other Antennas not attached to a building and/or structure.~~

14.10.1.5

(a) Antennas that comply with all of the following conditions are excluded from any height standards in 14.10.1 P4, P5 and P9:

(i) GPS antennas that do not exceed the following dimensions:

A. 300mm high; and

B. 130mm in diameter.

(ii) Omni-directional 'whip' or di-pole type antennas that do not exceed the following dimensions:

A. 1.6m high;

B. 1.5m horizontal length whip or rod; or

C. Cross-section element no more than 60mm in diameter.

~~(iii) Are not located within an Identified Area.~~

(iv) Do not connect to an area, façade or item specifically listed in Schedule 30.1.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- It is unclear what the rule is intended to cover.
- All antennas will be attached to a building or a structure (even if a purpose-built pole).
- These types of antennas could be deployed on an existing building or structure covered by Rules P4 and P5, or on a pole as provided for under P9.
- These antennas have low visual impact, making them appropriate on top of buildings and poles or in an Identified Area.

Point Number 644.38

Summary of Decision Requested: **Amend** Rule 14.10.1 P8- Small cell units exceeding the permitted volumetric dimension of 0.1 l m² regulated in the NESTF- and related activity standard by changing all use of "m²" to "m³."

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule uses m² rather than m³ in activity rules and standards and needs to be amended to m³.
- Volumetric dimension in the NESTF 2016 is 0.1 l m³.

Point Number 644.39

Summary of Decision Requested: **Amend** Rule 14.10.1.7 (c) - Poles, antennas and head frames+1 as follows:

(c) Rules 14.10.1.7(+)(a) does not apply to lightning rods and GPS antennas, omni directional whip antenna, ancillary telecommunication devices and earth peaks.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Appears to be an incorrect reference in Rule 14.10.1.7 (c) to Rule 14.10.1.7 (l) rather than 14.10.1.7 (a), as there is no Rule 14.10.1.7 (l).

Point Number 644.40

Summary of Decision Requested: **Amend** activity Specific Standard 14.10.1.8 (a) (i) P10- Externally mounted telecommunication satellite dishes and ancillary components to read as the following:

(a) Externally mounted telecommunication satellite dishes and ancillary components that comply with the following conditions:

(i) Do not exceed 1.0m in diameter, or 1.8m in diameter in industrial, rural residential and rural zones.

(ii) Are attached to existing buildings, and/or including a pole or structure other than a building when located in the rural residential and rural zones.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Activity specific condition 14.10.1.8 (a)(i) limits the diameter of a satellite dish to 1m.
- As part of Rural Broadband Initiative Phase 2 Project, which includes parts of Waikato District, some rural communities may need to be connected to broadband via satellite link.
- Higher capacity links may require a satellite dish up to 1.8m in diameter.

Point Number 644.41

Summary of Decision Requested: **Amend** Rule 14.10.1 C7- Small cell units as follows:

C7 Small cell units located in an Identified Area that connect to an area, façade or item specifically listed in Schedule 30.1 exceeding the maximum volumetric dimension of 0.1 l m² regulated in the NESTF, up to a maximum volume of 0.25m².

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule uses m2 rather than m3 in activity rules and standards and needs to be amended to m3.
- it is unnecessary to restrict equipment in an *Identified Area* given its very small scale.
- Rule should instead only cover equipment connecting to a scheduled heritage item, which would not be a permitted activity under amended Rule P7.

Point Number 644.42

Summary of Decision Requested: Delete activity specific condition Rule 14.10.1.6 P8 (ii) that relates to Identified Areas.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- It is unnecessary to restrict equipment in an Identified Area given its very small scale.
- This rule would restrict connecting to a scheduled heritage item.

Point Number 644.43

Summary of Decision Requested: Retain Policy 3.3.4 The relationships of Maori with natural resources and land, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.44

Summary of Decision Requested: Retain Objective 3.4.1 Significant amenity landscapes, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.45

Summary of Decision Requested: Retain Policy 3.4.2 Recognizing Significant Amenity Landscapes, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.46

Summary of Decision Requested: Retain Policy 3.4.3 Maintaining and enhancing Significant Amenity Landscapes, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 644.47

Summary of Decision Requested: Retain Policy 3.4.4 The relationships of Maori with their resources and land, as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Submitter Number: 645 **Submitter:** Robert Clear

Point Number 645.1

Summary of Decision Requested: Amend the zoning of 176 Limmer Road, Te Kowhai, from Rural Zone to Village Zone.

Decision Reasons:

- Village Zone would be appropriate for the subject property as it adjoins proposed medium density residential zone on Te Kowhai Airfield.
- Proposed Residential Development on Airfield Land will have an adverse effect on the rural land use of 176 Limmer Road.

Submitter Number: 646 **Submitter:** Vodafone New Zealand Limited

Point Number 646.1

Summary of Decision Requested: Amend the format of the district plan as necessary to adopt the format and requirements of the National Planning Standards including F-4 Spatial Planning Tools (District) Standard should they come into effect before decisions on the Proposed District Plan are made.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- National Planning Standards are currently under consideration by the Ministry of the Environment.
- It is likely that at least some standards will have legal effect prior to issue of decisions on the Proposed Plan.
- Submitter requests the decision maker consider reformatting notified content and any changes made as part of this process into the National Planning Standards.
- Purpose of submission is to give council scope to change notified content and any changes made as part of process to meet any obligations of the approved National Planning Standards.

Point Number 646.2

Summary of Decision Requested: Retain Objective 3.1.1 Indigenous Vegetation and Habitats as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.3

Summary of Decision Requested: Retain Policy 3.1.2-Policies as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas", requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.4

Summary of Decision Requested: Retain Objective 3.2.1 Significant Natural Areas as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.5

Summary of Decision Requested: Retain Policy 3.2.2- Identify and recognise as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.6

Summary of Decision Requested: Retain Policy 3.2.3- Management hierarchy as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.7

Summary of Decision Requested: Retain Policy 3.2.4- Biodiversity Offsetting as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.8

Summary of Decision Requested: Retain Policy 3.2.5- Biodiversity in the coastal environment as notified.

Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.9
Summary of Decision Requested:	Retain 3.2.6- Providing for vegetation clearance as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.10
Summary of Decision Requested:	Retain 3.2.7- Managing Significant Natural Areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.11
Summary of Decision Requested:	Retain Objective 3.3.1- Outstanding natural features and landscapes as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.12
Summary of Decision Requested:	Retain Policy 3.3.2- Recognising values and qualities as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.13
Summary of Decision Requested:	Retain Policy 3.3.3- Protection from inappropriate subdivision, use and development as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.14
Summary of Decision Requested:	Retain 3.5.1- Natural Character as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.15
Summary of Decision Requested:	Retain Policy 3.5.2- Recognising natural character as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.16
Summary of Decision Requested:	Retain Policy 3.5.3- Protecting the natural character qualities of the coastal environment as notified.
Decision Reasons:	<ul style="list-style-type: none"> Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas. Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.17

Summary of Decision Requested: Retain Policy 3.5.4- Protecting the natural character of wetlands, and lakes and rivers and their margins as notified.

Decision Reasons:

- Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in such areas.
- Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas.
- Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure.
- Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Point Number 646.18

Summary of Decision Requested: Retain Objective 6.1.1- Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.19

Summary of Decision Requested: Retain Policy 6.1.2- Development, operation and maintenance as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.20

Summary of Decision Requested: Retain Policy 6.1.4- Infrastructure benefits as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.21

Summary of Decision Requested: Retain Policy 6.1.5- Natural hazards and climate change as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.22

Summary of Decision Requested: Retain Policy 6.1.7- Reverse sensitivity and infrastructure as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.23

Summary of Decision Requested: Retain Objective 6.1.8- Infrastructure in the community and identified areas as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.24

Summary of Decision Requested: Retain Policy 6.1.9- Environmental effects, community health, safety and amenity as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.25

Summary of Decision Requested: Retain Policy 6.1.10- Infrastructure in identified areas as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.26

Summary of Decision Requested: Retain Policy 6.1.11- Undergrounding new infrastructure as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- These provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 646.27

Summary of Decision Requested: Retain Policy 6.1.12-Co-location of compatible facilities as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
 - These provisions are considered to provide a workable policy framework for telecommunications infrastructure.
-

Point Number 646.28

Summary of Decision Requested: Retain Policy 6.1.13- Future growth areas as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
 - These provisions are considered to provide a workable policy framework for telecommunications infrastructure.
-

Point Number 646.29

Summary of Decision Requested: Retain Policy 6.1.14- Electromagnetic and radio frequency fields as notified.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
 - These provisions are considered to provide a workable policy framework for telecommunications infrastructure.
-

Point Number 646.30

Summary of Decision Requested: Amend Policy 6.1.3- Technological advances by replacing it with the following wording as proposed in the draft National Planning Standard for Network Utilities or other changes of like effect:

Provide flexibility for network utilities to adopt new technologies that:

1. Improve access to, and efficient use of, networks and services;
2. Allow for the re-use of redundant services and structures;
3. Increase resilience, safety or reliability of networks and services;
4. Result in environmental benefits and enhancements; or
5. Promote environmentally sustainable outcomes including green infrastructure and the increase the utilisation of renewable resources.

OR

Amend Policy 6.1.3 - Technological advances, by using "or" rather than "and" to remove conjunctive nature of the clauses.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Policy 6.13 seeks to provide flexibility to use new technologies subject to a number of conjunctive limbs.
 - It is unclear how clause (iii) would be interpreted where a new technology may have a significant community benefit but does not necessarily reduce environmental effects.
 - Wording of the equivalent policy in the draft National Planning Standard for Network Utilities is a preferred approach to promoting the use of technological advances.
 - Draft National Planning Standard for Network Utilities provisions are being used as best practice by the stakeholders for discussion with councils undertaking plan reviews and the content of submissions.
-

Point Number 646.31

Summary of Decision Requested: Retain Chapter 14 Infrastructure and Energy as notified, except where specific amendments have been requested in the submission.

Decision Reasons:

- Generally, Chapter 14 is supported in regard to infrastructure and particularly sections 14.1-14.3 and 14.10 telecommunications, except where specific amendments have been requested.
-

Point Number 646.32

Summary of Decision Requested: Amend activity specific conditions in Rule 14.2.1.1 for New Infrastructure (P1) by providing an exemption for service connections including any associated support poles from all height in relation to boundary controls.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Support poles associated with service connections should be exempt from any height in relation to boundary controls either where within a road or outside of a road on the basis that have very minor bulk compared with more substantial buildings and structures.
-

Point Number 646.33

Summary of Decision Requested: Amend the activity specific conditions in Rule 14.3.1.1 for Minor Infrastructure Upgrading (P2), as follows:

(1)(b) Permitted height increase for an existing pole to the "lesser of 25m or 30%".

(c) Amend permitted pole or support structure width to twice the width of the existing pole at the widest point, unless a double pole is required to replace a single pole where the permitted pole or support structure width required is three times the width of the existing pole at the widest point (double poles may be required for electricity networks).

(3) The addition, replacement or relocation of existing antennas where:

(a) The antennas shall not increase ~~in the face~~ area by more than 20% of the relevant permitted standard for new panel antennas and shall not increase the diameter of a dish antenna by more than 20% of the relevant permitted standard for a new dish antenna; and

(b) The antennas shall not increase in height by more than 20% of the relevant permitted standard for new dish and panel antennas.

Note that the area controls are not applied to other antennas types such as those that are made up of rods and tubes, which are controlled by standard (3) (b).

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- A number of proposed conditions relevant to telecommunications are impractical to support rapid technical changes or maintenance requirements.
- Not aligned with draft National Planning Standard for Network Utilities.
- Submitter seeks alignment with National Planning Standard that is currently under development, currently under development to provide a practical means for typical infrastructure upgrading activity to respond with rapidly changing technology requirements.

Point Number

646.34

Summary of Decision Requested:

Amend Activity-specific conditions Rule 14.3.1.3 for P4 Earthworks activities associated with infrastructure and the related rules cascade such that it is clear what the activity status is in all Identified Areas where earthworks either exceed the permitted volumes in Rule 14.3.1.3, are restricted by a clause in Rule 14.3.1.3 (e.g. scheduled historic heritage site), or where the rule is silent (e.g. SNA).

AND

Amend Rule 14.2.3 NC3 Non-Complying Activities so that earthworks ancillary to infrastructure do not cascade by default to non-complying activity status under the rule 14.2.3 NC3.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- These standards include earthworks thresholds in many Identified Areas, but not all of the Identified Areas (e.g. SNA) and includes a standard not allowing earthworks on a scheduled historic heritage sites.
- For the avoidance of doubt, submitter seeks relief the Rule 14.3.1.3 is made clearer what the status of earthworks either not covered by a standard in 14.3.1.3 or are subject to a rule not providing for them as a permitted activity in a particular area (e.g. scheduled historic heritage).
- It is unclear if earthworks not subject to a specific threshold in an overlay, or subject to a rule that does not allow any earthworks as a permitted activity, would then default to be a non-complying activity regardless of scale under Rule 14.2.3 NC3 (earthworks in an Identified Area not otherwise provided for by a rule in Chapter 14).
- Submitter seeks such relief for avoidance of doubt.

Point Number

646.35

Summary of Decision Requested:

Add a new controlled activity rule under General Infrastructure 14.3.2- Controlled Activities as follows, or wording to like effect:

C2 A service connection to an area, façade or item specifically listed in Schedule 30.1.

Matters of Control:

- Design and placement of the service connection to minimise impacts on the values and attributes of the listed area, façade or item.

Decision Reasons:

- Rule P8 under General Infrastructure provides for service connection as a permitted activity other than where connected to an area, façade or item specifically listed in Schedule 30.1.
- There has been ongoing discussion between telecommunications operators and Heritage New Zealand Pouhere Taonga over how service connection to heritage listed buildings should be addressed and agreement on other plans that decided they were appropriately dealt with as a controlled activity.

Point Number

646.36

Summary of Decision Requested:

Amend specific conditions Rule 14.10.1.3(a)(iii) Antennas and lines attached to retaining walls, tunnels, bridges and other structures located within the road, by changing the permitted dish antennas size descriptor from 0.6m "width" to 0.6m "diameter".

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Activity-specific controls in 14.10.1.3 include 0.6m "width" restriction which needs to be changed to "diameter".

Point Number

646.37

Summary of Decision Requested:

Amend Activity Rule 14.10.1 P7 Antennas not attached to a building and/or structure, and any other rules as necessary such that the equipment covered by activity specific conditions in Rule 14.10.1.5 may be attached to buildings, structures and poles covered in Rules P4, P5 and P9 as follows:

Activity Title: ~~Other antennas not attached to a building and structure.~~

14.10.1.5

(a) Antennas that comply with all of the following conditions are excluded from any height standards in 14.10.2 P4, P5 and P9:

(i) GPS antennas that do not exceed the following dimensions:

A. 300mm high; and

B. 130mm in diameter.

(ii) Omni-directional 'whip' or di-pole type antennas that do not exceed the following dimensions

A. 1.6m high;

B. 1.5m horizontal length whip or rod; or

C. Cross section element no more than 60mm in diameter.

~~(iii) Are not located within an Identified Area.~~

(iv) Do not connect to an area, façade or item specifically listed in Schedule 30.1.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Unclear what this rule is intended to cover.

- All antennas will be attached to a building or structure.
- Types of antennas used could be deployed on a existing building/structure covered by rules P4 and P5, or on a pole as provided for under P9.
- Antennas have low visual impact and therefore are appropriate on top of buildings and poles in an Identified Area.

Point Number 646.38

Summary of Decision Requested: **Amend** activity-specific condition Rule 14.10.1.6 for P8- Small cell units exceeding the permitted volumetric dimension of 0.11m³ regulated in the NESTF and related activity standards by changing all use of "m2" to "m3".

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule use m2 rather than m3 in activity rules and standards and must be amended to m3.
- Volumetric dimension in NESTF 2016 is 0.11m³.

Point Number 646.39

Summary of Decision Requested: **Delete** activity specific condition rule 14.10.1.6 (ii) P8 that relates to "Identified Areas".

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- It is unnecessary to restrict equipment in an Identified Area given its very small scale.
- This Rule would restrict connecting to a scheduled heritage item.

Point Number 646.40

Summary of Decision Requested: **Amend** activity-specific conditions Rule 14.10.1.7 (c) for P9 Poles, antennas and head frames, as follows:

(c) Rule 14.10.1.7(4)(ii) does not apply to lighting rods and GPS antennas, omni-directional whip antennas, ancillary telecommunication devices and earth peaks.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Appears to be an incorrect reference in Rule 14.10.1.7 (c) as rule refers to Rule 14.10.1.7(1) rather than 14.10.1.7(a) as there is no Rule 14.10.1.7(1).

Point Number 646.41

Summary of Decision Requested: **Amend** activity-specific condition Rule 14.10.1.8(a)(i) for P10 Externally-mounted telecommunication satellite dishes and ancillary components, as follows:

(a) Externally-mounted telecommunications satellite dishes and ancillary components that comply with the following conditions:

(i) Do not exceed 1.0m in diameter, or 1.8m in diameter in industrial, rural residential and rural zones.

(ii) Are attached to existing buildings, and/or including a pole or structure other than a building when located in the rural residential and rural zones;

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Activity-specific condition 14.10.1.8(a)(i) limits the diameter of a satellite dish to 1m.
- Higher capacity links, like the Rural Broadband Initiative Phase 2 Project, may require a satellite dish up to 1.8m in diameter.

Point Number 646.42

Summary of Decision Requested: **Amend** activity-specific condition Rule 14.10.2 for C7 - Small cell units as follows:

C7 Small cell units that connect to an area, facade or item specifically listed in Schedule 30.1 exceeding the maximum volumetric dimension in 0.11m³ regulated in the NESTF, up to a maximum volume of 0.25m³.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- The Rule uses m2 rather than m3 in the activity rules and standards, which needs to be amended to m3.
- It is unnecessary to restrict this equipment in an Identified Area given its very small scale.
- The Rule should instead only cover equipment connecting to a scheduled heritage item, which would not be a permitted activity under amended Rule P7.

Point Number 646.43

Summary of Decision Requested: **Retain** Objective 6.1.6 Reverse sensitivity.

Decision Reasons:

- This is generally consistent with the policy framework in the draft National Planning Standards for infrastructure.
- The provisions are considered to provide a workable policy framework for telecommunications infrastructure framework.

Point Number 646.44

Summary of Decision Requested: **Retain** Policy 3.3.4- The relationships of Maaori with natural resources and land as notified.

Decision Reasons:	<ul style="list-style-type: none"> • Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these area where new infrastructure or significant upgrades are required in such areas. • Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. • Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. • Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.45
Summary of Decision Requested:	Retain Objective 3.4.1- Significant amenity landscapes as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these area where new infrastructure or significant upgrades are required in such areas. • Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. • Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. • Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.46
Summary of Decision Requested:	Retain Policy 3.4.2- Recognising Significant Amenity Landscapes as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these area where new infrastructure or significant upgrades are required in such areas. • Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. • Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. • Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.47
Summary of Decision Requested:	Retain Policy 3.4.3- Maintaining and enhancing Significant Amenity Landscapes as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these area where new infrastructure or significant upgrades are required in such areas. • Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. • Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. • Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.
Point Number	646.48
Summary of Decision Requested:	Retain Policy 3.4.4- The relationships of Maaori with their resources and land as notified.
Decision Reasons:	<ul style="list-style-type: none"> • Policy 6.1.10 in the Infrastructure section directly addresses infrastructure in "Identified Areas," requiring consideration of the values and attributes of these area where new infrastructure or significant upgrades are required in such areas. • Policy 6.1.10 needs to be read in conjunction with the Natural Environment provisions where assessing proposals in Identified Areas. • Natural Environment Provisions as drafted set out a workable framework for assessing telecommunications infrastructure. • Submitter wishes to preserve its standing on such provisions should changes be sought by other parties.

Submitter Number:	647	Submitter:	Karen Miles
Organisation:	D & K Miles Limited		
Point Number	647.1		
Summary of Decision Requested:	Amend Rule 22.4.1.2 (a) General Subdivision, to change the date to record of title must be issued from 6th December 1997 to before December 2010, or more recently e.g. 2012.		
Decision Reasons:	<ul style="list-style-type: none"> • Oppose the from December 1997 threshold date of title for subdivision. • 1997 was 20 years ago which is too long. • Submitter wants further growth opportunities in their rural area. • Next plan change would be over 10 years away for this matter to be considered again. 		

Submitter Number:	648	Submitter:	Chorus New Zealand Limited
Point Number	648.1		
Summary of Decision Requested:	Amend the format of the district plan as necessary to adopt the format and requirements of the National Planning Standards, including F-4 Spatial Planning Tools (District) Standard should these come into effect before decisions on the Proposed District Plan are made.		
	AND		
	Any consequential amendments necessary as a result of the amendments to grant the relief sought.		
Decision Reasons:	<ul style="list-style-type: none"> • National Planning Standards are currently under consideration by the Ministry for the Environment. • It is likely at least some standards will have legal effect prior to the issue of decisions on the Proposed Plan. • Submitter request the decision maker considers reformatting the notified content. • Any changes made as part of this process into the National Planning Standards requirements, for example F-4 Spatial Planning Tools (District) Standard. • Purpose of submission point is to give Council scope to change notified content. • Any changes made as part of this process to meet any obligations of the approved National Planning Standards, likely to come into effect in April 2019. 		

Point Number 648.2

Summary of Decision Requested: Retain Objective 3.1.1 - Biodiversity and ecosystems as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.3

Summary of Decision Requested: Retain Indigenous Vegetation and Habitats Policies 3.1.2 as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.4

Summary of Decision Requested: Retain Objective 3.2.1- Significant Natural Areas as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.5

Summary of Decision Requested: Retain Policy 3.2.2- Identify and Recognise as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.6

Summary of Decision Requested: Retain Policy 3.2.3 - Management hierarchy as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.7

Summary of Decision Requested: Retain Policy 3.2.4- Biodiversity Offsetting as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.8

Summary of Decision Requested: Retain Policy 3.2.5 - Biodiversity in the coastal environment as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.9

Summary of Decision Requested: Retain Policy 3.2.6 - Providing for vegetation clearance as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.10

Summary of Decision Requested: Retain Policy 3.2.7 - Managing Significant Natural Areas as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.11

Summary of Decision Requested: Retain Objective 3.3.1 - Outstanding natural features and landscapes as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.12

Summary of Decision Requested: Retain Policy 3.3.2 - Recognising values and qualities as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.13

Summary of Decision Requested: Retain Policy 3.3.3 - Protection from inappropriate subdivision, use and development as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.14

Summary of Decision Requested: Retain Objective 3.5.1- Natural Character as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.

- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.15

Summary of Decision Requested: **Retain** Policies 3.5.2 - Recognising natural character as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.16

Summary of Decision Requested: **Retain** Policy 3.5.3 - Protecting the natural character qualities of the coastal environment as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.17

Summary of Decision Requested: **Retain** Policy 3.5.4 - Protecting the natural character of wetlands, and lakes and rivers and their margins as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.18

Summary of Decision Requested: **Retain** Objective 6.1.1 - Development, operation and maintenance of infrastructure as notified.

Decision Reasons:

- The provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- The provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 648.19

Summary of Decision Requested: **Retain** Policy 6.1.2 - Development, operation and maintenance as notified.

Decision Reasons:

- The provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- The provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 648.20

Summary of Decision Requested: **Retain** Policy 6.1.4 - Infrastructure benefits as notified.

Decision Reasons:

- The provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- The provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 648.21

Summary of Decision Requested: **Retain** Policy 6.1.5 - Natural Hazards and climate change as notified.

Decision Reasons:

- The provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- The provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number	648.22
Summary of Decision Requested:	Retain Policy 6.1.7 - Reverse sensitivity and Infrastructure as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.23
Summary of Decision Requested:	Retain Objective 6.1.8 - Infrastructure in the community and identified areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.24
Summary of Decision Requested:	Retain Policy 6.1.9- Environmental effects, community health, safety and amenity as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.25
Summary of Decision Requested:	Retain Policy 6.1.10 - Infrastructure in identified areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.26
Summary of Decision Requested:	Retain Policy 6.1.11 - Undergrounding new infrastructure as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.27
Summary of Decision Requested:	Retain Policy 6.1.12 - Co-location of compatible facilities as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.28
Summary of Decision Requested:	Retain Policy 6.1.13 - Future growth areas as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.29
Summary of Decision Requested:	Retain Policy 6.1.14 - Electromagnetic and radio frequency fields as notified.
Decision Reasons:	<ul style="list-style-type: none"> • The provisions are generally consistent with policy framework in the draft National Planning Standard for Infrastructure. • The provisions are considered to provide a workable policy framework for telecommunications infrastructure.
Point Number	648.30
Summary of Decision Requested:	<p>Amend Policy 6.1.3 - Technological advances by replacing it with the following wording as proposed in the draft National Planning Standard for Network Utilities or any other changes of like effect:</p> <p><i>Provide flexibility for network utilities to adopt new technologies that:</i></p> <ol style="list-style-type: none"> <i>1. Improve access to, and efficient use of, networks and services;</i> <i>2. Allow for the re-use of redundant services and structures;</i> <i>3. Increase resilience, safety or reliability of networks and services;</i> <i>4. Result in environmental benefits and enhancements; or</i>

AND

Amend Policy 6.1.3 - Technological advances by using "or" rather than "and" to remove the conjunctive nature of clauses.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Policy 6.1.3 seeks to provide flexibility to use new technologies subject to a number of conjunctive limbs (i.e. all have to be met).
- It is unclear how clause (iii) would be interpreted where a new technology may have a significant community benefit but does not necessarily reduce environmental effects.
- Wording of the equivalent policy in the draft National Planning Standard for Network Utilities is a preferred approach to promoting the use of technological advances, as it provides alternative means to satisfy the policy.
- Draft National Planning Standard for Network Utilities provisions are being used as best practice by stakeholders for discussion with councils undertaking plan reviews and the content of submissions.

Point Number

648.31

Summary of Decision Requested:

Retain Chapter 14 Infrastructure and Energy as notified, particularly Sections 14.1-14.3 and 14.10, except where specific amendments have been requested in the submission.

Decision Reasons:

- Generally, Chapter 14 is supported in regard to infrastructure and particularly sections 14.1-14.3 and 14.10 - Telecommunications, except where specific amendments have been requested.

Point Number

648.32

Summary of Decision Requested:

Amend Rule 14.2.1.1 New Infrastructure relating to P1 New infrastructure- Activity Specific conditions by providing an exemption for service connections including any associated support poles from all heights in relation to boundary controls.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Support poles associated with service connections should be exempt from any height in relation to boundary controls either where within a road or outside of a road (e.g. along a right of way) on the basis that they have very minor bulk compared with more substantial buildings and structures.

Point Number

648.33

Summary of Decision Requested:

Amend activity-specific conditions (1)(b) and (c) and (3)(a) and (b) in Rule 14.3.1.1 which relate to P2 Minor upgrading of existing infrastructure, as follows:

(1) The realignment, configuration, relocation or replacement of infrastructure and associated structures that meet all of the following conditions:

...

(b) Do not increase the height of any existing pole or support structure by ~~more than 15%~~ the lesser of 25m or 30%;

(c) Do not increase the diameter (width) of any existing pole or support structure by ~~more than 15%~~ by more than twice the width of the existing pole at the widest point, unless a double pole is required to replace a single pole where the permitted pole or support structure width required is three times the width of the existing pole at the widest point (double poles may be required for electricity networks).

...

(3) The addition, replacement or relocation of existing antennas where:

(a) The antennas shall not increase ~~in the face area~~ by more than 20% of the relevant permitted standard for new panel antennas and shall not increase the diameter of dish antenna by more than 20% of the relevant permitted standard for a new dish antenna; and

(b) The antennas shall not increase in height by more than 20% of the relevant permitted standard for new dish and panel antennas.

Note that the area controls are not applied to other antenna types such as those made up of rods and tubes, which are controlled by standard (3)(b).

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- A number of proposed conditions relevant to telecommunications are impractical to support rapid technical changes or maintenance requirements.
- The provisions are not aligned with draft National Planning Standard for Network Utilities.
- Submitter seeks various amendments to seek more alignment with the National Planning Standard that is currently under development and intended to provide a practical envelope for typical infrastructure upgrading activity.

Point Number

648.34

Summary of Decision Requested:

Amend activity-specific conditions Rule 14.3.1.3 relating to P4 Earthworks associated with infrastructure- Activity Specific Conditions and related rules cascade such that is clear what the activity status is in all Identified Areas where earthworks either exceed the permitted volumes in Rule 14.3.1.3, are restricted by a clause in Rule 14.3.1.3 (e.g. scheduled historic heritage site), or where the rule is silent (e.g. SNA).

AND

Amend Rule 14.2.3 NC3 - Non-Complying Activities so that earthworks ancillary to infrastructure do not cascade by default to non-complying activity status under the rule.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- These standards include earthworks thresholds in many Identified Areas, including SNAs, and includes a standard not allowing earthworks on scheduled historic heritage sites.
- Is unclear if earthworks not subject to a specific threshold in an overlay, or subject to a rule that does not allow any earthworks as a permitted activity, would then default to be a non-complying activity regardless of scale under Rule 14.2.3, NC3.

- For avoidance of doubt, submitter seeks 14.3.1.3 and associated rules cascade makes it clear what the status is of earthworks either not covered by a standard in 14.3.1.3 or are subject to a rule not providing for them as a permitted activity in a particular area (e.g. scheduled historic heritage) and ensure they do not cascade by default to non-complying under Rule 14.2.3 NC3.

Point Number 648.35

Summary of Decision Requested: **Add** a new controlled activity rule under Rule 14.3.2 Controlled activities, as follows, or wording to like effect:

C2 A service connection to an area façade or item specifically listed in Schedule 30.1.

Matters of Control:

- Design and placement of the service connection to minimise impacts on the values and attributes of the listed area, façade or item.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule P8 in the General Infrastructure rules provides for service connections as a permitted activity other than where connected to an area, façade or item specifically listed in Schedule 30.1.
 - There have been ongoing discussions between telecommunications operators and Heritage New Zealand Pouhere Taonga over how service connections to heritage listed buildings should be addressed.
 - Agreement has been reached on other plans that these are appropriately dealt with as a controlled activity to enable method of connection to be controlled to minimise impacts on heritage items while still allowing for reasonable and practical use of heritage listed buildings.

Point Number 648.36

Summary of Decision Requested: **Amend** activity-specific condition Rule 14.10.1.3(a)(iii) P4 relating to antennas and lines attached to retaining walls, tunnels, bridges and other structures located with the road by changing the permitted dish antenna size descriptor from 0.6m "width" to 0.6m "diameter."

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Activity-specific controls in 14.10.1.3 include a 0.6m "width" restriction for dish antennas and should be changed to "diameter".

Point Number 648.37

Summary of Decision Requested: **Amend** Rule 14.10.1 P7 - Permitted activities and any other rules as necessary such that the equipment covered by the activity specific conditions in Rule 14.10.1.5 may be attached to buildings, structures and poles covered in Rules P4, P5 and P9 as follows:

Other antennas not attached to a building and/or structure.

14.10.1.5

(a) Antennas that comply with all of the following conditions are excluded from any height standards in 14.10.1 P4, P5 and P9:

(i) GPS antennas that do not exceed the following dimensions:

A. 300mm high; and

B. 130mm in diameter.

(ii) Omni-directional 'whip' or di-pole type antennas that do not exceed the following dimensions:

A. 1.6m high;

B. 1.5m horizontal length whip or rod; or

C. Cross-section element no more than 60mm in diameter.

(iii) Are not located within an Identified Area.

(iv) Do not connect to an area, façade or item specifically listed in Schedule 30.1.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- It is unclear what the rule is intended to cover.
- All antennas will be attached to a building or a structure (even if a purpose-built pole).
- These types of antennas could be deployed on an existing building or structure covered by Rules P4 and P5, or on a pole as provided for under P9.
- These antennas have low visual impact, making them appropriate on top of buildings and poles or in an Identified Area.

Point Number 648.38

Summary of Decision Requested: **Amend** Rule 14.10.1 - Permitted Activities P8 and related activity standard by changing all use of "m2" to "m3".

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule uses "m2" rather than "m3" in activity rules and standards and needs to be amended to "m3".
- Volumetric dimension in the NESTF 2016 is 0.11m3.

Point Number 648.39

Summary of Decision Requested: **Amend** activity-specific conditions Rule 14.10.1.7(c) Poles, antennas and head frames+1, as follows:

(c) Rule 14.10.1.7(a) does not apply to lightning rods and GPS antennas, omni directional whip antenna, ancillary telecommunication devices and earth peaks.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Appears to be an incorrect reference in Rule 14.10.1.7(c) to Rule 14.10.1.7(1) rather than 14.10.1.7(a), as there is no Rule 14.10.1.7(1).

Point Number 648.40

Summary of Decision Requested: **Amend** activity-specific standard 14.10.1.8(a)(i) relating to P10 - Externally-mounted telecommunication satellite dishes and ancillary components as follows:

(a) Externally-mounted telecommunication satellite dishes and ancillary components that comply with the following conditions:

(i) Do not exceed 1.0m in diameter, or 1.8m in diameter in industrial, rural residential and rural zones;

(ii) Are attached to existing buildings, and/or including a pole or structure other than a building when located in the rural residential and rural zones.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Activity-specific condition 14.10.1.8(a)(i) limits the diameter of a satellite dish to 1m.
- As part of Rural Broadband Initiative Phase 2 Project, which includes parts of Waikato District, some rural communities may need to be connected to broadband via satellite link.
- Higher capacity links may require a satellite dish up to 1.8m in diameter.

Point Number 648.41

Summary of Decision Requested: **Amend** activity Rule 14.10.1 C7 Controlled Activities relating to Small cell units as follows:

~~C7 Small cell units located in an Identified Area that connect to an area, facade or item specifically listed in Schedule 30.1 exceeding the maximum volumetric dimension of 0.11m² regulated in the NESTF, up to a maximum volume of 0.25m³.~~

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Rule uses "m2" rather than "m3" in activity rules and standards and needs to be amended to "m3".
- Unnecessary to restrict equipment in an *Identified Area* given its very small scale.
- Rule should instead only cover equipment connecting to a scheduled heritage item, which would not be a permitted activity under amended rule P7.

Point Number 648.42

Summary of Decision Requested: **Amend** the legal description in the designation schedule for designation U17 at Mt Pukemore to Pt Lot 1 and Pt Lot 2 DP 19278 to the full extent of the Chorus property as shown on the plans included in the Notice of Requirement and attached to the submission

AND

Amend the designation maps for Designation U17 at Mt Pukemore.

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Incorrect spatial extent of designation shown on planning map.
- The full legal description of the land was not included in the Notice of Requirement, but the full and correct extent of the land to be designated was shown spatially on the maps provided with the Notice of Requirement.

Point Number 648.43

Summary of Decision Requested: **Amend** the planning maps by adding the designation boundaries for U10 at 217 Hunter Road, Eureka in accordance with the extent of the designation included in the Notice of Requirement and additional information (see submission for map).

AND

Any consequential amendments necessary as a result of the amendments to grant the relief sought.

Decision Reasons:

- Incorrect spatial extent of designation shown on planning map.
- Online maps do not show the proposed designation in the designation layer, although correctly shown in the designation schedule.
- This should match the property details and map supplied in the Notice of Requirement.

Point Number 648.44

Summary of Decision Requested: **Retain** Objective 6.1.6 Reverse sensitivity as notified.

Decision Reasons:

- The provisions are generally consistent with the policy framework in the draft National Planning Standard for Infrastructure.
- The provisions are considered to provide a workable policy framework for telecommunications infrastructure.

Point Number 648.45

Summary of Decision Requested: **Retain** Policy 3.3.4 - The relationships of Maaori with natural resources and land as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.

- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.46

Summary of Decision Requested: Retain Objective 3.4.1 - Significant amenity landscapes as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.47

Summary of Decision Requested: Retain Policy 3.4.2 - Recognising Significant Amenity Landscapes as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.48

Summary of Decision Requested: Retain Policy 3.4.3 - Maintaining and enhancing Significant Amenity Landscapes as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Point Number 648.49

Summary of Decision Requested: Retain Policy 3.4.4 - The relationships of Maaori with their resources and land as notified.

Decision Reasons:

- Policy 6.1.10 in Infrastructure section directly addresses infrastructure in 'Identified Areas,' requiring a consideration of the values and attributes of these areas where new infrastructure or significant upgrades are required in these areas.
- Policy 6.1.10 will need to be read in conjunction with Natural Environment provisions where assessing proposals in these areas.
- Submitter considers Natural Environment provisions, as drafted, set out a workable framework for assessing telecommunications infrastructure in these areas, particularly where assessed in conjunction with Policy 6.1.10.
- Submitter wishes to preserve its standing on these provisions should changes be sought by other parties.

Submitter Number: 649

Submitter: Mike Visser

Organisation: Progress Partners Ltd

Point Number 649.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark zone, as notified.

Decision Reasons:

- Te Kowhai Airpark is a valuable asset to the aviation community.

Point Number 649.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark zone, as notified.

Decision Reasons:

- Te Kowhai Airpark is a valuable asset to the aviation community.

Submitter Number: 650

Submitter: Jacob Stead

Point Number 650.1

Summary of Decision Requested: Retain Chapter 9.2 Te Kowhai Airpark zone, as notified.

Decision Reasons:

- Airfield has been around longer than most residents and it should therefore be allowed to grow in line with the village image.
- Hearing the aircraft above Te Kowhai brings a happy atmosphere.
- Caution should be taken regarding how long an aircraft may loiter, achievable through New Zealand Aeronautical Information Publication (NZAIP).

Point Number 650.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark zone, as notified.

Decision Reasons:

- Airfield has been around longer than most residents and it should therefore be allowed to grow inline with the village image.
- Hearing the aircraft above Te Kowhai brings a happy atmosphere.
- Caution should be taken regarding how long an aircraft may loiter, achievable through NZAIP.

Submitter Number: 651 **Submitter:** Jon Muller

Organisation: GE Free New Zealand

Point Number 651.1

Summary of Decision Requested: Add new provisions to the Proposed District Plan to give Genetically Modified Organisms their own section, as follows (which replicate those provisions in the Auckland Unitary Plan):

Issue: Genetically Modified Organisms

The environment, including human health and well-being, is safe from the adverse effects of GMO's from land use activities.

Resource Consent Categories

- Field Trials - Discretionary Activity,
- Food-related GMO Releases - Prohibited Activity,
- Non-food-related GMO Releases - Prohibited Activity.

Policies

1. Adopt a precautionary approach by prohibiting the general release of a GMO
2. Require outdoor field trialling of GMOs to be a discretionary activity to avoid the risk effects to the environment from the use, storage, cultivation, harvesting, processing or transportation.
3. Adopt an adaptive approach through periodic reviews of these plan provisions, particularly if new information on the benefits and/or adverse effects of a GMO activity becomes available.
4. Require the holder of a resource consent granted for the outdoor field trialling of a GMO is financially accountable for any adverse effects associated with the activity.
5. Enable the use of GMOs approved releases for medical and veterinary applications, except for the outdoor cultivation of pharmaceutical producing organisms.
6. Require where appropriate, more stringent measures than those required under the provisions of the HSNO Act to manage potential risks.
7. Require all monitoring costs to be met by the consent holder.

Reasons and Explanations

The objectives, policies and methods seek to achieve the following:

1. Manage risk and avoid adverse effects on people, communities, tangata whenua, the economy and the environment associated with the outdoor use of GMOs.
2. Provide the framework for a unified approach to the management of the outdoor use of GMOs to address cross-boundary effects.
3. Ensure accountability by GMO operators for the full costs related to the monitoring of GMO activities, and any migration of GMOs beyond specified areas, including unintentional GM contamination.
4. Ensure accountability by GMO operators for compensation via performance bonds in the event that the activity under their operation results in adverse effects to third parties or the environment.
5. The manufacture, trialling or use of viable and/or non viable genetically modified organisms for medical purposes recognised as medicines under the Medicines Act 1981 and approved as safe to use by the Ministry of Health, including the EPA approved releases except for the outdoor cultivation of pharmaceutical producing organisms.

Decision Reasons:

- The members are highly concerned over the lack of any consideration of genetically modified organisms in the Proposed District Plan.
- Whilst there have been no applications for the release of Genetically Modified Organism (GMO) there is a strong possibility that in the next few years there could be.
- The Environmental Protection Agency (EPA) under Hazardous Substances and New Organisms Act acknowledges that though it is a genetically modified organism once released is no longer a new organism.
- The EPA will no longer have any jurisdiction as to its consequences.
- This then falls onto local bodies to manage and protect their communities from any hazards associated with all GMO releases.
- Members are concerned over the adverse effects and consequences of GMO contamination and the compromises they will need to make regarding the economic loss to their businesses, farming and cultural activities, should GMO land use be introduced into the region at this time.
- In the last 17 years since GMO's have been developed in New Zealand there is evidence that the expected outcomes have not come to fruition.
- Submission refers to the GM animal research at the facility in Ruakura (Attached as Appendix 1)
- Evidence from overseas, where GM crops have been grown for 15 years, has found an increasing level of pesticide use on crops, deleterious health effects from those working with and living near GM crops and an ever growing weed and insect resistance problem that is forcing other pesticide measures to be used with an increased battle for market dominance of their particular patented proprietary chemical.
- Conflicts over GMO pollution between farming neighbours has led to legal action; cultural and traditional beliefs are being disregarded; consumer resistance is still high and there is an export market premium for non-GMO produce.
- There are also potential adverse effects for unexpected and unknown medium-term and long term impacts on soil biota, waterways and the natural environment generally arising from GMOs outside containment.
- Tataua, Fonterra and Miraka Milks have a GMO Free requirement for the milk products.
- Concerns over the ability to control the grass genetic pollution is a major concern and it is important to have precautionary approach to any escape and release of GM until the negative effects are known on the region.
- The Hazardous Substance and New Organisms (HSNO) Act only has jurisdiction on any adverse effects of GMOs whilst they are in containment. As soon as GMOs are fully released the Hazardous Substances and New Organisms Act no longer governs them. This is because a GMO is considered a new organism and thereby governed under HSNO, until it is released then it is no longer a new organism.
- The conclusions of the nine council strong "Inter Council Working Party on GMO Risk Evaluation & Management Options" found local regulation highly necessary when it comes to GMOs release in the regions.
- In recent years there have been Resource Management Act changes and several legal decisions giving "jurisdiction under the RMA for regional councils to make provision for control of the use of GMOs through regional policy statements and plans". Submission sets out recent cases.
- Submitter requests Waikato District to support the approach taken by the Auckland Unitary Plan and Whangarei/Far North District Council's and adopt their rules, policies and objectives toward the outdoor use of GMOs.
- These policies and objectives support the need for GMO precautionary approach.

- Environmental Protection Area is to protect and enhance ecosystems and ecological corridors, and protect the habitats of plants, birds and other wildlife.
- There is some concerning data highlighting the hazards that GMO and their associated pesticides are having on the environment.
- The genetic pollution from GMOs eco toxic properties should be considered hazardous substances in relation to their pollution and self-perpetuating invasive qualities.
- The pollution of the environment from excessive industrial agriculture destroys the amenity values for people and the environment.
- The adverse effects on land use policy should have added to Policy (1) Genetically Modified Organisms.
- Submission discusses the residual risks of Hazardous substances in relation to Chapter 10 (Hazardous Substances). The submitter states that while there have been no applications for the release of GMOs there is a strong possibility that in the next few years there could be.
- The submission indicates that there is mounting concern over the "new advanced GE technologies" and though they are considered as "genetically modified organisms" there is mounting pressure to have them exempt from central government regulation.
- The possibility of the escape of these GMO could become eco hazards and have cumulative effects which if unregulated have the possibility of serious consequences on the environment and communities.
- As these technologies are very new, there is now growing evidence around the unanticipated off target effects of organisms engineered through these techniques and what these effects will have on ensuing generations.
- Submitter refers to several research literature relevant to Genetic Engineering and concludes that these studies show that the technology has a long way to go and if released prematurely the cumulative effects would be damaging on the region.

Point Number 651.2

Summary of Decision Requested: No specific decision sought, but submission states that the AgResearch Ruakura animal field test site should be the only area zoned for Genetically Modified Organism (GMO) activity.

Decision Reasons:

- Any new field tests must obtain resource consent and be notified.

Point Number 651.3

Summary of Decision Requested: Genetically Modified animal sites should be registered on the Land Information Memorandum (LIM) reports.

Decision Reasons:

- Submitter refers to the Whakamaru Field test site (not within the Waikato District) where 3,000 GM sheep were buried. After the failed experiment there was no further monitoring and any responsibility for further site inspection or monitoring any adverse effects rising over time will fall on Council.
- The site could still be considered a contaminated site and remediated as such.

Point Number 651.4

Summary of Decision Requested: No specific decision sought, but submission supports Rural Resources - IA.6 Issues, Objectives and Policies in the Operative District Plan which ensure that rural actions do not constrain or compromise existing lawfully-established productive rural activities.

Decision Reasons:

- Concerned over the lack of any consideration of genetically-modified organisms in the Proposed District Plan.

Point Number 651.5

Summary of Decision Requested: **Amend** Section A Plan Overview and Strategic Directions to include a section on Genetically Modified organisms.

Decision Reasons:

- The conclusion of the Inter Council Working Party on GMO Risk Evaluation of Management Options found that local regulation is highly necessary when it comes to GMO release in the region.

Point Number 651.6

Summary of Decision Requested: **Retain** the policies and objectives in Chapter 2 Tangata Whenua and their support of Te Ao Maori.

Decision Reasons:

- These policies and objectives support the need for a precautionary approach to GMOs.

Submitter Number: 652

Submitter:

Kenneth Whyte

Point Number 652.1

Summary of Decision Requested: **Amend** the proposed cycle way to be extended from Buckland Road, Tuakau to access the Waikato River via the river stop banks (see maps attached to the submission for further details).

Decision Reasons:

- Allows for a unique opportunity to gain land for River access, leisure activities and possibly a park.
- The Council-owned stopbanks are wide enough to accommodate large farm vehicles and could easily be an extension of the proposed walkway / cycleway.
- The only current access to the River is via River Road which is hazardous for pedestrians and cyclists.
- Would allow a future connection via walkway / cycleway to the River Road access.
- The River is stunning at this location.

Point Number 652.2

Summary of Decision Requested: Council to **purchase** the land contained within the Waikato River stopbanks near Buckland Road, Tuakau by Council for park land (see the maps attached to the submission for further detail).

Decision Reasons:

- Access to this land will be difficult if the land adjoining Buckland Road becomes residential.
- The current rural use is marginally sustainable crops or grazing.
- Presents an amazing opportunity for current residents, future residents and tourists.

Point Number 652.3

Summary of Decision Requested: Amend the Proposed District Plan to prevent any more waste facilities located on the River on the land between Buckland Road, Tuakau and the Waikato River (see map attached to the submission for further details).

Decision Reasons:

- The reclaimed alluvial river plains were reclaimed for soil conservation (for rural use) and erosion protection.
- Waste facilities are not sustainable nor environmentally friendly.

Submitter Number: 653 **Submitter:** Eliza Lawton

Point Number 653.1

Summary of Decision Requested: Amend the Proposed District Plan to protect and maintain the special character of Raglan.

Decision Reasons:

- Concerned the special character of Raglan is being eroded through the building of apartments that do not comply with the District Plan.

Point Number 653.2

Summary of Decision Requested: Amend the Proposed District Plan so that any building that does not comply with the District Plan in Raglan is publicly notified.

Decision Reasons:

- Concerned that the special character of Raglan is being eroded through the building of apartments that does not comply with the District Plan.

Point Number 653.3

Summary of Decision Requested: Add provisions to control and regulate Air BnB and Book-A-Bach in Raglan.

Decision Reasons:

- Air BnB and book-a-bach are having a detrimental effect on local housing options, causing a rental crisis and driving the price up of any rentals that remain.
- Many long-time locals are having to move out of town because of a global problem.
- Submission prefers a restriction/ban on Air BnB and book-a-bach for those houses that are not on the same property as the owner's primary dwelling, i.e. it's fine if a person has their spare room on these sites, but if should be restricted/banned if it is the owner's second house that could otherwise be rented by a local person or family.

Submitter Number: 654 **Submitter:** Ngaakau Tapatahi Trust

Point Number 654.1

Summary of Decision Requested: Amend Rule 22.1.2 Permitted Activities to enable "health facilities" as a Permitted Activity on land legally described as Lot 1 DPS 13189 (104A Duncan Road, Tamahere);
OR
Amend the zoning of Lot 1 DPS 13189 (104A Duncan Road, Tamahere) from the Rural Zone to Business Zone and any other amendments to provide relief sought in submission.

Decision Reasons:

- Tamahere Hospital and Healing Centre (Tamahere Hospital) is sited on approximately 3.8 ha of culturally historic whenua in the heart of Ngaati Haua, between Cambridge and Hamilton.
- Hospital delivers services from a kaupapa Maori perspective but also provide services to accommodate individuals seeking an alternative health approach.
- Subsequent to its initial construction, Ngaakau Tapatahi Trust, applied for, and obtained, multiple resource consents to accommodate the hospital's expansion.
- Consents were triggered because the hospital exceeded the maximum site coverage permitted in the Rural Zone (2% of the site area, or 500m2, whichever is the larger, and/or because non-residential buildings are limited to a maximum of 400m2 (hospital is already around 1400m2). Thus any form of physical development will trigger a resource consent requirement, irrespective of whether the hospital operates in accordance with original consent conditions.
- Recurring need for consents indicates Rural Zone provisions are not conducive to sustainable management of the facility.
- Inability to avoid RMA consent triggers is time-consuming and costly.
- The nature of the hospital's treatment philosophy means overdevelopment is not supported by the Trust excessive development would not eventuate.
- Requested change is consistent with purpose of RMA and ensures a physical resource, set aside for health care purposes, can meet the reasonably foreseeable needs of future patients.

Point Number 654.2

Summary of Decision Requested: Amend Rule 22.3.6 Building Coverage, to exempt the Tamahere Hospital and Healing Centre (104A Duncan Road, Tamahere) from this provision;
OR
Amend Rule 22.3.6 Building Coverage, to allow more permissive building coverage which recognizes the on-site activity and need for development flexibility and any other amendments to provide the relief sought.

Decision Reasons:

- Subsequent to the hospital's initial construction, Ngaakau Tapatahi Trust, applied for, and obtained, multiple resource consents to accommodate the hospital's expansion.
- Consents triggered because the hospital exceeded the maximum site coverage permitted in the Rural Zone (2% of the site area, or 500m2, whichever is the larger, and/or because non-residential buildings are limited to a maximum of 400m2 (hospital already around 1400m2). Thus any form of physical development will trigger a resource consent requirement, irrespective of whether the hospital operates in accordance with original consent conditions.

- Inability to avoid RMA consent triggers is time-consuming and costly.
- Over-development of the site will not occur due to philosophy and management by the Trust.

Submitter Number:	655	Submitter:	Robyn Harris
Organisation:	Rotongaro-Huntly Pony Club		
Point Number	655.1		
Summary of Decision Requested:	Amend the zoning of the 183ha former Huntly East Mine area to be a Recreational and Events zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Remove restrictions on access and redevelopment activities that apply to Rural Zoning. • Kimihia Lake project is focused on rehabilitating the area and creating a facility which will enhance Huntly and benefit many facets of the community. • Land surrounding the former Huntly East Mine has other recreational facilities already in existence and broadening the range of facilities available within close proximity will benefit the wider community through both personal use, and attracting visitors to the area. • Outdoor and environmental education, recreational, accommodation and tourism opportunities should not be overlooked, given the potential for decline via re-routing of the main arterial motorway. • Rotongaro-Huntly Pony Club could potentially utilize some of the facilities offered by the Kimihia Lake Project through the development of bridle paths. • The project is worthy of support. 		

Submitter Number:	656	Submitter:	Dianne & John Messent
Point Number	656.1		
Summary of Decision Requested:	Amend the Proposed District Plan to create a special activity zone in accordance with the provisions sought in the Allen Fabrics Ltd Submission for the 183ha former East Huntly Mine located at McVie Road, East Mine Road and 191 Kimihia Road.		
Decision Reasons:	<ul style="list-style-type: none"> • It is very important that the Waikato District has a plan for its central town. • The bold plan presented to the Waikato District Council by the generosity of Allens Fabrics Ltd. contains all answers for the sustainable future of the Huntly District. 		

Submitter Number:	657	Submitter:	Hampton Downs Motorsport Park
Point Number	657.1		
Summary of Decision Requested:	Delete Rule 26.1.4 NC1 Non-complying Activities - Precinct B in its entirety.		
Decision Reasons:	<ul style="list-style-type: none"> • The non-complying activity status for Precinct B differs to the discretionary activity status for all other Precincts, and is therefore opposed. • It is unclear why the provisions for Precinct B default to non-complying when the provisions for all other Precincts default to discretionary. • Activities not provided for under the Permitted Activity rules for Precinct B should be discretionary not non-complying. 		

Point Number	657.2		
Summary of Decision Requested:	Delete Rule 26.1.4 NC2 Non-complying Activities - Precinct B in its entirety.		
Decision Reasons:	<ul style="list-style-type: none"> • The reference to 'dangerous activities' is not considered appropriate for an international motorsport park (and the existing consented motor sport and recreation activities that occur on site). • There is an existing condition in the main resource consent for the Motorsport Park that appropriately addresses these concerns. • It is not appropriate (or necessary) to duplicate those provisions here. 		

Point Number	657.3		
Summary of Decision Requested:	Delete Rule 26.2.1 PI-D1 Noise - Motorsport and Recreation Activity in its entirety.		
Decision Reasons:	<ul style="list-style-type: none"> • Noise is already addressed in the existing resource consents for the Motorsport Park site. • The addition of noise standards within the zone provisions is effectively duplicating parts of the existing resource consent(s) and has the potential to result in a number of different noise standards applying to the site. • The reference to notional boundary of any dwelling is opposed. • The existing dwellings to the rear of the Motorsport Park site all have no complaints covenants and were previously part of the HDMP site. • The existing resource consent specifies a noise contour boundary for the surrounding area. • The proposed wording affords a consented international motorsport no protection against new dwellings looking to develop nearby. 		

Point Number	657.4		
---------------------	-------	--	--

Summary of Decision Requested: Delete Rule 26.2.2 Noise - Precincts B and C in its entirety.

Decision Reasons:

- The activities within Precincts B and C have already been consented under existing resource consents and will be developed in accordance with the conditions of the existing resource consents.
- Opposed to any new conditions being imposed on either of these areas.
- The addition of noise standards within the zone provisions is effectively duplicating parts of the existing resource consent(s) and has the potential to result in a number of different noise standards applying to the site.
- The reference to the notional boundary of any dwelling is also opposed. The existing dwellings to the rear of the Motorsport Park site all have no complaints covenants and were previously part of the HDMP site.
- The existing resource consent specifies a noise contour boundary for the surrounding area.
- The proposed wording affords a consented international motorsport park no protection against new dwellings looking to develop nearby.

Point Number 657.5

Summary of Decision Requested: Delete Rule 26.2.4 Landscaping and screening in its entirety.

Decision Reasons:

- Landscaping is already in place (in accordance with the existing resource consent) and is required to be maintained on an ongoing basis in accordance with the existing resource consent.
- Landscaping is required around part of the perimeter (adjacent to the State Highway), and is not affected by any new development at the site.

Point Number 657.6

Summary of Decision Requested: Delete Rule 26.2.5 Earthworks - All Precincts in its entirety.

Decision Reasons:

- The existing resource consents already include conditions with respect to earthworks.

Point Number 657.7

Summary of Decision Requested: Delete Rule 26.2.6 Motorsport and Recreation Events - Precincts A and C in its entirety.

Decision Reasons:

- The existing resource consents already include conditions with respect to the number of spectators and events.
- There is no reason to duplicate those conditions in the zone provisions.

Point Number 657.8

Summary of Decision Requested: Delete Rule 26.2.7 Motorsport and Events Traffic Management - All Precincts in its entirety.

Decision Reasons:

- The existing resource consents already include conditions with respect to traffic management, carparking and overflow parking.
- The overflow carparking area that is sometimes used is not formed (and therefore would not comply with the proposed rules).
- There is no reason to duplicate those conditions in the zone provisions.

Point Number 657.9

Summary of Decision Requested: Delete Rule 26.2.8 Carparking, Access and Roding - All Precincts in its entirety.

Decision Reasons:

- Already covered by existing resource consent.

Point Number 657.10

Summary of Decision Requested: Amend Rule 26.2.11 PI Signs general - All Precincts so that the signage rule only applies to signage that is orientated towards the public roads as follows:

PI

~~(a) A sign shall comply with all of the following conditions. A sign that is:~~

~~(i) Set back less than 7.5m from Hampton Downs Road; and/or~~

~~(ii) Set back less than 1.5m from State Highway One~~

~~And is externally facing so that the main audience is motorists travelling along Hampton Downs Road or State Highway One, shall comply with the following conditions:~~

~~(i) It does not exceed 2.5m²;~~

~~(ii) The sign height shall not exceed 1.0m;~~

~~(iii) Illuminated signs shall not:~~

~~A. Have a light source that flashes or moves;~~

~~B. Contain moving parts or reflective materials.~~

~~(iv) It is set back at least 7.5m from the boundary of Hampton Downs Road;~~

~~(v) It is set back at least 1.5m from State Highway 1;~~

~~(vi) Is orientated to be internally facing so the main audience are spectators on-site;~~

~~(vii) Is screened from State Highway 1;~~

~~with~~(iv), It relates to:

A. Any motor sport and creation activity or events facility within the Motorsport and Recreation Zone; or

B. A property name sign.

Decision Reasons:

- The rules relating to signage should only apply to signage that is located within the front building setback and that is outward facing to ensure the intended audience is motorists travelling along either the Waikato Expressway or Hampton Downs Road.
- There should be no other restrictions regarding signage within the Motorsport Park.
- 3m2 is not considered appropriate or reasonable for signage at a motorsport park.
- Large, clear and legible signage is required for driver safety and as part of the overall Motorsport experience, and is larger than 3m2 (i.e. the signs along the sides of the race track (visible to spectators and drivers only).
- There should be no controls/restrictions regarding the size or area of internal signage within the zone.
- The maximum sign height of 10m is supported.
- The restrictions regarding flashing or moving signs are opposed insofar as they relate to internal signage within the zone.
- There should be no restrictions regarding internal signage (including flashing or moving signs) within the Motor Sport and Recreation zone.
- The restrictions regarding flashing or moving signs are associated with driver safety and should only apply to signage that is located within the front setback and is directed at motorists travelling along a public road.
- Provisions around driver safety within the Motorsport Park already provide appropriate control for internal signage.
- Flashing or moving signs are considered appropriate for an International Motorsport Park and contribute to the overall visitor experience.
- The minimum setbacks in Rules (iv) and (v) are supported, however amendments are proposed so that these standards are moved to the beginning/heading of the Rule.
- The suggested amendments in rules (i) – (iii) only apply to signs located within the minimum setback from the Waikato Expressway and Hampton Downs Road.
- Not all signage is internally facing.
- In some situations it is appropriate to erect signage along the State Highway boundary.
- The signage provisions do not allow for these types of signs.
- The requirement that all signage is screened from the State Highway is opposed.
- Due to the size of the Hampton Downs Motorsport Park site and its topography, it is not possible to screen all of the internal signage from the adjacent State Highway.
- Signage that is outward facing and directed towards the State Highway will also not be screened.
- Oppose any restrictions regarding sign content.
- The signage within the Motorsport Park often relates to specific sponsors, team branding and motor related products.
- Signage forms an essential part of the overall experience at the Motor Sport Park, but would be excluded under the existing wording.
- Internal signage is required for safety/information purposes or to add to the overall spectator experience.

Point Number 657.11

Summary of Decision Requested: Add a new rule to Rule 26.2.11 P3 Signs General – All Precincts as follows:

P3

(a) Signs that are setback at least 7.5m from Hampton Downs Road and at least 1.5m from State Highway One.

Decision Reasons:

- There should be no restrictions regarding internal signage within the Hampton Downs Motorsport and Recreation Zone.
- This rule will differentiate between signage that is located within the front building setbacks and internal signage within the Hampton Downs Motor Sport and Recreation Zone.

Point Number 657.12

Summary of Decision Requested: Retain the Restricted Discretionary activity status in Rule 26.2.11 RD1 Signs General - All Precincts

Decision Reasons:

- The restricted discretionary activity status for a sign that cannot comply with Rule 26.2.11(P1).

Point Number 657.13

Summary of Decision Requested: Delete Rule 26.2.12 Signs - effects on traffic - All Precincts in its entirety.

Decision Reasons:

- Any rules restricting internal signage within the Hampton Downs Motor Sport and Recreation Zone are opposed.
- It is not appropriate to impose conditions limiting or controlling the signage within an International Motorsport Park.
- The signage associated with the consented motorsport and recreation activities and facilities forms and integral part of the overall development and can often imitate the content, colour or appearance of a traffic control sign.
- The conditions in Rule 26.2.12 should not apply to the Hampton Downs Motorsport and Recreation Zone.

Point Number 657.14

Summary of Decision Requested: Delete Rule 26.2.13 Scale and duration of Travellers Accommodation - Precinct C in its entirety.

Decision Reasons:

- The traveller's accommodation activities are already consented under the existing land use consent and will establish in accordance with the existing resource consent.
- Opposed to any proposal to impose additional restrictions on an activity that has already been consented at the site.

- The traveller's accommodation activities within Precinct 3 will be developed in accordance with the existing resource consent. Any additional standards are opposed.

Point Number 657.15

Summary of Decision Requested: Amend the heading of Rule 26.3.1 as follows:

26.3.1 ~~Construction or alteration of a building or structure – All Precincts, Motorsport and recreational facilities – Precinct A~~

Decision Reasons:

- The reference to 'Motorsport and Recreational facilities – Precinct A' in the heading of Rule 26.3.1 is opposed.
- The rule permitting the construction or alteration of a building or structure should not be limited to Precinct A only.
- Amendments are proposed to ensure that this Rule applies to all Precinct Areas.
- The 'construction or alteration of a building or structure' is for an activity that is permitted within that Precinct Area.
- Amendments required to ensure permitted rules apply to all Precinct Areas.

Point Number 657.16

Summary of Decision Requested: Retain the permitted activity status of Rule 26.3.1 P1 Motorsport and recreational facilities - Precinct A

AND

Amend the wording of Rule 26.3.1 P1 Motorsport and recreational facilities - Precinct A as follows:

~~(P1) Construction or alteration of a building or structure for a motor sport and recreation activity or facility in Precinct A (Operational Motorsport Area) identified on the planning maps.~~

AND

Add the following additional Rules (P2) – (P5) to Rule 26.3.1 Motorsport and recreational facilities - Precinct A:

~~(P2) Construction or alteration of a building or structure for a business or industrial activity, or a residential activity within an existing dwelling in Precinct B; and~~

~~(P3) Construction or alteration of a building or structure for a Traveller's Accommodation and Motor Sport and Recreation Activity or Facility within Precinct C; and~~

~~(P4) Alteration to the existing residential apartment buildings for a residential activity within the existing residential apartments within Precinct D; and~~

~~(P5) Alteration to the existing industrial units for an industrial activity within the existing industrial units within Precinct E.~~

AND

Amend Rule 26.3.1 D1 Motorsport and recreational facilities - Precinct A, to refer to the additional rules as a consequential amendment.

Decision Reasons:

- The permitted activity status in Rule 26.3.1 (P1) is supported and should be retained.
- Amendments are proposed to the wording of Rule (P1) (if it is retained) to ensure that the Rule applies to both motorsport and recreation 'activities' and 'facilities'.
- Rule 26.3.1 (P1) provides for the 'construction or alteration of a building or structure for a motor sport and recreation facility in Precinct A as a permitted activity.
- While permitted activity status is supported, it is unclear why the above rule is necessary when the activities proposed are already permitted by Rule 26.1.1.1 and why a similar rule is not proposed for the construction or alteration of a building or structure within any of the other Precinct Areas.
- Clarification is sought as to whether 'the construction or alteration of a building or structure' in the other Precinct Areas would also be permitted and why a similar rule is not proposed for each of the other Precinct Areas.
- Amendments are proposed to Rule 26.3.1 to ensure that the construction or alteration of a building or structure is a permitted activity in all Precinct Areas where the building or structure is for an activity that is permitted in the Precinct.

Point Number 657.17

Summary of Decision Requested: Amend Rule 26.3.1 Motorsport and recreational facilities - Precinct A from its current location within the 'Land Use Building' Rules to the 'Permitted Activity Rules' in Section 26.1.1.1.

Decision Reasons:

- Amendments are proposed in the current format of Rule 26.3.1 and its location within the Chapter.
- Rule 26.3.1 does not fit within the bulk and location standards in the 'Land Use – Building' Section.
- It does not manage any bulk and location requirement (height, daylight admission etc.)
- Its inclusion (and purpose) within this section of the PDP is therefore unclear.
- It does not make sense that the permitted land use activities in Rule 26.1.1 are subject to compliance with the Land Use Building Rules (26.3).
- Construction of buildings and structures should already be covered by the Permitted Activity Rules in 26.1.1.

Point Number 657.18

Summary of Decision Requested: Retain the Discretionary Activity Status of Rule 26.3.1 D1 Motorsport and recreational facilities - Precinct A.

Decision Reasons:

- The discretionary activity status in Rule (D1) is supported.

Point Number 657.19

Summary of Decision Requested: Retain Rule 26.3.2 P1 Height - All Precincts as notified.

Decision Reasons:

- The maximum permitted height that is proposed in Rule 26.3.2 P1 is supported and should be retained as proposed.

Point Number 657.20

Summary of Decision Requested: Amend Rule 26.3.2 P2 Height - All Precincts, as follows:

P2

(a) A building or structure in:

(i) Precinct B (~~Business and Industrial Area~~) (~~Industrial and Business Precinct~~)

(ii) Precinct C (~~Travelers Accommodation and Motor Sport and Recreation Area~~) (~~Minor Race Track Area~~)

(iii) Precinct D (Residential Apartments)

(iv) Precinct E (Industrial Units) ~~as identified on the planning maps.~~

Shall not exceed 10m in height

Decision Reasons:

- The maximum permitted heights that are proposed in Rule 26.3.2(P2) are supported.
- Minor amendments are proposed to the names of each Precinct and the formatting in Rule (P2) to ensure consistency with the rest of the Chapter.

Point Number 657.21

Summary of Decision Requested: **Retain** the Restricted Discretionary Activity Status in Rule 26.3.2 (RD1) Height - all precincts and the limits of discretion as notified, except for the amendments outlined below.

AND

Amend Rule 26.3.2 RD1 (b)(iii) to refer to the "privacy at adjoining zone boundaries" (as opposed to "privacy at adjoining properties").

Decision Reasons:

- The Restricted Discretionary Activity status in Rule 26.3.2 (RD1) is supported.
- The Hampton Downs Motorsport Park site is a large site that comprises several adjacent certificates of title.
- The limits of discretion should only apply to the external zone boundaries, not the internal boundaries within the site.

Point Number 657.22

Summary of Decision Requested: **Retain** Rule 26.3.3 P1 Daylight admission - All Precincts as notified.

Decision Reasons:

- Rule 26.3.3 (P1) is supported insofar as the daylight admission rule applies to the zone boundary.
- The proposed daylight admission Rule applies to the zone boundary (rather than the individual title boundaries). This approach is supported and should be retained.

Point Number 657.23

Summary of Decision Requested: **Retain** the Restricted Discretionary Activity Status in Rule 26.3.3 RD1 Daylight admission - all precincts and the limits of discretion, except the amendments outlined below.

AND

Amend Rule 26.3.3 RD1(b) Daylight admission - all precincts as follows:

- Correct the existing formatting error (whereby items (c) – (g) should be renumbered as (i) – (v)); and
- Replace "Admission of daylight and sunlight to adjoining sites" with "Admission of daylight and sunlight to adjoining zone boundaries"; and
- Replace "Privacy of adjoining properties" with "Privacy on the adjoining zone boundaries".

Decision Reasons:

- The Restricted Discretionary Activity Status in Rule 26.3.3 (RD1) is supported.
- Clarification is sought with respect to the different terms used in Council's exercise of discretion.
- The limits of discretion refer to 'adjoining sites' and 'adjoining properties'.
- It is unclear why Council have differentiated between 'adjoining properties' in the daylight admission rule. The use of differing terms within Chapter 26 is opposed.
- The 'zone boundary' is considered more appropriate for Council's limits of discretion.
- The Hampton Downs Motorsport site is a large site that comprises of several adjacent certificates of title.
- The limits of discretion should only apply to the external zone boundaries, not the internal boundaries within the site.

Point Number 657.24

Summary of Decision Requested: **Retain** the 45% site coverage for all Precincts in Rule 26.3.4 Site coverage.

AND

Amend the heading of Rule 26.3.4 Site coverage so that the Rule applies to All Precincts

AND

Amend Rule 26.3.4 Site coverage P1 - P5 by replacing those with a single Rule P1 that applies to all Precinct Areas:

P1 The total site coverage of any buildings or structures shall not exceed 45% within each Precinct.

Decision Reasons:

- The 45% site coverage that is proposed as a permitted activity in Rules (P1)-(P5) is supported.
- Amendments are proposed to the existing formatting to simplify the Rules.
- 45% site coverage is proposed in each Precinct Area.
- A single site coverage rule is therefore proposed in each Precinct Area.

Point Number 657.25

Summary of Decision Requested: **Retain** Rule 26.3.5 Building setbacks - All precincts as notified.

Decision Reasons:

- The building setbacks in Rule 26.3.5 are supported insofar as they only refer to the boundaries that are adjacent to a public road or another zone.
- No internal setback requirements are stated for the individual title boundaries that collectively make up the Motor sport and Recreation zone.
- The proposal to only apply a building setback requirement at the external zone boundaries is supported.
- There should be no internal setbacks within the Motorsport Park site.

Point Number 657.26

Summary of Decision Requested: **Delete** Rule 26.3.6 Size and scale of activities - Precinct B in its entirety.

Decision Reasons:

- The restrictions regarding the size and scale of activities within Precinct B are opposed in their entirety.
- The bulk and location of business and industrial development within Precinct B is already covered by the existing resource consents.
- Any duplication of the existing resource consents in the zone chapter is opposed.

Point Number 657.27

Summary of Decision Requested: **Amend** the Subdivision Provisions in Rule 26.4 Subdivision so that subdivision is a restricted discretionary activity.

Decision Reasons:

- The Discretionary Activity status for subdivision within the Hampton Downs Motor Sport and Recreation Zone is opposed.
- The activity status should be restricted discretionary.

Point Number 657.28

Summary of Decision Requested: **Amend** the Non-Complying Activity status in Rule 26.4 NC1 Subdivision to be a discretionary activity.

Decision Reasons:

- The non-complying activity status should be discretionary.

Point Number 657.29

Summary of Decision Requested: **Amend** the District Plan definition for 'Motorsport and Recreation Event in Chapter 13 Definitions by deleting the definition and replacing it with the following:

Motorsport and Recreation Activity Event

Means any activity in the Hampton Downs Motorsport and Recreation Zone that provides motorised and/or non-motorised entertainment, sport, education or training, and includes but is not limited to:

- Racing events and activities
- Off-road racing such as moto-cross or bmx
- Driver training or education
- Club days
- Vehicle testing and practise activities
- Organised events
- Go karts and go kart drifting
- Multi sport and off road running events
- Paintball, lazer tag, outdoor skate parks and clay bird shooting
- Drifting for motor vehicles

Decision Reasons:

- The proposed definition is opposed.
- It does not correspond with the definition that was submitted and agree to as part of the Draft District Plan feedback and the Council workshops that Hampton Downs Motorsport Park previously attended.
- A definition for a 'motorsport and recreation activity' is proposed instead of a 'motorsport and recreation event'.
- The reference to 'events' in the definition appears to be a duplication of one of the existing resource consent conditions.
- Hampton Downs Motorsport Park is opposed to any proposal to duplicate the existing resource consent conditions as zone provisions.
- The purpose of the zone is to recognise and provide for existing (and consented) motor sport and recreation activities and facilities at the site, and their future operation and expansion.
- A new definition is required to provide greater certainty to all parties in relation to the existing and consented land use activities at the site.

Point Number 657.30

Summary of Decision Requested: **Amend** the definition for "Motor sport and recreation facilities" in Chapter 13: Definitions as follows:

Motor sport and recreation facilities

Means any buildings or structures in the Motor Sport and Recreation Zone that support the development and operation of the Hampton Downs Motorsport Park and are associated with motor sport and recreation activities and include:

- (a) Race tracks, race pads and associated pit garages and support facilities;
- (b) Race control, safety, emergency and media facilities;
- (c) Corporate boxes and hospitality facilities;
- (d) Restaurants, cafes, food and beverage and merchandising retail areas;
- (e) Administration buildings and facilities;
- ~~(f)~~ (f). General ticketing, toilet and ablution facilities;
- ~~(g)~~ (g). Industrial units, vehicle workshops and storage sheds;
- ~~(h)~~ (h). Corporate showrooms and expo areas, including areas for the display of racing-related memorabilia;
- ~~(i)~~ (i). Residential accommodation and swimming pool and tennis court facilities;
- ~~(j)~~ (j). A convention centre;
- ~~(k)~~ (k). Traveller's accommodation, including a camping ground and hotel accommodation;
- ~~(l)~~ (l). Parking and helipad facilities;
- ~~(m)~~ (m). Driver training school inclusive of a skid pad;
- ~~(n)~~ (n). Spectator facilities including pedestrian accessways, tunnels, overbridges, spectator viewing platforms and seating areas;
- ~~(o)~~ (o). A jet sprint course;
- ~~(p)~~ (p). Go-kart and drifting pads;
- (g) A commercial/industrial area
- ~~(r)~~ (r). Accessory buildings, facilities and structures such as maintenance and storage sheds, decks, shade cloths and storage containers for all items listed of the above.

Decision Reasons:

- The definition for motorsport and recreation facility is supported.
- Minor amendments are proposed to align with the wording that was previously submitted to Council (and agreed to) as part of the District Plan feedback.

Point Number 657.31

Summary of Decision Requested: Delete the definition for "Automotive activities" from Chapter 13 Definitions in its entirety.

Decision Reasons:

- The inclusion of a definition for 'automotive activities' within the District Plan is opposed.
- The inclusion of this definition is unnecessary and should be deleted.

Point Number 657.32

Summary of Decision Requested: Retain the specific zone (Hampton Downs Motor Sport and Recreation Zone) for the Hampton Downs Motorsport Park, except for the amendments outlined elsewhere in the submission.

Decision Reasons:

- The identification of the Hampton Downs Motorsport Park on the Planning Maps is supported.

Point Number 657.33

Summary of Decision Requested: Retain the boundaries of the Hampton Downs Motor Sport and Recreation Zone as shown on the planning maps, except for the amendments below.

AND

Amend the external boundaries of the Hampton Downs Motorsport and Recreation Zone to include an additional piece of land located on the southern side of Hampton Downs Road, if Hampton Downs Motorsport Park purchase the land.

Decision Reasons:

- Hampton Downs Motorsport Park is seeking to purchase a small parcel of land on the southern side of Hampton Downs Road.
- This area was previously identified as part of the Hampton Downs Motorsport sites but is not currently owned by Hampton Downs Motorsport Park.
- Minor amendments will be required to the external boundaries of the Hampton Downs Motorsport Park Zone (particularly in relation to the land on the southern side of Hampton Downs Road) if Hampton Downs Motorsport purchase this land.
- The changes are required to correctly identify the boundaries of the Hampton Downs Motorsport and Recreation Zone.

Point Number 657.34

Summary of Decision Requested: Retain the five Precinct Areas (identified as Precincts A-E on the Planning Maps), except for the amendments outlined below.

AND

Amend the descriptions/names of the Precinct Areas.

Decision Reasons:

- The identification of five separate Precinct Areas is supported.
- Amendments are sought to the description/name of each precinct.
- The Precinct boundaries shown on planning maps correspond with existing (and consented) land use activities and development at Hampton Downs Motorsport Park.

Point Number 657.35

Summary of Decision Requested: Amend the introduction to Chapter 26 Hampton Downs Sport and Recreation Zone, to clearly identify and describe the five Precinct Areas within the Hampton Downs Motor Sport and Recreation Zone as follows:

(5) The Hampton Downs Motor Sport and Recreation Zone comprises of the following Precinct Areas:

(a) Precinct A – Operational Motorsport Area

(b) Precinct B – Business and Industrial Area

(c) Precinct C – Travellers Accommodation and Motor Sport and Recreation Area

(d) Precinct D – Residential Apartments

(e) Precinct E – Industrial Units

AND

Amend the Introduction to Chapter 26 Hampton Downs Motorsport and Recreation Zone to clearly state that the planning maps show the location and boundaries of each Precinct Area.

AND

Amend the Introduction to Chapter 26 Hampton Downs Motorsport and Recreation Zone to include the following descriptions of each Precinct Area:

- **Precinct A: The operational motorsport area** – including but not limited to the main race tracks, pit garages and associated race control, spectator and support facilities; a convention centre and general hospitality, facilities including retail, restaurant, cafe and food premises; vehicle workshops and garaging; corporate show rooms; parking and helipad facilities; and administration facilities;
- **Precinct B: A business/industrial area**, that also contains an existing residential dwelling;
- **Precinct C: Travellers' accommodation and Motor Sport and Recreation Area**, and includes the consented campground, and existing race track and buildings and storage containers required to support motor sport and recreation related activities;
- **Precinct D: Residential Apartments: 80 residential apartments;**
- **Precinct E: Industrial Units 12 Industrial units.**

Decision Reasons:

- To clearly define the Precinct Areas at the start of the zone provisions and refer Plan users to the relevant Planning Maps (showing the location of each Precinct Area).
- Amendments are necessary so that it is clear that the Hampton Downs motor Sport and Recreation Zone comprises of five separate Precinct areas and there are specific provisions or rules that apply to each Precinct.
- Minor amendments to the wording/name of each Precinct Area is necessary to correspond with the land use activities within each Precinct.

Point Number 657.36

Summary of Decision Requested: Add a paragraph to the introduction of Chapter 26 Hampton Downs Motor Sport and Recreation Zone outlining that Hampton Downs Motorsport Park operates under a number of existing resource consents, and the existing resource consents effectively manage the effects within the Motorsport Park.

Decision Reasons:

- The introduction is lacking essential background information with respect to the existing resource consents.
- The Hampton Downs Motorsport Park was established (and operates) by way of resource consent and this will continue to manage any effects at the site.
- It is important that Plan users know that the site has existing resource consents, which contain conditions regarding bulk and location, traffic and noise.
- The existing resource consent conditions are not being duplicated in the District Plan, but will continue to apply to the site.

Point Number 657.37

Summary of Decision Requested: Amend Rule 26.1.1.1(P1) Permitted Activities - Operational Motorsport Area Precinct A Activity as follows:

(P1) Motor sport and recreation facilities and/or motor sport and recreation activities

Decision Reasons:

- The permitted activity rules for Precinct A (Rule 26.1.1.1 (P1) & (P2) do not provide for a motor sport and recreation activity as a permitted activity within the operational motorsport area.
- The current wording only provides for the motor sport and recreation facility (P1); or a day to day activity (P2).
- A motorsport and recreation activity should also clearly be provided for as a permitted activity within Precinct A; and is one of the main reasons for the site specific zoning.
- The activities and the facilities should both be permitted within the operational motorsport area.

Point Number 657.38

Summary of Decision Requested: Delete the activity specific conditions in Rule 26.1.1.1 P1 and P2 Permitted Activities - Operational Motorsport Area - Precinct A

AND

Delete the activity specific conditions in Rule 26.1.1.2 P1, P2, P3 and P4 Permitted Activities - Business and Industrial Area - Precinct B

AND

Delete the activity specific conditions in Rule 26.1.1.3 P1 Permitted Activities - Minor Race Track Area - Precinct C

AND

Delete the activity specific conditions in Rule 26.1.1.4 P1 Permitted Activities - Residential Apartments - Precinct D

AND

Delete the activity specific conditions in Rule 26.1.1.5 P1 Permitted Activities - Industrial Units - Precinct E

Decision Reasons:

- The heading of each of the above rules already identifies the Precinct to which the Rule applies.
- There is no reason to duplicate the precinct area as an activity specific condition. This is a double up and so the activity specific conditions are of no use at all.

Point Number	657.39
Summary of Decision Requested:	<p>Delete Rule 26.1.1.2 P1, P2 and P3 Permitted Activities - Business and Industrial Area Precinct B Activity in their entirety</p> <p>AND</p> <p>Add a new rule 26.1.1.2 P1 (insert name) as follows:</p> <p><u>P1 A business or industrial activity.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> Permitted Activity Rules for Precinct B are unnecessarily complex. Precinct B is area is an area of approximately 17 hectares that has been consented for business/industrial development. There is also an existing dwelling located within Precinct B. Development of the consented business/industrial area will occur in accordance with the existing resource consent. No need to impose additional rules/controls within this Precinct Area, nor is there any reason to differentiate between 'automotive activities' non-automotive activities' and 'general warehousing' within the Permitted Activity Rules. Provisions include too many definitions (and relate to activities that have already been consented at the site) P1 – P3 for Precinct B should be simplified to comprise a single rule (P1) that provides for 'a Business or Industrial activity' within Precinct B.
Point Number	657.40
Summary of Decision Requested:	<p>Retain Rule 26.1.1.2 P4 Permitted Activities - Business and Industrial Area - Precinct B Activity except for the amendments outlined below.</p> <p>AND</p> <p>Amend Rule 26.1.1.2 P4 Permitted Activities - Business and Industrial Area - Precinct B B Activity as follows:</p> <p><i>A residential activity within an existing dwelling, <u>and alterations or additions to the existing dwelling</u></i></p> <p>AND</p> <p>Delete the Activity Specific Condition for Rule 26.1.1.2 P4 Permitted Activities - Business and Industrial Area - Precinct B Activity</p>
Decision Reasons:	<ul style="list-style-type: none"> Rule P4 recognises the existing residential activity within Precinct B and should therefore be retained. To allow for alterations and extensions to the existing dwelling.
Point Number	657.41
Summary of Decision Requested:	<p>Amend the heading in Rule 26.1.1.3 Permitted Activities Minor Race Track Area- Precinct C by replacing "Minor Race Track Area" with "<u>Travellers' Accommodation and Motor Sport and Recreation Area</u>"</p>
Decision Reasons:	<ul style="list-style-type: none"> To ensure the District Plan provisions correspond with the existing (and consented) land use activities in this area of the Motorsport Park.
Point Number	657.42
Summary of Decision Requested:	<p>Retain Rule 26.1.1.3 (P1) Permitted Activities - Minor Race Track Area - Precinct C insofar as it provides for traveller's accommodation and facilities as a permitted activity in Precinct C.</p>
Decision Reasons:	<ul style="list-style-type: none"> Precinct C (the Traveller's accommodation and Motor Sport and Recreation Area) includes the consented campground, and existing race track and building and storage containers required to support motorsport and recreation related activities.
Point Number	657.43
Summary of Decision Requested:	<p>Add a new rule to the permitted activities in Rule 26.1.1.3 Permitted Activities - Minor Race Track Area - Precinct C as follows:</p> <p><u>P2 A motor sport and recreation facility and/or activity.</u></p>
Decision Reasons:	<ul style="list-style-type: none"> A motorsport and recreation facility and/or activity should also clearly be provided for as a permitted activity within Precinct C.
Point Number	657.44
Summary of Decision Requested:	<p>Retain Rule 26.1.1.4 P1 Permitted Activities - Residential Apartments - Precinct D as notified.</p>
Decision Reasons:	<ul style="list-style-type: none"> The permitted activity rule for 'a residential activity within the residential apartments' within Precinct D is supported.
Point Number	657.45
Summary of Decision Requested:	<p>Retain Rule 26.1.1.5 P1 Permitted Activities - Industrial Units - Precinct E</p>
Decision Reasons:	<ul style="list-style-type: none"> The permitted activity for 'an industrial activity within the industrial units' within Precinct E is supported.
Point Number	657.46
Summary of Decision Requested:	<p>Delete Rule 26.1.2.1 C1 Controlled Activities - Operational Motor Sport Area - Precinct A in its entirety.</p>
Decision Reasons:	

- The definition that is proposed for a Motor sport and recreation activity includes racing events and activities.
- Rule 26.1.1.1 provides for racing events and activities as a Permitted Activity within Precinct A.
- No need to differentiate between an 'event' in the rules for Precinct A.
- The requirement to obtain resource consent for a motor sport and recreation event within an established and operational Motorsport Park site is opposed in its entirety and is contrary to the overall purpose of the site specific zone.
- Motor sport and recreation events are an integral part of the operational motorsport area (Precinct A) and have already been consented (and established) at the site via the suite of existing resource consents that have been approved for the site.
- To recognise the existing and consented Motor sport and Recreation Activities at the site and to allow for their continual operation and expansion without requiring additional resource consents (where the scale and intensity is still in accordance with the existing resource consents).
- Definition for Motorsport and Recreation Activity (refer to submission) was developed in consultation with Council and include both events and activities.
- Differentiating between "events" and "activities" is potentially confusing.

Point Number 657.47

Summary of Decision Requested: Delete Rule 26.1.2.2 C1 Controlled Activities - Minor Race Track Area - Precinct C in its entirety.

Decision Reasons:

- The definition proposed for 'Motor sport and recreation activity' includes 'racing events and activities'.
- Requested inclusion of a new rule (in Rule 26.1.1.3(P2)) that provides for racing events and activities as a Permitted Activity within Precinct C.
- No need to differentiate between an 'event' in the rules.
- The requirement to obtain resource consent for a motor sport and recreation event within an established and operational Motorsport Park site is opposed in its entirety and contrary to the overall purpose of the site specific zone.
- To recognise the existing and consented Motor sport and Recreation Activities at the site and to allow for their continual operation and expansion without requiring additional resource consents (where the scale and intensity is still in accordance with the existing resource consents).
- Definition for Motorsport and Recreation Activity (refer to submission) was developed in consultation with Council and include both events and activities.
- Distinguishing between 'events' and 'activities' is potentially confusing and considered unnecessary.

Point Number 657.48

Summary of Decision Requested: Delete Rule 26.1.2.2 C2 Controlled Activities - Minor Race Track Area - Precinct C in its entirety.

Decision Reasons:

- Requested inclusion of a new rule (in Rule 26.1.1.3(P2)) that provides for racing events and activities as a Permitted Activity within Precinct C.
- The requirement to obtain resource consent for a motor sport and recreation event within an established and operational Motorsport Park site is opposed in its entirety and contrary to the overall purpose of the site specific zone.
- To recognise the existing and consented Motor sport and Recreation Activities at the site and to allow for their continual operation and expansion without requiring additional resource consents (where the scale and intensity is still in accordance with the existing resource consents).
- Definition for Motorsport and Recreation Activity (refer to submission) was developed in consultation with Council and include both events and activities.
- Distinguishing between 'events' and 'activities' is potentially confusing and considered unnecessary.

Point Number 657.49

Summary of Decision Requested: Amend Rule 26.1.3 D1 Discretionary Activities - All Precincts by deleting the existing wording and replace with the following new rule:

26.1.3 Discretionary Activities – All precincts

D1 Any activity that is not a motorsport and recreation activity or a motorsport and recreation facility or any activity not listed in Rule 26.1.1.

Decision Reasons:

- The wording (and purpose) of this rule is unclear.
- The wording in the Rule Heading applies that this rule applies to all Precincts.
- Precinct B is later excluded in the same Rule (The latter part of the Rule only applies to Precincts A, C, D and E (Not Precinct B)).
- Clarification is sought with respect to why Precinct B has been excluded (and is non-complying instead of Discretionary).
- Assumed that the purpose of the Discretionary Activity is to capture those activities that are not 'motor sport and recreation facility' (both of which should be defined terms in the District Plan) and/or activities that are not already consented at the Motor Park site.

Point Number 657.50

Summary of Decision Requested: Delete the definition for "day to day activity" from Chapter 13 Definitions in its entirety.

Decision Reasons:

- The inclusion of a definition for 'day to day activity' within the District Plan is opposed.
- The inclusion of this definition is unnecessary and should be deleted.

Point Number 657.51

Summary of Decision Requested: Delete the definition for "General warehousing" from Chapter 13 Definitions in its entirety.

Decision Reasons:

- The inclusion of a definition for 'General warehousing' within the District Plan is opposed.
- The inclusion of this definition is unnecessary and should be deleted.

Point Number 657.52

Summary of Decision Requested: Delete the definition for "Non-automotive activities" from Chapter 13 Definitions in its entirety.

Decision Reasons:

- The inclusion of a definition for 'Non-automotive activities' within the District Plan is opposed.
- The inclusion of this definition is unnecessary and should be deleted.

Point Number 657.53

Summary of Decision Requested: Retain the definition for "Travellers Accommodation" in Chapter 13 Definitions as notified.

Decision Reasons:

- The inclusion of a definition for 'Travellers Accommodation' within the District Plan is supported.

Point Number 657.54

Summary of Decision Requested: Delete the definition for "Activities not provided for in Precinct B in the Motor sport and Recreation Zone" from Chapter 13 Definitions in its entirety.

Decision Reasons:

- The inclusion of a definition for 'Activities not provided for in Precinct B in the Motor sport and Recreation Zone' within the District Plan is opposed.
- The inclusion of this definition is unnecessary and should be deleted.

Point Number 657.55

Summary of Decision Requested: Delete the definition for "Spectator" from Chapter 13 Definitions in its entirety.

Decision Reasons:

- The inclusion of a definition for 'Spectator' within the District Plan is opposed.
- The inclusion of this definition within the District Plan is unnecessary and should be deleted.

Point Number 657.56

Summary of Decision Requested: Amend Objective 9.1.1 Continued development and operation of the Hampton Downs Motorsport Park by deleting it and replacing it with the following wording:
9.1.1 Objective – Continued development and operation of the Hampton Downs Motor Sport and Recreation Zone.
To use and develop the Hampton Downs Motor Sport and Recreation Zone as a regionally significant Motor Sport and Recreation facility that meets the current and future needs of the community.

Decision Reasons:

- The identification of a zone specific objective and policies for the Hampton Downs Motor Sport and Recreation Zone is supported.
- The existing objective is not aspirational.
- The existing activities and facilities at Hampton Downs Motorsport Park are already regionally significant.
- The proposed objective does not appropriately recognise or provide for the continued operation and development of the Motorsport Park.
- Minor amendments are proposed to the wording of the proposed objective and policies, to align with the wording that was previously submitted to Council (and agreed to) as part of the Draft District Plan feedback and to be consistent with the wording of the other specific zone objectives and policies proposed in Chapter 9.
- The adoption of a consistent policy framework throughout the District Plan is supported.

Point Number 657.57

Summary of Decision Requested: Amend Policy 9.1.1.1 Operation and development as follows:
9.1.1.1 Policy – Operation and development
(a) Enable the continued operation and development of ~~activities, facilities and events within the~~ Hampton Downs Motor sport and Recreation Zone by providing for:
(i) A wide range of motor sport and recreation activities; and
(ii) ~~The development of~~ facilities to support the motor sport and recreation activities ~~and events~~.

Decision Reasons:

- The identification of a zone specific objective and policies for the Hampton Downs Motor Sport and Recreation Zone is supported.
- Minor amendments are proposed to the objective and policies to align with the following:
 - The wording that was previously submitted to Council (and agreed to) as part of the Draft District Plan feedback
 - To be consistent with the defined terms that are proposed in Chapter 13 (motor sport and recreation activities' and motor sport and recreation facilities' and the zone name.
 - To be consistent with the wording of the other specific zone objectives and policies proposed in Chapter 9.
 - The adoption of a consistent policy framework throughout the District Plan is supported.

Point Number 657.58

Summary of Decision Requested: Amend Policy 9.1.1.2 Precinct-based development as follows:

9.1.1.2 Policy – Precinct-based development

- a) A precinct-based approach enables the ongoing operation and development of the Hampton Downs Motor sport ~~Park by and Recreation Zone such that:~~
- (i) Precinct A provides for the operational motorsport area including the main race tracks, ~~and associated facilities, pit garages and associated race control, spectator and support facilities, a convention centre and general hospitality facilities including retail, restaurant, café and food premises, vehicle workshops and garaging, corporate show rooms, parking and helipad facilities, and administration facilities;~~
 - (ii) Precinct B provides ~~for a commercial business and industrial area facilities and activities that supports the Hampton Downs Motorsport Park, and also contains an existing residential dwelling;~~
 - (iii) Precinct C provides ~~for a minor race tracks, Traveller's accommodation and Motor Sport and Recreation Area, and includes the consented campground, an existing race track and buildings and storage containers required to support motorsport and recreation related activities;~~
 - (iv) Precinct D provides ~~for residential activities within the 80 existing Residential Apartments; and~~
 - (v) Precinct E provides ~~for industrial activities within the 12 existing industrial units.~~

Decision Reasons:

- The identification of a zone specific objective and policies for the Hampton Downs Motor Sport and Recreation Zone is supported.
- Minor amendments are proposed to the objective and policies to align with the following:
 - The wording that was previously submitted to Council (and agreed to) as part of the Draft District Plan feedback
 - To be consistent with the defined terms that are proposed in Chapter 13 (motor sport and recreation activities' and motor sport and recreation facilities' and the zone name.
 - To be consistent with the wording of the other specific zone objectives and policies proposed in Chapter 9.
 - The adoption of a consistent policy framework throughout the District Plan is supported.

Point Number

657.59

Summary of Decision Requested:

Amend Policy 9.1.1.3 Management of adverse effects, as follows:

9.1.1.3 Policy – Management of adverse effects

(a) ~~Mitigating~~ adverse effects by managing:

- (i) ~~The scale, intensity, timing and duration of activities so that adverse noise effects on the surrounding rural zone are minimised; and~~
- (ii) ~~The adverse traffic safety effects to ensure the safe and efficient operation and functioning of the adjacent transport network and efficient access to surrounding facilities is maintained at all times; and~~
- ~~(iii) Signs are visible from, or located in close proximity to, a public road to ensure the safe functioning of the public road; and~~
- ~~(iii) (iv) The size, scale and intensity of development to ensure the amenity of the surrounding rural zone is maintained.~~

Decision Reasons:

- The identification of a zone specific objective and policies for the Hampton Downs Motor Sport and Recreation Zone is supported.
- Minor amendments are proposed to the objective and policies to align with the following:
 - The wording that was previously submitted to Council (and agreed to) as part of the Draft District Plan feedback
 - To be consistent with the defined terms that are proposed in Chapter 13 (motor sport and recreation activities' and motor sport and recreation facilities' and the zone name.
 - To be consistent with the wording of the other specific zone objectives and policies proposed in Chapter 9.
 - The adoption of a consistent policy framework throughout the District Plan is supported.

Point Number

657.60

Summary of Decision Requested:

Delete the outdated plans from Appendix 12 Motorsport and Recreation.
AND
Retain the noise contour plan in Appendix 12 Motorsport and Recreation.

Decision Reasons:

- A lot of the plans in Appendix 12 are outdated and require deleting or replacing with updated plans.
- Several of these plans are outdated and require deleting or replacing with updated plans.
- The inclusion of the noise contour plan is supported.
- The identification of precinct areas on the planning maps negates the requirement to include the outdated Concept Plan in the PDP.
- The old concept plan should either be updated or deleted.

Submitter Number:

658

Submitter:

Koning Family Trust and Martin Koning

Point Number

658.1

Summary of Decision Requested:

Amend Policy 4.1.5 Density, as follows:

Residential development responds to its context and seeks to achieve, over time, the following average gross density targets:

Achieve a minimum density of:

- (i) 12-15 households per hectare in the Residential Zone
- (ii) 8-10 households per hectare in the Village Zone where public reticulated services can be provided.

AND

Any further relief or amendments as necessary to support the relief sought in the submission.

Decision Reasons:

- Future Proof and the WRPS provides direction on the desired density of greenfield development throughout the sub-region.
- Future Proof and the WRPS recognise that these densities are to be achieved over time and are targets across the towns such as Huntly, Ngaruawahia and Raglan.
- Policy 4.1.5 is worded in such a way that provides little flexibility in the density of future greenfield development and removes the flexibility and long-term nature of achieving the target densities embedded in the higher order policy documents.

- The policy should be worded to be consistent with the density targets embedded in these documents, which allows development to respond to its location and context, with higher densities located in appropriate locations near urban centres or areas of amenity and lower densities where there are topographical, geographical and physical constraints.
- Allowing for this balance to occur will also assist in providing a range of housing typologies and housing choice while giving effect to the intent of the higher order strategic growth documents.

Point Number 658.2

Summary of Decision Requested: Amend Policy 4.1.18(iii) Raglan, as follows:

(iii) Rangitahi and other areas around the Raglan urban area are the primary locations for the medium term growth and are developed in a manner that connects to the existing town and maintains and enhances the natural environment.

AND

Any further relief or amendments as necessary to support the relief sought in the submission.

Decision Reasons:

- This policy identifies that Rangitahi is the only area that is to provide for medium term growth in Raglan.
- This policy is inconsistent with the broad direction set within the NPS - UDC which seeks to create competition in the land development market.
- The NPS identifies that Councils must respond to projected development capacity information to ensure adequate development capacity is available in the short, medium and long term.
- Where Council's are in identified high growth areas, demand projections must include a margin of at least an extra 20% in the short to medium terms and an extra 15% in the long term.
- The Future Proof sub-region shows capacity to demand deficit in Raglan and Ngarunui Beach.
- Considered inappropriate to restrict medium term growth to one location.

Point Number 658.3

Summary of Decision Requested: Amend the zoning of the properties at 339 Wainui Road, 145 Te Hutewai Road and 151 Te Hutewai Road (CFR 216110, SA27B/621 and 406847) from Rural Zone to Residential Zone (see maps included with the submission).

AND

Any further relief and/or amendments as necessary to support the relief sought in the submission.

Decision Reasons:

- The NPS-UDC identifies the Future Proof sub-region as a high-growth urban area.
- The Housing Development Capacity study required by Policy PBI has been completed for the Future Proof Sub-Region.
- This has identified a broad scale long term demand is able to be met over the sub-region. However it identifies that there is demand in and around Raglan over the next 30 years.
- The Assessment identifies a shortfall in capacity compared to projected demand in Raglan and Ngarunui Beach over the short, medium and long term both with and without the increased demand margin considered for medium and high growth local authorities.
- It is necessary to anticipate this projected growth and provide an opportunity to accommodate the projected demand in housing in the area.
- Additional economic analysis of Raglan's projected growth has been carried out by Property Economics which indicated that Raglan will experience sustained population growth over the next 20 years.
- Using medium growth projection, there will be demand for 700 additional dwellings to cater for this growth.
- An additional 150 dwellings will be required to provide for the likely demand for holiday homes over the same period. Refer to Figure 5 in submission (showing projected trend).
- The same assessment identifies that if a high growth scenario is applied, this number is likely to increase to 1,150 to accommodate projected market growth.
- The rezoning provides an opportunity to address the projected demand and capacity issues in a location that is contiguous with the existing Raglan township in the areas that are projected to have a capacity shortfall in the future.
- The site is a logical location for the future growth of Raglan
- Submission illustrates the Indicative Urban Limits in Figure 7, and Figure 8 shows the Indicative Urban Limits and extent of the submitter's land holdings in relation to the indicative boundary.
- The proposed rezoning is consistent with the spatial approach of the Future Proof growth strategy. It is located party within the IUL.
- The balance of the site adjoins the IUL and the existing Residential Zone. Zoning of the 33ha block outside of the IUL provides development certainty over the rest of the undeveloped area contained within the IUL.
- The site is a logical connection between land that is already zoned for residential land with rural land included in the IUL, creating a more rational and logical urban area.
- The submitter's site is immediately adjacent to land that is zoned for residential development. Submission shows how connection to this area may be achieved, creating a connected and accessible urban environment.
- The subject site is located in close proximity to existing services (Raglan Wastewater Treatment Plan and the potable Water Supply and Reservoir), meaning subject to capacity it may be serviced.
- Submission details an initial three waters assessment. Subject to ensuring adequate capacity of services the land will be able to be serviced.
- Investigations have not identified any reasons that the site is unable to be developed.
- Preliminary investigation have considered: Transportation, Three Waters, Ecology, Archaeology, Economic Demand, Contaminated Land, Geotechnical.
- These assessments have identified a number of constraints across the site which will need to be addressed. However there are not considered to be any serious limitations that would preclude development of the site.
- The proposed District Plan requires any residential development within 300m of open wastewater oxidation ponds to obtain Discretionary resource consent. The zoning boundary is designed to ensure dwellings will be able to be constructed over 300m from the oxidation ponds.

Submitter Number: 659

Submitter: Helen Mahon

Point Number 659.1

Summary of Decision Requested: Amend the zoning of the 183ha sites along East Mine Road with the titles CFR 805391, CFR SA50A/762, CFR SA10D/800, CFR 1955501, CFR SA 61B/799, CFR SA 18B/1138, CFR SA30A/356, SA 40D/985, CFR SA251/176, SA 26C/345, SA 51/131 from Rural Zone to a multi-purpose designation to develop a recreation and events zone, alongside a residential zone.

Decision Reasons:

- The submitter supports the proposal for the following reasons:
 - Educational outcomes for youth
 - Significant employment opportunities
 - Improved recreational living and lifestyles for residents through outdoor activities, water sports
 - A great opportunity for Huntly to become a destination for tourists
 - This project has the ability to transform Huntly
 - It is time that the District Council gave 100% support, endorsement and commitment to the beautification of Huntly.

Submitter Number: 660

Submitter: Owen Mounsey

Point Number	660.1
Summary of Decision Requested:	Amend the zoning of the 183ha sites along East Mine Road with the titles CFR 805391, CFR SA50A/762, CFR SA10D/800, CFR 1955501, CFR SA 61B/799, CFR SA 18B/1138, CFR SA30A/356, SA 40D/985, CFR SA251/176, SA 26C/345, SA 51/131 from Rural Zone to a multi-purpose designation to develop a recreation and events zone, alongside a residential zone.
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the proposal for the following reasons: <ul style="list-style-type: none"> Educational outcomes for youth Significant employment opportunities Improved recreational living and lifestyles for residents through outdoor activities, water sports A great opportunity for Huntly to become a destination for tourists This project has the ability to transform Huntly It is time that the District Council gave 100% support, endorsement and commitment to the beautification of Huntly.

Submitter Number:	661	Submitter:	Greg & Janice Allen
Organisation:	Allenmara Computers Ltd		
Point Number	661.1		
Summary of Decision Requested:	Amend the zones and overlays around McVie Road and Kimihia Road, Huntly to enable the development of the Kimihia Lakes Recreation and Events Park; AND No specific decision requested, but submission seeks to recognise and celebrate the history of the Kimihia District, and restore and make available this amazing area for the entire community and visitors.		
Decision Reasons:	<ul style="list-style-type: none"> Recognise and celebrate the history of Kimihia District Passionate about the historic importance and wish to share with everyone. Huntly needs this. 		

Submitter Number:	662	Submitter:	Blue Wallace Surveyors Ltd
Point Number	662.1		
Summary of Decision Requested:	Amend Policy 4.7.14 Structure and master planning as follows (or words to similar effect): <i>(a) Ensure that development and subdivision within approved structure or master plan areas is integrated, where physically reasonable, with the general development pattern and infrastructure requirements specified conceptually provided for in an approved structure or master plan.</i>		
Decision Reasons:	<ul style="list-style-type: none"> It is important to note that the function of high-level growth planning documents should not unreasonably constrain specific land use within the district. There has been little to no on-site investigations as to the location of intersections or transportation corridors thus resulting in unreasonable constraints. Supports the aim to integrate land use developments with preceding approved structure plans, however seeks that appropriate flexibility is provided to account for specific on-site variables. 		

Point Number	662.2		
Summary of Decision Requested:	Retain Policy 5.3.3 Industrial and commercial activities, except for the amendments sought below AND Add a new clause (c) to Policy 5.3.3 Industrial and commercial activities as follows (or words to similar effect): <i>(c) Recognise that activities associated with non-rural infrastructure be provided for within the rural environment.</i>		
Decision Reasons:	<ul style="list-style-type: none"> The rural industrial integrity of the Rural Zone is an important message to be contained in the Plan. Considers that non-rural industries can operate in the Rural Zone where they abut infrastructure such as a state highway. Recognise that the rural environment is influenced by non-rural infrastructure, and some non-rural activities can occur in the zone e.g. a service station. 		

Point Number	662.3		
Summary of Decision Requested:	Retain Policy 5.6.3 Subdivision within the Country Living Zone, except for the amendments sought below AND Amend Policy 5.6.3(a)(i) Subdivision within the Country Living Zone as follows: <i>(i) The creation of undersized lots is avoided discouraged where character and amenity are compromised;</i>		
Decision Reasons:	<ul style="list-style-type: none"> The word "avoid" is absolute and will restrict flexibility in subdivision design. The submitter supports in part Policy 5.6.3 to the extent that Country Living Zones may intensify (residentially) thus providing an element of future proofing into the zone. Amendments are needed to create undersize allotments in appropriate instances. 		

Point Number	662.4		
Summary of Decision Requested:	Retain Rule 16.1.3 Restricted Discretionary Activities, except for the amendments sought below AND		

Amend Rule 16.1.3 RDI(c) Restricted Discretionary Activities as follows:

(c) *The minimum net site area per residential unit is ~~300~~200m².*

Decision Reasons:

- Rule 16.1.3 provides clear guidance for increasing residential density and infill development.
- The area requirement for multi-unit developments needs to be reduced to 200m² for each dwelling unit, as such an area will allow for efficient residential intensification without the need for a more onerous development assessment.
- Whilst many residential properties will be constrained in obtaining a 200m² net site area, a satisfactory urban design can be achieved on smaller allotments.

Point Number

662.5

Summary of Decision Requested:

Retain Rule 16.2.4.1 P2 Earthworks - General, except for the amendments sought below

AND

Amend Rule 16.2.4.1 P2 Earthworks - General as follows (or words to similar effect):

Earthworks for the purpose of creating a building platform and accessway for residential purposes within a site, using imported fill material must meet the following condition:

Decision Reasons:

- Seeks to amend the permitted activity rule by expanding the coverage to accessway formation too.
- Supports the permitted activity status for earthworks associated with building platforms.

Point Number

662.6

Summary of Decision Requested:

Amend Rule 16.3.5 P1 Daylight admission as follows:

Buildings must not protrude through a height control plane rising at an angle of 37 degrees commencing at an elevation of ~~2.5~~2m above ground level at every point of the site boundary

Decision Reasons:

- This will align with other district plans in the region and will provide a consistent standard for development.
- Greater housing choice will be enabled.

Point Number

662.7

Summary of Decision Requested:

Retain Rule 16.3.8 P1(a)(i) Service Court, except for the amendments sought below

AND

Amend Rule 16.3.8 P1(b) Service Court to require a dimension of at least a 3m diagonal line that is no less than 1.5m in width rather than the 3m diameter requirement.

Decision Reasons:

- Supports a 15m² service court.
- Does not agree that a 3m diameter shape factor is appropriate given that service areas should be discreet areas and hence located to the side or rear of a property.
- A 3m diameter circle is not conducive to discreetly locating a service court.

Point Number

662.8

Summary of Decision Requested:

Amend Rule 16.3.9.3 P1(a) Building setback - Waterbodies as follows:

(a) Any building must be setback a minimum of:

(i) 23m from the margin of any:

A. lake over 4ha; and

B. wetland;

(ii) 23m from the bank of any river (other than the Waikato and Waipa Rivers);

...

(v) 10m from a managed wetland

AND

Any consequential amendments.

Decision Reasons:

- A wetland as defined under the RMA is broad reaching and covers many features.
- Having a nominal 23m setback applied to such a wide variation of water features is inappropriate and introduces significant inefficiencies which is contrary to Part 2 of the RMA and the sustainable management of natural and physical resources.
- A lake can constitute a large array of waterbodies and therefore a starting point of 4ha should be used before the setback applies.

Point Number

662.9

Summary of Decision Requested:

Retain Rule 16.4.1 RDI Subdivision - General, except for the amendments sought below

AND

Amend Rule 16.4.1 RDI Subdivision - General as follows:

(a) Subdivision must comply with all of the following conditions:

...

(iii) Where roads are to be vested in Council, and where practicable, they must follow a grid layout;

...

(v) Where the subdivision is within a structure plan area, neighbourhood centres within the site are provided in general accordance with that structure plan document.

(b) Council's discretion shall be restricted to the following matters:

...

(ix) General consistency with any relevant structure plan or master plan including the provision of neighbourhood parks, reserved and neighbourhood centres;

Decision Reasons:

- Grid road layouts are obviously the most efficient transportation design, however when developing land for residential land use, natural features will need to be provided for and could prevent a grid layout.
- The amendments sought recognise a grid road layout is not always achievable.
- The amendments recognise on-site variables as opposed to strict adherence to high-level structure planning documents.

Point Number

662.10

Summary of Decision Requested:

Retain Rule 16.4.4 RD1 Subdivision - Multi-unit development, except for the amendments sought below
AND

Amend Rule 16.4.4 RD1 (a)(iii) Subdivision - Multi-unit development to reduce the minimum net site area required to 200m² for each unit.

Decision Reasons:

- Matches that or abutting territorial authorities.
- There is plenty of physical evidence that can be provided to assure that a 200m² net site area is suitable to house multi-unit developments.
- Smaller net site areas will enable efficient use of land, particularly in regard to infill housing areas.

Point Number

662.11

Summary of Decision Requested:

Amend Rule 16.4.13 RD1(a) Subdivision creating reserves as follows:

(a) Every reserve, including where a reserve is identified within a structure plan or master plan (other than an esplanade reserve), proposed for vesting as part of the subdivision, must be bordered by roads ~~along at least 50% of its boundaries as much as is practicable.~~

Decision Reasons:

- This rule seeks to impose a development constraint that may not feasibly be possible or practicable.
- Reserves should provide access from transportation corridors, on-site variables could mean that a 50% road frontage is not possible, thus defaulting the development to a high order planning assessment.
- It is understood that this provision is proposed (in part) to enable passive surveillance, however in many instances a 50% road boundary is unrealistic with other design considerations available for Crime Prevention Through Environmental Design principles.

Point Number

662.12

Summary of Decision Requested:

Retain Rule 16.4.16 Subdivision of land containing an Environmental Protection Area, except for the amendments sought below
AND

Amend Rule 16.4.16 C1 (a) Subdivision of land containing an Environmental Protection Area as follows:

(a) Subdivision of land containing an Environmental Protection Area must comply with all of the following as conditions of consent:

Decision Reasons:

- Supports the rule as development within close proximity to delineated EPAs needs appropriate recognition to facilitate natural process and mitigate any potential adverse effects of development on such areas.
- Considers that, from a developer's perspective, a planting and management plan may be prepared and submitted to Council as a condition of consent.
- Once the developer has the confidence of consent being issues for any particular project, detailed design plans can include the provision of landscape plans and planting specifications.

Point Number

662.13

Summary of Decision Requested:

Retain Rule 22.2.3.1 P3 Earthworks - General, except for the amendments sought below
AND

Amend Rule 22.2.3.1 P3 (a) Earthworks - General as follows:

(a) Earthworks for the purpose of creating a building platform and accessway for residential purposes within a site, using imported fill material must meet the following condition:

Decision Reasons:

- Supports the permitted activity rule for earthworks in part.
- Seeks that the permitted activity rule be amended to include earthworks associated with the construction of accessways to build platforms as this currently gets overlooked by many developers.
- Contends that earthworks for accessways is inherent in subdivision consent and has subsequently already been considered by Council on the basis of effects.
- Earthworks restrictions will still be required to comply with NZS 4431:1989.

Point Number

662.14

Summary of Decision Requested:

Amend Rule 22.3.7.5 P1 Building setback - waterbodies as follows:

(a) Any building must be set back a minimum of:

(i) 32m from the margin of any;

A. Lake over 4ha; and

B. Wetland;

...

(v) 10m from a managed wetland

Decision Reasons:

- Opposes the use of the generic term "wetland" when requiring setbacks.
- Such all-encompassing terminology is inappropriate for use within the Proposed District Plan as it will have a significant impact on land development that may not carry any reasonable environmental benefit.
- Seeks that setbacks for man-made stormwater infrastructure and/or modified waterbodies be identified under all applicable waterbody setback rules as 10m.
- Notwithstanding the above, as a "lake" can constitute a large array of waterbodies, a starting point of 4ha should be used in the Proposed District Plan before the setback applies.

Point Number 662.15

Summary of Decision Requested: Delete Rule 22.4.1.1 PR1 Prohibited subdivision

AND

Add a cascading objective, policy and rule set whereby subdivision of Rural and Country Living Zone within the Urban Expansion Area is a Non-Complying Activity and will be subject to an approved Concept Plan of development.

Decision Reasons:

- Recognises that land within the Urban Expansion area is being preserved so as to enable future urban growth that is aligned with strategic agreements between Hamilton City Council and Waikato District Council; however prohibiting the future use of the area is too heavy handed.
- Urban expansion boundary across the country are subject to a higher level of land use management, whereby a well-considered and strategic concept land development plan can precede subdivision scheme plans.
- Market conditions and the rights of landowners should not be unreasonably withheld through limited district plan provisions. Rather a collaborative approach between all parties should be supported whilst aligning with their primary objectives in serving the local communities in a fair and reasonable manner.

Point Number 662.16

Summary of Decision Requested: Amend Rule 22.4.1.1 PR2 Prohibited subdivision from a Prohibited activity to a Non-Complying activity.

Decision Reasons:

- Acknowledges that subdivision of the district's rural resource needs to be carefully and responsibly managed by Council, however, such management is poorly provided for in the Proposed District Plan.
- Fundamentally opposed to the use of prohibition as a land management tool.
- A non-complying rule is more appropriate.

Point Number 662.17

Summary of Decision Requested: Amend Rule 22.4.1.1 PR3(a) Prohibited subdivision from a Prohibited activity to a Non-Complying activity.

Decision Reasons:

- Acknowledges that subdivision of the district's rural resource needs to be carefully and responsibly managed by Council, however, such management is poorly provided for in the Proposed District Plan.
- Fundamentally opposed to the use of prohibition as a land management tool.
- A non-complying activity is more appropriate.

Point Number 662.18

Summary of Decision Requested: Amend Rule 22.4.1.2 RD1(a)(iv) General subdivision as follows:

(iv) The additional lot must have a proposed area of between ~~8~~3,000m² and 1.6ha;

Decision Reasons:

- Seeks to lessen the minimum rural residential lot size in the Rural Zone from 8,000m² to 3,000m².
- Landowners have concerns regarding the Rural Zone subdivision design standards and how this affects large farming succession planning.
- Enabling greater flexibility in the area quantum for rural subdivision, retiring farmers can more effectively retain their rural lifestyle.

Point Number 662.19

Summary of Decision Requested: Retain Rule 22.4.1.4 RD1 Boundary relocation to the extent that there is no longer the requirement for boundaries subject to this rule to be under the same ownership, except for the amendments sought below

AND

Amend Rule 22.4.1.4 RD1(a)(iv) Boundary relocation as follows:

(iv) Create one lot of at least ~~8~~3,000m² in area.

Decision Reasons:

- Amend this rule so that it aligns with the amendments sought within Rule 22.4.1.2 RD1.
- The amendment sought will enable greater flexibility for rural subdivision and allow retiring farmers to retain their rural lifestyle without the more onerous maintenance requirements.

Point Number 662.20

Summary of Decision Requested: Retain Rule 22.4.1.5 RD1 Rural Hamlet Subdivision to the extent that it will allow for appropriate rural communities to be comprehensively designed under the boundary relocation provisions, except for the amendments sought below

AND

Amend Rule 22.4.1.5 RD1(a)(iii) Rural Hamlet Subdivision as follows:

(iii) Each proposed lot has a minimum area of ~~8~~3,000m².

Decision Reasons:

- Supports the rule in part to the extent that it will allow for appropriate rural communities to be comprehensively designed under the boundary relocation provisions.
- The amendments will enable greater flexibility in the area quantum for Hamlet boundary relocation subdivision and allowing more effectively for retiring farmers to retain their rural lifestyle without the onerous maintenance requirements.

Point Number 662.21

Summary of Decision Requested: Retain Rule 22.4.1.6 RD1 Conservation lot subdivision, except for the amendments sought below

AND

Amend Rule 22.4.1.6 RD1(a)(i) Conservation lot subdivision as follows:

(j) The lot must contain a contiguous area of existing Significant Natural Area, or environmental conditions favourable to extending a Significant Natural Area, either as shown on the planning maps or as...

Decision Reasons:

- Supports the rule in part on the principle that a contiguous area of land containing ecological significance should not be fragmented, nor should spatially separate areas of land containing ecological significance be considered as one area due to non-connectivity.
- Considers that land immediately abutting ecologically Significant Natural Area due to landform/topography or other shared environmental attribute should also be used to calculate conservation allotment provisions.
- The land abutting Significant Natural Areas are often sharing habitat criteria and hence should be recognised as holding inherent ecological values.
- Need to recognise the landowner's ability to rehabilitate peripheral areas of Significant Natural Areas.
- Such an amendment will have a measurable, positive environmental effect that can be managed in perpetuity.

Point Number 662.22

Summary of Decision Requested: Delete Rule 22.4.4 RD1(a) Subdivision - Road frontage.

Decision Reasons:

- A 60m width may not always be appropriate in the event that the actual or potential adverse effects on traffic safety are less than minor.
- Contends that a more meaningful road frontage dimension be provided through an assessment of the existing and proposed traffic effect of any development, as well as the criteria contained within the district plan detailing the required sight visibility and operational speed environment.
- Considers that the frontage rule is superfluous, as engineering criteria alone should be used to regulate road frontage widths.

Point Number 662.23

Summary of Decision Requested: Retain Rule 22.4.9 RD1 Subdivision - building platform, except for the amendments sought below

AND

Amend Rule 22.4.9 RD1(a)(i) Subdivision - building platform as follows:

(j) Has an area of ~~4,000m²~~ 500m² exclusive of boundary setbacks;

Decision Reasons:

- Supports the Proposed Plan providing clear design guidance on the subdivision process- such as the location and dimension for building platforms.
- The reason for the sought amendment is so that overly restrict design criteria are removed from the Proposed District Plan and that more adaptive solutions can be considered by the developer without the need for expanded assessment matters.

Point Number 662.24

Summary of Decision Requested: Retain Rule 23.2.3.1 P1 Earthworks - General, except for the amendments sought below

AND

Amend Rule 23.2.3.1 P1(a)(iii) Earthworks - General as follows:

(iii) A building platform and accessway for a residential activity including an accessory building.

Decision Reasons:

- Support the permitted activity rule for earthworks in part.
- Seeks that the permitted activity rule be amended to include earthworks associated with the construction of accessways.
- This currently gets overlooked by many developers and often triggers an unexpected land use consent.
- Earthworks for accessways is inherent in subdivision consent and subsequently already been considered by Council on the basis of effects.
- Earthworks restrictions will still comply in regard to NZS 4431:1989

Point Number 662.25

Summary of Decision Requested: Amend Rule 23.2.3.1 P2 Earthworks - General as follows:

(a) Earthworks within a site for purposes other those contained in P1 (excluding the importation of fill material) must meet all of the following conditions:

(i) Do not exceed a volume of more than ~~250~~500m³ and an area of more than 1000m² within a site over any single 12 month period;

...

(iii) Earthworks are set back ~~4.0~~0.5m from any boundary;

...

Decision Reasons:

- Notes that a 250m³ limit is the same as for the Residential Zone. Given the different activities undertaken for rural residential purposes, an increase in the limit to 500m³ is appropriate.
- It is noted that a soil disturbing quantum would be better to align with the provisions of the Waikato Regional Plan.
- Seeks a 0.5m setback within the rural environment.

Point Number 662.26

Summary of Decision Requested: Amend Rule 23.3.7.5 P1 Building setback - Waterbodies as follows:

(a) Any building must be set back a minimum of:

(i) 23m from the margin of any:

A. Lake over 4ha; and

B. Wetland;

...

(v) 10m from a managed wetland.

Decision Reasons:

- Opposes the use of the generic term "wetland" as this all-encompassing terminology is inappropriate for use within the Proposed District Plan as it will a significant impact on land development in Country Living Zone that may not carry any reasonable environmental benefit.
- The setbacks for man-made stormwater infrastructure and/or modified waterbodies be identified under all applicable waterbody setback rules be 10m.

- As a 'lake' can constitute a large array of waterbodies., the submitter contends that a starting point of 4ha be used in the Proposed District Plan before the setback applies.

Point Number 662.27

Summary of Decision Requested: **Delete** Rule 23.4.1 PR1 Prohibited Subdivision
AND

Add a cascading objective, policy and rule set whereby subdivision of Country Living Zone land within the Urban Expansion Area is a Non-Complying Activity and will be subject to an approved Concept Plan of development.

Decision Reasons:

- Recognises that land within the Urban Expansion area is being preserved so as to enable future urban growth that is aligned with strategic agreements between Hamilton City Council and Waikato District Council; however prohibiting the future use of the area is too heavy handed.
- Urban expansion boundary across the country are subject to a higher level of land use management, whereby a well-considered and strategic concept land development plan can precede subdivision scheme plans.
- Market conditions and the rights of landowners should not be unreasonably withheld through limited district plan provisions. Rather a collaborative approach between all parties should be supported whilst aligning with their primary objectives in serving the local communities in a fair and reasonable manner.

Point Number 662.28

Summary of Decision Requested: **Amend** Rule 23.4.2 RD1(a)(i) General Subdivision as follows:

(i) All proposed lots must have a net site area of at least ~~5~~3,000m².

Decision Reasons:

- Contends that a rural residential allotment should provide flexibility for the different kinds of activities in the Country Living Zone.
- Allotments down to an area of 3,000m² should be provided for to allow such flexibility.

Point Number 662.29

Summary of Decision Requested: **Delete** Rule 23.4.3 D1(a)(vi) Subdivision within identified areas relating to Coal Mining Area.

Decision Reasons:

- Seeks that the discretionary activity trigger "Coal Mining Area" be removed given that such an overlay applies to a large area of land, with the degree of influence being inconsistent across large land holdings across the district.
- Consideration for the Coal Mining Policy Area to be assessed by Council as a matter of limited discretion would be more appropriate.

Point Number 662.30

Summary of Decision Requested: **Amend** Rule 23.4.8 RD1(a)(i) Subdivision - Building platform as follows:

(i) has an area of ~~1,000m²~~ 500m² exclusive of boundary setbacks;

Decision Reasons:

- Do not support requiring a 1,000m² building envelope as this presents an excessively conservative development footprint.
- Generally supportive of the Proposed District Plan providing design guidance on the subdivision process.
- It is an overly restrictive design criteria.
- More adaptive solutions can be considered by the developer without the need for an expanded assessment matter through Council's unrestricted discretion.

Point Number 662.31

Summary of Decision Requested: **Amend** Rule 24.3.6.3 PI Building setback - Waterbodies as follows:

(a) A building must be set back a minimum of 30 from:

(i) the margin of any:

A. Lake over 4ha;

B. Wetland; and

C. River bank, other than the Waikato River and Waipa River.

D. 10m from a managed wetland

Decision Reasons:

- Opposes the use of the generic term "wetland" as this all-encompassing terminology is inappropriate for use within the Proposed District Plan as it will have a significant impact on land development in Country Living Zone that may not carry any reasonable environmental benefit.
- The setbacks for man-made stormwater infrastructure and/or modified waterbodies be identified under all applicable waterbody setback rules is 10m.
- As a 'lake' can constitute a large array of waterbodies., the submitter contends that a starting point of 4ha be used in the Proposed District Plan before the setback applies.

Point Number 662.32

Summary of Decision Requested: **Retain** the definition of "Record of Title" in Chapter 13 Definitions.

Decision Reasons:

- Supports the definition given that it reflects the most recent terminology within the LT Survey Act 2017.

Point Number 662.33

Summary of Decision Requested: **Retain** the definition of "Site" in Chapter 13 Definitions, except for the amendments sought below;

AND

Add new clause (5) to the definition of "Site" in Chapter 13 Definitions, as follows:

Site

Means:

...

5. Subdivided land that requires no further consent from Council.

Decision Reasons:

- Generally supports the proposed definition for a "site."
- Such an amendment is applied in the Operative Hamilton City District Plan where land use consent is required for a recently subdivided allotment, and where sections of policy notations do not affect the newly created allotment.
- Such provision will enable land use consents to be assessed based on their merits, as opposed to irrelevant planning notations.

Point Number

662.34

Summary of Decision Requested:

Retain Objective 4.1.1 Strategic, except for the amendments sought below

AND

Amend Objective 4.1.1 (b) Strategic as follows:

(b) ~~Amend~~ Additional 13,300 – 17,500 dwellings are created during the period 2018 - 2045 to reflect market demands.

Decision Reasons:

- Supports in part the objective as it sets a worthy goal regarding future urban residential development across the district.
- The objective stresses a dwelling quantum which will act as a rigid formula being applied across the district over a time frame that does not correspond to the life of the Proposed District Plan.
- Setting a specifically quantified target for residential growth is problematic when unknown variables are considered.
- Clause (b) should be amended or removed to enable adaptability.

Point Number

662.35

Summary of Decision Requested:

Amend Policy 4.1.3 Location of Development as follows:

(a) *Subdivision and development of a residential, commercial and industrial nature is to occur within and adjacent to towns and villages where infrastructure and services can be efficiently and economically provided.*

(b) *Locate urban growth areas ~~only~~ where they are consistent with the relevant Strategic Growth documents for the district ~~Future Proof Strategy Planning for Growth 2017~~.*

Decision Reasons:

- The submitter agrees with this policy to the extent that residential urban growth is to occur in a logical pattern that is reflective of well-considered growth strategy.
- The proposed wording of the policy is too restrictive and need not state that only urban growth be enabled within the 2017 Future Proof Strategy.
- Limiting growth to the 2017 iteration of the strategy is limiting, and will result in future drafting fixes over the life of the District Plan.

Point Number

662.36

Summary of Decision Requested:

Amend Objective 4.1.7(a) Character of towns as follows:

(a) *Development in the Residential, Village, Industrial and Business zones is attractive, connected and reflects the ~~existing~~ character of towns.*

Decision Reasons:

- The objective is worded in such a way that potentially is confusing for plan users.
- The objective encourages development, however the statement requiring that it "reflects the existing character" is not analogous with development and growth.
- Growth is not always possible to undertake without altering existing character.

Point Number

662.37

Summary of Decision Requested:

Retain Policy 4.1.14(a) Taupiri, except for the amendments sought below

AND

Amend Policy 4.1.14(a) (ii) Taupiri as follows:

(ii) *Future roads, parks, pedestrian and cycle networks are developed in general accordance with the Taupiri section of the Ngaruawahia, Hopuhopu, Taupiri, Horotiu, Te Kowhai & Glen Massey Structure Plan, as well as in consideration of site specific natural and physical features;*

Decision Reasons:

- The objective is appropriate regarding the effect of the Waikato Expressway on Taupiri's existing character
- The submitter disagrees with the proposed wording of clause (ii) as a demonstrable issue arises regarding overt design limitations being imposed on development from high-level strategic plan mapping.
- At best, structure planning is used for conceptual consideration of how and where growth areas are to function in the context of the wider area.
- The policy gives too much weight to the Structure Plan, which has not been prepared with consideration of natural and physical features of the Taupiri Area.
- The Taupiri land area contained within the Structure Plan is subject to significant gully networks, Waikato River Flood Protection Area etc.
- An over-adherence to the high-level design outcomes as envisaged in the Structure Plan map will not represent sustainable management of natural and physical resources.

Point Number

662.38

Summary of Decision Requested:

Retain Policy 4.1.15 Ngaruawahia, except for the amendments sought below

and

Amend Policy 4.1.15(a)(iv) Ngaruawahia as follows:

(iv) *Future neighbourhood centres, roads, parks, pedestrian and cycle networks are developed in general accordance with the Ngaruawahia section of the Ngaruawahia, Hopuhopu, Taupiri, Horotiu, Te Kowhai & Glen Massey Structure Plan, as well as in consideration of site specific natural and physical features; and*

Decision Reasons:

- As provided for in the applicable planning maps, residential growth to the north of the township, in the vicinity of Starr Road, represents a sensible approach given connectivity to transportation corridors, transport integration, and developable land integration with existing residential land use to the south.
- The land surrounding Starr Road is proposed to be rezoned from Rural Zone to Residential Zone contains an area that has been used in the past for intensive farming activities. The intensive land use has not yet been discontinued and consequently will not be constrained under sub-clause (ii) of the policy.
- The flat developable nature of the land in and surrounding Starr Road will integrate with residential land use to the south west, and therefore represents an efficient zone change reflective of urban development demand for the township.
- The submitter disagrees with the proposed wording of clause (iv) as a demonstrable issue arises regarding overt design limitations being imposed on development from high level strategic plan mapping.
- An over-adherence to the high-level design outcomes as envisaged in the structure plan map will not represent sustainable management of natural and physical resources.

Point Number 662.39

Summary of Decision Requested: Retain Policy 4.1.17 Te Kowhai as notified.

Decision Reasons:

- Supports the proposed development direction in the Proposed Waikato District Plan for Te Kowhai
- Development surrounding and ancillary to the Te Kowhai air field is appropriate, and the densities proposed align with future growth in the village.

Point Number 662.40

Summary of Decision Requested: Retain Objective 4.2.1 Residential Character as notified

Decision Reasons:

Supports this objective as an appropriate unambiguous high-level statement in the Proposed Waikato District Plan regarding development within residential areas and provides a suitable policy context.

Point Number 662.41

Summary of Decision Requested: Retain Policy 4.2.2 Character.

Decision Reasons:

- Notes that this policy does not align with several other policies proposed by Council as they relate to structure plans e.g. Policy 4.1.15 and 4.1.14.
- Acknowledges that urban growth needs to be considered in the context of a strategic plan, however an appropriate level of flexibility is needed in structure plans to allow for on-site variables that may not be provided for in the structure plan.

Point Number 662.42

Summary of Decision Requested: Retain Policy 4.2.5 Setback: Side boundaries, except for the amendments sought below

AND

Amend Policy 4.2.5(b) Setback: Side boundaries as follows:

(b) Reduced side boundary setbacks occur ~~only generally~~, where it:

(i)...

(ii) Retains trees on the site; or

(iii) Written approval for the encroachment has been provided by the abutting landowner.

Decision Reasons:

- Support in part as the policy provides a degree of flexibility in regard to side yard performance standards in the Residential Zone.
- A further clause should be included to recognise the written approvals from affected parties, such as neighbouring landowners.

Point Number 662.43

Summary of Decision Requested: Retain Policy 4.2.12 Outdoor living court - Multi-unit development, as notified.

Decision Reasons:

- It provides for flexibility in development through urban design.

Point Number 662.44

Summary of Decision Requested: Retain Objective 4.2.14 Earthworks, as notified.

Decision Reasons:

- Supports the objective in that subdivision development and assessment by Council is undertaken concurrently under the consents process, and that this process is inclusive of earthworks.

Point Number 662.45

Summary of Decision Requested: Retain Objective 4.2.16 Housing options, except for the amendments sought below

AND

Amend Objective 4.2.16(a) Housing options as follows:

(a) A wide range of housing options occurs in the Residential Zones of Huntly, Ngaruawahia, Pokeno, Raglan, Te Kauwhata, Taupiri and Tuakau...

Decision Reasons:

- Supports the objective in part as it is important for high-level recognition in the district plan for housing diversity.
- Taupiri should be explicitly included in the objective.
- The inclusion of Taupiri is due to the increased residential density and growth in the village post the Waikato Expressway.

Point Number	662.46
Summary of Decision Requested:	Retain Objective 4.7.1 Subdivision and Land Use Integration, as notified.
Decision Reasons:	<ul style="list-style-type: none"> The objective provides a suitable context in which urban development policies are to be derived.
Point Number	662.47
Summary of Decision Requested:	Amend Policy 4.7.2(a)(vii) Subdivision location and design as follows: <i>(vii) Promote consistent grid layout <u>where it suits character and topographical constraints</u>.</i>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the policy in part as a grid layout is the most efficient subdivision design, hence the current wording of the policy is considered redundant. Notes that that clause (viii) runs contrary to Policy 4.7.3(vii).
Point Number	662.48
Summary of Decision Requested:	Amend Policy 4.7.5 (a) Servicing Requirements as follows: <i>(a) Require urban subdivision and development to be serviced to a level that will provide for the anticipated activities approved <u>indicated</u> in a structure plan, or otherwise anticipated within the zone...</i>
Decision Reasons:	<ul style="list-style-type: none"> Support limited due to an over-emphasis being placed on high-level structure plan detail Structure plans are high level documents and should not be used to prematurely constrain future land use Not enough ground truthing has underpinned the district's structure plans, particularly around the identification of on-site natural and physical constraints.
Point Number	662.49
Summary of Decision Requested:	Amend structure plans to avoid placing roads that will span different boundaries.
Decision Reasons:	<ul style="list-style-type: none"> No reasons provided.
Point Number	662.50
Summary of Decision Requested:	Amend Rule 17.3.4.2 P1(a) Building setback - Waterbodies as follows: <i>(a) Any building must be setback a minimum of:</i> <i>(i) 23m from the margin of any:</i> <i>A. Lake <u>over 4ha</u>; and</i> <i>B. Wetland;</i> <i>(v) <u>10m from a managed wetland</u></i> AND Any consequential amendments.
Decision Reasons:	<ul style="list-style-type: none"> A wetland as defined under the RMA is broad reaching and covers many features. Having a nominal 23m setback applied to such a wide variation of water features is inappropriate and introduces significant inefficiencies which is contrary to Part 2 of the RMA and the sustainable management of natural and physical resources. A lake can constitute a large array of waterbodies and therefore a starting point of 4ha should be used before the setback applies.
Point Number	662.51
Summary of Decision Requested:	Amend Rule 18.3.7 P1(a) Building setback - Waterbodies as follows: <i>(a) Any building must be setback a minimum of:</i> <i>(i) 23m from the margin of any:</i> <i>A. lake <u>over 4ha</u>; and</i> <i>B. wetland;</i> ... <i>(v) <u>10m from a managed wetland</u></i> AND Any consequential amendments.
Decision Reasons:	<ul style="list-style-type: none"> A wetland as defined under the RMA is broad reaching and covers many features. Having a nominal 23m setback applied to such a wide variation of water features is inappropriate and introduces significant inefficiencies which is contrary to Part 2 of the RMA and the sustainable management of natural and physical resources. A lake can constitute a large array of waterbodies and therefore a starting point of 4ha should be used before the setback applies.
Point Number	662.52
Summary of Decision Requested:	Amend Rule 20.3.4.2 P1(a) Building setback - Waterbodies as follows:

(a) Any building must be setback a minimum of: 30 from:
 (i) the margin of any:
 A. Lake over 4ha; and
 B. Wetland; and
 C. River bank, other than the Waikato River and Waipa River
 ...
 AND

Amend Rule 20.3.4.2 Building setback to require the following setback for managed wetlands to match the amendments sought for other zones:
10m from a managed wetland
 AND
Any consequential amendments.

Decision Reasons:

- A wetland as defined under the RMA is broad reaching and covers many features.
- Having a nominal setback applied to such a wide variation of water features is inappropriate and introduces significant inefficiencies which is contrary to Part 2 of the RMA and the sustainable management of natural and physical resources.
- A lake can constitute a large array of waterbodies and therefore a starting point of 4ha should be used before the setback applies.

Point Number 662.53

Summary of Decision Requested: **Amend Rule 21.3.4.2 PI (a) Building setback - Waterbodies as follows:**

(a) Any building must be setback a minimum of: 30 from:
 the margin of any:
 A. Lake over 4ha; and
 B. Wetland; and
 C. River bank, other than the Waikato River and Waipa River.
 AND

Amend Rule 21.3.4.2 Building setback- water bodies to require the following setback for managed wetlands to match the amendment sought for other zones:
10m from a managed wetland
 AND
 Any consequential amendments.

Decision Reasons:

- A wetland as defined under the RMA is broad reaching and covers many features.
- Having a nominal setback applied to such a wide variation of water features is inappropriate and introduces significant inefficiencies which is contrary to Part 2 of the RMA and the sustainable management of natural and physical resources.
- A lake can constitute a large array of waterbodies and therefore a starting point of 4ha should be used before the setback applies.

Point Number 662.54

Summary of Decision Requested: **Amend Rule 25.3.4.2 PI (a) Building setback - Waterbodies as follows:**

(a) Any building must be setback a minimum of: 32 from:
 (i) the margin of any: lake over 4ha with a bed of 8ha or more
 AND

Amend Rule 25.3.5.2 Building setback- Waterbodies to require the following setback for managed wetland to match the amendments sought for other zones:
(v) 10m from a managed wetland
 AND
 Any consequential amendments.

Decision Reasons:

- A wetland as defined under the RMA is broad reaching and covers many features.
- Having a nominal setback applied to such a wide variation of water features is inappropriate and introduces significant inefficiencies which is contrary to Part 2 of the RMA and the sustainable management of natural and physical resources.
- A lake can constitute a large array of waterbodies and therefore a starting point of 4ha should be used before the setback applies.

Submitter Number: 663 **Submitter:** Graham Halsey

Point Number 663.1

Summary of Decision Requested: **Amend** the proposed cycle way to be extended from Buckland Road, Tuakau, to access the Waikato River via the river stop banks (see maps attached to the submission for further details).

Decision Reasons:

- Allows for a unique opportunity to gain land for River access, leisure activities and possibly a park.
- The Council-owned stopbanks are wide enough to accommodate large farm vehicles and could easily be an extension of the proposed walkway / cycle way.
- The only current access to the river is via River Road which is hazardous for pedestrians and cyclists.
- Would allow a future connection via walkway / cycle way to the River Road access.
- The river is stunning at this location.

Point Number 663.2

Summary of Decision Requested: **Purchase** the land contained within the Waikato River stopbanks near Buckland Road, Tuakau, by Council for park land (see the maps attached to the submission for further detail).

Decision Reasons:

- Access to this land will be difficult if the land adjoining Buckland Road becomes residential.
- The current rural use is marginally sustainable crops or grazing.
- Presents an amazing opportunity for current residents, future residents and tourists.

Point Number

663.3

Summary of Decision Requested:

Amend the Proposed District Plan to avoid any more waste facilities located on the Waikato River on the land between Buckland Road, Tuakau and the Waikato River that is not sustainable nor environmentally practical for waste facilities or use (see map attached to the submission for further details).

Decision Reasons:

- The reclaimed alluvial river plains were reclaimed for soil conservation (for rural use) and erosion protection.

Point Number

663.4

Summary of Decision Requested:

No specific decision sought, but submission opposes the rezoning of land in Tuakau at River Road as identified in the map included in the submission from Business and Rural to Industrial zoning.

Decision Reasons:

- There is a larger industrial area already proposed.
- Encourage all industry to relocate within on large Industrial Zone.
- Residents of Tuakau wish to have a physical as well as a cultural connection with the Waikato River.
- River Road only access to the Waikato River.
- Industry should be discouraged from River Road to allow a safe walkway and/or cycleway to enable safe family River access without any detrimental effect from Industry.
- Industry emitting unlawful odour is a long term problem along River Road.
- Proposed zoning outside the main industrial zone will detrimentally affect Tuakau's future.
- This zoning may attract other industry unable to control effects outside their boundaries to be located within these areas.

Submitter Number:

664

Submitter:

Mark Morgan

Organisation:

Waikato Regional Airport Limited

Point Number

664.1

Summary of Decision Requested:

No specific decision sought, but submission opposes Chapter 9.2 Te Kowhai Airpark.

Decision Reasons:

- Objects to the proposal due to aeronautical safety considerations.
- Supports aspects of the proposal that facilitate recreational aviation in the region.
- Activities that have the potential to intensify aeronautical activity to a commercial scale in close proximity to Hamilton Airport and their airspace represent a greatly increased threat to users of the airport.
- Have not been provided with the results of any aeronautical safety study.
- Modifying the obstacle limitation surface at Te Kowhai to permit traffic at night or under instrument flight rules compromises safety by encouraging faster, more high performance aircraft to operate in the vicinity of Hamilton Airport.

Point Number

664.2

Summary of Decision Requested:

No specific decision sought, but submission opposes Chapter 27 Te Kowhai Airpark.

Decision Reasons:

- Objects to the proposal due to aeronautical safety considerations.
- Supports aspects of the proposal that facilitate recreational aviation in the region.
- Activities that have the potential to intensify aeronautical activity to a commercial scale in close proximity to Hamilton Airport and our airspace represent a greatly increased threat to users of the airport.
- Have not been provided with the results of any aeronautical safety study.
- Modifying the obstacle limitation surface at Te Kowhai to permit traffic at night or under instrument flight rules compromises safety by encouraging faster, more high performance aircraft to operate in the vicinity of Hamilton Airport.

Submitter Number:

665

Submitter:

Paul Liddle

Point Number

665.1

Summary of Decision Requested:

Retain the Residential Zone as notified on the properties within the vicinity of Starr Road, Ngaruawahia.

Decision Reasons:

- Residential growth to the north of the township in the vicinity of Starr Road represents a sensible approach given connectivity to transportation corridors, transport integration, developable land integration with existing residential land use to the south.
- Intensive farming activities within this area have been discontinued
- The land is flat and will integrate with the surrounding residential sites.
- It is an efficient zone change, reflective of urban development demand for the township.

Submitter Number:

666

Submitter:

William Henwood

Point Number

666.1

Summary of Decision Requested:

Retain Chapter 9.2 Te Kowhai Airpark, as notified.

Decision Reasons:

- Ensures that Te Kowhai Aerodrome remains as a vibrant and useful part of the community.

Point Number 666.2

Summary of Decision Requested: Retain Chapter 27 Te Kowhai Airpark Zone, as notified.

Decision Reasons:

- Ensures that Te Kowhai Aerodrome remains as a vibrant and useful part of the community.

Submitter Number: 667 **Submitter:** Duncan McNaughton

Point Number 667.1

Summary of Decision Requested: Amend the zoning of the property at 203 Buckville Road, Pukekohe, from Rural Zone to Country Living Zone.

Decision Reasons:

- Surrounding area to the north and west within the Auckland Council territory boundary has been zoned Future Urban Zone under the Auckland Unitary Plan.
- This could result in residential housing and therefore a residential environment rather than a large open space rural environment.
- The property does not contain prime soils.
- Given the close proximity to the village of Buckland and Pukekohe, a change in zoning is considered logical.

Submitter Number: 668 **Submitter:** Clem & Alison Reeve

Point Number 668.1

Summary of Decision Requested: Amend the zoning of the property at 243 Pokeno Road, Pokeno, from Rural Zone to Business Zone or similar.

Decision Reasons:

- The property is a large lifestyle block of 22 ha bounded by Pokeno Road and the North Island Main Trunk railway.
- The surrounding properties appear to be in the process of being subdivided for residential sections.
- The area will require other infrastructure such as commercial development similar to "The Base", complemented by a "Park and Ride".
- Another possibility could be an academic campus, which would be well located between Auckland and Hamilton.

Submitter Number: 669 **Submitter:** Bernard Brown

Point Number 669.1

Summary of Decision Requested: No specific decision sought, but submission states that the Proposed District Plan lacks practical measures to assist management of existing excessive pressures of tourist uses on existing infrastructure of the Whaanga Coast.

Decision Reasons:

- No reasons provided.

Point Number 669.2

Summary of Decision Requested: No specific decision sought, but submission objects to the Amenity Landscape overlay added to property number 1013511 (16 Whaanga Road, Whale Bay, Raglan).

Decision Reasons:

- Infringing on individual property rights.

Point Number 669.3

Summary of Decision Requested: No specific decision sought, but submission states that the proposed plan is not user friendly.

Decision Reasons:

- Too many overlay designations.
- The zone name should reflect the use of the property, e.g. Residential.

Point Number 669.4

Summary of Decision Requested: Amend the Rural zoning of the property located at 759 Wainui Road, Raglan (Property Number 1013542) to reflect the use of the property, e.g. Residential.

Decision Reasons:

- Object to the inclusion in the Rural Zone.
- The zone name should reflect the use of the property e.g. Residential.

Point Number 669.5

Summary of Decision Requested: Delete the Outstanding Natural Landscape from the property located at 759 Wainui Road, Raglan (Property Number 1013542).

Decision Reasons:

- Complex overlay designations infringe on individual property rights.
- Request removal.

Point Number 669.6

Summary of Decision Requested: **Delete** the Significant Amenity Landscapes from the property located at 759 Wainui Road, Raglan (Property Number 1013542).

Decision Reasons:

- Complex overlay designations infringe on individual property rights.
- Request removal.

Point Number 669.7

Summary of Decision Requested: **Delete** Significant Natural Area overlay from property located at 759 Wainui Road, Raglan (Property Number 1013542).

Decision Reasons:

- Complex overlay designations infringe on individual property rights.
- Request removal.

Submitter Number: 670

Submitter:

Property owners on Galbraith St, Jacobs Lane and Old Taupiri Road

Point Number 670.1

Summary of Decision Requested: **Amend** the zoning of the following properties from Country Living Zone to Village Zone:

- 82A Old Taupiri Road, Ngaruawahia
- 84 Old Taupiri Road, Ngaruawahia
- 93 Old Taupiri Road, Ngaruawahia
- 101 Old Taupiri Road, Ngaruawahia
- 104 Old Taupiri Road, Ngaruawahia
- 106 Old Taupiri Road, Ngaruawahia
- 109 Old Taupiri Road, Ngaruawahia
- 111 Old Taupiri Road, Ngaruawahia
- 116 A-C Old Taupiri Road, Ngaruawahia
- 127 Old Taupiri Road, Ngaruawahia
- 138 Old Taupiri Road, Ngaruawahia
- 145 Old Taupiri Road, Ngaruawahia
- 146 Old Taupiri Road, Ngaruawahia
- 152 Old Taupiri Road, Ngaruawahia
- 161 Old Taupiri Road, Ngaruawahia
- 176 Old Taupiri Road, Ngaruawahia
- 181 Old Taupiri Road, Ngaruawahia
- 182 Old Taupiri Road, Ngaruawahia
- 192 Old Taupiri Road, Ngaruawahia
- 217B Old Taupiri Road, Ngaruawahia
- 247 Old Taupiri Road, Ngaruawahia
- 271 Old Taupiri Road, Ngaruawahia
- 43A Galbraith Street, Ngaruawahia
- 57 Galbraith Street, Ngaruawahia
- 65 Galbraith Street, Ngaruawahia
- 10 Jacobs Lane, Ngaruawahia
- 15 Jacobs Lane, Ngaruawahia
- 18 Jacobs Lane, Ngaruawahia
- 21 Jacobs Lane, Ngaruawahia
- 24 Jacobs Lane, Ngaruawahia
- 28 Jacobs Lane, Ngaruawahia
- 34 Jacobs Lane, Ngaruawahia
- 37 Jacobs Lane, Ngaruawahia

AND

Amend the zoning of the property at 232 Old Taupiri Road, Ngaruawahia from Rural Zone to Village Zone.

(Refer to map 2 included in the submission)

AND

Amend the zoning of the properties in the immediate locality of the specific properties listed above to Village Zone (see Map 1 included in the submission).

Decision Reasons:

- Ngaruawahia is identified in the Future Proof Growth Strategy as a locality of expedient growth.
- The Waikato Regional Policy Statement - Built Environment enables growth in Ngaruawahia for which the Proposed Waikato District Plan is to give effect to.
- The Ngaruawahia Structure Plan 2017 encourages sustainable growth.
- Plan Change 17 - Ngaruawahia and Surrounds was the RMA response to the Ngaruawahia Structure Plan in acknowledgement of the growth and supply of land in Ngaruawahia.
- The Waikato District Council Long Term Plan 2018 - 2028 recognises the growth and recognises that Ngaruawahia is a locality that will grow.
- The Waikato District Council is promoting master planning as a means to manage growth through Blue Print.
- The Village Zone promoted in this submission is in accordance of these strategic and higher order documents that guide and direct planning in Ngaruawahia.
- The character and the amenity values of the locality, and the scale of development and pressure on infrastructure (and its provision), will not change should the area be re-zoned from Country Living and Rural to Village Zone.
- Submitters wish to enable their ability to provide for their well-being by having a choice to have the right zone regulating their properties and proximity.
- It was not evident in the section 32 reports why the properties (locality) were not considered by Village Zone.
- Protecting resources and safeguarding the life-supporting capacity of the environment is supported as a principle.
- For the rural block located at 232 Old Taupiri Road, it is considered there should be an exception due to proximity to infrastructure, services and facilities.
- Submission references the Introductory Section 32 report.
- There is evidence that as a town north of Hamilton City, there is and projected in the immediate future, growth pressure.
- There is no Village Zone in Ngaruawahia.
- It is promoted that there should be a mixture of both Residential Zone and Village Zone. This would provide a balance of "most efficient use of infrastructure, service and facilities, reduce the demand for rural land, and reducing the need for travel.
- The Village Zone will make sure that growth is managed in a way that results in efficient and high amenity urban areas and avoids compromising the characteristics. The blanket use of Residential Zone in Ngaruawahia, rather than a mixture of both Residential Zone and Village Zone, has the potential to compromise character and amenity of the locality.
- The submission refers to the Section 32 Report for the Village Zone.
- The identified properties along Old Taupiri Road, Galbraith Road and Jacobs Lane are in close proximity to the residential and urban environments of Ngaruawahia.
- It is promoted that approving Village Zone provisions over the properties identified within the red area illustrated in Map 1 (refer to submission) will be consistent with the intent and purpose for Village Zone environments.

Submitter Number:	671	Submitter:	Jeremy Buxton
Point Number	671.1		
Summary of Decision Requested:	Amend all land within the greater Horotiu area currently zoned Country/Residential to be rezoned to Residential zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Better use of available land. • Good for existing schools. • Great for first home buyers. • Good for tourism. • A landmark entrance to Hamilton. 		
Point Number	671.2		
Summary of Decision Requested:	Retain all land in the greater Horotiu area currently zoned New Residential to be Residential Zone.		
Decision Reasons:	<ul style="list-style-type: none"> • Better use of available land. • Good for existing schools. • Great for first home buyers. • Good for tourism. • A landmark entrance to Hamilton. 		
Point Number	671.3		
Summary of Decision Requested:	Provide housing and infrastructure to the growing community, including freeing up land for housing development.		
Decision Reasons:	<ul style="list-style-type: none"> • We are living in an area of massive growth and expansion. • We must free up good land for further housing developments. • This would be great for all concerned, including: <ul style="list-style-type: none"> ◦ first home buyers, ◦ schools and early education of children, ◦ development of community ◦ mum and dad investors ◦ recreational activities for all to enjoy ◦ tourism boost. 		

Submitter Number:	672	Submitter:	Ian and Darianne Voyle
Point Number	672.1		
Summary of Decision Requested:	Amend the zoning of the property located at 436A Tauwhare Road, Matangi to Residential Zone; OR Village Zone OR Country Living Zone. AND Any consequential rule amendments.		
Decision Reasons:	<ul style="list-style-type: none"> • Refer to submission for site details and RMA context. • Landowner has experienced difficulties maintaining the orchard as year after year it brings no profit and is a burden to maintain. • Given the relatively small area of the site, a farming operation or grazing is not considered viable. • Given the central village location of the site it is considered an inefficient use of urban land. • The site is located in the centre of the Matangi Village and abuts residential areas along the north-western and eastern boundaries • The site has substantial frontage to Tauwhare Road (90m) and Taplin Road (160m) which will provide for good connection and integration with the existing transportation network. • The site will also have good pedestrian connection to the village centre as a new footpath has recently been constructed along the road frontages as part of the rural residential development to the south. • Site relies on its own bore. • A water main runs along the boundary of the site on both Tauwhare and Taplin Roads providing trickle feed supply to the surrounding residential sites. • Both the Long Term Plan and Matangi Community Plan have identified that future growth of the village is anticipated and expected to be one of the highest rates of growth in villages and rural communities, reaching 39% change by 2045. • If the subject site is to be re-zoned Residential, the allowance in wastewater capacity can be made when such system is designed for the township. • The site is included within the Waikato District Council Urban Limits with Proposed District Plan Zoning (refer to map attached to submission) • The site is consistent with the direction of Future Proof for urban development. • Also consistent with the objectives and policies of the proposed zoning. • It is recognised that should the site be re-zoned Residential, the provision of the three waters infrastructure (reticulated water supply, reticulated wastewater disposal and stormwater (on site disposal via soakage/detention/reuse) will be required. • The site has frontage to two roads with both of them straight and good visibility in the locality of the subject site. • Both frontages are of sufficient width to accommodate a local public road to be connected to Tauwhare or Taplin Roads. • Should the site be re-zoned as residential, a comprehensive integrated transportation assessment is anticipated to be a requirement of any future subdivision. • Infrastructure provision would be a predetermine for any residential development. • In the alternative, Village zone re-zoning is sought where reticulated services are not required. 		

Submitter Number:	673	Submitter:	Maree Williams
Point Number	673.1		

Summary of Decision Requested: Amend the zoning of the property at 353 Scotsman Valley Road, Morrinsville from Rural Zone to split zoning (Country Living and Rural Zone), as shown in the Operative District Plan maps.

Decision Reasons:

- Gives the submitter the opportunity for subdivision.

Submitter Number: 674 **Submitter:** Bruce Stirling

Point Number 674.1

Summary of Decision Requested: Retain the Residential zoning as notified, with specific reference to Ngaruawahia (see maps attached to the submission).

Decision Reasons:

- Residential zoning to the north of Ngaruawahia township and in the vicinity of Starr Road is a sensible approach given connectivity to transport corridors, transport integration and integration with existing residential activities to the south.
- The land surrounding Starr Road was previously used for intensive farming, but this is discontinued.
- The flat developable nature of the land in and around Starr Road will integrate with residential land uses to the south west, and therefore represents an efficient zone change reflective of urban development demand for the township.

Submitter Number: 676 **Submitter:** T&G Global Limited

Point Number 676.1

Summary of Decision Requested: Retain Objective 5.1.1 – The Rural Environment;
AND

Amend the Proposed District Plan to provide a definition for "productive rural activities" which should include both production of raw products and also the processing of such products and ancillary activities as are acceptable within the Rural Zone;

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- Given the significance of the objective for the application of policies and rules within the Rural Zone, a definition of productive rural activities should be provided.

Point Number 676.2

Summary of Decision Requested: Retain Policy 5.3.2 – Productive Rural Activities.

Decision Reasons:

- Productive rural activities should be specifically provided for within rural areas to ensure the achievement of the objectives specified for that zone, and the efficient use of resources.
- The submitter is concerned to ensure that reverse sensitivity effects of locating incompatible land uses within the Rural Zone are addressed within the provisions of the District Plan on the basis that such activities detract from the stated objectives for that zone.

Point Number 676.3

Summary of Decision Requested: Retain Policy 5.3.4 (b) – Density of dwellings and buildings within the rural environment.

Decision Reasons:

- The submitter supports Policy 5.3.4-Density of dwellings and buildings within the rural environment insofar as that policy recognises at sub-paragraph (b) that additional dwellings are needed to support workers' accommodation for productive rural activities.
- It is important to consider the accommodation of rural workers as part of the support within the Rural Zone for productive rural activities
- This policy should inform the rules within the Proposed Plan for minor dwellings within the Rural Zone.

Point Number 676.4

Summary of Decision Requested: Retain Policy 5.3.7(a)(iv) – Reverse Sensitivity Effects
AND

Amend Policy 5.3.7 - Reverse Sensitivity Effects to provide explicit recognition of workers' accommodation within the rural environment.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- The submitter supports Policy 5.3.7 – Reverse Sensitivity Effects in so far as it recognises minor dwellings as a typical and accepted feature of the rural environment.
- The accommodation of seasonal and other horticultural or agricultural workers within the rural environment is an important aspect of the continuing function of productive rural activities.

- The nature of such a use does not give rise to reverse sensitivity effects in the same way as other residential activities because rural workers are aware of and familiar with the effects associated with rural production activities.

Point Number 676.5

Summary of Decision Requested: **Retain** the definition of "Farming" in Chapter 13 Definitions in terms of providing for horticultural activities as well as the processing of produce grown on the land, except for the amendments sought below

AND

Amend the definition of "Farming" in Chapter 13 Definitions to allow for the processing of produce grown on other sites owned or leased by the same owners, and the submitter cites the definition of "On-site Primary Produce Manufacturing" in the Operative Waikato District Plan (Franklin Section) as better reflecting the needs of growers

AND

Amend the definition of "farming" in Chapter 13 Definitions to ensure that horticultural activities undertaken within greenhouses and shade houses, including hydroponics, are included in the definition.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- The definition of "On-site Primary Produce Manufacturing" in the Operative District Plan (Waikato section) provides for the more efficient use of resources by reducing the need for dispersed on-site produce manufacturing which can lead to greater environmental impacts across the district.
- The submitter also seeks clarification within the definition of farming to ensure that horticultural activities undertaken within greenhouses and shade houses are considered as farming activities.
- While the proposed definition refers to horticulture, it is not specific in whether or not that includes activities undertaken within greenhouses or under shade cover or that may not rely on the soil, for example hydroponics.
- The existing definition of farming within the Waikato District Plan – Franklin Section refers to horticulture.
- No corresponding definition of horticulture has been provided within the Proposed Plan. Furthermore, the definition of Intensive Farming provided under the Proposed Plan creates some uncertainty as it specifically includes farming which is not dependent on the fertility of the soils on which the activity is located, including glasshouse production and nurseries.
- If horticulture activities undertaken under glass house or shade covers are to be considered as intensive farming then this has considerable ramifications in terms of the Rural Zone activity rules as such activities would require resource consent as a Restricted Discretionary activity.
- This cannot be the intended outcome of the Proposed Plan and as this would be a departure from the established rules of the operative Plan the submitter would oppose this outcome.

Point Number 676.6

Summary of Decision Requested: **Amend** the definition of "Intensive farming" in Chapter 13 Definitions to specifically exclude horticulture activities under cover of either a greenhouse or shade house.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- This reflects the existing provisions of the Operative Waikato District Plan – Franklin Section.

Point Number 676.7

Summary of Decision Requested: **Amend** Rule 22.3.6 Building coverage to increase the limit, so that the maximum limit of building coverage within a Rural Zone enables proper establishment of horticulture activities and facilities and related accessory buildings, worker accommodation, etc.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- The limit is too restrictive to enable the proper establishment of horticulture activities and related accessory buildings, worker accommodations and the like.
- The proposed limits therefore do not achieve the objectives and policies as discussed above.

Point Number 676.8

Summary of Decision Requested: **Retain** the definition of "Building" in Chapter 13 Definitions which excludes structures that are permeable and less than 4m in height to protect crops for agricultural use, except for the amendments sought below.

AND

Amend the definition of "Building" in Chapter 13 Definitions to exclude buildings that protect crops for horticultural use.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- No reasons provided.

Point Number 676.9

Summary of Decision Requested: **Amend** Rule 22.3.7.2 – Building setback sensitive land use to enable the provision of accommodation for agricultural, horticultural and seasonal workers where that accommodation is within 300m of an intensive farming activity.
AND
Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- Sensitive land use includes residential includes residential activity. Any sensitive land use not complying with this standard is a discretionary activity.
- The nature of worker accommodation does not give rise to reverse sensitivity effects in the same way as other residential activities because rural workers are aware of and familiar with the effects associated with rural production activities.

Point Number 676.10

Summary of Decision Requested: No specific decision sought, but the submission supports the Proposed District Plan insofar as it acknowledges the importance of horticultural activities within the District and seeks to protect such uses from reverse sensitivity effects of incompatible land use.

Decision Reasons:

- No reasons provided.

Point Number 676.11

Summary of Decision Requested: **Amend** the Proposed District Plan to make provision for activities ancillary to horticultural activities such as storage, packing, processing, transport, worker accommodation and administration.

Decision Reasons:

- No reasons provided.

Point Number 676.12

Summary of Decision Requested: **Amend** the Proposed District Plan to provide clearer provision for the accommodation of horticultural and seasonal workers within the rural environment.

Decision Reasons:

- The accommodation of such workers is critical to productive rural activities within the rural environment and therefore to the efficient use of rurally zoned land.

Point Number 676.13

Summary of Decision Requested: **Amend** Rule 22.3.7.2 – Building setback sensitive land use to classify sensitive activities as Restricted Discretionary Activities, and limit Council's discretion in the same way as Rule 22.3.7.4.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- This will limit the Council's discretion in the same way as is provided for noise sensitive activities in Rule 22.3.7.4.
- The nature of worker accommodation does not give rise to reverse sensitivity effects in the same way as other residential activities because rural workers are aware of and familiar with the effects associated with rural production activities.

Point Number 676.14

Summary of Decision Requested: **Retain** Rule 22.3.2 Minor dwelling which classifies a minor dwelling as a permitted activity;

AND

Add a specific provision to the Proposed District Plan to allow workers' accommodation for workers engaged in rural production activities as a permitted activity up to 120m2;

OR

Add a specific provision to the Proposed District Plan to enable workers' accommodation for workers engaged in rural production activities up to 120m2 as a restricted discretionary activity, restricting the matters of discretion to the effects of the built form on the environment;

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- The accommodation of such workers is critical to productive rural activities within the rural environment and therefore to the efficient use of rurally zoned land.
- The Auckland Unitary Plan makes provision specifically for workers' accommodation including a specific definition.
- The Waikato District Plan- Franklin section makes a distinction between subsidiary dwellings providing accommodation for dependent relatives and those for seasonal workers or works engaged in farming or horticultural activities.
- A similar distinction should be made within the Proposed District Plan to enable a minor dwelling and a worker accommodation up to 120m2 for workers engaged in rural production activities as a permitted activity.
- If it is established that any effects associated with such use cannot be managed within the rural environment, the submitter would seek the activity be considered as a restricted discretionary activity with the Council's discretion restricted to those particular effects.

Point Number 676.15

Summary of Decision Requested: **Amend** Chapter 22 Rural Zone to clarify that the activities listed as Permitted Activities within Rule 22.1.2 Permitted Activities include activities

ancillary to those specifically provided for.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- The inference is that the provisions are not clear.

Point Number 676.16

Summary of Decision Requested: **Amend** Rule 22.3.7.2 Building setback - sensitive activities, to clarify that the setback does not apply where the sensitive land use is located on the same land as an intensive farming activity.

AND

Any further or consequential amendments necessary to address the concerns raised in the submission.

Decision Reasons:

- This is to enable and recognise workers' accommodation associated with rural production activities.

Point Number 676.17

Summary of Decision Requested: **Retain** Rule 22.3.1 Number of dwellings within a lot insofar as the use of existing residential dwellings within the rural environment by agricultural, horticultural and seasonal workers is currently enabled as the use of a residential unit.

Decision Reasons:

- The submitter supports this rule on the basis that it provides for the occupation of dwellings by agricultural, horticultural and seasonal workers.

Submitter Number: 677 **Submitter:** Arthur Raymond Wright

Point Number 677.1

Summary of Decision Requested: **Delete** areas of the Significant Natural Area from the property at 314 Murray Road, Pukekawa that do not meet the significant natural area status.

Decision Reasons:

- The mapped Significant Natural Areas on this property do not meet the criteria and no information has been provided to justify their significance.
- Without this information, the goal of protecting Significant Natural Areas will not be met and farm activities will be unnecessarily restricted. Refer to maps and photos attached to submission for further detail.
- Council needs to communicate more with landowners.
- Supports Council in their endeavours to protect Significant Natural Areas and preserve true significant natural areas.
- Gorse infested sidings, scrub lands that will be developed into grazing land, trees planted for firewood have been identified as significant natural areas and other areas which should have been marked as significant natural areas have not been identified.

Submitter Number: 678 **Submitter:** Christine Madsen

On behalf of: Madsen & Holmes

Point Number 678.1

Summary of Decision Requested: **Amend** Rule 21.2.9 Indigenous vegetation clearance inside a Significant Natural Area, to permit the removal of invasive weeds to maintain open water for birds.

Decision Reasons:

- The submitter refers to their own experience and states that habitats need to be maintained for the benefit of game bird shooters. Refer to submission which contains an excerpt from an article written by Tom Caithness (*A Summary of the 1991 Waterfowl Shooting Season*).

Point Number 678.2

Summary of Decision Requested: **Amend** Rule 22.2.3.3 Earthworks - Significant Natural Areas, to permit the removal of accumulated silt to maintain open water for water birds.

Decision Reasons:

- The submitter refers to their own experience and states that habitats need to be maintained for the benefit of game bird shooters. Refer to submission which contains an excerpt from an article written by Tom Caithness (*A Summary of the 1991 Waterfowl Shooting Season*).

Point Number 678.3

Summary of Decision Requested: **Retain** the right as a permitted activity to maintain the habitat for the benefit of game bird shooters on the submitter's property at Oram Road and 150 Koheroa Road, Mercer (see map included in submission for location).

Decision Reasons:

- The submitter refers to their own experience and states that habitats need to be maintained for the benefit of game bird shooters. Refer to submission which contains an excerpt from an articles written by Caithness (*A Summary of the 1991 Waterfowl Shooting Season*).

Submitter Number:	679	Submitter:	Greenways Orchards Limited
Point Number	679.1		
Summary of Decision Requested:	<p>Amend the zoning of the properties in Te Kauwhata listed below from Residential Zone to Business Zone:</p> <ol style="list-style-type: none"> 1. Part of 4 Wayside Road (to be a split zone) 2. 8 and 10 Wayside Road 3. 16 and 24 Wayside Road <p>Refer to the map in this submission which indicates the extent of Business zoning requested by this submitter.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The sites contain existing commercial activities and a Business Zone would protect these activities and the capital invested. • The sites are close to State Highway 1 and business activities would draw on this locational advantage. • A Business Zone would enable diversity in land use. • Noise, glare and emissions from traffic and associated infrastructure along State Highway 1 conflict with residential use. Rezoning for businesses would therefore avoid reverse sensitivity effects and provide a buffer between the on-ramp and Residential Zone. 		
Point Number	679.2		
Summary of Decision Requested:	<p>Retain the mapped indicative roading layout in the vicinity of the property at 16 and 24 Wayside Road, Te Kauwhata if the property remains Residential Zone.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • In the event that the requested rezoning to Business is not accepted, the submitter supports the indicative roading layout that enters their property from the north. 		
Point Number	679.3		
Summary of Decision Requested:	<p>Delete Policy 4.5.11(a)(ii) Residential upper floors: Business Town Centre Zone and Business Zone relating to avoiding residential activity at ground level.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • There may be circumstances where ground floor residences are appropriate, especially when dealing with zone or heritage interfaces, or motel accommodation. 		
Point Number	679.4		
Summary of Decision Requested:	<p>Amend Rule 16.4.3 RD1(a)(ii) Subdivision - Te Kauwhata West Residential Area as follows:</p> <p>(a) Proposed lots within Te Kauwhata West Residential Area must comply with all of the following conditions:</p> <p>...</p> <p>(ii) Have a minimum average net site area of 875m² 700m²;</p>		
Decision Reasons:	<ul style="list-style-type: none"> • The proposed minimum average net site area of 875m² is an inefficient use of land that fails to account for anticipated growth in the area. • It fails to give effect to the Future Proof Strategy which seeks a more compact urban form and greater densities in existing settlements. • It does not achieve the minimum density required by strategic Policy 4.1.5. 		
Point Number	679.5		
Summary of Decision Requested:	<p>Delete Rule 17.1.5 NC1 Non-Complying Activities</p> <p>AND</p> <p>Add ground floor residential activity to Rule 17.1.4 Discretionary Activities.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • A non-complying activity status for this type of multi-unit development is too restrictive and does not provide for innovation in design or development concepts which may promote good outcomes for the Business Zone. • Residential activities are appropriate and a non-complying activity status does not enable this type of development. • Residential development at ground floor level may an appropriate design response given the characteristics of the site and surrounding area, such as where buildings adjoin a Residential Zone. 		
Point Number	679.6		
Summary of Decision Requested:	<p>Delete Rule 17.1.5 NC2 Non-Complying Activities</p> <p>AND</p> <p>Add ground floor residential activity to Rule 17.1.4 Discretionary Activities.</p>		
Decision Reasons:	<ul style="list-style-type: none"> • A non-complying activity status for this type of residential activity is too restrictive and does not provide for innovation in design or development concepts which may promote good outcomes for the Business Zone. • Residential activities are appropriate and a non-complying activity status does not enable this type of development. • Residential development at ground floor level may an appropriate design response given the characteristics of the site and surrounding area, such as where buildings adjoin a Residential Zone. 		
Point Number	679.7		
Summary of Decision Requested:	<p>Amend Table 14.12.5.1 - Separation distances, by replacing with the Operative Waikato District Plan - Franklin Section rules in Part 9.5 Location of Vehicle Crossings for arterial and collector roads.</p>		
Decision Reasons:			

- The section 32 analysis does not justify the separation distances set out in proposed Table 14.12.5.1. In the operative Franklin Section, roads are classified in terms of their importance for traffic movement and access functions.
- For properties on roads listed at the top of the hierarchy, access to them is either restricted or managed through design.
- In contrast, the objective is to maximise ease and access to properties located on local roads.

Point Number 679.8

Summary of Decision Requested: Delete Table 14.12.5.3 - Minimum sight distances

AND

Add references to "RTS6 - Guidelines for visibility at driveways".

Decision Reasons:

- There is no section 32 analysis to justify the proposed minimum sight distances.
- There are national documents that already address this matter and therefore the district plan does not need to specify different standards.

Point Number 679.9

Summary of Decision Requested: Amend Table 14.12.5.14 - Access and road conditions (Residential, Village, Business, Business Town Centre and Industrial Zones), to be replaced with NZS 4404:2010 Land Development and Subdivision Infrastructure - Table 3.2 Rooding Design Standards.

OR

Amend Table 14.12.5.14 Access and road conditions, by replacing with the standards in the Operative District Plan - Franklin Section as follows:

Users Legal width Minimum total seal width

2-4 3.5m 2.7m

5-8 8m 5m

Decision Reasons:

- The proposed access standards are excessive, will result in inefficient use of the urban land resource and will prevent infill development.
- The extra seal width increases impervious surfaces and stormwater runoff without any apparent need or benefit and will add excessive development costs.
- NZS 4404:2010 - Land Development and Subdivision Infrastructure is a national document that addresses access and road conditions and it is therefore not necessary for the district plan to specify different standards.
- The current standards in the operative Franklin Section are more appropriate than the proposed standards.

Point Number 679.10

Summary of Decision Requested: Retain Rule 16.4.3 Subdivision - Te Kauwhata West Residential Area, with the exception of Rules RD1(a)(ii) and RD1(a)(iv) which are addressed elsewhere in the submission.

Decision Reasons:

- Enables the subdivision of land in Te Kauwhata to provide for growth within the district.

Point Number 679.11

Summary of Decision Requested: Delete Rule 16.4.3(a)(iv) Subdivision -Te Kauwhata West Residential Area and make it a matter of discretion.

Decision Reasons:

- The establishment of grid patterns may not be appropriate to all sites due to topographical or other physical constraints.
- There is no section 32 analysis to justify the requirement for a grid layout.
- The appropriateness of a grid layout should therefore be listed as a matter of discretion rather than a rule.

Point Number 679.12

Summary of Decision Requested: Delete Rule 16.4.13(a) Subdivision creating reserves and make it a matter of discretion.

Decision Reasons:

- Roading infrastructure is expensive and this rule will therefore result in unjustified costs to developers and purchasers.
- The rule is arbitrary and may not be appropriate for all types of reserves and developments.
- Safety and surveillance of reserves may be achieved with less road frontage as indicated with the subdivision concept plan provided with the submission.
- There is no section 32 analysis to justify the 50% threshold.
- The extent of road frontage for a proposed reserve should therefore be a matter of discretion rather than a rule.

Submitter Number: 680

Submitter:

Federated Farmers of New Zealand

Point Number 680.1

Summary of Decision Requested: Withdraw the Proposed District Plan as provided for in Schedule 1 (8D(1)) of the Resource Management Act 1991 to allow an assessment of the drafted plan against the National Planning Standards when it is released. This would allow analysis of the submissions and robust identification and scheduling of the Significant Natural Areas, Outstanding Landscapes and Significant Amenity Landscapes.

Decision Reasons:

- The submitter considers that withdrawing the Proposed Plan at this stage would allow an assessment of against the National Planning Standards when released in 2019.
- The submissions received during this process could provide useful feedback and could be analysed during the interim period. This would improve the quality of the Proposed District Plan.
- It would allow WDC time to undertake robust identification and scheduling of significant natural areas, outstanding landscapes and significant amenity landscapes. Taking time during the early planning stage will reduce the time consuming and expensive appeal process.

Point Number	680.2
Summary of Decision Requested:	<p>Amend the Proposed District Plan to acknowledge and recognise that biodiversity gains are best achieved with landowner buy-in.</p> <p>AND</p> <p>Adopt a biodiversity policy and management framework which facilitates a collective and collaborative response to this public good issue which could be achieved by non-regulatory methods that include such as:</p> <ul style="list-style-type: none"> • increasing the contestable conservation fund as recommended in the Kessels Ecology report • assistance with stock exclusion and pest control • raising education and awareness about the importance of biodiversity. <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • Submission indicates that the consultation process for Significant Natural Areas was not robust or engaging, and there is no evidence in the Proposed District Plan that raised issues were heard, understood or addressed by the Council. • The best outcomes are achieved when Councils have a good understanding of the issues facing landowners, and acknowledge the <i>public good</i> aspect which is provided (at the expense of landowners). This includes utilising Council ratepayers' money to provide meaningful incentives to enable good biodiversity management, such as provision of information and advice, assistance with pest control and other non-regulatory tools that reflect a partnership approach to achieve biodiversity gains. The majority of indigenous biodiversity which remains in the district is found on private land. • The submitter's experience is that the best biodiversity outcomes are achieved when Councils have a good understanding of the issues facing landowners, acknowledge the public good aspect which is created and work to provide meaningful incentives and information. This important partnership approach is currently missing under the Proposed District Plan planning response.
Point Number	680.3
Summary of Decision Requested:	<p>Amend plan format and structure to ensure the respective chapters include an introductory/explanatory section that provides plan users with a clear understanding of the issues, values, and purpose of the chapter.</p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan in its current format is not cohesive. It is oversimplified, with a bias on environmental ecology to the extent that important context around social, economic and cultural outcomes is missing. • Furthermore, opportunities for incorporating best-practice planning methods have not been adopted, which is to the detriment of plan users, and ultimately to the district's natural and physical resources.
Point Number	680.4
Summary of Decision Requested:	<p>Amend the Proposed District Plan to include proactive and positive attributes as well such as a range of non-regulatory methods or the suite of mechanisms council will be using to educate, inform, incentivise and generate a good understanding of the respective resource management issues.</p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan in its current format is not cohesive. It is oversimplified with a bias on environmental ecology to the extent that important context around social, economic and cultural outcomes are missing. • Opportunities for incorporating best-practice planning methods have not been adopted, which is to the detriment of plan users, and ultimately to the district's natural and physical resources.
Point Number	680.5
Summary of Decision Requested:	<p>Amend the Proposed District Plan so the associated rules are included in the relevant chapter, i.e. one chapter for each resource management topic</p> <p>OR</p> <p>Amend the Proposed District Plan to provide 'road-mapping' or 'sign posting' within the Proposed District Plan.</p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan in its current format is not cohesive. It is oversimplified with a bias on environmental ecology to the extent that important context around social, economic and cultural outcomes are missing. • Furthermore, opportunities for incorporating best-practice planning methods have not been adopted, which is to the detriment of plan users, and ultimately to the district's natural and physical resources.
Point Number	680.6
Summary of Decision Requested:	<p>Amend the Proposed District Plan to include advisory notes cross-referencing other legislation, planning instruments or authorities that have jurisdiction or an interest in specific issues.</p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> • The Proposed District Plan in its current format is not cohesive. It is oversimplified with a bias on environmental ecology to the extent that important context around social, economic and cultural outcomes are missing. • Furthermore, opportunities for incorporating best-practice planning methods have not been adopted, which is to the detriment of plan users, and ultimately to the district's natural and physical resources.

Point Number	680.7
Summary of Decision Requested:	<p>Amend the Proposed District Plan to incorporate the relevant issues outlined in Section 1.4 Issues for Waikato district into the respective chapters of the Plan.</p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers the purpose of the plan would be better served if the issues for the district were incorporated into the respective chapters of the plan rather than contained in a separate section.
Point Number	680.8
Summary of Decision Requested:	<p>Amend the Proposed District Plan to incorporate the relevant issues outlined in Section 1.5 What does this mean for Waikato district strategic objectives and directions? into the respective chapters of the Plan.</p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers the purpose of the plan would be better served if the issues for the district were incorporated into the respective chapters of the plan rather than contained in a separate section.
Point Number	680.9
Summary of Decision Requested:	<p>Amend Section 1.4.3 (b) The Rural environment as follows:</p> <p><i>In addition, rural activities contribute to the parts of the rural environment parts of the district which are valued for their landscape, character and amenity values.</i></p> <p>AND</p> <p>Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.</p>
Decision Reasons:	<ul style="list-style-type: none"> The rural ideal of landscapes or amenity are largely dynamic working landscapes which are there as a result of the activities you would expect to find in the rural zone. It is important to establish that understanding in the contextual sections of the plan.
Point Number	680.10
Summary of Decision Requested:	No specific decision sought, but submission supports in part Section 1.4.3.1 Rural activities.
Decision Reasons:	<ul style="list-style-type: none"> Broad support is extended to the range of issues outlined in this section. However, it is important to accurately reflect legislative requirements and not over-simplify this contextual information. It may not always be appropriate to seek to avoid adverse effects on the environment, and may in fact be more important to remedy or mitigate them, depending on the situation.
Point Number	680.11
Summary of Decision Requested:	<p>Amend Section 1.4.3.2 (b) Protecting the rural environment, as follows:</p> <p><i>Activities affecting landscape, historic and amenity values, including: rural character, recreational activities, high quality soils, significant mineral resources and ecological values need to be managed to avoid, <u>remedy or mitigate</u> adverse effects on the...</i></p> <p>AND</p> <p>Make any consequential changes necessary to give effect to the relief.</p>
Decision Reasons:	<ul style="list-style-type: none"> Broad support is extended to the range of issues outlined in this section. However, it is important to accurately reflect legislative requirements and not over-simplify this contextual information. It may not always be appropriate to seek to avoid adverse effects on the environment, and may in fact be more important to remedy or mitigate them, depending on the situation.
Point Number	680.12
Summary of Decision Requested:	<p>Delete Section 1.5.7(a) Natural environment</p> <p>OR</p> <p>Amend Section 1.5.7(a) Natural environment as follows</p> <p><i>The Council will ensure that adjoining authorities and the regional council are informed of <u>any</u> resource consent applications received for vegetation clearance <u>located on the district boundary</u>. The location of indigenous vegetation...</i></p> <p>AND</p> <p>Any consequential changes needed to give effect to this relief.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter considers this section to be an unnecessary duplication of the cross-boundary issues addressed under Section 1.5.3 and 1.5.7.1 (a). In most vegetation-clearance situations, it would be completely unnecessary to involve all adjoining authorities and the regional council. In fact, it may only occasionally be appropriate for such involvement in relation to cross-boundary clearance of significant indigenous vegetation.
Point Number	680.13
Summary of Decision Requested:	Add to Section 1.5.7 Natural environment new provisions as follows:

(##) Reconciling the tension between the private cost and public benefit of protecting and managing the District's natural environment.

(###) Increase public recognition and understanding of the District's natural environment, the associated values and the respective responsibility that the public and private landowners assume in its ongoing management and protection.

(####) Develop a range of non-regulatory mechanisms that encourage, assist and facilitate the protection, maintenance or enhancement of the District's Significant Natural Areas and Outstanding Natural Landscapes.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter states that this requested relief relates to their submission points raised in Section Two General Comments above. In this regard, Sections 2.15 and 2.16 of the submission read as follows:

Our members strongly support a planning approach which recognises that landowners play a principle role as managers (and financiers) of the region's natural and physical resources. They also support plans that are truly effects-based and do not unnecessarily inhibit or pose constraints on farming activity. Landowners are proactive resource managers who rely on their properties natural and physical resources for their farming business. It is entirely in their best interest to manage their land sustainably.

Farmers are the most efficient agents for achieving on-farm good practice, as farmers are where the 'rubber hits the road' for land management. To that end, Federated Farmers actively encourage non-regulatory methods to achieve and encourage good practices. There are substantial existing drivers for farmers to ensure that their on-farm practices meet environmental standards. The lack of non-regulatory methods proposed in the PDP is a significant concern.

Point Number 680.14

Summary of Decision Requested: Retain Section 1.5.7.3 Water as notified.

Decision Reasons:

- The submitter understands the issues outlined in this section and is supportive of the approach to encourage winter water storage, and is keen to ensure that there is a consistent approach adopted within the plan with an enabling management response adopted. This will require amendments to the way water tanks are proposed to be controlled in the notified plan. Further comment and specific relief sought will be made against the respective definitions and proposed rules.

Point Number 680.15

Summary of Decision Requested: Amend Section 1.5.7.5 (a) The coast as follows:

Coastal issues cross the boundaries with Otorohanga District, Hauraki District and Auckland. In addition, Waikato Regional Council has responsibilities for administering the coastal marine area. The Council will liaise with the relevant councils on coastal activities with a cross-boundary impact. Inappropriate development will be managed...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose and intent of this section, however it is important to not over simplify this contextual information.

Point Number 680.16

Summary of Decision Requested: Retain Section 1.5.7.7 Energy as notified.

Decision Reasons:

- The submitter supports the balanced approach which is being established for the management of energy infrastructure and development within the plan.

Point Number 680.17

Summary of Decision Requested: Amend Section 1.9.4 (a) Section 6 RMA as follows:

This section places a duty on the Council to recognise and provide for a range of matters of national importance. These include the coastal environment, lakes, rivers, wetlands, natural features, significant habitats of indigenous fauna and significant indigenous vegetation...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Submitter understands the purpose and intent of this section. However, it is important to accurately summarise the Act and not over simplify this contextual information.

Point Number 680.18

Summary of Decision Requested: Amend Section 1.9.5 (a) Section 7 RMA as follows:

The matters in Section 7 of the RMA, while not described as matters of national importance are, nevertheless, important to Council's resource management functions. This section requires Council to have particular regard to several matters, including kaitiakitanga, the ethic of stewardship, the efficient use and development of natural and physical resources, the maintenance and enhancement ~~protection~~ of amenity values...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose and intent of this section, however it is important to accurately summarise the Act and not over simplify this contextual information.

Point Number 680.19

Summary of Decision Requested: Amend Section 1.10.3.4 (b) National Environmental Standards as follows:

National Environmental Standards are regulations issued under sections 43 and 44 of the RMA and apply nationally. This means that each regional, city or district council must enforce the same standard. In some circumstances, councils can impose stricter standards. The land use activities over which respective

NESs apply will be considered as permitted activities under this plan.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the hierarchy of planning instruments and Council's intent to not duplicate land use controls for activities to which respective National Environmental Standards ('NES's) apply.
- The submitter considers it appropriate for the Proposed District Plan to be more explicit in terms of the relationship between the NESs and the rules framework within the plan. This lack of connection between the two is of particular concern when a 'catch all' rule like NCS is proposed.

Point Number

680.20

Summary of Decision Requested:

Amend Section 1.12.2 Natural Environment as follows:

(a) A district that values protects its natural habitat and ecological values and retains its significant landscape features.

(b) A district that acknowledges the tension between the private cost and public benefit of maintaining or enhancing the District's natural environment.

(c) A district that where retains the natural character of its rural areas and has access to the public open space is available for public enjoyment and use and well used by the community.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter considers the Proposed District Plan to be overly simplistic and unbalanced in its identification of the significant issues and strategic direction being taken by the district.
- The lack of recognition or acknowledgement that tensions can be created when private cost is over relied on to achieve public benefit is a significant concern for our members.
- There are impacts caused by natural environment and historic heritage provisions as many of these sites are located on private land. Our members value the natural environment and historic heritage, but often the unknown costs or implications of a policy approach can create a perception that these areas are a liability rather than an asset.
- When developing policies around the natural environment and heritage, the impacts on resource users must be addressed. Council's mechanisms to manage or enhance them should include encouragement for resource users. If the effects on landowners are ignored it could be perceived that natural environment resources are a hindrance and a liability, resulting in negative consequences all around.
- The submitter seeks policies which provide recognition of the private efforts which have created public good resources, and non-regulatory methods that assist landowners help to create win-win outcomes - which should be the ultimate goal.
- Furthermore, the submitter considers the purpose and intent of (c) in the notified version of the Proposed District Plan to be unclear and confusing as presently worded, and seek that this be set forth more clearly.

Point Number

680.21

Summary of Decision Requested:

Retain Section 1.12.7 Managing change as notified.

Decision Reasons:

- The submitter supports the policy position and consider effective consultation and strategic planning to be critical for the efficient operation of the Council's functions.

Point Number

680.22

Summary of Decision Requested:

Amend Section 1.12.8 (b) (vi) Strategic objectives as follows :

(vi) Protect ~~and enhance~~ public green open space, outstanding landscapes and areas of cultural, ecological, historic, and environmental significance from inappropriate use and development.

AND

Add to Section 1.12.8 (b) Strategic objectives the following:

(vii) Reconciling the tension between the private cost and public benefit of maintaining or enhancing the District's natural environment and historic heritage.

(viii) Acknowledge the continued use of rural areas for productive rural activities and other land and soil resource-dependent rural-based activities, as well as access to and the extraction of mineral resources, are important to the economic health and well-being of the district and wider subregion.

(ix) Active participation of landowners is seen as vital to the maintenance and enhancement of indigenous biodiversity. The Council will work with landowners, recognise their stewardship and current management practices, and will promote the use of non-regulatory methods, including assistance with the establishment of protective covenants, service delivery, education, and other incentives.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is disappointed at the urban-centric focus and nature of this summary of strategic objectives. The importance of the primary production sector to this district should be a key consideration for the overarching direction of this plan.
- Rural landowners take great pride in their work, stewardship of their land and their economic contribution to their local community.
- Section 1.4.2 (page 7) states that economic growth can be largely attributed to primary industry, which as of 2014 accounts for more than a third of the district's GDP.
- Submitter asks to adopt a more balanced and considered approach to the strategic objectives of this Proposed District Plan. One which is more consistent with the purpose and intent of the Resource Management Act 1991 ('RMA') and direction in the Waikato Regional Policy Statement ('WRPS').

Point Number

680.23

Summary of Decision Requested:

Amend Objective 2.12 (a) -Whakapapa (connection to nature) as follows:

Relationships with ancestral lands, water, sites, waahi tapu and other taonga are protected from inappropriate subdivision, use and development, and enhanced where appropriate.

AND

Any consequential changes needed to give effect to this relief:

Decision Reasons:

- This aspect of *whakapapa* should be addressed in the Proposed District Plan, and should relate to the effects of land use.
- This is in keeping with a general theme across our submission which seeks to ensure WDC restricts the Proposed District Plan provisions to matters that district councils have the jurisdiction to regulate.

Point Number 680.24

Summary of Decision Requested: **Amend** Policy 2.12.1 (a) Whanaungatanga (relationship to nature) as follows:

(a) Recognise the relationship of Tangata Whenua with areas of significance, including waahi tapu, urupaa, maunga and other landforms, mahinga kai, and indigenous flora and consider these matters through provisions which trigger requirement for resource consent or Notice of Requirement for Designation, which may include:

...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose and intent of this policy but considers it appropriate for the Proposed District Plan to include detail as to how this policy will be implemented. It is difficult to determine how and when the provisions listed in Points (i-vii) will be required.
- The resource consent and/or designation process is the most appropriate method to incorporate the stated provisions - as and when necessary.

Point Number 680.25

Summary of Decision Requested: **Amend** Policy 2.14.1 (a) (i) Kaitiakitanga (stewardship/guardianship) as follows:

(i) Establishing who should be consulted, in what circumstances within a resource consent application process or in a resource consent implementation process, and the consultation fees;

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose and intent of this policy but seek to remind Council that a broad policy like this can isolate landowners. In the submitter's experience most landowners want to do the right thing with regards to cultural heritage but it is Council's role to facilitate this with a planning framework that creates certainty and consistency.
- The Council needs to ensure that appropriate consideration is given to existing landowner's rights and their reasonable expectations to manage their land, when recognising and providing for tangata whenua's exercise of kaitiakitanga.

Point Number 680.26

Summary of Decision Requested: **Amend** Policy 2.15.1 Ngaa taonga tuku iho (Maori Sites and Areas of Significance) as follows:

(a) Ensure new subdivision, use and development does not compromise...

(b) Areas and sites of significance to Maori including waahi tapu sites and waahi tapu areas are protected from adverse effects of inappropriate land use change development or activities on those sites.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Not all subdivision, development or land use should be subject to this policy. There are many legitimate and expected activities which should be able to continue without undue restriction. Submitter accepts that changes to existing land use activities may need to be assessed against potential adverse effects on these sites and areas.

Point Number 680.27

Summary of Decision Requested: No specific decision sought, but the submission conditionally supports Objective 3.1.1 (a) Biodiversity and ecosystems.

Decision Reasons:

- The submitter's support for this objective is conditional on provision of appropriate policy that recognises the role landowners play in protecting and enhancing biodiversity and our relief sought elsewhere in that regard.
- The submitter understands the intention of this objective is to give effect to the RMA and Waikato Regional Policy Statement (WRPS). It is a goal that many farmers and landowners share and reminds farmers to adopt responsible management and environmental practices.
- However, the Proposed District Plan's exclusively regulatory approach is outdated and inconsistent with best practice and advice received from the Council's own consultant through this district plan review process (Kessels Ecology Significant Natural Areas Summary of Inputs from the Community Consultation Process Dec 2016). The submitter considers that the planning approach will need significant changes if Council is genuine about engaging in effective consultation and serious about achieving the stated public good outcomes.

Point Number 680.28

Summary of Decision Requested: **Add** new policy to Section 3.1 Indigenous Vegetation and Habitats as follows:

(a) The Council recognises landowners' stewardship of the land and will work with landowners to promote the use of non-regulatory methods; including assistance with the establishment of protective covenants, service delivery, education, and other incentives in protecting and enhancing ecological sites, geological features, and the values of outstanding natural features and landscapes; and ensure current land management practices help achieve this.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Enhancement goals require active management on behalf of both Council and landowners if the goals are to be met. Submitter is concerned at the lack of understanding and recognition within the planning framework of the role landowners play with regards to achieving protection and enhanced biodiversity and ecosystem values across the district, regional and country.
- Active participation of landowners is practically necessary and essential to the successful protection and enhancement of ecological sites, geological features, and the values of outstanding natural features and landscapes.

Point Number 680.29

Summary of Decision Requested: **Amend** Policy 3.1.2 (a) Policies as follows:

(a) ~~Enable Incentivise~~ activities that maintain or enhance indigenous biodiversity including:

(i) planting using indigenous species suitable to the habitat;

(ii) the removal or management of pest plant and animal species;

(iii) biosecurity works.

AND

Add to Policy 3.1.2 (a) Policies as follows:

(iv) Encouraging voluntary planting of indigenous plant specimens suitable to each habitat, whilst anticipating flexibility to appropriately manage planted vegetation in a way that is integrated with other land management practices.

AND

Add to Policy 3.1.2 new Policies as follows:

(d) Council will coordinate with other agencies and organisations in identifying risks, requirements, opportunities and effective methods for maintaining and enhancing Waikato's biodiversity and will support landowners with a range of regulatory and non-regulatory initiatives to maintain and enhance biodiversity.

(e) Consider additional subdivision opportunities where significant biodiversity gains can be achieved in the following priority areas or locations:

(i) Peat lakes and rivers: by permanently providing significant buffer areas around peat lakes and rivers; or

(ii) Wetlands, kahikatea stands, riparian margins and bush stands on the low lands, by providing permanent protection; or

(iii) Significant natural areas being aggregated to form one large more ecologically sustainable area and being permanently protected; or

(iv) Biodiversity corridors: by the permanent protection of significant areas of indigenous forest within biodiversity (indigenous forest) corridors; or

(v) Biodiversity corridors: by permanently protecting significant riparian or wetland areas within identified biodiversity (river or stream) corridors.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- Submitter supports the enabling intent of this policy, however the proposed rules framework designed to implement this policy are not consistent.
- Activities such as the removal or management of pest plant and animal species can require vegetation clearance and earthworks for conservation fencing to exclude stock or pests. The proposed rules only enable the vegetation clearance activity under Rule 22.2.7, PI (a)(ii), earthworks for a new fence or track would require a Restricted Discretionary resource consent as per Rule 22.2.3.3, RD 1(a).
- This requirement introduces consent costs, on top of labour and materials and creates time constraints – all of which have the ability to stifle good intentions and hinder rather than enable activities which ultimately maintain or enhance indigenous biodiversity.
- It is widely accepted that the enhancement indigenous vegetation and ecosystems is difficult to achieve without assistance and co-operation from landowners and other parties. Landowners need support from a range of authorities and agencies for initiatives to protect and maintain biodiversity.

Point Number

680.30

Summary of Decision Requested:

Amend Objective 3.2.1 Significant Natural Areas as follows:

(a) Indigenous biodiversity in Significant Natural Areas is protected and enhanced through a range of regulatory and non-regulatory methods.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The submitter considers it important for the Objective to provide more direction and context. It is important to be clear that enhancement goals require a different approach to protection which can be achieved, in part via regulation. Regulation can control use but not induce the active management required to achieve enhancement.
- The submitter recognises that protection of significant indigenous vegetation and significant habitats of indigenous fauna is a RMA Section 6(c) obligation, and that biodiversity is important to all New Zealanders. This does not however justify the one dimensional approach the Proposed District Plan has adopted.
- Farmers play a fundamental role in the on-going active management and protection of biodiversity on private land in the district and invest hundreds and thousands of dollars in weed and pest control on their own land, every single year.
- It more appropriate to provide support, advice and encouragement through contestable funds to landowners when it comes to protection of ecosystems supporting significant indigenous vegetation and significant habitats of indigenous fauna. It is through such non-regulatory methods that Council can ensure the greatest landowner buy-in and ultimately the best environmental gains.

Point Number

680.31

Summary of Decision Requested:

Amend Policy 3.2.2 (a) Identify and Recognise, as follows:

(a) Identify significant indigenous vegetation and habitats of indigenous fauna in accordance with the Waikato Regional Policy Statement and identify as Significant Natural Areas on a Schedule in the plan and planning maps.

(i) The sites currently identified on the planning maps are for information purposes only and have no legal effect until a robust identification process, including ground-truthing, has been undertaken.

(b) Recognise and protect Significant Natural Areas by ensuring the characteristics that contribute to their significance are not adversely affected.

(i) Ensure landowners are informed of the characteristics relating to their specific site and the activities which may adversely affect them.

(c) Where a proposed activity requires a resource consent solely as a result of an area being identified as a significant natural area (SNA) and the site has not been ground-truthed, Council will meet the costs of the ground-truthing assessment to confirm the status and boundaries of the significant natural area. The assessment will be carried out by a Council approved suitably qualified and experienced ecologist prior to an application for resource consent being lodged.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- FFNZ understand the intent of this policy and the link to the significance criteria in the Waikato Regional Policy Statement (WRPS)
- FFNZ support the principle of a policy that seeks to identify areas of national importance and consider that a targeted planning response is more appropriate than general catch all rules which elevate all areas of biodiversity to a significance status until proven otherwise.
- However, this position increases the importance of the process used to identify the sites, as with significance comes protection and acceptance that extra land use controls may be required to meet RMA obligations. It would be very rare to find a landowner who would not want to look after an area which is truly significant, but frustrations and resentment will result from a flawed identification process.
- In this regard we are unsure what the method or process which will be used to implement the identification assessment required of Policy 3.2.2(a) and as such cannot assess the merits or otherwise of the process going forward.
- With regards to SNA sites which have been included in the PDR, FFNZ seek that these be withdrawn until a robust identification process has been undertaken. Many sites have been mapped as SNAs which didn't categorically meet the WRPS significance criterion. It is our submission that identification of sites using aerial photography and desktop analysis with only a very small percentage of sites visited to ground-truth information, means the level of confidence in the process is not sufficiently high enough to incorporate these sites into the plan with the degree of regulation proposed to be applied over these areas.
- There are many potential deficiencies in relying only on desktop studies, including outdated information, not understanding the purpose or origins of features that may be identified (such as 'wetland areas' for example - which may have been deliberately constructed for water storage purposes) and not being able to properly evaluate and understand the values of a feature, or ground slope.
- FFNZ also urge WDC to be strategic and practical in its approach and focus limited resources on working first with those landowners who are engaged and keen to be involved in the first instance. There is little to be gained by backing reluctant landowners into an expensive and protracted litigious battle using public money that would be better spent achieving good outcomes on the ground not on paper.

Point Number 680.32

Summary of Decision Requested: Retain Policy 3.2.3 Management hierarchy as notified.

Decision Reasons:

- The submission conditionally supports this policy, which submitter understands is drafted to give effect to the Waikato Regional Policy Statement.
- The submitter supports a planning response which is focused on more robust and ground-truthed Significant Natural Area identification and which may impact on and require amendments to rules.

Point Number 680.33

Summary of Decision Requested: Retain Policy 3.2.4 Biodiversity Offsetting as notified.

Decision Reasons:

- Conditional support is extended to this policy, which the submitter understands is drafted to give effect to the Waikato Regional Policy Statement.
- Support is conditional on a more robust Significant Natural Area identification process being undertaken.

Point Number 680.34

Summary of Decision Requested: Retain Policy 3.2.5 Biodiversity in the coastal environment as notified.

Decision Reasons:

- Conditional support is extended to this policy, which submitter understands is drafted to give effect to the NZ Coastal Policy Statement and Waikato Regional Policy Statement.
- Support is conditional on a more robust Significant Natural Area identification process being undertaken.

Point Number 680.35

Summary of Decision Requested: Amend Policy 3.2.6 (b) Providing for vegetation clearance as follows:

(b) Provide for the clearance of indigenous vegetation in Significant Natural Areas for the construction of building platforms, services, access, vehicle parking and on-site manoeuvring and the development of Maori Freehold Land by:...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Conditional support is extended to this policy which FFNZ understand is drafted to give effect to the WRPS. Support is conditional on a more robust SNA identification process being undertaken.
- Furthermore, FFNZ seek a better balance being struck between environmental, social and economic wellbeing. Farmers typically need to undertake a variety of types of vegetation clearance as part of day-to-day farming activity for the purpose of matters including the following:
 - Vegetation clearance around farm buildings, airstrips and helipads, farm access tracks, waterway crossings, culverts and bridges, farm infrastructure such as telecommunications facilities, water supply pipelines, dams and troughs, fertiliser storage areas, hazardous substance storage and handling areas, silage pits, stock mustering areas for dairy sheds, shearing sheds and marshalling yards.
 - Pest plant/weed control, including invasive weed clearance from riparian margins
 - Pasture maintenance
 - Maintenance of rural fire breaks
- These types of minor vegetation clearance include clearance of all types of vegetation, including indigenous vegetation. These activities are undertaken in the context of the relatively wide open spaces and low population and development densities that characterise rural areas.
- Enabling these types of routine minor vegetation clearance is important for efficient resource management in order to support the economic, social and cultural well-being of communities in the district. Farmers should not be subject to undue delays and costs from triggering resource consent requirements for minor clearance of indigenous vegetation where there is little or no environmental benefit.
- FFNZ are also unsure why land tenure is an appropriate trigger to determine different land use controls related to biodiversity outcomes, and seek that reference to particular land tenure be deleted from this policy.

Point Number 680.36

Summary of Decision Requested: Add to Policy 3.2.7 Managing Significant Natural Areas a new clause (b) as follows:

(b) Recognise that management of Significant Natural Areas on private land requires public investment in a range of incentives such as:

(i) Rates remissions or rebates for land retired for biodiversity purposes;

(ii) Reimbursements or discounts for products and fencing material for stock exclusion;

(iii) Resource consent fee discounts and waivers;

(iv) Providing native plants seedlings;

(v) Pest animal and weed control assistance;

(vi) Contestable fund for biodiversity projects;

(vii) Transferable development rights;

(viii) Education and information on types of vegetation and habitat, and why they are important;

(ix) Assistance for landowners going through a QEII process, or applying for Landcare Trust funding.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Waikato District Council need to prioritise and ground-truth identification and management of Significant Natural Areas in order to ensure landowners are not unnecessarily subject to onerous costs and time delays. This is the outcome when usual and expected farming activities are subject to resource consent conditions to protect patches of indigenous vegetation. Submitter has concerns that the district's ratepayers will not be able to afford to adequately protect areas of indigenous vegetation which accurately meet the significance criteria let alone the 'wish list' which has currently been created by the inadequate identification process.

- Waikato District Council also need to acknowledge the role landowners play in managing Significant Natural Areas where these are found on private land, and to have policy which incentivises a range of management tools to enable the appropriate management of Significant Natural Areas.

Point Number 680.37

Summary of Decision Requested: **Retain** Policy 3.2.8 Incentivise subdivision, as notified.

Decision Reasons:

- The submitter supports the intention of the incentive.

Point Number 680.38

Summary of Decision Requested: **Retain** Objective 3.3.1 Outstanding natural features and landscapes, as notified.

Decision Reasons:

- The submitter understands the intent of this Objective is to meet RMA obligations and Waikato Regional Policy Statement direction.

Point Number 680.39

Summary of Decision Requested: **Amend** Policy 3.3.2 (a) Recognising values and qualities, as follows:

(a)...

(vi) ~~existing~~ water reservoirs and dams;

(vii) ~~existing~~ pastoral farming activities on the margins of these areas.

(b) ...

(vi) ~~existing~~ pastoral farming activities on the margins of these areas.

(c) ...

(v) ~~existing~~ pastoral farming activities on the margins these areas.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the policy in the context of the Waikato Regional Policy Statement. However, the Proposed District Plan must ensure that ONFs and ONLs (which have been identified over private farmland), enable farming activities that contribute to the values and qualities of pastoral working landscapes. These are dynamic and changing, and it is not appropriate for the Proposed District Plan to seek to 'freeze' landscape character by rendering farming land use and development as 'static' in this context.
- Farmers have a legitimate right to be able to use their land resource in a way that meets their social and economic wellbeing. This includes being able to respond to a range of variables including economic drivers and market trends and adapt, through change. It is accepted that adverse effects need to be managed to an appropriate standard. However, the Proposed District Plan policy framework as proposed, will force unduly onerous and unnecessary assessment requirements on resource consent applicants for little or no environmental benefit if it only focuses on recognising existing farms and farming infrastructure. The Proposed District Plan policy should instead emphasise values and attributes, and the type of farming activities which give rise to these, rather than restricting recognition specifically to existing activities.

Point Number 680.40

Summary of Decision Requested: **Amend** Policy 3.3.3 Protection from inappropriate subdivision, use and development, as follows:

(a) Ensure that the attributes of identified Outstanding Natural Features and Outstanding Natural Landscapes are protected from inappropriate subdivision, use and development by:

(i) requiring new buildings and structures to be integrated into the Outstanding Natural Landscape or feature to minimise any visual impacts;

(ii) managing the adverse effects of new building platforms, buildings, driveways and roads through appropriate subdivision design;

(iii) requiring subdivision and development to retain views of Outstanding Natural Landscapes and features from public places; and

(iv) avoiding the adverse effects of extractive industries and inappropriate earthworks.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the intent of this policy. However consider that amendments are required to better meet RMA obligations and Waikato Regional Policy Statement direction.

Point Number 680.41

Summary of Decision Requested: **Retain** Policy 3.3.4 The relationships of Maori with natural resources and land, as notified.

Decision Reasons:

- The submitter supports the principle of this policy which recognises that balance and compromise is required to be struck between the competing values of resource use and resource protection.
- The submitter expects this principle as expressed in 3.3.4 (b) to be applied consistently and a better balance struck in relation to use and development of private land within Outstanding Natural Landscapes and Outstanding Natural Features.

Point Number 680.42

Summary of Decision Requested: **Add** a new clause (b) to Objective 3.4.1 Significant amenity landscapes, as follows:

(b) These areas will be identified and applied over public land only in recognition that zone specific rules are designed, in part, to manage adverse effects on amenity values created by, private land use, where appropriate.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the intent of this objective is to meet Waikato Regional Policy Statement (WRPS) Policy 12.3 direction.
- The WRPS does not explicitly require the amenity values of rural landscapes to be identified and managed. The submitter views the extra overlay of SAL objectives, policies and rules as they relate to rural activities on private land are an unnecessary duplication of rural zone rules.
- The submitter is opposed to any protection of a rural ideal, landscape or amenity that largely involves working landscapes there as a result of the activities you would expect to find in the rural zone.
- The submitter does not support unnecessary controls on activities in the rural area.
- The submitter is concerned at the lack of landowner involvement in the process of identifying significant amenity landscapes and understand that substantial areas of some farmland has been included.

Point Number 680.43

Summary of Decision Requested: Amend Policy 3.4.2 (a) Recognising Significant Amenity Landscapes, as follows:

(a) Recognise the attributes which contribute to identified Significant Amenity Landscapes.

(i) This policy will be implemented by the relevant zone rules which control effects of land use relative to the zone.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the intent of this policy is to meet Waikato Regional Policy Statement Policy (WRPS) 12.3 direction. However, the WRPS does not explicitly require the amenity values of rural landscapes to be identified and managed.
- The extra overlay of Significant Amenity Landscape objectives, policies and rules (as they relate to rural activities on private land) serve no useful purpose. These are an unnecessary duplication of other Rural Zone rules that control amenity through provisions for managing building bulk and location and certain earthworks.
- The submitter opposes any 'protection' of rural pastoral landscape amenity or characteristic over farmland, no matter how 'significant' such amenity may seem and oppose any associated restriction on land use within farmland, aimed at such protection. Farmland is a 'working landscape' that is always changing as a result of the rural-based activities that would be expected to be found within rural areas. Any restrictions aimed at protecting rural farmland amenity are completely unnecessary and do not achieve any environment benefit. Rather they only serve to burden farmers with undue delay and cost in having to seek resource consents in order to carry out routine farming activity and associated development.

Point Number 680.44

Summary of Decision Requested: Amend Policy 3.4.3 Maintaining and enhancing Significant Amenity Landscapes as follows:

Policy 3.4.3 Maintaining ~~and or where appropriate~~ enhancing the attributes of Significant Amenity Landscapes

(a) Maintain and, where appropriate, enhance the attributes of identified Significant Amenity Landscapes, during subdivision, land use and development, in particular by:

(i) requiring buildings and structures to be integrated into the Significant Amenity Landscape to minimise any visual impacts;

(ii) managing the adverse effects of building platforms, buildings, driveways and roads through appropriate subdivision design;

(iii) recognising and providing for the ~~continuation/development~~ of rural production farming activities within hill country landscapes and volcanic features;

(iv) managing the adverse effects of earthworks; and

(v) promoting and encouraging maintenance and enhancement of their attributes.

(b) Note: There are no rules relating specifically to Significant Amenity Landscapes in Chapter 22. However, where discretionary or non-complying activity resource consents are required under rules of this Plan, and where those activities are located within significant amenity landscapes, the proposed activities will be assessed in terms of their consistency with this policy.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter's relief in this respect is contingent on relief sought in relation to Objective 3.4.1 and Policy 3.4.2.
- The proposed policy as drafted contains a number of unnecessary duplications and is inconsistent with the enabling approach adopted under 3.4.4.
- The potential adverse effects associated with new development can be addressed under (ii). Non rural development earthworks will be addressed under (ii) so (iv) is an unnecessary duplication which may capture farming related earthworks inappropriately.
- The activities that have attributes which contribute to amenity values should be enabled and so it is important to acknowledge this in (iii), but it is broader than just farming. The proposed amendments are required to ensure a consistent planning response is adopted. Reference to made to the enabling intent of 3.4.4(b), which appropriately prioritises economic, social and cultural wellbeing over second tier amenity landscapes.
- The Waikato Regional Policy Statement doesn't require rules as such. Rather, the overarching requirement to 'maintain and enhance' can be achieved by recognising all types of farming activity as contributing to rural landscape amenity, and excluding it from requirement for resource consent.
- Implementing the policy can be achieved when *discretionary activity* or *non-complying activity* status is triggered as a result of other resource consent requirements in the Proposed District Plan. An assessment of the adverse effects of the proposed activity can be considered, if appropriate, at that time, against significant landscape amenity values and the ability to avoid, remedy or mitigate those effects.

Point Number 680.45

Summary of Decision Requested: Retain Policy 3.4.4 The relationships of Maaori with their resources and land, as notified.

Decision Reasons:

- The submitter supports the principle of this policy which recognises that balance and compromise is required to be struck between the competing values of resource use and resource protection, but this is contingent on our relief sought in relation to Objective 3.4.1 and Policies 3.4.2 and 3.4.3.
- The submitter expects this principle as expressed in 3.4.4(b) to be applied consistently across the district regardless of the land title.

Point Number 680.46

Summary of Decision Requested: Retain Objective 3.5.1 Natural Character, as notified.

Decision Reasons:

- The submitter understands the purpose and intent of this Objective.

Point Number 680.47

Summary of Decision Requested: Delete Policy 3.5.2 Recognising natural character
AND
Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the coastal environment and rivers and lakes are particularly valued for natural character qualities which are predominant in these areas and the RMA section 6(a) and the Waikato Regional Policy Statement Policy 12.2 requirements.
- In the submitter's view, Policies 3.5.3 and 3.5.4 achieve those goals more appropriately, with Policy 3.5.2 being an unnecessary duplication, which has the ability to cause confusion and uncertainty leading to unnecessarily onerous requirements for assessment in resource consent applications. It is important to note the planning map legend includes overlays as 'coastal environment', 'natural character', 'outstanding natural landscapes'. There are no overlays on the legend which match the areas specified under 3.5.2(b).

Point Number 680.48

Summary of Decision Requested: Delete clause (a)(vi) from Policy 3.5.3 (a) Protecting the natural character qualities of the coastal environment
AND

Amend Policy 3.5.3 (a) (viii) Protecting the natural character qualities of the coastal environment as follows:

(viii) recognising ~~historic farming operations that continue today,~~

AND

Add to Policy 3.5.3 (a) Protecting the natural character qualities of the coastal environment, a new 'Note' as follows:

Note the Policy will not be implemented until such time as the areas of outstanding natural character within the coastal environment have been appropriately identified and included into the planning maps.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Whilst the submitter understands the intent of this policy it is important the note the planning map legend lists overlays as 'coastal environment', 'natural character', 'outstanding natural landscapes'. There are no overlays on the legend which match areas specified as outstanding natural character areas.
- Focus must be on land use controls to purposes which fall within the jurisdiction of the district council.

Point Number 680.49

Summary of Decision Requested: **Amend** Policy 3.5.4 Protecting the natural character of wetlands, and lakes and rivers and their margins, as follows:

(a) Protect the natural character qualities of wetlands, and lakes and rivers and their margins from inappropriate subdivision, use and development by:

(i) ensuring that location, intensity, scale and form of subdivision, use and development are appropriate;

(ii) minimising, to the extent practicable and necessary, indigenous vegetation clearance and modification ~~(including earthworks, disturbance and structures);~~

(iii) encouraging any new activities to consolidate within, and around, existing developments or, where the natural character and landscape values have already been compromised, to avoid development sprawling; and

(iv) requiring appropriate setbacks of activities from wetlands, lakes and rivers.

(b) Determining what is inappropriate use and development will be considered with respect to the level of natural character. Where man-made elements/influences are dominant, it may be appropriate that activities result in further adverse effect on natural character.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands that the intent of this policy is to meet RMA section 6(a) and the Waikato Regional Policy statement Policy 2.2 requirements, however considers amendments are required to better meet the Waikato Regional Policy Statement direction.
- The submitter is unsure of the drafting of 3.5.4 (a)(ii) and what the relationship between the activities contained within the brackets is.

Point Number 680.50

Summary of Decision Requested: **Retain** Objective 4.1.2 Urban growth and development, as notified.

Decision Reasons:

- Support is extended to the recognition that future settlement development is appropriately directed to existing areas with infrastructure and services.

Point Number 680.51

Summary of Decision Requested: **Retain** Policy 4.1.3 Location of development, as notified.

Decision Reasons:

- The submitter supports this policy as it is aimed at ensuring future settlement development is appropriately directed to existing areas with infrastructure and services.

Point Number 680.52

Summary of Decision Requested: **Retain** Policy 4.1.5 Density as notified.

Decision Reasons:

- The submitter supports this policy, which is designed to reduce urban sprawl and the subsequent pressures that are placed on Council infrastructure and services.

Point Number 680.53

Summary of Decision Requested: **Amend** Policy 4.1.10 (a)(ii) Tuakau, as follows:

(ii) ~~Existing intensive Rural production activities including farming and intensive farming operations~~, and industrial activities are protected from the effects of reverse sensitivity by considering the location of new residential development; and...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is concerned at the focus of this policy. Consideration of reverse sensitivity effects created when new residential development occurs within an existing non-residential environment, should be applied much wider than to just intensive farming and industrial activities.
- Submitter considers that sensitive activities in rural areas can result in creating unreasonable expectations of the amenity of rural areas among people who are unaccustomed to rural environments. This would result in complaints about normal farming activities, and create unreasonable expectations that such effects to be avoided or mitigated in every instance, which would drive opposition to farming activity, making it even harder for farmers to be able to efficiently utilise the rural land resource for farming

Point Number 680.54

Summary of Decision Requested: Amend Policy 4.1.15 (a) Ngaruawahia as follows:

(a) Ngaruawahia is developed to ensure:

(i) ~~Existing intensive Rural production activities including farming and intensive farming operations~~ and industrial activities are protected from the effects of reverse sensitivity when locating new residential development;...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is concerned at the current focus of the Policy. The consideration of reverse sensitivity effects created when new residential development occurs within an existing non-residential environment should be applied much wider than to just intensive farming and industrial activities.
- The submitter considers that it could result in creating unreasonable expectations of the amenity of the area and perpetuate reverse sensitivity issues with people unaccustomed to the rural environment complaining about normal farming activities and expecting those effects to be avoided or mitigated in every instance.

Point Number 680.55

Summary of Decision Requested: Amend Objective 5.1.1 (a) The rural environment, as follows:

(a) Subdivision, use and development within the rural environment where:

(i) high class ~~and versatile~~ soils are protected ~~for primary productive use and to maintain the productive land resources for future generations~~ ~~rural activities~~;

(ii) ~~productive primary productive use and rural activities are supported and enabled in a manner which does not reduce existing primary productive use or compromise existing and future primary productive use options while maintaining or enhancing the rural environment;~~

(iii) ~~urban subdivision, use and development in the rural environment is avoided the use and development of rural resources enables people and communities to provide for their economic, social and cultural wellbeing~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Agriculture is significant to the district, both in economic terms and for the basis of district identity as a thriving and successful rural region.
- Primary production activities such as dairying, dry stock and horticulture make significant contributions to the economic, social and cultural well-being of the district. The submitter believes that the Proposed District Plan needs to adopt a more balanced and considered response between resource use and resource protection.
- Any decisions, policies or rules relating to the sustainable management of the district's rural land and soils must recognise the economic, social and cultural wellbeing that rural activities provide to the district and wider region.
- The submitter supports a high priority being given to maintaining the productive capacity of rural land resource. Sustaining the primary sector activities dependent on this land is critical to providing for current and future generations, however it is difficult to do this too prescriptively. For example, a stony soil that may be identified as appropriate for alternative non rural use may be highly productive for one particular land use.
- The submitter supports a flexible approach to managing the effects of land use on the soils of the district, one that is based on flexible, enabling objectives and policies.
- The submitter considers these amendments are required to better meet the Waikato Regional Policy Statement Objective 3.25 Values of soils and Policy 14.2 directives.

Point Number 680.56

Summary of Decision Requested: Amend Chapter 5 Rural Environment, to include a new policy as follows:

5.1.2 Policy – enabling growth

(a) Provide for the growth and efficient operation of primary, productive land use and rural production activities in the Rural Zone.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This new policy is required as consequential relief sought in relation to Objective 5.1.1.

Point Number 680.57

Summary of Decision Requested: Delete Objective 5.2.1 Rural resources.

AND

Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission

Decision Reasons:

- The submitter opposes this policy and remind Waikato District Council that it is the Regional Council's role to control land use for the purpose of soil conservation. The district council's role, as directed by the Waikato Regional Policy Statement (WRPS), is to ensure land use is managed in a way that does not decline the availability of high class soils for primary production due to inappropriate subdivision, use or development (WRPS Policy 14.2).
- The relief sought in relation to Objective 5.1.1 above will better meet RMA and the WRPS requirements and renders 5.2.1 (a)(i) unnecessary and inappropriate. Submitter is unsure what resource management issue 5.2.1 (a)(ii) is trying to address or what 'rural land' means in this context.
- Objective 5.2.1 is also, in part, an unnecessary duplication of resource management issues which are being addressed under Chapter 3 Natural Environment.
- There are other elements of the objective which are also outside the functions of a district council.

Point Number 680.58

Summary of Decision Requested: **Delete** Policy 5.2.2 (b) High class soils.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the intent of the policy, but reminds Waikato District Council (WDC) that management of chemical and biological properties of soils is not a territorial authority function. They are concerned about unnecessary duplication, overlap and added costs arising from over-regulation, without added value. WDC can realistically do its part in protection of soils by way of subdivision and development controls, but submitter is concerned that (b) has the potential to capture and control other activities inappropriately.

Point Number 680.59

Summary of Decision Requested: **Amend** Policy 5.2.3 (a) and (b) Effects of subdivision and development on soils, as follows:

(a) ~~Subdivision, use and development minimises the fragmentation of productive rural land, particularly where high class soils are located.~~

(b) ~~Subdivision which provides a range of lifestyle and economic options is managed in a way that ensures rural resources, character and environmental values are retained, directed away from high class soils and/or where indigenous biodiversity is being protected.~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter considers that subdivision and development policies and planning should provide for managed growth in rural communities.
- While land use change, subdivision and land development activities in rural areas may result in the loss of productive land, there is a need to recognise that farmers may need to undertake small lot subdivision for a number of reasons, including: providing for farm succession, disposing of surplus dwellings and for providing on-farm accommodation for family members and employees, and rearrangement of lot boundaries to enable more efficient land management.
- Considered, well-managed growth in rural communities provides for diversity and vibrancy in rural areas, sustains essential community infrastructure, and provides employment flexibility and opportunities.
- The submitter considers that there are benefits to enabling subdivision and other rural-residential opportunities, however, this should be done in a way that appropriately protects rural character and enables and maintains a reasonable use of productive land.
- FFNZ oppose the protection of rural landscapes or amenity on farmland which is characterised by ever-changing working landscapes, that are largely there as a result of farming activities that you would expect to find in a rural zone.
- Furthermore, they consider that land use and subdivision don't need to be controlled to protect areas of significant indigenous vegetation where there are clearly no more than minor effects, or where the effects can be successfully mitigated through permitted or controlled activity standards.

Point Number 680.60

Summary of Decision Requested: **Amend** Objective 5.3.1 (a) Rural character and amenity, as follows:

(a) ~~The values which contribute to Rural character and amenity are maintained.~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports the intent of the objective. However, some amendment is required to ensure the plan is appropriately focused and consistent with broader policy direction.
- The submitter considers that there are benefits to enabling a range of land use opportunities within the Rural Zone, and that this should be done in a way that appropriately maintains the values that contribute to the rural character and amenity of the zone.
- The submitter opposes the protection of rural landscapes or amenity on farmland which is characterised by ever-changing working landscapes, that are largely there as a result of farming activities that would be expected to be found in a rural area.
- A focus on 'values' would introduce a degree of flexibility that is necessary to recognising the evolving nature of rural farming areas.

Point Number 680.61

Summary of Decision Requested: **Retain** Policy 5.3.2 Productive rural activities, as notified, subject to the amendment sought below:

5.3.2 Policy - ~~Productive Rural production activities~~

(a) ~~Recognise and protect the continued operation of the rural environment as a productive working environment by:~~

(i) ~~Recognising that buildings and structures associated with farming and forestry and other operational structure for productive rural activities contribute to rural character and amenity values;~~

(ii) ~~Ensuring productive rural activities contribute to rural character and amenity values~~

(iii) ~~Providing for lawfully-established rural activities and protecting them from sensitive land uses and reverse sensitivity effects.~~

(iv) ~~Recognising the use and development of rural resources enables people and communities to provide for their economic, social and cultural wellbeing.~~

AND

Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission

Decision Reasons:

- The activities required to operate in the rural environment should be the overall focus of this policy. Submitter is not sure what is meant by 'productive rural activities' in this context and believe Waikato District Council (WDC) has inadvertently used the terms 'productive rural activities' and 'rural production activities' interchangeably. They are not interchangeable in our view.
- It is also important to acknowledge that change may occur as new markets and technologies are created. Therefore, production techniques will need to adapt and such change is not detrimental to rural amenity. A good example is the rise of viticulture in New Zealand over the last 20 years and the change from pastoral landscapes to vineyards.
- Farmers want the opportunity to continue to innovate and invest and adopt in new technologies and retain the flexibility to respond to markets. Submitter acknowledges that WDC has an important role to play in ensuring the Proposed District Plan does not stifle primary production with overly restrictive and unnecessary land use controls.
- That important goal can be achieved with acceptance of the relief sought across the submission.

Point Number 680.62

Summary of Decision Requested: **Amend** Policy 5.3.3 Industrial and commercial activities as follows:

~~(b) Industrial and commercial Rural~~ industries and services are managed to ensure that any potential adverse effect on the ~~they are in keeping with the~~ character of the Rural Zone are avoided, remedied or mitigated.

~~(a)~~ Avoid locating industrial...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the intent of this policy, it is considered that the amendments are required to ensure the wording is consistent with stated policy header and other policies within this section.
- The order of (a) and (b) would make more sense if the order was swapped. The key point being that activities without a functional need to be in the zone should be avoided. The supporting point is that if they are going to be in the zone any potential adverse effects on the rural character needs to be managed.

Point Number 680.63

Summary of Decision Requested: Amend Policy 5.3.4 Density of dwellings and buildings within the rural environment, as follows:

~~(a) Shall be at a density and scale~~ Retain open spaces to ensure rural character is maintained.

~~(b) Additional dwellings shall be directly associated with the scale and intensity of the farming activities on site~~ support workers' accommodation for large productive rural activities.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is concerned with Council's reference within the policy to retain open spaces. Open space is one element which contributes to the rural character. Prioritising this value over others has the potential to create perverse outcomes.
- The submitter has concerns at the priority given to workers' accommodation and consider the policy should also recognise that farm properties may require extra dwellings which are occupied by non-staff, for example, other family members living on the farm who may not be employed on the property. There will be situations such as farm succession where retired family members will continue to live on the property. Furthermore, the term 'worker' may not cover the situation where more than one owner of the property resides on the farm in separate housing, as they aren't technically 'staff'.

Point Number 680.64

Summary of Decision Requested: Amend Policy 5.3.5 (b) (iv) Earthworks activities as follows:

~~(iv) Adjoining properties and public services are protected~~ from the adverse effects of inappropriate earthworks.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submission supports the enabling intent of this policy. However, the amendment is appropriate to provide necessary context to 5.3.5(b)(iv).

Point Number 680.65

Summary of Decision Requested: Amend Policy 5.3.6 Intensive farming activities, as follows:

~~(a) Enable~~ Recognise that intensive farming activities may be increasingly required as the twin pressures on land required for urban growth and food production increases. provided they operate in accordance with industry best practice and management of adverse effects both on-site and any neighbouring sites.

~~(b) Ensure that intensive farming activities operate in such a way as to~~ appropriately manage adverse effects both on-site and on any neighbouring sites.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Policy 5.3.6 is misguided and an unnecessary duplication as written.
- The management of potential adverse effects from an intensive farming activity is addressed under Policy 5.3.7(h) and as such the second part of this policy is not required.
- The Proposed District Plan is short-sighted and not sufficiently future focused in its current response to intensive farming activities. Although NZ is a pastoral farming nation, intensive farming is a relevant way to increase production and reduce overhead costs. Increasing land prices mean that the ability to purchase large tracts of land for extensive production is becoming less viable. Policy about management of effects associated with intensive farming should be a separate policy.

Point Number 680.66

Summary of Decision Requested: Amend Policy 5.3.7 (a) and (b) and (c) Reverse sensitivity effects, as follows:

~~(a) Recognise the following features are typical of the rural environment and the effects are accepted and able to be managed:~~

~~(i) Large numbers of animals being farmed, extensive areas of plants, vines or fruit crops, plantation forests and farm forests;~~

~~(ii) Noise, odour, dust, traffic and visual effects~~ including buildings and structures associated with the use of land for farming, horticulture, forestry, farm quarries;

~~(iii) Existing~~ mineral extraction and processing activities;

~~(iv) Minor dwellings;~~

~~(v) Papakainga housing developments within Maaori Freehold land.~~

~~(b) Manage activities to ensure that adverse effects (other than minor effects) are avoided, remedied or mitigated. Avoid adverse effects outside the site and where those effects cannot be avoided, they are to be mitigated.~~

~~(c) Mitigate the adverse effects of reverse sensitivity through the use of setbacks and the design of subdivisions and development~~ where appropriate.

...

AND

Add to Policy 5.3.7 Reverse sensitivity effects a new clause (i) as follows:

~~(i) Ensure that land use activities that are sensitive to the effects of rural activities do not constrain the operation of rural activities.~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports the intent of Policy 5.3.7, which is in part to raise awareness of the types of activities and associated effects which are considered appropriate within the rural environment. It is appropriate for the plan to be clear and upfront that farming activities must be able to function effectively and not be unduly restricted by new and encroaching activities being established within the rural zone.
- Amendments are required to ensure the plan accurately implements reverse sensitivity principles.
- The submitter accepts that where possible unacceptable nuisance effects such as noise and odour should be contained within the property boundary. However, farming requirements and weather conditions mean that even with the best intention it is not always possible to avoid a level of nuisance effect. In such instances (which are generally intermittent and temporary) it is imperative that the Plan clearly allows for this to ensure the farm business is not unduly impacted upon.
- This could include such activities as harvesting contractors and farmers working through the night to harvest crops due to short weather windows, odour from the feeding out of silage in neighbouring paddock, and short term odour from the spreading of effluent on pasture.
- These effects are not unreasonable to expect in the Rural Zone, and that therefore 5.3.7(b) is inappropriate as presently worded. We consider that it could result in creating unreasonable expectations of the amenity of the Rural Zone, and perpetuate reverse sensitivity issues with people unaccustomed to the rural environment complaining about normal farming activities and expecting those effects to be avoided or mitigated in every instance.
- Farming in a rural area is a lawfully established existing activity
- Noise, lighting, odour and dust can be quite reasonable effects as a consequence of normal farming activities as outlined in (a) there are some concerns as to how (a) and (b) are to be read together, along with reference to the avoiding, or mitigating of usual and expected effects within the rural environment.
- The methods used to give effect to this policy must not place undue constraints on either the existing land use or the potential land use activity. Any decisions as to separation distance as a method to address such issues must be based on a case by case assessment and not an automatic planning response.
- The submitter supports adopting an approach for low probability and low impact scenarios of incurring occasional relatively minor adverse effects rather than imposing external buffer zones. Submitter is opposed to use of blanket external buffer zones as a proxy for triggering resource consent, as it places restrictions on adjoining landowners who have no responsibility for the adverse effect, and who receive no compensation for the restrictions placed on their activities. That said, it may be appropriate for sensitive activities to avoid locating within close proximity to activities that may emit objectionable odours and discharges.

Point Number 680.67**Summary of Decision Requested:** Amend Policy 5.3.8 (e) Effects on rural character and amenity from rural subdivision, as follows:

~~(e) Subdivision, use and development opportunities ensure that rural character and amenity values are maintained. Subdivision within the Rural Zone should give particular consideration to anticipated rural land use and development and recognise that integrated and well planned subdivision design;~~

(i) Creates desirable places to live.

(ii) Results in the efficient and effective land use.

(iii) Provides for anticipated future land use and development.

(iv) Recognises the physical layout and underlying topography of the site.

(v) Integrates with existing utility services and infrastructure.

(vi) Gives effect to any relevant outline development plan or structure plan.

(vii) Implements best practice urban design principles

(viii) Enables efficient utilisation of productive farmland through appropriate provision for rearranging property ownership to enable management of farmland according to landowner need

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- Submitter understands the intent of the policy but consider Waikato District Council's focus on rural character and amenity betrays a lack of understanding of the broader issues and drivers for subdivision within a rural environment.
- Subdivision is primarily a process of defining (or redefining) land parcel boundaries. However, for farmers and other large landowners, land is a critical asset, and there are important implications arising from regulation of subdivision that need to be appropriately considered.
- Submitter agrees that inappropriately designed or located subdivision can result in the inefficient use of natural and physical resources that can give rise to adverse environmental effects. These concerns should be appropriately addressed through the Proposed District Plan (PDP) in a way that provides certainty for developers and landowners, and which aligns subdivision provisions with Council's broader strategic planning.
- It is also important that the PDP recognises that unnecessary constraints on otherwise appropriate subdivision can also result in adverse effects. In considering the proposed rules around subdivision, the submission seeks to ensure there is a degree of flexibility for landowners in the rural area who need subdivision enabled in order to facilitate efficient management of the land resource. This recognises that economic and social drivers for subdivision may differ between farming operations, and that these different drivers often require different treatment.
- Farmers undertake low impact subdivision for a variety of reasons. These vary from diversifying their business into tourism operations (lodgings and or associated tourism development and infrastructure), providing for or disposing of a surplus dwelling on the property where a neighbouring farm is purchased, providing for a family member or staff member to live on the farm or to implement a succession plan for multiple siblings through small lot subdivision, or for boundary adjustment of boundary relocation to promote the more efficient administration of farm land.
- A farm may be valued considerably beyond its underlying productive capacity, simply because of the farm's proximity to the urban centre and urban infrastructure, or the amenity afforded by proximity to a desirable locality, such as coastal areas. However, these reflect a piece of land's potential value for other land uses, and do not reflect its value for farming per-se. This situation can result in a farmer having to pay considerably more in rates or facing significantly increased opportunity costs from continuing to farm the land, as opposed to subdividing the property for some other land use. This in-turn creates a significant economic driver for subdivision. This tautological driver of land value needs to be carefully managed if NZ is to avoid losing valuable productive farmland in favour of non-farming development and use.
- This situation can be exacerbated where returns from farming are variable, due to a variety of factors including: weather conditions, economic conditions, individual property circumstances and market demands, which disrupt farming continuity. Therefore enabling diversification, flexibility, responsiveness and cash flow, are critically important to retaining the viability of farming.

Point Number 680.68**Summary of Decision Requested:** Delete Policy 5.3.9 Non-rural activities.

AND

Any consequential changes necessary to give effect to the relief sought and/or concerns raised in the submission.

Decision Reasons:

- The submitter considers Policy 5.3.9 an unnecessary duplication of issues which are addressed by other policies within the Proposed District Plan.

Point Number 680.69**Summary of Decision Requested:** Retain Policy 5.3.11 Home occupations, as notified.**Decision Reasons:**

- The submitter supports the enabling intent of this policy. It is important to provide for small scale diverse business opportunities within the rural zone with can help to sustain a vibrant rural community.

Point Number 680.70

Summary of Decision Requested: Retain Policy 5.3.13 Waste management activities, as notified.

Decision Reasons:

- The submitter broadly supports the intent of this policy with the focus of (b) and (c) on waste management facilities appropriate.
-

Point Number 680.71

Summary of Decision Requested: Amend Policy 5.3.15 (a) (ii) Noise and vibration, as follows:

(ii) Limiting the timing and duration of noise-generating activities which are not anticipated within rural areas:

AND

Delete Policy 5.3.15 (a) (viii) Noise and vibration.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- In relation in 5.3.7, submitter considers plan provisions should acknowledge the issue of 'reverse sensitivity' when addressing 'noise and vibration effects' and that there must be provision to allow for a reasonable level of noise associated with agricultural activity within the rural zone – both in daylight hours and through the night.
 - There will be situations for example where farm machinery will be used for making hay or harvesting crops outside the hours prescribed in Rule 22.2.1.1 (P2); newly weaned animals will also be making noise outside of any specified hours. Such noises and vibrations must legitimately be expected in a rural zone.
 - There is concern that the policy as currently worded will create unreasonable expectations of the amenity of the Rural Zone, and perpetuate reverse sensitivity issues with people unaccustomed to the rural environment complaining about normal farming activities and expecting those effects to be controlled in every instance.
-

Point Number 680.72

Summary of Decision Requested: Retain Policy 5.3.16 Specific area - Agricultural research centres, as notified.

Decision Reasons:

- Submitter supports recognition of the need for research centres.
-

Point Number 680.73

Summary of Decision Requested: Retain Objective 5.4.1 Minerals and extractive industries, as notified.

Decision Reasons:

- The submitter agrees with the Objective.
-

Point Number 680.74

Summary of Decision Requested: Retain Policy 5.4.2 Access to minerals and extractive industries, as notified.

Decision Reasons:

- The submitter supports this policy approach provided that it doesn't inadvertently capture farm quarries in any resource consent process.
-

Point Number 680.75

Summary of Decision Requested: Amend Objective 5.5.1 (a) Hamilton's Urban Expansion Area, as follows:

(a) Protect land within Hamilton's Urban Expansion Area for future urban development whilst:

AND

Add to Objective 5.5.1 (a) Hamilton's Urban Expansion Area new clause (i), as follows:

(i) Ensuring that existing rural production activities and industrial activities are protected from the effects of reverse sensitivity when locating new residential development.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports co-ordinated future planning with regards to urban expansion, however this must not be at the expense of lawfully established activities.
-

Point Number 680.76

Summary of Decision Requested: Retain Objective 6.1.1 Development, operation and maintenance of infrastructure, as notified.

Decision Reasons:

- The submitter supports a single objective aimed at social, economic, cultural and environmental benefits.
-

Point Number 680.77

Summary of Decision Requested: Retain Policy 6.1.2 Development, operation and maintenance, as notified.

Decision Reasons:

- The submitter gives conditional support for these policies to provide for infrastructure, provided that these don't unnecessarily burden farmers with needless delays and costs nor erode ability of farmers to undertake practical day-to-day farming without being encumbered by regulations that result in undue hardship on farmers for a wider public good benefit.

Point Number 680.78

Summary of Decision Requested: **Retain** Policy 6.1.3 Technological advances as notified.

Decision Reasons:

- Submitter supports making infrastructure more accessible, especially within rural areas. Submitter is opposed to policy which favours granting access for infrastructure maintenance that unnecessarily infringes on rights of farmers to be able to manage their properties or compromises the safety and efficiency of their farming operations.

Point Number 680.79

Summary of Decision Requested: **Amend** Policy 6.1.4. (a) (i) Infrastructure benefits, as follows:

(i) Enabling enhancement of the quality of life and residential standard for people and communities, including rural areas;

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports infrastructure for its benefits but seeks that the policy also includes benefits for rural-based communities, industry and agriculture.

Point Number 680.80

Summary of Decision Requested: **Amend** Policy 6.1.5 Natural hazards and climate change, as follows:

(g) Improve the resilience of infrastructure to natural hazard risk and climate change disruptions by:

(i) Encourageing the design and location of infrastructure to take account of natural hazards and the effects of climate change.

(ii) Ensure management and operational decisions include appropriate natural hazard and climate change risk analysis.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports the aim of improving resilience to natural hazard risks and climate change disruptions, including provision and management of infrastructure to anticipate these risks. The policy could be better worded along these lines.

Point Number 680.81

Summary of Decision Requested: **Amend** Objective 6.1.6 (a) Reverse sensitivity, as follows:

(g) Existing and/or designated infrastructure (including the National Grid) is protected from reverse sensitivity effects, and ~~infrastructure (including the National Grid)~~ is not compromised.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports protection of existing infrastructure from reverse sensitivity effects, but this should not apply to infrastructure that does not yet exist. Submitter seeks that this policy be amended by referring to protection of existing and/or designated infrastructure.

Point Number 680.82

Summary of Decision Requested: **Amend** Policy 6.1.7 Reverse sensitivity and infrastructure, as follows:

(a) Avoid, remedy or mitigate reverse sensitivity effects on existing and/or designated infrastructure from subdivision, use and development ~~as far as~~ ~~reasonably practicable~~, so that the ongoing and efficient operation of infrastructure is not compromised.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- This policy should be refocused on existing or designated infrastructure and on proposed subdivision, development and use. Submitter is concerned that this policy will be used to unfairly prejudice against existing farming activity in favour of infrastructure that doesn't exist yet. Infrastructure that doesn't exist should properly be subject to its own consent application or notice of requirement process, where merits can be considered on a case-by-case basis in the context of the surrounding environment and land use.
- Some subdivision in rural areas, such as boundary relocation or boundary adjustment where the pattern of land use activity is not being intensified, can support the efficient management of farming and primary production, and is only likely to have minor reverse sensitivity effects on existing infrastructure. The policy should be more appropriately focused on mitigation or remediation of reverse sensitivity effects (rather than avoidance).
- Some subdivision, such as small lifestyle lots to facilitate protection of significant natural areas, can have important positive environmental effects. Such subdivision should not be automatically biased against by a policy strictly focused on avoidance of reverse sensitivity effects on infrastructure.

Point Number 680.83

Summary of Decision Requested: **Amend** Objective 6.1.8 Infrastructure in the community and identified areas as follows:

6.1.8 Objective – Proposed and/or designated infrastructure in the community and identified areas

(g) Proposed and/or designated infrastructure takes into account the qualities and characteristics of surrounding environments and community well-being.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this objective provided it is refocused to apply to proposed and/or designated infrastructure. Generally, in rural areas, wider open spaces and lower development intensity mean that adverse effects on amenity and environmental quality can be more readily absorbed without consequence. (This is different from lawfully established existing infrastructure that may have been designed when surrounding environmental qualities were different, and in respect of which it is appropriate to consider reverse sensitivity effects, and where it may be an efficient use of resources to maintain such infrastructure for the time being.)

Point Number 680.84

Summary of Decision Requested: **Retain** Policy 6.1.9 Environmental effects, community health, safety and amenity, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.85

Summary of Decision Requested: **Retain** Policy 6.1.10 Infrastructure in identified areas, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.86

Summary of Decision Requested: **Amend** Policy 6.1.11 (a) Undergrounding new infrastructure, as follows:
 (a) Encourage new infrastructure in residential and urban areas to be placed underground unless...
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy provided that it applies to urban areas. Undergrounding is unnecessary in the context of rural areas, where the disadvantages and costs of undergrounding may far outweigh any benefits.

Point Number 680.87

Summary of Decision Requested: **Amend** Policy 6.1.12 (a) Co-location of compatible facilities, as follows:
 (a) Encourage compatible infrastructure to share location or facilities where operational advantages can be achieved or adverse effects are reduced, and where reverse sensitivity effects on other surrounding land use and development is not increased.
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports this policy provided that it doesn't extend the area of concern for reverse sensitivity around co-located infrastructure in a way that would otherwise further constrain farming activities. Consideration should be included within the policy for ensuring reverse sensitivity effects on other uses is not increased.

Point Number 680.88

Summary of Decision Requested: **Retain** Policy 6.1.13 Future growth areas, as notified.

Decision Reasons:

- The submitter supports this policy as an efficient use of resources.

Point Number 680.89

Summary of Decision Requested: **Retain** Policy 6.1.14 Electromagnetic and radio frequency fields, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.90

Summary of Decision Requested: **Amend** Policy 6.1.15 (a) Raglan navigation beacons, as follows:
 (a) Avoid proposed new development and land use obscuring navigational beacons and associated view shafts at Raglan Harbour (Whaingaroa).
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter supports this policy, provided that it is aimed at new development on land that might otherwise obstruct line-of sight for navigation beacons and that it won't impinge on existing farming activity and built form.

Point Number 680.91

Summary of Decision Requested: **Delete** Policy 6.1.16 Water conservation.
 OR
Amend Policy 6.1.16 Water conservation as follows:
6.1.16 Policy Stormwater management for new development and subdivision ~~Water conservation~~
 AND

Amend Policy 6.1.6 Water conservation, as follows:

(g) Where new development and land use is proposed which may otherwise give rise to stormwater ponding, overland flow and flood management issues, encourage water conservation measures and, where appropriate, low impact stormwater design and facilities.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- If the policy is aimed at water conservation in order to facilitate minimum flows for water allocation, that is a regional council matter, and the district council does not have jurisdiction over this under the Act.
- Similarly, if the policy is aimed at freshwater quality management, it also has no place in a district plan.
- If it is aimed at flood control, and managing stormwater ponding and overland flow, then it should be focused in the context of proposed development intensification and subdivision which triggers stormwater management concerns, and in which case the title 'water conservation' is a misnomer.

Point Number

680.92

Summary of Decision Requested:

Amend Objective 6.2.1 (a) National grid, as follows:

(a) The national significance of the National Grid is recognised and managed in order to meet the needs of present and future generations protected.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes this objective as it is not consistent with the National Policy Statement for Electricity Transmission 2010 ('NPSET'). The NPSET is aimed at enabling the management of the effects of the electricity transmission network in light of its national significance being the need to operate, maintain, develop and upgrade the electricity transmission network. It says nothing about protection. The objective of the NPSET is: To recognise the national significance of the electricity transmission network by facilitating the operation, maintenance and upgrade of the existing transmission network and the establishment of new transmission resources to meet the needs of present and future generations, while:
 - *managing the adverse environmental effects of the network; and*
 - *managing the adverse effects of other activities on the network.*
- The submitter is concerned that if district plans start to seek protection of assets used or owned by Transpower NZ Ltd, that this will escalate into a requirement all sorts of impositions on farming activity where farms are traversed by part of the National Grid. Submitter seeks that this objective be amended to more closely reflect the objective of the NPSET.

Point Number

680.93

Summary of Decision Requested:

Amend Policy 6.2.2. (a) Recognise the national grid, as follows:

Recognise the operational, functional and technical constraints of the National Grid, and the interconnectedness of networks where these may be co-located within the National Grid Yard or within public land, including roads.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy provided that its confined to consideration of National Grid matters within the National Grid Yard and the National Grid Corridor. Outside these areas, farmers have the right to use and to manage access to their farms including the right to refuse access across private land.

Point Number

680.94

Summary of Decision Requested:

Retain Policy 6.2.3 Operation and development of the National Grid.

Decision Reasons:

- The submitter supports this policy.

Point Number

680.95

Summary of Decision Requested:

Amend Policy 6.2.4 (a) Maintenance and minor upgrade the National Grid, as follows:

(a) Enable the repair, maintenance, replacement and minor upgrade of the National Grid within the National Grid Corridor.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy. Replacement of an underground pipeline, wires and replacement of an electricity tower can be seriously big jobs. Whole paddocks or areas of the farm may be taken over by the network utility operator and unable to be used by the farmer, as well as experiencing significant traffic over their farm by work crews arriving and leaving for work every day and vehicles carrying gear and equipment. Disturbance and disruption includes damage to pasture and soil compaction; damage to property, gates and fence lines; livestock disturbance; having to change farming practice like not being able to graze particular paddocks or continue with irrigation; damage and destruction of crops; and storage of materials and machinery on the property. Landowners are concerned about liability if there is an accident while workers are on their land. All these disruptive matters which occur outside the National Grid Corridor should be handled by landowner agreement with network utility operators, and is outside the sphere of the district plan to control.
- The policy consideration be confined to matters within the National Grid Corridor. In particular, 'replacement' or 'minor upgrade' should not involve any increase in adverse effects beyond this corridor.

Point Number

680.96

Summary of Decision Requested:

Add to Policy 6.2.5 (a) Environmental effects new clauses (vi) and (vii) as follows:

(vi) Avoiding, remedying or mitigating adverse effects (including intrusion), from operation, maintenance or upgrading of infrastructure, which may intrude on activities outside the National Grid Yard; and

(vii) Enabling non-sensitive farming activity, such as: animal grazing, pasture maintenance, pest and weed control, as well as maintaining existing farm infrastructure such as dams and water storage tanks, troughs, water races and water supply pipelines, stock feed pads, stock and vehicle access tracks (including bridges, culverts and fords), fences, rural fire breaks, and farm telecommunication facilities, within the National Grid Yard, except within 12m of a National Grid support structure.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support this policy. Any policy which seeks to manage landowners' activities around utilities and the potential for reverse sensitivity needs to differentiate between rural and urban land uses. Rural and farming land uses will not have the same reverse sensitivity effects on any network utility due to the wider open spaces, low density of buildings, larger property sizes and less people on the property.
- It is a burden for landowners to host public infrastructure on their property, which has mostly been installed in the past without compensation. Landowners must be prepared to operate their farming activities around public infrastructure, and to have work crews on their property doing operation or maintenance activities. In today's health and safety climate, this is not something that farmers take lightly.

The submitter contends that the policy criteria be expanded to include:

- Avoiding, remedying or mitigating adverse effects (including intrusion) of infrastructure servicing requirements in areas outside the National Grid Yard.
- Enabling farming activity such as; animal grazing, pasture maintenance, pest and weed control, as well as maintaining existing farm infrastructure such as dams and water storage tanks, troughs, water races and water supply pipelines, stock feed pads, stock and vehicle access tracks (including bridges, culverts and fords), fences, rural fire breaks, and farm telecommunication facilities, within the National Grid Yard, except within 12m of a National Grid support structure.

Point Number

680.97

Summary of Decision Requested:

Amend Policy 6.2.6 (a) Reverse sensitivity and the National Grid, as follows:

(a) Manage proposed subdivision, use and development adjacent to the National Grid Yard so that the operation, maintenance, upgrading and development of the National Grid is not compromised by ensuring that:

(i) The National Grid is identified on the planning maps and the National Grid Yard and National Grid Corridor establish buffer distances for managing land use development and subdivision near the National Grid;

(ii) Sensitive proposed land uses and buildings and structures that may compromise the National Grid, including intensive farming activities, are excluded from establishing within the National Grid Yard;

(iii) Subdivision is managed within the National Grid Corridor to avoid subsequent land use from compromising the operation, maintenance, minor upgrading and development of the National Grid; and

(iv) Changes to existing activities within a National Grid Yard do not further restrict the operation, maintenance, upgrading and development of the National Grid.

AND

Add to Policy 6.2.6 (a) Reverse sensitivity and the National Grid, new clause (v) as follows:

(v) Existing farming activity which is not sensitive to management of the National Grid, such as grazing, intensive stock feeding in open feedlots, land cultivation, maintenance of pasture, existing farm accessways and tracks (including stock bridges, culverts and fords), fences and stock exclusion structures, areas for fodder storage, rural fire breaks, water supply pipelines, farm dams, stock water troughs, permitted vegetation clearance, and pest and weed control, is permitted within the National Grid Yard, except within 12 metres from the outer edge of any national grid support structure.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy. Rural and farming land uses will not have the same reverse sensitivity effects on any network utility due to the wider open spaces, low density of buildings, larger property sizes and less people on the property. This includes intensive farming activity where animals are kept in outdoor feedlots. Where intensively farmed animals are kept indoors, the submitter accepts that minimum separation distances between buildings and high-voltage electricity transmission lines and structures is important. However, this can be managed through policy aimed at restriction of new structures and development within the National Grid Yard.
- The submitter seeks that the policy's focus is such that matters requiring consideration be confined to being within the National Grid Yard, and to network utility activities that can be lawfully carried out within the National Grid Yard.
- The submitter seeks that the policy be amended so that it clearly only applies to proposed subdivision, use and development within the National Grid Yard, and does not impugn existing lawfully established activity and development.
- The submitter seeks that existing farming, and maintenance of existing farm accessways and fences within the National Grid Yard, be provided for.

Point Number

680.98

Summary of Decision Requested:

Retain Objective 6.3.1 Renewable energy, as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number

680.99

Summary of Decision Requested:

Retain Policy 6.3.2 Utilising energy efficiency, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number

680.100

Summary of Decision Requested:

Retain Policy 6.3.3 Enabling renewable electricity generation, as notified.

Decision Reasons:

- The submitter supports this policy to the extent that community-scale REG facilities are of a scale and character that is appropriate to their proposed location and not inconsistent with the manner of existing development and land use on adjoining sites. Submitter is particularly concerned about potential compromises to existing farm development and farming activity such as farm airstrips and associated aircraft take-off and landing flight paths that can result from inappropriate placement of large wind turbine structures.

Point Number

680.101

Summary of Decision Requested:

Retain Policy 6.3.4 (a) Future renewable electricity, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.102

Summary of Decision Requested: **Add** to Policy 6.3.5 Existing renewable electricity facilities, a new clause (b) as follows:

(b) Enable non-sensitive rural land use including: animal grazing, land cultivation and maintenance of pasture, pest and weed control, farm accessways and tracks fences and stock exclusion structures (including stock bridges, culverts and fords), water supply pipelines, farm dams and stock water troughs, and farm storage areas for fodder storage, fuel, fertiliser, hazardous substances, including associated farm storage buildings, sheds, animal barns and shelters and rural fire breaks, and permitted vegetation clearance, pest and weed control

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy provided that recognition is made in the policy for non-sensitive farming activity such as animal grazing, cultivation and pasture maintenance, pest and weed control, maintenance of farm tracks (including stock bridges, culverts and fords), fences, water supply pipelines, farm dams and stock water troughs, and farm storage areas for fodder storage, fuel, fertiliser, hazardous substances, including associated farm storage buildings, sheds, animal barns and shelters and rural fire breaks.

Point Number 680.103

Summary of Decision Requested: **Retain** Objective 6.4.1 (a) Integration of infrastructure with subdivision, land use and development, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.104

Summary of Decision Requested: **Amend** Policy 6.4.7 (a) Stormwater, as follows:

(a) Ensure that stormwater and drainage infrastructure for subdivision, land use and development in urban and rural residential areas:

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy provided that criteria for low-impact design approaches and minimising impervious surfaces is focused so that these only apply in urban areas. In rural areas, the impact of stormwater from development, and the amount of impervious surface in comparison to land area, is insignificant to the point that these are not relevant issues, and the costs of carrying out assessment and design for these matters far outweighs any benefit to be derived.

Point Number 680.105

Summary of Decision Requested: **Retain** Objective 6.5.1 Land transport network, as notified.

Decision Reasons:

- The submitter supports this objective.

Point Number 680.106

Summary of Decision Requested: **Retain** Policy 6.5.2 (a) Construction and operation of the land transport network.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.107

Summary of Decision Requested: **Retain** Policy 6.5.3 Road hierarchy and function, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number 680.108

Summary of Decision Requested: **Add** to Policy 6.5.4 Road standards, a new clause (b) as follows:

(b) Ensure that in rural areas, the safe and efficient functioning of roads also takes into account safe sight distances, vehicle entranceways, pavement design and construction, road geometry and speed environments.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy and submits that the policy be expanded to recognise that in rural areas, the safe and efficient functioning of roads also takes into account safe sight distances, vehicle entranceways, pavement design, construction and geometry and speed environments. Rural roads are often longer roads with higher speed environments than urban roads, and safe and efficient roads are important for farming communities.

Point Number 680.109

Summary of Decision Requested: **Add** to Policy 6.5.5 Road safety, a new clause (b) as follows:

(b) To recognise that in rural areas, there may be agreements with landowners to utilise road berms for grazing or hay making, and that changes to road design to accommodate new access for subdivision need to consider the effect of subdivision and site access on the safe and efficient functioning of the road network in light of such arrangements.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports this policy and submits that the policy be expanded to recognise that in rural areas, there may be agreements with landowners to utilise road berms for grazing or hay making, and that changes to road design to accommodate new access for subdivision need to consider the effect of subdivision and site access on the safe and efficient functioning of the road network in light of such arrangements.

Point Number

680.110

Summary of Decision Requested:

Retain Policy 6.5.6 (a) Network utility location, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number

680.111

Summary of Decision Requested:

Retain Policy 6.5.7 (a) Vehicle access, as notified.

Decision Reasons:

- The submitter supports this policy.

Point Number

680.112

Summary of Decision Requested:

Amend Objective 7.1.1 (a) as follows:

(a) *A district that acknowledges its past by recognising, identifying, protecting and promoting historic heritage.*

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose of the Objective however amendment is required to promote consistency and clarity within the Proposed District Plan. We note that the term 'heritage' is not defined in the Proposed District Plan.

Point Number

680.113

Summary of Decision Requested:

Amend Policy 7.1.2 (a) Identification, as follows:

(a) ~~Identify and schedule historic heritage identified by the Regional Heritage Forum as requiring protection from inappropriate subdivision, use and development throughout the District that represent the heritage and cultural themes and activities of the district.~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter considers this Policy has the potential to unnecessarily duplicate work the Regional Council is facilitating via the Regional Heritage Forum. It is the submitter's understanding this forum is currently scoping an inventory of historic heritage items, sites and areas for inclusion in district plans, which merit some form of heritage management or possibly even protection from inappropriate subdivision, use and development.
- The submitter prefers that there is some consistency between different agencies managing heritage issues, hence our relief sought in this regard.

Point Number

680.114

Summary of Decision Requested:

Amend Policy 7.1.3 (a) and (d) Heritage items, as follows:

(a) *The contribution of historic heritage to the Waikato District and its communities is maintained through the protection management and conservation of its buildings, sites, structures, places and areas through restoring, conserving and reusing.*

...

(d) ~~Ensure~~ *Protect* the relationship of identified redoubts and battlefields with their surrounds or settings is from inappropriate subdivision, use and development.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter is broadly supportive of the policy approach being taken. Council is appropriately limiting matters to 'inappropriate' subdivision, use and development. Section 6 (f) of the RMA provides for the protection of historic heritage from inappropriate subdivision, use, and development. With this direction, only inappropriate activities that could damage sites need to be managed.

Point Number

680.115

Summary of Decision Requested:

Amend Policy 7.1.7 Identification, as follows:

~~(a) Notable trees should be identified and scheduled in Schedule 30.2 in a manner that recognises the important values of each tree. Identify and schedule trees, including groups of trees and assess them for significance and/or notable values.~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- With reference to Schedule 30.2 Notable Trees, submitter is unsure why this policy is necessary. Presumably the relevant Proposed District Plan Schedule should be referenced in any such policy, otherwise there is concern that the policy could be used to justify some sort of assessment or onerous consenting requirement in respect of any old tree.

Point Number	680.116
Summary of Decision Requested:	<p>Amend Policy 7.1.8 (a) Tree protection, as follows:</p> <p>(a) <i>Ensure removal of a notable tree listed in (Schedule 30.2 Notable Trees) only occurs if the tree is in an unsafe condition and/or there is a serious risk to human life or property.</i></p> <p>(b) <i>Ensure land use or work within the dripline of a notable tree listed in (Schedule 30.2 Notable Trees) does not affect the form or health of the tree.</i></p> <p>(c) <i>Enable removal of the protective tree status if the values associated with the protected tree have deteriorated.</i></p> <p>(d) <i>Enable removal of a notable tree on private property if the reasonable use and enjoyment of the property and surrounds is compromised.</i></p> <p>AND</p> <p>Any consequential changes needed to give effect to this relief.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter supports the practical approach adopted by this policy but consider it needs to go further to enable the removal of a notable tree on private property if the use and enjoyment of that property is compromised.
Point Number	680.117
Summary of Decision Requested:	<p>Amend Policy 7.1.9 Tree maintenance, as follows</p> <p>(a) <i>Enable the maintenance and management of a notable tree for the purposes of:</i></p> <p>(i) <i>Ensuring the continuing health, structural integrity and amenity value of the tree; OR and</i></p> <p>(ii) <i>The reasonable use and enjoyment of the property and surrounds.</i></p> <p>AND</p> <p>Any consequential changes needed to give effect to this relief.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter broadly supports the intention of the policy however we consider that the two purposes are not mutually inclusive. The reasonable use and enjoyment of private property and surrounds is important in and of itself, the amendment is required to acknowledge and recognise that.
Point Number	680.118
Summary of Decision Requested:	<p>Amend Policy 8.1.3 Esplanade reserves and walkways, as follows</p> <p>(a) <i>With the exception of subdivision in the Rural Zone, to Acquire esplanade reserves or strips along coasts, rivers, lakes and wetlands during subdivision to enable the creation of trails and public access, particularly in identified high priority areas in Appendix 4.</i></p> <p>AND</p> <p>Any consequential changes needed to give effect to this relief.</p>
Decision Reasons:	<ul style="list-style-type: none"> The submitter is opposed to creation of esplanade reserves or strips where land is being subdivided for the purposes of facilitating farming in the Rural Zone. The disadvantages far outweigh the benefits. Any given member of the public might visit such waterway margins once in their lifetimes, if at all, while farmers have to put up with theft and nuisance on a continual basis. Creation of public access alongside farmland encourages all sorts of problems for farmers, including theft of farm property and stock, and harassment/harm of farm animals by careless dog owners. In addition, unless any such esplanade reserves that are acquired can be responsibly managed for pests and weeds (and unwanted excess vegetation growth blocking waterways), then provision of esplanade reserves ultimately results in land flooding problems for farmers in the vicinity. Where nuisance plants like tobacco weed get established on riparian margins, this can cause adverse effects on water quality through exposing riparian areas to soil erosion when the tobacco weed etc gets swept away in big flood events Moreover, due to the pattern of existing land fragmentation, any reliance on a requirement to provide esplanade reserves upon subdivision of land almost certainly never results in continuous esplanade access along any given river or stream margin. Any access that might otherwise result alongside rivers and streams from such subdivision, ends up at best being intermittent due to the ad-hoc and infrequent timing of rural subdivision. Furthermore, farmers should not have to provide esplanade reserves or strips where they are only seeking boundary relocation or boundary adjustment to enable better practical management of farmland. Any requirement to acquire esplanade reserves or strips should be accompanied by a strategy which identifies waterways where acquisition of esplanade reserves is a priority for the purposes listed in section 229 and 230 of the RMA, in which all the management issues associated with esplanade reserves (such as enabling safe and practical public access, or pest and weed control etc) are provided for in a comprehensive manner in a way that also sits outside the district plan among the Council's other functions under the Local Government Act 2002 and the Reserves Act 1977.
Point Number	680.119
Summary of Decision Requested:	<p>Delete Chapter 10 - Hazardous substances.</p> <p>AND</p> <p>Replace with an advice note which states that it is no longer a district council function to control any actual or potential effects of the use, development, or protection of land, for the purpose of the prevention or mitigation of any adverse effects of the storage, use, disposal, or transportation of hazardous substances. Hazardous substances are adequately managed by the Hazardous Substances and New Organisms Act (HSNO) and there is no need for further regulation in the Waikato District Plan.</p> <p>AND</p> <p>Any consequential changes needed to give effect to this relief.</p>
Decision Reasons:	<ul style="list-style-type: none"> Federated Farmers is strongly opposed to these hazardous substance provisions and recommends they be replaced with a framework that recognises hazardous substances are already adequately managed by the Hazardous Substances and New Organisms Act 1996 ("HSNO") and there is no need for further regulation in the District Plan. HSNO already provides a comprehensive and far reaching regulatory framework for managing hazardous substances. The Health and Safety at Work Act 2015 also provides regulatory controls that users and handlers of hazardous substances must be appropriately trained and certified. The Council is unnecessarily duplicating existing regulation for no additional benefit, there is also a risk that Council regulation will be inconsistent. FFNZ has provided alternative relief sought in response to the notified Objective and policies below. However, this is in the interests of being thorough rather than accepting of the ultra vires approach.
Point Number	680.120
Summary of Decision Requested:	<p>Amend Objective 10.1.1 Effects of hazardous substances, as follows:</p> <p>(a) <i>Residual risk associated with the storage, use, or disposal of hazardous substances is managed to ensure that the effects on people, property and the environment are acceptable, while recognising the benefits of activities using hazardous substances.</i></p> <p>AND</p>

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The risk management approach of the Objective is supported. Primary producers rely on a number of hazardous substances for everyday operations and as such it is vital that farming and horticulture can continue to use and store necessary hazardous substances without being captured by unnecessary land use controls.
- It is considered the proposed Objective is inappropriately focused on the benefit of the 'facilities' rather than the benefits of using hazardous substances.
- There is also some concern with the proposed definition of Hazardous Facility. A separate submission point will address this issue under Chapter 13.

Point Number

680.121

Summary of Decision Requested:

Amend Policy 10.1.2 (a) Location of new hazardous facilities, as follows:

(a) *New hazardous facilities minimise the risk to the environment (including people and property) to acceptable levels by:*

(i) *Siting new hazardous facilities in appropriate locations that are separated from incompatible activities such as sensitive land use and infrastructure, and environment;*

(ii) *Avoid locating near to sensitive land use activities and infrastructure*

(iii) *Designing, constructing and operating hazardous facilities in a manner that ensures the adverse effects of the operation or an accidental event involving hazardous substances can be avoided, remedied or mitigated ~~or contained within the site;~~ and*

(iv) *Disposing hazardous wastes to authorised disposal or treatment facilities that have appropriate management systems in place.*

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The intention of this policy is understood, however there appears to be unnecessary duplication in parts and it needs to be re-phrased to be clearer and more precise.
- Issues with the definition of Hazardous Facility will be addressed in a submission point related specifically to the definitions chapter.

Point Number

680.122

Summary of Decision Requested:

Retain Policy 10.1.3 Residual risks of hazardous substances as notified (if the definition of Hazardous facility is amended as per amendments sought, as outlined in a separate submission point):

OR

Amend Policy 10.1.3 Residual risks of hazardous substances as follows:

(a) *Facilities for the use, storage, or disposal of hazardous substances shall identify and assess potential adverse effects (including cumulative risks and potential effects of identified natural hazards) to prevent unacceptable levels of risk to human health, safety, property and the natural environment. Promote better understanding of the potential adverse effects of the use, storage or disposal of hazardous substances, and the methods and controls for avoiding remedying or mitigating such effects.*

(b) *Establish thresholds of acceptable risks from the use, storage, transportation and disposal of hazardous substances on the health and safety of people, and the environment.*

(c) *To provide for the manufacture, storage, use, disposal and transportation of hazardous substances in accordance with industry protocols and regulations established under the Hazardous Substances and New Organisms Act 1996.*

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter considers the all-encompassing nature of the *Hazardous Facility* definition renders this policy ineffective and inappropriate. A garden shed or storage cupboard in the laundry or garage would meet the definition of *hazardous facility* and as such trigger the requirement for a user of garden sprays to identify and assess adverse effects to prevent unacceptable levels of risk to human health, safety, property and the natural environment. It is acknowledged from the Section 32 report that this is not Council's intention, and seek the suggested amendments to remedy the presumed drafting error.
- The Section 32 report lists on page 3 the additional situations where supplementary controls over and above those imposed by the HSNO Act or other statutes may be necessary including managing the effects of hazardous facilities on sensitive land uses and cumulative effects from multiple facilities. The purpose of the proposed policy in this suite is to manage adverse effects and risks but it has a significantly wider reach than that and is unmanageable in its present form. The proposed new policy 10.1.3 (b) provides the necessary policy support for the activity list approach for Rule 22.2.4.

Point Number

680.123

Summary of Decision Requested:

Delete Policy 10.1.4 (b) and (c) Reverse sensitivity effects:

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The purpose of proposed Policy 10.1.4 is to meet reverse sensitivity effects, however in the submitter's view, (b) is already addressed by Policy 10.1.2 (a)(i) and includes risk management issues which would be addressed under Policy 10.1.3.

Point Number

680.124

Summary of Decision Requested:

Amend Objective 10.2.1(a) Contaminated land, as follows:

(a) *The subdivision, use and development of contaminated land is managed to protect human health and the environment from unacceptable risk.*

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- It is important for the Objective to be clear about the issue which is trying to be addressed and what the plan seeks to achieve. In this case it is about protecting human health and the environment from unacceptable risk of harm caused by the subdivision, use and development of contaminated land.

Point Number

680.125

Summary of Decision Requested:

Add to Policy 10.2.2 Managing the use of contaminated land an advice note as follows:

Advice note: The status of some activities will be determined by the requirements of the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health Regulations 2011. Reference should be made to the Ministry of Environment website for a copy of these regulations, a user's guide, and documents incorporated by reference in these regulations.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter understands the purpose and intent of this policy and considers the planning approach which is predicated on land use change is appropriate.
- Soil tests upon sub-division and the already existing food standards testing allow for the identification of contaminated land when it has an effect on the public and as such there is no need for additional rules proposing tighter regulations for contaminated land or suspected contaminated land without there being a demonstrable effects-based need for these higher standards.
- It is not cost effective to deal with potential sites proactively, especially if there is no identified need, through either the food chain or land use change.
- For these reasons the submitter also supports the planning approach which seeks to avoid unnecessary duplication with the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health Regulations 2011 ('NES'). This approach is consistent with Implementation Method 14.4.1 of the Waikato Regional Policy Statement.
- Whilst the alignment approach is supported amendments are required to better 'signpost' this alignment within the chapter. This will ensure plan users are better informed and understand the rules framework which applies.

Point Number 680.126

Summary of Decision Requested: Retain the definition of "Agricultural and horticultural research activities" in Chapter 13: Definitions.

Decision Reasons:

- The submitter supports this definition.

Point Number 680.127

Summary of Decision Requested: Amend the definition of "Ancillary rural earthworks" in Chapter 13 Definitions, as follows:

(a) Means any earthworks or disturbance of soil associated with: cultivation, land preparation (including establishment of sediment and erosion control measures), for planting and growing operations of crops and pasture;

(b) harvesting of agricultural and horticultural crops (farming) and forests (forestry); and planting trees, removing trees and horticultural root ripping;

(c) maintenance and construction of facilities typically associated with farming and forestry activities, including, but not limited to, farm/forestry tracks, roads, vehicle manoeuvring areas and landings, stock marshalling yards, stock races, silage pits, offal pits, burying dead stock and plat waste, farm drains, farm effluent ponds, feeding pads, digging post holes, fencing and sediment control measures, drilling bores, installing and maintaining services such as water pipes and troughs, off-stream farm water storage dams, hard stand areas for stock, fertiliser storage pads, airstrips and helipads.

(d) Farm quarries where quarry winnings are only used within the farm site

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The definition of *Ancillary Rural Earthworks* should be congruent with a resource management policy framework which seeks to enable primary production in rural areas, and that it should be as clear as possible. The activities included in the submission point clearly be contemplated, including within any related definition.
- Off-stream farm water storage dams for stock and domestic water storage are commonplace on many farms.
- Farm quarries are certainly part of normal day to day farming operation and shouldn't need resource consent. Other district plans make allowance for permitted farm quarries at a scale which is appropriate in the context of the wide open spaces of the rural environment.

Point Number 680.128

Summary of Decision Requested: Retain the definition of "Animal feed lot" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The submitter supports this definition and exemptions.

Point Number 680.129

Summary of Decision Requested: Amend the definition of "Boarding, breeding or animal training establishment" in Chapter 13 Definitions, as follows:

Means an activity carried out on land or within buildings where board and lodging, breeding and training is provided or intended to be provided for more than five animals (excluding offspring up to 3 months of age). This does not include dog kennels, calf rearing ~~sheds~~, stables, ~~and~~ or similar ~~activities shelters~~ for private farming uses, and activities defined as Agricultural and horticultural research activities and Agricultural research centres.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The submitter supports the exemptions included in this definition but considers the amendment as proposed is necessary to ensure that there is no confusion or uncertainty created when the rules framework is applied.

Point Number 680.130

Summary of Decision Requested: Add a new definition for "Boundary Adjustment" to Chapter 13: Definitions as follows:

Boundary adjustment – means a subdivision of adjoining allotments to adjust the position of boundaries, in a manner that produces the same number of allotments.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter seeks a definition of *Boundary Adjustment*, in recognition that this is a valid form of reorganisation of land parcels, which is useful for supporting rationalisation of farm management.

Point Number 680.131

Summary of Decision Requested: Amend the definition of "Earthworks" in Chapter 13 Definitions, as follows:

Means modification of land surfaces by blading, contouring, ripping, moving, removing, placing or replacing soil or earth, or by excavation, or by cutting or filling operations, but does not include Ancillary Rural Earthworks.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The definition of *Earthworks* should clearly exclude *Ancillary Rural Earthworks*, lest the latter get needlessly caught up in a resource consent process which is triggered by the former.

Point Number 680.132

Summary of Decision Requested: **Amend** the definition of "Energy corridor" in Chapter 13 Definitions to ensure that it is the same, regardless of which format of the Proposed District Plan is being used.

Decision Reasons:

- Note that the definition of *Energy Corridor* is different on the two different formats of the plan uploaded on the Council website. It is assumed the electronic plan version contains an incorrect drafting error as it applies to *emergency generator*.

Point Number 680.133

Summary of Decision Requested: **Amend** the definition of "Extractive industry" in Chapter 13 Definitions, as follows:

Means taking, winning or extracting by whatever means, the naturally-occurring minerals (including but not limited to coal, rock, sand, and gravel) and peat from under or on the land surface, but does not include a Farm Quarry.

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- Farm quarries should be excluded from the definition of *Extractive Industry*, consistent with our relief sought in relation to the definition of *Ancillary Rural Earthworks*.

Point Number 680.134

Summary of Decision Requested: **Add** to the definition of "Farming" in Chapter 13 Definitions, a new clause (c) as follows:

(c) Ancillary Rural Earthworks

AND

Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- *Ancillary Rural Earthworks* should be included in the list of activities included in the definition of *Farming*, consistent with our relief sought in relation to the definition of *Ancillary Rural Earthworks*.

Point Number 680.135

Summary of Decision Requested: **Retain** the definition of "Farming noise" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The submitter supports the definition.

Point Number 680.136

Summary of Decision Requested: **Retain** the definition of "Farm quarry" in Chapter 13 Definitions, as notified.

Decision Reasons:

- The submitter supports this definition.

Point Number 680.137

Summary of Decision Requested: **Amend** the definition of "Functional need" in Chapter 13 Definitions, as follows:

~~*Means for Chapter 14 Infrastructure and Energy, the need for a proposal or activity to traverse, locate or operate in a particular environment because it can only occur in that environment for any number of reasons.*~~

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support this definition provided that the effect of this definition doesn't override the prerogative of landowners to refuse access to any member of the public or any network utility operator over private farmland.
- The definition has wider application than just Chapter 14 and may apply in certain circumstances to rural activities in and around waterbodies for example.

Point Number 680.138

Summary of Decision Requested: **Amend** definition the of "Homestay" in Chapter 13 Definitions, as follows:

Means accommodation provided to guests who pay a daily tariff to stay in accommodation where it is ancillary to the residential and farming activity on the site and where the host is a permanent resident on the site. This could be in a home with the permanent occupants of the household or in a separate building.

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The definition needs to be amended to better reflect current homestay trends and the nature of this activity. It provides for small scale diverse business opportunities within the rural zone which can help to sustain a vibrant rural community.

Point Number 680.139

Summary of Decision Requested: **Amend** the definition of "Hazardous facility" in Chapter 13 Definition as follows:
Means activities involving hazardous substances and premises at which these substances are used, stored or disposed of. Storage includes vehicles for their transport located at a facility for more than short periods of time. A Hazardous facility does not include:
(a) The incidental use and storage of Hazardous substances in domestic quantities; and
(b) Fuel contained in tanks of motor vehicles, agricultural and forestry equipment, boats and small engines; and,
(c) On farm milk and farm effluent storage and disposal; and
(d) Storage of superphosphate or lime or similar fertiliser in the Rural Zone; and
(e) Use and storage of agrichemicals covered by, and in accordance with New Zealand Standard 8409:2004 Management of Agrichemicals.
 AND
 Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- The definition as currently worded has the potential to capture a range of activities inappropriately.

Point Number 680.140

Summary of Decision Requested: **Amend** the definition of "Hazardous substance" in Chapter 13 Definitions, as follows:
Means any substance with hazardous properties, including radioactivity, high BOD (Biological Oxygen Demand) and those properties defined as hazardous for the purpose of the Hazardous Substances and New Organisms Act 1996.
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The definition should be consistent with the HSNO Act, any variation has the ability to cause confusion and unnecessary duplication.

Point Number 680.141

Summary of Decision Requested: **Retain** the definition of "Heritage item" in Chapter 13 Definitions, as notified.

Decision Reasons:

- Support is extended to the reference to Appendix 30.1 - it is important that these items are identified and scheduled accordingly.

Point Number 680.142

Summary of Decision Requested: **Retain** the definition of "High class soils" in Chapter 13 Definitions, as notified.

Decision Reasons:

- It is accepted that this definition describes what is commonly known as 'high class soils'.

Point Number 680.143

Summary of Decision Requested: **Delete** the definition of "High Natural Character Area" from Chapter 13 Definitions.
 AND
 Any consequential amendments needed to give effect to this relief.

Decision Reasons:

- This definition provides no purpose as there is no *High Natural Character Area* layer identified on the planning maps.

Point Number 680.144

Summary of Decision Requested: **Amend** Activity specific condition 14.10.1.6 (a)(ii) relating to P8 Small cell units exceeding the permitted volumetric dimension of 0.11m³ regulated in the NESTF, as follows:
(a) Small cell units exceeding the permitted volumetric dimension of 0.11m² regulated in the NESTF that comply with all of the following conditions
(ii) Are not located within an Identified Area, except within the Rural Zone, where small cell units are a permitted activity within any Identified Area; and...
 AND
 Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.10.1, provided that restrictions on telecommunication and radio communication equipment in the Rural Zone, that are aimed at managing visual amenity, are appropriate to reflect the wide-open space scale and rural amenity character of rural areas.
- It is not appropriate to impose the same degree of restriction on masts and aerials and the like in rural areas. In remote rural areas where internet connection is unavailable, farmers typically have need of farm telecommunication and radio communication equipment in order to augment the efficient and safe operation of farms.
- Imposing the same degree of constraint on masts and aerials in rural areas to that of urban areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional aerials and masts, which are arbitrarily constrained by way of inappropriately-scaled visual amenity criteria.
- If the Council is minded to permit co-located poles antennas and headframes at a permitted height of 30 metres in the Rural Zone, there is practically no visual difference between co-located devices and non-co-located devices mounted on poles up to 30 metres height in rural areas, and therefore the maximum permitted height should be simplified to 30 metres.

Point Number 680.145

Summary of Decision Requested:**Amend** Activity specific condition 14.10.1.7 relating to P9 Poles, antennas and headframes, as follows:*(a) Any poles and attached antenna that comply with the following conditions:**(i) Are not located within an Identified Area, except within the Rural Zone, where poles, antennas and headframes are a permitted activity within any Identified Area:*

...

(iv) Not exceed the height limits set out in the following table:

Zone	Permitted height
Rural, Country Living	25m (and 30m for colocation of at least two operators)

.....

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally supports Rule 14.10.1, provided that restrictions on telecommunication and radio communication equipment in the Rural Zone, that are aimed at managing visual amenity, are appropriate to reflect the wide-open space scale and rural amenity character of rural areas.
- It is not appropriate to impose the same degree of restriction on masts and aerials and the like in rural areas. In remote rural areas where internet connection is unavailable, farmers typically have need of farm telecommunication and radio communication equipment in order to augment the efficient and safe operation of farms.
- Imposing the same degree of constraint on masts and aerials in rural areas to that of urban areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional aerials and masts, which are arbitrarily constrained by way of inappropriately-scaled visual amenity criteria.
- If the Council is minded to permit co-located poles antennas and headframes at a permitted height of 30 metres in the Rural Zone, there is practically no visual difference between co-located devices and non-co-located devices mounted on poles up to 30 metres height in rural areas, and therefore the maximum permitted height should be simplified to 30 metres.

Point Number

680.146

Summary of Decision Requested:**Amend** Activity specific conditions 14.10.1.8 (a)(iv) relating to P10 Externally-mounted telecommunication satellite dishes and ancillary components, as follows:*(a) Externally-mounted telecommunication satellite dishes and ancillary components that comply with the following conditions:**(iv) Are not located within an Identified Area (except within the Rural Zone, where externally mounted telecommunication satellite dishes and earthpeaks are a permitted activity).*

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support Rule 14.10.1, provided that restrictions on telecommunication and radio communication equipment in the Rural Zone, that are aimed at managing visual amenity, are appropriate to reflect the wide-open space scale and rural amenity character of rural areas.
- It is not appropriate to impose the same degree of restriction on masts and aerials and the like in rural areas. In remote rural areas where internet connection is unavailable, farmers typically have need of farm telecommunication and radio communication equipment in order to augment the efficient and safe operation of farms.
- Imposing the same degree of constraint on masts and aerials in rural areas to that of urban areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional aerials and masts, which are arbitrarily constrained by way of inappropriately-scaled visual amenity criteria.
- If the Council is minded to permit co-located poles antennas and headframes at a permitted height of 30 metres in the Rural Zone, there is practically no visual difference between co-located devices and non-co-located devices mounted on poles up to 30 metres height in rural areas, and therefore the maximum permitted height should be simplified to 30 metres.

Point Number

680.147

Summary of Decision Requested:**Amend** Activity specific condition 14.10.1.12 (a)(i) relating to P14 Aerial telecommunication lines and associated support structures, including those not complying with regulations 41-42 of the NESTF, as follows:*Activity-specific conditions**14.10.1.12**(a) Aerial telecommunication lines...**(i) Do not exceed ~~2~~30m in height; and...*

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter conditionally support Rule 14.10.1, provided that restrictions on telecommunication and radio communication equipment in the Rural Zone, that are aimed at managing visual amenity, are appropriate to reflect the wide-open space scale and rural amenity character of rural areas.
- It is not appropriate to impose the same degree of restriction on masts and aerials and the like in rural areas. In remote rural areas where internet connection is unavailable, farmers typically have need of farm telecommunication and radio communication equipment in order to augment the efficient and safe operation of farms.
- Imposing the same degree of constraint on masts and aerials in rural areas to that of urban areas, unfairly penalises farmers who have to rely on such equipment, for what amounts to little or no environmental benefit. Efficiency and safety of farm operations can be compromised if farmers are required to have a high regulatory hurdle to overcome in order to be able to install practically-sized functional aerials and masts, which are arbitrarily constrained by way of inappropriately-scaled visual amenity criteria.
- If the Council is minded to permit co-located poles antennas and headframes at a permitted height of 30 metres in the Rural Zone, there is practically no visual difference between co-located devices and non-co-located devices mounted on poles up to 30 metres height in rural areas, and therefore the maximum permitted height should be simplified to 30 metres.

Point Number

680.148

Summary of Decision Requested:**Amend** Rule 14.10.3 (a)(ii) RD5 Restricted Discretionary Activities, as follows:*(a) Aerial telecommunication lines and...*

...

(ii) Are not located within an Identified Area (except within the Rural Zone, where aerial telecommunication lines and associated support structures complying with regulations 41-21 of the NESTF are a permitted activity within Identified Areas)...

AND

Any consequential changes needed to give effect to this relief.

Decision Reasons:

- The submitter opposes Rule 14.10.3 and submits that aerial telecommunication lines and associated support structures complying with regulations 41-21 of the NESTF should be a permitted activity within Identified Areas in the Rural Zone, for the same reasons as given in relation to the relief sought in respect of Rule 14.10.1.

Point Number

680.149
